

# PHANTOMS & MONSTERS

RADIO

Presents

**GUEST:**

**MAX  
HAWTHORNE**  
AUTHOR &  
CRYPTID RESEARCHER

*A Paranormal Life*

*with*

*Bernadette McDaniel*

**FRIDAY, JANUARY 6TH - 11PM ET / 8PM PT**

1  
00:01:05,810 --> 00:00:01,069

[Music]

2  
00:01:10,429 --> 00:01:08,330

everyone and happy New Year thank you

3  
00:01:12,230 --> 00:01:10,439

guys for sticking around

4  
00:01:14,030 --> 00:01:12,240

um I do want to just tell you guys that

5  
00:01:17,149 --> 00:01:14,040

I am recovering from covets if you see

6  
00:01:19,070 --> 00:01:17,159

me coughing just don't be alarmed

7  
00:01:21,890 --> 00:01:19,080

um tonight we have a great show for you

8  
00:01:23,929 --> 00:01:21,900

we have researcher author and

9  
00:01:26,749 --> 00:01:23,939

experiencer Max Hawthorne and we're

10  
00:01:29,950 --> 00:01:26,759

going to be discussing the Megalodon so

11  
00:01:37,190 --> 00:01:35,870

IMAX hi hi Max welcome thank you so much

12  
00:01:38,929 --> 00:01:37,200

for being here

13  
00:01:40,969 --> 00:01:38,939

it's my pleasure and by the way I

14

00:01:42,469 --> 00:01:40,979

actually have covet also so we're we're

15

00:01:45,550 --> 00:01:42,479

on the same page

16

00:01:48,890 --> 00:01:45,560

oh dear okay great

17

00:01:51,350 --> 00:01:48,900

and then it just

18

00:01:53,389 --> 00:01:51,360

yeah this is this is my first bout of it

19

00:01:55,130 --> 00:01:53,399

so I'm like the doctor said you're gonna

20

00:01:59,389 --> 00:01:55,140

be slow to recover from it and I'm like

21

00:02:01,249 --> 00:01:59,399

right so but I appreciate you being here

22

00:02:04,249 --> 00:02:01,259

thank you so much I didn't know you had

23

00:02:06,289 --> 00:02:04,259

covet too oh it's all right you know we

24

00:02:07,910 --> 00:02:06,299

do what we can you know

25

00:02:10,130 --> 00:02:07,920

I didn't want to leave you high and dry

26

00:02:14,449 --> 00:02:10,140

so

27

00:02:14,459 --> 00:02:17,869

really my daughters if

28

00:02:17,879 --> 00:02:21,530

you're hearing it later I

29

00:02:25,490 --> 00:02:24,410

I'm a big mug person

30

00:02:27,589 --> 00:02:25,500

I like it

31

00:02:29,690 --> 00:02:27,599

so watch out what about yourself for

32

00:02:32,630 --> 00:02:29,700

those who don't know you I'm sorry say

33

00:02:36,530 --> 00:02:34,729

oh so why don't you tell everyone a

34

00:02:40,010 --> 00:02:36,540

little bit about yourself for those who

35

00:02:43,550 --> 00:02:41,449

um sure

36

00:02:46,910 --> 00:02:43,560

gosh I should pull up my bio and read

37

00:02:49,190 --> 00:02:46,920

that whole boring thing let's see that

38

00:02:50,270 --> 00:02:49,200

should be interesting actually why don't

39

00:02:52,309 --> 00:02:50,280

I do that

40

00:02:54,410 --> 00:02:52,319

this way the key it's better than me

41

00:02:57,410 --> 00:02:54,420

just like you know rambling on and on

42

00:03:00,470 --> 00:02:57,420

and on and stuff although it's kind of

43

00:03:04,970 --> 00:03:02,930

Max Hawthorne is an American author and

44

00:03:07,190 --> 00:03:04,980

screenwriter referred to as the prince

45

00:03:09,350 --> 00:03:07,200

of paleo fiction he is best known for

46

00:03:11,330 --> 00:03:09,360

his Cronus Rising series of sci-fi

47

00:03:13,130 --> 00:03:11,340

suspense throwers which have garnered

48

00:03:15,290 --> 00:03:13,140

both book of the year and People's

49

00:03:17,030 --> 00:03:15,300

Choice Awards he is the Amazon number

50

00:03:19,009 --> 00:03:17,040

one best-selling author of The Cryptid

51  
00:03:21,110 --> 00:03:19,019  
research book monsters and Marine

52  
00:03:23,509 --> 00:03:21,120  
Mysteries as well as Memoirs of a gym

53  
00:03:25,250 --> 00:03:23,519  
rat an outrageous expose of the hell

54  
00:03:27,110 --> 00:03:25,260  
Club Ministry it's really gross that

55  
00:03:29,390 --> 00:03:27,120  
stuff and the children's book I wanted

56  
00:03:30,830 --> 00:03:29,400  
Tyrannosaurus for Christmas his song a

57  
00:03:33,110 --> 00:03:30,840  
tyrannosaurus for Christmas peaked at

58  
00:03:34,729 --> 00:03:33,120  
number two on the 2021 World Indie

59  
00:03:36,649 --> 00:03:34,739  
charts he has been interviewed by both

60  
00:03:39,290 --> 00:03:36,659  
the Washington Post and fangoria

61  
00:03:41,990 --> 00:03:39,300  
magazine has appeared on QVC spaced out

62  
00:03:44,509 --> 00:03:42,000  
radio Coast to Coast AM and in a tribe

63  
00:03:46,729 --> 00:03:44,519

called quests rap video I left my wallet

64

00:03:48,649 --> 00:03:46,739

in El Segundo I was the cop

65

00:03:50,630 --> 00:03:48,659

and it goes on and on about a lot of

66

00:03:53,210 --> 00:03:50,640

other stuff where you're born yada yada

67

00:03:54,710 --> 00:03:53,220

yada lives in the greater northeast with

68

00:03:56,630 --> 00:03:54,720

his wife daughter and a pair of enormous

69

00:03:58,670 --> 00:03:56,640

Siberian Forest cats one of whom you met

70

00:04:01,570 --> 00:03:58,680

who when they're not stalking Max's toes

71

00:04:04,309 --> 00:04:01,580

sleep on his desk as he writes

72

00:04:06,110 --> 00:04:04,319

that's about it

73

00:04:08,149 --> 00:04:06,120

well I figure that it's easier for the

74

00:04:10,970 --> 00:04:08,159

guests to like explain themselves better

75

00:04:12,309 --> 00:04:10,980

than I could so I can't remember all

76

00:04:14,750 --> 00:04:12,319

that stuff

77

00:04:16,430 --> 00:04:14,760

yeah if I read the rest of it I would

78

00:04:18,289 --> 00:04:16,440

have gotten tired just reading it it's

79

00:04:20,090 --> 00:04:18,299

like you know do you actually do all

80

00:04:22,670 --> 00:04:20,100

this stuff my God how do you have time

81

00:04:26,689 --> 00:04:22,680

to live you know so

82

00:04:28,670 --> 00:04:26,699

anyway right well thank you so what

83

00:04:30,170 --> 00:04:28,680

would you what would you like to though

84

00:04:31,550 --> 00:04:30,180

I appreciate it what would you like to

85

00:04:33,469 --> 00:04:31,560

talk about would you like to talk about

86

00:04:35,510 --> 00:04:33,479

your Bigfoot experience first or do you

87

00:04:37,730 --> 00:04:35,520

just want to dive into Megalodon

88

00:04:39,650 --> 00:04:37,740

uh let's do the Bigfoot thing first and

89

00:04:41,150 --> 00:04:39,660

get that out of the way actually I

90

00:04:43,129 --> 00:04:41,160

actually managed to dig out some stuff

91

00:04:44,930 --> 00:04:43,139

to go along with it to you know spice it

92

00:04:46,430 --> 00:04:44,940

up a little and all that keep in mind I

93

00:04:47,930 --> 00:04:46,440

mean all this is in Monsters and three

94

00:04:50,510 --> 00:04:47,940

mysteries in a lot more detail that I'm

95

00:04:52,730 --> 00:04:50,520

going to remember here but um

96

00:04:55,249 --> 00:04:52,740

so basically uh

97

00:04:58,249 --> 00:04:55,259

when this happened I was not even really

98

00:05:01,129 --> 00:04:58,259

aware of the existence of Bigfoot okay

99

00:05:05,150 --> 00:05:01,139

this is almost 30 years ago and uh back

100

00:05:07,129 --> 00:05:05,160

then my family we had a uh a house on

101  
00:05:08,330 --> 00:05:07,139  
Candlewood Lake up in Connecticut in

102  
00:05:10,850 --> 00:05:08,340  
Danbury

103  
00:05:12,170 --> 00:05:10,860  
so attached Canada lake is a very large

104  
00:05:14,030 --> 00:05:12,180  
lake

105  
00:05:16,909 --> 00:05:14,040  
um It's like got 50 miles of Coastline

106  
00:05:19,010 --> 00:05:16,919  
so you can imagine that's fairly sizable

107  
00:05:21,650 --> 00:05:19,020  
connected to it and technically part of

108  
00:05:24,290 --> 00:05:21,660  
Candlewood is a slate called Swan's Pond

109  
00:05:26,270 --> 00:05:24,300  
which is I guess a couple miles long or

110  
00:05:29,029 --> 00:05:26,280  
something like that you know maybe 60

111  
00:05:31,670 --> 00:05:29,039  
feet deep in places and squons is kind

112  
00:05:34,730 --> 00:05:31,680  
of like State Park okay

113  
00:05:37,370 --> 00:05:34,740

so it's connected to the Apparently and

114

00:05:40,490 --> 00:05:37,380

they have built a Causeway piled up

115

00:05:43,249 --> 00:05:40,500

rocks and stuff between the two so that

116

00:05:44,930 --> 00:05:43,259

cars could drive over okay and this

117

00:05:46,670 --> 00:05:44,940

Causeway so it has it's either a one or

118

00:05:49,969 --> 00:05:46,680

two lane road I don't remember to be

119

00:05:51,710 --> 00:05:49,979

honest it's been so long but um it has a

120

00:05:53,570 --> 00:05:51,720

so that the waters could flow back and

121

00:05:56,749 --> 00:05:53,580

forth there's like a steel reinforced

122

00:05:58,850 --> 00:05:56,759

concrete like I don't know duct that

123

00:06:01,310 --> 00:05:58,860

goes under the road maybe it's six feet

124

00:06:03,230 --> 00:06:01,320

wide or something like that so water and

125

00:06:05,510 --> 00:06:03,240

Wildlife fish Etc can flow back and

126

00:06:09,469 --> 00:06:05,520

forth does that make sense

127

00:06:11,570 --> 00:06:09,479

cool so um with all the rocks and gravel

128

00:06:13,129 --> 00:06:11,580

piled up around there and stuff and we

129

00:06:14,870 --> 00:06:13,139

figured my brother's license we like to

130

00:06:16,969 --> 00:06:14,880

fish we figured that there'd be a lot of

131

00:06:20,029 --> 00:06:16,979

crayfish there so we came up with this

132

00:06:21,650 --> 00:06:20,039

genius plan I think it was summertime I

133

00:06:23,150 --> 00:06:21,660

could not tell you the day or anything

134

00:06:25,730 --> 00:06:23,160

like that obviously it's so long ago but

135

00:06:28,430 --> 00:06:25,740

uh and we got up when it was still pitch

136

00:06:30,170 --> 00:06:28,440

black out and we drove to the lake we

137

00:06:32,930 --> 00:06:30,180

had like live shiners that we picked up

138

00:06:34,610 --> 00:06:32,940

the night before and uh you know fishing

139

00:06:36,230 --> 00:06:34,620

with Bobbers with shiners under them if

140

00:06:39,230 --> 00:06:36,240

you know what that is

141

00:06:40,730 --> 00:06:39,240

um so we are kind of yeah right well we

142

00:06:42,529 --> 00:06:40,740

figured there'd be crayfish all around

143

00:06:44,809 --> 00:06:42,539

those rocks and stuff we didn't know for

144

00:06:46,070 --> 00:06:44,819

sure but it made sense we figured

145

00:06:48,350 --> 00:06:46,080

there'd be a lot of bass lurking around

146

00:06:49,550 --> 00:06:48,360

the shallows especially krakadawn so

147

00:06:51,230 --> 00:06:49,560

we'd be putting minnows in front of

148

00:06:54,230 --> 00:06:51,240

their faces and we would clean up you

149

00:06:55,490 --> 00:06:54,240

know catch a lot of fish from sure

150

00:06:57,350 --> 00:06:55,500

um unfortunately for us we didn't check

151

00:06:59,629 --> 00:06:57,360

the weather it had rained its butt off

152

00:07:01,309 --> 00:06:59,639

all the night before and when we got

153

00:07:02,570 --> 00:07:01,319

there and the sun was just coming up the

154

00:07:04,010 --> 00:07:02,580

water even though it was flat calm it

155

00:07:07,850 --> 00:07:04,020

was the color of coffee

156

00:07:09,950 --> 00:07:07,860

you know like dark dark and that's bad

157

00:07:12,529 --> 00:07:09,960

news like for bait fishing because if

158

00:07:15,290 --> 00:07:12,539

the bass doesn't like run smack into the

159

00:07:16,550 --> 00:07:15,300

bait he's not gonna find it like lure

160

00:07:19,070 --> 00:07:16,560

fishermen know in those conditions you

161

00:07:21,170 --> 00:07:19,080

use like a bright chartreuse with a lot

162

00:07:23,390 --> 00:07:21,180

of vibration to try and get a strike Etc

163

00:07:24,890 --> 00:07:23,400

but we were an experience so we sat

164

00:07:26,629 --> 00:07:24,900

there for I don't know how long half an

165

00:07:29,330 --> 00:07:26,639

hour or something like that an hour we

166

00:07:32,450 --> 00:07:29,340

had our rods out we were getting nothing

167

00:07:35,270 --> 00:07:32,460

so my this was on the swan side mind you

168

00:07:36,830 --> 00:07:35,280

okay and so my brothers decided you know

169

00:07:38,629 --> 00:07:36,840

we're gonna go cross over and try the

170

00:07:41,270 --> 00:07:38,639

Candlewood side which means you go up

171

00:07:43,550 --> 00:07:41,280

the hill across that road down the other

172

00:07:44,930 --> 00:07:43,560

side in a straight line from where we

173

00:07:47,150 --> 00:07:44,940

were sitting that might have been like

174

00:07:48,890 --> 00:07:47,160

50 feet but you know it's a little

175

00:07:50,570 --> 00:07:48,900

different when you go up cross Etc and

176

00:07:53,029 --> 00:07:50,580

of course you got to be careful so I was

177

00:07:54,650 --> 00:07:53,039

like go ahead go go I'll stay here and I

178

00:07:56,930 --> 00:07:54,660

think you know sibling rivalries I'll be

179

00:07:59,029 --> 00:07:56,940

by myself when the fish turn on you know

180

00:08:00,710 --> 00:07:59,039

I'm Gonna Catch like a lot more or

181

00:08:03,830 --> 00:08:00,720

whatever I'll get the bigger fish you

182

00:08:06,110 --> 00:08:03,840

know whatever yeah so I'm sitting on

183

00:08:08,210 --> 00:08:06,120

like a bucket you know flipped over a

184

00:08:10,370 --> 00:08:08,220

bucket and uh you know nothing's going

185

00:08:11,749 --> 00:08:10,380

on the lake there's nobody awake there's

186

00:08:13,070 --> 00:08:11,759

nothing out there tiny bit of mist

187

00:08:15,529 --> 00:08:13,080

floating around and stuff like that

188

00:08:19,129 --> 00:08:15,539

sun's coming up and all and then I start

189

00:08:21,050 --> 00:08:19,139

seeing this thing out in the water and

190

00:08:22,969 --> 00:08:21,060

distance I mean I have to go back there

191

00:08:25,249 --> 00:08:22,979

to really gauge it it might have been

192

00:08:27,290 --> 00:08:25,259

100 or 200 feet away initially

193

00:08:28,730 --> 00:08:27,300

but it was just like dark object it was

194

00:08:31,129 --> 00:08:28,740

on the surface and it was moving around

195

00:08:32,510 --> 00:08:31,139

and then it disappeared and then it came

196

00:08:34,790 --> 00:08:32,520

back up again

197

00:08:36,050 --> 00:08:34,800

a little bit closer and it disappeared

198

00:08:37,550 --> 00:08:36,060

and it would disappear for like a minute

199

00:08:39,290 --> 00:08:37,560

or two at a time

200

00:08:40,969 --> 00:08:39,300

so I'm staring at this thing and I'm

201  
00:08:42,949 --> 00:08:40,979  
like At first I thought oh there's a big

202  
00:08:45,230 --> 00:08:42,959  
fish but then I realized it wasn't a

203  
00:08:46,190 --> 00:08:45,240  
fish you know I've noticed that it was

204  
00:08:49,250 --> 00:08:46,200  
like a

205  
00:08:50,930 --> 00:08:49,260  
kind of dome-shaped and hairy you know

206  
00:08:52,550 --> 00:08:50,940  
like it looked like it was like a like a

207  
00:08:55,670 --> 00:08:52,560  
beaver like it was a reddish brown color

208  
00:08:57,050 --> 00:08:55,680  
okay so I thought oh it's a muskrat yeah

209  
00:08:58,310 --> 00:08:57,060  
