

the EVERYTHING ELSE SHOW LIVE STREAM

[everything-else-show.com](http://everything-else-show.com)

1  
00:00:24,380 --> 00:00:21,970

[Music]

2  
00:00:27,470 --> 00:00:24,390

hello everyone this is Martin Willis

3  
00:00:29,029 --> 00:00:27,480

your host and I have an exciting guest

4  
00:00:31,700 --> 00:00:29,039

we're going to be talking about what I

5  
00:00:35,150 --> 00:00:31,710

think is a fascinating topic we have

6  
00:00:37,090 --> 00:00:35,160

Edwin seam a PhD and he's

7  
00:00:39,500 --> 00:00:37,100

internationally known for his work and

8  
00:00:42,229 --> 00:00:39,510

parapsychology we're going to be talking

9  
00:00:43,490 --> 00:00:42,239

about the Stargate project as some

10  
00:00:47,630 --> 00:00:43,500

people call it or the Stargate program

11  
00:00:50,479 --> 00:00:47,640

and so much more and again I'm really

12  
00:00:52,850 --> 00:00:50,489

excited I spoke to Edwin about a year

13  
00:00:54,560 --> 00:00:52,860

ago or a little bit more fascinating man

14

00:00:59,180 --> 00:00:54,570

and here he is all the way from

15

00:01:00,560 --> 00:00:59,190

California how are you well fine Martin

16

00:01:03,680 --> 00:01:00,570

thanks for having me on the show and

17

00:01:07,100 --> 00:01:03,690

looking forward to it yes and I like

18

00:01:11,090 --> 00:01:07,110

that title you chose for this show which

19

00:01:16,100 --> 00:01:11,100

is basically psychic spies the Russians

20

00:01:20,570 --> 00:01:16,110

and research the inside story so yeah we

21

00:01:27,339 --> 00:01:20,580

want to hear the inside story well I was

22

00:01:30,859 --> 00:01:27,349

on the program from 1976 through 1995

23

00:01:32,540 --> 00:01:30,869

the program was funded by the US

24

00:01:34,460 --> 00:01:32,550

government as everybody knows under the

25

00:01:36,380 --> 00:01:34,470

name of Stargate which was only the last

26  
00:01:39,680 --> 00:01:36,390  
name of a whole bunch of what are called

27  
00:01:43,339 --> 00:01:39,690  
code names or special access names but

28  
00:01:46,160 --> 00:01:43,349  
nonetheless if you add up it was founded

29  
00:01:48,169 --> 00:01:46,170  
by Russell Targ and how put off people

30  
00:01:50,719 --> 00:01:48,179  
know those names fairly well now and

31  
00:01:52,609 --> 00:01:50,729  
they are to be congratulated for their

32  
00:01:59,059 --> 00:01:52,619  
bravery for starting this program in

33  
00:02:01,400 --> 00:01:59,069  
1972 I joined in 1976 my time of the

34  
00:02:05,690 --> 00:02:01,410  
program is longer than the sum of those

35  
00:02:08,210 --> 00:02:05,700  
two guys how left in 85 and Russell left

36  
00:02:10,790 --> 00:02:08,220  
in 82 so I've been there the longest so

37  
00:02:14,869 --> 00:02:10,800  
if you want an inside story as biased as

38  
00:02:16,850 --> 00:02:14,879

it is it's me back and how did you how

39

00:02:18,770 --> 00:02:16,860

did you fall into I mean there wasn't a

40

00:02:20,900 --> 00:02:18,780

whole lot of people employed and

41

00:02:23,330 --> 00:02:20,910

actually working under this government

42

00:02:28,009 --> 00:02:23,340

contract how did that all happen how did

43

00:02:31,009 --> 00:02:28,019

it start I should say well it turns out

44

00:02:32,720 --> 00:02:31,019

they give just a bit of history here I'm

45

00:02:34,309 --> 00:02:32,730

putting together with a colleague

46

00:02:37,640 --> 00:02:34,319

where we're calling the Stargate

47

00:02:40,509 --> 00:02:37,650

archives which are four very large books

48

00:02:43,160 --> 00:02:40,519

one maybe 800 to a thousand pages each

49

00:02:44,180 --> 00:02:43,170

all the work that was carried on by the

50

00:02:46,430 --> 00:02:44,190

US government

51  
00:02:48,500 --> 00:02:46,440  
we have enough fourth volume which tells

52  
00:02:50,990 --> 00:02:48,510  
all the memos flying back and forth

53  
00:02:53,630 --> 00:02:51,000  
within the government as with regard to

54  
00:02:56,210 --> 00:02:53,640  
starting this program one member we have

55  
00:02:58,330 --> 00:02:56,220  
was signed by the Director of Central

56  
00:03:02,180 --> 00:02:58,340  
Intelligence a guy by the name of Colby

57  
00:03:06,050 --> 00:03:02,190  
starting the program in 1972 they were

58  
00:03:07,729 --> 00:03:06,060  
concerned that that perhaps the stories

59  
00:03:10,520 --> 00:03:07,739  
coming out of the Soviet Union and China

60  
00:03:12,619 --> 00:03:10,530  
and elsewhere if those stories were true

61  
00:03:16,940 --> 00:03:12,629  
then there was somewhat of an obvious

62  
00:03:19,220 --> 00:03:16,950  
self-evident possible applications for

63  
00:03:21,110 --> 00:03:19,230

intelligence gathering so that's why

64

00:03:22,789 --> 00:03:21,120

they were interested in it the other

65

00:03:26,089 --> 00:03:22,799

thing it's really interesting from my

66

00:03:29,300 --> 00:03:26,099

point of view as a sort of materialist

67

00:03:31,640 --> 00:03:29,310

physicist that the people who were

68

00:03:33,380 --> 00:03:31,650

starting this if the agency in the later

69

00:03:35,809 --> 00:03:33,390

on of other organizations from the

70

00:03:38,599 --> 00:03:35,819

government looked at it purely as a

71

00:03:41,000 --> 00:03:38,609

signal based system from physics

72

00:03:43,970 --> 00:03:41,010

physiology and psychology there was

73

00:03:45,860 --> 00:03:43,980

nothing sort of new agey aspect about it

74

00:03:47,870 --> 00:03:45,870

at all many of my colleagues and

75

00:03:49,580 --> 00:03:47,880

sometimes myself think oh well maybe

76

00:03:53,030 --> 00:03:49,590

they're missing something in that regard

77

00:03:55,729 --> 00:03:53,040

hmm I came to it though it may in a very

78

00:03:58,190 --> 00:03:55,739

backward sort of way I was in finished

79

00:03:59,900 --> 00:03:58,200

graduate school I was a postdoc in

80

00:04:02,080 --> 00:03:59,910

nuclear physics at the University of

81

00:04:04,729 --> 00:04:02,090

California Davis from the cyclotron

82

00:04:07,360 --> 00:04:04,739

cyclotron lab out there I've never even

83

00:04:10,580 --> 00:04:07,370

heard of ESP let alone being interested

84

00:04:14,509 --> 00:04:10,590

and I'm sitting around I see an advert

85

00:04:17,390 --> 00:04:14,519

for a weekend seminar run by Professor

86

00:04:19,610 --> 00:04:17,400

Charles Tarr charlie cart and he had a

87

00:04:21,409 --> 00:04:19,620

guy on there named Bob Monroe which is

88

00:04:23,330 --> 00:04:21,419

now known as the Monroe Institute in

89

00:04:25,400 --> 00:04:23,340

Virginia and Bob Monroe had just

90

00:04:27,529 --> 00:04:25,410

published a book called journeys out of

91

00:04:28,909 --> 00:04:27,539

the body so I had nothing better to do

92

00:04:31,640 --> 00:04:28,919

so I went to that thing and here's this

93

00:04:34,400 --> 00:04:31,650

kind of business oriented looking guy in

94

00:04:36,110 --> 00:04:34,410

his 50s saying the most amazing

95

00:04:38,600 --> 00:04:36,120

I thought completely stupid things that

96

00:04:40,100 --> 00:04:38,610

it possibly could imagine he was getting

97

00:04:41,839 --> 00:04:40,110

out of his body and he was going and

98

00:04:43,790 --> 00:04:41,849

pinching somebody and they would have a

99

00:04:45,040 --> 00:04:43,800

bruise on them you know out of his body

100

00:04:47,589 --> 00:04:45,050

pinching them all

101  
00:04:49,809 --> 00:04:47,599  
says it okay if this business guy can do

102  
00:04:51,790 --> 00:04:49,819  
that I'm an arrogant stupid physicist I

103  
00:04:53,290 --> 00:04:51,800  
bought the book and I started reading

104  
00:04:55,540 --> 00:04:53,300  
and I read the whole book and I said

105  
00:04:56,890 --> 00:04:55,550  
okay I want to give this up go I mean if

106  
00:04:59,649 --> 00:04:56,900  
this is real I should be able to do it

107  
00:05:02,740 --> 00:04:59,659  
and I tried desperately for maybe two

108  
00:05:04,450 --> 00:05:02,750  
nuts nothing happened so I stick the

109  
00:05:09,939 --> 00:05:04,460  
whole thing aside and rejected the whole

110  
00:05:12,070 --> 00:05:09,949  
thing but then I ran into a guy he was

111  
00:05:14,950 --> 00:05:12,080  
giving a talk at UC Berkeley his name

112  
00:05:17,200 --> 00:05:14,960  
was Charles honorton and we became

113  
00:05:19,059 --> 00:05:17,210

friends and colleagues Eve as a mentor

114

00:05:21,550 --> 00:05:19,069

of mine and he was speaking science I

115

00:05:23,350 --> 00:05:21,560

went to go hear him he was talking sign

116

00:05:25,360 --> 00:05:23,360

so I invited Chuck out for dinner and I

117

00:05:27,399 --> 00:05:25,370

said hey Chuck started asking all these

118

00:05:30,399 --> 00:05:27,409

really tough questions and he had solid

119

00:05:32,230 --> 00:05:30,409

scientific answer huh and that got me

120

00:05:33,909 --> 00:05:32,240

interested in the field I said how could

121

00:05:36,610 --> 00:05:33,919

I not be interested in this I'm an

122

00:05:39,610 --> 00:05:36,620

experimental physicist for the PhD in

123

00:05:41,350 --> 00:05:39,620

nuclear physics how could I fail not to

124

00:05:44,860 --> 00:05:41,360

be interested in this yeah I'm still

125

00:05:48,159 --> 00:05:44,870

here Wow well interesting so but did you

126

00:05:49,809 --> 00:05:48,169

find this particular job with the

127

00:05:52,990 --> 00:05:49,819

government or did they find you how did

128

00:05:53,230 --> 00:05:53,000

all that how did all that happen ah very

129

00:05:57,059 --> 00:05:53,240

good

130

00:05:59,950 --> 00:05:57,069

there is now the late mr. Ingo Swan

131

00:06:03,219 --> 00:05:59,960

well-known psychic in the early days

132

00:06:05,499 --> 00:06:03,229

subject and I had spent a year in India

133

00:06:10,089 --> 00:06:05,509

chasing miracles I found none that's all

134

00:06:12,070 --> 00:06:10,099

separate story and I I came back and

135

00:06:15,159 --> 00:06:12,080

started to work at Maimonides Medical

136

00:06:18,070 --> 00:06:15,169

Center in Brooklyn New York and that is

137

00:06:20,439 --> 00:06:18,080

was a research facility looking at dream

138

00:06:22,749 --> 00:06:20,449

telepathy in fact there's a funny thing

139

00:06:25,300 --> 00:06:22,759

about that we'd answer the phone hello

140

00:06:27,369 --> 00:06:25,310

Division of parapsychology may we tell

141

00:06:30,309 --> 00:06:27,379

you they call it and there would be this

142

00:06:33,219 --> 00:06:30,319

cognitive dissonance ahead to the flow

143

00:06:34,990 --> 00:06:33,229

of what a sales going on here but I saw

144

00:06:37,390 --> 00:06:35,000

more psychic stuff in the basement of

145

00:06:39,999 --> 00:06:37,400

that building in Brooklyn that I ever

146

00:06:42,129 --> 00:06:40,009

did anything in India and I ran into

147

00:06:45,790 --> 00:06:42,139

Ingo Swann and we started working

148

00:06:48,490 --> 00:06:45,800

together and I'm a research physicist at

149

00:06:50,649 --> 00:06:48,500

that time and experimentalist knew what

150

00:06:51,999 --> 00:06:50,659

he was doing some work at SR I couldn't

151  
00:06:55,510 --> 00:06:52,009  
tell me much about it because was all

152  
00:06:57,790 --> 00:06:55,520  
classified he said gee how would you

153  
00:06:58,510 --> 00:06:57,800  
like to come and work I don't want my

154  
00:07:00,969 --> 00:06:58,520  
brilliant

155  
00:07:02,619 --> 00:07:00,979  
piqué psychokinesis work to go down the

156  
00:07:05,379 --> 00:07:02,629  
tubes because somebody flipped the light

157  
00:07:08,080 --> 00:07:05,389  
switch and that that's what happened no

158  
00:07:11,559 --> 00:07:08,090  
k alright so basically Ingo Swan got me

159  
00:07:15,010 --> 00:07:11,569  
my job how about that now is that did

160  
00:07:17,320 --> 00:07:15,020  
you get any criticism for looking into

161  
00:07:18,219 --> 00:07:17,330  
this type of work from your colleagues

162  
00:07:21,219 --> 00:07:18,229  
tons

163  
00:07:23,830 --> 00:07:21,229

oh absolutely there's a bit of a story

164

00:07:25,719 --> 00:07:23,840

there one of my dear friends and

165

00:07:28,510 --> 00:07:25,729

colleagues we were business partners and

166

00:07:31,300 --> 00:07:28,520

physics colleagues the late professor

167

00:07:33,640 --> 00:07:31,310

Melvin Schwartz and he was a high energy

168

00:07:36,820 --> 00:07:33,650

physicist at Stanford Linear Accelerator

169

00:07:38,980 --> 00:07:36,830

Center at SLAC and he thought what I was

170

00:07:40,839 --> 00:07:38,990

doing was total BS and every time we met

171

00:07:43,149 --> 00:07:40,849

to do anything together so should he

172

00:07:45,070 --> 00:07:43,159

would just brag on me like it what the

173

00:07:47,439 --> 00:07:45,080

hell are you doing waste your time so

174

00:07:52,450 --> 00:07:47,449

when I took over the directorship of the

175

00:07:54,100 --> 00:07:52,460

program in 1985 we put together actually

176

00:07:56,320 --> 00:07:54,110

the army did put together what was

177

00:07:59,290 --> 00:07:56,330

called scientific Oversight Committee of

178

00:08:01,149 --> 00:07:59,300

the who's who of science in the country

179

00:08:05,920 --> 00:08:01,159

and the interest requirement for that

180

00:08:09,159 --> 00:08:05,930

you had to be a self Perkis captain but

181

00:08:10,959 --> 00:08:09,169

open-minded so by then Mel Mel had won

182

00:08:14,080 --> 00:08:10,969

the Nobel Prize in Physics will Leon

183

00:08:16,209 --> 00:08:14,090

Lederman for the discoverer of the muon

184

00:08:18,070 --> 00:08:16,219

neutrino so I went to Mel brought him

185

00:08:19,870 --> 00:08:18,080

down to my house for dinner and I said

186

00:08:22,420 --> 00:08:19,880

hey Mel how would you like to be on our

187

00:08:25,029 --> 00:08:22,430

scientific Oversight Committee and I

188

00:08:27,309 --> 00:08:25,039

said now you know he said well goodness

189

00:08:29,170 --> 00:08:27,319

sakes that is just I think it's total BS

190

00:08:30,969 --> 00:08:29,180

why do you want me on on your committee

191

00:08:32,560 --> 00:08:30,979

and I said there's two reasons one you

192

00:08:35,069 --> 00:08:32,570

have a Nobel Prize and that looks really

193

00:08:37,870 --> 00:08:35,079

good on the math end but the real reason

194

00:08:41,110 --> 00:08:37,880

the real reason is I trust you you're an

195

00:08:43,620 --> 00:08:41,120

honest scientist he said okay I'll do it

196

00:08:46,449 --> 00:08:43,630

with one condition listen what's that

197

00:08:48,130 --> 00:08:46,459

suppose after I am watching you for a

198

00:08:50,470 --> 00:08:48,140

year because it had to be a five-year

199

00:08:55,090 --> 00:08:50,480

commitment if after watching you for a

200

00:08:57,220 --> 00:08:55,100

year I discovered some bold ideas and I

201  
00:08:59,019 --> 00:08:57,230  
said well okay if you can convince the

202  
00:08:59,740 --> 00:08:59,029  
other members of this committee that

203  
00:09:01,930 --> 00:08:59,750  
it's all bs

204  
00:09:03,699 --> 00:09:01,940  
that I'll quit and I'll come to work for

205  
00:09:05,829 --> 00:09:03,709  
you at Brookhaven National Laboratory in

206  
00:09:07,720 --> 00:09:05,839  
New York he's just done I said now we're

207  
00:09:11,120 --> 00:09:07,730  
not even close to done so we're talking

208  
00:09:13,670 --> 00:09:11,130  
about I said what if watching us free

209  
00:09:15,830 --> 00:09:13,680  
and talking to other members of the

210  
00:09:17,570 --> 00:09:15,840  
community you come to the conclusion

211  
00:09:19,790 --> 00:09:17,580  
there's something worth looking at here

212  
00:09:21,350 --> 00:09:19,800  
that caught him off-guard and he said

213  
00:09:23,030 --> 00:09:21,360

I'll tell you what I will spend some

214

00:09:25,160 --> 00:09:23,040

fraction on my career helping you to

215

00:09:26,960 --> 00:09:25,170

figure out how it worked you did that up

216

00:09:30,860 --> 00:09:26,970

to about a year before he passed away

217

00:09:34,160 --> 00:09:30,870

well amazing isn't that great now how

218

00:09:40,730 --> 00:09:34,170

and why did the government get involved

219

00:09:45,170 --> 00:09:40,740

in this uh it's complex

220

00:09:47,030 --> 00:09:45,180

first off inglis one have done some work

221

00:09:50,270 --> 00:09:47,040

at the American Society for psychical

222

00:09:52,610 --> 00:09:50,280

research in in New York City very

223

00:09:58,340 --> 00:09:52,620

wonderful brownstone place on 73rd

224

00:10:01,370 --> 00:09:58,350

Street I think and it has obviously you

225

00:10:03,350 --> 00:10:01,380

know if it's true that's a big if then

226

00:10:06,290 --> 00:10:03,360

if you can sit in a room and just coop

227

00:10:08,330 --> 00:10:06,300

it's happening next floor and maybe next

228

00:10:09,950 --> 00:10:08,340

door in another country and be able to

229

00:10:13,280 --> 00:10:09,960

describe it without any risk to yourself

230

00:10:15,440 --> 00:10:13,290

and it's cheap why not give it a go and

231

00:10:19,100 --> 00:10:15,450

that was part of what started this

232

00:10:21,110 --> 00:10:19,110

bailout and when ego came to SR I and

233

00:10:23,390 --> 00:10:21,120

it's all written up and put off in tards

234

00:10:26,420 --> 00:10:23,400

book called mind reach when he first

235

00:10:27,770 --> 00:10:26,430

came there they were doing ESP kinds of

236

00:10:30,710 --> 00:10:27,780

things from this room to the next room

237

00:10:34,460 --> 00:10:30,720

and bingo had a reputation well deserved

238

00:10:35,720 --> 00:10:34,470

by my dad as his throwing tantrums and

239

00:10:37,490 --> 00:10:35,730

he said damn it

240

00:10:39,110 --> 00:10:37,500

I could look anywhere in the world just

241

00:10:40,370 --> 00:10:39,120

give me the geographic coordinates many

242

00:10:43,280 --> 00:10:40,380

place in the world I'll tell you what's

243

00:10:45,050 --> 00:10:43,290

there and he could Wow at that blew

244

00:10:47,240 --> 00:10:45,060

apart the whole thing and then other

245

00:10:50,000 --> 00:10:47,250

people came on that price and hella

246

00:10:53,510 --> 00:10:50,010

Hammond and other folks were able to do

247

00:10:56,960 --> 00:10:53,520

this not perfectly by no means not

248

00:11:00,470 --> 00:10:56,970

perfectly but good enough now now what

249

00:11:02,030 --> 00:11:00,480

type of person does it take or have you

250

00:11:04,130 --> 00:11:02,040

looked into that what type of person

251

00:11:08,390 --> 00:11:04,140

does this take that can actually do this

252

00:11:10,430 --> 00:11:08,400

type of thing you know anything you can

253

00:11:13,400 --> 00:11:10,440

think of the government paid and I thank

254

00:11:15,350 --> 00:11:13,410

you a Martin for your tax money put it

255

00:11:17,210 --> 00:11:15,360

Larsen where we think is large sums of

256

00:11:19,490 --> 00:11:17,220

