

BESSIEGE

Introduction

1
00:00:11,749 --> 00:00:09,589
welcome to beseech it's an early access

2
00:00:16,460 --> 00:00:11,759
game on steam and you can play it on

3
00:00:19,340 --> 00:00:16,470
your Macintosh or your PC yes I don't

4
00:00:20,960 --> 00:00:19,350
I'm talking like a wizard but I should

5
00:00:22,939 --> 00:00:20,970
be talking like a Viking if I don't

6
00:00:26,150 --> 00:00:22,949
really know how Vikings talk I gave it

7
00:00:29,540 --> 00:00:26,160
my best shot uh here's me playing Samba

8
00:00:31,009 --> 00:00:29,550
sage is fun I hope you enjoy the

9
00:00:34,400 --> 00:00:31,019
gameplay please like the video and

10
00:00:38,799 --> 00:00:34,410
subscribe to the channel see you in the

11
00:00:42,410 --> 00:00:38,809
game bye so this is the menu for besiege

12
00:00:44,450 --> 00:00:42,420
there's a another world you can kind of

13
00:00:46,520 --> 00:00:44,460

look and rotate around since this is

14

00:00:49,190 --> 00:00:46,530

early access a lot of the the other

15

00:00:51,740 --> 00:00:49,200

lands that you can travel to aren't

16

00:00:54,290 --> 00:00:51,750

available so this is the one I'm plane

17

00:00:57,830 --> 00:00:54,300

and each one of these little plateaus is

18

00:01:01,369 --> 00:00:57,840

a different level and you start off

19

00:01:04,820 --> 00:01:01,379

really basic and kind of runs you

20

00:01:08,510 --> 00:01:04,830

through simpler levels so you build

21

00:01:10,789 --> 00:01:08,520

simple machines to actually learn how to

22

00:01:15,080 --> 00:01:10,799

play the game but imma jump into the

23

00:01:17,749 --> 00:01:15,090

Queen's fodder right here and so here it

24

00:01:23,130 --> 00:01:17,759

is this is the setup and this is your

25

00:01:32,219 --> 00:01:27,100

build it like Legos or erector sets and

26

00:01:34,779 --> 00:01:32,229

you use your right click to look around

27

00:01:37,020 --> 00:01:34,789

your canvas here and right now I'm just

28

00:01:42,490 --> 00:01:37,030

going to build like a quick little

29

00:01:44,320 --> 00:01:42,500

battling RAM and I don't know how this

30

00:01:47,350 --> 00:01:44,330

is going to work against these armies

31

00:01:49,870 --> 00:01:47,360

I'm trying to defeat these squads of

32

00:01:54,880 --> 00:01:49,880

cannon fodder the Queen sent out to stop

33

00:01:57,370 --> 00:01:54,890

me in my machines good luck and so these

34

00:02:03,460 --> 00:01:57,380

that menu down there to the left these

35

00:02:05,529 --> 00:02:03,470

are all for braces poles blocks to

36

00:02:07,510 --> 00:02:05,539

really build the frame of your device

37

00:02:12,940 --> 00:02:07,520

that you want and then the gears down

38

00:02:14,729 --> 00:02:12,950

here you use for locomotion and so I'm

39
00:02:19,270 --> 00:02:14,739
gonna put some powered wheels on here I

40
00:02:22,300 --> 00:02:19,280
like to have four powered wheels and you

41
00:02:25,210 --> 00:02:22,310
use your up arrow and back arrow to

42
00:02:28,810 --> 00:02:25,220
actually control is forward or backward

43
00:02:31,900 --> 00:02:28,820
momentum now this is not going to be a

44
00:02:34,150 --> 00:02:31,910
good enough vehicle to destroy this army

45
00:02:36,160 --> 00:02:34,160
but you have a weapon pallet down here

46
00:02:39,190 --> 00:02:36,170
and you also have an armor palette so i

47
00:02:41,080 --> 00:02:39,200
believe that i should actually create