and then it got a tiny bit closer and

210  
00:08:59,930 --> 00:08:58,320  
I'm like no that's too big to be a

211  
00:09:02,150 --> 00:08:59,940  
muskrat I'm like that must be a beaver

212  
00:09:03,410 --> 00:09:02,160  
you know like a beaver's butt or back

213  
00:09:05,870 --> 00:09:03,420

you know sticking up like that or

214

00:09:08,449 --> 00:09:05,880

something like that and I'm like uh it's

215

00:09:09,470 --> 00:09:08,459

not a no it's not a beaver not I don't

216

00:09:12,650 --> 00:09:09,480

even know if there are beavers around

217

00:09:14,990 --> 00:09:12,660

there but anyway and uh so I continue to

218

00:09:16,610 --> 00:09:15,000

watch and I kept doing the same thing it

219

00:09:18,530 --> 00:09:16,620

would go underwater

220

00:09:20,389 --> 00:09:18,540

Superior for a minute or two and then

221

00:09:21,949 --> 00:09:20,399

pop back up maybe five or ten feet

222

00:09:24,530 --> 00:09:21,959

closer I don't know I have no idea what

223

00:09:26,030 --> 00:09:24,540

it was doing okay and then I started

224

00:09:27,889 --> 00:09:26,040

seeing other parts of it though it's got

225

00:09:29,570 --> 00:09:27,899

a little bit closer like there seemed to

226

00:09:31,610 --> 00:09:29,580

be like a body behind this what I

227

00:09:34,130 --> 00:09:31,620

realized was the head and then like

228

00:09:37,670 --> 00:09:34,140

limbs or something like that and so I'm

229

00:09:39,230 --> 00:09:37,680

like is that a deer and I'm like no

230

00:09:42,050 --> 00:09:39,240

because you know the deer have that

231

00:09:44,750 --> 00:09:42,060

classic you know fake Loch Ness monster

232

00:09:46,610 --> 00:09:44,760

profile the body's floating the head and

233

00:09:48,290 --> 00:09:46,620

necks pick up that type of stuff and I

234

00:09:49,670 --> 00:09:48,300

saw the head at the top of it it was

235

00:09:51,650 --> 00:09:49,680

like a dome

236

00:09:54,949 --> 00:09:51,660

um so that didn't make sense and then I

237

00:09:56,210 --> 00:09:54,959

thought is this like a big Irish Setter

238

00:09:58,070 --> 00:09:56,220

you know because it was kind of that

239

00:10:00,769 --> 00:09:58,080

color but that didn't work either

240

00:10:03,610 --> 00:10:00,779

because it wasn't a dog and it kept

241

00:10:06,889 --> 00:10:03,620

diving you know which was really weird

242

00:10:08,870 --> 00:10:06,899

and so it's gradually getting closer and

243

00:10:10,310 --> 00:10:08,880

closer and I'm like what am I looking at

244

00:10:12,710 --> 00:10:10,320

here you know I forgot all about the

245

00:10:14,449 --> 00:10:12,720

fishing at this point so I stood up and

246

00:10:17,269 --> 00:10:14,459

I'm looking I'm trying to peek over and

247

00:10:19,250 --> 00:10:17,279

see and I can see now that that don't

248

00:10:21,590 --> 00:10:19,260

think is definitely ahead and there's

249

00:10:24,110 --> 00:10:21,600

like you know Parts behind it and then

250

00:10:26,870 --> 00:10:24,120

there's what look like legs and I could

251  
00:10:29,449 --> 00:10:26,880  
see the legs move as it would submerge

252  
00:10:30,949 --> 00:10:29,459  
and they were together though they

253  
00:10:33,050 --> 00:10:30,959  
didn't do a flutter kick like a person

254  
00:10:35,389 --> 00:10:33,060  
they moved together like you know like

255  
00:10:37,130 --> 00:10:35,399  
when girls wear those mermaid tails this

256  
00:10:39,410 --> 00:10:37,140  
type of stuff or they have like swimming

257  
00:10:41,090 --> 00:10:39,420  
fins that are one piece whales flukes

258  
00:10:42,350 --> 00:10:41,100  
they move together like that as they

259  
00:10:45,230 --> 00:10:42,360  
went under it

260  
00:10:47,329 --> 00:10:45,240  
so I'm like I have no idea what I'm

261  
00:10:49,009 --> 00:10:47,339  
looking at okay but it's gradually

262  
00:10:50,509 --> 00:10:49,019  
getting closer and closer and I'm

263  
00:10:52,370 --> 00:10:50,519

thinking gosh I wonder if I should try

264

00:10:54,470 --> 00:10:52,380

and like cast out and see if I could

265

00:10:55,970 --> 00:10:54,480

snag this thing you know which would

266

00:10:57,850 --> 00:10:55,980

have been as it turned out a very very

267

00:11:01,730 --> 00:10:57,860

bad idea okay

268

00:11:03,590 --> 00:11:01,740

yeah when it was that far away like on

269

00:11:05,870 --> 00:11:03,600

you know we're talking at least 100 feet

270

00:11:08,990 --> 00:11:05,880

still maybe 150 feet I thought it was

271

00:11:10,190 --> 00:11:09,000

maybe five feet long okay on a guess you

272

00:11:13,730 --> 00:11:10,200

know so a girl started getting a little

273

00:11:16,490 --> 00:11:13,740

closer a little closer and it was uh

274

00:11:18,470 --> 00:11:16,500

moving more towards the center I guess

275

00:11:20,389 --> 00:11:18,480

towards where that big pipe was which

276

00:11:21,769 --> 00:11:20,399

was right kind of next to me it might

277

00:11:23,449 --> 00:11:21,779

have been like I don't know where I'm

278

00:11:26,210 --> 00:11:23,459

sitting on the Rocks maybe you know 20

279

00:11:27,829 --> 00:11:26,220

feet 30 feet to the you know that I

280

00:11:29,509 --> 00:11:27,839

don't call it like trough of water going

281

00:11:31,850 --> 00:11:29,519

through and that might have been like

282

00:11:33,769 --> 00:11:31,860

eight feet across or ten feet across at

283

00:11:37,009 --> 00:11:33,779

certain points but um

284

00:11:38,210 --> 00:11:37,019

so I decided I'm going to stand up and

285

00:11:39,590 --> 00:11:38,220

I'm going to and it was getting more

286

00:11:41,449 --> 00:11:39,600

bright out by the way

287

00:11:44,150 --> 00:11:41,459

this was important because I saw this

288

00:11:46,250 --> 00:11:44,160

really clearly and um so I figured let

289

00:11:48,650 --> 00:11:46,260

me get up and I'm going to start backing

290

00:11:50,750 --> 00:11:48,660

up the hill and I'll get higher up so I

291

00:11:52,550 --> 00:11:50,760

can see down on this thing better you

292

00:11:54,170 --> 00:11:52,560

know like a vantage point like that and

293

00:11:56,329 --> 00:11:54,180

see through the water a little better

294

00:11:58,190 --> 00:11:56,339

instead of coming at it like this and

295

00:12:00,590 --> 00:11:58,200

that was my plan so as I started to do

296

00:12:02,090 --> 00:12:00,600

that you know it's treacherous footing

297

00:12:03,889 --> 00:12:02,100

there and I dislodged a bunch of the

298

00:12:05,810 --> 00:12:03,899

rocks and gravel whatever and made some

299

00:12:07,430 --> 00:12:05,820

noise and I think this thing had never

300

00:12:11,269 --> 00:12:07,440

realized that I was there the whole time

301

00:12:13,670 --> 00:12:11,279

say I think it was eating crayfish it

302

00:12:15,829 --> 00:12:13,680

was diving down it was catching crayfish

303

00:12:17,810 --> 00:12:15,839

coming up to eat them whatever breathing

304

00:12:19,370 --> 00:12:17,820

going back down this type of stuff you

305

00:12:21,410 --> 00:12:19,380

know like potato chips type thing you

306

00:12:23,569 --> 00:12:21,420

know you gotta have whatever I wasn't

307

00:12:25,430 --> 00:12:23,579

sure about this until I'll explain

308

00:12:27,110 --> 00:12:25,440

more but when I went on a show and I got

309

00:12:30,110 --> 00:12:27,120

proof of this but um

310

00:12:33,769 --> 00:12:30,120

so when the rocks move the thing knew I

311

00:12:35,930 --> 00:12:33,779

was there and it was alarmed and it like

312

00:12:39,170 --> 00:12:35,940

rolled like this and Dove and went under

313

00:12:42,530 --> 00:12:39,180

the water and as it did I saw its arm

314

00:12:45,410 --> 00:12:42,540

like it's its shoulder and its upper arm

315

00:12:47,329 --> 00:12:45,420

and its forearm like this cut across

316

00:12:50,329 --> 00:12:47,339

like that okay all the visibles went

317

00:12:52,370 --> 00:12:50,339

underwater and it had an arm like a very

318

00:12:55,730 --> 00:12:52,380

muscular person it was definitely

319

00:12:57,829 --> 00:12:55,740

anthropoid okay but covered with thick

320

00:13:00,530 --> 00:12:57,839

reddish brown obviously drenched hair

321

00:13:02,269 --> 00:13:00,540

you know but very muscular and I'm like

322

00:13:04,190 --> 00:13:02,279

what the heck is that you know and it

323

00:13:05,990 --> 00:13:04,200

went underwater crashed like that and I

324

00:13:07,490 --> 00:13:06,000

thought it was a huge orangutan or

325

00:13:09,110 --> 00:13:07,500

something like that at this point which

326

00:13:11,509 --> 00:13:09,120

is of course crazy because who has an

327

00:13:14,329 --> 00:13:11,519

orangutan wandering around Connecticut

328

00:13:16,970 --> 00:13:14,339

you know made no sense so the thing is

329

00:13:18,949 --> 00:13:16,980

swimming but you never know

330

00:13:20,870 --> 00:13:18,959

but I like I said I still had no idea

331

00:13:23,389 --> 00:13:20,880

about Bigfoot at this point okay all I

332

00:13:25,370 --> 00:13:23,399

know is I just saw like a huge like a

333

00:13:27,050 --> 00:13:25,380

big ape like thing like it's shoulder

334

00:13:28,550 --> 00:13:27,060

arm all this stuff it was very muscular

335

00:13:31,550 --> 00:13:28,560

I got to give it credit he must have

336

00:13:34,069 --> 00:13:31,560

been pumping up a lot but uh so it swims

337

00:13:37,069 --> 00:13:34,079

through the channel right next to me and

338

00:13:39,170 --> 00:13:37,079

I had rushed over there to look and that

339

00:13:41,090 --> 00:13:39,180

was a little bit scary because from a

340

00:13:42,769 --> 00:13:41,100

distance it looked small but when it

341

00:13:44,329 --> 00:13:42,779

went through the channel the shadowy

342

00:13:46,310 --> 00:13:44,339

formed that I saw under there was quite

343

00:13:48,710 --> 00:13:46,320

big and the water remember the water in

344

00:13:50,810 --> 00:13:48,720

the channel went like this like like up

345

00:13:53,090 --> 00:13:50,820

like that like something very large and

346

00:13:54,590 --> 00:13:53,100

passed through at high speed and it kind

347

00:13:56,210 --> 00:13:54,600

of scared me a little bit to be honest

348

00:13:59,990 --> 00:13:56,220

because I'm like whoa what is that yeah

349

00:14:01,430 --> 00:14:00,000

and so so I ran up the hill almost got

350

00:14:03,290 --> 00:14:01,440

hit by a car

351

00:14:05,509 --> 00:14:03,300

crossed over

352

00:14:07,069 --> 00:14:05,519

grab my brothers I'm like look there's a

353

00:14:09,590 --> 00:14:07,079

I was calling it The hairy red thing

354

00:14:11,269 --> 00:14:09,600

okay and I said there's this big hairy

355

00:14:12,470 --> 00:14:11,279

red thing I said it's swimming through

356

00:14:15,110 --> 00:14:12,480

the pipe it's going to come through

357

00:14:17,930 --> 00:14:15,120

right now right now just watch watch

358

00:14:20,329 --> 00:14:17,940

of course this thing was quick and by

359

00:14:21,769 --> 00:14:20,339

the time I got up there and oh my car it

360

00:14:23,389 --> 00:14:21,779

had already gone through

361

00:14:24,290 --> 00:14:23,399

you know so by the time I got down on

362

00:14:25,970 --> 00:14:24,300

the other side it was sort of going

363

00:14:27,410 --> 00:14:25,980

we're standing there and the seconds are

364

00:14:28,970 --> 00:14:27,420

taken by and they're like you're full of

365

00:14:30,889 --> 00:14:28,980

it you're an idiot you know the usual

366

00:14:33,949 --> 00:14:30,899

sibling insults whatever

367

00:14:35,870 --> 00:14:33,959

so then yeah as I was being berated

368

00:14:37,490 --> 00:14:35,880

there was this like crashing sound in

369

00:14:39,710 --> 00:14:37,500

the water off to our left and there are

370

00:14:42,530 --> 00:14:39,720

these lily pads along the edges of the

371

00:14:44,150 --> 00:14:42,540

you know the edge of the lake there like

372

00:14:45,470 --> 00:14:44,160

you know I don't know how far I stuck

373

00:14:47,210 --> 00:14:45,480

out like five or eight feet or something

374

00:14:49,550 --> 00:14:47,220

like that and it was something under the

375

00:14:51,170 --> 00:14:49,560

lily pads that was thrashing around and

376

00:14:53,569 --> 00:14:51,180

then moving along and then thrashing

377

00:14:55,850 --> 00:14:53,579

around and moving along Etc so I think

378

00:14:58,009 --> 00:14:55,860

this thing went under the lily pads for

379

00:15:00,290 --> 00:14:58,019

cover and was using them to work its way

380

00:15:03,110 --> 00:15:00,300

around until around the point and then

381

00:15:04,790 --> 00:15:03,120

it disappeared so I didn't think much of

382

00:15:06,170 --> 00:15:04,800

it honestly up until I started doing

383

00:15:08,990 --> 00:15:06,180

research for Monsters and Marine

384

00:15:10,490 --> 00:15:09,000

Mysteries and then I realized holy crap

385

00:15:12,710 --> 00:15:10,500

you know I'm like this is this thing

386

00:15:14,990 --> 00:15:12,720

must have been a Bigfoot

387

00:15:16,550 --> 00:15:15,000

so I started looking researching and I

388

00:15:18,050 --> 00:15:16,560

found an old newspaper article from like

389

00:15:20,569 --> 00:15:18,060

a hundred years ago or something like

390

00:15:23,650 --> 00:15:20,579

that from the lake and it said like um

391

00:15:26,329 --> 00:15:23,660

fishermen report hairy wild child

392

00:15:29,030 --> 00:15:26,339

swimming in Lake that's what they called

393

00:15:30,470 --> 00:15:29,040

it and I spoke to some researchers and

394

00:15:32,810 --> 00:15:30,480

they said back then that's what they

395

00:15:34,850 --> 00:15:32,820

used to call them you know because then

396

00:15:36,889 --> 00:15:34,860

they're the term Sasquatch or Bigfoot

397

00:15:39,050 --> 00:15:36,899

was Bigfoot wasn't even coin yet that

398

00:15:41,750 --> 00:15:39,060

happened like whatever Pattinson's film

399

00:15:43,610 --> 00:15:41,760

and all that stuff so yeah that's you

400

00:15:46,189 --> 00:15:43,620

know I found evidence of that and then

401  
00:15:48,590 --> 00:15:46,199  
the interesting thing for me was is that

402  
00:15:50,050 --> 00:15:48,600  
let me just pull this up is that I was

403  
00:15:52,449 --> 00:15:50,060  
on this uh

404  
00:15:56,030 --> 00:15:52,459  
other show like a little over a year ago

405  
00:15:58,250 --> 00:15:56,040  
and this guy he is a celebrity deaf

406  
00:15:59,810 --> 00:15:58,260  
whose name will not be mentioned but he

407  
00:16:02,150 --> 00:15:59,820  
was listening to the show I was on I was

408  
00:16:03,829 --> 00:16:02,160  
talking about this stuff and he said yo

409  
00:16:06,530 --> 00:16:03,839  
I just listened to today's episode about

410  
00:16:08,930 --> 00:16:06,540  
Candlewood Lake OMG I know the place

411  
00:16:11,689 --> 00:16:08,940  
well we used to Camp there back in the

412  
00:16:14,269 --> 00:16:11,699  
late 70s and early 80s I have fished the

413  
00:16:17,269 --> 00:16:14,279

same Causeway that Max described I know

414

00:16:19,370 --> 00:16:17,279

the tunnel well and yes we gathered

415

00:16:21,590 --> 00:16:19,380

