

Robert Powell

1
00:00:07,369 --> 00:00:05,090
maybe that's why try yeah well we can

2
00:00:09,620 --> 00:00:07,379
just keep going this way if you'd like

3
00:00:12,200 --> 00:00:09,630
it is this phone okay with you and are

4
00:00:12,950 --> 00:00:12,210
you comfortable yeah yeah this is fine

5
00:00:15,950 --> 00:00:12,960
all right

6
00:00:17,420 --> 00:00:15,960
and okay and again for the live listener

7
00:00:18,740 --> 00:00:17,430
that's been hanging in there thanks so

8
00:00:24,939 --> 00:00:18,750
much it looks like I have to do a little

9
00:00:28,490 --> 00:00:24,949
bit of editing I just saw your text so

10
00:00:31,330 --> 00:00:28,500
Robert so can you tell the first-time

11
00:00:33,410 --> 00:00:31,340
listener a little bit about yourself

12
00:00:37,400 --> 00:00:33,420
sure

13
00:00:40,760 --> 00:00:37,410

I live in Austin Texas

14

00:00:43,639 --> 00:00:40,770

my degree is in chemistry and I spent

15

00:00:45,709 --> 00:00:43,649

most of my career the last 30 years in

16

00:00:49,010 --> 00:00:45,719

the semiconductor field I was an

17

00:00:52,069 --> 00:00:49,020

engineering manager I worked on flash

18

00:00:54,229 --> 00:00:52,079

memory chips on microprocessor chips and

19

00:00:57,400 --> 00:00:54,239

I also managed a state-of-the-art

20

00:00:59,599 --> 00:00:57,410

chemistry laboratory as well as a

21

00:01:03,820 --> 00:00:59,609

state-of-the-art research and

22

00:01:08,840 --> 00:01:03,830

development laboratory I retired early

23

00:01:11,420 --> 00:01:08,850

when I was in my 50s and I went ahead

24

00:01:13,730 --> 00:01:11,430

and started doing the things I really

25

00:01:17,149 --> 00:01:13,740

enjoyed doing one of which was to

26
00:01:20,530 --> 00:01:17,159
investigate the UFO phenomena so I've

27
00:01:23,240 --> 00:01:20,540
spent the last 10 years actually

28
00:01:26,330 --> 00:01:23,250
probably putting in 15 to 20 hours a

29
00:01:30,410 --> 00:01:26,340
week on that just like it was a job well

30
00:01:34,569 --> 00:01:30,420
and I became the director of research at

31
00:01:37,039 --> 00:01:34,579
MUFON and done a lot of interesting

32
00:01:39,830 --> 00:01:37,049
investigations in addition to talk to

33
00:01:43,580 --> 00:01:39,840
personally interviewing probably over a

34
00:01:47,450 --> 00:01:43,590
hundred and fifty people I've I did the

35
00:01:54,080 --> 00:01:47,460
Stephenville lights investigation back

36
00:01:57,020 --> 00:01:54,090
in 2008 and then recently I did a detail

37
00:01:59,480 --> 00:01:57,030
investigation on our deal agua dia which

38
00:02:01,910 --> 00:01:59,490

was IR video that occurred in Puerto

39

00:02:07,850 --> 00:02:01,920

Rico right I thought we could talk a

40

00:02:10,070 --> 00:02:07,860

little bit about that as well you know

41

00:02:13,620 --> 00:02:10,080

along with this new group that you have

42

00:02:16,770 --> 00:02:13,630

started but

43

00:02:19,320 --> 00:02:16,780

one in particular was there ever any

44

00:02:21,180 --> 00:02:19,330

consensus about what that I know people

45

00:02:23,160 --> 00:02:21,190

were saying it was a balloon you know

46

00:02:26,010 --> 00:02:23,170

you heard everything but was there ever

47

00:02:30,390 --> 00:02:26,020

any consensus of what that may end up

48

00:02:32,250 --> 00:02:30,400

being or is that still an unknown it's

49

00:02:34,560 --> 00:02:32,260

still an unknown

50

00:02:38,130 --> 00:02:34,570

you know people that banned various

51
00:02:40,290 --> 00:02:38,140
theories right such as a balloon I think

52
00:02:43,230 --> 00:02:40,300
I think that's the better theory would

53
00:02:45,060 --> 00:02:43,240
be some type of advanced drone but

54
00:02:49,140 --> 00:02:45,070
there's a few problems with that theory

55
00:02:50,940 --> 00:02:49,150
right when it goes into the water art

56
00:02:53,210 --> 00:02:50,950
when it goes into the water that's a

57
00:02:56,100 --> 00:02:53,220
little tough for a drone these days

58
00:02:58,050 --> 00:02:56,110
right that but what really makes it

59
00:03:00,630 --> 00:02:58,060
difficult is for a drone to come out of

60
00:03:02,730 --> 00:03:00,640
the water at high speed yeah they

61
00:03:06,120 --> 00:03:02,740
actually we research that and there are

62
00:03:08,970 --> 00:03:06,130
some drones that can enter the water and

63
00:03:12,000 --> 00:03:08,980

move through the water it it a good good

64

00:03:15,420 --> 00:03:12,010

speed right from camp can they do that

65

00:03:19,080 --> 00:03:15,430

right from the air or or do they have

66

00:03:21,900 --> 00:03:19,090

yeah really yeah mowing actually depends

67

00:03:25,200 --> 00:03:21,910

developed a drum flies like an airplane

68

00:03:27,330 --> 00:03:25,210

and then it blows its wings off right

69

00:03:29,100 --> 00:03:27,340

before it impacts the water and then it

70

00:03:33,360 --> 00:03:29,110

goes into the water like a torpedo and

71

00:03:37,140 --> 00:03:33,370

then it maintains you know fairly I've

72

00:03:39,210 --> 00:03:37,150

lost the underwater the the problem is

73

00:03:41,760 --> 00:03:39,220

though that that drone can't come back

74

00:03:45,330 --> 00:03:41,770

out of the water yeah and that's what

75

00:03:48,300 --> 00:03:45,340

happens on the video you know it were

76

00:03:50,580 --> 00:03:48,310

look that we looked at you know some

77

00:03:54,240 --> 00:03:50,590

people argue that well maybe it didn't

78

00:03:57,990 --> 00:03:54,250

really go in the water but they have yet

79

00:04:02,700 --> 00:03:58,000

could advance a strong argument as to

80

00:04:05,040 --> 00:04:02,710

why this object would not have actually

81

00:04:08,760 --> 00:04:05,050

been in the water but it's just an image

82

00:04:10,680 --> 00:04:08,770

issue because there are times where the

83

00:04:12,270 --> 00:04:10,690

image is crystal clear and disappears

84

00:04:15,570 --> 00:04:12,280

and it comes back crystal clear so

85

00:04:18,630 --> 00:04:15,580

that's that's not indicative of a video

86

00:04:20,729 --> 00:04:18,640

system that is that it's limit of

87

00:04:22,290 --> 00:04:20,739

capabilities and then you suddenly lose

88

00:04:24,600 --> 00:04:22,300

the object because then you wouldn't

89

00:04:26,879 --> 00:04:24,610

have it come back and you know it's a

90

00:04:29,480 --> 00:04:26,889

clear object again

91

00:04:32,339 --> 00:04:29,490

now I have taken a look at that video

92

00:04:34,980 --> 00:04:32,349

myself very interesting and one of the

93

00:04:36,659 --> 00:04:34,990

you know my first or a thought I had at

94

00:04:38,939 --> 00:04:36,669

one time was a balloon but I understand

95

00:04:43,649 --> 00:04:38,949

there was all types of maneuvers where

96

00:04:45,990 --> 00:04:43,659

that wouldn't really fit in and also the

97

00:04:49,320 --> 00:04:46,000

question I have do I recall that that

98

00:04:52,529 --> 00:04:49,330

either splits into two objects or was

99

00:04:55,020 --> 00:04:52,539

that some type of reflection no it

100

00:04:58,260 --> 00:04:55,030

splits into two objects we cannot

101
00:05:01,709 --> 00:04:58,270
explain that as a reflection so there's

102
00:05:03,149 --> 00:05:01,719
so you know so there are all of the

103
00:05:04,890 --> 00:05:03,159
debunkers are always trying to come up

104
00:05:06,929 --> 00:05:04,900
with some type of theory right they

105
00:05:08,939 --> 00:05:06,939
never really put out a full report and

106
00:05:12,089 --> 00:05:08,949
explain the video from beginning to end

107
00:05:14,459 --> 00:05:12,099
but they try to look at pieces of it

108
00:05:17,279 --> 00:05:14,469
so one once there it was oh maybe it's a

109
00:05:21,140 --> 00:05:17,289
pair of Chinese lanterns no that were

110
00:05:23,939 --> 00:05:21,150
tied together and then they tore apart

111
00:05:25,920 --> 00:05:23,949
right after they disappeared in the

112
00:05:27,480 --> 00:05:25,930
water and then of course they have to

113
00:05:29,850 --> 00:05:27,490

say well they didn't really go in the

114

00:05:32,100 --> 00:05:29,860

water in order to make that argument but

115

00:05:36,420 --> 00:05:32,110

probably the biggest problem with a

116

00:05:39,360 --> 00:05:36,430

Chinese lantern is that in order to meet

117

00:05:41,850 --> 00:05:39,370

the balloon theory requirements these

118

00:05:43,100 --> 00:05:41,860

lanterns would have to move at 20 to 25

119

00:05:46,550 --> 00:05:43,110

miles per hour

120

00:05:50,279 --> 00:05:46,560

mm-hmm and the problem there is a

121

00:05:53,329 --> 00:05:50,289

Chinese lantern won't survive it it

122

00:05:55,619 --> 00:05:53,339

speeds much above five miles per hour

123

00:05:58,980 --> 00:05:55,629

you mean oh just tear apart basically

124

00:06:01,800 --> 00:05:58,990

right yeah they will basically collapse

125

00:06:06,300 --> 00:06:01,810

because its base all it is is a candle

126

00:06:09,390 --> 00:06:06,310

it's inside a very lightweight envelope

127

00:06:11,369 --> 00:06:09,400

we can you know it yeah right and it's

128

00:06:13,589 --> 00:06:11,379

just pushing hot air to the top and so

129

00:06:16,019 --> 00:06:13,599

it makes it rise well it well if the

130

00:06:18,600 --> 00:06:16,029

wind impacts the side of it and

131

00:06:20,309 --> 00:06:18,610

collapses it will you know longer or

132

00:06:21,050 --> 00:06:20,319

lighter than air and so then it quickly

133

00:06:24,149 --> 00:06:21,060

drops

134

00:06:28,140 --> 00:06:24,159

hmm so for there's no way this could

135

00:06:31,829 --> 00:06:28,150

have been you know Chinese lanterns no

136

00:06:35,430 --> 00:06:31,839

has anyone good explanation so far yeah

137

00:06:37,829 --> 00:06:35,440

has anyone in you know I know that there

138

00:06:40,770 --> 00:06:37,839

were some people on the team that we're

139

00:06:43,920 --> 00:06:40,780

looking at this seriously that

140

00:06:48,450 --> 00:06:43,930

he wanted to remain anonymous and those

141

00:06:52,379 --> 00:06:48,460

were people of you know basic science

142

00:06:54,980 --> 00:06:52,389

if I remember right is that true well

143

00:06:58,470 --> 00:06:54,990

the the guys who wrote the report as

144

00:07:03,090 --> 00:06:58,480

myself I have a science background hmm

145

00:07:08,550 --> 00:07:03,100

Carl I can't recall crossing the last

146

00:07:12,750 --> 00:07:08,560

name of Carl Paulson in Carl's back

147

00:07:15,690 --> 00:07:12,760

degrees and physics he got his physics

148

00:07:17,970 --> 00:07:15,700

degree in New York University and then

149

00:07:20,610 --> 00:07:17,980

he worked at Princeton Laboratories he

150

00:07:23,670 --> 00:07:20,620

worked for Lockheed a very intelligent

151

00:07:26,130 --> 00:07:23,680

guy so he was a key person in the

152

00:07:30,030 --> 00:07:26,140

analysis and then a guy by the name of

153

00:07:33,480 --> 00:07:30,040

Larry Cates who was his degrees in

154

00:07:36,150 --> 00:07:33,490

mathematics and he did a lot of the

155

00:07:38,580 --> 00:07:36,160

statistical work on it as well as you

156

00:07:42,240 --> 00:07:38,590

know just a lot of the calculations and

157

00:07:44,760 --> 00:07:42,250

then Morgan Beale whose background is in

158

00:07:50,060 --> 00:07:44,770

earth sciences and then of course

159

00:07:52,280 --> 00:07:50,070

Richard Hoffman who works at the Army

160

00:07:57,600 --> 00:07:52,290

Materiel Command

161

00:07:59,880 --> 00:07:57,610

and he's an engineer there so the those

162

00:08:02,040 --> 00:07:59,890

are the main guys that worked on it we

163

00:08:06,480 --> 00:08:02,050

also had as soon as we released the port

164

00:08:09,719 --> 00:08:06,490

report we had a I guess what you might

165

00:08:12,440 --> 00:08:09,729

call an IR technician time tactus

166

00:08:14,520 --> 00:08:12,450

because he worked on those exact same

167

00:08:19,110 --> 00:08:14,530

video systems

168

00:08:21,840 --> 00:08:19,120

this was the MX 15 and he worked on them

169

00:08:24,210 --> 00:08:21,850

in Puerto Rico he said he may have

170

00:08:25,880 --> 00:08:24,220

worked on the exact unit that took the

171

00:08:28,409 --> 00:08:25,890

photo he didn't you know he doesn't know

172

00:08:31,290 --> 00:08:28,419

but he was very familiar with them and

173

00:08:34,649 --> 00:08:31,300

he showed these videos to the other

174

00:08:38,850 --> 00:08:34,659

technicians in their lab and they said

175

00:08:41,459 --> 00:08:38,860

they couldn't identify what it was that

176

00:08:48,300 --> 00:08:41,469

comment was what was so unique to them

177

00:08:51,720 --> 00:08:48,310

was that the object was so easy to

178

00:08:54,150 --> 00:08:51,730

see that was to them what was unique

179

00:08:55,949 --> 00:08:54,160

about it I see now

180

00:08:59,100 --> 00:08:55,959

and you remind me because it's been a

181

00:09:04,019 --> 00:08:59,110

while since I looked at this was there

182

00:09:09,420 --> 00:09:04,029

actually radar data as well yes we

183

00:09:12,420 --> 00:09:09,430

obtained radar data from the FAA and the

184

00:09:15,509 --> 00:09:12,430

radar data does not pick up the object

185

00:09:19,050 --> 00:09:15,519

is the plane is videoing it what the

186

00:09:22,530 --> 00:09:19,060

radar data did pick up though is it

187

00:09:27,269 --> 00:09:22,540

detected an unknown object in the same

188

00:09:29,970 --> 00:09:27,279

area that this object came towards the

189

00:09:32,449 --> 00:09:29,980

Puerto Rico from just northwest of the

190

00:09:35,759 --> 00:09:32,459

island about two miles offshore

191

00:09:39,240 --> 00:09:35,769

so radar picks up an unusual object

192

00:09:44,340 --> 00:09:39,250

approaching a puerto rico and what was

193

00:09:47,280 --> 00:09:44,350

unusual also was that the the radar was

194

00:09:49,139 --> 00:09:47,290

basically skiing every 10 seconds and so

195

00:09:51,660 --> 00:09:49,149

instead of seeing an object that's

196

00:09:54,119 --> 00:09:51,670

moving in a straight line there was an

197

00:09:57,179 --> 00:09:54,129

object without a transponder right so I

198

00:09:58,650 --> 00:09:57,189

mean I marry radar and it's just jumping

199

00:10:01,259 --> 00:09:58,660

around it's moving in a general

200

00:10:03,480 --> 00:10:01,269

direction and I never could figure out

201
00:10:05,670 --> 00:10:03,490
that that's just really strange it just

202
00:10:08,160 --> 00:10:05,680
doesn't make any sense why would do that

203
00:10:11,040 --> 00:10:08,170
I mean what the only thing I can say for

204
00:10:13,800 --> 00:10:11,050
certain was there was some unknown in

205
00:10:17,040 --> 00:10:13,810
that area but I couldn't not explain you

206
00:10:19,319 --> 00:10:17,050
know why this seemingly random movement

207
00:10:22,499 --> 00:10:19,329
and when I say random it's moving in a

208
00:10:25,740 --> 00:10:22,509
direction but it's hopscotching around

209
00:10:29,660 --> 00:10:25,750
is it runs in that direction and we sent

210
00:10:33,269 --> 00:10:29,670
a copy of the report to the french group

211
00:10:36,509 --> 00:10:33,279
sigma3 AF which is a group of brain

212
00:10:41,009 --> 00:10:36,519
scientists that one time were part of

213
00:10:42,749 --> 00:10:41,019

you know CNES and their programs and and

214

00:10:44,069 --> 00:10:42,759

they brought up a good point and then i

215

00:10:47,009 --> 00:10:44,079

research it and said yeah i guess

216

00:10:51,210 --> 00:10:47,019

they've got a a good point here that's

217

00:10:55,590 --> 00:10:51,220

very typical of an object that's jamming

218

00:10:59,309 --> 00:10:55,600

a radar signal really see the op yeah

219

00:11:02,009 --> 00:10:59,319

just j and me and you can jam radar

220

00:11:04,829 --> 00:11:02,019

signals in in different ways and the way

221

00:11:07,590 --> 00:11:04,839

i suspect this was occurring and this is

222

00:11:10,499 --> 00:11:07,600

just purely a hypothetical guess right

223

00:11:14,790 --> 00:11:10,509

is that the object may have had a plasma

224

00:11:18,600 --> 00:11:14,800

around it in plasmas will cause a radar

225

00:11:21,540 --> 00:11:18,610

being to skip and jump so that's just my

226

00:11:23,939 --> 00:11:21,550

guess but that was very interesting that

227

00:11:26,490 --> 00:11:23,949

you know I mean what are the odds that

228

00:11:28,920 --> 00:11:26,500

we would pick up this unknown object

229

00:11:32,100 --> 00:11:28,930

right before this object approaches yeah

230

00:11:33,840 --> 00:11:32,110

Porto Rico that's really recently yeah

231

00:11:36,329 --> 00:11:33,850

that it disappeared off radar

232

00:11:39,720 --> 00:11:36,339

you know once it came over the island

233

00:11:42,210 --> 00:11:39,730

with we just calculated the distance

234

00:11:45,059 --> 00:11:42,220

that the radar could still detect the

235

00:11:49,170 --> 00:11:45,069

object based on altitude and once the

236

00:11:53,129 --> 00:11:49,180

object would drop below about 400 feet

237

00:11:55,079 --> 00:11:53,139

it would drop below radar so though that

238

00:11:58,019 --> 00:11:55,089

was the theory as it was probably above

239

00:12:00,449 --> 00:11:58,029

400 feet was picked up on radar then

240

00:12:04,110 --> 00:12:00,459

once it dropped below 400 feet then you

241

00:12:07,460 --> 00:12:04,120

can't cheat on radar anymore Wow well

242

00:12:09,930 --> 00:12:07,470

that is so yeah that is quite a case and

243

00:12:14,129 --> 00:12:09,940

and it's something when something like

244

00:12:16,470 --> 00:12:14,139

this happens it just seems to go so far

