

STANTON FRIEDMAN

FAREWELL SHOW

1
00:00:05,760 --> 00:00:31,390

[Music]

2
00:00:38,920 --> 00:00:34,910

hello and welcome to the show it's

3
00:00:40,400 --> 00:00:38,930

Martin Willis I'm your host and I am in

4
00:00:43,460 --> 00:00:40,410

New Brunswick

5
00:00:45,170 --> 00:00:43,470

now I haven't told I haven't told Stan

6
00:00:49,100 --> 00:00:45,180

this yet but I'll tell you the listeners

7
00:00:51,920 --> 00:00:49,110

I mentioned I was at the Canada border I

8
00:00:53,930 --> 00:00:51,930

gave them my passport was talking to

9
00:00:55,539 --> 00:00:53,940

them and then they asked me what I was

10
00:00:59,450 --> 00:00:55,549

doing and I said well I'm interviewing

11
00:01:01,369 --> 00:00:59,460

someone in New Brunswick and Frederick

12
00:01:05,329 --> 00:01:01,379

in and they said okay well what's the

13
00:01:08,960 --> 00:01:05,339

interview about and I said UFOs and then

14

00:01:12,440 --> 00:01:08,970

I was asked so many other questions they

15

00:01:16,429 --> 00:01:12,450

actually made me pull my car over and I

16

00:01:19,130 --> 00:01:16,439

was I was detained for quite some time

17

00:01:21,230 --> 00:01:19,140

kind of looking through to make sure but

18

00:01:23,210 --> 00:01:21,240

I all of a sudden I'm thinking is it had

19

00:01:27,920 --> 00:01:23,220

to do with UFOs I don't know but anyway

20

00:01:30,050 --> 00:01:27,930

I am here with the one and only the one

21

00:01:33,440 --> 00:01:30,060

and only and you know who he is

22

00:01:35,570 --> 00:01:33,450

I have Stan Friedman welcome to the show

23

00:01:37,730 --> 00:01:35,580

Stan delighted to be with you yeah

24

00:01:39,740 --> 00:01:37,740

thanks for thanks for setting this up

25

00:01:42,860 --> 00:01:39,750

now we are actually in a conference room

26

00:01:44,450 --> 00:01:42,870

in a hotel in Fredericton and your

27

00:01:45,770 --> 00:01:44,460

internet just it just didn't feel

28

00:01:50,300 --> 00:01:45,780

comfortable with your internet and

29

00:01:51,860 --> 00:01:50,310

that's fine so we're we made it I was I

30

00:01:53,090 --> 00:01:51,870

got to tell you I was sweating when I

31

00:01:55,850 --> 00:01:53,100

was at the border because I was watching

32

00:01:58,520 --> 00:01:55,860

the clock tick and so everything's good

33

00:02:01,160 --> 00:01:58,530

Stan thanks so much in this show is a

34

00:02:02,600 --> 00:02:01,170

tribute to you it's got our last show

35

00:02:06,170 --> 00:02:02,610

together and I think it's been about ten

36

00:02:09,289 --> 00:02:06,180

times that we've been a lot I don't keep

37

00:02:11,360 --> 00:02:09,299

track of these yeah you can't if you had

38

00:02:14,539 --> 00:02:11,370

to keep track of I need a secretary and

39

00:02:16,759 --> 00:02:14,549

I don't have one right so Stan you

40

00:02:19,789 --> 00:02:16,769

started back in what year was it you

41

00:02:21,920 --> 00:02:19,799

start I read Andrew Pope's book the

42

00:02:25,580 --> 00:02:21,930

report on unidentified flying objects in

43

00:02:27,559 --> 00:02:25,590

1958 and that was only because I was

44

00:02:29,210 --> 00:02:27,569

ordering books from marbuoro books I

45

00:02:32,479 --> 00:02:29,220

needed one more book so I wouldn't have

46

00:02:33,580 --> 00:02:32,489

to pay shipping and there was a roux

47

00:02:35,949 --> 00:02:33,590

belts book

48

00:02:39,309 --> 00:02:35,959

and it was marked down to dollar

49

00:02:40,990 --> 00:02:39,319

ninety-nine or something and so wasn't

50

00:02:42,309 --> 00:02:41,000

it cost me anything because otherwise it

51
00:02:44,440 --> 00:02:42,319
would have had to pay shipping because

52
00:02:47,290 --> 00:02:44,450
for the rest of the order and that was a

53
00:02:49,240 --> 00:02:47,300
lot more than a dollar ninety-nine so

54
00:02:51,309 --> 00:02:49,250
that company started and I didn't get my

55
00:02:53,290 --> 00:02:51,319
first lecture I'm a little slow on the

56
00:02:54,759 --> 00:02:53,300
draw as a nuclear physicist you have to

57
00:02:57,940 --> 00:02:54,769
be careful what you say sure it will

58
00:03:00,580 --> 00:02:57,950
expect you to be factual you know and so

59
00:03:05,650 --> 00:03:00,590
I didn't get my first lecture until 1967

60
00:03:12,910 --> 00:03:05,660
and I didn't go full-time really until

61
00:03:14,920 --> 00:03:12,920
about 1978 or so no not that late but

62
00:03:16,090 --> 00:03:14,930
there were a lot of years I'm speaking

63
00:03:20,460 --> 00:03:16,100

before I went full-time

64

00:03:23,670 --> 00:03:20,470

the problem was that I worked in a

65

00:03:27,070 --> 00:03:23,680

Howell I putted a volatile industry

66

00:03:30,460 --> 00:03:27,080

advanced nuclear propulsion sort of

67

00:03:33,520 --> 00:03:30,470

things I worked on nuclear airplanes for

68

00:03:35,890 --> 00:03:33,530

General Electric was a small program in

69

00:03:39,460 --> 00:03:35,900

1958 we spent one hundred million

70

00:03:41,650 --> 00:03:39,470

dollars we employed thirty four hundred

71

00:03:43,720 --> 00:03:41,660

people of whom 1,100 were engineers and

72

00:03:46,360 --> 00:03:43,730

scientists this wasn't six professors

73

00:03:50,309 --> 00:03:46,370

sitting around the table you know I

74

00:03:52,270 --> 00:03:50,319

worked for most exciting thing in my

75

00:03:54,280 --> 00:03:52,280

professional career if you will was

76
00:03:58,030 --> 00:03:54,290
working for Westinghouse Astro nuclear

77
00:04:00,490 --> 00:03:58,040
lab when we tested the nrx a sixth

78
00:04:03,039 --> 00:04:00,500
nuclear rocket reactor propulsion system

79
00:04:06,720 --> 00:04:03,049
out of the nuclear test site not far

80
00:04:12,720 --> 00:04:06,730
from area 51 the thing was this big

81
00:04:21,129 --> 00:04:19,150
yeah that was exciting we listened the

82
00:04:24,010 --> 00:04:21,139
test was done out in Nevada but we were

83
00:04:24,700 --> 00:04:24,020
back in Pennsylvania and we were

84
00:04:27,580 --> 00:04:24,710
listening

85
00:04:29,860 --> 00:04:27,590
five minutes elapsed nominal temperature

86
00:04:32,020 --> 00:04:29,870
and pressure in ten minutes we had no

87
00:04:34,409 --> 00:04:32,030
idea along the thing would last nobody's

88
00:04:37,960 --> 00:04:34,419

ever done this before

89

00:04:43,050 --> 00:04:37,970

the exhaust temperature liquid hydrogen

90

00:04:47,629 --> 00:04:43,060

in cold very cold and out at 4,000

91

00:04:50,850 --> 00:04:47,639

agrees that's hot amazing you know guess

92

00:04:52,650 --> 00:04:50,860

jet engines usually 1,800 or something

93

00:04:55,440 --> 00:04:52,660

like that you know and this is over four

94

00:04:57,720 --> 00:04:55,450

thousand so that was so exciting and

95

00:04:59,909 --> 00:04:57,730

then they cancelled the program

96

00:05:03,629 --> 00:04:59,919

I mean Los Alamos that is likely Lord

97

00:05:06,420 --> 00:05:03,639

ruined 4,000 megawatts and Aerojet

98

00:05:09,150 --> 00:05:06,430

tested one so here are three very

99

00:05:11,909 --> 00:05:09,160

successful tests all meeting the

100

00:05:13,170 --> 00:05:11,919

requirements of the testing and they

101
00:05:16,409 --> 00:05:13,180
cancel the program because we're not

102
00:05:21,690 --> 00:05:16,419
going anywhere that was the frustrating

103
00:05:23,159 --> 00:05:21,700
thing you know and I thought I was

104
00:05:25,409 --> 00:05:23,169
headed for the best job you could

105
00:05:29,460 --> 00:05:25,419
imagine they canceled the nuclear rocket

106
00:05:31,680 --> 00:05:29,470
program okay I'm looking around for a

107
00:05:34,590 --> 00:05:31,690
job sending out resumes and I knew dr.