crayfish there to roast on our campfires

416

00:16:24,050 --> 00:16:21,600

anyway we were camping there one night

417

00:16:25,790 --> 00:16:24,060

and heard rustling around our tents and

418

00:16:27,949 --> 00:16:25,800

kind of brushed it off as deer but the

419

00:16:30,050 --> 00:16:27,959

next day we went fishing and when we

420

00:16:31,370 --> 00:16:30,060

came back to Camp our tents were

421

00:16:33,470 --> 00:16:31,380

destroyed and everything was thrown

422

00:16:35,090 --> 00:16:33,480

everywhere we just thought it was some

423

00:16:35,990 --> 00:16:35,100

crazy hippies and never thought twice

424

00:16:37,850 --> 00:16:36,000

about it

425

00:16:40,129 --> 00:16:37,860

a few weeks later my buddies wanted to

426

00:16:42,170 --> 00:16:40,139

go back there to camp for the weekend

427

00:16:43,610 --> 00:16:42,180

excuse me and I told them that I didn't

428

00:16:45,530 --> 00:16:43,620

want to go because all my stuff got

429

00:16:47,629 --> 00:16:45,540

destroyed last time we were there

430

00:16:50,569 --> 00:16:47,639

they went without me and when they

431

00:16:52,129 --> 00:16:50,579

returned I kind of poked fun at them and

432

00:16:54,590 --> 00:16:52,139

asked that the crazy hippies came back

433

00:16:57,170 --> 00:16:54,600

and trashed their Camp again they said

434

00:17:00,769 --> 00:16:57,180

no but they said when they went out in

435

00:17:03,230 --> 00:17:00,779

the morning I gotta get the rest of this

436

00:17:05,090 --> 00:17:03,240

to go fishing in their canoe they said

437

00:17:07,309 --> 00:17:05,100

that they were about 30 or 40 feet

438

00:17:08,990 --> 00:17:07,319

offshore now this would be the wood side

439

00:17:12,110 --> 00:17:09,000

of squons pond just as we understand

440

00:17:14,150 --> 00:17:12,120

that and Swan's Pond like the woods

441

00:17:16,970 --> 00:17:14,160

there if you ever go hiking there is

442

00:17:18,650 --> 00:17:16,980

incredibly rough I mean like I've been

443

00:17:22,130 --> 00:17:18,660

up there there are Boulders the size of

444

00:17:24,770 --> 00:17:22,140

houses they're huge inclines treacherous

445

00:17:27,230 --> 00:17:24,780

footing so thick I mean it's like jungle

446

00:17:29,210 --> 00:17:27,240

you know you could not like you know if

447

00:17:31,250 --> 00:17:29,220

you ran through there carelessly you'd

448

00:17:32,810 --> 00:17:31,260

break a leg knee your neck whatever I'm

449

00:17:35,330 --> 00:17:32,820

just telling you so anyway

450

00:17:38,029 --> 00:17:35,340

um so yeah so you have to be very agile

451  
00:17:40,250 --> 00:17:38,039  
to get through there basically right I

452  
00:17:42,230 --> 00:17:40,260  
mean like I'm careful I mean very

453  
00:17:43,970 --> 00:17:42,240  
careful yeah I mean if I shoot your

454  
00:17:46,250 --> 00:17:43,980  
photos you'd be like wow because it's

455  
00:17:47,870 --> 00:17:46,260  
like the side of a mountain yeah okay so

456  
00:17:50,150 --> 00:17:47,880  
they said they were 30 or 40 feet I'm

457  
00:17:52,310 --> 00:17:50,160  
sure they heard crazy thrashing in the

458  
00:17:53,750 --> 00:17:52,320  
woods and a buck Came Crashing through

459  
00:17:55,370 --> 00:17:53,760  
the woods and jumped into the water in

460  
00:17:56,450 --> 00:17:55,380  
front of them like he was running from

461  
00:17:58,370 --> 00:17:56,460  
something

462  
00:18:00,529 --> 00:17:58,380  
and he swam by them like he was crazy

463  
00:18:02,510 --> 00:18:00,539

with fear then they heard something in

464

00:18:05,270 --> 00:18:02,520

the woods where he came from running

465

00:18:06,890 --> 00:18:05,280

after him meaning after the deer but it

466

00:18:09,169 --> 00:18:06,900

stopped just before the clearing now I'm

467

00:18:10,610 --> 00:18:09,179

just going to interject like I said you

468

00:18:12,110 --> 00:18:10,620

you ain't running through these Woods

469

00:18:14,990 --> 00:18:12,120

okay and no Runner is going to be able

470

00:18:16,490 --> 00:18:15,000

to Chase and catch a deer okay you're a

471

00:18:19,190 --> 00:18:16,500

design of this but anyway

472

00:18:20,690 --> 00:18:19,200

um so uh then they heard something in

473

00:18:22,730 --> 00:18:20,700

the woods where he came from running

474

00:18:24,890 --> 00:18:22,740

after him but it stopped just before the

475

00:18:25,909 --> 00:18:24,900

clearing they figured it was a hunter or

476

00:18:26,630 --> 00:18:25,919

something like that but didn't see

477

00:18:28,549 --> 00:18:26,640

anything

478

00:18:31,490 --> 00:18:28,559

and they said that whoever it was for

479

00:18:33,049 --> 00:18:31,500

the next half hour or so with a rock or

480

00:18:34,909 --> 00:18:33,059

a stick at them every couple of minutes

481

00:18:37,250 --> 00:18:34,919

or so they just thought it was the

482

00:18:39,710 --> 00:18:37,260

hunter pissed off that they were there

483

00:18:41,330 --> 00:18:39,720

they called out to him and said that

484

00:18:43,669 --> 00:18:41,340

they were in a canoeing to stop throwing

485

00:18:45,409 --> 00:18:43,679

things at them they never got a response

486

00:18:47,150 --> 00:18:45,419

and everything just stopped and they

487

00:18:49,549 --> 00:18:47,160

went on their way without incidents

488

00:18:52,250 --> 00:18:49,559

incident that was the last time any of

489

00:18:56,570 --> 00:18:52,260

us went there to Camp because hold on

490

00:18:59,810 --> 00:18:58,370

we thought that the place was just

491

00:19:01,250 --> 00:18:59,820

cursed with craziness but after I

492

00:19:03,289 --> 00:19:01,260

listened to Max's story it just makes

493

00:19:05,270 --> 00:19:03,299

sense that maybe they encounter what Max

494

00:19:06,230 --> 00:19:05,280

saw holy cow after all these years I

495

00:19:07,970 --> 00:19:06,240

never even thought that it could have

496

00:19:11,090 --> 00:19:07,980

been a squash love your show

497

00:19:13,010 --> 00:19:11,100

so the point is that somebody else who

498

00:19:15,950 --> 00:19:13,020

had been in that exact area I mean

499

00:19:17,630 --> 00:19:15,960

everybody knows that a Bigfoot is a

500

00:19:19,070 --> 00:19:17,640

primate and primates and they have a

501  
00:19:21,650 --> 00:19:19,080  
reputation for throwing stolen people

502  
00:19:24,169 --> 00:19:21,660  
you know hiding growing pine cones

503  
00:19:26,270 --> 00:19:24,179  
throwing Boulders you know all different

504  
00:19:28,909 --> 00:19:26,280  
stuff so it makes sense and since this

505  
00:19:30,710 --> 00:19:28,919  
is like state land basically I would

506  
00:19:32,630 --> 00:19:30,720  
imagine that these things like I thought

507  
00:19:34,490 --> 00:19:32,640  
it you know it was a young one and maybe

508  
00:19:36,230 --> 00:19:34,500  
he was like sneaking out you know with a

509  
00:19:37,909 --> 00:19:36,240  
crayfish addiction and the crack of dawn

510  
00:19:40,669 --> 00:19:37,919  
taking advantage of that type of stuff

511  
00:19:43,130 --> 00:19:40,679  
but I know what I saw let me tell you it

512  
00:19:45,770 --> 00:19:43,140  
freaked me out I mean yeah when you see

513  
00:19:48,650 --> 00:19:45,780

a big hairy muscular arm like that I

514

00:19:50,810 --> 00:19:48,660

mean like humanoid you know like and you

515

00:19:52,490 --> 00:19:50,820

if you just spent like 10 minutes trying

516

00:19:54,710 --> 00:19:52,500

to figure out what you're looking at and

517

00:19:55,970 --> 00:19:54,720

now you totally don't know I I just

518

00:19:59,270 --> 00:19:55,980

really I thought somebody had a better

519

00:20:01,070 --> 00:19:59,280

orangutan that learned to swim and like

520

00:20:02,450 --> 00:20:01,080

to swim and dive or crayfish you know

521

00:20:04,070 --> 00:20:02,460

but

522

00:20:07,070 --> 00:20:04,080

it was a lot bigger than I thought when

523

00:20:09,650 --> 00:20:07,080

it passed it wasn't that

524

00:20:12,950 --> 00:20:09,660

yeah did it

525

00:20:15,650 --> 00:20:12,960

did hurt that some bigfoots they do the

526

00:20:17,330 --> 00:20:15,660

I wasn't that cool smell anything no and

527

00:20:20,930 --> 00:20:17,340

it was when it passed me it was

528

00:20:23,150 --> 00:20:20,940

underwater so but uh you know yeah so

529

00:20:25,909 --> 00:20:23,160

nothing was like coming up okay

530

00:20:27,590 --> 00:20:25,919

no it's funny too because that's amazing

531

00:20:29,570 --> 00:20:27,600

over the years that I've been in that

532

00:20:31,669 --> 00:20:29,580

area you know sometimes we've seen like

533

00:20:33,950 --> 00:20:31,679

helicopters like searching over the

534

00:20:35,330 --> 00:20:33,960

woods and stuff like that you know and

535

00:20:37,130 --> 00:20:35,340

my dad was like oh probably some

536

00:20:40,490 --> 00:20:37,140

criminal or escape from the prison or

537

00:20:43,549 --> 00:20:40,500

something I have no idea but anyway but

538

00:20:44,990 --> 00:20:43,559

yeah that's uh you know very common they

539

00:20:47,330 --> 00:20:45,000

can apparently they can apparently swim

540

00:20:49,010 --> 00:20:47,340

and if and it's ever true when they

541

00:20:50,450 --> 00:20:49,020

exist when people see they swim with

542

00:20:53,810 --> 00:20:50,460

their legs together they're gonna be

543

00:20:57,490 --> 00:20:53,820

like hey Max was right look at that yeah

544

00:21:01,970 --> 00:21:00,650

seeing that like I I don't think I could

545

00:21:03,770 --> 00:21:01,980

handle that

546

00:21:04,909 --> 00:21:03,780

I wouldn't want to seen it on dry land

547

00:21:06,049 --> 00:21:04,919

and to be honest it does sound

548

00:21:08,390 --> 00:21:06,059

terrifying

549

00:21:09,830 --> 00:21:08,400

I mean can you imagine if I cast a lure

550

00:21:12,770 --> 00:21:09,840

out there like with treble hooks and

551  
00:21:17,690 --> 00:21:15,130  
I mean I'm sure I would have gotten bad

552  
00:21:19,310 --> 00:21:17,700  
or it or it would have like realized

553  
00:21:20,690 --> 00:21:19,320  
what what was the problem and said oh

554  
00:21:22,669 --> 00:21:20,700  
let me come over here and have a

555  
00:21:29,830 --> 00:21:22,679  
conversation with you you know and I

556  
00:21:36,710 --> 00:21:33,890  
yeah exactly yeah I

557  
00:21:37,630 --> 00:21:36,720  
lucky you didn't do that

558  
00:21:39,590 --> 00:21:37,640  
no no

559  
00:21:42,770 --> 00:21:39,600  
I do

560  
00:21:44,930 --> 00:21:42,780  
there oh the reason you're here is we're

561  
00:21:47,210 --> 00:21:44,940  
going to talk about another

562  
00:21:49,130 --> 00:21:47,220  
aquatic Cryptid

563  
00:21:53,630 --> 00:21:49,140

Megalodon

564

00:21:57,470 --> 00:21:53,640

so yes what got you into the subject

565

00:22:02,029 --> 00:22:00,770

sharks Megalodon

566

00:22:04,730 --> 00:22:02,039

um well let's see I've been fishing

567

00:22:08,390 --> 00:22:04,740

since I was like four or five years old

568

00:22:09,950 --> 00:22:08,400

I I got an igfa world record to my under

569

00:22:11,450 --> 00:22:09,960

my belt could have had more but I

570

00:22:14,390 --> 00:22:11,460

refused to kill the sharks that we got

571

00:22:17,090 --> 00:22:14,400

but um I mean I write about Marine

572

00:22:19,130 --> 00:22:17,100

Cryptids I fish for them

573

00:22:20,510 --> 00:22:19,140

you know or why fish let's put it that

574

00:22:21,770 --> 00:22:20,520

way some of the things I've caught I

575

00:22:23,990 --> 00:22:21,780

mean if you've seen some of the fish I

576

00:22:27,169 --> 00:22:24,000

caught you'd be astonished I've got fish

577

00:22:28,970 --> 00:22:27,179

big enough to eat people no joke but um

578

00:22:30,649 --> 00:22:28,980

you know that's it is what it is but

579

00:22:32,810 --> 00:22:30,659

yeah I mean initially like my first

580

00:22:34,730 --> 00:22:32,820

novel Cronus Rising

581

00:22:37,549 --> 00:22:34,740

um it didn't have a Megalodon in it it

582

00:22:38,990 --> 00:22:37,559

had uh that thing right there actually

583

00:22:41,270 --> 00:22:39,000

that one's fighting a Megalodon right

584

00:22:42,950 --> 00:22:41,280

there but these giant previous house

585

00:22:45,350 --> 00:22:42,960

called plyosaurs that were kind of like

586

00:22:48,110 --> 00:22:45,360

the uh sperm whales of their day I guess

587

00:22:49,850 --> 00:22:48,120

you'd say or something and as you start

588

00:22:51,649 --> 00:22:49,860

doing research you know you learn more

589

00:22:52,850 --> 00:22:51,659

and more and more about it I mean I

590

00:22:55,669 --> 00:22:52,860

actually ended up delving into

591

00:22:57,409 --> 00:22:55,679

paleontology as a hobby solving the

592

00:22:59,510 --> 00:22:57,419

mystery of how mystery of how pleaseies

593

00:23:01,909 --> 00:22:59,520

were swam solving the mystery of why

594

00:23:03,830 --> 00:23:01,919

pleasey Source had such long necks lots

595

00:23:05,510 --> 00:23:03,840

of other stuff so you just kind of

596

00:23:06,710 --> 00:23:05,520

accrue all this knowledge after a while

597

00:23:08,390 --> 00:23:06,720

and the more you do and the more

598

00:23:10,190 --> 00:23:08,400

research you do the more things you

599

00:23:11,690 --> 00:23:10,200

discover you know I've discovered some

600

00:23:13,610 --> 00:23:11,700

things about Megalodon that's that's

601  
00:23:16,430 --> 00:23:13,620  
some of the Fanboys out there probably

602  
00:23:18,649 --> 00:23:16,440  
don't like you know they've protested a

603  
00:23:21,169 --> 00:23:18,659  
lot there's website out there dedicated

604  
00:23:23,090 --> 00:23:21,179  
to trying to discredit my Megalodon

605  
00:23:27,409 --> 00:23:23,100  
Theory one of them

606  
00:23:30,470 --> 00:23:29,270  
see that's

607  
00:23:33,770 --> 00:23:30,480  
the thing

608  
00:23:36,470 --> 00:23:33,780  
well you see everybody likes to portray

609  
00:23:39,049 --> 00:23:36,480  
carcharodon or careacles or ototus

610  
00:23:41,149 --> 00:23:39,059  
Megalodon as this giant super Predator

611  
00:23:43,370 --> 00:23:41,159  
but the truth of the matter is is that

612  
00:23:46,310 --> 00:23:43,380  
this shark split off from another shark

613  
00:23:48,470 --> 00:23:46,320

called otodus chubutensis you know for

614

00:23:51,070 --> 00:23:48,480

many millions of years ago the two swam

615

00:23:54,890 --> 00:23:51,080

the Seven Seas together at the same time

616

00:23:57,669 --> 00:23:54,900

Megalodon got bigger than chubby tenses

617

00:24:00,230 --> 00:23:57,679

chubby tends to top that around 40 feet

618

00:24:02,390 --> 00:24:00,240

Megalodon was probably able to hit the

619

00:24:04,549 --> 00:24:02,400

mid 50s or maybe even close to 60 feet

620

00:24:06,169 --> 00:24:04,559

of length but there's reasons for that

621

00:24:08,210 --> 00:24:06,179

these animals the reason they branched

622

00:24:09,169 --> 00:24:08,220

off is their teeth are diff are very

623

00:24:10,909 --> 00:24:09,179

different

624

00:24:12,590 --> 00:24:10,919

otodus I mean a chubby tenses tooth are

625

00:24:15,590 --> 00:24:12,600

