

Missing 411

Neanderthals

1
00:00:13,749 --> 00:00:09,370
Oh transition over here all right please

2
00:00:21,200 --> 00:00:17,150
all right this is our missing 411

3
00:00:26,480 --> 00:00:21,210
segment one of our listeners uh John has

4
00:00:30,759 --> 00:00:26,490
yeah I believe a theory on missing 411

5
00:00:33,040 --> 00:00:30,769
he sent me a bunch of information in

6
00:00:34,670 --> 00:00:33,050
what the hell's going on back there oh

7
00:00:39,680 --> 00:00:34,680
don't worry about it

8
00:00:43,660 --> 00:00:39,690
I kind of have to because I hear ya I'm

9
00:00:47,330 --> 00:00:43,670
gonna promise called him alright John um

10
00:00:51,470 --> 00:00:47,340
our listener John has a theory about

11
00:00:52,850 --> 00:00:51,480
missing for 11 and he's here now to kind

12
00:00:55,670 --> 00:00:52,860
of give us a whole rundown of what he

13
00:00:59,569 --> 00:00:55,680

thinks might be behind this phenomenon

14

00:01:01,760 --> 00:00:59,579

John take it away alright so this is

15

00:01:04,100 --> 00:01:01,770

gonna sound weird but what I think is

16

00:01:05,929 --> 00:01:04,110

going on is I actually think that it is

17

00:01:08,000 --> 00:01:05,939

oh well

18

00:01:11,480 --> 00:01:08,010

it's weird but Neanderthals all right

19

00:01:14,630 --> 00:01:11,490

now from like what I've been looking at

20

00:01:17,330 --> 00:01:14,640

I was actually taking the missing for

21

00:01:21,499 --> 00:01:17,340

one map and then cave system maps in the

22

00:01:23,450 --> 00:01:21,509

US and I was also taking out Bigfoot

23

00:01:25,550 --> 00:01:23,460

sighting maps and I was actually putting

24

00:01:30,440 --> 00:01:25,560

them together and they overlap

25

00:01:32,719 --> 00:01:30,450

damn near perfectly and um from what

26
00:01:34,570 --> 00:01:32,729
I've been thinking about is how to put

27
00:01:37,510 --> 00:01:34,580
this um

28
00:01:40,039 --> 00:01:37,520
[Music]

29
00:01:44,929 --> 00:01:40,049
[h__\h]

