

1

00:00:00,000 --> 00:00:29,840

Revealed in upcoming episodes of this program are the contents of a recently

2

00:00:29,840 --> 00:00:36,840

unearthed repository classified by the secret government, the phenomenon archives.

3

00:00:59,840 --> 00:01:26,680

Was our race genetically engineered 6,000 years ago?

4

00:01:26,680 --> 00:01:33,520

Were we created by beings from distant space to work as laborers towards unknown end?

5

00:01:33,520 --> 00:01:38,600

From ancient cave paintings to the conquest of space, we have grappled with the truths

6

00:01:38,600 --> 00:01:40,320

of our beginnings.

7

00:01:40,320 --> 00:01:45,680

But what if the question of our origin falls outside the realm of social acceptability?

8

00:01:45,680 --> 00:01:50,360

What would happen to our culture if we were to discover that we, as a race, are no more

9

00:01:50,360 --> 00:02:01,360

than the result of a genetic experiment conducted by a superior life form?

10

00:02:01,360 --> 00:02:05,480

Over the course of the 20th century, we have witnessed exponential advancements in the

11

00:02:05,480 --> 00:02:08,000

collective knowledge of mankind.

12

00:02:08,000 --> 00:02:12,080

In every field of science and technology, our achievements are no longer measured in

13

00:02:12,080 --> 00:02:19,000

centuries or decades, but in years and even months.

14

00:02:19,000 --> 00:02:23,320

Without this extraordinary growth, mankind has surpassed every achievement recorded throughout

15

00:02:23,320 --> 00:02:26,200

the millennia of known civilization.

16

00:02:26,200 --> 00:02:30,320

But what if the breakthroughs of today concerning humanity, the earth and our beginnings are

17

00:02:30,320 --> 00:02:34,040

not new wisdom at all?

18

00:02:34,040 --> 00:02:39,280

What if much of this supposed recent knowledge lays secreted away in the ruins of a once-powerful

19

00:02:39,280 --> 00:02:42,320

society awaiting our discovery?

20

00:02:42,320 --> 00:02:46,520

Could this alleged new knowledge uncovered in Earth's little corner of the universe

21

00:02:46,520 --> 00:02:50,680

be considered Genesis-revisited?

22

00:02:50,680 --> 00:02:55,280

This is the belief of the world-renowned archaeologist, linguist and expert in the field of cultural

23

00:02:55,280 --> 00:02:58,000

anthropology, Zechariah Sitchin.

24

00:02:58,000 --> 00:02:59,760

I'm Zechariah Sitchin.

25

00:02:59,760 --> 00:03:07,920

I devoted a lifetime to the study of ancient civilizations, ancient languages, their art,

26

00:03:07,920 --> 00:03:12,200

their beliefs, and the knowledge that they had.

27

00:03:12,880 --> 00:03:19,080

The question is, when you study, when you look at all that, is it myth, is it mythology,

28

00:03:19,080 --> 00:03:20,920

or did it really happen?

29

00:03:20,920 --> 00:03:24,920

I believe it all really happened.

30

00:03:24,920 --> 00:03:30,880

In our obsession with antagonisms at the moment, we often forget how much unites all the members

31

00:03:30,880 --> 00:03:33,280

of humanity.

32

00:03:33,280 --> 00:03:39,360

Perhaps we need some outside universal threat to make us recognize this common bound.

33

00:03:39,360 --> 00:03:45,680

I occasionally think how our differences worldwide would vanish if we were facing an alien threat

34

00:03:45,680 --> 00:03:49,000

from outside this world.

35

00:03:49,000 --> 00:03:54,000

And yet I ask you, is not an alien force already amongst us?

36

00:04:03,000 --> 00:04:09,200

Space is the inescapable challenge to all the advanced nations of the Earth.

37

00:04:09,200 --> 00:04:13,760

Space is the first space-faring nation to establish the United States as the preeminent

38

00:04:13,760 --> 00:04:17,120

space-faring nation.

39

00:04:17,120 --> 00:04:23,320

First for the coming decade for the 1990s space station freedom, and next for the new

40

00:04:23,320 --> 00:04:30,840

century, back to the moon, back to the future, and this time back to stay.

41

00:04:30,840 --> 00:04:38,880

And then a journey into tomorrow, a journey to another planet, a manned mission to Mars.

42

00:04:39,560 --> 00:04:45,160

An ambitious objective, and with the success of the Mars probes and NASA's rover, one

43

00:04:45,160 --> 00:04:49,600

that humanity has made substantial strides toward achieving.

44

00:04:49,600 --> 00:04:53,560

Could there have been a space base on Mars in antiquity?

45

00:04:53,560 --> 00:05:02,560

If we had physical tangible evidence of artifacts on Mars, we are not only not alone in the

46

00:05:02,560 --> 00:05:07,920

universe, but someone has been on the next planet over.

47

00:05:07,960 --> 00:05:11,920

In itself, we'll forever change our frame of reference.

48

00:05:11,920 --> 00:05:18,120

Mankind came out of the dark ages, and the Middle Ages reached the age of enlightenment,

49

00:05:18,120 --> 00:05:23,720

experienced the industrial revolution, and entered the era of advanced technology, the

50

00:05:23,720 --> 00:05:27,920

era of genetic engineering, and the era of spaceflight.

51

00:05:27,920 --> 00:05:29,920

Thanks, Addo.

52

00:05:29,920 --> 00:05:32,920

4 forward, just under the right level.

53

00:05:32,920 --> 00:05:34,920

30 seconds forward.

54

00:05:34,920 --> 00:05:36,920

We copy it down, Eagle.

55

00:05:36,920 --> 00:05:38,920

The angle has landed.

56

00:05:38,920 --> 00:05:42,920

Astronauts who land like eagles.

57

00:05:42,920 --> 00:05:47,920

Zechariah Sitchin's research reveals that in our ancient past there were advanced beings

58

00:05:47,920 --> 00:05:53,920

referred to as the Anunnaki, translated, those who from heaven to earth came.

59

00:05:54,920 --> 00:06:00,920

The idea that there was, in our solar system, a race of intelligent beings far older than

60

00:06:00,920 --> 00:06:06,920

us who are now gone would certainly force us to rethink lots of questions, including

61

00:06:06,920 --> 00:06:08,920

the question of human origins.

62

00:06:08,920 --> 00:06:10,920

Where did we come from?

63

00:06:10,920 --> 00:06:13,920

Could we be the products of genetic engineering?

64

00:06:13,920 --> 00:06:18,920

The hypothesis that modern science is only now catching up with ancient knowledge is inspiring

65

00:06:18,920 --> 00:06:24,920

scientists and researchers to increase efforts to rediscover that which may have been lost over

time.

