

# The Katanga

SNARKIE

1  
00:00:15,340 --> 00:00:12,620  
though hello here we are again back with

2  
00:00:20,060 --> 00:00:15,350  
the monster and this time it's about the

3  
00:00:22,460 --> 00:00:20,070  
Katanga snake Jeff it's called monsters

4  
00:00:26,570 --> 00:00:22,470  
talking about the whole crap sorry yeah

5  
00:00:27,550 --> 00:00:26,580  
[h\_\_h] back again with monsters talking

6  
00:00:31,490 --> 00:00:27,560  
about them

7  
00:00:33,920 --> 00:00:31,500  
the Katanga snake it was no this is more

8  
00:00:35,990 --> 00:00:33,930  
of a more kind of didn't more realistic

9  
00:00:37,040 --> 00:00:36,000  
kind of one that has more of a plausible

10  
00:00:38,209 --> 00:00:37,050  
explanation but I think it's getting

11  
00:00:39,799 --> 00:00:38,219  
them to less cuz there's actually a

12  
00:00:44,450 --> 00:00:39,809  
photograph and I have a video that we

13  
00:00:48,200 --> 00:00:44,460

can play here about the actual the pilot

14

00:00:50,000 --> 00:00:48,210

who saw it most stupendous so I will

15

00:00:53,510 --> 00:00:50,010

fire that I did I'll do that

16

00:00:55,639 --> 00:00:53,520

halfway through but anyways so this

17

00:00:56,209 --> 00:00:55,649

alleged large snake was sighted by a

18

00:00:59,569 --> 00:00:56,219

colonel

19

00:01:02,599 --> 00:00:59,579

Remy von leader de he was a Belgian

20

00:01:04,189 --> 00:01:02,609

pilot who served during World War two in

21

00:01:06,230 --> 00:01:04,199

the Belgian and British air forces and

22

00:01:08,270 --> 00:01:06,240

he apparently has a quite now seeing uh

23

00:01:10,730 --> 00:01:08,280

flight records he had escaped from a

24

00:01:12,320 --> 00:01:10,740

German prisoner of war camp and made to

25

00:01:15,380 --> 00:01:12,330

the British and became a member of Royal

26

00:01:17,510 --> 00:01:15,390

Air Force and he was promoted along that

27

00:01:19,039 --> 00:01:17,520

way and he became a deputy chief of

28

00:01:20,359 --> 00:01:19,049

staff to the Minister of Defence in

29

00:01:23,149 --> 00:01:20,369

Britain I guess this is building him as

30

00:01:24,770 --> 00:01:23,159

a character witnesses a lot of them try

31

00:01:28,760 --> 00:01:24,780

to describe and he's considered World

32

00:01:31,880 --> 00:01:28,770

War two your own flying ace and in 1959

33

00:01:33,980 --> 00:01:31,890

when this nico cited he was a safer Kurt

34

00:01:35,749 --> 00:01:33,990

but it's a full colonel which is this

35

00:01:38,420 --> 00:01:35,759

rank reg the colonel he commanded the

36

00:01:40,310 --> 00:01:38,430

air base in kameena in the Belgian Congo

37

00:01:41,749 --> 00:01:40,320

and while returning from mission by

38

00:01:43,429 --> 00:01:41,759

helicopter he'd encountered a giant

39

00:01:45,639 --> 00:01:43,439

snake emerging from Mahal as he flew

40

00:01:48,080 --> 00:01:45,649

over the forest the jungle in the Congo

41

00:01:50,960 --> 00:01:48,090

he described the snake as being close to

42

00:01:53,300 --> 00:01:50,970

50 feet or 50 or about 15 meters long l

43

00:01:54,710 --> 00:01:53,310

had he made several passes of the snake

44

00:01:56,330 --> 00:01:54,720

at a lower altitude in order to allow

45

00:01:58,670 --> 00:01:56,340

another person on board with him to

46

00:02:00,020 --> 00:01:58,680

photograph the creature the snake rose

47

00:02:02,240 --> 00:02:00,030

up approximately ten feet off the ground

48

00:02:03,440 --> 00:02:02,250

from what he could estimate giving the

49

00:02:05,780 --> 00:02:03,450

impression that would have attacked the

50

00:02:07,819 --> 00:02:05,790

helicopter had it flown lower within it

51  
00:02:10,309 --> 00:02:07,829  
striking range you later described the

52  
00:02:13,490 --> 00:02:10,319  
snake as a dark shade of green so it did

53  
00:02:16,830 --> 00:02:14,760  
again

54  
00:02:19,830 --> 00:02:16,840  
correct correct Alex did have green skin

55  
00:02:21,690 --> 00:02:19,840  
with some brown and I had a white kind

56  
00:02:24,330 --> 00:02:21,700  
of cream-colored underbelly like how

57  
00:02:26,340 --> 00:02:24,340  
snakes have different colors of them in

58  
00:02:27,990 --> 00:02:26,350  
the belly of the snakes it was about

59  
00:02:31,560 --> 00:02:28,000  
three feet wide so that's a big [\h\_\_\h]