30
00:01:46,969 --> 00:01:44,939
brain part now that I'm talking about it

31
00:01:49,249 --> 00:01:46,979
alright the bong again and cut you get

32
00:01:51,679 --> 00:01:49,259
come on back it's fine alright alright

33
00:01:56,030 --> 00:01:51,689
so you can take a breath are you talking

34
00:01:59,240 --> 00:01:56,040
into a like a tin can by the way no I'm

35
00:02:00,230 --> 00:01:59,250
talking into actual playstation4 Mike if

36
00:02:04,310 --> 00:02:00,240
you can't hear me very well

37
00:02:07,010 --> 00:02:04,320
Wow Wow it literally finds it yeah it

38
00:02:09,320 --> 00:02:07,020

sounds like you're talking into some you

39

00:02:10,889 --> 00:02:09,330

know Edison's first phone or such as

40

00:02:15,869 --> 00:02:10,899

that

41

00:02:18,539 --> 00:02:15,879

know if you've got you know gangsta

42

00:02:20,460 --> 00:02:18,549

money but the wireless gold headset is

43

00:02:22,140 --> 00:02:20,470

really good too and it plugs right into

44

00:02:25,289 --> 00:02:22,150

the laptop and everything else

45

00:02:28,710 --> 00:02:25,299

maybe it's my ears but uh John sorry go

46

00:02:30,000 --> 00:02:28,720

ahead alright alright so um the reason I

47

00:02:31,949 --> 00:02:30,010

think that we haven't been able to find

48

00:02:33,030 --> 00:02:31,959

Bigfoot or any of these Neanderthals or

49

00:02:36,210 --> 00:02:33,040

whatever them thinking is running around

50

00:02:38,520 --> 00:02:36,220

actually taking people is because there

51
00:02:40,429 --> 00:02:38,530
has been studies showing that they

52
00:02:42,809 --> 00:02:40,439
actually intentionally buried their dead

53
00:02:44,819 --> 00:02:42,819
which could be the reason why if someone

54
00:02:49,430 --> 00:02:44,829
actually fused these things we don't

55
00:02:52,410 --> 00:02:49,440
actually find any bodies of them also

56
00:02:55,379 --> 00:02:52,420
there there has been stuff showing that

57
00:02:58,170 --> 00:02:55,389
in the past humans did actually fight

58
00:03:01,099 --> 00:02:58,180
with them and they have been known to

59
00:03:06,960 --> 00:03:01,109
actually take women and rape them and

60
00:03:11,580 --> 00:03:06,970
kill and eat people - so um pandas now

61
00:03:15,659 --> 00:03:11,590
how do I put this oh no go away talk to

62
00:03:17,970 --> 00:03:15,669
somebody one side alright so um pandas

63
00:03:19,830 --> 00:03:17,980

weren't discovered until like the 1900s

64

00:03:22,289 --> 00:03:19,840

and those things are those kind of

65

00:03:27,420 --> 00:03:22,299

saying they're not super intelligent so

66

00:03:29,970 --> 00:03:27,430

if you think that the way I would put it

67

00:03:32,670 --> 00:03:29,980

is is those things can avoid people for

68

00:03:35,729 --> 00:03:32,680

so long if Neanderthals were supposedly

69

00:03:40,080 --> 00:03:35,739

in close relation to intelligence as US

70

00:03:43,050 --> 00:03:40,090

I don't see why they couldn't hide out

71

00:03:45,569 --> 00:03:43,060

in the woods or avoid us especially if

72

00:03:47,670 --> 00:03:45,579

they have had conflicts with us before

73

00:03:49,770 --> 00:03:47,680

they would be smart enough to avoid us

74

00:03:56,580 --> 00:03:49,780

unless we were in either small groups or

75

00:04:00,439 --> 00:03:56,590

it was a weaker one of us like and how

76

00:04:03,000 --> 00:04:00,449

to put this I think that they would

77

00:04:05,520 --> 00:04:03,010

probably most likely hunt like wolves

78

00:04:07,710 --> 00:04:05,530

which I think would explain why hunters

79

00:04:10,229 --> 00:04:07,720

get taken to because let's say that you

80

00:04:12,300 --> 00:04:10,239

shoot one right I think that they might

81

00:04:17,699 --> 00:04:12,310

actually like hit you from the sides

82

00:04:18,180 --> 00:04:17,709

um not just that but this is a can you

83

00:04:21,300 --> 00:04:18,190

still hear me

84

00:04:24,690 --> 00:04:21,310

yeah yeah okay and then there's cases of

85

00:04:26,790 --> 00:04:24,700

like people being gone up here cliff

86

00:04:28,830 --> 00:04:26,800

