

INTERVIEWS OF THE UFO EXPERIENCE

**PODCASTUFO.COM**

1  
00:00:05,269 --> 00:00:02,840  
hi everyone this is Martin Willis of

2  
00:00:08,750 --> 00:00:05,279  
podcast UFO and welcome to episode

3  
00:00:11,930 --> 00:00:08,760  
number 12 today's guest is dr. Robert E

4  
00:00:14,930 --> 00:00:11,940  
Ferrell and he has written a number of

5  
00:00:17,180 --> 00:00:14,940  
books and has great fairy on UFO

6  
00:00:18,860 --> 00:00:17,190  
propulsion please listen to us on

7  
00:00:21,260 --> 00:00:18,870  
stitcher on your smartphone's we have a

8  
00:00:24,560 --> 00:00:21,270  
nap right on our website that's for free

9  
00:00:26,240 --> 00:00:24,570  
and please do rate us on iTunes if you

10  
00:00:29,210 --> 00:00:26,250  
get a chance your feedback is always

11  
00:00:32,510 --> 00:00:29,220  
welcome and you can email us at info at

12  
00:00:49,060 --> 00:00:32,520  
podcast UFO calm thank you and I hope

13  
00:00:55,910 --> 00:00:52,520

hi everyone I have dr. Robert E Farrell

14

00:00:57,890 --> 00:00:55,920

on skype how you doing dr. Farrell I'm

15

00:01:00,770 --> 00:00:57,900

doing fine thank you thanks for joining

16

00:01:02,540 --> 00:01:00,780

us and let's talk quickly about you have

17

00:01:04,640 --> 00:01:02,550

a new book that's out and it's on the

18

00:01:06,080 --> 00:01:04,650

best sellers list right well actually I

19

00:01:08,720 --> 00:01:06,090

have three books that made the best

20

00:01:12,380 --> 00:01:08,730

seller list the first to our novels

21

00:01:14,990 --> 00:01:12,390

first one being alien log the second one

22

00:01:17,270 --> 00:01:15,000

is alien log to the New World Order and

23

00:01:19,100 --> 00:01:17,280

then the third book is nonfiction and

24

00:01:20,780 --> 00:01:19,110

that's the science behind alien

25

00:01:23,810 --> 00:01:20,790

encounters and that just came out this

26

00:01:26,390 --> 00:01:23,820

year I like the title of that actually a

27

00:01:30,680 --> 00:01:26,400

lot because I think I think science does

28

00:01:34,870 --> 00:01:30,690

not look at UFOs and not too hard anyway

29

00:01:38,090 --> 00:01:34,880

as of yet and you have some amazing

30

00:01:41,240 --> 00:01:38,100

insight on how they propel themselves

31

00:01:42,920 --> 00:01:41,250

which I guess is probably the number one

32

00:01:45,620 --> 00:01:42,930

question that comes up how do they get

33

00:01:48,200 --> 00:01:45,630

here if they can if they're limited to

34

00:01:51,710 --> 00:01:48,210

light speed how can they make a right

35

00:01:53,270 --> 00:01:51,720

angle turn at 2,000 miles an hour and

36

00:01:57,139 --> 00:01:53,280

stuff like that can you explain your

37

00:01:58,850 --> 00:01:57,149

your theories on that yeah when I became

38

00:02:00,740 --> 00:01:58,860

a believer which was so long ago I don't

39

00:02:02,510 --> 00:02:00,750

even remember you know I've always

40

00:02:05,440 --> 00:02:02,520

believed that there had to be other life

41

00:02:07,040 --> 00:02:05,450

out there just the vastness and

42

00:02:08,779 --> 00:02:07,050

astronomers are beginning to believe

43

00:02:12,320 --> 00:02:08,789

that there may be more planets in our

44

00:02:14,630 --> 00:02:12,330

galaxy than there are stars so certainly

45

00:02:17,330 --> 00:02:14,640

it makes sense and i don't think i've

46

00:02:19,010 --> 00:02:17,340

ever heard anyone argue lately that

47

00:02:21,770 --> 00:02:19,020

there isn't other life out there and

48

00:02:23,210 --> 00:02:21,780

given the range of life of stars are Our

49

00:02:26,360 --> 00:02:23,220

Stars kind of in the middle of its life

50

00:02:28,490 --> 00:02:26,370

this got to be stars with planets in the

51  
00:02:31,220 --> 00:02:28,500  
habitable zone that are perhaps a

52  
00:02:32,750 --> 00:02:31,230  
billion years or more older than us so

53  
00:02:35,000 --> 00:02:32,760  
therefore there's got to be intelligence

54  
00:02:36,950 --> 00:02:35,010  
out there that's way beyond us in their

55  
00:02:38,809 --> 00:02:36,960  
technology and therefore would have

56  
00:02:41,570 --> 00:02:38,819  
craft that could be flying around and

57  
00:02:43,309 --> 00:02:41,580  
people report so okay I accept the fact

58  
00:02:46,190 --> 00:02:43,319  
that there's life out there and probably

59  
00:02:48,140 --> 00:02:46,200  
they are visiting us then the question

60  
00:02:51,050 --> 00:02:48,150  
is how can they do some of these things

61  
00:02:56,330 --> 00:02:51,060  
and the hunter g acceleration and right

62  
00:02:57,920 --> 00:02:56,340  
angle turns really led me to understand

63  
00:02:59,390 --> 00:02:57,930

how they do that because there's only

64

00:03:01,370 --> 00:02:59,400

one way they can do that in my opinion

65

00:03:02,450 --> 00:03:01,380

there's only one way they could

66

00:03:05,090 --> 00:03:02,460

accelerate it 100

67

00:03:07,460 --> 00:03:05,100

geez without damage to the vehicle or

68

00:03:09,920 --> 00:03:07,470

the occupants and that is they're using

69

00:03:11,480 --> 00:03:09,930

gravitational field propulsion because

70

00:03:13,220 --> 00:03:11,490

if you're using gravity field propulsion

71

00:03:16,070 --> 00:03:13,230

whether it's a negative field or a

72

00:03:18,490 --> 00:03:16,080

positive field you are simply free

73

00:03:21,290 --> 00:03:18,500

falling into or away from that field

74

00:03:23,810 --> 00:03:21,300

it's analogous to jumping out of a plane

75

00:03:27,650 --> 00:03:23,820

if you were in an airplane flying over

76

00:03:29,180 --> 00:03:27,660

Jupiter or some large planet that has

77

00:03:31,520 --> 00:03:29,190

let's say 50 times the pull of gravity

78

00:03:34,580 --> 00:03:31,530

and you jump out of the plane you're

79

00:03:36,610 --> 00:03:34,590

going to freefall toward that planet but

80

00:03:38,930 --> 00:03:36,620

you'll have no sensation of acceleration

81

00:03:40,760 --> 00:03:38,940

just as our astronauts floating in space

82

00:03:42,170 --> 00:03:40,770

when they do a spacewalk that they are

83

00:03:45,470 --> 00:03:42,180

actually accelerating toward our planet

84

00:03:47,090 --> 00:03:45,480

at about 1 G if they were circling some

85

00:03:50,090 --> 00:03:47,100

other larger planet it would be a higher

86

00:03:51,470 --> 00:03:50,100

g-force but yet they're free falling so

87

00:03:54,230 --> 00:03:51,480

if you have the ability to create this

88

00:03:56,570 --> 00:03:54,240

field that you either fall into or fall

89

00:03:58,730 --> 00:03:56,580

away from you just point the field in

90

00:04:00,260 --> 00:03:58,740

the direction you want to go and you

91

00:04:01,400 --> 00:04:00,270

accelerate in that direction but you

92

00:04:03,290 --> 00:04:01,410

don't even realize you're accelerating

93

00:04:06,200 --> 00:04:03,300

and if you want to make a right angle

94

00:04:08,210 --> 00:04:06,210

turn you point the field at right angles

95

00:04:09,950 --> 00:04:08,220

and you start free falling in that

96

00:04:11,990 --> 00:04:09,960

direction and I'm not claiming they make

97

00:04:14,240 --> 00:04:12,000

exactly right angle turns there's no

98

00:04:15,920 --> 00:04:14,250

evidence for that but it's near right

99

00:04:18,500 --> 00:04:15,930

angle it's certainly a sharp return then

100

00:04:24,230 --> 00:04:18,510

we can we can imagine our airplanes or

101

00:04:25,940 --> 00:04:24,240

our pilots surviving so so the fact is

102

00:04:27,440 --> 00:04:25,950

that there's only one way they can

103

00:04:29,810 --> 00:04:27,450

propel themselves that way and that's

104

00:04:33,440 --> 00:04:29,820

what gravitational fields and there's

105

00:04:35,090 --> 00:04:33,450

other evidence to support that and I can

106

00:04:38,620 --> 00:04:35,100

talk about that right now if you'd like

107

00:04:40,790 --> 00:04:38,630

yeah we can wait okay well let's see

108

00:04:43,430 --> 00:04:40,800

other evidence that they are using

109

00:04:44,990 --> 00:04:43,440

gravitational fields and more

110

00:04:48,710 --> 00:04:45,000

specifically negative gravitational

111

00:04:50,960 --> 00:04:48,720

fields I've given over 60 lectures on

112

00:04:53,840 --> 00:04:50,970

this object and one of the slides that I

113

00:04:56,840 --> 00:04:53,850

show is it's two shots two photographs

114

00:04:59,240 --> 00:04:56,850

taken by the same photographer maybe a

115

00:05:01,580 --> 00:04:59,250

minute apart or maybe ten seconds apart

116

00:05:04,220 --> 00:05:01,590

I don't know but it's a UFO over a field

117

00:05:07,630 --> 00:05:04,230

and it's kicking up dust you can see the

118

00:05:10,040 --> 00:05:07,640

dust being kicked up from the field and

119

00:05:13,490 --> 00:05:10,050

underneath the craft in a circular area

120

00:05:14,380 --> 00:05:13,500

there's a zone that seems to be clear of

121

00:05:17,000 --> 00:05:14,390

the dust

122

00:05:19,010 --> 00:05:17,010

well if you imagine that they are

123

00:05:20,900 --> 00:05:19,020

creating a negative gravitational field

124

00:05:23,510 --> 00:05:20,910

it would be expelling anything in that

125

00:05:25,760 --> 00:05:23,520

zone it's that negative in the field is

126

00:05:27,950 --> 00:05:25,770

that's giving the lift to the to the

127

00:05:31,670 --> 00:05:27,960

craft but it's also expelling everything

128

00:05:35,120 --> 00:05:31,680