66

00:06:24,920 --> 00:06:35,920

It rekindles a situation that has lain dormant almost 5,500 years, the incident of the Tower of Babel.

67

00:06:35,920 --> 00:06:42,920

In the Babylonian version of the biblical story, the people of Babylon were building a tower whose head

68

00:06:42,920 --> 00:06:49,920

should reach the heaven in which a sham, a space rocket, was to be installed under the

69

00:06:49,920 --> 00:06:52,920

direction of their supreme god.

70

00:06:52,920 --> 00:06:59,920

But the other deities were not amused by this foray of mankind into the space age.

71

00:06:59,920 --> 00:07:04,920

The biblical story recalls that Yahweh came down to see the city and the tower that the humans were

72

00:07:04,920 --> 00:07:09,920

building, and he said to his colleagues in Genesis chapter 11,

73

00:07:09,920 --> 00:07:13,920

This is just the beginning of their undertakings.

74

00:07:13,920 --> 00:07:19,920

From now on, anything that they shall scheme to do shall no longer be impossible for them.

75

00:07:19,920 --> 00:07:26,920

Come, let us go down and confuse their language so that they should not understand each other's speech.

76

00:07:26,920 --> 00:07:32,920

Thanks to the science of archaeology, experts now know that the first great civilization emerged almost

77

00:07:32,920 --> 00:07:42,920

6,000 years ago, older than the Greeks, older than the Mayans, older than the Incas.

78

00:07:42,920 --> 00:07:48,920

The people of this society were called Sumerians after their land, Sumer, in the great plain between

79

00:07:48,920 --> 00:07:52,920

the Euphrates and Tigris rivers, today's Iraq.

80

00:07:52,920 --> 00:07:57,920

The book of Genesis calls the land Shinar.

81

00:07:57,920 --> 00:08:02,920

For generations, biblical scholars either ignore biblical references to ancient kingdoms

82

00:08:02,920 --> 00:08:05,920

or categorize these as legend or lore.

83

00:08:05,920 --> 00:08:10,920

Through the study of historical relics and the translation of ancient languages, many biblical

84

00:08:10,920 --> 00:08:16,920

researchers now believe that the previously questioned Old Testament references are indeed

85

00:08:16,920 --> 00:08:21,920

historically authentic accounts of flourishing advanced cultures.

86

00:08:21,920 --> 00:08:31,920

If you study the Genesis document, God made Adam out of clay and then took Eve out of his rib,

87

00:08:31,920 --> 00:08:33,920

one of his ribs, etc.

88

00:08:33,920 --> 00:08:38,920

If you study this document, you discover that it is really a much shorter version of a much more

89

00:08:38,920 --> 00:08:45,920

complicated document that comes out of Babylonia and then out of Sumer and so on.

90

00:08:45,920 --> 00:08:54,920

These ancient texts give a really complicated story of powerful non-human God-like beings

91

00:08:54,920 --> 00:08:59,920

actually engineering us, making us for specific purposes.

92

00:08:59,920 --> 00:09:05,920

Zechariah Sitchin's investigation into these cultures brings him to this 6,000-year-old temple

93

00:09:05,920 --> 00:09:09,920

in an excavated area of the ancient city, Iraq.

94

00:09:09,920 --> 00:09:16,920

Until its discovery only 150 years ago, Iraq was known only through passages in the Bible.

95

00:09:16,920 --> 00:09:24,920

The temple is dedicated to a female goddess named Inani, also referred to in later times as Ishtar,

96

00:09:24,920 --> 00:09:26,920

Zechariah Sitchin.

97

00:09:26,920 --> 00:09:30,920

You can see here her features and little damage.

98

00:09:30,920 --> 00:09:35,920

Her divinity was marked by the tear of horns that she had.

99

00:09:35,920 --> 00:09:44,920

She held a jar with the water of life and she was surrounded as a decoration,

100

00:09:44,920 --> 00:09:51,920

but perhaps also symbolically, with the symbol that some refer to as entwined snakes,

101

00:09:51,920 --> 00:09:57,920

which was the symbol of science in those days, 6,000 years ago.

102

00:09:57,920 --> 00:10:05,920

Some find in it a precursor of the Egyptian Ankh, which was the symbol of life and creation.

103

00:10:05,920 --> 00:10:11,920

Further results of Mr. Sitchin's research affirm the theory that this visage of entwined snakes

104

00:10:11,920 --> 00:10:15,920

is the symbol for genetic manipulation of DNA.

105

00:10:15,920 --> 00:10:22,920

Carved out in stone over 6,000 years ago, Ishtar is sometimes depicted flying through the sky

106

00:10:22,920 --> 00:10:26,920

and leaving the Earth's atmosphere to traverse the heavens.

107

00:10:28,920 --> 00:10:34,920

In ancient Mesopotamia, the secrets of astronomy and other celestial knowledge are kept carefully guarded,

108

00:10:34,920 --> 00:10:41,920

studied behind closed doors by an exclusive society of priest astronomers.

109

00:10:41,920 --> 00:10:47,920

Cylinder seals like these are the only surviving record of these carefully guarded secrets.

110

00:10:47,920 --> 00:10:52,920

This clay tablet carries the print of a cylinder seal about 4500 years old.

111

00:10:52,920 --> 00:10:59,920

It depicts the god in Leo granting the plow to humankind, ushering in the age of modern agriculture.

112

00:10:59,920 --> 00:11:04,920

On closer inspection, something completely remarkable can be seen.

113

00:11:04,920 --> 00:11:11,920

A detailed depiction of the complete solar system configured identically to that known to contemporary science.

114

00:11:11,920 --> 00:11:16,920

With the sun prominently figured in the center, each planet appears in its correct position

115

00:11:16,920 --> 00:11:20,920

and relative proportions to the other planetary bodies.

116

00:11:20,920 --> 00:11:28,920

On the outskirts is one additional planet, a tenth not currently located by astronomers of our modern era.

117

00:11:28,920 --> 00:11:33,920

Astronomers around the world are on the lookout for this evasive celestial sphere

118

00:11:33,920 --> 00:11:39,920

as a growing body of physical evidence indicates that it does in fact exist.

119

00:11:40,920 --> 00:11:53,920

History records the discovery of the planet Pluto as February 18, 1930 by astronomer Clyde Tombaugh.

120

00:11:53,920 --> 00:11:59,920

Yet Pluto is clearly shown on the imprint taken from the Sumerian cylinder seal.