like like a giant great white sharks

626  
00:24:17,930 --> 00:24:15,600  
they're triangular the crowns are thin

627  
00:24:20,450 --> 00:24:17,940  
from the side like a white sharks Etc

628  
00:24:23,090 --> 00:24:20,460  
more of a predator Megalodon's teeth

629  
00:24:25,250 --> 00:24:23,100  
evolve differently and I've got some

630  
00:24:26,450 --> 00:24:25,260  
stuff for you actually you know since

631  
00:24:29,990 --> 00:24:26,460  
you wanted to talk about all the stuff

632  
00:24:31,370 --> 00:24:30,000  
so this is a now this is not a fresh

633  
00:24:34,430 --> 00:24:31,380  
megalon2 so don't get excited because

634  
00:24:37,490 --> 00:24:34,440  
this is a cast of a six inch on tooth

635  
00:24:39,890 --> 00:24:37,500  
okay I have several Fox size white ones

636  
00:24:41,510 --> 00:24:39,900  
in my collection actually but right now

637  
00:24:44,930 --> 00:24:41,520  
for display purposes I'm not going to

638  
00:24:46,450 --> 00:24:44,940

dig those out so this okay

639

00:24:51,409 --> 00:24:46,460

probably

640

00:24:54,470 --> 00:24:51,419

a you are one or two upper right side

641

00:24:58,029 --> 00:24:54,480

tooth okay this would be the actual

642

00:25:00,890 --> 00:24:58,039

front side here okay the uh

643

00:25:03,409 --> 00:25:00,900

labial side and the lingual side is on

644

00:25:05,210 --> 00:25:03,419

the back so the display side the curved

645

00:25:07,370 --> 00:25:05,220

part this is really the inside of the

646

00:25:09,409 --> 00:25:07,380

mouth okay so what's interesting about

647

00:25:10,970 --> 00:25:09,419

this tooth crown is if you look at it it

648

00:25:13,010 --> 00:25:10,980

has interesting shape besides the fact

649

00:25:15,649 --> 00:25:13,020

it's very thick from the side and

650

00:25:18,890 --> 00:25:15,659

slightly curved okay is that the crown

651  
00:25:21,770 --> 00:25:18,900  
is not a triangle like a white sharks do

652  
00:25:23,210 --> 00:25:21,780  
you notice how it has this column like

653  
00:25:25,789 --> 00:25:23,220  
Center here

654  
00:25:27,710 --> 00:25:25,799  
and then these cusps flare out

655  
00:25:29,510 --> 00:25:27,720  
so when I as I was studying more and

656  
00:25:30,649 --> 00:25:29,520  
more with these teams and trying to

657  
00:25:32,210 --> 00:25:30,659  
figure out there's no other shark that

658  
00:25:34,789 --> 00:25:32,220  
has teeth like this why are they like

659  
00:25:36,169 --> 00:25:34,799  
this okay is I started realizing these

660  
00:25:39,649 --> 00:25:36,179  
teeth were designed to function like

661  
00:25:41,570 --> 00:25:39,659  
bone chisels say meaning that when the

662  
00:25:43,070 --> 00:25:41,580  
shark was feeding on a whale

663  
00:25:45,710 --> 00:25:43,080

it would be trying to bite through the

664

00:25:47,690 --> 00:25:45,720

rib cage now whales have very thick ribs

665

00:25:48,950 --> 00:25:47,700

I mean like I've got fossil ribs here

666

00:25:50,450 --> 00:25:48,960

I'm going to show you in a minute and

667

00:25:53,029 --> 00:25:50,460

these ribs are very hard and they're

668

00:25:55,310 --> 00:25:53,039

made of bone and these teeth are embedded

669

00:25:58,730 --> 00:25:55,320

in Jaws made of cartilage so they can

670

00:26:00,830 --> 00:25:58,740

easily be broken off or break Etc so you

671

00:26:02,690 --> 00:26:00,840

don't just come at a whale smashing the

672

00:26:04,490 --> 00:26:02,700

bite and then lose a third of the teeth

673

00:26:05,510 --> 00:26:04,500

in your jaw that's kind of

674

00:26:07,370 --> 00:26:05,520

counterproductive even though they're

675

00:26:09,049 --> 00:26:07,380

going to be replaced it doesn't like

676  
00:26:10,909 --> 00:26:09,059  
make sense so the what happened with

677  
00:26:12,890 --> 00:26:10,919  
these teeth is they were designed to

678  
00:26:15,169 --> 00:26:12,900  
function like um you know what a log

679  
00:26:18,110 --> 00:26:15,179  
splitter is

680  
00:26:19,190 --> 00:26:18,120  
yeah okay so you take a log splitter and

681  
00:26:21,169 --> 00:26:19,200  
it's sort of shaped like this and it has

682  
00:26:22,909 --> 00:26:21,179  
serrations and you hammer it into a log

683  
00:26:25,370 --> 00:26:22,919  
and the logs puts apart you know for

684  
00:26:28,370 --> 00:26:25,380  
firewood that type of stuff okay so what

685  
00:26:30,350 --> 00:26:28,380  
these people do it you would have whale

686  
00:26:32,269 --> 00:26:30,360  
ribs like here here and here and you'd

687  
00:26:34,010 --> 00:26:32,279  
have teeth here here and here and so

688  
00:26:36,590 --> 00:26:34,020

these teeth would come in and they would

689

00:26:38,090 --> 00:26:36,600

go between two of the ribs like this and

690

00:26:39,710 --> 00:26:38,100

then once they got to a certain point

691

00:26:41,570 --> 00:26:39,720

like you're seeing it touching my

692

00:26:43,610 --> 00:26:41,580

fingers there actually let's get a whale

693

00:26:46,970 --> 00:26:43,620

rib over here actually to show you yeah

694

00:26:49,190 --> 00:26:46,980

okay there's a chunk of one okay then as

695

00:26:53,450 --> 00:26:49,200

it got to a certain point those cusps

696

00:26:56,090 --> 00:26:53,460

would dig in to the ribs on either side

697

00:26:57,470 --> 00:26:56,100

and it would crack crack and it popped

698

00:26:59,950 --> 00:26:57,480

them apart because you'd have two two

699

00:27:04,190 --> 00:26:59,960

rib rib rip understand so pushing

700

00:27:05,390 --> 00:27:04,200

slicing serrations Etc and you can see

701

00:27:07,130 --> 00:27:05,400

this right here

702

00:27:08,990 --> 00:27:07,140

we got physical proof and I have

703

00:27:10,490 --> 00:27:09,000

numerous fossils like this I don't know

704

00:27:13,070 --> 00:27:10,500

if this is going to show too well or not

705

00:27:14,810 --> 00:27:13,080

but you look at this rib here okay

706

00:27:17,630 --> 00:27:14,820

you're going to see

707

00:27:19,430 --> 00:27:17,640

multiple gouges on it you see that one

708

00:27:21,529 --> 00:27:19,440

there and that one there now these are

709

00:27:24,649 --> 00:27:21,539

feeding marks two scores a Megalodon

710

00:27:26,390 --> 00:27:24,659

shark who does yeah I take this right

711

00:27:29,330 --> 00:27:26,400

here

712

00:27:32,750 --> 00:27:29,340

I line this up you'll see it fits

713

00:27:34,310 --> 00:27:32,760

perfectly in that Groove okay

714

00:27:36,830 --> 00:27:34,320

yes

715

00:27:39,010 --> 00:27:36,840

so there's multiple grooves though see

716

00:27:42,890 --> 00:27:39,020

yeah and the first one

717

00:27:44,990 --> 00:27:42,900

for the second one if you look down here

718

00:27:48,590 --> 00:27:45,000

I'm going to show you right I gotta get

719

00:27:50,990 --> 00:27:48,600

this in the right spot here okay I'm

720

00:27:52,730 --> 00:27:51,000

upside down okay right where my finger

721

00:27:55,010 --> 00:27:52,740

is here this one right here

722

00:27:57,409 --> 00:27:55,020

you see how that Groove ends in a big

723

00:27:59,930 --> 00:27:57,419

huge gap of broken bone right there

724

00:28:01,610 --> 00:27:59,940

that's a fracture point so it's a two

725

00:28:04,370 --> 00:28:01,620

makes a circle and squeeze on the other

726

00:28:06,890 --> 00:28:04,380

side this rib pow exploded basically

727

00:28:09,470 --> 00:28:06,900

correct fraction report and this tooth

728

00:28:11,149 --> 00:28:09,480

fits perfectly into those groups okay so

729

00:28:13,190 --> 00:28:11,159

we have proof positive that this is how

730

00:28:15,049 --> 00:28:13,200

they were breaking rib cages with their

731

00:28:16,970 --> 00:28:15,059

specially designed teeth and this is

732

00:28:19,730 --> 00:28:16,980

only in the upper jaw that these Teeth

733

00:28:21,710 --> 00:28:19,740

did this so when sharks feed especially

734

00:28:23,690 --> 00:28:21,720

white sharks and other sharks like that

735

00:28:25,789 --> 00:28:23,700

lemon sharks they do a fork and knife

736

00:28:28,730 --> 00:28:25,799

routine the lower teeth which are

737

00:28:30,409 --> 00:28:28,740

thinner stab into the body to pin it and

738

00:28:32,810 --> 00:28:30,419

then the upper teeth the lips peel back

739

00:28:35,330 --> 00:28:32,820

and then this comes down and it gouges

740

00:28:37,370 --> 00:28:35,340

in so this would come up to a whale and

741

00:28:39,529 --> 00:28:37,380

it would feel around press between the

742

00:28:42,110 --> 00:28:39,539

ribs and be able to bite clean through

743

00:28:46,070 --> 00:28:42,120

all that and take out a huge mouthful of

744

00:28:48,049 --> 00:28:46,080

bone heart lungs Etc this was highly

745

00:28:50,750 --> 00:28:48,059

useful for the animal very nutritious

746

00:28:52,730 --> 00:28:50,760

meat a lot of it and if a carcass had

747

00:28:55,010 --> 00:28:52,740

been there for a long time and it was

748

00:28:57,710 --> 00:28:55,020

stripped by other sharks smaller

749

00:28:59,510 --> 00:28:57,720

megalodons things of that nature Etc and

750

00:29:01,490 --> 00:28:59,520

for all the blubber and the guts were

751  
00:29:03,710 --> 00:29:01,500  
gone already you still let this fish

752  
00:29:05,269 --> 00:29:03,720  
have a huge meal of breaking through

753  
00:29:07,909 --> 00:29:05,279  
that protective rib cage and eating

754  
00:29:09,169 --> 00:29:07,919  
everything in it see so that's how it

755  
00:29:11,930 --> 00:29:09,179  
works but the thing is that that

756  
00:29:14,390 --> 00:29:11,940  
suggests though that this only worked if

757  
00:29:16,070 --> 00:29:14,400  
it was eating carrying

758  
00:29:18,830 --> 00:29:16,080  
because a whale is not going to lie on

759  
00:29:20,810 --> 00:29:18,840  
its side and say yeah big boy just fit

760  
00:29:23,210 --> 00:29:20,820  
those teeth right in there there you go

761  
00:29:24,370 --> 00:29:23,220  
that's it right now but it has to be

762  
00:29:28,370 --> 00:29:24,380  
dead already

763  
00:29:30,350 --> 00:29:28,380

which means that the larger fish which

764

00:29:33,289 --> 00:29:30,360

were of course slower more cumbersome

765

00:29:34,970 --> 00:29:33,299

were eating mostly carrion which was

766

00:29:36,470 --> 00:29:34,980

provided for them by the smaller

767

00:29:38,690 --> 00:29:36,480

megalodons which were still fast enough

768

00:29:41,810 --> 00:29:38,700

to make kills the whales back then were

769

00:29:44,149 --> 00:29:41,820

only 20 or 30 feet long anyway see so

770

00:29:46,310 --> 00:29:44,159

it's kind of like a food pyramid and the

771

00:29:48,529 --> 00:29:46,320

big sharks basically got their dinner

772

00:29:50,450 --> 00:29:48,539

you know from the smaller the the

773

00:29:52,610 --> 00:29:50,460

juveniles the sub-adults let's call it

774

00:29:54,529 --> 00:29:52,620

you know and that's that's how things

775

00:29:56,570 --> 00:29:54,539

worked out so the animal as they got

776

00:29:58,549 --> 00:29:56,580

bigger they switched from Mostly hunting

777

00:29:59,930 --> 00:29:58,559

to mostly Scavenging and people don't

778

00:30:01,850 --> 00:29:59,940

like this because we're like oh it

779

00:30:03,590 --> 00:30:01,860

wasn't it would swim at 70 miles an hour

780

00:30:05,510 --> 00:30:03,600

it could jump up and take planes out of

781

00:30:07,190 --> 00:30:05,520

the air and all this other stuff but

782

00:30:09,289 --> 00:30:07,200

that's not the case physics doesn't work

783

00:30:11,810 --> 00:30:09,299

like that so this theory is not popular

784

00:30:13,490 --> 00:30:11,820

with some people it just it makes more

785

00:30:16,190 --> 00:30:13,500

and more sense and I have so many

786

00:30:18,830 --> 00:30:16,200

fossils to back up now it's insane and

787

00:30:22,190 --> 00:30:18,840

not just whales dugongs all sorts of

788

00:30:24,889 --> 00:30:22,200

every you'd be amazed so

789

00:30:27,769 --> 00:30:24,899

anyway well it seems like you have a

790

00:30:29,870 --> 00:30:27,779

bunch of fans in the chat room oh wait

791

00:30:33,169 --> 00:30:29,880

wait you're gonna like this one now this

792

00:30:34,730 --> 00:30:33,179

okay is a piece of a big fossilized

793

00:30:36,769 --> 00:30:34,740

whale rib now this is interesting

794

00:30:39,169 --> 00:30:36,779

because hold on a second look at the

795

00:30:42,470 --> 00:30:39,179

exact date for this okay so this is from

796

00:30:44,690 --> 00:30:42,480

the Lee Creek mine okay uh phosphatic

797

00:30:48,950 --> 00:30:44,700

myosin strata Lee Creek mine North

798

00:30:52,250 --> 00:30:48,960

Carolina so this is from the Pongo River

799

00:30:55,190 --> 00:30:52,260

Morrow and this rib is between 23 and

800

00:30:56,750 --> 00:30:55,200

around 16 million years old okay now

801  
00:30:58,730 --> 00:30:56,760  
there's two interesting things about it

802  
00:31:00,049 --> 00:30:58,740  
the first is that this is from a very

803  
00:31:02,450 --> 00:31:00,059  
large whale

804  
00:31:04,190 --> 00:31:02,460  
and as most people know the great whales

805  
00:31:05,990 --> 00:31:04,200  
start to evolve until about four and a

806  
00:31:07,970 --> 00:31:06,000  
half million years ago but this came

807  
00:31:10,549 --> 00:31:07,980  
from a big whale which means it could

808  
00:31:12,950 --> 00:31:10,559  
have been Leviton you know the Leviathan

809  
00:31:14,450 --> 00:31:12,960  
sperm whale which is the only big whale

810  
00:31:16,610 --> 00:31:14,460  
that I'm aware of that that goes that

811  
00:31:20,029 --> 00:31:16,620  
far back now what's interesting is that

812  
00:31:22,490 --> 00:31:20,039  
this was actually scavenged by a

813  
00:31:25,310 --> 00:31:22,500

Megalodon you see that if you can see it

814

00:31:27,289 --> 00:31:25,320

you see that big Groove it's so hard to

815

00:31:30,529 --> 00:31:27,299

do this reverse that goes along the rib

816

00:31:33,470 --> 00:31:30,539

like this okay so that is a tooth Groove

817

00:31:35,450 --> 00:31:33,480

a very large megalon too now check this

818

00:31:37,610 --> 00:31:35,460

out remember how I told you how these

819

00:31:39,289 --> 00:31:37,620

customers cut it cut in when they got

820

00:31:41,210 --> 00:31:39,299

you know pressed down a certain point so

821

00:31:42,850 --> 00:31:41,220

if you see this and you slide this in

822

00:31:45,830 --> 00:31:42,860

actually this would have turned this way

823

00:31:48,409 --> 00:31:45,840

anterior like this and it got to a

824

00:31:50,930 --> 00:31:48,419

certain point okay here you see how the

825

00:31:52,909 --> 00:31:50,940

groove gets thicker and wider and deeper

826  
00:31:55,010 --> 00:31:52,919  
there that's where the cusp started to

827  
00:31:56,810 --> 00:31:55,020  
cut in but the thing is if we take this

828  
00:31:59,630 --> 00:31:56,820  
tooth and we put it all the way here

829  
00:32:01,789 --> 00:31:59,640  
this tooth does not cover it see and

830  
00:32:05,450 --> 00:32:01,799  
there's a 6 since 2. so the tooth that

831  
00:32:07,669 --> 00:32:05,460  
bit into this had to have be