60  
00:02:33,180 --> 00:02:31,570  
snake 50 feet long has it said its jaws

61  
00:02:34,890 --> 00:02:33,190  
were too triangle shaped kind of like a

62  
00:02:36,990 --> 00:02:34,900  
Viper how the drive you have a normal

63  
00:02:38,550 --> 00:02:37,000

snake kind of has like a tube rounded

64

00:02:40,500 --> 00:02:38,560

conehead but like you think of a

65

00:02:44,729 --> 00:02:40,510

rattlesnake or Vipers they'd be

66

00:02:50,160 --> 00:02:44,739

triangular heads so here I'm going to

67

00:02:53,130 --> 00:02:50,170

play his yes testimony er Oh to make

68

00:02:55,890 --> 00:02:53,140

several passes over the hood where the

69

00:02:57,750 --> 00:02:55,900

snake was he been able to let the man

70

00:03:00,930 --> 00:02:57,760

take a picture of it and I made

71

00:03:03,540 --> 00:03:00,940

certainly between four and six passes

72

00:03:06,270 --> 00:03:03,550

right over the hood where the snake was

73

00:03:09,680 --> 00:03:06,280

in by then I was already fine for 25

74

00:03:13,680 --> 00:03:09,690

years I have a very good experience of

75

00:03:16,800 --> 00:03:13,690

measuring things and I would see the

76

00:03:19,259 --> 00:03:16,810

snake I saw there was close to 50 foot

77

00:03:22,170 --> 00:03:19,269

close to 50 feet I don't know you say 50

78

00:03:25,890 --> 00:03:22,180

foot or 50 feet but very close to

79

00:03:31,280 --> 00:03:25,900

certainly and it was moving inside the

80

00:03:36,120 --> 00:03:31,290

hole and looking very dark green the

81

00:03:37,949 --> 00:03:36,130

green brown with his valley-wide now

82

00:03:41,640 --> 00:03:37,959

when I came down on that snake in his

83

00:03:45,690 --> 00:03:41,650

own and I would see at about 25 30 foot

84

00:03:48,620 --> 00:03:45,700

up the snake raised up by about I would

85

00:03:51,810 --> 00:03:48,630

say 10 foot and I could very clearly

86

00:03:53,250 --> 00:03:51,820

closely see the app which was looking in

87

00:03:57,180 --> 00:03:53,260

a could not come bigger better

88

00:03:59,490 --> 00:03:57,190

comparisons with a very large horse with

89

00:04:02,190 --> 00:03:59,500

big very very big jobs looking

90

00:04:04,949 --> 00:04:02,200

triangular and you just standing up like

91

00:04:07,470 --> 00:04:04,959

that to me and I I feel and I'm

92

00:04:10,560 --> 00:04:07,480

convinced if it activates the eye fire

93

00:04:12,840 --> 00:04:10,570

being in its range it would have struck

94

00:04:17,099 --> 00:04:12,850

at me would have been striking me and

95

00:04:19,979 --> 00:04:17,109

yet I would say oh certainly at least at

96

00:04:22,740 --> 00:04:19,989

least on the valley two foot wide and 3

97

00:04:23,890 --> 00:04:22,750

feet long it could have easily eaten up

98

00:04:26,980 --> 00:04:23,900

a man

99

00:04:29,920 --> 00:04:26,990

this is one of those rare Oh just going

100

00:04:31,840 --> 00:04:29,930

French oh he's Belgian but they have a

101  
00:04:34,090 --> 00:04:31,850  
there's two regions buttons kind of

102  
00:04:37,689 --> 00:04:34,100  
Dutch and what one's French so yes he

103  
00:04:39,939 --> 00:04:37,699  
can be home but uh the clip came from

104  
00:04:43,240 --> 00:04:39,949  
Archer the arthur c-- clark mysterious

105  
00:04:48,040 --> 00:04:43,250  
world wow this sounds interesting is

106  
00:04:50,320 --> 00:04:48,050  
that a TV show or some movie series was

107  
00:04:52,060 --> 00:04:50,330  
a series about Archie Clark

108  
00:04:57,129 --> 00:04:52,070  
investigating mysterious things across I

109  
00:04:58,780 --> 00:04:57,139  
think it was TV play not a play okay but

110  
00:05:00,010 --> 00:04:58,790  