245

00:12:18,889 --> 00:12:16,480

and then it kind of I don't know fades

246

00:12:21,389 --> 00:12:18,899

away don't you do you feel that way

247

00:12:25,199 --> 00:12:21,399

you know people stop talking about it

248

00:12:28,079 --> 00:12:25,209

and there's never a conclusion right

249

00:12:29,910 --> 00:12:28,089

yeah that's the you know that's the

250

00:12:33,210 --> 00:12:29,920

problem when you find your right is that

251

00:12:35,309 --> 00:12:33,220

there's no there's no organization it

252

00:12:37,230 --> 00:12:35,319

continually follows all of these

253

00:12:41,579 --> 00:12:37,240

together you know like a government type

254

00:12:43,679 --> 00:12:41,589

of organization hmm it's you know you're

255

00:12:46,110 --> 00:12:43,689

unless you know unless you have a

256

00:12:50,220 --> 00:12:46,120

spaceship that lands or something hard

257

00:12:52,410 --> 00:12:50,230

and concrete that you can grab people

258

00:12:54,929 --> 00:12:52,420

lose interest and they just jump from

259

00:12:57,689 --> 00:12:54,939

one story to the next without really

260

00:13:01,050 --> 00:12:57,699

looking at okay where are the really

261

00:13:04,319 --> 00:13:01,060

important cases versus just you know

262

00:13:07,590 --> 00:13:04,329

light from the sky for example right

263

00:13:10,980 --> 00:13:07,600

right and you know that I I think in

264

00:13:12,660 --> 00:13:10,990

general Society has changed in that way

265

00:13:15,600 --> 00:13:12,670

and I think it has to do with just all

266

00:13:18,290 --> 00:13:15,610

the information coming at us in all

267

00:13:21,759 --> 00:13:18,300

different ways all the time you know oh

268

00:13:23,710 --> 00:13:21,769

yeah you're right like I monitored

269

00:13:26,350 --> 00:13:23,720

a little bit on YouTube and on YouTube

270

00:13:29,259 --> 00:13:26,360

you can see how long the average person

271

00:13:31,449 --> 00:13:29,269

looks in the video yeah I mean the

272

00:13:34,929 --> 00:13:31,459

average person didn't look at the video

273

00:13:38,829 --> 00:13:34,939

for more than Oh probably 40 I think was

274

00:13:41,019 --> 00:13:38,839

around 40 45 seconds isn't that amazing

275

00:13:43,569 --> 00:13:41,029

yeah they never even saw the object

276

00:13:45,280 --> 00:13:43,579

split they never saw the object go into

277

00:13:48,160 --> 00:13:45,290

the water because they turned it off

278

00:13:50,829 --> 00:13:48,170

before it ever got there yeah yeah

279

00:13:52,929 --> 00:13:50,839

yeah it really really takes something to

280

00:13:55,780 --> 00:13:52,939

keep someone's attention and I do

281

00:14:02,919 --> 00:13:55,790

understand that I mean I can't even get

282

00:14:05,079 --> 00:14:02,929

through my email it's something so so

283

00:14:07,269 --> 00:14:05,089

let's talk that case is really

284

00:14:09,549 --> 00:14:07,279

fascinating to me and I and if there's

285

00:14:14,579 --> 00:14:09,559

ever any chances an update I would love

286

00:14:17,410 --> 00:14:14,589

to know I'd love to know about that and

287

00:14:20,530 --> 00:14:17,420

let's talk a little bit about the new

288

00:14:22,749 --> 00:14:20,540

organization that you just it just was

289

00:14:26,319 --> 00:14:22,759

founded recently it not too long ago

290

00:14:30,100 --> 00:14:26,329

right I see you oh that's correct we

291

00:14:32,619 --> 00:14:30,110

created it in August scientific

292

00:14:39,939 --> 00:14:32,629

Coalition for youth ology which we just

293

00:14:42,549 --> 00:14:39,949

call SCCT concept is that we want people

294

00:14:44,999 --> 00:14:42,559

with either law enforcement

295

00:14:48,549 --> 00:14:45,009

investigating type backgrounds or

296

00:14:53,819 --> 00:14:48,559

science backgrounds and so currently we

297

00:14:59,379 --> 00:14:53,829

have 35 members and those 35 members

298

00:15:03,340 --> 00:14:59,389

nine members have PhDs 92% of all the

299

00:15:07,569 --> 00:15:03,350

members have college degrees and then we

300

00:15:10,659 --> 00:15:07,579

we have a board that kind of reviews the

301

00:15:16,689 --> 00:15:10,669

resumes of any individuals interested in

302

00:15:21,989 --> 00:15:16,699

joining and we we pretty much you know

303

00:15:24,699 --> 00:15:21,999

try to avoid bringing in anyone who has

304

00:15:27,389 --> 00:15:24,709

kind of a non scientific view of the

305

00:15:30,100 --> 00:15:27,399

phenomenon so mm-hmm

306

00:15:34,420 --> 00:15:30,110

so we've got within the group we've got

307

00:15:39,610 --> 00:15:34,430

like PhDs and OSHA PhD and oceanography

308

00:15:41,350 --> 00:15:39,620

a PhD in physics PhD in psychology and

309

00:15:43,450 --> 00:15:41,360

then we've got masters and bachelor's

310

00:15:46,990 --> 00:15:43,460

degrees and electrical engineering

311

00:15:53,230 --> 00:15:47,000

chemistry physics all of the major

312

00:15:56,100 --> 00:15:53,240

science Sciences PhD in biochemistry so

313

00:15:58,180 --> 00:15:56,110

that tells you that there's a lot of

314

00:16:00,850 --> 00:15:58,190

scientists are interested in this

315

00:16:04,750 --> 00:16:00,860

phenomenon if it's investigated in a

316

00:16:07,780 --> 00:16:04,760

serious manner mm-hmm and and that is

317

00:16:14,139 --> 00:16:07,790

your attempt that is your mission

318

00:16:16,930 --> 00:16:14,149

statement is investigating these now so

319

00:16:21,810 --> 00:16:16,940

who decides the cases that you're going

320

00:16:27,550 --> 00:16:25,900

well the way we're currently set up we

321

00:16:29,620 --> 00:16:27,560

actually have not gotten to the point

322

00:16:32,710 --> 00:16:29,630

yet I've been bit investigating a

323

00:16:35,260 --> 00:16:32,720

specific case I mean other than I would

324

00:16:38,650 --> 00:16:35,270

be I would be a porto rico case right

325

00:16:41,710 --> 00:16:38,660

which was the very first case that we

326

00:16:46,269 --> 00:16:41,720

did but that was before we created the

327

00:16:48,490 --> 00:16:46,279

organization so now in any time we find

328

00:16:52,900 --> 00:16:48,500

a case that looks like it has hard

329

00:16:55,329 --> 00:16:52,910

evidence then we will collect a group of

330

00:16:59,199 --> 00:16:55,339

individuals and we will investigate the

331

00:17:01,510 --> 00:16:59,209

case but I would say on average you only

332

00:17:04,780 --> 00:17:01,520

usually have one or two good cases a

333

00:17:08,250 --> 00:17:04,790

year and buy a good case I mean a case

334

00:17:11,799 --> 00:17:08,260

that you either have a lot of witnesses

335

00:17:14,650 --> 00:17:11,809

or you have some type of strong

336

00:17:16,530 --> 00:17:14,660

photograph or video something that can

337

00:17:20,939 --> 00:17:16,540

be analyzed kind of like the

338

00:17:23,679 --> 00:17:20,949

Stephenville case for the Aguadilla case

339

00:17:27,610 --> 00:17:23,689

something that you can kind of sink your

340

00:17:29,919 --> 00:17:27,620

teeth into it yes we were talking prior

341

00:17:32,650 --> 00:17:29,929

back when both of our internets were

342

00:17:37,120 --> 00:17:32,660

working we were talking ahead of the

343

00:17:40,000 --> 00:17:37,130

show about how elusive you know UFOs are

344

00:17:42,940 --> 00:17:40,010

and how you know if you're doing

345

00:17:47,130 --> 00:17:42,950

scientific research how difficult it is

346

00:17:50,280 --> 00:17:47,140

to do it's not replicable

347

00:17:53,340 --> 00:17:50,290

right it's not like you can sit out

348

00:17:55,650 --> 00:17:53,350

someplace and say okay yeah um I know

349

00:17:59,400 --> 00:17:55,660

there will be a UFO show up here today

350

00:18:02,760 --> 00:17:59,410

you know it's on the schedule doesn't

351

00:18:04,560 --> 00:18:02,770

work that way yeah I think Bob Lazar

352

00:18:07,200 --> 00:18:04,570

would argue with you on that one

353

00:18:08,730 --> 00:18:07,210

oh yeah yeah he would probably say yeah

354

00:18:14,060 --> 00:18:08,740

there's a place you can go and see them

355

00:18:18,630 --> 00:18:14,070

all the time yeah well yeah so now the

356

00:18:23,580 --> 00:18:18,640

the the website address let's just give

357

00:18:34,650 --> 00:18:23,590

that out real quickly yeah that is WWE

358

00:18:37,140 --> 00:18:34,660

excuse me it's WWE SBU org oh okay I

359

00:18:40,830 --> 00:18:37,150

think I might have a different website

360

00:18:43,830 --> 00:18:40,840

up I'll have to check that out so I I

361

00:18:45,810 --> 00:18:43,840

wish you luck I hope you may have it I

362

00:18:48,419 --> 00:18:45,820

think you're right I'm right

363

00:18:51,120 --> 00:18:48,429

Barton you're right it's Explorer scu

364

00:18:56,070 --> 00:18:51,130

org yeah I think that that sounds right

365

00:18:58,200 --> 00:18:56,080

yeah yeah so let's hope some really good

366

00:19:02,010 --> 00:18:58,210

cases I see you can actually report a

367

00:19:04,799 --> 00:19:02,020

case there as well and also let's talk

368

00:19:07,169 --> 00:19:04,809

quickly about UFO data because that is

369

00:19:08,730 --> 00:19:07,179

another organization you're involved in

370

00:19:12,930 --> 00:19:08,740

and that's got to be what three years

371

00:19:16,230 --> 00:19:12,940

old or two years old now so gate is

372

00:19:18,950 --> 00:19:16,240

three years old I'm not as actively

373

00:19:21,930 --> 00:19:18,960

involved in that organization but I'm

374

00:19:28,650 --> 00:19:21,940

part of the organization is its basic

375

00:19:31,890 --> 00:19:28,660

mission is to develop a basically an

376

00:19:35,539 --> 00:19:31,900

optical system that takes spectra of

377

00:19:39,000 --> 00:19:35,549

lights at night so that you can analyze

378

00:19:40,799 --> 00:19:39,010

the photo and the system that's been

379

00:19:42,870 --> 00:19:40,809

developed so far actually takes two

380

00:19:47,430 --> 00:19:42,880

images one is an optical image and then

381

00:19:51,060 --> 00:19:47,440

the other is the spectra mm-hmm the most

382

00:19:53,610 --> 00:19:51,070

difficult part that you know the UFO

383

00:19:58,770 --> 00:19:53,620

dated group has run into is basically

384

00:20:00,960 --> 00:19:58,780

the software issues that surround when

385

00:20:07,020 --> 00:20:00,970

you know how camera recognized

386

00:20:09,510 --> 00:20:07,030

is an object right and without being

387

00:20:13,440 --> 00:20:09,520

confused by falling leaf or movements

388

00:20:15,240 --> 00:20:13,450

and clouds insects that go by those kind

389

00:20:18,120 --> 00:20:15,250

of things so that's the most difficult

390

00:20:20,039 --> 00:20:18,130

part of developing the system yeah

391

00:20:24,570 --> 00:20:20,049

there's going to be a lot of algorithm

392

00:20:27,810 --> 00:20:24,580

writing to get around all that right you

393

00:20:31,049 --> 00:20:27,820

know a lot of a lot of development to

394

00:20:34,940 --> 00:20:31,059

get something like that going so let's

395

00:20:39,120 --> 00:20:34,950

talk about the Nimitz case which is

396

00:20:40,950 --> 00:20:39,130

another fascinating case the first I

397

00:20:42,870 --> 00:20:40,960

know I know people were talking about it

398

00:20:47,990 --> 00:20:42,880

before but the first I heard about it is

399

00:20:51,090 --> 00:20:48,000

when Chris Chris mellon talked about it

400

00:20:54,169 --> 00:20:51,100

but you have how long have you been

401
00:20:57,570 --> 00:20:54,179
researching that case in particular I

402
00:21:00,890 --> 00:20:57,580
actually first found out about this case

403
00:21:05,520 --> 00:21:00,900
in July of 2016

404
00:21:08,130 --> 00:21:05,530
hmm it's kind of an interesting story

405
00:21:11,789 --> 00:21:08,140
because when I found out about it it

406
00:21:15,419 --> 00:21:11,799
wasn't the rest of it wasn't really out

407
00:21:17,940 --> 00:21:15,429
there in the UFO world per se I think

408
00:21:21,180 --> 00:21:17,950
there had been something that cropped up

409
00:21:23,940 --> 00:21:21,190
in around the year 2007 on a website

410
00:21:27,210 --> 00:21:23,950
called above top secret oh yeah

411
00:21:30,810 --> 00:21:27,220
but but that was all that was all there

412
00:21:34,980 --> 00:21:30,820
was and there was much about the case at

413
00:21:37,799 --> 00:21:34,990

that point in time but in mid-2016 a

414

00:21:41,700 --> 00:21:37,809

gentleman that I've known for a number

415

00:21:44,700 --> 00:21:41,710

of years who is not in the mainstream

416

00:21:47,820 --> 00:21:44,710

ufology world but I know that he works

417

00:21:51,570 --> 00:21:47,830

with the government and he has done work

418

00:21:56,460 --> 00:21:51,580

for organizations related to UFOs in the

419

00:22:00,180 --> 00:21:56,470

government now I was meeting with him

420

00:22:02,610 --> 00:22:00,190

and he was we were talking about the

421

00:22:04,560 --> 00:22:02,620

hardwood deer case and so he said well

422

00:22:07,049 --> 00:22:04,570

I've got an interesting case that you

423

00:22:10,440 --> 00:22:07,059

might be want to hear a little bit about

424

00:22:13,799 --> 00:22:10,450

and he had a folder that was a half inch

425

00:22:14,100 --> 00:22:13,809

thick on this case but he wouldn't he

426
00:22:15,810 --> 00:22:14,110
would

427
00:22:18,870 --> 00:22:15,820
let me see the folder but he told me

428
00:22:23,010 --> 00:22:18,880
some things about the case and then he

429
00:22:26,310 --> 00:22:23,020
said but by the way someone has leaked

430
00:22:27,870 --> 00:22:26,320
it to the Internet so if you want to do

431
00:22:30,390 --> 00:22:27,880
a little googling you won't have any

432
00:22:32,190 --> 00:22:30,400
problem finding it so that's why I

433
00:22:37,700 --> 00:22:32,200
proceeded to do mm-hmm

434
00:22:42,480 --> 00:22:37,710
and I found the magazine article by a

435
00:22:44,010 --> 00:22:42,490
former Navy colonel his name's of Paco I

436
00:22:45,450 --> 00:22:44,020
remember if I can pronounce his last

437
00:22:47,220 --> 00:22:45,460
name correctly I think something like

438
00:22:50,940 --> 00:22:47,230

chick Kerry or something like that

439

00:22:53,970 --> 00:22:50,950

but probably a number of your listeners

440

00:22:56,430 --> 00:22:53,980

may have seen this website so I found

441

00:23:00,090 --> 00:22:56,440

the website so what attracted me to it

442

00:23:02,850 --> 00:23:00,100

was it was not a typical UFO website

443

00:23:06,690 --> 00:23:02,860

right this was actually on a navy blog

444

00:23:08,820 --> 00:23:06,700

and so I'd looked in the writers ba bla

445

00:23:12,120 --> 00:23:08,830

other blogs right and they're all about

446

00:23:16,289 --> 00:23:12,130

Navy items this is his only write-up on

447

00:23:19,260 --> 00:23:16,299

a UFO and he's using navy lingo through

448

00:23:22,890 --> 00:23:19,270

the whole thing he takes time in the

449

00:23:25,560 --> 00:23:22,900

beginning to say you know this is pretty

450

00:23:28,409 --> 00:23:25,570

crazy and so I'm gonna start off by

451
00:23:31,140 --> 00:23:28,419
telling you how strong the witnesses

452
00:23:36,270 --> 00:23:31,150
were are in terms of their credibility

453
00:23:38,640 --> 00:23:36,280
and so he goes through that and so since

454
00:23:42,210 --> 00:23:38,650
I read that I said okay this is a

455
00:23:45,960 --> 00:23:42,220
legitimate case this is not you know

456
00:23:47,700 --> 00:23:45,970
just some wild case out there so I began

457
00:23:50,460 --> 00:23:47,710
the first thing I had to do is go look

458
00:23:52,440 --> 00:23:50,470
up all the Navy lingo so I could

459
00:23:55,799 --> 00:23:52,450
understand exactly what these guys were

460
00:24:00,860 --> 00:23:55,809
saying happened and so once I did that

461
00:24:05,640 --> 00:24:00,870
the next step was in late December of

462
00:24:08,909 --> 00:24:05,650
2016 I sent out I think about eleven

463
00:24:11,490 --> 00:24:08,919

foyers I think all told now I've sent

464

00:24:15,840 --> 00:24:11,500

out thirteen foyers so I sent them out

465

00:24:18,659 --> 00:24:15,850

to every different Navy organization to

466

00:24:20,580 --> 00:24:18,669

find out information because it it's

467

00:24:23,460 --> 00:24:20,590

probably good at this point that toe

468

00:24:27,570 --> 00:24:23,470

your audience kind of what basically

469

00:24:28,290 --> 00:24:27,580

happens so there there's a u.s. naval

470

00:24:32,400 --> 00:24:28,300

group

471

00:24:38,430 --> 00:24:32,410

out about 70 miles west San Diego

472

00:24:40,950 --> 00:24:38,440

November of 2004 and they had been the

473

00:24:44,850 --> 00:24:40,960

USS Princeton which is missile frigate

474

00:24:46,710 --> 00:24:44,860

had one of the top radar systems at that

475

00:24:50,100 --> 00:24:46,720

time which was called a spy-1 radar

476

00:24:51,840 --> 00:24:50,110

system and they've been detecting an

477

00:24:55,380 --> 00:24:51,850

object apparently for several days that

478

00:24:59,400 --> 00:24:55,390

would be up at 80,000 feet and then it

479

00:25:02,430 --> 00:24:59,410

would be down to you know 50 feet to 100

480

00:25:04,890 --> 00:25:02,440

feet above the ocean floor and so on

481

00:25:08,940 --> 00:25:04,900

this particular day I'm not sure what

482

00:25:11,160 --> 00:25:08,950

motivated them to do this but the

483

00:25:13,110 --> 00:25:11,170

Princeton picks us up these two objects

484

00:25:16,670 --> 00:25:13,120

up or one I'm not sure it's one or two

485

00:25:23,030 --> 00:25:16,680

objects that picked them up on radar and

486