underneath it including air so there's

129

00:05:37,670 --> 00:05:35,130

two xuxa photographs of that and in both

130

00:05:39,980 --> 00:05:37,680

of them you can see the same event so if

131

00:05:42,080 --> 00:05:39,990

you now say okay maybe they use negative

132

00:05:46,040 --> 00:05:42,090

fields what's what other evidence is for

133

00:05:49,070 --> 00:05:46,050

that well people who have UFOs fly over

134

00:05:50,810 --> 00:05:49,080

their head low low over the head have

135

00:05:53,270 --> 00:05:50,820

often reported that they've had this

136

00:05:55,670 --> 00:05:53,280

feeling of being pressed down well

137

00:05:58,340 --> 00:05:55,680

because of the negative field another

138

00:05:59,960 --> 00:05:58,350

thing that supports that is there have

139

00:06:04,670 --> 00:05:59,970

been occasions where people have come

140

00:06:06,710 --> 00:06:04,680

upon a UFO or on to the area where UFO

141

00:06:09,290 --> 00:06:06,720

had been seen hovering over a shallow

142

00:06:11,840 --> 00:06:09,300

body of water and when they got there

143

00:06:14,960 --> 00:06:11,850

the body of water was frozen so how do

144

00:06:16,610 --> 00:06:14,970

they do that really oh yeah well if they

145

00:06:18,440 --> 00:06:16,620

have a negative field under the craft

146

00:06:20,540 --> 00:06:18,450

because they're hovering low over this

147

00:06:24,200 --> 00:06:20,550

body of water I don't know maybe a foot

148

00:06:26,330 --> 00:06:24,210

above the surface all the air is being

149

00:06:28,159 --> 00:06:26,340

expelled underneath them creating a low

150

00:06:30,020 --> 00:06:28,169

pressure region and you know what

151  
00:06:31,460 --> 00:06:30,030  
happens to water when you lower the

152  
00:06:34,510 --> 00:06:31,470  
pressure the water begins to evaporate

153  
00:06:37,700 --> 00:06:34,520  
very fast it might even start boiling

154  
00:06:39,470 --> 00:06:37,710  
but the evaporation process carries heat

155  
00:06:40,909 --> 00:06:39,480  
away from that body of water that's the

156  
00:06:43,370 --> 00:06:40,919  
whole principle of evaporative cooling

157  
00:06:44,870 --> 00:06:43,380  
mmm eventually the num heat is taking

158  
00:06:47,750 --> 00:06:44,880  
away from that body of water that it

159  
00:06:49,700 --> 00:06:47,760  
freezes so that's again evidence that

160  
00:06:52,310 --> 00:06:49,710  
they have a negative field another

161  
00:06:53,810 --> 00:06:52,320  
another possibility for negative field

162  
00:06:55,520 --> 00:06:53,820  
would be the fact that they can travel

163  
00:07:00,590 --> 00:06:55,530

thousands of miles an hour without

164

00:07:02,240 --> 00:07:00,600

creating a shockwave right now we create

165

00:07:05,000 --> 00:07:02,250

shock waves with our aircraft because

166

00:07:06,830 --> 00:07:05,010

the way we transmit the signal ahead of

167

00:07:08,650 --> 00:07:06,840

the plane to tell molecules to get out

168

00:07:11,930 --> 00:07:08,660

of the way is through a pressure wave

169

00:07:14,720 --> 00:07:11,940

higher pressure and that signal can only

170

00:07:16,580 --> 00:07:14,730

travel at the speed of sound no faster

171

00:07:19,280 --> 00:07:16,590

so if the airplane reaches the speed of

172

00:07:21,380 --> 00:07:19,290

sound and it's not signaling advanced

173

00:07:23,840 --> 00:07:21,390

notice that it's coming and the air

174

00:07:26,630 --> 00:07:23,850

molecules crash up against the craft and

175

00:07:27,430 --> 00:07:26,640

create a shockwave but if you had a way

176

00:07:28,960 --> 00:07:27,440

to

177

00:07:30,850 --> 00:07:28,970

or worn these molecules that you're

178

00:07:34,120 --> 00:07:30,860

coming and give them enough time to

179

00:07:36,460 --> 00:07:34,130

galloway a way that to do this using

180

00:07:38,800 --> 00:07:36,470

something that is faster than the speed

181

00:07:41,770 --> 00:07:38,810

of sound like like a gravitational field

182

00:07:43,570 --> 00:07:41,780

it's it's actually faster than talk

183

00:07:45,760 --> 00:07:43,580

about that later but it's been measured

184

00:07:47,650 --> 00:07:45,770

at being faster than the speed of light

185

00:07:49,660 --> 00:07:47,660

but at any rate it's certainly fast

186

00:07:51,550 --> 00:07:49,670

enough that these molecules now have

187

00:07:54,610 --> 00:07:51,560

time to get out of the way and you don't

188

00:07:58,080 --> 00:07:54,620

create a shockwave and in fact the

189

00:08:01,170 --> 00:07:58,090

airflow around the craft is what

190

00:08:05,050 --> 00:08:01,180

aerodynamicist would refer to as a pure

191

00:08:07,870 --> 00:08:05,060

rotational flow another way it's very

192

00:08:09,370 --> 00:08:07,880

low drag so not only do they not create

193

00:08:11,440 --> 00:08:09,380

a shockwave but they don't really have

194

00:08:16,210 --> 00:08:11,450

as much drag on them as our craft would

195

00:08:18,670 --> 00:08:16,220

have so something has been measured has

196

00:08:21,730 --> 00:08:18,680

this been peer reviewed over the speed

197

00:08:24,100 --> 00:08:21,740

of light uh well that gets into another

198

00:08:26,110 --> 00:08:24,110

subject and I'd like to reserve that if

199

00:08:28,630 --> 00:08:26,120

I could as far as the faster than the

200

00:08:31,270 --> 00:08:28,640

speed of light yeah because of the if we

201  
00:08:33,969 --> 00:08:31,280  
want to discuss Eugene put clutton offs

202  
00:08:36,010 --> 00:08:33,979  
research over in Finland where he's

203  
00:08:38,350 --> 00:08:36,020  
actually producing gravitational fields

204  
00:08:42,670 --> 00:08:38,360  
and he's the one that measured the speed

205  
00:08:46,390 --> 00:08:42,680  
of his negative pulse at 64 c 64 times

206  
00:08:48,430 --> 00:08:46,400  
the speed of light and i can't say

207  
00:08:50,200 --> 00:08:48,440  
that's been peer-reviewed he's published

208  
00:08:53,830 --> 00:08:50,210  
and in fact i think he's coming out with

209  
00:08:55,300 --> 00:08:53,840  
an article soon in regards to his

210  
00:08:58,720 --> 00:08:55,310  
research but he's been doing this

211  
00:09:00,880 --> 00:08:58,730  
research for years in fact nasa and

212  
00:09:03,220 --> 00:09:00,890  
boeing were interested in it and my

213  
00:09:05,650 --> 00:09:03,230

understanding was that nasa tried to

214

00:09:08,380 --> 00:09:05,660

duplicate his work but because they

215

00:09:10,750 --> 00:09:08,390

weren't using superconductors of the

216

00:09:13,329 --> 00:09:10,760

appropriate size they weren't able to

217

00:09:15,730 --> 00:09:13,339

get good results now one of but button

218

00:09:16,870 --> 00:09:15,740

nose specialties is material science

219

00:09:19,120 --> 00:09:16,880

that's what he develops his

220

00:09:22,350 --> 00:09:19,130

superconductors so he's developed at me

221

00:09:25,420 --> 00:09:22,360

a way of creating a relatively large

222

00:09:27,520 --> 00:09:25,430

ceramic superconductor that's on the

223

00:09:30,300 --> 00:09:27,530

order of four inches in diameter and and

224

00:09:32,829 --> 00:09:30,310

it will withstand up to 30,000 rpm

225

00:09:36,630 --> 00:09:32,839

rotation speed and that's critical in

226

00:09:40,870 --> 00:09:36,640

his mind to create significant amount of

227

00:09:43,440 --> 00:09:40,880

gravitational fields but so he

228

00:09:45,820 --> 00:09:43,450

the one that measured the 64 c and i

229

00:09:47,590 --> 00:09:45,830

I've correspondent with him and I asked

230

00:09:49,600 --> 00:09:47,600

him to describe how he measured that and

231

00:09:51,370 --> 00:09:49,610

he did tell me but he asked me not to

232

00:09:53,350 --> 00:09:51,380

elaborate because it was an article it

233

00:09:55,510 --> 00:09:53,360

was going to be coming out soon and he

234

00:09:59,200 --> 00:09:55,520

didn't want to violate his is deal with

235

00:10:03,160 --> 00:09:59,210

the publisher mmm uh can you explain to

236

00:10:06,700 --> 00:10:03,170

the layperson out there how someone

237

00:10:11,140 --> 00:10:06,710

might possibly create gravitational

238

00:10:12,790 --> 00:10:11,150

fields yeah well I'm going to start with

239

00:10:15,490 --> 00:10:12,800

the theory and the theory goes all the

240

00:10:18,040 --> 00:10:15,500

way back to Einstein when he created his

241

00:10:20,560 --> 00:10:18,050

general theory of relativity he

242

00:10:24,310 --> 00:10:20,570

recognized that there was a interaction

243

00:10:27,040 --> 00:10:24,320

between electromagnetic fields and which

244

00:10:29,320 --> 00:10:27,050

is light and gravitational fields and in

245

00:10:31,900 --> 00:10:29,330

fact that allowed him to predict that a

246

00:10:34,330 --> 00:10:31,910

beam of light from a star for instance

247

00:10:37,390 --> 00:10:34,340

when it passes the rim of the Sun would

248

00:10:40,090 --> 00:10:37,400

be bent because of this interaction and

249

00:10:41,670 --> 00:10:40,100

he even predicted that a star close to

250

00:10:45,820 --> 00:10:41,680

the rim would have its light bent by

251  
00:10:51,100 --> 00:10:45,830  
1.75 arc seconds and that was back in

252  
00:10:52,240 --> 00:10:51,110  
nineteen fifteen I think and in 1919 so

253  
00:10:55,150 --> 00:10:52,250  
Arthur Eddington went on an expedition

254  
00:10:57,250 --> 00:10:55,160  
and during the solar eclipse and

255  