money to examine every question you can

257

00:11:21,980 --> 00:11:19,500

think of including that one they wanted

258

00:11:23,319 --> 00:11:21,990

to know who is the cooler psychics and

259

00:11:25,989 --> 00:11:23,329

who or not

260

00:11:30,400 --> 00:11:25,999

because they wanted to eventually find

261

00:11:34,989 --> 00:11:30,410

military people to be psychic spies

262

00:11:36,910 --> 00:11:34,999

I guess the sad news is with some hand

263

00:11:39,729 --> 00:11:36,920

waving descriptions we found with that

264

00:11:42,249 --> 00:11:39,739

job that most of the people that we deal

265

00:11:44,439 --> 00:11:42,259

with in one sense of any rate are

266

00:11:47,019 --> 00:11:44,449

boringly normal like the rest of us so

267

00:11:48,579 --> 00:11:47,029

what what differentiates the good guys

268

00:11:50,919 --> 00:11:48,589

from the bad guys and that's an

269

00:11:52,989 --> 00:11:50,929

interesting question and we just

270

00:11:55,769 --> 00:11:52,999

published a model about a year ago that

271

00:11:57,970 --> 00:11:55,779

addresses that question neurologically

272

00:11:59,789 --> 00:11:57,980

neurophysiological e of what's going on

273

00:12:01,720 --> 00:11:59,799

here in both synesthesia and

274

00:12:04,900 --> 00:12:01,730

interconnectedness in the brain and

275

00:12:08,049 --> 00:12:04,910

whole bunch of stuff like that if I were

276

00:12:10,449 --> 00:12:08,059

to say who I would pick students would

277

00:12:12,369 --> 00:12:10,459

be the worst case because they're more

278

00:12:14,079 --> 00:12:12,379

worried about everything else but even

279

00:12:16,569 --> 00:12:14,089

if you pay them to come to the lab oh my

280

00:12:19,900 --> 00:12:16,579

god together but if you find anybody

281

00:12:22,210 --> 00:12:19,910

that is happy with their station in life

282

00:12:24,850 --> 00:12:22,220

whether they're garbage collector or a

283

00:12:26,650 --> 00:12:24,860

Supreme Court justice no matter what

284

00:12:29,650 --> 00:12:26,660

they do if they're pleased with their

285

00:12:31,179 --> 00:12:29,660

job and they're good at it then that's a

286

00:12:34,869 --> 00:12:31,189

good thing there's a book on my shelf

287

00:12:37,539 --> 00:12:34,879

behind me called executive ESP by

288

00:12:39,809 --> 00:12:37,549

Douglas Dean and he wrote it in the 70s

289

00:12:42,189 --> 00:12:39,819

and in those days what they did

290

00:12:45,280 --> 00:12:42,199

companies would have sort of off-site

291

00:12:48,369 --> 00:12:45,290

team buildings but seminars that would

292

00:12:50,169 --> 00:12:48,379

go for a weekend to try to find out who

293

00:12:52,139 --> 00:12:50,179

should be in the management chain or how

294

00:12:54,159 --> 00:12:52,149

you know to improve the behavior of

295

00:12:57,100 --> 00:12:54,169

upper management in these various

296

00:13:00,129 --> 00:12:57,110

companies and what Dean did was to get

297

00:13:03,309 --> 00:13:00,139

people to agree to allow him to put in a

298

00:13:05,019 --> 00:13:03,319

covert ESP test so among all the other

299

00:13:06,519 --> 00:13:05,029

tests that people were taking they

300

00:13:09,249 --> 00:13:06,529

didn't know this other middle section

301  
00:13:12,069 --> 00:13:09,259  
was an ESP test and at the end of the

302  
00:13:14,049 --> 00:13:12,079  
time they broke that blind and sure

303  
00:13:15,729 --> 00:13:14,059  
enough revealed it was the SP test and

304  
00:13:17,470 --> 00:13:15,739  
darkness team then sent out

305  
00:13:19,600 --> 00:13:17,480  
questionnaires to find out whether these

306  
00:13:22,689 --> 00:13:19,610  
people believed in ESP or not what came

307  
00:13:26,319 --> 00:13:22,699  
out of that is very very interesting

308  
00:13:28,419 --> 00:13:26,329  
number one the scores on the ESP test by

309  
00:13:32,129 --> 00:13:28,429  
these executives correlated

310  
00:13:34,749 --> 00:13:32,139  
significantly with their salary up and

311  
00:13:36,820 --> 00:13:34,759  
let that sort of hand-waving sort of

312  
00:13:39,520 --> 00:13:36,830  
means you get paid the big bucks for

313  
00:13:41,080 --> 00:13:39,530

making slightly wiser decisions with the

314

00:13:43,240 --> 00:13:41,090

absence of data I mean that's what

315

00:13:45,610 --> 00:13:43,250

rejected jobs are you'd have to be

316

00:13:48,160 --> 00:13:45,620

figure out what to go and can never get

317

00:13:49,960 --> 00:13:48,170

all the data of me but did not

318

00:13:53,950 --> 00:13:49,970

coordinator at all in their belief in

319

00:13:56,650 --> 00:13:53,960

ESP so they were using sub lis ESP in

320

00:13:57,430 --> 00:13:56,660

some way without having happy to believe

321

00:13:59,560 --> 00:13:57,440

in it at all

322

00:14:02,530 --> 00:13:59,570

so if you have danced your question who

323

00:14:05,500 --> 00:14:02,540

would I find people I find it successful

324

00:14:07,060 --> 00:14:05,510

people bring them into testing and is

325

00:14:09,220 --> 00:14:07,070

that kind of like across the board that

326

00:14:14,680 --> 00:14:09,230

these people have no idea that they have

327

00:14:17,350 --> 00:14:14,690

this skill often it is this is a little

328

00:14:19,030 --> 00:14:17,360

unfair and I admit that up front when

329

00:14:23,170 --> 00:14:19,040

someone comes to me says test me I'm

330

00:14:24,970 --> 00:14:23,180

psychic and less interest it I mean

331

00:14:26,710 --> 00:14:24,980

you're good you drive down any of the

332

00:14:28,570 --> 00:14:26,720

streets of Palo Alto there's madam

333

00:14:30,460 --> 00:14:28,580

what's her face and what they have palm

334

00:14:32,350 --> 00:14:30,470

readers and what have you we learned a

335

00:14:34,840 --> 00:14:32,360

long time to go leave those people uh

336

00:14:38,860 --> 00:14:34,850

yeah uh-huh

337

00:14:41,890 --> 00:14:38,870

so when when you were interviewing

338

00:14:44,080 --> 00:14:41,900

people how did that work how did you

339

00:14:46,780 --> 00:14:44,090

find if the subjects that could do

340

00:14:49,350 --> 00:14:46,790

remote viewing and I want to also talk

341

00:14:53,320 --> 00:14:49,360

more about what remote viewing actually

342

00:14:54,420 --> 00:14:53,330

is to detail but but how did you find

343

00:14:57,700 --> 00:14:54,430

these people that were

344

00:15:00,910 --> 00:14:57,710

better-than-average I guess that's how

345

00:15:02,320 --> 00:15:00,920

you'd put it that that's a very good

346

00:15:03,940 --> 00:15:02,330

question because that again was

347

00:15:05,680 --> 00:15:03,950

something that the government was very

348

00:15:07,990 --> 00:15:05,690

much interested in because they want to

349

00:15:13,900 --> 00:15:08,000

have their own cadre of super psychics

350

00:15:16,270 --> 00:15:13,910

trotting the short answer is we haven't

351

00:15:18,700 --> 00:15:16,280

o'clock that that's the real festival

352

00:15:21,310 --> 00:15:18,710

artists answer although we have some

353

00:15:24,340 --> 00:15:21,320

ideas now which was way past the

354

00:15:25,810 --> 00:15:24,350

Stargate program about how how a brain

355

00:15:28,030 --> 00:15:25,820

would be structured but that's a

356

00:15:30,520 --> 00:15:28,040

testable thing coming up in the in the

357

00:15:32,410 --> 00:15:30,530

near future with my research but back

358

00:15:37,990 --> 00:15:32,420

then what we did

359

00:15:39,670 --> 00:15:38,000

I had a task to serve a fair number of

360

00:15:42,820 --> 00:15:39,680

people maybe three or four hundred

361

00:15:45,130 --> 00:15:42,830

people to find out which one's of those

362

00:15:48,550 --> 00:15:45,140

people were psychic and the bottom line

363

00:15:51,189 --> 00:15:48,560

is about a one in a hundred people

364

00:15:53,410 --> 00:15:51,199

can meet laboratory definitions of

365

00:15:55,989 --> 00:15:53,420

excellence performance and the only way

366

00:15:58,900 --> 00:15:55,999

to find them is to Finn's to have them

367

00:16:03,210 --> 00:15:58,910

do the job in correlations with

368

00:16:06,699 --> 00:16:03,220

creativity correlations with meditation

369

00:16:08,650 --> 00:16:06,709

correlations with interest any of the

370

00:16:10,720 --> 00:16:08,660

correlations that are popular among the

371

00:16:12,850 --> 00:16:10,730

description papers in parapsychology

372

00:16:15,189 --> 00:16:12,860

none of those things turned out to be

373

00:16:17,350 --> 00:16:15,199

predictive of behavior in our

374

00:16:19,629 --> 00:16:17,360

circumstance it does work in other

375

00:16:21,759 --> 00:16:19,639

circumstances a trance felt like at

376

00:16:24,189 --> 00:16:21,769

Edinboro and so on for the remote

377

00:16:27,400 --> 00:16:24,199

viewing like stuff but our particular

378

00:16:32,079 --> 00:16:27,410

task was different than all the other

379

00:16:35,139 --> 00:16:32,089

kind of ESP work for example we told our

380

00:16:38,049 --> 00:16:35,149

people we don't want you to tell us in

381

00:16:40,960 --> 00:16:38,059

our interview what the target reminds

382

00:16:43,239 --> 00:16:40,970

you of you know like your mother's apple

383

00:16:45,009 --> 00:16:43,249

pie in the window cooling no no that's

384

00:16:46,660 --> 00:16:45,019

not what's happening in Russia I don't

385

00:16:49,030 --> 00:16:46,670

want to know what your mothers having ty

386

00:16:50,920 --> 00:16:49,040

I want to know what is actually

387

00:16:53,499 --> 00:16:50,930

happening in Russia when you task you to

388

00:16:56,079 --> 00:16:53,509

go there and that is a different

389

00:16:58,929 --> 00:16:56,089

approach and if public plays a big role

390

00:17:01,480 --> 00:16:58,939

in trying to figure out who you bring in

391

00:17:05,049 --> 00:17:01,490

to do this this kind of dicey now the

392

00:17:09,069 --> 00:17:05,059

double-blind test that that's another I

393

00:17:12,279 --> 00:17:09,079

heard you mention that before so can you

394

00:17:15,429 --> 00:17:12,289

explain how that works how how you test

395

00:17:17,319 --> 00:17:15,439

someone with a double-blind test right

396

00:17:20,380 --> 00:17:17,329

let's suppose you're going to be the

397

00:17:24,699 --> 00:17:20,390

remote viewer to that boy and I'm going

398

00:17:27,669 --> 00:17:24,709

to be your inhaler and someone who

399

00:17:30,340 --> 00:17:27,679

neither of us knows is going to generate

400

00:17:32,830 --> 00:17:30,350

a target photograph or a target location

401  
00:17:35,770 --> 00:17:32,840  
for you to describe I won't know that

402  
00:17:38,440 --> 00:17:35,780  
person I don't even know the set of

403  
00:17:40,419 --> 00:17:38,450  
possible places they will choose that

404  
00:17:43,899 --> 00:17:40,429  
person has never met you and that person

405  
00:17:46,120 --> 00:17:43,909  
uses a random procedure to pick say one

406  
00:17:49,389 --> 00:17:46,130  
out of 300 pictures all right I don't

407  
00:17:52,149 --> 00:17:49,399  
know what are there so I don't know what

408  
00:17:54,010 --> 00:17:52,159  
the target is that means I am blind all

409  
00:17:55,659 --> 00:17:54,020  
right and you certainly don't know

410  
00:17:58,630 --> 00:17:55,669  
that's why it's called a double blind

411  
00:18:00,909 --> 00:17:58,640  
and that's the only valid way you can

412  
00:18:01,960 --> 00:18:00,919  
guarantee that something interesting is

413  
00:18:05,290 --> 00:18:01,970

going on well

414

00:18:07,120 --> 00:18:05,300

and would you say that you have seen

415

00:18:09,640 --> 00:18:07,130

things that have just like blown you

416

00:18:14,170 --> 00:18:09,650

away that you just can't imagine how how

417

00:18:16,750 --> 00:18:14,180

it happened yeah a lot of them I could

418

00:18:20,730 --> 00:18:16,760

talk for the text too without first with

419

00:18:23,470 --> 00:18:20,740

examples let me give you just a tunic

420

00:18:26,320 --> 00:18:23,480

one is well known one of our best people

421

00:18:29,890 --> 00:18:26,330

is a fellow named Joseph mcmoneagle

422

00:18:32,110 --> 00:18:29,900

retired Warrant Officer from the Army

423

00:18:36,730 --> 00:18:32,120

the NSC the National Security Council

424

00:18:39,160 --> 00:18:36,740

gave tasking to describe what is going

425

00:18:43,090 --> 00:18:39,170

on in this building in in town in

426

00:18:44,950 --> 00:18:43,100

northern Russia called sfera Dvinsk it's

427

00:18:48,040 --> 00:18:44,960

been known since the 40s as a submarine

428

00:18:50,380 --> 00:18:48,050

base for sure and there was a big

429

00:18:53,710 --> 00:18:50,390

building and satellite photographs of

430

00:18:55,540 --> 00:18:53,720

that era could look in at the side and

431

00:18:57,460 --> 00:18:55,550

see something was going on inside the

432

00:18:59,170 --> 00:18:57,470

building but they really desperately

433

00:19:04,090 --> 00:18:59,180

wanted to know because they have no idea

434

00:19:06,400 --> 00:19:04,100

and so Joe was given a week they were

435

00:19:08,170 --> 00:19:06,410

given a photograph satellite photographs

436

00:19:10,930 --> 00:19:08,180

of the roofs of the building that was

437

00:19:13,480 --> 00:19:10,940

put in the double sealed envelope etc

438

00:19:15,280 --> 00:19:13,490

etc and that was put in front of Joe in

439

00:19:16,570 --> 00:19:15,290

a double-blind way the first you were

440

00:19:18,880 --> 00:19:16,580

stuck at there didn't even know where

441

00:19:22,360 --> 00:19:18,890

the testing came from this sounds really

442

00:19:25,060 --> 00:19:22,370

strange but it that's what happened and

443

00:19:27,250 --> 00:19:25,070

we say Joe the target of the day is a

444

00:19:28,840 --> 00:19:27,260

photograph inside this envelope and the

445

00:19:32,200 --> 00:19:28,850

person who said that had no idea what

446

00:19:35,760 --> 00:19:32,210

the photograph was Joe gave maybe 30

447

00:19:38,920 --> 00:19:35,770

pages some of it is immoral online

448

00:19:41,260 --> 00:19:38,930

described in glowing detail the

449

00:19:44,320 --> 00:19:41,270

construction of a huge submarine that

450

00:19:46,450 --> 00:19:44,330

was double hauled and who you cattle

451  
00:19:49,480 --> 00:19:46,460  
around like submarine with an outer skin

452  
00:19:50,230 --> 00:19:49,490  
and it dwarfed a World War 2 level

453  
00:19:52,800 --> 00:19:50,240  
submarine

454  
00:19:55,930 --> 00:19:52,810  
how many missile tubes and it had a

455  
00:20:00,150 --> 00:19:55,940  
magneto a hydro magneto propulsion

456  
00:20:04,960 --> 00:20:00,160  
system etc etc etc and that was done in

457  
00:20:06,910 --> 00:20:04,970  
1979 and September 23rd 1980 they

458  
00:20:09,010 --> 00:20:06,920  
launched from that facility what the

459  
00:20:11,020 --> 00:20:09,020  
West calls the typhoon-class submarine

460  
00:20:14,170 --> 00:20:11,030  
in Russia I think it's called the Akua

461  
00:20:15,440 --> 00:20:14,180  
meaning the shark it is enormous in the

462  
00:20:16,910 --> 00:20:15,450  
fact they

463  
00:20:20,990 --> 00:20:16,920

the movie the hunt for the Red October

464

00:20:24,410 --> 00:20:21,000

was loosely based on that sign known as

465

00:20:25,610 --> 00:20:24,420

he amazing yeah isn't that something and

466

00:20:28,400 --> 00:20:25,620

what was it you said you're going to

467

00:20:32,270 --> 00:20:28,410

give a couple examples I'll give you the

468

00:20:34,400 --> 00:20:32,280

second one which is more local through a

469

00:20:35,930 --> 00:20:34,410

long chain a colleague of mine was

470

00:20:42,230 --> 00:20:35,940

working in the West Wing of the White

471

00:20:44,450 --> 00:20:42,240

House under Clinton and she was a Maison

472

00:20:47,540 --> 00:20:44,460

to the center very interesting woman and

473

00:20:50,270 --> 00:20:47,550

I knew her personally through a friend

474

00:20:51,800 --> 00:20:50,280

and she called me up one day while she

475

00:20:53,720 --> 00:20:51,810

was working there says oh my God my

476  
00:20:56,300 --> 00:20:53,730  
twenty-something daughter has failed to

477  
00:20:58,610 --> 00:20:56,310  
show up at work can you help us find her

478  
00:21:00,680 --> 00:20:58,620  
and I said for crying out loud you have

479  
00:21:02,930 --> 00:21:00,690  
you know the Secret Service the FBI and

480  
00:21:05,810 --> 00:21:02,940  
all the alphabet soup wife calling the

481  
00:21:07,820 --> 00:21:05,820  
he she said I can't use government

482  
00:21:13,910 --> 00:21:07,830  
resources on a personal case that good

483  
00:21:16,790 --> 00:21:13,920  
so I said okay so I test two people one

484  
00:21:18,800 --> 00:21:16,800  
of whom is taking mainly now dr. Nevin

485  
00:21:21,020 --> 00:21:18,810  
Lance he's worked with me for years

486  
00:21:24,110 --> 00:21:21,030  
he's not only a decent psychic but he's

487  
00:21:26,420 --> 00:21:24,120  
also was in charge of the personality

488  
00:21:29,120 --> 00:21:26,430

factors he's a PhD psychologist all

489

00:21:33,380 --> 00:21:29,130

right he gave a glowing description of

490

00:21:36,650 --> 00:21:33,390

this person that was she was having a

491

00:21:39,650 --> 00:21:36,660

psychotic break but she was okay not in

492

00:21:42,410 --> 00:21:39,660

any physical danger and Joe and one

493

00:21:45,700 --> 00:21:42,420

other person gave enough material that

494

00:21:50,270 --> 00:21:45,710

the FBI can go get her and they did

495

00:21:52,340 --> 00:21:50,280

amazing I mean and I I thought wow the

496

00:21:54,620 --> 00:21:52,350

West Wing is really happy about us throw

497

00:21:59,120 --> 00:21:54,630

money which we didn't get anything

498

00:22:02,300 --> 00:21:59,130

really now yeah so was funding often an

499

00:22:06,500 --> 00:22:02,310

issue was a seller and what type of

500

00:22:09,980 --> 00:22:06,510

budget was it was it a yearly budget uh

501  
00:22:11,660 --> 00:22:09,990  
it was very spotty uh first of all let

502  
00:22:17,390 --> 00:22:11,670  
me say a lot of people think of this as

503  
00:22:19,790 --> 00:22:17,400  
a CIA program um CAA gave a hundred and

504  
00:22:24,850 --> 00:22:19,800  
ninety something thousand dollars on

505  
00:22:29,250 --> 00:22:27,170  
the two biggest funders were in the

506  
00:22:30,960 --> 00:22:29,260  
Defense Intelligence Agency

507  
00:22:33,150 --> 00:22:30,970  
and I had a contract with the army

508  
00:22:35,909 --> 00:22:33,160  
medical research and development command

509  
00:22:37,169 --> 00:22:35,919  
initially for ten million dollars to

510  
00:22:39,419 --> 00:22:37,179  
conduct research

511  
00:22:41,220 --> 00:22:39,429  
I only saw six and a half million with

512  
00:22:43,770 --> 00:22:41,230  
that before they quit giving the money

513  
00:22:45,840 --> 00:22:43,780

about the early days there were places