48
00:02:43,750 --> 00:02:41,090
like a wall of armor but this is pretty

49
00:02:45,970 --> 00:02:43,760
wide and so maybe i should brace it I

50
00:02:47,800 --> 00:02:45,980
don't know we can zoom in with your your

51

00:02:51,339 --> 00:02:47,810

scroll wheel

52

00:02:54,400 --> 00:02:51,349

and let's see if I can brace some stuff

53

00:02:56,290 --> 00:02:54,410

let's a pic a brace right here and you

54

00:02:58,930 --> 00:02:56,300

drag it to the place you want to brace

55

00:03:02,770 --> 00:02:58,940

and so I got like a little brace there

56

00:03:05,130 --> 00:03:02,780

so to stabilize the little vehicle now

57

00:03:07,570 --> 00:03:05,140

which each one of these building blocks

58

00:03:11,979 --> 00:03:07,580

you put on this vehicle it makes it

59

00:03:14,080 --> 00:03:11,989

heavier and if you make it heavier it's

60

00:03:16,210 --> 00:03:14,090

harder to fly and there's there are

61

00:03:17,800 --> 00:03:16,220

elements to make your machine lighter

62

00:03:21,789 --> 00:03:17,810

you can have balloons which I'll show

63

00:03:23,320 --> 00:03:21,799

you and so you really have to account

64

00:03:27,840 --> 00:03:23,330

for all the different things that you

65

00:03:32,020 --> 00:03:27,850

build on your machine for the goal of

66

00:03:33,430 --> 00:03:32,030

that particular level and so since I

67

00:03:36,390 --> 00:03:33,440

don't have to fly anywhere I just really

68

00:03:39,759 --> 00:03:36,400

need to destroy these these people I

69

00:03:44,650 --> 00:03:39,769

mind can be as heavy as it needs to be

70

00:03:54,280 --> 00:03:44,660

and so lyssa build like a little like

71

00:03:55,810 --> 00:03:54,290

front wall and price it you know I don't

72

00:03:59,650 --> 00:03:55,820

really know I'm just kind of like going

73

00:04:02,280 --> 00:03:59,660

along and guessing where the stuff would

74

00:04:06,069 --> 00:04:02,290

go i'm not sure i was going to perform

75

00:04:09,309 --> 00:04:06,079

and see here but i do need to add some

76
00:04:11,800 --> 00:04:09,319
weapons i'm going to need to add some

77
00:04:15,220 --> 00:04:11,810
weapons and so what kind of weapons we

78
00:04:18,909 --> 00:04:15,230
would like to add well they're men they

79
00:04:21,159 --> 00:04:18,919
have some armor on and so i've never

80
00:04:23,650 --> 00:04:21,169
used a circular saw before so that this

81
00:04:25,870 --> 00:04:23,660
might be kind of fun and so where can I

82
00:04:28,270 --> 00:04:25,880
put these circular saw oh wow right

83
00:04:31,240 --> 00:04:28,280
there that's awesome so maybe they can

84
00:04:32,770 --> 00:04:31,250
be funneled in let's let's try that so

85
00:04:35,290 --> 00:04:32,780
how do i use the circular saw maybe it's

86
00:04:38,409 --> 00:04:35,300
this forever running and put one on back

87
00:04:43,000 --> 00:04:38,419
and what the hell let's add some flame

88
00:04:48,040 --> 00:04:43,010

flame throwers on this thing and have

89

00:04:50,200 --> 00:04:48,050

them placed the front and let's just uh

90

00:04:52,650 --> 00:04:50,210

have them come on this side as well and

91

00:04:55,830 --> 00:04:52,660

so these will this light up

92

00:04:59,130 --> 00:04:55,840

if anybody tries to approach me so let's

93

00:05:03,240 --> 00:04:59,140

uh let's see how this functions let's

94

00:05:07,560 --> 00:05:03,250

get a good camera angle and you press