832  
00:32:09,649 --> 00:32:07,679  
maybe two inches longer than this

833  
00:32:12,049 --> 00:32:09,659  
possibly an eight inch tooth I mean it

834  
00:32:13,490 --> 00:32:12,059  
was a gigantic Megalodon that's what I'm

835  
00:32:16,130 --> 00:32:13,500  
telling you that was feeding on this

836  
00:32:18,409 --> 00:32:16,140  
carcass okay so but it shows you it

837  
00:32:20,330 --> 00:32:18,419  
shows you how the cost was cut in like

838  
00:32:22,070 --> 00:32:20,340

that and it's fascinating because like I

839

00:32:24,049 --> 00:32:22,080

said this may rib may have come from a

840

00:32:26,630 --> 00:32:24,059

Louis Vuitton so

841

00:32:28,430 --> 00:32:26,640

interesting stuff but anyway so what

842

00:32:31,090 --> 00:32:28,440

else did you want to talk about that

843

00:32:35,090 --> 00:32:31,100

really is yeah

844

00:32:37,130 --> 00:32:35,100

did Megalodon have any Predators or was

845

00:32:37,850 --> 00:32:37,140

it just basically the predator of the

846

00:32:39,950 --> 00:32:37,860

day

847

00:32:41,810 --> 00:32:39,960

well I mean that's you know obviously

848

00:32:43,250 --> 00:32:41,820

nobody was back there but

849

00:32:45,049 --> 00:32:43,260

um I would imagine there was competition

850

00:32:46,610 --> 00:32:45,059

between them and that chubby tends as

851  
00:32:48,710 --> 00:32:46,620  
sharks although when they got to a

852  
00:32:50,630 --> 00:32:48,720  
certain size sharks tend to be size

853  
00:32:53,149 --> 00:32:50,640  
oriented in terms of who gives way to

854  
00:32:55,850 --> 00:32:53,159  
who or whom so it would be easy for a

855  
00:32:58,370 --> 00:32:55,860  
50-foot megalon say to appropriate a

856  
00:32:59,630 --> 00:32:58,380  
carcass from a 30-foot chubby tenses the

857  
00:33:02,090 --> 00:32:59,640  
shark is going to give way to a much

858  
00:33:03,470 --> 00:33:02,100  
larger Predator you know I believe that

859  
00:33:05,750 --> 00:33:03,480  
liviton probably had the same

860  
00:33:07,190 --> 00:33:05,760  
relationship with Megalodon that the

861  
00:33:09,169 --> 00:33:07,200  
great white shark has with the killer

862  
00:33:10,909 --> 00:33:09,179  
whale today which means it was probably

863  
00:33:13,490 --> 00:33:10,919

occasionally preyed on by the whale

864

00:33:14,870 --> 00:33:13,500

although it wasn't its main prey it's

865

00:33:16,789 --> 00:33:14,880

just more like an opportunistic thing

866

00:33:19,009 --> 00:33:16,799

where it sort of shark as an annoyance

867

00:33:20,330 --> 00:33:19,019

or maybe they were like orcas orcas can

868

00:33:23,210 --> 00:33:20,340

be a little on the sadistic side as

869

00:33:25,190 --> 00:33:23,220

people know you know so I don't know

870

00:33:26,409 --> 00:33:25,200

that it heavily contributed to the uh

871

00:33:28,730 --> 00:33:26,419

yeah

872

00:33:30,049 --> 00:33:28,740

let's say because I mean white sharks

873

00:33:32,570 --> 00:33:30,059

and orcas have existed together for

874

00:33:34,009 --> 00:33:32,580

millions of years we know workers when

875

00:33:35,509 --> 00:33:34,019

they want to they kill white sharks and

876

00:33:36,889 --> 00:33:35,519

eat their livers Etc

877

00:33:39,350 --> 00:33:36,899

so it was probably a similar

878

00:33:41,269 --> 00:33:39,360

relationship but not like uh it wasn't a

879

00:33:42,470 --> 00:33:41,279

predator-prey relationship let's say

880

00:33:44,570 --> 00:33:42,480

does that make sense they had different

881

00:33:46,430 --> 00:33:44,580

niches

882

00:33:50,389 --> 00:33:46,440

yeah

883

00:33:52,190 --> 00:33:50,399

okay so I do you have a documentary out

884

00:33:54,769 --> 00:33:52,200

and I did get a chance to watch it and

885

00:33:58,490 --> 00:33:54,779

it's fascinating so my question to you

886

00:34:01,970 --> 00:33:58,500

is did Megalodon kill the whale

887

00:34:04,730 --> 00:34:01,980

yeah I yeah I addressed that in the uh

888

00:34:06,230 --> 00:34:04,740

documentary um if people haven't do you

889

00:34:11,290 --> 00:34:06,240

have a link that people can go to to see

890

00:34:15,710 --> 00:34:13,849

yeah he should have it he can put it in

891

00:34:18,349 --> 00:34:15,720

the chat room

892

00:34:20,030 --> 00:34:18,359

I mean if they go on yeah I don't even

893

00:34:21,589 --> 00:34:20,040

know the name of my name of my own

894

00:34:24,409 --> 00:34:21,599

channel these days what is it Max

895

00:34:26,750 --> 00:34:24,419

Hawthorne's book trailers and videos I

896

00:34:28,550 --> 00:34:26,760

think is the name of it yes but if you

897

00:34:31,369 --> 00:34:28,560

go on there it's called mega shark or

898

00:34:35,750 --> 00:34:31,379

Megalodon and what happened is this past

899

00:34:38,510 --> 00:34:35,760

July uh we had a some adult humpback

900

00:34:41,690 --> 00:34:38,520

whale carcass come ashore off Briar

901  
00:34:43,609 --> 00:34:41,700  
Island Nova Scotia and friends of mine

902  
00:34:45,349 --> 00:34:43,619  
are specialists in this and they took

903  
00:34:48,409 --> 00:34:45,359  
all sorts of photos of the car because

904  
00:34:50,869 --> 00:34:48,419  
at Sea and when it was on land Etc and

905  
00:34:54,169 --> 00:34:50,879  
what was fascinating is

906  
00:34:56,210 --> 00:34:54,179  
um there were at least two very very

907  
00:34:58,490 --> 00:34:56,220  
large shark bites

908  
00:34:59,930 --> 00:34:58,500  
on the carcass and you you guys will be

909  
00:35:03,950 --> 00:34:59,940  
able to see this in the video at length

910  
00:35:06,349 --> 00:35:03,960  
uh the bytes are at least a yard across

911  
00:35:07,430 --> 00:35:06,359  
uh they appear to be white shark bites

912  
00:35:09,290 --> 00:35:07,440  
though

913  
00:35:11,390 --> 00:35:09,300

um which supports the notion that

914

00:35:13,010 --> 00:35:11,400

several marine biologists in the

915

00:35:15,430 --> 00:35:13,020

Discovery Channel have stated where they

916

00:35:18,470 --> 00:35:15,440

feel that occasionally great whites

917

00:35:20,990 --> 00:35:18,480

experience or suffer from gigantism

918

00:35:22,849 --> 00:35:21,000

which is the known phenomena uh we see

919

00:35:25,130 --> 00:35:22,859

it I mean I talked about it Monster

920

00:35:27,470 --> 00:35:25,140

Industries I have caught beetles that

921

00:35:28,910 --> 00:35:27,480

are supposed to be only an inch long and

922

00:35:30,710 --> 00:35:28,920

I've caught them that were two and a

923

00:35:32,930 --> 00:35:30,720

half inches long the same exact species

924

00:35:34,430 --> 00:35:32,940

uh the American toad which is supposed

925

00:35:36,950 --> 00:35:34,440

to get the only four inches or sometimes

926  
00:35:38,810 --> 00:35:36,960  
goes to eight inches Etc so a white

927  
00:35:41,270 --> 00:35:38,820  
shark that's normally topping out at 20

928  
00:35:43,790 --> 00:35:41,280  
or so feet getting almost twice that

929  
00:35:45,530 --> 00:35:43,800  
size is not an impossibility it's you

930  
00:35:48,170 --> 00:35:45,540  
know fish indeterminate growth that type

931  
00:35:50,390 --> 00:35:48,180  
of stuff but I think that it was a white

932  
00:35:51,950 --> 00:35:50,400  
shark that did this um I crunched the

933  
00:35:53,750 --> 00:35:51,960  
numbers or people seen the documentary

934  
00:35:56,810 --> 00:35:53,760  
and the fish appears to have been at

935  
00:35:59,329 --> 00:35:56,820  
least 32 feet in length which is a

936  
00:36:00,650 --> 00:35:59,339  
hellaciously huge shark I mean you're

937  
00:36:02,990 --> 00:36:00,660  
talking something the size of the fish

938  
00:36:05,030 --> 00:36:03,000

and Jaws three which you know people

939

00:36:07,430 --> 00:36:05,040

like because you know that's something

940

00:36:09,109 --> 00:36:07,440

for reference Etc you know it always

941

00:36:10,550 --> 00:36:09,119

scare me as a kid when the guy got

942

00:36:12,050 --> 00:36:10,560

swallowed alive and he didn't remember

943

00:36:13,430 --> 00:36:12,060

you from the mouth getting chewed up and

944

00:36:16,250 --> 00:36:13,440

everything like that you know kind of

945

00:36:18,950 --> 00:36:16,260

freaked me out a little bit but uh

946

00:36:21,530 --> 00:36:18,960

I mean that looks like the the whale was

947

00:36:24,109 --> 00:36:21,540

initially injured by a ship strike from

948

00:36:26,390 --> 00:36:24,119

a prop it has a huge wound that you can

949

00:36:29,450 --> 00:36:26,400

see in the photos on its shoulder one

950

00:36:31,430 --> 00:36:29,460

side and by the base of its neck one of

951  
00:36:32,930 --> 00:36:31,440  
the big giant bites is right next to

952  
00:36:35,270 --> 00:36:32,940  
that wound which of course is

953  
00:36:37,490 --> 00:36:35,280  
interesting but it looks like the uh

954  
00:36:39,530 --> 00:36:37,500  
this the whale was hurt and then a

955  
00:36:41,870 --> 00:36:39,540  
really big shark came up and bided on

956  
00:36:43,190 --> 00:36:41,880  
the tail region to immobilize it and it

957  
00:36:44,990 --> 00:36:43,200  
finished bleeding out or whatever and it

958  
00:36:46,130 --> 00:36:45,000  
started to feed and it took a big bite

959  
00:36:47,810 --> 00:36:46,140  
like I said on the coat of region in

960  
00:36:49,550 --> 00:36:47,820  
front of the flukes there's a huge bite

961  
00:36:51,890 --> 00:36:49,560  
right next to the ship strength of the

962  
00:36:53,810 --> 00:36:51,900  
prop wound there and probably some on

963  
00:36:55,490 --> 00:36:53,820

the front of the head that we can't see

964

00:36:57,650 --> 00:36:55,500

from the photos that we got

965

00:36:59,390 --> 00:36:57,660

but uh you know we're able to Crunch the

966

00:37:01,130 --> 00:36:59,400

numbers and everything it you could see

967

00:37:03,109 --> 00:37:01,140

two gouges on the edges of the wounds

968

00:37:07,370 --> 00:37:03,119

there's no doubt these are shark bites

969

00:37:10,010 --> 00:37:07,380

and they are ginormous but Megalodon is

970

00:37:10,849 --> 00:37:10,020

unlikely I mean Megalodon could have

971

00:37:13,250 --> 00:37:10,859

caught

972

00:37:15,410 --> 00:37:13,260

a humpback that was hurt like that so

973

00:37:18,710 --> 00:37:15,420

that's you know obviously a possibility

974

00:37:20,390 --> 00:37:18,720

but right the thing is that it takes

975

00:37:23,150 --> 00:37:20,400

normally a breeding population of at

976

00:37:25,970 --> 00:37:23,160

least 500 animals to sustain a

977

00:37:27,349 --> 00:37:25,980

population genetically say whereas if

978

00:37:29,510 --> 00:37:27,359

you have a great white shark that

979

00:37:31,849 --> 00:37:29,520

occasionally suffers from gigantism you

980

00:37:33,950 --> 00:37:31,859

can have some freak that appears every

981

00:37:35,990 --> 00:37:33,960

few years or something like that you

982

00:37:37,609 --> 00:37:36,000

know and it doesn't reproduce

983

00:37:40,069 --> 00:37:37,619

necessarily a pass on the genes because

984

00:37:43,730 --> 00:37:40,079

it's so big you know I mean if you're a

985

00:37:46,010 --> 00:37:43,740

a 32 foot male white shark and you try

986

00:37:47,270 --> 00:37:46,020

approaching an 18 foot female she's

987

00:37:50,810 --> 00:37:47,280

going to be terrified and run for her

988

00:37:52,490 --> 00:37:50,820

life see and the reverse of a male white

989

00:37:54,770 --> 00:37:52,500

shark

990

00:37:56,810 --> 00:37:54,780

tries approaching a female twice as long

991

00:37:59,870 --> 00:37:56,820

as eight times his Mass he's gonna get

992

00:38:02,329 --> 00:37:59,880

eaten see so you know passing on the

993

00:38:04,910 --> 00:38:02,339

genes is not likely with his gigantism

994

00:38:07,609 --> 00:38:04,920

thing I mean in Monsters and Mysteries I

995

00:38:10,670 --> 00:38:07,619

think I documented at least four or five

996

00:38:13,910 --> 00:38:10,680

giant sharks the biggest of which

997

00:38:16,550 --> 00:38:13,920

appears to is the one um Simon Pierce

998

00:38:19,130 --> 00:38:16,560

photographed in 2017. he photographed a

999

00:38:21,230 --> 00:38:19,140

whale shark off of the Galapagos it was

1000

00:38:25,250 --> 00:38:21,240

a 40-foot whale shark the size of a big

1001

00:38:27,770 --> 00:38:25,260

bus and it has a four foot bite scar on

1002

00:38:29,990 --> 00:38:27,780

its uh rear total region the same region

1003

00:38:33,730 --> 00:38:30,000

in fact where the humpback Was Bitten

1004

00:38:36,589 --> 00:38:33,740

so four feet across that's even bigger

1005

00:38:38,990 --> 00:38:36,599

yeah that's actually there's photos of

1006

00:38:41,390 --> 00:38:39,000

his uh his whale shark documentary with

1007

00:38:44,750 --> 00:38:41,400

the bite and stuff but uh you know so

1008

00:38:47,690 --> 00:38:44,760

he's his oh wow holds the record for the

1009

00:38:49,609 --> 00:38:47,700

largest proven bite accident bite that

1010

00:38:50,870 --> 00:38:49,619

I'm aware of but we had the beasts of

1011

00:38:53,990 --> 00:38:50,880

Briar Island which was a white shark

1012

00:38:55,550 --> 00:38:54,000

estimated 26 feet from that same region

1013

00:38:56,990 --> 00:38:55,560

um there was the one I called the Perth

1014

00:38:59,150 --> 00:38:57,000

County Colossus I don't know if you ever

1015

00:39:00,950 --> 00:38:59,160

saw the discovery they had that super

1016

00:39:02,569 --> 00:39:00,960

Predator special you know when they said

1017

00:39:05,870 --> 00:39:02,579

it was a 35-foot white shark in the Kill

1018

00:39:11,270 --> 00:39:08,569

I think so it probably was a while back

1019

00:39:13,250 --> 00:39:11,280

I analyzed

1020

00:39:17,630 --> 00:39:13,260

pygmy blue whale that had a big bite on

1021

00:39:18,950 --> 00:39:17,640

its upper the Dunkle the oh anyway so

1022

00:39:20,810 --> 00:39:18,960

that was in there a bunch of different

1023

00:39:23,210 --> 00:39:20,820

like mega sharks that all the evidence

1024

00:39:25,069 --> 00:39:23,220

has been collected photos Etc and stuff

1025

00:39:27,290 --> 00:39:25,079

this didn't make the book obviously

1026

00:39:30,230 --> 00:39:27,300

because this happened after that and uh

1027

00:39:31,790 --> 00:39:30,240

there's another one that I had I I got

1028

00:39:32,510 --> 00:39:31,800

um evidence of

1029

00:39:34,010 --> 00:39:32,520

um

1030

00:39:36,950 --> 00:39:34,020

oh gosh I'm trying to think where it was

1031

00:39:39,109 --> 00:39:36,960

is a little smaller probably about 28

1032

00:39:40,670 --> 00:39:39,119

feet long but also it was a white shark

1033

00:39:42,170 --> 00:39:40,680

with a giant bite on it from a much

1034

00:39:44,569 --> 00:39:42,180

bigger white shark

1035

00:39:45,530 --> 00:39:44,579

so there's a lot there are big sharks

1036

00:39:47,690 --> 00:39:45,540

out

1037

00:39:51,470 --> 00:39:47,700

I mean big you would not want to be in

1038

00:39:57,970 --> 00:39:54,650

no no I would not trust me I'd like to

1039

00:40:00,470 --> 00:39:57,980

so and I'll fish for him is this the

1040

00:40:02,150 --> 00:40:00,480