108
00:05:40,379 --> 00:05:34,600
Robert Wood at McDonnell Douglas in

109
00:05:43,020 --> 00:05:40,389
California and I got a job offer and my

110
00:05:46,909 --> 00:05:43,030
job would have been to figure out how

111
00:05:49,380 --> 00:05:46,919
flying saucers worked gorgeous

112
00:05:52,590 --> 00:05:49,390
opportunity you know I don't think I've

113
00:05:54,240 --> 00:05:52,600

ever heard this part well in other words

114

00:05:58,830 --> 00:05:54,250

how to do space travel is that what

115

00:06:02,279 --> 00:05:58,840

you're well how to get yeah from here to

116

00:06:03,990 --> 00:06:02,289

there but more importantly I guess from

117

00:06:06,570 --> 00:06:04,000

a McDonnell Douglas weak point and they

118

00:06:10,110 --> 00:06:06,580

were an aerospace of course was how do

119

00:06:12,719 --> 00:06:10,120

you to zip around the atmosphere you

120

00:06:14,570 --> 00:06:12,729

know and so I'm driving across the

121

00:06:18,480 --> 00:06:14,580

country when I heard on the radio that

122

00:06:22,080 --> 00:06:18,490

the program manned orbiting laboratory

123

00:06:24,779 --> 00:06:22,090

which I was gonna be working under got

124

00:06:26,820 --> 00:06:24,789

cancelled as I'm driving across the

125

00:06:29,219 --> 00:06:26,830

country and I walk in nothing like being

126
00:06:32,279 --> 00:06:29,229
greeted with I show my papers and stuff

127
00:06:36,450 --> 00:06:32,289
you know I had an offer and all I you

128
00:06:39,690 --> 00:06:36,460
know we just laid off 5,000 people you

129
00:06:41,460 --> 00:06:39,700
just took the job I just took yeah they

130
00:06:43,350 --> 00:06:41,470
kept me for three months I could do

131
00:06:45,210 --> 00:06:43,360
whatever I wanted

132
00:06:50,670 --> 00:06:45,220
well at least you didn't get it by a

133
00:06:52,740 --> 00:06:50,680
Twitter no I didn't and it was you know

134
00:06:53,210 --> 00:06:52,750
I really was looking forward to it

135
00:06:55,640 --> 00:06:53,220
because

136
00:06:58,790 --> 00:06:55,650
I've been working for 14 years in

137
00:07:03,230 --> 00:06:58,800
industry and so here is a chance to put

138
00:07:04,880 --> 00:07:03,240

it all all the work to use so to speak

139

00:07:06,680 --> 00:07:04,890

and I was interested in the zipping

140

00:07:10,400 --> 00:07:06,690

around in the atmosphere in going to the

141

00:07:12,770 --> 00:07:10,410

Stars and so forth and so the one thing

142

00:07:16,810 --> 00:07:12,780

I did that was exciting to me I did a

143

00:07:18,940 --> 00:07:16,820

literature search on magneto

144

00:07:23,990 --> 00:07:18,950

aerodynamics hmm

145

00:07:26,780 --> 00:07:24,000

and I found like 900 references which

146

00:07:29,390 --> 00:07:26,790

astonished me frankly but so many people

147

00:07:32,350 --> 00:07:29,400

were looking into this you if you the

148

00:07:34,610 --> 00:07:32,360

air around a vehicle in the atmosphere

149

00:07:39,140 --> 00:07:34,620

there's a law of physics that says if

150

00:07:41,120 --> 00:07:39,150

you got a current moving at right angles

151
00:07:42,890 --> 00:07:41,130
to a magnetic field you'd get a force at

152
00:07:44,360 --> 00:07:42,900
right angles to the electric field that

153
00:07:47,300 --> 00:07:44,370
you've generated with the current and

154
00:07:50,320 --> 00:07:47,310
the magnetic field and people actually

155
00:07:53,360 --> 00:07:50,330
have built-in electromagnetic submarine

156
00:07:57,740 --> 00:07:53,370
well we don't think of it that way but

157
00:08:01,970 --> 00:07:57,750
sea water is an electrically conducting

158
00:08:04,700 --> 00:08:01,980
fluid salt and there makes it so it's

159
00:08:07,640 --> 00:08:04,710
like ionized air looks different in some

160
00:08:09,020 --> 00:08:07,650
words but they're directly analogous but

161
00:08:11,150 --> 00:08:09,030
you can get around all the problems of

162
00:08:14,360 --> 00:08:11,160
high-speed flights you can control lift

163
00:08:16,970 --> 00:08:14,370

drag heating sonicboom production radar

164

00:08:20,570 --> 00:08:16,980

profile all those good things if you got

165

00:08:23,540 --> 00:08:20,580

a plasma ionized air now did did Mirabal

166

00:08:29,240 --> 00:08:23,550

was Mirabeau big Mirabeau was he one

167

00:08:31,580 --> 00:08:29,250

that worked on this no but I know him he

168

00:08:35,540 --> 00:08:31,590

did some interesting work it's been a

169

00:08:37,040 --> 00:08:35,550

long time since I've heard his name race

170

00:08:40,180 --> 00:08:37,050

Stanford talked about a similarity

171

00:08:43,279 --> 00:08:40,190

between an object he saw and what

172

00:08:46,220 --> 00:08:43,289

variable was actually working on oh okay

173

00:08:48,110 --> 00:08:46,230

yeah I was very interesting so I just

174

00:08:49,430 --> 00:08:48,120

want to just clear a couple things with

175

00:08:50,930 --> 00:08:49,440

people listening tonight

176

00:08:55,910 --> 00:08:50,940

already we're getting a whole bunch of

177

00:08:58,040 --> 00:08:55,920

nice messages in the message board 45

178

00:09:00,650 --> 00:08:58,050

minutes or so into the show we're going

179

00:09:04,130 --> 00:09:00,660

to have calls people can call in

180

00:09:06,740 --> 00:09:04,140

wish stand well and and thank him for

181

00:09:08,660 --> 00:09:06,750

his great work over all these years and

182

00:09:11,000 --> 00:09:08,670

when we get to that time I will announce

183

00:09:13,610 --> 00:09:11,010

it and also just basically how to call

184

00:09:17,750 --> 00:09:13,620

in I'll tell you how to do that when

185

00:09:21,080 --> 00:09:17,760

that time comes so Stan this your career

186

00:09:22,700 --> 00:09:21,090

you had I imagine if you stuck with your

187

00:09:26,840 --> 00:09:22,710

career you could have made a heck of a

188

00:09:31,010 --> 00:09:26,850

lot of money if I've been able to find

189

00:09:33,890 --> 00:09:31,020

jobs using my weird talents I suppose

190

00:09:35,510 --> 00:09:33,900

but I was never in it for the money I

191

00:09:37,760 --> 00:09:35,520

mean I worked my way through five years

192

00:09:39,980 --> 00:09:37,770

at college I was a busboy in the

193

00:09:42,620 --> 00:09:39,990

Catskill Mountains would you believe for

194

00:09:44,660 --> 00:09:42,630

a couple of summers there was a waiter

195

00:09:47,750 --> 00:09:44,670

at a hotel in Chicago while I was going

196

00:09:49,610 --> 00:09:47,760

to the University of Chicago Wow and

197

00:09:52,250 --> 00:09:49,620

I've worked every weekend all the

198

00:09:54,050 --> 00:09:52,260

holidays all it was interesting I learn

199

00:09:56,660 --> 00:09:54,060

a lot about people as well as about food

200

00:09:59,420 --> 00:09:56,670

yeah yeah right I've waited tables I

201
00:10:00,910 --> 00:09:59,430
know what you mean well my mother kept a

202
00:10:06,710 --> 00:10:00,920
kosher home

203
00:10:09,380 --> 00:10:06,720
so I'd never seen a lobster before and a

204
00:10:14,180 --> 00:10:09,390
lot of other esotery is seeming to me

205
00:10:16,520 --> 00:10:14,190
food so the point is I did work my way

206
00:10:19,270 --> 00:10:16,530
through school and I wanted to work on

207
00:10:22,700 --> 00:10:19,280
exciting programs once I started at GE

208
00:10:24,200 --> 00:10:22,710
and it was exciting and exotic materials

209
00:10:26,720 --> 00:10:24,210
I'd never heard of beryllium and

210
00:10:29,870 --> 00:10:26,730
brilliant oxide boron carbide and

211
00:10:31,280 --> 00:10:29,880
lithium hydride you know where all this

212
00:10:33,530 --> 00:10:31,290
stuff come from they weren't teaching me

213
00:10:37,550 --> 00:10:33,540

about that at the University that's for

214

00:10:40,520 --> 00:10:37,560

sure I was in radiation shielding and so

215

00:10:42,800 --> 00:10:40,530

you got a problems that they operate at

216

00:10:44,030 --> 00:10:42,810

high temperatures you worry about weight

217

00:10:45,980 --> 00:10:44,040

because you're gonna put them in an

218

00:10:48,920 --> 00:10:45,990

aircraft to begin with and then in a

219

00:10:52,430 --> 00:10:48,930

space system and other things you know

220

00:10:55,370 --> 00:10:52,440

and it's shocks people when I tell them

221

00:10:57,470 --> 00:10:55,380

what I told you earlier is that the

222

00:11:03,500 --> 00:10:57,480

aircraft nuclear propulsion program at

223

00:11:10,660 --> 00:11:03,510

General Electric 1956 to 1959 I work our

224

00:11:12,690 --> 00:11:10,670

budget in 1958 was 100 million dollars

225

00:11:23,100 --> 00:11:12,700

and

226

00:11:25,080 --> 00:11:23,110

aircraft nuclear propulsion systems so

227

00:11:27,390 --> 00:11:25,090

this wasn't a few professors sitting

228

00:11:29,810 --> 00:11:27,400

around a table jabbering about how nice

229

00:11:32,490 --> 00:11:29,820

it would be you know we never

230

00:11:37,290 --> 00:11:32,500

successfully uh we operated jet engines

231

00:11:40,020 --> 00:11:37,300

on nuclear power oh yes but not in an

232

00:11:42,120 --> 00:11:40,030

airplane I don't understand you know for

233

00:11:42,720 --> 00:11:42,130

the Ventura and all that how to have it

234

00:11:44,520 --> 00:11:42,730

well

235

00:11:47,250 --> 00:11:44,530

we won't want to get too techie here but

236

00:11:48,750 --> 00:11:47,260

but I'd like to ask you after the show

237

00:11:51,120 --> 00:11:48,760

how that worked

238

00:11:54,150 --> 00:11:51,130

it's very straightforward you take cold

239

00:11:55,740 --> 00:11:54,160

air in normal air and heat it in the

240

00:11:58,620 --> 00:11:55,750

reactor and kick it out through the

241

00:12:01,790 --> 00:11:58,630

terminal those heated air amazing yes

242

00:12:05,520 --> 00:12:01,800

airs all over where you're flying anyway

243

00:12:07,950 --> 00:12:05,530

that's Andy the nuclear rocket that uses

244

00:12:09,930 --> 00:12:07,960

liquid hydrogen as a propellant hmm

245

00:12:12,840 --> 00:12:09,940

which is a wholly different animal but

246

00:12:15,420 --> 00:12:12,850

is the lowest atomic number element the

247

00:12:18,210 --> 00:12:15,430

lightest weight for a cubic foot of

248

00:12:20,280 --> 00:12:18,220

propellant you know and one nice thing

249

00:12:22,680 --> 00:12:20,290

about hydrogen it's all over the place

250

00:12:26,490 --> 00:12:22,690

things no shortage of it you know and

251

00:12:28,650 --> 00:12:26,500

the moon has hydrogen 3 right most it

252

00:12:32,850 --> 00:12:28,660

probably does I don't know that's a good

253

00:12:34,500 --> 00:12:32,860

question yeah now Stan okay I guess what

254

00:12:37,620 --> 00:12:34,510

I was getting at when I said you could

255

00:12:39,720 --> 00:12:37,630

have made a lot of money if you stuck

256

00:12:43,710 --> 00:12:39,730

with this particular career do have any

257

00:12:47,070 --> 00:12:43,720

regrets doing what you've done no no no

258

00:12:52,050 --> 00:12:47,080

I go with the flow he was an aerospace

259

00:12:54,810 --> 00:12:52,060

analogy I find challenges everywhere and

260

00:12:58,530 --> 00:12:54,820

everything I worked on wasn't dum-dum

261

00:13:01,200 --> 00:12:58,540

routine I mean aircraft nuga propulsion

262

00:13:06,120 --> 00:13:01,210

system is not in a routine and I worked

263

00:13:10,140 --> 00:13:06,130

on spacecraft compact nuclear reactors a

264

00:13:12,930 --> 00:13:10,150

blue Bruce a lot of electricity you know

265

00:13:15,090 --> 00:13:12,940

to operate other systems it's exciting

266

00:13:17,430 --> 00:13:15,100

it was difficult but I mean did you have

267

00:13:21,300 --> 00:13:17,440

to have any regrets going into the UFO

268

00:13:22,990 --> 00:13:21,310

field from another career because well I

269

00:13:25,929 --> 00:13:23,000

had a crossover period

270

00:13:29,499 --> 00:13:25,939

I read my first book in 1958 gave my

271

00:13:36,249 --> 00:13:29,509

first lecture in 1967 and went full-time

272

00:13:38,829 --> 00:13:36,259

in like 79 so what made you decide to go

273

00:13:41,379 --> 00:13:38,839

full-time I needed a job and a family to

274

00:13:44,710 --> 00:13:41,389

support was very straightforward I took

275

00:13:47,710 --> 00:13:44,720

I thought I was gonna have the keenest

276

00:13:52,329 --> 00:13:47,720

job I would ever have wished for I was

277

00:13:54,340 --> 00:13:52,339

hired by McDonnell Douglas and I my job

278

00:13:58,240 --> 00:13:54,350

would be to figure out how flying

279

00:14:05,740 --> 00:13:58,250

saucers worked now that was a challenge

280

00:14:07,059 --> 00:14:05,750

and exciting and it was a shock when I'm

281

00:14:09,220 --> 00:14:07,069

driving across the country and heard

282

00:14:11,949 --> 00:14:09,230

that the program I was gonna work on had

283

00:14:17,439 --> 00:14:11,959

been cancelled out of the blue so to

284

00:14:19,240 --> 00:14:17,449

speak literally so but I'd already given

285

00:14:22,509 --> 00:14:19,250

lectures I've been lecturing for ten

286

00:14:25,480 --> 00:14:22,519

more than ten years so I enjoyed I'm a

287

00:14:29,980 --> 00:14:25,490

ham it's not kosher but I'm a hand I

288

00:14:33,850 --> 00:14:29,990

like being on the stage yeah and I've

289

00:14:35,829 --> 00:14:33,860

enjoyed it may sound strange some people

290

00:14:38,499 --> 00:14:35,839

a lot of people suggested especially

291

00:14:40,660 --> 00:14:38,509

early on that boy you must get a hard

292

00:14:42,160 --> 00:14:40,670

time from people well I don't I have a

293

00:14:44,309 --> 00:14:42,170

question answer period after every

294

00:14:47,949 --> 00:14:44,319

lecture more than 700 lectures so far

295

00:14:50,410 --> 00:14:47,959

yeah and I've had eleven hecklers and

296

00:14:51,879 --> 00:14:50,420

two of them were drunk yeah but you're

297

00:14:55,780 --> 00:14:51,889

gonna get that many if you talk about

298

00:14:59,799 --> 00:14:55,790

anything you know there's no shortage of

299

00:15:03,309 --> 00:14:59,809

them and you know what I've found the

300

00:15:07,530 --> 00:15:03,319

first year I was out full time so to

301
00:15:09,280 --> 00:15:07,540
speak I was worried I was speaking to

302
00:15:11,139 --> 00:15:09,290
Institute of Aeronautics and

303
00:15:13,749 --> 00:15:11,149
Astronautics sections technical groups

304
00:15:16,689 --> 00:15:13,759
Engineering Society of Cincinnati

305
00:15:19,210 --> 00:15:16,699
Engineering Society of Detroit is her

306
00:15:19,900 --> 00:15:19,220
prose so you're gonna be careful what

307
00:15:21,639 --> 00:15:19,910
you say

308
00:15:26,610 --> 00:15:21,649
you know they won't put up with garbage

309
00:15:30,639 --> 00:15:26,620
and they responded extremely well so I

310
00:15:32,950 --> 00:15:30,649
was delighted at the response and you

311
00:15:37,269 --> 00:15:32,960
know a typical example

312
00:15:41,230 --> 00:15:37,279
Gulf research labs technical people and

313
00:15:43,240 --> 00:15:41,240

I spoke and first question as well I'm

314

00:15:46,480 --> 00:15:43,250

sure one could come to other conclusions

315

00:15:48,820 --> 00:15:46,490

and the ones you've come to and I said

316

00:15:51,250 --> 00:15:48,830

well as I recall now I talked about five

317

00:15:54,960 --> 00:15:51,260

large-scale scientific studies and I

318

00:15:57,400 --> 00:15:54,970

asked somebody had read each one sneaky

319

00:15:59,440 --> 00:15:57,410

and you hadn't read any of those you

320

00:16:01,360 --> 00:15:59,450

remember them anybody who raises hand

321

00:16:06,190 --> 00:16:01,370

more than once because it was very rare

322

00:16:07,630 --> 00:16:06,200

at that time is that right yes I said

323

00:16:10,090 --> 00:16:07,640

what's the difference between us isn't

324

00:16:12,760 --> 00:16:10,100

it I gave you my conclusions I gave you

325

00:16:19,449 --> 00:16:12,770

the evidence the sources pictures of the

326

00:16:21,880 --> 00:16:19,459

covers of technical data and I've read

327

00:16:29,199 --> 00:16:21,890

them all you've read none of them whose

328

00:16:33,100 --> 00:16:29,209

opinions worth more and I shut up so I

329

00:16:35,199 --> 00:16:33,110

have had the opportunity to with

330

00:16:37,600 --> 00:16:35,209

technical people engineering societies I

331

00:16:39,190 --> 00:16:37,610

haven't avoided I preferred speaking

332

00:16:40,390 --> 00:16:39,200

professional groups you know we want to

333

00:16:43,030 --> 00:16:40,400

educate him a little bit and you're

334

00:16:45,340 --> 00:16:43,040

curious and so forth and but I also

335

00:16:47,650 --> 00:16:45,350

realized that I had a special background

336

00:16:50,710 --> 00:16:47,660

in terms of having worked on classified

337

00:16:52,720 --> 00:16:50,720

programs many people I've had people to

338

00:16:55,350 --> 00:16:52,730

all governments can't keep secrets oh

339

00:16:57,820 --> 00:16:55,360

yes they can

340

00:17:01,420 --> 00:16:57,830

there are leaks occasionally but

341

00:17:04,569 --> 00:17:01,430

remember there was a mile long facility

342

00:17:07,929 --> 00:17:04,579

built to separate uranium isotopes in

343

00:17:11,470 --> 00:17:07,939

secret a mile long the Manhattan Project

344

00:17:14,140 --> 00:17:11,480

yeah and there are other the stealth

345

00:17:17,559 --> 00:17:14,150

aircraft was developed in secret umpteen

346

00:17:19,120 --> 00:17:17,569

billion dollars were spent so secrets

347

00:17:20,799 --> 00:17:19,130

can be kept and some people don't

348

00:17:23,079 --> 00:17:20,809

appreciate that because they haven't

349

00:17:24,549 --> 00:17:23,089

worked on how would you know and and

350

00:17:26,919 --> 00:17:24,559

people say well of course you told your

351

00:17:29,140 --> 00:17:26,929

wife foot you were I never told my wife

352

00:17:30,790 --> 00:17:29,150

anything classified I'd be crazy to do

353

00:17:33,130 --> 00:17:30,800

that and this is my job could be

354

00:17:36,669 --> 00:17:33,140

prosecuted do you think some people do

355

00:17:38,770 --> 00:17:36,679

though I mean I think very little ice

356

00:17:42,370 --> 00:17:38,780

cream the heck daddy and frankly really

357

00:17:43,850 --> 00:17:42,380

yeah look one time I had to carry my own

358

00:17:47,480 --> 00:17:43,860

slides for

359

00:17:49,010 --> 00:17:47,490

classified presentation at a radiation

360

00:17:52,250 --> 00:17:49,020

shielding meeting that was classified

361

00:17:55,400 --> 00:17:52,260

and the couriered already left my slides

362

00:17:57,650 --> 00:17:55,410

weren't already in time and they sat me

363

00:18:00,919 --> 00:17:57,660

down and read me the riot act

364

00:18:02,299 --> 00:18:00,929

he slides go with you not in the trunk

365

00:18:05,840 --> 00:18:02,309

of the car that you're driving when

366

00:18:08,120 --> 00:18:05,850

you're in a car they go with you and if

367

00:18:10,160 --> 00:18:08,130

the plane crashes at Your Honor we don't

368

00:18:13,250 --> 00:18:10,170

care about you we care about the

369

00:18:15,110 --> 00:18:13,260

classified material and you here enough

370

00:18:16,850 --> 00:18:15,120

with this sort of stuff and I was so

371

00:18:18,799 --> 00:18:16,860

glad to get rid of the Hoos because when

372

00:18:21,919 --> 00:18:18,809

I got there I had to you know I say my

373

00:18:23,870 --> 00:18:21,929

size they were mine after class I had to

374

00:18:25,880 --> 00:18:23,880

be kept in a storage facility and all

375

00:18:28,940 --> 00:18:25,890

the rest of that so I developed a

376

00:18:32,780 --> 00:18:28,950

healthy appreciation of the fact but

377

00:18:37,930 --> 00:18:32,790

plenty can go on under security we don't

378

00:18:40,610 --> 00:18:37,940

know and some people ask me if I think

379

00:18:43,400 --> 00:18:40,620

the flying saucers are wrong and I say

380

00:18:46,580 --> 00:18:43,410

no because the number of sightings going

381

00:18:48,260 --> 00:18:46,590

back a long ways the behavior if we had

382

00:18:51,080 --> 00:18:48,270

systems like that we'd use them in

383

00:18:54,500 --> 00:18:51,090

warfare right and when we spending all

384

00:18:56,659 --> 00:18:54,510

that money you gotta justify it yeah you

385

00:19:00,020 --> 00:18:56,669

know the nuclear airplane a nuclear

386

00:19:03,340 --> 00:19:00,030

rocket all these things well let me just

387

00:19:07,460 --> 00:19:03,350

kind of sort of inject this at this

388

00:19:09,980 --> 00:19:07,470

point so you were all the way back in

389

00:19:13,039 --> 00:19:09,990

the 60s working on some really amazing

390

00:19:15,010 --> 00:19:13,049

things 56 I started but I mean but I'm

391

00:19:17,360 --> 00:19:15,020

just talking about the technology was

392

00:19:19,820 --> 00:19:17,370

really quite advanced what you're

393

00:19:22,250 --> 00:19:19,830

talking about do you think now that

394

00:19:25,700 --> 00:19:22,260

there are some things that they're

395

00:19:28,789 --> 00:19:25,710

keeping secret that are just beyond what

396

00:19:31,390 --> 00:19:28,799

we can imagine well I hope so I would

397

00:19:34,490 --> 00:19:31,400

think so yeah no really I think but

398

00:19:38,780 --> 00:19:34,500

remember that the big justification was

399

00:19:40,430 --> 00:19:38,790

the Cold War because if we don't do it

400

00:19:42,320 --> 00:19:40,440

the Russians will beat us to us and then

401
00:19:44,810 --> 00:19:42,330
I'll take advantage of that and so forth

402
00:19:48,230 --> 00:19:44,820
and so on the Cold War pressures of East

403
00:19:50,240 --> 00:19:48,240
awesome I think and we've got so much

404
00:19:53,990 --> 00:19:50,250
invested in our current equipment so to

405
00:19:54,710 --> 00:19:54,000
speak remember you can't get by building

406
00:19:56,419 --> 00:19:54,720
one of a

407
00:19:59,960 --> 00:19:56,429
kind of things if you're talking about

408
00:20:01,580 --> 00:19:59,970
warfare airplanes a lot of young people

409
00:20:05,659 --> 00:20:01,590
and realize during World War two

410
00:20:09,880 --> 00:20:05,669
we had fleets of 300 aircraft bombing in

411
00:20:12,320 --> 00:20:09,890
Europe 300 year planes dropping palms

412
00:20:14,930 --> 00:20:12,330
it's quite incredible when you stop to

413
00:20:19,940 --> 00:20:14,940

think about it so you kind of its mass

414

00:20:21,710 --> 00:20:19,950

production and people Wanderers what's

415

00:20:24,919 --> 00:20:21,720

nuclear got to do with anything

416

00:20:28,159 --> 00:20:24,929

well let me illustrate that a big bomb

417

00:20:30,649 --> 00:20:28,169

in world war ii was a 10 ton blockbuster

418

00:20:36,130 --> 00:20:30,659

the energy of 10 tons of dynamite TNT

419

00:20:38,899 --> 00:20:36,140

like aeruginosa no those were no clear

420

00:20:40,970 --> 00:20:38,909

I'm talking about bombing German cities

421

00:20:44,180 --> 00:20:40,980

in Japan sorry I'm sorry

422

00:20:47,600 --> 00:20:44,190

standard conventional chemical I got it

423

00:20:51,080 --> 00:20:47,610

and a big one would release the energy

424

00:20:52,460 --> 00:20:51,090

of 10 tons of dynamite that's not make a

425

00:20:55,100 --> 00:20:52,470

big hole in the ground I'll tell you

426

00:20:58,760 --> 00:20:55,110

that and I found a lot of buildings okay

427

00:21:01,580 --> 00:20:58,770

the first atomic bomb Trinity site in

428

00:21:04,029 --> 00:21:01,590

New Mexico that happens but they're very

429

00:21:12,919 --> 00:21:04,039

similar to Hiroshima and Nagasaki

430

00:21:15,380 --> 00:21:12,929

release the energy of 250,000 tons no

431

00:21:21,260 --> 00:21:15,390

I'm sorry 15,000 tons of dynamite but

432

00:21:26,360 --> 00:21:21,270

the first h-bomb 1952 release the energy

433

00:21:28,340 --> 00:21:26,370

of 10 million tons of dynamite and the

434

00:21:29,950 --> 00:21:28,350

biggest one the Russians said often Tsar

435

00:21:33,200 --> 00:21:29,960

Bomba

436

00:21:37,039 --> 00:21:33,210

released the energy of over 50 million

437

00:21:40,940 --> 00:21:37,049

tons of TNT so you go from 10 in World

438

00:21:47,560 --> 00:21:40,950

War 2 scary you know less than 20 years

439

00:21:53,120 --> 00:21:47,570

later 50 million tons in one bomb so

440

00:21:57,680 --> 00:21:53,130

every civilization out there is going to

441

00:21:59,690 --> 00:21:57,690

try to develop nuclear weapons now we

442

00:22:03,590 --> 00:21:59,700

know but you know we didn't even know

443

00:22:05,510 --> 00:22:03,600

there were neutrons until 1932 efficient

444

00:22:07,990 --> 00:22:05,520

and fusion the two processes that

445

00:22:12,430 --> 00:22:08,000

produced the energy 1930

446

00:22:16,510 --> 00:22:12,440

we first knew about those and so you go

447

00:22:19,780 --> 00:22:16,520

from ten to fifty million in less than a

448

00:22:23,080 --> 00:22:19,790

generation really which is really quite

449

00:22:27,820 --> 00:22:23,090

remarkable and the kicker is all the

450

00:22:29,680 --> 00:22:27,830

stars work by nuclear fusion and I would

451
00:22:31,860 --> 00:22:29,690
guarantee you that every civilization is

452
00:22:34,900 --> 00:22:31,870
gonna ask kind of said star of ours

453
00:22:37,680 --> 00:22:34,910
produce its energy it's a mass of

454
00:22:40,060 --> 00:22:37,690
burning gases what we said in the 1920s

455
00:22:43,020 --> 00:22:40,070
less than 100 years ago they were still

456
00:22:47,920 --> 00:22:43,030
saying that it isn't it's a fusion

457
00:22:51,520 --> 00:22:47,930
system if you will so it's important

458
00:22:53,350 --> 00:22:51,530
that people recognize that we have

459
00:22:55,810 --> 00:22:53,360
learned about fusion everybody else is

460
00:22:57,850 --> 00:22:55,820
going to want to learn about how their

461
00:23:00,070 --> 00:22:57,860
star produces its energy because it's

462
00:23:02,590 --> 00:23:00,080
perfectly obvious it's generating a huge

463
00:23:04,900 --> 00:23:02,600

amount of energy I'm not saying there

464

00:23:07,990 --> 00:23:04,910

isn't something beyond that I don't know

465

00:23:10,150 --> 00:23:08,000

what it is but but we already know

466

00:23:12,550 --> 00:23:10,160

enough in other words just say that six

467

00:23:14,170 --> 00:23:12,560

Rudner elite more we want to go the

468

00:23:16,240 --> 00:23:14,180

Stars we know how to do it if we want to

469

00:23:18,850 --> 00:23:16,250

spend the dough you can go that's my

470

00:23:21,430 --> 00:23:18,860

mother well the base is a basic rule

471

00:23:23,980 --> 00:23:21,440

here technological progress comes from

472

00:23:27,520 --> 00:23:23,990

doing things differently in an

473

00:23:29,260 --> 00:23:27,530

unpredictable way the future is not an

474

00:23:31,000 --> 00:23:29,270

extrapolation of the past today's

475

00:23:33,130 --> 00:23:31,010

computers are not just better slide

476

00:23:35,080 --> 00:23:33,140

rules and I'm sure a lot of people know

477

00:23:38,110 --> 00:23:35,090

what a slide rule is but I used one when

478

00:23:41,020 --> 00:23:38,120

I was working in industry you got to

479

00:23:42,550 --> 00:23:41,030

change how you do things so now there's

480

00:23:44,320 --> 00:23:42,560

another thing that's changed it's

481

00:23:46,240 --> 00:23:44,330

certainly our knowledge of technology

482

00:23:50,350 --> 00:23:46,250

that's changed energy production

483

00:23:54,160 --> 00:23:50,360

processes and stuff but we used to think

484

00:23:55,330 --> 00:23:54,170

when Frank Drake astronomer talked about

485

00:23:57,970 --> 00:23:55,340

listening for signals

486

00:24:00,340 --> 00:23:57,980

SETI's search for extraterrestrial

487

00:24:02,320 --> 00:24:00,350

intelligence I say it stands for silly

488

00:24:04,990 --> 00:24:02,330

effort to investigate but because I

489

00:24:08,650 --> 00:24:05,000

don't agree with their assumptions but

490

00:24:10,540 --> 00:24:08,660

the care is at that time he was talking

491

00:24:12,340 --> 00:24:10,550

about there might be as many as 8,000

492

00:24:16,159 --> 00:24:12,350

places in the galaxy that could be

493

00:24:24,440 --> 00:24:16,169

sending signals the latest word is that

494

00:24:26,149 --> 00:24:24,450

the stars on the average of 1.6% galaxy

495

00:24:29,049 --> 00:24:26,159

the Milky Way which is one of billions

496

00:24:30,919 --> 00:24:29,059

of galaxies they're over a hundred

497

00:24:34,609 --> 00:24:30,929

billion stars

498

00:24:39,019 --> 00:24:34,619

so that means 160 billion planets I'm

499

00:24:41,149 --> 00:24:39,029

not saying they're all occupied but 10%

500

00:24:44,659 --> 00:24:41,159

would still give you billions and

501
00:24:46,789 --> 00:24:44,669
billions of planets and the kicker is

502
00:24:51,200 --> 00:24:46,799
that we haven't been around that long

503
00:24:55,849 --> 00:24:51,210
right Bishop Ussher in the 1650s said

504
00:24:58,609 --> 00:24:55,859
the world was created in 4004 BC 6000

505
00:25:02,889 --> 00:24:58,619
years ago a big deal and now we say the

506
00:25:07,489 --> 00:25:02,899
earth is at least 5 billion years old so

507
00:25:10,729 --> 00:25:07,499
there are lots of planets out there and

508
00:25:12,710 --> 00:25:10,739
people have had plenty of time I mean

509
00:25:14,989 --> 00:25:12,720
look how short a time compared to the

510
00:25:18,590 --> 00:25:14,999
history of the planet it took us to go

511
00:25:19,999 --> 00:25:18,600
from it's got rid the neutron we didn't

512
00:25:24,859 --> 00:25:20,009
know everything around us has got

513
00:25:27,950 --> 00:25:24,869

neutrons in it 1932 guy got a Nobel

514

00:25:29,539 --> 00:25:27,960

Prize for that it'd been there all the

515

00:25:32,599 --> 00:25:29,549

time you understand but we didn't have

516

00:25:35,419 --> 00:25:32,609

the capability of the tank determining

517

00:25:38,899 --> 00:25:35,429

that it was there so in a very short

518

00:25:43,729 --> 00:25:38,909

time we have jumped to being able to put

519

00:25:45,830 --> 00:25:43,739

a 15 Megaton bomb together now if

520

00:25:49,340 --> 00:25:45,840

somebody else got started 10,000 years

521

00:25:53,749 --> 00:25:49,350

before we did or 10 million what do they

522

00:25:56,289 --> 00:25:53,759

know that we don't know so Friedman's

523

00:26:00,909 --> 00:25:56,299

law progress comes from doing things

524

00:26:04,399 --> 00:26:00,919

differently in an unpredictable way I

525

00:26:07,129 --> 00:26:04,409

get that we're just just in just a

526

00:26:09,590 --> 00:26:07,139

minute here going to the break so I will

527

00:26:12,320 --> 00:26:09,600

let the people know on YouTube if you

528

00:26:14,090 --> 00:26:12,330

want to post your questions now a couple

529

00:26:16,899 --> 00:26:14,100

of questions in there I'll ask stand

530

00:26:21,109 --> 00:26:16,909

that those questions during the break

531

00:26:24,409 --> 00:26:21,119

yeah so we are ready to go into break

532

00:26:27,919 --> 00:26:24,419

you're listening to Stanton Friedman and

533

00:26:30,889 --> 00:26:27,929

we're up in New Brunswick on location

534

00:26:34,039 --> 00:26:30,899

his hometown now and we're on kgr a

535

00:26:42,590 --> 00:26:34,049

radio and we'll be right back right

536

00:26:44,419 --> 00:26:42,600

after this break all right my friend

537

00:26:45,739 --> 00:26:44,429

we're clear we've got three and a half

538

00:26:48,759 --> 00:26:45,749

little over three and a half minutes and

539

00:26:51,529 --> 00:26:48,769

it's bright Martin got it thank you race

540

00:26:55,399 --> 00:26:51,539

okay so let's see if we have any

541

00:26:57,489 --> 00:26:55,409

questions that came in on the chat room

542

00:27:01,129 --> 00:26:57,499

I know people were asking earlier

543

00:27:03,200 --> 00:27:01,139

someone wanted to know a controversial

544

00:27:05,239 --> 00:27:03,210

question I saw come up and that is uh

545

00:27:06,950 --> 00:27:05,249

and you probably don't even want to

546

00:27:08,450 --> 00:27:06,960

weigh in on this but what do you think

547

00:27:10,700 --> 00:27:08,460

of Billy Meyers photos that was a

548

00:27:13,150 --> 00:27:10,710

question someone wanted to ask you Tony

549

00:27:15,470 --> 00:27:13,160

okay that's that's good

550

00:27:22,489 --> 00:27:15,480

[Laughter]