121

00:11:59,920 --> 00:12:04,920

There is also one additional planet, the one that scientists refer to as the mysterious Planet X,

122

00:12:04,920 --> 00:12:09,920

the yet undiscovered most distant member of our solar system.

123

00:12:10,920 --> 00:12:15,920

According to modern science, prior to the invention of the telescope in the 1600s,

124

00:12:15,920 --> 00:12:22,920

humanity had no knowledge of outlying planets beyond Jupiter, as these bodies cannot be viewed with the naked eye.

125

00:12:22,920 --> 00:12:29,920

Since the day of Galileo Galilei, optical astronomers have amassed an important body of knowledge about the outer planets.

126

00:12:29,920 --> 00:12:36,920

These theories established by astronomers from around the globe have been uncontested these last centuries.

127

00:12:36,920 --> 00:12:41,920

With the technological advancements of our day, new vantage points have developed,

128

00:12:41,920 --> 00:12:45,920

such as the unobstructed view of NASA's Hubble telescope,

129

00:12:45,920 --> 00:12:52,920

and the perspective gained through unmanned probes sent on reconnaissance missions to the outer reaches of our solar system.

130

00:12:52,920 --> 00:12:59,920

These breakthroughs in space exploration reveal many inaccuracies in earlier astronomical conclusions.

131

00:13:01,920 --> 00:13:08,920

On August 19, 1977, the American space probe Voyager 2 leaves Cape Canaveral on a several-year journey

132

00:13:08,920 --> 00:13:12,920

to the vicinity of this solar system's most distant planets.

133

00:13:12,920 --> 00:13:17,920

The Voyager's discoveries challenge many of astronomy's recent conclusions,

134

00:13:17,920 --> 00:13:21,920

while fully corroborating ancient knowledge.

135

00:13:22,920 --> 00:13:25,920

For the first time we see images of Uranus.

136

00:13:25,920 --> 00:13:32,920

Astonishing, it is exactly as the Sumerians report in their 6,000-year-old description.

137

00:13:32,920 --> 00:13:41,920

Though they have no telescopes that we know of, the Sumerians characterize Uranus as Mosh Seek, translated Bright Greenish.

138

00:13:41,920 --> 00:13:45,920

They also explain the unique planetary tilt of Uranus.

139

00:13:45,920 --> 00:13:53,920

According to the Sumerians, our solar system was invaded by a planetary body that caused collisions and disrupted the existing order.

140

00:13:53,920 --> 00:14:00,920

NASA scientists concur that a collision with a body the size of Earth traveling at 40,000 miles per

hour

141

00:14:00,920 --> 00:14:07,920

could have caused both the orbital skew of Uranus and the devastation apparent from the planet's surface scarring.

142

00:14:08,920 --> 00:14:14,920

Its neighbor Neptune was described as a blue-green planet by the Sumerians millennia ago,

143

00:14:14,920 --> 00:14:18,920

but science has only confirmed this fact during the past few decades.

144

00:14:18,920 --> 00:14:23,920

The Sumerians named and listed all of the planets in our solar system.

145

00:14:23,920 --> 00:14:32,920

Their documented list of these planets is tangible evidence that in at least one respect, modern man is on a path of rediscovery.

146

00:14:33,920 --> 00:14:48,920

That ancient knowledge included the planets Uranus and Neptune, supposedly unknown until discovered

in 1781 and 1846,

147

00:14:48,920 --> 00:14:53,920

and even Pluto, not discovered until 1930.

148

00:14:54,920 --> 00:15:07,920

Neptune, Nudemud, the artful creator, Uranus, Anu, Key of the Heavens, Saturn, Anshar, foremost of the heavens,

149

00:15:07,920 --> 00:15:21,920

Jupiter, Kishar, foremost of firm lands, the asteroid belt, Rakesh, the hammered bracelet, Mars, La Mou, God of War,

150

00:15:21,920 --> 00:15:28,920

and Key, Earth, what the Sumerians considered to be the seventh planet.

151

00:15:28,920 --> 00:15:34,920

Why the seventh planet? Why not the third, as Earth is so often referred to in modern parlance?

152

00:15:34,920 --> 00:15:42,920

Sumerian records indicate that they began their counting not from the Sun, but from a planet on the

outside of the solar system.

153

00:15:42,920 --> 00:15:51,920

But most surprising was the inclusion of one more large planet as the 12th member of our solar system.

154

00:15:51,920 --> 00:15:59,920

The launch of Pioneer 10 in 1972 ushers in the era of deep space exploration.

155

00:15:59,920 --> 00:16:06,920

The craft journeys beyond the outernone planets, sending back data that is used to seek a possible 10th planet.

156

00:16:06,920 --> 00:16:13,920

14 August 1978, which was just about six weeks after we discovered the fact that Pluto has a satellite.

157

00:16:13,920 --> 00:16:17,920

Once you have a satellite for a planet, you can determine how heavy it is.

158

00:16:17,920 --> 00:16:24,920

It turns out Pluto was very much smaller and lighter weight than we had thought, which meant that Pluto has no influence,

159

00:16:24,920 --> 00:16:29,920

no appreciable influence on the motions of the planet's Uranus and Neptune.

160

00:16:29,920 --> 00:16:39,920

At that point, we voiced the hypothesis that this means that there is at least one yet to be discovered planet in the outer reaches of the solar system.

161

00:16:39,920 --> 00:16:46,920

Over the past two decades, physicists have joined astronomers in the search for the mysterious Planet X.

162

00:16:46,920 --> 00:16:55,920

One of the things we did in 1978 having made this prediction that there was an additional planet, 10th or 12th, depending on your point of view,

163

00:16:55,920 --> 00:17:00,920

we sort of put our money where our mouth was as we went out and started looking for this thing.

164

00:17:00,920 --> 00:17:06,920

We've been able to refine the search area somewhat, get it rather narrowed down.

165

00:17:06,920 --> 00:17:11,920

We do our predictions based on the observed anomalies in Uranus and Neptune.

166

00:17:11,920 --> 00:17:18,920

We actually are currently looking down in the region of Centaurus, which is just south of the constellation Libra.

167

00:17:18,920 --> 00:17:29,920

But if it is in the kind of orbit that we describe here, it would have to be a planet that would have a mass something like 3 to 5 times the mass of the Earth.

168

00:17:29,920 --> 00:17:39,920

This would put it intermediate between the gaseous planets like Uranus and Neptune and the terrestrial planets that we have in the inner part of the solar system.

169

00:17:39,920 --> 00:17:49,920

So if this planet turns out to be in a 3600 year orbit, then its mass will be correspondingly larger.