uh yeah he so he was I guess I'm gonna

111  
00:05:03,040 --> 00:05:00,020  
try to get earlier is that he's very

112  
00:05:05,290 --> 00:05:03,050  
skilled pilot in a World War two so he

113  
00:05:08,320 --> 00:05:05,300

was good at estimating like distances

114

00:05:10,510 --> 00:05:08,330

and I guess sizes of objects from having

115

00:05:11,920 --> 00:05:10,520

to tak them from the air so his

116

00:05:14,080 --> 00:05:11,930

estimates for the size of snake are

117

00:05:16,390 --> 00:05:14,090

probably accurate and what were their

118

00:05:19,510 --> 00:05:16,400

estimates again about fifty feet long

119

00:05:21,250 --> 00:05:19,520

two to three feet wide and girth that's

120

00:05:24,250 --> 00:05:21,260

a serpent dude that's almost that's a

121

00:05:28,840 --> 00:05:24,260

that's a big goddamn snake it's a

122

00:05:30,400 --> 00:05:28,850

billion so multiple experts aims it all

123

00:05:32,290 --> 00:05:30,410

just apparently analyzed several of the

124

00:05:34,360 --> 00:05:32,300

pictures that were taken from the giant

125

00:05:36,520 --> 00:05:34,370

Congo a snake and and verified them as

126

00:05:37,779 --> 00:05:36,530

the pictures were authentic and they

127

00:05:40,180 --> 00:05:37,789

said the verified of the certain the

128

00:05:42,040 --> 00:05:40,190

size of the snake by comparison and

129

00:05:44,500 --> 00:05:42,050

analysis the ground features around the

130

00:05:45,909 --> 00:05:44,510

snake so they believe that given the

131

00:05:48,550 --> 00:05:45,919

ground features in the photograph that

132

00:05:53,050 --> 00:05:48,560

his description of the length and width

133

00:05:55,330 --> 00:05:53,060

the snake is approximately accurate so

134

00:05:56,710 --> 00:05:55,340

according to Colonel Lear de his report

135

00:05:59,020 --> 00:05:56,720

when he lowered the helicopter has every

136

00:06:00,460 --> 00:05:59,030

kind of rephrase or rehash this for a

137

00:06:01,960 --> 00:06:00,470

closer look at the snake it raised up

138

00:06:03,339 --> 00:06:01,970

about ten feet and looked as if it were

139

00:06:05,529 --> 00:06:03,349

going to strike the helicopter flew any

140

00:06:07,570 --> 00:06:05,539

closer but it's able to get a good view

141

00:06:09,370 --> 00:06:07,580

because it was not within range and this

142

00:06:13,150 --> 00:06:09,380

really kind of monitors of how an

143

00:06:14,529 --> 00:06:13,160

anaconda would attack now in a condoms

144

00:06:17,170 --> 00:06:14,539

which are probably the most closely

145

00:06:19,779 --> 00:06:17,180

related to something called a titanoboa

146

00:06:21,159 --> 00:06:19,789

it was a giant prehistoric snake that's

147

00:06:22,839 --> 00:06:21,169

believed to be extinct but it's a

148

00:06:24,909 --> 00:06:22,849

similar snake to what you've seen in the

149

00:06:27,450 --> 00:06:24,919

photo and something's kind of most

150

00:06:32,020 --> 00:06:27,460

closely related to modern anaconda and

151  
00:06:34,300 --> 00:06:32,030  
the anacondas have been documented to

152  
00:06:36,700 --> 00:06:34,310  
raise up to six to seven feet to strike

153  
00:06:38,260 --> 00:06:36,710  
and attack their prey so imagine seeing

154  
00:06:40,270 --> 00:06:38,270  
a snake in as younger

155  
00:06:42,070 --> 00:06:40,280  
a foot higher than you and bite you in

156  
00:06:45,280 --> 00:06:42,080  
the head you had to be pretty goddamn

157  
00:06:49,690 --> 00:06:45,290  
scary could be the size of basketball

158  
00:06:51,640 --> 00:06:49,700  
rim but that's all punched best making

159  
00:06:53,980 --> 00:06:51,650  
the jig and Blazing Saddles the guy