551

00:27:23,930 --> 00:27:22,499

and let's see we can I don't see any

552

00:27:28,519 --> 00:27:23,940

it's gonna take me too long to look

553

00:27:30,560 --> 00:27:28,529

through these questions and a lot of

554

00:27:33,919 --> 00:27:30,570

there's so many people that are giving

555

00:27:35,060 --> 00:27:33,929

you a lot of praise here and someone

556

00:27:38,989 --> 00:27:35,070

says hey if you get bored with

557

00:27:41,869 --> 00:27:38,999

retirement I don't know what they're

558

00:27:47,450 --> 00:27:41,879

trying to say here so anyway let's let's

559

00:27:51,230 --> 00:27:49,549

I'm just curious and it's kind of a

560

00:27:53,359 --> 00:27:51,240

personal question but what made you

561

00:27:56,570 --> 00:27:53,369

decide to move to Canada might want to

562

00:27:58,940 --> 00:27:56,580

Canadian ah I got it and we you could

563

00:28:00,859 --> 00:27:58,950

buy a house in Fredericton for half of

564

00:28:03,680 --> 00:28:00,869

what we sold her house for in California

565

00:28:06,649 --> 00:28:03,690

Oh California prices they were so crazy

566

00:28:09,859 --> 00:28:06,659

sky sky and my wife is one of nine kids

567

00:28:11,810 --> 00:28:09,869

and four of them were living back here

568

00:28:15,519 --> 00:28:11,820

at that time and their families and her

569

00:28:18,619 --> 00:28:15,529

parents were living here yeah so the

570

00:28:24,889 --> 00:28:18,629

family reasons I wasn't running away

571

00:28:26,799 --> 00:28:24,899

from the FBI as somebody totally I've

572

00:28:29,600 --> 00:28:26,809

never regretted the move I better say

573

00:28:33,950 --> 00:28:29,610

okay here's a couple questions so one of

574

00:28:36,019 --> 00:28:33,960

them is let's see UFOs can't get here

575

00:28:37,799 --> 00:28:36,029

from there they would need to go faster

576

00:28:41,369 --> 00:28:37,809

than light that's a question mark

577

00:28:43,320 --> 00:28:41,379

no that's wrong I'm not saying they

578

00:28:45,810 --> 00:28:43,330

can't but I don't know how to go fast in

579

00:28:49,979 --> 00:28:45,820

this real life but at 1g acceleration

580

00:28:51,869 --> 00:28:49,989

the force of gravity right here it takes

581

00:28:53,549 --> 00:28:51,879

and I best this is a multiple-choice

582

00:28:56,639 --> 00:28:53,559

question you don't need to know anything

583

00:28:58,830 --> 00:28:56,649

I wanted to take it one G to get to the

584

00:29:01,320 --> 00:28:58,840

speed of light thousand years hundred

585

00:29:02,789 --> 00:29:01,330

years ten years one year many people

586

00:29:05,310 --> 00:29:02,799

guess you know how many think it's a

587

00:29:06,959 --> 00:29:05,320

thousand one hundred and ten many people

588

00:29:09,330 --> 00:29:06,969

think of thousand or a hundred or ten

589

00:29:12,899 --> 00:29:09,340

takes less than a year so you're talking

590

00:29:14,279 --> 00:29:12,909

about a constant G one like a constant

591

00:29:16,019 --> 00:29:14,289

increase yeah

592

00:29:20,369 --> 00:29:16,029

twenty-one miles per hour per second

593

00:29:24,239 --> 00:29:20,379

that's one G terms I don't want to put

594

00:29:27,690 --> 00:29:24,249

in decimal point so that's the first

595

00:29:31,320 --> 00:29:27,700

thing the second thing is we that's half

596

00:29:35,339 --> 00:29:31,330

an Einstein Einstein said the speed of

597

00:29:38,700 --> 00:29:35,349

light so limit the other part is that

598

00:29:41,549 --> 00:29:38,710

time slows down as you get closer to the

599

00:29:43,940 --> 00:29:41,559

speed of light how much is it slow down

600

00:29:47,339 --> 00:29:43,950

well it depends on how close you can't

601
00:29:49,320 --> 00:29:47,349
you go out come back and marry your

602
00:29:53,940 --> 00:29:49,330
granddaughters best friend because you

603
00:29:56,940 --> 00:29:53,950
have an age much yeah and so that's a

604
00:29:59,549 --> 00:29:56,950
very important consideration and it may

605
00:30:01,379 --> 00:29:59,559
sound crazy why is it I don't know why

606
00:30:03,479 --> 00:30:01,389
that's the way God made the universe

607
00:30:06,539 --> 00:30:03,489
how's that for an answer for a nuclear

608
00:30:08,489 --> 00:30:06,549
physicist right yeah okay so that's

609
00:30:10,529 --> 00:30:08,499
sorry we didn't get to more questions or

610
00:30:12,479 --> 00:30:10,539
in this break but we will later and we

611
00:30:14,039 --> 00:30:12,489
will be taking calls later on a race

612
00:30:17,700 --> 00:30:14,049
we're ready but to go right back on are

613
00:30:22,139 --> 00:30:17,710

we yeah we've got 20 seconds oh I

614

00:30:25,200 --> 00:30:22,149

miscalculated here okay yeah just to the

615

00:30:28,190 --> 00:30:25,210

shine never short yeah because I don't

616

00:30:29,909 --> 00:30:28,200

always count the bumper music yeah

617

00:30:31,799 --> 00:30:29,919

sometimes you know the bumper music

618

00:30:34,430 --> 00:30:31,809

maybe 2 minutes and 20 seconds and are

619

00:30:37,110 --> 00:30:34,440

they around 60 seconds 7

620

00:30:48,330 --> 00:30:37,120

sometimes my fingers can be a bit skewed

621

00:30:53,970 --> 00:30:51,720

hey youtubers don't go away okay get the

622

00:30:56,670 --> 00:30:53,980

bump of rolling here Stanton you okay

623

00:30:59,910 --> 00:30:56,680

you all set I'm all ready to go

624

00:31:04,190 --> 00:30:59,920

are you ready you bet everybody on

625

00:31:10,230 --> 00:31:04,200

YouTube you all ready here we go in five

626
00:31:13,410 --> 00:31:10,240
four three two all right everyone

627
00:31:15,810 --> 00:31:13,420
welcome back my guest tonight is Stanton

628
00:31:18,090 --> 00:31:15,820
Friedman we have a tribute show a

629
00:31:20,910 --> 00:31:18,100
tribute and farewell and we will be

630
00:31:22,740 --> 00:31:20,920
taking calls in about 15 to 20 minutes

631
00:31:26,130 --> 00:31:22,750
for people who want to call in and wish

632
00:31:29,540 --> 00:31:26,140
stand well and thank him for his his

633
00:31:33,050 --> 00:31:29,550
great extraordinary work over the years

634
00:31:35,580 --> 00:31:33,060
so Stan

635
00:31:39,570 --> 00:31:35,590
one of the questions I thought about

636
00:31:42,720 --> 00:31:39,580
asking you is you broswell

637
00:31:44,130 --> 00:31:42,730
do you think that if it wasn't I know

638
00:31:45,540 --> 00:31:44,140

how that came about you've told me this

639

00:31:47,580 --> 00:31:45,550

story a couple of times it's really

640

00:31:49,920 --> 00:31:47,590

interesting do you think that if you

641

00:31:53,160 --> 00:31:49,930

didn't show up at that station that day

642

00:31:55,290 --> 00:31:53,170

and there wasn't a delay and or the guy

643

00:31:57,240 --> 00:31:55,300

didn't show up or whatever it was

644

00:31:59,670 --> 00:31:57,250

do you think Roswell would have come out

645

00:32:02,490 --> 00:31:59,680

eventually I don't know I wondered about

646

00:32:05,220 --> 00:32:02,500

I see no reason to think it had it after

647

00:32:10,380 --> 00:32:05,230

all I'm talking about in the late 70s

648

00:32:12,510 --> 00:32:10,390

right it happened in 47 so it kept been

649

00:32:15,420 --> 00:32:12,520

kept secret for a long time

650

00:32:17,490 --> 00:32:15,430

and now all the original Witnesses are

651
00:32:22,710 --> 00:32:17,500
dead all of them now I thought there was

652
00:32:24,390 --> 00:32:22,720
one or two yeah maybe there maybe well

653
00:32:26,430 --> 00:32:24,400
there may be ones we don't know anything

654
00:32:30,720 --> 00:32:26,440
at all about who were still alive yeah

655
00:32:36,630 --> 00:32:30,730
you know but generally speaking they

656
00:32:40,350 --> 00:32:36,640
died off and Roswell yeah I'm the

657
00:32:43,770 --> 00:32:40,360
original civilian investigator and I'd

658
00:32:46,110 --> 00:32:43,780
heard about it twice actually a woman a

659
00:32:48,180 --> 00:32:46,120
guy who was a forest ranger told me

660
00:32:51,230 --> 00:32:48,190
about a great sighting he had and come I

661
00:32:53,340 --> 00:32:51,240
was living in California back then and

662
00:32:55,560 --> 00:32:53,350
he said you really ought to talk to my

663
00:32:58,650 --> 00:32:55,570

mom she had a great report she was in

664

00:32:59,180 --> 00:32:58,660

New Mexico so I called Lidia sleeping

665

00:33:02,000 --> 00:32:59,190

his

666

00:33:03,620 --> 00:33:02,010

mother and cracked out as many people as

667

00:33:06,050 --> 00:33:03,630

I could she couldn't remember all the

668

00:33:08,540 --> 00:33:06,060

names and so forth and so on and I got

669

00:33:11,870 --> 00:33:08,550

nowhere really in finding other people

670

00:33:13,400 --> 00:33:11,880

she had heard the story that semester

671

00:33:16,640 --> 00:33:13,410

I'd crash and it was being shipped to

672

00:33:18,890 --> 00:33:16,650

wright-patterson Air Force Base and it's

673

00:33:22,720 --> 00:33:18,900

a true story but I didn't have the data

674

00:33:25,730 --> 00:33:22,730

to back it up so then my hearing about

675

00:33:28,370 --> 00:33:25,740

the real story so to speak that I could

676

00:33:30,740 --> 00:33:28,380

follow up on was again strictly by

677

00:33:33,680 --> 00:33:30,750

accident I was supposed to do three

678

00:33:38,030 --> 00:33:33,690

interviews in Baton Rouge Louisiana and

679

00:33:40,160 --> 00:33:38,040

a third interviewer was late some sit

680

00:33:42,140 --> 00:33:40,170

and talking to the station manager and

681

00:33:43,670 --> 00:33:42,150

out of the blue he says you know the guy

682

00:33:45,950 --> 00:33:43,680

you ought to talk to was Jesse Marcel

683

00:33:48,560 --> 00:33:45,960

and even an investigator that I am I

684

00:33:51,710 --> 00:33:48,570

said who's he his next sentence changed

685

00:33:53,000 --> 00:33:51,720

my life he handled roughly 200 sausage

686

00:33:56,480 --> 00:33:53,010

you understood him he was in the

687

00:33:58,370 --> 00:33:56,490

military what one thing I always forget

688

00:34:01,400 --> 00:33:58,380

to ask you Stan and I want you to

689

00:34:05,660 --> 00:34:01,410

continue but how did he know this he was

690

00:34:08,630 --> 00:34:05,670

there no no not Jesse oh no the manager

691

00:34:11,540 --> 00:34:08,640

oh the manager and Jesse were ham-radio

692

00:34:15,290 --> 00:34:11,550

buddies and he had seen the newspaper

693

00:34:18,470 --> 00:34:15,300

article in 47 they were big newspaper

694

00:34:20,270 --> 00:34:18,480

re-find saucer and the Mexican ranch in

695

00:34:22,940 --> 00:34:20,280

New Mexico general says its radar

696

00:34:27,440 --> 00:34:22,950

weather gadget you know but Jesse was

697

00:34:30,200 --> 00:34:27,450

the intelligence officer at the Roswell

698

00:34:34,970 --> 00:34:30,210

Army Air Field named Walker Air Force

699

00:34:38,930 --> 00:34:34,980

Base it became later and so he was there

700

00:34:43,480 --> 00:34:38,940

and a rancher came in with some crazy

701
00:34:48,560 --> 00:34:46,640
sheriff said he ought to go the base and

702
00:34:51,710 --> 00:34:48,570
jesse was the intelligence officer at

703
00:34:54,170 --> 00:34:51,720
the base so he brought his pieces of

704
00:34:57,170 --> 00:34:54,180
wreckage there strange stuff very

705
00:34:59,990 --> 00:34:57,180
lightweight strong foil-like material

706
00:35:01,220 --> 00:35:00,000
that you couldn't tear couldn't break

707
00:35:03,140 --> 00:35:01,230
couldn't break through with a

708
00:35:06,010 --> 00:35:03,150
sledgehammer and stuff like that and

709
00:35:09,230 --> 00:35:06,020
other things and the base commander

710
00:35:12,070 --> 00:35:09,240
ordered Jesse to take one of their dirt

711
00:35:13,810 --> 00:35:12,080
counterintelligence core guys

712
00:35:17,950 --> 00:35:13,820
follow the rancher round he said there's

713
00:35:19,690 --> 00:35:17,960

a whole huge field of this stuff fields

714

00:35:23,230 --> 00:35:19,700

are big in New Mexico there are many

715

00:35:25,390 --> 00:35:23,240

people that like lots of fields and so

716

00:35:27,660 --> 00:35:25,400

they brought some of it they followed

717

00:35:31,210 --> 00:35:27,670

the ranch around they came back with it

718

00:35:34,000 --> 00:35:31,220

and that was the end of that there was

719

00:35:35,860 --> 00:35:34,010

big story the Kenneth Arnold sighting

720

00:35:38,380 --> 00:35:35,870

had occurred just a few weeks before

721

00:35:41,230 --> 00:35:38,390

yeah the first sighting they got a lot

722

00:35:44,830 --> 00:35:41,240

of attention nine objects zipping around

723

00:35:46,420 --> 00:35:44,840

in the sky he timed them locked on the

724

00:35:49,990 --> 00:35:46,430

dashboard of the airplane he was flying

725

00:35:52,150 --> 00:35:50,000

and they were going more than 1,200

726

00:35:55,930 --> 00:35:52,160

miles an hour that's a speed record at

727

00:35:58,600 --> 00:35:55,940

that time was like 7-under Mawson you

728

00:36:01,740 --> 00:35:58,610

know this was quite extraordinary than

729

00:36:07,780 --> 00:36:01,750

in other words but just so jesse was the

730

00:36:11,110 --> 00:36:07,790

officer at the base who was the guy in

731

00:36:13,390 --> 00:36:11,120

charge of bringing wreckage back in he

732

00:36:15,880 --> 00:36:13,400

wasn't in charge of investigating UFOs

733

00:36:19,480 --> 00:36:15,890

there was no such thing at that time I

734

00:36:21,790 --> 00:36:19,490

mean nobody kind of a job but he had the

735

00:36:26,440 --> 00:36:21,800

clearance this is the only atomic

736

00:36:28,000 --> 00:36:26,450

bombing group in the entire world the

737

00:36:30,550 --> 00:36:28,010

Russians didn't test their first one

738

00:36:33,550 --> 00:36:30,560

until a couple years later so only the

739

00:36:36,700 --> 00:36:33,560

United States and that group was at

740

00:36:38,650 --> 00:36:36,710

Roswell Army Airfield so this wasn't a

741

00:36:40,960 --> 00:36:38,660

bunch of GI sitting around nothing

742

00:36:42,880 --> 00:36:40,970

better to do the make up stories or

743

00:36:45,970 --> 00:36:42,890

anything like that they all had to have

744

00:36:47,920 --> 00:36:45,980

high-level security clearances atomic

745

00:36:49,690 --> 00:36:47,930

bombs they were the only people in the

746

00:36:51,310 --> 00:36:49,700

world who had access to them they

747

00:36:53,650 --> 00:36:51,320

dropped the ones under worship of

748

00:36:57,810 --> 00:36:53,660

Nagasaki and two more in operation

749

00:37:01,660 --> 00:36:57,820

crossroads so Jesse was pretty special

750

00:37:03,960 --> 00:37:01,670

in anyway I asked him worried them he's

751
00:37:07,750 --> 00:37:03,970
from Houma I didn't know where home was

752
00:37:10,420 --> 00:37:07,760
Louisiana but I called information got a

753
00:37:11,910 --> 00:37:10,430
number for Jesse the next day after my

754
00:37:16,990 --> 00:37:11,920
lecture at Louisiana State University

755
00:37:20,230 --> 00:37:17,000
and he told me his story and I followed

756
00:37:24,269 --> 00:37:20,240
up on that with Bill Moore we found 60

757
00:37:27,669 --> 00:37:24,279
some witnesses the first year after the

758
00:37:31,419 --> 00:37:27,679
we got looking at lucky sometimes you

759
00:37:33,339 --> 00:37:31,429
get lucky I called the rot I looked at

760
00:37:35,309 --> 00:37:33,349
how to look in and out lights or as well

761
00:37:37,719 --> 00:37:35,319
yeah and looked at a list of newspapers

762
00:37:39,489 --> 00:37:37,729
Russell's got a newspaper the Roswell

763
00:37:41,679 --> 00:37:39,499

Daily Record so I called them and I said

764

00:37:46,989 --> 00:37:41,689

you know maybe you can help me I've got

765

00:37:49,089 --> 00:37:46,999

these stories here about the group that

766

00:37:52,599 --> 00:37:49,099

served at the base there guy named

767

00:37:53,919 --> 00:37:52,609

Walter Haut put out the pump the public

768

00:37:56,409 --> 00:37:53,929

information he was the public

769

00:38:00,130 --> 00:37:56,419

information gun his wife worked at the

770

00:38:02,289 --> 00:38:00,140

newspaper how lucky can you get you know

771

00:38:05,109 --> 00:38:02,299

so I talked to her and I talked to

772

00:38:07,839 --> 00:38:05,119

Walter and he had been people think I

773

00:38:10,239 --> 00:38:07,849

was a pil public information a big deal

774

00:38:13,569 --> 00:38:10,249

he was a bombardier during the war flew

775

00:38:15,880 --> 00:38:13,579

more than 20 missions over Japan and you

776

00:38:18,519 --> 00:38:15,890

pick your best he including a couple and

777

00:38:21,789 --> 00:38:18,529

some of the tests and you pick your best

778

00:38:25,569 --> 00:38:21,799

guys because at that time we didn't have

779

00:38:29,349 --> 00:38:25,579

a lot of moms to waste you gotta put the

780

00:38:31,179 --> 00:38:29,359

bomb in the right place for the test or

781

00:38:36,429 --> 00:38:31,189

if you're dropping on Hiroshima or

782

00:38:41,649 --> 00:38:36,439

Nagasaki and so I was lucky in that

783

00:38:47,559 --> 00:38:41,659

sense and I managed to get grant there's

784

00:38:52,809 --> 00:38:47,569

a very special guy who has supported a

785

00:38:56,499 --> 00:38:52,819

lot of research on UFOs and first grant

786

00:38:59,259 --> 00:38:56,509

I got from him it was a first grant

787

00:39:03,729 --> 00:38:59,269

think game he's given a lot of sense and

788

00:39:07,899 --> 00:39:03,739

I was able to go out to New Mexico and

789

00:39:10,989 --> 00:39:07,909

there were two bombs I mean to saucer

790

00:39:13,029 --> 00:39:10,999

crashes there Roswell and the plains of

791

00:39:15,359 --> 00:39:13,039

san agustin which is over near White

792

00:39:17,859 --> 00:39:15,369

