

1  
00:00:03,110 --> 00:00:02,389  
and it hits me oh my gosh this is that

2  
00:00:04,249 --> 00:00:03,120  
triangle

3  
00:00:05,360 --> 00:00:04,259  
you know there's explanation for

4  
00:00:07,309 --> 00:00:05,370  
everything that occurred in the

5  
00:00:09,680 --> 00:00:07,319  
Rendlesham forest incident that doesn't

6  
00:00:13,190 --> 00:00:09,690  
involve aliens at all it was completely

7  
00:00:16,039 --> 00:00:13,200  
silent it comes right over our head it's

8  
00:00:17,630 --> 00:00:16,049  
so a classic flying-saucer really

9  
00:00:19,400 --> 00:00:17,640  
standing in the clearing he turned over

10  
00:00:20,750 --> 00:00:19,410  
to my father and held his hand and he

11  
00:00:24,320 --> 00:00:20,760  
looked in his eyes and said we're not

12  
00:00:26,060 --> 00:00:24,330  
alone good evening and I say it that way

13  
00:00:28,910 --> 00:00:26,070

because we're so close to Halloween this

14

00:00:30,500 --> 00:00:28,920

is Martyn Willis the host of podcast UFO

15

00:00:34,010 --> 00:00:30,510

and welcome to the show

16

00:00:36,049 --> 00:00:34,020

and we're coming at you live like every

17

00:00:38,690 --> 00:00:36,059

Wednesday at 9:00 p.m. Eastern Standard

18

00:00:40,430 --> 00:00:38,700

Time on the dark matter radio network we

19

00:00:40,819 --> 00:00:40,440

have another fascinating show for you

20

00:00:43,819 --> 00:00:40,829

tonight

21

00:00:46,459 --> 00:00:43,829

Alejandro Rojas of open minds is coming

22

00:00:49,850 --> 00:00:46,469

right up with the UFO news and after

23

00:00:51,729 --> 00:00:49,860

that our guest is David Paris and he'll

24

00:00:55,160 --> 00:00:51,739

be talking about space warp technology

25

00:00:57,189 --> 00:00:55,170

amazing stuff and that will be a show

26

00:01:00,400 --> 00:00:57,199

that I think you'll find fascinating and

27

00:01:04,729 --> 00:01:00,410

how are you doing out there alejandro I

28

00:01:07,730 --> 00:01:04,739

am doing great hello sir hello and I saw

29

00:01:09,770 --> 00:01:07,740

when I was booking David Paris I was

30

00:01:13,340 --> 00:01:09,780

looking online to see who else had him

31

00:01:14,600 --> 00:01:13,350

on and it looks like you had him on yeah

32

00:01:16,700 --> 00:01:14,610

I've had him a couple of times I think

33

00:01:20,510 --> 00:01:16,710

I've had him the most and I've been

34

00:01:22,550 --> 00:01:20,520

following this his Space Warp stuff very

35

00:01:25,219 --> 00:01:22,560

closely in fact I'm I told him I'm gonna

36

00:01:29,210 --> 00:01:25,229

write a blog for the Huffington Post on

37

00:01:31,880 --> 00:01:29,220

his IndieGoGo project because I think

38

00:01:35,030 --> 00:01:31,890

it's fascinating it is and you know this

39

00:01:36,740 --> 00:01:35,040

may really show how it's possible for us

40

00:01:40,370 --> 00:01:36,750

to get to the stars and how the stars

41

00:01:42,289 --> 00:01:40,380

are possibly getting to us so I'm in Hua

42

00:01:44,120 --> 00:01:42,299

- would that be I mean how cool would it

43

00:01:46,280 --> 00:01:44,130

be that you know like you and I got to

44

00:01:48,620 --> 00:01:46,290

talk to this guy and these gentlemen

45

00:01:50,840 --> 00:01:48,630

with great credentials who you know

46

00:01:53,330 --> 00:01:50,850

discovered and built a space warp

47

00:01:55,639 --> 00:01:53,340

technology in their basement essentially

48

00:01:57,410 --> 00:01:55,649

I mean that'd be amazing it really is

49

00:01:59,899 --> 00:01:57,420

how dell computers started you know I

50

00:02:01,999 --> 00:01:59,909

mean how a lot of yeah you know just way

51  
00:02:03,590 --> 00:02:02,009  
off topic here but you know the Apple

52  
00:02:06,260 --> 00:02:03,600  
number one the very first motherboard

53  
00:02:07,910 --> 00:02:06,270  
ever made by Apple just sold for just

54  
00:02:10,190 --> 00:02:07,920  
under a million dollars at auction the

55  
00:02:13,910 --> 00:02:10,200  
other days and that's something yeah all

56  
00:02:16,339 --> 00:02:13,920  
on wood blocks yeah exactly so

57  
00:02:17,750 --> 00:02:16,349  
speaking of credentials let's talk about

58  
00:02:20,150 --> 00:02:17,760  
the news I know we're gonna start right

59  
00:02:21,800 --> 00:02:20,160  
off talking about Boyd Bushman that's

60  
00:02:24,790 --> 00:02:21,810  
right another gentleman with some

61  
00:02:28,339 --> 00:02:24,800  
impeccable credentials he really is a

62  
00:02:31,580 --> 00:02:28,349  
Lockheed Martin engineer a senior

63  
00:02:33,320 --> 00:02:31,590

scientist there before he retired he

64

00:02:35,690 --> 00:02:33,330

recently passed away

65

00:02:38,630 --> 00:02:35,700

August 7th however before passing away

66

00:02:40,360 --> 00:02:38,640

he did a video that has gone viral and

67

00:02:43,520 --> 00:02:40,370

is making waves in mainstream media

68

00:02:48,650 --> 00:02:43,530

where he claims that there are aliens

69

00:02:50,930 --> 00:02:48,660

and UFOs at area 51 now our story kind

70

00:02:54,160 --> 00:02:50,940

of chronicles his discussion in this

71

00:02:57,229 --> 00:02:54,170

arena over the years because he actually

72

00:02:59,300 --> 00:02:57,239

as far as I know the first appearance he

73

00:03:01,880 --> 00:02:59,310

did talking about anti-gravity was on a

74

00:03:05,210 --> 00:03:01,890

1999 documentary that's where I first

75

00:03:07,100 --> 00:03:05,220

saw him that was done by Nick cook who

76

00:03:11,600 --> 00:03:07,110

wrote for James Defence the famous

77

00:03:13,580 --> 00:03:11,610

military magazine and he was looking

78

00:03:15,320 --> 00:03:13,590

into black projects he said no one you

79

00:03:17,750 --> 00:03:15,330

know he thought maybe there was

80

00:03:19,670 --> 00:03:17,760

anti-gravity projects out there but no

81

00:03:21,289 --> 00:03:19,680

company said they had any but this one

82

00:03:23,780 --> 00:03:21,299

engineer from Lockheed Martin would talk

83

00:03:25,280 --> 00:03:23,790

to him now Boyd Bushmen this entire time

84

00:03:27,229 --> 00:03:25,290

and even back here his statements are

85

00:03:29,270 --> 00:03:27,239

really vague and kind of you know hard

86

00:03:31,099 --> 00:03:29,280

to understand so Nick cook was saying

87

00:03:32,690 --> 00:03:31,109

well maybe he's trying to tell me

88

00:03:34,520 --> 00:03:32,700

something but he can't

89

00:03:37,340 --> 00:03:34,530

but essentially Boyd Bushman said he's

90

00:03:40,789 --> 00:03:37,350

interested in antigravity years later in

91

00:03:42,710 --> 00:03:40,799

2007 he did another documentary again he

92

00:03:47,270 --> 00:03:42,720

talked about anti-gravity and how UFOs

93

00:03:49,970 --> 00:03:47,280

are most likely advanced and aircraft

94

00:03:51,710 --> 00:03:49,980

mistaken for something else but then at

95

00:03:54,229 --> 00:03:51,720

the end you know this is what David

96

00:03:56,270 --> 00:03:54,239

sarita kind of coaxed him and he says he

97

00:03:58,940 --> 00:03:56,280

knew a jet fighter pilot who shot down

98

00:04:01,039 --> 00:03:58,950

the Roswell aircraft and walked inside

99

00:04:03,890 --> 00:04:01,049

and saw the alien so this is shocking

100

00:04:05,809 --> 00:04:03,900

about a year later you know I was

101  
00:04:08,569 --> 00:04:05,819  
talking with a friend who in this field

102  
00:04:10,640 --> 00:04:08,579  
who said they knew Boyd Bushman and they

103  
00:04:12,410 --> 00:04:10,650  
forwarded me an email that they had just

104  
00:04:14,629 --> 00:04:12,420  
received from him that was this

105  
00:04:18,409 --> 00:04:14,639  
polygraph test with these amazing claim

106  
00:04:21,020 --> 00:04:18,419  
to Terry aliens at area 51 that he

107  
00:04:23,089 --> 00:04:21,030  
worked at s4 that he knew Bob Lazar and

108  
00:04:25,370 --> 00:04:23,099  
all this stuff and I couldn't verify

109  
00:04:27,170 --> 00:04:25,380  
whether or not it was real boy Bushman

110  
00:04:29,540 --> 00:04:27,180  
sent me a cryptic email that just

111  
00:04:31,040 --> 00:04:29,550  
said if you want to do an interview tell

112  
00:04:34,820 --> 00:04:31,050  
me when and how much you want to pay me

113  
00:04:36,950 --> 00:04:34,830

and that's all I heard from him so I did

114

00:04:38,960 --> 00:04:36,960

post that just this week given this new

115

00:04:40,969 --> 00:04:38,970

information because in this new video

116

00:04:43,610 --> 00:04:40,979

he's showing these pictures of aliens

117

00:04:45,830 --> 00:04:43,620

he's talking about you know an alien

118

00:04:48,469 --> 00:04:45,840

ghost picture he shows where this guy he

119

00:04:50,090 --> 00:04:48,479

knew supposedly was with this alien when

120

00:04:52,249 --> 00:04:50,100

it died and when he took a picture of

121

00:04:54,860 --> 00:04:52,259

himself the aliens showed up in in the

122

00:04:57,980 --> 00:04:54,870

picture some real wild stuff about good

123

00:05:00,469 --> 00:04:57,990

aliens and bad aliens and recently the

124

00:05:03,620 --> 00:05:00,479

aliens defending themselves and killing

125

00:05:06,050 --> 00:05:03,630

19 people and really wild it's kind of

126

00:05:08,870 --> 00:05:06,060

fake you know he's not really clear on

127

00:05:11,390 --> 00:05:08,880

all of these claims but he says he

128

00:05:14,210 --> 00:05:11,400

wasn't at area 51 in this video he says

129

00:05:17,870 --> 00:05:14,220

he received it from a team that worked

130

00:05:20,450 --> 00:05:17,880

at area 51 but some problems obviously

131

00:05:23,570 --> 00:05:20,460

there's a lot have arisen in his

132

00:05:25,820 --> 00:05:23,580

statement one being that actually did

133

00:05:27,620 --> 00:05:25,830

some research those pictures he posted

134

00:05:30,920 --> 00:05:27,630

of this alleged alien he got from his

135

00:05:33,409 --> 00:05:30,930

team were posted by a guy named John

136

00:05:35,870 --> 00:05:33,419

Hutchinson a Canadian anti-gravity

137

00:05:38,089 --> 00:05:35,880

researcher who boy Bushman had said he

138

00:05:39,740 --> 00:05:38,099

was interested prior but in 2008

139

00:05:42,500 --> 00:05:39,750

Hutchinson said he received these

140

00:05:45,020 --> 00:05:42,510

pictures and he from an unknown source

141

00:05:46,640 --> 00:05:45,030

he said they were in the CIA he posted

142

00:05:49,189 --> 00:05:46,650

them and immediately people said hey

143

00:05:51,230 --> 00:05:49,199

that's an alien from Kmart I've got that

144

00:05:54,140 --> 00:05:51,240

alien in my office and they started

145

00:05:56,480 --> 00:05:54,150

posting pictures so now boy Bushman has

146

00:05:59,510 --> 00:05:56,490

said that these alien pictures were

147

00:06:01,159 --> 00:05:59,520

among his pictures he got from area 51

148

00:06:04,100 --> 00:06:01,169

and now a lot of people are saying hey

149

00:06:05,600 --> 00:06:04,110

that's my Kmart alien so I think it's

150

00:06:08,450 --> 00:06:05,610

really there are a lot of people saying

151

00:06:10,939 --> 00:06:08,460

no the alien looks a little different

152

00:06:12,680 --> 00:06:10,949

it's close but not the same some people

153

00:06:15,589 --> 00:06:12,690

are saying well the government probably

154

00:06:18,409 --> 00:06:15,599

created that doll and and sold it at

155

00:06:20,210 --> 00:06:18,419

Kmart in order to if the pictures ever

156

00:06:23,180 --> 00:06:20,220

came out then they could debunk them

157

00:06:25,129 --> 00:06:23,190

well that's a stretch yeah it's a really

158

00:06:27,529 --> 00:06:25,139

big stretch so I think that

159

00:06:29,719 --> 00:06:27,539

unfortunately mr. Bushmen uh and

160

00:06:30,980 --> 00:06:29,729

probably John Hutchinson who I think is

161

00:06:33,860 --> 00:06:30,990

a great guy he's a very interesting

162