00:25:25,920 --> 00:25:23,040

they call in a marine f-18 colonel

487

00:25:28,200 --> 00:25:25,930

Lieutenant Colonel Kurtz who also

488

00:25:33,030 --> 00:25:28,210

happened to be the commanding officer of

489

00:25:35,190 --> 00:25:33,040

that of an entire marine squadron so

490

00:25:39,420 --> 00:25:35,200

they give him the coordinates and he's

491

00:25:43,620 --> 00:25:39,430

flying to coordinates before he gets

492

00:25:45,630 --> 00:25:43,630

there the Princeton radios him and tells

493

00:25:50,430 --> 00:25:45,640

him to break off because they're sending

494

00:25:55,130 --> 00:25:50,440

two Navy super hornets which is just you

495

00:25:58,290 --> 00:25:55,140

know a more advanced f-18 to the target

496

00:26:00,840 --> 00:25:58,300

but since he's in the area he goes ahead

497

00:26:05,940 --> 00:26:00,850

and flies by and he never sees the

498

00:26:08,880 --> 00:26:05,950

targets but he sees this huge bubbling

499

00:26:11,880 --> 00:26:08,890

area in the ocean which to him the best

500

00:26:16,140 --> 00:26:11,890

explanation is like a ship that has just

501
00:26:19,040 --> 00:26:16,150
suck he says that the water is glassy

502
00:26:23,790 --> 00:26:19,050
clear that day except for this one area

503
00:26:27,690 --> 00:26:23,800
so he breaks off and goes from the area

504
00:26:31,140 --> 00:26:27,700
and then the other two f-18s who the

505
00:26:35,120 --> 00:26:31,150
commander of the group which is called

506
00:26:37,620 --> 00:26:35,130
the Black Aces off of the USS Nimitz

507
00:26:41,700 --> 00:26:37,630
command the commanders last name is

508
00:26:46,400 --> 00:26:41,710
frayed or he he's headed there

509
00:26:48,990 --> 00:26:46,410
with his wing guy and as they approach

510
00:26:51,000 --> 00:26:49,000
they don't see anything on radar but

511
00:26:54,240 --> 00:26:51,010
once they get close enough and get to

512
00:26:56,550 --> 00:26:54,250
the target they see the target that the

513
00:26:59,730 --> 00:26:56,560

USS Princeton has vectored them to them

514

00:27:02,160 --> 00:26:59,740

and what they see is basically he

515

00:27:04,020 --> 00:27:02,170

describes it as a tic-tac so it's

516

00:27:09,780 --> 00:27:04,030

basically you know like those candies

517

00:27:13,020 --> 00:27:09,790

mm-hmm it's a oval type object and the

518

00:27:14,850 --> 00:27:13,030

commander believes the tic-tac is he

519

00:27:16,920 --> 00:27:14,860

said there's no wings there's no method

520

00:27:19,980 --> 00:27:16,930

of propulsion it's just there in the sky

521

00:27:22,590 --> 00:27:19,990

and but then it turns its nose towards

522

00:27:25,320 --> 00:27:22,600

him and when he does that when it does

523

00:27:29,490 --> 00:27:25,330

that he assumes that that's an

524

00:27:32,280 --> 00:27:29,500

aggressive move and so one of the f-18s

525

00:27:36,210 --> 00:27:32,290

I think changes to a different altitude

526
00:27:37,860 --> 00:27:36,220
and then his f-18 engages the object now

527
00:27:41,670 --> 00:27:37,870
he doesn't have any weaponry on board

528
00:27:44,220 --> 00:27:41,680
he's just I guess doing his standard

529
00:27:47,580 --> 00:27:44,230
maneuvers which yeah I'm not familiar

530
00:27:50,250 --> 00:27:47,590
with those stopping and maybe but my

531
00:27:51,960 --> 00:27:50,260
understanding is what happens is he's

532
00:27:56,880 --> 00:27:51,970
trying to do a maneuver so he gets

533
00:28:00,090 --> 00:27:56,890
behind the object and the object

534
00:28:02,370 --> 00:28:00,100
actually gets behind him and so he's

535
00:28:04,350 --> 00:28:02,380
never able to do that and he's you know

536
00:28:07,170 --> 00:28:04,360
he does various maneuvers and then

537
00:28:13,050 --> 00:28:07,180
finally this object just takes off and

538
00:28:15,030 --> 00:28:13,060

leaves so he and the other f-18 I think

539

00:28:17,640 --> 00:28:15,040

they're not able to match that speed so

540

00:28:19,920 --> 00:28:17,650

they just head back to the Nimitz if

541

00:28:24,060 --> 00:28:19,930

they're heading back to the Nimitz the

542

00:28:26,820 --> 00:28:24,070

USS Princeton calls her and says you'll

543

00:28:30,350 --> 00:28:26,830

never guess but the object is back at

544

00:28:34,350 --> 00:28:30,360

its same tap and captious means that its

545

00:28:39,120 --> 00:28:34,360

location where it was first found by the

546

00:28:40,980 --> 00:28:39,130

USS Princeton and so the commander says

547

00:28:43,710 --> 00:28:40,990

well you know we're we're low on fuel

548

00:28:46,290 --> 00:28:43,720

now we cannot you know turn back around

549

00:28:49,490 --> 00:28:46,300

and go back there so they proceeded to

550

00:28:53,070 --> 00:28:49,500

the Nimitz and the Nimitz ends two more

551
00:28:55,530 --> 00:28:53,080
f-18 to that target and it's at this

552
00:28:59,820 --> 00:28:55,540
point it's not real clear

553
00:29:02,810 --> 00:28:59,830
if it was the first two f-18s or the

554
00:29:06,360 --> 00:29:02,820
second two f-18s that apparently took a

555
00:29:12,200 --> 00:29:06,370
video of the object but I'm pretty sure

556
00:29:15,510 --> 00:29:12,210
it was the second pair of f-18s and and

557
00:29:19,170 --> 00:29:15,520
the story of what happens to them you

558
00:29:21,330 --> 00:29:19,180
know and we don't have because the guy

559
00:29:24,630 --> 00:29:21,340
who wrote the Navy blog was familiar

560
00:29:26,670 --> 00:29:24,640
with this captain fray bar I mean not

561
00:29:29,160 --> 00:29:26,680
captain but the commander for a bar and

562
00:29:33,060 --> 00:29:29,170
Lieutenant Carl Cerf who was a commander

563
00:29:35,190 --> 00:29:33,070

of the marine a marine squadron so what

564

00:29:38,100 --> 00:29:35,200

his story basically is the story from

565

00:29:41,130 --> 00:29:38,110

those two officers and we don't have

566

00:29:45,140 --> 00:29:41,140

this story of who ever you know the two

567

00:29:47,670 --> 00:29:45,150

f-18s that went out later now when this

568

00:29:53,460 --> 00:29:47,680

when they flew over and they saw the

569

00:29:55,380 --> 00:29:53,470

bubbling in the water were they assuming

570

00:29:59,640 --> 00:29:55,390

that the thing went underwater and I

571

00:30:01,710 --> 00:29:59,650

heard you say early on that it was down

572

00:30:03,840 --> 00:30:01,720

to a hundred feet above the ocean floor

573

00:30:07,350 --> 00:30:03,850

so that means they were actually

574

00:30:09,810 --> 00:30:07,360

tracking in underwater oh okay I'm sorry

575

00:30:12,540 --> 00:30:09,820

100 feet above the ocean surface

576
00:30:17,340 --> 00:30:12,550
oh the officered surface okay just above

577
00:30:19,260 --> 00:30:17,350
the ocean surface now the in the article

578
00:30:20,820 --> 00:30:19,270
that's written the marine Carl doesn't

579
00:30:25,140 --> 00:30:20,830
draw any conclusions as to whether

580
00:30:26,850 --> 00:30:25,150
something this was the object he was

581
00:30:29,600 --> 00:30:26,860
going to find or anything his only

582
00:30:33,240 --> 00:30:29,610
conclusion was the ocean water was

583
00:30:37,290 --> 00:30:33,250
crystal clear you know much more calm

584
00:30:39,390 --> 00:30:37,300
than normal except in this area where it

585
00:30:41,970 --> 00:30:39,400
looked like an object the size of a ship

586
00:30:45,750 --> 00:30:41,980
had just sunk yeah because of turbulence

587
00:30:49,110 --> 00:30:45,760
in the in that area but he did not know

588
00:30:53,480 --> 00:30:49,120

what caused it or he didn't see anything

589

00:30:58,350 --> 00:30:53,490

that caused that that's he only saw the

590

00:31:01,710 --> 00:30:58,360

water turbulence so do you think at this

591

00:31:03,330 --> 00:31:01,720

point that this I know you did your for

592

00:31:06,600 --> 00:31:03,340

use and we can talk more about that but

593

00:31:08,940 --> 00:31:06,610

at this point is this case classified as

594

00:31:10,980 --> 00:31:08,950

far as you know

595

00:31:16,350 --> 00:31:10,990

oh you mean classified by the military

596

00:31:19,620 --> 00:31:16,360

yes so far and all of my foyers that

597

00:31:21,870 --> 00:31:19,630

have been denied the Navy has never said

598

00:31:24,480 --> 00:31:21,880

that this information is classified and

599

00:31:27,570 --> 00:31:24,490

that is why we can't send it to you what

600

00:31:31,860 --> 00:31:27,580

they said every time was that they just

601
00:31:34,860 --> 00:31:31,870
don't have the logs and so basically

602
00:31:38,190 --> 00:31:34,870
what they said is five different naval

603
00:31:43,970 --> 00:31:38,200
assets right the USS Nimitz the USS

604
00:31:49,379 --> 00:31:43,980
Princeton the Navy squadron the

605
00:31:51,600 --> 00:31:49,389
arraigned f-18 and there was also what's

606
00:31:54,740 --> 00:31:51,610
called an e-2 Hawkeye which is an

607
00:31:57,779 --> 00:31:54,750
airborne early warning aircraft mm-hmm

608
00:32:00,539 --> 00:31:57,789
that was in the area that also picked up

609
00:32:04,159 --> 00:32:00,549
the object on their radar all five of

610
00:32:07,590 --> 00:32:04,169
those Navy assets when I sent foyers

611
00:32:10,320 --> 00:32:07,600
every time the response came back was

612
00:32:12,350 --> 00:32:10,330
that we have no information we don't

613
00:32:16,460 --> 00:32:12,360

have those logs we don't have anything

614

00:32:21,500 --> 00:32:16,470

so they never used a they never claimed

615

00:32:25,350 --> 00:32:21,510

classification or top-secret however

616

00:32:29,129 --> 00:32:25,360

when I asked for the deck logs of the

617

00:32:31,490 --> 00:32:29,139

USS Princeton I received that same

618

00:32:35,070 --> 00:32:31,500

replied that we don't have any deck logs

619

00:32:36,570 --> 00:32:35,080

in a FOIA officer because you know these

620

00:32:39,210 --> 00:32:36,580

FOIA officers that you send these

621

00:32:41,009 --> 00:32:39,220

requests to they're not really in the

622

00:32:42,659 --> 00:32:41,019

business of trying to hide information

623

00:32:45,960 --> 00:32:42,669

from you they're just you know they're

624

00:32:49,940 --> 00:32:45,970

doing their clerical job mm-hmm and this

625

00:32:55,590 --> 00:32:49,950

this FOIA officer didn't say this to me

626

00:33:00,740 --> 00:32:55,600

he said that's very unusual that they

627

00:33:04,470 --> 00:33:00,750

can't give you the deck logs and he said

628

00:33:08,340 --> 00:33:04,480

that it's so unlikely that they've lost

629

00:33:10,950 --> 00:33:08,350

the deck logs that it's more likely that

630

00:33:13,019 --> 00:33:10,960

they have classified it and it's

631

00:33:14,190 --> 00:33:13,029

classified high enough that he you know

632

00:33:16,230 --> 00:33:14,200

he's not even aware of the

633

00:33:18,960 --> 00:33:16,240

classification so he said so basically

634

00:33:22,200 --> 00:33:18,970

he's saying it it's classified like top

635

00:33:23,430 --> 00:33:22,210

secret for example he's never been to

636

00:33:25,889 --> 00:33:23,440

FOIA officer he's

637

00:33:27,919 --> 00:33:25,899

going to know that all he's just going

638

00:33:33,450 --> 00:33:27,929

to hear is we don't have those logs I

639

00:33:35,279 --> 00:33:33,460

thought that was I thought that was kind

640

00:33:38,970 --> 00:33:35,289

of against the Freedom of Information

641

00:33:44,009 --> 00:33:38,980

Act but maybe I just don't know enough

642

00:33:46,680 --> 00:33:44,019

about that I thought that so once hit

643

00:33:48,299 --> 00:33:46,690

something hits classified that it's just

644

00:33:52,259 --> 00:33:48,309

pulled out of the loop and you have to

645

00:33:54,899 --> 00:33:52,269

wait until after that changes say you

646

00:33:58,440 --> 00:33:54,909

know 25 years later or 50 years later or

647

00:34:01,680 --> 00:33:58,450

something right yes it's classified work

648

00:34:05,340 --> 00:34:01,690

secret of its top secret they don't have

649

00:34:07,379 --> 00:34:05,350

to give you in other words they don't

650

00:34:13,859 --> 00:34:07,389

even have to acknowledge that it exists

651
00:34:16,889 --> 00:34:13,869
at all I'm not sure if they have to

652
00:34:19,859 --> 00:34:16,899
acknowledge exists at all but I know it

653
00:34:22,230 --> 00:34:19,869
is a practice to just say it doesn't

654
00:34:25,200 --> 00:34:22,240
exist does not exist even though it does

655
00:34:30,059 --> 00:34:25,210
hmm I've done enough for years I just

656
00:34:33,990 --> 00:34:30,069
see that happen now sometimes what I

657
00:34:35,520 --> 00:34:34,000
think happens also Martin is it's a lot

658
00:34:39,089 --> 00:34:35,530
of work for them to go find this

659
00:34:42,329 --> 00:34:39,099
information right and in some cases they

660
00:34:45,710 --> 00:34:42,339
just say hey you know I don't want to

661
00:34:48,720 --> 00:34:45,720
mess with that we all have the data or

662
00:34:54,480 --> 00:34:48,730
week I've heard I've heard replies that

663
00:34:57,480 --> 00:34:54,490

we can't find it right which sounds even

664

00:35:00,630 --> 00:34:57,490

more suspicious that's actually what my

665

00:35:07,230 --> 00:35:00,640

appeal was so for example when I

666

00:35:10,530 --> 00:35:07,240

appealed one of the foyers my first

667

00:35:12,780 --> 00:35:10,540

appeal was just turned down they just

668

00:35:16,500 --> 00:35:12,790

said nope we agree because you're really

669

00:35:19,829 --> 00:35:16,510

appealing to the Navy just to higher up

670

00:35:23,030 --> 00:35:19,839

you're appealing to Jack which is the

671

00:35:28,170 --> 00:35:23,040

Navy's basically there's legal arm and

672

00:35:29,970 --> 00:35:28,180

so they just said no we we agreed that

673

00:35:31,470 --> 00:35:29,980

they they've done a reasonable search

674

00:35:33,780 --> 00:35:31,480

and that's all I have to do is a

675

00:35:37,020 --> 00:35:33,790

reasonable search and so then they give

676

00:35:38,700 --> 00:35:37,030

you the legal cases that support

677

00:35:42,020 --> 00:35:38,710

you know what defines the reasonable

678

00:35:45,680 --> 00:35:42,030

search so then I sent back a second

679

00:35:48,720 --> 00:35:45,690

appeal on another one of the foyers and

680

00:35:51,420 --> 00:35:48,730

I noticed on the email it was the same

681

00:35:54,000 --> 00:35:51,430

jag officers that we're going to

682

00:35:57,240 --> 00:35:54,010

evaluate that one so I sent them an

683

00:36:00,300 --> 00:35:57,250

additional email where I basically I

684

00:36:03,540 --> 00:36:00,310

said I understand your first argument

685

00:36:06,950 --> 00:36:03,550

and there's some validity to that I said

686

00:36:10,170 --> 00:36:06,960

however in this case what I'm arguing is

687

00:36:13,800 --> 00:36:10,180

you've got five different Navy assets

688

00:36:15,930 --> 00:36:13,810

right and you're going to tell me this

689

00:36:18,510 --> 00:36:15,940

it's reasonable that you can't find

690

00:36:21,450 --> 00:36:18,520

documents on any of five Navy assets

691

00:36:26,040 --> 00:36:21,460

that were in a UH Navy exercise on that

692

00:36:28,020 --> 00:36:26,050

day and so this time after I sent that

693

00:36:30,690 --> 00:36:28,030

to them they said well we'll take that

694

00:36:32,130 --> 00:36:30,700

into consideration so I think they said

695

00:36:33,150 --> 00:36:32,140

okay we got to throw this guy a bone

696

00:36:36,270 --> 00:36:33,160

yeah

697

00:36:39,480 --> 00:36:36,280

so they they sent me back a report a

698

00:36:42,780 --> 00:36:39,490

partial this time they give me partial

699

00:36:46,140 --> 00:36:42,790

acceptance on my appeal and they sent me

700

00:36:48,990 --> 00:36:46,150

some e-mails back and I was really

701
00:36:54,690 --> 00:36:49,000
surprised that these guys sent me these

702
00:36:57,089 --> 00:36:54,700
emails via this email the first one and

703
00:37:01,650 --> 00:36:57,099
I open up and I'm looking and it's from

704
00:37:05,880 --> 00:37:01,660
a lieutenant colonel and they have sent

705
00:37:09,380 --> 00:37:05,890
the Jag officers have asked him have you

706
00:37:17,010 --> 00:37:09,390
ever heard this case bla bla bla right

707
00:37:21,120 --> 00:37:17,020
his response is oh the tic-tacs yeah we

708
00:37:23,700 --> 00:37:21,130
know all about the tic tacs and I'm just

709
00:37:27,210 --> 00:37:23,710
like wow so okay so now they're

710
00:37:34,160 --> 00:37:27,220
admitting that this happened and then

711
00:37:38,790 --> 00:37:36,329
another lieutenant colonel

712
00:37:42,410 --> 00:37:38,800
this guy was my second guy he was a

713
00:37:44,880 --> 00:37:42,420

zombie Carl he was a major and he said

714

00:37:47,790 --> 00:37:44,890

well we don't have these documents

715

00:37:50,340 --> 00:37:47,800

because there you know there are over

716

00:37:54,000 --> 00:37:50,350

ten years old and how

717

00:37:57,000 --> 00:37:54,010

so they would be in the archives and so

718

00:37:59,010 --> 00:37:57,010

then he ended he writes at his email I'm

719

00:38:00,900 --> 00:37:59,020

sure you can find a point of contact

720

00:38:05,430 --> 00:38:00,910

that could find the documents in the

721

00:38:09,960 --> 00:38:05,440

archives for mr. Powell and so of course

722

00:38:11,730 --> 00:38:09,970

I've since sent them another appeal that

723

00:38:13,320 --> 00:38:11,740

I want them to go search the archives

724

00:38:15,480 --> 00:38:13,330

because I think all they did initially

725

00:38:17,490 --> 00:38:15,490

is they just asked the squadron's

726

00:38:19,650 --> 00:38:17,500

hey do you have these documents from the

727

00:38:22,710 --> 00:38:19,660