514

00:22:47,669 --> 00:22:45,850

where our management was walking up down

515

00:22:49,020 --> 00:22:47,679

the hall measuring the drapes to get us

516

00:22:52,169 --> 00:22:49,030

out of here because we didn't have any

517

00:22:53,820 --> 00:22:52,179

friend well on the average when I when

518

00:22:59,789 --> 00:22:53,830

we were at s RI Stanford Research

519

00:23:02,820 --> 00:22:59,799

Institute from 1972 to 1989 it averaged

520

00:23:05,310 --> 00:23:02,830

about 750 thousand dollars a year that

521

00:23:07,530 --> 00:23:05,320

sounds great but let me tell you there

522

00:23:09,180 --> 00:23:07,540

was a huge variance sometimes there was

523

00:23:11,280 --> 00:23:09,190

no money and they're ready to fire us

524

00:23:12,690 --> 00:23:11,290

all and then lots of money we can hire

525

00:23:14,940 --> 00:23:12,700

people and then he had to fire them just

526

00:23:18,840 --> 00:23:14,950

and ran out of money and so on the

527

00:23:20,909 --> 00:23:18,850

steady money came and I was lucky when I

528

00:23:23,450 --> 00:23:20,919

took over the program building on very

529

00:23:25,860 --> 00:23:23,460

tall shoulders a foot off and tart

530

00:23:27,510 --> 00:23:25,870

establishing very good relationships

531

00:23:30,299 --> 00:23:27,520

with funding Chambliss and I spent

532

00:23:32,100 --> 00:23:30,309

probably 40% of my time racing back and

533

00:23:33,539 --> 00:23:32,110

forth to Washington making sure money

534

00:23:36,090 --> 00:23:33,549

and it was successful

535

00:23:39,539 --> 00:23:36,100

Manning directly from the Congress Wow

536

00:23:43,200 --> 00:23:39,549

well in the chat room niikka wants to

537

00:23:48,600 --> 00:23:43,210

know what what can you say about the KC

538

00:23:50,430 --> 00:23:48,610

denial KC denial I know about Edgar

539

00:23:51,810 --> 00:23:50,440

Cayce a little okay I don't

540

00:23:54,600 --> 00:23:51,820

sorry I thought that was something

541

00:23:56,549 --> 00:23:54,610

something you may I didn't really

542

00:23:58,169 --> 00:23:56,559

understand that's who I thought it was

543

00:23:59,640 --> 00:23:58,179

talking about but I didn't really get

544

00:24:06,090 --> 00:23:59,650

the question either I thought you might

545

00:24:11,039 --> 00:24:06,100

though so what is let's say ESP what is

546

00:24:13,409 --> 00:24:11,049

what would you consider ESP and is well

547

00:24:21,980 --> 00:24:13,419

I'm going to bluntly asked who is ESP

548

00:24:27,270 --> 00:24:21,990

real oh okay I'll take the back

549

00:24:29,070 --> 00:24:27,280

if it turns out probably exit it was I

550

00:24:34,080 --> 00:24:29,080

don't think Jamie Jamie

551  
00:24:35,520 --> 00:24:34,090  
John Joseph Banks Brian who basically

552  
00:24:38,880 --> 00:24:35,530  
was the father of research

553  
00:24:40,860 --> 00:24:38,890  
parapsychology in the country at first

554  
00:24:42,920 --> 00:24:40,870  
at Duke University and then at the

555  
00:24:48,200 --> 00:24:42,930  
foundation for the research of nature

556  
00:24:51,410 --> 00:24:48,210  
man he defined X extrasensory perception

557  
00:24:54,830 --> 00:24:51,420  
with the term extra meaning it's ways of

558  
00:24:57,380 --> 00:24:54,840  
gathering information about the world in

559  
00:24:59,630 --> 00:24:57,390  
ways that are not involved in the five

560  
00:25:01,460 --> 00:24:59,640  
known sensory systems in other words you

561  
00:25:04,210 --> 00:25:01,470  
don't see it hear it smell it taste it

562  
00:25:06,560 --> 00:25:04,220  
feel it any of that sort of stuff and

563  
00:25:09,110 --> 00:25:06,570

that doesn't tell you anything about

564

00:25:10,550 --> 00:25:09,120

what ESP actually is it tells you about

565

00:25:13,430 --> 00:25:10,560

a whole lot of stuff but what it isn't

566

00:25:15,140 --> 00:25:13,440

and so when you design an experiment you

567

00:25:18,290 --> 00:25:15,150

have to make sure that there isn't any

568

00:25:20,660 --> 00:25:18,300

you know sneaky things with radar with

569

00:25:22,760 --> 00:25:20,670

radios transmitters or receivers in

570

00:25:24,710 --> 00:25:22,770

people's ear so there isn't cheating you

571

00:25:26,750 --> 00:25:24,720

have to make sure that there's no other

572

00:25:30,680 --> 00:25:26,760

way to get the information other than

573

00:25:33,350 --> 00:25:30,690

that by some unknown way doesn't tell

574

00:25:35,270 --> 00:25:33,360

you anything so let me make a very geeky

575

00:25:38,660 --> 00:25:35,280

statement for you since you asked if I

576  
00:25:40,040 --> 00:25:38,670  
believe even less treatment here comes

577  
00:25:43,250 --> 00:25:40,050  
the geeky statement there's

578  
00:25:46,340 --> 00:25:43,260  
incontrovertible evidence for an

579  
00:25:48,890 --> 00:25:46,350  
information transfer anomaly we

580  
00:25:51,170 --> 00:25:48,900  
currently do not understand doesn't see

581  
00:25:53,780 --> 00:25:51,180  
anything at all about ESP but I'll go to

582  
00:25:56,420 --> 00:25:53,790  
the map to defend that and so will

583  
00:25:58,580 --> 00:25:56,430  
professor Jessica Utz what the nation's

584  
00:26:01,030 --> 00:25:58,590  
leading statistician but she was just

585  
00:26:07,490 --> 00:26:01,040  
stepped down as the president of the

586  
00:26:09,170 --> 00:26:07,500  
American Association and she worked in

587  
00:26:12,260 --> 00:26:09,180  
my lab for a year as a visiting

588  
00:26:14,780 --> 00:26:12,270

scientist she says look ESP meets of the

589

00:26:16,610 --> 00:26:14,790

research at ESP needs all the standard

590

00:26:19,160 --> 00:26:16,620

definitions of what constitutes a

591

00:26:23,470 --> 00:26:19,170

genuine phenomenon it is in my view a

592

00:26:26,600 --> 00:26:23,480

genuine comment and how is it viewed by

593

00:26:30,670 --> 00:26:26,610

how did you find this is viewed by the

594

00:26:33,530 --> 00:26:30,680

media the American media list to say

595

00:26:36,590 --> 00:26:33,540

that's a very interesting question I'm

596

00:26:41,060 --> 00:26:36,600

on it it's a little disappointing most

597

00:26:43,430 --> 00:26:41,070

the time American culture on one hand

598

00:26:45,290 --> 00:26:43,440

loves this stuff you know you all the

599

00:26:46,670 --> 00:26:45,300

movies and the books and you know the

600

00:26:49,090 --> 00:26:46,680

calls in the newspaper for your

601  
00:26:52,520 --> 00:26:49,100  
horoscopes and all of that kind of stuff

602  
00:26:54,230 --> 00:26:52,530  
in some sense the American culture is

603  
00:26:56,720 --> 00:26:54,240  
almost too much believing in this

604  
00:26:59,660 --> 00:26:56,730  
material it happens too fast

605  
00:27:03,320 --> 00:26:59,670  
on the other hand the scientists kind of

606  
00:27:05,450 --> 00:27:03,330  
rejected out of hand for a variety of

607  
00:27:09,530 --> 00:27:05,460  
reasons and one of the reasons I think

608  
00:27:13,310 --> 00:27:09,540  
is that culturally the judeo-christian

609  
00:27:15,140 --> 00:27:13,320  
or Abrahamic religions it actually says

610  
00:27:18,740 --> 00:27:15,150  
that this is the work of the devil

611  
00:27:20,630 --> 00:27:18,750  
Illuminati and you know powerful people

612  
00:27:22,640 --> 00:27:20,640  
with the rich witch trials where they

613  
00:27:24,860 --> 00:27:22,650

burn people at the stake for having

614

00:27:29,450 --> 00:27:24,870

manifested this and other powerful

615

00:27:29,930 --> 00:27:29,460

things that women can do and that's too

616

00:27:32,000 --> 00:27:29,940

bad

617

00:27:34,460 --> 00:27:32,010

and as a result for example I won't name

618

00:27:37,010 --> 00:27:34,470

the organization we did go make monocle

619

00:27:39,950 --> 00:27:37,020

I did a whole series on live television

620

00:27:42,440 --> 00:27:39,960

for nationwide television organization

621

00:27:44,420 --> 00:27:42,450

and they were thrilled they were

622

00:27:46,550 --> 00:27:44,430

absolutely thrilled and then editing

623

00:27:48,650 --> 00:27:46,560

made us look like idiots I've heard of

624

00:27:51,830 --> 00:27:48,660

that why would they believe this it's

625

00:27:53,570 --> 00:27:51,840

just terrible and for the most part I

626

00:27:57,320 --> 00:27:53,580

don't do American media you're an

627

00:28:00,800 --> 00:27:57,330

exception at all for media on the other

628

00:28:03,650 --> 00:28:00,810

hand Treatise love lip balm and in

629

00:28:05,750 --> 00:28:03,660

Russia much to my surprise there

630

00:28:08,390 --> 00:28:05,760

people are upper level people all

631

00:28:10,610 --> 00:28:08,400

falling all over themselves let me give

632

00:28:13,070 --> 00:28:10,620

one example here I can mention his name

633

00:28:16,460 --> 00:28:13,080

has given me permission and his name is

634

00:28:19,820 --> 00:28:16,470

dr. Jack Verona

635

00:28:22,010 --> 00:28:19,830

he's a career intelligence officer he

636

00:28:25,180 --> 00:28:22,020

has a PhD in physics very smart fellow

637

00:28:27,950 --> 00:28:25,190

and almost single-handedly responsible

638

00:28:30,650 --> 00:28:27,960

for the continuation of the government

639

00:28:33,230 --> 00:28:30,660

funding very smart fellow he's given me

640

00:28:35,680 --> 00:28:33,240

permission a to use his name be write

641

00:28:39,410 --> 00:28:35,690

anything I want about him he absolutely

642

00:28:42,980 --> 00:28:39,420

refuses flatly refuses to write anything

643

00:28:45,470 --> 00:28:42,990

himself about this part of that I think

644

00:28:47,450 --> 00:28:45,480

it's because even though he's 8 he's in

645

00:28:48,980 --> 00:28:47,460

his early eighties and retired he

646

00:28:51,440 --> 00:28:48,990

doesn't want to be dragged to the media

647

00:28:54,470 --> 00:28:51,450

give you one example on one exception

648

00:28:57,740 --> 00:28:54,480

back from a colleague and I are working

649

00:28:59,510 --> 00:28:57,750

at publishing all of the research that

650

00:29:04,760 --> 00:28:59,520

was carried out by funded by the

651  
00:29:07,580 --> 00:29:04,770  
government from 1972 to 1985 and here is

652  
00:29:08,790 --> 00:29:07,590  
a cover of the first such book you can

653  
00:29:11,310 --> 00:29:08,800  
go on Amazon

654  
00:29:14,070 --> 00:29:11,320  
look for the Stargate archives and this

655  
00:29:15,780 --> 00:29:14,080  
will appear and I doubt your people can

656  
00:29:18,150 --> 00:29:15,790  
read it but what it says at the bottom

657  
00:29:21,990 --> 00:29:18,160  
this is Laurie one everything you want

658  
00:29:26,160 --> 00:29:22,000  
to know about remote viewing from 1972

659  
00:29:28,890 --> 00:29:26,170  
to 1984 anything how to find people how

660  
00:29:30,930 --> 00:29:28,900  
to do the analysis what the criteria are

661  
00:29:33,480 --> 00:29:30,940  
what the correlations within to the your

662  
00:29:35,720 --> 00:29:33,490  
but at the bottom here it says foreword

663  
00:29:42,000 --> 00:29:35,730

by William s Cohen

664

00:29:43,410 --> 00:29:42,010

William s Cohen was a minority leader of

665

00:29:46,050 --> 00:29:43,420

the Senate Intelligence Committee

666

00:29:48,570 --> 00:29:46,060

Republican minority leader and later

667

00:29:51,360 --> 00:29:48,580

became Secretary of Defense under under

668

00:29:54,600 --> 00:29:51,370

Bill Clinton he wrote a fortress wow

669

00:29:56,850 --> 00:29:54,610

that's great yeah he was very brave to

670

00:30:01,350 --> 00:29:56,860

come yes absolutely

671

00:30:02,520 --> 00:30:01,360

now what about the eastern culture you

672

00:30:05,160 --> 00:30:02,530

know you're talking about the Western

673

00:30:08,610 --> 00:30:05,170

culture mostly but how do they view this

674

00:30:12,360 --> 00:30:08,620

or did they even get involved in trying

675

00:30:16,470 --> 00:30:12,370

to do this type of research oh very much

676

00:30:19,310 --> 00:30:16,480

so I'm not close buddies with a KGB ex

677

00:30:22,290 --> 00:30:19,320

KGB guys one of the books that we wrote

678

00:30:26,610 --> 00:30:22,300

the deputy director of KGB both the

679

00:30:29,250 --> 00:30:26,620

former verbal divorce it's a little bit

680

00:30:33,330 --> 00:30:29,260

complicated because in the official

681

00:30:35,700 --> 00:30:33,340

communist idea is this can't happen but

682

00:30:38,100 --> 00:30:35,710

nobody paid attention to that the KGB

683

00:30:42,710 --> 00:30:38,110

was using this stuff back in the early

684

00:30:46,580 --> 00:30:42,720

70s a very famous now no longer with us

685

00:30:49,380 --> 00:30:46,590

imple at mosaic Cogan an information

686

00:30:51,840 --> 00:30:49,390

scientist wrote an article in the 60s

687

00:30:56,250 --> 00:30:51,850

that was republished in the 7th early

688

00:30:58,590 --> 00:30:56,260

70s called is telepathy possible and he

689

00:31:01,440 --> 00:30:58,600

argued that the way that works is our

690

00:31:04,080 --> 00:31:01,450

brain is like a an oscillator for a

691

00:31:06,750 --> 00:31:04,090

radio and our body is like a 2 meter

692

00:31:08,690 --> 00:31:06,760

antenna radiating our thoughts out in

693

00:31:11,970 --> 00:31:08,700

very low frequency electromagnetic

694

00:31:15,420 --> 00:31:11,980

radiation and that terrified the West in

695

00:31:17,490 --> 00:31:15,430

fact we have money to test that idea so

696

00:31:19,710 --> 00:31:17,500

we did remote viewing in a submerged

697

00:31:22,950 --> 00:31:19,720

submersible at the 80 meters down the

698

00:31:26,310 --> 00:31:22,960

mountain killed a teenager is that right

699

00:31:29,039 --> 00:31:26,320

yes we had this blanket see what around

700

00:31:33,060 --> 00:31:29,049

us and show that that didn't stop the

701  
00:31:36,119 --> 00:31:33,070  
frilly some years later I met Koga in in

702  
00:31:38,129 --> 00:31:36,129  
Moscow and I said professors in order to

703  
00:31:40,259 --> 00:31:38,139  
meet you and I'm shaking his hand I said

704  
00:31:42,989 --> 00:31:40,269  
I've got good news of bad she said what

705  
00:31:44,940 --> 00:31:42,999  
is it I said the bad news is your idea

706  
00:31:46,950 --> 00:31:44,950  
of telepathy being an oscillator in the

707  
00:31:47,970 --> 00:31:46,960  
body so it's just not right so I'm glad

708  
00:31:50,879 --> 00:31:47,980  
to hear you say that

709  
00:31:53,249 --> 00:31:50,889  
I don't think so anymore either and then

710  
00:31:56,789 --> 00:31:53,259  
I told him about entropy or this idea

711  
00:31:58,409 --> 00:31:56,799  
very complicated issue and he brought it

712  
00:32:00,869 --> 00:31:58,419  
up and I said we've done research on

713  
00:32:02,700 --> 00:32:00,879

that and you're absolutely spot-on we

714

00:32:05,549 --> 00:32:02,710

became close friends into every dive Wow

715

00:32:07,590 --> 00:32:05,559

is that something so now what about the

716

00:32:09,210 --> 00:32:07,600

use of drugs you know you hear that

717

00:32:10,769 --> 00:32:09,220

government you know experimented with

718

00:32:14,129 --> 00:32:10,779

LSD and all kinds of things like that

719

00:32:17,539 --> 00:32:14,139

was there any use of drugs with any of

720

00:32:20,999 --> 00:32:17,549

the people trying to do these things not

721

00:32:23,789 --> 00:32:21,009

in our program but before I joined it I

722

00:32:26,279 --> 00:32:23,799

work at Maimonides Medical Center back

723

00:32:30,869 --> 00:32:26,289

in the 70s raw bunch of hippies so there

724

00:32:33,180 --> 00:32:30,879

was a lot of experimentation effects and

725

00:32:34,830 --> 00:32:33,190

and what that happened it's this really

726

00:32:37,710 --> 00:32:34,840

important and it's the basis of our

727

00:32:39,989 --> 00:32:37,720

neurological model contrary to what I

728

00:32:41,970 --> 00:32:39,999

ask of people to tell you and mushroom

729

00:32:43,830 --> 00:32:41,980

people will tell you and LSD people will

730

00:32:47,039 --> 00:32:43,840

die and all that stuff all that

731

00:32:50,279 --> 00:32:47,049

chemistry goes on creating wondrous

732

00:32:53,009 --> 00:32:50,289

things in your head but that's in your

733

00:32:55,379 --> 00:32:53,019

head okay if it just raises the noise

734

00:32:57,479 --> 00:32:55,389

level in your head for really as peak

735

00:33:00,599 --> 00:32:57,489

coming in from the outside hitting him

736

00:33:02,340 --> 00:33:00,609

it's strong ESP functioning I know I'm

737

00:33:04,229 --> 00:33:02,350

going to have all other nasty emails my

738

00:33:06,060 --> 00:33:04,239

shamans all over the world on basis of

739

00:33:08,940 --> 00:33:06,070

that but that's what the data Wow

740

00:33:13,019 --> 00:33:08,950

and what about this conversation came up

741

00:33:15,779 --> 00:33:13,029

recently in I did a show with a guy that

742

00:33:17,519 --> 00:33:15,789

was that thinks that we've been visited

743

00:33:20,399 --> 00:33:17,529

by extra dimensional like

744

00:33:22,950 --> 00:33:20,409

interdimensional beings up and I try to

745

00:33:25,379 --> 00:33:22,960

be open-minded of I wasn't really sure

746

00:33:29,129 --> 00:33:25,389

what to think about that but so I asked

747

00:33:33,239 --> 00:33:29,139

him this question and I said well what

748

00:33:35,670 --> 00:33:33,249

would like today's technology compared

749

00:33:38,100 --> 00:33:35,680

to say

750

00:33:39,840 --> 00:33:38,110

things have changed so much since 1985

751  
00:33:42,870 --> 00:33:39,850  
when this program ended I think that's

752  
00:33:45,150 --> 00:33:42,880  
when you said it was now we have so many

753  
00:33:47,010 --> 00:33:45,160  
things bombarded at us

754  
00:33:50,400 --> 00:33:47,020  
radio waves of different types I think

755  
00:33:52,380 --> 00:33:50,410  
we have for many many years but do you

756  
00:33:55,800 --> 00:33:52,390  
think that would you talked about

757  
00:33:57,780 --> 00:33:55,810  
submerge under the sea and that didn't

758  
00:33:59,730 --> 00:33:57,790  
change anything do you think that the

759  
00:34:03,780 --> 00:33:59,740  
radio waves would change anything at all

760  
00:34:06,900 --> 00:34:03,790  
that we're bombarded with I don't think

761  
00:34:08,970 --> 00:34:06,910  
so uh your people worried about you I

762  
00:34:10,950 --> 00:34:08,980  
live in California everybody's a little

763  
00:34:12,480 --> 00:34:10,960

bit nutso have you heard you know if you

764

00:34:15,240 --> 00:34:12,490

don't want to have a house underneath

765

00:34:19,080 --> 00:34:15,250

the power lines in fact very well-known

766

00:34:21,960 --> 00:34:19,090

I think now like the late frost 80 was

767

00:34:24,780 --> 00:34:21,970

pushing very hard on the dangers of 60

768

00:34:27,390 --> 00:34:24,790

cycle 60 Hertz radiation which is we're

769

00:34:30,000 --> 00:34:27,400

all bathed in that all the time and