00:06:36,980 --> 00:06:33,870

researcher I think they were both kind

163

00:06:39,170 --> 00:06:36,990

of fooled and but you know that shows

164

00:06:40,940 --> 00:06:39,180

that mister bushman's pictures didn't

165

00:06:43,390 --> 00:06:40,950

come from area 51 they came

166

00:06:46,670 --> 00:06:43,400

a friend of his so you got a question

167

00:06:49,070 --> 00:06:46,680

where all this information came from and

168

00:06:51,170 --> 00:06:49,080

the rest of his claims and why the heck

169

00:06:53,180 --> 00:06:51,180

is he claiming all this stuff yeah you

170

00:06:54,770 --> 00:06:53,190

know there's a couple things that don't

171

00:06:56,510 --> 00:06:54,780

really sit right with me

172

00:06:59,450 --> 00:06:56,520

of course the pictures right off the bat

173

00:07:01,580 --> 00:06:59,460

but secondly when you were conversing

174

00:07:03,980 --> 00:07:01,590

back and forth with him and he wanted

175

00:07:05,690 --> 00:07:03,990

money you know to be on your show that

176

00:07:08,960 --> 00:07:05,700

kind of I don't know that doesn't sit

177

00:07:10,490 --> 00:07:08,970

right with me and he's a brilliant man

178

00:07:12,980 --> 00:07:10,500

you can tell that right off the bat and

179

00:07:16,340 --> 00:07:12,990

I did a little research in the patents

180

00:07:19,520 --> 00:07:16,350

that they claim are his actually do go

181

00:07:21,590 --> 00:07:19,530

to Lockheed Martin and were credited to

182

00:07:24,380 --> 00:07:21,600

him so he's definitely you know he's

183

00:07:25,520 --> 00:07:24,390

he's legit but you know he might be one

184

00:07:28,010 --> 00:07:25,530

of these people that just went off the

185

00:07:29,690 --> 00:07:28,020

far end a little bit you know as they

186

00:07:32,180 --> 00:07:29,700

get older and you know who knows the

187

00:07:33,920 --> 00:07:32,190

circumstances yeah it happens we

188

00:07:35,300 --> 00:07:33,930

interviewed a guy named dick French and

189

00:07:37,280 --> 00:07:35,310

Lee Spiegel wrote about him and that

190

00:07:39,650 --> 00:07:37,290

made a big story but I feel that's the

191

00:07:41,240 --> 00:07:39,660

same thing these guys stories are

192

00:07:44,440 --> 00:07:41,250

inconsistent even though he was a real

193

00:07:46,580 --> 00:07:44,450

Air Force pilot in the past so who knows

194

00:07:49,700 --> 00:07:46,590

related to this he said he knew Bob

195

00:07:52,100 --> 00:07:49,710

Lazar and it just so happens I have been

196

00:07:54,170 --> 00:07:52,110

in contact with Bob Lazar because this

197

00:07:56,300 --> 00:07:54,180

is our other big news for the week Bob

198

00:07:58,970 --> 00:07:56,310

Lazar is going to be speaking at the UFO

199

00:08:01,670 --> 00:07:58,980

Congress so this is going to be

200

00:08:04,160 --> 00:08:01,680

essentially his first appearance at a at

201  
00:08:06,860 --> 00:08:04,170  
a UFO event like this well I was going

202  
00:08:09,470 --> 00:08:06,870  
to say he he's been away from the whole

203  
00:08:11,300 --> 00:08:09,480  
thing for such a long time he's been

204  
00:08:13,130 --> 00:08:11,310  
away since the beginning I mean he came

205  
00:08:15,200 --> 00:08:13,140  
out the only person he talks to his

206  
00:08:17,120 --> 00:08:15,210  
George Knapp was in a while but

207  
00:08:18,800 --> 00:08:17,130  
otherwise he shied away from this stuff

208  
00:08:20,930 --> 00:08:18,810  
and just like he's done in recent

209  
00:08:22,310 --> 00:08:20,940  
interviews which origen happy says you

210  
00:08:23,750 --> 00:08:22,320  
know I don't like being part of the

211  
00:08:27,620 --> 00:08:23,760  
whole UFO thing I don't care if people

212  
00:08:29,210 --> 00:08:27,630  
believe me or not and well what happened

213  
00:08:30,800 --> 00:08:29,220

was in that he came out for the

214

00:08:33,950 --> 00:08:30,810

anniversary did another interview with

215

00:08:36,950 --> 00:08:33,960

George Knapp and he kind of said these

216

00:08:38,780 --> 00:08:36,960

things and so you know what we

217

00:08:40,280 --> 00:08:38,790

approached George with and George agreed

218

00:08:43,400 --> 00:08:40,290

is kind of like well let's get those

219

00:08:45,560 --> 00:08:43,410

hard questions people have out there let

220

00:08:48,140 --> 00:08:45,570

you answer those and be done with it so

221

00:08:49,820 --> 00:08:48,150

you can so it's going to be George Knapp

222

00:08:52,860 --> 00:08:49,830

is going to talk about his case I saw

223

00:08:56,550 --> 00:08:52,870

this talk at MUFON it's very compelling

224

00:08:59,790 --> 00:08:56,560

and then he's going to bring out Bob

225

00:09:01,650 --> 00:08:59,800

Lazar and do an hour Q & A and so this

226

00:09:03,240 --> 00:09:01,660

is going to be fascinating but anyways

227

00:09:05,519 --> 00:09:03,250

I'm definitely going to be out there and

228

00:09:07,380 --> 00:09:05,529

I hope I actually get to interview Bob

229

00:09:09,060 --> 00:09:07,390

but you know I mean I I'm on the fence

230

00:09:09,540 --> 00:09:09,070

about him do I got to be to be honest

231

00:09:12,360 --> 00:09:09,550

with you

232

00:09:15,900 --> 00:09:12,370

whether he's legit or not you know I

233

00:09:17,700 --> 00:09:15,910

mean he JM he did he did not speak the

234

00:09:19,320 --> 00:09:17,710

truth when it came to things like MIT

235

00:09:21,240 --> 00:09:19,330

and stuff like that you know I mean it's

236

00:09:23,400 --> 00:09:21,250

pretty well-covered that he actually

237

00:09:25,800 --> 00:09:23,410

didn't go there and you know people say

238

00:09:27,420 --> 00:09:25,810

well maybe the government you know did

239

00:09:29,790 --> 00:09:27,430

something with his files and all that

240

00:09:31,890 --> 00:09:29,800

you know conspiracy type of stuff but I

241

00:09:35,700 --> 00:09:31,900

don't know Stanton Friedman look really

242

00:09:37,860 --> 00:09:35,710

deeply into his education and I I'm on

243

00:09:39,690 --> 00:09:37,870

the fence of with Bob about Bob Lazar

244

00:09:45,060 --> 00:09:39,700

but I still would love to interview him

245

00:09:48,090 --> 00:09:45,070

yeah I think I have similar feelings as

246

00:09:51,210 --> 00:09:48,100

you do but really George makes a lot of

247

00:09:52,920 --> 00:09:51,220

really great arguments and so it's going

248

00:09:54,990 --> 00:09:52,930

to be really interesting to see Lazar

249

00:09:58,110 --> 00:09:55,000

address some of those issues because

250

00:10:00,870 --> 00:09:58,120

George does understand these problems

251  
00:10:03,300 --> 00:10:00,880  
very well so he sees where these issues

252  
00:10:05,699 --> 00:10:03,310  
are and you know he's a very hard-nosed

253  
00:10:09,390 --> 00:10:05,709  
investigative journalist so he'll talk

254  
00:10:12,300 --> 00:10:09,400  
about that but for what it's worth I did

255  
00:10:15,000 --> 00:10:12,310  
ask Lazar you know if he really did know

256  
00:10:16,710 --> 00:10:15,010  
Bob Boyd Bushman and he said is it

257  
00:10:18,449 --> 00:10:16,720  
direct quote was no I've never heard of

258  
00:10:21,540 --> 00:10:18,459  
him there were very few people who

259  
00:10:23,370 --> 00:10:21,550  
worked at s4 just a little over 20 we

260  
00:10:25,620 --> 00:10:23,380  
all knew the names on the list he was

261  
00:10:29,070 --> 00:10:25,630  
not one of them mm-hmm

262  
00:10:30,990 --> 00:10:29,080  
well so weird stuff I don't know what to

263  
00:10:33,510 --> 00:10:31,000

make of it right so what's the last

264

00:10:35,280 --> 00:10:33,520

story for today yeah this one's really

265

00:10:37,710 --> 00:10:35,290

fun this is a pool that was done

266

00:10:41,040 --> 00:10:37,720

recently by Ripley's Believe It or Not

267

00:10:43,079 --> 00:10:41,050

in Louisville in London and this was a

268

00:10:45,510 --> 00:10:43,089

pool as to you know what people if

269

00:10:47,519 --> 00:10:45,520

people believed in aliens and or God and

270

00:10:51,900 --> 00:10:47,529

it was really interesting they pulled

271

00:10:55,530 --> 00:10:51,910

1500 adults and they 51% of these adults

272

00:10:58,829 --> 00:10:55,540

believed in aliens only 25% believed in

273

00:11:02,880 --> 00:10:58,839

God when it came to the kids 500 were

274

00:11:04,949 --> 00:11:02,890

pulled 64 percent believed in aliens 33

275

00:11:06,240 --> 00:11:04,959

percent believed in God so it's kind of

276

00:11:08,700 --> 00:11:06,250

higher than our interest

277

00:11:10,830 --> 00:11:08,710

that the kids I had to hire rate for God

278

00:11:12,510 --> 00:11:10,840

but still yeah this has been kind of a

279

00:11:17,550 --> 00:11:12,520

story that's been going out there in the

280

00:11:19,380 --> 00:11:17,560

UK that you know in the Brits believe in

281

00:11:21,000 --> 00:11:19,390

aliens more than they do in God so

282

00:11:23,820 --> 00:11:21,010

that's kind of interesting and I think

283

00:11:26,520 --> 00:11:23,830

it's just telling when it comes to how

284

00:11:29,190 --> 00:11:26,530

people feel about this sort of thing and

285

00:11:30,570 --> 00:11:29,200

I do a talk on on UFOs and religion and

286

00:11:32,640 --> 00:11:30,580

extraterrestrials and it's almost like

287

00:11:36,270 --> 00:11:32,650

you know we're adopting kind of this

288

00:11:41,820 --> 00:11:36,280

nouveau Tech and you know tech based

289

00:11:43,590 --> 00:11:41,830

religious belief mm-hmm well I think you

290

00:11:45,300 --> 00:11:43,600

know the more and more that there's

291

00:11:46,920 --> 00:11:45,310

awareness that there's most likely life

292

00:11:49,650 --> 00:11:46,930

out there the more and more people will

293

00:11:52,350 --> 00:11:49,660

believe you know that there's possibly

294

00:11:54,660 --> 00:11:52,360

aliens out there yeah it's a really

295

00:11:57,900 --> 00:11:54,670

interesting story I think and the god

296

00:11:59,490 --> 00:11:57,910

one I wouldn't touch that one now well

297

00:12:02,310 --> 00:11:59,500

it's a tough subject that always gets

298

00:12:04,500 --> 00:12:02,320

people on people are passionate on both

299

00:12:06,720 --> 00:12:04,510

sides of the fence on that one don't be

300

00:12:08,550 --> 00:12:06,730

a worse man no I I understand what

301

00:12:10,710 --> 00:12:08,560

you're saying I'd like to feel that I'm

302

00:12:13,170 --> 00:12:10,720

agnostic as it was what I like to say

303

00:12:15,540 --> 00:12:13,180

not straight atheist but I do got to say

304

00:12:17,040 --> 00:12:15,550

that you know when it comes to people

305

00:12:18,600 --> 00:12:17,050

who believe some really wild stuff

306

00:12:20,850 --> 00:12:18,610

whether it be UFO cases or

307

00:12:23,220 --> 00:12:20,860

extraterrestrial cases I don't put much

308

00:12:24,630 --> 00:12:23,230

stock into you know if you're a

309

00:12:27,350 --> 00:12:24,640

religious person you can't really

310

00:12:29,940 --> 00:12:27,360

persecute those people because your

311

00:12:32,640 --> 00:12:29,950

beliefs are based off of faith as well

312

00:12:34,950 --> 00:12:32,650

so to me it's all kind of faith-based

313

00:12:37,290 --> 00:12:34,960

stuff that that I don't prescribe or

314

00:12:39,450 --> 00:12:37,300

subscribe to but each one has their own

315

00:12:41,790 --> 00:12:39,460

right to believe whatever they want and

316

00:12:43,530 --> 00:12:41,800

I think it's interesting that Corrado

317

00:12:46,110 --> 00:12:43,540

Balducci who used to be the demonologist

318

00:12:47,820 --> 00:12:46,120

for the Vatican he said how can i

319

00:12:51,110 --> 00:12:47,830

discount their anecdotal information

320

00:12:54,810 --> 00:12:51,120

when my beliefs in my religion are also

321

00:12:56,730 --> 00:12:54,820