95

00:05:10,980 --> 00:05:07,570

play and I think okay so I gotta press

96

00:05:12,780 --> 00:05:10,990

the Y button to activate my flame

97

00:05:15,750 --> 00:05:12,790

throwers and has these people i'm

98

00:05:17,780 --> 00:05:15,760

assuming are gonna charge me so let's

99

00:05:21,120 --> 00:05:17,790

keep that in mind I'm gonna roll back

100

00:05:24,650 --> 00:05:21,130

hopefully they'll advance and i'll light

101
00:05:28,950 --> 00:05:24,660
them up with some flames now here we go

102
00:05:35,300 --> 00:05:28,960
roll back and so they're chasing oh god

103
00:05:45,120 --> 00:05:39,990
that get them all they're on fire my

104
00:05:47,280 --> 00:05:45,130
machine died but I passed I passed my

105
00:05:49,590 --> 00:05:47,290
success I think I need to get ninety

106
00:05:51,930 --> 00:05:49,600
percent of them but I 16s I can go to

107
00:05:57,360 --> 00:05:51,940
the next zone that was actually pretty

108
00:06:01,020 --> 00:05:57,370
cool little improv my machine failed but

109
00:06:03,600 --> 00:06:01,030
I my machine didn't fail it didn't

110
00:06:05,070 --> 00:06:03,610
survive that that wave but I think I

111
00:06:08,840 --> 00:06:05,080
killed them all look I'm still spinning

112
00:06:11,159 --> 00:06:08,850
down there it's going to stop this and

113
00:06:13,830 --> 00:06:11,169

I'll load in what's great you can

114

00:06:17,520 --> 00:06:13,840

actually save these machines and load

115

00:06:18,930 --> 00:06:17,530

them up on different levels that that

116

00:06:20,340 --> 00:06:18,940

you that you go to so if you've already

117

00:06:23,880 --> 00:06:20,350

had have like a really good like

118

00:06:27,380 --> 00:06:23,890

battering ram a catapult or my chainsaw

119

00:06:30,780 --> 00:06:27,390

flamer as a call this the chain flame

120

00:06:32,940 --> 00:06:30,790

you save it and use it later and as you

121

00:06:35,250 --> 00:06:32,950

load it you can also manipulate it tear

122

00:06:37,920 --> 00:06:35,260

down and see if you don't constantly

123

00:06:40,110 --> 00:06:37,930

have to start from square one every time

124

00:06:43,800 --> 00:06:40,120

you go to level in fact if I advance on

125

00:06:46,770 --> 00:06:43,810

to the next zone it will bring this this

126
00:06:49,170 --> 00:06:46,780
machine with me but let's load up one of

127
00:06:52,740 --> 00:06:49,180
my goofier machines and see how it does

128
00:06:54,330 --> 00:06:52,750
so this is the balloon of the death I'm

129
00:06:57,140 --> 00:06:54,340
gonna see how this actually performs

130
00:07:00,090 --> 00:06:57,150
against this now this thing is over

131
00:07:03,810 --> 00:07:00,100
built overweight I don't even know if i

132
00:07:05,610 --> 00:07:03,820
have a canon on this thing um it's

133
00:07:06,960 --> 00:07:05,620
pretty fun though look at this I don't

134
00:07:09,300 --> 00:07:06,970
know what its gonna do it's just so

135
00:07:11,430 --> 00:07:09,310
balloony it might not be able to do

136
00:07:19,529 --> 00:07:11,440
anything but let's uh let's see what

137
00:07:23,460 --> 00:07:19,539
kind of death I can bring go oh no I'm

138
00:07:25,500 --> 00:07:23,470

just running them over I'm gettin some

139

00:07:31,710 --> 00:07:25,510

lift off i'm gettin some lift off oh no

140

00:07:37,320 --> 00:07:31,720

oh my god i'm dead in the water i'm dead

141

00:07:41,240 --> 00:07:37,330