770

00:34:31,590 --> 00:34:30,010

they're you know the SEC the the physic

771

00:34:33,840 --> 00:34:31,600

people Zelo or the radiation is so

772

00:34:36,630 --> 00:34:33,850

smaller can't hurt but if you look at

773

00:34:40,680 --> 00:34:36,640

the pharmacology of such stuff of drugs

774

00:34:43,050 --> 00:34:40,690

and enm radiation the effects drop as

775

00:34:45,420 --> 00:34:43,060

the intensity drops but then again at

776

00:34:49,640 --> 00:34:45,430

very low intensities and me was pushing

777

00:34:52,710 --> 00:34:49,650

really hard on the dangers of you know

778

00:34:54,410 --> 00:34:52,720

alternating current 60 Hertz I don't

779

00:34:57,240 --> 00:34:54,420

know the Russians are really big on this

780

00:35:00,330 --> 00:34:57,250

that's still open question whether it

781

00:35:02,390 --> 00:35:00,340

does in our model about precognition how

782

00:35:08,460 --> 00:35:02,400

that works and it's a very testable

783

00:35:11,580 --> 00:35:08,470

model in the brain we don't think e e NM

784

00:35:14,250 --> 00:35:11,590

electricity magnetism plays a role but

785

00:35:18,090 --> 00:35:14,260

the fact that people's sensory systems

786

00:35:21,570 --> 00:35:18,100

normal sensory systems like vision the

787

00:35:24,180 --> 00:35:21,580

the people that are that may prove to be

788

00:35:25,800 --> 00:35:24,190

good psychics have an extended visual

789

00:35:27,420 --> 00:35:25,810

range let's say see a little bit more

790

00:35:29,520 --> 00:35:27,430

need for it a little bit more in the

791

00:35:33,420 --> 00:35:29,530

ultraviolet than the average bear that's

792

00:35:35,430 --> 00:35:33,430

a testable hypothesis that we propose

793

00:35:37,950 --> 00:35:35,440

and shortly and then the next year we'll

794

00:35:40,650 --> 00:35:37,960

be testing it offshore down in Brazil

795

00:35:43,590 --> 00:35:40,660

actually with some scientists now that's

796

00:35:47,010 --> 00:35:43,600

interesting now getting back to the

797

00:35:49,530 --> 00:35:47,020

question that Nica asked in the chat

798

00:35:51,540 --> 00:35:49,540

room he was more definitive now

799

00:35:54,480 --> 00:35:51,550

thought he meant edgar cayce as well the

800

00:35:57,230 --> 00:35:54,490

you know the supposed psychic but what

801  
00:36:01,200 --> 00:35:57,240  
he was asking about was the former CIA

802  
00:36:04,410 --> 00:36:01,210  
director William Casey hadn't okay so

803  
00:36:07,080 --> 00:36:04,420  
William Casey up had denied wrote me

804  
00:36:08,630 --> 00:36:07,090  
viewing and up just he just wants to

805  
00:36:11,310 --> 00:36:08,640  
know your take on it

806  
00:36:13,530 --> 00:36:11,320  
well I have a memo signed by him

807  
00:36:16,890 --> 00:36:13,540  
starting to progress there right yeah

808  
00:36:20,010 --> 00:36:16,900  
yeah I mean I can show you it's really

809  
00:36:22,260 --> 00:36:20,020  
there's so it's going to be in its it's

810  
00:36:23,610 --> 00:36:22,270  
going to be in the archive books that'll

811  
00:36:25,770 --> 00:36:23,620  
be out by the appoint for at the end of

812  
00:36:28,470 --> 00:36:25,780  
the year his signature Oh now does that

813  
00:36:32,670 --> 00:36:28,480

mean that he just wanted to downplay it

814

00:36:35,130 --> 00:36:32,680

do you think well he's signing off on

815

00:36:38,250 --> 00:36:35,140

what turned out to be a very very very

816

00:36:40,560 --> 00:36:38,260

secret program and you don't want to

817

00:36:44,280 --> 00:36:40,570

admit the jury for example when I got

818

00:36:46,170 --> 00:36:44,290

I've had clearances since I was under

819

00:36:48,450 --> 00:36:46,180

graduate school short for the RAND

820

00:36:51,990 --> 00:36:48,460

Corporation in Santa Monica and I had a

821

00:36:53,910 --> 00:36:52,000

top secret clearance then and except for

822

00:36:55,290 --> 00:36:53,920

a few times in graduate school it didn't

823

00:36:57,120 --> 00:36:55,300

have parent says but I want to start

824

00:37:01,350 --> 00:36:57,130

working that's right I had to get a

825

00:37:03,780 --> 00:37:01,360

clearance just to be on campus and you

826  
00:37:06,330 --> 00:37:03,790  
know the FBI runs around and asks all

827  
00:37:09,540 --> 00:37:06,340  
your people I get this panic phone call

828  
00:37:11,010 --> 00:37:09,550  
from Chuck Arlington what the FBI guy

829  
00:37:12,450 --> 00:37:11,020  
showed up at are interviewing me for

830  
00:37:14,010 --> 00:37:12,460  
clearance for you how come you're

831  
00:37:17,340 --> 00:37:14,020  
getting it clearance so I had to lie to

832  
00:37:19,830 --> 00:37:17,350  
him to say oh you can't be at us or I

833  
00:37:22,320 --> 00:37:19,840  
unless you have a clearance because what

834  
00:37:25,080 --> 00:37:22,330  
was classified was the fact that our

835  
00:37:28,230 --> 00:37:25,090  
program was classified which made it

836  
00:37:30,570 --> 00:37:28,240  
really opinion about yeah yeah speaking

837  
00:37:33,480 --> 00:37:30,580  
of that you know classified program um

838  
00:37:37,500 --> 00:37:33,490

did you have to stay hush-hush about

839

00:37:39,540 --> 00:37:37,510

this after the program ended or were you

840

00:37:44,460 --> 00:37:39,550

debriefed and told you know you could

841

00:37:46,560 --> 00:37:44,470

say certain things about this uh yes and

842

00:37:50,130 --> 00:37:46,570

no I was debriefed on some of my

843

00:37:53,600 --> 00:37:50,140

clearances but the CIA released

844

00:37:57,990 --> 00:37:53,610

knowledge that the program existed in

845

00:38:00,810 --> 00:37:58,000

1995 and you can look up a Nightline

846

00:38:02,640 --> 00:38:00,820

with Ted Koppel and I think November

847

00:38:06,540 --> 00:38:02,650

1995 I was

848

00:38:08,910 --> 00:38:06,550

that show with the former director of

849

00:38:12,030 --> 00:38:08,920

CIA gates who became Secretary of

850

00:38:13,950 --> 00:38:12,040

Defense and a person that I suggested

851

00:38:17,220 --> 00:38:13,960

beyond the program only identified as

852

00:38:19,680 --> 00:38:17,230

normal CIA a guy and me and three of us

853

00:38:21,930 --> 00:38:19,690

were on this program talking about it in

854

00:38:26,730 --> 00:38:21,940

the open in the open so everything's and

855

00:38:30,380 --> 00:38:26,740

in year 2000 and continues today the CIA

856

00:38:33,540 --> 00:38:30,390

released 89 thousand pages of our reps

857

00:38:35,280 --> 00:38:33,550

amazing yeah and now some of it is still

858

00:38:37,710 --> 00:38:35,290

classified and probably still should be

859

00:38:38,940 --> 00:38:37,720

but almost all of it is that's that's

860

00:38:41,100 --> 00:38:38,950

why we're putting together these

861

00:38:42,600 --> 00:38:41,110

archives which will be available to

862

00:38:46,130 --> 00:38:42,610

everybody now how many people were

863

00:38:50,550 --> 00:38:46,140

involved would you say as a total of

864

00:38:52,260 --> 00:38:50,560

involved in the the Stargate oh very

865

00:38:55,980 --> 00:38:52,270

interesting there are two aspects of

866

00:38:58,320 --> 00:38:55,990

Star Trek from 1972 to about late 1978

867

00:39:00,330 --> 00:38:58,330

it was all done at Stanford Research

868

00:39:04,710 --> 00:39:00,340

Institute called Essaouira International

869

00:39:09,030 --> 00:39:04,720

now all right probably less than 20

870

00:39:15,150 --> 00:39:09,040

during that area less than 20 ah but you

871

00:39:19,020 --> 00:39:15,160

you generated 80,000 papers we were a

872

00:39:21,030 --> 00:39:19,030

paper mill oh one of the things that we

873

00:39:22,770 --> 00:39:21,040

did for example when I took over the

874

00:39:24,570 --> 00:39:22,780

program and I had this ten million

875

00:39:27,420 --> 00:39:24,580

dollar contract two million dollars a

876

00:39:31,020 --> 00:39:27,430

year for five years I had a staff of 12

877

00:39:33,620 --> 00:39:31,030

people plus a whole lot of subcontracts

878

00:39:35,610 --> 00:39:33,630

in different places around the world and

879

00:39:38,790 --> 00:39:35,620

consultants and what had it was a big

880

00:39:40,920 --> 00:39:38,800

program and my first contract I had 30

881

00:39:42,450 --> 00:39:40,930

you know I know what when you have a

882

00:39:44,100 --> 00:39:42,460

contract in federal government

883

00:39:45,750 --> 00:39:44,110

they give what's called a work statement

884

00:39:49,830 --> 00:39:45,760

they don't just give you money and say

885

00:39:52,230 --> 00:39:49,840

have fun we all want that instead they

886

00:39:53,700 --> 00:39:52,240

say okay here are a bunch of items we

887

00:39:55,680 --> 00:39:53,710

want you to do and here's how much money

888

00:39:57,090 --> 00:39:55,690

you can spend on each of these items and

889

00:39:58,890 --> 00:39:57,100

if you run out of money and this one you

890

00:40:01,680 --> 00:39:58,900

can't take money from here to put over

891

00:40:05,310 --> 00:40:01,690

there it's very rigid as to what they

892

00:40:11,220 --> 00:40:05,320

ask us to do and so in my first year I

893

00:40:13,320 --> 00:40:11,230

have 38 separate tasks to do and each

894

00:40:15,930 --> 00:40:13,330

one of those have quarterly reports and

895

00:40:16,349 --> 00:40:15,940

in annual reports and the scientific

896

00:40:18,420 --> 00:40:16,359

over

897

00:40:20,940 --> 00:40:18,430

that committee had to review it and that

898

00:40:22,620 --> 00:40:20,950

went in there I mean I spent my time

899

00:40:25,829 --> 00:40:22,630

writing and raising money for the most

900

00:40:28,799 --> 00:40:25,839

fun yeah I bet now is there anyone

901  
00:40:31,339 --> 00:40:28,809  
actually exploring this topic now

902  
00:40:35,970 --> 00:40:31,349  
anywhere in the world

903  
00:40:39,269 --> 00:40:35,980  
tons two books that we have online right

904  
00:40:42,120 --> 00:40:39,279  
now let's make sure I get the title

905  
00:40:43,380 --> 00:40:42,130  
correct here it is it's the two ball I'm

906  
00:40:45,390 --> 00:40:43,390  
set called

907  
00:40:48,960 --> 00:40:45,400  
extrasensory perception support

908  
00:40:51,120 --> 00:40:48,970  
skepticism and science vol 2 of this to

909  
00:40:53,609 --> 00:40:51,130  
bottom said is all about theories of ESP

910  
00:40:56,720 --> 00:40:53,619  
it not works why one will answer that

911  
00:40:59,069 --> 00:40:56,730  
question gory detail we outlined all the

912  
00:41:02,039 --> 00:40:59,079  
almost all the research places around

913  
00:41:04,710 --> 00:41:02,049

the world it used to be America was the

914

00:41:06,870 --> 00:41:04,720

center of research right now there are

915

00:41:09,089 --> 00:41:06,880

very few places doing this and work in

916

00:41:12,329 --> 00:41:09,099

this country institutionalize I think

917

00:41:16,249 --> 00:41:12,339

there's only two that I'm aware of three

918

00:41:19,079 --> 00:41:16,259

now University of West Georgia the

919

00:41:21,539 --> 00:41:19,089

Institute for noetic Sciences in Lorain

920

00:41:23,759 --> 00:41:21,549

County and us the laboratories for

921

00:41:25,999 --> 00:41:23,769

fundamental research that's all that's

922

00:41:29,400 --> 00:41:26,009

happening in the u.s. institutionalized

923

00:41:33,269 --> 00:41:29,410

however in Europe my gosh the UK is a

924

00:41:35,160 --> 00:41:33,279

hotbed of new research going on some

925

00:41:39,329 --> 00:41:35,170

research in Russia some research in

926  
00:41:41,069 --> 00:41:39,339  
Hungary some research and Portugal one

927  
00:41:44,549 --> 00:41:41,079  
of the main funders of this work

928  
00:41:48,420 --> 00:41:44,559  
worldwide is the foundation be all in

929  
00:41:50,519 --> 00:41:48,430  
fund out of porto portugal and they put

930  
00:41:53,220 --> 00:41:50,529  
in about half a million euros every two

931  
00:41:55,079 --> 00:41:53,230  
years which is nothing but hot

932  
00:41:57,479 --> 00:41:55,089  
competition for that little bit now what

933  
00:42:00,509 --> 00:41:57,489  
about the u.s. who are who are funding

934  
00:42:05,430 --> 00:42:00,519  
the institutions in the u.s. the three

935  
00:42:08,130 --> 00:42:05,440  
or the two right now nobody's funding me

936  
00:42:11,430 --> 00:42:08,140  
I wish they were but they're not that

937  
00:42:14,579 --> 00:42:11,440  
will change shortly I think these two

938  
00:42:17,160 --> 00:42:14,589

frenetic Sciences is a subscription

939

00:42:19,670 --> 00:42:17,170

organization people sign up and you know

940

00:42:22,289 --> 00:42:19,680

so a lot of their funding comes from

941

00:42:24,839 --> 00:42:22,299

subscribers who buy it you know get

942

00:42:26,700 --> 00:42:24,849

their newsletter and buy merchandise and

943

00:42:28,979 --> 00:42:26,710

attend conferences and all that it's a

944

00:42:30,060 --> 00:42:28,989

very interesting organization the

945

00:42:33,000 --> 00:42:30,070

University of West Shore

946

00:42:35,490 --> 00:42:33,010

job has believe it or not institutional

947

00:42:37,560 --> 00:42:35,500

support from University to conduct

948

00:42:38,100 --> 00:42:37,570

research in parapsychology which is

949

00:42:42,120 --> 00:42:38,110

terrific

950

00:42:44,870 --> 00:42:42,130

Wow yep so is a is parapsychology a

951  
00:42:47,460 --> 00:42:44,880  
something you can actually now this is a

952  
00:42:52,860 --> 00:42:47,470  
layman's question is it something you

953  
00:42:55,200 --> 00:42:52,870  
can get a degree in at the University of

954  
00:42:57,390 --> 00:42:55,210  
West Georgia you can I think the way

955  
00:42:59,870 --> 00:42:57,400  
they were to this it's a degree in

956  
00:43:02,520 --> 00:42:59,880  
psychology with emphasis of

957  
00:43:04,080 --> 00:43:02,530  
parapsychology how you can get a degree

958  
00:43:06,720 --> 00:43:04,090  
in one of the big centers in Europe

959  
00:43:09,300 --> 00:43:06,730  
there was um I don't know if you know

960  
00:43:13,710 --> 00:43:09,310  
the name of Arthur Tressler he was a

961  
00:43:16,260 --> 00:43:13,720  
Hungarian writer and when he died he

962  
00:43:18,150 --> 00:43:16,270  
bequeathed a large sum of money to the

963  
00:43:20,070 --> 00:43:18,160

University of Edinburgh in Scotland to

964

00:43:23,010 --> 00:43:20,080

the psychology department there which

965

00:43:25,020 --> 00:43:23,020

they were desperately ashamed of took

966

00:43:27,510 --> 00:43:25,030

upon parapsychology so they had a

967

00:43:31,020 --> 00:43:27,520

worldwide search for the first occupier

968

00:43:33,360 --> 00:43:31,030

of that chair the professorship in an

969

00:43:35,580 --> 00:43:33,370

American one actually a long time good

970

00:43:38,220 --> 00:43:35,590

friend of mine he died suddenly too for

971

00:43:40,590 --> 00:43:38,230

many years ago Bob Morris was his name

972

00:43:43,440 --> 00:43:40,600

and he became the director of that of

973

00:43:45,720 --> 00:43:43,450

the curler unit in the psychology

974

00:43:47,940 --> 00:43:45,730

department and by the time he passed

975

00:43:50,550 --> 00:43:47,950

away he had become it was such a

976  
00:43:53,130 --> 00:43:50,560  
rigorous good program that the

977  
00:43:55,440 --> 00:43:53,140  
psychology department at Edinboro was

978  
00:43:58,590 --> 00:43:55,450  
dragging on their website that their the

979  
00:44:01,410 --> 00:43:58,600  
center of Europe for quality ESP

980  
00:44:06,240 --> 00:44:01,420  
research pain he was able to change that

981  
00:44:08,130 --> 00:44:06,250  
and so he had many PhDs that got PhDs in

982  
00:44:10,980 --> 00:44:08,140  
this discipline have fanned out across

983  
00:44:13,470 --> 00:44:10,990  
the whole UK and working at various

984  
00:44:16,080 --> 00:44:13,480  
universities universe University of

985  
00:44:18,210 --> 00:44:16,090  
Northampton is one hartfordshire and

986  
00:44:20,880 --> 00:44:18,220  
other places around that are doing

987  
00:44:23,910 --> 00:44:20,890  
pretty interesting work their job you

988  
00:44:28,050 --> 00:44:23,920

hear a lot of times you'll have seen

989

00:44:32,210 --> 00:44:28,060

either documentaries or like a news

990

00:44:36,420 --> 00:44:32,220

flash where police have exhausted

991

00:44:38,520 --> 00:44:36,430

everything that they could possibly do

992

00:44:40,710 --> 00:44:38,530

to find out say where a body is or

993

00:44:42,570 --> 00:44:40,720

something like that and then their last

994

00:44:43,890 --> 00:44:42,580

resort is to go to a psychic and the

995

00:44:46,200 --> 00:44:43,900

psychic actually fine

996

00:44:48,540 --> 00:44:46,210

this has happened a number of times but

997

00:44:50,340 --> 00:44:48,550

the psychic actually finds the body and

998

00:44:52,950 --> 00:44:50,350

describes its you know by a mighty river

999

00:44:55,740 --> 00:44:52,960

bank and there's a car and all this is

1000

00:44:59,390 --> 00:44:55,750

that remote viewing is that what that is

1001  
00:45:02,370 --> 00:44:59,400  
yes well it's it's gathering information

1002  
00:45:06,420 --> 00:45:02,380  
informational size and more term size as

1003  
00:45:12,080 --> 00:45:06,430  
a general term for ESP the Greek letter

1004  
00:45:16,290 --> 00:45:12,090  
Sai is spelled psi yes and associate

1005  
00:45:17,910 --> 00:45:16,300  
sociologists from Michigan dr. Marcella

1006  
00:45:19,740 --> 00:45:17,920  
truths he wrote a book called the blue

1007  
00:45:22,590 --> 00:45:19,750  
shield I think it's called and they

1008  
00:45:25,080 --> 00:45:22,600  
don't call me to that all about the

1009  
00:45:27,810 --> 00:45:25,090  
police departments using psychics either

1010  
00:45:30,300 --> 00:45:27,820  
they're murderers and Hellcat it's or

1011  
00:45:35,040 --> 00:45:30,310  
not actually we have a number of cases

1012  
00:45:36,810 --> 00:45:35,050  
in our in our collection of law

1013  
00:45:40,710 --> 00:45:36,820

enforcement along those lines

1014

00:45:43,710 --> 00:45:40,720

one of which there was a murder a young

1015

00:45:47,100 --> 00:45:43,720

woman was murdered in Washington DC and

1016

00:45:49,530 --> 00:45:47,110

everybody was looking for her and the

1017

00:45:52,380 --> 00:45:49,540

woman's parents called up Joe mcmoneagle

1018

00:45:54,420 --> 00:45:52,390

in Virginia and said can you help us

1019

00:45:57,330 --> 00:45:54,430

find our daughter she's missing and

1020

00:45:59,510 --> 00:45:57,340

nobody can find her and he said if you

1021

00:46:03,060 --> 00:45:59,520

can get the police department from the

1022

00:46:06,900 --> 00:46:03,070

DC to call me I'll work the really well

1023

00:46:08,400 --> 00:46:06,910

he he this is metaphorically doesn't

1024

00:46:12,120 --> 00:46:08,410

work this way you stuck a pin on the map

1025

00:46:14,340 --> 00:46:12,130