170

00:17:49,920 --> 00:17:53,920

This one here is a map of the solar system as we know it.

171

00:17:53,920 --> 00:17:57,920

The inner planets, this is the orbit of Planet Pluto.

172

00:17:57,920 --> 00:18:03,920

And this here is the orbit that I have proposed for the 10th planet.

173

00:18:03,920 --> 00:18:06,920

And here's where we think it is right about now in its orbit.

174

00:18:07,920 --> 00:18:12,920

If Planet X exists, we are not alone in this solar system.

175

00:18:18,920 --> 00:18:21,920

Earth, the 7th planet.

176

00:18:21,920 --> 00:18:28,920

The sacred number 7, 7 days in the week, 7 days of Genesis, 7 tablets of creation.

177

00:18:28,920 --> 00:18:33,920

A case can be made for historical coincidence, but to Zechariah's itchen,

178

00:18:33,920 --> 00:18:37,920

this kind of numeric repetition points to more than just legend.

179

00:18:37,920 --> 00:18:43,920

Whichever way you look at it, the facts about this 10th planet are nothing less than astonishing.

180

00:18:43,920 --> 00:18:51,920

The story of this planet, as told by the Sumerians on their 7 tablets of creation, begins 4 billion years ago

181

00:18:51,920 --> 00:18:58,920

when our solar system was much younger and our own planet Earth did not yet exist.

182

00:18:58,920 --> 00:19:04,920

The surviving historical records of the Sumerians reveal the story of an intruder planet, Nibiru,

183

00:19:04,920 --> 00:19:11,920

which appeared out of deep space, drawn into the center of our solar system by the planetary pole of Neptune,

184

00:19:11,920 --> 00:19:14,920

Uranus, Saturn and Jupiter.

185

00:19:14,920 --> 00:19:21,920

On an opposing orbital path with the 7th planet, a planet referred to in Sumerian records as Tiamat,

186

00:19:21,920 --> 00:19:27,920

Nibiru's new orbit around the sun placed the two planets on a collision course.

187

00:19:27,920 --> 00:19:33,920

Sumerian cosmogony answers many puzzles that still baffle modern science.

188

00:19:33,920 --> 00:19:42,920

Central to it was the tale of a celestial collision and knowledge of a solar system with 12 members.

189

00:19:42,920 --> 00:19:48,920

As they draw near, one of the satellites of Nibiru crashes into Tiamat, cracking the planet.

190

00:19:48,920 --> 00:19:55,920

Subsequent collisions smash half of Tiamat completely, breaking the pieces into what develops mostly into the asteroid belt.

191

00:19:55,920 --> 00:20:01,920

This is referred to in the Bible and Sumerian text as the firmament.

192

00:20:01,920 --> 00:20:04,920

The other half of Tiamat becomes Earth.

193

00:20:04,920 --> 00:20:11,920

The Earth is thrust into a new orbital position, carrying with it Tiamat's main satellite, our moon.

194

00:20:11,920 --> 00:20:16,920

Nibiru, the intruder, is cast into a permanent clockwise solar orbit,

195

00:20:16,920 --> 00:20:20,920

returning to Earth's neighborhood once each 3600 years,

196

00:20:20,920 --> 00:20:25,920

forever becoming the 12th member of our solar system.

197

00:20:25,920 --> 00:20:30,920

This tale of creation echoed through all the ancient cultures,

198

00:20:30,920 --> 00:20:38,920

becoming part of the scientific knowledge that we find in the Old Testament, in the creation story of Genesis.

199

00:20:38,920 --> 00:20:44,920

In the aftermath of the collision, the biblical creator Elohim proclaims,

200

00:20:44,920 --> 00:20:49,920

Let the waters under the heaven be gathered together into one place,

201

00:20:49,920 --> 00:20:53,920

and let the dry land appear.

202

00:20:53,920 --> 00:20:55,920

And it was so.

203

00:20:55,920 --> 00:20:59,920

And Elohim called the dry land Earth.

204

00:20:59,920 --> 00:21:04,920

And the gathering together of the waters he called seas.

205

00:21:04,920 --> 00:21:08,920

If Earth is the orbital remains of a planetary collision,

206

00:21:08,920 --> 00:21:12,920

scientists believe that the most obvious place to look for planetary scarring

207

00:21:12,920 --> 00:21:18,920

is seven miles below the surface of the Pacific Ocean.

208

00:21:18,920 --> 00:21:22,920

When in the heights heavens had not been made,

209

00:21:22,920 --> 00:21:25,920

and below Earth had not been caused,

210

00:21:25,920 --> 00:21:30,920

not but primordial absolute, their begetter, mamu,

211

00:21:30,920 --> 00:21:36,920

and Tiamat she who bore them all, their waters were mingled together.

212

00:21:36,920 --> 00:21:41,920

The biblical passage of Genesis reads,

213

00:21:41,920 --> 00:21:45,920

In the beginning God created the heaven and the earth.

214

00:21:45,920 --> 00:21:48,920

And the earth was without form and void,

215

00:21:48,920 --> 00:21:52,920

and darkness was upon the face of the deep.

216

00:21:52,920 --> 00:21:56,920

And the spirit of God moved upon the face of the waters.

217

00:21:56,920 --> 00:22:03,920

And God said, Let there be light, and there was light.

218

00:22:03,920 --> 00:22:07,920

If we apply the knowledge of the Mesopotamian text to the biblical text,

219

00:22:07,920 --> 00:22:11,920

the correct reading of the book of Genesis emerges,

220

00:22:11,920 --> 00:22:14,920

especially in relation to waters.

221

00:22:14,920 --> 00:22:20,920

And Elohim said, Let there be a firmament in the midst of the waters,

222

00:22:20,920 --> 00:22:23,920

and let it divide the waters from the waters.

223

00:22:23,920 --> 00:22:26,920

And Elohim made the firmament,

224

00:22:26,920 --> 00:22:29,920

dividing the waters which are under the firmament,

225

00:22:29,920 --> 00:22:32,920

from the waters which are above the firmament.

226

00:22:32,920 --> 00:22:37,920

And Elohim called the firmament heaven.

227

00:22:37,920 --> 00:22:40,920

Upper waters, lower waters?

228

00:22:40,920 --> 00:22:42,920

What does the Bible mean by this?

229

00:22:42,920 --> 00:22:47,920

The Sumerians describe Uranus and Neptune as watery planets.

230

00:22:47,920 --> 00:22:50,920

What are the conclusions of modern science?

231

00:22:50,920 --> 00:22:59,920

In 1979, 1980, and 1981, pioneer and voyager visit Jupiter and Saturn with their many moons.