Sands not too far from White Sands

793

00:39:20,919 --> 00:39:17,869

so when you start talking to the people

794

00:39:23,079 --> 00:39:20,929

on the ground and the thing is that

795

00:39:24,609 --> 00:39:23,089

Walter Haut does knew a lot of the

796

00:39:27,909 --> 00:39:24,619

people he had to base your book and he

797

00:39:30,370 --> 00:39:27,919

gave me a copy of it so you know oh yeah

798

00:39:31,240 --> 00:39:30,380

I remember Joe lived in Oshkosh and this

799

00:39:33,220 --> 00:39:31,250

guy lived here

800

00:39:35,950 --> 00:39:33,230

I lived there and so that was a great

801
00:39:39,790 --> 00:39:35,960
help to have somebody who had been there

802
00:39:41,500 --> 00:39:39,800
at the time and now Roscoe is a small

803
00:39:44,110 --> 00:39:41,510
town now it's about the same size as

804
00:39:47,560 --> 00:39:44,120
Frederick did you know 5060 thousand

805
00:39:49,420 --> 00:39:47,570
something like that at that time less

806
00:39:52,420 --> 00:39:49,430
than 25 thousand but it was a big town

807
00:39:56,910 --> 00:39:52,430
for that part of New Mexico you know and

808
00:40:00,250 --> 00:39:56,920
I get a kick out of the fact that the

809
00:40:03,250 --> 00:40:00,260
town near where the crash actually

810
00:40:07,420 --> 00:40:03,260
occurred wasn't Roswell was Corona tiny

811
00:40:09,510 --> 00:40:07,430
little town and the first spy satellite

812
00:40:12,970 --> 00:40:09,520
was called the corona spies

813
00:40:15,010 --> 00:40:12,980

interestingly enough we knew after the

814

00:40:16,990 --> 00:40:15,020

u2 disaster we knew their Russians would

815

00:40:19,240 --> 00:40:17,000

be able to shoot one down because they

816

00:40:21,880 --> 00:40:19,250

were able to fly almost as high as we

817

00:40:24,730 --> 00:40:21,890

could at that time so isn't it ironic

818

00:40:28,300 --> 00:40:24,740

that the corona spy satellite was

819

00:40:31,630 --> 00:40:28,310

developed and shows you the benefit of

820

00:40:37,900 --> 00:40:31,640

being in a military program there were

821

00:40:40,740 --> 00:40:37,910

12 failures in row the 13th one worked

822

00:40:43,720 --> 00:40:40,750

and got more data on Soviet military

823

00:40:45,580 --> 00:40:43,730

installations than all the u2 flights

824

00:40:49,060 --> 00:40:45,590

that had preceded it

825

00:40:52,720 --> 00:40:49,070

that was a corona spy satellite and it

826
00:40:54,850 --> 00:40:52,730
was kept secret the corona for 25 years

827
00:40:59,410 --> 00:40:54,860
Wow for those who say you can't keep

828
00:41:02,080 --> 00:40:59,420
secrets yes so we did Oh what was it

829
00:41:06,120 --> 00:41:02,090
like when you actually interviewed a

830
00:41:10,540 --> 00:41:06,130
direct witness were they right away

831
00:41:12,850 --> 00:41:10,550
welcoming your or your interview or did

832
00:41:16,900 --> 00:41:12,860
they was it hard to get them to actually

833
00:41:18,940 --> 00:41:16,910
talk about they were welcoming they I

834
00:41:20,380 --> 00:41:18,950
mean I gave him a background sheet and

835
00:41:22,000 --> 00:41:20,390
stuff like that they knew I was

836
00:41:23,470 --> 00:41:22,010
legitimate like I belong the American

837
00:41:25,360 --> 00:41:23,480
nuclear society the American Physical

838
00:41:27,670 --> 00:41:25,370

Society the Americans to do Aeronautics

839

00:41:29,530 --> 00:41:27,680

and Astronautics and I only worked for

840

00:41:32,460 --> 00:41:29,540

big companies General Electric General

841

00:41:36,100 --> 00:41:32,470

Motors Westinghouse McDonnell Douglas

842

00:41:38,980 --> 00:41:36,110

TRW systems so kind of very respectable

843

00:41:41,560 --> 00:41:38,990

background and they know that well

844

00:41:42,749 --> 00:41:41,570

universities may hire quacks on occasion

845

00:41:46,959 --> 00:41:42,759

you know

846

00:41:49,539 --> 00:41:46,969

crackpots if you will but GE and

847

00:41:51,759 --> 00:41:49,549

Westinghouse doesn't have that kind of

848

00:41:54,279 --> 00:41:51,769

reputation if you're good enough to work

849

00:41:58,749 --> 00:41:54,289

for them you must have something on the

850

00:42:01,809 --> 00:41:58,759

ball you know so people cooperated I

851
00:42:05,440 --> 00:42:01,819
think a number the people that I talked

852
00:42:09,309 --> 00:42:05,450
to I think they were glad to get it off

853
00:42:12,249 --> 00:42:09,319
their chest really story yeah yeah

854
00:42:15,160 --> 00:42:12,259
because they knew the the lives were in

855
00:42:17,380 --> 00:42:15,170
the paper right and how was the

856
00:42:19,779 --> 00:42:17,390
consistency of the people it was very

857
00:42:23,170 --> 00:42:19,789
good how they described the materials

858
00:42:25,539 --> 00:42:23,180
and the properties of the materials and

859
00:42:28,150 --> 00:42:25,549
stuff like that but again you got guys

860
00:42:31,930 --> 00:42:28,160
working for the only atomic bombing

861
00:42:35,219 --> 00:42:31,940
group and the entire world yeah that

862
00:42:37,900 --> 00:42:35,229
says something they didn't hire idiots I

863
00:42:41,529 --> 00:42:37,910

mean I know having had a clearance for

864

00:42:44,289 --> 00:42:41,539

14 years that you gotta happen on the

865

00:42:47,920 --> 00:42:44,299

ball to get hired to work on something

866

00:42:50,079 --> 00:42:47,930

very classified right and in other words

867

00:42:51,489 --> 00:42:50,089

you don't walk in from outside hey I'd

868

00:42:56,170 --> 00:42:51,499

like to see where they make the nuclear

869

00:42:58,900 --> 00:42:56,180

bombs or they load them or anything you

870

00:43:00,969 --> 00:42:58,910

don't have access so I found that people

871

00:43:03,450 --> 00:43:00,979

were relieved to be able to talk to

872

00:43:08,739 --> 00:43:03,460

somebody that they felt they could trust

873

00:43:11,079 --> 00:43:08,749

and they recognized I mean the cat was

874

00:43:13,420 --> 00:43:11,089

out of the bag so to speak so they were

875

00:43:16,299 --> 00:43:13,430

not I know some people were in fear

876
00:43:18,039 --> 00:43:16,309
because they were threatened right well

877
00:43:20,319 --> 00:43:18,049
there were people in the early days had

878
00:43:24,640 --> 00:43:20,329
been told to keep the damn mouth shut

879
00:43:26,680 --> 00:43:24,650
no question about that and but that had

880
00:43:29,709 --> 00:43:26,690
to do with all kinds of classified

881
00:43:32,650 --> 00:43:29,719
things all the guys work at the base had

882
00:43:34,959 --> 00:43:32,660
to have a clearance you didn't just walk

883
00:43:36,400 --> 00:43:34,969
in off the street and get access because

884
00:43:38,200 --> 00:43:36,410
you might walk around and see something

885
00:43:40,329 --> 00:43:38,210
that was classified even if you weren't

886
00:43:41,920 --> 00:43:40,339
working with it there are plenty of

887
00:43:44,079 --> 00:43:41,930
people working at the base it's like at

888
00:43:46,719 --> 00:43:44,089

Los Alamos thousands of people work

889

00:43:48,969 --> 00:43:46,729

there and you have to have a clearance

890

00:43:50,510 --> 00:43:48,979

because you may be exposed or hear

891

00:43:56,630 --> 00:43:50,520

somebody talking or

892

00:44:00,320 --> 00:43:56,640

whatever so security has long arm and

893

00:44:03,110 --> 00:44:00,330

gathers in people in information and

894

00:44:10,090 --> 00:44:03,120

threatens the heck out of you ever open

895

00:44:13,370 --> 00:44:10,100

your mouth so when when the government

896

00:44:15,620 --> 00:44:13,380

said that this was you know whether a

897

00:44:16,970 --> 00:44:15,630

weather balloon with the radar reflector

898

00:44:19,090 --> 00:44:16,980

or the radar reflector but when they

899

00:44:22,130 --> 00:44:19,100

first when they first said that oh

900

00:44:26,210 --> 00:44:22,140

nobody argued with it and not even the

901
00:44:30,170 --> 00:44:26,220
witnesses know so they basically had

902
00:44:32,060 --> 00:44:30,180
this out of their life or whatever until

903
00:44:35,690 --> 00:44:32,070
you know you know it started being

904
00:44:40,130 --> 00:44:35,700
investigating it again in the 70s right

905
00:44:43,700 --> 00:44:40,140
right and what about the one thing

906
00:44:47,420 --> 00:44:43,710
that's confusing is about the supposed

907
00:44:50,540 --> 00:44:47,430
pod that crashed separate there seemed

908
00:44:52,760 --> 00:44:50,550
to have been the bodies recovered a

909
00:44:55,940 --> 00:44:52,770
couple of miles from where the wreckage

910
00:44:57,530 --> 00:44:55,950
came down so a crew compartment would

911
00:44:59,720 --> 00:44:57,540
not be surprising when we talk about

912
00:45:04,730 --> 00:44:59,730
crew compartments on spacecrafts as a

913
00:45:07,990 --> 00:45:04,740

matter of fact so you know the first

914

00:45:11,210 --> 00:45:08,000

certainly the newspaper coverage in 1947

915

00:45:13,300 --> 00:45:11,220

didn't say anything about bodies or

916

00:45:17,120 --> 00:45:13,310

anything general says its radar weather

917

00:45:20,450 --> 00:45:17,130

gadget army captures flying saucer on

918

00:45:21,950 --> 00:45:20,460

her ranch in New Mexico general citizens

919

00:45:25,490 --> 00:45:21,960

raid our weather gadget who was gonna

920

00:45:27,920 --> 00:45:25,500

argue now did you actually speak with

921

00:45:31,750 --> 00:45:27,930

any witnesses that said they saw bodies

922

00:45:34,940 --> 00:45:31,760

did you personally speak to anyone I

923

00:45:38,270 --> 00:45:34,950

Glenn Dennis was as close as I came he

924

00:45:40,370 --> 00:45:38,280

was the mortician at the base and he

925

00:45:44,270 --> 00:45:40,380

hadn't heard about them he was asked

926
00:45:47,510 --> 00:45:44,280
about small caskets can you get smaller

927
00:45:49,340 --> 00:45:47,520
gaskets and he says well you can if you

928
00:45:53,160 --> 00:45:49,350
because you got a very children once in

929
00:45:57,289 --> 00:45:53,170
a while you know so Undertaker's even

930
00:45:59,460 --> 00:45:57,299
knew about such things but the people

931
00:46:02,039 --> 00:45:59,470
people weren't running around shooting

932
00:46:04,079 --> 00:46:02,049
off their mouths hey Stan come and talk

933
00:46:07,319 --> 00:46:04,089
to me it wasn't like that I had to find

934
00:46:11,130 --> 00:46:07,329
them and oh sure I'd ask everybody I

935
00:46:12,420 --> 00:46:11,140
talked to like Walter how I was looking

936
00:46:16,890 --> 00:46:12,430
for which we can write the base at the

937
00:46:19,140 --> 00:46:16,900
time it's a big base and in a small town

938
00:46:23,039 --> 00:46:19,150

like that people get to know each other

939

00:46:26,460 --> 00:46:23,049

you know this isn't the big city not at

940

00:46:32,039 --> 00:46:26,470

all old for Roswell and the bases was

941

00:46:35,880 --> 00:46:32,049

just what nine miles south of town okay

942

00:46:40,849 --> 00:46:35,890

so I am going to some reason I can't get

943

00:46:45,930 --> 00:46:40,859

our call-in number coming up there so

944

00:46:48,390 --> 00:46:45,940

and I am going to open the phones up

945

00:46:50,940 --> 00:46:48,400

people would like to call in and wish

946

00:46:55,529 --> 00:46:50,950

Stan well I'm trying to get the number

947

00:46:57,630 --> 00:46:55,539

up there right now but this number is

948

00:47:00,329 --> 00:46:57,640

only good during the live show and for

949

00:47:01,980 --> 00:47:00,339

some reason this is just not showing up

950

00:47:06,089 --> 00:47:01,990

like I suppose see it right there but I

951

00:47:11,849 --> 00:47:06,099

can't get it to shift over so that

952

00:47:13,499 --> 00:47:11,859

call-in number is 603 967 403 Oh if

953

00:47:16,160 --> 00:47:13,509

anyone would like to call in you're

954

00:47:18,690 --> 00:47:16,170

welcome to call in and wish Stan well

955

00:47:21,390 --> 00:47:18,700

now how that's going to work basically

956

00:47:24,990 --> 00:47:21,400

is if you're listening live on YouTube

957

00:47:27,690 --> 00:47:25,000

of course or kgr a radio you're gonna

958

00:47:29,759 --> 00:47:27,700

have to mute you're gonna have to mute

959

00:47:31,200 --> 00:47:29,769

or turn down your speaker's down really

960

00:47:33,870 --> 00:47:31,210

low so there's no feedback coming

961

00:47:37,019 --> 00:47:33,880

through and I'll take calls and you'll

962

00:47:40,079 --> 00:47:37,029

be on hold until I introduce you I can

963

00:47:42,210 --> 00:47:40,089

only take one person at a time so you'll

964

00:47:43,769 --> 00:47:42,220

have to be patient and calling in but

965

00:47:45,539 --> 00:47:43,779

you are welcome to call in now and

966

00:47:49,079 --> 00:47:45,549

hopefully I'll be able to figure out the

967

00:47:50,220 --> 00:47:49,089

call and number bring that back here to

968

00:47:56,069 --> 00:47:50,230

put it up on the screen again that

969

00:47:56,370 --> 00:47:56,079

number is 603 967 403 Oh or anyone that

970

00:48:00,630 --> 00:47:56,380

would

971

00:48:05,220 --> 00:48:00,640

and call it alright

972

00:48:12,359 --> 00:48:05,230

so they'll probably call in more in the

973

00:48:16,430 --> 00:48:12,369

second hour so in your your career in

974

00:48:19,140 --> 00:48:16,440

this field I would say that your your

975

00:48:21,779 --> 00:48:19,150

that's your biggest contribution it have

976

00:48:22,349 --> 00:48:21,789

to be I mean Roswell yeah it's on the

977

00:48:24,809 --> 00:48:22,359

map

978

00:48:27,920 --> 00:48:24,819

I bet the I bet even the town has more

979

00:48:31,349 --> 00:48:27,930

of a population because it's well the

980

00:48:34,940 --> 00:48:31,359

museum International UFO Museum and

981

00:48:37,470 --> 00:48:34,950

Research Center in Roswell last year

982

00:48:44,039 --> 00:48:37,480

you're actually the year before last

983

00:48:45,749 --> 00:48:44,049

it had 220 whoops let's start gonna have

984

00:48:49,680 --> 00:48:45,759

to turn up turn off whatever it is make

985

00:48:52,890 --> 00:48:49,690

a noise hang in there I know no hang in

986

00:48:57,120 --> 00:48:52,900

there please yes sir last year the

987

00:49:02,789 --> 00:48:57,130

museum and over 220,000 visitors this is

988

00:49:05,130 --> 00:49:02,799

a town yeah and you if you were there

989

00:49:06,870 --> 00:49:05,140

you gotta want to be there it's it's in

990

00:49:08,400 --> 00:49:06,880

the middle of nowhere it's 200 miles

991

00:49:12,059 --> 00:49:08,410

from Albuquerque it's 200 miles from

992

00:49:14,099 --> 00:49:12,069

Amarillo it's 200 miles from El Paso so

993

00:49:17,130 --> 00:49:14,109

it's not on the way by to anyplace

994

00:49:18,599 --> 00:49:17,140

that's right words so that shows the

995

00:49:21,539 --> 00:49:18,609

interest may come from all over the

996

00:49:24,720 --> 00:49:21,549

world no question about that just as

997

00:49:27,029 --> 00:49:24,730

I've spoken in all 50 states all 50

998

00:49:29,039 --> 00:49:27,039

states ten Canadian provinces and 19

999

00:49:30,930 --> 00:49:29,049

other countries don't tell me that

1000

00:49:34,230 --> 00:49:30,940

people aren't interested I know they are

1001
00:49:36,029 --> 00:49:34,240
cuz I've been out there alright so we

1002
00:49:39,870 --> 00:49:36,039
caller what's your first name and where

1003
00:49:42,870 --> 00:49:39,880
are you calling from um my first name is

1004
00:49:45,329 --> 00:49:42,880
yeah I know and I'm calling from Mount

1005
00:49:48,870 --> 00:49:45,339
Pleasant Texas or I'm from San Antonio

1006
00:49:50,460 --> 00:49:48,880
alright thank you I think I'm trying to

1007
00:49:53,309 --> 00:49:50,470
crank the volume down here a little bit

1008
00:49:56,609 --> 00:49:53,319
so you have a comment or a question

1009
00:49:59,099 --> 00:49:56,619
you'd like to ask in I have a question

1010
00:50:02,190 --> 00:49:59,109
more about the procedures on keeping

1011
00:50:07,200 --> 00:50:02,200
secrets and I wasn't scared with know

1012
00:50:08,650 --> 00:50:07,210
about analyzing secrets because keeping

1013
00:50:10,960 --> 00:50:08,660

your mouth shut that's probably

1014

00:50:14,920 --> 00:50:10,970

the problem that's not called upon

1015

00:50:18,579 --> 00:50:14,930

that's partly how is and it seems to me

1016

00:50:21,130 --> 00:50:18,589

that in his I want to ask in his

1017

00:50:25,839 --> 00:50:21,140

research had the other came to the

1018

00:50:29,079 --> 00:50:25,849

conclusion that you that the phenomenon

1019

00:50:33,220 --> 00:50:29,089

doesn't want you to know about it about

1020

00:50:36,130 --> 00:50:33,230

the about UFOs in general not just UFOs

1021

00:50:37,420 --> 00:50:36,140

but the paranormal in general and I

1022

00:50:39,099 --> 00:50:37,430

don't think my comments off the air

1023

00:50:40,690 --> 00:50:39,109

thanks for the call

1024

00:50:43,750 --> 00:50:40,700

well of course I haven't spoken to any

1025

00:50:46,089 --> 00:50:43,760

aliens and I haven't spoken to somebody

1026
00:50:48,190 --> 00:50:46,099
who says yeah I'm well aware of all the

1027
00:50:49,569 --> 00:50:48,200
secrets in this than anything I mean we

1028
00:50:56,349 --> 00:50:49,579
don't get that kind of insight

1029
00:50:59,380 --> 00:50:56,359
information but I think the aliens are

1030
00:51:01,000 --> 00:50:59,390
here for their purposes they know we

1031
00:51:03,370 --> 00:51:01,010
know they're here after you've been

1032
00:51:06,130 --> 00:51:03,380
tracked on radar umpteen hundred times

1033
00:51:09,400 --> 00:51:06,140
from the ground and from the air and

1034
00:51:11,140 --> 00:51:09,410
who's got the radar the government has

1035