00:11:00,400 --> 00:10:57,260  
actually proved Einstein to be correct

256  
00:11:03,790 --> 00:11:00,410  
so the theory says that there is this

257  
00:11:10,320 --> 00:11:03,800  
interaction between electromagnetic

258  
00:11:13,090 --> 00:11:10,330  
fields and gravitational fields in 1934

259  
00:11:16,960 --> 00:11:13,100  
dr. Richard Coleman who is a professor

260  
00:11:18,880 --> 00:11:16,970  
at Caltech wrote a textbook and it was

261  
00:11:22,030 --> 00:11:18,890  
called relativity thermodynamics and

262  
00:11:25,210 --> 00:11:22,040  
cosmology in in that book he spent

263  
00:11:27,700 --> 00:11:25,220

several pages deriving in relationship

264

00:11:29,530 --> 00:11:27,710

and showed that a beam of light back

265

00:11:33,190 --> 00:11:29,540

back then they didn't have lasers so he

266

00:11:35,200 --> 00:11:33,200

called a pencil of light it was actually

267

00:11:37,870 --> 00:11:35,210

twice as effective in creating a

268

00:11:44,430 --> 00:11:37,880

gravitational field as a particle of

269

00:11:47,080 --> 00:11:44,440

matter recently in 2011 December of 2011

270

00:11:50,350 --> 00:11:47,090

there was a paper published by Lewis

271

00:11:52,430 --> 00:11:50,360

Rand Corp entitled the effects of light

272

00:11:55,160 --> 00:11:52,440

and gravitational attraction

273

00:11:58,430 --> 00:11:55,170

and he did an experiment where he shot a

274

00:12:01,100 --> 00:11:58,440

beam of the glacier being passed a mass

275

00:12:04,150 --> 00:12:01,110

that was suspended in a controlled

276

00:12:07,040 --> 00:12:04,160

environment and he was able to detect

277

00:12:11,420 --> 00:12:07,050

the fact that that laser light actually

278

00:12:16,580 --> 00:12:11,430

drew the the mass toward it so we had a

279

00:12:18,110 --> 00:12:16,590

gravitational field attached to it so so

280

00:12:20,780 --> 00:12:18,120

if you were going to create a

281

00:12:22,040 --> 00:12:20,790

gravitational field you would look at

282

00:12:24,170 --> 00:12:22,050

how could you manipulate the

283

00:12:27,320 --> 00:12:24,180

electromagnetic fields and in fact in my

284

00:12:29,780 --> 00:12:27,330

very first novel alien log my

285

00:12:32,000 --> 00:12:29,790

astrophysicist is talking to his boss

286

00:12:33,320 --> 00:12:32,010

who happens to be a colonel and they're

287

00:12:35,690 --> 00:12:33,330

involved in a project and they're

288

00:12:37,070 --> 00:12:35,700

standing next to a broken UFO and the

289

00:12:40,160 --> 00:12:37,080

colonel asked him you know how they work

290

00:12:41,960 --> 00:12:40,170

and Cory the astrophysicists is rubbing

291

00:12:44,450 --> 00:12:41,970

his hands over the surface of the craft

292

00:12:46,340 --> 00:12:44,460

and he says well I think this this is a

293

00:12:49,910 --> 00:12:46,350

superconducting material and there's a

294

00:12:51,740 --> 00:12:49,920

high high current flow through here and

295

00:12:53,620 --> 00:12:51,750

then they're somehow manipulating a

296

00:12:55,670 --> 00:12:53,630

magnetic field up through there and

297

00:12:57,200 --> 00:12:55,680

somehow create that he didn't know

298

00:12:59,890 --> 00:12:57,210

exactly because I don't know exactly but

299

00:13:03,740 --> 00:12:59,900

somehow creating a gravitational field

300

00:13:07,000 --> 00:13:03,750

now there are other possible ways to do

301  
00:13:13,250 --> 00:13:07,010  
this in one of them was presented I

302  
00:13:16,790 --> 00:13:13,260  
think was around 2007 dr. brush of no

303  
00:13:19,310 --> 00:13:16,800  
and dr. sandhu co-authored a paper that

304  
00:13:22,340 --> 00:13:19,320  
was presented at the american institute

305  
00:13:23,980 --> 00:13:22,350  
of aeronautics and astronautics and that

306  
00:13:26,420 --> 00:13:23,990  
happened to be a joint session with

307  
00:13:28,970 --> 00:13:26,430  
American society mechanical engineers

308  
00:13:32,840 --> 00:13:28,980  
and the Society of Automotive Engineers

309  
00:13:34,820 --> 00:13:32,850  
and also the society of american society

310  
00:13:37,070 --> 00:13:34,830  
of electrical engineers and was dealing

311  
00:13:38,960 --> 00:13:37,080  
with propulsion and they presented a

312  
00:13:41,590 --> 00:13:38,970  
paper that was peer reviewed and talked

313  
00:13:43,970 --> 00:13:41,600

about a method for creating a craft that

314

00:13:47,030 --> 00:13:43,980

could be propelled by gravitational

315

00:13:49,579 --> 00:13:47,040

field and what they proposed was that if

316

00:13:52,550 --> 00:13:49,589

you could take and build us some

317

00:13:55,579 --> 00:13:52,560

sections made out of parallel plates

318

00:14:00,260 --> 00:13:55,589

that were reflective and you could be a

319

00:14:02,660 --> 00:14:00,270

very high intense electromagnetic field

320

00:14:03,580 --> 00:14:02,670

through those plates in other words like

321

00:14:07,210 --> 00:14:03,590

a microwave

322

00:14:09,340 --> 00:14:07,220

instance and as the beam bounce back and

323

00:14:11,380 --> 00:14:09,350

forth is reflected back and forth

324

00:14:15,010 --> 00:14:11,390

between these plates it would shed

325

00:14:16,630 --> 00:14:15,020

gravitons now some people don't know

326

00:14:18,850 --> 00:14:16,640

what graviton is and in fact people who

327

00:14:20,440 --> 00:14:18,860

study gravity aren't sure how gravity

328

00:14:22,360 --> 00:14:20,450

you know what makes gravity nobody

329

00:14:24,820 --> 00:14:22,370

really knows yet the gravitons is just

330

00:14:28,360 --> 00:14:24,830

one one theory that there are gravitons

331

00:14:30,130 --> 00:14:28,370

at exchange course so anyway if you

332

00:14:32,410 --> 00:14:30,140

believe gravitons is what creates

333

00:14:34,120 --> 00:14:32,420

gravitational fields then as these

334

00:14:36,850 --> 00:14:34,130

photons are bouncing back and forth

335

00:14:40,270 --> 00:14:36,860

they're shedding gravitons creating

336

00:14:42,750 --> 00:14:40,280

gravitational field and so by assembling

337

00:14:45,070 --> 00:14:42,760

a number of these plates and then

338

00:14:46,630 --> 00:14:45,080

staging when you turn them different

339

00:14:48,850 --> 00:14:46,640

ones on you can kind of control the

340

00:14:52,930 --> 00:14:48,860

direction of the force in the direction

341

00:14:55,470 --> 00:14:52,940

that you travel with this craft and that

342

00:14:58,690 --> 00:14:55,480

gets into another question and that is

343

00:15:00,190 --> 00:14:58,700

why do UFOs have different colors people

344

00:15:03,340 --> 00:15:00,200

see them glowing this color and glowing

345

00:15:05,080 --> 00:15:03,350

that color or not glowing at all and if

346

00:15:07,480 --> 00:15:05,090

you follow the theory I just described

347

00:15:09,400 --> 00:15:07,490

as these photons are bouncing back and

348

00:15:11,920 --> 00:15:09,410

forth shet in gravitons they're losing

349

00:15:14,860 --> 00:15:11,930

energy and eventually they get to the

350

00:15:17,680 --> 00:15:14,870

point where the inefficiency shows up as

351

00:15:20,830 --> 00:15:17,690

a radiation of photons from the surface

352

00:15:23,320 --> 00:15:20,840

of these plates and it would be a whole

353

00:15:25,120 --> 00:15:23,330

spectrum but it would depend a lot on

354

00:15:27,430 --> 00:15:25,130

the energy level that the craft is

355

00:15:29,830 --> 00:15:27,440

operating at so for instance if the

356

00:15:30,880 --> 00:15:29,840

craft is hovering over the ground not

357

00:15:32,740 --> 00:15:30,890

doing anything just sitting there

358

00:15:35,560 --> 00:15:32,750

hovering it would be running a low

359

00:15:38,260 --> 00:15:35,570

energy level and the radiation might be

360

00:15:41,410 --> 00:15:38,270

in the form of infrared although there

361

00:15:43,120 --> 00:15:41,420

are theoretically sometimes when higher

362

00:15:44,410 --> 00:15:43,130

energy particles might be released so

363

00:15:45,580 --> 00:15:44,420

you don't want to go up and touch one of

364

00:15:46,750 --> 00:15:45,590

these things when it's running and you

365

00:15:49,000 --> 00:15:46,760

don't want to stand next to one very

366

00:15:51,670 --> 00:15:49,010

long or you might die from radiation

367

00:15:53,020 --> 00:15:51,680

poisoning but but generally you would be

368

00:15:55,690 --> 00:15:53,030

sitting there you wouldn't see it

369

00:15:57,070 --> 00:15:55,700

because it's in the infrared but if it

370

00:16:00,010 --> 00:15:57,080

suddenly decides to take off and

371

00:16:03,550 --> 00:16:00,020

accelerate then of course it requires a

372

00:16:05,670 --> 00:16:03,560

higher energy and it would shed a waste

373

00:16:09,070 --> 00:16:05,680

energy in a higher energy level and

374

00:16:11,110 --> 00:16:09,080

higher level of the spectrum more toward

375

00:16:12,790 --> 00:16:11,120

the visual and the color might depend

376

00:16:14,170 --> 00:16:12,800

again on the energy level and so with

377

00:16:15,730 --> 00:16:14,180

the intensity

378

00:16:18,130 --> 00:16:15,740

they're accelerating they might be very

379

00:16:20,110 --> 00:16:18,140

bright if they're going very fast in the

380

00:16:22,060 --> 00:16:20,120

atmosphere where they have a resistance

381

00:16:23,710 --> 00:16:22,070

they might be very bright if on the

382

00:16:24,940 --> 00:16:23,720