232

00:22:59,920 --> 00:23:03,920

During these missions, water is discovered virtually everywhere,

233

00:23:03,920 --> 00:23:08,920

as ice on the surface, and as water below the surface.

234

00:23:08,920 --> 00:23:14,920

The Sumerians' ancient claim of water on Jupiter's moons Io and Europa is proven.

235

00:23:14,920 --> 00:23:19,920

The Sumerian records indicate water on Enceladus and Tethys,

236

00:23:19,920 --> 00:23:24,920

two of the moons of Saturn, and in that planet's spectacular rings.

237

00:23:24,920 --> 00:23:28,920

The findings of NASA confirm these ancient Sumerian assertions,

238

00:23:28,920 --> 00:23:31,920

giving further credence and clarity to the biblical quote,

239

00:23:31,920 --> 00:23:34,920

Waters Above the Firmament.

240

00:23:34,920 --> 00:23:36,920

Halley's Comet travels through space,

241

00:23:36,920 --> 00:23:40,920

itself a spectacular confirmation of the biblical claim,

242

00:23:40,920 --> 00:23:42,920

Waters Above the Firmament.

243

00:23:42,920 --> 00:23:47,920

Nearly four billion years old, with a core half the size of Manhattan Island,

244

00:23:47,920 --> 00:23:53,920

this mystic traveler throws off water at the rate of 30 to 70 tons a second,

245

00:23:53,920 --> 00:23:57,920

with enough mass to continue its purge for thousands of years.

246

00:23:57,920 --> 00:24:00,920

Was ancient man aware of this spectral vision?

247

00:24:00,920 --> 00:24:07,920

The unusual celestial object reported in Babylonian texts to have been seen

248

00:24:07,920 --> 00:24:13,920

in the year 164 BC is believed to have been Halley's Comet.

249

00:24:13,920 --> 00:24:19,920

Significantly, it was considered the scepter star of Israel.

250

00:24:19,920 --> 00:24:22,920

In the Bible, the book of numbers records,

251

00:24:23,920 --> 00:24:26,920

I see it, though not now.

252

00:24:26,920 --> 00:24:30,920

I behold it, though it is not near.

253

00:24:30,920 --> 00:24:33,920

A star of Jacob did course.

254

00:24:33,920 --> 00:24:37,920

A scepter of Israel did arise.

255

00:24:37,920 --> 00:24:43,920

Halley's Comet and its lights are truly the messengers of Genesis.

256

00:24:43,920 --> 00:24:49,920

When the 19th century astronomer Chiaparelli announced that he had seen canals on Mars,

257

00:24:49,920 --> 00:24:51,920

he was ridiculed.

258

00:24:51,920 --> 00:24:56,920

So too was the respected American astronomer Lowell in 1916.

259

00:24:56,920 --> 00:25:01,920

When NASA's unmanned spacecraft visits Mars in the 70s and again in the 90s,

260

00:25:01,920 --> 00:25:05,920

ample evidence of water in that planet's past is revealed.

261

00:25:05,920 --> 00:25:10,920

Images from expeditions to Venus and Mars exhibit visual evidence of dry sea,

262

00:25:10,920 --> 00:25:16,920

lake and riverbeds characteristic of the biblical reference Waters Above the Firmament.

263

00:25:16,920 --> 00:25:20,920

Even Mercury, so close to the sun, seems to have had a watery past,

264

00:25:20,920 --> 00:25:23,920

yet maintaining ice at its polar caps.

265

00:25:23,920 --> 00:25:25,920

The NASA report reads,

266

00:25:25,920 --> 00:25:31,920

We are forced to no other conclusion but that we are seeing the effects of water on Mars.

267

00:25:31,920 --> 00:25:37,920

And, quote, Mars once had enough water to form a layer several meters deep

268

00:25:37,920 --> 00:25:40,920

over the whole surface of the planet, unquote.

269

00:25:40,920 --> 00:25:44,920

What we previously believed to be a dry and barren planet

270

00:25:44,920 --> 00:25:50,920

unexpectedly emerges as a planet where water once existed in abundance.

271

00:25:50,920 --> 00:25:55,920

Mars joins Venus, Mercury, the Earth and most recently the Earth's moon

272

00:25:55,920 --> 00:26:00,920

in corroborating the Sumerian concept of water below the firmament.

273

00:26:04,920 --> 00:26:07,920

With the discovery of water on the moon and distant planets,

274

00:26:07,920 --> 00:26:11,920

the possibility of colonization suddenly becomes much more viable.

275

00:26:11,920 --> 00:26:17,920

Oxygen can be extracted from the water to be used in domed habitats on planets with minimal atmosphere.

276

00:26:17,920 --> 00:26:21,920

And water is one of the principal ingredients of rocket fuel.

277

00:26:21,920 --> 00:26:26,920

This find increases the possibility of unlimited treks across the stars.

278

00:26:26,920 --> 00:26:31,920

We've had reports to the effect that the Viking equipment will never determine positively

279

00:26:31,920 --> 00:26:33,920

whether or not there's life on Mars.

280

00:26:33,920 --> 00:26:35,920

Can you set us straight on this?

281

00:26:35,920 --> 00:26:40,920

Well, my own view is it's much too soon to decide whether we will have a definitive answer

282

00:26:40,920 --> 00:26:44,920

It may be that there is an exotic biology on Mars.

283

00:26:44,920 --> 00:26:49,920

It may be that there's an exotic chemistry which looks a little bit like biology.

284

00:26:49,920 --> 00:26:52,920

There's a number of experiments to be done. They might decide the issue. They might not.

285

00:26:52,920 --> 00:26:56,920

But either way, Viking has been a biological success

286

00:26:56,920 --> 00:27:02,920

because the chemical explanation means that there is a kind of chemistry in the Martian surface

287

00:27:02,920 --> 00:27:06,920

which simulates some of the steps of chemistry in biology.

288

00:27:06,920 --> 00:27:08,920

We would learn something important about the origin of life.

289

00:27:08,920 --> 00:27:15,920

In October 1988, the Soviet Union sends two unmanned spacecraft, Phobos I and II,

290

00:27:15,920 --> 00:27:19,920

named for one of the Martian moons to study the red planet.

291

00:27:19,920 --> 00:27:22,920

Phobos I is lost while on its way to Mars.

292

00:27:22,920 --> 00:27:28,920

But Phobos II arrives to orbit Mars and immediately sends images back to Earth.

293

00:27:28,920 --> 00:27:33,920

On March 1st, 1989, pictures of this unusual grid are received.