in the water no no I'm squashing people

142

00:07:45,029 --> 00:07:41,250

there we go oh my god no that army

143

00:07:50,130 --> 00:07:45,039

completely demolished me all right that

144

00:07:53,400 --> 00:07:50,140

one didn't work let's try my stupid

145

00:07:56,430 --> 00:07:53,410

flyer which I haven't been able to

146

00:08:00,029 --> 00:07:56,440

master flying at all you can jot build

147

00:08:03,960 --> 00:08:00,039

giant propellers and I would assume a

148

00:08:05,790 --> 00:08:03,970

helicopter type device I have mastered

149

00:08:08,040 --> 00:08:05,800

at yet i'm still getting the hang of

150

00:08:11,340 --> 00:08:08,050

this this is really has no weapons so

151

00:08:13,110 --> 00:08:11,350

I'm just hoping to really have these

152

00:08:17,719 --> 00:08:13,120

guys advance at me and I'll chop them up

153

00:08:17,729 --> 00:08:24,360

all right oh my god charge yes

154

00:08:33,000 --> 00:08:31,110

watch out oh no it kept completely it's

155

00:08:34,709 --> 00:08:33,010

still doing this job it's just kind of

156

00:08:44,250 --> 00:08:34,719

going on the zone I'm not controlling it

157

00:08:50,540 --> 00:08:44,260

anymore oh my lord I whoa did I get them

158

00:08:54,060 --> 00:08:50,550

all holy [h__h] yeah I think I did it I

159

00:08:56,160 --> 00:08:54,070

think I got a majority of enough well I

160

00:08:58,470 --> 00:08:56,170

didn't get those uh the archers back

161

00:09:01,590 --> 00:08:58,480

there but that's stupid device which you

162

00:09:06,450 --> 00:09:01,600

saw was completely not built for

163

00:09:08,820 --> 00:09:06,460

Destruction rolled around and managed to

164

00:09:12,060 --> 00:09:08,830

set off a mine that I didn't notice was

165

00:09:15,269 --> 00:09:12,070

there and take out everybody so let's uh

166

00:09:22,340 --> 00:09:15,279

let's see what the the next zone has for

167

00:09:25,290 --> 00:09:22,350

us let's see here umm marksman's pass

168

00:09:28,470 --> 00:09:25,300

let's see what happens over there can I

169

00:09:30,750 --> 00:09:28,480

not go over there okay maybe I can't it

170

00:09:32,579 --> 00:09:30,760

says I can I just lit up it's not read

171

00:09:36,210 --> 00:09:32,589

me that's a probably since it's early

172

00:09:38,130 --> 00:09:36,220

access maybe they should have this be

173

00:09:39,870 --> 00:09:38,140

red instead of blue because everything

174

00:09:43,110 --> 00:09:39,880

is blue so I don't know where I can and

175

00:09:46,110 --> 00:09:43,120

can't go because I'm only up to half way

176
00:09:47,699 --> 00:09:46,120
in the progression so I don't know maybe

177
00:09:50,040 --> 00:09:47,709
they should change that that that's my

178
00:09:55,530 --> 00:09:50,050
advice to the devs change it to red let

179
00:09:57,390 --> 00:09:55,540
me know where I can't go large lair peak

180
00:09:59,579 --> 00:09:57,400
I can't even go there middle an

181
00:10:05,280 --> 00:09:59,589
encampment let's go to the encampment

182
00:10:06,720 --> 00:10:05,290
see what happens oh so I'm up against it

183
00:10:09,690 --> 00:10:06,730
looks like I got a frontline I gotta

184
00:10:12,840 --> 00:10:09,700
defeat and I have some archers back

185
00:10:16,260 --> 00:10:12,850
there I doubt this stupid

186
00:10:19,630 --> 00:10:16,270
machine is going to do it but I do have

187
00:10:21,280 --> 00:10:19,640