other hand they're going slow they

383

00:16:27,370 --> 00:16:24,950

wouldn't be quite as bright and they

384

00:16:29,019 --> 00:16:27,380

might be a different color now what

385

00:16:30,610 --> 00:16:29,029

would you if you had to guess what would

386

00:16:33,280 --> 00:16:30,620

I mean it seems like would be

387

00:16:35,440 --> 00:16:33,290

electricity of some sort that would

388

00:16:37,180 --> 00:16:35,450

power something like this what would

389

00:16:42,130 --> 00:16:37,190

your beat what would be your guests on

390

00:16:44,139 --> 00:16:42,140

that well I have a bucket list of things

391

00:16:47,320 --> 00:16:44,149

that I want to research and their energy

392

00:16:50,019 --> 00:16:47,330

sources is on that list so the only

393

00:16:52,380 --> 00:16:50,029

thing i might mention this thing called

394

00:16:56,470 --> 00:16:52,390

zero point energy that people discuss

395

00:16:59,320 --> 00:16:56,480

and people are researching that Eugene

396

00:17:01,900 --> 00:16:59,330

put glutton off in his research that

397

00:17:03,579 --> 00:17:01,910

he's been doing in his and when he

398

00:17:07,829 --> 00:17:03,589

reports his results one of the things

399

00:17:10,870 --> 00:17:07,839

that's kind of astounding this pulse of

400

00:17:12,309 --> 00:17:10,880

this gravity paul said he pretty he's

401  
00:17:15,819 --> 00:17:12,319  
able to produce out of this pulse

402  
00:17:17,949 --> 00:17:15,829  
generator has some very interesting

403  
00:17:19,660 --> 00:17:17,959  
things about it that number one and

404  
00:17:23,079 --> 00:17:19,670  
travels 64 times the speed of light

405  
00:17:25,829 --> 00:17:23,089  
number two he's determined that its

406  
00:17:28,900 --> 00:17:25,839  
interaction with the surroundings

407  
00:17:31,630 --> 00:17:28,910  
requires more energy than the energy he

408  
00:17:34,169 --> 00:17:31,640  
puts into his device so the question is

409  
00:17:36,970 --> 00:17:34,179  
world words all the energy coming from

410  
00:17:40,000 --> 00:17:36,980  
now he is an experimentalist and not a

411  
00:17:43,570 --> 00:17:40,010  
theorist as he's especially his material

412  
00:17:47,640 --> 00:17:43,580  
science so he doesn't know I mean he's

413  
00:17:51,480 --> 00:17:47,650

perplexed too he suspects it possibly

414

00:17:55,299 --> 00:17:51,490

this this gravitational wave is somehow

415

00:17:58,750 --> 00:17:55,309

causing sub upon subatomic particles to

416

00:18:02,410 --> 00:17:58,760

release energy and this might be ie

417

00:18:04,870 --> 00:18:02,420

zero-point energy I don't know but it

418

00:18:07,390 --> 00:18:04,880

might be that kind of energy source

419

00:18:09,700 --> 00:18:07,400

that's being used because you know

420

00:18:11,520 --> 00:18:09,710

whatever they do however fast they go or

421

00:18:13,900 --> 00:18:11,530

far they go it's going to take energy

422

00:18:16,350 --> 00:18:13,910

more does it come from and I don't know

423

00:18:22,480 --> 00:18:16,360

and that's like I said in my bucket list

424

00:18:25,240 --> 00:18:22,490

if UFOs have crashed in the past and it

425

00:18:28,000 --> 00:18:25,250

they've been covered up as far as like

426

00:18:30,490 --> 00:18:28,010

the government the military

427

00:18:32,530 --> 00:18:30,500

reversing engineering them or attempting

428

00:18:37,300 --> 00:18:32,540

to would you think they already have

429

00:18:39,190 --> 00:18:37,310

this information that dr. puck can't say

430

00:18:42,970 --> 00:18:39,200

his name bud glut not I know it's he's a

431

00:18:46,900 --> 00:18:42,980

Russian but that's but but it's p.o.d

432

00:18:48,550 --> 00:18:46,910

que le T Nov Vietnam do you think they

433

00:18:51,490 --> 00:18:48,560

already have this information or

434

00:18:53,830 --> 00:18:51,500

something very close to it well I would

435

00:18:55,830 --> 00:18:53,840

be surprised if they don't number one

436

00:18:59,200 --> 00:18:55,840

he's been approached by Boeing aircraft

437

00:19:00,790 --> 00:18:59,210

years ago and by NASA and as I said NASA

438

00:19:03,760 --> 00:19:00,800

has already done some experiments but

439

00:19:06,820 --> 00:19:03,770

because they didn't have the proper size

440

00:19:09,520 --> 00:19:06,830

equipment they ended money they

441

00:19:12,580 --> 00:19:09,530

abandoned the research maybe they pass

442

00:19:14,830 --> 00:19:12,590

it on to the DoD I don't know but the

443

00:19:19,030 --> 00:19:14,840

potential is so great that I would

444

00:19:23,080 --> 00:19:19,040

imagine that the military or DoD or

445

00:19:25,600 --> 00:19:23,090

somebody has knowledge about it now you

446

00:19:26,890 --> 00:19:25,610

could hand the blueprints to a 747 to

447

00:19:29,590 --> 00:19:26,900

the Wright brothers that doesn't mean

448

00:19:31,240 --> 00:19:29,600

they could build 747 and there may be

449

00:19:34,330 --> 00:19:31,250

some technology that we haven't quite

450

00:19:37,030 --> 00:19:34,340

learned yet like nanotechnology that

451  
00:19:39,280 --> 00:19:37,040  
might be required to assemble some of

452  
00:19:42,010 --> 00:19:39,290  
the components that we just don't have

453  
00:19:44,980 --> 00:19:42,020  
that technology and that might be one

454  
00:19:47,290 --> 00:19:44,990  
reason why maybe they haven't succeeded

455  
00:19:49,240 --> 00:19:47,300  
in creating a UFO on the other hand

456  
00:19:51,580 --> 00:19:49,250  
maybe they have some people think that a

457  
00:19:54,490 --> 00:19:51,590  
lot of UFOs we see are actually our own

458  
00:19:59,950 --> 00:19:54,500  
crap right right one thing you always

459  
00:20:02,470 --> 00:19:59,960  
hear a person say is if they can travel

460  
00:20:05,920 --> 00:20:02,480  
so many you know light years to get here

461  
00:20:09,010 --> 00:20:05,930  
then how could they possibly crash what

462  
00:20:12,370 --> 00:20:09,020  
you know here on earth what do you say

463  
00:20:14,530 --> 00:20:12,380

about that well I think there's maybe

464

00:20:18,000 --> 00:20:14,540

several reasons why they crash but in

465

00:20:20,050 --> 00:20:18,010

general if they are creating a

466

00:20:22,410 --> 00:20:20,060

gravitational field as a means of

467

00:20:24,970 --> 00:20:22,420

propulsion and they're using

468

00:20:27,490 --> 00:20:24,980

electromagnetic fields as the means of

469

00:20:31,120 --> 00:20:27,500

producing that gravitational field then

470

00:20:33,730 --> 00:20:31,130

a strong beam of electromagnetic energy

471

00:20:36,250 --> 00:20:33,740

could probably disrupt their propulsion

472

00:20:38,710 --> 00:20:36,260

system now radar happens to be a

473

00:20:40,250 --> 00:20:38,720

candidate for that and as a matter of

474

00:20:42,220 --> 00:20:40,260

fact the military actually

475

00:20:46,550 --> 00:20:42,230

developed a weapon called the

476

00:20:49,250 --> 00:20:46,560

electromagnetic pulse beam weapon which

477

00:20:52,190 --> 00:20:49,260

was designed to be mad aircraft and

478

00:20:54,890 --> 00:20:52,200

disable their electronics so certainly

479

00:20:56,210 --> 00:20:54,900

something like that could do it but a

480

00:20:59,480 --> 00:20:56,220

lot of the crashes have occurred in

481

00:21:01,430 --> 00:20:59,490

areas where a lot of research was being

482

00:21:06,290 --> 00:21:01,440

done in high-powered radar at least in

483

00:21:08,450 --> 00:21:06,300

the past the crap in my story line in my

484

00:21:11,900 --> 00:21:08,460

novels is based on a crash in Kingman

485

00:21:14,090 --> 00:21:11,910

Arizona that occurred in 1953 and they

486

00:21:15,650 --> 00:21:14,100

didn't have high-powered radar at that

487

00:21:19,160 --> 00:21:15,660

time in that area they weren't doing

488

00:21:20,630 --> 00:21:19,170

research in any way because I thought

489

00:21:22,700 --> 00:21:20,640

well maybe they were developing great

490

00:21:24,740 --> 00:21:22,710

are for the dew line or something but it

491

00:21:27,800 --> 00:21:24,750

turns out that didn't seem to be the

492

00:21:29,780 --> 00:21:27,810

case now that crash I attributed to the

493

00:21:32,090 --> 00:21:29,790

craft being too close to an atomic

494

00:21:35,390 --> 00:21:32,100

explosion because i got a believe when

495

00:21:38,300 --> 00:21:35,400

we started doing all these atomic tests

496

00:21:40,850 --> 00:21:38,310

out in nevada but they had craft

497

00:21:43,310 --> 00:21:40,860

stationed there to monitor those tests i

498

00:21:45,380 --> 00:21:43,320

mean i would they certainly would be

499

00:21:46,760 --> 00:21:45,390

curious about Howard how we're doing in

500

00:21:50,000 --> 00:21:46,770

this and what kind of development were

501  
00:21:51,800 --> 00:21:50,010  
making and I have a scenario that i

502  
00:21:53,840 --> 00:21:51,810  
described in the prologue of my second

503  
00:21:59,150 --> 00:21:53,850  
book that UFO may have been there

504  
00:22:03,770 --> 00:21:59,160  
monitoring the nuclear test that was set

505  
00:22:07,310 --> 00:22:03,780  
off in 19th of May 1953 it became known

506  
00:22:11,120 --> 00:22:07,320  
as Dirty Harry by the way but that crap

507  
00:22:12,830 --> 00:22:11,130  
got too close was was mortally wounded

508  
00:22:14,420 --> 00:22:12,840  
and but managed to make it over to the

509  
00:22:18,050 --> 00:22:14,430  