00:51:12,940 --> 00:51:11,150
the radar you and I don't have our own

1036
00:51:14,529 --> 00:51:12,950
little radar set let's set up a radar

1037
00:51:16,630 --> 00:51:14,539
set and see if we can crack any of these

1038
00:51:19,480 --> 00:51:16,640

UFOs that would be neat but you know

1039

00:51:21,609 --> 00:51:19,490

we're not in that position so there have

1040

00:51:23,890 --> 00:51:21,619

to be some few people in government and

1041

00:51:24,940 --> 00:51:23,900

there's another misconception some

1042

00:51:26,920 --> 00:51:24,950

people think well if you've got a

1043

00:51:29,730 --> 00:51:26,930

top-secret clearance you have access to

1044

00:51:32,380 --> 00:51:29,740

whole top secret material right wrong

1045

00:51:36,190 --> 00:51:32,390

there are two parts you have to have an

1046

00:51:37,750 --> 00:51:36,200

appropriate clearance and you have to

1047

00:51:41,440 --> 00:51:37,760

have a need-to-know

1048

00:51:43,690 --> 00:51:41,450

I mean I worked on radiation shielding

1049

00:51:50,280 --> 00:51:43,700

front of the airplanes that did not give

1050

00:51:53,310 --> 00:51:50,290

me access to classified Q clearance

1051
00:51:56,850 --> 00:51:53,320
atomic secrets if you will from other

1052
00:51:59,250 --> 00:51:56,860
programmers sorry you don't ever need to

1053
00:52:00,530 --> 00:51:59,260
know but I have a clearance that's not

1054
00:52:03,480 --> 00:52:00,540
good enough

1055
00:52:06,030 --> 00:52:03,490
and somebody makes those decisions in

1056
00:52:07,980 --> 00:52:06,040
other words so it's a double-layer you

1057
00:52:10,200 --> 00:52:07,990
got to pass through the sieve in the

1058
00:52:13,170 --> 00:52:10,210
first place to make sure you're a decent

1059
00:52:15,480 --> 00:52:13,180
honorable trustworthy etc etc and

1060
00:52:18,900 --> 00:52:15,490
secondly you have to have a need-to-know

1061
00:52:20,820 --> 00:52:18,910
and somebody has to certify that I went

1062
00:52:23,160 --> 00:52:20,830
through this when I visited on business

1063
00:52:26,480 --> 00:52:23,170

Los Alamos and other classified

1064

00:52:29,100 --> 00:52:26,490

facilities my company had to send

1065

00:52:32,280 --> 00:52:29,110

information about my clearance to those

1066

00:52:33,870 --> 00:52:32,290

people and they had to accept it I mean

1067

00:52:37,980 --> 00:52:33,880

if they didn't accept that I couldn't

1068

00:52:41,490 --> 00:52:37,990

visit there so it it's not a simple

1069

00:52:44,250 --> 00:52:41,500

question you know know it's difficult

1070

00:52:46,200 --> 00:52:44,260

need to know it's very important yeah

1071

00:52:47,460 --> 00:52:46,210

yeah I could see how that works all

1072

00:52:48,960 --> 00:52:47,470

right we have another caller on the line

1073

00:52:56,090 --> 00:52:48,970

your first name and where are you

1074

00:53:00,960 --> 00:52:59,760

hi Stan good to hear from you I'm sorry

1075

00:53:07,440 --> 00:53:00,970

you're retiring

1076

00:53:11,820 --> 00:53:07,450

hey I'm 84 what do you expect you got a

1077

00:53:13,920 --> 00:53:11,830

ways to go man Wow I hope to make 84 but

1078

00:53:15,510 --> 00:53:13,930

I enjoyed your visit to a quick

1079

00:53:18,990 --> 00:53:15,520

Community College at Blacksburg State

1080

00:53:22,140 --> 00:53:19,000

and I'm reading your book top-secret

1081

00:53:25,500 --> 00:53:22,150

magic again and this time right now at

1082

00:53:28,800 --> 00:53:25,510

the moment and I just got this email but

1083

00:53:30,180 --> 00:53:28,810

this arrives YouTube is up and I just

1084

00:53:32,790 --> 00:53:30,190

had to call in and say hi and

1085

00:53:39,090 --> 00:53:32,800

congratulations I mean you're still

1086

00:53:44,240 --> 00:53:39,100

alive right 86 so 84 84 well I have hope

1087

00:53:51,030 --> 00:53:44,250

for another 20 years myself been good

1088

00:53:53,400 --> 00:53:51,040

but I'm hoping I can get musk so he is

1089

00:53:58,860 --> 00:53:53,410

going to land at the gratitude in

1090

00:54:01,430 --> 00:53:58,870

Cydonia and any book that you that

1091

00:54:03,829 --> 00:54:01,440

stands human rights there's a splat

1092

00:54:06,650 --> 00:54:03,839

acts in there they there's brutal truths

1093

00:54:09,650 --> 00:54:06,660

and it is hard to get through the

1094

00:54:12,319 --> 00:54:09,660

different leaders it really is I mean a

1095

00:54:15,559 --> 00:54:12,329

top secret magic is one of the books

1096

00:54:19,370 --> 00:54:15,569

that shows how ye have to go into the

1097

00:54:22,069 --> 00:54:19,380

details of which typewriter was used and

1098

00:54:24,440 --> 00:54:22,079

and something like that and it is true

1099

00:54:26,390 --> 00:54:24,450

if you don't have a need to know even

1100

00:54:28,819 --> 00:54:26,400

presidents don't get the full briefings

1101

00:54:31,579 --> 00:54:28,829

thanks Bobby the last full briefing was

1102

00:54:39,890 --> 00:54:31,589

Eisenhower so I know Kennedy didn't get

1103

00:54:43,010 --> 00:54:39,900

one all the book sets this Dan Freeman

1104

00:54:45,109 --> 00:54:43,020

has as I had and the other thing I've

1105

00:54:49,270 --> 00:54:45,119

asked him for that he's never given me

1106

00:54:52,670 --> 00:54:49,280

it's those five hundred black pages

1107

00:54:54,079 --> 00:54:52,680

before yes and so I mean I'd like to be

1108

00:54:58,010 --> 00:54:54,089

able to just flip through those things

1109

00:55:01,520 --> 00:54:58,020

on a commercial if I won the Publishers

1110

00:55:05,059 --> 00:55:01,530

Clearing House right but that'll never

1111

00:55:07,700 --> 00:55:05,069

happen like being abducted I haven't

1112

00:55:10,970 --> 00:55:07,710

even seen a UFO so I almost step behind

1113

00:55:14,859 --> 00:55:10,980

you well I haven't seen I don't really

1114

00:55:17,150 --> 00:55:14,869

see money that my father did but he said

1115

00:55:20,930 --> 00:55:17,160

you know so I haven't seen one myself

1116

00:55:22,700 --> 00:55:20,940

but I know they were there you know with

1117

00:55:25,309 --> 00:55:22,710

with everything else and all the videos

1118

00:55:30,220 --> 00:55:25,319

that are out there and all the books

1119

00:55:34,520 --> 00:55:30,230

I've read that you've wrote and pouty

1120

00:55:37,280 --> 00:55:34,530

day after Roswell you know that one your

1121

00:55:39,770 --> 00:55:37,290

Air Force guy was one that definitely

1122

00:55:43,520 --> 00:55:39,780

stepped forward and had Kony's to tell

1123

00:55:45,589 --> 00:55:43,530

the truth and and and thank God for for

1124

00:55:47,569 --> 00:55:45,599

people like him and like an unlikely

1125

00:55:51,200 --> 00:55:47,579

would you discovers blue books about

1126
00:55:54,500 --> 00:55:51,210
support for teen I mean just your old

1127
00:55:58,160 --> 00:55:54,510
man up now I mean that right there and

1128
00:56:00,680 --> 00:55:58,170
14 there's no way anybody if it's

1129
00:56:03,530 --> 00:56:00,690
brought up can debate it there's like

1130
00:56:06,200 --> 00:56:03,540
911 you can't debate that thing came

1131
00:56:07,640 --> 00:56:06,210
down hundred ten story building came

1132
00:56:11,650 --> 00:56:07,650
down in fifteen seconds without

1133
00:56:13,210 --> 00:56:11,660
explosives I mean your physics Scottie

1134
00:56:17,500 --> 00:56:13,220
this thing

1135
00:56:19,000 --> 00:56:17,510
you know science is science and you

1136
00:56:21,099 --> 00:56:19,010
can't make a left-hand turn on a

1137
00:56:22,180 --> 00:56:21,109
right-hand turn unless you're inside the

1138
00:56:24,880 --> 00:56:22,190

center of gravity

1139

00:56:29,950 --> 00:56:24,890

all right well actually that project

1140

00:56:31,570 --> 00:56:29,960

group of 14 it that was asked to the the

1141

00:56:37,450 --> 00:56:31,580

the State Department I mean it never

1142

00:56:39,640 --> 00:56:37,460

does the DoD a NASA or even Donald Trump

1143

00:56:43,390 --> 00:56:39,650

he would not they would not be able to

1144

00:56:46,359 --> 00:56:43,400

explain such a report 14 without saying

1145

00:56:48,130 --> 00:56:46,369

that yes through our extraterrestrials

1146

00:56:50,530 --> 00:56:48,140

here and yes they are abducting people

1147

00:56:52,570 --> 00:56:50,540

and there's also a race of them that

1148

00:56:55,030 --> 00:56:52,580

looked like God and I'm sorry but we

1149

00:56:56,730 --> 00:56:55,040

really won look what we're running late

1150

00:56:58,720 --> 00:56:56,740

for the break we have to go into break

1151

00:57:03,370 --> 00:56:58,730

thanks so much for the call

1152

00:57:06,010 --> 00:57:03,380

yeah good luck Dan and get in touch with

1153

00:57:08,339 --> 00:57:06,020

you again someday I hope so too I hope

1154

00:57:10,990 --> 00:57:08,349

I'll still be around to be talked to

1155

00:57:13,540 --> 00:57:11,000

good night talking to you thing all

1156

00:57:16,089 --> 00:57:13,550

right so it's time for our break this is

1157

00:57:18,820 --> 00:57:16,099

Martin Willis on podcast UFO and we're

1158

00:57:28,950 --> 00:57:18,830

on kgr a radio and hang in there we'll

1159

00:57:32,170 --> 00:57:28,960

be right back Martin we're in the clear

1160

00:57:38,320 --> 00:57:32,180

the cleaning staff is here running

1161

00:57:40,900 --> 00:57:38,330

vacuum cleaners and everything else ok

1162

00:57:42,579 --> 00:57:40,910

good all right sorry about the feedback

1163

00:57:47,109 --> 00:57:42,589

I this really nothing I can do right now

1164

00:57:49,030 --> 00:57:47,119

to stop that so it's not real bad no no

1165

00:57:51,040 --> 00:57:49,040

it just didn't happen they're just one

1166

00:57:52,780 --> 00:57:51,050

little short period oh okay all right

1167

00:57:54,430 --> 00:57:52,790

because I turned the computer a little

1168

00:57:56,620 --> 00:57:54,440

bit hoping it would deflect it a little

1169

00:57:59,200 --> 00:57:56,630

bit all right thank you

1170

00:58:00,910 --> 00:57:59,210

okay so now we have this break here let

1171

00:58:03,110 --> 00:58:00,920

me just pull up to see if we have any

1172

00:58:07,790 --> 00:58:03,120

questions

1173

00:58:10,400 --> 00:58:07,800

that people wanted answered and what

1174

00:58:11,780 --> 00:58:10,410

about the skinwalker that movie just

1175

00:58:14,780 --> 00:58:11,790

came out I wondered - have you looked

1176

00:58:18,110 --> 00:58:14,790

into that at all it's on my list of

1177

00:58:21,770 --> 00:58:18,120

books - to get I haven't looked into

1178

00:58:25,640 --> 00:58:21,780

that I know George Knapp though yeah

1179

00:58:28,100 --> 00:58:25,650

he's great guy and a very solid reporter

1180

00:58:33,110 --> 00:58:28,110

yeah I mean we don't always agree on

1181

00:58:35,750 --> 00:58:33,120

things yeah yes that's one of the people

1182

00:58:37,850 --> 00:58:35,760

who we don't agree about yeah but I have

1183

00:58:39,500 --> 00:58:37,860

the greatest respect for George I did -

1184

00:58:41,300 --> 00:58:39,510

he's very knowledgeable I've been

1185

00:58:45,860 --> 00:58:41,310

interviewed by him I've spent some time

1186

00:58:47,480 --> 00:58:45,870

with them yeah and really good man yeah

1187

00:58:50,210 --> 00:58:47,490

yeah and it's matter I was reading

1188

00:58:52,940 --> 00:58:50,220

something today and you find journal I

1189

00:58:54,170 --> 00:58:52,950

think about the skinwalker ranch in

1190

00:58:57,620 --> 00:58:54,180

something like I've got to get the book

1191

00:59:01,100 --> 00:58:57,630

I don't know the book yeah so the video

1192

00:59:05,630 --> 00:59:01,110

just came out on the 11th I think it was

1193

00:59:08,900 --> 00:59:05,640

and that is a video that Jeremy Korbelt

1194

00:59:11,780 --> 00:59:08,910

did using a lot of George Knapp's

1195

00:59:15,050 --> 00:59:11,790

original footage from 25 years earlier I

1196

00:59:15,680 --> 00:59:15,060

think yes he's a big fan of Lazar and

1197

00:59:17,630 --> 00:59:15,690

Sue Ellen

1198

00:59:19,580 --> 00:59:17,640

yes he is he's got a film coming out in

1199

00:59:22,130 --> 00:59:19,590

December you know we have a call coming

1200

00:59:23,330 --> 00:59:22,140

in now we have I don't know exactly how

1201
00:59:23,840 --> 00:59:23,340
many minutes but why don't we take the

1202
00:59:32,510 --> 00:59:23,850
call

1203
00:59:37,610 --> 00:59:32,520
all right your first name where you can

1204
00:59:39,920 --> 00:59:37,620
get them Robert and gone from California

1205
00:59:41,300 --> 00:59:39,930
hey Robert how you doing so just to let

1206
00:59:42,980 --> 00:59:41,310
you know we only have two minutes here

1207
00:59:44,930 --> 00:59:42,990
in the break so if we can wrap it up in

1208
00:59:48,470 --> 00:59:44,940
the two minutes I'd be great so go ahead

1209
00:59:50,210 --> 00:59:48,480
we're just gonna ask him yeah okay did

1210
00:59:53,090 --> 00:59:50,220
you want me to ask the question now sure

1211
00:59:58,880 --> 00:59:53,100
already okay

1212
01:00:03,650 --> 00:59:58,890
stand George Easley Isley he was the

1213
01:00:05,860 --> 01:00:03,660

last link to FDR and Truman he died not

1214

01:00:08,960 --> 01:00:05,870

too long joy I'm the one at such the

1215

01:00:11,360 --> 01:00:08,970

email from California that he was just

1216

01:00:16,340 --> 01:00:11,370

like one city over from me in Tustin

1217

01:00:17,060 --> 01:00:16,350

California and and he was like the inner

1218

01:00:19,970 --> 01:00:17,070

circle

1219

01:00:21,830 --> 01:00:19,980

I remember you skating but you felt at

1220

01:00:24,260 --> 01:00:21,840

the time he didn't know anything I think

1221

01:00:26,300 --> 01:00:24,270

you said that you had interviewed him he

1222

01:00:30,290 --> 01:00:26,310

was a naval officer

1223

01:00:32,450 --> 01:00:30,300

but this wondering now that there's some

1224

01:00:35,720 --> 01:00:32,460

time has passed do you think he may have

1225

01:00:41,090 --> 01:00:35,730

known something about Roswell what was

1226

01:00:42,650 --> 01:00:41,100

the last name nicely L see L say L sey

1227

01:00:45,110 --> 01:00:42,660

George L see

1228

01:00:46,970 --> 01:00:45,120

yes I talked to him as a matter of fact

1229

01:00:50,600 --> 01:00:46,980

and I was very favorably impressed he

1230

01:00:55,160 --> 01:00:50,610

was a Navy ensign for many years and he

1231

01:00:58,100 --> 01:00:55,170

was very helpful and I was pleased to

1232

01:01:03,680 --> 01:00:58,110

find firsthand sources like that I mean

1233

01:01:05,240 --> 01:01:03,690

he was in the military I appreciated you

1234

01:01:07,490 --> 01:01:05,250

know I've had the good fortune of

1235

01:01:12,560 --> 01:01:07,500

talking to lots of people that I had the

1236

01:01:15,110 --> 01:01:12,570

greatest respect for the world war two

1237

01:01:17,570 --> 01:01:15,120

was a major event in man's history and

1238

01:01:20,930 --> 01:01:17,580

most of the guys I talked to had been in

1239

01:01:23,240 --> 01:01:20,940

the war or soon thereafter in the

1240

01:01:25,580 --> 01:01:23,250

military and stuff so I was very

1241

01:01:28,580 --> 01:01:25,590

impressed and George OC is one of them

1242

01:01:30,710 --> 01:01:28,590

as matter of fact his picture is in one

1243

01:01:34,280 --> 01:01:30,720

of my books I think I think I'm actually

1244

01:01:36,080 --> 01:01:34,290

gonna have to you don't so he told you

1245

01:01:38,690 --> 01:01:36,090

that he did not have any information

1246

01:01:40,040 --> 01:01:38,700

about Roswell or right okay one of the

1247

01:01:41,600 --> 01:01:40,050

other crashes you've written about

1248

01:01:43,190 --> 01:01:41,610

writte you're gonna have to hang in

1249

01:01:47,480 --> 01:01:43,200

there maybe we can somehow bring this

1250

01:01:49,850 --> 01:01:47,490

conversation into we have to go oh the

1251

01:02:00,620 --> 01:01:49,860

brakes off just hang in there a reason

1252

01:02:02,630 --> 01:02:00,630

why you have to stop talking please and

1253

01:02:03,080 --> 01:02:02,640

we'll get you right back on here here we

1254

01:02:11,420 --> 01:02:03,090

go

1255

01:02:13,580 --> 01:02:11,430

three two already one welcome back to

1256

01:02:15,740 --> 01:02:13,590

the show my name is Martin Willis and I

1257

01:02:18,380 --> 01:02:15,750

am with Stanton Friedman up in New

1258

01:02:20,810 --> 01:02:18,390

Brunswick and we were talking all kinds

1259

01:02:25,430 --> 01:02:20,820

of things we just and during the break a

1260

01:02:29,000 --> 01:02:25,440

name came up and and we have a caller on

1261

01:02:30,750 --> 01:02:29,010

the line now so if you would can you

1262

01:02:32,700 --> 01:02:30,760

kind of in a nutshell

1263

01:02:38,040 --> 01:02:32,710

talk about this situation we can bring

1264

01:02:44,070 --> 01:02:38,050

the caller back in which is Lee whatever

1265

01:02:47,420 --> 01:02:44,080

is your a jail yes well I I called the

1266

01:02:49,800 --> 01:02:47,430

Truman library I've been to 20 archives

1267

01:02:52,860 --> 01:02:49,810

because I think you need to get

1268

01:02:54,600 --> 01:02:52,870

first-hand information and the

1269

01:02:57,360 --> 01:02:54,610

Eisenhower library the Truman library

1270

01:03:00,930 --> 01:02:57,370

the Kennedy Library and a whole bunch of

1271

01:03:04,080 --> 01:03:00,940

other places and I asked the Truman

1272

01:03:07,350 --> 01:03:04,090

library this is a number of years ago

1273

01:03:10,640 --> 01:03:07,360

was there anybody still around who you

1274

01:03:13,470 --> 01:03:10,650

know was at the White House in the 40s

1275

01:03:15,660 --> 01:03:13,480

when Truman was president and stuff and

