Jason grew up on a farm near the little town of Orrick, Missouri where he's been a farm hand, journalist, photographer, bartender, and mayor! Jason teaches journalism at Northwest Missouri State University in Maryville and keeps the world safe from the forces of evil. As a kid he looked for Sasquatch footprints in the yard, UFOs over our farmhouse, and one night his whole family saw something that shouldn't – couldn't – have been in the sky. One afternoon, while alone, he saw a full-bodied apparition.

For over two decades Bryan, with a healthy dose of skepticism, has examined a wide range of reported paranormal phenomena, including ghosts, poltergeists, psychics, UFOs, conspiracy theories, urban legends, and much more. Unlike others in the field, Bryan has made sure not to run around cemeteries, screaming and scaring the group with over-active imaginations. From the field to the lab, he tests bizarre beliefs and practices, conducts experiments and on-site investigations, and recreates unusual events. He has confronted hauntings, Ouija board activity, levitation, psychic readings, alien abductions, and telephones that try to talk to the dead.

2018 09 27 The Official Paracast Channel <https://youtu.be/BZCOiW-cDY> Is the 'UFO Mystery' a Human Phenomenon With David Halperin | The Paracast September 9, 2018

Gene and Randall present a return appearance by UFO researcher and Biblical scholar David Halperin. His perspective on UFOs is that like religion, they are a human phenomenon. They have nothing to do with space travel or life on other planets. They're about us—our hopes, our longings, our terrors. Particularly the greatest terror of all: the end of our existence. Are they alien visitors? Yes; but not in the sense of coming from outer space. Inside our own minds, our own souls, there's enough alienness to fill a universe. Some of it is emerging ... With messages for us? Perhaps. We just need to learn to decode them. From 1976 through 2000, David taught Jewish history in the Religious Studies Department at the University of North Carolina, Chapel Hill.

2018 09 06 The Official Paracast Channel <https://youtu.be/nialsG9eK5U> UFO Abductee Calvin Parker tells all from 1973 incident | The Paracast September 2, 2018

On the evening of October 11, 1973, co-workers 42-year-old Charles Hickson and 19-year-old Calvin Parker told the Jackson County, Mississippi Sheriff's office they were fishing off a pier on the west bank of the Pascagoula River in Mississippi when they heard a whirring/whizzing sound, and saw two flashing blue lights and an oval shaped object 30–40 feet across and 8–10 feet high. Parker and Hickson claimed that they were "conscious but paralyzed" while three "creatures" took them aboard the object and subjected them to an examination before releasing them. Gene and Randall present Calvin Parker to discuss this experience and another, 20 years later, as told in his book, "Pascagoula — The Closest Encounter: My Story."

After The Paracast: Available exclusively for Paracast+ subscribers: Gene and cohost J. Randall Murphy present their unvarnished opinions about abductee Calvin Parker, who was one of the two experiences involved in the 1973 Pascagoula, Mississippi incident. Is he a "salt of the Earth" individual just trying to make sense of that and a subsequent experience? Randall details an incredible conspiracy theory involving the Black Rock datacenter, known as Aladdin, that can be used to manipulate stocks. He mentions President Trump possibly posting Tweets to influence the market, and Gene brings up the strange behavior of some alleged tech industry analysts who complained about alleged poor sales of the iPhone X even though it has been the largest selling smartphone on the planet for months.