now supposedly these guys are like way

87

00:04:30,840 --> 00:04:28,840

way stronger than us if you look it up

88

00:04:32,340 --> 00:04:30,850

there there's no reason to think that

89

00:04:34,050 --> 00:04:32,350

they couldn't literally pick up a

90

00:04:36,930 --> 00:04:34,060

hundred and eighty pound man 200 pound

91

00:04:39,480 --> 00:04:36,940

managers [h__h] walk off with them um

92

00:04:42,090 --> 00:04:39,490

yeah yeah just just grab your ass and

93

00:04:44,460 --> 00:04:42,100

walk off with you now that I don't know

94

00:04:47,190 --> 00:04:44,470

what they would smell like but what I

95

00:04:49,350 --> 00:04:47,200

was also thinking because like did the

96

00:04:52,050 --> 00:04:49,360

tracking dogs it was a tracking Center

97

00:04:54,960 --> 00:04:52,060

right what if their their smell is so

98

00:04:56,310 --> 00:04:54,970

bad that it throws off the docks or what

99

00:04:59,220 --> 00:04:56,320

if I was thinking this is a long shot

100

00:05:00,990 --> 00:04:59,230

probably not realistic at all but what

101
00:05:03,270 --> 00:05:01,000
if they were to actually take you and

102
00:05:05,310 --> 00:05:03,280
bring your ass up a tree like if they've

103
00:05:07,140 --> 00:05:05,320
actually survived for like the last

104
00:05:09,150 --> 00:05:07,150
20,000 years they said that they've been

105
00:05:10,680 --> 00:05:09,160
extinct for about 20,000 years now but

106
00:05:12,420 --> 00:05:10,690
if they're almost as smart as us right

107
00:05:14,670 --> 00:05:12,430
who is to say that they couldn't have

108
00:05:16,260 --> 00:05:14,680
watched a big cat drank someone up a

109
00:05:18,810 --> 00:05:16,270
tree and do the same thing with high

110
00:05:20,340 --> 00:05:18,820
altitudes or trees themselves and

111
00:05:22,710 --> 00:05:20,350
actually that might be why we're losing

112
00:05:24,570 --> 00:05:22,720
the the tracks of the people on the

113
00:05:25,950 --> 00:05:24,580

ground because I mean there's no reason

114

00:05:28,560 --> 00:05:25,960

why they couldn't drag your ass up a

115

00:05:30,260 --> 00:05:28,570

tree like a cougar um I guess I'm going

116

00:05:33,830 --> 00:05:30,270

to stop you right here are you saying

117

00:05:37,200 --> 00:05:33,840

Neanderthals are still around today and

118

00:05:40,290 --> 00:05:37,210

are Denis and they're all actually big

119

00:05:42,330 --> 00:05:40,300

Bigfoot big feet yeah that's kind of

120

00:05:44,460 --> 00:05:42,340

what I'm getting at and and I know

121

00:05:46,170 --> 00:05:44,470

people will say that like well they're

122

00:05:48,090 --> 00:05:46,180

they're smaller but you also have to

123

00:05:49,740 --> 00:05:48,100

think that if they avoided us for like

124

00:05:51,900 --> 00:05:49,750

let's say 20,000 years they may have

125

00:05:57,180 --> 00:05:51,910

evolved a little bit and gotten taller

126

00:05:59,040 --> 00:05:57,190

um I'm not I'm not exactly sure how to

127

00:06:00,420 --> 00:05:59,050

explain the size difference because I

128

00:06:01,740 --> 00:06:00,430

know Hannah's halls are supposed to be

129

00:06:03,870 --> 00:06:01,750

smaller than us that's the only thing I

130

00:06:06,660 --> 00:06:03,880

could possibly come up with but that's

131

00:06:09,990 --> 00:06:06,670

kind of what I'm thinking that it is and

132

00:06:12,210 --> 00:06:10,000

I was there there's one person out there

133

00:06:14,700 --> 00:06:12,220

who I don't know it's freaking name but

134

00:06:16,170 --> 00:06:14,710

he did a remodel of Neanderthals and

135

00:06:21,450 --> 00:06:16,180

what he thinks that they would actually

136

00:06:24,240 --> 00:06:21,460

look like if they were ape-like and they

137

00:06:26,880 --> 00:06:24,250

actually look pretty pretty freaking

138

00:06:28,320 --> 00:06:26,890

intimidating I sent you some pictures of

139

00:06:31,260 --> 00:06:28,330

it yeah I get the other four pictures

140

00:06:33,680 --> 00:06:31,270

and I'll try to include that in the in

141

00:06:37,260 --> 00:06:33,690