294

00:27:33,920 --> 00:27:39,920

The grid, here in the upper right, is shot both in the optical range and in the infrared range.

295

00:27:39,920 --> 00:27:43,920

Later, they are merged into this composite overlay.

296

00:27:43,920 --> 00:27:50,920

On March 26th, Phobos II sends these images to Earth, taken just south of the equator.

297

00:27:50,920 --> 00:27:53,920

An unexplained elliptical shape appears.

298

00:27:53,920 --> 00:27:58,920

This shadow actually appeared all of a sudden. Why am I calling it the shadow?

299

00:27:58,920 --> 00:28:00,920

Because you can see things through it.

300

00:28:00,920 --> 00:28:04,920

This elliptical shadow then, is it in Mars' atmosphere or on the planet's surface?

301

00:28:04,920 --> 00:28:09,920

One thing is for sure. This something is not positioned horizontally.

302

00:28:09,920 --> 00:28:15,920

Well, to me it looks like a rocket taking off from the surface of Mars and leaving a trail behind.

303

00:28:15,920 --> 00:28:20,920

Well, if you'd want to fantasize, it could be interpreted that way too.

304

00:28:20,920 --> 00:28:24,920

Now, we think we ought to look at the real circumstances that have caused that trail,

305

00:28:24,920 --> 00:28:27,920

even though they haven't yet been fully clarified.

306

00:28:27,920 --> 00:28:32,920

That's more likely to be the shadow of some object, since surface elements can be seen through it.

307

00:28:32,920 --> 00:28:41,920

How long will it take to process all of the information to get more or less objective scientific results, rather than fantastic ones?

308

00:28:41,920 --> 00:28:43,920

Come back in a week.

309

00:28:43,920 --> 00:28:48,920

One week later, no details are given. Then, unexpectedly, this report.

310

00:28:48,920 --> 00:28:54,920

Last year, the Soviets launched two spacecraft to the planet, both named after the Martian moon, Phobos.

311

00:28:54,920 --> 00:28:58,920

Their mission was to photograph Mars and land probes on its moon.

312

00:28:58,920 --> 00:29:02,920

One was accidentally switched off by a mission operator.

313

00:29:02,920 --> 00:29:07,920

But the second reached Mars and transmitted pictures that are still puzzling Soviet scientists.

314

00:29:07,920 --> 00:29:12,920

As it swung over the equator, it took pictures from a height of 6,000 kilometers.

315

00:29:12,920 --> 00:29:19,920

This is an infrared photograph. It shows differences in temperature. The dark patches are colder.

316

00:29:20,920 --> 00:29:25,920

This section covers 600 kilometers. It shows objects down to the size of 2 kilometers.

317

00:29:25,920 --> 00:29:29,920

It's the most detailed infrared picture of the planet's surface.

318

00:29:29,920 --> 00:29:35,920

We have some very, very thin lines on the surface of Mars in the infrared, which means heat.

319

00:29:35,920 --> 00:29:38,920

And it's not visible, it's heat. You can see it through clouds.

320

00:29:38,920 --> 00:29:42,920

These have a resolution. These have a width, I would guess, of 3 or 4 kilometers wide.

321

00:29:42,920 --> 00:29:47,920

You're not to question what it is. I certainly don't know. And the Russians aren't telling us.

322

00:29:47,920 --> 00:29:54,920

Scientists are also puzzled by this shadow pictured on the surface of Mars by both optical and heat-seeking cameras.

323

00:29:54,920 --> 00:30:00,920

They convince it's a shadow because they can see objects on the surface beneath. But a shadow of what?

324

00:30:00,920 --> 00:30:04,920

Finally, there's the mystery of the vanishing spacecraft.

325

00:30:04,920 --> 00:30:10,920

The Russians have yet to release the last picture transmitted by Phobos before it lost contact with ground control.

326

00:30:10,920 --> 00:30:14,920

But the Russians have said that it shows an object coming towards the spacecraft,

327

00:30:14,920 --> 00:30:18,920

an object which, in their words, should not have been there.

328

00:30:18,920 --> 00:30:23,920

The spacecraft was circling Mars, coming into the same orbit as the moons of Mars.

329

00:30:23,920 --> 00:30:29,920

And the last picture, they got halfway through it, and they saw something there which shouldn't be there.

330

00:30:29,920 --> 00:30:33,920

Professor Pitzer makes the joke that it's martian people.

331

00:30:33,920 --> 00:30:39,920

British scientists will be able to judge for themselves when the Soviets bring their pictures to a conference at Exeter next month.

332

00:30:39,920 --> 00:30:43,920

Because, of course, there must be a sensible explanation, wasn't there?

333

00:30:43,920 --> 00:30:47,920

The Russians do not bring any pictures to the Exeter conference.

334

00:30:47,920 --> 00:30:52,920

How does the Russian Space Agency explain the spacecraft's destruction or disappearance?

335

00:30:52,920 --> 00:30:57,920

It does take a minimum of precision criteria to obtain on the image these spots,

336

00:30:57,920 --> 00:31:05,920

which some would like to call flying saucers, that appeared within the visual field of the infrared range.

337

00:31:05,920 --> 00:31:11,920

It must be pointed out that the flying saucer version is not ours.

338

00:31:11,920 --> 00:31:15,920

Actually, at first we were saying that there was no flying saucer,

339

00:31:15,920 --> 00:31:22,920

that surely all that we saw could be explained in understandable, natural and physical terms.

340

00:31:22,920 --> 00:31:30,920

One possibility could easily be that a small meteorite, a small bit of rock, was in the same orbit as for us and hit it.

341

00:31:30,920 --> 00:31:35,920

In an exclusive interview conducted in October 1990 in Moscow,

342

00:31:35,920 --> 00:31:40,920

Professor Lev Muchen of the Soviet Space Research Institute discredits the meteorite theory.

343

00:31:40,920 --> 00:31:46,920

There were attempts to hypothesize that there had been a collision between the space probe,

344

00:31:46,920 --> 00:31:51,920

which was then orbiting Mars in alignment with the orbit of Mars' moonlet,

345

00:31:51,920 --> 00:31:56,920

and strands of dust surrounding the moonphobos itself.

346

00:31:56,920 --> 00:32:04,920

But some fairly accurate computations made by several organizations and by our institute as well,

347

00:32:04,920 --> 00:32:08,920

have shown that this assumption is totally baseless.

348

00:32:08,920 --> 00:32:14,920

If not meteorite or debris, then what could possibly explain the mishap?

349

00:32:14,920 --> 00:32:16,920

Along silence follows.