anecdotal good for him say that and I'm

322

00:12:59,160 --> 00:12:56,740

right there with you with the agnostic

323

00:13:01,620 --> 00:12:59,170

stuff there I came out of the agnostic

324

00:13:05,670 --> 00:13:01,630

closet yeah thank you thanks for joining

325

00:13:07,920 --> 00:13:05,680

us and I knew you you would one day

326

00:13:10,650 --> 00:13:07,930

alright Alejandro thanks a lot and we'll

327

00:13:12,329 --> 00:13:10,660

be talking to you next week all right so

328

00:13:14,490 --> 00:13:12,339

right after the short music break we'll

329

00:13:16,650 --> 00:13:14,500

be right back with the David Paris and

330

00:13:19,740 --> 00:13:16,660

you can jump in the chat room at podcast

331

00:13:54,260 --> 00:13:19,750

UFO calm and interact and ask

332

00:14:00,090 --> 00:13:58,290

well hello David Paris how are you I'm

333

00:14:03,269 --> 00:14:00,100

good how are you doing tonight great

334

00:14:05,190 --> 00:14:03,279

thanks so much for joining us and I I

335

00:14:08,700 --> 00:14:05,200

think I heard you on coast to coast or

336

00:14:11,519 --> 00:14:08,710

somewhere and I was rather taken and

337

00:14:14,730 --> 00:14:11,529

fascinated by what you're trying to do

338

00:14:16,980 --> 00:14:14,740

in this whole thing I actually had a

339

00:14:20,400 --> 00:14:16,990

conversation going with sunny dr. sunny

340

00:14:23,220 --> 00:14:20,410

white at Eagle works I think it was

341

00:14:25,290 --> 00:14:23,230

about warp bubbles and stuff like that

342

00:14:27,810 --> 00:14:25,300

this this stuff all just fascinates me

343

00:14:30,570 --> 00:14:27,820

so first of all can you introduce

344

00:14:32,090 --> 00:14:30,580

yourself your your background and what

345

00:14:36,269 --> 00:14:32,100

you're what you're up to

346

00:14:40,110 --> 00:14:36,279

okay my name is David Parris and I'm an

347

00:14:43,560 --> 00:14:40,120

adjunct professor at four local colleges

348

00:14:46,590 --> 00:14:43,570

here and I teach about ten different

349

00:14:52,769 --> 00:14:46,600

courses from astronomy physics geography

350

00:14:55,850 --> 00:14:52,779

geology meteorology I do a number of I'm

351

00:14:59,780 --> 00:14:55,860

kind of like this traveling science guy

352

00:15:03,810 --> 00:14:59,790

and I do about 70 semester hours a year

353

00:15:08,550 --> 00:15:03,820

so I'm very busy with distant education

354

00:15:11,850 --> 00:15:08,560

face to face and I've also have a

355

00:15:14,820 --> 00:15:11,860

company that we recently formed after

356

00:15:17,220 --> 00:15:14,830

about three years of well I guess it

357

00:15:19,620 --> 00:15:17,230

started really back nine years ago when

358

00:15:24,019 --> 00:15:19,630

I got involved with the research on the

359

00:15:27,600 --> 00:15:24,029

Bruce Gernon case and that had led up to

360

00:15:29,220 --> 00:15:27,610

a discovery of natural phenomena and

361

00:15:30,930 --> 00:15:29,230

then to take it into the lab and

362

00:15:34,949 --> 00:15:30,940

actually produce an artificial

363

00:15:40,079 --> 00:15:34,959

environment of space warp bubble and in

364

00:15:45,090 --> 00:15:40,089

the last year August of 2013 we formed a

365

00:15:49,230 --> 00:15:45,100

company of space warp dynamics and so we

366

00:15:52,460 --> 00:15:49,240

haven't sold anything yet but we're in I

367

00:15:55,829 --> 00:15:52,470

have any basic free time that I have

368

00:15:59,100 --> 00:15:55,839

I've been you know in the laboratory

369

00:16:02,750 --> 00:15:59,110

itself I have a master's degree in

370

00:16:06,040 --> 00:16:02,760

geography and I have an engineering

371

00:16:08,680 --> 00:16:06,050

associate in science and

372

00:16:11,320 --> 00:16:08,690

I've been in Air Force I've written

373

00:16:14,860 --> 00:16:11,330

numerical weather models I've had about

374

00:16:17,889 --> 00:16:14,870

40 years into the defense contracting

375

00:16:21,400 --> 00:16:17,899

business and also as a private defense

376

00:16:24,550 --> 00:16:21,410

contractor working with the Army and

377

00:16:30,090 --> 00:16:24,560

portable forecaster workstations

378

00:16:35,079 --> 00:16:30,100

I guess it's my involvement in aviation

379

00:16:37,660 --> 00:16:35,089

ham radio electronics software numerical

380

00:16:41,110 --> 00:16:37,670

weather modeling all that came very

381

00:16:45,160 --> 00:16:41,120

nicely packaged in and under the the

382

00:16:48,699 --> 00:16:45,170

geography header which allows you to be

383

00:16:51,760 --> 00:16:48,709

cross disciplines and operate in any of

384

00:16:55,120 --> 00:16:51,770

the modes and I prefer in that kind of

385

00:16:57,250 --> 00:16:55,130

realm kind of work that I do you have to

386

00:16:58,780 --> 00:16:57,260

be knowledgeable about a lot of

387

00:17:00,940 --> 00:16:58,790

different fields and be able to

388

00:17:04,090 --> 00:17:00,950

integrate those things together I never

389

00:17:07,360 --> 00:17:04,100

wanted to ever be pigeonholed into a

390

00:17:13,360 --> 00:17:07,370

particular segment now that doesn't mean

391

00:17:15,520 --> 00:17:13,370

that I reject people who are you know

392

00:17:17,230 --> 00:17:15,530

concentrated in their fields that that's

393

00:17:19,900 --> 00:17:17,240

not where I'm coming from it I just feel

394

00:17:22,360 --> 00:17:19,910

is that you you really need when you're

395

00:17:24,250 --> 00:17:22,370

working on a particular subject matter

396

00:17:28,630 --> 00:17:24,260

like this is that you got to have a

397

00:17:30,669 --> 00:17:28,640

background that covers a wide vista of

398

00:17:35,080 --> 00:17:30,679

things you just you would just be

399

00:17:37,930 --> 00:17:35,090

surprised on where ideas and experiences

400

00:17:39,370 --> 00:17:37,940

come from to solve this big detective

401  
00:17:41,740 --> 00:17:39,380  
story and that's really what it's come

402  
00:17:46,000 --> 00:17:41,750  
down to I mean this is like a really

403  
00:17:48,430 --> 00:17:46,010  
intriguing detective story started back

404  
00:17:53,080 --> 00:17:48,440  
when I was 16 when I had my sighting of

405  
00:17:55,810 --> 00:17:53,090  
a UFO upstate New York in 1969 actually

406  
00:17:57,910 --> 00:17:55,820  
near the end of August when we formed

407  
00:17:59,620 --> 00:17:57,920  
formed a company all the ironies of it

408  
00:18:02,620 --> 00:17:59,630  
all yeah so I want to talk a little bit

409  
00:18:04,650 --> 00:18:02,630  
about that ND art bell probably have you

410  
00:18:07,330 --> 00:18:04,660  
ever talked to him on your ham radio oh

411  
00:18:11,669 --> 00:18:07,340  
well actually I'm not an extra class I'm

412  
00:18:14,169 --> 00:18:11,679  
a general class oh so he he actually has

413  
00:18:17,320 --> 00:18:14,179

reserved frequencies for extra class

414

00:18:18,760 --> 00:18:17,330

that I'm not allowed to to get on to

415

00:18:20,320 --> 00:18:18,770

okay you're speaking a foreign language

416

00:18:22,930 --> 00:18:20,330

to me but that's okay

417

00:18:26,290 --> 00:18:22,940

can you tell us what the Bruce I believe

418

00:18:30,430 --> 00:18:26,300

you said Guren hey Jordan yeah yes I'll

419

00:18:34,600 --> 00:18:30,440

talk about that sure in 1970 he was

420

00:18:37,990 --> 00:18:34,610

flying a Beechcraft a36 beach bonanza

421

00:18:40,270 --> 00:18:38,000

it was a brand new several months out of

422

00:18:42,460 --> 00:18:40,280

the factory and he had been making a

423

00:18:46,210 --> 00:18:42,470

number of flights from West Palm Beach

424

00:18:49,810 --> 00:18:46,220

to Andrews island and he was doing this

425

00:18:52,060 --> 00:18:49,820

as a business venture and his father was

426  
00:18:53,620 --> 00:18:52,070  
in Realty II and he had another business

427  
00:18:56,440 --> 00:18:53,630  
associate he was actually in

428  
00:18:58,720 --> 00:18:56,450  
construction and they made a number of

429  
00:19:00,130 --> 00:18:58,730  
flights back and forth to Andros to West

430  
00:19:02,230 --> 00:19:00,140  
Palm Beach about fourteen of these

431  
00:19:06,220 --> 00:19:02,240  
things and on one of the last flights

432  
00:19:08,200 --> 00:19:06,230  
that they had made he got caught up in a

433  
00:19:10,720 --> 00:19:08,210  
series of thunderstorms very rapidly

434  
00:19:16,030 --> 00:19:10,730  
developing thunderstorms which circled

435  
00:19:19,210 --> 00:19:16,040  
his aircraft and he was near the Bimini

436  
00:19:21,549 --> 00:19:19,220  
Island area and he had to make a

437  
00:19:25,060 --> 00:19:21,559  
decision because these thunderstorms

438  
00:19:27,640 --> 00:19:25,070

were up to about 65,000 feet and the

439

00:19:31,659 --> 00:19:27,650

last two was kind of closing the door on

440

00:19:34,120 --> 00:19:31,669

his escape route and as these things

441

00:19:37,030 --> 00:19:34,130

began to go up he noticed the tunnel

442

00:19:40,180 --> 00:19:37,040

being formed between the two of them he

443

00:19:42,700 --> 00:19:40,190

saw a blue sky on the other side and the

444

00:19:44,320 --> 00:19:42,710

you know the rule of thumb is you don't

445

00:19:46,270 --> 00:19:44,330

fly through tunnels like that because

446

00:19:49,180 --> 00:19:46,280

there's an extreme turbulence you could

447

00:19:52,120 --> 00:19:49,190

lose control the aircraft but he knew

448

00:19:53,830 --> 00:19:52,130

that if he allowed these clouds or if he

449

00:19:55,690 --> 00:19:53,840

didn't penetrate and get out of this

450

00:19:59,020 --> 00:19:55,700

situation that he'd probably run out of

451  
00:20:02,919 --> 00:19:59,030  
fuel and crash into the ocean so he took

452  
00:20:07,150 --> 00:20:02,929  
the the tunnel and as he went through

453  
00:20:09,690 --> 00:20:07,160  
this which was miles and length within

454  
00:20:12,669 --> 00:20:09,700  
like 20 seconds he covered well over

455  
00:20:16,540 --> 00:20:12,679  
about ten miles of girth of these clouds

456  
00:20:18,610 --> 00:20:16,550  
forming them and which was way faster

457  
00:20:22,450 --> 00:20:18,620  
than what he should have been able to do

458  
00:20:24,550 --> 00:20:22,460  
this and as he exited this he got

459  
00:20:27,430 --> 00:20:24,560  
encased in what he calls electronic fog

460  
00:20:29,710 --> 00:20:27,440  
where visibility went to zero around his

461  
00:20:31,900 --> 00:20:29,720  
aircraft the aircraft was still flying

462  
00:20:33,550 --> 00:20:31,910  
the this quote

463  
00:20:35,830 --> 00:20:33,560

electronic fog which is ionized

464

00:20:37,630 --> 00:20:35,840

particles that are formed from the

465

00:20:42,400 --> 00:20:37,640

clouds that adhere to the aircraft

466

00:20:46,570 --> 00:20:42,410

surface because it's metal he was in a

467

00:20:48,850 --> 00:20:46,580

non sustainable mode but he got caught

468

00:20:51,160 --> 00:20:48,860

up into a natural phenomenon the local

469

00:20:53,200 --> 00:20:51,170

space warp bubble and this is as near as

470

00:20:55,870 --> 00:20:53,210

I can figure because it follows the

471

00:20:59,320 --> 00:20:55,880

theory and everything of alcoa

472

00:21:01,530 --> 00:20:59,330

Miguel Alcubierre and he ends up in

473

00:21:05,320 --> 00:21:01,540

Miami Beach but he disappears from radar

474

00:21:07,420 --> 00:21:05,330

and he makes a radio call to the

475

00:21:09,780 --> 00:21:07,430

approach control and they say well

476  
00:21:12,760 --> 00:21:09,790  
there's no aircraft at Bimini Island

477  
00:21:15,730 --> 00:21:12,770  
however we have an aircraft south on

478  
00:21:18,130 --> 00:21:15,740  
Miami Beach and he says like it can't

479  
00:21:21,130 --> 00:21:18,140  
happen because I'm like almost 100 miles

480  
00:21:24,460 --> 00:21:21,140  
away why can't you pick me up on radar