a cannon wall that I'd like to show you

188
00:10:27,040 --> 00:10:21,290

here in a second let's but let's see

189

00:10:30,820 --> 00:10:27,050

what happens here I'm going going I'm

190

00:10:35,440 --> 00:10:30,830

going don't know I can't even turn it's

191

00:10:41,410 --> 00:10:35,450

just this is total chaos so let's go

192

00:10:43,900 --> 00:10:41,420

ahead and open up my cannon wall have no

193

00:10:46,090 --> 00:10:43,910

idea what this is gonna do so look at

194

00:10:49,150 --> 00:10:46,100

this I have I believe eight cans up

195

00:10:51,520 --> 00:10:49,160

front now can adjust fire straight and

196

00:10:54,490 --> 00:10:51,530

once you fire it once that's it you get

197

00:10:57,220 --> 00:10:54,500

one cannonball and with the amount of

198

00:10:59,200 --> 00:10:57,230

people here this might not work and

199

00:11:01,150 --> 00:10:59,210

these cannonballs don't actually have a

200

00:11:06,270 --> 00:11:01,160

good distance but let's give it a shot

201
00:11:08,770 --> 00:11:06,280
and then re-evaluate how I can improve

202
00:11:14,580 --> 00:11:08,780
this uh this cannon cuz it's pretty

203
00:11:21,540 --> 00:11:14,590
destructive so let's fire oh no did I

204
00:11:28,390 --> 00:11:21,550
didn't do it did some damage there we go

205
00:11:31,030 --> 00:11:28,400
this thing is a monster see this that's

206
00:11:33,340 --> 00:11:31,040
a good angle we can move up we can move

207
00:11:40,240 --> 00:11:33,350
back we can fire canyons and we can't

208
00:11:45,010 --> 00:11:40,250
fire flame here we go [h__\h] oh oh my

209
00:11:49,680 --> 00:11:45,020
god flav odd oh this thing it's so

210
00:11:52,150 --> 00:11:49,690
top-heavy it's a it's not practical

211
00:11:54,900 --> 00:11:52,160
lyssa hit him with the flames first and

212
00:12:00,539 --> 00:11:54,910
see what happens

213
00:12:06,249 --> 00:12:00,549

there we go flame on and fire cannons

214

00:12:08,319 --> 00:12:06,259

come on that did that not work all right

215

00:12:11,650 --> 00:12:08,329

let's try let's try and maybe I'm just

216

00:12:14,429 --> 00:12:11,660

not maneuvering good enough so let's try

217

00:12:21,159 --> 00:12:14,439

that again move up a little bit flame

218

00:12:29,829 --> 00:12:21,169

flame well if they have a can oh god

219

00:12:34,059 --> 00:12:29,839

damn damn I'll just two can I didn't see

220

00:12:36,779 --> 00:12:34,069

that other cannon on on that side so I

221

00:12:40,629 --> 00:12:36,789

really don't know how to get around that

222

00:12:42,729 --> 00:12:40,639

it's going to take far more trial and

223

00:12:45,159 --> 00:12:42,739

error than I anticipated I may have to

224

00:12:46,719 --> 00:12:45,169

build a totally new machine in fact I

225

00:12:50,710 --> 00:12:46,729

probably am gonna have to build a new

226

00:12:55,329 --> 00:12:50,720

machine one that can absorb cannon

227

00:12:59,829 --> 00:12:55,339

damage and do pinpoint kind of

228

00:13:08,489 --> 00:12:59,839

devastation so let's see if I can build

229

00:13:11,379 --> 00:13:08,499

a box the box of doom so here's the

230

00:13:16,239 --> 00:13:11,389

start the midway point I'm trying to try

231

00:13:22,449 --> 00:13:16,249

to build like a Borg cube in beseech my

232

00:13:27,150 --> 00:13:22,459

board cube that can do everything all

233

00:13:31,179 --> 00:13:27,160

right this is the Borg cube took a while