That's where such people as your humble host of The Paracast and such notables as Tim Beckley, Jerome Clark, Allen Greenfield and Rick Hilberg got their starts. In a single virtual room, Gene's old friends will reminisce about their early work in the UFO field. The political and cultural climate, how both may have impacted early research efforts, are also debated. Guest co-host is J. Kathleen is the niece of Betty Hill, whose abduction experience with her husband Barney has been regarded as one of the most credible such encounters. Kathleen is also associated with the Mutual UFO Network, as Director of Experimenter Research and the Foundation for Research into Extraterrestrial Encounters, as an advisory board member and consultant to its research subcommittee.</p> <p>The Paracast Copyright © 2002–2017 The Paracast LLC. We focus heavily on listener questions about such subjects as the history of UFOs and other aspects of the phenomenon. We briefly cover his decision to participate in the recent Cinco de Mayo dustup, which we refer to as Slidegate or the "topic that shall not be named." During this episode, Dolan also focuses on the state of UFO research, reverse engineering alleged alien technology, so-called breakaway civilizations, the schemes skeptics use to debunk UFOs, and his upcoming book about so-called "false flags" and how they influenced our history. He'll also respond to a listener question about what he'd do if he had \$100 million with which to investigate the mystery.</p> <p>The Paracast Copyright © 2002–2017 The Paracast LLC. This is the organization co-founded by astronaut Dr. Edgar Mitchell, which focuses heavily on experiencers. According to the material we have from the organization: The Mission of FREE will focus on "Research, Education and Support" but will primarily focus on scientific investigation through surveys and interviews on individuals who have had UFO related contact experiences with non-human sentient beings (commonly known as "ET Contact") and to compare this group with individuals that have had other types of "paranormal contact experiences." In addition, Ray will discuss his personal paranormal encounters and how that led to the creation of FREE.</p> <p>The Paracast Copyright © 2002–2017 The Paracast LLC. Jones So what about claims of ongoing mind control and how powerful are these sinister influences? Marie D. Jones returns to The Paracast to discuss her latest book with co-author “Larry Flaxman,” entitled “Mind Wars: Who’s Been Watching You From the Shadows.” The book presents “a history of mind control, surveillance, and social engineering by the government, media, and secret societies.” And, yes, there is a section about subliminal mind control, which recalls what Chris was talking about during the June 28th edition of After The Paracast.” The Manchurian Candidate is also on the agenda.

Our conversations on the July 12 episode with Marie Jones whetted our appetite for more mind games and conspiracy talk, so who better to dig into the subject than Greg and Walter? Greg Bishop was the publisher of the Excluded Middle magazine and the compilation book, Wake Up Down There; Project Beta, was co-author of Weird California and is the longtime host of Radio Mysterioso. Walter Bosley is a former AFOSI agent and a former FBI counterintelligence specialist. He’s author of the intriguing books, Empire of the Wheel: Espionage, The Occult and Murder in Southern California; and his recent books, Latitude 33: Key to the Kingdom and the just-released The Lost Expedition of Sir Richard Francis Burton. Greg and Walter offer a wealth of knowledge concerning conspiracy, mind-control, secret government tech, and much more! There’s so much here that this discussion will extend to After The Paracast.

It was purportedly designed to develop psychological warfare techniques and exotic research. It is said to be related to the legend of the Philadelphia Experiment due to its supposed time travel connection, and there are even claims of a possible connection with extraterrestrials. Well, independent producer and director Christopher Garetano has reportedly spent more than 10 years probing this alleged conspiracy, and has released a documentary film, "Montauk Chronicles," to present his findings. Was the Montauk Project real, or just a bunch of tall tales devised by a handful of people for reasons best known to themselves?</p> <p>The Paracast Copyright © 2002–2017 The Paracast LLC. They discuss a wide variety of subjects from pop culture, movie special effects, to so-called breakaway civilizations. So is it possible that UFOs and other unusual events are caused by individuals who have left our known world and are engaging in actions that we do not quite understand? The term was originally coined by UFO researcher and historian Richard Dolan to describe black budget projects, a secret space program, central bankers, secret societies and other agencies that fly under the radar. Peter will also discuss the current state of UFO research, where we go from here, and related subjects. In discussing the prospects for disclosure, he’ll offer a balanced view of the body politic and the loss of the age-old spirit of bipartisanship. How does it impact the world in which we live, and our own lives? According to his bio, “Dr. Kirby Surprise received his doctorate in counseling psychology from the Institute for Integral Studies. He works in an advanced outpatient program for the State of California where he assesses, diagnoses, and treats clients with psychotic and delusional disorders.”</p> <p>The Paracast Copyright © 2002–2017 The Paracast LLC. During this session, Whitley will discuss his new book, “The Super Natural,” co-authored with J. Newton Rayzor Professor of Religion at Rice University, Jeffery Kripal. According to the promotional notes, “[This] book looks at all kinds of ‘impossible’ things, from extra-dimensional beings to bilocation to bumps in the night. They contend that these phenomena are not impossible at all: rather, they are part of our natural world. ‘The Super Natural’ considers that the natural world is actually a ‘user natural world’ — and all we have to do to see this is to change the lenses through which we are looking at it and the languages through which we are presently limiting it.”</p> <p>The Paracast Copyright © 2002–2017 The Paracast LLC. According to Davenport, “One of the issues I would like to discuss is the wild proliferation of sightings of clusters of red, orange, and yellow fireballs. It appears to be the most important facet to the current status of Ufology, and I strongly suspect that the overwhelming majority of those reports do not involve so-called ‘Chinese’ lanterns.” Davenport will also discuss his ongoing plans to develop a UFO detection system using “passive” radar. First proposed 22 years ago, Davenport suggests that recent advancements in personal computer technology make the plans more feasible than ever.</p> <p>The Paracast Copyright © 2002–2017 The Paracast LLC. Marc also explores the potential that humans may some day perfect some sort of warp drive, for faster-than-light travel across space. And what about across dimensions, through wormholes? Her latest book, <i>More Encounters with Star People: Urban American Indians Tell Their Stories</i> , takes us from the Reservations out into the world-at-large for more entertaining tales of contact and intrigue. “[It] details the UFO stories of American Indians who live off the reservation. One intriguing difference between the two groups: There were more cases of physical evidence presented to back up the testimony of urban American Indians. As with her first book, this volume not only recounts their encounters, but the recounting itself becomes part of the story. [Dr. Clarke] is a professor emeritus at Montana State University and reveals herself as part UFO investigator, part journalist, part therapist, and part friend.”	Transcript Link