160  
00:06:58,330 --> 00:06:53,990  
punched horse in the face let's knock it

161  
00:06:59,920 --> 00:06:58,340  
out punch that damn thing bucket so yeah

162  
00:07:03,970 --> 00:06:59,930  
the anaconda is a biggest snake that we

163  
00:07:06,790 --> 00:07:03,980

have no dodging in the world please that

164

00:07:10,510 --> 00:07:06,800

weighed up to 550 pounds or more and

165

00:07:11,590 --> 00:07:10,520

they usually top out a bigger normal

166

00:07:13,780 --> 00:07:11,600

bigger ones are a few hundred pounds of

167

00:07:17,020 --> 00:07:13,790

the biggest document Italy is over 550

168

00:07:18,220 --> 00:07:17,030

pounds and about a foot in diameter I'll

169

00:07:21,370 --> 00:07:18,230

fight that thing I'll put in the

170

00:07:23,140 --> 00:07:21,380

headlock give it a huggy raise your fist

171

00:07:25,690 --> 00:07:23,150

huh I'm gonna coming up I'm gonna fire

172

00:07:29,800 --> 00:07:25,700

slam it just like a Hulk Hogan did it

173

00:07:32,830 --> 00:07:29,810

the you know on to Wrestlemania 3 Andre

174

00:07:34,630 --> 00:07:32,840

John I think that was the one yeah

175

00:07:37,300 --> 00:07:34,640

that's the one I said put up your dukes

176

00:07:40,150 --> 00:07:37,310

he said you didn't have any arm brother

177

00:07:44,140 --> 00:07:40,160

yeah I'm give that thing a power driving

178

00:07:47,350 --> 00:07:44,150

there DDT I fight snakes big ones

179

00:07:52,510 --> 00:07:47,360

snake fighter mr. general coming Susan

180

00:07:54,790 --> 00:07:52,520

snake fighter to the best one but so for

181

00:07:56,320 --> 00:07:54,800

about four for more than a hundred years

182

00:07:59,350 --> 00:07:56,330

explorers and natives in the Amazon

183

00:08:02,440 --> 00:07:59,360

River Basin have reported the sea snakes

184

00:08:04,390 --> 00:08:02,450

that between 1550 feet long with weights

185

00:08:06,580 --> 00:08:04,400

as extreme as they estimate to be five

186

00:08:08,500 --> 00:08:06,590

tons and the most famous account of a

187

00:08:11,050 --> 00:08:08,510

tiny anaconda involved British explorer

188

00:08:14,440 --> 00:08:11,060

Percy Fawcett who reportedly killed and

189

00:08:17,200 --> 00:08:14,450

measured a 62 foot anaconda and his

190

00:08:19,750 --> 00:08:17,210

account goes thus we were drifting

191

00:08:22,810 --> 00:08:19,760

easily along the sluggish current not

192

00:08:26,950 --> 00:08:22,820

far below the confluence of a of T Gore

193

00:08:29,800 --> 00:08:26,960

and the Rio Negro when almost under the

194

00:08:31,990 --> 00:08:29,810

valve of almost under the bow there

195

00:08:35,560 --> 00:08:32,000

appeared a triangular head in several

196

00:08:37,959 --> 00:08:35,570

feet of undulating body is a giant

197

00:08:40,270 --> 00:08:37,969

anaconda I sprang for my rifle as the

198

00:08:41,800 --> 00:08:40,280

creature began to make its way up the

199

00:08:43,839 --> 00:08:41,810

bank I get away from the boat through

200

00:08:45,970 --> 00:08:43,849

the river ain't hardly waiting to in

201  
00:08:49,510 --> 00:08:45,980  
aimed and smashed a 44 soften those

202  
00:08:51,430 --> 00:08:49,520  
bullet into the spine ten feet below the

203  
00:08:53,950 --> 00:08:51,440  
wicked head so he shot it in the spa

204  
00:08:56,020 --> 00:08:53,960  
about ten feet below its head and once

205  
00:08:57,870 --> 00:08:56,030  
there was a flurry of foam and several

206  
00:08:59,860 --> 00:08:57,880  
heaving thumps against the boats keel

207  
00:09:04,240 --> 00:08:59,870  
shakiness of though they had run a

208  
00:09:07,180 --> 00:09:04,250  
ground so apparently you're breaking up