year 2004 well no they don't have

728

00:38:25,440 --> 00:38:22,720

documents a squadron seconds documents

729

00:38:28,920 --> 00:38:25,450

at home so they never really went looked

730

00:38:31,620 --> 00:38:28,930

in the archives so that I'm that appeal

731

00:38:36,630 --> 00:38:31,630

still out outstanding it's been it's

732

00:38:39,960 --> 00:38:36,640

almost two months old now and I know a

733

00:38:44,340 --> 00:38:39,970

lot I go ahead mark no doubt that this

734

00:38:49,070 --> 00:38:44,350

happened you know the event happened

735

00:38:54,900 --> 00:38:52,560

Navy the Navy Inspector General actually

736

00:38:57,390 --> 00:38:54,910

investigated the case but I can't prove

737

00:39:00,810 --> 00:38:57,400

that but that's all hearsay from what

738

00:39:03,030 --> 00:39:00,820

I've heard so far so now I played up on

739

00:39:07,260 --> 00:39:03,040

YouTube I played the video that it shows

740

00:39:09,050 --> 00:39:07,270

online is that a thick video do you know

741

00:39:14,760 --> 00:39:09,060

anything about that

742

00:39:17,880 --> 00:39:14,770

okay familiar with the video it's we

743

00:39:21,240 --> 00:39:17,890

don't know for certain that that is the

744

00:39:24,860 --> 00:39:21,250

video that was taken by the f-18 what we

745

00:39:30,390 --> 00:39:24,870

do know is that the f-18s did take video

746

00:39:33,510 --> 00:39:30,400

because in my foyer reply that's noted

747

00:39:37,560 --> 00:39:33,520

in the lieutenant Colonel's email he

748

00:39:39,870 --> 00:39:37,570

said we a lot of us saw the video so

749

00:39:42,390 --> 00:39:39,880

apparently these guys got the video and

750

00:39:45,620 --> 00:39:42,400

they were playing it among the other you

751
00:39:50,010 --> 00:39:45,630
know various officers on board the ship

752
00:39:53,070 --> 00:39:50,020
so we know video exists what I don't

753
00:39:55,350 --> 00:39:53,080
know for certain is is the video that

754
00:39:57,560 --> 00:39:55,360
was released on the Internet

755
00:40:00,920 --> 00:39:57,570
and that video was actually released in

756
00:40:09,180 --> 00:40:04,860
and so various people made arguments

757
00:40:13,760 --> 00:40:09,190
oh if maybe it's a fake video because it

758
00:40:17,310 --> 00:40:13,770
was released on a German video a German

759
00:40:22,050 --> 00:40:17,320
media video type site you know that

760
00:40:26,550 --> 00:40:22,060
makes movies and things hmm so whether

761
00:40:30,780 --> 00:40:26,560
or not that is the video I can't say for

762
00:40:32,790 --> 00:40:30,790
certain I actually suspect it is a copy

763
00:40:36,930 --> 00:40:32,800

of the original video and the reason I

764

00:40:39,720 --> 00:40:36,940

say that is the the altitude that's

765

00:40:43,040 --> 00:40:39,730

shown on the video of 20,000 feet is

766

00:40:46,050 --> 00:40:43,050

same altitude approximately that the

767

00:40:49,740 --> 00:40:46,060

commanding officer of the f-18 said they

768

00:40:53,280 --> 00:40:49,750

were at when they encountered the what

769

00:40:56,250 --> 00:40:53,290

he called the tic tacs so I suspect that

770

00:40:59,580 --> 00:40:56,260

is you know but we don't know for

771

00:41:01,860 --> 00:40:59,590

certain and to me what's the most

772

00:41:06,150 --> 00:41:01,870

important important part about this case

773

00:41:09,930 --> 00:41:06,160

is not whether that video is the you

774

00:41:12,510 --> 00:41:09,940

know is the real video or not to me the

775

00:41:15,120 --> 00:41:12,520

important part of the case is that we've

776

00:41:17,540 --> 00:41:15,130

got testimony from Navy and Marine

777

00:41:21,390 --> 00:41:17,550

officers that this event happened and

778

00:41:23,760 --> 00:41:21,400

those f-18s were sent off of the Nimitz

779

00:41:27,480 --> 00:41:23,770

to intercept this object and they and

780

00:41:31,830 --> 00:41:27,490

the lead f-18 it was a commanding

781

00:41:36,860 --> 00:41:31,840

officer engaged the object with his

782

00:41:40,590 --> 00:41:36,870

aircraft so not to me that eliminates

783

00:41:43,380 --> 00:41:40,600

just about everything and my view is I

784

00:41:46,590 --> 00:41:43,390

just want to know you know why can't the

785

00:41:51,300 --> 00:41:46,600

Navy just tell us what they know I don't

786

00:41:55,640 --> 00:41:51,310

understand their need to hide that

787

00:41:58,490 --> 00:41:55,650

information yeah it's probably up above

788

00:42:02,490 --> 00:41:58,500

them who knows

789

00:42:04,860 --> 00:42:02,500

so did you actually speak to the

790

00:42:09,510 --> 00:42:04,870

witnesses or was there you know was a

791

00:42:11,730 --> 00:42:09,520

communication in through email or or how

792

00:42:15,480 --> 00:42:11,740

what happened then that when it comes to

793

00:42:16,950 --> 00:42:15,490

the witnesses okay so the witnesses I

794

00:42:19,739 --> 00:42:16,960

have not

795

00:42:23,870 --> 00:42:19,749

been in communication with any of the

796

00:42:26,430 --> 00:42:23,880

witnesses I do know an individual who

797

00:42:28,459 --> 00:42:26,440

contacted me in actually making an

798

00:42:33,539 --> 00:42:28,469

occasion with lieutenant colonel Cerf

799

00:42:36,509 --> 00:42:33,549

didn't remember he was the marine who

800

00:42:40,829 --> 00:42:36,519

was in the first f-18 that all he saw

801
00:42:43,680 --> 00:42:40,839
was the water disturbance mm-hmm well so

802
00:42:46,370 --> 00:42:43,690
he called Lieutenant Colonel Kurtz and

803
00:42:48,630 --> 00:42:46,380
he said that was very polite

804
00:42:54,870 --> 00:42:48,640
conversation he said the gentleman spoke

805
00:42:57,059 --> 00:42:54,880
very slowly very distinctly and you know

806
00:43:01,829 --> 00:42:57,069
he was very confident and everything

807
00:43:02,370 --> 00:43:01,839
said and he said that well this is

808
00:43:06,380 --> 00:43:02,380
interesting

809
00:43:08,640 --> 00:43:06,390
first thing you he found out was that

810
00:43:11,509 --> 00:43:08,650
Lieutenant Colonel Kurth actually worked

811
00:43:14,329 --> 00:43:11,519
for Bigelow after he left the service

812
00:43:17,190 --> 00:43:14,339
and of course we all know Bigelow's

813
00:43:19,950 --> 00:43:17,200

interest UFOs right now whether or not

814

00:43:23,069 --> 00:43:19,960

that's coincidence or a part of the

815

00:43:25,910 --> 00:43:23,079

reason he was initially hired you know

816

00:43:29,640 --> 00:43:25,920

there's no way to know but in his

817

00:43:32,849 --> 00:43:29,650

conversation the Lieutenant Colonel did

818

00:43:36,989 --> 00:43:32,859

say that he could not comment any

819

00:43:39,719 --> 00:43:36,999

further on the case because of his prior

820

00:43:42,809 --> 00:43:39,729

job agreement you know with Bigelow

821

00:43:46,589 --> 00:43:42,819

industries hmm so I thought that was

822

00:43:49,709 --> 00:43:46,599

interesting that is so what is what is

823

00:43:53,160 --> 00:43:49,719

the protocol for like to say you're

824

00:43:56,039 --> 00:43:53,170

investigating this case and you see the

825

00:43:58,950 --> 00:43:56,049

person's name that wrote that blog and

826

00:44:02,130 --> 00:43:58,960

you are actually able to get a

827

00:44:03,660 --> 00:44:02,140

connection to contact that person what

828

00:44:04,430 --> 00:44:03,670

is a protocol for doing something like

829

00:44:09,120 --> 00:44:04,440

that

830

00:44:13,259 --> 00:44:09,130

well I'm myself I'm somewhat leery on

831

00:44:15,650 --> 00:44:13,269

that right because I just hate intruding

832

00:44:18,599 --> 00:44:15,660

on someone's private life hmm

833

00:44:20,400 --> 00:44:18,609

you know the guy who contacted with

834

00:44:26,069 --> 00:44:20,410

Colonel Lieutenant Colonel Kurtz I guess

835

00:44:28,790 --> 00:44:26,079

was not as it wasn't his big issue for

836

00:44:36,110 --> 00:44:31,850

and most of these guys like for example

837

00:44:40,850 --> 00:44:36,120

the the commanding officer of the f18

838

00:44:44,600 --> 00:44:40,860

that engaged who was lieutenant was

839

00:44:48,830 --> 00:44:44,610

commander David Freiburger of the Black

840

00:44:53,210 --> 00:44:48,840

Aces which is name of his stuff super

841

00:44:55,820 --> 00:44:53,220

hornet group i've i was able to

842

00:44:58,490 --> 00:44:55,830

determine where he lived and he had just

843

00:45:02,200 --> 00:44:58,500

just moved within I think a month of

844

00:45:06,590 --> 00:45:02,210

when I determined it and so I sent him a

845

00:45:10,430 --> 00:45:06,600

registered letter certified letter so

846

00:45:14,240 --> 00:45:10,440

they would come back you know if he

847

00:45:15,620 --> 00:45:14,250

would if he you know if it picked up

848

00:45:18,910 --> 00:45:15,630

where he'd moved to if he'd done a

849

00:45:22,100 --> 00:45:18,920

change of address or whatever mm-hmm and

850

00:45:24,380 --> 00:45:22,110

yeah I never received a letter back or a

851

00:45:26,210 --> 00:45:24,390

reply and yeah I'm just tend to realize

852

00:45:28,520 --> 00:45:26,220

a polite letter a lot of these guys

853

00:45:31,490 --> 00:45:28,530

after they get out of the military they

854

00:45:35,810 --> 00:45:31,500

work in the defense industry mm-hmm and

855

00:45:40,880 --> 00:45:35,820

you know the UFO topic is what I say

856

00:45:46,220 --> 00:45:40,890

it's like the great I love you know the

857

00:45:47,810 --> 00:45:46,230

quote the great taboo mm-hmm it's not

858

00:45:49,610 --> 00:45:47,820

like you know I don't think it's like

859

00:45:51,980 --> 00:45:49,620

someone's that okay you can't you know

860

00:45:55,340 --> 00:45:51,990

don't ever talk about UFOs but it's like

861

00:45:56,690 --> 00:45:55,350

if you're in that industry and you did

862

00:45:58,820 --> 00:45:56,700

talk about it it's almost like you

863

00:46:01,760 --> 00:45:58,830

you're talking about a ghost right like

864

00:46:03,050 --> 00:46:01,770

it's almost like oh I saw a ghost this

865

00:46:05,090 --> 00:46:03,060

morning yeah walked right across my

866

00:46:08,690 --> 00:46:05,100

living room I mean you get the same kind

867

00:46:10,250 --> 00:46:08,700

of reaction about I think it's

868

00:46:13,520 --> 00:46:10,260

interesting that Bob Bigelow for one

869

00:46:14,660 --> 00:46:13,530

it's not too afraid to talk about it no

870

00:46:17,060 --> 00:46:14,670

no he's not

871

00:46:20,360 --> 00:46:17,070

of course I guess he has he's the guy

872

00:46:21,950 --> 00:46:20,370

that does the hiring right so yeah he

873

00:46:28,700 --> 00:46:21,960

doesn't have to have any fear about his

874

00:46:31,370 --> 00:46:28,710

job but I think most other yeah other

875

00:46:33,260 --> 00:46:31,380

guys do have concerns about talking

876

00:46:37,820 --> 00:46:33,270

about that's a lot of the reason why a

877

00:46:40,310 --> 00:46:37,830

lot of the times military guys that talk

878

00:46:42,520 --> 00:46:40,320

about it they they've been retired and

879

00:46:47,090 --> 00:46:42,530

are in there you know 70

880

00:46:52,010 --> 00:46:47,100

mm-hmm right no one's gonna really

881

00:46:55,790 --> 00:46:52,020

bother them at this point so it's after

882

00:46:57,410 --> 00:46:55,800

it's after the hour and I'm going to put

883

00:47:02,060 --> 00:46:57,420

out there that if anyone wants to call

884

00:47:03,850 --> 00:47:02,070

in and ask our guests some questions and

885

00:47:06,590 --> 00:47:03,860

you're alive and watching on YouTube

886

00:47:12,080 --> 00:47:06,600

you'll see the number underneath in the

887

00:47:14,270 --> 00:47:12,090

description it's 6:03 nine six seven 403

888

00:47:18,500 --> 00:47:14,280

oh if you'd like to call in and ask our

889

00:47:22,370 --> 00:47:18,510

guest a question so where do you think

890

00:47:24,470 --> 00:47:22,380

this particular case where do you think

891

00:47:26,980 --> 00:47:24,480

it's going to go do you think some more

892

00:47:31,370 --> 00:47:26,990

more people will be engaged eventually

893

00:47:33,590 --> 00:47:31,380

in talking about the incident yeah I

894

00:47:36,350 --> 00:47:33,600

think I think there will be more

895

00:47:39,350 --> 00:47:36,360

information that comes out on the case I

896

00:47:42,770 --> 00:47:39,360

was talking to Chris Mellon and you know

897

00:47:47,210 --> 00:47:42,780

Chris is part of the belongs to the

898

00:47:50,540 --> 00:47:47,220

Stars group yeah yeah I've known Chris I

899

00:47:55,460 --> 00:47:50,550

guess probably four years I have not met

900

00:47:58,430 --> 00:47:55,470

him in person but he say what I consider

901
00:48:01,970 --> 00:47:58,440
him a fairly conservative person in

902
00:48:07,360 --> 00:48:01,980
terms of his views on the UFO phenomenon

903
00:48:11,660 --> 00:48:07,370
so he's pretty down-to-earth on it and

904
00:48:13,580 --> 00:48:11,670
he indicated to me that they would have

905
00:48:18,710 --> 00:48:13,590
more they had more information on this

906
00:48:21,260 --> 00:48:18,720
particular case so it will be

907
00:48:23,960 --> 00:48:21,270
interesting to see if he has them you

908
00:48:26,060 --> 00:48:23,970
know some additional information now he

909
00:48:27,760 --> 00:48:26,070
was an in office when this was happening

910
00:48:30,410 --> 00:48:27,770
but you know I know how

911
00:48:33,010 --> 00:48:30,420
compartmentalized everything is I'm sure

912
00:48:35,840 --> 00:48:33,020
he probably never knew anything about it

913
00:48:36,410 --> 00:48:35,850

actually he told me he had heard about

914

00:48:41,920 --> 00:48:36,420

it

915

00:48:46,190 --> 00:48:41,930

really Wow yeah and you know he he was

916

00:48:48,410 --> 00:48:46,200

he was confident that it had occurred he

917

00:48:50,900 --> 00:48:48,420

didn't know that at that time when I

918

00:48:54,300 --> 00:48:50,910

talked to him about this I first talked

919

00:49:00,360 --> 00:48:56,720

well not too long after I found out in

920

00:49:02,100 --> 00:49:00,370

mid-2016 mm-hmm and he was confident at

921

00:49:04,350 --> 00:49:02,110

that point this is long before you know

922

00:49:07,620 --> 00:49:04,360

that the to the stars group had been

923

00:49:10,590 --> 00:49:07,630

formed right and at a point in time he

924

00:49:12,720 --> 00:49:10,600

was confident that this had happened and

925

00:49:16,440 --> 00:49:12,730

he was aware of the four years I was

926
00:49:18,180 --> 00:49:16,450
going to be sending out and you know he

927
00:49:23,160 --> 00:49:18,190
was supported he was supportive of all

928
00:49:24,930 --> 00:49:23,170
that but now he clearly has gotten some

929
00:49:30,270 --> 00:49:24,940
more information within the last six

930
00:49:33,840 --> 00:49:30,280
months so I I suspect that there's

931
00:49:37,590 --> 00:49:33,850
someone on their team who had access to

932
00:49:39,810 --> 00:49:37,600
additional information on this case now

933
00:49:41,580 --> 00:49:39,820
you hear over and I think in the chat

934
00:49:44,370 --> 00:49:41,590
room we had this happen people are

935
00:49:47,490 --> 00:49:44,380
saying you know the Tom DeLonge Nimitz

936
00:49:51,120 --> 00:49:47,500
case how do you think that just happened

937
00:49:59,160 --> 00:49:51,130
because it was announced on that you

938
00:50:01,050 --> 00:49:59,170

know the the broadcast that he did yeah

939

00:50:04,230 --> 00:50:01,060

I'm sure you've heard a lot of people

940

00:50:05,880 --> 00:50:04,240

call this a Tom DeLonge case have you I

941

00:50:08,070 --> 00:50:05,890

mean I've seen that everywhere and

942

00:50:09,960 --> 00:50:08,080

someone mentioned it earlier in the chat

943

00:50:12,720 --> 00:50:09,970

room oh that's that video that Tom

944

00:50:15,410 --> 00:50:12,730

DeLonge had something to do with it it

945

00:50:18,510 --> 00:50:15,420

has really nothing to do with him at all

946

00:50:21,330 --> 00:50:18,520

but it just came out Chris Mel and I

947

00:50:22,740 --> 00:50:21,340

know talked about it right yeah it

948

00:50:26,640 --> 00:50:22,750

really has nothing to do with Tom

949

00:50:28,440 --> 00:50:26,650

DeLonge Chris you know it talked about

950

00:50:32,700 --> 00:50:28,450

it like I said you know Chris knew about

951
00:50:34,580 --> 00:50:32,710
it I know back in 2016 and like I told

952
00:50:37,650 --> 00:50:34,590
you when I found out about it in

953
00:50:40,560 --> 00:50:37,660
mid-2016 the individual that told me

954
00:50:43,520 --> 00:50:40,570
about it had a lot more information and

955
00:50:48,390 --> 00:50:43,530
what's been released because he had a

956
00:50:49,830 --> 00:50:48,400
half inch file and he told me I mean he

957
00:50:52,710 --> 00:50:49,840
told me things about the case that

958
00:50:57,050 --> 00:50:52,720
haven't even been that I haven't seen in

959
00:51:03,210 --> 00:50:57,060
the foyers and they're not in anywhere

960
00:51:06,500 --> 00:51:03,220
for for example he indicated to me that

961
00:51:11,870 --> 00:51:06,510
the the Navy guys

962
00:51:15,410 --> 00:51:11,880
were debriefed by and I and it was not

963
00:51:18,500 --> 00:51:15,420

clear to me if they were debriefed by

964

00:51:21,230 --> 00:51:18,510

someone within the Navy or whether they

965

00:51:23,990 --> 00:51:21,240

were outside the Navy and my gut feel

966

00:51:31,430 --> 00:51:24,000

was they may have been from outside the

967

00:51:33,110 --> 00:51:31,440

Navy hmm there's no doubt in my mind

968

00:51:35,180 --> 00:51:33,120

that there's more information out there

969

00:51:38,770 --> 00:51:35,190