350

00:32:16,920 --> 00:32:22,920

Then in December 1991, Marina Popovich, former cosmonaut trainee and retired Air Force Colonel,

351

00:32:22,920 --> 00:32:26,920

holds a surprise press conference at the Russian Consulate in San Francisco.

352

00:32:26,920 --> 00:32:31,920

She unearths the mysterious last photograph taken by Phobos.

353

00:32:31,920 --> 00:32:34,920

There is a strange shape in the foreground.

354

00:32:34,920 --> 00:32:41,920

Colonel Popovich refers to this as an unidentified flying object, a UFO.

355

00:32:41,920 --> 00:32:46,920

The object is juxtaposed against what appears to be the planet's tiny moonlet, Phobos,

356

00:32:46,920 --> 00:32:49,920

for which the craft is named.

357

00:32:49,920 --> 00:32:52,920

But how is the mysterious shadow explained?

358

00:32:52,920 --> 00:32:58,920

The Russians say it is a shadow of some object on, or just above, the Martian surface.

359

00:32:58,920 --> 00:33:05,920

Upon further examination in April 1992, when all of the related photographs are compared side by side,

360

00:33:05,920 --> 00:33:11,920

scientists reach the conclusion that the shadow is actually moving.

361

00:33:11,920 --> 00:33:15,920

If Mars was indeed the site of a space base in antiquity,

362

00:33:15,920 --> 00:33:21,920

could the failure of these Soviet space missions be attributed to some sort of alien intervention?

363

00:33:21,920 --> 00:33:26,920

Could the ancient space base have been reactivated?

364

00:33:26,920 --> 00:33:32,920

So the mystery remains. What caused the spacecraft to destabilize?

365

00:33:32,920 --> 00:33:39,920

Was it a malfunction? Or was there an outside cause? Perhaps an impact.

366

00:33:39,920 --> 00:33:43,920

The question that arises is indeed a simple one.

367

00:33:43,920 --> 00:33:50,920

Was the spacecraft Phobos 2 hit by something that put it out of commission?

368

00:33:50,920 --> 00:33:58,920

The circumstances in which Phobos 2 was lost suggest that someone might be back on Mars.

369

00:33:58,920 --> 00:34:04,920

Someone ready to knock out what to them is an alien spacecraft.

370

00:34:04,920 --> 00:34:21,920

Was Phobos deactivated by intelligent beings wishing to protect themselves from outsiders?

371

00:34:21,920 --> 00:34:26,920

Or perhaps there's some other more conventional explanation? We may never know.

372

00:34:27,920 --> 00:34:31,920

But indulging the possibilities of otherworldly visitors in the present

373

00:34:31,920 --> 00:34:36,920

will help us acclimate to their differences even when they finally do come calling.

374

00:34:36,920 --> 00:34:43,920

The question remains, how would we as a culture respond to incontrovertible evidence of a species of beings

375

00:34:43,920 --> 00:34:49,920

that not only preceded our own but actually engineered mankind?

376

00:34:49,920 --> 00:34:55,920

Of all the elusive mysteries, the greatest is the riddle of life itself.

377

00:34:55,920 --> 00:35:02,920

How did it begin? From what corner of the universe did the first emanations of existence arise?

378

00:35:02,920 --> 00:35:08,920

Was the seed of life carried to Earth from the planet Nibiru?

379

00:35:08,920 --> 00:35:16,920

There has been a blending of interest in biologists on one hand and planetary astronomers on the other

380

00:35:16,920 --> 00:35:22,920

in the question of the origin of life. Because the same questions about how life originated on Earth

381

00:35:22,920 --> 00:35:27,920

also would apply to Mars or some other solar system.

382

00:35:27,920 --> 00:35:35,920

And just as they really can't explain how life originated on Earth, they don't really know how it originated elsewhere.

383

00:35:35,920 --> 00:35:40,920

Contemporary scientific thinking cautiously asserts that life arrives on Earth

384

00:35:40,920 --> 00:35:47,920

when certain chemical substances crash into the surface aboard a stray comet early in our planet's history.

385

00:35:47,920 --> 00:35:54,920

What we are trying to find out in the meteorites is to see whether there are any of these molecules related to life.

386

00:35:54,920 --> 00:36:00,920

There are certain molecules like the amino acids which may be described as building blocks of life.

387

00:36:00,920 --> 00:36:09,920

Directed Panspermia, another scientific theory, suggests that life on Earth is seeded by a race of beings from outside the planet,

388

00:36:09,920 --> 00:36:15,920

not by chance but as the deliberate activity of an otherworldly society.

389

00:36:15,920 --> 00:36:20,920

The Bible suggests that the creation of humankind comes at the end of a long list.

390

00:36:20,920 --> 00:36:28,920

All the fishes of the sea and all the fowl that fly the skies and all the animals that fill the Earth

391

00:36:28,920 --> 00:36:37,920

and all the creeping things that crawl upon the Earth, it was only then that Elohim created the atom.

392

00:36:37,920 --> 00:36:43,920

In the last few pages of the story of creation, the Sumerians pointed the Anunnaki

393

00:36:43,920 --> 00:36:48,920

as the creators of mankind, our own benefactors of life.

394

00:36:48,920 --> 00:36:58,920

According to Sumerian text, the Anunnaki in advance of landing 445,000 years ago sent androids to scout the Earth.

395

00:36:58,920 --> 00:37:05,920

150,000 years later, the Anunnaki themselves arrive and create humankind.

396

00:37:05,920 --> 00:37:08,920

How was atom created?

397

00:37:08,920 --> 00:37:20,920

According to the Sumerians, it was by genetic engineering, fertilization in vitro, in a glass tube as depicted in this cylinder seal rendering.

398

00:37:20,920 --> 00:37:24,920

Adam was the first test tube baby.

399

00:37:24,920 --> 00:37:28,920

In Genesis chapter 1, verse 26, the Bible reads,

400

00:37:28,920 --> 00:37:31,920

Let us make the atom in our image and likeness.

401

00:37:31,920 --> 00:37:45,920

But why? Sumerian documentation suggests the Anunnaki create humanity to assist in mining African gold that they need to save the dwindling atmosphere of their home planet, Nibiru.

402

00:37:45,920 --> 00:37:56,920

Judaism, Christianity and Islam, the three great western traditions, religious traditions, are all founded on the idea that there's something special about human beings.

403

00:37:56,920 --> 00:38:05,920

We didn't arrive here accidentally, so we're not just some consequence of billions of years of pointless accidental permutations of life forms.

404

00:38:05,920 --> 00:38:12,920

No, we were created in the image of God. The creation really is about the process of our salvation.