481  
00:21:26,440 --> 00:21:24,470  
and he goes sir you know you're there's

482  
00:21:29,380 --> 00:21:26,450  
only one aircraft and that aircraft is

483  
00:21:33,280 --> 00:21:29,390  
down over Miami Beach well the fog

484  
00:21:35,440 --> 00:21:33,290  
dissipates and he is over Miami Beach

485  
00:21:38,230 --> 00:21:35,450  
and this occurs about two and a half

486  
00:21:41,020 --> 00:21:38,240  
minutes later he then clears with the

487  
00:21:44,200 --> 00:21:41,030  
approach control he lands he had taken

488  
00:21:48,630 --> 00:21:44,210

off at 3 o'clock in the afternoon he

489

00:21:52,740 --> 00:21:48,640

lands at West Palm Beach at 347 well

490

00:21:55,090 --> 00:21:52,750

something's wrong here because he

491

00:21:58,120 --> 00:21:55,100

normally and he had done these trips a

492

00:22:01,120 --> 00:21:58,130

number of times this trip typically

493

00:22:04,510 --> 00:22:01,130

takes 75 minutes and he actually had put

494

00:22:07,300 --> 00:22:04,520

an additional 40 miles on to the his

495

00:22:08,350 --> 00:22:07,310

route trying to avoid the thunderstorms

496

00:22:11,970 --> 00:22:08,360

and try to figure out what's going to

497

00:22:16,210 --> 00:22:11,980

happen so he actually made this trip

498

00:22:18,670 --> 00:22:16,220

within 47 minutes and so with a lands

499

00:22:20,440 --> 00:22:18,680

ground clocks check with his ground

500

00:22:24,700 --> 00:22:20,450

clock or his clock inside the aircraft

501  
00:22:28,000 --> 00:22:24,710  
and he is puzzled by this but

502  
00:22:30,460 --> 00:22:28,010  
fortunately for us Bruce is a very

503  
00:22:31,630 --> 00:22:30,470  
meticulous pilot any I've flown with him

504  
00:22:33,730 --> 00:22:31,640  
several times actually

505  
00:22:35,560 --> 00:22:33,740  
as a result doing other television

506  
00:22:37,990 --> 00:22:35,570  
programs with History Channel and

507  
00:22:40,390 --> 00:22:38,000  
Discovery Channel on that so we have met

508  
00:22:44,020 --> 00:22:40,400  
up several times and I interviewed him

509  
00:22:45,580 --> 00:22:44,030  
and I've flown with him like I said he's

510  
00:22:48,220 --> 00:22:45,590  
a very detailed kind of guy

511  
00:22:50,529 --> 00:22:48,230  
fortunately for us he wrote down a lot

512  
00:22:52,899 --> 00:22:50,539  
of this information and he also had the

513  
00:22:55,570 --> 00:22:52,909

refueling tickets he's one of these type

514

00:22:58,539 --> 00:22:55,580

of pilots that as soon as he land he

515

00:23:00,460 --> 00:22:58,549

would then refuel the aircraft in this

516

00:23:02,860 --> 00:23:00,470

case he found that he had nine extra

517

00:23:05,289 --> 00:23:02,870

gallons of fuel that he did not expend

518

00:23:07,840 --> 00:23:05,299

and he was like again you know again

519

00:23:11,700 --> 00:23:07,850

very meticulous about how much fuel do

520

00:23:14,230 --> 00:23:11,710

you use you know you know what was his

521

00:23:17,950 --> 00:23:14,240

use rates and all these type of things

522

00:23:20,710 --> 00:23:17,960

and so in order for him to have made

523

00:23:23,620 --> 00:23:20,720

that trip I calculated that he had to be

524

00:23:26,080 --> 00:23:23,630

flying 319 miles an hour from takeoff to

525

00:23:29,830 --> 00:23:26,090

landing in order to traverse that

526  
00:23:31,990 --> 00:23:29,840  
distance now problem being is that the

527  
00:23:36,610 --> 00:23:32,000  
wings of the aircraft begin to crack at

528  
00:23:39,070 --> 00:23:36,620  
about 220 knots and you get structural

529  
00:23:41,950 --> 00:23:39,080  
cracks into the wing structures so the

530  
00:23:45,220 --> 00:23:41,960  
planes not designed to cone 319 miles an

531  
00:23:47,470 --> 00:23:45,230  
hour so that kind of was left out of the

532  
00:23:50,620 --> 00:23:47,480  
equation and then we had to then

533  
00:23:52,990 --> 00:23:50,630  
consider at that point as he has always

534  
00:23:56,500 --> 00:23:53,000  
said is this time travel that have

535  
00:23:58,810 --> 00:23:56,510  
gotten involved with because he states

536  
00:24:01,269 --> 00:23:58,820  
that you know the the whole began to

537  
00:24:04,750 --> 00:24:01,279  
rotate you know there were cloud like

538  
00:24:06,519 --> 00:24:04,760

cumulus clouds small puffy Q inside that

539

00:24:09,430 --> 00:24:06,529

kind of looked like a cement mixer kind

540

00:24:13,779 --> 00:24:09,440

of going around he also it talks about

541

00:24:18,269 --> 00:24:13,789

feeling a little bit weightless and and

542

00:24:21,490 --> 00:24:18,279

the aircraft operating in a kind of a

543

00:24:25,380 --> 00:24:21,500

hydroplaning mode prior to feeling the

544

00:24:28,810 --> 00:24:25,390

weightlessness and it was momentary and

545

00:24:30,580 --> 00:24:28,820

so with all the and I kind of take this

546

00:24:33,639 --> 00:24:30,590

through in the science of the Bruce

547

00:24:36,549 --> 00:24:33,649

Gernon flight I take it through the

548

00:24:38,980 --> 00:24:36,559

tunnel second-by-second as his

549

00:24:42,639 --> 00:24:38,990

explanations and then make comparisons

550

00:24:46,840 --> 00:24:42,649

against the Cal Cuvier migaila ku beers

551  
00:24:51,730 --> 00:24:46,850  
theories and they seem to parallel quite

552  
00:24:54,880 --> 00:24:51,740  
nicely well that led me to then do some

553  
00:24:57,220 --> 00:24:54,890  
further investigation which I began to

554  
00:24:58,990 --> 00:24:57,230  
look at the weather forensics aircraft

555  
00:25:01,210 --> 00:24:59,000  
losses in the region

556  
00:25:03,250 --> 00:25:01,220  
and it started to compile all this

557  
00:25:04,900 --> 00:25:03,260  
information being a meteorologist you

558  
00:25:07,120 --> 00:25:04,910  
know had access to all these that type

559  
00:25:11,290 --> 00:25:07,130  
of things and began to find a pattern

560  
00:25:14,980 --> 00:25:11,300  
and with that pattern I was able to then

561  
00:25:18,370 --> 00:25:14,990  
do some predictive analysis of those

562  
00:25:20,950 --> 00:25:18,380  
patterns and then make predictions as to

563  
00:25:25,060 --> 00:25:20,960

these types of thunderstorms that would

564

00:25:27,310 --> 00:25:25,070

evolve and be created off the east coast

565

00:25:29,980 --> 00:25:27,320

of Miami and so you're at about 20

566

00:25:34,900 --> 00:25:29,990

degrees north latitude at that point so

567

00:25:38,110 --> 00:25:34,910

it's it's a very active area there's

568

00:25:41,140 --> 00:25:38,120

tremendous amounts of water vapor light

569

00:25:43,420 --> 00:25:41,150

variable upper air winds and the

570

00:25:46,560 --> 00:25:43,430

availability of generating thunderstorms

571

00:25:49,180 --> 00:25:46,570

and from 11 o'clock in the morning

572

00:25:50,560 --> 00:25:49,190

peaking at about the three o'clock mode

573

00:25:55,290 --> 00:25:50,570

or you know where they become very

574

00:25:58,260 --> 00:25:55,300

intense is very common in that region so

575

00:26:01,000 --> 00:25:58,270

pilots that take off in a nice clear sky

576

00:26:02,920 --> 00:26:01,010

yeah we'll get wrapped up and involved

577

00:26:07,180 --> 00:26:02,930

in these things later on in today as

578

00:26:08,920 --> 00:26:07,190

they fly out into the quote the um you

579

00:26:09,760 --> 00:26:08,930

know triangle I use that with kind of

580

00:26:12,010 --> 00:26:09,770

tongue-in-cheek

581

00:26:15,940 --> 00:26:12,020

you could draw a trapezoid there if you

582

00:26:19,750 --> 00:26:15,950

wanted to this triangle is not really a

583

00:26:22,390 --> 00:26:19,760

line of demarcation you you take off and

584

00:26:25,330 --> 00:26:22,400

you leave the the coast of a United

585

00:26:29,020 --> 00:26:25,340

States in that region that general area

586

00:26:32,710 --> 00:26:29,030

and you can get involved in very rapidly

587

00:26:34,830 --> 00:26:32,720

forming open so cumulus that goes to

588

00:26:41,140 --> 00:26:34,840

towering queue that then goes to

589

00:26:45,820 --> 00:26:41,150

accumulate on a sea beam in Thunder spot

590

00:26:47,380 --> 00:26:45,830

a very large thunderstorm but in these

591

00:26:51,070 --> 00:26:47,390

cases the thunderstorms that are

592

00:26:53,350 --> 00:26:51,080

generated are huge is just tremendous

593

00:26:56,350 --> 00:26:53,360

and girth and that means the width of

594

00:27:00,130 --> 00:26:56,360

the cloud and the thunderstorms can

595

00:27:03,730 --> 00:27:00,140

evolve and go up to I have seen them on

596

00:27:05,980 --> 00:27:03,740

radar myself well in excess of 70,000

597

00:27:08,200 --> 00:27:05,990

feet out in those in those regions well

598

00:27:12,220 --> 00:27:08,210

can you explain to the listener what a

599

00:27:13,380 --> 00:27:12,230

warp bubble is or theorized to be I

600

00:27:20,380 --> 00:27:13,390

should say

601  
00:27:22,510 --> 00:27:20,390  
yeah that theorized in the lab we have

602  
00:27:25,810 --> 00:27:22,520  
found a little bit some slight

603  
00:27:29,860 --> 00:27:25,820  
differences however the fabric of space

604  
00:27:34,230 --> 00:27:29,870  
as talked about by Einstein himself is

605  
00:27:36,820 --> 00:27:34,240  
that the entire universe is can be

606  
00:27:40,360 --> 00:27:36,830  
controlled in a sense the fabric of

607  
00:27:41,980 --> 00:27:40,370  
space can be controlled by mass and the

608  
00:27:44,320 --> 00:27:41,990  
larger the mass then the more

609  
00:27:46,419 --> 00:27:44,330  
compression of the fabric of space which

610  
00:27:49,480 --> 00:27:46,429  
is relative to other positions around

611  
00:27:52,870 --> 00:27:49,490  
and throughout the universe and/or our

612  
00:27:55,360 --> 00:27:52,880  
own solar system so our Sun for example

613  
00:27:58,539 --> 00:27:55,370

has an equator has a little bit more

614

00:28:01,030 --> 00:27:58,549

mass or kind of a bulge at the equator

615

00:28:03,520 --> 00:28:01,040

just like the earth does and therefore

616

00:28:06,130 --> 00:28:03,530

there's a slight there's a little bit

617

00:28:10,840 --> 00:28:06,140

more compression and we could relate

618

00:28:12,789 --> 00:28:10,850

this to an accordion for example say an

619

00:28:16,360 --> 00:28:12,799

accordion stretched all the way out as

620

00:28:19,299 --> 00:28:16,370

representing normal space if you get

621

00:28:22,510 --> 00:28:19,309

near a large mass in a natural condition

622

00:28:25,659 --> 00:28:22,520

and the accordion would begin to get

623

00:28:28,990 --> 00:28:25,669

compressed however that same distance

624

00:28:31,720 --> 00:28:29,000

from the end one end to the accordion to

625

00:28:34,390 --> 00:28:31,730

the other is still the same amount of

626

00:28:37,900 --> 00:28:34,400

linear space except it is just

627

00:28:41,039 --> 00:28:37,910

compressed and the object here of what

628

00:28:44,980 --> 00:28:41,049

Miguel Alcubierre talked about in 1994

629

00:28:47,380 --> 00:28:44,990

was the fact that he was looking at an

630

00:28:49,659 --> 00:28:47,390

artificial inducement of space that

631

00:28:52,330 --> 00:28:49,669

would compress in front of the craft and

632

00:28:54,640 --> 00:28:52,340

then that compression would then begin

633

00:28:58,750 --> 00:28:54,650

to blossom out up and around the craft

634

00:29:03,700 --> 00:28:58,760

and then expand behind pushing the craft

635

00:29:06,430 --> 00:29:03,710

through on normal space so kind of like

636

00:29:10,680 --> 00:29:06,440

if you want to envision a hot air

637

00:29:14,500 --> 00:29:10,690

balloon once it achieves its buoyancy

638

00:29:16,299 --> 00:29:14,510

being able to be floating through the

639

00:29:19,630 --> 00:29:16,309

atmosphere in a sense so you've got it

640