the in the YouTube clip as well

142

00:06:38,129 --> 00:06:37,270

you can bottle a good a good bunch of

143

00:06:39,929 --> 00:06:38,139

inch

144

00:06:42,540 --> 00:06:39,939

and I think it's just as valid as any

145

00:06:45,719 --> 00:06:42,550

other Theory out there when it's about

146

00:06:47,159 --> 00:06:45,729

missing 411 like you said there's a

147

00:06:48,510 --> 00:06:47,169

plenty of species that have yet to be

148

00:06:51,420 --> 00:06:48,520

discovered why couldn't there be a

149

00:06:53,909 --> 00:06:51,430

pocket of Neanderthals maybe in each

150

00:06:57,959 --> 00:06:53,919

continent barely surviving scraping by

151
00:07:01,230 --> 00:06:57,969
but able to abduct humans feed on humans

152
00:07:02,999 --> 00:07:01,240
and do God knows well with them yeah

153
00:07:05,760 --> 00:07:03,009
yeah yeah that's what I'm thinking not

154
00:07:07,080 --> 00:07:05,770
just that but the big cats I was saying

155
00:07:10,890 --> 00:07:07,090
in there have been shown to use

156
00:07:13,379 --> 00:07:10,900
infrasound to actually stun prey now

157
00:07:14,790 --> 00:07:13,389
think about if big cats we're almost as

158
00:07:16,350 --> 00:07:14,800
smart as a person and actually started

159
00:07:17,790 --> 00:07:16,360
using as weapon I have no proof to show

160
00:07:19,080 --> 00:07:17,800
whether or not and it's also could

161
00:07:22,709 --> 00:07:19,090
actually do that it's just pure

162
00:07:25,350 --> 00:07:22,719
speculation but if they could infrasound

163
00:07:28,260 --> 00:07:25,360

has been shown to cause visual and

164

00:07:30,629 --> 00:07:28,270

auditory hallucinations and for all we

165

00:07:32,730 --> 00:07:30,639

know they could be using it it is I mean

166

00:07:34,800 --> 00:07:32,740

it is just good speculation but if they

167

00:07:38,129 --> 00:07:34,810

were think it could be the reason why

168

00:07:39,540 --> 00:07:38,139

you see a goat man or a Bigfoot or a dog

169

00:07:42,300 --> 00:07:39,550

man but kind of with the same

170

00:07:44,040 --> 00:07:42,310

similarities and body types because I

171

00:07:45,719 --> 00:07:44,050

don't know how much it would affect you

172

00:07:47,309 --> 00:07:45,729

depending on the person and it could

173

00:07:49,950 --> 00:07:47,319

also be why you see missing clothes

174

00:07:51,839 --> 00:07:49,960

because let's say you got something

175

00:07:54,029 --> 00:07:51,849

around you and it starts making a sound

176

00:07:55,350 --> 00:07:54,039

that you can't pick up right and it

177

00:07:56,790 --> 00:07:55,360

starts messing with your mind to the

178

00:07:58,559 --> 00:07:56,800

point where you start taking clothes off

179

00:08:00,959 --> 00:07:58,569

and just running in random directions in

180

00:08:03,689 --> 00:08:00,969

the woods because it makes you act

181

00:08:07,429 --> 00:08:03,699

infrasound will make you act extremely

182

00:08:09,899 --> 00:08:07,439

irrationally depending on the person I

183

00:08:12,240 --> 00:08:09,909

know that I'm trying to think of ways

184

00:08:14,579 --> 00:08:12,250

that like could explain the weirdness

185

00:08:16,469 --> 00:08:14,589

also the dogs like the dogs will take

186

00:08:17,999 --> 00:08:16,479

off right and the reason why I'm also

187

00:08:20,070 --> 00:08:18,009

thinking about ampere sound is because

188

00:08:21,839 --> 00:08:20,080

maybe the dogs could actually hear it

189

00:08:23,249 --> 00:08:21,849

before the humans do and that's why the

190

00:08:25,110 --> 00:08:23,259

dogs are always fine because they like

191

00:08:26,369 --> 00:08:25,120

they hear that [h__h] they just bolt like

192

00:08:30,719 --> 00:08:26,379

they're like no I'm not having any of

193

00:08:32,550 --> 00:08:30,729

this this is an amazing period with yeah

194

00:08:33,509 --> 00:08:32,560

like with the animals around because you

195

00:08:34,980 --> 00:08:33,519

know how they always say well like

196

00:08:36,540 --> 00:08:34,990

Bigfoot or dog man turning that [h__h]