209  
00:09:08,560 --> 00:09:07,190  
a bit you're uh you're getting staticky

210  
00:09:10,120 --> 00:09:08,570  
every now and again they turn the

211  
00:09:13,180 --> 00:09:10,130  
outbound off right now

212  
00:09:14,830 --> 00:09:13,190  
so hopefully that fixes it so what

213  
00:09:17,050 --> 00:09:14,840

happened he shot the anaconda about ten

214

00:09:19,150 --> 00:09:17,060

feet below its head in the spine it

215

00:09:23,320 --> 00:09:19,160

thrashed about if the boats are hard I

216

00:09:27,220 --> 00:09:23,330

made him think they hit land interesting

217

00:09:30,220 --> 00:09:27,230

so these are sir I'm getting I don't

218

00:09:32,200 --> 00:09:30,230

think I'm doing that I don't know what's

219

00:09:35,020 --> 00:09:32,210

so can we go clear Skype and call back

220

00:09:37,090 --> 00:09:35,030

in what I was going to ask about these

221

00:09:39,370 --> 00:09:37,100

giant snakes is that they appear not

222

00:09:41,880 --> 00:09:39,380

only to be capable of living and going

223

00:09:43,570 --> 00:09:41,890

on land but also drilling into water

224

00:09:49,240 --> 00:09:43,580

correct and some of the stuff that I

225

00:09:50,680 --> 00:09:49,250

read that just - for them to sustain in

226

00:09:52,390 --> 00:09:50,690

support their mass and they have to

227

00:09:54,910 --> 00:09:52,400

spend a lot of the time going through

228

00:09:56,620 --> 00:09:54,920

the water because of how [h\_\_h] huge

229

00:10:00,070 --> 00:09:56,630

there and hammers a way for their other

230

00:10:02,260 --> 00:10:00,080

shape is there's got a big meat tube for

231

00:10:03,130 --> 00:10:02,270

a lack of a better term with ribs on it

232

00:10:07,570 --> 00:10:03,140

mm-hmm

233

00:10:09,250 --> 00:10:07,580

meat - that's pretty hot so this also

234

00:10:11,890 --> 00:10:09,260

brought me to another thing I'd heard of

235

00:10:14,770 --> 00:10:11,900

which kind of gives rise or gives

236

00:10:17,050 --> 00:10:14,780

credence to a theory of the extinct

237

00:10:18,700 --> 00:10:17,060

creatures kind of still being around in

238

00:10:21,010 --> 00:10:18,710

this world or possible sightings of them

239

00:10:24,570 --> 00:10:21,020

it was called Mo Kelly

240

00:10:27,430 --> 00:10:24,580

mmm Bay also out of Africa and the

241

00:10:29,110 --> 00:10:27,440

allegedly from the Belgian or now what

242

00:10:32,170 --> 00:10:29,120

we know is the Democratic Republic of

243

00:10:36,180 --> 00:10:32,180

the Congo I think it's called now we're

244

00:10:38,560 --> 00:10:36,190

gonna talk about dinosaurs it is yes

245

00:10:42,280 --> 00:10:38,570

it's allegedly a dinosaur species that

246

00:10:45,220 --> 00:10:42,290

still inhabits the Congo region Daniel

247

00:10:47,829 --> 00:10:45,230

Loxton in a Donald Prothero authors of

248

00:10:49,720 --> 00:10:47,839

the abominable science origins of the

249

00:10:53,140 --> 00:10:49,730

Yeti Nessie and other famous cryptids

250

00:10:55,480 --> 00:10:53,150

research Samoa came Bhum Bhum Bay and

251  
00:10:57,550 --> 00:10:55,490  
depth and they note that though members

252  
00:10:59,440 --> 00:10:57,560  
of the enormous beasts hidden in the

253  
00:11:02,210 --> 00:10:59,450  
Congo region date back to at least the

254  
00:11:04,040 --> 00:11:02,220  
sixteenth centuries within the 1500s the

255  
00:11:05,750 --> 00:11:04,050  
idea of an elusive African dinosaur like

256  
00:11:07,850 --> 00:11:05,760  
animal seems to have developed only

257  
00:11:10,250 --> 00:11:07,860  
after the discovery of the 1919 century

258  
00:11:11,810 --> 00:11:10,260  
of fossilized dinosaurs so there's kind