in Rock Creek Park 75 teeth when were

1026

00:46:16,980 --> 00:46:14,350

they on the body Oh God

1027

00:46:21,120 --> 00:46:16,990

that that is that is totally amazing and

1028

00:46:23,730 --> 00:46:21,130

you know I doing the show in another

1029

00:46:25,710 --> 00:46:23,740

show I do I just think there's just so

1030

00:46:29,820 --> 00:46:25,720

many things that can't really be

1031

00:46:33,270 --> 00:46:29,830

explained and that definitely definitely

1032

00:46:38,400 --> 00:46:33,280

is one of them right there would you say

1033

00:46:40,800 --> 00:46:38,410

that this is kind of a weird subject to

1034

00:46:43,170 --> 00:46:40,810

ask you could you think that

1035

00:46:46,530 --> 00:46:43,180

remote viewing could be done off planet

1036

00:46:48,900 --> 00:46:46,540

in other words like uh say on the moon

1037

00:46:51,930 --> 00:46:48,910

or another planet can someone act can it

1038

00:46:55,500 --> 00:46:51,940

travel distances or is it just located

1039

00:46:57,640 --> 00:46:55,510

here on the globe that's definitely not

1040

00:47:04,559 --> 00:46:57,650

an outrageously stupid question

1041

00:47:06,999 --> 00:47:04,569

oh you're good to know okay of course

1042

00:47:10,390 --> 00:47:07,009

yes in fact we've done some work with

1043

00:47:12,430 --> 00:47:10,400

that Ingo Swann did a quote remote

1044

00:47:15,460 --> 00:47:12,440

viewing fly by the plan of Jupiter

1045

00:47:18,190 --> 00:47:15,470

before any of NASA's spaceships god I

1046

00:47:20,259 --> 00:47:18,200

think I heard about this okay okay yes

1047

00:47:22,359 --> 00:47:20,269

and he he described that Jupiter had

1048

00:47:24,039 --> 00:47:22,369

rings it was not thought of and it had a

1049

00:47:26,200 --> 00:47:24,049

magnetic field which should have not

1050

00:47:29,650 --> 00:47:26,210

never known turned out to be correct

1051

00:47:32,650 --> 00:47:29,660

Wow isn't that amazing night I did an

1052

00:47:35,049 --> 00:47:32,660

experiment I which my management because

1053

00:47:37,210 --> 00:47:35,059

Bulova watch company was offering a big

1054

00:47:40,150 --> 00:47:37,220

prize for the most clever experiment on

1055

00:47:42,370 --> 00:47:40,160

the nature of time so I said hey I would

1056

00:47:45,430 --> 00:47:42,380

like to do an experiment will you let me

1057

00:47:47,349 --> 00:47:45,440

apply for that grant and my management

1058

00:47:48,999 --> 00:47:47,359

said are you what the grant or do you

1059

00:47:50,829 --> 00:47:49,009

want to actually do the study and I said

1060

00:47:53,289 --> 00:47:50,839

I'd rather do the study she said okay

1061

00:47:55,720 --> 00:47:53,299

I'll fund it so what this was the

1062

00:47:59,109 --> 00:47:55,730

Jupiter which at the time was 40 light

1063

00:48:00,759 --> 00:47:59,119

minutes away has an inner moon called IO

1064

00:48:03,279 --> 00:48:00,769

and it goes around Jupiter

1065

00:48:06,130 --> 00:48:03,289

once every I forget what the time period

1066

00:48:07,749 --> 00:48:06,140

is very short and it does it suffers an

1067

00:48:11,229 --> 00:48:07,759

eclipse every time it gets behind

1068

00:48:13,690 --> 00:48:11,239

Jupiter every town in every orbit and so

1069

00:48:17,259 --> 00:48:13,700

it turns out that we know one can

1070

00:48:19,089 --> 00:48:17,269

compute to precision the eclipse time

1071

00:48:20,829 --> 00:48:19,099

and we call the eclipse time when the

1072

00:48:22,420 --> 00:48:20,839

moon is half lit in other words the

1073

00:48:25,599 --> 00:48:22,430

shadow of Jupiter is only covering half

1074

00:48:29,349 --> 00:48:25,609

the moon so what we wanted to know was

1075

00:48:31,120 --> 00:48:29,359

can somebody describe when that when

1076

00:48:33,849 --> 00:48:31,130

that Eclipse time is occurring on the

1077

00:48:36,039 --> 00:48:33,859

planet on that moon and the question we

1078

00:48:38,979 --> 00:48:36,049

want to ask do they do it in earth base

1079

00:48:40,930 --> 00:48:38,989

time which is 40 minutes later or in

1080

00:48:43,239 --> 00:48:40,940

Jupiter's time is that they were sitting

1081

00:48:44,920 --> 00:48:43,249

on your bed watching so we did this very

1082

00:48:47,200 --> 00:48:44,930

careful experiment and I'll leave all

1083

00:48:48,789 --> 00:48:47,210

the technical details out but involved

1084

00:48:50,380 --> 00:48:48,799

doing remote viewing at 3:00 in the

1085

00:48:54,910 --> 00:48:50,390

morning over hot fudge sundaes and

1086

00:48:57,759 --> 00:48:54,920

pennies for the WWB counter great 8050

1087

00:49:00,849 --> 00:48:57,769

so and then we had a sugar college make

1088

00:49:04,120 --> 00:49:00,859

the measurements for us as to when that

1089

00:49:06,160 --> 00:49:04,130

halftime came and over many trials our

1090

00:49:09,370 --> 00:49:06,170

viewer managed to get the correct answer

1091

00:49:10,870 --> 00:49:09,380

to plus or minus 10 songs god 10-second

1092

00:49:13,590 --> 00:49:10,880

now the question is

1093

00:49:16,540 --> 00:49:13,600

now here's the question did he do it in

1094

00:49:19,060 --> 00:49:16,550

earth-based time or Jupiter based I'm

1095

00:49:20,770 --> 00:49:19,070

gonna and I'm going to ask you I mean

1096

00:49:23,950 --> 00:49:20,780

I'm going to answer they did it in

1097

00:49:25,510 --> 00:49:23,960

Jupiter time bingo you got it right

1098

00:49:28,000 --> 00:49:25,520

lucky lucky guess

1099

00:49:31,150 --> 00:49:28,010

I was a remote viewing it up now you

1100

00:49:34,270 --> 00:49:31,160

just said that you were having hot fudge

1101  
00:49:36,460 --> 00:49:34,280  
sundaes possibly so does that mean that

1102  
00:49:38,290 --> 00:49:36,470  
someone doesn't have to be like in a

1103  
00:49:42,640 --> 00:49:38,300  
sterile environment where there's no

1104  
00:49:44,650 --> 00:49:42,650  
noise and that's so much BS I mean we

1105  
00:49:48,160 --> 00:49:44,660  
did you know I said we tested Cogan's

1106  
00:49:50,380 --> 00:49:48,170  
idea in a submersible one of the persons

1107  
00:49:52,240 --> 00:49:50,390  
with me as we're being towed out in this

1108  
00:49:55,750 --> 00:49:52,250  
submersible is the off of Catalina

1109  
00:49:58,120 --> 00:49:55,760  
Island was Green and seasick and I kept

1110  
00:49:59,980 --> 00:49:58,130  
saying well are you feeling okay sure

1111  
00:50:02,860 --> 00:49:59,990  
you ask me one more time I'm gonna barf

1112  
00:50:05,560 --> 00:50:02,870  
all over you shut up so here's the

1113  
00:50:07,960 --> 00:50:05,570

seasick woman doing marvelous remote

1114

00:50:12,700 --> 00:50:07,970

viewing oh there's another story you'll

1115

00:50:16,300 --> 00:50:12,710

appreciate one of the army units at a

1116

00:50:18,550 --> 00:50:16,310

droid army Arsenal in up in Maryland was

1117

00:50:20,470 --> 00:50:18,560

doing remote viewing and I was asked to

1118

00:50:22,750 --> 00:50:20,480

go back there and act as a judge on

1119

00:50:25,240 --> 00:50:22,760

their material so I'm sitting in this

1120

00:50:27,370 --> 00:50:25,250

trailer looking at material back there

1121

00:50:29,260 --> 00:50:27,380

and all of a sudden I hear the loudest

1122

00:50:32,020 --> 00:50:29,270

damn noise I've ever heard in my life I

1123

00:50:35,050 --> 00:50:32,030

live fifteen inches off my chair come

1124

00:50:37,390 --> 00:50:35,060

whoa holy cow what was that turned out

1125

00:50:40,090 --> 00:50:37,400

this trailer was like a hundred yards

1126  
00:50:43,540 --> 00:50:40,100  
from a 15 inch howitzer range they were

1127  
00:50:45,040 --> 00:50:43,550  
shooting off these type of gianna it's

1128  
00:50:48,190 --> 00:50:45,050  
still able to do remote viewing and

1129  
00:50:52,240 --> 00:50:48,200  
that's certain Wow well now how does it

1130  
00:50:55,090 --> 00:50:52,250  
actually I don't know if the word work

1131  
00:50:58,030 --> 00:50:55,100  
is the right word to use but does do

1132  
00:51:01,840 --> 00:50:58,040  
things just pop in someone's head now

1133  
00:51:03,520 --> 00:51:01,850  
how does that how does it happen well I

1134  
00:51:06,130 --> 00:51:03,530  
got a dress that in two ways one is

1135  
00:51:07,420 --> 00:51:06,140  
experiential in other words talking with

1136  
00:51:09,550 --> 00:51:07,430  
people you know I've been working with

1137  
00:51:11,650 --> 00:51:09,560  
Joe my Chronicle for 30 years and Angela

1138  
00:51:13,900 --> 00:51:11,660

for 30 years in eleven thirty years so I

1139

00:51:16,540 --> 00:51:13,910

know them very well with close friends

1140

00:51:22,120 --> 00:51:16,550

and so okay so what's it like when you

1141

00:51:24,150 --> 00:51:22,130

do this and the answer rarely is like a

1142

00:51:27,750 --> 00:51:24,160

multimedia extravaganza going

1143

00:51:30,420 --> 00:51:27,760

between your ears sometimes it's like

1144

00:51:32,190 --> 00:51:30,430

that most the time I think it's almost

1145

00:51:36,030 --> 00:51:32,200

as if you're making it up

1146

00:51:37,590 --> 00:51:36,040

really and you just have to go ahead you

1147

00:51:40,830 --> 00:51:37,600

just have to go with it what Joe was

1148

00:51:43,710 --> 00:51:40,840

able to do and then go also was able to

1149

00:51:45,480 --> 00:51:43,720

at least statistically say well I made

1150

00:51:47,760 --> 00:51:45,490

this up but this is we made it to the

1151  
00:51:50,490 --> 00:51:47,770  
target and be able to make two columns

1152  
00:51:54,120 --> 00:51:50,500  
of numbers and chortled ifferent that

1153  
00:51:57,180 --> 00:51:54,130  
way I find that amazes but that said we

1154  
00:51:58,740 --> 00:51:57,190  
have some now ideas neurologically which

1155  
00:52:00,930 --> 00:51:58,750  
we're going to be testing shortly in the

1156  
00:52:02,190 --> 00:52:00,940  
brain of how this might work and what is

1157  
00:52:04,260 --> 00:52:02,200  
involved do you know the term

1158  
00:52:05,810 --> 00:52:04,270  
synesthesia have you ever heard you say

1159  
00:52:10,710 --> 00:52:05,820  
that one more time

1160  
00:52:12,360 --> 00:52:10,720  
synesthesia with that okay what it is

1161  
00:52:14,280 --> 00:52:12,370  
it's been around for a long time known

1162  
00:52:17,430 --> 00:52:14,290  
for a long time it's people who have

1163  
00:52:19,830 --> 00:52:17,440

sort of crosswire wiring oh yeah brains

1164

00:52:21,420 --> 00:52:19,840

yep in other words they see numbers and

1165

00:52:25,020 --> 00:52:21,430

yep I know what you're talking about yes

1166

00:52:25,740 --> 00:52:25,030

they smell they spell color yep yep

1167

00:52:28,650 --> 00:52:25,750

exactly

1168

00:52:32,790 --> 00:52:28,660

we think that synesthesia plays a role

1169

00:52:35,610 --> 00:52:32,800

in being a good subject and that's a

1170

00:52:37,920 --> 00:52:35,620

testable idea it will find out we wrote

1171

00:52:40,290 --> 00:52:37,930

this model published in Sage publication

1172

00:52:42,330 --> 00:52:40,300

and if the model of how is how

1173

00:52:43,950 --> 00:52:42,340

precognition works is completely wrong

1174

00:52:46,950 --> 00:52:43,960

there's one aspect of which is really

1175

00:52:48,270 --> 00:52:46,960

good let's suppose your your knees toast

1176

00:52:51,990 --> 00:52:48,280

where are you located I'm in the state

1177

00:52:53,880 --> 00:52:52,000

of Maine in the state of Maine okay I'm

1178

00:52:58,200 --> 00:52:53,890

in the state of confusion to Coachella

1179

00:53:00,080 --> 00:52:58,210

for ya so okay tomorrow morning when you

1180

00:53:01,890 --> 00:53:00,090

get up you're going to pick a random

1181

00:53:04,020 --> 00:53:01,900

photograph out of the National

1182

00:53:07,200 --> 00:53:04,030

Geographic magazine all right that's

1183

00:53:09,090 --> 00:53:07,210

tomorrow I have a subject sitting here

1184

00:53:10,470 --> 00:53:09,100

who's going to tell you what that is

1185

00:53:12,000 --> 00:53:10,480

going to tell me what that picture

1186

00:53:14,880 --> 00:53:12,010

you're going to choose randomly tomorrow

1187

00:53:17,190 --> 00:53:14,890

will be so there's the problem how does

1188

00:53:20,460 --> 00:53:17,200

that information get from tomorrow there

1189

00:53:22,860 --> 00:53:20,470

then to here now that's a physics

1190

00:53:25,710 --> 00:53:22,870

question only you don't have doesn't it

1191

00:53:28,080 --> 00:53:25,720

depend upon any aspect of me over the

1192

00:53:30,120 --> 00:53:28,090

remote viewer is its how the world can

1193

00:53:32,070 --> 00:53:30,130

that information get from tomorrow there

1194

00:53:34,290 --> 00:53:32,080

then to here now that's a physics

1195

00:53:35,840 --> 00:53:34,300

question we call that the physics domain

1196

00:53:38,810 --> 00:53:35,850

and we and we

1197

00:53:41,270 --> 00:53:38,820

some hand-waving arguments for how that

1198

00:53:43,040 --> 00:53:41,280

might work then once it's onboard the

1199

00:53:44,960 --> 00:53:43,050

brain we call that the neuroscience

1200

00:53:46,430 --> 00:53:44,970

domain in other words what goes on in

1201

00:53:49,370 --> 00:53:46,440

the brain that allows people to

1202

00:53:52,010 --> 00:53:49,380

accurately describe and to have this

1203

00:53:53,810 --> 00:53:52,020

experience and there there are large

1204

00:53:55,790 --> 00:53:53,820

number of testable things in our model

1205

00:53:57,950 --> 00:53:55,800

we call that the neuroscience for me

1206

00:54:00,110 --> 00:53:57,960

what's what's I think a step forward if

1207

00:54:02,660 --> 00:54:00,120

the models wrong at least dividing it up

1208

00:54:04,040 --> 00:54:02,670

into two chunks neuroscientist don't

1209

00:54:05,750 --> 00:54:04,050

have to worry about how the information

1210

00:54:07,930 --> 00:54:05,760

got there they only have to worry about

1211

00:54:09,650 --> 00:54:07,940

what happened when it got there and the

1212

00:54:11,330 --> 00:54:09,660

physicists don't have to worry about

1213

00:54:12,890 --> 00:54:11,340

what happens when it gets on board the

1214

00:54:14,510 --> 00:54:12,900

brain they only have to worry about how

1215

00:54:16,640 --> 00:54:14,520

it got there in the first now which is

1216

00:54:21,320 --> 00:54:16,650

would you say that we still know very

1217

00:54:23,090 --> 00:54:21,330

little about the brain no we know a hell

1218

00:54:26,240 --> 00:54:23,100

of a lot about the French do we know a

1219

00:54:28,070 --> 00:54:26,250

lot do we know how the web chalmers

1220

00:54:30,740 --> 00:54:28,080

another called the heart problem

1221

00:54:33,140 --> 00:54:30,750

no there's an awful lot of stuff I can't

1222

00:54:34,790 --> 00:54:33,150

tell you exactly where the brain love

1223

00:54:37,070 --> 00:54:34,800

occurs there's probably no separate

1224

00:54:39,290 --> 00:54:37,080

region for but there's an awful lot of

1225

00:54:40,940 --> 00:54:39,300

stuff that is known for cognitive

1226  
00:54:43,610 --> 00:54:40,950  
neuroscience these days about the brain

1227  
00:54:46,310 --> 00:54:43,620  
do we know everything no not even close

1228  
00:54:48,080 --> 00:54:46,320  
but we know it yeah but uh you know I

1229  
00:54:51,460 --> 00:54:48,090  
hear people debating what consciousness

1230  
00:54:54,140 --> 00:54:51,470  
is and what the mind is and all that

1231  
00:54:58,400 --> 00:54:54,150  
compared to the brain if it's separate

1232  
00:55:02,990 --> 00:54:58,410  
or or parallel or all that does any of

1233  
00:55:07,070 --> 00:55:03,000  
that play into what your research was

1234  
00:55:12,710 --> 00:55:07,080  
yes there's a huge debate in our in our

1235  
00:55:16,190 --> 00:55:12,720  
research community it falls into the in

1236  
00:55:18,860 --> 00:55:16,200  
two words of dualism where you think the

1237  
00:55:21,500 --> 00:55:18,870  
brain is the mind whatever that is

1238  
00:55:24,560 --> 00:55:21,510

consciousness it is not equal to the

1239

00:55:27,140 --> 00:55:24,570

brain and the other side of that is that

1240

00:55:29,810 --> 00:55:27,150

the what we define is consciousness all

1241

00:55:32,540 --> 00:55:29,820

that rich think so subjective thing that

1242

00:55:35,240 --> 00:55:32,550

goes on on the brain the richness of the

1243

00:55:37,700 --> 00:55:35,250

taste of hot fudge sundaes the richness

1244

00:55:39,350 --> 00:55:37,710

of the color red what it feels like to

1245

00:55:41,930 --> 00:55:39,360

be above all that good stuff that goes

1246

00:55:44,900 --> 00:55:41,940

up we all love as humans being

1247

00:55:48,410 --> 00:55:44,910

materialist which I am one say that that

1248

00:55:51,349 --> 00:55:48,420

is an emergent property of the brain

1249

00:55:54,230 --> 00:55:51,359

now the other side of that argues a few

1250

00:55:56,240 --> 00:55:54,240

is strongly against that my colleagues

1251  
00:55:59,329 --> 00:55:56,250  
that have been working on this problem

1252  
00:56:01,730 --> 00:55:59,339  
for a long time are happy to go down

1253  
00:56:04,099 --> 00:56:01,740  
this article physicalist idea how this

1254  
00:56:06,470 --> 00:56:04,109  
might work until it begins to fail then

1255  
00:56:08,900 --> 00:56:06,480  
I'm all doors are open as far as I'm

1256  
00:56:11,180 --> 00:56:08,910  
concerned I'm data-driven and all the

1257  
00:56:13,009 --> 00:56:11,190  
data that we have so far at least my

1258  
00:56:15,559 --> 00:56:13,019  
interpretation of it most of my thoughts

1259  
00:56:18,140 --> 00:56:15,569  
some of my colleagues agree is that you

1260  
00:56:19,220 --> 00:56:18,150  
don't need to hypothesize anything at

1261  
00:56:20,509 --> 00:56:19,230  
all about the nature of consciousness

1262  
00:56:23,420 --> 00:56:20,519  
here's the interesting thing

1263  
00:56:24,980 --> 00:56:23,430

how does 89 thousand pages from the CIA

1264

00:56:28,430 --> 00:56:24,990

release from our project

1265

00:56:31,759 --> 00:56:28,440

the only time consciousness has even

1266

00:56:33,829 --> 00:56:31,769

mentioned as a word is in references to

1267

00:56:36,799 --> 00:56:33,839

some of the somebody else's book really

1268

00:56:43,569 --> 00:56:36,809

ah yeah that's something

1269

00:56:48,289 --> 00:56:43,579

now what about how let's see how

1270

00:56:52,400 --> 00:56:48,299

reliable would you say ESP and remote

1271

00:56:58,249 --> 00:56:52,410

viewing is let me here's a highly

1272

00:56:59,870 --> 00:56:58,259

technical term it's okay and the

1273

00:57:03,130 --> 00:56:59,880

California it's even worse than the

1274

00:57:06,289 --> 00:57:03,140

California telephone says had that said

1275

00:57:08,210 --> 00:57:06,299

however if you use it properly it can be

1276

00:57:10,249 --> 00:57:08,220

extremely helpful let me give you a

1277

00:57:12,079 --> 00:57:10,259

couple of examples one of the things