have you have you so you've caught in

1041

00:40:04,670 --> 00:40:02,160

the you've caught them alive you've

1042

00:40:06,950 --> 00:40:04,680

caught sharks these large sharks I have

1043

00:40:09,050 --> 00:40:06,960

caught many species of sharks makos

1044

00:40:12,050 --> 00:40:09,060

hammerheads

1045

00:40:13,069 --> 00:40:12,060

bull sharks I've never landed a white

1046

00:40:15,589 --> 00:40:13,079

shark

1047

00:40:17,329 --> 00:40:15,599

you know I did have released a world

1048

00:40:18,890 --> 00:40:17,339

record blue shark and the world record

1049

00:40:21,349 --> 00:40:18,900

nurse shark

1050

00:40:22,730 --> 00:40:21,359

um unharmed uh that blue shark was 12

1051  
00:40:25,310 --> 00:40:22,740  
feet long and that way like they said

1052  
00:40:27,410 --> 00:40:25,320  
730 pounds you know which is you know a

1053  
00:40:29,930 --> 00:40:27,420  
nice tussle but that's small potatoes

1054  
00:40:31,310 --> 00:40:29,940  
compared to I mean this shark from Briar

1055  
00:40:32,870 --> 00:40:31,320  
Island that we're talking about mostly

1056  
00:40:34,910 --> 00:40:32,880  
eight or ten tons

1057  
00:40:36,770 --> 00:40:34,920  
you know that's not a small fit you

1058  
00:40:40,089 --> 00:40:36,780  
ain't gonna stop that on a rod and reel

1059  
00:40:42,890 --> 00:40:40,099  
not not uh do you just

1060  
00:40:45,530 --> 00:40:42,900  
do you just fish for fun or do you tag

1061  
00:40:48,050 --> 00:40:45,540  
them and release them oh wow you see

1062  
00:40:49,550 --> 00:40:48,060  
that right there that is the one I was

1063  
00:40:51,290 --> 00:40:49,560

telling you about

1064

00:40:54,230 --> 00:40:51,300

um now they were initially saying her

1065

00:40:55,550 --> 00:40:54,240

name is seabatch that great white okay I

1066

00:40:58,430 --> 00:40:55,560

spoke to the guy who did all the photos

1067

00:41:00,829 --> 00:40:58,440

and stuff and they put that in like I

1068

00:41:02,870 --> 00:41:00,839

forget what some UK paper and they were

1069

00:41:04,790 --> 00:41:02,880

claiming she was 15 feet long but that's

1070

00:41:07,130 --> 00:41:04,800

an exaggeration she's only actually

1071

00:41:09,349 --> 00:41:07,140

around 11 feet long I guess they thought

1072

00:41:11,990 --> 00:41:09,359

that would but still that bite is about

1073

00:41:15,770 --> 00:41:12,000

30 inches across

1074

00:41:17,450 --> 00:41:15,780

which is yeah that's pretty big yeah and

1075

00:41:19,609 --> 00:41:17,460

you could see individual two notches on

1076  
00:41:21,829 --> 00:41:19,619  
there Etc it's another shark bite I have

1077  
00:41:23,569 --> 00:41:21,839  
all the photos not just this stuff from

1078  
00:41:25,250 --> 00:41:23,579  
the original photographer including

1079  
00:41:27,290 --> 00:41:25,260  
showing on the belly region where the

1080  
00:41:29,210 --> 00:41:27,300  
you know the rake marks are and the

1081  
00:41:30,829 --> 00:41:29,220  
lower jaw teeth Etc but yeah that's

1082  
00:41:31,550 --> 00:41:30,839  
evidence of another mega shark right

1083  
00:41:34,849 --> 00:41:31,560  
there

1084  
00:41:38,270 --> 00:41:34,859  
um but to answer your question I fish uh

1085  
00:41:40,970 --> 00:41:38,280  
I guess you'd say for fun for the

1086  
00:41:42,710 --> 00:41:40,980  
discovery you know it's like uh like the

1087  
00:41:44,630 --> 00:41:42,720  
Forrest Gump saying you know life is

1088  
00:41:46,490 --> 00:41:44,640

like a bunch of chocolates well fishing

1089

00:41:47,750 --> 00:41:46,500

is the same way you can drop your line

1090

00:41:48,770 --> 00:41:47,760

on there you never know what you're

1091

00:41:54,170 --> 00:41:48,780

gonna get

1092

00:41:56,270 --> 00:41:54,180

know so but I release like 99 of the

1093

00:41:57,650 --> 00:41:56,280

fish I catch I'm not into killing

1094

00:41:59,210 --> 00:41:57,660

animals or anything like that you know

1095

00:42:01,190 --> 00:41:59,220

we catch a fish even something big

1096

00:42:03,410 --> 00:42:01,200

that's like not doing well like it's

1097

00:42:05,630 --> 00:42:03,420

exhausted will actually run it beside

1098

00:42:07,430 --> 00:42:05,640

the boat like hold it in the water and

1099

00:42:09,290 --> 00:42:07,440

move the boat slowly so the water goes

1100

00:42:11,210 --> 00:42:09,300

through its gills and resuscitate the

1101  
00:42:13,849 --> 00:42:11,220  
fish so that it can be released safely

1102  
00:42:15,589 --> 00:42:13,859  
you know and not fall at the bottom die

1103  
00:42:16,849 --> 00:42:15,599  
or whatever so a little hairy when

1104  
00:42:17,990 --> 00:42:16,859  
you're dealing with sharks and stuff you

1105  
00:42:21,650 --> 00:42:18,000  
know they're not exactly the friendliest

1106  
00:42:23,810 --> 00:42:21,660  
Critters but yeah I can imagine trying

1107  
00:42:26,890 --> 00:42:23,820  
to release them they're not too happy

1108  
00:42:31,490 --> 00:42:29,270  
I'm sorry guys

1109  
00:42:33,710 --> 00:42:31,500  
oh no go ahead go ahead

1110  
00:42:34,790 --> 00:42:33,720  
yeah the cap my Charter Captain they had

1111  
00:42:35,810 --> 00:42:34,800  
a PIN to the side of the boat while

1112  
00:42:37,310 --> 00:42:35,820  
they're taking the hook out and he was

1113  
00:42:38,750 --> 00:42:37,320

like hey do you want to touch it I'm

1114

00:42:41,329 --> 00:42:38,760

like sure he was watching teeth I'm like

1115

00:42:42,890 --> 00:42:41,339

nah you ain't kidding it was a like just

1116

00:42:44,569 --> 00:42:42,900

a seven foot blue shark you know about

1117

00:42:46,550 --> 00:42:44,579

this maybe you know your side just like

1118

00:42:49,730 --> 00:42:46,560

that in terms of mass or whatever but it

1119

00:42:53,450 --> 00:42:49,740

felt like Stone

1120

00:42:56,230 --> 00:42:53,460

covered with an inch of tire rubber and

1121

00:42:58,970 --> 00:42:56,240

sandpaper on top I mean that

1122

00:43:00,530 --> 00:42:58,980

you know it was really something you

1123

00:43:02,210 --> 00:43:00,540

know these like these experiences are

1124

00:43:03,890 --> 00:43:02,220

great as an author in terms of you know

1125

00:43:05,390 --> 00:43:03,900

bringing these things to life and and

1126  
00:43:07,849 --> 00:43:05,400  
your books and stuff like that you know

1127  
00:43:10,490 --> 00:43:07,859  
but I'm sorry I interrupted you oh no

1128  
00:43:11,930 --> 00:43:10,500  
that's fine that that's amazing I in a

1129  
00:43:13,190 --> 00:43:11,940  
way I would love to do something like

1130  
00:43:14,930 --> 00:43:13,200  
that but another way I would be

1131  
00:43:17,990 --> 00:43:14,940  
terrified because I'd be afraid it would

1132  
00:43:19,430 --> 00:43:18,000  
whip around and just just grab me so

1133  
00:43:22,010 --> 00:43:19,440  
that's what you get you got to get

1134  
00:43:23,210 --> 00:43:22,020  
yourself a good Charter guy crew that

1135  
00:43:24,770 --> 00:43:23,220  
knows what they're doing and you know

1136  
00:43:26,089 --> 00:43:24,780  
make sure you're gonna stay safe and if

1137  
00:43:28,069 --> 00:43:26,099  
you're ever gonna go down to Florida or

1138  
00:43:32,210 --> 00:43:28,079

Jersey I know people I can introduce you

1139

00:43:34,490 --> 00:43:32,220

okay okay that sounds great so is this

1140

00:43:36,890 --> 00:43:34,500

are we talking about the uh the

1141

00:43:39,650 --> 00:43:36,900

Galapagos giant is that the one we're

1142

00:43:41,510 --> 00:43:39,660

talking about that was the that's not

1143

00:43:44,089 --> 00:43:41,520

the one in the documentary that is the

1144

00:43:48,050 --> 00:43:44,099

one that has like the the biggest bite

1145

00:43:50,630 --> 00:43:48,060

I've ever seen okay now to be fair

1146

00:43:52,069 --> 00:43:50,640

in the interest of clarity

1147

00:43:55,309 --> 00:43:52,079

10 years ago or something like that

1148

00:43:56,930 --> 00:43:55,319

somebody sent me a photo

1149

00:43:59,990 --> 00:43:56,940

um and I've never been able to use it

1150

00:44:02,270 --> 00:44:00,000

because I don't know who sent it to me

1151  
00:44:04,370 --> 00:44:02,280  
you know or anything like that so I

1152  
00:44:07,130 --> 00:44:04,380  
wouldn't have permission copyright wise

1153  
00:44:09,530 --> 00:44:07,140  
but they sent me a photo of uh humpback

1154  
00:44:13,730 --> 00:44:09,540  
whale it's flukes coming up out of the

1155  
00:44:15,650 --> 00:44:13,740  
water and it has an enormous bite out of

1156  
00:44:18,349 --> 00:44:15,660  
one fluke like you could see it it's

1157  
00:44:21,470 --> 00:44:18,359  
like individual two notches white

1158  
00:44:23,510 --> 00:44:21,480  
shredded flesh Etc and you can't say how

1159  
00:44:25,670 --> 00:44:23,520  
big the shark was it that is because you

1160  
00:44:27,770 --> 00:44:25,680  
don't know is this a calf is it an adult

1161  
00:44:29,990 --> 00:44:27,780  
you know it's impossible to gauge that

1162  
00:44:32,150 --> 00:44:30,000  
type of stuff and if it was an adult the

1163  
00:44:34,309 --> 00:44:32,160

bite would be gigantic I mean like five

1164

00:44:36,650 --> 00:44:34,319

feet across at least maybe six you know

1165

00:44:38,150 --> 00:44:36,660

but yeah the Galapagos giant which is a

1166

00:44:40,849 --> 00:44:38,160

monitor I slapped on it in Monsters

1167

00:44:42,290 --> 00:44:40,859

Mysteris is the uh name I gave to this

1168

00:44:43,670 --> 00:44:42,300

shark that attacked that big whale shark

1169

00:44:47,089 --> 00:44:43,680

in the Galapagos

1170

00:44:49,550 --> 00:44:47,099

and that's Simon's baby and I would I I

1171

00:44:51,950 --> 00:44:49,560

you gotta respect that man because he

1172

00:44:53,870 --> 00:44:51,960

swims with whale sharks and gives them

1173

00:44:56,809 --> 00:44:53,880

sonograms like pregnant whale sharks

1174

00:44:59,690 --> 00:44:56,819

okay but to be in the water oh my gosh

1175

00:45:02,210 --> 00:44:59,700

she's a whale shark with a bite this big

1176

00:45:05,089 --> 00:45:02,220

taken out of it I would be looking

1177

00:45:06,829 --> 00:45:05,099

around going I wonder what did that and

1178

00:45:08,450 --> 00:45:06,839

if it's around here anywhere because

1179

00:45:11,750 --> 00:45:08,460

you're in a swimming you know you're in

1180

00:45:13,450 --> 00:45:11,760

scuba gear and you're bite-sized at that

1181

00:45:15,829 --> 00:45:13,460

point you know

1182

00:45:19,550 --> 00:45:15,839

just think about it you know he's

1183

00:45:22,130 --> 00:45:19,560

amazing I couldn't do it yeah right oh

1184

00:45:23,809 --> 00:45:22,140

my gosh that's

1185

00:45:26,210 --> 00:45:23,819

oh wow

1186

00:45:28,790 --> 00:45:26,220

yeah that was on a long line I think you

1187

00:45:30,410 --> 00:45:28,800

can see the heavy Cable in its mouth and

1188

00:45:33,589 --> 00:45:30,420

it was exhausted and probably a white

1189

00:45:38,089 --> 00:45:33,599

shark came up and made a meal out of it

1190

00:45:40,190 --> 00:45:38,099

so oh my gosh that's amazing that really

1191

00:45:43,309 --> 00:45:40,200

is

1192

00:45:47,750 --> 00:45:43,319

um so the Megalodon was about 60 feet

1193

00:45:49,370 --> 00:45:47,760

right give or take um

1194

00:45:51,490 --> 00:45:49,380

go ahead

1195

00:45:54,650 --> 00:45:51,500

no I did some number crunching

1196

00:45:56,390 --> 00:45:54,660

on on Megalodon size and yeah I would

1197

00:45:57,890 --> 00:45:56,400

say the shark was in at least the upper

1198

00:45:59,329 --> 00:45:57,900

50s and stuff

1199

00:46:00,530 --> 00:45:59,339

um you know you see people coming out

1200

00:46:02,390 --> 00:46:00,540

with different like theories and

1201  
00:46:03,650 --> 00:46:02,400  
formulas and all this stuff but there

1202  
00:46:06,410 --> 00:46:03,660  
was a piece I did like an interview

1203  
00:46:08,210 --> 00:46:06,420  
about Megalodon moms and whether they

1204  
00:46:10,730 --> 00:46:08,220  
lived in cold or warm water and all this

1205  
00:46:13,910 --> 00:46:10,740  
stuff and uh I was able to do the number

1206  
00:46:16,490 --> 00:46:13,920  
crunching and I discovered that we have

1207  
00:46:18,410 --> 00:46:16,500  
not discovered the biggest megalon teeth

1208  
00:46:20,510 --> 00:46:18,420  
that have been out there

1209  
00:46:23,030 --> 00:46:20,520  
like in terms of the the big teeth like

1210  
00:46:25,670 --> 00:46:23,040  
this like I told you before this is a

1211  
00:46:28,010 --> 00:46:25,680  
principal tooth you know okay

1212  
00:46:31,069 --> 00:46:28,020  
right here dead center biggest tooth in

1213  
00:46:33,890 --> 00:46:31,079

the jaw basically okay but if you pull

1214

00:46:36,950 --> 00:46:33,900

up one of those megalon Jaws you had

1215

00:46:41,569 --> 00:46:40,010

let's see uh that one's not very

1216

00:46:43,849 --> 00:46:41,579

accurate actually

1217

00:46:47,089 --> 00:46:43,859

yeah that's not gonna work see if you

1218

00:46:49,370 --> 00:46:47,099

see the teeth on the on the uh edges of

1219

00:46:52,849 --> 00:46:49,380

the jaw here like the laterals and the

1220

00:46:55,010 --> 00:46:52,859

posterior teeth the teeth get smaller

1221

00:46:56,930 --> 00:46:55,020

as they go around when the teeth have

1222

00:46:58,250 --> 00:46:56,940

they use teeth that are all big it makes

1223

00:46:59,930 --> 00:46:58,260

the jaw look twice as big as it's

1224

00:47:00,950 --> 00:46:59,940

supposed to be and that's not how it

1225

00:47:03,109 --> 00:47:00,960

works

1226

00:47:05,690 --> 00:47:03,119

um I mean I could send you like a jaw to

1227

00:47:06,950 --> 00:47:05,700

show you accurately but if if you had

1228

00:47:08,150 --> 00:47:06,960

time to slap it in there but you guys

1229

00:47:10,670 --> 00:47:08,160

probably don't because you got to load

1230

00:47:12,770 --> 00:47:10,680

it and stuff but if you go on like um

1231

00:47:14,270 --> 00:47:12,780

well the point is is so the teeth start

1232

00:47:16,430 --> 00:47:14,280

all big and then they get smaller as

1233

00:47:21,650 --> 00:47:16,440

they go towards the joint okay where the

1234

00:47:24,470 --> 00:47:21,660

Jaws meet up and low okay so the like I

1235

00:47:26,690 --> 00:47:24,480

have a virtual Museum of fossils and

1236

00:47:29,510 --> 00:47:26,700

stuff and now like it used to be very

1237

00:47:31,670 --> 00:47:29,520

difficult to Crunch maximum two size in

1238

00:47:34,010 --> 00:47:31,680

a specimen based on individual teeth

1239

00:47:35,809 --> 00:47:34,020

because there weren't complete sets you

1240

00:47:37,970 --> 00:47:35,819

know what I mean now there are several

1241

00:47:41,390 --> 00:47:37,980

complete sets of teeth out there so I

1242

00:47:44,150 --> 00:47:41,400

was able to do that and so you see like

1243

00:47:46,430 --> 00:47:44,160

um okay let me just pull up a thing here

1244

00:47:51,230 --> 00:47:46,440

so I'm going to show you a fossil tooth

1245

00:47:54,050 --> 00:47:51,240

okay and this is a lower right jaw tooth

1246

00:47:57,470 --> 00:47:54,060

it's either number nine or number 10.