00:29:22,360 --> 00:29:19,640

kind of like a hot air bubble maybe a

641

00:29:25,000 --> 00:29:22,370

poor example but a lot of people have a

642

00:29:26,470 --> 00:29:25,010

very difficult time thinking about this

643

00:29:29,560 --> 00:29:26,480

type of

644

00:29:31,030 --> 00:29:29,570

phenomenon is there any we have a couple

645

00:29:33,280 --> 00:29:31,040

of questions coming up on the message

646

00:29:35,320 --> 00:29:33,290

board but is there any parallel between

647

00:29:40,180 --> 00:29:35,330

your work and what they were talking

648

00:29:44,350 --> 00:29:40,190

about at skunk works I'm not familiar

649

00:29:47,740 --> 00:29:44,360

with exactly what they were doing there

650

00:29:49,750 --> 00:29:47,750

possibly could be parallels but I am not

651  
00:29:54,370 --> 00:29:49,760  
aware of the various programs that they

652  
00:29:57,400 --> 00:29:54,380  
had going on actually I kind of believe

653  
00:30:01,410 --> 00:29:57,410  
is what I had actually witnessed when I

654  
00:30:04,810 --> 00:30:01,420  
was 16 is more than likely the type of

655  
00:30:07,000 --> 00:30:04,820  
propulsion system that they utilized on

656  
00:30:08,800 --> 00:30:07,010  
that craft I mean that was the thing

657  
00:30:13,240 --> 00:30:08,810  
that really got me started actually we

658  
00:30:16,960 --> 00:30:13,250  
have other ones here about that okay

659  
00:30:20,110 --> 00:30:16,970  
upstate New York a place called Goodyear

660  
00:30:22,300 --> 00:30:20,120  
Lake late August about a week before

661  
00:30:27,340 --> 00:30:22,310  
going back to school and my senior year

662  
00:30:30,370 --> 00:30:27,350  
and that morning was up at a friend's

663  
00:30:32,530 --> 00:30:30,380

house we're looking up at the mountain

664

00:30:34,830 --> 00:30:32,540

and turning away and talking and joking

665

00:30:39,250 --> 00:30:34,840

around and off the corner of my eye

666

00:30:42,220 --> 00:30:39,260

spotted a silver disc and it was about

667

00:30:44,440 --> 00:30:42,230

60 feet in diameter as an approximately

668

00:30:47,860 --> 00:30:44,450

100 feet off the top of the mountain

669

00:30:52,630 --> 00:30:47,870

which later we revealed a dug up a topo

670

00:30:54,400 --> 00:30:52,640

map which was about 400 feet high and it

671

00:30:56,110 --> 00:30:54,410

was so it would be about five it would

672

00:30:58,750 --> 00:30:56,120

be about approximately 500 feet off the

673

00:31:02,620 --> 00:30:58,760

ground and about 1,200 feet down range

674

00:31:04,930 --> 00:31:02,630

of us and as it was only moving about a

675

00:31:07,750 --> 00:31:04,940

twenty miles an hour at the most

676

00:31:10,060 --> 00:31:07,760

at that at that particular time and as

677

00:31:13,420 --> 00:31:10,070

it passed our position it banked about

678

00:31:16,540 --> 00:31:13,430

20 degrees and I could see the top of

679

00:31:19,210 --> 00:31:16,550

this thing and I could see the metal

680

00:31:21,520 --> 00:31:19,220

striations you know as you know like

681

00:31:23,410 --> 00:31:21,530

roll alumina mount you know when to

682

00:31:25,630 --> 00:31:23,420

manufacture there's kind of like an and

683

00:31:28,270 --> 00:31:25,640

embedded because of the rollers there's

684

00:31:30,940 --> 00:31:28,280

like striations into the metal well the

685

00:31:32,680 --> 00:31:30,950

Sun reflected against this which was to

686

00:31:34,630 --> 00:31:32,690

our back and this is against the

687

00:31:37,720 --> 00:31:34,640

perfectly blue sky had no clouds at all

688

00:31:39,919 --> 00:31:37,730

and you could see that there was a front

689

00:31:42,799 --> 00:31:39,929

and back to the craft

690

00:31:46,490 --> 00:31:42,809

perfect discus shaped object platinum in

691

00:31:49,539 --> 00:31:46,500

color and it was not rotating or any of

692

00:31:52,220 --> 00:31:49,549

this stuff it was incredibly stable and

693

00:31:54,799 --> 00:31:52,230

this thing on and if you're familiar

694

00:31:57,049 --> 00:31:54,809

with aviation you'd appreciate this when

695

00:32:00,230 --> 00:31:57,059

this thing bank 20 degrees at 20 miles

696

00:32:04,220 --> 00:32:00,240

an hour 60 foot diameter craft it never

697

00:32:06,020 --> 00:32:04,230

lost an inch hmm I you know even a small

698

00:32:08,870 --> 00:32:06,030

aircraft like a Piper Cub when you bank

699

00:32:10,880 --> 00:32:08,880

that aircraft you lose altitude okay

700

00:32:13,490 --> 00:32:10,890

there's some different lift coefficients

701  
00:32:15,560 --> 00:32:13,500  
on to the wing at that point and again

702  
00:32:18,049 --> 00:32:15,570  
it's all thrust to weight ratios here in

703  
00:32:20,149 --> 00:32:18,059  
a normal horizontal flight you know you

704  
00:32:22,520 --> 00:32:20,159  
can keep it nice and level but this

705  
00:32:24,770 --> 00:32:22,530  
thing didn't veer at all and then it

706  
00:32:29,419 --> 00:32:24,780  
righted up after a past our position and

707  
00:32:32,390 --> 00:32:29,429  
it just went away one and so that

708  
00:32:35,870 --> 00:32:32,400  
intrigued me to this very day how many

709  
00:32:41,210 --> 00:32:35,880  
people were with you by the way uh there

710  
00:32:43,149 --> 00:32:41,220  
was about was four or five of us before

711  
00:32:45,860 --> 00:32:43,159  
you move on I just wanted to know do you

712  
00:32:47,750 --> 00:32:45,870  
had you talked about it over the years

713  
00:32:53,480 --> 00:32:47,760

with the same people you witnessed it

714

00:32:55,159 --> 00:32:53,490

with yeah I mean over the before we all

715

00:32:56,659 --> 00:32:55,169

kind of separated and went our own ways

716

00:32:59,779 --> 00:32:56,669

after high school and then went to

717

00:33:01,610 --> 00:32:59,789

college and all this type of thing yeah

718

00:33:06,140 --> 00:33:01,620

after that time we did talk about it we

719

00:33:08,630 --> 00:33:06,150

also tried to get hit the the groups it

720

00:33:10,820 --> 00:33:08,640

was a family but to get the mother out

721

00:33:13,399 --> 00:33:10,830

so she would be in a witness because in

722

00:33:16,430 --> 00:33:13,409

the back of my mind being 16 who's going

723

00:33:17,990 --> 00:33:16,440

to believe us right yeah and so when I

724

00:33:21,289 --> 00:33:18,000

went home and I told my parents about it

725

00:33:25,190 --> 00:33:21,299

my father being an old retired colonel

726

00:33:28,039 --> 00:33:25,200

in the Army goes we get crazy I've

727

00:33:29,630 --> 00:33:28,049

actually compiled a story that details a

728

00:33:31,399 --> 00:33:29,640

lot of this with the maps and the

729

00:33:33,260 --> 00:33:31,409

position of where we were and all that

730

00:33:36,799 --> 00:33:33,270

type of thing and a picture of the house

731

00:33:38,899 --> 00:33:36,809

of where we were related to the mountain

732

00:33:42,860 --> 00:33:38,909

and all this type of things so I put a

733

00:33:46,070 --> 00:33:42,870

lot of work into writing this up because

734

00:33:48,049 --> 00:33:46,080

to me this was really the beginning I

735

00:33:50,330 --> 00:33:48,059

mean I was a football player and a

736

00:33:53,270 --> 00:33:50,340

wrestler I dropped everything in my

737

00:33:56,240 --> 00:33:53,280

senior year and I just started

738

00:33:58,700 --> 00:33:56,250

trying to collect information and trying

739

00:34:00,620 --> 00:33:58,710

to hone all my skills because I was

740

00:34:02,950 --> 00:34:00,630

bound and determined to figure this out

741

00:34:08,540 --> 00:34:02,960

now you know myself

742

00:34:10,970 --> 00:34:08,550

46 years later I think I may have

743

00:34:12,350 --> 00:34:10,980

figured out how it worked well that's

744

00:34:14,570 --> 00:34:12,360

that's the question I have for you I

745

00:34:16,669 --> 00:34:14,580

want to know first of all up in the

746

00:34:18,649 --> 00:34:16,679

message board someone wants to know what

747

00:34:20,629 --> 00:34:18,659

type of equipment do you have in your

748

00:34:22,550 --> 00:34:20,639

lab and I want to know have you had any

749

00:34:27,830 --> 00:34:22,560

break breakthroughs on this in your lab

750

00:34:31,580 --> 00:34:27,840

oh yeah oh yeah absolutely about it

751  
00:34:33,970 --> 00:34:31,590  
we've actually have held back for the

752  
00:34:36,350 --> 00:34:33,980  
last three years a lot of the

753  
00:34:40,190 --> 00:34:36,360  
discoveries that we've made because we

754  
00:34:41,990 --> 00:34:40,200  
have designed a number of confirming

755  
00:34:44,270 --> 00:34:42,000  
experiments that were different from the

756  
00:34:46,369 --> 00:34:44,280  
other ones and as we kept getting the

757  
00:34:49,879 --> 00:34:46,379  
same kinds of answers coming back we

758  
00:34:51,260 --> 00:34:49,889  
said well are we really sure isn't there

759  
00:34:54,010 --> 00:34:51,270  
another way to try to measure something

760  
00:34:57,500 --> 00:34:54,020  
like this we'll do this experiment and

761  
00:35:00,080 --> 00:34:57,510  
as a result we kept getting more and

762  
00:35:04,780 --> 00:35:00,090  
more confirmation of what we were seeing

763  
00:35:09,830 --> 00:35:04,790

is was reality and so we haven't really

764

00:35:11,560 --> 00:35:09,840

said anything and haven't you know you

765

00:35:13,850 --> 00:35:11,570

know put this out into the public view

766

00:35:15,650 --> 00:35:13,860

because then it gets a little scary of

767

00:35:18,890 --> 00:35:15,660

some of the other implications about it

768

00:35:21,110 --> 00:35:18,900

but you know I'm always very trying to

769

00:35:24,890 --> 00:35:21,120

look at this from a very positive mode

770

00:35:27,350 --> 00:35:24,900

of getting to the point of being able to

771

00:35:30,050 --> 00:35:27,360

actually lift the craft off the ground

772

00:35:33,800 --> 00:35:30,060

that we've been building it's a quarter

773

00:35:37,070 --> 00:35:33,810

scale of a full-size version 30 by 30

774

00:35:39,110 --> 00:35:37,080

foot human-occupied craft seven people

775

00:35:41,780 --> 00:35:39,120

could sit in this thing but we have a

776

00:35:45,200 --> 00:35:41,790

7x7 which is a quarter scale version of

777

00:35:47,180 --> 00:35:45,210

it and it weighs approximately 40 pounds

778

00:35:52,730 --> 00:35:47,190

and the motors that we've been

779

00:35:54,080 --> 00:35:52,740

developing is the our goal is to lift

780

00:35:55,810 --> 00:35:54,090

this thing off the ground within the

781

00:35:58,820 --> 00:35:55,820

next six months to a year

782

00:36:00,860 --> 00:35:58,830

twist excited with the width funding or

783

00:36:03,590 --> 00:36:00,870

without funding we'll talk about that

784

00:36:06,080 --> 00:36:03,600

too because you have an IndieGoGo and

785

00:36:06,720 --> 00:36:06,090

let's talk a little bit about that but

786

00:36:08,070 --> 00:36:06,730

first of all

787

00:36:10,800 --> 00:36:08,080

if you wouldn't mind answering what type

788

00:36:13,980 --> 00:36:10,810

of equipment do you have a lot of

789

00:36:16,440 --> 00:36:13,990

homebrew I mean you don't go to you

790

00:36:18,330 --> 00:36:16,450

don't go down to the local store

791

00:36:19,650 --> 00:36:18,340

electronics I don't care whatever you

792

00:36:21,359 --> 00:36:19,660

want to kind of store you want a name

793

00:36:25,020 --> 00:36:21,369

and you can't pick up any of this kind

794

00:36:27,630 --> 00:36:25,030

of stuff so we've modified greatly a lot

795

00:36:31,500 --> 00:36:27,640

of the basic equipment now we happen to

796

00:36:34,440 --> 00:36:31,510

be using an RF based transmitter with

797

00:36:37,640 --> 00:36:34,450

linear amplifiers and all these things

798

00:36:41,490 --> 00:36:37,650

are modified we have a very special

799

00:36:43,590 --> 00:36:41,500