1278

00:57:14,480 --> 00:57:12,089

that when I became director of the

1279

00:57:16,190 --> 00:57:14,490

program I had to try to re-educate our

1280

00:57:18,289 --> 00:57:16,200

government clients in the following

1281

00:57:19,880 --> 00:57:18,299

sense people thought we had miracles oh

1282

00:57:23,289 --> 00:57:19,890

my god we can levitate a month to the

1283

00:57:25,549 --> 00:57:23,299

moon and we can reach into a creature

1284

00:57:27,200 --> 00:57:25,559

Brezhnev's office and describe what's

1285

00:57:29,690 --> 00:57:27,210

inside and you know it's going to be

1286

00:57:32,539 --> 00:57:29,700

God's gift to intelligence Kelly no

1287

00:57:35,089 --> 00:57:32,549

didn't work out that way but if you

1288

00:57:37,009 --> 00:57:35,099

invert the problem and say okay what can

1289

00:57:39,200 --> 00:57:37,019

we what can we demonstrate in the

1290

00:57:41,240 --> 00:57:39,210

laboratory okay you can do this the

1291

00:57:43,999 --> 00:57:41,250

other thing and is there an application

1292

00:57:47,210 --> 00:57:44,009

for that and the answer is very clearly

1293

00:57:49,339 --> 00:57:47,220

yes let me give you an example suppose

1294

00:57:52,880 --> 00:57:49,349

you have a lost nuclear weapon or a

1295

00:57:54,589 --> 00:57:52,890

kidnap victim and you and the people who

1296

00:57:56,809 --> 00:57:54,599

are lots of people looking for if they

1297

00:57:59,930 --> 00:57:56,819

have no idea where it is they have some

1298

00:58:02,299 --> 00:57:59,940

idea but you know in large areas what we

1299

00:58:04,249 --> 00:58:02,309

can do we can't often pin

1300

00:58:07,519 --> 00:58:04,259

point where that where that lost thing

1301  
00:58:09,769 --> 00:58:07,529  
actually is but we can reduce the time

1302  
00:58:11,870 --> 00:58:09,779  
it takes you to solve that problem to a

1303  
00:58:15,799 --> 00:58:11,880  
significant degree which might in fact

1304  
00:58:18,709 --> 00:58:15,809  
have in fact save lives and reduce the

1305  
00:58:21,079 --> 00:58:18,719  
amount of expenditure you need to

1306  
00:58:23,630 --> 00:58:21,089  
accomplish that and here's the way to go

1307  
00:58:25,969 --> 00:58:23,640  
about it let's say there's a kidnap

1308  
00:58:28,789 --> 00:58:25,979  
victim and you strongly suspect they're

1309  
00:58:31,279 --> 00:58:28,799  
in the UK somewhere or maybe in London

1310  
00:58:33,829 --> 00:58:31,289  
must make that out and so you divide up

1311  
00:58:35,870 --> 00:58:33,839  
London in say six or seven different

1312  
00:58:38,929 --> 00:58:35,880  
areas the authorities going to search in

1313  
00:58:40,880 --> 00:58:38,939

those areas right and so we have like

1314

00:58:42,679 --> 00:58:40,890

six areas they're going to search for we

1315

00:58:44,660 --> 00:58:42,689

have a seventh one meaning none of the

1316

00:58:46,789 --> 00:58:44,670

above and we have some very clever

1317

00:58:49,519 --> 00:58:46,799

techniques with computers and it's being

1318

00:58:52,219 --> 00:58:49,529

written about in these volumes that will

1319

00:58:54,499 --> 00:58:52,229

allow you to say well if you're going to

1320

00:58:56,809 --> 00:58:54,509

search these areas in a random way why

1321

00:58:59,120 --> 00:58:56,819

not search our and we'll give you a list

1322

00:59:01,130 --> 00:58:59,130

you can search ours in our way and if

1323

00:59:02,900 --> 00:59:01,140

you do that it'll reduce the time it

1324

00:59:05,209 --> 00:59:02,910

takes you to find it by anywhere between

1325

00:59:08,239 --> 00:59:05,219

ten to twenty five percent and that has

1326

00:59:11,929 --> 00:59:08,249

is this something that has consistently

1327

00:59:15,439 --> 00:59:11,939

weren't done yes so I guess that would

1328

00:59:20,689 --> 00:59:15,449

be a good use a good reason to say it

1329

00:59:24,890 --> 00:59:20,699

works you know it works somewhat and Wow

1330

00:59:27,499 --> 00:59:24,900

and I remember listening to a show where

1331

00:59:30,559 --> 00:59:27,509

you talked about you and your colleagues

1332

00:59:32,479 --> 00:59:30,569

did a test when it came to I want to say

1333

00:59:35,029 --> 00:59:32,489

horse races or something like that

1334

00:59:36,289 --> 00:59:35,039

well oh yeah how to make any with it I

1335

00:59:39,169 --> 00:59:36,299

want to talk about that because that's

1336

00:59:44,479 --> 00:59:39,179

that's a I might want to get in on that

1337

00:59:48,739 --> 00:59:44,489

yeah well we didn't lengthy series on

1338

00:59:50,299 --> 00:59:48,749

sports bed you can do it for horse races

1339

00:59:53,390 --> 00:59:50,309

this is called associational

1340

00:59:55,160 --> 00:59:53,400

remote-viewing in other words if listen

1341

00:59:56,900 --> 00:59:55,170

just to illustrate the point that I'll

1342

01:00:00,109 --> 00:59:56,910

tear about the real case that supposes a

1343

01:00:01,939 --> 01:00:00,119

two horse horse race okay and I would

1344

01:00:03,859 --> 01:00:01,949

like to sit down the Newmark euro

1345

01:00:05,509 --> 01:00:03,869

psychic and say okay

1346

01:00:07,719 --> 01:00:05,519

tomorrow the race is happening which

1347

01:00:10,130 --> 01:00:07,729

horse horse a horse B is going to win

1348

01:00:13,219 --> 01:00:10,140

that's the straight forward and wrong

1349

01:00:16,080 --> 01:00:13,229

way to go about here I can know straight

1350

01:00:18,300 --> 01:00:16,090

White's the wrong way let's step back

1351

01:00:21,300 --> 01:00:18,310

a bit suppose I have a regular plane

1352

01:00:23,190 --> 01:00:21,310

deck of cards right and I pick one at

1353

01:00:25,230 --> 01:00:23,200

random and I stick it underneath my desk

1354

01:00:27,090 --> 01:00:25,240

here and I'll say okay all the way from

1355

01:00:29,580 --> 01:00:27,100

Maine I'm going to make this really easy

1356

01:00:33,090 --> 01:00:29,590

for you just tell me is it a black or

1357

01:00:35,220 --> 01:00:33,100

red card wrong because what happens is

1358

01:00:37,260 --> 01:00:35,230

you close your eyes and wafting before

1359

01:00:38,940 --> 01:00:37,270

your mental landscape does every black

1360

01:00:40,380 --> 01:00:38,950

and red playing card you've ever seen in

1361

01:00:42,420 --> 01:00:40,390

your whole life can you play bridge last

1362

01:00:44,910 --> 01:00:42,430

night so there's a cleaving ace of

1363

01:00:47,400 --> 01:00:44,920

spades and a red Jack of Diamonds and

1364

01:00:49,650 --> 01:00:47,410

what have you over there and that stuff

1365

01:00:52,410 --> 01:00:49,660

you've invented nothing at all that's

1366

01:00:53,940 --> 01:00:52,420

coming from the dark that that's called

1367

01:00:56,670 --> 01:00:53,950

a forced choice problem

1368

01:00:59,610 --> 01:00:56,680

so what we learned how to do is to solve

1369

01:01:03,930 --> 01:00:59,620

that problem is somebody unknown to me

1370

01:01:05,850 --> 01:01:03,940

would say okay if red if the red is the

1371

01:01:08,430 --> 01:01:05,860

color of the card will associate that

1372

01:01:10,680 --> 01:01:08,440

with a picture of a kangaroo and if it's

1373

01:01:13,740 --> 01:01:10,690

black will associate that with a picture

1374

01:01:15,660 --> 01:01:13,750

of a rocketship and now I ask you

1375

01:01:17,280 --> 01:01:15,670

okay learn tomorrow I'm going to show

1376

01:01:18,900 --> 01:01:17,290

you how we're going to space in the hot

1377

01:01:20,760 --> 01:01:18,910

hours from now let me show you a

1378

01:01:23,280 --> 01:01:20,770

photograph just remove you with that

1379

01:01:26,520 --> 01:01:23,290

photograph is now you don't have to

1380

01:01:29,100 --> 01:01:26,530

worry about what what is associated with

1381

01:01:31,530 --> 01:01:29,110

that photograph and so the picture I'm

1382

01:01:33,240 --> 01:01:31,540

going to show you later is determined by

1383

01:01:37,800 --> 01:01:33,250

the color of the car that's facing up

1384

01:01:43,680 --> 01:01:37,810

here now we do that for for the real

1385

01:01:46,970 --> 01:01:43,690

case for we did 30 trials with very

1386

01:01:49,320 --> 01:01:46,980

complicated series of stuff we have a

1387

01:01:51,390 --> 01:01:49,330

strategy betting team that was in

1388

01:01:53,820 --> 01:01:51,400

Birmingham Alabama and a bunch of your

1389

01:01:56,760 --> 01:01:53,830

remote viewers out here and so what we

1390

01:01:58,770 --> 01:01:56,770

did was and my friend in Alabama will

1391

01:02:00,810 --> 01:01:58,780

say well I've got targeting and target B

1392

01:02:03,710 --> 01:02:00,820

all squared away I had no idea what the

1393

01:02:05,910 --> 01:02:03,720

hell that was he had picked some sports

1394

01:02:08,910 --> 01:02:05,920

game I didn't know where this football

1395

01:02:10,560 --> 01:02:08,920

basketball horse-racing whatever where

1396

01:02:12,810 --> 01:02:10,570

there was a binary outcome team a or

1397

01:02:15,240 --> 01:02:12,820

team B would win and he just named the

1398

01:02:18,840 --> 01:02:15,250

outcome of let's say the Dodgers playing

1399

01:02:21,480 --> 01:02:18,850

some other baseball team and the outcome

1400

01:02:24,000 --> 01:02:21,490

if team a won he called that if the

1401  
01:02:25,740 --> 01:02:24,010  
Dodgers won he just defined at a star

1402  
01:02:27,690 --> 01:02:25,750  
today and if the other team I needed to

1403  
01:02:28,970 --> 01:02:27,700  
find out a star to be he said I've got

1404  
01:02:31,460 --> 01:02:28,980  
these two daughters

1405  
01:02:33,890 --> 01:02:31,470  
cat fair enough so I'd sit down with you

1406  
01:02:35,180 --> 01:02:33,900  
and that's it okay tomorrow and you're

1407  
01:02:37,130 --> 01:02:35,190  
going to see a photograph please

1408  
01:02:39,200 --> 01:02:37,140  
describe that photograph you describe it

1409  
01:02:41,330 --> 01:02:39,210  
because we put your data in the computer

1410  
01:02:43,310 --> 01:02:41,340  
the computer randomly picks two pictures

1411  
01:02:46,490 --> 01:02:43,320  
that are different from one another as

1412  
01:02:47,870 --> 01:02:46,500  
possible and arbitrarily Mable's one of

1413  
01:02:50,540 --> 01:02:47,880

those pictures target a and the other

1414

01:02:52,790 --> 01:02:50,550

one who started B and if your

1415

01:02:55,760 --> 01:02:52,800

description matches one of those two a

1416

01:02:57,800 --> 01:02:55,770

really significant degree I send a note

1417

01:02:59,180 --> 01:02:57,810

back to my colleague in Alabama saying

1418

01:03:01,300 --> 01:02:59,190

well we think it's going to be target

1419

01:03:05,599 --> 01:03:01,310

anyone and it's a good high-quality

1420

01:03:08,410 --> 01:03:05,609

agreement bet on it okay out of 30

1421

01:03:11,300 --> 01:03:08,420

trials nine of them meant a pre the

1422

01:03:13,730 --> 01:03:11,310

predefined threshold of goodness if you

1423

01:03:17,330 --> 01:03:13,740

will and of those nine bets we make

1424

01:03:20,000 --> 01:03:17,340

money on eight of them really Wow

1425

01:03:23,420 --> 01:03:20,010

so now so what are you doing sitting

1426

01:03:26,180 --> 01:03:23,430

retire there right now ah here you go

1427

01:03:29,060 --> 01:03:26,190

boy later that you know why not win the

1428

01:03:29,750 --> 01:03:29,070

lottery well I am I'm very very you

1429

01:03:32,390 --> 01:03:29,760

think I don't

1430

01:03:35,960 --> 01:03:32,400

lol though I'm actually talking more but

1431

01:03:39,490 --> 01:03:37,880

the reason the real serious answer to

1432

01:03:44,210 --> 01:03:39,500

that question and it's a good question

1433

01:03:46,250 --> 01:03:44,220

is it's labor intensive psychic people

1434

01:03:48,020 --> 01:03:46,260

are not like switches you can turn them

1435

01:03:51,410 --> 01:03:48,030

on and off they get bored quickly and

1436

01:03:55,099 --> 01:03:51,420

hell if you get bored tying your shoes

1437

01:03:57,170 --> 01:03:55,109

you don't do a good job of it so it was

1438

01:03:59,780 --> 01:03:57,180

labor intensive it took like nine months

1439

01:04:01,580 --> 01:03:59,790

to do this kind of thing it just isn't

1440

01:04:06,020 --> 01:04:01,590

worth the effort - Wow and how many

1441

01:04:09,950 --> 01:04:06,030

people were involved we had through huh

1442

01:04:12,830 --> 01:04:09,960

so that long Wow but very interesting

1443

01:04:15,050 --> 01:04:12,840

just the fact that something could be

1444

01:04:18,020 --> 01:04:15,060

you know actually come out of it was

1445

01:04:20,359 --> 01:04:18,030

really really amazing yeah because

1446

01:04:23,390 --> 01:04:20,369

that's what we're Russell Russell Targ

1447

01:04:26,900 --> 01:04:23,400

the good news is he used the same idea

1448

01:04:29,390 --> 01:04:26,910

and he won \$100,000 Betty and silver

1449

01:04:31,010 --> 01:04:29,400

futures by this technique unfortunately

1450

01:04:32,450 --> 01:04:31,020

lost hundred thousand dollars in later

1451

01:04:35,690 --> 01:04:32,460

on but the first part worked out very

1452

01:04:39,680 --> 01:04:35,700

well one of my other colleagues how foot

1453

01:04:41,990 --> 01:04:39,690

off put his kid through school by doing

1454

01:04:42,530 --> 01:04:42,000

this also this kind of technique you it

1455

01:04:45,710 --> 01:04:42,540

does what

1456

01:04:48,740 --> 01:04:45,720

how about that now I don't understand

1457

01:04:50,960 --> 01:04:48,750

this question came from Omar but maybe

1458

01:04:55,510 --> 01:04:50,970

you understand it where do you think

1459

01:04:58,460 --> 01:04:55,520

electric human conductivity comes from

1460

01:05:01,550 --> 01:04:58,470

electric human conductivity I have no

1461

01:05:04,490 --> 01:05:01,560

idea okay I didn't I didn't understand

1462

01:05:06,530 --> 01:05:04,500

that so maybe I'll ask out Omar if you

1463

01:05:10,340 --> 01:05:06,540

could rephrase that in a different type

1464

01:05:14,660 --> 01:05:10,350

of way also someone up there is how do

1465

01:05:23,180 --> 01:05:14,670

or can some would defend from remote

1466

01:05:24,980 --> 01:05:23,190

viewing boy yes and no obviously we had

1467

01:05:27,080 --> 01:05:24,990

a whole program called countermeasures

1468

01:05:28,820 --> 01:05:27,090

what can we do if we can remote view

1469

01:05:30,760 --> 01:05:28,830

them they can remove us how do we

1470

01:05:33,710 --> 01:05:30,770

protect ourselves all right

1471

01:05:35,600 --> 01:05:33,720

the answer is putting up shields and

1472

01:05:38,510 --> 01:05:35,610

doing all that stuff won't work but we

1473

01:05:41,690 --> 01:05:38,520

came up with an idea let's suppose you

1474

01:05:43,580 --> 01:05:41,700

had a candle and you didn't want some

1475

01:05:45,410 --> 01:05:43,590

bad guys to know there you have a candle

1476

01:05:48,460 --> 01:05:45,420

what you could do is put a huge

1477

01:05:51,230 --> 01:05:48,470

searchlight right next to handle uh-huh

1478

01:05:52,820 --> 01:05:51,240

so that if people are looking around for

1479

01:05:54,290 --> 01:05:52,830

a weak source of light you would never

1480

01:05:59,630 --> 01:05:54,300

see the candle you can see this big

1481

01:06:01,520 --> 01:05:59,640

searchlight so we have a way balls

1482

01:06:04,400 --> 01:06:01,530

entropy and some other things you have a

1483

01:06:08,090 --> 01:06:04,410

random target the random system which

1484

01:06:10,460 --> 01:06:08,100

would act as a decoy to hide what you're

1485

01:06:12,800 --> 01:06:10,470

actually trying to protect but as far as

1486

01:06:16,430 --> 01:06:12,810

the government never I mean that was

1487

01:06:17,990 --> 01:06:16,440

probably mostly like an experiment but

1488

01:06:19,790 --> 01:06:18,000

the government would never have would

1489

01:06:23,390 --> 01:06:19,800

really never worry about that I mean

1490

01:06:26,150 --> 01:06:23,400

were we worried that Russia what was you

1491

01:06:28,700 --> 01:06:26,160

really did okay what yeah one of the

1492

01:06:30,230 --> 01:06:28,710

things that we had an SSRI we had one of

1493

01:06:33,140 --> 01:06:30,240

these rooms which actually is in the

1494

01:06:35,270 --> 01:06:33,150

news late they called asked if a special

1495

01:06:38,270 --> 01:06:35,280

compartment and information facility we

1496

01:06:40,340 --> 01:06:38,280

have top-secret stuff and we'd go down

1497

01:06:42,470 --> 01:06:40,350

there from time to time but five

1498

01:06:44,660 --> 01:06:42,480

envelopes marked yeah one two three four

1499

01:06:46,580 --> 01:06:44,670

five with pictures inside them and we

1500

01:06:48,440 --> 01:06:46,590

tell the people in this super super

1501  
01:06:51,260 --> 01:06:48,450  
super super secret place and say look

1502  
01:06:52,820 --> 01:06:51,270  
when we walk out of here randomly pick

1503  
01:06:54,830 --> 01:06:52,830  
one of these pictures or one of these

1504  
01:06:56,390 --> 01:06:54,840  
sealed envelopes and put it in the

1505  
01:06:58,489 --> 01:06:56,400  
middle of the table

1506  
01:07:01,489 --> 01:06:58,499  
and will penetrate your walls with

1507  
01:07:03,319 --> 01:07:01,499  
remote viewing and they say oh you can't

1508  
01:07:06,710 --> 01:07:03,329  
do that and I said yeah watch us and we

1509  
01:07:08,420 --> 01:07:06,720  
did know what we didn't tell them walk

1510  
01:07:15,259 --> 01:07:08,430  
does it scared the hell out kept the

1511  
01:07:17,989 --> 01:07:15,269  
money coming around and but we didn't

1512  
01:07:20,569 --> 01:07:17,999  
tell them once we once the remotest

1513  
01:07:22,249 --> 01:07:20,579

untied and it say can I have the picture

1514

01:07:24,289 --> 01:07:22,259

and they give me the the envelope and I

1515

01:07:27,019 --> 01:07:24,299

take it upstairs opening the envelope

1516

01:07:30,470 --> 01:07:27,029

and show the person the photograph for s

1517

01:07:34,400 --> 01:07:30,480

feedback if they were looking into their

1518

01:07:37,190 --> 01:07:34,410

future at the feedback they never

1519

01:07:39,789 --> 01:07:37,200

penetrated the room though uh-huh but

1520

01:07:44,120 --> 01:07:39,799

they were really scared about ah Wow

1521

01:07:46,249 --> 01:07:44,130

amazing and do you think are as far as

1522

01:07:50,029 --> 01:07:46,259

you know you said you have you've gone

1523

01:07:55,460 --> 01:07:50,039

to Russia Moscow like 20 times and did

1524

01:08:00,349 --> 01:07:55,470

they have a say a comparable really good

1525

01:08:02,930 --> 01:08:00,359

remote viewer as well I met one of them

1526

01:08:06,769 --> 01:08:02,940

Joe Nigel mcmoneagle I met one her name

1527

01:08:09,229 --> 01:08:06,779

is um Eleanor klimova she was an Army

1528

01:08:11,809 --> 01:08:09,239

personnel and I actually did an

1529

01:08:13,640 --> 01:08:11,819

experiment with her so at first hand

1530

