

1
00:00:03,169 --> 00:00:02,389
and it hits me oh my gosh this is that

2
00:00:04,249 --> 00:00:03,179
triangle

3
00:00:05,360 --> 00:00:04,259
you know there's explanation for

4
00:00:07,309 --> 00:00:05,370
everything that occurred in the

5
00:00:09,680 --> 00:00:07,319
Rendlesham forest incident that doesn't

6
00:00:12,200 --> 00:00:09,690
involve aliens at all it was completely

7
00:00:16,010 --> 00:00:12,210
silent it comes right over our heads

8
00:00:17,630 --> 00:00:16,020
it's so classic flying-saucer really

9
00:00:19,400 --> 00:00:17,640
standing in the clearing he turned over

10
00:00:20,660 --> 00:00:19,410
to my father and held his hand and he

11
00:00:24,670 --> 00:00:20,670
looked in his eyes and said we're not

12
00:00:30,800 --> 00:00:28,099
welcome to podcast UFO for our live show

13
00:00:33,709 --> 00:00:30,810

we're live every Wednesday at 8 p.m.

14

00:00:36,170 --> 00:00:33,719

Eastern Standard Time on podcast UFO

15

00:00:38,240 --> 00:00:36,180

calm during the show feel free to

16

00:00:40,700 --> 00:00:38,250

participate live in our chat room and

17

00:00:43,700 --> 00:00:40,710

don't forget to like us on our very

18

00:00:45,260 --> 00:00:43,710

active Facebook page hello and welcome

19

00:00:47,990 --> 00:00:45,270

to the show on Martin Willis your host

20

00:00:51,500 --> 00:00:48,000

and we are live from a secret

21

00:00:53,479 --> 00:00:51,510

mountaintop and main well sounds good

22

00:00:54,110 --> 00:00:53,489

anyway and we have an interesting guest

23

00:00:57,350 --> 00:00:54,120

this evening

24

00:01:00,680 --> 00:00:57,360

Ron rig ear and he has been a UFO

25

00:01:03,110 --> 00:01:00,690

researcher for more than 50 years and is

26

00:01:06,230 --> 00:01:03,120

a retired aerospace engineer from

27

00:01:08,060 --> 00:01:06,240

Douglas Aircraft and Aerojet well before

28

00:01:11,330 --> 00:01:08,070

we get to him we're going to be talking

29

00:01:12,950 --> 00:01:11,340

to Alejandro Rojas with the news in just

30

00:01:16,039 --> 00:01:12,960

a minute but I want to thank all the

31

00:01:17,510 --> 00:01:16,049

listeners that support the show and if

32

00:01:19,640 --> 00:01:17,520

you can't support the show we still

33

00:01:22,249 --> 00:01:19,650

appreciate you and if you'd like to

34

00:01:24,410 --> 00:01:22,259

listen for free you can every Wednesday

35

00:01:28,520 --> 00:01:24,420

evening at 8 to 10 p.m. Eastern Standard

36

00:01:31,999 --> 00:01:28,530

Time and that is right here on podcast

37

00:01:34,219 --> 00:01:32,009

UFO comm you can also jump into the

38

00:01:36,920 --> 00:01:34,229

chatroom there and ask our guests some

39

00:01:40,670 --> 00:01:36,930

questions every week and we're also live

40

00:01:43,670 --> 00:01:40,680

on PSN radio now and there's an active

41

00:01:46,569 --> 00:01:43,680

Skype chat room on that as well don't

42

00:01:49,429 --> 00:01:46,579

forget we run the full show as a podcast

43

00:01:52,160 --> 00:01:49,439

every Thursday at 10:00 to midnight

44

00:01:53,480 --> 00:01:52,170

Eastern Standard Time on the Dark Matter

45

00:01:56,690 --> 00:01:53,490

digital network

46

00:01:58,850 --> 00:01:56,700

Alejandro how are you I am good how are

47

00:01:59,810 --> 00:01:58,860

you my friend good and I'm kind of

48

00:02:03,410 --> 00:01:59,820

excited

49

00:02:05,660 --> 00:02:03,420

I have a next week I have an important

50

00:02:08,719 --> 00:02:05,670

guest and that's you we're gonna do a

51
00:02:11,990 --> 00:02:08,729
whole darn show together um did you

52
00:02:13,490 --> 00:02:12,000
really you forgot no I do remember cuz I

53
00:02:17,440 --> 00:02:13,500
advertised it on

54
00:02:20,810 --> 00:02:17,450
show that's right so you're oh you did

55
00:02:23,300 --> 00:02:20,820
okay so you are committed I'm committed

56
00:02:27,470 --> 00:02:23,310
I told the world that it's gonna happen

57
00:02:30,080 --> 00:02:27,480
and I am a man of my word good to hear

58
00:02:31,010 --> 00:02:30,090
I knew done anyway so I'll be there yeah

59
00:02:33,980 --> 00:02:31,020
that'll be fun

60
00:02:36,380 --> 00:02:33,990
yeah what do you want to talk about with

61
00:02:39,320 --> 00:02:36,390
it on the show you know I think we'll

62
00:02:42,980 --> 00:02:39,330
probably have a game plan before that

63
00:02:43,400 --> 00:02:42,990

time okay yeah yeah that that sounds

64

00:02:46,010 --> 00:02:43,410

good

65

00:02:48,800 --> 00:02:46,020

yeah well so what's going on with the

66

00:02:52,790 --> 00:02:48,810

news this week there's UFOs all over the

67

00:02:55,130 --> 00:02:52,800

place and there's fake UFOs all over the

68

00:02:56,690 --> 00:02:55,140

place so I guess I'll just just to start

69

00:02:58,160 --> 00:02:56,700

off real quick

70

00:02:59,780 --> 00:02:58,170

there's a lot of fakes out there I've

71

00:03:03,560 --> 00:02:59,790

said this before that we're kind of in

72

00:03:07,340 --> 00:03:03,570

the age of the UK tabloids

73

00:03:09,680 --> 00:03:07,350

because now when you look for news you

74

00:03:11,810 --> 00:03:09,690

know there's the UK tabloids have

75

00:03:13,970 --> 00:03:11,820

stories every day now they're all

76

00:03:16,190 --> 00:03:13,980

jumping on this UFO bandwagon and

77

00:03:19,160 --> 00:03:16,200

they're jumping on the fake UFO

78

00:03:22,610 --> 00:03:19,170

bandwagon so secure team ten there's a

79

00:03:25,100 --> 00:03:22,620

new one called section 51 there's also

80

00:03:27,170 --> 00:03:25,110

this crappy news website that calls

81

00:03:30,199 --> 00:03:27,180

itself the science world report that is

82

00:03:33,050 --> 00:03:30,209

jumping in on this as well and they're

83

00:03:36,289 --> 00:03:33,060

posting all of these fake UFO videos

84

00:03:38,830 --> 00:03:36,299

these are all fake people so science

85

00:03:43,039 --> 00:03:38,840

world report if it comes from them or

86

00:03:44,840 --> 00:03:43,049

from these tabloids just disregard them

87

00:03:47,240 --> 00:03:44,850

so some of you might be following the

88

00:03:49,340 --> 00:03:47,250

open minds headlines we post every day

89

00:03:51,350 --> 00:03:49,350

the news headlines you'll notice we

90

00:03:52,850 --> 00:03:51,360

haven't been covering those but we've

91

00:03:54,560 --> 00:03:52,860

been covering other stories because

92

00:03:58,550 --> 00:03:54,570

there are interesting stories out there

93

00:04:00,770 --> 00:03:58,560

yeah no that's good you know there's is

94

00:04:02,990 --> 00:04:00,780

too bad there's no like real watchdog

95

00:04:04,759 --> 00:04:03,000

for this type of thing but what can you

96

00:04:06,680 --> 00:04:04,769

do you know I mean they now they're

97

00:04:08,990 --> 00:04:06,690

probably reporting other paranormal

98

00:04:14,509 --> 00:04:09,000

things that aren't so as well if it's

99

00:04:18,770 --> 00:04:14,519

you know are you aware that sir are the

100

00:04:20,750 --> 00:04:18,780

UK people yeah or is it mostly UFOs

101
00:04:22,880 --> 00:04:20,760
sometimes some other things there are

102
00:04:25,210 --> 00:04:22,890
some ghost videos or Bigfoot videos

103
00:04:26,590 --> 00:04:25,220
there was actually a Bigfoot video of

104
00:04:30,970 --> 00:04:26,600
caught by

105
00:04:32,380 --> 00:04:30,980
drone allegedly recently in Utah and it

106
00:04:36,040 --> 00:04:32,390
was kind of funny it turned out to be a

107
00:04:38,110 --> 00:04:36,050
hoax and the guy's gotten these silly

108
00:04:40,750 --> 00:04:38,120
costumes and we're teasing people with

109
00:04:44,070 --> 00:04:40,760
this video that they released showing

110
00:04:46,210 --> 00:04:44,080
how they were just tricking everyone but

111
00:04:48,910 --> 00:04:46,220
so that's kind of funny because a lot of

112
00:04:51,160 --> 00:04:48,920
people are using you know paranormal and

113
00:04:53,980 --> 00:04:51,170

the popularity of paranormal not just to

114

00:04:55,660 --> 00:04:53,990

get hits like the tabloids but also for

115

00:04:57,850 --> 00:04:55,670

marketing purposes because they know

116

00:05:00,220 --> 00:04:57,860

people like these tabloids will run with

117

00:05:01,270 --> 00:05:00,230

it and then unfortunately some of those

118

00:05:03,370 --> 00:05:01,280

stories are getting picked up by

119

00:05:05,860 --> 00:05:03,380

mainstream media and then they get a

120

00:05:10,210 --> 00:05:05,870

bunch of attention and a lot of hits and

121

00:05:12,190 --> 00:05:10,220

it's a great marketing tool yeah yeah

122

00:05:18,880 --> 00:05:12,200

not much you can do about it just what

123

00:05:22,060 --> 00:05:18,890

could you do hmm yeah is this what did

124

00:05:23,980 --> 00:05:22,070

we call the awkward yeah

125

00:05:28,870 --> 00:05:23,990

so I was just waiting for you to take

126

00:05:30,820 --> 00:05:28,880

the lead oh I see okay yeah so so what's

127

00:05:33,430 --> 00:05:30,830

actually happening that's real this week

128

00:05:37,090 --> 00:05:33,440

so what's happening that's real real

129

00:05:40,420 --> 00:05:37,100

UFOs so we have a gentleman charles

130

00:05:43,920 --> 00:05:40,430

lamoureux from vancouver who is a UFO

131

00:05:46,420 --> 00:05:43,930

hunter so he's out looking for UFOs

132

00:05:48,280 --> 00:05:46,430

frequently and he lives kind of in the

133

00:05:49,810 --> 00:05:48,290

downtown Vancouver area and he's got a

134

00:05:52,810 --> 00:05:49,820

lot of equipment he does this with

135

00:05:54,490 --> 00:05:52,820

cameras and and such and one of these

136

00:05:56,050 --> 00:05:54,500

cameras is a low Lux kind of

137

00:05:57,460 --> 00:05:56,060

night-vision camera he's got a regular

138

00:06:00,160 --> 00:05:57,470

camera he's got a thermal

139

00:06:03,640 --> 00:06:00,170

black-and-white camera so it detects

140

00:06:06,550 --> 00:06:03,650

heat and these heat signatures are

141

00:06:08,470 --> 00:06:06,560

different colors well on June 3rd just

142

00:06:11,050 --> 00:06:08,480

recently he caught something interesting

143

00:06:14,350 --> 00:06:11,060

that he sent over to us and it's an

144

00:06:17,070 --> 00:06:14,360

orange orb and he captures this on his

145

00:06:20,280 --> 00:06:17,080

night vision which captures color and

146

00:06:22,990 --> 00:06:20,290

you see this orb cruising across the sky

147

00:06:24,880 --> 00:06:23,000

then it goes in front of these buildings

148

00:06:27,010 --> 00:06:24,890

they're in Vancouver and it and it does

149

00:06:28,720 --> 00:06:27,020

make a turn at one point you can tell

150

00:06:31,660 --> 00:06:28,730

from the star field that you can see in

151
00:06:33,460 --> 00:06:31,670
the background and it definitely looks

152
00:06:37,090 --> 00:06:33,470
like an orb so it's really interesting

153
00:06:39,760 --> 00:06:37,100
he also shows that this object cannot be

154
00:06:40,300 --> 00:06:39,770
seen on the thermal that just means that

155
00:06:47,830 --> 00:06:40,310
it

156
00:06:50,290 --> 00:06:47,840
the other thing is that he couldn't see

157
00:06:52,120 --> 00:06:50,300
it with his eyes so kind of an

158
00:06:54,130 --> 00:06:52,130
interesting video I think the movement

159
00:06:59,860 --> 00:06:54,140
of this thing's really weird kind of

160
00:07:02,170 --> 00:06:59,870
cool now I talked to Mark Dantonio move

161
00:07:04,480 --> 00:07:02,180
on photo and video analyst and asked him

162
00:07:06,850 --> 00:07:04,490
what he thought and he said it could be

163
00:07:08,440 --> 00:07:06,860

trash blowing in the air

164

00:07:10,210 --> 00:07:08,450

I caught a video that was somewhat

165

00:07:13,270 --> 00:07:10,220

similar and you can see this one in the

166

00:07:17,110 --> 00:07:13,280

story as well in Las Vegas this was sent

167

00:07:18,850 --> 00:07:17,120

to me by a some people who went in on

168

00:07:21,760 --> 00:07:18,860

vacation in Vegas and they sent me the

169

00:07:23,530 --> 00:07:21,770

video and let me post it and this was

170

00:07:27,670 --> 00:07:23,540

years ago probably eight years ago

171

00:07:29,710 --> 00:07:27,680

something like that and you can see this

172

00:07:32,200 --> 00:07:29,720

thing kind of floating around really

173

00:07:34,270 --> 00:07:32,210

weird I think the videos still kind of

174

00:07:36,700 --> 00:07:34,280

strange mark is pretty convinced that

175

00:07:38,260 --> 00:07:36,710

that was trash and I can see that a

176

00:07:41,800 --> 00:07:38,270

little more because it does look like

177

00:07:43,690 --> 00:07:41,810

it's doing weird kind of things but this

178

00:07:46,090 --> 00:07:43,700

object that Charles got is kind of

179

00:07:50,740 --> 00:07:46,100

moving steadily along and makes this

180

00:07:53,020 --> 00:07:50,750

curved turn so my video guy here Michael

181

00:07:55,450 --> 00:07:53,030

Kline he also feels that it's probably

182

00:07:58,030 --> 00:07:55,460

some sort of trash floating in the air

183

00:07:59,500 --> 00:07:58,040

but either way it's a really neat video

184

00:08:02,860 --> 00:07:59,510

and I think Charles makes some good

185

00:08:05,590 --> 00:08:02,870

points that it's not trash just in the

186

00:08:07,900 --> 00:08:05,600

way that it moves in everything so I

187

00:08:10,600 --> 00:08:07,910

think this one's somewhat at least still

188

00:08:12,730 --> 00:08:10,610

mysterious but it's a real great video

189

00:08:16,540 --> 00:08:12,740

and Charles is a great guy so this is a

190

00:08:20,140 --> 00:08:16,550

good one you know when you take like an

191

00:08:22,570 --> 00:08:20,150

object you look at at through that night

192

00:08:25,240 --> 00:08:22,580

vision and it turns a certain color can

193

00:08:29,740 --> 00:08:25,250

you work back with to see what color it

194

00:08:33,520 --> 00:08:29,750

really would be well the the device that

195

00:08:36,460 --> 00:08:33,530

he uses is called a low Lux device so

196

00:08:39,100 --> 00:08:36,470

it's not necessarily like a traditional

197

00:08:42,400 --> 00:08:39,110

night vision like the military uses its

198

00:08:45,310 --> 00:08:42,410

it captures full color and it's more of

199

00:08:49,390 --> 00:08:45,320

just like a special sort of lens that

200

00:08:53,770 --> 00:08:49,400

can catch really low light and it can

201

00:08:55,480 --> 00:08:53,780

also capture infrared light

202

00:08:58,600 --> 00:08:55,490

so it just kind of has a wider spectrum

203

00:09:00,850 --> 00:08:58,610

so it's real color so what you see with

204

00:09:03,400 --> 00:09:00,860

this camera is real color and what's

205

00:09:05,320 --> 00:09:03,410

funny about this camera is that we've

206

00:09:07,690 --> 00:09:05,330

written a couple of stories on on UFO

207

00:09:11,200 --> 00:09:07,700

videos captured with this camera and now

208

00:09:13,630 --> 00:09:11,210

when you go to the website for this

209

00:09:16,600 --> 00:09:13,640

camera they have listed some of these

210

00:09:17,770 --> 00:09:16,610

videos including some of our stories on

211

00:09:19,000 --> 00:09:17,780

there which is kind of funny because

212

00:09:21,130 --> 00:09:19,010

that's the only thing they have on there

213

00:09:24,580 --> 00:09:21,140

so it must be popular for that purpose

214

00:09:28,240 --> 00:09:24,590

but yeah so that is it should be the

215

00:09:30,700 --> 00:09:28,250

real color of that it's receiving now if

216

00:09:33,660 --> 00:09:30,710

it's a reflection it could be a

217

00:09:36,670 --> 00:09:33,670

reflection of IR light and Mark Dantonio

218

00:09:38,760 --> 00:09:36,680

mentioned that because Charles feels the

219

00:09:41,980 --> 00:09:38,770

objects probably within a hundred feet

220

00:09:44,500 --> 00:09:41,990

mark felt that that was probably true so

221

00:09:46,390 --> 00:09:44,510

mark that well it could be reflecting IR

222

00:09:48,760 --> 00:09:46,400

light from the camera because the camera

223

00:09:51,130 --> 00:09:48,770

has the ability to throw out you know

224

00:09:53,590 --> 00:09:51,140

the IR light that can't be seen with

225

00:09:55,930 --> 00:09:53,600

your eyes and so it could be reflecting

226

00:10:01,930 --> 00:09:55,940

that however Charles says he had his IR

227

00:10:03,490 --> 00:10:01,940

off so it wasn't that so but it is kind

228

00:10:06,160 --> 00:10:03,500

of a reddish color if you've seen like

229

00:10:09,040 --> 00:10:06,170

for instance if you have an older camera

230

00:10:11,800 --> 00:10:09,050

lots of older cameras can catch IR so if

231

00:10:14,440 --> 00:10:11,810

you take your remote control which uses

232

00:10:17,350 --> 00:10:14,450

IR a lot I or like and face it at your

233

00:10:19,930 --> 00:10:17,360

older video camera and push the buttons

234

00:10:22,000 --> 00:10:19,940

you'll see the IR light on your remote

235

00:10:24,520 --> 00:10:22,010

control coming out at the end whereas

236

00:10:26,590 --> 00:10:24,530

you can't see that with your eye and

237

00:10:30,810 --> 00:10:26,600

when you do that you'll delight you

238

00:10:33,490 --> 00:10:30,820

typically a reddish kind of color so

239

00:10:35,590 --> 00:10:33,500

that that's one possibility they've

240

00:10:39,190 --> 00:10:35,600

thought of but Charles is pretty sure

241

00:10:41,380 --> 00:10:39,200

that that's not it oh well ok well what

242

00:10:43,570 --> 00:10:41,390

else is happening yeah some other

243

00:10:44,860 --> 00:10:43,580

interesting ones I know this is one that

244

00:10:47,050 --> 00:10:44,870

you thought was pretty interesting and

245

00:10:49,870 --> 00:10:47,060

it is this is somebody in Indiana and

246

00:10:54,460 --> 00:10:49,880

now this is a picture that was actually

247

00:10:56,860 --> 00:10:54,470

taken on March 2nd in 2015 but only

248

00:10:59,020 --> 00:10:56,870

recently submitted to move on and so

249

00:11:03,370 --> 00:10:59,030

this story was written by Roger Marsh of

250

00:11:06,340 --> 00:11:03,380

MUFON and this person says it was like 3

251
00:11:07,570 --> 00:11:06,350
o'clock in the morning and they were

252
00:11:09,370 --> 00:11:07,580
driving around for some

253
00:11:11,950 --> 00:11:09,380
and they kept driving her around at

254
00:11:14,100 --> 00:11:11,960
night they don't say why but when they

255
00:11:17,230 --> 00:11:14,110
passed this field they saw these three

256
00:11:19,000 --> 00:11:17,240
orbs above this field they thought it

257
00:11:21,700 --> 00:11:19,010
was kind of neat and kept moving on they

258
00:11:23,200 --> 00:11:21,710
came back later and saw the light so

259
00:11:25,150 --> 00:11:23,210
this time they stopped and looked and

260
00:11:27,220 --> 00:11:25,160
thought oh that's cool and it was

261
00:11:29,890 --> 00:11:27,230
something like the third time they came

262
00:11:32,110 --> 00:11:29,900
by that they finally decided to take a

263
00:11:34,660 --> 00:11:32,120

picture and they said that every time

264

00:11:36,250 --> 00:11:34,670

they came by it was for like 45 minute

265

00:11:39,370 --> 00:11:36,260

period these lights were sitting there

266

00:11:40,780 --> 00:11:39,380

and it's which is kind of weird that

267

00:11:43,210 --> 00:11:40,790

they would leave and come back and leave

268

00:11:46,810 --> 00:11:43,220

and come back so early in the morning

269

00:11:49,510 --> 00:11:46,820

but still the images are really

270

00:11:54,400 --> 00:11:49,520

interesting or the image because you do

271

00:11:56,440 --> 00:11:54,410

see these three round lights floating in

272

00:11:58,900 --> 00:11:56,450

the sky just floating there in a

273

00:12:00,370 --> 00:11:58,910

triangular formation of course any three

274

00:12:02,410 --> 00:12:00,380

lights would be that way and you can see

275

00:12:04,800 --> 00:12:02,420

they don't appear to be a solid object

276

00:12:07,870 --> 00:12:04,810

because it looks like you can see a

277

00:12:11,680 --> 00:12:07,880

contrail in between them behind them

278

00:12:12,630 --> 00:12:11,690

right and so yeah this is a really weird

279

00:12:16,480 --> 00:12:12,640

photo

280

00:12:18,760 --> 00:12:16,490

MUFON did look at this the investigator

281

00:12:21,610 --> 00:12:18,770

Patrick O'Brian did close it as an

282

00:12:23,470 --> 00:12:21,620

unknown so yeah you've seen this picture

283

00:12:25,810 --> 00:12:23,480

kind of weird huh yeah it's a it's

284

00:12:27,940 --> 00:12:25,820

actually really good the orbs or lights

285

00:12:32,230 --> 00:12:27,950