kingman area before a crash now that's

510  
00:22:21,410 --> 00:22:18,060  
my hypothesis so that's another reason

511  
00:22:23,210 --> 00:22:21,420  
they might crash on sometimes they may

512  
00:22:25,820 --> 00:22:23,220  
be Christ because we shoot him down or

513  
00:22:29,090 --> 00:22:25,830

something I don't know right the theory

514

00:22:32,720 --> 00:22:29,100

here of the gravitational propulsion

515

00:22:37,580 --> 00:22:32,730

does it matter how much the object ways

516

00:22:39,410 --> 00:22:37,590

that is being propelled no so in theory

517

00:22:41,510 --> 00:22:39,420

then this could be something that could

518

00:22:45,020 --> 00:22:41,520

be used on an asteroid that's heading

519

00:22:48,410 --> 00:22:45,030

our way possibly well one of the things

520

00:22:50,900 --> 00:22:48,420

but but no suggested now he certainly

521

00:22:53,390 --> 00:22:50,910

doesn't want his research and equipment

522

00:22:54,140 --> 00:22:53,400

to be used for military use but he did

523

00:22:56,480 --> 00:22:54,150

say

524

00:22:58,940 --> 00:22:56,490

this beam that he he can produce which

525

00:23:01,520 --> 00:22:58,950

is just for a it's a pulse okay it's a

526

00:23:02,720 --> 00:23:01,530

very short duration pulse but strong

527

00:23:04,720 --> 00:23:02,730

enough he's actually being able to

528

00:23:07,220 --> 00:23:04,730

deflect a two inch thick metal plate

529

00:23:09,260 --> 00:23:07,230

through a distance of several kilometers

530

00:23:11,540 --> 00:23:09,270

and it passes through buildings and so

531

00:23:13,880 --> 00:23:11,550

forth but he was suggesting that perhaps

532

00:23:16,250 --> 00:23:13,890

a pulse beam like this could be aimed at

533

00:23:19,790 --> 00:23:16,260

a satellite to move it to a higher orbit

534

00:23:21,920 --> 00:23:19,800

okay or maybe two dis or disable it I

535

00:23:23,840 --> 00:23:21,930

don't know so it does have weapons

536

00:23:26,300 --> 00:23:23,850

possibilities which which he really

537

00:23:28,760 --> 00:23:26,310

doesn't want to have happen that's you

538

00:23:31,310 --> 00:23:28,770

know that's could be one of the reasons

539

00:23:33,680 --> 00:23:31,320

why there's been such a cover-up over

540

00:23:36,620 --> 00:23:33,690

the years is because of the threat of

541

00:23:41,300 --> 00:23:36,630

National Defense that these things could

542

00:23:44,630 --> 00:23:41,310

be used against us come one thing I talk

543

00:23:48,620 --> 00:23:44,640

about a lot and this show is one of the

544

00:23:51,200 --> 00:23:48,630

theories that people think that UFOs

545

00:23:53,090 --> 00:23:51,210

could possibly be interdimensional

546

00:23:56,900 --> 00:23:53,100

what's your what's your take on that

547

00:24:00,290 --> 00:23:56,910

well you have to understand my mission

548

00:24:03,440 --> 00:24:00,300

is to try and convince play people that

549

00:24:06,380 --> 00:24:03,450

UFOs and ETS our reality and these

550

00:24:08,000 --> 00:24:06,390

people are skeptical at best they

551  
00:24:10,640 --> 00:24:08,010  
certainly would not go into a bookstore

552  
00:24:14,500 --> 00:24:10,650  
and buy a book on UFOs which is why I

553  
00:24:17,690 --> 00:24:14,510  
opted to use the science fiction format

554  
00:24:21,610 --> 00:24:17,700  
but it's in my lecture and in my books I

555  
00:24:23,300 --> 00:24:21,620  
very carefully avoid wormholes

556  
00:24:25,850 --> 00:24:23,310  
multi-dimensions and things like that

557  
00:24:27,580 --> 00:24:25,860  
I'm not saying they aren't true because

558  
00:24:31,220 --> 00:24:27,590  
I couldn't prove whether they are or not

559  
00:24:33,800 --> 00:24:31,230  
but I tried to explain in a manner

560  
00:24:36,800 --> 00:24:33,810  
that's a nuts-and-bolts manner that

561  
00:24:39,860 --> 00:24:36,810  
anyone who's had high school physics or

562  
00:24:42,170 --> 00:24:39,870  
high school science could understand and

563  
00:24:45,290 --> 00:24:42,180

if I can explain all the phenomenon of

564

00:24:48,080 --> 00:24:45,300

the people see UFOs do using just

565

00:24:50,720 --> 00:24:48,090

traditional science then they don't have

566

00:24:52,810 --> 00:24:50,730

to worry about interdimensional travel

567

00:24:54,770 --> 00:24:52,820

and things like that how about when

568

00:24:57,500 --> 00:24:54,780

people have said they've seen them

569

00:24:59,360 --> 00:24:57,510

appear and disappear well their cloaking

570

00:25:02,930 --> 00:24:59,370

themselves and I explained that in my

571

00:25:04,850 --> 00:25:02,940

lectures end in my book and I one

572

00:25:07,440 --> 00:25:04,860

possible way they could do that just

573

00:25:09,509 --> 00:25:07,450

like the Klingons of course

574

00:25:12,690 --> 00:25:09,519

they they have a very strong magnetic

575

00:25:14,669 --> 00:25:12,700

field around them and and this testimony

576

00:25:18,240 --> 00:25:14,679

to that that they do have a very strong

577

00:25:20,909 --> 00:25:18,250

magnetic field well there was some some

578

00:25:24,750 --> 00:25:20,919

work done actually paper was published

579

00:25:28,110 --> 00:25:24,760

by dr. Thomas erber from the Illinois

580

00:25:30,659 --> 00:25:28,120

Institute of Technology it was back in

581

00:25:32,730 --> 00:25:30,669

nineteen sixty one and he he published

582

00:25:34,680 --> 00:25:32,740

it in the british journal of nature for

583

00:25:36,570 --> 00:25:34,690

so on so many of your listeners want to

584

00:25:39,000 --> 00:25:36,580

research that they have to go to the

585

00:25:42,419 --> 00:25:39,010

british version of the journal of nature

586

00:25:45,360 --> 00:25:42,429

and his paper was called the velocity of

587

00:25:48,480 --> 00:25:45,370

light in a magnetic field this was back

588

00:25:50,460 --> 00:25:48,490

in 61 he was interesting interested in

589

00:25:53,430 --> 00:25:50,470

seeing what the effect of a magnetic

590

00:25:55,200 --> 00:25:53,440

field had on the velocity of light and

591

00:25:59,129 --> 00:25:55,210

he actually developed the empirical

592

00:26:01,200 --> 00:25:59,139

equation based on his studies and the

593

00:26:04,440 --> 00:26:01,210

equations we report the index of

594

00:26:06,720 --> 00:26:04,450

refraction is a function of the the

595

00:26:10,680 --> 00:26:06,730

magnetic field strength now index of

596

00:26:13,080 --> 00:26:10,690

refraction is the velocity of light in a

597

00:26:15,570 --> 00:26:13,090

vacuum divided by the velocity of light

598

00:26:18,110 --> 00:26:15,580

as it passes through substance like a

599

00:26:21,120 --> 00:26:18,120

piece of glass or water or whatever and

600

00:26:23,909 --> 00:26:21,130

you know glass has an index of

601  
00:26:26,669 --> 00:26:23,919  
refraction close to two so that means

602  
00:26:29,759 --> 00:26:26,679  
the white is only traveling half its

603  
00:26:31,740 --> 00:26:29,769  
past as it does in a vacuum well anyway

604  
00:26:34,799 --> 00:26:31,750  
so if you plot this you see that it was

605  
00:26:36,870 --> 00:26:34,809  
a very strong magnetic field you can

606  
00:26:39,029 --> 00:26:36,880  
create an index of refraction much

607  
00:26:40,560 --> 00:26:39,039  
greater than 2 or even a little less

608  
00:26:42,659 --> 00:26:40,570  
than 2 doesn't matter but it's enough

609  
00:26:45,990 --> 00:26:42,669  
you could imagine it's creating any lens

610  
00:26:47,820 --> 00:26:46,000  
in this lens then is taking the light

611  
00:26:49,889 --> 00:26:47,830  
from behind the craft and bending it

612  
00:26:52,110 --> 00:26:49,899  
around so it comes out on the front side

613  
00:26:54,870 --> 00:26:52,120

of the craft and the person looking at

614

00:26:58,049 --> 00:26:54,880

the crowd doesn't see the crap it's gone

615

00:27:00,149 --> 00:26:58,059

it's been cloaked I think this I've read

616

00:27:02,610 --> 00:27:00,159

somewhere where the military is trying

617

00:27:04,080 --> 00:27:02,620

to perfect something like this yeah it's

618

00:27:09,720 --> 00:27:04,090

a little less sophisticated though

619

00:27:14,220 --> 00:27:09,730

they're using I think like miniature TV

620

00:27:17,279 --> 00:27:14,230

cameras if you will and screens on the

621

00:27:17,610 --> 00:27:17,289

suit and maybe cameras on the back of

622

00:27:19,830 --> 00:27:17,620

the sir

623

00:27:21,600 --> 00:27:19,840

and cameras on the back of the suitor

624

00:27:23,760 --> 00:27:21,610

are taking a look at what's behind the

625

00:27:25,200 --> 00:27:23,770

person and then projecting onto the

626

00:27:27,630 --> 00:27:25,210

screens in front of the person so you

627

00:27:30,240 --> 00:27:27,640

who are looking at the person don't see

628

00:27:32,730 --> 00:27:30,250

the person it's like they disappear Wow

629

00:27:34,470 --> 00:27:32,740

so to say so many angles to worry about

630

00:27:36,090 --> 00:27:34,480

in something well yeah I mean I probably

631

00:27:37,410 --> 00:27:36,100

simplified it a little bit but I mean

632

00:27:40,470 --> 00:27:37,420

that's the concept I think they're

633

00:27:42,240 --> 00:27:40,480

working on and I don't in there by the

634

00:27:44,070 --> 00:27:42,250

way the magnetic field required to do

635

00:27:47,660 --> 00:27:44,080

anything significant is very large

636

00:27:50,549 --> 00:27:47,670

probably even to get a sufficient

