I received a correspondence in May 2012. It was forwarded by 'John' a retired Federal employee who lives in northern Nevada and who wished to remain anonymous.

The story centers around a bizarre encounter with a terrifying cryptid that John experienced while living with his Grandfather. John later stated to me that the property was in a rural area of Aleppo Township in Greene County, Pennsylvania. He did not want to pinpoint the location but did say that he wanted the post dedicated to his Grandfather - Samuel Hill, who he considers the most remarkable man he has ever known.

John seemed quite sincere in my opinion. He decided to come forth with the account after he had a rather strange encounter a few months previous to writing me (which he did not want to discuss).

I will describe this incident and others in detail and answer all questions from the chat room.

Tobias is a frequent guest on various podcasts and radio shows, has contributed to several books on the paranormal, and is often invited to speak at paranormal conferences and events. He was also featured in the Small Town Monsters documentary 'Terror in the Skies' and the series premiere of Expedition X for his work investigating Mothman sightings around Lake Michigan. He and his wife Emily have been involved with the Lake Michigan Mothman investigation since its advent in the spring of 2017, and recently published a book chronicling the experience, 'The Lake Michigan Mothman: High Strangeness in the Midwest.'

His years as an investigator have served him best by illustrating that when it comes to the anomalous, the preternatural, and the paranormal, any answers he's found are still hopelessly outnumbered by questions.

The documentary film 'The House in Between' and the subsequent follow-up release detailed Alice's personal ordeal in which her Mississippi dream home turned into a nightmare after a life-changing supernatural incident.	0
				Alice refused to spend another night at her house unless someone proved to her what she experienced has a natural explanation.	
				Paranormal investigator John Bullard was part of the initial team that started looking for answers. After many years, directors' Steve Gonsalves and Kendall Whelpton headed to Mississippi with their camera crew to document the real-life effects of a homeowner's mission to get her house back from this terrifying nightmare.	
				The approach was much like a detective chasing down leads and connecting the dots. With a no stone left unturned mindset, utilizing real scientific data via physicists, field experts and deep accurate research. The filmmakers were also adamant their film crew be very experienced in the field of paranormal research because of the sensitive nature of this case. The directors hand selected each film crew member not only for their respective production expertise but also for their dedication to the documentation of real paranormal research.

In this episode of Phantoms & Monsters Radio, we present Carrie and Greg, a married couple living in Summit County, Ohio who have been dealing with a 12-year saga. Namely, there are monsters in their yard. Cryptid canines are a part of their everyday life. Join us for an intriguing look at the evolution of their ordeal...what they have experienced and what they have learned from it.

Carrie and her husband Greg moved into their Summit County, Ohio home in 2003. Greg is an Executive Chef and Carrie is a School Nutrition Specialist. They have three children and a ten-year-old granddaughter. They are avid outdoor enthusiasts and spend as much time as possible camping, scuba diving and hiking with their two dogs Liberty and Ripley. Their experience with the canine cryptids began in 2010.

Early on, Carrie and Greg's son witnessed a large, dark creature over six feet tall lurking in the tree line.

The lone rooster began to squawk and the creature let out a fierce growl, then all went silent. He heard what sounded like something jumping back over the fence, and the rooster squealed as if in pain. At that point, he grabbed a gun and flashlight and ran outside, searching the fence from the front porch with his light. He saw the rooster but it appeared to have something dark over its middle. It slowly dawned on him that the "something dark" was the muzzle of a creature with two glaring eyes.

				My name is Ryan Paul Tremblay. I've been a hardcore Cryptozoology enthusiast and researcher for well over 20 years now. Like many, my fascination with monsters and things that go "bump in the night" began very early on. Growing up in New England was the perfect breeding ground for such a fascination. With plenty of wilderness around—and our Cryptid to boot, I soon began to hear not only of Bigfoot, but now the Dover Demon. As the years went on, I found more media accessible to my young mind: Books were plentiful and shows began to emerge in the early 90's showcasing Cryptid encounters. In Southern Arizona, I had my own personal encounter with the Dog Man. This simply fueled my obsession for Cryptozoology. Before I knew it, I was traversing down numerous rabbit holes. Jersey Devil. Upright Canids. Various forms of Sasquatch. Extraterrestrials and finally, the Wendigo. Through countless hours of hard work, plenty of literature and even the reluctant volunteering of information through connections to Indigenous people, I found a supernatural creature that captured my curiosity, my determination and fascination alike! Host of Whisper to a Scream podcast and Cohost of Monster Radio.