259  
00:11:14,690 --> 00:11:11,820  
of a sense that this of I guess kind of

260  
00:11:16,880 --> 00:11:14,700  
between European discovery colonization

261  
00:11:19,220 --> 00:11:16,890  
of Africa which they probably blended in

262  
00:11:21,830 --> 00:11:19,230  
with native African legends of giant

263  
00:11:23,930 --> 00:11:21,840

reptilian like creatures which you know

264

00:11:25,730 --> 00:11:23,940

maybe the Europeans seen these giant

265

00:11:27,230 --> 00:11:25,740

bones and hearing the native legends of

266

00:11:29,720 --> 00:11:27,240

these giant reptiles which could be

267

00:11:31,310 --> 00:11:29,730

large snakes that could still have this

268

00:11:33,020 --> 00:11:31,320

earth that have not been documented or

269

00:11:38,540 --> 00:11:33,030

died out they could have made this

270

00:11:41,000 --> 00:11:38,550

legend of okay la Ben Bay I grew up

271

00:11:44,480 --> 00:11:41,010

reading a lot of these kind of like

272

00:11:46,810 --> 00:11:44,490

weird stories and people and explorers

273

00:11:50,300 --> 00:11:46,820

in the Congo and parts of Africa would

274

00:11:56,180 --> 00:11:50,310

recount seeing what would look like a

275

00:11:59,120 --> 00:11:56,190

dinosaur a very large one like like well

276  
00:12:01,010 --> 00:11:59,130  
over you know the standard what we see

277  
00:12:03,050 --> 00:12:01,020  
in Bigfoot like eight feet this thing

278  
00:12:06,320 --> 00:12:03,060  
would be like like a we'd see in

279  
00:12:07,910 --> 00:12:06,330  
Jurassic Park the movie yeah yeah a lot

280  
00:12:13,100 --> 00:12:07,920  
of the ideas from the Ross world it

281  
00:12:15,590 --> 00:12:13,110  
wasn't written in Michael Crichton's

282  
00:12:17,660 --> 00:12:15,600  
taken from stuff in the 1920s or 30s I

283  
00:12:20,420 --> 00:12:17,670  
don't know probably probably whose base

284  
00:12:21,700 --> 00:12:20,430  
was everything's based after King Kong

285  
00:12:25,490 --> 00:12:21,710  
everything's based on King Kong

286  
00:12:26,660 --> 00:12:25,500  
everything is a ripoff of King Kong Alex

287  
00:12:28,100 --> 00:12:26,670  
you're just talking [h\_\_h] on King Kong

288  
00:12:29,450 --> 00:12:28,110

today for making the Oh master I Sara

289

00:12:31,340 --> 00:12:29,460

Tomczyk stinks he killed that in the

290

00:12:33,220 --> 00:12:31,350

transverse wrecks no yeah you know what

291

00:12:36,110 --> 00:12:33,230

I would talk to your nan to it's right

292

00:12:37,820 --> 00:12:36,120

so the the origin of this McCallum bed

293

00:12:39,620 --> 00:12:37,830

babe apparently can be traced back to at

294

00:12:42,700 --> 00:12:39,630

least four European context to be traced

295

00:12:45,620 --> 00:12:42,710

back to 1909 a book town beasts and men

296

00:12:47,390 --> 00:12:45,630

the author speculated that sauropods

297

00:12:49,220 --> 00:12:47,400

long neck dinosaurs might still be alive

298

00:12:51,440 --> 00:12:49,230

in the deepest African jungles although

299

00:12:53,300 --> 00:12:51,450

he offered no real evidence aside from

300

00:12:55,310 --> 00:12:53,310

legends and rumor but sensationalized

301

00:12:56,690 --> 00:12:55,320

claims were quickly picked up it's

302

00:12:58,340 --> 00:12:56,700

circulated in the press

303

00:13:00,200 --> 00:12:58,350

damp well the Washington Post story from

304

00:13:04,250 --> 00:13:00,210

1910 announce that brontosaurus still

305

00:13:05,930 --> 00:13:04,260

lives so I guess it's real

306

00:13:07,850 --> 00:13:05,940

we had no we have these legends you can

307

00:13:10,280 --> 00:13:07,860

see back maging african low my agent at