01:08:16,700 --> 01:08:13,650

knowledge he's ever much as good as Joe

1531

01:08:18,769 --> 01:08:16,710

mcmoneagle I can't speak to the other at

1532

01:08:20,930 --> 01:08:18,779

one time the remote viewing group there

1533

01:08:26,149 --> 01:08:20,940

had a hundred and twenty remote viewers

1534

01:08:29,539 --> 01:08:26,159

Wow amazing yeah yeah now it seems to me

1535

01:08:31,999 --> 01:08:29,549

that if I was hired and had a contract

1536

01:08:33,470 --> 01:08:32,009

like this I would really now you

1537

01:08:36,289 --> 01:08:33,480

mentioned earlier that people can get

1538

01:08:38,300 --> 01:08:36,299

bored real easy but I think wow yeah

1539

01:08:41,539 --> 01:08:38,310

that would be such a fun job I mean did

1540

01:08:46,910 --> 01:08:41,549

did was there a turnaround or did people

1541

01:08:49,789 --> 01:08:46,920

just stay with it well much to the

1542

01:08:53,240 --> 01:08:49,799

consternation of our minders and we have

1543

01:08:56,349 --> 01:08:53,250

minders one fellow of the lake Jim

1544

01:08:58,070 --> 01:08:56,359

Salyer was a gs-15 very high-ranking

1545

01:09:01,249 --> 01:08:58,080

geneticists from Defense Intelligence

1546

01:09:01,669 --> 01:09:01,259

Agency he was with us on-site for eight

1547

01:09:04,789 --> 01:09:01,679

years

1548

01:09:08,390 --> 01:09:04,799

all right and his job is to make sure we

1549

01:09:09,800 --> 01:09:08,400

were doing our job Rob and he get really

1550

01:09:12,110 --> 01:09:09,810

angry because

1551  
01:09:13,730 --> 01:09:12,120  
you fly somebody a psychic remote you're

1552  
01:09:15,950 --> 01:09:13,740  
in from the East Coast and the guy would

1553  
01:09:18,740 --> 01:09:15,960  
walk in the door like Joanna said you

1554  
01:09:20,630 --> 01:09:18,750  
look like B us you look terrible

1555  
01:09:23,000 --> 01:09:20,640  
take the day off and come back tomorrow

1556  
01:09:26,120 --> 01:09:23,010  
you're resident and Jim would go berserk

1557  
01:09:27,890 --> 01:09:26,130  
I said look you want to fill in all the

1558  
01:09:31,010 --> 01:09:27,900  
little boxes in your sheet or would you

1559  
01:09:33,050 --> 01:09:31,020  
rather have good data these I'd rather

1560  
01:09:37,820 --> 01:09:33,060  
have you yeah yeah that that totally

1561  
01:09:40,300 --> 01:09:37,830  
makes sense do you think there that this

1562  
01:09:43,640 --> 01:09:40,310  
will in any type of way

1563  
01:09:45,800 --> 01:09:43,650

come back as far as our government is

1564

01:09:49,520 --> 01:09:45,810

concerned or do you think it's just it's

1565

01:09:51,559 --> 01:09:49,530

gone for good or do you think you know I

1566

01:09:54,079 --> 01:09:51,569

can't see how technology could change

1567

01:09:57,530 --> 01:09:54,089

anything this is all just you know

1568

01:10:01,640 --> 01:09:57,540

personal but let's just let's just have

1569

01:10:04,190 --> 01:10:01,650

a case for instance let's say all of a

1570

01:10:05,900 --> 01:10:04,200

sudden someone is born and all of a

1571

01:10:11,150 --> 01:10:05,910

sudden they realize this person really

1572

01:10:15,530 --> 01:10:11,160

has a gift and do you think they would

1573

01:10:17,330 --> 01:10:15,540

initiate something with that person let

1574

01:10:19,130 --> 01:10:17,340

me rephrase your question a little bit

1575

01:10:21,470 --> 01:10:19,140

and it's related and I will answer that

1576

01:10:23,000 --> 01:10:21,480

witness ass and that is why did the

1577

01:10:26,710 --> 01:10:23,010

government get out of this okay yes

1578

01:10:29,150 --> 01:10:26,720

that's what I meant to say and the

1579

01:10:30,320 --> 01:10:29,160

especially one of the things we're

1580

01:10:33,730 --> 01:10:30,330

finding that we're going to be

1581

01:10:36,050 --> 01:10:33,740

publishing you know the CIA published a

1582

01:10:38,120 --> 01:10:36,060

critique called from the american

1583

01:10:39,920 --> 01:10:38,130

institutes of research saying this stuff

1584

01:10:43,460 --> 01:10:39,930

never worked as an intelligence tool

1585

01:10:47,390 --> 01:10:43,470

what was the problem of that in 1980

1586

01:10:49,760 --> 01:10:47,400

alone the CIA came back 35 separate

1587

01:10:52,340 --> 01:10:49,770

times tasking the remote viewers on

1588

01:10:54,410 --> 01:10:52,350

different paths and the way i think

1589

01:10:56,570 --> 01:10:54,420

about that is you know I really hate

1590

01:10:58,670 --> 01:10:56,580

chocolate pie I'm going to have to eat

1591

01:11:04,070 --> 01:10:58,680

15 slices just to make sure that I

1592

01:11:07,790 --> 01:11:04,080

actually ate so it was producing stuff

1593

01:11:09,560 --> 01:11:07,800

that they were pleased with one thing it

1594

01:11:12,470 --> 01:11:09,570

in the intelligence community they have

1595

01:11:14,630 --> 01:11:12,480

what are called hints ints there's faux

1596

01:11:17,300 --> 01:11:14,640

tint from photography there's SIGINT

1597

01:11:19,450 --> 01:11:17,310

from signals there is comment from

1598

01:11:22,190 --> 01:11:19,460

communications intelligence and so on

1599

01:11:23,669 --> 01:11:22,200

one type of intelligence is like the old

1600

01:11:26,310 --> 01:11:23,679

World War two spies

1601  
01:11:28,169 --> 01:11:26,320  
humans for humans are gathering

1602  
01:11:31,500 --> 01:11:28,179  
information you know behind enemy lines

1603  
01:11:34,350 --> 01:11:31,510  
and that kind of stuff our data the good

1604  
01:11:37,620 --> 01:11:34,360  
news and bad news is as good as humans

1605  
01:11:39,450 --> 01:11:37,630  
was and equally as bad hmm it's very

1606  
01:11:41,970 --> 01:11:39,460  
difficult to interpret what's going on

1607  
01:11:44,459 --> 01:11:41,980  
there but it was good enough now why did

1608  
01:11:48,149 --> 01:11:44,469  
the program shut down a number of

1609  
01:11:50,370 --> 01:11:48,159  
reasons the Cold War was over and most

1610  
01:11:52,050 --> 01:11:50,380  
of the tasking in the Cold War was

1611  
01:11:56,189 --> 01:11:52,060  
what's called strategic intelligence

1612  
01:11:58,320 --> 01:11:56,199  
here is a site in in Ukraine at

1613  
01:12:00,090 --> 01:11:58,330

Semipalatinsk and people have been

1614

01:12:02,399 --> 01:12:00,100

worrying about it for ten years what the

1615

01:12:05,040 --> 01:12:02,409

blazes is going on at this facility and

1616

01:12:07,260 --> 01:12:05,050

so that is a strategic intelligence

1617

01:12:08,910 --> 01:12:07,270

problem doesn't matter when you book you

1618

01:12:12,959 --> 01:12:08,920

try to figure out what's going on there

1619

01:12:14,550 --> 01:12:12,969

a tactical intelligence problem is where

1620

01:12:17,110 --> 01:12:14,560

Saddam Hussein going to be in the next

1621

01:12:23,630 --> 01:12:20,600

ESP frankly sucks at the second job it's

1622

01:12:26,930 --> 01:12:23,640

much better at the first job and so the

1623

01:12:30,590 --> 01:12:26,940

need for this kind of intelligence for

1624

01:12:32,780 --> 01:12:30,600

for a strategic work with and with

1625

01:12:34,610 --> 01:12:32,790

increased satellite detection and all

1626

01:12:37,430 --> 01:12:34,620

that kind of stuff the need for that

1627

01:12:40,010 --> 01:12:37,440

kind of fell away that's one possible

1628

01:12:45,950 --> 01:12:40,020

possible reasons of a shutdown another

1629

01:12:48,980 --> 01:12:45,960

possible reason is the staffer on the

1630

01:12:51,110 --> 01:12:48,990

Senate Appropriations Committee wanted

1631

01:12:55,340 --> 01:12:51,120

to force this down the throats of CIA

1632

01:12:56,990 --> 01:12:55,350

and nobody at CIA one of the program so

1633

01:13:00,230 --> 01:12:57,000

they did everything they could to shut

1634

01:13:02,570 --> 01:13:00,240

the thing down thirdly and this I think

1635

01:13:04,790 --> 01:13:02,580

is a big one we had a whole series of

1636

01:13:07,730 --> 01:13:04,800

protectors William Cohen was one of them

1637

01:13:10,430 --> 01:13:07,740

who stood between us and the people who

1638

01:13:12,830 --> 01:13:10,440

tried to shut us down and a lot of those

1639

01:13:14,600 --> 01:13:12,840

people who were committed to the

1640

01:13:17,930 --> 01:13:14,610

existence of this phenomena and its

1641

01:13:19,730 --> 01:13:17,940

usefulness have somewhat gone away and

1642

01:13:22,460 --> 01:13:19,740

give you an example of that Joe

1643

01:13:25,190 --> 01:13:22,470

mcmoneagle and I spent a decade a whole

1644

01:13:28,940 --> 01:13:25,200

decade below the radar trying to get

1645

01:13:31,310 --> 01:13:28,950

something started and because in Intel's

1646

01:13:32,690 --> 01:13:31,320

for counterterrorism it's a great thing

1647

01:13:34,730 --> 01:13:32,700

it would be wonderful

1648

01:13:37,160 --> 01:13:34,740

I hope I'm running both they're using it

1649

01:13:40,070 --> 01:13:37,170

now I don't think they are and my

1650

01:13:42,260 --> 01:13:40,080

argument for that is that we found that

1651

01:13:43,700 --> 01:13:42,270

the working stiff the people who are

1652

01:13:46,460 --> 01:13:43,710

going to be doing the data and the

1653

01:13:50,030 --> 01:13:46,470

analysis loved what we had to do because

1654

01:13:51,440 --> 01:13:50,040

it was cheating you know but every time

1655

01:13:56,390 --> 01:13:51,450

they took they wanted to give a small

1656

01:13:58,070 --> 01:13:56,400

program going they decided that it got

1657

01:14:00,740 --> 01:13:58,080

killed with the management room you know

1658

01:14:02,300 --> 01:14:00,750

upper level officers in the life is of

1659

01:14:06,350 --> 01:14:02,310

no way you know we don't want to get

1660

01:14:10,970 --> 01:14:06,360

caught doing this stuff yeah did I'm to

1661

01:14:13,490 --> 01:14:10,980

have people speculated on how this

1662

01:14:17,660 --> 01:14:13,500

worked in the first place

1663

01:14:20,150 --> 01:14:17,670

like and what and what I see you shaking

1664

01:14:24,920 --> 01:14:20,160

your head yes and what uh what did they

1665

01:14:26,750 --> 01:14:24,930

come up with well there as I said coggan

1666

01:14:28,360 --> 01:14:26,760

father was a electromagnetic and we

1667

01:14:31,590 --> 01:14:28,370

tested that

1668

01:14:34,570 --> 01:14:31,600

we have what's actually surprised me

1669

01:14:38,860 --> 01:14:34,580

what surprised me was we have some memos

1670

01:14:40,090 --> 01:14:38,870

from the CIA even in 1973 outlining what

1671

01:14:42,630 --> 01:14:40,100

they thought would be an appropriate

1672

01:14:45,250 --> 01:14:42,640

research program that was

1673

01:14:47,890 --> 01:14:45,260

psychophysiology what is going to honor

1674

01:14:50,470 --> 01:14:47,900

the brain can we just you know without

1675

01:14:52,030 --> 01:14:50,480

you know with high ethics take

1676

01:14:55,030 --> 01:14:52,040

somebody's brain apart if you will my

1677

01:14:57,310 --> 01:14:55,040

imagery to try to find out what is what

1678

01:15:00,430 --> 01:14:57,320

makes a psychic tick to be blunt about

1679

01:15:02,410 --> 01:15:00,440

it they wanted to know what were the

1680

01:15:04,120 --> 01:15:02,420

target properties what makes a good

1681

01:15:05,680 --> 01:15:04,130

remote viewing target what and what

1682

01:15:07,330 --> 01:15:05,690

shouldn't you waste your time on for

1683

01:15:09,400 --> 01:15:07,340

example if you have satellites that are

1684

01:15:11,080 --> 01:15:09,410

looking at the visible spectrum you

1685

01:15:14,440 --> 01:15:11,090

don't want to send that satellite

1686

01:15:17,170 --> 01:15:14,450

looking for infrared it will work so

1687

01:15:19,330 --> 01:15:17,180

they wanted to know what what would lend

1688

01:15:21,430 --> 01:15:19,340

itself to this kind of new collection

1689

01:15:23,830 --> 01:15:21,440

asset this new collection technique and

1690

01:15:27,670 --> 01:15:23,840

we have a lot we learned a lot about

1691

01:15:29,140 --> 01:15:27,680

that actually and I'll say it crudely if

1692

01:15:31,060 --> 01:15:29,150

you're searching for something you're

1693

01:15:33,940 --> 01:15:31,070

more likely to find it that something is

1694

01:15:36,100 --> 01:15:33,950

radioactive than if it's cocaine mm-hmm

1695

01:15:38,230 --> 01:15:36,110

and there's a good reason for that

1696

01:15:40,030 --> 01:15:38,240

involving changes of entropy and a whole

1697

01:15:43,720 --> 01:15:40,040

lot of stuff which I'm not to vomiting

1698

01:15:45,880 --> 01:15:43,730

well your listeners asleep but we did

1699

01:15:48,220 --> 01:15:45,890

find some qualities that would tell us

1700

01:15:49,930 --> 01:15:48,230

tasks your remote viewers on this kind

1701

01:15:52,570 --> 01:15:49,940

of a problem rather than this kind of

1702

01:15:56,650 --> 01:15:52,580

bubble hmm Wow

1703

01:15:58,270 --> 01:15:56,660

now there's up you know some people I

1704

01:16:00,430 --> 01:15:58,280

don't know if this is true or not but

1705

01:16:03,640 --> 01:16:00,440

they say everything is connected in one

1706

01:16:06,910 --> 01:16:03,650

way or another you know energy and all

1707

01:16:11,020 --> 01:16:06,920

that and then you get all the way down

1708

01:16:19,090 --> 01:16:11,030

to how they can explain the quantum

1709

01:16:20,940 --> 01:16:19,100

entanglement type of thing um so you

1710

01:16:25,690 --> 01:16:20,950

have another hour Hank and I are

1711

01:16:27,550 --> 01:16:25,700

screaming jumping up and down so I'm not

1712

01:16:30,370 --> 01:16:27,560

alright so you don't think it has

1713

01:16:33,970 --> 01:16:30,380

anything to do with any type of quantum

1714

01:16:36,580 --> 01:16:33,980

or unseen pranic absolutely not let me

1715

01:16:39,490 --> 01:16:36,590

know Peggy why first off I have the bona

1716

01:16:41,440 --> 01:16:39,500

things there is no one with one

1717

01:16:43,330 --> 01:16:41,450

exception of the theorists nope

1718

01:16:45,340 --> 01:16:43,340

lawyer by the name of Brian Josephson a

1719

01:16:46,810 --> 01:16:45,350

good friend and a very smart smart

1720

01:16:49,660 --> 01:16:46,820

fellow he disagrees with me

1721

01:16:52,680 --> 01:16:49,670

but i he's not an experimentalist I

1722

01:16:55,180 --> 01:16:52,690

spent 12 years doing nuclear physics

1723

01:16:57,520 --> 01:16:55,190

experiments where I have to live in

1724

01:17:00,370 --> 01:16:57,530

midst of quantum theory and how I'll

1725

01:17:02,530 --> 01:17:00,380

interpret all this and quantum 101 in

1726

01:17:04,120 --> 01:17:02,540

college and graduate school I've had

1727

01:17:07,510 --> 01:17:04,130

lots and lots and lots of money visit

1728

01:17:09,760 --> 01:17:07,520

alright there are those that would hold

1729

01:17:11,470 --> 01:17:09,770

that the brain is the quant is the

1730

01:17:13,510 --> 01:17:11,480

large-scale quantum mechanical thing

1731

01:17:15,220 --> 01:17:13,520

first of all fun level it is because

1732

01:17:17,080 --> 01:17:15,230

quantum mechanics describes how atoms

1733

01:17:19,480 --> 01:17:17,090

interact with each other right in a

1734

01:17:20,980 --> 01:17:19,490

brain at least some some people I know

1735

01:17:22,510 --> 01:17:20,990

their atoms are interacting in their

1736

01:17:25,840 --> 01:17:22,520

brain and they call it thought about

1737

01:17:30,310 --> 01:17:25,850

that but there have been calculations

1738

01:17:32,680 --> 01:17:30,320

and experiments that show that the brain

1739

01:17:34,900 --> 01:17:32,690

does not act like a giant like a giant

1740

01:17:37,450 --> 01:17:34,910

electron and have a wave function that

1741

01:17:39,580 --> 01:17:37,460

can reach across time in quantum

1742

01:17:43,110 --> 01:17:39,590

interconnectedness and and oneness

1743

01:17:45,340 --> 01:17:43,120

across the planet sorry the amount of

1744

01:17:47,890 --> 01:17:45,350

probability waves in quantum theory

1745

01:17:50,020 --> 01:17:47,900

coming from the brain doesn't get even

1746

01:17:52,600 --> 01:17:50,030

through the skull but across and let

1747

01:17:55,000 --> 01:17:52,610

across the planet it just doesn't end

1748

01:17:58,030 --> 01:17:55,010

that's not just philosophy on my part

1749

01:18:00,760 --> 01:17:58,040

that's hard measurements of ATP 80 years

1750

01:18:03,070 --> 01:18:00,770

of looking exactly what constitutes a

1751

01:18:05,400 --> 01:18:03,080

large-scale quantum device as opposed to

1752

01:18:07,420 --> 01:18:05,410

a small and then give you an example

1753

01:18:10,480 --> 01:18:07,430

physicists like to compete with each

1754

01:18:13,630 --> 01:18:10,490

other who can make the largest chunk act

1755

01:18:15,540 --> 01:18:13,640

like a single quantum thing and the

1756

01:18:19,570 --> 01:18:15,550

record is at least a couple years ago

1757

01:18:23,740 --> 01:18:19,580

was 500,000 rubidium atoms rubidium as

1758

01:18:25,840 --> 01:18:23,750

an element 500,000 of them is too small

1759

01:18:27,850 --> 01:18:25,850

respect to see without an unaided eye

1760

01:18:30,730 --> 01:18:27,860

the electron microscope little tiny

1761

01:18:32,650 --> 01:18:30,740

speck and sure enough for me it acts

1762

01:18:34,410 --> 01:18:32,660

like a quantum a collective quantum

1763

01:18:38,440 --> 01:18:34,420

thing that's the good news

1764

01:18:40,630 --> 01:18:38,450

but it does so at millionths of a degree

1765

01:18:43,660 --> 01:18:40,640

above absolute zero and temperature mean

1766

01:18:45,880 --> 01:18:43,670

and as soon as you raise it a little bit

1767

01:18:47,980 --> 01:18:45,890

to maybe a million for the degree above

1768

01:18:49,900 --> 01:18:47,990

absolute zero it quits acting like a

1769

01:18:52,570 --> 01:18:49,910

quantum device now you're going to tell

1770

01:18:53,700 --> 01:18:52,580

me a brain 300 degrees above absolute

1771

01:18:57,510 --> 01:18:53,710

zero

1772

01:19:00,450 --> 01:18:57,520

is going to act like a quantum device

1773

01:19:02,310 --> 01:19:00,460

sorry so what is the argument you

1774

01:19:04,740 --> 01:19:02,320

mentioned your colleague or that you

1775

01:19:06,360 --> 01:19:04,750

said was very smart that believes that

1776

01:19:08,729 --> 01:19:06,370

it's possible

1777

01:19:12,270 --> 01:19:08,739

what is his theory on that what does his

1778

01:19:16,530 --> 01:19:12,280

take his name is Brian Johnson

1779

01:19:17,790 --> 01:19:16,540

Nobel or he won the prize for developing

1780

01:19:20,640 --> 01:19:17,800

what is now called the Josephson

1781

01:19:23,760 --> 01:19:20,650

Junction very nice fellow very he works

1782

01:19:25,590 --> 01:19:23,770

at Cambridge he's invited we argue with

1783

01:19:28,020 --> 01:19:25,600

each other online a lot it cost me a

1784

01:19:29,550 --> 01:19:28,030

coherence junkie so he invited me to

1785

01:19:31,650 --> 01:19:29,560