637

00:27:52,830 --> 00:27:50,559

distortion equivalent to what you would

638

00:27:56,720 --> 00:27:52,840

see on a hot summer day from the heat

639

00:27:59,910 --> 00:27:56,730

cries out off the road would require

640

00:28:01,830 --> 00:27:59,920

magnetic fields they're probably equal

641

00:28:03,930 --> 00:28:01,840

to or a little greater than our

642

00:28:05,760 --> 00:28:03,940

strongest fields that we produce so far

643

00:28:08,790 --> 00:28:05,770

but I'm not putting limits on the

644

00:28:11,669 --> 00:28:08,800

capabilities of UFOs to create a strong

645

00:28:13,020 --> 00:28:11,679

magnetic field if they can do that and

646

00:28:14,970 --> 00:28:13,030

they could use that now there may be

647

00:28:17,820 --> 00:28:14,980

other means I couldn't find any research

648

00:28:20,010 --> 00:28:17,830

done on on the same thing as far as the

649

00:28:21,600 --> 00:28:20,020

effect of electric fields you know

650

00:28:24,419 --> 00:28:21,610

electric wheels might also do the same

651  
00:28:26,220 --> 00:28:24,429  
thing but certainly magnetic fields

652  
00:28:27,600 --> 00:28:26,230  
could be one possible way that they

653  
00:28:30,450 --> 00:28:27,610  
cloak themselves so they cloak

654  
00:28:33,330 --> 00:28:30,460  
themselves in one location move over to

655  
00:28:35,220 --> 00:28:33,340  
another location and then reappear now

656  
00:28:38,580 --> 00:28:35,230  
people say oh that's interdimensional

657  
00:28:40,140 --> 00:28:38,590  
travel well I can't say it isn't but I

658  
00:28:42,000 --> 00:28:40,150  
can explain it in a way that doesn't

659  
00:28:46,650 --> 00:28:42,010  
require international interdimensional

660  
00:28:50,340 --> 00:28:46,660  
travel one thing in your books you

661  
00:28:53,430 --> 00:28:50,350  
discuss the alternative to the big bang

662  
00:28:55,860 --> 00:28:53,440  
theory yes I really want to talk about

663  
00:28:58,980 --> 00:28:55,870

that because that's always been a really

664

00:29:01,830 --> 00:28:58,990

tough one for me to swallow I'm not a

665

00:29:05,190 --> 00:29:01,840

scientist but what is your take on the

666

00:29:07,680 --> 00:29:05,200

Big Bang Theory uh I think the big bang

667

00:29:11,100 --> 00:29:07,690

theory is wrong and it's to put it

668

00:29:14,250 --> 00:29:11,110

simply it's a misinterpretation of the

669

00:29:16,440 --> 00:29:14,260

data it's interesting just last week I

670

00:29:18,780 --> 00:29:16,450

gave for the first time a new lecture

671

00:29:21,500 --> 00:29:18,790

that I've developed it's called how the

672

00:29:24,180 --> 00:29:21,510

universe began without a big bang and

673

00:29:27,270 --> 00:29:24,190

it's a two-hour lecture its power point

674

00:29:30,270 --> 00:29:27,280

the first part is history of the

675

00:29:30,680 --> 00:29:30,280

astronomy and and the astronomers and

676  
00:29:32,240 --> 00:29:30,690  
and there

677  
00:29:35,890 --> 00:29:32,250  
machines that they used to gather data

678  
00:29:40,610 --> 00:29:35,900  
going all the way back to Copernicus and

679  
00:29:41,780 --> 00:29:40,620  
up to present time so I go through and

680  
00:29:43,130 --> 00:29:41,790  
talk a little bit about each of these

681  
00:29:44,990 --> 00:29:43,140  
astronomers and the equipment they use

682  
00:29:47,000 --> 00:29:45,000  
and the results that they got and and

683  
00:29:49,370 --> 00:29:47,010  
the tools that they developed and then

684  
00:29:52,760 --> 00:29:49,380  
the second part is talking about the big

685  
00:29:55,010 --> 00:29:52,770  
bang and as a way of interpreting all

686  
00:29:56,900 --> 00:29:55,020  
the data that's been accumulated and in

687  
00:30:00,170 --> 00:29:56,910  
the third part is to talk about a better

688  
00:30:02,270 --> 00:30:00,180

theory in my opinion that is much better

689

00:30:04,700 --> 00:30:02,280

than the Big Bang Theory it uses the

690

00:30:08,360 --> 00:30:04,710

same data but doesn't violate all the

691

00:30:11,300 --> 00:30:08,370

fundamental laws of physics that the Big

692

00:30:13,370 --> 00:30:11,310

Bang Theory violates and I'd be glad to

693

00:30:17,780 --> 00:30:13,380

explain that sir if you'd like yes would

694

00:30:20,450 --> 00:30:17,790

you okay well if we start way back in

695

00:30:23,210 --> 00:30:20,460

around 1928 gentleman by the name of

696

00:30:26,950 --> 00:30:23,220

Paul Dirac he was a physicists and

697

00:30:31,220 --> 00:30:26,960

English physicist and paul dirac

698

00:30:35,090 --> 00:30:31,230

mathematically proved that a particle

699

00:30:37,310 --> 00:30:35,100

should have anti particles and so then

700

00:30:39,440 --> 00:30:37,320

in nineteen thirty he proposed that the

701  
00:30:42,650 --> 00:30:39,450  
vacuum of space was actually a sea of

702  
00:30:46,670 --> 00:30:42,660  
electrons that were counteracted by a

703  
00:30:49,580 --> 00:30:46,680  
sea of holes because the charge of the

704  
00:30:52,040 --> 00:30:49,590  
universe had to be neutral later that

705  
00:30:55,250 --> 00:30:52,050  
was revised so that these holes were

706  
00:30:57,080 --> 00:30:55,260  
positive particles and initially he

707  
00:30:58,730 --> 00:30:57,090  
thought maybe they were protons but then

708  
00:31:02,660 --> 00:30:58,740  
the mass of the proton was too great to

709  
00:31:04,550 --> 00:31:02,670  
explain things so it was worked out that

710  
00:31:09,200 --> 00:31:04,560  
there was a particle the of equal mass

711  
00:31:10,940 --> 00:31:09,210  
to the electron but opposite charge and

712  
00:31:13,970 --> 00:31:10,950  
that led to the discovery of the

713  
00:31:17,330 --> 00:31:13,980

positron and it led to Derek getting a

714

00:31:21,200 --> 00:31:17,340

Nobel Prize in 1933 so if you imagine

715

00:31:24,560 --> 00:31:21,210

and this concept of a sea of the stuff

716

00:31:26,240 --> 00:31:24,570

and that's the basis of this theory by

717

00:31:28,490 --> 00:31:26,250

the way I did not invent this theory I

718

00:31:29,930 --> 00:31:28,500

subscribe a whole hardly to it it turns

719

00:31:31,850 --> 00:31:29,940

out one of my friends here in sun city

720

00:31:35,930 --> 00:31:31,860

west actually developed the theory and

721

00:31:39,680 --> 00:31:35,940

i'm now his his disciple you might say

722

00:31:41,810 --> 00:31:39,690

but anyway so it was I was always

723

00:31:43,610 --> 00:31:41,820

trained to avoid singularities

724

00:31:44,780 --> 00:31:43,620

throughout my math courses and

725

00:31:46,400 --> 00:31:44,790

engineering courses you know whatever

726

00:31:48,410 --> 00:31:46,410

you do have a way to think you are

727

00:31:50,690 --> 00:31:48,420

already and here the big banks starts

728

00:31:53,210 --> 00:31:50,700

off in a singularity so that got that

729

00:31:54,830 --> 00:31:53,220

turned me off right off the bat another

730

00:31:57,740 --> 00:31:54,840

thing that is a clue that the big bang

731

00:31:59,660 --> 00:31:57,750

theory might be wrong is the the

732

00:32:01,490 --> 00:31:59,670

interpretation of the data that they

733

00:32:04,450 --> 00:32:01,500

have and this is the data is good the

734

00:32:08,330 --> 00:32:04,460

data says that the further away a

735

00:32:12,170 --> 00:32:08,340

galactic cluster is from us the faster

736

00:32:14,000 --> 00:32:12,180

it's traveling and they big bankers are

737

00:32:16,400 --> 00:32:14,010

forced to interpret that as acceleration

738

00:32:18,260 --> 00:32:16,410

and of course if you have acceleration

739

00:32:19,460 --> 00:32:18,270

you need a force to create that and

740

00:32:22,070 --> 00:32:19,470

therefore you need energy to create

741

00:32:24,860 --> 00:32:22,080

force and therefore you need to go find

742

00:32:26,390 --> 00:32:24,870

dark energy well guess what they haven't

743

00:32:29,860 --> 00:32:26,400

found it so that's certainly a clue that

744

00:32:32,570 --> 00:32:29,870

maybe they're on the wrong track so

745

00:32:35,000 --> 00:32:32,580

those are a couple things that make me

746

00:32:37,190 --> 00:32:35,010

believe that they're wrong and bobby

747

00:32:38,720 --> 00:32:37,200

mcgee he is the one who developed this

748

00:32:42,890 --> 00:32:38,730

theory and I hope someday he gets some

749

00:32:44,420 --> 00:32:42,900

kind of award for it if you start off

750

00:32:47,210 --> 00:32:44,430

with the idea that it's much easier to

751

00:32:50,870 --> 00:32:47,220

imagine that the universe began with

752

00:32:54,380 --> 00:32:50,880

with all the matter in place on day one

753

00:32:57,590 --> 00:32:54,390

in a different form and that form is

754

00:33:00,080 --> 00:32:57,600

such that that matter can be created can

755

00:33:01,850 --> 00:33:00,090

be converted into energy because to

756

00:33:04,610 --> 00:33:01,860

create the universe requires a lot of

757

00:33:09,230 --> 00:33:04,620

energy the universe as we see it okay

758

00:33:12,190 --> 00:33:09,240

and the most energetic thing we can

759

00:33:14,810 --> 00:33:12,200

think of is to have mass annihilation

760

00:33:17,990 --> 00:33:14,820

because when you have to like an

761

00:33:20,090 --> 00:33:18,000

electron and positron come together you

762

00:33:23,690 --> 00:33:20,100

annihilate the total mass and create

763

00:33:26,060 --> 00:33:23,700

wrote ons in the form of gamma rays so