308

00:13:12,590 --> 00:13:10,290

least in 1500s they trace back those

309

00:13:13,090 --> 00:13:12,600

legends and from europeans picking up on

310

00:13:14,650 --> 00:13:13,100

that and

311

00:13:16,030 --> 00:13:14,660

we have this if you didn't see the

312

00:13:18,040 --> 00:13:16,040

photograph in the video they said you

313

00:13:19,320 --> 00:13:18,050

have this think it's completely

314

00:13:21,670 --> 00:13:19,330

plausible there could be a large

315

00:13:23,050 --> 00:13:21,680

snake-like creature that hasn't been

316

00:13:26,290 --> 00:13:23,060

discovered but you think it was as big

317

00:13:27,550 --> 00:13:26,300

as an anaconda but I found it or we've

318

00:13:29,350 --> 00:13:27,560

seen creatures go extinct like the

319

00:13:30,670 --> 00:13:29,360

Tasmanian Tigers and the Dodos so

320

00:13:34,030 --> 00:13:30,680

perhaps that could have been the loss

321

00:13:37,920 --> 00:13:34,040

one of the last living specimens of that

322

00:13:39,910 --> 00:13:37,930

uh the titanoboa that was left on earth

323

00:13:41,530 --> 00:13:39,920

because we thought the coelacanth was

324

00:13:43,360 --> 00:13:41,540

extinct for a very long time yet we've

325

00:13:48,970 --> 00:13:43,370

made caught one I believe in the South

326

00:13:51,250 --> 00:13:48,980

Atlantic that's true so I mean it's

327

00:13:53,110 --> 00:13:51,260

definitely possible this is kind of hard

328

00:13:56,020 --> 00:13:53,120

your rep your mentor mind around a

329

00:13:57,520 --> 00:13:56,030

50-foot snake or a dinosaur walking

330

00:14:00,130 --> 00:13:57,530

around in the in the woods having a good

331

00:14:02,740 --> 00:14:00,140

time because you'd assume that it needs

332

00:14:05,050 --> 00:14:02,750

quite a source of energy to keep going

333

00:14:07,690 --> 00:14:05,060

large animals to feed on these the

334

00:14:10,240 --> 00:14:07,700

snakes I mean if it was there there were

335

00:14:11,800 --> 00:14:10,250

carnivores I mean water buffalo there's

336

00:14:14,980 --> 00:14:11,810

large animals in Africa to feed up oh

337

00:14:18,640 --> 00:14:14,990

absolutely but you know you know as the

338

00:14:21,160 --> 00:14:18,650

buffalo roam and maybe try to get away

339

00:14:23,770 --> 00:14:21,170

from this large trying to like

340

00:14:25,360 --> 00:14:23,780

Triceratops Erdrich try to source reck

341

00:14:27,580 --> 00:14:25,370

sources like that like it's created

342

00:14:30,430 --> 00:14:27,590

quite a ruckus to get that get away from

343

00:14:32,740 --> 00:14:30,440

this thing I don't know it seems a

344

00:14:34,480 --> 00:14:32,750

little far-fetched but I don't deny is

345

00:14:37,750 --> 00:14:34,490

anything's possible in the stupid world

346

00:14:40,840 --> 00:14:37,760

it's world stupid I believe it well

347

00:14:43,030 --> 00:14:40,850

isn't the Loch Ness monster was supposed

348

00:14:44,980 --> 00:14:43,040

to be a plesiosaur please wrapped yes

349

00:14:48,070 --> 00:14:44,990

although I mean if it's a reptile that's

350

00:14:56,290 --> 00:14:48,080

gonna do up in Scotland yeah boom it's

351

00:14:58,950 --> 00:14:56,300

all happening I love it I like these not

352

00:15:02,500 --> 00:14:58,960

your traditional cryptozoology story

353

00:15:03,790 --> 00:15:02,510

somewhat feasible I dig it a little

354

00:15:07,090 --> 00:15:03,800

different than the norm you got anything

355

00:15:08,950 --> 00:15:07,100

else that's it so far this week I'll be

356

00:15:13,570 --> 00:15:08,960

coming back I guess gotta do some more

357

00:15:21,200 --> 00:15:18,610

so if you want to be a wrestler got my