234

00:13:33,999 --> 00:13:31,189

as you can see I have a line of flame

235

00:13:36,519 --> 00:13:34,009

throwers up front directly center so

236

00:13:41,619 --> 00:13:36,529

when I turn using my wheels I'll be able

237

00:13:44,439 --> 00:13:41,629

to hopefully really articulate the

238

00:13:45,579 --> 00:13:44,449

aiming and be pinpoint with it I gotta

239

00:13:48,179 --> 00:13:45,589

take out two cannons so we'll see what

240

00:13:50,799 --> 00:13:48,189

happens i got ramp house I have turning

241

00:13:53,199 --> 00:13:50,809

buzz saws which I doubt is going to be

242

00:13:55,090 --> 00:13:53,209

useful i have blades that will slice and

243

00:13:58,119 --> 00:13:55,100

dice people but i doubt those will be

244

00:13:59,769 --> 00:13:58,129

useful as well but basically for

245

00:14:02,829 --> 00:13:59,779

cosmetic but i'm able to use these

246

00:14:04,869 --> 00:14:02,839

blades to knock down the McCanns so

247

00:14:07,340 --> 00:14:04,879

let's see what happens here this is

248

00:14:11,090 --> 00:14:07,350

going to be insane also i have four

249

00:14:15,700 --> 00:14:11,100

cannons up here for distance I have

250

00:14:19,690 --> 00:14:15,710

armor plating this thing is a god damn

251
00:14:26,930 --> 00:14:19,700
beast it's a war machine so let's see

252
00:14:31,870 --> 00:14:26,940
what happens praise praise the Viking

253
00:14:40,190 --> 00:14:31,880
Lords let us go into battle right now

254
00:14:45,020 --> 00:14:40,200
here we go it's mobile light it up flame

255
00:14:52,010 --> 00:14:45,030
on and I got to take out these goddamn

256
00:14:53,480 --> 00:14:52,020
cannons oh my god oh no oh no didn't do

257
00:14:56,600 --> 00:14:53,490
it I got to take out at least one more

258
00:15:00,650 --> 00:14:56,610
can I took out all the guys my buzz saw

259
00:15:03,800 --> 00:15:00,660
is going crazy let's try to aim for the

260
00:15:08,780 --> 00:15:03,810
cannon here we go here we go let's see

261
00:15:19,610 --> 00:15:08,790
them take out this cannon flame on crush

262
00:15:25,070 --> 00:15:19,620
the cannon oh my lord no no no no I Borg

263
00:15:28,400 --> 00:15:25,080

cube is insane Oh No maybe if I real

264

00:15:30,980 --> 00:15:28,410

quick here let's see if i can add take

265

00:15:35,110 --> 00:15:30,990

off the spinning or take out the blades

266

00:15:38,000 --> 00:15:35,120

and put them on to the wheels themselves

267

00:15:39,740 --> 00:15:38,010

to get some spinning blade action right

268

00:15:44,710 --> 00:15:39,750

there some spinning blade action

269

00:15:48,290 --> 00:15:44,720

possibly to take out the cannon and the

270

00:15:50,000 --> 00:15:48,300

the troops in a quicker fashion here we

271

00:15:58,730 --> 00:15:50,010

go let's see what happens here this is

272

00:16:07,740 --> 00:16:05,670

flame on oh come on [h__\h] maybe I

273

00:16:09,960 --> 00:16:07,750

should fire my cannon first fire

274

00:16:21,500 --> 00:16:09,970

mechanic here we go fire the cannons

275

00:16:25,980 --> 00:16:21,510

flame on turning oh come on do it do it

276

00:16:28,470 --> 00:16:25,990

no did I do it today they get ninety

277

00:16:32,270 --> 00:16:28,480

percent come on I spinning my spinning

278

00:16:36,270 --> 00:16:32,280

blader haters doing some damage still oh

279

00:16:40,590 --> 00:16:36,280

come on they're freaking out over there