or whatever they are seem like they're

286

00:12:35,050 --> 00:12:32,240

perfectly round in very uniform and so

287

00:12:37,360 --> 00:12:35,060

is the triangle formation looks for a

288

00:12:40,300 --> 00:12:37,370

uniform as well of course that triangle

289

00:12:42,790 --> 00:12:40,310

from any angle can look different but I

290

00:12:45,700 --> 00:12:42,800

think it's a really great pictures

291

00:12:48,400 --> 00:12:45,710

really yeah really weird kind of a

292

00:12:50,350 --> 00:12:48,410

strange one and yes and see that they

293

00:12:53,080 --> 00:12:50,360

just jump on well in the show notes

294

00:12:55,120 --> 00:12:53,090

there's a link - oh yeah and TV

295

00:12:56,650 --> 00:12:55,130

everything's right there yeah and the

296

00:12:59,320 --> 00:12:56,660

last one I wanted to talk about really

297

00:13:02,800 --> 00:12:59,330

quick was a pilot who says he got in a

298

00:13:05,590 --> 00:13:02,810

dogfight with a sphere UFO so this pilot

299

00:13:10,330 --> 00:13:05,600

essentially says he was flying along and

300

00:13:12,700 --> 00:13:10,340

he found the he saw this object he said

301
00:13:17,370 --> 00:13:12,710
he was like at a thousand feet seems low

302
00:13:20,500 --> 00:13:17,380
but he was flying by and he was going

303
00:13:21,140 --> 00:13:20,510
this object passed by going the opposite

304
00:13:23,300 --> 00:13:21,150
direction

305
00:13:26,060 --> 00:13:23,310
said it was 300 feet after his thought

306
00:13:29,780 --> 00:13:26,070
of his less left wing and it looked like

307
00:13:31,550 --> 00:13:29,790
a metallic orb that was reflecting light

308
00:13:32,510 --> 00:13:31,560
and it was about the size of a

309
00:13:36,560 --> 00:13:32,520
basketball

310
00:13:38,540 --> 00:13:36,570
he said he then turned to try to catch

311
00:13:42,890 --> 00:13:38,550
up to this thing to go check it out

312
00:13:45,830 --> 00:13:42,900
but he said it turned also so when he

313
00:13:48,140 --> 00:13:45,840

kept maneuvering to try to fly over by

314

00:13:51,440 --> 00:13:48,150

this thing to check it out he says it

315

00:13:53,750 --> 00:13:51,450

also was trying to keep behind him and

316

00:13:55,910 --> 00:13:53,760

that's why he said he even use his term

317

00:14:00,050 --> 00:13:55,920

that it felt like they were they became

318

00:14:03,230 --> 00:14:00,060

engaged in a to turn dogfight is what he

319

00:14:05,180 --> 00:14:03,240

called it but after the second turn he

320

00:14:08,390 --> 00:14:05,190

said the object kind of broke away and

321

00:14:12,980 --> 00:14:08,400

went straight off to the south of him

322

00:14:14,630 --> 00:14:12,990

and then he lost sight of it she said

323

00:14:16,970 --> 00:14:14,640

that there's this is a second time this

324

00:14:22,370 --> 00:14:16,980

has happened to him and the last time

325

00:14:24,410 --> 00:14:22,380

this happened was in 1978 Wow yeah so

326

00:14:27,410 --> 00:14:24,420

this was over San Bernardino County in

327

00:14:28,730 --> 00:14:27,420

California but yeah that's another

328

00:14:32,450 --> 00:14:28,740

pretty interesting that said it's

329

00:14:34,610 --> 00:14:32,460

another MUFON report you know it sounds

330

00:14:38,000 --> 00:14:34,620

similar to some of the Foo Fighters

331

00:14:40,460 --> 00:14:38,010

during World War two it does it does it

332

00:14:42,790 --> 00:14:40,470

sounds similar to Foo Fighters and it

333

00:14:46,370 --> 00:14:42,800

could sound kind of weird but you know

334

00:14:50,810 --> 00:14:46,380

metallic spheres are reported fairly

335

00:14:55,430 --> 00:14:50,820

frequently and and craft that seems to

336

00:14:57,440 --> 00:14:55,440

be maneuvering out to stay away or from

337

00:15:00,530 --> 00:14:57,450

other aircraft is also something that's

338

00:15:03,860 --> 00:15:00,540

reported by pilots fairly frequently Oh

339

00:15:06,050 --> 00:15:03,870

certainly you've got dozens of cases

340

00:15:08,810 --> 00:15:06,060

from credible pilots that say this sort

341

00:15:10,730 --> 00:15:08,820

of thing has happened so who knows I

342

00:15:12,350 --> 00:15:10,740

guess it's a possibility but this is

343

00:15:15,380 --> 00:15:12,360

just another one to add to the list

344

00:15:17,510 --> 00:15:15,390

pretty strange yeah well hey thanks a

345

00:15:19,700 --> 00:15:17,520

lot Alejandro and that'll be it'll be

346

00:15:21,800 --> 00:15:19,710

great to have you here next week yeah

347

00:15:23,840 --> 00:15:21,810

it'll be a lot of fun I'm looking

348

00:15:26,060 --> 00:15:23,850

forward to it yeah now I'm going to set

349

00:15:29,480 --> 00:15:26,070

the stage a little for the upcoming

350

00:15:33,590 --> 00:15:29,490

guests Ron rig ear he is sitting outside

351
00:15:35,600 --> 00:15:33,600
on his porch on his cell phone because

352
00:15:37,600 --> 00:15:35,610
of two very loud pair

353
00:15:40,040 --> 00:15:37,610
and that's how we're gonna do the show

354
00:15:43,520 --> 00:15:40,050
did you have to deal with that Alejandro

355
00:15:45,230 --> 00:15:43,530
and yes I did and I think if I remember

356
00:15:47,540 --> 00:15:45,240
correctly last time I interviewed him

357
00:15:49,490 --> 00:15:47,550
I've known Ron for like a decade if not

358
00:15:53,420 --> 00:15:49,500
longer but I think the last time I

359
00:15:57,010 --> 00:15:53,430
interviewed him the parrots did get a

360
00:16:00,140 --> 00:15:57,020
little feisty and made themselves known

361
00:16:01,640 --> 00:16:00,150
in the background all right okay

362
00:16:03,470 --> 00:16:01,650
everyone so hang in there for the quick

363
00:17:13,990 --> 00:16:03,480

music break we'll be right back with Ron

364

00:17:19,760 --> 00:17:17,299

Ron Ricky R how are you fine thank you

365

00:17:22,880 --> 00:17:19,770

glad to have you on the show thank you

366

00:17:26,240 --> 00:17:22,890

dear I've heard your name over the years

367

00:17:29,510 --> 00:17:26,250

a number of times and you have quite an

368

00:17:31,990 --> 00:17:29,520

extensive background let's talk about

369

00:17:34,909 --> 00:17:32,000

that first and then I want to find out

370

00:17:37,549 --> 00:17:34,919

what captured your imagination and got

371

00:17:40,070 --> 00:17:37,559

you interested in UFOs but can you

372

00:17:42,799 --> 00:17:40,080

basically for the person that's unaware

373

00:17:46,450 --> 00:17:42,809

of your background can you basically

374

00:17:51,500 --> 00:17:46,460

tell them your satellite and aero engine

375

00:17:54,710 --> 00:17:51,510

aerospace engineer background sure I got

376

00:17:58,460 --> 00:17:54,720

started investment interested in UFOs

377

00:18:00,860 --> 00:17:58,470

back and C's long long time ago like in

378

00:18:03,340 --> 00:18:00,870

the 50s when they had all those horrible

379

00:18:06,230 --> 00:18:03,350

Class B movies

380

00:18:09,470 --> 00:18:06,240

invasion for space River every Saturday

381

00:18:11,810 --> 00:18:09,480

on khakha coke bottle or 7up bottle or

382

00:18:13,970 --> 00:18:11,820

roma milk bread wrapper that was all we

383

00:18:17,510 --> 00:18:13,980

needed to get into a matinee movie on

384

00:18:18,590 --> 00:18:17,520

Saturday see one of these B movies that

385

00:18:24,289 --> 00:18:18,600

I

386

00:18:26,990 --> 00:18:24,299

cool it was just a lot of fun and that

387

00:18:29,960 --> 00:18:27,000

kind of piqued my interest and that was

388

00:18:32,390 --> 00:18:29,970

about the same time major Keyhoe

389

00:18:35,299 --> 00:18:32,400

donkey came out and was talking about

390

00:18:37,130 --> 00:18:35,309

devils and we had one of the few

391

00:18:39,190 --> 00:18:37,140

televisions in the neighborhood and

392

00:18:43,399 --> 00:18:39,200

would have people gather around the TV

393

00:18:45,860 --> 00:18:43,409

that type television came on sometime in

394

00:18:48,770 --> 00:18:45,870

the morning we had two and sometimes

395

00:18:53,560 --> 00:18:48,780

three channels it went off the air until

396

00:18:55,820 --> 00:18:53,570

o'clock at by black and white of course

397

00:18:59,659 --> 00:18:55,830

would even sit around watch a test

398

00:19:02,120 --> 00:18:59,669

pattern but one of the shows was news

399

00:19:05,990 --> 00:19:02,130

show I'm not remembering who the host

400

00:19:08,600 --> 00:19:06,000

was but they were engera in this I think

401
00:19:12,289 --> 00:19:08,610
he was a marine major Don Quixote was

402
00:19:15,039 --> 00:19:12,299
talking about UFOs and I was fascinated

403
00:19:17,720 --> 00:19:15,049
by because here was confirmation that

404
00:19:18,890 --> 00:19:17,730
maybe these might be cheesy movies but

405
00:19:22,160 --> 00:19:18,900
at least there was

406
00:19:25,370 --> 00:19:22,170
some basis for them to jog here or in

407
00:19:27,650 --> 00:19:25,380
here so that kind of got me started on

408
00:19:30,860 --> 00:19:27,660
the whole thing and then when the

409
00:19:33,260 --> 00:19:30,870
Russians launched Sputnik right then and

410
00:19:35,300 --> 00:19:33,270
there I decided I would become an

411
00:19:41,630 --> 00:19:35,310
aeronautical engineer so I could figure

412
00:19:44,660 --> 00:19:41,640
out ways to keep those dirty commies and

413
00:19:47,960 --> 00:19:44,670

at the same time solve the mystery of

414

00:19:50,780 --> 00:19:47,970

UFOs because since I've been convinced

415

00:19:51,740 --> 00:19:50,790

by then that they were real and they

416

00:19:54,320 --> 00:19:51,750

could had all these flight

417

00:19:57,430 --> 00:19:54,330

characteristics how do they do that that

418

00:19:59,660 --> 00:19:57,440

was the question that kind of drove me

419

00:20:02,240 --> 00:19:59,670

Samet school got my degree in

420

00:20:05,360 --> 00:20:02,250

aeronautical engineering and went to

421

00:20:07,940 --> 00:20:05,370

work for Douglas Aircraft and hired on

422

00:20:18,380 --> 00:20:07,950

as part of the Saturn Apollo team this

423

00:20:22,420 --> 00:20:18,390

is back in 1962 no 63 and I was assigned

424

00:20:25,520 --> 00:20:22,430

as a electrical engineering department

425

00:20:27,430 --> 00:20:25,530

that was the only departments hoping

426

00:20:30,920 --> 00:20:27,440

they'd had at the time so I was

427

00:20:33,110 --> 00:20:30,930

responsible for out legree interphase

428

00:20:35,060 --> 00:20:33,120

all the electrical components which is

429

00:20:38,440 --> 00:20:35,070

between the upper stages and the lower

430

00:20:41,480 --> 00:20:38,450

stages of the Saturn Apollo moon rocket

431

00:20:45,440 --> 00:20:41,490

then I was fortunate to be in the right

432

00:20:47,990 --> 00:20:45,450

place at the right time to hear about

433

00:20:50,900 --> 00:20:48,000

this new and exciting project called

434

00:20:54,410 --> 00:20:50,910

Skylab well we call it the orbital

435

00:20:56,390 --> 00:20:54,420

workshop with most your listeners are

436

00:20:59,810 --> 00:20:56,400

probably too young to realize that in

437

00:21:03,950 --> 00:20:59,820

the early 60s we had a lot of failures

438

00:21:08,770 --> 00:21:03,960

or rockets with no go up and explode and

439

00:21:12,910 --> 00:21:08,780

I mean it was disastrous so we planned I

440

00:21:15,410 --> 00:21:12,920

think with 19 different moon launches

441

00:21:17,810 --> 00:21:15,420

figuring that about half of whom would

442

00:21:19,490 --> 00:21:17,820

crash so the astronauts really brave

443

00:21:22,100 --> 00:21:19,500

they were real heroes they were brave

444

00:21:24,460 --> 00:21:22,110

they they were they knew that about yeah

445

00:21:27,320 --> 00:21:24,470

that the longest thing crashed and they

446

00:21:32,280 --> 00:21:27,330

we had escaped modules built into him

447

00:21:33,780 --> 00:21:32,290

where if the firing off through was

448

00:21:35,520 --> 00:21:33,790

see that something was going to miss he

449

00:21:39,090 --> 00:21:35,530

could push the button and launch the

450

00:21:44,070 --> 00:21:39,100

crew capsule off of the main rocket but

451
00:21:47,010 --> 00:21:44,080
that was sketchy so anyway I worked on

452
00:21:54,410 --> 00:21:47,020
space on the orbital workshop for Skylab

453
00:22:00,680 --> 00:21:54,420
and then I transferred over to Douglas

454
00:22:04,890 --> 00:22:02,700
intelligence-gathering aircraft we

455
00:22:08,130 --> 00:22:04,900
called spy planes but the biggest

456
00:22:13,200 --> 00:22:08,140
gathering intelligence and that program

457
00:22:15,780 --> 00:22:13,210
was awarded to Boeing so I was all of a

458
00:22:19,380 --> 00:22:15,790
sudden out of a job the way they worked

459
00:22:21,450 --> 00:22:19,390
at narrow space at that time was it when

460
00:22:23,990 --> 00:22:21,460
they canceled the program everybody out

461
00:22:27,510 --> 00:22:24,000
of the program got laid off immediately

462
00:22:30,030 --> 00:22:27,520
and sent home and then they would hire

463
00:22:34,500 --> 00:22:30,040

the ones they wanted to cut back really

464

00:22:37,590 --> 00:22:34,510

well I was one devastated so I called a

465

00:22:39,270 --> 00:22:37,600

friend of mine and he said no we don't

466

00:22:40,500 --> 00:22:39,280

have it he hoped he's back here I was

467

00:22:43,080 --> 00:22:40,510

Huntington Beach there was this base

468

00:22:45,810 --> 00:22:43,090

division and while I was on the phone to

469

00:22:47,910 --> 00:22:45,820

him I got a call from Scott this little

470

00:22:49,260 --> 00:22:47,920

company named barrel jet he says Ron

471

00:22:53,070 --> 00:22:49,270

we've been looking at she wants you to

472

00:22:56,480 --> 00:22:53,080

come here and work for us so I started

473

00:23:01,380 --> 00:22:56,490

working there and there I worked on

474

00:23:04,050 --> 00:23:01,390

Spitz 31 years and past observation

475

00:23:07,500 --> 00:23:04,060

platforms or spy satellites and various

476
00:23:10,590 --> 00:23:07,510
sensing systems that would be able to

477
00:23:14,010 --> 00:23:10,600
detect better than the human eye or

478
00:23:17,340 --> 00:23:14,020
human senses could detect that's where I

479
00:23:18,810 --> 00:23:17,350
ended my career and retired and went to

480
00:23:22,100 --> 00:23:18,820
run a campground mobile home park

481
00:23:28,970 --> 00:23:22,110
continue my UFO research has started

482
00:23:32,400 --> 00:23:28,980
looking into very ancient to us Oh Vince

483
00:23:35,120 --> 00:23:32,410
what was it were there any of those and

484
00:23:37,590 --> 00:23:35,130
so I I lived in an area at that time

485
00:23:41,760 --> 00:23:37,600
where there were a lot of petroglyphs

486
00:23:45,240 --> 00:23:41,770
and pictographs petroglyphs are where

487
00:23:45,730 --> 00:23:45,250
these rock is incised pictographs or

488
00:23:47,530 --> 00:23:45,740

were

489

00:23:50,560 --> 00:23:47,540

there's a pigment or paint applied to

490

00:23:53,919 --> 00:23:50,570

the surface of the rock and long behold

491

00:23:58,390 --> 00:23:53,929

I started seeing what looked to be to be

492

00:24:01,000 --> 00:23:58,400

fly orbs or flying saucers and I talked

493

00:24:04,960 --> 00:24:01,010

to some of my nature friends and most of

494

00:24:09,160 --> 00:24:04,970

them were very quiet that either didn't

495

00:24:15,010 --> 00:24:09,170

know or claimed not to know and then I

496

00:24:17,740 --> 00:24:15,020

met suit Belcher and he was quite blunt

497

00:24:19,600 --> 00:24:17,750

about it he said yes those are those are

498

00:24:23,910 --> 00:24:19,610

the star people they come down and their

499

00:24:27,520 --> 00:24:23,920

ships and they have been coming here for

500

00:24:28,799 --> 00:24:27,530

for a long time when maybe speak about a

501
00:24:34,419 --> 00:24:28,809
long time they're talking about

502
00:24:38,110 --> 00:24:34,429
prehistoric times so that started a new

503
00:24:42,130 --> 00:24:38,120
realm of Investigation so I'm a state

504
00:24:45,820 --> 00:24:42,140
director new fonts for MUFON to talk for

505
00:24:48,430 --> 00:24:45,830
several years and I was asked to rewrite

506
00:24:52,480 --> 00:24:48,440
their field investigators mantle and I

507
00:24:54,160 --> 00:24:52,490
wrote that and brought it up to the 21st

508
00:24:57,580 --> 00:24:54,170
century it's now available

509
00:25:01,720 --> 00:24:57,590
electronically as well as hardcopy and

510
00:25:03,700 --> 00:25:01,730
wrote 23 operating procedures on using

511
00:25:07,570 --> 00:25:03,710
different items of equipment different

512
00:25:12,160 --> 00:25:07,580
techniques to be used in investigation

513
00:25:14,620 --> 00:25:12,170

shows that that's up to currents wow

514

00:25:17,350 --> 00:25:14,630

that's something I've said a number of

515

00:25:21,310 --> 00:25:17,360

times in the show that it really doesn't

516

00:25:23,290 --> 00:25:21,320

matter if it's ancient or now you know I

517

00:25:25,570 --> 00:25:23,300

mean as far as different stages of

518

00:25:28,150 --> 00:25:25,580

development of intelligence out there it

519

00:25:30,460 --> 00:25:28,160

could be at any point in our development

520

00:25:36,760 --> 00:25:30,470

that these things could be showing up

521

00:25:40,450 --> 00:25:36,770

you know as an example about time and

522

00:25:44,610 --> 00:25:40,460

development the 4.5 3 billion years that

523

00:25:46,690 --> 00:25:44,620

Earth has been here as far as we know

524

00:25:48,850 --> 00:25:46,700

Mark Dantonio

525

00:25:52,720 --> 00:25:48,860

he's been on this show a number of times

526
00:25:57,430 --> 00:25:52,730
he's a MUFON a photo analyst but I was

527
00:25:58,810 --> 00:25:57,440
at a talk where he displayed something

528
00:25:59,529 --> 00:25:58,820
that he did when he was teaching classes

529
00:26:12,009 --> 00:25:59,539
and

530
00:26:15,909 --> 00:26:12,019
what he did with it it was 350 feet long

531
00:26:17,799 --> 00:26:15,919
which is four thousand two hundred and

532
00:26:21,639 --> 00:26:17,809
twenty-two inches or something like that

533
00:26:24,580 --> 00:26:21,649
so he says okay this three hundred and

534
00:26:27,879 --> 00:26:24,590
fifty foot roll of toilet paper is the

535
00:26:31,239 --> 00:26:27,889
existence of earth and then down the

536
00:26:34,419 --> 00:26:31,249
line he would have this many feet out

537
00:26:37,560 --> 00:26:34,429
it's the first known life or you know

538
00:26:42,639 --> 00:26:37,570

all the way and when it comes to humans

539

00:26:46,210 --> 00:26:42,649

being a existing or let's just say Homo

540

00:26:48,700 --> 00:26:46,220

erectus which is the nearest well the

541

00:26:50,109 --> 00:26:48,710

oldest fossil of Homo erectus is 1.9

542

00:26:52,359 --> 00:26:50,119

million years old

543

00:26:54,849 --> 00:26:52,369

so that whole roll that whole roll of

544

00:26:56,259 --> 00:26:54,859

toilet paper the four thousand two

545

00:27:00,460 --> 00:26:56,269

hundred and twenty two inches I believe

546

00:27:05,169 --> 00:27:00,470

it is Homo erectus is only just over a

547

00:27:07,239 --> 00:27:05,179

half an inch at the end so it will give

548

00:27:10,450 --> 00:27:07,249

you a scope of time we can't figure out

549

00:27:13,539 --> 00:27:10,460

time it for the human brain you just

550

00:27:15,789 --> 00:27:13,549

can't you can't understand how much time

551

00:27:19,659 --> 00:27:15,799

that is but when you have it laid out

552

00:27:22,839 --> 00:27:19,669

like that you can see so they could have

553

00:27:26,249 --> 00:27:22,849

been visiting earth you know way before

554

00:27:29,879 --> 00:27:26,259

Homo erectus was here you know who knows

555

00:27:33,609 --> 00:27:29,889

it's all that's all fascinating to me

556

00:27:36,070 --> 00:27:33,619

some of the glyphs I found I sent you

557

00:27:40,089 --> 00:27:36,080

photos of them that I took and I believe

558

00:27:43,749 --> 00:27:40,099

you have both of them on your page our

559

00:27:47,349 --> 00:27:43,759

five to six thousand years old here and

560

00:27:50,589 --> 00:27:47,359

they show these flying orbs and there's

561

00:27:54,310 --> 00:27:50,599

a couple of pictures of what looks like

562

00:27:57,339 --> 00:27:54,320

the prototypical alien gray and just

563

00:28:01,529 --> 00:27:57,349

these things are amazing that they are

564

00:28:04,659 --> 00:28:01,539

there anthropologists and archaeologists

565

00:28:09,279 --> 00:28:04,669

both have both disciplines have a

566

00:28:11,530 --> 00:28:09,289

difficult time explaining them it's kind

567

00:28:16,090 --> 00:28:11,540