764

00:33:28,400 --> 00:33:26,070

Bobby imagines that the primordial

765

00:33:31,970 --> 00:33:28,410

universe which extends out to infinity

766

00:33:35,000 --> 00:33:31,980

is a three dimensional matrix if you

767

00:33:37,940 --> 00:33:35,010

would or lattice work and at the lattice

768

00:33:42,340 --> 00:33:37,950

points our positronium atoms how

769

00:33:45,290 --> 00:33:42,350

positronium exists they've been detected

770

00:33:48,740 --> 00:33:45,300

what they are is a very simple Adam it's

771

00:33:52,250 --> 00:33:48,750

an electron orbiting a common center

772

00:33:54,169 --> 00:33:52,260

with a positron and they both have the

773

00:33:55,940 --> 00:33:54,179

same mass of the center's in between

774

00:33:57,889 --> 00:33:55,950

and there's Benny fast enough that the

775

00:33:59,830 --> 00:33:57,899

certificate force keeps them away and

776

00:34:01,810 --> 00:33:59,840

and there's also electric charges

777

00:34:05,269 --> 00:34:01,820

electrical forces that counterbalance

778

00:34:06,669 --> 00:34:05,279

and so they are in this matrix locked in

779

00:34:10,040 --> 00:34:06,679

with all these gazillion other

780

00:34:13,010 --> 00:34:10,050

positronium Zin a stable arrangement the

781

00:34:15,319 --> 00:34:13,020

the primordial universe is it could

782

00:34:16,730 --> 00:34:15,329

absolute zero or near absolute zero and

783

00:34:19,000 --> 00:34:16,740

it's a very stable system because

784

00:34:22,819 --> 00:34:19,010

normally positronium czar not stable

785

00:34:25,480 --> 00:34:22,829

they tend to annihilate each other in

786

00:34:29,149 --> 00:34:25,490

just a fraction of a second and become

787

00:34:31,460 --> 00:34:29,159

photons so in in our laboratory they're

788

00:34:33,440 --> 00:34:31,470

not very stable but he visualizes that

789

00:34:36,319 --> 00:34:33,450

perhaps in the primordial universe it

790

00:34:40,190 --> 00:34:36,329

would be a stable structure so if you go

791

00:34:42,500 --> 00:34:40,200

back about 24 to 30 billion years ago

792

00:34:44,960 --> 00:34:42,510

and his estimate you could say the

793

00:34:47,809 --> 00:34:44,970

finger of God disrupted one of these

794

00:34:51,379 --> 00:34:47,819

positronium and it annihilated releasing

795

00:34:53,780 --> 00:34:51,389

two gamma rays which in turn hit two

796

00:34:56,180 --> 00:34:53,790

other positronium releasing for gamma

797

00:34:58,130 --> 00:34:56,190

rays and so on so you can imagine you

798

00:35:01,190 --> 00:34:58,140

now have a chain reaction that's

799

00:35:04,400 --> 00:35:01,200

occurring and this explosion if you want

800

00:35:06,170 --> 00:35:04,410

to call it that is his expanding at the

801  
00:35:09,859 --> 00:35:06,180  
speed of light or near the speed of

802  
00:35:12,559 --> 00:35:09,869  
light and that he calls it a

803  
00:35:14,210 --> 00:35:12,569  
deflagration way so within this wave

804  
00:35:17,089 --> 00:35:14,220  
it's expanding outward at near the speed

805  
00:35:18,950 --> 00:35:17,099  
of light there are various stages of

806  
00:35:21,680 --> 00:35:18,960  
events that are occurring throughout the

807  
00:35:23,420 --> 00:35:21,690  
thickness of this deflagration wave and

808  
00:35:25,970 --> 00:35:23,430  
he estimates the thickness to be two and

809  
00:35:28,700 --> 00:35:25,980  
a half billion light years so the lot

810  
00:35:32,059 --> 00:35:28,710  
can happen within that timeframe but on

811  
00:35:34,970 --> 00:35:32,069  
the outer front of this deflagration

812  
00:35:36,799 --> 00:35:34,980  
wave of course photons in the form of

813  
00:35:38,690 --> 00:35:36,809

gamma rays are being shot out and

814

00:35:42,859 --> 00:35:38,700

causing the chain reaction to continue

815

00:35:44,780 --> 00:35:42,869

behind the wave eventually the photons

816

00:35:47,990 --> 00:35:44,790

are converted back into particles

817

00:35:49,789 --> 00:35:48,000

subatomic particles and eventually atoms

818

00:35:53,809 --> 00:35:49,799

and then eventually molecules and then

819

00:35:56,720 --> 00:35:53,819

eventually particles at Klima rate and

820

00:35:58,849 --> 00:35:56,730

form heavier particles now these

821

00:36:01,220 --> 00:35:58,859

particles and are traveling at near

822

00:36:03,920 --> 00:36:01,230

light-speed so they are gravitationally

823

00:36:05,930 --> 00:36:03,930

enhanced according to relativity which

824

00:36:07,109 --> 00:36:05,940

causes the attraction to be even greater

825

00:36:09,680 --> 00:36:07,119

between these priority

826

00:36:13,529 --> 00:36:09,690

causes them to agglomerate faster

827

00:36:18,019 --> 00:36:13,539

eventually you get a dust and gas that's

828

00:36:20,759 --> 00:36:18,029

formed mostly hydrogen some helium and

829

00:36:23,309 --> 00:36:20,769

there are pockets where gravity is a

830

00:36:25,200 --> 00:36:23,319

little stronger than others so these the

831

00:36:28,670 --> 00:36:25,210

dust and gas begin to collapse and form

832

00:36:32,460 --> 00:36:28,680

stars and eventually out of those

833

00:36:34,349 --> 00:36:32,470

galaxies form and clusters form and then

834

00:36:36,329 --> 00:36:34,359

so that's all occurring on this side of

835

00:36:38,130 --> 00:36:36,339

that deflagration wave its speeding

836

00:36:41,089 --> 00:36:38,140

onward even as we speak its way out

837

00:36:44,940 --> 00:36:41,099

there going on doing its thing but

838

00:36:48,839 --> 00:36:44,950

what's happening inside and behind on

839

00:36:50,730 --> 00:36:48,849

our side of the split wave because of

840

00:36:52,349 --> 00:36:50,740

the scene that's occurring when these

841

00:36:54,930 --> 00:36:52,359

particles collide they make collide off

842

00:36:56,370 --> 00:36:54,940

center and they start spinning and of

843

00:36:58,980 --> 00:36:56,380

course you know you've seen pictures of

844

00:37:00,509 --> 00:36:58,990

galaxies that are spinning and a lot of

845

00:37:02,819 --> 00:37:00,519

things are spinning what's happening is

846

00:37:04,980 --> 00:37:02,829

the linear momentum it's originally at

847

00:37:08,489 --> 00:37:04,990

the wave front of these initial

848

00:37:11,549 --> 00:37:08,499

particles that are being created is

849

00:37:13,559 --> 00:37:11,559

being converted to angular momentum what

850

00:37:15,870 --> 00:37:13,569

that means is the linear momentum is

851  
00:37:17,880 --> 00:37:15,880  
decreasing as the angular momentum goes

852  
00:37:21,029 --> 00:37:17,890  
up therefore the velocity in a linear

853  
00:37:23,249 --> 00:37:21,039  
direction is decreasing so the closer in

854  
00:37:25,079 --> 00:37:23,259  
to us that we look at things the slower

855  
00:37:27,479 --> 00:37:25,089  
they're moving and wouldn't you know

856  
00:37:31,440 --> 00:37:27,489  
that's exactly what the data says mm-hmm

857  
00:37:33,440 --> 00:37:31,450  
a good analogy that Bobby gives in that

858  
00:37:38,519 --> 00:37:33,450  
respect first of all as far as the

859  
00:37:41,640 --> 00:37:38,529  
denigration way is if you if you have a

860  
00:37:42,660 --> 00:37:41,650  
room full of methane and air and of

861  
00:37:43,950 --> 00:37:42,670  
course you want you don't be in that

862  
00:37:45,630 --> 00:37:43,960  
room you're standing outside and you're

863  
00:37:48,079 --> 00:37:45,640

looking through this thick glass window

864

00:37:50,579 --> 00:37:48,089

with a camera a high-speed camera and

865

00:37:52,349 --> 00:37:50,589

you set up a spark in the middle of the

866

00:37:54,059 --> 00:37:52,359

room you can imagine what that

867

00:37:56,970 --> 00:37:54,069

high-speed film camera will show you

868

00:37:58,109 --> 00:37:56,980

it'll be like an explosion and expanding

869

00:38:00,450 --> 00:37:58,119

out where it is this bubble that's

870

00:38:03,569 --> 00:38:00,460

growing and it's very bright because its

871

00:38:05,729 --> 00:38:03,579

rating energy that's that's continuing

872

00:38:08,400 --> 00:38:05,739

the explosion process and what's really

873

00:38:11,460 --> 00:38:08,410

happening is the the molecules that were

874

00:38:14,009 --> 00:38:11,470

methane and oxygen and nitrogen are

875

00:38:16,440 --> 00:38:14,019

being converted into different form like

876

00:38:17,530 --> 00:38:16,450

carbon sort whatever behind that

877

00:38:20,230 --> 00:38:17,540

deflagration way

878

00:38:22,570 --> 00:38:20,240

and we being left behind there's a lot

879

00:38:25,090 --> 00:38:22,580

of turbulence in the wake of this so

880

00:38:26,980 --> 00:38:25,100

that's kind of how the universe grew but

881

00:38:29,620 --> 00:38:26,990

keep in mind that the total mass of the

882

00:38:31,330 --> 00:38:29,630

room doesn't change it's just converted

883

00:38:33,490 --> 00:38:31,340

from one form to another and the same

884

00:38:34,990 --> 00:38:33,500

thing is with the universe the total

885

00:38:38,080 --> 00:38:35,000

mass of the universe was already

886

00:38:40,960 --> 00:38:38,090

determined by this matrix that extends

887

00:38:42,970 --> 00:38:40,970

out to infinity so all that happens

888

00:38:45,100 --> 00:38:42,980

during this deflagration wave is a

889

00:38:47,680 --> 00:38:45,110

conversion from one form of matter into

890

00:38:49,480 --> 00:38:47,690

another the one other analogy that he

891