Chris wonders why all the data from a decade’s worth of San Luis Valley research that he’s submitted to MUFON and NIDS (National Institute for Discovery Science) has not received an acknowledgement — or a thank you. He discusses some of the amazing phenomena he’s investigated, cases that have yet to become part of the UFO lexicon. And what about disclosure advocates such as Stephen Bassett? Can we ever really understand the true source behind UFOs? Could we even wrap our heads around or do we have language to describe what it’s really all about? What about communicating with aliens that do not look or think in a way that even resembles what we humans understand?	Transcript Link

Researcher Donald E. Keyhoe believed some of these were "alien motherships"; Micah will look at how the discoverer of Pluto became involved in determining what these objects were, as well as the peculiar search for Earth's second moon, and the continuing search for "moonlets" today. Over the years, mystery objects in Earth orbit have helped promote the belief in what is known as "The Black Knight Satellite," a hypothetical alien probe that has monitored Earth for 13,000 years. Micah explains the scientific discoveries behind this modern legend, which have built onto a mythos over the years.</p>	Transcript Link

Yet they were unavoidably and undeniably real. Despite my initial doubt, I came to realize that there are still aspects of Nature which are neither understood or accepted, even though their reality has profound implications for understanding the true breadth of the human psyche and its possible continuity after death." The 10th anniversary observance of The Paracast continues with Gene and Chris plus Greg Bishop, Paul Kimball and Goggs Mackay. They discuss the influence of podcasts, and why UFO-oriented conventions are playing to an increasingly older audience. Yes, we do mention the Comic-Con, which can attract well over 100,000 participants. Paul wonders why UFO conferences have, by and large, become an old boy network with an elitist attitude (conscious or otherwise) on the part of some of the researcher/lecturers. The discussion moves to some anecdotes about UFO conventions. The panel also focuses on some of the issues involving a certain UFO disclosure advocate that is regarded as tone-deaf, not to mention the rantings from former Canadian government official Paul Hellyer.

				This episode is a special roundtable featuring two of our guest co-hosts over the years, Greg Bishop, of "Radio Misterioso," film producer Paul Kimball, and long-time forum participant and moderator Goggs Mackay. We talk about the state of paranormal research, how our views have changed over the years when it comes to individual cases, such as Roswell, and the possible causes of the UFO phenomenon. The panel also discusses things that might be done to make research more productive; what about the evidence contained in those UFO databases, what about free and transparent evaluation of all the evidence? The discussion also includes the plight of the experiencer, how their lives have been impacted by their experience, and where UFO abductions may fit in. And what about "panic in the woods" and the "Oz Factor"? The discussion continues on the corresponding episode of After The Paracast.