of fun listening to them guy actually

568

00:28:19,810 --> 00:28:16,100

but then talking with the Hopi and Zuni

569

00:28:22,780 --> 00:28:19,820

elders and I find it another common

570

00:28:31,270 --> 00:28:22,790

place these these things don't care all

571

00:28:33,480 --> 00:28:31,280

the time oh you okay yeah I just had to

572

00:28:36,490 --> 00:28:33,490

I so thought yeah that's good water

573

00:28:38,880 --> 00:28:36,500

if you wanted you wanted you want to

574

00:28:41,650 --> 00:28:38,890

take a quick break

575

00:28:45,280 --> 00:28:41,660

yeah okay

576

00:28:48,160 --> 00:28:45,290

so in just to let if if someone wants to

577

00:28:50,350 --> 00:28:48,170

make a quick call in your welcome to and

578

00:28:54,190 --> 00:28:50,360

the phone number here is six zero three

579

00:28:56,410 --> 00:28:54,200

nine six seven four OH three oh if

580

00:28:59,410 --> 00:28:56,420

anyone wants to call in and you want to

581

00:29:02,230 --> 00:28:59,420

talk about a sighting that you've had or

582

00:29:04,990 --> 00:29:02,240

anything like that we're letting Ron

583

00:29:07,810 --> 00:29:05,000

take a little break here so again that

584

00:29:16,270 --> 00:29:07,820

number is six oh three nine six seven

585

00:29:22,740 --> 00:29:16,280

four oh three oh are you back you need

586

00:29:31,330 --> 00:29:28,480

okay that's fine we don't have any

587

00:29:34,620 --> 00:29:31,340

commercials on this show but that's okay

588

00:29:37,330 --> 00:29:34,630

again if anyone wants to call in and

589

00:29:39,610 --> 00:29:37,340

it's too bad I just I didn't save that

590

00:29:43,390 --> 00:29:39,620

long-winded rant that I just did about

591

00:29:48,460 --> 00:29:43,400

the earth age for right now while he's

592

00:29:51,730 --> 00:29:48,470

gone but if you are listening live or

593

00:29:53,380 --> 00:29:51,740

actually as a podcast later on and you

594

00:29:58,180 --> 00:29:53,390

want to check out the show notes to this

595

00:30:00,430 --> 00:29:58,190

if you go to the end of Ron's bio down

596

00:30:03,030 --> 00:30:00,440

at the bottom you'll see three pictures

597

00:30:06,280 --> 00:30:03,040

of the glyphs that he was talking about

598

00:30:10,930 --> 00:30:06,290

a couple of them you can make out easily

599

00:30:13,480 --> 00:30:10,940

and some of them not not so easily but

600

00:30:17,650 --> 00:30:13,490

it is kind of curious a lot of the

601
00:30:21,340 --> 00:30:17,660
figures that the Native Americans drew

602
00:30:24,550 --> 00:30:21,350
are do have a similarity to what we

603
00:30:25,000 --> 00:30:24,560
think of as possible extraterrestrial

604
00:30:27,940 --> 00:30:25,010
and

605
00:30:34,450 --> 00:30:27,950
that is something that has fascinated me

606
00:30:37,150 --> 00:30:34,460
a long time is what the Native Americans

607
00:30:42,730 --> 00:30:37,160
call star people and the Hopi Indians

608
00:30:45,460 --> 00:30:42,740
are another another group that they have

609
00:30:49,690 --> 00:30:45,470
chena dolls and that are just really

610
00:30:52,060 --> 00:30:49,700
almost alien like are you back I'm back

611
00:30:54,190 --> 00:30:52,070
I'm back thank you for that break I

612
00:30:56,260 --> 00:30:54,200
apologize to you in to your audience

613
00:31:00,760 --> 00:30:56,270

I'll talk real fast to make up for

614

00:31:04,360 --> 00:31:00,770

houses no no no no need to worry you

615

00:31:06,940 --> 00:31:04,370

were mentioning Kachinas and casinos

616

00:31:10,840 --> 00:31:06,950

they are the star people

617

00:31:14,440 --> 00:31:10,850

they have representatives from different

618

00:31:18,190 --> 00:31:14,450

galaxies there's a galaxy plan and both

619

00:31:22,060 --> 00:31:18,200

hope you know Oliver glow people and the

620

00:31:24,760 --> 00:31:22,070

casinos come down every year to san

621

00:31:27,280 --> 00:31:24,770

francisco peaks of the mountains are

622

00:31:30,610 --> 00:31:27,290

just north and a little bit west of

623

00:31:34,900 --> 00:31:30,620

Flagstaff Arizona from there they go to

624

00:31:39,250 --> 00:31:34,910

Zuni which is in extreme western edge of

625

00:31:42,280 --> 00:31:39,260

New Mexico just below i-40 and then

626
00:31:46,900 --> 00:31:42,290
after appearing in Zuni they then go to

627
00:31:49,990 --> 00:31:46,910
the different problems and these star

628
00:31:53,280 --> 00:31:50,000
people are acknowledged in their

629
00:31:57,790 --> 00:31:53,290
religious carvings and their dances and

630
00:31:59,920 --> 00:31:57,800
this weekend is coming up we're coming

631
00:32:03,580 --> 00:31:59,930
up on the Solstice on the 21st and they

632
00:32:06,070 --> 00:32:03,590
will be and ceremony for the day before

633
00:32:07,870 --> 00:32:06,080
occurring of the day after so we're

634
00:32:12,010 --> 00:32:07,880
getting into high seasons for that now

635
00:32:15,540 --> 00:32:12,020
but the Kachinas and our representative

636
00:32:20,220 --> 00:32:15,550
and some of the paintings as well

637
00:32:25,000 --> 00:32:20,230
pictographs and the star people are also

638
00:32:27,340 --> 00:32:25,010

represented there's a one set of 19

639

00:32:29,980 --> 00:32:27,350

different images that are close to

640

00:32:33,130 --> 00:32:29,990

life-size like the sago canyon

641

00:32:36,940 --> 00:32:33,140

pictographs and those are about six

642

00:32:38,560 --> 00:32:36,950

thousand years old and if you look

643

00:32:44,889 --> 00:32:38,570

carefully you can see

644

00:32:47,549 --> 00:32:44,899

the spheres or orbs fly off leaving the

645

00:32:52,049 --> 00:32:47,559

Watchers behind those Watchers are there

646

00:32:53,589 --> 00:32:52,059

to keep skinwalker remember the

647

00:32:57,069 --> 00:32:53,599

skinwalker ranch

648

00:32:59,409 --> 00:32:57,079

oh yes mm-hmm oh but the goal if we go

649

00:33:01,959 --> 00:32:59,419

up the canyon from sagal Canyon

650

00:33:04,569 --> 00:33:01,969

yeah it's true reservations row goes up

651
00:33:07,719 --> 00:33:04,579
through if you pass through a gate it's

652
00:33:10,329 --> 00:33:07,729
locked unless you're human and down the

653
00:33:13,479 --> 00:33:10,339
other side you come to the skinwalker

654
00:33:16,949 --> 00:33:13,489
ranch and that's Ken Walker that whole

655
00:33:20,589 --> 00:33:16,959
spirit that which depending on which

656
00:33:22,689 --> 00:33:20,599
Gauri's wish to accept but it's a

657
00:33:27,089 --> 00:33:22,699
malevolent force irrespective of which

658
00:33:32,199 --> 00:33:27,099
one is that the other at the canyon so

659
00:33:35,469 --> 00:33:32,209
most 19 figures are there for the sole

660
00:33:40,659 --> 00:33:35,479
purpose of warning people don't go up

661
00:33:44,939 --> 00:33:40,669
this canyon and use their power to the

662
00:33:47,019 --> 00:33:44,949
evil malevolent being in the canyon and

663
00:33:51,879 --> 00:33:47,029

another cliff that's there I did not

664

00:33:56,409 --> 00:33:51,889

send you as a glyph and I've no reason

665

00:33:59,139 --> 00:33:56,419

other than just did cross my mind I'm is

666

00:34:03,029 --> 00:33:59,149

there's a witch that's being constrained

667

00:34:05,349 --> 00:34:03,039

by the spiritual force of a medicine man

668

00:34:11,319 --> 00:34:05,359

fascinating set of lifts all of that one

669

00:34:14,559 --> 00:34:11,329

little area hmm I've actually seen I've

670

00:34:16,990 --> 00:34:14,569

actually seen some in California I was

671

00:34:18,909 --> 00:34:17,000

just totally amazed up on up on top of

672

00:34:22,659 --> 00:34:18,919

it wasn't really even a mountain it was

673

00:34:25,960 --> 00:34:22,669

just up in the hills and it's the one

674

00:34:31,359 --> 00:34:25,970

thing that puzzles me is how can they

675

00:34:35,379 --> 00:34:31,369

date these things you know maybe the

676

00:34:37,450 --> 00:34:35,389

pigments or something we're talking

677

00:34:41,799 --> 00:34:37,460

petroglyphs that's where the rock is in

678

00:34:44,230 --> 00:34:41,809

size mm-hmm there they can get a crude

679

00:34:47,169 --> 00:34:44,240

approximation based about how much of

680

00:34:49,599 --> 00:34:47,179

the Repat base you know let me back off

681

00:34:52,059 --> 00:34:49,609

there's I think most people have been in

682

00:34:52,540 --> 00:34:52,069

the desert or mountainous terrain that

683

00:34:56,140 --> 00:34:52,550

see

684

00:35:00,210 --> 00:34:56,150

a lot of rocks many of those rocks have

685

00:35:02,710 --> 00:35:00,220

a coating on them oxidation coating

686

00:35:06,370 --> 00:35:02,720

mineral coatings from different devices

687

00:35:09,130 --> 00:35:06,380

in the West all the sandstone we get a

688

00:35:12,670 --> 00:35:09,140

black called desert varnish it's a

689

00:35:16,420 --> 00:35:12,680

mixture of titanium and different metals

690

00:35:21,180 --> 00:35:16,430

that are leached out the positive on the

691

00:35:23,800 --> 00:35:21,190

surface part when that black part is

692

00:35:26,410 --> 00:35:23,810

upgraded away either by percussive

693

00:35:30,580 --> 00:35:26,420

hitting with the raw are scraping with a

694

00:35:34,780 --> 00:35:30,590

harder rock then it reveals the wider

695

00:35:37,180 --> 00:35:34,790

surface rock underneath then the process

696

00:35:41,920 --> 00:35:37,190

of repair Mesa redepositing whatever

697

00:35:44,170 --> 00:35:41,930

this film was this black years goes back

698

00:35:46,240 --> 00:35:44,180

and is redeposited because the system

699

00:35:50,530 --> 00:35:46,250

it's a natural system it doesn't stop

700

00:35:54,130 --> 00:35:50,540

and so by determining the thickness of

701
00:35:55,840 --> 00:35:54,140
every patina that's deposited from the

702
00:35:58,470 --> 00:35:55,850
time they were inside to the time can

703
00:36:02,200 --> 00:35:58,480
nature they can a rough approximation

704
00:36:07,150 --> 00:36:02,210
the other thing they do is to dig around

705
00:36:09,310 --> 00:36:07,160
the sites whether it's petroglyphs and

706
00:36:10,990 --> 00:36:09,320
see if they can find different artifacts

707
00:36:14,080 --> 00:36:11,000
with an enable them to get a more

708
00:36:15,970 --> 00:36:14,090
accurate gauge that's quite common yeah

709
00:36:18,940 --> 00:36:15,980
because these things it's not graffiti

710
00:36:23,080 --> 00:36:18,950
these were well thought out well planned

711
00:36:26,020 --> 00:36:23,090
and took a while to construct so with

712
00:36:29,410 --> 00:36:26,030
the pictographs there's a technopath of

713
00:36:33,880 --> 00:36:29,420

positive harvest and the pigments are

714

00:36:38,650 --> 00:36:33,890

for the most part part of life they're

715

00:36:44,290 --> 00:36:38,660

plant matter blood different different

716

00:36:46,270 --> 00:36:44,300

organic materials and those have life

717

00:36:49,510 --> 00:36:46,280

that they can measure with a lot more

718

00:36:52,420 --> 00:36:49,520

accuracy carbon-14 dating is one of them

719

00:36:56,080 --> 00:36:52,430

mm-hmm and so they can get really close

720

00:36:59,590 --> 00:36:56,090

with that but again they have certain

721

00:37:01,180 --> 00:36:59,600

characteristics of me and the artists

722

00:37:04,830 --> 00:37:01,190

work that they could say well this is

723

00:37:06,279 --> 00:37:04,840

this time period because of all the this

724

00:37:09,069 --> 00:37:06,289

literally

725

00:37:10,839 --> 00:37:09,079

thousands of these paddles and they tell

726

00:37:13,089 --> 00:37:10,849

stories of the migration they tell

727

00:37:16,599 --> 00:37:13,099

stories of today we fear there's floods

728

00:37:19,929 --> 00:37:16,609

they tell stories of could find water of

729

00:37:22,150 --> 00:37:19,939

this canon if they have different pet

730

00:37:24,849 --> 00:37:22,160

requests and pictographs that picks the

731

00:37:26,009 --> 00:37:24,859

supernova of 1054 there's one of that

732

00:37:30,609 --> 00:37:26,019

Canyon

733

00:37:32,709 --> 00:37:30,619

yeah there's that's requests and

734

00:37:35,069 --> 00:37:32,719

pictographs that talk about the moon

735

00:37:39,759 --> 00:37:35,079

phases there's something to talk about

736

00:37:42,569 --> 00:37:39,769

all manner of archaeology just those

737

00:37:45,669 --> 00:37:42,579

ancient techniques to determine

738

00:37:50,679 --> 00:37:45,679

astronomy positions there's moon phases

739

00:37:53,309 --> 00:37:50,689

there's fascinating series that their

740

00:37:57,009 --> 00:37:53,319

chakras Fajada Butte where they have

741

00:38:00,269 --> 00:37:57,019

stone dagger too too long

742

00:38:02,349 --> 00:38:00,279

large rocks that we we could not move

743

00:38:05,890 --> 00:38:02,359

today without it

744

00:38:08,650 --> 00:38:05,900

heavy equipment these rocks were

745

00:38:13,509 --> 00:38:08,660

positioned very carefully so as a

746

00:38:17,559 --> 00:38:13,519

solstice and the light would come down

747

00:38:22,899 --> 00:38:17,569

between these two rocks and a dagger of

748

00:38:26,009 --> 00:38:22,909

life with Traverse across a spiral and

749

00:38:31,829 --> 00:38:26,019

that would at a noon on the Solstice

750

00:38:37,509 --> 00:38:31,839

this dagger would precisely bisects the

751

00:38:40,199 --> 00:38:37,519

spiral amazing piece of work well up in

752

00:38:43,630 --> 00:38:40,209

richer Canyon near Moab there's a

753

00:38:47,109 --> 00:38:43,640

rattlesnake about a 10 or 12 foot

754

00:38:50,439 --> 00:38:47,119

rattlesnake petroglyph incised in the

755

00:38:53,739 --> 00:38:50,449

rock dutiful an anatomically correct a

756

00:38:57,939 --> 00:38:53,749

beautiful snake but at noon on the

757

00:39:00,789 --> 00:38:57,949

Solstice an arrowhead comes down pierces

758

00:39:04,179 --> 00:39:00,799

the skull of this rattlesnake it's just

759

00:39:08,529 --> 00:39:04,189

so cool like whoever thought of that and

760

00:39:10,630 --> 00:39:08,539

was able to execute it and if you

761

00:39:11,739 --> 00:39:10,640

imagine the patience it took to sit

762

00:39:14,829 --> 00:39:11,749

there and say okay

763

00:39:17,049 --> 00:39:14,839

let's move this rock over here and at

764

00:39:20,240 --> 00:39:17,059

noon on the Solstice we'll see what

765

00:39:22,700 --> 00:39:20,250

happens we can move this okay go

766

00:39:24,710 --> 00:39:22,710

appearance you have to be there several

767

00:39:27,500 --> 00:39:24,720

years to get everything position just

768

00:39:29,240 --> 00:39:27,510

right and then you'll have like she come

769

00:39:33,130 --> 00:39:29,250

out with his chisel or Carver real quick

770

00:39:37,850 --> 00:39:33,140

so yes they stopped by dick

771

00:39:42,430 --> 00:39:37,860

there's I sent you one group of three

772

00:39:45,770 --> 00:39:42,440

pictures remember that one is captured

773

00:39:50,060 --> 00:39:45,780

fleeing captured and returned I think

774

00:39:52,910 --> 00:39:50,070

the captain saw them interesting story

775

00:39:55,580 --> 00:39:52,920

did you get those I'm not sure I have

776

00:39:58,010 --> 00:39:55,590

three pictures I I don't know if you

777

00:39:59,750 --> 00:39:58,020

sent them to the same email address but

778

00:40:01,220 --> 00:39:59,760

anyway there are three I was just

779

00:40:02,810 --> 00:40:01,230

mentioning while we're on break here

780

00:40:05,540 --> 00:40:02,820

that if anyone wanted to see them

781

00:40:08,450 --> 00:40:05,550

they're down but on the in the show

782

00:40:12,550 --> 00:40:08,460

notes but I'm sorry all I have is three

783

00:40:14,780 --> 00:40:12,560

I can add some more later but go ahead

784

00:40:17,270 --> 00:40:14,790

talk about I went to a different

785

00:40:19,790 --> 00:40:17,280

computer and I might have used a

786

00:40:22,790 --> 00:40:19,800

different email address for you one was

787

00:40:26,300 --> 00:40:22,800

I see sir and I forget what the other

788

00:40:30,380 --> 00:40:26,310

one was they may get a different inbox

789

00:40:32,720 --> 00:40:30,390

but there's a big croc I'd let me give

790

00:40:36,770 --> 00:40:32,730

you the backstory I think it's

791

00:40:40,850 --> 00:40:36,780

interesting there's I have a reputation

792

00:40:43,730 --> 00:40:40,860

of being the UFO guy and the gentleman

793

00:40:47,060 --> 00:40:43,740

came up to me one guy one day he looked

794

00:40:50,600 --> 00:40:47,070

at me and can I help you turn the UFO

795

00:40:52,490 --> 00:40:50,610

guy aren't yet I said yeah you gotta go

796

00:40:55,220 --> 00:40:52,500

down to the booth next you gotta go down

797

00:40:56,930 --> 00:40:55,230

there there's this huge huge rocks a

798

00:41:00,650 --> 00:40:56,940

four-foot tall a wave on it

799

00:41:02,390 --> 00:41:00,660

I got my attention so I clicked up a

800

00:41:04,430 --> 00:41:02,400

little bit each can be some rough

801
00:41:07,310 --> 00:41:04,440
directions said you go down there to the

802
00:41:10,130 --> 00:41:07,320
road to post next turn right on a dirt

803
00:41:11,570 --> 00:41:10,140
road go for about a mile there's a huge

804
00:41:13,760 --> 00:41:11,580
boulder all by itself

805
00:41:16,820 --> 00:41:13,770
and you can't miss it's got these four

806
00:41:18,500 --> 00:41:16,830
foot tall aliens on it what I've right

807
00:41:23,810 --> 00:41:18,510
here the term can't miss it that's the

808
00:41:26,450 --> 00:41:23,820
kiss of death but anyway the other thing

809
00:41:28,540 --> 00:41:26,460
most if you have listeners not here in

810
00:41:32,240 --> 00:41:28,550
the West I'll tell acknowledge it and

811
00:41:33,590 --> 00:41:32,250
not so much backe flipped on hundreds of

812
00:41:35,900 --> 00:41:33,600
dirt roads out here

813
00:41:38,390 --> 00:41:35,910

most of the area if you were to get a

814

00:41:40,940 --> 00:41:38,400

sheet of glass and drop it about a foot

815

00:41:43,970 --> 00:41:40,950

on to the concrete the cracks would be

816

00:41:47,960 --> 00:41:43,980

about like the dirt roads they just

817

00:41:50,420 --> 00:41:47,970

proliferate and so on the finding the

818

00:41:53,840 --> 00:41:50,430

right road for we're fairly remote but I

819

00:41:57,500 --> 00:41:53,850

did find it a one-mile in all of God's

820

00:42:01,430 --> 00:41:57,510

most gruff absolutely no rocks at all

821

00:42:04,160 --> 00:42:01,440

but to be seen I checked every rock of

822

00:42:08,180 --> 00:42:04,170

any significant size for seven miles

823

00:42:10,520 --> 00:42:08,190

going up this Canyon I finally found

824

00:42:13,430 --> 00:42:10,530

this folder as fortunately it was right

825

00:42:15,380 --> 00:42:13,440

next to the road I mean you could roll

826

00:42:16,610 --> 00:42:15,390

down the passenger car window and touch

827

00:42:20,780 --> 00:42:16,620

it that's how close it was

828

00:42:24,560 --> 00:42:20,790

mm-hm but it's about eight foot to nine

829

00:42:29,660 --> 00:42:24,570

foot almost scoop in shape and on the

830

00:42:32,030 --> 00:42:29,670

front of this Boulder there's it's a

831

00:42:36,790 --> 00:42:32,040

there are three Petra Petra quests

832

00:42:40,820 --> 00:42:36,800

panels on the first panel shows a UFO

833

00:42:44,600 --> 00:42:40,830

which is a hope you slice you know their

834

00:42:49,280 --> 00:42:44,610

prophet Iota it's a mobile with an arrow

835

00:42:54,260 --> 00:42:49,290

at the bottom stylized man then there's

836

00:42:56,720 --> 00:42:54,270

a man with his ears down which means

837

00:42:58,430 --> 00:42:56,730

he's not really paying attention cuz

838

00:43:01,130 --> 00:42:58,440

then when they're paying attention your

839

00:43:03,470 --> 00:43:01,140

ears are up then there's some bird

840

00:43:06,500 --> 00:43:03,480

flying and then there's a deer

841

00:43:09,920 --> 00:43:06,510

footprints with the dewclaws short so

842

00:43:14,210 --> 00:43:09,930

that means he was fearful and running

843

00:43:18,550 --> 00:43:14,220

from this UFO so that and there's a

844

00:43:22,190 --> 00:43:18,560

natural hole in the rock there so it's

845

00:43:24,560 --> 00:43:22,200

that was the first panel then slightly

846

00:43:30,500 --> 00:43:24,570

above that one into the left is a panel

847

00:43:33,350 --> 00:43:30,510

of flying serpent and he's captured this

848

00:43:35,660 --> 00:43:33,360

guy that's got his ears down his arms

849

00:43:37,550 --> 00:43:35,670

hanging your shoulder sagging he's got

850

00:43:40,670 --> 00:43:37,560