1276

01:03:18,420 --> 01:03:15,670

they mentioned Giorgio's scene and they

1277

01:03:22,560 --> 01:03:18,430

told me how to find him which I did and

1278

01:03:25,590 --> 01:03:22,570

do you see and so we were talking about

1279

01:03:27,270 --> 01:03:25,600

things like James and Leigh who was the

1280

01:03:31,620 --> 01:03:27,280

executive secretary of the National

1281

01:03:35,640 --> 01:03:31,630

Security Council and here's a guy Elsie

1282

01:03:37,620 --> 01:03:35,650

who served at the White House how can

1283

01:03:40,200 --> 01:03:37,630

you not listen to somebody like that you

1284

01:03:40,740 --> 01:03:40,210

know during this time frame he's dead

1285

01:03:47,400 --> 01:03:40,750

now

1286

01:03:52,950 --> 01:03:47,410

but so I did talk to him it was very

1287

01:03:55,020 --> 01:03:52,960

favorably impressed and I had so many

1288

01:03:57,870 --> 01:03:55,030

people that I talked to it like I'll see

1289

01:04:00,030 --> 01:03:57,880

you who had sufficient background so

1290

01:04:01,170 --> 01:04:00,040

that you could not not from done as oh

1291

01:04:02,730 --> 01:04:01,180

he's a nobody

1292

01:04:04,440 --> 01:04:02,740

you know he doesn't know what he's

1293

01:04:08,610 --> 01:04:04,450

talking about he wasn't there that sort

1294

01:04:11,460 --> 01:04:08,620

of nonsense I check out people I ask for

1295

01:04:13,170 --> 01:04:11,470

credentials I look to see forms you know

1296

01:04:16,070 --> 01:04:13,180

if there's one thing the military does

1297

01:04:21,630 --> 01:04:16,080

it has forms all over the place

1298

01:04:27,150 --> 01:04:21,640

documents and so he was a Navy ensign

1299

01:04:29,310 --> 01:04:27,160

and he LC was very helpful in offering

1300

01:04:29,970 --> 01:04:29,320

information about how things worked at

1301

01:04:33,120 --> 01:04:29,980

the White House

1302

01:04:34,740 --> 01:04:33,130

and things like you know if you get guys

1303

01:04:37,740 --> 01:04:34,750

who were there I had somebody say one of

1304

01:04:40,470 --> 01:04:37,750

the documents that I say is genuine and

1305

01:04:43,620 --> 01:04:40,480

fill class who was a big D bunker paid

1306

01:04:50,780 --> 01:04:43,630

me a thousand dollars for proving him

1307

01:04:54,450 --> 01:04:50,790

wrong about documents and I was able to

1308

01:04:59,880 --> 01:04:54,460

get other documents and one thing George

1309

01:05:03,450 --> 01:04:59,890

agreed with LC was that the government

1310

01:05:06,180 --> 01:05:03,460

isn't always consistent not everything

1311

01:05:08,070 --> 01:05:06,190

has the same typeface back then people

1312

01:05:11,750 --> 01:05:08,080

use typewriters is before the computer

1313

01:05:18,900 --> 01:05:11,760

age back in the 40s and 50s and stuff

1314

01:05:22,380 --> 01:05:18,910

rajma was 1947 so it was good to talk to

1315

01:05:25,260 --> 01:05:22,390

people who were on the scene and who

1316

01:05:27,780 --> 01:05:25,270

could say yes that's just exactly of

1317

01:05:31,440 --> 01:05:27,790

course somebody was out of the country

1318

01:05:36,890 --> 01:05:31,450

at the time Wood James Leigh the

1319

01:05:39,000 --> 01:05:36,900

National Security Council have been

1320

01:05:41,849 --> 01:05:39,010

involved in doing something this is

1321

01:05:44,550 --> 01:05:41,859

during the Eisenhower era and so I was

1322

01:05:46,950 --> 01:05:44,560

just wondering now that you have time to

1323

01:05:50,550 --> 01:05:46,960

reflect you think that he may have known

1324

01:05:52,530 --> 01:05:50,560

about Roswell prop he might have known a

1325

01:05:54,870 --> 01:05:52,540

little bit heard something from somebody

1326

01:05:58,290 --> 01:05:54,880

scuttlebutt if you will as they used to

1327

01:06:00,930 --> 01:05:58,300

call it and the reason why I say that at

1328

01:06:03,740 --> 01:06:00,940

the end of that during a second

1329

01:06:06,420 --> 01:06:03,750

interview he showed the reporter

1330

01:06:09,030 --> 01:06:06,430

top-secret documents of the Truman

1331

01:06:10,920 --> 01:06:09,040

Doctrine doctrine which currently you

1332

01:06:13,920 --> 01:06:10,930

know I mean whatever the special words

1333

01:06:16,620 --> 01:06:13,930

for not having these papers well he had

1334

01:06:19,230 --> 01:06:16,630

him in his house in a hidden in some

1335

01:06:21,180 --> 01:06:19,240

sort of library cabinet so that got me

1336

01:06:25,320 --> 01:06:21,190

to wondering I wonder what else he may

1337

01:06:28,140 --> 01:06:25,330

have I don't know anybody who's

1338

01:06:29,910 --> 01:06:28,150

listening who has some documents that

1339

01:06:31,680 --> 01:06:29,920

they'd like to show somebody that they

1340

01:06:36,390 --> 01:06:31,690

think they can trust and who's gonna die

1341

01:06:37,920 --> 01:06:36,400

anyway pretty soon I'd like to hear from

1342

01:06:41,520 --> 01:06:37,930

them I'm in Fredericton New Brunswick

1343

01:06:43,350 --> 01:06:41,530

Canada I'm in the phone book you can

1344

01:06:44,940 --> 01:06:43,360

look me up I didn't wonder if you

1345

01:06:47,010 --> 01:06:44,950

if you knew if you knew any of his

1346

01:06:48,630 --> 01:06:47,020

family members because that was the

1347

01:06:50,790 --> 01:06:48,640

other thing that can be after they sent

1348

01:06:53,220 --> 01:06:50,800

you in the email that he actually led to

1349

01:06:55,350 --> 01:06:53,230

reporters see this document of the

1350

01:06:57,960 --> 01:06:55,360

Truman Doctrine that he actually kept

1351

01:06:59,550 --> 01:06:57,970

from the White House which I'm sure he

1352

01:07:02,670 --> 01:06:59,560

wasn't supposed to keep but you know of

1353

01:07:06,450 --> 01:07:02,680

course back then as you know and my dad

1354

01:07:08,880 --> 01:07:06,460

was also in the Air Force sac Strategic

1355

01:07:12,630 --> 01:07:08,890

Air Command he actually five he actually

1356

01:07:16,190 --> 01:07:12,640

told me one day that he saw five saucers

1357

01:07:18,540 --> 01:07:16,200

out at Hunter airbase in Georgia

1358

01:07:20,280 --> 01:07:18,550

Savannah Georgia it's not there anymore

1359

01:07:22,830 --> 01:07:20,290

but I don't know if you're aware of an

1360

01:07:25,140 --> 01:07:22,840

arm of the Army Air Corps base called

1361

01:07:28,040 --> 01:07:25,150

the hunter airbase he said it's coming

1362

01:07:31,680 --> 01:07:28,050

out of the latrine walking towards his

1363

01:07:33,660 --> 01:07:31,690

bomber is I believe they kept that also

1364

01:07:38,340 --> 01:07:33,670

atomic bombs there may be or at least

1365

01:07:40,620 --> 01:07:38,350

some sort of the wing wing you know b-52

1366

01:07:43,340 --> 01:07:40,630

is there at hunter Air Base and he city

1367

01:07:47,390 --> 01:07:43,350

looked up and he saw a five disc

1368

01:07:51,180 --> 01:07:47,400

circling around like a merry-go-round

1369

01:07:52,890 --> 01:07:51,190

this is like back in 1953 and I was this

1370

01:07:55,380 --> 01:07:52,900

one that was another thing I mean I know

1371

01:07:57,780 --> 01:07:55,390

I'm off the topic but I was the one that

1372

01:07:59,550 --> 01:07:57,790

sent to the email that he had passed and

1373

01:08:02,220 --> 01:07:59,560

I was in the Orange County Register and

1374

01:08:04,380 --> 01:08:02,230

then I thought well maybe he had contact

1375

01:08:06,990 --> 01:08:04,390

with the family to see if he had and he

1376

01:08:09,180 --> 01:08:07,000

hidden things that they discovered so

1377

01:08:13,020 --> 01:08:09,190

see anything retaining the Roswell or

1378

01:08:13,830 --> 01:08:13,030

the other crash did you found that was a

1379

01:08:20,930 --> 01:08:13,840

Corona

1380

01:08:23,310 --> 01:08:20,940

other was the plains of Sun Agustin yeah

1381

01:08:26,940 --> 01:08:23,320

well I'm just kind of I'm kind of late

1382

01:08:29,400 --> 01:08:26,950

to the party Vanna you know I've seen

1383

01:08:31,380 --> 01:08:29,410

you many times on the dusty back when

1384

01:08:34,800 --> 01:08:31,390

they really had news programs such as

1385

01:08:38,970 --> 01:08:34,810

the real Nightline and Larry King and of

1386

01:08:43,440 --> 01:08:38,980

course now it's like cotton candy so you

1387

01:08:46,170 --> 01:08:43,450

know I mean but no fluff a shout out

1388

01:08:47,970 --> 01:08:46,180

from Southern California have a great

1389

01:08:50,850 --> 01:08:47,980

retirement have some fun

1390

01:08:52,410 --> 01:08:50,860

are you going to be popping up still

1391

01:08:55,050 --> 01:08:52,420

once in a while because I just think

1392

01:08:56,430 --> 01:08:55,060

can't see you sitting around well no

1393

01:08:58,050 --> 01:08:56,440

I've got a couple more

1394

01:09:01,289 --> 01:08:58,060

but just to give I'll be in South

1395

01:09:05,490 --> 01:09:01,299

Carolina at the end of the week and I

1396

01:09:08,579 --> 01:09:05,500

got to in California three next year

1397

01:09:11,189 --> 01:09:08,589

I'm the 50th anniversary of MUFON the

1398

01:09:13,140 --> 01:09:11,199

mutual UFO network they have an annual

1399

01:09:17,990 --> 01:09:13,150

symposium and it'll be in Irvine

1400

01:09:20,760 --> 01:09:18,000

California in the summer early July of

1401

01:09:22,439 --> 01:09:20,770

2019 well that's where that's where I

1402

01:09:26,999 --> 01:09:22,449

live so I'll have to come out and

1403

01:09:29,640 --> 01:09:27,009

firstly see you okay good all around

1404

01:09:34,349 --> 01:09:29,650

I'll be out there outside yeah I'm the

1405

01:09:36,660 --> 01:09:34,359

one that you owe me money okay all right

1406

01:09:39,120 --> 01:09:36,670

hey thanks to the code day yeah all

1407

01:09:40,380 --> 01:09:39,130

right Martin hey great thank you thank

1408

01:09:43,410 --> 01:09:40,390

you sorry for the cutoff there a little

1409

01:09:46,760 --> 01:09:43,420

bit hey just to let people know this is

1410

01:09:49,289 --> 01:09:46,770

not this show here is not the official

1411

01:09:53,010 --> 01:09:49,299

Stan Freeman retirement show this show

1412

01:09:54,840 --> 01:09:53,020

is one that I am doing personally for my

1413

01:09:58,350 --> 01:09:54,850

show since I've had to stand on at least

1414

01:10:00,270 --> 01:09:58,360

ten times so this is my farewell I

1415

01:10:03,720 --> 01:10:00,280

wanted to make sure that I saw stand in

1416

01:10:05,100 --> 01:10:03,730

person and was able to do this so I'm

1417

01:10:07,020 --> 01:10:05,110

not saying that Stan is retiring

1418

01:10:09,479 --> 01:10:07,030

tomorrow you'll never see him but I will

1419

01:10:12,870 --> 01:10:09,489

say that this is my farewell show to him

1420

01:10:16,860 --> 01:10:12,880

in tribute to him and and I personally

1421

01:10:20,610 --> 01:10:16,870

will say at the end but I think stan has

1422

01:10:22,709 --> 01:10:20,620

done so much for this for this field in

1423

01:10:23,459 --> 01:10:22,719

so many different ways and thank you

1424

01:10:26,459 --> 01:10:23,469

yeah

1425

01:10:30,630 --> 01:10:26,469

and speaking of that what do you think

1426

01:10:34,500 --> 01:10:30,640

the future is do you find that there may

1427

01:10:37,410 --> 01:10:34,510

be another Stan Freedman that may evolve

1428

01:10:40,229 --> 01:10:37,420

are you hoping for that well there are

1429

01:10:43,320 --> 01:10:40,239

people like John Greenwald who is only

1430

01:10:44,939 --> 01:10:43,330

in his thirties yeah and so he's got it

1431

01:10:47,970 --> 01:10:44,949

and he's done more he's got the black

1432

01:10:50,970 --> 01:10:47,980

vault website yeah he's collected more

1433

01:10:53,670 --> 01:10:50,980

darn documents than you can imagine

1434

01:10:55,830 --> 01:10:53,680

so I think there will be others and

1435

01:10:57,600 --> 01:10:55,840

there's also one of the things that's

1436

01:11:00,930 --> 01:10:57,610

changed it's the thing I mentioned

1437

01:11:04,260 --> 01:11:00,940

earlier the perception that there are so

1438

01:11:05,939 --> 01:11:04,270

many planets now we didn't know about

1439

01:11:08,189 --> 01:11:05,949

that we didn't think we're there we

1440

01:11:09,150 --> 01:11:08,199

thought planets were rare the earth is

1441

01:11:09,670 --> 01:11:09,160

unique

1442

01:11:11,260 --> 01:11:09,680

kind of

1443

01:11:14,050 --> 01:11:11,270

we thought were in the top of the heap

1444

01:11:17,320 --> 01:11:14,060

yeah you know I don't believe it for a

1445

01:11:21,040 --> 01:11:17,330

minute but the perception of that has

1446

01:11:25,570 --> 01:11:21,050

changed so I expect a couple of things

1447

01:11:27,580 --> 01:11:25,580

are gonna happen somebody is going to

1448

01:11:30,190 --> 01:11:27,590

decide that it's time for the world to

1449

01:11:32,080 --> 01:11:30,200

know about this

1450

01:11:35,580 --> 01:11:32,090

they've been covering up the cosmic

1451

01:11:37,540 --> 01:11:35,590

Watergate I call it for a lot of years

1452

01:11:41,290 --> 01:11:37,550

secondly I think there are gonna be

1453

01:11:44,080 --> 01:11:41,300

people who may have kept some documents

1454

01:11:47,350 --> 01:11:44,090

and will make them public because

1455

01:11:49,930 --> 01:11:47,360

they're in their 80s or 90s and what the

1456

01:11:52,990 --> 01:11:49,940

heck you know it's time the public is

1457

01:11:55,330 --> 01:11:53,000

ready for it now look if you talk to

1458

01:11:59,080 --> 01:11:55,340

people back then about having one point

1459

01:12:03,100 --> 01:11:59,090

six planets per star that's

1460

01:12:05,680 --> 01:12:03,110

extraordinary it really is as an ocean

1461

01:12:08,860 --> 01:12:05,690

there they're all over the darn place we

1462

01:12:11,470 --> 01:12:08,870

didn't think that look 8,000 planets we

1463

01:12:14,760 --> 01:12:11,480

thought might be out there sending radio

1464

01:12:18,010 --> 01:12:14,770

signals and we're talking over a hundred

1465

01:12:20,440 --> 01:12:18,020

billion planets in our galaxy alone

1466

01:12:24,550 --> 01:12:20,450

that's not coming the other galaxies

1467

01:12:26,920 --> 01:12:24,560

maybe a low figure yeah we don't because

1468

01:12:29,860 --> 01:12:26,930

colonization of migration nobody talks

1469

01:12:32,980 --> 01:12:29,870

about that I mean look at Canada and the

1470

01:12:35,530 --> 01:12:32,990

United States back 500 years ago weren't

1471

01:12:38,890 --> 01:12:35,540

many people around those places you know

1472

01:12:40,990 --> 01:12:38,900

that's right and as time has gone on and

1473

01:12:42,880 --> 01:12:41,000

people saw up on a wonderful place I'm

1474

01:12:45,490 --> 01:12:42,890

living in Canada now and I think I'm a

1475

01:12:49,570 --> 01:12:45,500

dual citizen I you know god save the

1476

01:12:52,960 --> 01:12:49,580

clean so what I'm saying is our

1477

01:12:55,450 --> 01:12:52,970

perception of our significance has

1478

01:12:57,040 --> 01:12:55,460

changed yeah and now I don't know

1479

01:12:59,320 --> 01:12:57,050

whether the churches of the world have

1480

01:13:05,290 --> 01:12:59,330

gotten together but it was once a

1481

01:13:09,070 --> 01:13:05,300

question s of the Pope and somebody was

1482

01:13:11,560 --> 01:13:09,080

the Pope's made a comment about if God

1483

01:13:14,940 --> 01:13:11,570

made them there's no reason there can't

1484

01:13:17,560 --> 01:13:14,950

be life all over the place out there

1485

01:13:25,540 --> 01:13:17,570

there's this sort of enlightened comment

1486

01:13:27,400 --> 01:13:25,550

yeah well anyway we have a caller yes

1487

01:13:30,970 --> 01:13:27,410

for anyone that's calling into the show

1488

01:13:33,760 --> 01:13:30,980

what happens is you're gonna have to be

1489

01:13:36,850 --> 01:13:33,770

on hold until you is that a dog do we

1490

01:13:42,520 --> 01:13:38,950

welcome to the show caller what's your

1491

01:13:44,770 --> 01:13:42,530

first name where you calling from hi my

1492

01:13:52,900 --> 01:13:44,780

name is Luis berry and I'm calling from

1493

01:13:55,980 --> 01:13:52,910

Alaska I don't have certain stanton do

1494

01:14:02,640 --> 01:13:55,990

you have any idea what reverse Oz

1495

01:14:05,440 --> 01:14:02,650

Morse's Moses non-ionizing radiation is

1496

01:14:08,650 --> 01:14:05,450

well no that's a process used to D

1497

01:14:13,930 --> 01:14:08,660

sailing water as far as I know where you

1498

01:14:16,240 --> 01:14:13,940

putting on Elise knows gone I'm sorry

1499

01:14:18,660 --> 01:14:16,250

sir the reason I was wondering is one of

1500

01:14:21,790 --> 01:14:18,670

the people who was in Middleton Forest

1501

01:14:24,310 --> 01:14:21,800

the US government paid off him off

1502

01:14:27,370 --> 01:14:24,320

because he was exposed to this type of

1503

01:14:31,000 --> 01:14:27,380

radiation off and supposedly in the

1504

01:14:33,040 --> 01:14:31,010

forest and took care of his aliens

1505

01:14:37,090 --> 01:14:33,050

reasons stuff like that I was just

1506

01:14:39,370 --> 01:14:37,100

wondering what this process was and you

1507

01:14:42,670 --> 01:14:39,380

know how did they relate that to

1508

01:14:45,010 --> 01:14:42,680

radiation I don't know but that's a

1509

01:14:47,200 --> 01:14:45,020

unique one on me and I certainly don't

1510

01:14:52,140 --> 01:14:47,210

know I know a lot about neutrons and

1511

01:14:54,820 --> 01:14:52,150

gamma rays and beta particles maybe but

1512

01:14:58,150 --> 01:14:54,830

look there are radioactive materials all

1513

01:15:00,550 --> 01:14:58,160

over the place a lot more in some places