1247

00:47:59,109 --> 00:47:57,480

okay and that's up for this step okay so

1248

00:48:03,530 --> 00:47:59,119

the number nine

1249

00:48:05,630 --> 00:48:03,540

tooth in the larger jaw complete jaw out

1250

00:48:09,050 --> 00:48:05,640

there which includes teeth pushing six

1251

00:48:12,170 --> 00:48:09,060

inches the number nine tooth would be 74

1252

00:48:14,510 --> 00:48:12,180

millimeters in slant height which is a

1253

00:48:17,809 --> 00:48:14,520

little less than three inches this tooth

1254

00:48:20,329 --> 00:48:17,819

is over four inches this way so this

1255

00:48:22,250 --> 00:48:20,339

shows you that this shark this exact

1256

00:48:25,730 --> 00:48:22,260

tooth in the jaw which is one of the

1257

00:48:28,910 --> 00:48:25,740

tinier teeth okay was at least a third

1258

00:48:30,770 --> 00:48:28,920

larger than that specimen so this this

1259

00:48:33,530 --> 00:48:30,780

shark its biggest heat were over eight

1260

00:48:35,809 --> 00:48:33,540

inches in length and that's a fact okay

1261

00:48:37,130 --> 00:48:35,819

that's if it's a number nine if it was

1262

00:48:38,690 --> 00:48:37,140

number ten

1263

00:48:41,870 --> 00:48:38,700

I don't even want to Crunch the numbers

1264

00:48:44,210 --> 00:48:41,880

okay because then you find yourself in

1265

00:48:46,250 --> 00:48:44,220

Crazy territory you know it's one thing

1266

00:48:48,650 --> 00:48:46,260

to say that this tooth this shark's

1267

00:48:49,910 --> 00:48:48,660

largest teeth were eight and a half

1268

00:48:51,829 --> 00:48:49,920

inches or eight and a quarter inches

1269

00:48:53,990 --> 00:48:51,839

long that's gigantic it's bigger than

1270

00:48:55,250 --> 00:48:54,000

any known specimen but if this was a

1271

00:48:57,490 --> 00:48:55,260

number 10 tooth which would be even

1272

00:48:59,569 --> 00:48:57,500

smaller and I scaled up it would be

1273

00:49:02,150 --> 00:48:59,579

insanely big and I don't even want to go

1274

00:49:09,790 --> 00:49:02,160

there okay so is it a number nine is it

1275

00:49:15,430 --> 00:49:13,490

from the same area mother and baby

1276

00:49:20,750 --> 00:49:15,440

okay

1277

00:49:22,550 --> 00:49:20,760

he's pretty cute oh yeah yeah teeny tiny

1278

00:49:25,089 --> 00:49:22,560

little thing but it's the exact same

1279

00:49:27,069 --> 00:49:25,099

tooth in the jaw

1280

00:49:29,750 --> 00:49:27,079

anyway

1281

00:49:32,030 --> 00:49:29,760

now where if I wanted to find a

1282

00:49:40,930 --> 00:49:32,040

Megalodon tooth where would I find where

1283

00:49:44,930 --> 00:49:43,130

I mean you can go and go all sorts of

1284

00:49:46,730 --> 00:49:44,940

places there yeah a lot of places are

1285

00:49:48,589 --> 00:49:46,740

getting shut down and stuff

1286

00:49:51,230 --> 00:49:48,599

um I mean if you want to go to the Lee

1287

00:49:55,250 --> 00:49:51,240

Creek mine you can try that uh you could

1288

00:49:57,410 --> 00:49:55,260

try the Morgan River you can try uh the

1289

00:49:59,329 --> 00:49:57,420

Cooper River is another spot I mean

1290

00:50:01,250 --> 00:49:59,339

there's a lot of places it's all areas

1291

00:50:03,890 --> 00:50:01,260

where like in Florida stuff that used to

1292

00:50:05,870 --> 00:50:03,900

be underwater and those Rivers were

1293

00:50:09,109 --> 00:50:05,880

still there but obviously they were like

1294

00:50:12,430 --> 00:50:09,119

deeper and the large females would come

1295

00:50:15,230 --> 00:50:12,440

in there to birth their pups I'd say and

1296

00:50:17,270 --> 00:50:15,240

a lot of times you find the baby teeth

1297

00:50:19,069 --> 00:50:17,280

because when they hatched in their

1298

00:50:20,930 --> 00:50:19,079

nurseries or a hatched or gave birth and

1299

00:50:23,089 --> 00:50:20,940

were in their nurseries they would stay

1300

00:50:25,130 --> 00:50:23,099

there it appears in the shallows where

1301  
00:50:27,050 --> 00:50:25,140  
we're safe until they were big enough to

1302  
00:50:29,930 --> 00:50:27,060  
go out into the Open Sea like goliath

1303  
00:50:32,890 --> 00:50:29,940  
grouper there was a huge fish that I've

1304  
00:50:36,050 --> 00:50:32,900  
caught I've caught 400 Pounders but um

1305  
00:50:37,550 --> 00:50:36,060  
they'll stay in the mangroves you know

1306  
00:50:38,809 --> 00:50:37,560  
they're tiny little things until they

1307  
00:50:40,370 --> 00:50:38,819  
get a certain point maybe they're three

1308  
00:50:42,230 --> 00:50:40,380  
feet long then they'll go out and move

1309  
00:50:44,510 --> 00:50:42,240  
out to reefs and stuff like that because

1310  
00:50:46,250 --> 00:50:44,520  
there are predators so in Megalodon's

1311  
00:50:47,690 --> 00:50:46,260  
day the babies were like I guess around

1312  
00:50:49,730 --> 00:50:47,700  
six and a half seven people long when

1313  
00:50:52,190 --> 00:50:49,740

they were born it was not safe to go out

1314

00:50:53,870 --> 00:50:52,200

in the open sea you had other Mega Lawns

1315

00:50:56,210 --> 00:50:53,880

that would eat them you had chubby tents

1316

00:50:58,549 --> 00:50:56,220

of sharks that would eat them you had

1317

00:51:00,349 --> 00:50:58,559

um God there's giant prehistoric makos

1318

00:51:02,390 --> 00:51:00,359

ancestors are the great whites that

1319

00:51:04,490 --> 00:51:02,400

would eat them there they even had these

1320

00:51:07,190 --> 00:51:04,500

uh weasel sharks called

1321

00:51:08,630 --> 00:51:07,200

um oh my gosh I just hit a T-Zone and I

1322

00:51:10,069 --> 00:51:08,640

can't think of the name right now that's

1323

00:51:12,170 --> 00:51:10,079

what happens when you have covet and too

1324

00:51:13,730 --> 00:51:12,180

much cold medicine but uh you know they

1325

00:51:14,829 --> 00:51:13,740

even had some sharks like it looks like

1326

00:51:18,049 --> 00:51:14,839

they wouldn't

1327

00:51:19,430 --> 00:51:18,059

you know yeah but so it was a dangerous

1328

00:51:22,010 --> 00:51:19,440

ocean out there I mean if you've got 25

1329

00:51:24,829 --> 00:51:22,020

foot mako sharks out there and you're a

1330

00:51:26,210 --> 00:51:24,839

seven foot megalon your lunch see so the

1331

00:51:27,470 --> 00:51:26,220

pups would stay in the nursery until

1332

00:51:29,630 --> 00:51:27,480

they got big enough to go out in the

1333

00:51:31,190 --> 00:51:29,640

open sea and fend for themselves so

1334

00:51:32,990 --> 00:51:31,200

that's why you have different teeth and

1335

00:51:34,430 --> 00:51:33,000

different sizes of different places but

1336

00:51:36,470 --> 00:51:34,440

the bigger teeth are usually the

1337

00:51:38,150 --> 00:51:36,480

spawning females that would come into

1338

00:51:39,890 --> 00:51:38,160

the shallows to give birth and then go

1339

00:51:43,250 --> 00:51:39,900

back out to sea

1340

00:51:46,309 --> 00:51:43,260

so I got some adorable baby makeups I

1341

00:51:50,089 --> 00:51:46,319

got one it's like a gem so perfect I

1342

00:51:55,130 --> 00:51:53,089

oh wow I bet that's amazing I really do

1343

00:51:57,230 --> 00:51:55,140

I'm jealous because I'm I'm interested

1344

00:51:59,089 --> 00:51:57,240

in that is is there a complete skeleton

1345

00:52:02,089 --> 00:51:59,099

somewhere of a megalodon or we haven't

1346

00:52:03,710 --> 00:52:02,099

found that yet no there's the skeletons

1347

00:52:05,510 --> 00:52:03,720

are made of cartilage so there's some

1348

00:52:07,490 --> 00:52:05,520

vertebrae that are

1349

00:52:09,230 --> 00:52:07,500

um you know you some that'll be

1350

00:52:11,630 --> 00:52:09,240

discovered

1351

00:52:13,370 --> 00:52:11,640

um but I believe in I think it's in

1352

00:52:15,410 --> 00:52:13,380

Zurich I think they have like a partial

1353

00:52:17,390 --> 00:52:15,420

skull or something like that you know

1354

00:52:19,430 --> 00:52:17,400

not from an adult or anything like that

1355

00:52:21,470 --> 00:52:19,440

I mean uh but uh you know if you ever

1356

00:52:23,109 --> 00:52:21,480

want to get your hands on stuff look go

1357

00:52:25,970 --> 00:52:23,119

to Fossil Shack

1358

00:52:27,890 --> 00:52:25,980

fossilshack.com all one word and you

1359

00:52:30,290 --> 00:52:27,900

talk to Seth and you tell them you know

1360

00:52:34,190 --> 00:52:30,300

me and he'll take care of you Seth okay

1361

00:52:36,770 --> 00:52:34,200

he he provides full Mosasaur skeletons

1362

00:52:39,410 --> 00:52:36,780

for museums I mean like the size of a

1363

00:52:41,750 --> 00:52:39,420

bus you name it he has it so you know

1364

00:52:43,130 --> 00:52:41,760

whatever you possibly wanted and he'll

1365

00:52:44,990 --> 00:52:43,140

he'll take good care of you he's a great

1366

00:52:48,710 --> 00:52:45,000

guy

1367

00:52:49,910 --> 00:52:48,720

okay sounds great so my I have I think a

1368

00:52:52,010 --> 00:52:49,920

couple more questions and we're going to

1369

00:52:53,329 --> 00:52:52,020

take some audience questions

1370

00:52:55,670 --> 00:52:53,339

um so

1371

00:52:58,849 --> 00:52:55,680

we talked about Megalodon being around I

1372

00:53:02,210 --> 00:52:58,859

guess 50 feet or so and then the

1373

00:53:05,569 --> 00:53:02,220

Galapagos giant was about 40 to 42 feet

1374

00:53:08,270 --> 00:53:05,579

right around it yeah that's the of going

1375

00:53:10,370 --> 00:53:08,280

by the formulas I have yeah Simon said

1376

00:53:11,510 --> 00:53:10,380

the bite was about four feet across so I

1377

00:53:16,609 --> 00:53:11,520

think that shark would probably have

1378

00:53:23,210 --> 00:53:20,270

antique sharks yeah with these gigantic

1379

00:53:25,970 --> 00:53:23,220

sharks is there ever a possibility for a

1380

00:53:28,870 --> 00:53:25,980

Megalodon a Megalodon size shark to be

1381

00:53:33,470 --> 00:53:31,609

oh I mean look your average Megalodon

1382

00:53:34,670 --> 00:53:33,480

adult I think they said was only 35 feet

1383

00:53:36,290 --> 00:53:34,680

long

1384

00:53:38,450 --> 00:53:36,300

you got to think of it like relative to

1385

00:53:40,910 --> 00:53:38,460

the great white you know I mean we know

1386

00:53:42,950 --> 00:53:40,920

that white sharks could get into the low

1387

00:53:45,410 --> 00:53:42,960

20 feet I've proved that they get bigger

1388

00:53:48,710 --> 00:53:45,420

than that but these may be gigantism

1389

00:53:50,390 --> 00:53:48,720

incidents again but so let's say that we

1390

00:53:53,329 --> 00:53:50,400

know your average adult white shark is

1391

00:53:55,670 --> 00:53:53,339

what 16 feet long so if you scale it up

1392

00:53:57,770 --> 00:53:55,680

the average Megalodon was 35 feet long

1393

00:53:59,630 --> 00:53:57,780

you know that's a decent sized fish so

1394

00:54:03,049 --> 00:53:59,640

if we had a white shark that was 40 or

1395

00:54:05,390 --> 00:54:03,059

42 feet gigantism or not you know that's

1396

00:54:07,490 --> 00:54:05,400

still on the size range you know are we

1397

00:54:09,170 --> 00:54:07,500

going to get something the size of you

1398

00:54:10,450 --> 00:54:09,180

know something that was you know feeding

1399

00:54:14,030 --> 00:54:10,460

on whales

1400

00:54:16,910 --> 00:54:14,040

3.6 million years ago or longer doubtful

1401  
00:54:18,890 --> 00:54:16,920  
but then you know you never know once

1402  
00:54:20,630 --> 00:54:18,900  
the human race gets out of the way maybe

1403  
00:54:22,490 --> 00:54:20,640  
they'll come back

1404  
00:54:25,430 --> 00:54:22,500  
or the white shark will evolve into

1405  
00:54:26,870 --> 00:54:25,440  
something like that it'll split off you

1406  
00:54:28,250 --> 00:54:26,880  
know we'll have like white sharks and

1407  
00:54:29,870 --> 00:54:28,260  
then we'll have a larger version that's

1408  
00:54:31,069 --> 00:54:29,880  
more of a scavenger type thing I don't

1409  
00:54:35,210 --> 00:54:31,079  
know

1410  
00:54:39,470 --> 00:54:35,220  
much of the ocean

1411  
00:54:41,630 --> 00:54:39,480  
that hasn't been explored as well so you

1412  
00:54:43,970 --> 00:54:41,640  
don't know what's really down there too

1413  
00:54:44,990 --> 00:54:43,980

if you think about it so that's another

1414

00:54:47,210 --> 00:54:45,000

thing

1415

00:54:49,250 --> 00:54:47,220

at least it's in my opinion so and I do

1416

00:54:50,750 --> 00:54:49,260

have some questions for you are you okay

1417

00:54:55,309 --> 00:54:50,760

with taking those

1418

00:54:57,950 --> 00:54:55,319

Bring It On okay so so Vincent wants to

1419

00:54:59,870 --> 00:54:57,960

know what do you think the blimp was

1420

00:55:03,230 --> 00:54:59,880

the bloop

1421

00:55:07,730 --> 00:55:03,240

um the blue yeah

1422

00:55:10,790 --> 00:55:07,740

dismissed as being an iceberg uh I think

1423

00:55:14,210 --> 00:55:10,800

dragging along the bottom I listened to

1424

00:55:16,790 --> 00:55:14,220

it at normal speed and it doesn't really

1425

00:55:19,370 --> 00:55:16,800

sound organic to me it's like when they

1426

00:55:20,990 --> 00:55:19,380

speed it up like 16 times it does but

1427

00:55:22,990 --> 00:55:21,000

there is another sound out there I think

1428

00:55:26,750 --> 00:55:23,000

it's called Julia or something like that

1429

00:55:29,390 --> 00:55:26,760

and I I'm not this isn't life

1430

00:55:31,609 --> 00:55:29,400

in an area of expertise now but I've

1431

00:55:33,170 --> 00:55:31,619

read that the sound seems to coincide

1432

00:55:35,329 --> 00:55:33,180

like every spring or something like that

1433

00:55:37,910 --> 00:55:35,339

with this region where they keep seeing

1434

00:55:39,710 --> 00:55:37,920

this shadowy form moving through the

1435

00:55:41,510 --> 00:55:39,720

water from the same time of year that

1436

00:55:42,349 --> 00:55:41,520

supposedly bigger than the Empire State

1437

00:55:45,650 --> 00:55:42,359

Building

1438

00:55:48,230 --> 00:55:45,660

that's what they say okay so I don't

1439

00:55:51,109 --> 00:55:48,240

know what that could possibly be

1440

00:55:52,910 --> 00:55:51,119

Etc but uh you know

1441

00:55:54,109 --> 00:55:52,920

that's but I don't think that I think

1442

00:55:57,290 --> 00:55:54,119

the bloop has been pretty much

1443

00:55:59,450 --> 00:55:57,300

discredited the Julia thing ah look Olaf

1444

00:56:02,450 --> 00:55:59,460

wants to know on a 15 million year old

1445

00:56:11,690 --> 00:56:04,190

should I introduce him to the audience

1446

00:56:15,470 --> 00:56:13,069

yeah

1447

00:56:18,530 --> 00:56:15,480

Grump Max did you see Max get mauled by

1448

00:56:21,049 --> 00:56:18,540

his Siberian Forest cat on the air that

1449

00:56:24,890 --> 00:56:21,059

was great

1450

00:56:26,589 --> 00:56:24,900

he's tired and sleepy like me

1451

00:56:29,930 --> 00:56:26,599

all right

1452

00:56:32,290 --> 00:56:29,940

so this is one of the behemoths that

1453

00:56:36,349 --> 00:56:32,300

sleeps on my desk as I write

1454

00:56:39,349 --> 00:56:36,359

this is Olaf he is a Siberian Forest cat

1455

00:56:42,950 --> 00:56:39,359

and he's a big beefy boy as you can see

1456

00:56:47,030 --> 00:56:42,960

like a cow but anyway and

1457

00:56:49,309 --> 00:56:47,040

ouch thank you but uh sorry buddy sorry

1458

00:56:52,490 --> 00:56:49,319

about that he hates being thrust into

1459

00:56:54,910 --> 00:56:52,500

the Limelight and stuff but um yeah I

1460

00:56:57,770 --> 00:56:54,920

have these two Knuckles

1461

00:56:59,750 --> 00:56:57,780

yes and he's they're very lovable I mean

1462

00:57:01,849 --> 00:56:59,760

they're so playful and so human I mean

1463

00:57:03,950 --> 00:57:01,859

they have emotions it's like the other

1464

00:57:06,109 --> 00:57:03,960

day like mace his brother was on the

1465

00:57:08,510 --> 00:57:06,119

island eating and he picked that he was

1466

00:57:09,890 --> 00:57:08,520

like stuffed and then like he was he lay

1467

00:57:11,750 --> 00:57:09,900

on his side he was like sitting there

1468

00:57:13,790 --> 00:57:11,760

like this like uh and I took the food

1469

00:57:15,470 --> 00:57:13,800

and I pushed it close to him and you

1470

00:57:16,670 --> 00:57:15,480

know how like when a person goes like a

1471

00:57:18,950 --> 00:57:16,680

buffet and it eats them much they're

1472

00:57:19,970 --> 00:57:18,960

gonna throw up and you have that like he

1473

00:57:22,069 --> 00:57:19,980

looked at it like this thing was like

1474

00:57:24,410 --> 00:57:22,079

yeah and he like just pushed it away

1475

00:57:27,109 --> 00:57:24,420

like that like get that away from me and

1476

00:57:30,410 --> 00:57:27,119

it was such a human gesture hilarious

1477

00:57:32,390 --> 00:57:30,420

yeah he's like oh and he loved it you

1478

00:57:35,210 --> 00:57:32,400

know it's his favorite meal but enough

1479

00:57:36,410 --> 00:57:35,220

is enough you know so but he was so

1480

00:57:39,170 --> 00:57:36,420

stuffed

1481

00:57:43,190 --> 00:57:39,180

my hair so

1482

00:57:44,930 --> 00:57:43,200

oh he's your writing partner and my

1483

00:57:46,190 --> 00:57:44,940

editor when he tells me it's time to

1484

00:57:48,530 --> 00:57:46,200

take a break he'll just lay on the

1485

00:57:50,930 --> 00:57:48,540

keyboard and I can't write

1486

00:57:52,089 --> 00:57:50,940

there you go sometimes you need someone

1487

00:57:54,770 --> 00:57:52,099

like that

1488

00:57:57,650 --> 00:57:54,780

so Deepak would like to know what your

1489

00:57:59,569 --> 00:57:57,660

opinion of mermaids are

1490

00:58:06,349 --> 00:57:59,579

I never dated one so what do you think

1491

00:58:12,170 --> 00:58:08,089

you know I would if I was single but uh

1492

00:58:13,970 --> 00:58:12,180

I did have a I met him named reggae in

1493

00:58:16,490 --> 00:58:13,980

Jamaica like two years ago she was

1494

00:58:18,230 --> 00:58:16,500

pretty Sleek in all that but that fish

1495

00:58:20,270 --> 00:58:18,240

breath was just not working for me and

1496

00:58:22,910 --> 00:58:20,280

my wife was not happy about it so you

1497

00:58:25,010 --> 00:58:22,920

know we had to break it off but I I know

1498

00:58:27,170 --> 00:58:25,020

nothing about mermaids except that

1499

00:58:29,569 --> 00:58:27,180

special on Discovery which really pissed

1500

00:58:32,089 --> 00:58:29,579

me off because you know it was like a

1501  
00:58:34,010 --> 00:58:32,099  
total setup and a fake in my opinion you

1502  
00:58:35,750 --> 00:58:34,020  
know it annoyed everybody I I you know I

1503  
00:58:37,190 --> 00:58:35,760  
felt like an idiot like feeding into it

1504  
00:58:38,990 --> 00:58:37,200  
and everything

1505  
00:58:43,549 --> 00:58:39,000  
yeah

1506  
00:58:46,130 --> 00:58:43,559  