no feet so he can't run he's got no

851
00:43:43,130 --> 00:43:40,680
hands so I can't fight and she's on a

852
00:43:45,520 --> 00:43:43,140
bird standing on a bird and the bird

853
00:43:47,480 --> 00:43:45,530
stopped flying which means he can't we

854
00:43:48,860 --> 00:43:47,490
Herbert's all these

855
00:43:53,110 --> 00:43:48,870
it's like when those when they're trying

856
00:43:55,520 --> 00:43:53,120
to get away from something so Helen he's

857
00:43:57,380 --> 00:43:55,530
about line for the print there so he's

858
00:44:02,540 --> 00:43:57,390
part of the mountain lion clan he's been

859
00:44:07,730 --> 00:44:02,550
taken by this flying reptile then the

860
00:44:10,790 --> 00:44:07,740
next panel shows a descending spiral so

861
00:44:13,490 --> 00:44:10,800
but the end is closed off and there's a

862
00:44:15,800 --> 00:44:13,500
snake blocking the end of it so it says

863
00:44:18,080 --> 00:44:15,810

he's been trying to get down just not by

864

00:44:22,310 --> 00:44:18,090

a serpent and then there's another

865

00:44:25,910 --> 00:44:22,320

spiral descending spiral and it's

866

00:44:28,420 --> 00:44:25,920

open-ended and there he is coming down

867

00:44:33,440 --> 00:44:28,430

with the help of a spirit person

868

00:44:35,240 --> 00:44:33,450

so all these beasts fleeing capture and

869

00:44:37,100 --> 00:44:35,250

returned by a spear first all on one

870

00:44:41,060 --> 00:44:37,110

rock I thought was it a beautiful

871

00:44:43,640 --> 00:44:41,070

depiction right there yeah this

872

00:44:48,260 --> 00:44:43,650

fascinates I went back and told Java

873

00:44:51,380 --> 00:44:48,270

sits on seven miles not one there's no

874

00:44:54,020 --> 00:44:51,390

aliens there just a flying Serpent and

875

00:44:56,750 --> 00:44:54,030

they're about three inches tall four

876

00:44:57,470 --> 00:44:56,760

inches tall did a four-foot either he

877

00:45:00,980 --> 00:44:57,480

was little

878

00:45:13,280 --> 00:45:00,990

I'm trying to remember that desert yeah

879

00:45:17,480 --> 00:45:13,290

yeah I was thinking they was either that

880

00:45:19,910 --> 00:45:17,490

or you found the wrong rock now we're

881

00:45:22,640 --> 00:45:19,920

we're only about 15 minutes away from

882

00:45:24,530 --> 00:45:22,650

the top of the hour and I going to

883

00:45:28,880 --> 00:45:24,540

change gears a little bit here we can

884

00:45:31,970 --> 00:45:28,890

talk about the ancient connection again

885

00:45:34,960 --> 00:45:31,980

later on in the the second hour but I

886

00:45:38,000 --> 00:45:34,970

had I want to get back to satellites

887

00:45:41,180 --> 00:45:38,010

because you know we had a couple

888

00:45:43,220 --> 00:45:41,190

questions sent to us and I don't know if

889

00:45:45,620 --> 00:45:43,230

the listener is a subscriber or just

890

00:45:49,250 --> 00:45:45,630

listens to the first part of the show so

891

00:45:51,980 --> 00:45:49,260

I and I again I'd like to keep talking

892

00:45:54,800 --> 00:45:51,990

about that later on and because I think

893

00:45:59,240 --> 00:45:54,810

it's fascinating but with your

894

00:46:00,800 --> 00:45:59,250

involvement in the the satellites this

895

00:46:04,100 --> 00:46:00,810

question came in

896

00:46:06,560 --> 00:46:04,110

and he is asking I would like to know if

897

00:46:10,150 --> 00:46:06,570

you think there are monitoring systems

898

00:46:12,920 --> 00:46:10,160

pointing away from Earth out into space

899

00:46:14,900 --> 00:46:12,930

specifically that could be part of a

900

00:46:17,660 --> 00:46:14,910

classified program such as Star Wars

901
00:46:22,190 --> 00:46:17,670
defense system that was rumored to be in

902
00:46:26,500 --> 00:46:22,200
development that's one question okay see

903
00:46:29,060 --> 00:46:26,510
I start off by my involvement with the

904
00:46:32,210 --> 00:46:29,070
satellites was I wrote the performance

905
00:46:35,090 --> 00:46:32,220
design specs we're all part of a team I

906
00:46:38,780 --> 00:46:35,100
mean there's team members of thousands

907
00:46:40,790 --> 00:46:38,790
six or eight five engineers led by a

908
00:46:42,680 --> 00:46:40,800
team leader I was not the team leader I

909
00:46:45,230 --> 00:46:42,690
wrote I wrote the specs I would tap

910
00:46:47,120 --> 00:46:45,240
everybody's brains and talk to the Air

911
00:46:49,910 --> 00:46:47,130
Force about what their requirements were

912
00:46:52,430 --> 00:46:49,920
and integrate their requirements with

913
00:46:56,110 --> 00:46:52,440

our capabilities and to provide the

914

00:46:59,720 --> 00:46:56,120

specifications the reason we did that is

915

00:47:03,710 --> 00:46:59,730

you might have the idea you hire me to

916

00:47:07,220 --> 00:47:03,720

paint your house your concept of me

917

00:47:09,380 --> 00:47:07,230

painting your house is to have maybe 40

918

00:47:12,140 --> 00:47:09,390

people with one-inch brushes very

919

00:47:14,330 --> 00:47:12,150

carefully going over every inch of it

920

00:47:16,340 --> 00:47:14,340

and I'm going to fly over it with one of

921

00:47:19,340 --> 00:47:16,350

these helicopters that has a 500 gallon

922

00:47:20,960 --> 00:47:19,350

bucket and drop it all at once so both

923

00:47:24,380 --> 00:47:20,970

of them get your house painted with a

924

00:47:26,900 --> 00:47:24,390

remarkably different results so what my

925

00:47:29,000 --> 00:47:26,910

job was to make sure that when you said

926
00:47:30,230 --> 00:47:29,010
you want the house payment and I said I

927
00:47:32,180 --> 00:47:30,240
was going to paint the house that we

928
00:47:34,670 --> 00:47:32,190
knew precisely what was going to happen

929
00:47:36,680 --> 00:47:34,680
what and what all the requirements were

930
00:47:42,710 --> 00:47:36,690
and how you could verify that we did it

931
00:47:45,260 --> 00:47:42,720
right that was my job now then the other

932
00:47:50,150 --> 00:47:45,270
thing was you asked about is there a

933
00:47:53,360 --> 00:47:50,160
platform that looks into space no not

934
00:47:57,440 --> 00:47:53,370
directly and the reason is our primary

935
00:47:59,080 --> 00:47:57,450
goal is to protect Earth and to protect

936
00:48:02,960 --> 00:47:59,090
the continental United States

937
00:48:06,620 --> 00:48:02,970
so the spy satellites looked at the

938
00:48:09,520 --> 00:48:06,630

earth disk but they also look above the

939

00:48:11,930 --> 00:48:09,530

earth disk because that's where

940

00:48:13,610 --> 00:48:11,940

potential overseas threats who comes

941

00:48:14,630 --> 00:48:13,620

from a ballistic missile go up in the

942

00:48:16,880 --> 00:48:14,640

atmosphere and come

943

00:48:19,550 --> 00:48:16,890

come back down so we'd have to look to

944

00:48:22,850 --> 00:48:19,560

see if we see it coming over the

945

00:48:25,460 --> 00:48:22,860

atmosphere so it's from that respect we

946

00:48:27,920 --> 00:48:25,470

do see in the new space but it's not

947

00:48:31,840 --> 00:48:27,930

paint there per se were aimed at the

948

00:48:35,420 --> 00:48:31,850

earth - did that answer all those yeah

949

00:48:40,490 --> 00:48:35,430

yeah but let me just ask you this is I

950

00:48:44,480 --> 00:48:40,500

think I read somewhere were you talk

951
00:48:48,100 --> 00:48:44,490
about the fact that UFOs could possibly

952
00:48:53,060 --> 00:48:48,110
be caught on these spy satellites

953
00:48:54,350 --> 00:48:53,070
absolutely we did that most your readers

954
00:48:54,920 --> 00:48:54,360
will probably remember the Phoenix

955
00:48:58,850 --> 00:48:54,930
flight

956
00:49:02,000 --> 00:48:58,860
oh yeah yeah we we got that week now

957
00:49:03,890 --> 00:49:02,010
when I when I use the word track that

958
00:49:06,050 --> 00:49:03,900
being something different the way our

959
00:49:09,410 --> 00:49:06,060
system works than what most people think

960
00:49:14,930 --> 00:49:09,420
of so I'm going to say we tracked it but

961
00:49:17,020 --> 00:49:14,940
that's not a continuous tracking the way

962
00:49:20,060 --> 00:49:17,030
you would if you're standing that

963
00:49:23,450 --> 00:49:20,070

mountaintop watching a truck go by the

964

00:49:27,800 --> 00:49:23,460

distance respected for example our

965

00:49:30,320 --> 00:49:27,810

satellite takes pictures it's a scanning

966

00:49:33,380 --> 00:49:30,330

system and it scans and then rescan says

967

00:49:36,790 --> 00:49:33,390

a tree scans the entire Earth and so

968

00:49:40,670 --> 00:49:36,800

then we so we would see things and then

969

00:49:43,010 --> 00:49:40,680

using it moving target indicator MTI we

970

00:49:45,350 --> 00:49:43,020

could say oh this this object has moose

971

00:49:48,070 --> 00:49:45,360

is the last time therefore something

972

00:49:50,330 --> 00:49:48,080

dentists that we want to look at because

973

00:49:53,060 --> 00:49:50,340

stationary things nobody cares about

974

00:49:56,150 --> 00:49:53,070

looking at them at the top moving don't

975

00:50:00,350 --> 00:49:56,160

worry about so we look at moving things

976
00:50:04,070 --> 00:50:00,360
and that was what piqued our interest

977
00:50:05,090 --> 00:50:04,080
and we saw the phoenix life can you hold

978
00:50:08,030 --> 00:50:05,100
it just off of them

979
00:50:12,460 --> 00:50:08,040
just one second hell how often is a scan

980
00:50:14,630 --> 00:50:12,470
done that's classified but it's

981
00:50:17,000 --> 00:50:14,640
frequently enough so we don't worry

982
00:50:20,510 --> 00:50:17,010
about it let's just put it that way and

983
00:50:23,510 --> 00:50:20,520
the main reason is the data compression

984
00:50:28,020 --> 00:50:23,520
there's a whole lot of information

985
00:50:30,780 --> 00:50:28,030
gathered and if we have to look at it

986
00:50:33,750 --> 00:50:30,790
that you're blinking rapidly you can

987
00:50:37,620 --> 00:50:33,760
still track something but there's gaps

988
00:50:39,510 --> 00:50:37,630

in the tracking if you blink fast enough

989

00:50:42,330 --> 00:50:39,520

the gap still really matter

990

00:50:45,030 --> 00:50:42,340

yeah but if you that's so that's

991

00:50:48,900 --> 00:50:45,040

essentially what we're doing and we

992

00:50:52,730 --> 00:50:48,910

tracked it from Southern Nevada all the

993

00:50:55,470 --> 00:50:52,740

way aloft itself and east of Tucson

994

00:50:59,910 --> 00:50:55,480

now when you when this is being tracked

995

00:51:05,480 --> 00:50:59,920

are you able to detect speed and size or

996

00:51:10,080 --> 00:51:05,490

anything like that speed yes sighs no

997

00:51:12,450 --> 00:51:10,090

sighs is we're an infrared system and

998

00:51:15,570 --> 00:51:12,460

size depends upon how much you have to

999

00:51:19,740 --> 00:51:15,580

read the object is either reflecting or

1000

00:51:22,860 --> 00:51:19,750

generating if threat is heat so if it's

1001

00:51:25,650 --> 00:51:22,870

a really hot thing then it generates

1002

00:51:27,780 --> 00:51:25,660

more a really cool thing but it might

1003

00:51:32,340 --> 00:51:27,790

also be reflecting so we can get

1004

00:51:35,310 --> 00:51:32,350

relative intensities and then with known

1005

00:51:39,960 --> 00:51:35,320

sources then we can say oh we know what

1006

00:51:45,300 --> 00:51:39,970

this is because it has radiant intensity

1007

00:51:48,930 --> 00:51:45,310

is so much that's an idea you might have

1008

00:51:52,320 --> 00:51:48,940

a flash ball and a match the both have

1009

00:51:54,840 --> 00:51:52,330

the same amount of energy but the flash

1010

00:51:57,570 --> 00:51:54,850

bulb expends its energy very quickly

1011

00:51:59,550 --> 00:51:57,580

let's say a thousand four second whereas

1012

00:52:01,980 --> 00:51:59,560

a match has a bright flash and then

1013

00:52:04,140 --> 00:52:01,990

burned slowly over a longer period of

1014

00:52:05,460 --> 00:52:04,150

five hmm they both have the same energy

1015

00:52:07,980 --> 00:52:05,470

but they'll have different time

1016

00:52:10,380 --> 00:52:07,990

intensity profiles so you could say oh

1017

00:52:11,880 --> 00:52:10,390

that's way it's time intensity profile

1018

00:52:13,440 --> 00:52:11,890

stove's if the match

1019

00:52:17,490 --> 00:52:13,450

where's wow look at that that was a

1020

00:52:18,870 --> 00:52:17,500

flash bulb so that's the way we then

1021

00:52:20,910 --> 00:52:18,880

over a period of time we can identify

1022

00:52:24,060 --> 00:52:20,920

various targets based upon their time

1023

00:52:25,920 --> 00:52:24,070

intensity profile but this was a one

1024

00:52:27,900 --> 00:52:25,930

shot to go we hadn't seen it before so

1025

00:52:31,440 --> 00:52:27,910

we couldn't do that qualitative

1026
00:52:34,950 --> 00:52:31,450
measurement I see now okay so this

1027
00:52:38,070 --> 00:52:34,960
happened you I'm trying to picture

1028
00:52:39,870 --> 00:52:38,080
exactly how this it all works but let's

1029
00:52:41,550 --> 00:52:39,880
just say you're you're monitoring or

1030
00:52:44,990 --> 00:52:41,560
someone's monitoring or

1031
00:52:51,150 --> 00:52:45,000
even a computer's monitoring and this it

1032
00:52:54,810 --> 00:52:51,160
it in this in this Phoenix lights the

1033
00:52:56,640 --> 00:52:54,820
object whatever it was goes through

1034
00:53:01,530 --> 00:52:56,650
starting in Nevada and in the course

1035
00:53:08,390 --> 00:53:01,540
that you tracked it who gets that

1036
00:53:12,090 --> 00:53:08,400
information and how is it not a big deal

1037
00:53:15,030 --> 00:53:12,100
well it goes through several different

1038
00:53:18,410 --> 00:53:15,040

command space command is the main one

1039

00:53:21,540 --> 00:53:18,420

located at Cheyenne Mountain and the

1040

00:53:24,300 --> 00:53:21,550

data goes directly to Space Command and

1041

00:53:27,330 --> 00:53:24,310

several others users and the list is

1042

00:53:29,760 --> 00:53:27,340

classified but just suffice it to say if

1043

00:53:31,280 --> 00:53:29,770

the people that need to get it and the

1044

00:53:36,980 --> 00:53:31,290

people that don't need it don't get it

1045

00:53:40,680 --> 00:53:36,990

and but what we should to have at the

1046

00:53:45,780 --> 00:53:40,690

the Air Force Station large Plexiglas

1047

00:53:48,000 --> 00:53:45,790

map of the world with the grass clear

1048

00:53:49,650 --> 00:53:48,010

plexiglass and on the Plexiglas was a

1049

00:53:53,640 --> 00:53:49,660

map of the world this looked just like

1050

00:53:55,740 --> 00:53:53,650

the world so standard map and then there

1051

00:53:57,360 --> 00:53:55,750

was behind it there was an arm that

1052

00:53:59,340 --> 00:53:57,370

would rotate that had a whole bunch a

1053

00:54:02,160 --> 00:53:59,350

little peanut bolts in it and whenever

1054

00:54:05,910 --> 00:54:02,170

there was a knob detected the life would

1055

00:54:07,530 --> 00:54:05,920

blink on and an airman with the grease

1056

00:54:10,470 --> 00:54:07,540

pencil would vote for the next on the

1057

00:54:16,800 --> 00:54:10,480

map that doesn't provide a lot of

1058

00:54:20,340 --> 00:54:16,810

accuracy so we later on we find that as

1059

00:54:23,520 --> 00:54:20,350

computers became more capable computer

1060

00:54:26,940 --> 00:54:23,530

program that would enable us to do all

1061

00:54:28,650 --> 00:54:26,950

of this electronically but Gus remember

1062

00:54:32,310 --> 00:54:28,660

the old science fiction shows whether

1063

00:54:34,140 --> 00:54:32,320

they had the reels of tape there were 18

1064

00:54:39,290 --> 00:54:34,150

inches diameter that's spinning in the

1065

00:54:45,030 --> 00:54:39,300

background oh yeah we should build one

1066

00:54:47,520 --> 00:54:45,040

tape would be 15 minutes of data and

1067

00:54:50,370 --> 00:54:47,530

we're running 24/7 so you could imagine

1068

00:54:53,670 --> 00:54:50,380

how many tapes we would use it and we

1069

00:54:55,470 --> 00:54:53,680

can't use the whole tape because we have

1070

00:54:59,340 --> 00:54:55,480

to reload load so we

1071

00:55:01,230 --> 00:54:59,350

run a tape we run three tapes so we can

1072

00:55:06,510 --> 00:55:01,240

always make sure there's no gas in the

1073

00:55:11,700 --> 00:55:06,520

coverage each tape 15-minute tape gives

1074

00:55:15,420 --> 00:55:11,710

us about six and six back of the eight

1075

00:55:17,910 --> 00:55:15,430

and a half by fourteen paper printer

1076
00:55:21,030 --> 00:55:17,920
paper now the printers are going crazy

1077
00:55:26,730 --> 00:55:21,040
when we're doing this so that this is

1078
00:55:29,430 --> 00:55:26,740
going on all the time 24/7 365 and it's

1079
00:55:31,350 --> 00:55:29,440
a fascinating thing to watch realize we

1080
00:55:34,770 --> 00:55:31,360
can't always print this so we have

1081
00:55:38,540 --> 00:55:34,780
another electronic program that looks at

1082
00:55:43,050 --> 00:55:38,550
these data electronically and sorts out

1083
00:55:45,360 --> 00:55:43,060
it's sort of like when you're when

1084
00:55:46,890 --> 00:55:45,370
you're busy working you can you can sort

1085
00:55:48,630 --> 00:55:46,900
out you say okay I'm going to listen for

1086
00:55:51,720 --> 00:55:48,640
my wife and my girlfriend splice I'm

1087
00:55:53,400 --> 00:55:51,730
gonna listen for the telephone I'll just

1088
00:55:55,620 --> 00:55:53,410

hear it but it won't rote register I

1089

00:55:58,790 --> 00:55:55,630

won't pay any attention to the cat with

1090

00:56:01,260 --> 00:55:58,800

scratches or any of these other things

1091

00:56:03,240 --> 00:56:01,270

so that's what our software does it

1092

00:56:04,710 --> 00:56:03,250

listens to what it's supposed to listen

1093

00:56:06,840 --> 00:56:04,720

for and doesn't listens for anything

1094

00:56:10,050 --> 00:56:06,850

else it still keeps it but it doesn't

1095

00:56:13,260 --> 00:56:10,060

report it and then when something

1096

00:56:15,990 --> 00:56:13,270

happens that's of significance then it

1097

00:56:20,520 --> 00:56:16,000

figures an alert and we get an instant

1098

00:56:25,140 --> 00:56:20,530

report model now how long ago was this

1099

00:56:29,160 --> 00:56:25,150

as far as that technology oh it's still

1100

00:56:34,830 --> 00:56:29,170

going on this started the grease pencil

1101

00:56:38,520 --> 00:56:34,840

was in the early 60s to mid 70s early

1102

00:56:43,200 --> 00:56:38,530

80s and we it was it's an evolutionary

1103

00:56:46,830 --> 00:56:43,210

process and we continue to evolve the

1104

00:56:49,350 --> 00:56:46,840

process as computers get faster and more

1105

00:56:53,100 --> 00:56:49,360

capable obviously we were able to do

1106

00:56:55,320 --> 00:56:53,110

more processing now how are you privy to

1107

00:56:59,280 --> 00:56:55,330

know about the Phoenix lights of that

1108

00:57:01,740 --> 00:56:59,290

incident I wrote what is called a 60-day

1109

00:57:03,000 --> 00:57:01,750

report that was every 60 days we send a

1110

00:57:06,630 --> 00:57:03,010

full report of everything that's

1111

00:57:09,339 --> 00:57:06,640

happened to the US Air Force and so I

1112

00:57:12,700 --> 00:57:09,349

wrote the 60 day report I got all the

1113

00:57:14,829 --> 00:57:12,710

course that was one of them era there

1114

00:57:18,579 --> 00:57:14,839

was another one of the object that came

1115

00:57:24,849 --> 00:57:18,589

from deep space crossed in front of our

1116

00:57:28,390 --> 00:57:24,859

star sensor made 92 returned appeared in

1117

00:57:32,559 --> 00:57:28,400

front of our primary sensor in a stately

1118

00:57:34,690 --> 00:57:32,569

fashion about twelve thousand miles an

1119

00:57:39,160 --> 00:57:34,700

hour which is Boyle escape lost just

1120

00:57:40,479 --> 00:57:39,170

went into space as a powered craft so we

1121

00:57:45,400 --> 00:57:40,489

knew that wasn't a meteor was a

1122

00:57:50,049 --> 00:57:45,410

meteorite was a tonne another object we

1123

00:57:57,099 --> 00:57:50,059

saw was the Iranian UFO was over a rock

1124

00:58:01,989 --> 00:57:57,109

in 1976 Wow so yeah we got a pretty good

1125

00:58:05,259 --> 00:58:01,999

record there was one event I don't know

1126
00:58:10,479 --> 00:58:05,269
how many people remember a sighting over

1127
00:58:12,099 --> 00:58:10,489
Colorado don't remember the guys Amy ran

1128
00:58:14,170 --> 00:58:12,109
a restaurant without his daughter in

1129
00:58:17,380 --> 00:58:14,180
videotape that it was a little over a

1130
00:58:22,089 --> 00:58:17,390