just whether or not you know it's this

970

00:51:42,050 --> 00:51:38,780

is one those time will tell right and

971

00:51:45,440 --> 00:51:42,060

you know if the to the Stars groups has

972

00:51:48,170 --> 00:51:45,450

more information then hopefully we'll

973

00:51:52,100 --> 00:51:48,180

see something within you know a short

974

00:51:56,870 --> 00:51:52,110

period of time right how long did this

975

00:52:02,810 --> 00:51:56,880

event go on for well my understanding is

976
00:52:05,870 --> 00:52:02,820
it went on for several days actual event

977
00:52:08,300 --> 00:52:05,880
on November 14 that prior to that there

978
00:52:14,270 --> 00:52:08,310
had been the radar guys were picking it

979
00:52:16,730 --> 00:52:14,280
up so this has been for several days a

980
00:52:20,720 --> 00:52:16,740
couple of other things interesting that

981
00:52:22,580 --> 00:52:20,730
happen is both the marine and the Navy

982
00:52:26,780 --> 00:52:22,590
pilots were asked if they had any

983
00:52:29,150 --> 00:52:26,790
ordnance on board and both both of us

984
00:52:32,630 --> 00:52:29,160
said no they didn't so I just thought

985
00:52:37,100 --> 00:52:32,640
that's interesting that they would even

986
00:52:40,670 --> 00:52:37,110
be asked back ordnance meaning what

987
00:52:42,770 --> 00:52:40,680
weapons mm-hmm yeah Wow so they were

988
00:52:46,580 --> 00:52:42,780

thinking a possible self-defense it

989

00:52:49,520 --> 00:52:46,590

sounds like well I don't know that the

990

00:52:57,740 --> 00:52:49,530

work that was just you know last time I

991

00:53:01,040 --> 00:52:57,750

those guy so how far off of the shore

992

00:53:03,980 --> 00:53:01,050

did this actually happened about 70

993

00:53:05,810 --> 00:53:03,990

miles southwest of San Diego and it

994

00:53:10,580 --> 00:53:05,820

really that's really kind of Kara

995

00:53:12,410 --> 00:53:10,590

makes you wonder you know thinking what

996

00:53:15,170 --> 00:53:12,420

the Catalina island's those are off of

997

00:53:18,980 --> 00:53:15,180

LA right I mean there's really nothing

998

00:53:20,240 --> 00:53:18,990

out 70 miles out just ocean yeah yeah

999

00:53:25,040 --> 00:53:20,250

they were just doing

1000

00:53:27,140 --> 00:53:25,050

the terrier attack group 11 which is the

1001

00:53:30,050 --> 00:53:27,150

Nimitz is the main aircraft carrier for

1002

00:53:31,490 --> 00:53:30,060

that and so it was involved the

1003

00:53:34,550 --> 00:53:31,500

Princeton

1004

00:53:37,099 --> 00:53:34,560

there was a submarine the USS can't

1005

00:53:40,130 --> 00:53:37,109

recall if it was the USS Louisville I

1006

00:53:42,380 --> 00:53:40,140

can give the Louisville but it was not

1007

00:53:47,660 --> 00:53:42,390

involved in deciding it was just part of

1008

00:53:52,099 --> 00:53:47,670

that carrier group someone I spoke to

1009

00:53:54,470 --> 00:53:52,109

recently was suggesting that you know

1010

00:53:58,250 --> 00:53:54,480

with all this activity in you know

1011

00:54:01,940 --> 00:53:58,260

toward North Korea out with all the

1012

00:54:04,760 --> 00:54:01,950

activity in the Navy vessels that

1013

00:54:06,680 --> 00:54:04,770

there's probably or most likely it was

1014

00:54:10,520 --> 00:54:06,690

so much just speculating that there's

1015

00:54:14,480 --> 00:54:10,530

probably sightings and you know you do

1016

00:54:16,670 --> 00:54:14,490

hear about activity during you know some

1017

00:54:20,540 --> 00:54:16,680

type of war or event

1018

00:54:22,670 --> 00:54:20,550

it just seems it seems like there

1019

00:54:25,160 --> 00:54:22,680

there's some type of Attraction going on

1020

00:54:27,710 --> 00:54:25,170

there yep

1021

00:54:31,550 --> 00:54:27,720

I mean this is just kind of from

1022

00:54:33,950 --> 00:54:31,560

experience it's not it's not like full

1023

00:54:37,550 --> 00:54:33,960

update up that just from everything I've

1024

00:54:40,400 --> 00:54:37,560

ever done and read and research and just

1025

00:54:44,420 --> 00:54:40,410

my experience has been that things like

1026
00:54:46,010 --> 00:54:44,430
if you wanted to attract a UFO sighting

1027
00:54:49,490 --> 00:54:46,020
the best way to do it to have a large

1028
00:54:52,609 --> 00:54:49,500
military operation and it just seems to

1029
00:54:57,280 --> 00:54:52,619
attract because there's there's too many

1030
00:55:02,440 --> 00:54:57,290
cases in history where you know a

1031
00:55:04,940 --> 00:55:02,450
military training exercise sites UFOs

1032
00:55:06,040 --> 00:55:04,950
absolutely you know which i think is

1033
00:55:08,720 --> 00:55:06,050
really fascinating

1034
00:55:10,520 --> 00:55:08,730
I've told on this show a number of

1035
00:55:12,140 --> 00:55:10,530
different times that I talked to someone

1036
00:55:15,010 --> 00:55:12,150
in Vietnam that said there were

1037
00:55:17,750 --> 00:55:15,020
sightings you know he's part of a

1038
00:55:20,089 --> 00:55:17,760

supposedly according to himself this was

1039

00:55:21,770 --> 00:55:20,099

many years ago he told me he was part of

1040

00:55:24,230 --> 00:55:21,780

a special group in the Air Force that

1041

00:55:29,380 --> 00:55:24,240

was investigating you know sightings

1042

00:55:33,799 --> 00:55:29,390

during a lot of the conflicts so yeah

1043

00:55:38,479 --> 00:55:33,809

yeah very fun a large number those

1044

00:55:42,019 --> 00:55:38,489

one believe this in 1964 and it was near

1045

00:55:45,650 --> 00:55:42,029

where the Aguadilla case happened it was

1046

00:55:49,069 --> 00:55:45,660

the USS Gantt and there was a military

1047

00:55:51,729 --> 00:55:49,079

exercise it's in Project Blue Book so

1048

00:55:54,829 --> 00:55:51,739

these are documented by the Air Force

1049

00:55:59,390 --> 00:55:54,839

even they even had the object on radar

1050

00:56:02,589 --> 00:55:59,400

and the images of the radar available

1051

00:56:05,529 --> 00:56:02,599

Project Blue Book

1052

00:56:08,239 --> 00:56:05,539

so there's definitely an object there

1053

00:56:12,039 --> 00:56:08,249

and it was cited by both the Air Force

1054

00:56:16,699 --> 00:56:12,049

and the Navy and it was just during a

1055

00:56:18,229 --> 00:56:16,709

naval exercise hmm which is what this

1056

00:56:20,749 --> 00:56:18,239

was off of the coast of California

1057

00:56:23,359 --> 00:56:20,759

because they were going through

1058

00:56:25,370 --> 00:56:23,369

exercises because the USS Nimitz the

1059

00:56:29,089 --> 00:56:25,380

next year was sent to Iraq

1060

00:56:30,739 --> 00:56:29,099

so it was you know was out in the I

1061

00:56:34,039 --> 00:56:30,749

don't remember if it's in the

1062

00:56:37,120 --> 00:56:34,049

Mediterranean or in the Persian Gulf but

1063

00:56:41,329 --> 00:56:37,130

it was in it went out into that arena

1064

00:56:43,459 --> 00:56:41,339

now this is one of the I don't know what

1065

00:56:45,229 --> 00:56:43,469

the right term for it is but it's one of

1066

00:56:49,239 --> 00:56:45,239

the super carriers or something like

1067

00:56:52,160 --> 00:56:49,249

that isn't it yes it's a nuclear carrier

1068

00:56:55,370 --> 00:56:52,170

yeah I believe if I'm correct it's the

1069

00:56:57,469 --> 00:56:55,380

first of the Nimitz class nuclear attack

1070

00:57:00,709 --> 00:56:57,479

carriers Wow

1071

00:57:06,709 --> 00:57:00,719

back in the late 70s I was in the San

1072

00:57:12,199 --> 00:57:06,719

Diego area and I went out and some I was

1073

00:57:13,999 --> 00:57:12,209

at a park with my girlfriend up and was

1074

00:57:16,009 --> 00:57:14,009

invited with you know from these Navy

1075

00:57:18,229 --> 00:57:16,019

guys they said hey come you know check

1076

00:57:20,900 --> 00:57:18,239

out we're on this carrier and I can't

1077

00:57:23,179 --> 00:57:20,910

remember the name of it I have never

1078

00:57:26,870 --> 00:57:23,189

seen anything like that in my life the

1079

00:57:31,009 --> 00:57:26,880

thing was just like so huge I just

1080

00:57:36,439 --> 00:57:31,019

couldn't even imagine it yeah like five

1081

00:57:40,269 --> 00:57:36,449

thousand guys right and I remember you

1082

00:57:43,279 --> 00:57:40,279

know they have you know we walk by this

1083

00:57:45,559 --> 00:57:43,289

I don't want to say building a

1084

00:57:47,630 --> 00:57:45,569

compartment I guess all set up for

1085

00:57:50,810 --> 00:57:47,640

machine shop he says we can replace all

1086

00:57:53,030 --> 00:57:50,820

anything that breaks in the entire ship

1087

00:57:55,910 --> 00:57:53,040

right out of here you know to lit out

1088

00:57:59,750 --> 00:57:55,920

which is fascinating they're so

1089

00:58:02,510 --> 00:57:59,760

self-sufficient and 5000 people that's

1090

00:58:04,760 --> 00:58:02,520

you know a small I mean not quite a city

1091

00:58:08,780 --> 00:58:04,770

but it's a it's a large town

1092

00:58:10,880 --> 00:58:08,790

yeah the people and the way they can

1093

00:58:13,840 --> 00:58:10,890

just scramble the Jets so quickly is

1094

00:58:16,130 --> 00:58:13,850

it's fascinating how all that works

1095

00:58:22,700 --> 00:58:16,140

bring them up in the elevators and all

1096

00:58:24,470 --> 00:58:22,710

that so are there any other cases you

1097

00:58:26,300 --> 00:58:24,480

know you mentioned earlier the one in

1098

00:58:29,180 --> 00:58:26,310

Puerto Rico that there was a military

1099

00:58:31,160 --> 00:58:29,190

operation as there other ones you know

1100

00:58:35,060 --> 00:58:31,170

similar to this that you're familiar

1101
00:58:38,180 --> 00:58:35,070
with well there's another one I can tell

1102
00:58:40,970 --> 00:58:38,190
you a little bit about that it's a very

1103
00:58:44,240 --> 00:58:40,980
interesting case and this one also

1104
00:58:47,030 --> 00:58:44,250
happened this one happens actually 2013

1105
00:58:49,820 --> 00:58:47,040
so it's more it's about the same

1106
00:58:50,060 --> 00:58:49,830
timeframe is the Aguadilla or a RICO

1107
00:58:58,910 --> 00:58:50,070
case

1108
00:59:00,830 --> 00:58:58,920
because hey Robert

1109
00:59:03,830 --> 00:59:00,840
which would you mind would you mind

1110
00:59:05,210 --> 00:59:03,840
holding that thought just for a minute

1111
00:59:07,040 --> 00:59:05,220
we'll get right back to that and we'll

1112
00:59:08,600 --> 00:59:07,050
talk about this case I promise the

1113
00:59:14,600 --> 00:59:08,610

listener and you but we have a caller

1114

00:59:16,640 --> 00:59:14,610

calling in I'd like to take ok ok caller

1115

00:59:21,020 --> 00:59:16,650

welcome to the show your first name and

1116

00:59:24,590 --> 00:59:21,030

where you're calling from can you hear

1117

00:59:26,170 --> 00:59:24,600

me call her yeah hi there we first name

1118

00:59:29,660 --> 00:59:26,180

where you're calling from

1119

00:59:34,760 --> 00:59:29,670

I'm Ryan I'm calling from South Carolina

1120

00:59:36,560 --> 00:59:34,770

call Ryan again yes oh nice pickup it's

1121

00:59:38,450 --> 00:59:36,570

been a couple weeks yeah how about that

1122

00:59:42,290 --> 00:59:38,460

how you doing Ryan you have a question

1123

00:59:44,480 --> 00:59:42,300

for our guest yes I do I hope I didn't

1124

00:59:47,390 --> 00:59:44,490

call it sounded like you're about to get

1125

00:59:49,520 --> 00:59:47,400

into some well remember we'll get back

1126

00:59:55,040 --> 00:59:49,530

into it we're leaving the listener and

1127

00:59:58,130 --> 00:59:55,050

suspense okay I just had a quick

1128

00:59:59,530 --> 00:59:58,140

question of some of the evidence

1129

01:00:02,140 --> 00:59:59,540

presented has to do

1130

01:00:04,630 --> 01:00:02,150

with radar sightings or something like

1131

01:00:08,560 --> 01:00:04,640

that I've always wanted to ask a radar

1132

01:00:10,510 --> 01:00:08,570

expert this with regard to UFOs how how

1133

01:00:15,040 --> 01:00:10,520

reliable would you consider it I mean

1134

01:00:17,080 --> 01:00:15,050

I've talked to whether people software

1135

01:00:21,420 --> 01:00:17,090

people and they've all said that you

1136

01:00:24,070 --> 01:00:21,430

know relying on radar for UFO sightings

1137

01:00:26,770 --> 01:00:24,080

might be an issue at times because you

1138

01:00:29,980 --> 01:00:26,780

know radar there are radar anomalies

1139

01:00:31,500 --> 01:00:29,990

associated whether there are software

1140

01:00:33,070 --> 01:00:31,510

problems that cause you know

1141

01:00:35,650 --> 01:00:33,080

misinterpretation of the data

1142

01:00:37,810 --> 01:00:35,660

what's his at then you know you know the

1143

01:00:41,830 --> 01:00:37,820

possibility of some UFO is being just

1144

01:00:44,410 --> 01:00:41,840

simply radar anomalies yeah that's

1145

01:00:46,270 --> 01:00:44,420

that's a good question Ryan and there I

1146

01:00:49,420 --> 01:00:46,280

know what you're talking about there for

1147

01:00:52,480 --> 01:00:49,430

example you can have a radar beam that

1148

01:00:57,340 --> 01:00:52,490

bounces off an inverted atmospheric air

1149

01:00:59,380 --> 01:00:57,350

layer right and so the you get in what

1150

01:01:02,140 --> 01:00:59,390

you think is an object and it's actually

1151

01:01:07,120 --> 01:01:02,150

just a the beam bouncing off a cloud or

1152

01:01:10,000 --> 01:01:07,130

an inverted area in this particular case

1153

01:01:12,640 --> 01:01:10,010

the one we were talking about my

1154

01:01:14,590 --> 01:01:12,650

understanding is that the spy-1 system

1155

01:01:17,430 --> 01:01:14,600

which is what is the name of the radar

1156

01:01:24,090 --> 01:01:17,440

system that the USS Princeton was using

1157

01:01:28,360 --> 01:01:24,100

operate at various radar wavelength

1158

01:01:31,270 --> 01:01:28,370

simultaneously so it's not a it's not

1159

01:01:34,570 --> 01:01:31,280

just a one it's not like you just send a

1160

01:01:36,430 --> 01:01:34,580

beam out at 2.4 gigahertz and it comes

1161

01:01:39,490 --> 01:01:36,440

back I mean they're sending out a spread

1162

01:01:42,750 --> 01:01:39,500

across you know various wavelengths so

1163

01:01:46,840 --> 01:01:42,760

they likelihood that you would get a

1164

01:01:50,530 --> 01:01:46,850

false return is less and then if you add

1165

01:01:52,260 --> 01:01:50,540

to it that this early this airborne

1166

01:01:55,300 --> 01:01:52,270

early warning aircraft

1167

01:01:58,510 --> 01:01:55,310

he's also detecting the object at the

1168

01:02:00,850 --> 01:01:58,520

same location so now that that makes it

1169

01:02:03,430 --> 01:02:00,860

kind of problematic because you've got a

1170

01:02:07,150 --> 01:02:03,440

Navy ship and you've got an aircraft

1171

01:02:11,020 --> 01:02:07,160

that are two different locations and in

1172

01:02:13,230 --> 01:02:11,030

order to create a bogey your bogey is

1173

01:02:18,789 --> 01:02:13,240

gonna have to bounce the beam

1174

01:02:22,480 --> 01:02:18,799

incorrectly to both ship and aircraft if

1175

01:02:26,470 --> 01:02:22,490

the same you know XYZ coordinate in the

1176

01:02:29,230 --> 01:02:26,480

atmosphere now you can do that if you're

1177

01:02:37,120 --> 01:02:29,240

doing it intentionally right like if

1178

01:02:41,349 --> 01:02:37,130

you're you're trying to basically hide

1179

01:02:43,240 --> 01:02:41,359

you know if this is a US for example I'm

1180

01:02:45,759 --> 01:02:43,250

pretty sure the US has the ability to

1181

01:02:49,210 --> 01:02:45,769

make an aircraft show up on someone's

1182

01:02:52,240 --> 01:02:49,220

radar screen and if you so you can

1183

01:02:54,460 --> 01:02:52,250

intentionally do that but I don't think

1184

01:02:59,230 --> 01:02:54,470

that could happen you know by accident

1185

01:03:01,900 --> 01:02:59,240

and if this is an unknown right we we

1186

01:03:06,099 --> 01:03:01,910

just make the assumption that the

1187

01:03:11,680 --> 01:03:06,109

unknown is is not trying to fool the

1188

01:03:14,470 --> 01:03:11,690

radar systems yeah one of the things

1189

01:03:16,299 --> 01:03:14,480

that I have to admit I've always been

1190

01:03:19,930 --> 01:03:16,309

amazed by some of these radar reports

1191

01:03:23,259 --> 01:03:19,940

and sometimes the tracked object will be

1192

01:03:25,420 --> 01:03:23,269

going faster than the plane chasing it

1193

01:03:27,730 --> 01:03:25,430

and I just always wondered if they're

1194

01:03:30,160 --> 01:03:27,740

you know playing devil's advocate here

1195

01:03:32,259 --> 01:03:30,170

is there the radar anomaly that can

1196

01:03:34,420 --> 01:03:32,269

produce that you know say we're just

1197

01:03:38,319 --> 01:03:34,430

talking hit being tracked about one

1198

01:03:40,749 --> 01:03:38,329

object as opposed to multiple yeah in

1199

01:03:43,210 --> 01:03:40,759

you know I mean I'm I've got a fair

1200

01:03:46,359 --> 01:03:43,220

amount of experience analyzing radar but

1201

01:03:48,940 --> 01:03:46,369

I'm not a radar expert but from what I

1202

01:03:54,160 --> 01:03:48,950

do know I think you would have you would

1203

01:03:56,440 --> 01:03:54,170

be hard-pressed to have a false radar

1204

01:04:00,519 --> 01:03:56,450

image that's moving in a straight line

1205

01:04:02,170 --> 01:04:00,529

at a high rate of speed and especially

1206

01:04:07,359 --> 01:04:02,180

if it and then it makes a certain a

1207

01:04:09,579 --> 01:04:07,369

sudden turn I would expect the radar the

1208

01:04:13,180 --> 01:04:09,589

false radar image to mostly kind of sit

1209

01:04:15,609 --> 01:04:13,190