197

00:08:38,579 --> 00:08:36,550

comes around like it goes super quiet

198

00:08:40,019 --> 00:08:38,589

like everything that shuts up maybe

199

00:08:42,389 --> 00:08:40,029

that's the same reason maybe they can

200

00:08:45,210 --> 00:08:42,399

hear it but our ears can actually pick

201
00:08:47,309 --> 00:08:45,220
up that sound so I was thinking that it

202
00:08:48,990 --> 00:08:47,319
might be like that and I also compared

203
00:08:50,730 --> 00:08:49,000
them the chimps and the stuff that I

204
00:08:53,550 --> 00:08:50,740
sent you because

205
00:08:55,740 --> 00:08:53,560
chimps have a tendency of being violent

206
00:08:57,000 --> 00:08:55,750
towards other chimps now that might

207
00:08:59,190 --> 00:08:57,010
sound weird like why would they go

208
00:09:02,070 --> 00:08:59,200
together but if we take nano-cells and

209
00:09:04,650 --> 00:09:02,080
say that the more aids like or camp like

210
00:09:06,990 --> 00:09:04,660
than people then I was trying to compare

211
00:09:09,540 --> 00:09:07,000
it to their the territory range and a

212
00:09:12,900 --> 00:09:09,550
chimps have a territory range from when

213
00:09:15,510 --> 00:09:12,910

I found online about 30 miles to 150

214

00:09:16,620 --> 00:09:15,520

miles now if you take the cave systems

215

00:09:18,630 --> 00:09:16,630

what I was trying to show you is if you

216

00:09:21,300 --> 00:09:18,640

take the cave systems and the missing

217

00:09:22,889 --> 00:09:21,310

people of the missing 401 and you

218

00:09:24,630 --> 00:09:22,899

compare it to the territory range of

219

00:09:28,199 --> 00:09:24,640

what a shame could have they're almost

220

00:09:30,000 --> 00:09:28,209

completely identical and if you take

221

00:09:32,220 --> 00:09:30,010

that territory range and put it on like

222

00:09:35,010 --> 00:09:32,230

all the cave systems I didn't do it to

223

00:09:37,350 --> 00:09:35,020

every single one I sent you but um it

224

00:09:39,060 --> 00:09:37,360

basically blots out almost the entire

225

00:09:41,550 --> 00:09:39,070

middle of the map just like the missing

226

00:09:45,960 --> 00:09:41,560

people so basically what I'm getting at

227

00:09:47,670 --> 00:09:45,970

is I think that it's just them just

228

00:09:49,560 --> 00:09:47,680

filling out in the woods still and

229

00:09:51,600 --> 00:09:49,570

taking food like you said where they can

230

00:09:54,060 --> 00:09:51,610

find it and I think they probably have a

231

00:09:57,269 --> 00:09:54,070

territory range of about 150 miles or so

232

00:09:59,880 --> 00:09:57,279

I'm not sure but if I am right you

233

00:10:01,410 --> 00:09:59,890

probably could find one now they're

234

00:10:02,940 --> 00:10:01,420

supposed to be nocturnal too

235

00:10:05,040 --> 00:10:02,950

the animals are supposed to be nocturnal

236

00:10:06,690 --> 00:10:05,050

so I think the reason why no one's

237

00:10:09,600 --> 00:10:06,700

actually finding these things is because

238

00:10:11,579 --> 00:10:09,610

one low bury their dead - they're only

239

00:10:14,220 --> 00:10:11,589

running around that night unless I guess

240

00:10:15,630 --> 00:10:14,230

someone would disturb them now the way

241

00:10:18,720 --> 00:10:15,640

that I think you could find them is take

242

00:10:20,880 --> 00:10:18,730

the actual place with the biggest amount

243

00:10:24,560 --> 00:10:20,890

of missing people why is this printer

244

00:10:27,240 --> 00:10:24,570

going and then take them focus on oh god

245

00:10:29,370 --> 00:10:27,250

okay sorry don't worry the present you

246

00:10:31,519 --> 00:10:29,380

you take them place with the most amount

247

00:10:33,900 --> 00:10:31,529

of missing people most cave systems and

248

00:10:35,970 --> 00:10:33,910

within the territory range of a chimp

249

00:10:37,800 --> 00:10:35,980

and then you go to that place that has

250

00:10:39,690 --> 00:10:37,810

the biggest number and go to the cave

251

00:10:41,430 --> 00:10:39,700

systems around that place and I think

252

00:10:42,930 --> 00:10:41,440

that would be the best way to catch them

253

00:10:44,819 --> 00:10:42,940

off guard is probably while they're

254

00:10:46,800 --> 00:10:44,829

sleeping but if I'm right they probably

255

00:10:48,240 --> 00:10:46,810

hunt in packs because they weren't known

256

00:10:50,280 --> 00:10:48,250

to take down lowly mammoths and [h__h]

257

00:10:52,230 --> 00:10:50,290

like that so if you did wake them up

258

00:10:55,319 --> 00:10:52,240

they were known to be pretty brutal only

259

00:10:57,569 --> 00:10:55,329

we're known to kill us so if let's say

260

00:11:00,990 --> 00:10:57,579

you did come upon them they might [h__h]