mile long we got a report of that one

1131
00:58:25,599 --> 00:58:22,099
day one of the analysts came down radix

1132
00:58:27,759 --> 00:58:25,609
real excited to just Ron we got got me

1133
00:58:34,109 --> 00:58:27,769
should I follow nice the Air Force says

1134
00:58:37,839 --> 00:58:34,119
it's a forest fire yeah so anyway the

1135
00:58:41,079 --> 00:58:37,849
local sheriff assilex but there was a

1136
00:58:42,729 --> 00:58:41,089
forest fire in his area and he sent

1137
00:58:45,969 --> 00:58:42,739
squads out he couldn't find any forest

1138
00:58:50,799 --> 00:58:45,979

where at all so that was that was an

1139

00:58:54,249 --> 00:58:50,809

interesting event now to me what you're

1140

00:58:57,089 --> 00:58:54,259

saying here sounds like scientific

1141

00:58:59,200 --> 00:58:57,099

evidence that these things are happening

1142

00:59:03,099 --> 00:58:59,210

oh yeah

1143

00:59:05,200 --> 00:59:03,109

and and for me to understand that just

1144

00:59:06,759 --> 00:59:05,210

gets pushed to someone else's desk and

1145

00:59:08,650 --> 00:59:06,769

you know the people that need to know

1146

00:59:12,989 --> 00:59:08,660

find out about it and then it goes

1147

00:59:15,519 --> 00:59:12,999

nowhere it's frustrating to hear that

1148

00:59:20,349 --> 00:59:15,529

it's resting to be a part of it

1149

00:59:22,180 --> 00:59:20,359

I bet and so you obviously with what you

1150

00:59:23,380 --> 00:59:22,190

just said a minute ago you're at least

1151

00:59:26,970 --> 00:59:23,390

some of your colleagues

1152

00:59:31,059 --> 00:59:26,980

new that you're interested in UFOs so

1153

00:59:33,549 --> 00:59:31,069

did you forcibly try to get anywhere

1154

00:59:37,210 --> 00:59:33,559

with any of this so is it just you just

1155

00:59:41,380 --> 00:59:37,220

held back by the bureaucracy of my whole

1156

00:59:45,039 --> 00:59:41,390

thing I escaped the edge of the

1157

00:59:47,170 --> 00:59:45,049

classified world and can that what I

1158

00:59:52,000 --> 00:59:47,180

mean is there's certain things are

1159

00:59:54,670 --> 00:59:52,010

classified and and justifiably saw

1160

00:59:58,390 --> 00:59:54,680

police especially back then

1161

01:00:01,599 --> 00:59:58,400

more so than now but for different

1162

01:00:04,299 --> 01:00:01,609

reasons but I do what the limits were

1163

01:00:05,950 --> 01:00:04,309

and I went right up to the edge of the

1164

01:00:07,769 --> 01:00:05,960

limits and I didn't reveal any

1165

01:00:12,009 --> 01:00:07,779

classified information I still haven't

1166

01:00:15,599 --> 01:00:12,019

but it really makes the security

1167

01:00:17,650 --> 01:00:15,609

personnel anxious I was interviewed by

1168

01:00:22,210 --> 01:00:17,660

Air Force Office of Special

1169

01:00:25,000 --> 01:00:22,220

Investigations captain you're ready for

1170

01:00:31,960 --> 01:00:25,010

a good laugh yeah I had one Captain

1171

01:00:34,420 --> 01:00:31,970

James Kirk okay and he came in he kicked

1172

01:00:35,829 --> 01:00:34,430

the security and the security out of his

1173

01:00:40,620 --> 01:00:35,839

office and says we're going to need your

1174

01:00:43,509 --> 01:00:40,630

office for about an hour and came in and

1175

01:00:47,980 --> 01:00:43,519

at tried to debrief me I told him

1176

01:00:50,349 --> 01:00:47,990

everything I told him and he was just

1177

01:00:53,620 --> 01:00:50,359

very flummoxed the first thing he said

1178

01:00:57,400 --> 01:00:53,630

I'm Captain James Kirk in civilian

1179

01:00:59,319 --> 01:00:57,410

clothes and I said oh yeah right he

1180

01:01:12,549 --> 01:00:59,329

ended up showing me his driver's license

1181

01:01:16,480 --> 01:01:12,559

is Air Force ID humor about it and he

1182

01:01:19,749 --> 01:01:16,490

took lotsa notes I never got any flak

1183

01:01:21,700 --> 01:01:19,759

from it it was just you know they they

1184

01:01:26,730 --> 01:01:21,710

have to check up on these things I'm

1185

01:01:30,759 --> 01:01:26,740

glad they do and another time I got a

1186

01:01:34,720 --> 01:01:30,769

classified document sent to Mia said to

1187

01:01:36,610 --> 01:01:34,730

my home Twix

1188

01:01:38,860 --> 01:01:36,620

not a Twix

1189

01:01:40,060 --> 01:01:38,870

can't remember the old-fashioned way we

1190

01:01:42,580 --> 01:01:40,070

just said something all the phone lines

1191

01:01:46,960 --> 01:01:42,590

on the piece of paper you mean a fax of

1192

01:01:49,660 --> 01:01:46,970

that yeah fax fax thank you I got a fax

1193

01:01:51,280 --> 01:01:49,670

and it what they had no classified

1194

01:01:54,070 --> 01:01:51,290

markings but I knew instantly what it

1195

01:01:56,850 --> 01:01:54,080

was because hot prepared the report that

1196

01:02:00,550 --> 01:01:56,860

it has this fighting in it

1197

01:02:04,260 --> 01:02:00,560

ha ha damn it where did this come from

1198

01:02:07,510 --> 01:02:04,270

so I'm 50 some odd miles away from work

1199

01:02:11,770 --> 01:02:07,520

that's I worked in Azusa and lived in

1200

01:02:15,220 --> 01:02:11,780

Huntington Beach at 53 miles one way so

1201

01:02:18,580 --> 01:02:15,230

I put it in a sealed envelope put it

1202

01:02:20,740 --> 01:02:18,590

under the mattress of my bed and next

1203

01:02:23,410 --> 01:02:20,750

morning took it in the Security office

1204

01:02:27,580 --> 01:02:23,420

and I said I received this classified

1205

01:02:29,680 --> 01:02:27,590

documents on a fax and I want to report

1206

01:02:32,220 --> 01:02:29,690

the first Senate to me because it's a

1207

01:02:34,360 --> 01:02:32,230

you know we got a violation somewhere

1208

01:02:36,130 --> 01:02:34,370

well they didn't believe it did any

1209

01:02:37,930 --> 01:02:36,140

classification markings on it so I had

1210

01:02:39,580 --> 01:02:37,940

to take him down to the vault show them

1211

01:02:42,910 --> 01:02:39,590

the classified document from which they

1212

01:02:45,070 --> 01:02:42,920

came and there was that same page but

1213

01:02:48,330 --> 01:02:45,080

the pace that I showed them in the vault

1214

01:02:51,430 --> 01:02:48,340

has classified markings on them so

1215

01:02:54,370 --> 01:02:51,440

there's a big boulder all there I was

1216

01:02:56,410 --> 01:02:54,380

ordered to go home I violated security

1217

01:03:01,420 --> 01:02:56,420

because I didn't properly take care of

1218

01:03:03,160 --> 01:03:01,430

it Oh big investigation that day I come

1219

01:03:05,470 --> 01:03:03,170

back the next morning and the security

1220

01:03:10,150 --> 01:03:05,480

guard when I walked in he says what the

1221

01:03:14,380 --> 01:03:10,160

hell did you do well the guy was sent to

1222

01:03:17,680 --> 01:03:14,390

investigate you he's been fired really

1223

01:03:20,410 --> 01:03:17,690

and yeah and I never did get to the

1224

01:03:21,970 --> 01:03:20,420

bottom of it but security left me alone

1225

01:03:24,790 --> 01:03:21,980

from then on I don't know what the hell

1226

01:03:26,880 --> 01:03:24,800

went on Wow well it's a bizarre series

1227

01:03:28,810 --> 01:03:26,890

of events food security was pretty tight

1228

01:03:41,350 --> 01:03:28,820

did this have anything to do with

1229

01:03:44,770 --> 01:03:41,360

Hillary's email okay well you know

1230

01:03:47,920 --> 01:03:44,780

someone said on the message board

1231

01:03:49,300 --> 01:03:47,930

let me just pull that back they they

1232

01:03:50,230 --> 01:03:49,310

said it seems like you're saying the

1233

01:03:52,510 --> 01:03:50,240

government is deliberate

1234

01:03:56,680 --> 01:03:52,520

we worth holding this stuff by

1235

01:04:01,000 --> 01:03:56,690

classifying it as secret and what do you

1236

01:04:03,609 --> 01:04:01,010

say no but it's the opposite it's

1237

01:04:07,960 --> 01:04:03,619

properly classified secret therefore it

1238

01:04:09,400 --> 01:04:07,970

is withheld I know it's a difference

1239

01:04:12,660 --> 01:04:09,410

there's a difference and that is there

1240

01:04:15,130 --> 01:04:12,670

something that are properly classified

1241

01:04:18,070 --> 01:04:15,140

let me just ask you this someone with an

1242

01:04:21,400 --> 01:04:18,080

interest in UFOs like yourself how do

1243

01:04:24,160 --> 01:04:21,410

you feel about um like let's just say I

1244

01:04:27,160 --> 01:04:24,170

don't know if this is so or not let's

1245

01:04:29,350 --> 01:04:27,170

just say the Phoenix lights incident you

1246

01:04:33,310 --> 01:04:29,360

know was recorded scientifically

1247

01:04:35,350 --> 01:04:33,320

recorded by this spy satellite and it

1248

01:04:38,200 --> 01:04:35,360

goes nowhere do you think that should be

1249

01:04:43,690 --> 01:04:38,210

classified or do you think that should

1250

01:04:47,020 --> 01:04:43,700

well go ahead to to release the fact

1251

01:04:49,060 --> 01:04:47,030

that we saw something it isn't a

1252

01:04:52,710 --> 01:04:49,070

scientific assessment that would enable

1253

01:04:56,740 --> 01:04:52,720

anybody to have any dreams put to it

1254

01:05:01,210 --> 01:04:56,750

they for somebody to say oh you got a

1255

01:05:03,310 --> 01:05:01,220

UFO show me your data show me what it

1256

01:05:06,040 --> 01:05:03,320

was raging intensity would show me it's

1257

01:05:08,349 --> 01:05:06,050

time intensity profile show me the raw

1258

01:05:10,810 --> 01:05:08,359

data that enables you to determine this

1259

01:05:13,690 --> 01:05:10,820

and all those are all data are

1260

01:05:16,390 --> 01:05:13,700

classified and properly so because it

1261

01:05:18,340 --> 01:05:16,400

shows capabilities and limitations and

1262

01:05:20,560 --> 01:05:18,350

we don't want to reveal their

1263

01:05:23,220 --> 01:05:20,570

capabilities limitation we cos beacon

1264

01:05:25,510 --> 01:05:23,230

generic broad terms but to make it

1265

01:05:27,790 --> 01:05:25,520

scientifically prove all the scientists

1266

01:05:29,620 --> 01:05:27,800

we're in the field would have to be able

1267

01:05:32,170 --> 01:05:29,630

to look at the raw data I see come to

1268

01:05:35,320 --> 01:05:32,180

the same conclusion and those data are

1269

01:05:37,990 --> 01:05:35,330

properly ratified well just the fact

1270

01:05:41,349 --> 01:05:38,000

that if you could you could note this

1271

01:05:44,290 --> 01:05:41,359

loosely in tandem with all the witness

1272

01:05:48,300 --> 01:05:44,300

reports of the sighting at the same time

1273

01:05:53,140 --> 01:05:51,130

authenticity that this happened it's

1274

01:05:55,810 --> 01:05:53,150

it's too bad and I do understand what

1275

01:05:59,500 --> 01:05:55,820

you're saying about all the classified

1276

01:06:03,910 --> 01:05:59,510

aspects of the is it called the DSP the

1277

01:06:06,279 --> 01:06:03,920

defense whatever it was programmed

1278

01:06:08,250 --> 01:06:06,289

in support program and that's still up

1279

01:06:11,140 --> 01:06:08,260

there still works there's an other

1280

01:06:15,240 --> 01:06:11,150

successor to that an evolutionary

1281

01:06:18,720 --> 01:06:15,250

upgrade if you will that is the

1282

01:06:20,890 --> 01:06:18,730

space-based infrared system receivers I

1283

01:06:23,430 --> 01:06:20,900

wrote the performance design

1284

01:06:28,870 --> 01:06:23,440

specifications for that system as well

1285

01:06:31,750 --> 01:06:28,880

there's a high orbit and a low orbit the

1286

01:06:33,190 --> 01:06:31,760

DSPs and I that's what is called

1287

01:06:38,859 --> 01:06:33,200

geosynchronous orbit

1288

01:06:42,809 --> 01:06:38,869

that's 22,300 miles above the earth hmm

1289

01:06:46,900 --> 01:06:42,819

and and it stays there the whole time it

1290

01:06:50,799 --> 01:06:46,910

satellites fall if you imagine if you

1291

01:06:53,200 --> 01:06:50,809

were to throw a rock it goes 20 feet

1292

01:06:54,720 --> 01:06:53,210

magic to throw a rock so hard it came

1293

01:06:58,150 --> 01:06:54,730

back to teach on the back of the head

1294

01:07:05,170 --> 01:06:58,160

well that would be what a satellite does

1295

01:07:07,329 --> 01:07:05,180

it falls at a rate and so they fall at

1296

01:07:11,140 --> 01:07:07,339

the same rate the Earth rotates and it's

1297

01:07:14,349 --> 01:07:11,150

a Geo earth same synchronicity sort the

1298

01:07:20,640 --> 01:07:14,359

geosynchronous orbit mm-hmm another

1299

01:07:24,549 --> 01:07:20,650

orbit is mo Nia mo l ni y a that was

1300

01:07:29,140 --> 01:07:24,559

discovered by the Soviets and that's

1301

01:07:34,059 --> 01:07:29,150

where the satellite is an extremely high

1302

01:07:36,940 --> 01:07:34,069

orbit and his pump down whips around the

1303

01:07:39,400 --> 01:07:36,950

earth with great velocity much closer to

1304

01:07:42,670 --> 01:07:39,410

the earth in the order of maybe five

1305

01:07:45,910 --> 01:07:42,680

hundred to a thousand miles and then

1306

01:07:49,900 --> 01:07:45,920

whips back out to a far distance but all

1307

01:07:54,400 --> 01:07:49,910

the time it's it enables it to have a

1308

01:07:57,069 --> 01:07:54,410

less predictable less more defensive

1309

01:07:59,559 --> 01:07:57,079

capability the satellites that are up

1310

01:08:02,259 --> 01:07:59,569

there right now and Co synchronous orbit

1311

01:08:06,910 --> 01:08:02,269

your satellites for communication your

1312

01:08:09,700 --> 01:08:06,920

satellites for television yeah that's a

1313

01:08:13,450 --> 01:08:09,710

beautiful place to put them but it's so

1314

01:08:15,970 --> 01:08:13,460

bang crowded up there mm-hmm it's making

1315

01:08:17,229 --> 01:08:15,980

it difficult so other orbits are being

1316

01:08:20,380 --> 01:08:17,239

looked at

1317

01:08:23,910 --> 01:08:20,390

and tried out to see how we can keep the

1318

01:08:27,130 --> 01:08:23,920

Curry's we want and need without

1319

01:08:32,320 --> 01:08:27,140

grudging into another satellite the real

1320

01:08:34,539 --> 01:08:32,330

issue yeah another thing do you getting

1321

01:08:37,809 --> 01:08:34,549

back to the question asked earlier by

1322

01:08:41,470 --> 01:08:37,819

this email or the Star Wars defense

1323

01:08:44,349 --> 01:08:41,480

program there's been rumors whether

1324

01:08:46,809 --> 01:08:44,359

that's going to exist I guess I was back

1325

01:08:48,190 --> 01:08:46,819

in Ronald Reagan's day when I first

1326

01:08:50,829 --> 01:08:48,200

heard about it

1327

01:08:53,890 --> 01:08:50,839

do you think something like that if it's

1328

01:08:55,930 --> 01:08:53,900

not in development I know we're getting

1329

01:08:58,240 --> 01:08:55,940

off topic but I won't stay long honest

1330

01:09:00,099 --> 01:08:58,250

but if it's not in development currently

1331

01:09:01,840 --> 01:09:00,109

do you think that that something like

1332

01:09:05,079 --> 01:09:01,850

that will happen where there will be a

1333

01:09:07,450 --> 01:09:05,089

capability for us to like laser beam

1334

01:09:09,729 --> 01:09:07,460

another country or vice versa they could

1335

01:09:12,519 --> 01:09:09,739

to us that type of thing taking it up

1336

01:09:17,320 --> 01:09:12,529

into the sky or has that been regulated

1337

01:09:20,380 --> 01:09:17,330

so that is not supposed to happen pretty

1338

01:09:23,229 --> 01:09:20,390

well self regulated the biggest problem

1339

01:09:26,950 --> 01:09:23,239

of god is funding this dang art to get

1340

01:09:30,340 --> 01:09:26,960

money where the government broke for 19

1341

01:09:32,620 --> 01:09:30,350

trillion dollars a death and so to get

1342

01:09:35,050 --> 01:09:32,630

funding for programs it's really

1343

01:09:37,420 --> 01:09:35,060

difficult yeah but when it comes to the

1344

01:09:39,430 --> 01:09:37,430

defense it seems like we have endless

1345

01:09:43,390 --> 01:09:39,440

amounts of money to spend on any type of

1346

01:09:45,039 --> 01:09:43,400

defense projects the biggest problem we

1347

01:09:52,209 --> 01:09:45,049

have is a lot of the defense's money

1348

01:09:54,310 --> 01:09:52,219

goes to sustain ongoing programs if we

1349

01:09:56,220 --> 01:09:54,320

were to close a bunch of paces and bring

1350

01:09:58,660 --> 01:09:56,230

a bunch of people home we'll use

1351

01:10:01,420 --> 01:09:58,670

probably a billion gallons of fuel a day

1352

01:10:03,520 --> 01:10:01,430

I don't I don't know the exact about it

1353

01:10:07,840 --> 01:10:03,530

imagine all the airplanes all the drones

1354

01:10:18,070 --> 01:10:07,850

all the tanks all the ships and you know

1355

01:10:19,840 --> 01:10:18,080

it's a fuel expense very little when you

1356

01:10:21,760 --> 01:10:19,850

check the budget there's not too much

1357

01:10:24,520 --> 01:10:21,770

going for research and development

1358

01:10:28,600 --> 01:10:24,530

most of us going to ongoing projects

1359

01:10:30,670 --> 01:10:28,610

okay but if we get Wynyard go ahead if

1360

01:10:31,090 --> 01:10:30,680

we got win that Russia was developing

1361

01:10:34,060 --> 01:10:31,100

this

1362

01:10:38,530 --> 01:10:34,070

or in another country China or something

1363

01:10:41,200 --> 01:10:38,540

like that you had bet I mean I would bet

1364

01:10:47,500 --> 01:10:41,210

that everything would be dropped and

1365

01:10:50,560 --> 01:10:47,510

we'd be you know trying to keep pace we

1366

01:10:53,940 --> 01:10:50,570

can keep pace with the technology we

1367

01:10:55,690 --> 01:10:53,950

have with most of what they're doing

1368

01:10:59,950 --> 01:10:55,700

with what we've got

1369

01:11:03,670 --> 01:10:59,960

so if they had an emerging technology

1370

01:11:06,130 --> 01:11:03,680

that would counter what we have then yes

1371

01:11:08,710 --> 01:11:06,140

there would be a big trade phase to try

1372

01:11:10,960 --> 01:11:08,720

to get that in so that we would have the

1373

01:11:15,460 --> 01:11:10,970

upper hand we got some pretty good

1374

01:11:18,430 --> 01:11:15,470

systems on board but Star Wars was our

1375

01:11:24,010 --> 01:11:18,440

space Defense Initiative SDI because the

1376

01:11:27,010 --> 01:11:24,020

formal name of it was defunded for for

1377

01:11:31,110 --> 01:11:27,020

the most part there was a two part

1378

01:11:34,120 --> 01:11:31,120

system and the part of section was

1379

01:11:36,430 --> 01:11:34,130

pretty well established but the other

1380

01:11:39,220 --> 01:11:36,440

part of it what do you do when you see

1381

01:11:41,560 --> 01:11:39,230

him there was a need to shoot them down

1382

01:11:44,800 --> 01:11:41,570

the Israelis worked a lot on that and

1383

01:11:49,229 --> 01:11:44,810

have a system and there's an effect we

1384

01:11:51,030 --> 01:11:49,239

had a system we tried to get over into

1385

01:11:55,240 --> 01:11:51,040

Crimea

1386

01:11:58,740 --> 01:11:55,250

Tencent work out cool but we've got a a

1387

01:12:02,560 --> 01:11:58,750

modest system but it's not anywhere

1388

01:12:05,440 --> 01:12:02,570

nearly capable enough to do what great

1389

01:12:08,590 --> 01:12:05,450

and then bases with SDI and one of the

1390

01:12:10,990 --> 01:12:08,600

reasons is multiple each targeted

1391

01:12:13,960 --> 01:12:11,000

individual warheads

1392

01:12:17,860 --> 01:12:13,970

Irv's there's we could have as many as

1393

01:12:20,200 --> 01:12:17,870

20 of those and shoot all 20 of them

1394

01:12:24,310 --> 01:12:20,210

well that's a you're gonna waste a lot

1395

01:12:26,410 --> 01:12:24,320

of stuff and how do you shoot it well

1396

01:12:28,120 --> 01:12:26,420

you you want to throw up a hand for

1397

01:12:31,840 --> 01:12:28,130

rocks and let's run full and run it to

1398

01:12:35,320 --> 01:12:31,850

those two I'll use a laser lasers take a

1399

01:12:37,150 --> 01:12:35,330

lot of power and you gotta have 20

1400

01:12:39,910 --> 01:12:37,160

liters what if they launched two

1401

01:12:44,030 --> 01:12:39,920

missiles with now you've got 40 warheads

1402

01:12:45,580 --> 01:12:44,040

to worry about at least 40 lasers so

1403

01:12:49,310 --> 01:12:45,590

I mean the problem just throws

1404

01:12:51,050 --> 01:12:49,320

astronomical so then it becomes a system

1405

01:12:53,750 --> 01:12:51,060

of okay let's see if we can

1406

01:12:58,400 --> 01:12:53,760

differentiate which one or two or three

1407

01:13:01,430 --> 01:12:58,410

of these independent missiles or

1408

01:13:02,090 --> 01:13:01,440