there because it's continually bouncing

1210

01:04:20,079 --> 01:04:15,619

yeah and it might make maybe it might

1211

01:04:22,480 --> 01:04:20,089

make a sudden jump right because maybe

1212

01:04:25,420 --> 01:04:22,490

you're false if you're looking like it

1213

01:04:26,890 --> 01:04:25,430

inverted atmospheric layer it might look

1214

01:04:28,839 --> 01:04:26,900

like it's sitting there right

1215

01:04:32,019 --> 01:04:28,849

because you're bouncing off and then

1216

01:04:33,519 --> 01:04:32,029

maybe the atmosphere changes a little

1217

01:04:34,960 --> 01:04:33,529

bit so now you don't bounce off that

1218

01:04:37,269 --> 01:04:34,970

area the beam goes a little farther and

1219

01:04:40,089 --> 01:04:37,279

bounces off a different area so it looks

1220

01:04:41,740 --> 01:04:40,099

like something jumps someplace but I

1221

01:04:43,990 --> 01:04:41,750

don't think you'd see a straight line

1222

01:04:47,410 --> 01:04:44,000

you know in other words because your

1223

01:04:50,079 --> 01:04:47,420

radar is usually turning every three to

1224

01:04:51,579 --> 01:04:50,089

ten seconds so I don't think you would

1225

01:04:56,620 --> 01:04:51,589

see something moving for example a

1226

01:05:00,420 --> 01:04:56,630

straight line if it was what they call I

1227

01:05:02,980 --> 01:05:00,430

guess the colors a radar rabbit I think

1228

01:05:05,890 --> 01:05:02,990

all right well hey Ryan thanks for the

1229

01:05:08,230 --> 01:05:05,900

call hey thanks for having me all right

1230

01:05:10,120 --> 01:05:08,240

all right take care thank you

1231

01:05:13,170 --> 01:05:10,130

so just along those lines before we get

1232

01:05:16,839 --> 01:05:13,180

back into the story you know in 1952

1233

01:05:21,010 --> 01:05:16,849

with the sightings over the Capitol and

1234

01:05:24,099 --> 01:05:21,020

in Washington DC I believe they tried to

1235

01:05:27,789 --> 01:05:24,109

debunk that or you know the I don't want

1236

01:05:30,309 --> 01:05:27,799

to say debunk but they tried to come up

1237

01:05:33,309 --> 01:05:30,319

with an explanation of the radar and

1238

01:05:36,460 --> 01:05:33,319

they said that was inversions if I

1239

01:05:40,150 --> 01:05:36,470

remember right yeah I think that was the

1240

01:05:43,150 --> 01:05:40,160

explanation for the 1952 sightings the

1241

01:05:45,970 --> 01:05:43,160

thing to me that makes that one less

1242

01:05:49,500 --> 01:05:45,980

likely is that you have a visual

1243

01:05:52,029 --> 01:05:49,510

sighting along with the radar sighting

1244

01:05:56,579 --> 01:05:52,039

that probably your strongest type

1245

01:06:01,269 --> 01:05:56,589

sightings we had visual and radar are

1246

01:06:04,990 --> 01:06:01,279

b-47 case back in 1957 not only do you

1247

01:06:07,870 --> 01:06:05,000

have not only was there radar from the

1248

01:06:10,930 --> 01:06:07,880

RB 47 but there was radar on the ground

1249

01:06:14,950 --> 01:06:10,940

detecting the object and there was a

1250

01:06:17,049 --> 01:06:14,960

visual sighting of the object yeah you

1251
01:06:20,279 --> 01:06:17,059
know so I interrupted you in the middle

1252
01:06:22,569 --> 01:06:20,289
of a story and I always I always get

1253
01:06:25,599 --> 01:06:22,579
well I gotta say it I always get hate

1254
01:06:28,329 --> 01:06:25,609
mail when I do that so so I'm expecting

1255
01:06:30,010 --> 01:06:28,339
that but do you remember approximately

1256
01:06:30,819 --> 01:06:30,020
where you left off in that the story

1257
01:06:35,589 --> 01:06:30,829
sure

1258
01:06:38,289 --> 01:06:35,599
okay great so okay this story is three

1259
01:06:40,029 --> 01:06:38,299
hunters they're hunting black bear up in

1260
01:06:40,960 --> 01:06:40,039
Ontario and they're in the middle of

1261
01:06:42,970 --> 01:06:40,970
nowhere there's

1262
01:06:45,910 --> 01:06:42,980
cellphone towers there's nothing wrong

1263
01:06:48,480 --> 01:06:45,920

an old logging road so they're headed

1264

01:06:52,089 --> 01:06:48,490

down to this logging road they set up

1265

01:06:56,800 --> 01:06:52,099

their their sites for where they're

1266

01:07:00,490 --> 01:06:56,810

gonna have the black bear it's about the

1267

01:07:01,390 --> 01:07:00,500

ground five six o'clock they shoot some

1268

01:07:07,540 --> 01:07:01,400

black bear

1269

01:07:09,790 --> 01:07:07,550

they video it and then they you know

1270

01:07:11,380 --> 01:07:09,800

they call on the radio to their other

1271

01:07:13,480 --> 01:07:11,390

hunters because there's several groups

1272

01:07:15,940 --> 01:07:13,490

of hunters out on this area but there

1273

01:07:19,260 --> 01:07:15,950

are three right here so they call them

1274

01:07:22,630 --> 01:07:19,270

say hey we've got ours and so they're

1275

01:07:24,670 --> 01:07:22,640

getting ready to pack up and go meet the

1276

01:07:26,370 --> 01:07:24,680

other hunters so they put the black bear

1277

01:07:28,990 --> 01:07:26,380

on the back of a pickup truck and

1278

01:07:31,480 --> 01:07:29,000

they're driving down the road by now

1279

01:07:34,720 --> 01:07:31,490

it's about nine o'clock at night and

1280

01:07:36,310 --> 01:07:34,730

it's dark and there's nothing anywhere

1281

01:07:39,400 --> 01:07:36,320

so there's no lights other than the

1282

01:07:40,900 --> 01:07:39,410

lights and pickup truck you got two guys

1283

01:07:44,550 --> 01:07:40,910

in the front of truck one guy in the

1284

01:07:47,260 --> 01:07:44,560

back the guy in the back happens to be a

1285

01:07:50,349 --> 01:07:47,270

research and development scientist that

1286

01:07:53,140 --> 01:07:50,359

has contracts at the DoD that's what

1287

01:07:56,890 --> 01:07:53,150

really excited me about this case hmm

1288

01:07:58,930 --> 01:07:56,900

so we've got a guy who's got a good head

1289

01:08:00,430 --> 01:07:58,940

on his shoulders and he's singing about

1290

01:08:03,099 --> 01:08:00,440

this pickup they're going down this

1291

01:08:06,790 --> 01:08:03,109

logging road and he sees these lights

1292

01:08:12,370 --> 01:08:06,800

approaching and he he told me his first

1293

01:08:14,020 --> 01:08:12,380

thought was what why would a helicopter

1294

01:08:17,320 --> 01:08:14,030

because these things are moving slow

1295

01:08:19,450 --> 01:08:17,330

right it's low low altitude what's a

1296

01:08:21,459 --> 01:08:19,460

helicopter doing out here in the middle

1297

01:08:26,200 --> 01:08:21,469

of nowhere 9:30 at night so he's not

1298

01:08:27,999 --> 01:08:26,210

feeling real good about this because no

1299

01:08:30,160 --> 01:08:28,009

reason you'd have a helicopter out there

1300

01:08:32,740 --> 01:08:30,170

so they're continuing down the logging

1301

01:08:35,320 --> 01:08:32,750

road and the lights continue in their

1302

01:08:37,510 --> 01:08:35,330

direction until the lights is right in

1303

01:08:41,249 --> 01:08:37,520

front it's starting to cross the road in

1304

01:08:44,019 --> 01:08:41,259

front of them it's about 400 yards away

1305

01:08:46,360 --> 01:08:44,029

if this at that point in time and he

1306

01:08:49,079 --> 01:08:46,370

tells the driver he says stop the truck

1307

01:08:52,479 --> 01:08:49,089

and you know turn off your lights so

1308

01:08:54,229 --> 01:08:52,489

they did he does that and by now the

1309

01:08:57,019 --> 01:08:54,239

object is close enough

1310

01:09:00,769 --> 01:08:57,029

it's about 200 yards at this point in

1311

01:09:03,530 --> 01:09:00,779

time and he can tell this is no

1312

01:09:07,970 --> 01:09:03,540

helicopter and it's shaped like a

1313

01:09:09,740 --> 01:09:07,980

barbell like you took a disc if you know

1314

01:09:11,570 --> 01:09:09,750

your typical Flying Saucer disc on one

1315

01:09:13,849 --> 01:09:11,580

side of the barbell put one on the other

1316

01:09:18,590 --> 01:09:13,859

side of the barbell and it's just

1317

01:09:21,519 --> 01:09:18,600

sitting there in the sky mm-hmm and the

1318

01:09:25,130 --> 01:09:21,529

first thing he does is he he grabs his

1319

01:09:28,070 --> 01:09:25,140

camera that he video the black bear with

1320

01:09:30,170 --> 01:09:28,080

right and so he turns it on soon as he

1321

01:09:32,059 --> 01:09:30,180

turns it on it turns on for about one

1322

01:09:32,510 --> 01:09:32,069

second it turns right back off battery

1323

01:09:36,110 --> 01:09:32,520

dies

1324

01:09:39,800 --> 01:09:36,120

click stop yeah turns it on turns right

1325

01:09:43,039 --> 01:09:39,810

off then grabs his cell phone to use

1326

01:09:45,979 --> 01:09:43,049

that camera well cell phone he said is

1327

01:09:48,410 --> 01:09:45,989

hot and it's in it's acting as if

1328

01:09:53,300 --> 01:09:48,420

someone had just rebooted it so it's

1329

01:09:55,670 --> 01:09:53,310

it's not you know it's not live so now

1330

01:09:57,590 --> 01:09:55,680

he doesn't have you know so he looks for

1331

01:10:02,180 --> 01:09:57,600

the next thing he can do he has his

1332

01:10:05,860 --> 01:10:02,190

hunting rifle which has a nine a a 9 X

1333

01:10:09,950 --> 01:10:05,870

50 millimeter scope on his hunting rifle

1334

01:10:12,320 --> 01:10:09,960

so he he gets out of the truck and he

1335

01:10:15,260 --> 01:10:12,330

holds the hunting rifle on the on the

1336

01:10:19,370 --> 01:10:15,270

hood and he's basically just watching

1337

01:10:25,280 --> 01:10:19,380

and everything this objects doing so

1338

01:10:29,570 --> 01:10:25,290

this so that your audience can visualize

1339

01:10:34,010 --> 01:10:29,580

this imagine the barbell and it it's got

1340

01:10:36,440 --> 01:10:34,020

a plasma that's about 12 inches all the

1341

01:10:40,729 --> 01:10:36,450

way around it kind of an indigo colored

1342

01:10:43,550 --> 01:10:40,739

plasma and the object is slowly spinning

1343

01:10:46,910 --> 01:10:43,560

around it Center by slowly I mean very

1344

01:10:52,190 --> 01:10:46,920

slowly like once a minute it completes

1345

01:10:54,200 --> 01:10:52,200

revolution and there's a stream he

1346

01:10:58,340 --> 01:10:54,210

described it as being similar to the

1347

01:11:01,100 --> 01:10:58,350

aurora borealis coming out of the object

1348

01:11:06,950 --> 01:11:01,110

but it never reaches the ground it just

1349

01:11:07,160 --> 01:11:06,960

kind of stops and the streams the part

1350

01:11:14,570 --> 01:11:07,170

of

1351

01:11:17,090 --> 01:11:14,580

it's not like you know like in a jet

1352

01:11:22,610 --> 01:11:17,100

right here your gases come out of the

1353

01:11:25,189 --> 01:11:22,620

nozzles instead the you know these these

1354

01:11:26,930 --> 01:11:25,199

particles just come out of where

1355

01:11:29,000 --> 01:11:26,940

opposite of wherever the objects

1356

01:11:33,680 --> 01:11:29,010

movement has nothing to do with the any

1357

01:11:37,850 --> 01:11:33,690

you know in particular like a jet engine

1358

01:11:40,370 --> 01:11:37,860

or anything like that and so he's as

1359

01:11:45,380 --> 01:11:40,380

he's watching it the guy in the front

1360

01:11:46,729 --> 01:11:45,390

goes shoot it chase and he's like no I'm

1361

01:11:51,290 --> 01:11:46,739

not gonna shoot something I don't even

1362

01:11:55,220 --> 01:11:51,300

know what it is so he continues taking

1363

01:11:57,500 --> 01:11:55,230

mental notes and then this object starts

1364

01:12:01,939 --> 01:11:57,510

to move again and it it slowly moves off

1365

01:12:02,600 --> 01:12:01,949

and by the time it's about a quarter

1366

01:12:06,050 --> 01:12:02,610

mile away

1367

01:12:07,820 --> 01:12:06,060

which is about oh I guess it's I think

1368

01:12:12,860 --> 01:12:07,830

that's roughly around five hundred yards

1369

01:12:14,270 --> 01:12:12,870

or so he picks up his camera again to

1370

01:12:16,280 --> 01:12:14,280

see if maybe it will work this time

1371

01:12:18,500 --> 01:12:16,290

because it was young turn on for a

1372

01:12:20,590 --> 01:12:18,510

minute turn off this time he turns it on

1373

01:12:23,240 --> 01:12:20,600

and it's working

1374

01:12:28,220 --> 01:12:23,250

and so he thinks he's videoing the

1375

01:12:34,250 --> 01:12:28,230

object and he you know he videos it and

1376

01:12:38,780 --> 01:12:34,260

then the object disappears so then when

1377

01:12:41,120 --> 01:12:38,790

after it's gone he replaces video well

1378

01:12:44,150 --> 01:12:41,130

during the three minutes of his video

1379

01:12:47,090 --> 01:12:44,160

that he video the object Holly you can

1380

01:12:53,900 --> 01:12:47,100

hear are their voices and you can't see

1381

01:12:59,630 --> 01:12:53,910

anything it's just noise so so this he

1382

01:13:05,060 --> 01:12:59,640

became he's got he's got several dozen

1383

01:13:07,430 --> 01:13:05,070

Pat's on his business and and my first

1384

01:13:09,979 --> 01:13:07,440

thought when I heard his story was this

1385

01:13:12,650 --> 01:13:09,989

is pretty interesting I want to meet the

1386

01:13:17,540 --> 01:13:12,660

guy in person so I flew up to where the

1387

01:13:19,040 --> 01:13:17,550

guy lived and I met with him and I had

1388

01:13:20,010 --> 01:13:19,050

already verified that he did have these

1389

01:13:22,680 --> 01:13:20,020

patents

1390

01:13:25,260 --> 01:13:22,690

that and these are projects he does with

1391

01:13:28,920 --> 01:13:25,270

the Department of Defense and I saw

1392

01:13:32,430 --> 01:13:28,930

operation even took me to a department

1393

01:13:33,450 --> 01:13:32,440

defense plant where he said okay Robert

1394

01:13:35,040 --> 01:13:33,460

to get you in here

1395

01:13:39,690 --> 01:13:35,050

I'm gonna tell them that I'm

1396

01:13:41,730 --> 01:13:39,700

interviewing you for a job so so I gave

1397

01:13:43,830 --> 01:13:41,740

them my driver's license and they sign

1398

01:13:45,060 --> 01:13:43,840

me in and we just went through there and

1399

01:13:46,380 --> 01:13:45,070

even just showed me the different

1400

01:13:48,600 --> 01:13:46,390

products he had that they were

1401
01:13:51,750 --> 01:13:48,610
manufacturing the Defense Department

1402
01:13:57,170 --> 01:13:51,760
plant this thing this plant was a full

1403
01:14:03,900 --> 01:13:57,180
acre indoors just everything from

1404
01:14:05,640 --> 01:14:03,910
submarine buoys to lasers to you know

1405
01:14:07,620 --> 01:14:05,650
what have you and they weren't just

1406
01:14:09,300 --> 01:14:07,630
making his products they were making

1407
01:14:14,370 --> 01:14:09,310
products from a lot of different people

1408
01:14:18,750 --> 01:14:14,380
did you know so he was just showing me

1409
01:14:21,630 --> 01:14:18,760
this and then when I went to it he had

1410
01:14:27,480 --> 01:14:21,640
five engineers at work for him he had

1411
01:14:30,270 --> 01:14:27,490
his own our research building he had a

1412
01:14:33,150 --> 01:14:30,280
very expensive car inside there and the

1413
01:14:34,950 --> 01:14:33,160

guy clearly has plenty of money so to me

1414

01:14:37,020 --> 01:14:34,960

Martin it was like okay so why would

1415

01:14:38,610 --> 01:14:37,030

this guy make this this is one of these

1416

01:14:41,250 --> 01:14:38,620

stories right because I've got a very

1417

01:14:43,050 --> 01:14:41,260

credible witness I mean I've got a guy

1418

01:14:47,850 --> 01:14:43,060

with a science background that saw this

1419

01:14:53,190 --> 01:14:47,860

hmm and it's up close so you're left

1420

01:14:55,700 --> 01:14:53,200

with only really two hypotheses you know

1421

01:14:59,910 --> 01:14:55,710

what had happened or two guys lying

1422

01:15:03,330 --> 01:14:59,920

you know there's it's kind of hard to

1423

01:15:06,120 --> 01:15:03,340

believe it was a mass hallucination of

1424

01:15:08,760 --> 01:15:06,130

him and the other two hunters and we

1425

01:15:11,400 --> 01:15:08,770

interviewed one of the other hunters on

1426

01:15:12,060 --> 01:15:11,410

video and when we interviewed this guy

1427

01:15:15,990 --> 01:15:12,070

too

1428

01:15:20,220 --> 01:15:16,000

but we we had to black out their face

1429

01:15:23,190 --> 01:15:20,230

and their voices because he does not

1430

01:15:27,270 --> 01:15:23,200

want his name or identity known because

1431

01:15:29,910 --> 01:15:27,280

he has people that he employs and he

1432

01:15:30,980 --> 01:15:29,920

doesn't want to take the risk of losing

1433

01:15:33,770 --> 01:15:30,990

his

1434

01:15:34,870 --> 01:15:33,780

vo deep contracts over something like

1435

01:15:39,860 --> 01:15:34,880

this

1436

01:15:41,510 --> 01:15:39,870

did he actually say in the video in the

1437

01:15:47,300 --> 01:15:41,520

interview did he actually say that he

1438

01:15:49,100 --> 01:15:47,310

did contract work for the do D or not I

1439

01:15:50,750 --> 01:15:49,110

believe he did I'd have to go look at

1440

01:15:52,790 --> 01:15:50,760

the video yeah I think he does say that

1441

01:15:55,130 --> 01:15:52,800

mm-hmm and I know he did as I went to

1442

01:15:57,230 --> 01:15:55,140

his plant and I saw the work he was

1443

01:15:59,870 --> 01:15:57,240

doing you know and I went through the

1444

01:16:01,610 --> 01:15:59,880

DoD facility so there's no doubt that he

1445

01:16:05,860 --> 01:16:01,620

does so the question just becomes okay

1446

01:16:09,020 --> 01:16:05,870

why why would this guy make up the story

1447

01:16:11,030 --> 01:16:09,030

I mean some people might say oh he's a

1448

01:16:13,910 --> 01:16:11,040

government plan right they're trying to

1449