00:38:52,120 --> 00:38:49,490

gives because it's so good that I have

892

00:38:55,630 --> 00:38:52,130

to give it imagine you're standing on a

893

00:38:57,310 --> 00:38:55,640

corner okay and a potato truck drives by

894

00:38:59,440 --> 00:38:57,320

now when was the last time you had a

895

00:39:02,320 --> 00:38:59,450

potato truck drive by anyway he picked

896

00:39:03,670 --> 00:39:02,330

the potato truck and it drives by and

897

00:39:05,830 --> 00:39:03,680

you know the potatoes are falling off

898

00:39:08,170 --> 00:39:05,840

the back of the truck it's beating on

899

00:39:10,540 --> 00:39:08,180

down the road 30 miles an hour and it's

900

00:39:13,180 --> 00:39:10,550

dropping potatoes as it go so you helped

901  
00:39:14,890 --> 00:39:13,190  
to happen to have a radar gun in your

902  
00:39:17,500 --> 00:39:14,900  
pocket you know you always carry one of

903  
00:39:19,840 --> 00:39:17,510  
those and you whip it out and you take

904  
00:39:22,330 --> 00:39:19,850  
some data you look at the potatoes just

905  
00:39:24,360 --> 00:39:22,340  
up the road a little ways and record the

906  
00:39:26,470 --> 00:39:24,370  
speed versus distance and then you keep

907  
00:39:27,940 --> 00:39:26,480  
recording data and finally get to the

908  
00:39:29,620 --> 00:39:27,950  
ones that have just fallen off the truck

909  
00:39:31,180 --> 00:39:29,630  
and you write that down you know 30

910  
00:39:35,050 --> 00:39:31,190  
miles an hour and there's six blocks

911  
00:39:38,590 --> 00:39:35,060  
away and then you plot this data okay

912  
00:39:41,230 --> 00:39:38,600  
and then you can the data shows that the

913  
00:39:43,120 --> 00:39:41,240

further out the potatoes are the faster

914

00:39:44,770 --> 00:39:43,130

they're going now you don't say these

915

00:39:46,180 --> 00:39:44,780

are potatoes you just plot the data you

916

00:39:48,070 --> 00:39:46,190

hand it to someone you say what do you

917

00:39:50,200 --> 00:39:48,080

think of that and they're going to say

918

00:39:52,810 --> 00:39:50,210

wow whatever it's happening it looks

919

00:39:55,540 --> 00:39:52,820

like it's accelerating well you and I

920

00:39:58,090 --> 00:39:55,550

know it's not it's decelerating as a

921

00:40:00,970 --> 00:39:58,100

linear momentum is being transferred

922

00:40:03,850 --> 00:40:00,980

into angular momentum as potatoes start

923

00:40:06,520 --> 00:40:03,860

to cut humble so that's a good analogy

924

00:40:09,720 --> 00:40:06,530

yes very good well we're just about out

925

00:40:12,760 --> 00:40:09,730

of time a couple of quick questions

926  
00:40:15,550 --> 00:40:12,770  
first of all where can someone find your

927  
00:40:18,190 --> 00:40:15,560  
book they can find all of my books on

928  
00:40:20,440 --> 00:40:18,200  
Amazon or Barnes and Noble or they can

929  
00:40:23,710 --> 00:40:20,450  
go to a bookstore and order they're all

930  
00:40:27,600 --> 00:40:23,720  
available as paper books or ebooks or

931  
00:40:30,579 --> 00:40:27,610  
they can go to my website which is wwan

932  
00:40:34,630 --> 00:40:30,589  
log that's one word alien log

933  
00:40:36,670 --> 00:40:34,640  
dot-com and they can read about my books

934  
00:40:39,309 --> 00:40:36,680  
a little bit and also there's a button

935  
00:40:40,809 --> 00:40:39,319  
they can push to buy not where they can

936  
00:40:42,819 --> 00:40:40,819  
buy the books and takes them it links

937  
00:40:44,979 --> 00:40:42,829  
them right to Amazon if they click the

938  
00:40:46,450 --> 00:40:44,989

Amazon button right through the place

939

00:40:49,630 --> 00:40:46,460

where the book is or they can go to

940

00:40:51,039 --> 00:40:49,640

Barnes & Noble or they can download an

941

00:40:54,339 --> 00:40:51,049

order form if they want an autographed

942

00:40:56,140 --> 00:40:54,349

copy and mail that to me and I will sign

943

00:40:58,239 --> 00:40:56,150

the book and send it off to him great

944

00:41:01,359 --> 00:40:58,249

and do you have any future projects

945

00:41:04,989 --> 00:41:01,369

lined up yes i'm working on alien log 3

946

00:41:07,930 --> 00:41:04,999

and the title is alien log 3 the Dulce

947

00:41:11,170 --> 00:41:07,940

affair and for people who are in the

948

00:41:13,660 --> 00:41:11,180

know as far as you follow gee that

949

00:41:16,870 --> 00:41:13,670

conjures up some bad stuff the Dulce

950

00:41:19,719 --> 00:41:16,880

affair is based on stories about the

951

00:41:22,719 --> 00:41:19,729

Dulce base in Dulce New Mexico and

952

00:41:27,670 --> 00:41:22,729

supposedly an underground base where our

953

00:41:30,279 --> 00:41:27,680

military is working with ETS bad ETS to

954

00:41:33,400 --> 00:41:30,289

do bad things and my characters get

955

00:41:35,890 --> 00:41:33,410

involved in that I saw a show on UFO

956

00:41:39,099 --> 00:41:35,900

hunters about that and and when I spoke

957

00:41:41,529 --> 00:41:39,109

to bill birnes he told me that that was

958

00:41:45,579 --> 00:41:41,539

one of the freakiest situations that he

959

00:41:48,069 --> 00:41:45,589

had ever got involved in yes a lot of my

960

00:41:50,680 --> 00:41:48,079

research and a lot of my data if you

961

00:41:53,440 --> 00:41:50,690

will comes from a book called UFO

962

00:41:55,420 --> 00:41:53,450

highways by anthony sanchez and the

963

00:41:59,200 --> 00:41:55,430

first path of his book is an interview

964

00:42:01,299 --> 00:41:59,210

with Colonel x who was there but of

965

00:42:04,539 --> 00:42:01,309

course is remaining anonymous because

966

00:42:06,940 --> 00:42:04,549

he's got first-hand knowledge and if he

967

00:42:09,009 --> 00:42:06,950

starts talking about it and couldn't and

968

00:42:12,009 --> 00:42:09,019

they know who he is he will somehow

969

00:42:13,749 --> 00:42:12,019

manage to die that's where I'm getting a

970

00:42:16,870 --> 00:42:13,759

lot of my information and you know I'm

971

00:42:18,190 --> 00:42:16,880

writing science fiction so if you know

972

00:42:20,559 --> 00:42:18,200

I'm not trying to take liberties because

973

00:42:24,579 --> 00:42:20,569

I pride myself in being very accurate in

974

00:42:26,349 --> 00:42:24,589

what I say to the extent that the

975

00:42:29,589 --> 00:42:26,359

information that my characters give out

976

00:42:31,209 --> 00:42:29,599

is is I give references in the back of

977

00:42:33,670 --> 00:42:31,219

these science fiction books which is

978

00:42:35,769 --> 00:42:33,680

unusual though the bike by chapter you

979

00:42:38,559 --> 00:42:35,779

can actually research what my characters

980

00:42:41,019 --> 00:42:38,569

said before we go just just one more

981

00:42:43,450 --> 00:42:41,029

question comes to mind here and that has

982

00:42:44,200 --> 00:42:43,460

to do with skeptics that constantly say

983

00:42:46,900 --> 00:42:44,210

how could they

984

00:42:49,690 --> 00:42:46,910

possibly be visiting us here when the

985

00:42:52,300 --> 00:42:49,700

nearest star is four and a half

986

00:42:55,990 --> 00:42:52,310

light-years away what's your what's your

987

00:42:58,329 --> 00:42:56,000

theory on that well the key to that is

988

00:43:01,290 --> 00:42:58,339

this the ability to accelerated very

989

00:43:04,660 --> 00:43:01,300

high rates and UFOs have been clocked

990

00:43:07,839 --> 00:43:04,670

with radar and other means of as

991

00:43:09,880 --> 00:43:07,849

accelerating at a 100 GS that doesn't

992

00:43:11,170 --> 00:43:09,890

mean they're limited to that rate but if

993

00:43:14,500 --> 00:43:11,180

we could build a craft that could

994

00:43:19,140 --> 00:43:14,510

accelerate at 100 GS you get to very

995

00:43:25,120 --> 00:43:21,550

relativity kicks in as you approach the

996

00:43:28,000 --> 00:43:25,130

speed of light Betty and Barney Hill had

997

00:43:30,880 --> 00:43:28,010

abductors that supposedly was determined

998

00:43:33,550 --> 00:43:30,890

later came from zeta 1 and 2 Reticuli

999

00:43:37,510 --> 00:43:33,560

and that's a system that's about 40

1000

00:43:39,730 --> 00:43:37,520

light-years away well if you had this

1001  
00:43:42,700 --> 00:43:39,740  
craft I described that get accelerated a

1002  
00:43:45,220 --> 00:43:42,710  
hundred GS you would be there in less

1003  
00:43:47,560 --> 00:43:45,230  
than one month according to the calendar

1004  
00:43:49,839 --> 00:43:47,570  
on your vehicle now that's in the

1005  
00:43:53,109 --> 00:43:49,849  
instant acceleration of constant

1006  
00:43:56,050 --> 00:43:53,119  
acceleration 100 G's your calendar would

1007  
00:43:57,460 --> 00:43:56,060  
say you got there in one month and of

1008  
00:44:00,099 --> 00:43:57,470  
course the unfortunate thing is if you

1009  
00:44:03,820 --> 00:44:00,109  
turn around and come back to you two

1010  
00:44:07,630 --> 00:44:03,830  
months later the world would have sped

1011  
00:44:10,180 --> 00:44:07,640  
ahead about 80 years you know so that's

1012  
00:44:12,490 --> 00:44:10,190  
one of the problems but that's one oh

1013  
00:44:14,859 --> 00:44:12,500

wait that's how you do time travel yeah

1014

00:44:16,359 --> 00:44:14,869

yeah well that's interesting well thanks

1015

00:44:18,940 --> 00:44:16,369

so much this has been great talking to

1016

00:44:21,250 --> 00:44:18,950

you today and thanks for joining us and