warheads is real and which ones are

1409

01:13:05,180 --> 01:13:02,100

phony

1410

01:13:07,940 --> 01:13:05,190

I seem got another sensing system mm-hmm

1411

01:13:13,190 --> 01:13:07,950

so it easier to sense them that is to

1412

01:13:15,620 --> 01:13:13,200

shoot all of them and that's where the

1413

01:13:18,530 --> 01:13:15,630

airborne laser which is chemical laser

1414

01:13:21,680 --> 01:13:18,540

aboard an aircraft we didn't get much

1415

01:13:23,990 --> 01:13:21,690

out of the shoot him down but we got

1416

01:13:27,950 --> 01:13:24,000

quite a bit out of the knot you see him

1417

01:13:31,130 --> 01:13:27,960

type of thing I see what so we're live

1418

01:13:33,530 --> 01:13:31,140

with a Ron Rick Gary if anyone wants to

1419

01:13:35,320 --> 01:13:33,540

call in the show and ask her on a

1420

01:13:39,080 --> 01:13:35,330

question that number is six oh three

1421

01:13:41,210 --> 01:13:39,090

nine six seven four OH three oh you are

1422

01:13:44,150 --> 01:13:41,220

welcome to call in you're also welcome

1423

01:13:49,370 --> 01:13:44,160

to pose a question up in the chat room

1424

01:13:54,290 --> 01:13:49,380

either on skype at PS n radio or over at

1425

01:13:56,960 --> 01:13:54,300

podcast UFO comm this same person was

1426

01:13:59,600 --> 01:13:56,970

mentioning about you I'm sure you're

1427

01:14:03,380 --> 01:13:59,610

familiar with the famous NASA shuttle

1428

01:14:05,990 --> 01:14:03,390

footage that seems to show an object

1429

01:14:09,620 --> 01:14:06,000

like moving off and zig zagging moving

1430

01:14:11,810 --> 01:14:09,630

off into space and then it appears

1431

01:14:14,780 --> 01:14:11,820

almost like missiles being shot at it

1432

01:14:17,180 --> 01:14:14,790

now this could be I've heard you know

1433

01:14:19,460 --> 01:14:17,190

skeptics say that's ice particles I have

1434

01:14:22,490 --> 01:14:19,470

no idea what it is I just wondered if

1435

01:14:25,130 --> 01:14:22,500

you have looked at that footage no I

1436

01:14:27,350 --> 01:14:25,140

have looked at the footage and I too

1437

01:14:30,680 --> 01:14:27,360

have no idea what it is I did not buy

1438

01:14:33,680 --> 01:14:30,690

the explanation of NASA after that it

1439

01:14:35,480 --> 01:14:33,690

was an ice particle that developed the

1440

01:14:40,100 --> 01:14:35,490

ice and Dalton and led a pocket of

1441

01:14:42,590 --> 01:14:40,110

compressed air escape I mean that's why

1442

01:14:45,410 --> 01:14:42,600

anybody believes that I'm gonna sell him

1443

01:14:49,010 --> 01:14:45,420

a fridge well let's talk a little bit

1444

01:14:50,810 --> 01:14:49,020

about that now this last year I happened

1445

01:14:55,910 --> 01:14:50,820

to go to Goddard Space Center and had a

1446

01:14:59,720 --> 01:14:55,920

nice tour all through there and it was

1447

01:15:04,410 --> 01:15:02,100

what do you think about some of the

1448

01:15:07,140 --> 01:15:04,420

footage you know there's there's all

1449

01:15:09,450 --> 01:15:07,150

types of rumors I'm trying to remember

1450

01:15:13,230 --> 01:15:09,460

Gary him his last name he was a hacker

1451

01:15:17,330 --> 01:15:13,240

that claimed that he saw different

1452

01:15:20,100 --> 01:15:17,340

things before things were removed from

1453

01:15:24,480 --> 01:15:20,110

footage and stuff like that what do you

1454

01:15:27,330 --> 01:15:24,490

think about all the talk that NASA will

1455

01:15:28,620 --> 01:15:27,340

cut a feed to the International Space

1456

01:15:34,350 --> 01:15:28,630

Station or something like that if an

1457

01:15:36,980 --> 01:15:34,360

object is seen doing that I've heard

1458

01:15:40,320 --> 01:15:36,990

those rumors as well or herself stories

1459

01:15:45,330 --> 01:15:40,330

and I can't say that they're not doing

1460

01:15:46,620 --> 01:15:45,340

it but NASA simply doesn't deal with

1461

01:15:48,870 --> 01:15:46,630

nothing

1462

01:15:52,260 --> 01:15:48,880

when I was working with NASA that was

1463

01:15:54,260 --> 01:15:52,270

classified was the excuse me the

1464

01:15:58,650 --> 01:15:54,270

download frequency for the fan

1465

01:16:02,360 --> 01:15:58,660

communications as I didn't love every

1466

01:16:05,400 --> 01:16:02,370

astronaut from very first ones I believe

1467

01:16:09,120 --> 01:16:05,410

had a special frequency they can call

1468

01:16:11,760 --> 01:16:09,130

and talk to NASA medical staffs NASA

1469

01:16:14,700 --> 01:16:11,770

psychological staff and their families

1470

01:16:16,620 --> 01:16:14,710

so they could have conversation with

1471

01:16:17,970 --> 01:16:16,630

their families and up drops on that's

1472

01:16:22,440 --> 01:16:17,980

the only thing I know it was ever

1473

01:16:27,600 --> 01:16:22,450

classified by NASA I worked with them

1474

01:16:30,720 --> 01:16:27,610

for close to 20 years they might very

1475

01:16:35,460 --> 01:16:30,730

well have footage that they're not

1476

01:16:38,190 --> 01:16:35,470

releasing but there's no last time I

1477

01:16:41,070 --> 01:16:38,200

checked which is a bonala business for a

1478

01:16:43,340 --> 01:16:41,080

little over 15 years but they had no

1479

01:16:49,410 --> 01:16:43,350

provision for plastic I classified

1480

01:16:51,930 --> 01:16:49,420

documents or data there was any that

1481

01:16:53,520 --> 01:16:51,940

nobody that I knew a lot of time I work

1482

01:16:55,500 --> 01:16:53,530

with and all the meetings I said nobody

1483

01:17:01,590 --> 01:16:55,510

has security classifications except for

1484

01:17:04,440 --> 01:17:01,600

a military force no so can't help you

1485

01:17:09,120 --> 01:17:04,450

there yeah I do know that there's been

1486

01:17:11,129 --> 01:17:09,130

stuff that is probably suppressed or

1487

01:17:13,919 --> 01:17:11,139

explained away with cilia

1488

01:17:16,489 --> 01:17:13,929

Asians like the ice crystals that the

1489

01:17:22,250 --> 01:17:16,499

astronauts saw that they all said it was

1490

01:17:24,449 --> 01:17:22,260

not ice crystals thank you John

1491

01:17:27,509 --> 01:17:24,459

they explained it more than they try to

1492

01:17:29,479 --> 01:17:27,519

suppress it and they give sometimes very

1493

01:17:32,009 --> 01:17:29,489

very poor explanations

1494

01:17:33,299 --> 01:17:32,019

so when but if they were classifying

1495

01:17:35,250 --> 01:17:33,309

that you wouldn't see it I'll guarantee

1496

01:17:37,979 --> 01:17:35,260

if it was if they were classifying it

1497

01:17:40,189 --> 01:17:37,989

you would not see it right I mean they

1498

01:17:42,299 --> 01:17:40,199

do not release classified information

1499

01:17:44,040 --> 01:17:42,309

thanks to people in the chat room that

1500

01:17:49,679 --> 01:17:44,050

was Gary McKinnon the person I was

1501

01:17:52,139 --> 01:17:49,689

trying to think of yes I don't know if

1502

01:17:56,819 --> 01:17:52,149

you ever got extradited to us oh no find

1503

01:17:58,379 --> 01:17:56,829

it over here as far as I know not in it

1504

01:18:01,919 --> 01:17:58,389

was kind of interesting how he was able

1505

01:18:04,040 --> 01:18:01,929

to hack that from a DSL type line or

1506

01:18:06,209 --> 01:18:04,050

something like that and it is

1507

01:18:14,659 --> 01:18:06,219

girlfriends on its house or something

1508

01:18:22,639 --> 01:18:20,699

the arab-israeli war though remember

1509

01:18:26,219 --> 01:18:22,649

what the Scud missiles were found over

1510

01:18:27,870 --> 01:18:26,229

at reporter named Wolf Blitzer

1511

01:18:29,819 --> 01:18:27,880

now you have what a day for workers

1512

01:18:31,830 --> 01:18:29,829

Punnett whoops whoop lit sir

1513

01:18:39,000 --> 01:18:31,840

it just sounds like that should be his

1514

01:18:42,000 --> 01:18:39,010

job but the mode of operation then was

1515

01:18:47,600 --> 01:18:42,010

that our satellite would detect the

1516

01:18:50,870 --> 01:18:47,610

logical Scud we would detect that at

1517

01:18:53,939 --> 01:18:50,880

Cheyenne Mountain Colorado under

1518

01:18:57,179 --> 01:18:53,949

Peterson Air Force Base then there would

1519

01:18:59,909 --> 01:18:57,189

be a telephone call to the Pentagon the

1520

01:19:03,949 --> 01:18:59,919

Pentagon vajayjay or they almost always

1521

01:19:07,319 --> 01:19:03,959

Jake they in turn would telephone call

1522

01:19:10,500 --> 01:19:07,329

the area commander of a patriot missile

1523

01:19:12,719 --> 01:19:10,510

battery and give him the information he

1524

01:19:15,000 --> 01:19:12,729

needed all handled by telephone calls

1525

01:19:16,649 --> 01:19:15,010

all handled on non secure lines we

1526

01:19:19,919 --> 01:19:16,659

didn't have any secure lines and Whiston

1527

01:19:22,679 --> 01:19:19,929

Siam mountain all the way to Israel tel

1528

01:19:24,870 --> 01:19:22,689

Aviv where ever since then we change

1529

01:19:26,850 --> 01:19:24,880

that the depth acceptance arm

1530

01:19:30,750 --> 01:19:26,860

of operation there that was in what my

1531

01:19:35,939 --> 01:19:30,760

wants amazing whatever the first Gulf

1532

01:19:38,790 --> 01:19:35,949

War was is scary in a way yeah

1533

01:19:40,800 --> 01:19:38,800

you know I this is probably going way

1534

01:19:44,910 --> 01:19:40,810

off topic and let's just keep it quick

1535

01:19:46,950 --> 01:19:44,920

but you know I heard you always here I

1536

01:19:49,370 --> 01:19:46,960

really do believe that we landed on the

1537

01:19:52,470 --> 01:19:49,380

moon okay so I'm not gonna go I'm not

1538

01:19:55,200 --> 01:19:52,480

conspiratorial about that a lot of

1539

01:19:58,110 --> 01:19:55,210

people will argue in a past guest just a

1540

01:19:59,820 --> 01:19:58,120

couple of weeks ago was very adamant

1541

01:20:02,370 --> 01:19:59,830

that he didn't think that we landed on

1542

01:20:07,020 --> 01:20:02,380

the moon but the technology you think of

1543

01:20:08,990 --> 01:20:07,030

1969 July when they first landed there

1544

01:20:14,160 --> 01:20:09,000

was all this like push button and

1545

01:20:16,830 --> 01:20:14,170

computer you were around then how did

1546

01:20:19,830 --> 01:20:16,840

that technology work so accurately was

1547

01:20:22,410 --> 01:20:19,840

it all through mathematics that had to

1548

01:20:29,810 --> 01:20:22,420

be manually done or what what how did

1549

01:20:34,649 --> 01:20:29,820

that work we had a computer that wishes

1550

01:20:36,990 --> 01:20:34,659

was was enough to the entire facility it

1551

01:20:42,899 --> 01:20:37,000

generated that much with soup

1552

01:20:45,060 --> 01:20:42,909

technology both I would say 95 to 98% of

1553

01:20:48,360 --> 01:20:45,070

the Saturn Apollo moon lock was designed

1554

01:20:51,419 --> 01:20:48,370

with the boss with flight rules which

1555

01:20:53,160 --> 01:20:51,429

probably none dear listeners under the

1556

01:20:56,310 --> 01:20:53,170

age of 40 you can know what a flight

1557

01:21:03,149 --> 01:20:56,320

blue is and freedom nine key adding

1558

01:21:06,899 --> 01:21:03,159

machine that's what we well very little

1559

01:21:12,629 --> 01:21:06,909

computers we did get a computer and that

1560

01:21:15,720 --> 01:21:12,639

was reasonably good it was IBM 1620 and

1561

01:21:19,709 --> 01:21:15,730

that was the collar of parts of punch

1562

01:21:22,410 --> 01:21:19,719

cards if we were really really excited

1563

01:21:25,290 --> 01:21:22,420

when they came out with formula

1564

01:21:31,080 --> 01:21:25,300

translation software which became known

1565

01:21:35,250 --> 01:21:31,090

as Fortran and we were able to well I'll

1566

01:21:38,310 --> 01:21:35,260

give you an incident we would use fuel

1567

01:21:40,650 --> 01:21:38,320

flow with calculations to determine

1568

01:21:44,760 --> 01:21:40,660

engine cutoff thrust vectors things like

1569

01:21:46,740 --> 01:21:44,770

that and so we we would do that with

1570

01:21:48,870 --> 01:21:46,750

slide rules and with slide rule since

1571

01:21:50,700 --> 01:21:48,880

you're really good you can get maybe two

1572

01:21:54,150 --> 01:21:50,710

decimal place accuracy on them may be

1573

01:21:56,940 --> 01:21:54,160

really good so we got this computer

1574

01:21:59,760 --> 01:21:56,950

Nikkei was nine decimal places well

1575

01:22:02,270 --> 01:21:59,770

that's in the insane Wow

1576

01:22:08,010 --> 01:22:02,280

but we've got the data so we reported it

1577

01:22:12,450 --> 01:22:08,020

to NASA and our NASA contracting officer

1578

01:22:14,970 --> 01:22:12,460

Homer Jones cut nice back he looks at me

1579

01:22:21,150 --> 01:22:14,980

says what do you guys do when you want

1580

01:22:24,480 --> 01:22:21,160

to get real actress back to the decimal

1581

01:22:28,700 --> 01:22:24,490

place accuracy good night I got their

1582

01:22:31,920 --> 01:22:28,710

back but it was too it's fun times we

1583

01:22:33,720 --> 01:22:31,930

were seriously we did allow failures I

1584

01:22:36,540 --> 01:22:33,730

think the term was failure is not an

1585

01:22:39,210 --> 01:22:36,550

option and it wasn't you know I I can't

1586

01:22:41,430 --> 01:22:39,220

remember if it was this country or or

1587

01:22:43,440 --> 01:22:41,440

what country it was that had he talked

1588

01:22:47,340 --> 01:22:43,450

very early in the program about failed

1589

01:22:48,870 --> 01:22:47,350

launches and I heard I'm trying to

1590

01:22:50,280 --> 01:22:48,880

remember what country was was trying to

1591

01:22:53,640 --> 01:22:50,290

put a probe on the moon and they had

1592

01:22:59,040 --> 01:22:53,650

countless failed launches do you know it

1593

01:23:00,770 --> 01:22:59,050

was it US job yeah we had quite a few

1594

01:23:06,150 --> 01:23:00,780

failures and the reason was we we

1595

01:23:07,770 --> 01:23:06,160

miscalculated the mass of the moon the

1596

01:23:12,360 --> 01:23:07,780

other thing we had solvents which we

1597

01:23:14,370 --> 01:23:12,370

speaking it so if we would encounter there

1598

01:23:16,620 --> 01:23:14,380

were some very reputable scientists who

1599

01:23:20,580 --> 01:23:16,630

said we're going to have three four five

1600

01:23:23,280 --> 01:23:20,590

foot of fine dust the result of millions

1601
01:23:26,100 --> 01:23:23,290
of years of micrometeoroid impacts is

1602
01:23:30,300 --> 01:23:26,110
creating all this dust and nothing to

1603
01:23:34,550 --> 01:23:30,310
blow it away then there wasn't that much

1604
01:23:37,560 --> 01:23:34,560
dust with some would you look at the

1605
01:23:46,080 --> 01:23:37,570
dust talk to the astronauts it was a

1606
01:23:51,390 --> 01:23:46,090
crazy type of us to think right charts

1607
01:23:52,110 --> 01:23:51,400
and everything and earth it's a steady

1608
01:23:54,390 --> 01:23:52,120
sorry

1609
01:23:56,340 --> 01:23:54,400
discharge we got enough air molecules

1610
01:23:58,890 --> 01:23:56,350
moving around and that discharges all

1611
01:24:02,670 --> 01:23:58,900
these charges parrying sort of bounces

1612
01:24:07,520 --> 01:24:02,680
out and works pretty good but in space

1613
01:24:09,480 --> 01:24:07,530

there's no no mechanism for grounding

1614

01:24:13,320 --> 01:24:09,490

satellites the way we've seen our

1615

01:24:17,690 --> 01:24:13,330

satellites is we have a positive ground

1616

01:24:19,860 --> 01:24:17,700

and then all of the space junk the dust

1617

01:24:22,050 --> 01:24:19,870

comes around accumulates on the

1618

01:24:25,110 --> 01:24:22,060

radiators so that we start getting

1619

01:24:26,790 --> 01:24:25,120

warmer and warmer and warmer starts

1620

01:24:28,890 --> 01:24:26,800

collecting on the solar panel so we

1621

01:24:32,370 --> 01:24:28,900

don't have as much power generation and

1622

01:24:35,930 --> 01:24:32,380

so what we have to do that is reverse

1623

01:24:39,690 --> 01:24:35,940

the polarity of the electronics and

1624

01:24:42,300 --> 01:24:39,700

simultaneously fire the fish reactive

1625

01:24:44,280 --> 01:24:42,310

control system motors can move the

1626

01:24:46,050 --> 01:24:44,290

satellite over about ten feet so if

1627

01:24:49,530 --> 01:24:46,060

these are cloud of dust about ten feet

1628

01:24:50,040 --> 01:24:49,540

away and then everything goes back to

1629

01:24:52,110 --> 01:24:50,050

normal

1630

01:24:55,680 --> 01:24:52,120

go the next time it's we see

1631

01:24:58,470 --> 01:24:55,690

performances straight back to another

1632

01:25:00,540 --> 01:24:58,480

position so this business a lot of

1633

01:25:05,760 --> 01:25:00,550

little little nuances that go on with

1634

01:25:09,180 --> 01:25:05,770

these things I bet I can't it some just

1635

01:25:12,680 --> 01:25:09,190

posted up on the of the message board

1636

01:25:16,560 --> 01:25:12,690

and I've heard I've heard similar things

1637

01:25:18,960 --> 01:25:16,570

to this that the Apollo 11 that Lander

1638

01:25:21,330 --> 01:25:18,970

and the moon was using a computer

1639

01:25:26,190 --> 01:25:21,340

thirteen hundred times less powerful

1640

01:25:29,190 --> 01:25:26,200

than your iPhone which is I don't know

1641

01:25:31,500 --> 01:25:29,200

the calculation but I yeah it was much a

1642

01:25:36,570 --> 01:25:31,510

trashy eighty would have been a powerful

1643

01:25:38,430 --> 01:25:36,580

powerful computer I don't know I can't

1644

01:25:40,350 --> 01:25:38,440

quantify and say thirteen at a time but

1645

01:25:42,720 --> 01:25:40,360

I wouldn't be a bit surprised yeah

1646

01:25:45,660 --> 01:25:42,730

and I've heard you know along those

1647

01:25:48,090 --> 01:25:45,670

lines where Voyager one has about as

1648

01:25:58,620 --> 01:25:48,100

much computer power as your key fob on

1649

01:26:00,930 --> 01:25:58,630

your car amazing and the one thing since

1650

01:26:03,660 --> 01:26:00,940

you I know this is a that's a not

1651

01:26:05,460 --> 01:26:03,670

exactly a satellite but - how does

1652

01:26:07,950 --> 01:26:05,470

I think that's traveling now

1653

01:26:14,250 --> 01:26:07,960

like 35,000 miles an hour or something

1654

01:26:16,170 --> 01:26:14,260

like that how it was probably through

1655

01:26:17,640 --> 01:26:16,180

like a ricochet around a planet or

1656

01:26:21,050 --> 01:26:17,650

something like that is that the only way

1657

01:26:24,480 --> 01:26:21,060

that you can get up to speed like that

1658

01:26:28,290 --> 01:26:24,490

when you're when it's uh you know

1659

01:26:30,540 --> 01:26:28,300

traveling through space yeah once you

1660

01:26:32,880 --> 01:26:30,550

get as we get further and further away

1661

01:26:36,300 --> 01:26:32,890

from the gravitational effects of our

1662

01:26:38,580 --> 01:26:36,310

Sun and the planets become the major

1663

01:26:41,340 --> 01:26:38,590

contributor and we do slingshot around

1664

01:26:43,350 --> 01:26:41,350

those and then when we get into deep

1665

01:26:48,360 --> 01:26:43,360

space we just kind of coast it's not the

1666

01:26:51,450 --> 01:26:48,370

slow down and so it's you know the

1667

01:26:53,460 --> 01:26:51,460

gravitational effects so faraway planets

1668

01:26:56,610 --> 01:26:53,470

become in this fuel but they're still

1669

01:26:59,430 --> 01:26:56,620

there they're always there we just can't

1670

01:27:02,520 --> 01:26:59,440

really measure them but yeah it's mainly

1671

01:27:04,740 --> 01:27:02,530

slingshot off please shooting off the

1672

01:27:07,020 --> 01:27:04,750

planets and then going into deeper space

1673

01:27:12,270 --> 01:27:07,030

I think I said Rick joy mid-swing dick

1674

01:27:16,740 --> 01:27:12,280

immense slingshot okay so since you're a

1675

01:27:19,880 --> 01:27:16,750

man of science and you're your technical

1676

01:27:22,890 --> 01:27:19,890

involvement all the and all of that and

1677

01:27:24,420 --> 01:27:22,900

you have a fascination with UFOs how do

1678

01:27:26,520 --> 01:27:24,430

you think you know the question you

1679

01:27:29,190 --> 01:27:26,530

always hear from skeptics is oh it's

1680

01:27:33,090 --> 01:27:29,200

impossible to get here from another

1681

01:27:35,870 --> 01:27:33,100

solar system star system this takes too

1682

01:27:38,790 --> 01:27:35,880

much energy takes too much time

1683

01:27:45,180 --> 01:27:38,800

what do you think about those statements

1684

01:27:49,230 --> 01:27:45,190

I think they're displaying large degree

1685

01:27:53,130 --> 01:27:49,240