give a talk at Cambridge and I went

1786

01:19:34,560 --> 01:19:31,660

there and I said my title was the

1787

01:19:40,590 --> 01:19:34,570

confessions of a coherence junkie ha ha

1788

01:19:43,250 --> 01:19:40,600

and what they what he thinks is and he

1789

01:19:46,470 --> 01:19:43,260

has an attitude he's a very serious

1790

01:19:47,100 --> 01:19:46,480

transcendental follower Transcendental

1791

01:19:48,900 --> 01:19:47,110

Meditation

1792

01:19:50,610 --> 01:19:48,910

and I'm not on his case about that I

1793

01:19:53,280 --> 01:19:50,620

think it's cause I spend a lot of time

1794

01:19:54,510 --> 01:19:53,290

to give you myself and that kind of

1795

01:19:56,640 --> 01:19:54,520

experience that people have in

1796

01:19:58,920 --> 01:19:56,650

meditation and he is trying desperately

1797

01:20:02,070 --> 01:19:58,930

to put in some testable ideas

1798

01:20:06,300 --> 01:20:02,080

theoretically to do that the problem is

1799

01:20:09,090 --> 01:20:06,310

that the only day of the people that

1800

01:20:11,750 --> 01:20:09,100

hold the idea that consciousness is not

1801  
01:20:13,950 --> 01:20:11,760  
located in the brains extending outward

1802  
01:20:19,530 --> 01:20:13,960  
the only data they have is

1803  
01:20:21,479 --> 01:20:19,540  
parapsychology now I'm happy if if the

1804  
01:20:24,090 --> 01:20:21,489  
other side of that argument that is

1805  
01:20:27,600 --> 01:20:24,100  
materialism know that it's neurons of

1806  
01:20:29,700 --> 01:20:27,610  
the brain when that begins to fail I'll

1807  
01:20:33,450 --> 01:20:29,710  
start paying attention else here but at

1808  
01:20:36,090 --> 01:20:33,460  
the moment as you have to bail Wow

1809  
01:20:38,040 --> 01:20:36,100  
it's interesting philosophy is damned

1810  
01:20:40,140 --> 01:20:38,050  
interesting philosophy I'm not you know

1811  
01:20:44,190 --> 01:20:40,150  
I don't call them horrible stupid people

1812  
01:20:47,370 --> 01:20:44,200  
like they sometimes refer to us but but

1813  
01:20:50,340 --> 01:20:47,380

you know it's a fact I was giving a talk

1814

01:20:52,380 --> 01:20:50,350

at in India once at the Ramakrishna

1815

01:20:54,570 --> 01:20:52,390

mission Institute of culture you call

1816

01:20:58,680 --> 01:20:54,580

cut a very famous place and I was the

1817

01:21:01,979 --> 01:20:58,690

resident materialist invited and what

1818

01:21:04,380 --> 01:21:01,989

was fascinating about that is that one

1819

01:21:06,840 --> 01:21:04,390

of the Ramakrishna mission monks and I

1820

01:21:09,060 --> 01:21:06,850

got on really well together

1821

01:21:11,730 --> 01:21:09,070

and I said look I'd like your philosophy

1822

01:21:12,870 --> 01:21:11,740

of transcendence and survival of bodily

1823

01:21:15,030 --> 01:21:12,880

death that's a much more interesting

1824

01:21:16,860 --> 01:21:15,040

philosophy than mine is which when I

1825

01:21:19,020 --> 01:21:16,870

take my last breath that's the end of it

1826

01:21:21,150 --> 01:21:19,030

I said I hope you're right so why don't

1827

01:21:23,490 --> 01:21:21,160

we try to work together to try to come

1828

01:21:26,250 --> 01:21:23,500

up with some way you have to get beyond

1829

01:21:28,320 --> 01:21:26,260

the literature 3,000 years ago

1830

01:21:30,120 --> 01:21:28,330

you have to know they didn't know about

1831

01:21:31,530 --> 01:21:30,130

genetics they didn't know about neurons

1832

01:21:32,970 --> 01:21:31,540

they didn't know about they didn't know

1833

01:21:35,700 --> 01:21:32,980

about a whole bunch of stuff which we

1834

01:21:39,090 --> 01:21:35,710

now know about can we find some

1835

01:21:41,340 --> 01:21:39,100

experiment that will support that your

1836

01:21:43,710 --> 01:21:41,350

philosophical outlook and reject mine

1837

01:21:45,720 --> 01:21:43,720

and we are still in dialogue about that

1838

01:21:48,600 --> 01:21:45,730

if you have come oh yes Dylan dialog

1839

01:21:51,740 --> 01:21:48,610

loaded now what about head jerk the

1840

01:21:55,650 --> 01:21:51,750

group ever tried the sensory deprivation

1841

01:21:56,880 --> 01:21:55,660

tanks is that anything you've ever tried

1842

01:22:01,110 --> 01:21:56,890

you know what I mean where you float in

1843

01:22:03,360 --> 01:22:01,120

the Saline yeah sure the ganzfeld

1844

01:22:04,980 --> 01:22:03,370

procedure which is a cheaper way of

1845

01:22:06,800 --> 01:22:04,990

doing something like that puts people in

1846

01:22:10,350 --> 01:22:06,810

a mound or tree state of consciousness

1847

01:22:12,870 --> 01:22:10,360

the closest we ever came to that when

1848

01:22:15,060 --> 01:22:12,880

England was working with we had a remote

1849

01:22:18,540 --> 01:22:15,070

viewing room in our laboratory which was

1850

01:22:20,400 --> 01:22:18,550

painted like gunmetal gray with very

1851

01:22:22,170 --> 01:22:20,410

small lighting and if everything was

1852

01:22:24,360 --> 01:22:22,180

gray there was no artwork on the walls

1853

01:22:27,330 --> 01:22:24,370

and nothing it was kind of a featureless

1854

01:22:28,830 --> 01:22:27,340

room in which to do the work and we've

1855

01:22:30,660 --> 01:22:28,840

done work on altered states of

1856

01:22:33,450 --> 01:22:30,670

consciousness with regard to hypnosis

1857

01:22:34,980 --> 01:22:33,460

and lucid dreaming neither of those

1858

01:22:37,590 --> 01:22:34,990

enhanced remote viewing

1859

01:22:40,350 --> 01:22:37,600

neither of them Wow how about that now

1860

01:22:42,510 --> 01:22:40,360

where does a you mentioned something

1861

01:22:47,520 --> 01:22:42,520

about someone could Remote View

1862

01:22:50,850 --> 01:22:47,530

something like a day in advance so is

1863

01:22:53,460 --> 01:22:50,860

there any type of connection to possible

1864

01:22:56,040 --> 01:22:53,470

time travel of thoughts or something how

1865

01:23:00,960 --> 01:22:56,050

does it how would that how does that

1866

01:23:02,880 --> 01:23:00,970

work well until one this two volumes set

1867

01:23:06,330 --> 01:23:02,890

we have a philosopher mainstream

1868

01:23:07,950 --> 01:23:06,340

philosopher from Australia who addressed

1869

01:23:10,020 --> 01:23:07,960

the question because most people think

1870

01:23:12,450 --> 01:23:10,030

precognition violates causality

1871

01:23:16,260 --> 01:23:12,460

causality means I've got this battery

1872

01:23:18,799 --> 01:23:16,270

and it will won't fall into my hand

1873

01:23:22,250 --> 01:23:18,809

unless until I open my fingers right

1874

01:23:23,930 --> 01:23:22,260

so how can it fall before I open like my

1875

01:23:25,819 --> 01:23:23,940

fingers that violates the causal

1876

01:23:28,370 --> 01:23:25,829

relationship between opening my fingers

1877

01:23:30,229 --> 01:23:28,380

of this battery falling and so I thought

1878

01:23:32,600 --> 01:23:30,239

for a long period of time one big

1879

01:23:35,569 --> 01:23:32,610

problem we have about precognition is it

1880

01:23:38,899 --> 01:23:35,579

appeared turns out to be incorrect that

1881

01:23:42,319 --> 01:23:38,909

it violates causality and what this guy

1882

01:23:44,479 --> 01:23:42,329

did Richard Richard Cory's his name was

1883

01:23:47,750 --> 01:23:44,489

able to demonstrate philosophically how

1884

01:23:50,060 --> 01:23:47,760

it does not violate causality now that

1885

01:23:52,189 --> 01:23:50,070

gets really interesting because what it

1886

01:23:53,720 --> 01:23:52,199

says is you know all those science

1887

01:23:56,390 --> 01:23:53,730

fiction programs which are a lot of fun

1888

01:23:58,720 --> 01:23:56,400

if you can see the future are you

1889

01:24:01,879 --> 01:23:58,730

condemned to experience that future is

1890

01:24:04,459 --> 01:24:01,889

it is it absolutely guaranteed

1891

01:24:06,919 --> 01:24:04,469

you know deterministically so that you

1892

01:24:10,970 --> 01:24:06,929

cannot avoid it in fact Sandra Bullock

1893

01:24:14,089 --> 01:24:10,980

I've acted in a film called premonitions

1894

01:24:15,919 --> 01:24:14,099

and she had this premonition that her

1895

01:24:17,839 --> 01:24:15,929

husband was going to get killed and she

1896

01:24:19,370 --> 01:24:17,849

and she did everything to prevent that

1897

01:24:21,830 --> 01:24:19,380

to happen but at the end of the day

1898

01:24:24,859 --> 01:24:21,840

nature conspired against her and her

1899

01:24:27,549 --> 01:24:24,869

husband until unfortunately Joe make

1900

01:24:30,109 --> 01:24:27,559

monocle and I did a real premonitions

1901

01:24:32,330 --> 01:24:30,119

set on the media this is one of those my

1902

01:24:34,100 --> 01:24:32,340

fishing about the media they didn't tell

1903

01:24:38,450 --> 01:24:34,110

us that they wanted to be an extra on

1904

01:24:39,680 --> 01:24:38,460

the DVD of that movie we could show real

1905

01:24:43,549 --> 01:24:39,690

print cognition under laboratory

1906

01:24:47,209 --> 01:24:43,559

conditions but our data shows that you

1907

01:24:50,779 --> 01:24:47,219

can have access to alternative futures

1908

01:24:52,250 --> 01:24:50,789

those that don't come come to the past

1909

01:24:54,470 --> 01:24:52,260

let me explain how that happens it's

1910

01:24:57,049 --> 01:24:54,480

really easy to understand it imagine a

1911

01:25:00,260 --> 01:24:57,059

six-sided die has six phases right 1 2 3

1912

01:25:02,930 --> 01:25:00,270

4 5 6 imagine the following very boring

1913

01:25:05,089 --> 01:25:02,940

cakes that met that where the computer

1914

01:25:07,549 --> 01:25:05,099

died you know it's not in real diet you

1915

01:25:09,350 --> 01:25:07,559

you say ok what we'd like you to do is

1916

01:25:11,600 --> 01:25:09,360

to press a number 1 through 6 on the

1917

01:25:13,879 --> 01:25:11,610

keyboard and after you press the number

1918

01:25:16,220 --> 01:25:13,889

the computer will randomly toss this

1919

01:25:18,379 --> 01:25:16,230

random kind of this real fair guy and

1920

01:25:21,109 --> 01:25:18,389

show you a face almost cream so you

1921

01:25:22,970 --> 01:25:21,119

print you pissed press number 3 and 6

1922

01:25:25,189 --> 01:25:22,980

comes up units you press number 4 and a

1923

01:25:28,490 --> 01:25:25,199

4 comes up it's a direct hit but we

1924

01:25:31,160 --> 01:25:28,500

fooled you half the time when you

1925

01:25:32,050 --> 01:25:31,170

pressed number 4 we rolled the dice

1926

01:25:33,430 --> 01:25:32,060

twice

1927

01:25:36,220 --> 01:25:33,440

it happened so fast you don't notice

1928

01:25:38,650 --> 01:25:36,230

that delayed that suppose you press

1929

01:25:40,240 --> 01:25:38,660

number four and it rolls of ice and it

1930

01:25:43,330 --> 01:25:40,250

comes up some number let's say through

1931

01:25:45,580 --> 01:25:43,340

we then biased to that die for the next

1932

01:25:47,050 --> 01:25:45,590

throw so that number three on a fifty

1933

01:25:49,030 --> 01:25:47,060

percent chance of coming up and the

1934

01:25:51,610 --> 01:25:49,040

other faces have a 10 percent chance and

1935

01:25:54,100 --> 01:25:51,620

then roll that die display for you now

1936

01:25:57,220 --> 01:25:54,110

the interesting question is could you

1937

01:25:59,170 --> 01:25:57,230

well under those cases for the most

1938

01:26:00,310 --> 01:25:59,180

likely future in other words the one

1939

01:26:03,910 --> 01:26:00,320

that was going to come up fifty percent

1940

01:26:06,160 --> 01:26:03,920

of the time but didn't what did you

1941

01:26:08,710 --> 01:26:06,170

guess the face that came up or the face

1942

01:26:11,440 --> 01:26:08,720

that should have come up it didn't that

1943

01:26:13,480 --> 01:26:11,450

answered that question directly are you

1944

01:26:16,330 --> 01:26:13,490

condemned to see that the only future

1945

01:26:18,820 --> 01:26:16,340

that happens the answer is no you can

1946

01:26:21,730 --> 01:26:18,830

you track the most probable future

1947

01:26:23,410 --> 01:26:21,740

whether it comes up or not if so if you

1948

01:26:25,150 --> 01:26:23,420

have a second tree we can get by a hit

1949

01:26:27,850 --> 01:26:25,160

by a truck on the way to work stay in

1950

01:26:32,560 --> 01:26:27,860

bed you'll be fine that's good to know

1951

01:26:34,840 --> 01:26:32,570

now it is yeah episode has somebody paid

1952

01:26:39,270 --> 01:26:34,850

me to do this heavy duty philosophical

1953

01:26:44,200 --> 01:26:39,280

experiment wow what a drawing right so a

1954

01:26:48,370 --> 01:26:44,210

1985 it closed and computers Oh eyes are

1955

01:26:50,440 --> 01:26:48,380

in 1995 ok so you are in with computers

1956

01:26:52,810 --> 01:26:50,450

I was just going to ask you what what

1957

01:26:59,800 --> 01:26:52,820

and I heard you mentioned a couple of

1958

01:27:01,420 --> 01:26:59,810

programs so what part of your job was

1959

01:27:04,780 --> 01:27:01,430

involved in computers and do you think

1960

01:27:06,820 --> 01:27:04,790

today with the advanced you know

1961

01:27:07,930 --> 01:27:06,830

technology things would be different

1962

01:27:12,250 --> 01:27:07,940

you'd be able to do different

1963

01:27:15,730 --> 01:27:12,260

experiments very much so um in fact now

1964

01:27:18,340 --> 01:27:15,740

I have an entire self-contained credible

1965

01:27:20,500 --> 01:27:18,350

good remote viewing program that I can

1966

01:27:22,870 --> 01:27:20,510

send around the people to do really

1967

01:27:25,990 --> 01:27:22,880

really am and it's all through

1968

01:27:29,920 --> 01:27:26,000

algorithms and things like that or yeah

1969

01:27:32,620 --> 01:27:29,930

yes there's let me describe a little

1970

01:27:36,010 --> 01:27:32,630

geeky here a something called a

1971

01:27:38,980 --> 01:27:36,020

mathematical set if I can thank you tell

1972

01:27:42,720 --> 01:27:38,990

me the set of cities that have a million

1973

01:27:45,909 --> 01:27:42,730

population or more you say okay la

1974

01:27:48,850 --> 01:27:45,919

Chicago and so on you could give us

1975

01:27:51,549 --> 01:27:48,860

named bunch of cities the problem is

1976

01:27:53,859 --> 01:27:51,559

what happens if you have a C that is one

1977

01:27:55,149 --> 01:27:53,869

person short of the million it doesn't

1978

01:27:56,949 --> 01:27:55,159

fit that set

1979

01:28:00,279 --> 01:27:56,959

it's called a crisp set the engines are

1980

01:28:03,009 --> 01:28:00,289

really hard but somebody at Berkeley got

1981

01:28:05,229 --> 01:28:03,019

means on the pick in the 70s invented

1982

01:28:07,870 --> 01:28:05,239

something similar called a fuzzy set

1983

01:28:10,029 --> 01:28:07,880

where now you can ask a really difficult

1984

01:28:12,399 --> 01:28:10,039

question give me the list of cities that

1985

01:28:14,020 --> 01:28:12,409

are kind of big you say well what do you

1986

01:28:17,229 --> 01:28:14,030

mean by kind of bigness I don't know you

1987

01:28:20,049 --> 01:28:17,239

can indent that term and fuzzy sets are

1988

01:28:21,459 --> 01:28:20,059

in television and fuzzy sets are used by

1989

01:28:23,560 --> 01:28:21,469

Google to show you about what

1990

01:28:28,209 --> 01:28:23,570

advertisements you should see on your

1991

01:28:29,979 --> 01:28:28,219

Google machine and so on okay well a way

1992

01:28:32,919 --> 01:28:29,989

and think about fuzzy sets it's a

1993

01:28:35,739 --> 01:28:32,929

quantitative way of describing the

1994

01:28:38,489 --> 01:28:35,749

ambiguous and I thought what is more

1995

01:28:41,469 --> 01:28:38,499

vigorous that we're both doing so I I

1996

01:28:44,139 --> 01:28:41,479

incorporated fuzzy sets into the remote

1997

01:28:46,689 --> 01:28:44,149

viewing process automatic judging and it

1998

01:28:48,189 --> 01:28:46,699

works like gangbusters it's really good

1999

01:28:51,040 --> 01:28:48,199

wow that's amazing

2000

01:28:51,850 --> 01:28:51,050

amazing so um this is going to be it for

2001

01:28:54,520 --> 01:28:51,860

the show tonight

2002

01:28:56,350 --> 01:28:54,530

I want to thank you so much and can you

2003

01:28:58,629 --> 01:28:56,360

tell the listening audience where they

2004

01:29:02,049 --> 01:28:58,639

can find these books once are published

2005

01:29:07,859 --> 01:29:02,059

you said on Amazon but yeah if you go to

2006

01:29:10,330 --> 01:29:07,869

my full name and when WI n C period ma Y

2007

01:29:12,699 --> 01:29:10,340

you'll find four or five books up there

2008

01:29:16,569 --> 01:29:12,709

listing and and most of them are pretty

2009

01:29:19,569 --> 01:29:16,579

geeky but ESP Wars Eastern West which

2010

01:29:23,620 --> 01:29:19,579

looks like this it's available on Amazon

2011

01:29:25,719 --> 01:29:23,630

Kindle for a good price this book is fun

2012

01:29:28,839 --> 01:29:25,729

because it has some very funny anecdotes

2013

01:29:30,520 --> 01:29:28,849

in it and it's it's a fun read the rest

2014

01:29:32,199 --> 01:29:30,530

of them are are interesting if you're

2015

01:29:34,419 --> 01:29:32,209

interested in the geek you saw excellent

2016

01:29:35,919 --> 01:29:34,429

all right hey well thank you so much

2017

01:29:38,979 --> 01:29:35,929

it's it's really been a real pleasure

2018

01:29:40,479 --> 01:29:38,989

I've really really enjoyed tonight now

2019

01:29:42,609 --> 01:29:40,489

me to learn and I very much appreciate

2020

01:29:43,929 --> 01:29:42,619

the questions you have asked and any

2021

01:29:46,540 --> 01:29:43,939

time you want to come back and make up

2022

01:29:49,569 --> 01:29:46,550

some new stuff excellent all right will

2023

01:29:52,989 --> 01:29:49,579

you take care all right Kara thank you

2024

01:29:55,509 --> 01:29:52,999

hi alright everyone so that's it for our

2025

01:29:58,509 --> 01:29:55,519

show I hope you enjoyed it I really did

2026

01:29:59,680 --> 01:29:58,519

enjoy it quite a bit myself and we're

2027

01:30:01,240 --> 01:29:59,690

going to be up in just a couple

2028

01:30:04,540 --> 01:30:01,250

days on Monday we're going to be back

2029

01:30:07,870 --> 01:30:04,550

here and we have a excellent guest

2030

01:30:11,830 --> 01:30:07,880

coming up Monday it's John Kiriakou now

2031

01:30:16,990 --> 01:30:11,840

he is a former CIA he's the only one

2032

01:30:19,870 --> 01:30:17,000

that went to prison for for torture he

2033

01:30:21,940 --> 01:30:19,880

did not torture people but what he did

2034

01:30:24,970 --> 01:30:21,950

was he was a whistleblower he's got a

2035

01:30:27,460 --> 01:30:24,980

fascinating story and so that will be

2036

01:30:29,290 --> 01:30:27,470

here Monday I believe it's 8 o'clock and

2037

01:30:31,420 --> 01:30:29,300

hope to see you then

2038

01:30:35,500 --> 01:30:31,430

all right so this is Martin Willis and

2039

01:30:44,980 --> 01:30:43,060

[Music]