280

00:16:45,060 --> 00:16:40,600

that wasn't ninety percent ah one more

281

00:16:48,630 --> 00:16:45,070

time one more time here we go I'm gonna

282

00:16:52,380 --> 00:16:48,640

roll back and then to the left roll back

283

00:16:55,590 --> 00:16:52,390

to the left back into the left and the

284

00:17:04,610 --> 00:16:55,600

fire those candidates roll back cannon

285

00:17:10,080 --> 00:17:04,620

fire flame on crust come on let's do it

286

00:17:12,600 --> 00:17:10,090

come on now am I in I should add more uh

287

00:17:15,320 --> 00:17:12,610

more buzz saws those things are doing

288

00:17:18,480 --> 00:17:15,330

some damage so when my thing falls apart

289

00:17:20,490 --> 00:17:18,490

the buzz saws keep going let's do that

290

00:17:22,410 --> 00:17:20,500

let's buzz saw lit up real quick I

291

00:17:30,359 --> 00:17:22,420

apologize for saying that was the last

292

00:17:38,080 --> 00:17:36,700

buzzsaw buzzsaw buzz saw buzzsaw I'm

293

00:17:41,950 --> 00:17:38,090

just kind of haphazardly putting these

294

00:17:44,970 --> 00:17:41,960

buzz saws on here I just want them to do

295

00:17:50,649 --> 00:17:44,980

their thing when this thing flies apart

296

00:17:53,159 --> 00:17:50,659

which will happen Plus saw all right I

297

00:18:00,669 --> 00:17:53,169

don't know puzzles kind of anymore

298

00:18:08,830 --> 00:18:00,679

what's what happens roll back fire

299

00:18:19,899 --> 00:18:08,840

cannons BAM flame on oh no flame on oh

300

00:18:24,519 --> 00:18:19,909

my god oh my lord I gotta charge I gotta

301
00:18:28,049 --> 00:18:24,529
charge more one more time god damn it up

302
00:18:31,479 --> 00:18:28,059
this game's addictive you can't tell so

303
00:18:35,109 --> 00:18:31,489
drop fire control back fire cannons go

304
00:18:41,560 --> 00:18:35,119
to the left a little bit all right fire

305
00:18:47,950 --> 00:18:41,570
cannons get it roller left roll around

306
00:18:53,200 --> 00:18:47,960
come on goddamn it stop didn't work fire

307
00:18:58,450 --> 00:18:53,210
cannons oh there we go I'm getting in

308
00:18:59,950 --> 00:18:58,460
the mix in the mix let my bus laws do

309
00:19:09,190 --> 00:18:59,960
their things they're twisting and

310
00:19:12,269 --> 00:19:09,200
turning yes damn it take it hun %

311
00:19:16,720 --> 00:19:12,279
damn alright black shoes 142

312
00:19:18,610 --> 00:19:16,730
over-engineered but damn I was fun and

313
00:19:20,110 --> 00:19:18,620

that Borg cube has a lot of potential

314

00:19:22,090 --> 00:19:20,120

it's basically just a platform that you

315

00:19:24,539 --> 00:19:22,100

can have any weapons to it doesn't

316

00:19:27,399 --> 00:19:24,549

survive as you saw when I turned on the

317

00:19:29,350 --> 00:19:27,409

flamethrowers the whole entire structure

318

00:19:32,710 --> 00:19:29,360

just went up in flames I wasn't being

319

00:19:34,389 --> 00:19:32,720

bombarded with with too much stuff the

320

00:19:36,789 --> 00:19:34,399

thing just kind of collapse on its own

321

00:19:39,909 --> 00:19:36,799

weight the structural integrity of that

322

00:19:43,360 --> 00:19:39,919

is is very minimal well that's it that's

323

00:19:45,430 --> 00:19:43,370

besieged guys I hope you enjoyed um the

324

00:19:49,149 --> 00:19:45,440

total chaos and destruction is very

325

00:19:50,740 --> 00:19:49,159

bloody it's fun it's on steam thanks for