of ignorance right now what we're doing

1686

01:27:56,010 --> 01:27:53,140

is throwing rocks no matter how you want

1687

01:27:58,350 --> 01:27:56,020

to look at it we're throwing rocks and

1688

01:28:01,170 --> 01:27:58,360

should be using our arm muscles or we

1689

01:28:04,350 --> 01:28:01,180

should go into extending that pipe

1690

01:28:07,710 --> 01:28:04,360

making an atlatl or we extend if I make

1691

01:28:11,060 --> 01:28:07,720

a slingshot or we extend it by making a

1692

01:28:15,090 --> 01:28:11,070

rocket attack even so those are all

1693

01:28:18,229 --> 01:28:15,100

evolutionary transitions in other words

1694

01:28:23,290 --> 01:28:18,239

involves from one step to the next

1695

01:28:25,520 --> 01:28:23,300

what we will see soon revolutionary

1696

01:28:29,060 --> 01:28:25,530

doing something other than throwing

1697

01:28:33,049 --> 01:28:29,070

rocks and one of those evolutionary

1698

01:28:35,810 --> 01:28:33,059

processes was described by Bob Lazar

1699

01:28:39,560 --> 01:28:35,820

when he came in and said what they're

1700

01:28:43,970 --> 01:28:39,570

doing this folding space they look at a

1701

01:28:45,799 --> 01:28:43,980

various base and fold it over much as

1702

01:28:49,009 --> 01:28:45,809

you would a sheet of paper bringing one

1703

01:28:50,870 --> 01:28:49,019

corner to you next to you and then just

1704

01:28:53,120 --> 01:28:50,880

transfer it to the other corner and then

1705

01:28:57,189 --> 01:28:53,130

unfolding it and just reverse the entire

1706

01:28:59,930 --> 01:28:57,199

length of the page so that would be a

1707

01:29:07,040 --> 01:28:59,940

revolutionary step that would enable us

1708

01:29:09,890 --> 01:29:07,050

to traverse great distances well I I'm

1709

01:29:12,500 --> 01:29:09,900

glad you're part of Bob's thing and I

1710

01:29:14,180 --> 01:29:12,510

have a question I'm going to I'll hang

1711

01:29:20,060 --> 01:29:14,190

on to for right now up on the message

1712

01:29:23,379 --> 01:29:20,070

board from Matt Matthew but so bob lazar

1713

01:29:28,509 --> 01:29:23,389

you got to know Laer

1714

01:29:35,000 --> 01:29:28,519

John layer and and then Bob Lazar and I

1715

01:29:38,750 --> 01:29:35,010

have I'm on the fence about Bob and so I

1716

01:29:43,989 --> 01:29:38,760

want to know I want to talk a little bit

1717

01:29:53,649 --> 01:29:43,999

about that sure huh so do you think that

1718

01:29:59,810 --> 01:29:53,659

Bob's story was legitimate yes you do

1719

01:30:03,560 --> 01:29:59,820

before he worked at area 51's for and he

1720

01:30:09,040 --> 01:30:03,570

was not just a skeptic he was a deep

1721

01:30:12,410 --> 01:30:09,050

bunker you guys are full of bull crap

1722

01:30:14,180 --> 01:30:12,420

and I mean he was a bunker yes

1723

01:30:15,649 --> 01:30:14,190

scientifically there's no way they can

1724

01:30:17,870 --> 01:30:15,659

do this there's no way they could do

1725

01:30:21,770 --> 01:30:17,880

that I'm a scientist there's though you

1726

01:30:26,660 --> 01:30:21,780

know these guys are full of it and the

1727

01:30:29,419 --> 01:30:26,670

week after he started working there he

1728

01:30:31,459 --> 01:30:29,429

came at and he was sort of asked it's

1729

01:30:32,000 --> 01:30:31,469

based and very apologetic that he said

1730

01:30:35,090 --> 01:30:32,010

you know

1731

01:30:37,670 --> 01:30:35,100

tsipras had these you guys are right he

1732

01:30:44,270 --> 01:30:37,680

says worse than that don't even know the

1733

01:30:47,540 --> 01:30:44,280

story so so he sure did what he said he

1734

01:30:49,580 --> 01:30:47,550

did or has an exceedingly strong

1735

01:30:54,500 --> 01:30:49,590

psychotropic drugs that he was totally

1736

01:30:58,990 --> 01:30:54,510

unaware of that were able to change his

1737

01:31:03,020 --> 01:30:59,000

entire aspect and it's lasted for almost

1738

01:31:06,050 --> 01:31:03,030

30 years so however you want to play

1739

01:31:09,110 --> 01:31:06,060

that is okay with me I'm convinced that

1740

01:31:10,910 --> 01:31:09,120

it was something he personally worked

1741

01:31:14,000 --> 01:31:10,920

with and personally witnessed and it's

1742

01:31:17,230 --> 01:31:14,010

not the result of continuing 30-year

1743

01:31:20,000 --> 01:31:17,240

long-lasting psychotropic drugs I don't

1744

01:31:23,320 --> 01:31:20,010

you know it's just the the question is

1745

01:31:26,450 --> 01:31:23,330

you know the education and the fact that

1746

01:31:29,330 --> 01:31:26,460

he didn't know landmark right outside of

1747

01:31:32,810 --> 01:31:29,340

MIT and you know there's just been when

1748

01:31:36,020 --> 01:31:32,820

when a story falls apart you look for

1749

01:31:41,830 --> 01:31:36,030

all the loose ends and there was a lot

1750

01:31:44,630 --> 01:31:41,840

of loose ends when it comes to him I

1751

01:31:55,880 --> 01:31:44,640

mean we'll see more bob lazar transcript

1752

01:31:58,760 --> 01:31:55,890

so we have brock obama's are very

1753

01:32:02,150 --> 01:31:58,770

difficult to and snippy very easy to

1754

01:32:05,960 --> 01:32:02,160

determine how many classmates video

1755

01:32:07,760 --> 01:32:05,970

what was it professor's name i believe

1756

01:32:10,700 --> 01:32:07,770

the man when I heard him and I saw him

1757

01:32:14,270 --> 01:32:10,710

with my own eyes I saw the way be a so

1758

01:32:17,030 --> 01:32:14,280

it didn't yeah I didn't feel a need to

1759

01:32:20,210 --> 01:32:17,040

work one where others who were just to

1760

01:32:23,570 --> 01:32:20,220

what he was saying or not saying well

1761

01:32:26,000 --> 01:32:23,580

you know I think I look at George Knapp

1762

01:32:27,520 --> 01:32:26,010

now I have a lot a lot of respect for

1763

01:32:30,980 --> 01:32:27,530

George Knapp as a matter of fact I think

1764

01:32:34,720 --> 01:32:30,990

he is probably one of the best people on

1765

01:32:40,640 --> 01:32:34,730

the radio that dives into this topic and

1766

01:32:45,130 --> 01:32:40,650

he and a very honest and level-headed

1767

01:32:49,180 --> 01:32:45,140

person and he he basically stands behind

1768

01:32:52,870 --> 01:32:49,190

bob lazar maybe there's two two things

1769

01:32:56,050 --> 01:32:52,880

that could be happening one is maybe Bob

1770

01:33:02,740 --> 01:32:56,060

Lazar can really sell himself to the

1771

01:33:06,340 --> 01:33:02,750

people and he and and he's not being

1772

01:33:08,200 --> 01:33:06,350

straight with everyone or the fact that

1773

01:33:11,080 --> 01:33:08,210

you know maybe there is something to

1774

01:33:14,169 --> 01:33:11,090

this I I'd like to be open-minded I just

1775

01:33:17,919 --> 01:33:14,179

I just have like I said I've been on the

1776

01:33:22,870 --> 01:33:17,929

fence about Bob because of all the

1777

01:33:25,630 --> 01:33:22,880

different things that has come for ya I

1778

01:33:27,880 --> 01:33:25,640

could say I face it on my personal

1779

01:33:32,020 --> 01:33:27,890

knowledge of knowing and then everything

1780

01:33:33,520 --> 01:33:32,030

else says yeah that's the only

1781

01:33:34,959 --> 01:33:33,530

comparison I could make us we've got a

1782

01:33:38,979 --> 01:33:34,969

president and we know less about that we

1783

01:33:42,760 --> 01:33:38,989

knew bob lazar welcome right wrong or a

1784

01:33:51,340 --> 01:33:42,770

difference yes okay now funk-defied

1785

01:33:57,780 --> 01:33:51,350

house twice how many books you think

1786

01:34:01,439 --> 01:33:57,790

he's written about yeah no sorry zero

1787

01:34:05,320 --> 01:34:01,449

party for this I would think if he was

1788

01:34:07,990 --> 01:34:05,330

attempting to exploit it he would have

1789

01:34:12,760 --> 01:34:08,000

at least attempted to get back a little

1790

01:34:14,320 --> 01:34:12,770

bit yeah that's another two feet of

1791

01:34:16,689 --> 01:34:14,330

personal knowledge at the fact that he

1792

01:34:18,340 --> 01:34:16,699

hasn't tried to exploit our to strong

1793

01:34:21,570 --> 01:34:18,350

indicators that you tell the truth we

1794

01:34:25,780 --> 01:34:21,580

just given up doesn't care anymore

1795

01:34:29,830 --> 01:34:25,790

yeah yeah I was sodium I think was

1796

01:34:34,390 --> 01:34:29,840

the Alejandro's conference during no

1797

01:34:36,250 --> 01:34:34,400

Scott field yeah I was out there but I

1798

01:34:38,110 --> 01:34:36,260

unfortunately that year I had to leave

1799

01:34:42,360 --> 01:34:38,120

early so I miss that that whole thing

1800

01:34:45,669 --> 01:34:42,370

and I I was hoping that there would be a

1801
01:34:48,370 --> 01:34:45,679
questions after and I wanted to see that

1802
01:34:52,330 --> 01:34:48,380
tape but I guess he was scooted off for

1803
01:34:54,220 --> 01:34:52,340
it after that but let's get back to you

1804
01:34:58,330 --> 01:34:54,230
have a question that came up on the

1805
01:34:58,870 --> 01:34:58,340
message board and our guest meaning you

1806
01:35:00,939 --> 01:34:58,880
you talk

1807
01:35:03,280 --> 01:35:00,949
from the iranian UFO at the beginning of

1808
01:35:08,379 --> 01:35:03,290
the show can you elaborate on these

1809
01:35:12,300 --> 01:35:08,389
specifics like for instance what we knew

1810
01:35:15,990 --> 01:35:12,310
why it didn't get shared with everyone

1811
01:35:19,000 --> 01:35:16,000
is it because again the classified

1812
01:35:23,020 --> 01:35:19,010
implications of the government it was

1813
01:35:29,020 --> 01:35:23,030

classified by the Defense Intelligence

1814

01:35:31,390 --> 01:35:29,030

Agency what I got was we call it itty

1815

01:35:36,360 --> 01:35:31,400

bitty and individual target events

1816

01:35:43,720 --> 01:35:36,370

database which showed all of the events

1817

01:35:46,390 --> 01:35:43,730

of the 30 days I think anyway a certain

1818

01:35:50,740 --> 01:35:46,400

period of time in the midst of that

1819

01:35:52,840 --> 01:35:50,750

report was the exact precise take time

1820

01:35:58,800 --> 01:35:52,850

latitude and longitude of the Iranian

1821

01:36:04,479 --> 01:35:58,810

UFO and the cryptic comment was 76 tans

1822

01:36:06,010 --> 01:36:04,489

possible eschar and as far as a

1823

01:36:09,640 --> 01:36:06,020

classified term I can't tell you what it

1824

01:36:15,840 --> 01:36:09,650

means that that that was a unclassified

1825

01:36:18,010 --> 01:36:15,850

correlation of that event oh that's

1826

01:36:19,990 --> 01:36:18,020

that's all I can tell you about it was

1827

01:36:22,959 --> 01:36:20,000

that was what led me to it I talked to

1828

01:36:29,860 --> 01:36:22,969

several people but we I ate classified

1829

01:36:33,430 --> 01:36:29,870

it I presented at the I forget which

1830

01:36:37,390 --> 01:36:33,440

MUFON symposium I won the award for the

1831

01:36:40,629 --> 01:36:37,400

best case analysis of the year and that

1832

01:36:44,320 --> 01:36:40,639

was the report on the Iranian UFO Wow

1833

01:36:46,899 --> 01:36:44,330

so I that should be available of video

1834

01:36:52,000 --> 01:36:46,909

available from move on I haven't ever

1835

01:36:53,860 --> 01:36:52,010

seen it cook I was there well so I'm

1836

01:36:55,660 --> 01:36:53,870

sure you could get it there's a

1837

01:36:58,360 --> 01:36:55,670

presidential a lot more information about

1838

01:37:00,580 --> 01:36:58,370

it for that case for that case I'm sure

1839

01:37:02,590 --> 01:37:00,590

most of the listeners are aware of that

1840

01:37:07,899 --> 01:37:02,600

case but for the the one that isn't that

1841

01:37:09,310 --> 01:37:07,909

happened in 1976 and they were there

1842

01:37:12,369 --> 01:37:09,320

were jets that were scrambled the

1843

01:37:14,919 --> 01:37:12,379

military was scrambled and there was a

1844

01:37:18,899 --> 01:37:14,929

you know the details I think some

1845

01:37:22,599 --> 01:37:18,909

equipment failed or something when they

1846

01:37:24,759 --> 01:37:22,609

was first scrambled an Iranian Imperial

1847

01:37:28,079 --> 01:37:24,769

Air Force f4 which is a first light

1848

01:37:31,509 --> 01:37:28,089

fighter then we were on good terms with

1849

01:37:33,549 --> 01:37:31,519

the Shah of Iran's provided it with her

1850

01:37:36,629 --> 01:37:33,559

frontline weapon systems the f4 phantom

1851

01:37:42,729 --> 01:37:36,639

jet was one of those frontline fighters

1852

01:37:45,819 --> 01:37:42,739

and as f4 turned and the Chiefs radar

1853

01:37:48,309 --> 01:37:45,829

lock their lock on with radars to get

1854

01:37:50,889 --> 01:37:48,319

their missiles to hit the target and as

1855

01:37:53,020 --> 01:37:50,899

soon as that you as soon as they got the

1856

01:37:54,909 --> 01:37:53,030

target and we're holding it with radar

1857

01:37:57,429 --> 01:37:54,919

that's called radar lock and this is a

1858

01:38:00,179 --> 01:37:57,439

achieve radar lock every bit of

1859

01:38:04,839 --> 01:38:00,189

electronics equipment in the f4 failed

1860

01:38:07,599 --> 01:38:04,849

instantly and simultaneously as soon as

1861

01:38:09,599 --> 01:38:07,609

the f4 no longer posed to threat other

1862

01:38:13,569 --> 01:38:09,609

words it started falling out of the sky

1863

01:38:15,250 --> 01:38:13,579

the electronic came back off so they

1864

01:38:18,969 --> 01:38:15,260

thought they had a faulty aircraft they

1865

01:38:21,459 --> 01:38:18,979

launched a second f4 and that F core

1866

01:38:25,029 --> 01:38:21,469

went up and encountered the a UFO same

1867

01:38:27,639 --> 01:38:25,039

problems not just once the four times

1868

01:38:30,789 --> 01:38:27,649

with each aircraft does lock onto this

1869

01:38:34,689 --> 01:38:30,799

right target and the target split into

1870

01:38:35,619 --> 01:38:34,699

several one now this is not an isolated

1871

01:38:37,479 --> 01:38:35,629

event

1872

01:38:39,809 --> 01:38:37,489

three o'clock my this was about ten

1873

01:38:43,449 --> 01:38:39,819

o'clock at night the Jets were flying

1874

01:38:45,879 --> 01:38:43,459

SuperSonics in a city of several million

1875

01:38:47,889 --> 01:38:45,889

people sonic booms that are going all

1876

01:38:51,099 --> 01:38:47,899

over the town great with those before

1877

01:38:53,799 --> 01:38:51,109

maybe as many as two million people with

1878

01:38:59,679 --> 01:38:53,809

us this is it but thought something was

1879

01:39:02,049 --> 01:38:59,689

kept secret it was widely know the UFO

1880

01:39:05,549 --> 01:39:02,059

or white bright light that was causing

1881

01:39:08,770 --> 01:39:05,559

all this problem split into two and

1882

01:39:12,069 --> 01:39:08,780

disappeared over a ridge the next

1883

01:39:14,500 --> 01:39:12,079

morning the Imperial Iranian Air Force

1884

01:39:17,020 --> 01:39:14,510

sent a helicopter out and they could

1885

01:39:19,359 --> 01:39:17,030

find no evidence of it but they did get

1886

01:39:21,639 --> 01:39:19,369

reports from the people that yes

1887

01:39:23,949 --> 01:39:21,649

something could come in there and so

1888

01:39:25,470 --> 01:39:23,959

either landed or crash depending on the

1889

01:39:29,660 --> 01:39:25,480

witness of service

1890

01:39:34,590 --> 01:39:29,670

of the same time all this was happening

1891

01:39:38,310 --> 01:39:34,600

an airline was approaching from Europe

1892

01:39:42,750 --> 01:39:38,320

flight to rob airline pilot was blinded

1893

01:39:49,200 --> 01:39:42,760

by this light the amount of time white

1894

01:39:52,170 --> 01:39:49,210

blindness can persist his normally about

1895

01:39:57,170 --> 01:39:52,180

a minute max but he was not blinded for

1896

01:40:02,580 --> 01:39:57,180

over five minutes flying a faster craft

1897

01:40:04,800 --> 01:40:02,590

fascinated the entire scenario this play

1898

01:40:09,110 --> 01:40:04,810

was all reported in Tehran it was the

1899

01:40:11,610 --> 01:40:09,120

this UFO was seen over Cairo Egypt

1900

01:40:16,460 --> 01:40:11,620

there's not very many points in between

1901

01:40:18,350 --> 01:40:16,470

but for airliners spotted it it was a

1902

01:40:21,979 --> 01:40:18,360

big event

1903

01:40:25,290 --> 01:40:21,989

so it wasn't suppressed at all it got a

1904

01:40:26,729 --> 01:40:25,300

bob tracks who was then a reporter for

1905

01:40:29,540 --> 01:40:26,739

the National Enquirer when the National

1906

01:40:33,229 --> 01:40:29,550

Enquirer had a great deal of credibility

1907

01:40:40,740 --> 01:40:33,239

wrote a great deal about it

1908

01:40:44,729 --> 01:40:40,750

this is for sure to go in every state

1909

01:40:47,220 --> 01:40:44,739

and all of the sudden haste these papers

1910

01:40:50,310 --> 01:40:47,230

that describe desert they're available

1911

01:40:54,150 --> 01:40:50,320

out there as archives and like I say you

1912

01:40:57,510 --> 01:40:54,160

just quite sure but the MUFON symposium

1913

01:41:00,720 --> 01:40:57,520

and I think there Bob Pratt's papers had

1914

01:41:03,120 --> 01:41:00,730

Bruce Maccabees analysis are also

1915

01:41:04,590 --> 01:41:03,130

available walk MUFON website so I just

1916

01:41:07,770 --> 01:41:04,600

why it's interested in this case could

1917

01:41:11,580 --> 01:41:07,780

get a lot of data from just on website

1918

01:41:16,350 --> 01:41:11,590

almost right yeah I I'm trying to

1919

01:41:19,380 --> 01:41:16,360

remember the military personnel that the

1920

01:41:24,210 --> 01:41:19,390

gentleman that was involved in spoke on

1921

01:41:26,130 --> 01:41:24,220

that do you know who he they had I do he

1922

01:41:27,780 --> 01:41:26,140

was a captain I've spoken to him I

1923

01:41:29,970 --> 01:41:27,790

talked to him and shook hands with him

1924

01:41:32,280 --> 01:41:29,980

had a picture taken with him and I'm not

1925

01:41:36,270 --> 01:41:32,290

remembering his name either but he was

1926

01:41:38,820 --> 01:41:36,280

on our show briefly and I met him the

1927

01:41:41,250 --> 01:41:38,830

head of the Imperial Iranian Air Force

1928

01:41:43,650 --> 01:41:41,260

like our Secretary of the Air Force was

1929

01:41:48,650 --> 01:41:43,660

there watching the whole thing I mean

1930

01:41:52,170 --> 01:41:48,660

that really yeah this is a big deal I

1931

01:41:54,180 --> 01:41:52,180

had a game one presentation on it and I

1932

01:41:57,030 --> 01:41:54,190

had a gentleman the audiences lived in

1933

01:41:59,670 --> 01:41:57,040

Tehran at the time and he said there

1934

01:42:02,070 --> 01:41:59,680

were where he was standing he lived on a

1935

01:42:04,640 --> 01:42:02,080

hill slightly above Tehran too hilly

1936

01:42:07,800 --> 01:42:04,650

town that he lived off of a higher Hill

1937

01:42:09,720 --> 01:42:07,810

and he says you could see hundreds of

1938

01:42:13,530 --> 01:42:09,730

people with flashlights everything else

1939

01:42:14,970 --> 01:42:13,540

out there looking at this thing maybe

1940

01:42:17,390 --> 01:42:14,980

maybe a million

1941

01:42:21,620 --> 01:42:17,400

too many people heard it that saw it was

1942

01:42:25,470 --> 01:42:21,630

unhurt Oh shopper

1943

01:42:30,080 --> 01:42:25,480

very few people here knew about it right

1944

01:42:32,940 --> 01:42:30,090

it's a it really is it's one of those

1945

01:42:35,280 --> 01:42:32,950

amazing cases and what in your

1946

01:42:39,690 --> 01:42:35,290

experience with your background what

1947

01:42:42,270 --> 01:42:39,700

would make equipment fail would it be

1948

01:42:48,630 --> 01:42:42,280

electric mech electromagnetics or

1949

01:42:57,420 --> 01:42:48,640

something electric pulse but we can't

1950

01:42:59,490 --> 01:42:57,430

turn him back off I don't know what the

1951

01:43:01,770 --> 01:42:59,500

modalities was to turn it back on I know

1952

01:43:04,590 --> 01:43:01,780

that like I say we can turn them off and

1953

01:43:06,570 --> 01:43:04,600

that's one of the real threats we as a

1954

01:43:08,460 --> 01:43:06,580

nation face that's because all the power

1955

01:43:10,770 --> 01:43:08,470

lines and all the railroad tracks all

1956

01:43:13,830 --> 01:43:10,780

become great big conductors that could

1957

01:43:17,760 --> 01:43:13,840

take an EMP falls out and destroy things

1958

01:43:20,250 --> 01:43:17,770

so yeah you know there are a lot of

1959

01:43:23,460 --> 01:43:20,260

cases where electronics fail and then

1960

01:43:25,770 --> 01:43:23,470