261

00:11:03,090 --> 00:11:01,000

you up real fast but I think that'd be

262

00:11:04,720 --> 00:11:03,100

the quickest way to find them is just to

263

00:11:06,639 --> 00:11:04,730

take all the data

264

00:11:08,050 --> 00:11:06,649

a [h__h] together take the cave systems

265

00:11:10,269 --> 00:11:08,060

take the territory range take the

266

00:11:13,150 --> 00:11:10,279

missing people and go to that specific

267

00:11:16,720 --> 00:11:13,160

spot and try to explore the cave systems

268

00:11:18,639 --> 00:11:16,730

there um I don't know I've just been

269

00:11:21,280 --> 00:11:18,649

obsessing over this crap I think about

270

00:11:22,090 --> 00:11:21,290

people dearly that's really freaking

271

00:11:24,490 --> 00:11:22,100

interesting

272

00:11:28,060 --> 00:11:24,500

we usually do does it make you angry

273

00:11:29,949 --> 00:11:28,070

when we make light of absolutely not I

274

00:11:31,900 --> 00:11:29,959

love the way you guys talk about the

275

00:11:33,850 --> 00:11:31,910

stuff because it's just pure speculation

276

00:11:35,530 --> 00:11:33,860

at this point I have no better idea than

277

00:11:37,120 --> 00:11:35,540

anybody else I mean it could be aliens

278

00:11:39,129 --> 00:11:37,130

it could be interdimensional [h__h] I

279

00:11:40,540 --> 00:11:39,139

don't know but the what I'm looking at

280

00:11:43,480 --> 00:11:40,550

is I'm trying to figure out what it is

281

00:11:46,240 --> 00:11:43,490

from us purely like realistic

282

00:11:48,370 --> 00:11:46,250

perspective of like something that could

283

00:11:51,310 --> 00:11:48,380

actually be running around you know like

284

00:11:54,069 --> 00:11:51,320

I mean sure aliens could be up there but

285

00:11:55,120 --> 00:11:54,079

is it more realistic that it's aliens

286

00:11:57,730 --> 00:11:55,130

coming from a completely different

287

00:11:59,230 --> 00:11:57,740

galaxy and taking people or is it more

288

00:12:01,720 --> 00:11:59,240

realistic that something that has been

289

00:12:02,439 --> 00:12:01,730

proven in the past to take eat rape

290

00:12:04,379 --> 00:12:02,449

people

291

00:12:06,579 --> 00:12:04,389

is still running around in the woods

292

00:12:07,990 --> 00:12:06,589

unchecked because they're stronger than

293

00:12:10,240 --> 00:12:08,000

us they're faster than us they're not

294

00:12:11,680 --> 00:12:10,250

smarter than us obviously otherwise they

295

00:12:13,030 --> 00:12:11,690

would be on the top and we wouldn't you

296

00:12:15,220 --> 00:12:13,040

know be living in houses and [h__\h] like

297

00:12:17,110 --> 00:12:15,230

that but is it more realistic to have

298

00:12:19,090 --> 00:12:17,120

aliens out there taking people or

299

00:12:21,160 --> 00:12:19,100

interdimensional freakin portals opening

300

00:12:23,319 --> 00:12:21,170

up or things that were proven to exist

301

00:12:24,819 --> 00:12:23,329

at a certain point is just still out

302

00:12:26,800 --> 00:12:24,829

there still doing what they've done the

303

00:12:28,480 --> 00:12:26,810

entire time but they're just hiding

304

00:12:30,610 --> 00:12:28,490

really well because they're only on at

305

00:12:32,410 --> 00:12:30,620

9% who's really going to go that deep

306

00:12:36,059 --> 00:12:32,420

into the damn woods and then check it

307

00:12:38,170 --> 00:12:36,069

out most of the time yeah I don't know

308

00:12:41,079 --> 00:12:38,180

interesting theory John definitely

309

00:12:43,300 --> 00:12:41,089

interesting theory do you have anything

310

00:12:46,990 --> 00:12:43,310

else that you want to say about what you

311

00:12:49,720 --> 00:12:47,000

said so far because uh I think you kind

312

00:12:51,460 --> 00:12:49,730

of said it all I kind of did I don't

313

00:12:52,689 --> 00:12:51,470

know what else to really say I don't

314

00:12:54,970 --> 00:12:52,699

know I just like to hear you guys a

315

00:12:56,410 --> 00:12:54,980

speculation on it okay go ahead make I

316

00:13:00,220 --> 00:12:56,420

don't care to make fun of it whatever I

317

00:13:02,920 --> 00:13:00,230

just wanna I just wanna hear well I I

318

00:13:04,660 --> 00:13:02,930

don't often digest this a little bit and

319

00:13:07,360 --> 00:13:04,670

I'm going to dump you up the Skype line

320

00:13:09,790 --> 00:13:07,370

because quite honestly your your

321

00:13:13,269 --> 00:13:09,800

microphone is driving like a drill bit

322

00:13:15,819 --> 00:13:13,279

into my ears it could yes that could be

323

00:13:17,170 --> 00:13:15,829

because I went to answer last night and

324

00:13:18,249 --> 00:13:17,180

my ears are a little sensitive right now

325

00:13:19,960 --> 00:13:18,259

he's hungover

326

00:13:21,280 --> 00:13:19,970

so I like the theory I think it's

327

00:13:24,819 --> 00:13:21,290

interesting I like that you're trying to

328

00:13:26,409 --> 00:13:24,829

find logical explanations that could map

329

00:13:27,879 --> 00:13:26,419

back to science and all that stuff I

330

00:13:30,489 --> 00:13:27,889

think it's as good as any we've been

331

00:13:33,069 --> 00:13:30,499

discussing well we do know that we do

332

00:13:35,439 --> 00:13:33,079

know that ninety Falls are around and

333

00:13:36,549 --> 00:13:35,449

they're they're actually highly would

334

00:13:39,609 --> 00:13:36,559

they actually are in commercials for

335

00:13:45,999 --> 00:13:39,619

Geico and stuff like that so I'm ITT not

336

00:13:48,249 --> 00:13:46,009

people I don't know all right I'll let

337

00:13:51,519 --> 00:13:48,259

you go okay thank you bye John Thanks

338

00:13:53,159 --> 00:13:51,529

I'll talk to you later and we will blow

339

00:13:56,499 --> 00:13:53,169

him up

340

00:13:58,539 --> 00:13:56,509

hello him okay thank you for you go home

341

00:14:00,729 --> 00:13:58,549

alright there is a change so quickly

342

00:14:03,569 --> 00:14:00,739

Mike's gone from blowing up colors to

343

00:14:07,539 --> 00:14:03,579

blowing Linden you piece of [h__h]