fractal arrays and if people want to go

800

00:36:47,790 --> 00:36:43,600

to the website they can see pictures of

801  
00:36:52,380 --> 00:36:47,800  
it and these are specially modified and

802  
00:36:54,770 --> 00:36:52,390  
tuned - well the frequency is really

803  
00:36:58,560 --> 00:36:54,780  
kind of irrelevant in many regards but

804  
00:37:01,770 --> 00:36:58,570  
the the bottom line is is that what

805  
00:37:03,900 --> 00:37:01,780  
happens between these arrays as the

806  
00:37:05,810 --> 00:37:03,910  
compression of the fabric of space in

807  
00:37:10,109 --> 00:37:05,820  
the near field of the arrays themselves

808  
00:37:12,050 --> 00:37:10,119  
and we've actually replicated is the try

809  
00:37:14,490 --> 00:37:12,060  
pole electric fields within

810  
00:37:18,060 --> 00:37:14,500  
thunderstorms now one of the realities

811  
00:37:20,849 --> 00:37:18,070  
of Bruce's flight and a number of other

812  
00:37:23,940 --> 00:37:20,859  
pilots that in many people would claim

813  
00:37:25,770 --> 00:37:23,950

that foam you know their accounts are

814

00:37:28,200 --> 00:37:25,780

very anecdotal you know there's not a

815

00:37:29,760 --> 00:37:28,210

lot of evidence well how many people fly

816

00:37:32,550 --> 00:37:29,770

with all kinds of different digital

817

00:37:35,099 --> 00:37:32,560

recorders and all kinds of cameras with

818

00:37:38,550 --> 00:37:35,109

them when they're flying aircraft right

819

00:37:40,080 --> 00:37:38,560

that doesn't happen normally and we were

820

00:37:42,090 --> 00:37:40,090

fortunate like I said with Bruce being

821

00:37:43,590 --> 00:37:42,100

able to write down he had the refueling

822

00:37:45,210 --> 00:37:43,600

tickets and the maps and all this other

823

00:37:48,120 --> 00:37:45,220

things and that's what really kind of

824

00:37:50,910 --> 00:37:48,130

led me down into trying to figure this

825

00:37:52,500 --> 00:37:50,920

mystery out and the bottom line was is

826

00:37:54,630 --> 00:37:52,510

that the thunderstorms were the real

827

00:37:56,460 --> 00:37:54,640

elements here and the fact that the

828

00:37:58,410 --> 00:37:56,470

thunderstorms themselves are kind of

829

00:38:00,810 --> 00:37:58,420

like a huge particle accelerator that

830

00:38:03,480 --> 00:38:00,820

make antimatter you got gamma rays

831

00:38:07,710 --> 00:38:03,490

coming out of these things they got like

832

00:38:10,470 --> 00:38:07,720

10 to the 15 watts of power which is an

833

00:38:12,900 --> 00:38:10,480

incredible amount of energy in

834

00:38:16,560 --> 00:38:12,910

comparison to say for example like a 13

835

00:38:18,480 --> 00:38:16,570

kiloton weapon that would have about ten

836

00:38:19,190 --> 00:38:18,490

to the seventh lots of power and

837

00:38:21,650 --> 00:38:19,200

equivalent

838

00:38:23,690 --> 00:38:21,660

so you got a differential there ten to

839

00:38:27,890 --> 00:38:23,700

the eighth watts of power I mean that

840

00:38:30,730 --> 00:38:27,900

it's tremendous now I say this and then

841

00:38:33,710 --> 00:38:30,740

when you talk to theoretical physicists

842

00:38:35,569 --> 00:38:33,720

they will claim that you have to have an

843

00:38:39,380 --> 00:38:35,579

ordering amount of power it has to be

844

00:38:41,990 --> 00:38:39,390

exotic energy and blah blah blah and I

845

00:38:44,720 --> 00:38:42,000

respect what they are trying to do

846

00:38:47,329 --> 00:38:44,730

however we discovered that it doesn't

847

00:38:51,430 --> 00:38:47,339

require that and this is where the

848

00:38:55,000 --> 00:38:51,440

controversy will go but however I will

849

00:38:57,470 --> 00:38:55,010

we will overcome that type of

850

00:38:59,810 --> 00:38:57,480

controversy with the lifting of the

851

00:39:01,849 --> 00:38:59,820

craft off the ground and then there

852

00:39:05,089 --> 00:39:01,859

won't be any arguments about what we've

853

00:39:07,280 --> 00:39:05,099

done what we've accomplished and what we

854

00:39:11,750 --> 00:39:07,290

have gotten our patent pending Zahn

855

00:39:13,550 --> 00:39:11,760

so now that like I said we modify

856

00:39:18,680 --> 00:39:13,560

greatly a lot of the equipment that we

857

00:39:22,010 --> 00:39:18,690

use we stretch our dollar greatly I work

858

00:39:23,839 --> 00:39:22,020

in northern amount of hours to put this

859

00:39:25,970 --> 00:39:23,849

towards that the team that we've

860

00:39:30,620 --> 00:39:25,980

assembled we have two physicists with us

861

00:39:33,530 --> 00:39:30,630

and we have a flight test engineer we

862

00:39:36,910 --> 00:39:33,540

have software people we have system

863

00:39:40,309 --> 00:39:36,920

designers and fabricators and that and

864

00:39:42,230 --> 00:39:40,319

no one gets paid and we've been to been

865

00:39:45,290 --> 00:39:42,240

together now for three years and we just

866

00:39:48,559 --> 00:39:45,300

recently took on a new physicist a

867

00:39:51,010 --> 00:39:48,569

particle physicist actually and some of

868

00:39:53,780 --> 00:39:51,020

the software that he's developed for

869

00:39:55,790 --> 00:39:53,790

some of the places that he's worked the

870

00:40:00,020 --> 00:39:55,800

experience that he's gained he thinks

871

00:40:02,300 --> 00:40:00,030

that he can adapt the concepts of what

872

00:40:05,030 --> 00:40:02,310

he's done with a you know a brand new

873

00:40:07,579 --> 00:40:05,040

base of software that will take the data

874

00:40:10,370 --> 00:40:07,589

that we have generated and be able to

875

00:40:12,349 --> 00:40:10,380

display it in a three dimensional mode

876

00:40:14,120 --> 00:40:12,359

for us that's one of the things we

877

00:40:16,670 --> 00:40:14,130

really want to see now we have we have

878

00:40:19,280 --> 00:40:16,680

our equations that we've developed that

879

00:40:22,190 --> 00:40:19,290

will predict how much pull that this

880

00:40:24,470 --> 00:40:22,200

motor has and again it may be a little

881

00:40:27,079 --> 00:40:24,480

bit to describe here on to the podcast

882

00:40:30,319 --> 00:40:27,089

here but the the motors if you take your

883

00:40:32,929 --> 00:40:30,329

hand and form a V between your thumb

884

00:40:35,239 --> 00:40:32,939

and you know your fingers and just open

885

00:40:37,939 --> 00:40:35,249

up your hand and form a V this thing

886

00:40:41,089 --> 00:40:37,949

doesn't thrust it pulls in other words

887

00:40:43,429 --> 00:40:41,099

things go in towards it and so we have a

888

00:40:45,859 --> 00:40:43,439

torsion bar and we've set up that's over

889

00:40:48,079 --> 00:40:45,869

three and a half pounds of weight in an

890

00:40:51,679 --> 00:40:48,089

isolated case and it's insulated it's

891

00:40:54,380 --> 00:40:51,689

made out of glass and wood and we have

892

00:40:57,739 --> 00:40:54,390

put the motor 35 centimeters away we

893

00:41:01,279 --> 00:40:57,749

have put it 70 140 centimeters away and

894

00:41:06,859 --> 00:41:01,289

we can swing that way and we have Swing

895

00:41:10,249 --> 00:41:06,869

rates and which are per minute or

896

00:41:12,679 --> 00:41:10,259

millimeters per second at 35 centimeters

897

00:41:14,660 --> 00:41:12,689

for example it goes like one point five

898

00:41:17,749 --> 00:41:14,670

six or one and a half millimeters per

899

00:41:19,279 --> 00:41:17,759

second now to the audience that doesn't

900

00:41:22,789 --> 00:41:19,289

sound like a lot but when you see that

901  
00:41:25,099 --> 00:41:22,799  
laser reflecting off the mirror onto the

902  
00:41:29,089 --> 00:41:25,109  
projection screen and this thing was

903  
00:41:30,890 --> 00:41:29,099  
sitting dead still and then at 140

904  
00:41:32,569 --> 00:41:30,900  
centimeters you see the thing swinging

905  
00:41:34,699 --> 00:41:32,579  
again that's three and a half pounds of

906  
00:41:37,549 --> 00:41:34,709  
weight with a hundred watts of power

907  
00:41:40,429 --> 00:41:37,559  
coming out of the motor and so our motor

908  
00:41:42,890 --> 00:41:40,439  
evolution we've had I have ten different

909  
00:41:46,880 --> 00:41:42,900  
variants of this motor each one is

910  
00:41:49,400 --> 00:41:46,890  
stronger and with the same input we've

911  
00:41:52,539 --> 00:41:49,410  
been able to double the capacity of the

912  
00:41:56,299 --> 00:41:52,549  
motor and the new one that we're testing

913  
00:41:58,309 --> 00:41:56,309

this this particular motor hasn't been

914

00:42:01,579 --> 00:41:58,319

put into the vertical test and yet in

915

00:42:04,699 --> 00:42:01,589

another few days it will be but the hope

916

00:42:06,859 --> 00:42:04,709

is from what I'm seeing right now is we

917

00:42:10,160 --> 00:42:06,869

might be able to get it again to double

918

00:42:14,509 --> 00:42:10,170

the output with the same input and this

919

00:42:16,669 --> 00:42:14,519

is what we're leading up to is about 23

920

00:42:18,109 --> 00:42:16,679

to 24 hundred watts of power we should

921

00:42:20,809 --> 00:42:18,119

be able to lift about a hundred pounds

922

00:42:22,789 --> 00:42:20,819

off the ground and then it goes off kind

923

00:42:26,029 --> 00:42:22,799

of asymptotically in other words once

924

00:42:28,459 --> 00:42:26,039

you've established the overunity type of

925

00:42:31,039 --> 00:42:28,469

condition it doesn't require a whole lot

926  
00:42:33,589 --> 00:42:31,049  
more power and this kind of correlates

927  
00:42:37,759 --> 00:42:33,599  
back to what I seen when I was at 16

928  
00:42:40,279 --> 00:42:37,769  
years old is that being in a horizontal

929  
00:42:42,620 --> 00:42:40,289  
position and moving it doesn't require

930  
00:42:43,540 --> 00:42:42,630  
and that's what it appeared to me it

931  
00:42:45,250 --> 00:42:43,550  
didn't really did

932  
00:42:46,960 --> 00:42:45,260  
interfere that it required that much

933  
00:42:49,420 --> 00:42:46,970  
more energy for this thing to just take

934  
00:42:52,180 --> 00:42:49,430  
off like a shot which I think that the

935  
00:42:57,910 --> 00:42:52,190  
this particular UFO which has been seen

936  
00:43:02,110 --> 00:42:57,920  
all over the world and over there's

937  
00:43:04,390 --> 00:43:02,120  
pictures of it from 2001 and Budapest

938  
00:43:08,380 --> 00:43:04,400

Hungary it's the same crap that I saw

939

00:43:11,140 --> 00:43:08,390

when I was 16 so I you know the evidence

940

00:43:13,240 --> 00:43:11,150

is out there that this craft has been

941

00:43:19,240 --> 00:43:13,250

around now did somebody here on earth

942

00:43:21,310 --> 00:43:19,250

produce it well I don't know if I can

943

00:43:23,050 --> 00:43:21,320

answer that because I am not

944

00:43:26,410 --> 00:43:23,060

knowledgeable of everything that goes on

945

00:43:29,260 --> 00:43:26,420

behind the scenes and skunk works and

946

00:43:31,980 --> 00:43:29,270

other places around the world but to be

947

00:43:35,920 --> 00:43:31,990

quite honest with you if we had it in

948

00:43:39,010 --> 00:43:35,930

1969 wouldn't you think that we would

949

00:43:41,980 --> 00:43:39,020

have that now yeah I think that came up

950

00:43:44,500 --> 00:43:41,990

in a couple of podcasts ago when when I

951

00:43:46,360 --> 00:43:44,510

was speaking with Lise Spiegel about

952

00:43:48,880 --> 00:43:46,370

something that people are talking about

953

00:43:51,370 --> 00:43:48,890

exists now and he saw that way back when

954

00:43:53,740 --> 00:43:51,380

you know same same type of deal it

955

00:43:56,950 --> 00:43:53,750

couldn't be held secret that long I mean

956

00:43:59,080 --> 00:43:56,960

I I wouldn't think it could be well if

957

00:44:01,780 --> 00:43:59,090

you have individuals like Kelly Johnson