01:16:16,520 --> 01:16:13,920

pull yeah you know your leg right like

1450

01:16:17,930 --> 01:16:16,530

there's no reason this guy would do that

1451

01:16:19,490 --> 01:16:17,940

there's and there's no reason to

1452

01:16:22,210 --> 01:16:19,500

government really would do that because

1453

01:16:25,640 --> 01:16:22,220

if you think about it you follow Jesus

1454

01:16:27,740 --> 01:16:25,650

best worst enemy the government doesn't

1455

01:16:28,910 --> 01:16:27,750

have any have to do anything to kill it

1456

01:16:31,610 --> 01:16:28,920

yeah I know

1457

01:16:35,120 --> 01:16:31,620

the Roswell slides and you could go on

1458

01:16:37,310 --> 01:16:35,130

and on yeah yeah how did you first hear

1459

01:16:39,530 --> 01:16:37,320

about did he report the story to one of

1460

01:16:41,840 --> 01:16:39,540

the UFO centers or how did you hear

1461

01:16:48,020 --> 01:16:41,850

about the story to begin with okay so

1462

01:16:52,220 --> 01:16:48,030

this guy reported the story and in the

1463

01:16:53,720 --> 01:16:52,230

MUFON and the the guy that went and

1464

01:16:57,370 --> 01:16:53,730

investigated the story was an

1465

01:16:59,840 --> 01:16:57,380

ex-policeman and he cut in the

1466

01:17:02,090 --> 01:16:59,850

ex-policeman who was a MUFON field

1467

01:17:04,970 --> 01:17:02,100

investigator contacted me because I was

1468

01:17:08,030 --> 01:17:04,980

he just asked grant hey who can I have

1469

01:17:14,300 --> 01:17:08,040

helped me out on this case so this guy

1470

01:17:16,940 --> 01:17:14,310

was open-minded enough to say hey you

1471

01:17:19,310 --> 01:17:16,950

know let me get some help on this so he

1472

01:17:23,120 --> 01:17:19,320

and I talked about it you know Stewart

1473

01:17:26,750 --> 01:17:23,130

he met with with the witness at least

1474

01:17:33,380 --> 01:17:26,760

two to three times and then I flew up to

1475

01:17:35,540 --> 01:17:33,390

meet with a witness and I just wanted to

1476

01:17:38,510 --> 01:17:35,550

try to figure out okay what what is the

1477

01:17:40,610 --> 01:17:38,520

motivation here and I can't I could not

1478

01:17:43,290 --> 01:17:40,620

see any motivation for him to make this

1479

01:17:48,780 --> 01:17:45,960

because it's not like he you know he's

1480

01:17:50,970 --> 01:17:48,790

remaining anonymous mm-hm so he can't

1481

01:17:53,150 --> 01:17:50,980

make money from it and he doesn't need

1482

01:17:56,940 --> 01:17:53,160

money because he has plenty of money

1483

01:17:59,490 --> 01:17:56,950

there just no reason for him to make it

1484

01:17:59,820 --> 01:17:59,500

up now one thing I can I could tell from

1485

01:18:03,720 --> 01:17:59,830

it

1486

01:18:06,000 --> 01:18:03,730

Martin is he is very I guess you might

1487

01:18:08,610 --> 01:18:06,010

say transfixed with what happened now I

1488

01:18:10,470 --> 01:18:08,620

mean he's really wanting to okay how

1489

01:18:14,700 --> 01:18:10,480

could I figure this out I mean he's had

1490

01:18:16,020 --> 01:18:14,710

his own engineers worked on models of

1491

01:18:18,330 --> 01:18:16,030

how could this happen

1492

01:18:21,570 --> 01:18:18,340

and for example you know where his video

1493

01:18:23,400 --> 01:18:21,580

didn't work in his telephone mmm-hmm he

1494

01:18:27,030 --> 01:18:23,410

doesn't you know he doesn't jump to the

1495

01:18:29,490 --> 01:18:27,040

conclusion over you know that ship

1496

01:18:32,070 --> 01:18:29,500

didn't want me to video it so it you

1497

01:18:34,890 --> 01:18:32,080

know wiped out my iPhone that's not what

1498

01:18:37,170 --> 01:18:34,900

the way he looked at it at all he said

1499

01:18:39,450 --> 01:18:37,180

okay hey I've got a plasma that's 12

1500

01:18:41,970 --> 01:18:39,460

inches around this object that takes a

1501

01:18:45,180 --> 01:18:41,980

lot of power so he had his engineers

1502

01:18:48,390 --> 01:18:45,190

calculate how much power would it take

1503

01:18:52,230 --> 01:18:48,400

to create an indigo plasma in the

1504

01:18:58,020 --> 01:18:52,240

atmosphere and he he made the assumption

1505

01:19:02,430 --> 01:18:58,030

that the frequency of the plasma was the

1506

01:19:06,960 --> 01:19:02,440

same as you can make the color indigo

1507

01:19:08,370 --> 01:19:06,970

with an electrical arcs and I don't

1508

01:19:11,220 --> 01:19:08,380

recall the frequency I'd have to go look

1509

01:19:12,720 --> 01:19:11,230

it up what he did is he had his engineer

1510

01:19:15,950 --> 01:19:12,730

say okay that's the frequency of that

1511

01:19:19,590 --> 01:19:15,960

how much power would it take to

1512

01:19:23,220 --> 01:19:19,600

basically turn 12 inches of atmosphere

1513

01:19:24,630 --> 01:19:23,230

all around this craft into a plasma in

1514

01:19:28,050 --> 01:19:24,640

the answer they came back with was

1515

01:19:31,070 --> 01:19:28,060

basically the same amount of power as a

1516

01:19:34,230 --> 01:19:31,080

small nuclear power plant produce well

1517

01:19:38,190 --> 01:19:34,240

and and so from there he said okay well

1518

01:19:41,370 --> 01:19:38,200

if I guess that much power the en field

1519

01:19:43,050 --> 01:19:41,380

summit is going to be so strong that you

1520

01:19:46,020 --> 01:19:43,060

know my camera's not going to work nor

1521

01:19:49,680 --> 01:19:46,030

will my cell phone work so he believes

1522

01:19:52,590 --> 01:19:49,690

that that was just an artifact of the

1523

01:19:54,630 --> 01:19:52,600

field around the craft and the once he

1524

01:19:56,510 --> 01:19:54,640

thinks that's why once it went farther

1525

01:19:59,270 --> 01:19:56,520

away and he turns

1526

01:20:01,220 --> 01:19:59,280

a more back on that he was able to get

1527

01:20:03,740 --> 01:20:01,230

he was able to get the audio but he

1528

01:20:09,950 --> 01:20:03,750

wasn't able to get the video oh it still

1529

01:20:12,320 --> 01:20:09,960

had some effect on it yeah so now when

1530

01:20:15,110 --> 01:20:12,330

you're talking about that strong of a

1531

01:20:18,500 --> 01:20:15,120

signal isn't that could that be

1532

01:20:22,730 --> 01:20:18,510

detrimental to your health or you know

1533

01:20:24,170 --> 01:20:22,740

plant and animal health well it could be

1534

01:20:26,090 --> 01:20:24,180

if you're exposed to it for a

1535

01:20:29,810 --> 01:20:26,100

significant you know long enough period

1536

01:20:32,750 --> 01:20:29,820

of time but they would just you know it

1537

01:20:35,360 --> 01:20:32,760

wasn't a real long exposure I see it was

1538

01:20:38,030 --> 01:20:35,370

you know four five hundred feet away

1539

01:20:41,540 --> 01:20:38,040

from them so I mean basically it was

1540

01:20:44,030 --> 01:20:41,550

just enough of an e/m field to probably

1541

01:20:49,360 --> 01:20:44,040

this is he and I talked missus best

1542

01:20:52,100 --> 01:20:49,370

guess is that probably it was a Sony I

1543

01:20:54,710 --> 01:20:52,110

came in the brain it was one of the Sony

1544

01:20:59,180 --> 01:20:54,720

cameras and it probably has a safety

1545

01:21:01,310 --> 01:20:59,190

feature to keep from from a camera being

1546

01:21:02,780 --> 01:21:01,320

destroyed so it probably says okay if I

1547

01:21:07,490 --> 01:21:02,790

picked up more the next amount of

1548

01:21:10,430 --> 01:21:07,500

current in my you know in my circuitry

1549

01:21:12,080 --> 01:21:10,440

then I just turn off that I you know you

1550

01:21:19,550 --> 01:21:12,090

have a breaker or something someone to

1551

01:21:22,610 --> 01:21:19,560

that thing cuts off the so that's what

1552

01:21:24,860 --> 01:21:22,620

he probably had and probably the same

1553

01:21:28,160 --> 01:21:24,870

thing with a cell phone and they also

1554

01:21:29,660 --> 01:21:28,170

had a motorola radios that they used to

1555

01:21:33,110 --> 01:21:29,670

communicate because there's no cell

1556

01:21:35,570 --> 01:21:33,120

phone towers in that area hmm and their

1557

01:21:38,050 --> 01:21:35,580

Motorola radio units were fried those

1558

01:21:44,210 --> 01:21:38,060

didn't survive Wow

1559

01:21:46,940 --> 01:21:44,220

wow that's amazing so did when this was

1560

01:21:53,330 --> 01:21:46,950

happening did he hear any type of sound

1561

01:21:58,580 --> 01:21:53,340

or anything do you talk about however he

1562

01:22:03,050 --> 01:21:58,590

took when I was visiting him we he's got

1563

01:22:05,480 --> 01:22:03,060

his camera it's locked up in a safe it's

1564

01:22:09,230 --> 01:22:05,490

okay he had his camera and we hooked it

1565

01:22:10,250 --> 01:22:09,240

up to an oscilloscope and he he

1566

01:22:13,520 --> 01:22:10,260

basically

1567

01:22:16,040 --> 01:22:13,530

feels that there is a real low-level

1568

01:22:18,529 --> 01:22:16,050

sound that's being generated it was

1569

01:22:21,020 --> 01:22:18,539

picked up on the video camera but it

1570

01:22:23,620 --> 01:22:21,030

wasn't a sound that he at least he

1571

01:22:26,390 --> 01:22:23,630

didn't notice it when he was out there

1572

01:22:27,020 --> 01:22:26,400

when you talk to someone I love talking

1573

01:22:30,259 --> 01:22:27,030

to people

1574

01:22:32,270 --> 01:22:30,269

where an event happens to and you know

1575

01:22:35,839 --> 01:22:32,280

they're not really they never had an

1576

01:22:38,419 --> 01:22:35,849

interest in the field at all and they

1577

01:22:40,040 --> 01:22:38,429

take it serious and you know what is it

1578

01:22:46,310 --> 01:22:40,050

all that I love it

1579

01:22:49,279 --> 01:22:46,320

did does does he now wonder you know

1580

01:22:51,049 --> 01:22:49,289

about if it was say extraterrestrial I

1581

01:22:55,609 --> 01:22:51,059

mean his Heath is he thinking all those

1582

01:22:57,109 --> 01:22:55,619

different thoughts no yeah first thing

1583

01:22:59,870 --> 01:22:57,119

he thought about was okay this is

1584

01:23:03,020 --> 01:22:59,880

something that we have uh-huh because

1585

01:23:05,479 --> 01:23:03,030

he's you know do the contacts he has

1586

01:23:08,720 --> 01:23:05,489

been you know hey is there anything we

1587

01:23:12,950 --> 01:23:08,730

have like this cuz he and I talked about

1588

01:23:16,310 --> 01:23:12,960

that yeah and he said the one guy he

1589

01:23:20,959 --> 01:23:16,320

knows basically gave him an answer

1590

01:23:26,240 --> 01:23:20,969

he said the guy told him if if we had

1591

01:23:28,729 --> 01:23:26,250

something like this I wouldn't give you

1592

01:23:32,600 --> 01:23:28,739

an answer one way or another and the

1593

01:23:36,379 --> 01:23:32,610

only thing I can tell you is I don't

1594

01:23:39,350 --> 01:23:36,389

know anything about it so basically the

1595

01:23:41,509 --> 01:23:39,360

guy was telling him that they don't have

1596

01:23:43,310 --> 01:23:41,519

anything like that which I think he

1597

01:23:46,580 --> 01:23:43,320

already suspected right I mean because

1598

01:23:51,220 --> 01:23:46,590

if you can't we we just don't have the

1599

01:23:56,180 --> 01:23:51,230

ability to take a heavy large object and

1600

01:23:59,390 --> 01:23:56,190

to let it just sit there without moving

1601
01:24:01,100 --> 01:23:59,400
you know unless it's a balloon why do it

1602
01:24:04,310 --> 01:24:01,110
unless it's lighter than air or unless

1603
01:24:06,410 --> 01:24:04,320
it's like a helicopter right but not an

1604
01:24:08,270 --> 01:24:06,420
object that makes no noise and it's

1605
01:24:13,700 --> 01:24:08,280
heavy and large and it just sits there

1606
01:24:16,189 --> 01:24:13,710
not something we can do right right yeah

1607
01:24:20,149 --> 01:24:16,199
I find I find sightings like that

1608
01:24:22,040 --> 01:24:20,159
fascinating and I have somehow either

1609
01:24:23,569 --> 01:24:22,050
read something because I do recall

1610
01:24:25,850 --> 01:24:23,579
seeing a

1611
01:24:27,680 --> 01:24:25,860
graphic that almost looked like a

1612
01:24:31,189 --> 01:24:27,690
barbell unless it was another UFO

1613
01:24:34,100 --> 01:24:31,199

sighting yeah he actually had his

1614

01:24:38,030 --> 01:24:34,110

engineers make a really neat graphic

1615

01:24:40,850 --> 01:24:38,040

that you can it's a PDF and you can

1616

01:24:44,089 --> 01:24:40,860

actually spin it by spinning I mean you

1617

01:24:45,500 --> 01:24:44,099

can on your computer you can turn it you

1618

01:24:49,100 --> 01:24:45,510

know you can make it look at you say

1619

01:24:52,129 --> 01:24:49,110

song it's it's a 3d CAD drawing

1620

01:24:54,080 --> 01:24:52,139

basically and you can just turn the

1621

01:24:56,780 --> 01:24:54,090

object any way you want and you see it

1622

01:24:59,120 --> 01:24:56,790

from all different brains all right

1623

01:25:02,089 --> 01:24:59,130

going back to UFO data we were talking

1624

01:25:05,030 --> 01:25:02,099

about that earlier what happens in a

1625

01:25:07,700 --> 01:25:05,040

situation like this when there is plasma

1626

01:25:11,270 --> 01:25:07,710

and you have a unit you're trying to

1627

01:25:13,490 --> 01:25:11,280

collect data with does the same thing

1628

01:25:18,530 --> 01:25:13,500

happened at either will fry it or it'll

1629

01:25:20,089 --> 01:25:18,540

you know not work yeah I mean if let's

1630

01:25:22,700 --> 01:25:20,099

just say there had been a UFO data

1631

01:25:24,410 --> 01:25:22,710

system there like the one that they

1632

01:25:28,040 --> 01:25:24,420

developed a model it I'll take a

1633

01:25:34,359 --> 01:25:28,050

spectrograph what would have happened

1634

01:25:37,660 --> 01:25:34,369

because it's a battery-operated DSLR

1635

01:25:41,540 --> 01:25:37,670

camera system so it's very similar to

1636

01:25:44,500 --> 01:25:41,550

like it will do video right and it would

1637

01:25:47,689 --> 01:25:44,510

have shut down also just like his vid

1638

01:25:51,229 --> 01:25:47,699

that must be so frustrating I so many

1639

01:25:57,709 --> 01:25:51,239

cases you hear about well the car stalls

1640

01:26:00,169 --> 01:25:57,719

the cameras happens a lot where a

1641

01:26:03,979 --> 01:26:00,179

battery looks like that just dies when

1642

01:26:06,490 --> 01:26:03,989

it was fully charged and it must all you

1643

01:26:09,680 --> 01:26:06,500

know be related to the you know the same

1644

01:26:14,629 --> 01:26:09,690

propulsion system or something whatever

1645

01:26:18,109 --> 01:26:14,639

it is all fascinating stuff yeah I mean

1646

01:26:20,270 --> 01:26:18,119

the thing that I would like done if

1647

01:26:24,080 --> 01:26:20,280

there the resources were available right

1648

01:26:25,729 --> 01:26:24,090

which the resources are there if there

1649

01:26:28,669 --> 01:26:25,739

was a government organization to do it

1650

01:26:34,189 --> 01:26:28,679

right because you've got a known camera

1651
01:26:36,500 --> 01:26:34,199
model it was a sony cybershot and we

1652
01:26:37,340 --> 01:26:36,510
know the exact model right and so all

1653
01:26:40,910 --> 01:26:37,350
you need is you

1654
01:26:42,920 --> 01:26:40,920
the design engineers tell you okay how

1655
01:26:45,230 --> 01:26:42,930
does the shutdown for how does the

1656
01:26:48,200 --> 01:26:45,240
shutdown mechanism work on that camera

1657
01:26:51,460 --> 01:26:48,210
mm-hmm and what and then you would just

1658
01:26:54,350 --> 01:26:51,470
model okay what kind of frequencies

1659
01:26:56,900 --> 01:26:54,360
would shut it down and it brought power

1660
01:26:59,210 --> 01:26:56,910
levels and then the same thing with the

1661
01:27:01,400 --> 01:26:59,220
cell phone right and then you look at

1662
01:27:03,730 --> 01:27:01,410
where they intersect in other words what

1663
01:27:08,920 --> 01:27:03,740

what power level and what frequency

1664

01:27:12,380 --> 01:27:08,930

would basically cause the cellphone to

1665

01:27:14,770 --> 01:27:12,390

basically turn off and read restart up

1666

01:27:17,510 --> 01:27:14,780

again cause the camera to shut down

1667

01:27:23,360 --> 01:27:17,520

within a second of being turned on and

1668

01:27:29,630 --> 01:27:23,370

cause the what you mccumbee motorola

1669

01:27:31,760 --> 01:27:29,640

field radios to fry and the truck engine

1670

01:27:33,380 --> 01:27:31,770

is unaffected yeah I was just going to

1671

01:27:35,330 --> 01:27:33,390

ask you about I was gonna ask you about

1672

01:27:40,070 --> 01:27:35,340

the truck so nothing at all happened

1673

01:27:42,620 --> 01:27:40,080

with the truck right the truck the

1674

01:27:45,110 --> 01:27:42,630

engine they turned off the lights but

1675

01:27:49,670 --> 01:27:45,120

the engine was not you know did not cut

1676

01:27:51,530 --> 01:27:49,680

or die well that is just so baffling it

1677

01:27:54,170 --> 01:27:51,540

seems like oh yeah it's some type of

1678

01:27:57,020 --> 01:27:54,180

frequency somewhere in between but you

1679

01:27:59,510 --> 01:27:57,030

know you have car computers today are so

1680

01:28:07,400 --> 01:27:59,520

complicated it seems like it would it

1681

01:28:09,470 --> 01:28:07,410

would somehow affect that I'm not an

1682

01:28:13,580 --> 01:28:09,480

electrical engineer so I don't I don't

1683

01:28:16,940 --> 01:28:13,590

know you know how you know current cars

1684

01:28:20,470 --> 01:28:16,950

and trucks are designed in terms of you

1685

01:28:24,410 --> 01:28:20,480

know how susceptible are they to am feel

1686

01:28:25,610 --> 01:28:24,420

so you know we have we're coming up at

1687

01:28:28,040 --> 01:28:25,620