1514

01:15:03,370 --> 01:15:00,560

than others from Mother Nature that's

1515

01:15:05,560 --> 01:15:03,380

forgetting about one from that man is

1516

01:15:12,220 --> 01:15:05,570

produced you know the cobalt-60 source

1517

01:15:13,210 --> 01:15:12,230

they got lost some place and all right

1518

01:15:16,330 --> 01:15:13,220

well thank you sir

1519

01:15:19,180 --> 01:15:16,340

sure pleasure speaking with you and I've

1520

01:15:21,070 --> 01:15:19,190

been a fan of yours since we can thank

1521

01:15:23,439 --> 01:15:21,080

you all right take care of thanks for

1522

01:15:25,030 --> 01:15:23,449

the call thank you very much

1523

01:15:27,250 --> 01:15:25,040

all right so everyone just to let you

1524

01:15:28,900 --> 01:15:27,260

know if you're calling in I'm not going

1525

01:15:30,130 --> 01:15:28,910

to pick up right away what you'll be is

1526

01:15:32,650 --> 01:15:30,140

you'll be on hold you'll be able to hear

1527

01:15:34,419 --> 01:15:32,660

us talking and then I'll introduce you

1528

01:15:36,700 --> 01:15:34,429

so just hang in there and make sure that

1529

01:15:39,880 --> 01:15:36,710

your volume sound on your computer or

1530

01:15:42,370 --> 01:15:39,890

however you're listening to the show so

1531

01:15:44,500 --> 01:15:42,380

we will take calls that numbers up on

1532

01:15:49,330 --> 01:15:44,510

the screen for those of you at kgr a

1533

01:15:52,990 --> 01:15:49,340

radio that number is six oh three nine

1534

01:15:56,470 --> 01:15:53,000

six seven four OH three oh you can call

1535

01:16:01,240 --> 01:15:56,480

it and either thanks Stanford's work or

1536

01:16:03,400 --> 01:16:01,250

ask them a question and so one of the

1537

01:16:05,260 --> 01:16:03,410

things I wanted to ask you Stan was in

1538

01:16:07,450 --> 01:16:05,270

this whole time that you've been

1539

01:16:09,490 --> 01:16:07,460

involved in this field what do you think

1540

01:16:14,740 --> 01:16:09,500

is the most important step that's

1541

01:16:17,229 --> 01:16:14,750

happened besides the planets I think the

1542

01:16:22,030 --> 01:16:17,239

most important step is that many more

1543

01:16:24,820 --> 01:16:22,040

people have come to realize that we're

1544

01:16:27,729 --> 01:16:24,830

not in the center of the universe and

1545

01:16:29,860 --> 01:16:27,739

that our technology is undoubtedly not

1546

01:16:35,520 --> 01:16:29,870

the most advanced in the neighborhood so

1547

01:16:39,900 --> 01:16:35,530

to speak and we've taken ourselves off

1548

01:16:44,770 --> 01:16:39,910

the pinnacle the middle of the universe

1549

01:16:48,790 --> 01:16:44,780

look at us and it hasn't taken it's only

1550

01:16:52,990 --> 01:16:48,800

a few hundred years you know first

1551
01:16:53,500 --> 01:16:53,000
flight was 1903 amazing how much has

1552
01:16:56,650 --> 01:16:53,510
changed

1553
01:16:58,810 --> 01:16:56,660
oh such a short time yes and I'm

1554
01:17:00,700 --> 01:16:58,820
impressed with that because I know that

1555
01:17:04,419 --> 01:17:00,710
progress comes from doing things

1556
01:17:06,610 --> 01:17:04,429
differently in an unpredictable way it's

1557
01:17:08,550 --> 01:17:06,620
that last part that bothers people they

1558
01:17:12,040 --> 01:17:08,560
think things go in a straight line

1559
01:17:16,270 --> 01:17:12,050
no the transistor is not just a small

1560
01:17:20,380 --> 01:17:16,280
vacuum - I hope people remember vacuum

1561
01:17:23,560 --> 01:17:20,390
tubes right right

1562
01:17:26,140 --> 01:17:23,570
so do you think also I had you on the

1563
01:17:29,169 --> 01:17:26,150

show right after the December 16th

1564

01:17:32,040 --> 01:17:29,179

you know the Pentagon released the New

1565

01:17:34,180 --> 01:17:32,050

York Times article that came out and and

1566

01:17:35,460 --> 01:17:34,190

at that time you were saying you wish

1567

01:17:37,650 --> 01:17:35,470

you were young

1568

01:17:39,180 --> 01:17:37,660

again when that started what do you

1569

01:17:41,460 --> 01:17:39,190

think what do you think about since the

1570

01:17:44,070 --> 01:17:41,470

last time we talked about that I I'm

1571

01:17:47,610 --> 01:17:44,080

rather disappointed I mean here you got

1572

01:17:49,560 --> 01:17:47,620

some very impressive people talking

1573

01:17:53,280 --> 01:17:49,570

about a program that was secret for

1574

01:17:55,040 --> 01:17:53,290

years many years and was a small amount

1575

01:17:58,620 --> 01:17:55,050

that was spent in that particular

1576

01:18:05,010 --> 01:17:58,630

program twenty-two million dollars which

1577

01:18:06,570 --> 01:18:05,020

is nothing right but I think that we're

1578

01:18:09,510 --> 01:18:06,580

hanging in the right direction I think

1579

01:18:10,830 --> 01:18:09,520

there's gonna be a lot more I think a

1580

01:18:13,410 --> 01:18:10,840

lot more has been spent that we don't

1581

01:18:15,390 --> 01:18:13,420

know anything about but people shouldn't

1582

01:18:16,800 --> 01:18:15,400

be surprised that just because we've

1583

01:18:19,290 --> 01:18:16,810

made a lot of advances which we

1584

01:18:22,820 --> 01:18:19,300

certainly have that we're at the

1585

01:18:26,130 --> 01:18:22,830

ultimate okay that's the end of the road

1586

01:18:27,930 --> 01:18:26,140

that's not the way things if words over

1587

01:18:31,920 --> 01:18:27,940

and over again people have thought

1588

01:18:35,640 --> 01:18:31,930

that's it you know they're they're great

1589

01:18:38,820 --> 01:18:35,650

astronomer right around the turn of the

1590

01:18:42,570 --> 01:18:38,830

19th century said if there was one thing

1591

01:18:44,910 --> 01:18:42,580

he was sure man would never fly any

1592

01:18:46,170 --> 01:18:44,920

distance in a vehicle that's right and

1593

01:18:48,150 --> 01:18:46,180

that was two months before the Wright

1594

01:18:49,800 --> 01:18:48,160

brothers first flight that's right yeah

1595

01:18:51,660 --> 01:18:49,810

and remember the Wright brothers first

1596

01:18:54,330 --> 01:18:51,670

flight was like 40 miles an hour

1597

01:18:56,190 --> 01:18:54,340

a short distance regards or something no

1598

01:18:59,340 --> 01:18:56,200

less than that was it yeah yeah we have

1599

01:19:03,020 --> 01:18:59,350

it inside of b-52 that's right I've

1600

01:19:06,110 --> 01:19:03,030

never seen that diagram no yeah so

1601

01:19:09,180 --> 01:19:06,120

things have happened a lot more quickly

1602

01:19:10,410 --> 01:19:09,190

than would have been expected right some

1603

01:19:13,110 --> 01:19:10,420

people have suggested well that means

1604

01:19:16,320 --> 01:19:13,120

we've had help from the aliens why would

1605

01:19:19,290 --> 01:19:16,330

any sensible alien give any technology

1606

01:19:23,490 --> 01:19:19,300

to Earthlings we killed 50 million

1607

01:19:25,440 --> 01:19:23,500

people in the past century and in wars

1608

01:19:28,290 --> 01:19:25,450

20th century was the worst on record

1609

01:19:31,200 --> 01:19:28,300

really yeah yeah fifty million people I

1610

01:19:34,260 --> 01:19:31,210

mean that is just hardly it's not

1611

01:19:35,940 --> 01:19:34,270

something to be proud of right right we

1612

01:19:38,070 --> 01:19:35,950

have another caller and other people

1613

01:19:39,810 --> 01:19:38,080

just be patient I'm taking calls one at

1614

01:19:41,580 --> 01:19:39,820

a time sorry trying to call it now

1615

01:19:42,090 --> 01:19:41,590

caller what's your first name where you

1616

01:19:45,450 --> 01:19:42,100

calling from

1617

01:19:48,270 --> 01:19:45,460

oh this is John from North Carolina oh

1618

01:19:52,920 --> 01:19:48,280

hi dear how are you you have a question

1619

01:19:56,430 --> 01:19:52,930

or on comment yes Stanton thank you for

1620

01:19:59,760 --> 01:19:56,440

all the work you've done a yeoman's work

1621

01:20:03,630 --> 01:19:59,770

I've always enjoyed seeing you over the

1622

01:20:06,660 --> 01:20:03,640

decades and you to be congratulated and

1623

01:20:09,000 --> 01:20:06,670

honored IEM actually did one of the

1624

01:20:15,450 --> 01:20:09,010

first stories after you and Bill Moore

1625

01:20:17,010 --> 01:20:15,460

did your initial study with Roswell I

1626

01:20:19,650 --> 01:20:17,020

was working on in search of at the time

1627

01:20:22,260 --> 01:20:19,660

we went out and did a UFO government

1628

01:20:25,140 --> 01:20:22,270

cover-up story and we we interviewed

1629

01:20:28,610 --> 01:20:25,150

Jesse myself senior and does his take on

1630

01:20:32,490 --> 01:20:28,620

everything and coincidentally I actually

1631

01:20:38,130 --> 01:20:32,500

had worked with and for Jaime shandur a

1632

01:20:40,950 --> 01:20:38,140

Oh years ago and a kinda lost track of

1633

01:20:43,230 --> 01:20:40,960

Jaime and and all that but I was pretty

1634

01:20:44,460 --> 01:20:43,240

active in the whole field back and this

1635

01:20:49,530 --> 01:20:44,470

would've been in the early eighties

1636

01:20:52,950 --> 01:20:49,540

actually as an ABC field producer I

1637

01:20:55,320 --> 01:20:52,960

actually was doing a UFO story up in

1638

01:20:59,120 --> 01:20:55,330

Wyoming and and actually had a sighting

1639

01:21:03,930 --> 01:20:59,130

and got got film of it and it was it was

1640

01:21:06,390 --> 01:21:03,940

pretty interesting and very shocking

1641

01:21:10,380 --> 01:21:06,400

when when it my cameraman and I saw it

1642

01:21:13,110 --> 01:21:10,390

it just it changed my life do you know

1643

01:21:14,580 --> 01:21:13,120

what what James doing out or whatever

1644

01:21:16,380 --> 01:21:14,590

happened cuz I've never talked to him

1645

01:21:18,510 --> 01:21:16,390

and it's a bit coy about answering me

1646

01:21:21,360 --> 01:21:18,520

when we discuss things and I was wanted

1647

01:21:23,460 --> 01:21:21,370

to respect his privacy but he kind of

1648

01:21:25,350 --> 01:21:23,470

leave her looks like she was working on

1649

01:21:27,870 --> 01:21:25,360

something special I think that you know

1650

01:21:29,640 --> 01:21:27,880

hit he and the bill and they were and

1651
01:21:32,220 --> 01:21:29,650
you probably were involved with there's

1652
01:21:34,590 --> 01:21:32,230
a time and then it's just kind of it

1653
01:21:36,060 --> 01:21:34,600
just died off and in the 80s and it

1654
01:21:39,660 --> 01:21:36,070
didn't go anywhere until had his little

1655
01:21:42,300 --> 01:21:39,670
thing I think I'm you can add to that I

1656
01:21:45,210 --> 01:21:42,310
would I know I haven't had any contact

1657
01:21:47,820 --> 01:21:45,220
with Jamie or bill nor for that matter

1658
01:21:51,150 --> 01:21:47,830
for more than a decade I'd say as a

1659
01:21:54,600 --> 01:21:51,160
general rule we worked together for some

1660
01:21:57,810 --> 01:21:54,610
period of time digging out witnesses and

1661
01:22:01,120 --> 01:21:57,820
matter of fact bill and Jamie Jamie was

1662
01:22:06,020 --> 01:22:01,130
a Hollywood TV producers

1663
01:22:08,630 --> 01:22:06,030

wanted to make a big special movie and

1664

01:22:11,540 --> 01:22:08,640

book and the whole can of worms if you

1665

01:22:13,970 --> 01:22:11,550

well as it turned out right all right

1666

01:22:17,180 --> 01:22:13,980

and it didn't go anywhere really I was

1667

01:22:19,459 --> 01:22:17,190

disappointed about that we had

1668

01:22:24,500 --> 01:22:19,469

philosophical differences but they did

1669

01:22:26,350 --> 01:22:24,510

work hard in those early days I did

1670

01:22:28,760 --> 01:22:26,360

spend a lot of time with Jamie and Bill

1671

01:22:31,150 --> 01:22:28,770

and I haven't heard from either one of

1672

01:22:33,650 --> 01:22:31,160

them like I say in almost a decade

1673

01:22:35,780 --> 01:22:33,660

well I remember Bill telling me a

1674

01:22:37,760 --> 01:22:35,790

conversation that I don't know if this

1675

01:22:41,900 --> 01:22:37,770

is true or not but he said that he had

1676
01:22:45,740 --> 01:22:41,910
gotten in inquiry from 60 minutes and he

1677
01:22:49,490 --> 01:22:45,750
didn't really I guess didn't want to go

1678
01:22:52,070 --> 01:22:49,500
forward with that but but so it was kind

1679
01:22:53,479 --> 01:22:52,080
of momentum was going and and then he

1680
01:22:57,860 --> 01:22:53,489
just died so it was in earthing but I

1681
01:23:00,919 --> 01:22:57,870
can't lie to you all right I saw and had

1682
01:23:04,669 --> 01:23:00,929
an experience on on a gentleman up in

1683
01:23:07,760 --> 01:23:04,679
Wyoming which coincidentally is only he

1684
01:23:12,800 --> 01:23:07,770
lived about 60 miles as the crow flies

1685
01:23:16,250 --> 01:23:12,810
from AE Warren Air Force Base he has a

1686
01:23:19,100 --> 01:23:16,260
nuclear missile field up there and they

1687
01:23:21,919 --> 01:23:19,110
had shut down this hole in the 70s and

1688
01:23:25,430 --> 01:23:21,929

this was this gentleman's experience

1689

01:23:29,300 --> 01:23:25,440

took place over about about a decade and

1690

01:23:32,060 --> 01:23:29,310

we saw this stuff and I can I can

1691

01:23:35,120 --> 01:23:32,070

confirm that there's something very deep

1692

01:23:37,130 --> 01:23:35,130

going on well I I think if anybody

1693

01:23:40,630 --> 01:23:37,140

wanted to spend the effort they could

1694

01:23:44,030 --> 01:23:40,640

mind the old data before everybody dies

1695

01:23:47,360 --> 01:23:44,040

in other words if you made a major

1696

01:23:52,040 --> 01:23:47,370

effort to get people who have knowledge

1697

01:23:54,800 --> 01:23:52,050

to come forward I think you could gather

1698

01:23:57,470 --> 01:23:54,810

a lot of data people who were in a

1699

01:24:00,439 --> 01:23:57,480

position at a radar installation or in

1700

01:24:03,320 --> 01:24:00,449

an airplane I mean there are some

1701

01:24:05,300 --> 01:24:03,330

spectacular cases involving airplanes

1702

01:24:07,450 --> 01:24:05,310

and a whole crew seeing UFOs flying

1703

01:24:09,220 --> 01:24:07,460

circling around the earth

1704

01:24:10,720 --> 01:24:09,230

what are you supposed to say about these

1705

01:24:13,870 --> 01:24:10,730

people you're trusting them with nuclear

1706

01:24:16,120 --> 01:24:13,880

weapons you say you don't believe what

1707

01:24:18,130 --> 01:24:16,130

they say about seeing add Arnold flying

1708

01:24:21,700 --> 01:24:18,140

saucer or two of them or five of them or

1709

01:24:24,250 --> 01:24:21,710

whatever that that's nonsense so and

1710

01:24:27,490 --> 01:24:24,260

there's a big couple of big oceans out

1711

01:24:31,390 --> 01:24:27,500

there too and the Navy has stayed away

1712

01:24:33,280 --> 01:24:31,400

from this subject very loudly and I

1713

01:24:36,490 --> 01:24:33,290

don't know how they got away with it why

1714

01:24:38,200 --> 01:24:36,500

haven't the press gun after Navy people

1715

01:24:40,300 --> 01:24:38,210

because there certainly have been

1716

01:24:42,400 --> 01:24:40,310

sightings by guys on board aircraft

1717

01:24:46,210 --> 01:24:42,410

carriers and destroyers and so it's a

1718

01:24:48,640 --> 01:24:46,220

big ocean yeah also remember we have

1719

01:24:50,950 --> 01:24:48,650

nuclear-powered submarines and

1720

01:24:53,260 --> 01:24:50,960

nuclear-powered aircraft carriers and

1721

01:24:55,030 --> 01:24:53,270

I'm still impressed by the fact that a

1722

01:24:58,600 --> 01:24:55,040

nuclear-powered aircraft carrier can

1723

01:25:02,050 --> 01:24:58,610

operate without refueling from someplace

1724

01:25:04,510 --> 01:25:02,060

close to 25 years somebody told me 30

1725

01:25:06,940 --> 01:25:04,520

but I'll say 25 what the heck that

1726

01:25:11,020 --> 01:25:06,950

that's terribly impressive and

1727

01:25:14,110 --> 01:25:11,030

submarines in world war ii u-boats could

1728

01:25:18,160 --> 01:25:14,120

stay under for about a day now they can

1729

01:25:20,920 --> 01:25:18,170

go around the world underwater which is

1730

01:25:24,460 --> 01:25:20,930

truly incredible but I think that's

1731

01:25:26,590 --> 01:25:24,470

what's kept the peace because we know

1732

01:25:30,070 --> 01:25:26,600

that if somebody drops a bomb on us an

1733

01:25:31,360 --> 01:25:30,080

ICBM ershov we can retaliate with

1734

01:25:34,480 --> 01:25:31,370

submarines that he doesn't know where

1735

01:25:36,490 --> 01:25:34,490

they are that means you're almost

1736

01:25:39,760 --> 01:25:36,500

invulnerable you're protected by those

1737

01:25:42,610 --> 01:25:39,770

huge oceans and so we don't have a good

1738

01:25:44,230 --> 01:25:42,620

way of detecting submarines you know the

1739

01:25:46,960 --> 01:25:44,240

enemy can't find our submarines oh

1740

01:25:52,000 --> 01:25:46,970

they're right here there and no it

1741

01:25:53,770 --> 01:25:52,010

doesn't work that way so the nuclear

1742

01:25:55,780 --> 01:25:53,780

systems have been important and I think

1743

01:25:59,550 --> 01:25:55,790

there certainly are plenty of sightings

1744

01:26:07,150 --> 01:25:59,560

by of UFOs near nuclear installations

1745

01:26:10,510 --> 01:26:07,160

and you can understand what a real

1746

01:26:12,910 --> 01:26:10,520

quickly I have another ancillary story

1747

01:26:17,140 --> 01:26:12,920

but so he remember what you remember the

1748

01:26:19,770 --> 01:26:17,150

the the invaders show back in the 70s

1749

01:26:25,090 --> 01:26:19,780

yeah and

1750

01:26:28,900 --> 01:26:25,100

Babli so I so I like Genesis the actor

1751

01:26:31,120 --> 01:26:28,910

and I actually had talked to him he was

1752

01:26:32,680 --> 01:26:31,130