958

00:44:03,670 --> 00:44:01,790

who was the head of the skunk works and

959

00:44:07,030 --> 00:44:03,680

he had a sighting of a craft the dark

960

00:44:09,880 --> 00:44:07,040

craft that was a kind of triangular in

961

00:44:12,670 --> 00:44:09,890

shape if I recall the story correctly

962

00:44:16,660 --> 00:44:12,680

but he had an encounter and he had a an

963

00:44:20,230 --> 00:44:16,670

observation and yet you know he designs

964

00:44:22,540 --> 00:44:20,240

then the sr-71 obviously had a whole

965

00:44:25,990 --> 00:44:22,550

litany of aircraft that he was you know

966

00:44:29,230 --> 00:44:26,000

he guy on that developed and flew but

967

00:44:30,910 --> 00:44:29,240

one would think that if he actually had

968

00:44:33,430 --> 00:44:30,920

that sighting and was impressed by it

969

00:44:37,120 --> 00:44:33,440

that they weren't doing anything at that

970

00:44:38,890 --> 00:44:37,130

point and if there was anybody that was

971

00:44:41,650 --> 00:44:38,900

going to be doing stuff like that I

972

00:44:43,990 --> 00:44:41,660

would kind of imagine that if there were

973

00:44:47,650 --> 00:44:44,000

government research labs they would have

974

00:44:52,350 --> 00:44:47,660

been tried to got him to develop a craft

975

00:44:55,420 --> 00:44:52,360

around the engine technology but that's

976

00:44:56,810 --> 00:44:55,430

speculative on my part and I usually

977

00:44:58,850 --> 00:44:56,820

like to only make

978

00:45:02,000 --> 00:44:58,860

statements that I can back up with with

979

00:45:05,870 --> 00:45:02,010

fact but the that observation of Kelly

980

00:45:07,760 --> 00:45:05,880

Johnson was quite intriguing to me in a

981

00:45:10,310 --> 00:45:07,770

census was that just the story to cover

982

00:45:11,210 --> 00:45:10,320

up select something or did he

983

00:45:13,610 --> 00:45:11,220

legitimately

984

00:45:16,910 --> 00:45:13,620

have the sighting of which has been

985

00:45:19,210 --> 00:45:16,920

stated and documented I would have a

986

00:45:22,910 --> 00:45:19,220

tendency to believe him

987

00:45:24,530 --> 00:45:22,920

more than other people that's just

988

00:45:25,820 --> 00:45:24,540

because it was an engineer but I've seen

989

00:45:28,420 --> 00:45:25,830

a lot of interviews with the guy and he

990

00:45:31,730 --> 00:45:28,430

seemed very very down-to-earth you know

991

00:45:35,450 --> 00:45:31,740

but you know I guess we can all have

992

00:45:37,880 --> 00:45:35,460

secrets now are you as anyone reaching

993

00:45:40,820 --> 00:45:37,890

out to you since you've been talking

994

00:45:43,790 --> 00:45:40,830

about this and giving you their feedback

995

00:45:45,950 --> 00:45:43,800

any type of scientists in the field that

996

00:45:49,720 --> 00:45:45,960

have an interest in this or you kind of

997

00:45:52,040 --> 00:45:49,730

solo and bringing people in on your own

998

00:45:55,330 --> 00:45:52,050

there really hasn't been any interest

999

00:45:58,640 --> 00:45:55,340

from the outside scientific community

1000

00:46:02,690 --> 00:45:58,650

we're going this alone we realize we're

1001  
00:46:05,060 --> 00:46:02,700  
up against we're going against in some

1002  
00:46:08,510 --> 00:46:05,070  
respects the the energy levels and has

1003  
00:46:11,770 --> 00:46:08,520  
been a big point of controversy I go

1004  
00:46:15,200 --> 00:46:11,780  
down several different Theory chol

1005  
00:46:18,980 --> 00:46:15,210  
physicists that have you know made their

1006  
00:46:21,320 --> 00:46:18,990  
statements and I it really doesn't

1007  
00:46:26,120 --> 00:46:21,330  
bother me because I'm going in my own

1008  
00:46:28,640 --> 00:46:26,130  
direction so the facts that we have of

1009  
00:46:31,190 --> 00:46:28,650  
the facts it works it's there

1010  
00:46:33,920 --> 00:46:31,200  
it does was supposed to do I hear I'll

1011  
00:46:37,790 --> 00:46:33,930  
put you this way what you cannot

1012  
00:46:41,840 --> 00:46:37,800  
compress a laser beam within a near

1013  
00:46:44,750 --> 00:46:41,850

field of an RF generated environment you

1014

00:46:46,760 --> 00:46:44,760

can't compress a laser beam we do and we

1015

00:46:50,540 --> 00:46:46,770

have the data from different experiments

1016

00:46:53,030 --> 00:46:50,550

that all correlate the same thing we

1017

00:46:55,850 --> 00:46:53,040

have as we ran a hundred and forty

1018

00:46:59,060 --> 00:46:55,860

points with the laser with the system

1019

00:47:02,600 --> 00:46:59,070

off no system on and with those hundred

1020

00:47:05,360 --> 00:47:02,610

forty points we achieved a sigma for now

1021

00:47:07,250 --> 00:47:05,370

in order to get sigma v if you've been

1022

00:47:09,019 --> 00:47:07,260

you know reading about CERN with the

1023

00:47:11,089 --> 00:47:09,029

boson and all that they

1024

00:47:14,449 --> 00:47:11,099

and I on like ten million points to get

1025

00:47:17,509 --> 00:47:14,459

a Sigma Phi we just needed another 4,000

1026  
00:47:19,130 --> 00:47:17,519  
points to get a Sigma Phi and I wasn't

1027  
00:47:20,719 --> 00:47:19,140  
going to take that kind of eat up that

1028  
00:47:23,469 --> 00:47:20,729  
kind of time because we're not a

1029  
00:47:26,569 --> 00:47:23,479  
research lab you know we're trying to

1030  
00:47:27,349 --> 00:47:26,579  
apply what we've learned and make this

1031  
00:47:30,259 --> 00:47:27,359  
thing work

1032  
00:47:32,749 --> 00:47:30,269  
so I felt Sigma 4 was good enough for us

1033  
00:47:36,409 --> 00:47:32,759  
at this point but the compressing of a

1034  
00:47:38,569 --> 00:47:36,419  
laser beam is quite significant and the

1035  
00:47:40,579 --> 00:47:38,579  
next part of this which then also goes

1036  
00:47:43,279 --> 00:47:40,589  
to compression of spaces that we

1037  
00:47:46,039 --> 00:47:43,289  
discovered that we have a redshift that

1038  
00:47:48,380 --> 00:47:46,049

goes into the motor now then we could

1039

00:47:51,829 --> 00:47:48,390

correlate this to the effects of like a

1040

00:47:53,539 --> 00:47:51,839

black hole as you approach the fabric of

1041

00:47:56,299 --> 00:47:53,549

space to a black hole and you get near

1042

00:47:58,069 --> 00:47:56,309

the event horizon the fabric of space

1043

00:48:00,890 --> 00:47:58,079

would begin to compress but it also

1044

00:48:04,640 --> 00:48:00,900

exhibits the characteristics of a

1045

00:48:07,009 --> 00:48:04,650

redshift now with that said the next

1046

00:48:10,399 --> 00:48:07,019

point of this would be well how can you

1047

00:48:12,529 --> 00:48:10,409

prove that you're adjusting the fabric

1048

00:48:15,259 --> 00:48:12,539

of space what's the reach or the fetch

1049

00:48:17,479 --> 00:48:15,269

of this motor and that's why we set up

1050

00:48:21,289 --> 00:48:17,489

this modified Henry Cavendish experiment

1051

00:48:24,819 --> 00:48:21,299

where the torsion bars in an isolated

1052

00:48:27,949 --> 00:48:24,829

case there isn't any static electricity

1053

00:48:32,149 --> 00:48:27,959

there isn't any kind of a electro-motive

1054

00:48:35,599 --> 00:48:32,159

force here but this torsion bar when the

1055

00:48:37,849 --> 00:48:35,609

motor is positioned at a variety of

1056

00:48:41,179 --> 00:48:37,859

different distances but positions so

1057

00:48:43,429 --> 00:48:41,189

that it is accessing the on the end of

1058

00:48:44,689 --> 00:48:43,439

the torsion bar which are you know like

1059

00:48:47,269 --> 00:48:44,699

I said these three and a half pound

1060

00:48:51,589 --> 00:48:47,279

massive weights there and this thing

1061

00:48:54,079 --> 00:48:51,599

begins to pull towards the motor so that

1062

00:48:56,449 --> 00:48:54,089

the motor does not thrust it pulls and

1063

00:48:59,059 --> 00:48:56,459

so somebody's going to have to come up

1064

00:49:01,759 --> 00:48:59,069

and then explain to us with all the

1065

00:49:06,559 --> 00:49:01,769

results that we have is that everything

1066

00:49:09,049 --> 00:49:06,569

that we've experienced is totally bogus

1067

00:49:12,069 --> 00:49:09,059

and I'm going to tell you is that

1068

00:49:15,799 --> 00:49:12,079

they're not going to be able to

1069

00:49:17,870 --> 00:49:15,809

discredit what has happened here what

1070

00:49:20,209 --> 00:49:17,880

we've discovered we've also discovered

1071

00:49:22,130 --> 00:49:20,219

which was also another interesting point

1072

00:49:25,549 --> 00:49:22,140

we we

1073

00:49:27,680 --> 00:49:25,559

oh that it you just can't generate just

1074

00:49:29,930 --> 00:49:27,690

one big huge bubble and a lot of the

1075

00:49:31,910 --> 00:49:29,940

Thorntons talk about one big bubble

1076  
00:49:35,539 --> 00:49:31,920  
thousand meters big and all this type of

1077  
00:49:37,880 --> 00:49:35,549  
stuff and with the exotic energy we

1078  
00:49:41,240 --> 00:49:37,890  
discovered that you can make a larger

1079  
00:49:43,700 --> 00:49:41,250  
bubble from multiple sources and we've

1080  
00:49:47,210 --> 00:49:43,710  
also figured out how to steer this thing

1081  
00:49:50,990 --> 00:49:47,220  
so Al Kooper had a big problem in that

1082  
00:49:53,120 --> 00:49:51,000  
in his theorizing of this is you go

1083  
00:49:54,319 --> 00:49:53,130  
straight in a straight line well that's

1084  
00:49:58,670 --> 00:49:54,329  
not entirely true

1085  
00:50:00,289 --> 00:49:58,680  
this thing is affected by mass Gordon

1086  
00:50:03,200 --> 00:50:00,299  
went in at 10,000 feet and a hundred

1087  
00:50:05,450 --> 00:50:03,210  
miles later he came out of ten I'm sorry

1088  
00:50:07,309 --> 00:50:05,460

he went in at ten thousand feet and 100

1089

00:50:10,420 --> 00:50:07,319

miles later he came out at 10,000 feet

1090

00:50:13,579 --> 00:50:10,430

which meant that the mass of the earth

1091

00:50:15,289 --> 00:50:13,589

influenced the bubble and this means

1092

00:50:18,200 --> 00:50:15,299

that if you go on to space with this

1093

00:50:20,509 --> 00:50:18,210

bubble it means that if you're not into

1094

00:50:22,910 --> 00:50:20,519

a neutral point when you start to drive

1095

00:50:25,519 --> 00:50:22,920

out of the solar system you may be

1096

00:50:27,049 --> 00:50:25,529

influenced and again there's some

1097

00:50:30,319 --> 00:50:27,059

unknowns there because we haven't

1098

00:50:32,329 --> 00:50:30,329

obviously done that but in the lab we've

1099

00:50:35,269 --> 00:50:32,339

been able to put multiple engines

1100

00:50:37,549 --> 00:50:35,279

together and power one engine up more

1101  
00:50:42,769 --> 00:50:37,559  
than the other and we can get it to turn

1102  
00:50:44,900 --> 00:50:42,779  
on its axis so actual control is it was

1103  
00:50:48,349 --> 00:50:44,910  
a big consideration in design of the

1104  
00:50:50,990 --> 00:50:48,359  
blue bird with the multiple engine pods

1105  
00:50:54,470 --> 00:50:51,000  
that we have two on the one on each wing

1106  
00:50:58,160 --> 00:50:54,480  
tip and one prior a back of the cockpit

1107  
00:51:01,220 --> 00:50:58,170  
area and that will generate a bubble

1108  
00:51:04,970 --> 00:51:01,230  
that we can then control and articulate

1109  
00:51:08,120 --> 00:51:04,980  
the motors inside the pods to allow full

1110  
00:51:11,740 --> 00:51:08,130  
actual control of the craft so we're

1111  
00:51:14,509 --> 00:51:11,750  
very excited about that and we have our

1112  
00:51:17,539 --> 00:51:14,519  
power results and made comparisons

1113  
00:51:20,029 --> 00:51:17,549

against the ion drive thrusters that are

1114

00:51:21,650 --> 00:51:20,039

out there and we made a comparison and

1115

00:51:23,839 --> 00:51:21,660

you can see that in our paper that's

1116