start again you know I mean I I actually

1961

01:43:29,490 --> 01:43:25,780

heard an account directly from someone

1962

01:43:32,580 --> 01:43:29,500

that experienced the he not even into

1963

01:43:34,290 --> 01:43:32,590

UFOs but totally told a story and I've

1964

01:43:36,270 --> 01:43:34,300

said this story before in the show but

1965

01:43:37,550 --> 01:43:36,280

there we have a lot of new listeners so

1966

01:43:42,000 --> 01:43:37,560

I'll say it quickly

1967

01:43:44,940 --> 01:43:42,010

he was in a pass a mountain pass and all

1968

01:43:47,100 --> 01:43:44,950

of a sudden his car stopped just died

1969

01:43:49,200 --> 01:43:47,110

and so did everyone else's car and

1970

01:43:50,670 --> 01:43:49,210

people were out there lifting the hood

1971

01:43:51,770 --> 01:43:50,680

everyone was pulled

1972

01:43:53,930 --> 01:43:51,780

you know rolled over to

1973

01:43:55,399 --> 01:43:53,940

side as far as it could and everyone was

1974

01:43:56,299 --> 01:43:55,409

out lifting their hood trying to check

1975

01:44:00,100 --> 01:43:56,309

what's going on

1976

01:44:02,839 --> 01:44:00,110

no sudden this big cigar shaped craft

1977

01:44:05,510 --> 01:44:02,849

floated without a sound right through

1978

01:44:08,060 --> 01:44:05,520

the mountain pass right over their head

1979

01:44:14,060 --> 01:44:08,070

it had portholes which i think is

1980

01:44:15,589 --> 01:44:14,070

another added amazing thing and it

1981

01:44:18,169 --> 01:44:15,599

passed through they're all looking at it

1982

01:44:20,029 --> 01:44:18,179

and everyone's you know going oh you

1983

01:44:23,839 --> 01:44:20,039

know making noises and all that it goes

1984

01:44:25,339 --> 01:44:23,849

through then a guy gets in his car tries

1985

01:44:27,169 --> 01:44:25,349

the key again the thing starts right up

1986

01:44:32,529 --> 01:44:27,179

everyone's car started right up again

1987

01:44:35,890 --> 01:44:32,539

what can do that and why did it happen

1988

01:44:40,640 --> 01:44:35,900

unless developed in the past few years

1989

01:44:42,500 --> 01:44:40,650

right and I doubt it because in the past

1990

01:44:45,649 --> 01:44:42,510

every time we've had a weapon system

1991

01:44:48,279 --> 01:44:45,659

we've used it every time we've had the

1992

01:44:50,810 --> 01:44:48,289

best technology we used it more and I

1993

01:44:55,910 --> 01:44:50,820

don't think we have that cause we

1994

01:44:58,490 --> 01:44:55,920

haven't used so well you just I mean you

1995

01:45:01,220 --> 01:44:58,500

just touched on something that is of

1996

01:45:04,910 --> 01:45:01,230

great interest to me even though I've

1997

01:45:08,109 --> 01:45:04,920

talked about it fairly recently with I

1998

01:45:10,399 --> 01:45:08,119

had Christopher Mellon who was

1999

01:45:12,830 --> 01:45:10,409

interviewed by The Huffington Post

2000

01:45:18,080 --> 01:45:12,840

Leslie Kane a while back he was on the

2001

01:45:19,939 --> 01:45:18,090

show a while a few weeks ago and so if

2002

01:45:22,819 --> 01:45:19,949

there is technology out there you just

2003

01:45:24,290 --> 01:45:22,829

said we'd be using it and that does make

2004

01:45:26,959 --> 01:45:24,300

sense and a lot of people are saying

2005

01:45:31,279 --> 01:45:26,969

these triangle craft that are you know

2006

01:45:33,020 --> 01:45:31,289

floating at 40 knots overhead no sound a

2007

01:45:36,529 --> 01:45:33,030

lot of people saying it's some type of

2008

01:45:38,299 --> 01:45:36,539

experimental military but it goes back

2009

01:45:41,180 --> 01:45:38,309

for many years that people are seeing

2010

01:45:44,180 --> 01:45:41,190

these type of things what do you say to

2011

01:45:48,890 --> 01:45:44,190

the person that is saying it has to be

2012

01:45:50,419 --> 01:45:48,900

military zombies some evidence yeah same

2013

01:45:51,680 --> 01:45:50,429

as that doing everything else show me

2014

01:45:54,279 --> 01:45:51,690

the evidence I'm not saying your honor

2015

01:45:57,589 --> 01:45:54,289

are you saying until we have evidence

2016

01:46:00,649 --> 01:45:57,599

your speculation and my speculation are

2017

01:46:02,569 --> 01:46:00,659

equally valid we doubted it

2018

01:46:05,750 --> 01:46:02,579

I can't say you're wrong I can't say

2019

01:46:08,089 --> 01:46:05,760

you're right it's interesting

2020

01:46:09,740 --> 01:46:08,099

so I think Stanton Friedman calls it his

2021

01:46:15,669 --> 01:46:09,750

great basket that gold in the great

2022

01:46:17,930 --> 01:46:15,679

bastard yeah until we have evidence

2023

01:46:21,169 --> 01:46:17,940

those are nice there's lots of nice

2024

01:46:23,720 --> 01:46:21,179

stories come just the one you just told

2025

01:46:26,600 --> 01:46:23,730

that's a nice story and goes in the gray

2026

01:46:29,060 --> 01:46:26,610

packet as soon as we have something to

2027

01:46:32,270 --> 01:46:29,070

that we can use as evidence for that

2028

01:46:37,370 --> 01:46:32,280

part I won't the testimony is a type of

2029

01:46:40,189 --> 01:46:37,380

error in grant that every day two

2030

01:46:42,410 --> 01:46:40,199

eyewitnesses that's better three

2031

01:46:44,660 --> 01:46:42,420

eyewitnesses that's better chef and then

2032

01:46:46,279 --> 01:46:44,670

we start talking about how long was it

2033

01:46:48,799 --> 01:46:46,289

out what kind of car did you have

2034

01:46:50,109 --> 01:46:48,809

thought there was an allotted car where

2035

01:46:53,660 --> 01:46:50,119

everything is computer-controlled

2036

01:46:55,640 --> 01:46:53,670

anybody have a diesel truck doesn't have

2037

01:46:57,560 --> 01:46:55,650

an electronic ignition systems that shut

2038

01:47:00,529 --> 01:46:57,570

down why would that shut down yeah

2039

01:47:02,779 --> 01:47:00,539

there's there's a lot of things we could

2040

01:47:05,750 --> 01:47:02,789

we could add a lot of questions we can

2041

01:47:07,399 --> 01:47:05,760

ask the determine what was going on

2042

01:47:09,439 --> 01:47:07,409

together it's more evidence and that's

2043

01:47:13,540 --> 01:47:09,449

that's what we need to do before we

2044

01:47:17,209 --> 01:47:13,550

could quantitatively state was a UFO and

2045

01:47:19,459 --> 01:47:17,219

it could have been some kind of mass

2046

01:47:21,109 --> 01:47:19,469

hysteria or something hysteria that

2047

01:47:23,419 --> 01:47:21,119

that's creating people running around

2048

01:47:26,509 --> 01:47:23,429

shouting and waving their arms so I

2049

01:47:30,200 --> 01:47:26,519

don't know it's a my gray basket wrangle

2050

01:47:33,529 --> 01:47:30,210

yeah sure doc will give an answer what

2051

01:47:35,120 --> 01:47:33,539

do you think you know just I'd like to

2052

01:47:38,500 --> 01:47:35,130

hear different people's opinion on this

2053

01:47:43,160 --> 01:47:38,510

but what do you think we would need for

2054

01:47:46,759 --> 01:47:43,170

enough evidence that to show or to get

2055

01:47:51,500 --> 01:47:46,769

science interested in the fact of

2056

01:47:53,629 --> 01:47:51,510

exploring the possibility that we are

2057

01:47:55,970 --> 01:47:53,639

being visited from let's say

2058

01:47:59,359 --> 01:47:55,980

extraterrestrials up I'll go out and say

2059

01:48:00,979 --> 01:47:59,369

say that I'm not saying I always uh I

2060

01:48:03,169 --> 01:48:00,989

always get a lot of email if I say

2061

01:48:07,339 --> 01:48:03,179

something like that

2062

01:48:11,229 --> 01:48:07,349

so but I'm just saying what would it

2063

01:48:18,540 --> 01:48:11,239

take for evidence to make science

2064

01:48:23,190 --> 01:48:20,250

I don't know if you want to call me a

2065

01:48:25,500 --> 01:48:23,200

scientist or not but I'm interested they

2066

01:48:29,910 --> 01:48:25,510

have and I don't mean that as a flip

2067

01:48:32,280 --> 01:48:29,920

response I think you mean essentially

2068

01:48:35,430 --> 01:48:32,290

and I apologize for putting words in

2069

01:48:38,940 --> 01:48:35,440

your mouth mainstream science studies it

2070

01:48:42,110 --> 01:48:38,950

has the same way they do archaeology

2071

01:48:46,380 --> 01:48:42,120

anthropology carpentry

2072

01:48:49,740 --> 01:48:46,390

building bridges there's a certain place

2073

01:48:52,680 --> 01:48:49,750

for scientists exception a juice' Center

2074

01:48:54,180 --> 01:48:52,690

goes on with them I call that mainstream

2075

01:48:57,180 --> 01:48:54,190

science good then interested

2076

01:48:58,500 --> 01:48:57,190

you have to have some the first thing

2077

01:49:00,590 --> 01:48:58,510

that you get the crazies out of the

2078

01:49:03,390 --> 01:49:00,600

business

2079

01:49:07,500 --> 01:49:03,400

hundreds of take UFOs and rank will

2080

01:49:09,540 --> 01:49:07,510

scream efis that it detracts from it it

2081

01:49:12,810 --> 01:49:09,550

does it's it's not going to get any

2082

01:49:15,709 --> 01:49:12,820

better either with with drones so we had

2083

01:49:18,000 --> 01:49:15,719

someone posting up on the message board

2084

01:49:22,080 --> 01:49:18,010

earlier that you can buy you know

2085

01:49:25,650 --> 01:49:22,090

illuminated drones now for \$15 or \$20

2086

01:49:26,479 --> 01:49:25,660

you know yeah it's not going to get any

2087

01:49:29,040 --> 01:49:26,489

better

2088

01:49:31,770 --> 01:49:29,050

yeah and you can you can fly a a

2089

01:49:34,650 --> 01:49:31,780

nightstick in a plastic bag suspended

2090

01:49:38,610 --> 01:49:34,660

underneath your own yeah and do all

2091

01:49:41,130 --> 01:49:38,620

kinds of things and there's various

2092

01:49:46,890 --> 01:49:41,140

people have various bonus for putting

2093

01:49:49,709 --> 01:49:46,900

hoaxes out since your people see things

2094

01:49:53,190 --> 01:49:49,719

that they can't explain and the labels

2095

01:49:59,970 --> 01:49:53,200

oh yeah I'm not just a budget this year

2096

01:50:02,010 --> 01:49:59,980

so it's like yeah we're not see so it's

2097

01:50:05,970 --> 01:50:02,020

difficult I think the first thing is we

2098

01:50:10,200 --> 01:50:05,980

have to be we initially have to be a lot

2099

01:50:13,560 --> 01:50:10,210

horse bridges and our procedures our

2100

01:50:16,950 --> 01:50:13,570

methods our way of evaluating these

2101
01:50:20,479 --> 01:50:16,960
things the way the way we investigative

2102
01:50:23,100 --> 01:50:20,489
that's why support move on that's

2103
01:50:27,060 --> 01:50:23,110
they're trying to do a credible job and

2104
01:50:30,360 --> 01:50:27,070
they still get enough jobs in there you

2105
01:50:32,340 --> 01:50:30,370
know yes yeah super into super

2106
01:50:40,780 --> 01:50:32,350
enthusiastic people who have

2107
01:50:44,950 --> 01:50:40,790
lesser degree of judgment yes though we

2108
01:50:48,160 --> 01:50:44,960
just had earlier in the Skype chat room

2109
01:50:52,150 --> 01:50:48,170
over at PSN radio someone wrote that

2110
01:50:53,290 --> 01:50:52,160
there a new MUFON investigator and we

2111
01:50:55,960 --> 01:50:53,300
were going back and forth in a

2112
01:50:58,780 --> 01:50:55,970
conversation there one of the things

2113
01:51:02,380 --> 01:50:58,790

during the news we talked about a case

2114

01:51:04,810 --> 01:51:02,390

was being closed this person was talking

2115

01:51:09,550 --> 01:51:04,820

about that - how they seemed to close

2116

01:51:11,320 --> 01:51:09,560

cases quickly and what are your what are

2117

01:51:12,880 --> 01:51:11,330

your thoughts on that you know as

2118

01:51:18,310 --> 01:51:12,890

unknown or whatever but this seems

2119

01:51:22,540 --> 01:51:18,320

pretty quick yeah very seldom do we get

2120

01:51:29,140 --> 01:51:22,550

much data now quite frequently the data

2121

01:51:32,440 --> 01:51:29,150

are sketchy I had a case where a college

2122

01:51:36,640 --> 01:51:32,450

professor and a student were in their

2123

01:51:38,890 --> 01:51:36,650

houses they had they could hear

2124

01:51:42,580 --> 01:51:38,900

automatic weapons fire off the distance

2125

01:51:47,140 --> 01:51:42,590

this is a fine thing in their houses

2126
01:51:52,720 --> 01:51:47,150
they had something right right right so

2127
01:51:54,640 --> 01:51:52,730
what bright it was and noisy and just

2128
01:51:56,680 --> 01:51:54,650
earth-shattering that they was shaking

2129
01:52:00,820 --> 01:51:56,690
they could speak thus filtering down and

2130
01:52:01,390 --> 01:52:00,830
light shining through tracks on this

2131
01:52:05,550 --> 01:52:01,400
oxygen

2132
01:52:09,550 --> 01:52:05,560
it was overhead and that object

2133
01:52:12,520 --> 01:52:09,560
disappeared it went away and went

2134
01:52:18,430 --> 01:52:12,530
outside and one of the neighbors was

2135
01:52:20,380 --> 01:52:18,440
fighting with something and a small

2136
01:52:23,410 --> 01:52:20,390
something like three foot tall four foot

2137
01:52:28,120 --> 01:52:23,420
tall style but there were no children in

2138
01:52:32,050 --> 01:52:28,130

the area and then the next day a black

2139

01:52:34,390 --> 01:52:32,060

pea ever came up and went to the

2140

01:52:36,460 --> 01:52:34,400

backyard then brought out of I suggest

2141

01:52:39,850 --> 01:52:36,470

it was readily upheld this is your

2142

01:52:41,950 --> 01:52:39,860

four-foot tall child took it off and the

2143

01:52:43,810 --> 01:52:41,960

neighbor bought a do pickup truck and

2144

01:52:47,190 --> 01:52:43,820

had plenty of money and plenty of boobs

2145

01:52:55,860 --> 01:52:49,530

what was that all about

2146

01:53:02,170 --> 01:52:59,830

reports other than not to people of

2147

01:53:05,590 --> 01:53:02,180

anything happening couldn't find any

2148

01:53:07,860 --> 01:53:05,600

spent cartridges and when aircraft with

2149

01:53:11,290 --> 01:53:07,870

guns which are very show up anymore

2150

01:53:12,700 --> 01:53:11,300

engaged they eject the cartridges into

2151
01:53:14,440 --> 01:53:12,710
the air they fall to the ground so

2152
01:53:16,450 --> 01:53:14,450
there's a lot of automatic weapons fire

2153
01:53:18,700 --> 01:53:16,460
you're gonna find fake hearts we didn't

2154
01:53:24,930 --> 01:53:18,710
find it that doesn't mean they aren't

2155
01:53:27,820 --> 01:53:24,940
there - we did find footprints that

2156
01:53:32,380 --> 01:53:27,830
requiring jars explicitly maybe there

2157
01:53:35,890 --> 01:53:32,390
was a Bigfoot out there but that to any

2158
01:53:39,970 --> 01:53:35,900
other witness accounts and the neighbor

2159
01:53:47,620 --> 01:53:39,980
did have a brand-new pickup truck and he

2160
01:53:51,970 --> 01:53:47,630
was drunker than a skunk for energy so

2161
01:53:54,370 --> 01:53:51,980
where did you go after that what would

2162
01:53:55,720 --> 01:53:54,380
you do were you there are no more

2163
01:53:58,750 --> 01:53:55,730

witnesses there's nobody around to

2164

01:54:01,650 --> 01:53:58,760

cancel with it there was no police

2165

01:54:06,010 --> 01:54:01,660

activity no police forces on the country

2166

01:54:08,500 --> 01:54:06,020

very very remote area where do you know

2167

01:54:16,000 --> 01:54:08,510

what to do with it right what would you

2168

01:54:19,360 --> 01:54:16,010

write up the facts we only have about

2169

01:54:22,090 --> 01:54:19,370

ever we only have about three minutes

2170

01:54:24,220 --> 01:54:22,100

left and I had a couple of questions I'm

2171

01:54:25,960 --> 01:54:24,230

gonna try to being just give a real

2172

01:54:30,160 --> 01:54:25,970

quick short answer

2173

01:54:34,420 --> 01:54:30,170

let's see Bobby wanted to know did you

2174

01:54:36,820 --> 01:54:34,430

ever work on Vela satellites V ela how

2175

01:54:40,810 --> 01:54:36,830

every play listen no that's that was a

2176
01:54:43,270 --> 01:54:40,820
predecessor to DSP that was old no that

2177
01:54:47,260 --> 01:54:43,280
was a quick one all right and another

2178
01:54:51,210 --> 01:54:47,270
one is totally unrelated but Shane wants

2179
01:54:54,340 --> 01:54:51,220
to know what's your thoughts of the f-35

2180
01:54:55,930 --> 01:54:54,350
were and he just said that he doesn't

2181
01:54:59,320 --> 01:54:55,940
often get a chance to talk to an

2182
01:55:04,150 --> 01:55:01,840
you talk about the news strike

2183
01:55:04,840 --> 01:55:04,160
reconnaissance spider it's a piece of

2184
01:55:08,140 --> 01:55:04,850
junk

2185
01:55:11,950 --> 01:55:08,150
oh that's a good answer

2186
01:55:13,180 --> 01:55:11,960
okay yeah it's overpriced underperforms

2187
01:55:16,050 --> 01:55:13,190
Wow

2188
01:55:19,420 --> 01:55:16,060

yeah someone's probably making a little

2189

01:55:23,140 --> 01:55:19,430

trunk money on that one as they say in

2190

01:55:26,530 --> 01:55:23,150

the car business all right well can you

2191

01:55:28,420 --> 01:55:26,540

tell the listener if they're interested

2192

01:55:31,420 --> 01:55:28,430

in contacting you how they you don't

2193

01:55:34,840 --> 01:55:31,430

have a website right I do not have a

2194

01:55:47,500 --> 01:55:34,850

website I do not have a book for sale

2195

01:55:50,350 --> 01:55:47,510

yet I do have you know I I said we could

2196

01:55:52,300 --> 01:55:50,360

talk about that and you know I apologize

2197

01:55:55,090 --> 01:55:52,310

we ran on it we ran out of time so

2198

01:55:57,420 --> 01:55:55,100

that's your fascination right now is the

2199

01:56:01,120 --> 01:55:57,430

petroglyphs of that have a lot of

2200

01:56:04,210 --> 01:56:01,130

interesting beings and also orbs and

2201

01:56:05,770 --> 01:56:04,220

saucer like things just real quickly

2202

01:56:09,790 --> 01:56:05,780

because we only have 2 minutes or less

2203

01:56:12,460 --> 01:56:09,800

are you going to continue along that

2204

01:56:17,070 --> 01:56:12,470

path and try to discover more of these

2205

01:56:22,540 --> 01:56:17,080

in your new territory out there yes I am

2206

01:56:34,290 --> 01:56:22,550

and right now we're looking at my wife

2207

01:56:40,420 --> 01:56:37,990

three three petroglyphs and one

2208

01:56:46,570 --> 01:56:40,430

pictographs so far that accurately

2209

01:56:48,790 --> 01:56:46,580

depict ancient legends and just a nice

2210

01:57:05,490 --> 01:56:48,800

option and I have a very good friend who

2211

01:57:08,200 --> 01:57:05,500

I'm sure most audiences hope so we

2212

01:57:11,170 --> 01:57:08,210

correlate and find out what's going on

2213

01:57:12,670 --> 01:57:11,180

are you planning to but are you planning

2214

01:57:13,060 --> 01:57:12,680

to write a book about this or is this

2215

01:57:22,689 --> 01:57:13,070

just

2216

01:57:25,060 --> 01:57:22,699

talking minute I've got it's a hobby but

2217

01:57:30,609 --> 01:57:25,070

it's I don't plan on making I'd like to

2218

01:57:32,830 --> 01:57:30,619

make a lot of money all right well hey

2219

01:57:36,089 --> 01:57:32,840

thanks so much and listeners out there

2220

01:57:39,580 --> 01:57:36,099

you can if you go to the show notes on

2221

01:57:42,280 --> 01:57:39,590

podcast UFO you will see how to get a

2222

01:57:46,390 --> 01:57:42,290

hold of our great guest this evening run

2223

01:57:48,550 --> 01:57:46,400

Righi R thanks so much run anytime all

2224

01:57:50,100 --> 01:57:48,560

right yeah may want to have you back on

2225

01:57:53,379 --> 01:57:50,110

again we'll talk about that later

2226

01:57:55,149 --> 01:57:53,389

alright everyone so that's it for our

2227

01:57:56,830 --> 01:57:55,159

show this evening thanks so much for

2228

01:57:58,689 --> 01:57:56,840

listening we'll be back next week and

2229

01:58:01,450 --> 01:57:58,699

Alejandro Rojas and I'll be doing the

2230

01:58:03,399 --> 01:58:01,460

entire show together for those of you

2231

01:58:05,560 --> 01:58:03,409

that like to hear us do the news every

2232

01:58:06,550 --> 01:58:05,570

week you might enjoy it some people may

2233

01:58:08,500 --> 01:58:06,560

not like it at all

2234

01:58:10,290 --> 01:58:08,510

you can skip a week if you have to but

2235

01:58:13,899 --> 01:58:10,300

anyway we'll be back and thanks so much

2236

01:58:16,000 --> 01:58:13,909

a couple of thanks out there - Carrie

2237

01:58:19,720 --> 01:58:16,010

Lloyd Whitehouse and Bruce Renier for

2238

01:58:21,339 --> 01:58:19,730

our music and Keith Rowland for putting

2239

01:58:23,589 --> 01:58:21,349

us on the Dark Matter digital network

2240

01:58:25,510 --> 01:58:23,599

and also angel for over at PSN radio