the top of the hour but I'm gonna go a

1688

01:28:29,960 --> 01:28:28,050

little longer because of the technical

1689

01:28:30,730 --> 01:28:29,970

issues that we had if that's okay with

1690

01:28:36,350 --> 01:28:30,740

you

1691

01:28:39,530 --> 01:28:36,360

another another five or so after what do

1692

01:28:41,060 --> 01:28:39,540

you think is what's your best the only

1693

01:28:46,160 --> 01:28:41,070

thing I can ask is what's your best

1694

01:28:48,530 --> 01:28:46,170

guess on you know I I think you

1695

01:28:50,770 --> 01:28:48,540

understand that you know something's

1696

01:28:52,900 --> 01:28:50,780

happening

1697

01:28:57,459 --> 01:28:52,910

so I'm gonna ask you what your best

1698

01:28:59,170 --> 01:28:57,469

guess is to what it could be okay so

1699

01:29:02,110 --> 01:28:59,180

that's a that's a good question Martin

1700

01:29:05,860 --> 01:29:02,120

here's you're basically asking me what's

1701

01:29:09,760 --> 01:29:05,870

my view of the UFO phenomena and okay so

1702

01:29:12,490 --> 01:29:09,770

this is my answer based on ten years of

1703

01:29:18,430 --> 01:29:12,500

studying it and I probably average 15

1704

01:29:21,959 --> 01:29:18,440

hours a week working on it know in my

1705

01:29:24,550 --> 01:29:21,969

mind there's no doubt that if they

1706

01:29:27,610 --> 01:29:24,560

physically exist right in other words

1707

01:29:31,240 --> 01:29:27,620

I'm saying the UFO phenomena it's not

1708

01:29:37,870 --> 01:29:31,250

just light from the sky it's an actual

1709

01:29:39,459 --> 01:29:37,880

physical object and as far as I can tell

1710

01:29:41,560 --> 01:29:39,469

it appears to be intelligently

1711

01:29:45,450 --> 01:29:41,570

controlled so I feel pretty confident

1712

01:29:49,810 --> 01:29:45,460

that it's intelligently controlled now

1713

01:29:51,550 --> 01:29:49,820

what what is it you know where does it

1714

01:29:53,440 --> 01:29:51,560

come from there's no way to really know

1715

01:29:55,780 --> 01:29:53,450

that right I mean there's no way to know

1716

01:29:59,830 --> 01:29:55,790

from where does it originate now I can

1717

01:30:02,700 --> 01:29:59,840

give my best hypothesis right which is

1718

01:30:05,560 --> 01:30:02,710

just a guess based on the facts

1719

01:30:08,400 --> 01:30:05,570

information that we have if I had to

1720

01:30:12,580 --> 01:30:08,410

guess I would say it probably was

1721

01:30:16,000 --> 01:30:12,590

extraterrestrial and my guess is it's

1722

01:30:19,440 --> 01:30:16,010

more than one extraterrestrial source

1723

01:30:24,840 --> 01:30:19,450

just because there's so many different

1724

01:30:27,220 --> 01:30:24,850

shapes and you know capabilities and

1725

01:30:29,320 --> 01:30:27,230

overtime right this started right after

1726

01:30:32,650 --> 01:30:29,330

World War two or actually during World

1727

01:30:36,970 --> 01:30:32,660

War two and in the beginning it was

1728

01:30:40,270 --> 01:30:36,980

dominated by the disc shape and read AI

1729

01:30:42,250 --> 01:30:40,280

would say well I want it's not that I

1730

01:30:44,590 --> 01:30:42,260

would say I've actually looked at it and

1731

01:30:48,640 --> 01:30:44,600

it's it's now dominated by the triangle

1732

01:30:53,020 --> 01:30:48,650

shape and no the new model so right

1733

01:30:55,479 --> 01:30:53,030

let's changed you know over time and the

1734

01:30:59,830 --> 01:30:55,489

characteristics right back in the 70s

1735

01:31:03,100 --> 01:30:59,840

and 80s it was very 60s and 70s very

1736

01:31:04,090 --> 01:31:03,110

common for automobiles to just suddenly

1737

01:31:06,040 --> 01:31:04,100

die

1738

01:31:07,150 --> 01:31:06,050

right when they were in the presence of

1739

01:31:09,940 --> 01:31:07,160

a mmm

1740

01:31:11,650 --> 01:31:09,950

one of these look that does that rarely

1741

01:31:15,910 --> 01:31:11,660

there's a few cases but it rarely

1742

01:31:17,170 --> 01:31:15,920

happens today so the cure and maybe

1743

01:31:19,390 --> 01:31:17,180

that's because of the way we've changed

1744

01:31:23,460 --> 01:31:19,400

the design of the car when we went from

1745

01:31:27,390 --> 01:31:23,470

the you know the old fashioned

1746

01:31:30,370 --> 01:31:27,400

distributor system was a spark ignition

1747

01:31:32,830 --> 01:31:30,380

system to the modern which beautiful so

1748

01:31:36,130 --> 01:31:32,840

maybe that's why I don't know but a lot

1749

01:31:39,780 --> 01:31:36,140

of things in the phenomenon change so I

1750

01:31:47,080 --> 01:31:39,790

think the best bets extraterrestrial and

1751

01:31:50,200 --> 01:31:47,090

to me if you argue it not from the UFOs

1752

01:31:52,180 --> 01:31:50,210

people see here but just forget that for

1753

01:31:57,400 --> 01:31:52,190

a minute and just look at all the

1754

01:32:00,280 --> 01:31:57,410

extrasolar planets that we see right I

1755

01:32:02,980 --> 01:32:00,290

mean we we've now catalogued over 3,000

1756

01:32:04,990 --> 01:32:02,990

extrasolar planets mm-hmm in a large

1757

01:32:09,730 --> 01:32:05,000

number not a large a good number of

1758

01:32:12,610 --> 01:32:09,740

those are in the habitable zones and if

1759

01:32:15,310 --> 01:32:12,620

you ask for example some of the

1760

01:32:17,290 --> 01:32:15,320

scientists in SETI about

1761

01:32:19,990 --> 01:32:17,300

extraterrestrial life they will readily

1762

01:32:22,900 --> 01:32:20,000

admit that intelligent extraterrestrial

1763

01:32:25,000 --> 01:32:22,910

life exists out there I mean that's why

1764

01:32:26,680 --> 01:32:25,010

they're that's why they're doing the

1765

01:32:29,740 --> 01:32:26,690

work they're doing because they believe

1766

01:32:32,050 --> 01:32:29,750

it exists so they're fine

1767

01:32:33,970 --> 01:32:32,060

telling you that there's life that

1768

01:32:36,660 --> 01:32:33,980

exists and if you ask them with some of

1769

01:32:40,000 --> 01:32:36,670

that life much more intelligent than us

1770

01:32:43,270 --> 01:32:40,010

they will say yes some of it's got to be

1771

01:32:45,850 --> 01:32:43,280

more intelligent than us so then you ask

1772

01:32:50,050 --> 01:32:45,860

the next question do they know we're

1773

01:32:52,120 --> 01:32:50,060

here and now you may get four answers

1774

01:32:55,660 --> 01:32:52,130

from them but to me the answer is

1775

01:32:57,850 --> 01:32:55,670

absolutely yes and the reason is just

1776

01:33:00,970 --> 01:32:57,860

look at what we've done in the last 20

1777

01:33:03,430 --> 01:33:00,980

years absolutely like where we've gone

1778

01:33:06,550 --> 01:33:03,440

from zero extrasolar planets to we've

1779

01:33:09,970 --> 01:33:06,560

now catalogue over four thousand I would

1780

01:33:14,560 --> 01:33:09,980

say well within 20 years of being able

1781

01:33:16,480 --> 01:33:14,570

to identify the chemical species in the

1782

01:33:19,540 --> 01:33:16,490

atmosphere some of these planets

1783

01:33:21,730 --> 01:33:19,550

right so you can imagine civilization

1784

01:33:24,640 --> 01:33:21,740

hundreds of years more advanced than us

1785

01:33:28,090 --> 01:33:24,650

they've already realized that there's a

1786

01:33:30,970 --> 01:33:28,100

planet going around our Sun the planet

1787

01:33:34,690 --> 01:33:30,980

Earth that has oxygen nitrogen and

1788

01:33:38,550 --> 01:33:34,700

atmosphere they may even be able to

1789

01:33:42,100 --> 01:33:38,560

detect that when it's not facing the Sun

1790

01:33:44,470 --> 01:33:42,110

there's a certain frequencies of life

1791

01:33:47,110 --> 01:33:44,480

that seems to dominate across the land

1792

01:33:51,520 --> 01:33:47,120

masses right all that light we bit

1793

01:33:55,410 --> 01:33:51,530

mm-hmm and then they may also may even

1794

01:33:58,360 --> 01:33:55,420

be able to detect isotopes of uranium

1795

01:34:00,520 --> 01:33:58,370

and plutonium in our atmosphere because

1796

01:34:03,310 --> 01:34:00,530

those still exists from our above-ground

1797

01:34:06,940 --> 01:34:03,320

bombings from the fifties and sixties so

1798

01:34:09,730 --> 01:34:06,950

you've got strontium isotopes uranium

1799

01:34:12,070 --> 01:34:09,740

plutonium and so they could look at that

1800

01:34:14,530 --> 01:34:12,080

and they could go okay there's someone

1801
01:34:18,220 --> 01:34:14,540
that lives there that has the capability

1802
01:34:19,540 --> 01:34:18,230
of doing nuclear fission fusion now

1803
01:34:24,730 --> 01:34:19,550
whether they still exist

1804
01:34:27,910 --> 01:34:24,740
they may not know yeah that the the only

1805
01:34:30,790 --> 01:34:27,920
question becomes can they get here right

1806
01:34:33,880 --> 01:34:30,800
and that's where science becomes very

1807
01:34:36,370 --> 01:34:33,890
closed-minded and I I think it's just

1808
01:34:38,080 --> 01:34:36,380
that we just because we don't have the

1809
01:34:40,780 --> 01:34:38,090
physics of that figured out yet doesn't

1810
01:34:43,900 --> 01:34:40,790
mean that it can't be out there and it

1811
01:34:45,430 --> 01:34:43,910
can't be figured out right and interest

1812
01:34:47,560 --> 01:34:45,440
but it's becoming a little more

1813
01:34:50,290 --> 01:34:47,570

open-minded I went to a conference in

1814

01:34:52,060 --> 01:34:50,300

Huntsville only I guess was three or

1815

01:34:55,800 --> 01:34:52,070

four months ago and you know what this

1816

01:34:59,470 --> 01:34:55,810

conference was about how could we get a

1817

01:35:01,660 --> 01:34:59,480

space a small spacecraft to Alpha

1818

01:35:04,780 --> 01:35:01,670

Centauri which is four light-years away

1819

01:35:08,380 --> 01:35:04,790

yeah within twenty years

1820

01:35:12,960 --> 01:35:08,390

get it there point in that who was at

1821

01:35:17,020 --> 01:35:12,970

this conference NASA the US Air Force a

1822

01:35:19,260 --> 01:35:17,030

large number of major universities that

1823

01:35:24,720 --> 01:35:19,270

you know do research for the Air Force

1824

01:35:27,790 --> 01:35:24,730

in the basic concept was I mean it's

1825

01:35:30,010 --> 01:35:27,800

it's technically possible for us to

1826

01:35:33,250 --> 01:35:30,020

actually send a very small

1827

01:35:35,650 --> 01:35:33,260

spacecraft to Alpha Centauri which we

1828

01:35:38,590 --> 01:35:35,660

found we know there's a planet there in

1829

01:35:41,500 --> 01:35:38,600

the habit of habitable zone of Alpha

1830

01:35:46,270 --> 01:35:41,510

Centauri and get it there in 20 years

1831

01:35:50,800 --> 01:35:46,280

and the basic idea was to use a huge

1832

01:35:55,440 --> 01:35:50,810

Bank of laser systems on the earth or on

1833

01:36:00,460 --> 01:35:55,450

the moon and to use those lasers to

1834

01:36:03,550 --> 01:36:00,470

accelerate a an object that's basically

1835

01:36:07,800 --> 01:36:03,560

I don't know probably an ounce and rate

1836

01:36:10,990 --> 01:36:07,810

or less is this the sale the sale thing

1837

01:36:16,960 --> 01:36:11,000

well this is not as I guess you might

1838

01:36:20,410 --> 01:36:16,970

call it a sale basically hit this sale

1839

01:36:23,140 --> 01:36:20,420

and you accelerate it to 20% of the

1840

01:36:24,760 --> 01:36:23,150

speed of light mm-hmm and they've done

1841

01:36:27,610 --> 01:36:24,770

the calculations it's going to take in

1842

01:36:30,850 --> 01:36:27,620

11 minutes it would be at 20% of the

1843

01:36:33,060 --> 01:36:30,860

speed of light but the key here is the

1844

01:36:37,660 --> 01:36:33,070

weight the weight is almost nothing

1845

01:36:42,580 --> 01:36:37,670

you're basically taking a silicon chip

1846

01:36:44,650 --> 01:36:42,590

and the ability to take photographs and

1847

01:36:46,440 --> 01:36:44,660

you know just do a few basic

1848

01:36:50,760 --> 01:36:46,450

measurements like your cell phone to do

1849

01:36:54,970 --> 01:36:50,770

and and that becomes your spacecraft and

1850

01:36:56,860 --> 01:36:54,980

in 20 years they could get it to Alpha

1851
01:36:59,770 --> 01:36:56,870
Centauri now they couldn't get it to

1852
01:37:01,390 --> 01:36:59,780
slow down so it's gonna be like flying

1853
01:37:04,990 --> 01:37:01,400
through their solar system and just

1854
01:37:06,550 --> 01:37:05,000
snapping pictures as it goes by and then

1855
01:37:09,880 --> 01:37:06,560
sending them back and that would be it

1856
01:37:12,460 --> 01:37:09,890
but the point there is that we're

1857
01:37:14,530 --> 01:37:12,470
already starting to think about that so

1858
01:37:16,720 --> 01:37:14,540
where would sure civilization it

1859
01:37:19,990 --> 01:37:16,730
hundreds of years more advanced than us

1860
01:37:23,080 --> 01:37:20,000
to be right I'm just a thought on that

1861
01:37:25,900 --> 01:37:23,090
now it does wait actually this is just a

1862
01:37:35,650 --> 01:37:25,910
formal a person here does wait really

1863
01:37:39,540 --> 01:37:35,660

matter in space for travel does the mass

1864

01:37:43,090 --> 01:37:39,550

of the object makes the difference so

1865

01:37:45,580 --> 01:37:43,100

because basically the photon has

1866

01:37:47,920 --> 01:37:45,590

close to zero mass and it's traveling at

1867

01:37:51,400 --> 01:37:47,930

the speed of light and you're basically

1868

01:37:54,370 --> 01:37:51,410

trying to get some amount of mass to

1869

01:37:56,200 --> 01:37:54,380

travel close to the speed of light by

1870

01:38:00,670 --> 01:37:56,210

heating it with these photons and

1871

01:38:04,210 --> 01:38:00,680

imparting that energy to the man oh wow

1872

01:38:06,070 --> 01:38:04,220

okay so in closing here just one thing

1873

01:38:08,860 --> 01:38:06,080

and I'm not sure if this is still

1874

01:38:10,900 --> 01:38:08,870

something that's active or not but I do

1875

01:38:13,810 --> 01:38:10,910

remember that you said I got an email

1876

01:38:15,520 --> 01:38:13,820

from you oh I don't know maybe a couple

1877

01:38:17,410 --> 01:38:15,530

of months ago that you were trying to do

1878

01:38:20,350 --> 01:38:17,420

a call of action going back to the

1879

01:38:25,240 --> 01:38:20,360

Nimitz are you still is that still

1880

01:38:29,830 --> 01:38:25,250

ongoing yes we're trying to get everyone

1881

01:38:34,030 --> 01:38:29,840

to send their congressman a letter

1882

01:38:37,000 --> 01:38:34,040

asking for Congress to investigate this

1883

01:38:41,890 --> 01:38:37,010

incident you know to basically ask the

1884

01:38:45,250 --> 01:38:41,900

Navy to give Congress a debriefing of

1885

01:38:48,070 --> 01:38:45,260

what happened that's great and where can

1886

01:38:50,860 --> 01:38:48,080

someone find that I mean I saw a link to

1887

01:38:54,730 --> 01:38:50,870

that on open minds it's probably still

1888

01:39:00,670 --> 01:38:54,740

there yes there's a link on open mind

1889

01:39:07,050 --> 01:39:00,680

and if they go to Facebook and if they

1890

01:39:09,820 --> 01:39:07,060

just look on Facebook for the word scu

1891

01:39:12,940 --> 01:39:09,830

scientific Coalition for ufology they'll

1892

01:39:17,620 --> 01:39:12,950

put that in they'll find the SCU

1893

01:39:19,750 --> 01:39:17,630

Facebook site and on their there there

1894

01:39:22,240 --> 01:39:19,760

are plenty of instructions that tell

1895

01:39:24,130 --> 01:39:22,250

them how to fight they can actually

1896

01:39:27,730 --> 01:39:24,140

click on links that tell them who their

1897

01:39:30,730 --> 01:39:27,740

congressman is I've got a letter

1898

01:39:33,720 --> 01:39:30,740

template that they can download and

1899

01:39:38,950 --> 01:39:33,730

print out and send to their congressman

1900

01:39:40,630 --> 01:39:38,960

so just go to Facebook and search for

1901

01:39:43,540 --> 01:39:40,640

the word scientific Coalition for

1902

01:39:46,540 --> 01:39:43,550

ufology and you'll find everything you

1903

01:39:48,270 --> 01:39:46,550

need there excellent Robert as always

1904

01:39:50,950 --> 01:39:48,280

it's such a pleasure

1905

01:39:52,840 --> 01:39:50,960

well thanks Martin it was a interesting

1906

01:39:54,640 --> 01:39:52,850

talk yes and I'm sorry we had a little

1907

01:39:56,550 --> 01:39:54,650

bit of technical difficulty but we made

1908

01:40:00,060 --> 01:39:56,560

it through

1909

01:40:02,500 --> 01:40:00,070

all right so you take you take care

1910

01:40:05,980 --> 01:40:02,510

thank you have a wonderful week bye-bye

1911

01:40:08,760 --> 01:40:05,990

all right bye now okay everyone so thank

1912

01:40:11,830 --> 01:40:08,770

you so much for hanging in with us and

1913

01:40:14,020 --> 01:40:11,840

we're gonna be back next week with Peter

1914

01:40:17,230 --> 01:40:14,030

Davenport he's always a great guest to

1915

01:40:18,910 --> 01:40:17,240

have on and so that's it for tonight I

1916

01:40:21,820 --> 01:40:18,920

want to thank the people that helped out

1917

01:40:25,300 --> 01:40:21,830

with the show Alejandro Rojas our guests

1918

01:40:28,600 --> 01:40:25,310

Peggy for managing our Facebook page

1919

01:40:31,300 --> 01:40:28,610

there's 23 thousand I think people on

1920

01:40:34,060 --> 01:40:31,310

our Facebook page and some activity

1921

01:40:36,280 --> 01:40:34,070

going on there she's always posting UFO

1922

01:40:40,150 --> 01:40:36,290

updates on that and science related

1923

01:40:42,490 --> 01:40:40,160

things so check that out and again I

1924

01:40:45,220 --> 01:40:42,500

want to thank you all for listening

1925

01:40:51,430 --> 01:40:45,230

and remember to keep your eyes to the