00:51:27,380 --> 00:51:23,849

presented on the spaceport dynamics

1117

00:51:29,509 --> 00:51:27,390

website there's a comparison of the Dawn

1118

00:51:30,910 --> 00:51:29,519

spacecraft and their velocities of what

1119

00:51:34,580 --> 00:51:30,920

they achieve and what we've achieved

1120

00:51:37,730 --> 00:51:34,590

with a hundred watts of power

1121

00:51:40,040 --> 00:51:37,740

it's quite remarkable the significant

1122

00:51:41,840 --> 00:51:40,050

differences anion drive engine is the

1123

00:51:44,000 --> 00:51:41,850

equivalent of what they're using now on

1124

00:51:45,680 --> 00:51:44,010

a dawn spacecraft is the equivalent of

1125

00:51:48,370 --> 00:51:45,690

like holding a piece of paper in your

1126

00:51:50,900 --> 00:51:48,380

hand that's the amount of thrust

1127

00:51:53,890 --> 00:51:50,910

capability that it has and it's

1128

00:51:56,720 --> 00:51:53,900

cumulative and right now the fastest

1129

00:51:59,180 --> 00:51:56,730

spacecraft without any kind of

1130

00:52:01,100 --> 00:51:59,190

gravitational assist and that's like

1131

00:52:03,050 --> 00:52:01,110

twenty six thousand seven hundred miles

1132

00:52:05,660 --> 00:52:03,060

per hour now it's taken him about four

1133

00:52:08,690 --> 00:52:05,670

years to do that and using their same

1134

00:52:10,400 --> 00:52:08,700

specific impulse characteristics all the

1135

00:52:13,010 --> 00:52:10,410

same criteria that they would use with

1136

00:52:15,290 --> 00:52:13,020

the ion drive we did this with our 100

1137

00:52:20,030 --> 00:52:15,300

watt unit and that was an older engine

1138

00:52:23,750 --> 00:52:20,040

by the way and at 52 minute mark

1139

00:52:27,470 --> 00:52:23,760

were at 10.26 newtons of thrust

1140

00:52:31,040 --> 00:52:27,480

well equivalent okay this would be for

1141

00:52:33,650 --> 00:52:31,050

us a pull and an equivalent velocity

1142

00:52:35,270 --> 00:52:33,660

because we're traversing distance and

1143

00:52:39,640 --> 00:52:35,280

again this is a concept that a lot of

1144

00:52:42,830 --> 00:52:39,650

people have a lot of hard time grasping

1145

00:52:44,420 --> 00:52:42,840

but our equivalent velocity at the end

1146

00:52:46,490 --> 00:52:44,430

of a four year mark would be well over

1147

00:52:51,320 --> 00:52:46,500

three million miles per hour and with

1148

00:52:55,580 --> 00:52:51,330

the new motor that actually works out to

1149

00:52:57,680 --> 00:52:55,590

be almost double that like we'd be in

1150

00:52:59,780 --> 00:52:57,690

excess of six million miles an hour with

1151  
00:53:01,880 --> 00:52:59,790  
the new engine that we have tested and

1152  
00:53:04,280 --> 00:53:01,890  
that's old stuff because we have a new

1153  
00:53:06,980 --> 00:53:04,290  
motor and like I said every time we have

1154  
00:53:09,860 --> 00:53:06,990  
a new route eration of it it it's better

1155  
00:53:12,050 --> 00:53:09,870  
and better and better so that's our

1156  
00:53:14,570 --> 00:53:12,060  
ultimate goal but we we kind of made

1157  
00:53:17,660 --> 00:53:14,580  
that comparison so that people would

1158  
00:53:19,730 --> 00:53:17,670  
begin to realize is that or this is a

1159  
00:53:22,850 --> 00:53:19,740  
horse play this is serious stuff and

1160  
00:53:25,850 --> 00:53:22,860  
that what we have achieved at these low

1161  
00:53:28,730 --> 00:53:25,860  
power levels far exceed what the

1162  
00:53:31,640 --> 00:53:28,740  
abilities of the Zeon based ion drive

1163  
00:53:33,140 --> 00:53:31,650

spacecraft are and we'd love to get an

1164

00:53:35,660 --> 00:53:33,150

opportunity to stick one of these things

1165

00:53:38,120 --> 00:53:35,670

into space just as it is you know with

1166

00:53:40,310 --> 00:53:38,130

the technology that we have evolved and

1167

00:53:42,500 --> 00:53:40,320

developed we could run on batteries

1168

00:53:45,589 --> 00:53:42,510

that's the nice part about this so we

1169

00:53:49,940 --> 00:53:45,599

can run solar panels we can run on bat

1170

00:53:52,490 --> 00:53:49,950

it's not it we don't use any fuel so

1171

00:53:54,500 --> 00:53:52,500

which is amazing now is there anything

1172

00:53:56,809 --> 00:53:54,510

on YouTube this is another question up

1173

00:53:59,599 --> 00:53:56,819

on the board anything on YouTube people

1174

00:54:02,839 --> 00:53:59,609

can look at to see any of your progress

1175

00:54:05,630 --> 00:54:02,849

or anything in action well actually if

1176  
00:54:07,880 --> 00:54:05,640  
you go to the Space Warp dynamics

1177  
00:54:10,279 --> 00:54:07,890  
website there in the lower right hand

1178  
00:54:13,130 --> 00:54:10,289  
side of the first page there there's a

1179  
00:54:15,799 --> 00:54:13,140  
little tab or a button that says YouTube

1180  
00:54:18,380 --> 00:54:15,809  
videos and you can see kind of a

1181  
00:54:22,010 --> 00:54:18,390  
narrated piece that I do and it shows

1182  
00:54:25,849 --> 00:54:22,020  
the experiment of the torsion bar being

1183  
00:54:29,569 --> 00:54:25,859  
pulled by the motor and I you know I

1184  
00:54:31,430 --> 00:54:29,579  
have to say is my you know television

1185  
00:54:33,710 --> 00:54:31,440  
and production and all that kind of

1186  
00:54:36,829 --> 00:54:33,720  
stuff is you know I do I did a little

1187  
00:54:42,170 --> 00:54:36,839  
bit of that in high school as a kind of

1188  
00:54:45,160 --> 00:54:42,180

a hobby but we are not professionals you

1189

00:54:48,500 --> 00:54:45,170

have to give us a little bit of a

1190

00:54:51,019 --> 00:54:48,510

quarter on that our production and

1191

00:54:53,059 --> 00:54:51,029

capability but I think we get the point

1192

00:54:57,230 --> 00:54:53,069

across you see the motor you see the

1193

00:54:59,059 --> 00:54:57,240

isolated cage and we're all all of this

1194

00:55:02,390 --> 00:54:59,069

stuff is taking place into a Faraday

1195

00:55:04,130 --> 00:55:02,400

cage number one is that all and you know

1196

00:55:05,930 --> 00:55:04,140

straight a minute of the signals because

1197

00:55:07,910 --> 00:55:05,940

we didn't know what we were really

1198

00:55:09,799 --> 00:55:07,920

dealing with we didn't know the biologic

1199

00:55:12,529 --> 00:55:09,809

hazards of this thing if there were any

1200

00:55:15,500 --> 00:55:12,539

and so we've actually made measurements

1201  
00:55:18,890 --> 00:55:15,510  
of we have a Geiger counter digital and

1202  
00:55:21,319 --> 00:55:18,900  
also handheld type bold styles and with

1203  
00:55:27,200 --> 00:55:21,329  
the digital we had seen at a hundred

1204  
00:55:28,789 --> 00:55:27,210  
watts a half of microgram and to let

1205  
00:55:31,849 --> 00:55:28,799  
everybody know what that is there's a

1206  
00:55:34,700 --> 00:55:31,859  
thousand micrograms per REM which is a

1207  
00:55:37,160 --> 00:55:34,710  
very low amount of radiation the

1208  
00:55:40,010 --> 00:55:37,170  
background it's probably 12 to 18

1209  
00:55:42,769 --> 00:55:40,020  
micrograms that we experience on a

1210  
00:55:44,930 --> 00:55:42,779  
day-to-day basis natural uranium and the

1211  
00:55:47,660 --> 00:55:44,940  
soils and the wood and brick and things

1212  
00:55:51,339 --> 00:55:47,670  
like this sometimes you can get a little

1213  
00:55:54,769 --> 00:55:51,349

bit elevated but we're talking a half a

1214

00:55:57,970 --> 00:55:54,779

microgram of what we measured in the

1215

00:56:01,930 --> 00:55:57,980

throat of the engine

1216

00:56:04,089 --> 00:56:01,940

so with that said we still don't quite

1217

00:56:09,339 --> 00:56:04,099

understand what would be the

1218

00:56:11,980 --> 00:56:09,349

ramifications if you're getting wrapped

1219

00:56:15,430 --> 00:56:11,990

up into the fabric of space being

1220

00:56:18,190 --> 00:56:15,440

compressed and released how that affects

1221

00:56:21,010 --> 00:56:18,200

us on a cellular structure but I can

1222

00:56:23,500 --> 00:56:21,020

assure you that we're at a at this

1223

00:56:25,569 --> 00:56:23,510

junction we're you know with the Faraday

1224

00:56:27,760 --> 00:56:25,579

cage we have meters outside of the cage

1225

00:56:31,510 --> 00:56:27,770

and all of our meters are reading zero

1226

00:56:35,079 --> 00:56:31,520

and so we feel pretty comfortable in the

1227

00:56:37,839 --> 00:56:35,089

sense that of what we have you know

1228

00:56:40,990 --> 00:56:37,849

purposely investigated to see for our

1229

00:56:43,180 --> 00:56:41,000

health no one's gotten sick and we've

1230

00:56:48,490 --> 00:56:43,190

been doing this for years now I I

1231

00:56:50,589 --> 00:56:48,500

suspect that that we're fine well we're

1232

00:56:53,050 --> 00:56:50,599

right at the end of our show here can

1233

00:56:55,329 --> 00:56:53,060

you give out the name of your website

1234

00:56:58,630 --> 00:56:55,339

and also how someone can find you on the

1235

00:57:01,359 --> 00:56:58,640

IndieGoGo fun drive you have going sure

1236

00:57:04,660 --> 00:57:01,369

the IndieGoGo fun drive is you just type

1237

00:57:07,420 --> 00:57:04,670

in US Space Warp it will take you right

1238

00:57:12,390 --> 00:57:07,430

down into that particular segment the

1239

00:57:17,440 --> 00:57:12,400

the web sites that we have are Paris

1240

00:57:21,040 --> 00:57:17,450

Space Warp our Paris Space Warp research

1241

00:57:23,829 --> 00:57:21,050

org they'll take you to the base website

1242

00:57:28,480 --> 00:57:23,839

that we established but what you see is

1243

00:57:31,180 --> 00:57:28,490

actually kind of the as we have gone

1244

00:57:33,250 --> 00:57:31,190

around gone along from the beginning to

1245

00:57:35,470 --> 00:57:33,260

where we are right now and you'll see

1246

00:57:38,050 --> 00:57:35,480

buttons in there that that reference to

1247

00:57:40,540 --> 00:57:38,060

the Space Warp dynamics and there's

1248

00:57:42,430 --> 00:57:40,550

actually an independent war website for

1249

00:57:45,040 --> 00:57:42,440

that as well just type into your search

1250

00:57:47,800 --> 00:57:45,050

engine space warp dynamics and it'll pop

1251

00:57:49,569 --> 00:57:47,810

right up or just type in my name and ok

1252

00:57:51,910 --> 00:57:49,579

it will come up all right well hey

1253

00:57:54,339 --> 00:57:51,920

thanks so much we have to go for right

1254

00:57:57,940 --> 00:57:54,349

now and so that's it for our show today

1255

00:57:59,589 --> 00:57:57,950

and you can catch this podcast and any

1256

00:58:02,740 --> 00:57:59,599

other podcasts on our website which is

1257

00:58:05,170 --> 00:58:02,750

podcast UFO comm you can also check out

1258

00:58:07,420 --> 00:58:05,180

the links and the stories and our show

1259

00:58:09,040 --> 00:58:07,430

notes as well as joining in the

1260

00:58:11,680 --> 00:58:09,050

conversation in our forums I want to

1261

00:58:13,059 --> 00:58:11,690

give a quick thank to every thanks

1262

00:58:14,950 --> 00:58:13,069

one out there for helping out Keith

1263

00:58:18,339 --> 00:58:14,960

Rowland producer for Dark Matter radio

1264

00:58:20,740 --> 00:58:18,349

of course our guest David Paris we have

1265

00:58:23,620 --> 00:58:20,750

Carrie Lloyd Whitehouse and sui vac for

1266

00:58:25,450 --> 00:58:23,630

music they provide and Peggy shunning

1267

00:58:28,210 --> 00:58:25,460

for managing our Facebook and guess what

1268

00:58:30,819 --> 00:58:28,220

our Facebook page at 20,000 while we're

1269

00:58:33,520 --> 00:58:30,829

on the show here how about that 20,000

1270

00:58:35,079 --> 00:58:33,530

mics and you can check us out live next

1271

00:58:37,120 --> 00:58:35,089

week right here on the dark matter of

1272

00:58:40,690 --> 00:58:37,130

Radio Network 9:00 p.m. Eastern Standard