Kenneth states:

"For most of my life I had no awareness that I was an abductee. The night experiences I thought were dreams. In these, I would visit many places and see the same people many nights after I fell asleep. I thought they were dream people. I could smell, touch them and have all six senses with them. Some places were cold, some places too warm and other places I couldn't seem to get enough oxygen in.

When things became strange was in the summer of 1976. While attending Northeastern University, I would get a Top Security job, working for a contracting Agency for the Department Of Defense (DOD). The DOD and an abduction would create a conflict that would become lifelong in surveillance. I'm not going to get into much detail on this. The story was published in 2016 in a book titled 'Earth Transformations.' Published as non-fiction, where a young female agent for DOD, would be set up for abductions with me. With much assistance from Llan Starkweather, we were able to get this book published. Unfortunately, the book has been taken out of circulation.

In the years of 1975 through 1978, I would have abductions by the Greys in the daytime while driving a car with numerous different

2022 01 29 Phantoms & Monsters Radio <https://youtu.be/oE8ZHDChRJY> Phantoms & Monsters Radio A Tribute to BUTCH WITKOWSKI

Butch Witkowski was an independent researcher since 1989 when, along with four other people, he witnessed a UFO of substantial size quietly hover above a mountain in Tucson, Arizona. That was the day that he began his investigations into the UFO phenomenon. [Transcript Link](#)

He soon became a member of MUFON and a field investigator. After moving back to Pennsylvania, he concentrated on UFO research and cases related to alien abduction, mutilations, and unexplained encounters.

Butch had been a member of the Caernarvon Township (PA) Police Department in the 1970s. He used his investigative abilities as a police officer for his fieldwork, later becoming the founder of the UFO Research Center of Pennsylvania (UFORCOP).

I met Butch for the first time in 2013 after expressing my continued interest in the Todd Sees death case. We combined our research and years of experience, making great strides to deeply examine the incident. I'm proud to say that Butch's determination for finding the truth led to several revelations about the case.

Not long after we started working together, he became interested in cryptids, especially the dogman / upright canine phenomenon in our native Pennsylvania. Since 2015, Butch's efforts culminated in exposing over 30 modern sightings and encounters throughout the state.

Seth Breedlove is an Ohio filmmaker. He has written, edited, produced and directed shorts and features about a variety of topics but is best known for his production company and the films they've produced under the Small Town Monsters banner. Before film, Breedlove wrote for a number of websites, newspapers and magazines and learned some of the skills he employs as a director while working as a reporter. Breedlove has also appeared on numerous television and radio programs.

[Transcript Link](#)

In 2013, Breedlove began working on the concept for a series entitled Small Town Monsters. In general, he set out to capture true accounts from tiny communities often forgotten by the larger media outlets, and from the era (1960s and 1970s) of high intensity monster encounters. These cryptid sightings and stories were perfect for a documentary production company with a history of working in the Midwest. He was able to document cryptozoology by interviewing the original witnesses and re-creating/re-discovering elements of the cases at the ground level.

Seth has written and produced over a dozen films, including the more recent 'On The Trail of The Lake Michigan Mothman,' and 'On the Trail of Bigfoot: The Discovery.'

A short film he co-wrote, Chrysaline, debuted at the Louisiana International Film Festival in 2016, and his feature film, Corral, a psychological, supernatural

What are these ray shaped entity observations? Creature? Cryptid? Organic drone? Of this world or alien? Are they related to rods? First person sighting reports from across the country continue to increase, but the people who know what these rays are, are not talking. We need to know, so please comment and share. And if you have had a sighting let us know.

Here are 3 true first person Bigfoot encounters from across the US. There is a reason boys should have adult supervision, a Scout leader puts his Troop at risk in the Mount Hood National Forest. A teenager learns you need to share your catch with the other dwellers along the river. And be polite when you are camping, you could be interrupting creatures that are already there. So don't be shocked if you are screamed at. Remember, when you go into the wild, you are potentially in Bigfoot's country.

To help bring the unexplained to light we present five true first person observations of strange lights and objects in the Miami night skies and from across the US. The more we share what is seen, the more likely it is that disclosure will finally happen. The darkness can be revealing of objects, but not purpose. With all the technology we have, why are there so many unexplained? Or passed off as weather balloons and flares. We all need to share what we have seen and ask for answers.

Here are 5 first-person encounters with Bigfoot, Skunk Ape, Kushtaka, and other cryptid hominids of North America. Imagine an annual family vacation RV camping trip and then, when everyone is settled in for the night, being attacked by a Bigfoot. What is Bigfoot, a primitive hominid relative or a sophisticated extraterrestrial? Perhaps a shapeshifter or skinwalker? Could this answer why Bigfoot and other similar cryptids have been known by mankind for eons, yet never discovered?