I think it would be great if they

1507  
00:58:49,549 --> 00:58:46,140  
existed but you know I have you know

1508  
00:58:54,650 --> 00:58:52,549  
right Vincent wants to know uh ever hear

1509  
00:58:57,530 --> 00:58:54,660  
anything weird like mermaids or

1510  
00:59:01,370 --> 00:58:57,540  
underwater UFOs

1511  
00:59:03,190 --> 00:59:01,380  
I have seen that special

1512  
00:59:05,329 --> 00:59:03,200  
um what's it called

1513  
00:59:08,569 --> 00:59:05,339

disclosure I think is the name of it

1514

00:59:10,430 --> 00:59:08,579

it's a documentary about a gentleman who

1515

00:59:14,210 --> 00:59:10,440

uh was involved with the military and

1516

00:59:16,670 --> 00:59:14,220

UFO technology and according to that and

1517

00:59:19,849 --> 00:59:16,680

I actually purchased it to watch it

1518

00:59:23,270 --> 00:59:19,859

um he claims that they have reverse

1519

00:59:27,109 --> 00:59:23,280

engineered UFO Tech to the point that we

1520

00:59:30,289 --> 00:59:27,119

the U.S now have craft that can fly at

1521

00:59:32,210 --> 00:59:30,299

24 000 miles an hour in the air and by

1522

00:59:35,329 --> 00:59:32,220

creating using the technology to create

1523

00:59:37,670 --> 00:59:35,339

like a a bubble around a craft are able

1524

00:59:40,130 --> 00:59:37,680

to go underwater at 500 miles an hour

1525

00:59:42,049 --> 00:59:40,140

which would make sense I mean the Cheval

1526  
00:59:43,309 --> 00:59:42,059  
Torpedoes the Russians developed did

1527  
00:59:45,170 --> 00:59:43,319  
that and they they shoot through the

1528  
00:59:47,390 --> 00:59:45,180  
water rocket propelled to 300 miles an

1529  
00:59:51,370 --> 00:59:47,400  
hour so I guess it's possible but you

1530  
00:59:58,549 --> 00:59:54,470  
that's more than I know so

1531  
01:00:03,069 --> 00:59:58,559  
so is that just what I read go ahead

1532  
01:00:06,470 --> 01:00:03,079  
oh no I'm good just any questions

1533  
01:00:10,430 --> 01:00:09,049  
I didn't hear you okay oh no I was

1534  
01:00:14,329 --> 01:00:10,440  
asking if anyone else

1535  
01:00:19,069 --> 01:00:18,049  
what are your thoughts on Atlantis

1536  
01:00:22,190 --> 01:00:19,079  
um

1537  
01:00:24,710 --> 01:00:22,200  
the uh I mean I know

1538  
01:00:26,690 --> 01:00:24,720

just what most people do that it was

1539

01:00:28,849 --> 01:00:26,700

supposed you know supposedly thousands

1540

01:00:30,890 --> 01:00:28,859

of years ago in advanced technology that

1541

01:00:32,270 --> 01:00:30,900

sank beneath the waves

1542

01:00:34,609 --> 01:00:32,280

um I don't know if they've ever

1543

01:00:36,710 --> 01:00:34,619

discovered any concrete evidence of it

1544

01:00:39,109 --> 01:00:36,720

but I think it's a fascinating notion

1545

01:00:41,270 --> 01:00:39,119

I've seen uh

1546

01:00:46,010 --> 01:00:41,280

stuff reported like people have found

1547

01:00:47,829 --> 01:00:46,020

like supposedly like in Coal like gears

1548

01:00:50,990 --> 01:00:47,839

um and things like that that go back

1549

01:00:52,789 --> 01:00:51,000

millions and millions of years so I mean

1550

01:00:57,470 --> 01:00:52,799

maybe there was an advanced civilization

1551

01:01:01,549 --> 01:00:59,930

yeah isn't there like a stairway in the

1552

01:01:03,589 --> 01:01:01,559

Bahamas that they say it's like The

1553

01:01:04,670 --> 01:01:03,599

Stairway to Atlantis or something like

1554

01:01:06,470 --> 01:01:04,680

that

1555

01:01:08,510 --> 01:01:06,480

I think

1556

01:01:10,309 --> 01:01:08,520

I've been to the Bahamas but I never you

1557

01:01:12,829 --> 01:01:10,319

know you know I've never saw anything

1558

01:01:16,730 --> 01:01:14,690

okay yeah I'm not sure if it is the

1559

01:01:18,530 --> 01:01:16,740

Bahamas or not I know it's it's one of

1560

01:01:22,430 --> 01:01:18,540

those islands

1561

01:01:25,069 --> 01:01:22,440

any humanoid Marine Cryptids hi dizzy

1562

01:01:27,049 --> 01:01:25,079

um the only thing I've ever seen that

1563

01:01:29,450 --> 01:01:27,059

would be encrypted and related to the

1564

01:01:33,470 --> 01:01:29,460

water was that Bigfoot swimming Bigfoot

1565

01:01:34,970 --> 01:01:33,480

incident that we talked about earlier so

1566

01:01:36,890 --> 01:01:34,980

I'm sorry I can't be of more help with

1567

01:01:39,170 --> 01:01:36,900

that

1568

01:01:42,950 --> 01:01:39,180

no

1569

01:01:46,250 --> 01:01:42,960

so is there anyone else

1570

01:01:50,630 --> 01:01:47,870

are you okay

1571

01:01:53,990 --> 01:01:50,640

oh yeah you know old age coveted cat

1572

01:01:55,750 --> 01:01:54,000

hair you know it all catches up with you

1573

01:02:00,109 --> 01:01:55,760

right

1574

01:02:01,010 --> 01:02:00,119

I feel that trust me so is there okay I

1575

01:02:05,630 --> 01:02:01,020

want to make sure that wasn't the

1576

01:02:05,640 --> 01:02:08,510

what was that

1577

01:02:13,190 --> 01:02:10,849

oh what that was

1578

01:02:16,250 --> 01:02:13,200

that shot me I don't know what that was

1579

01:02:20,270 --> 01:02:16,260

um is there is there anything else that

1580

01:02:22,490 --> 01:02:20,280

you would like to talk about or promote

1581

01:02:25,789 --> 01:02:22,500

promote I mean if people are interested

1582

01:02:28,250 --> 01:02:25,799

first off um in terms of my stuff the uh

1583

01:02:29,270 --> 01:02:28,260

the the Mega Shark video is definitely

1584

01:02:30,710 --> 01:02:29,280

worth it because you're going to see

1585

01:02:35,690 --> 01:02:30,720

giant bites like you wouldn't believe

1586

01:02:38,210 --> 01:02:35,700

that's on my YouTube uh Channel which is

1587

01:02:41,450 --> 01:02:38,220

called Max Hawthorne's book trailers and

1588

01:02:42,410 --> 01:02:41,460

videos shows you I I I'm so brain dead I

1589

01:02:43,670 --> 01:02:42,420

don't even know the name of my own

1590

01:02:47,450 --> 01:02:43,680

channel

1591

01:02:50,210 --> 01:02:47,460

um but uh yeah if anybody wants to check

1592

01:02:52,870 --> 01:02:50,220

out the books first off uh you can go to

1593

01:02:55,370 --> 01:02:52,880

my website my author site is either

1594

01:02:58,430 --> 01:02:55,380

maxhawthorne.com make sure there's an e

1595

01:03:01,730 --> 01:02:58,440

on the end or cronusrising.com with a K

1596

01:03:03,530 --> 01:03:01,740

and there is a free books page on there

1597

01:03:05,210 --> 01:03:03,540

where you can get downloads and stuff

1598

01:03:06,410 --> 01:03:05,220

like that to check out

1599

01:03:09,349 --> 01:03:06,420

um all the books you know different

1600

01:03:11,930 --> 01:03:09,359

formats Etc are available uh there's a

1601  
01:03:13,549 --> 01:03:11,940  
Blog there's the Paleo gallery that you

1602  
01:03:15,710 --> 01:03:13,559  
can take a tour of all sorts of stuff

1603  
01:03:17,450 --> 01:03:15,720  
it's a pretty cool site has a lot of

1604  
01:03:19,069 --> 01:03:17,460  
stuff on there and everything and all my

1605  
01:03:21,650 --> 01:03:19,079  
all my stuff is available through Amazon

1606  
01:03:24,109 --> 01:03:21,660  
even the music

1607  
01:03:26,630 --> 01:03:24,119  
and it's on Kindle unlimited as well

1608  
01:03:28,970 --> 01:03:26,640  
right uh most of the stuff yeah you

1609  
01:03:30,530 --> 01:03:28,980  
could read online okay yeah which is

1610  
01:03:32,990 --> 01:03:30,540  
great oh if you're gonna get monsters

1611  
01:03:35,450 --> 01:03:33,000  
and remixes I definitely recommend the

1612  
01:03:37,010 --> 01:03:35,460  
Kindle version because all the

1613  
01:03:39,890 --> 01:03:37,020

## references

1614

01:03:41,450 --> 01:03:39,900

like the links are live so you can you

1615

01:03:43,609 --> 01:03:41,460

know if you want to corroborate or check

1616

01:03:45,109 --> 01:03:43,619

you know you know information provided

1617

01:03:46,730 --> 01:03:45,119

you just click on a boom on the internet

1618

01:03:48,890 --> 01:03:46,740

it'll take you right there so you don't

1619

01:03:50,690 --> 01:03:48,900

have to go you know copying URLs and

1620

01:03:52,730 --> 01:03:50,700

typing and stuff like that it really

1621

01:03:55,309 --> 01:03:52,740

makes your life easy for that type of

1622

01:03:58,190 --> 01:03:55,319

stuff and that's a good book I mean in

1623

01:04:00,410 --> 01:03:58,200

there I got to interview people like

1624

01:04:02,569 --> 01:04:00,420

that have had crypted encounters nobody

1625

01:04:04,490 --> 01:04:02,579

even knows they're still alive I spoke

1626  
01:04:07,490 --> 01:04:04,500  
to Rodney Ross at length the sole

1627  
01:04:09,470 --> 01:04:07,500  
survivor of the South Side sea serpent I

1628  
01:04:12,049 --> 01:04:09,480  
mean the sea monster from 1976 that

1629  
01:04:13,670 --> 01:04:12,059  
attacked three different boats over five

1630  
01:04:15,950 --> 01:04:13,680  
days and tried to kill and eat people

1631  
01:04:17,750 --> 01:04:15,960  
and he was right there to stay almost

1632  
01:04:20,270 --> 01:04:17,760  
ate the back of his boat with him and

1633  
01:04:22,670 --> 01:04:20,280  
his dad on it I I got all the dirt all

1634  
01:04:24,829 --> 01:04:22,680  
the details I I mean I found

1635  
01:04:26,210 --> 01:04:24,839  
discrepancies with past versions of the

1636  
01:04:27,230 --> 01:04:26,220  
stories and stuff like that I

1637  
01:04:28,130 --> 01:04:27,240  
interviewed

1638  
01:04:31,549 --> 01:04:28,140

um

1639

01:04:33,530 --> 01:04:31,559

oh what's his name uh Gary LaMotta who

1640

01:04:36,650 --> 01:04:33,540

saw that 38-foot Turtle back in like

1641

01:04:38,329 --> 01:04:36,660

1969 his friend Earl is still with us

1642

01:04:40,549 --> 01:04:38,339

and I interviewed Earl who was there and

1643

01:04:43,549 --> 01:04:40,559

saw this monstrous Turtle I mean great

1644

01:04:46,190 --> 01:04:43,559

stuff we investigated Mega squids

1645

01:04:48,230 --> 01:04:46,200

giant octopi I got a witness they saw an

1646

01:04:52,430 --> 01:04:48,240

octopus down in Florida back in I think

1647

01:04:54,890 --> 01:04:52,440

it was 2014 or 2013 an octopus that they

1648

01:04:57,289 --> 01:04:54,900

estimated was 80 or 90 feet long I mean

1649

01:04:59,750 --> 01:04:57,299

the list goes oh my gosh the Carnival

1650

01:05:01,430 --> 01:04:59,760

Cruise monster is in there all sorts of

1651

01:05:03,650 --> 01:05:01,440

stuff it's it's a really cool book and

1652

01:05:05,870 --> 01:05:03,660

everything is very factual you know I

1653

01:05:08,150 --> 01:05:05,880

try not to be I'm not preachy oh my God

1654

01:05:09,950 --> 01:05:08,160

I present the information you know I

1655

01:05:11,510 --> 01:05:09,960

give people what I think are

1656

01:05:14,329 --> 01:05:11,520

possibilities and then people get to

1657

01:05:15,789 --> 01:05:14,339

draw their own you know opinions or make

1658

01:05:18,049 --> 01:05:15,799

their own judgment I guess you'd say

1659

01:05:20,329 --> 01:05:18,059

what is your favorite story out of there

1660

01:05:23,210 --> 01:05:20,339

or a favorite account

1661

01:05:25,490 --> 01:05:23,220

honestly that giant turtle is probably

1662

01:05:28,370 --> 01:05:25,500

my favorite especially because I got to

1663

01:05:30,170 --> 01:05:28,380

talk to Earl at length because I I said

1664

01:05:32,150 --> 01:05:30,180

to him like how do you know how big the

1665

01:05:34,370 --> 01:05:32,160

turtle was and he said well we were we

1666

01:05:36,289 --> 01:05:34,380

had our two boats you know X number feet

1667

01:05:39,530 --> 01:05:36,299

apart and this Turtle which was almost

1668

01:05:42,289 --> 01:05:39,540

white like pale gray was lying on a uh

1669

01:05:45,049 --> 01:05:42,299

like an a rock outcropping like an

1670

01:05:47,569 --> 01:05:45,059

uprise like maybe 20 or 30 feet below

1671

01:05:51,250 --> 01:05:47,579

them and he said the turtle was as big

1672

01:05:53,569 --> 01:05:51,260

as my boat and my boat is 38 feet long

1673

01:05:56,210 --> 01:05:53,579

and I said were you a little nervous he

1674

01:05:57,770 --> 01:05:56,220

goes oh I was quite scared I was afraid

1675

01:05:59,750 --> 01:05:57,780

he was going to get mad and come up and

1676

01:06:01,609 --> 01:05:59,760

capsize us let me tell you this thing

1677

01:06:04,069 --> 01:06:01,619

was big you know but it was just really

1678

01:06:07,010 --> 01:06:04,079

it's just so cool to talk to somebody

1679

01:06:09,710 --> 01:06:07,020

who's been right there and such a rare

1680

01:06:11,809 --> 01:06:09,720

occurrence and there is footage of this

1681

01:06:14,390 --> 01:06:11,819

giant turtle I mean it's old Subway

1682

01:06:16,430 --> 01:06:14,400

footage yeah I took Stills they're in

1683

01:06:18,770 --> 01:06:16,440

Monsters memory Mysteries I got um

1684

01:06:21,170 --> 01:06:18,780

Gary's widow's permission and I enhanced

1685

01:06:22,549 --> 01:06:21,180

them and you can see this is a giant

1686

01:06:23,930 --> 01:06:22,559

turtle it's looking right at the camera

1687

01:06:26,150 --> 01:06:23,940

it stuck its head up out of the water

1688

01:06:29,630 --> 01:06:26,160

you could see the eyes the bags under

1689

01:06:31,190 --> 01:06:29,640

the eyes the beak the folds of flesh on

1690

01:06:33,890 --> 01:06:31,200

the throat all sorts of stuff like that

1691

01:06:35,809 --> 01:06:33,900

it's really weird oh my gosh how old is

1692

01:06:39,049 --> 01:06:35,819

it supposed to be

1693

01:06:40,910 --> 01:06:39,059

or how old was the turtle yeah how do

1694

01:06:44,990 --> 01:06:40,920

you think it was V I mean to be Turtles

1695

01:06:49,970 --> 01:06:46,490

tortoises could be well

1696

01:06:52,130 --> 01:06:49,980

years old but I mean this was in 1969 I

1697

01:06:53,870 --> 01:06:52,140

think and this was an adult animal it

1698

01:06:56,390 --> 01:06:53,880

was another one spotted a short time

1699

01:06:58,130 --> 01:06:56,400

after in that same area I had I found

1700

01:06:59,809 --> 01:06:58,140

sightings of these Turtles all over the

1701

01:07:01,130 --> 01:06:59,819

place going back sometimes 100 or 200

1702

01:07:04,910 --> 01:07:01,140

years

1703

01:07:07,309 --> 01:07:04,920

oh wow yeah even one

1704

01:07:08,690 --> 01:07:07,319

sorry oh go ahead no go ahead it's okay

1705

01:07:14,589 --> 01:07:08,700

what it looks like looks like the turtle

1706

01:07:18,410 --> 01:07:16,849

you know Turtle but you're not that

1707

01:07:21,230 --> 01:07:18,420

doesn't mean killer whales can't get you

1708

01:07:23,569 --> 01:07:21,240

you know yeah and like you said earlier

1709

01:07:25,609 --> 01:07:23,579

orcas they're very they I mean they seem

1710

01:07:28,010 --> 01:07:25,619

nice but they're very mean at times

1711

01:07:30,289 --> 01:07:28,020

I mean it I mean I you know you see like

1712

01:07:32,390 --> 01:07:30,299

one like SWAT of porpoise and send it

1713

01:07:34,430 --> 01:07:32,400

like or seal and send it 200 feet flying

1714

01:07:36,410 --> 01:07:34,440

through the air you know

1715

01:07:38,750 --> 01:07:36,420

it seems like they're like hey let's

1716

01:07:40,069 --> 01:07:38,760

play ball who's up you know like like

1717

01:07:41,270 --> 01:07:40,079

that kind of stuff

1718

01:07:45,710 --> 01:07:41,280

yeah

1719

01:07:48,950 --> 01:07:45,720

oh my God I got a muscle cramp ow

1720

01:07:52,309 --> 01:07:48,960

old age it's not even creeping up it's

1721

01:07:55,849 --> 01:07:52,319

like hey I'm here you know

1722

01:07:58,130 --> 01:07:55,859

trust me I understand that so if you

1723

01:08:00,770 --> 01:07:58,140

have if you have anything else that you

1724

01:08:03,049 --> 01:08:00,780

want to talk about or add or any of your

1725

01:08:04,490 --> 01:08:03,059

other books that you want to promote

1726

01:08:09,109 --> 01:08:04,500

you can

1727

01:08:10,069 --> 01:08:09,119

yeah no I'm just gonna put some ice on

1728

01:08:11,870 --> 01:08:10,079

this or something

1729

01:08:14,029 --> 01:08:11,880

um I mean if people are you know you

1730

01:08:15,529 --> 01:08:14,039

could go like I'm on Facebook there's a

1731

01:08:17,930 --> 01:08:15,539

group called monsters and Read Mysteries

1732

01:08:20,209 --> 01:08:17,940

and people are welcome to join there we

1733

01:08:21,829 --> 01:08:20,219

post lots of stuff you know for marine

1734

01:08:25,010 --> 01:08:21,839

Cryptids and other things like that

1735

01:08:27,349 --> 01:08:25,020

terrestrial Stuff Etc of interest and uh

1736

01:08:30,229 --> 01:08:27,359

it's you know that that's just it I mean

1737

01:08:31,970 --> 01:08:30,239

I'm me I'm easy to find you know people

1738

01:08:37,010 --> 01:08:31,980

like the books I'm happy to have more

1739

01:08:41,930 --> 01:08:40,130

right well I appreciate you coming on I

1740

01:08:44,150 --> 01:08:41,940

appreciate you putting up with me and

1741

01:08:45,470 --> 01:08:44,160

staying through the entire show Even

1742

01:08:47,870 --> 01:08:45,480

though you're sick trust me I understand

1743

01:08:50,090 --> 01:08:47,880

how bad covet is so I want to thank you

1744

01:08:51,950 --> 01:08:50,100

so much again Max I appreciate it

1745

01:08:53,570 --> 01:08:51,960

Bernadette it was my privilege and my

1746

01:08:58,610 --> 01:08:53,580

pleasure you got some great people great

1747

01:09:03,050 --> 01:09:01,130

we are very lucky

1748

01:09:05,030 --> 01:09:03,060

there I I adore them all so they're

1749

01:09:06,530 --> 01:09:05,040

wonderful so and I want to thank you

1750

01:09:10,090 --> 01:09:06,540

again and you have a good night thank

1751

01:09:12,829 --> 01:09:10,100

you Max thanks take care bye

1752

01:09:14,930 --> 01:09:12,839

all right everyone thank you so much for

1753

01:09:16,910 --> 01:09:14,940

being here and sticking with us I truly

1754

01:09:19,910 --> 01:09:16,920

appreciate it and again I want to thank

1755

01:09:21,709 --> 01:09:19,920

Max Hawthorne for being here he was an

1756

01:09:24,050 --> 01:09:21,719

amazing guest I I totally enjoyed

1757

01:09:26,329 --> 01:09:24,060

speaking with him

1758

01:09:29,630 --> 01:09:26,339

um next week I am going to have Lily

1759

01:09:31,729 --> 01:09:29,640

Nova as my guest and Wednesday Lon will

1760

01:09:34,849 --> 01:09:31,739

be doing another report show followed by

1761

01:09:36,829 --> 01:09:34,859

Vincent and then next week long will be

1762

01:09:39,169 --> 01:09:36,839

back at his regular time slot and I will

1763

01:09:40,610 --> 01:09:39,179

be following him again with Lily Nova so

1764

01:09:42,280 --> 01:09:40,620

thank you guys again and have a good

1765

01:09:56,650 --> 01:09:42,290

night bye