344

00:14:10,389 --> 00:14:07,549

interesting theory but Neanderthals

345

00:14:12,309 --> 00:14:10,399

taking people and they didn't die out

346

00:14:15,009 --> 00:14:12,319

after all why not that's that's pretty

347

00:14:16,509 --> 00:14:15,019

cool some women it was the argument for

348

00:14:20,139 --> 00:14:16,519

Loch Ness monster was right it was like

349

00:14:22,869 --> 00:14:20,149

a plesiosaur that had so I think you see

350

00:14:24,849 --> 00:14:22,879

it was in neanderthal that's in the end

351
00:14:26,529 --> 00:14:24,859
the thought with the costume yes

352
00:14:28,449 --> 00:14:26,539
they built costumes and they go

353
00:14:30,340 --> 00:14:28,459
underwater I think Frankie you know we

354
00:14:31,749 --> 00:14:30,350
talked about a Bigfoot movie that didn't

355
00:14:33,779 --> 00:14:31,759
have any suspense or anything I could

356
00:14:37,359 --> 00:14:33,789
see this being like a Crichton esque

357
00:14:41,019 --> 00:14:37,369
movie where you you know or something

358
00:14:44,139 --> 00:14:41,029
like that where you have a real

359
00:14:47,499 --> 00:14:44,149
scientific explanation to suspensful

360
00:14:49,629 --> 00:14:47,509
horror type thing you know like Jurassic

361
00:14:51,400 --> 00:14:49,639
Park was like the science mystery you

362
00:14:53,799 --> 00:14:51,410
could do like Neanderthals our Bigfoot

363
00:14:55,720 --> 00:14:53,809

but you don't know if it's aliens or

364

00:14:58,299 --> 00:14:55,730

what missing for one one the movie Oh

365

00:15:00,849 --> 00:14:58,309

didn't the Michael Crichton do that kind

366

00:15:03,189 --> 00:15:00,859

of with a Congo where it was until it

367

00:15:05,349 --> 00:15:03,199

was it was that intelligent gorillas I

368

00:15:07,989 --> 00:15:05,359

forget somewhat there were some what

369

00:15:11,259 --> 00:15:07,999

kind of intelligent like gorilla

370

00:15:14,919 --> 00:15:11,269

monsters they lived in these ruins you

371

00:15:17,169 --> 00:15:14,929

her trained and whatever yeah I thought

372

00:15:20,349 --> 00:15:17,179

that of but overall I like John stories

373

00:15:22,299 --> 00:15:20,359

in and he sent me enough links and funny

374

00:15:25,389 --> 00:15:22,309

enough like that map like the missing

375

00:15:31,450 --> 00:15:25,399

411 map that you see online and what he

376

00:15:34,960 --> 00:15:31,460

has when it comes to was the signs of

377

00:15:39,250 --> 00:15:34,970

see here he's a nice little interesting

378

00:15:43,510 --> 00:15:39,260

correlation of a Bigfoot sightings and

379

00:15:46,030 --> 00:15:43,520

then missing 411 disappearances so the

380

00:15:48,130 --> 00:15:46,040

map sleeves right there the conch

381

00:15:50,860 --> 00:15:48,140

clusters are pretty close together when

382

00:15:52,230 --> 00:15:50,870

you overlay the maps I don't know if

383

00:15:55,630 --> 00:15:52,240

it's coincidence or there's a

384

00:15:57,870 --> 00:15:55,640

correlation there don't know but you

385

00:16:00,880 --> 00:15:57,880

know but I also do like the theory that

386

00:16:01,360 --> 00:16:00,890

Neanderthal and Bigfoot are one in the

387

00:16:05,829 --> 00:16:01,370

same

388

00:16:07,960 --> 00:16:05,839

why not I like that one a lot huh makes

389

00:16:11,949 --> 00:16:07,970

sense doesn't make sense to a certain

390

00:16:13,510 --> 00:16:11,959

degree I guess the only problem we found

391

00:16:14,980 --> 00:16:13,520

well I guess he could say that they

392

00:16:16,360 --> 00:16:14,990

maybe they evolved or something that I

393

00:16:17,800 --> 00:16:16,370

don't think the only Neanderthal

394

00:16:20,710 --> 00:16:17,810

skeletons we found I think they've only