405

00:38:12,920 --> 00:38:25,920

Now, what if it were the case that there were creatures both technologically more advanced than us, older than us in terms of their civilization, and maybe even more intelligent than us?

406

00:38:25,920 --> 00:38:40,920

And more spiritually advanced, if we could imagine that. Then would this cause the creation story to collapse and leaving literally billions of people on the planet totally confused about the meaning of life?

407

00:38:40,920 --> 00:38:54,920

The Bible relates an incident of mankind overstepping the bounds of the Anunnaki when the Babylonians attempt to reach the gods by building an enormous launch pad in the archetypal story of the Great Tower of Babel.

408

00:38:54,920 --> 00:39:05,920

What is the target of their efforts? According to Zachariah's sitchin, it is our neighboring planet Mars, home of the Anunnaki's way station on route to Earth.

409

00:39:05,920 --> 00:39:29,920

The Sumerian tablets refer to the station planet Mars as the traveler's ship. I've taken it to mean that it was at Mars that the Anunnaki from the Biro transferred to smaller spacecraft to reach Earth-orbiting stations, not once every 3600 years, but on a more frequent schedule.

410

00:39:29,920 --> 00:39:47,920

Mesopotamian archives identify the 12 members of our solar system with specific symbols. Some, like Mars, Earth, and Venus, are indicated numerically on this ancient Stella.

411

00:39:47,920 --> 00:40:02,920

We see the sun with its many rays. We see another four depicted standing on their cult animals, but really it's a symbolism connected with the zodiac.

412

00:40:02,920 --> 00:40:22,920

We see the moon and we see the Earth symbolized by the seven dots which indicated the position of the Earth from the outer limits of the solar system, counting or coming inwards by somebody flying into from outer space.

413

00:40:22,920 --> 00:40:42,920

The seven dots of Earth with its crescent moon and the six-pointed star of Mars are revealing clues in this 4500-year-old Sumerian depiction. Two figures stand on either side of a craft.

414

00:40:42,920 --> 00:40:48,920

Some researchers believe that Mars was habitable as little as 10,000 years ago.

415

00:40:48,920 --> 00:41:06,920

A tenth planet, a mysterious species with the technology to genetically engineer humankind. A few years ago most of us would have laughed at these ideas, but after the cloning of Dolly the sheep and some of the breakthroughs in genetic engineering, these concepts begin to sound more plausible.

416

00:41:06,920 --> 00:41:15,920

When we come back, we'll look at some photographic evidence that raises more serious questions about what the mysterious Anunnaki may have left behind.

417

00:41:20,920 --> 00:41:35,920

When the United States launches the Mariner and Viking spacecraft to explore Mars in the 60s and 70s, enigmatic structures resembling those on Earth are photographed. This is a feature on Mars that NASA nicknames the Inca City.

418

00:41:35,920 --> 00:41:44,920

Here we see it compared with Saxonhuman Peru. These are lines on the Mars surface. These are the Nazca lines in Peru.

419

00:41:44,920 --> 00:41:55,920

I feel that what has been discovered so far is very suggestive of intelligent layout, but it would be responsible of me to say, I have proof.

420

00:41:55,920 --> 00:42:09,920

What I have is evidence which makes it appear as though it's been designed by some kind of intelligent thinking process, which is probably even more advanced than our current in some ways.

421

00:42:09,920 --> 00:42:30,920

I was especially intrigued by independent research suggestions in their reports that the orientation of the face and the joining pyramid indicated they were built in alignment with sunrise at Solstice Dime on Mars about 450,000 years ago.

422

00:42:31,920 --> 00:42:45,920

Could it be that a civilization capable of space travel almost half a million years ago visited this part of the solar system leaving behind monuments on Earth and Mars? The only beings mentioned by name are the Anunnaki.

423

00:42:45,920 --> 00:42:51,920

The only evidence supporting such a theory is evidence of visits by the Anunnaki.

424

00:42:51,920 --> 00:43:08,920

We have seen societies on Earth that have been demolished by cultural cross-representation, if you like, meeting a more advanced culture has had a severe impact on an existing culture.

425

00:43:08,920 --> 00:43:13,920

But I think we're intelligent enough to be prepared for that.

426

00:43:13,920 --> 00:43:20,920

Our civilization is technologically able to venture out into deep space on scientific quests of discovery.

427

00:43:20,920 --> 00:43:30,920

Can anyone then deny the possibility that members from a technologically more advanced world may have visited our solar system thousands of years ago?

428

00:43:30,920 --> 00:43:41,920

Thanks to the work of Zechariah Sechen and others like him, we know more than we ever have about ancient cultures and the life that came before.

429

00:43:44,920 --> 00:43:59,920

Is this Genesis revisited? Did the Sumerians and their ancient tablets reveal that we're only now catching up with ancient knowledge?

430

00:43:59,920 --> 00:44:03,920

Do the discoveries making headlines today originate with our ancient ancestors?

431

00:44:03,920 --> 00:44:14,920

Was this ancient knowledge given to the people of Sumeria by those distant explorers from the mysterious 10th planet, Nibiru, the Anunnaki?

432

00:44:14,920 --> 00:44:20,920

The final answers may lay buried in those yet to be uncovered volumes of the phenomenon archives.

433

00:44:29,920 --> 00:44:37,920

The Sumerians and their ancient ancestors are the most important of the ancient ancient legends.

434

00:44:37,920 --> 00:44:45,920

The Sumerians and their ancient ancestors are the most important of the ancient legends.

435

00:44:45,920 --> 00:44:53,920

The Sumerians and their ancient ancestors are the most important of the ancient legends.

436

00:44:53,920 --> 00:45:01,920

The Sumerians and their ancient ancestors are the most important of the ancient legends.

437

00:45:01,920 --> 00:45:09,920

The Sumerians and their ancient ancestors are the most important of the ancient legends.

438

00:45:09,920 --> 00:45:17,920

The Sumerians and their ancient ancestors are the most important of the ancient legends.

439

00:45:17,920 --> 00:45:27,920

The Sumerians and their ancient ancestors are the most important of the ancient legends.

440

00:45:27,920 --> 00:45:37,920

The Sumerians and their ancient ancestors are the most important of the ancient legends.

441

00:45:37,920 --> 00:45:47,920

The Sumerians and their ancient ancestors are the most important of the ancient legends.

442

00:45:47,920 --> 00:45:57,920

The Sumerians and their ancient ancestors are the most important of the ancient legends.

443

00:45:57,920 --> 00:46:07,920

The Sumerians and their ancient legends are the most important of the ancient legends.

444

00:46:27,920 --> 00:46:29,920

you