395

00:16:22,329 --> 00:16:20,720

been like an I know he's found them in

396

00:16:24,430 --> 00:16:22,339

Europe we might have finally caught the

397

00:16:26,829 --> 00:16:24,440

caucuses maybe to which I think that's

398

00:16:29,050 --> 00:16:26,839

technically Europe but maybe I don't

399

00:16:31,990 --> 00:16:29,060

think he found him anywhere else could

400

00:16:34,090 --> 00:16:32,000

be wrong on that but no oh was that I

401
00:16:36,430 --> 00:16:34,100
had we found what was that Iceman that

402
00:16:38,410 --> 00:16:36,440
was found in the I think in Europe he

403
00:16:40,870 --> 00:16:38,420
was perfectly encapsulated nice and he

404
00:16:44,019 --> 00:16:40,880
had like tools and like weapons

405
00:16:48,790 --> 00:16:44,029
was he a Neanderthal or just an ugly

406
00:16:52,210 --> 00:16:48,800
human I don't know that a cro-magnon man

407
00:16:57,940 --> 00:16:52,220
Otzi um oh that's good well go see okay

408
00:16:59,440 --> 00:16:57,950
Oh God OT o om love TZ I see why don't

409
00:17:02,350 --> 00:16:59,450
we know that's his name don't even name

410
00:17:05,650 --> 00:17:02,360
badge on or something yeah ed name tag I

411
00:17:11,949 --> 00:17:05,660
call me a driver's license and

412
00:17:16,140 --> 00:17:11,959
everything Oh weird but it was just as I

413
00:17:19,449 --> 00:17:16,150

say how old they think that Iceman was

414

00:17:25,870 --> 00:17:19,459

looks like it was a mummy though no I

415

00:17:29,080 --> 00:17:25,880

found it in the Austrian Alps 3300 BC

416

00:17:31,630 --> 00:17:29,090

okay like that hmm I thought okay we go

417

00:17:37,150 --> 00:17:31,640

I have heard though that the LG a

418

00:17:38,680 --> 00:17:37,160

regular on node be a regular homo sapien

419

00:17:41,169 --> 00:17:38,690

them that's right old enough to be I

420

00:17:42,909 --> 00:17:41,179

don't think in the end result yeah but

421

00:17:45,000 --> 00:17:42,919

there was like a split and I think like

422

00:17:48,330 --> 00:17:45,010

Neanderthals and hominids

423

00:17:51,900 --> 00:17:48,340

humans Homo sapiens they were sort of

424

00:17:55,470 --> 00:17:51,910

like competing species before our humans

425

00:17:57,180 --> 00:17:55,480

became like human human yeah I think we

426

00:17:58,770 --> 00:17:57,190

kind one out but we were like banging

427

00:18:00,270 --> 00:17:58,780

back and forth sort of how like a dog

428

00:18:03,240 --> 00:18:00,280

can make mate with a wolf

429

00:18:05,220 --> 00:18:03,250

yeah there's there are a lot of inner I

430

00:18:08,430 --> 00:18:05,230

don't know is it called inner species at

431

00:18:10,290 --> 00:18:08,440

that point but if interspecies because

432

00:18:11,820 --> 00:18:10,300

yeah you're you're just a branch it's

433

00:18:15,870 --> 00:18:11,830

like how you get ponies isn't that like

434

00:18:17,610 --> 00:18:15,880

a [h__h] mainly meal mules yeah yeah

435

00:18:19,110 --> 00:18:17,620

whatever they are they were banging each

436

00:18:22,020 --> 00:18:19,120

other there's six ways from Sunday

437

00:18:24,090 --> 00:18:22,030

that's all I know I feel like I need to

438

00:18:27,210 --> 00:18:24,100

get me some of that Neanderthal [h__h]

439

00:18:28,770 --> 00:18:27,220

man yeah yeah I want to marry a guy and

440

00:18:33,060 --> 00:18:28,780

a babe that's right

441

00:18:36,900 --> 00:18:33,070

Andy and a Neanderthal daddy oh I'll do

442

00:18:37,980 --> 00:18:36,910

it I'll do them all right all right grab

443

00:18:40,920 --> 00:18:37,990

the plesiosaur

444

00:18:46,710 --> 00:18:40,930

what us let's move on a little bit here

445

00:18:48,900 --> 00:18:46,720

we go coupon bond god [h__h] on Friday