working on a UFO show of the time and

1753

01:26:35,710 --> 01:26:32,690

him and I happen to meet him at a

1754

01:26:38,320 --> 01:26:35,720

conference and so I talked to him about

1755

01:26:41,850 --> 01:26:38,330

what I was working on and he said this

1756

01:26:45,460 --> 01:26:41,860

is what he said to me was I can tell you

1757

01:26:47,920 --> 01:26:45,470

exactly what he told me he said well you

1758

01:26:50,410 --> 01:26:47,930

know that's interesting he said when I

1759

01:26:53,320 --> 01:26:50,420

was working and he was like the lead in

1760

01:26:56,440 --> 01:26:53,330

this show and he said when I was working

1761

01:26:58,540 --> 01:26:56,450

on that program and it all it lasted I

1762

01:27:03,190 --> 01:26:58,550

think it was maybe three seasons at the

1763

01:27:06,280 --> 01:27:03,200

most and he said I got a call from Air

1764

01:27:09,250 --> 01:27:06,290

Force personnel and he said you know the

1765

01:27:10,780 --> 01:27:09,260

guys are flying those bombers you know

1766

01:27:12,520 --> 01:27:10,790

they're in the 60s and I say oh the

1767

01:27:14,950 --> 01:27:12,530

Strategic Air Command he goes yeah he

1768

01:27:17,920 --> 01:27:14,960

goes I was contacted by a believe he

1769

01:27:19,480 --> 01:27:17,930

said it was a captain and he said the

1770

01:27:22,360 --> 01:27:19,490

captain wanted to come and talk to him

1771

01:27:24,700 --> 01:27:22,370

so and I said about what he said about

1772

01:27:27,370 --> 01:27:24,710

this experience that he had had so they

1773

01:27:29,520 --> 01:27:27,380

got together and the captain in

1774

01:27:33,040 --> 01:27:29,530

proceeded to tell them that they were on

1775

01:27:34,330 --> 01:27:33,050

they were on one of their golden

1776

01:27:36,310 --> 01:27:34,340

missions whether they got nuclear

1777

01:27:39,280 --> 01:27:36,320

weapons are flying so their own you know

1778

01:27:41,380 --> 01:27:39,290

alert at any time and there's always

1779

01:27:42,790 --> 01:27:41,390

always a bomber or a series of bombers

1780

01:27:45,550 --> 01:27:42,800

in the air in the old days in the Cold

1781

01:27:47,830 --> 01:27:45,560

War and he said that their b-52 with

1782

01:27:50,230 --> 01:27:47,840

being tracked tracked and trails a few

1783

01:27:52,180 --> 01:27:50,240

miles back by these objects that could

1784

01:27:56,290 --> 01:27:52,190

see him on the radar and they just

1785

01:27:59,410 --> 01:27:56,300

trailed him for hours and then Roy told

1786

01:28:01,150 --> 01:27:59,420

me he said and then over the intercom

1787

01:28:04,300 --> 01:28:01,160

I'm just telling you what he told me he

1788

01:28:09,700 --> 01:28:04,310

said over the inner this Air Force guy

1789

01:28:14,680 --> 01:28:09,710

told Roy but over the intercom came a

1790

01:28:16,720 --> 01:28:14,690

voice and essentially it was you

1791

01:28:19,660 --> 01:28:16,730

shouldn't be playing with these weapons

1792

01:28:21,880 --> 01:28:19,670

these nuclear weapons you need that

1793

01:28:25,860 --> 01:28:21,890

you're dealing with something you you

1794

01:28:29,710 --> 01:28:25,870

know nothing of you should just not not

1795

01:28:32,629 --> 01:28:29,720

do what you're doing and again I'm just

1796

01:28:36,080 --> 01:28:32,639

I'm just the messenger here and

1797

01:28:38,030 --> 01:28:36,090

and so they it affected everyone so much

1798

01:28:40,040 --> 01:28:38,040

on the aircraft that these guys wanted

1799

01:28:43,189 --> 01:28:40,050

to go out and tell tell somebody I mean

1800

01:28:46,399 --> 01:28:43,199

was that was it affected them so so

1801
01:28:48,229 --> 01:28:46,409
deeply so they sold they told Roy and he

1802
01:28:50,540 --> 01:28:48,239
says we'll listen when she came to me

1803
01:28:52,459 --> 01:28:50,550
for tea and he said well can you help us

1804
01:28:54,680 --> 01:28:52,469
get this out and go public with it and

1805
01:28:57,410 --> 01:28:54,690
he said well I'm just you know I'm an

1806
01:29:00,290 --> 01:28:57,420
actor on a TV show it's you know core

1807
01:29:02,570 --> 01:29:00,300
fictional and he said but if you want me

1808
01:29:04,399 --> 01:29:02,580
to do something I'll try to help you and

1809
01:29:06,439 --> 01:29:04,409
he said okay well we'll get back to you

1810
01:29:08,149 --> 01:29:06,449
and he didn't hear from them for a

1811
01:29:09,950 --> 01:29:08,159
couple a couple months and then they

1812
01:29:13,280 --> 01:29:09,960
eventually got back to him and said you

1813
01:29:15,890 --> 01:29:13,290

know we were told and this is kind of

1814

01:29:18,200 --> 01:29:15,900

obvious but he said we were told to keep

1815

01:29:19,850 --> 01:29:18,210

our mouths shut to not talk about any of

1816

01:29:22,070 --> 01:29:19,860

this and he says you know you're not

1817

01:29:25,459 --> 01:29:22,080

going to hear from anymore and I'm just

1818

01:29:30,800 --> 01:29:25,469

I've been clearly given those directions

1819

01:29:34,570 --> 01:29:30,810

so thank you very much but that's it and

1820

01:29:36,680 --> 01:29:34,580

Roy told me this in person the story so

1821

01:29:40,820 --> 01:29:36,690

there's stuff going on

1822

01:29:44,570 --> 01:29:40,830

I saw myself and you're tracking it you

1823

01:29:46,010 --> 01:29:44,580

know in your way and one day we're going

1824

01:29:50,180 --> 01:29:46,020

to know about it and I think it's going

1825

01:29:52,390 --> 01:29:50,190

to be huge much more bigger than we ever

1826

01:29:54,800 --> 01:29:52,400

think I think there's that

1827

01:29:59,660 --> 01:29:54,810

extraterrestrial aspect of things but I

1828

01:30:03,129 --> 01:29:59,670

just feel that that also is conscious

1829

01:30:06,470 --> 01:30:03,139

being this goes way beyond

1830

01:30:08,149 --> 01:30:06,480

extraterrestrial and I think I think the

1831

01:30:10,070 --> 01:30:08,159

way that these beings are getting is are

1832

01:30:12,350 --> 01:30:10,080

so advanced that I think the development

1833

01:30:16,640 --> 01:30:12,360

has been that they literally can travel

1834

01:30:18,229 --> 01:30:16,650

with their mind I think that's I mean

1835

01:30:21,500 --> 01:30:18,239

they're I think they're coming in are

1836

01:30:23,600 --> 01:30:21,510

different levels many versions many

1837

01:30:25,459 --> 01:30:23,610

different evolutionary periods but I

1838

01:30:29,359 --> 01:30:25,469

think the ones at the top can just get

1839

01:30:30,709 --> 01:30:29,369

here by thinking it let some thanks

1840

01:30:31,990 --> 01:30:30,719

thank you so much I appreciate

1841

01:30:34,669 --> 01:30:32,000

everything I've done

1842

01:30:37,280 --> 01:30:34,679

you're very welcome and now we do

1843

01:30:39,800 --> 01:30:37,290

appreciate the call we actually have

1844

01:30:41,229 --> 01:30:39,810

another another caller calling in I'll

1845

01:30:43,720 --> 01:30:41,239

take them now

1846

01:30:45,970 --> 01:30:43,730

and I want to follow up after the

1847

01:30:47,979 --> 01:30:45,980

scuttle I hang in there caller I want to

1848

01:30:50,110 --> 01:30:47,989

follow up after this call about bill

1849

01:30:51,850 --> 01:30:50,120

more a little bit caller you're on the

1850

01:30:56,310 --> 01:30:51,860

line your first name where you're

1851

01:31:02,200 --> 01:30:59,410

I'm sorry can you hear me you're on

1852

01:31:05,170 --> 01:31:02,210

Terry what's your first name please

1853

01:31:07,270 --> 01:31:05,180

my name is Joe from New Jersey hi Joe

1854

01:31:10,270 --> 01:31:07,280

you got a comment or question for

1855

01:31:12,190 --> 01:31:10,280

Stanton Friedman I would just like to

1856

01:31:14,050 --> 01:31:12,200

thank him for lending credibility this

1857

01:31:16,900 --> 01:31:14,060

whole subject is most of times do you

1858

01:31:19,479 --> 01:31:16,910

talk about this stuff viewed as a

1859

01:31:22,720 --> 01:31:19,489

crackpot and the other thing I wanted to

1860

01:31:25,479 --> 01:31:22,730

ask him was about you know the recent

1861

01:31:28,360 --> 01:31:25,489

like NASA and the government owns this

1862

01:31:32,440 --> 01:31:28,370

rocket anymore and got rid of the Space

1863

01:31:34,750 --> 01:31:32,450

Shuttle because I think that you know if

1864

01:31:36,750 --> 01:31:34,760

we thought that they don't use it

1865

01:31:41,200 --> 01:31:36,760

anymore because these are back engineer

1866

01:31:43,990 --> 01:31:41,210

UFOs that they have different kinds of

1867

01:31:48,040 --> 01:31:44,000

well flight apparatus to go into space

1868

01:31:49,690 --> 01:31:48,050

law well I wouldn't be surprised if

1869

01:31:50,800 --> 01:31:49,700

they've got systems we don't know about

1870

01:31:53,320 --> 01:31:50,810

but there are a couple of things you

1871

01:31:56,860 --> 01:31:53,330

have to take into account advanced

1872

01:32:00,250 --> 01:31:56,870

propulsion systems are expensive they

1873

01:32:03,820 --> 01:32:00,260

don't come cheap if you're going to

1874

01:32:06,280 --> 01:32:03,830

advance the state of the art and there

1875

01:32:08,530 --> 01:32:06,290

it gets much harder to hide if you got a

1876

01:32:10,630 --> 01:32:08,540

fleet of them in other words and what's

1877

01:32:13,240 --> 01:32:10,640

the point of having them from a defense

1878

01:32:15,040 --> 01:32:13,250

viewpoint unless you can distribute them

1879

01:32:18,430 --> 01:32:15,050

where they're needed Heather did there

1880

01:32:20,770 --> 01:32:18,440

any on to protect the United States to

1881

01:32:23,380 --> 01:32:20,780

protect us against our enemies who might

1882

01:32:26,940 --> 01:32:23,390

want to attacked us and so forth so

1883

01:32:29,170 --> 01:32:26,950

there's a limited supply of money

1884

01:32:32,020 --> 01:32:29,180

certain limited in the supply of

1885

01:32:34,060 --> 01:32:32,030

imagination to which I've noticed that

1886

01:32:35,590 --> 01:32:34,070

people can't imagine anybody coming here

1887

01:32:41,080 --> 01:32:35,600

not wanting to land on the White House

1888

01:32:42,610 --> 01:32:41,090

lawn you know and I think let's say that

1889

01:32:47,190 --> 01:32:42,620

aliens aren't stupid

1890

01:32:53,880 --> 01:32:50,050

collar can you turn can you mute your

1891

01:32:56,070 --> 01:32:53,890

your computer in the background

1892

01:33:01,540 --> 01:32:56,080

I'm sorry that's all right

1893

01:33:04,060 --> 01:33:01,550

no just that the whole question there

1894

01:33:06,490 --> 01:33:04,070

have already been well over a dozen PhD

1895

01:33:08,890 --> 01:33:06,500

theses done about UFOs most people don't

1896

01:33:10,689 --> 01:33:08,900

know about any of them you know and I

1897

01:33:12,400 --> 01:33:10,699

get professors who say you know why

1898

01:33:13,959 --> 01:33:12,410

isn't somebody written a thesis well

1899

01:33:16,780 --> 01:33:13,969

they have one of them was about press

1900

01:33:18,340 --> 01:33:16,790

coverage and had some very damning

1901
01:33:20,920 --> 01:33:18,350
statements to make about the inadequacy

1902
01:33:25,479 --> 01:33:20,930
the failure the press to do its job etc

1903
01:33:27,520 --> 01:33:25,489
etcetera so there is a sophisticated

1904
01:33:31,060 --> 01:33:27,530
literature out there if you go looking

1905
01:33:32,500 --> 01:33:31,070
for in my book top-secret magic which

1906
01:33:36,970 --> 01:33:32,510
was written a number of years ago I've

1907
01:33:40,209 --> 01:33:36,980
list I think it's 11 PhD theses done

1908
01:33:42,550 --> 01:33:40,219
about UFOs and people just stare at me

1909
01:33:45,490 --> 01:33:42,560
what do you mean they got paid I mean

1910
01:33:47,470 --> 01:33:45,500
they they they did a thesis yes one was

1911
01:33:50,189 --> 01:33:47,480
on press coverage which was I found very

1912
01:33:53,290 --> 01:33:50,199
fascinating but psychological and

1913
01:33:56,110 --> 01:33:53,300

philosophical implications and things

1914

01:33:58,780 --> 01:33:56,120

like that the stuff is out there but you

1915

01:34:02,770 --> 01:33:58,790

got to go looking for it it's not coming

1916

01:34:07,590 --> 01:34:02,780

to you hey thanks for the call you're

1917

01:34:16,620 --> 01:34:11,800

caller caller welcome to the show your

1918

01:34:21,720 --> 01:34:18,520

welcome to the show where you calling

1919

01:34:24,490 --> 01:34:21,730

from your name please

1920

01:34:29,709 --> 01:34:24,500

obviously there's a problem there I see

1921

01:34:33,280 --> 01:34:29,719

a Massachusetts number on the line okay

1922

01:34:35,020 --> 01:34:33,290

can't hear them all right so what I

1923

01:34:38,080 --> 01:34:35,030

wanted to ask you about you were you

1924

01:34:39,820 --> 01:34:38,090

were I would say you're good friends

1925

01:34:44,320 --> 01:34:39,830

with Bill Moore at the time you yes with

1926

01:34:47,320 --> 01:34:44,330

him so the MUFON conference in 1989 he

1927

01:34:50,080 --> 01:34:47,330

comes out and and and talks about being

1928

01:34:53,170 --> 01:34:50,090

a disinformation agent he talks about

1929

01:34:57,070 --> 01:34:53,180

the Paul bennewitz case being involved

1930

01:34:59,920 --> 01:34:57,080

and not a good way in that did you have

1931

01:35:02,830 --> 01:34:59,930

any inkling that something was going on

1932

01:35:05,830 --> 01:35:02,840

before he came out with that not really

1933

01:35:07,900 --> 01:35:05,840

but don't deny our

1934

01:35:11,080 --> 01:35:07,910

Stickley different in our approach to

1935

01:35:14,410 --> 01:35:11,090

these matters and we had our

1936

01:35:18,400 --> 01:35:14,420

disagreements even back then he worked

1937

01:35:21,520 --> 01:35:18,410

hard he persisted in going after people

1938

01:35:26,080 --> 01:35:21,530

and data you know finding people and so

1939

01:35:27,790 --> 01:35:26,090

forth but there's no question that the

1940

01:35:29,710 --> 01:35:27,800

field was right for disinformation

1941

01:35:31,990 --> 01:35:29,720

because it's a little checking and

1942

01:35:33,880 --> 01:35:32,000

double-checking and triple-checking the

1943

01:35:36,310 --> 01:35:33,890

Rick Doty business that whole thing

1944

01:35:37,540 --> 01:35:36,320

there and there's no question that there

1945

01:35:41,860 --> 01:35:37,550

are people in the government who are

1946

01:35:46,570 --> 01:35:41,870

very happy to dis inform you know to

1947

01:35:49,620 --> 01:35:46,580

keep the wolves at bay so to speak by

1948

01:35:52,260 --> 01:35:49,630

seeding the turf with false information

1949

01:35:55,840 --> 01:35:52,270

misleading information and so forth

1950

01:36:00,100 --> 01:35:55,850

if you talk to any serious military

1951

01:36:02,910 --> 01:36:00,110

officers from back then you know that

1952

01:36:07,870 --> 01:36:02,920

there were what's the word I want

1953

01:36:11,410 --> 01:36:07,880

indoctrinations to stay away from this

1954

01:36:13,240 --> 01:36:11,420

subject don't leak this information I

1955

01:36:15,220 --> 01:36:13,250

mean it's obvious you don't want your

1956

01:36:18,220 --> 01:36:15,230

officers to release the latest nuclear

1957

01:36:19,450 --> 01:36:18,230

weapons designed for example there's a

1958

01:36:21,880 --> 01:36:19,460

lot of other stuff you don't want them

1959

01:36:23,590 --> 01:36:21,890

to release either remember there's

1960

01:36:26,800 --> 01:36:23,600

something missing in this equation who

1961

01:36:28,330 --> 01:36:26,810

speaks for planet Earth you know it's

1962

01:36:30,970 --> 01:36:28,340

easy to talk about landing I know one

1963

01:36:33,790 --> 01:36:30,980

goes one but still the president doesn't

1964

01:36:36,370 --> 01:36:33,800

speak for the planet right yeah there's

1965

01:36:38,140 --> 01:36:36,380

nobody who speaks for the planet we have

1966

01:36:40,030 --> 01:36:38,150

a the caller up sounds like this

1967

01:36:42,220 --> 01:36:40,040

feedback coming through if you could

1968

01:36:45,250 --> 01:36:42,230

mute wonderful yeah mute whatever good

1969

01:36:47,290 --> 01:36:45,260

yeah yeah I don't have nothing let me

1970

01:36:50,620 --> 01:36:47,300

turn my volume down yeah yes I hear I

1971

01:36:52,320 --> 01:36:50,630

hear a hiss so I want to continue that

1972

01:36:55,540 --> 01:36:52,330

talk a little bit more in just a minute

1973

01:36:57,670 --> 01:36:55,550

so we do have another call coming in too

1974

01:37:01,330 --> 01:36:57,680

so you get where you calling from me

1975

01:37:03,600 --> 01:37:01,340

what's your first name please you you're

1976

01:37:05,380 --> 01:37:03,610

talking to me right that's correct okay

1977

01:37:08,350 --> 01:37:05,390

this is Eric

1978

01:37:11,350 --> 01:37:08,360

I'm calling from Boston here I'm

1979

01:37:15,790 --> 01:37:11,360

actually the MUFON state director for

1980

01:37:18,670 --> 01:37:15,800

Massachusetts oh yeah and I am not

1981

01:37:22,360 --> 01:37:18,680

staying a few years ago up in Maine

1982

01:37:22,900 --> 01:37:22,370

star the contactee conference up in

1983

01:37:30,660 --> 01:37:22,910

Maine

1984

01:37:34,630 --> 01:37:30,670

it was great Stan you mentioned that

1985

01:37:36,460 --> 01:37:34,640

typically we no longer feel that we try

1986

01:37:40,030 --> 01:37:36,470

not to think that we're the center of

1987

01:37:41,890 --> 01:37:40,040

the universe which brings me to

1988

01:37:43,690 --> 01:37:41,900

something that I I have troubles with

1989

01:37:50,800 --> 01:37:43,700

current science let me spout out some

1990

01:37:53,950 --> 01:37:50,810

figures here earth they say is well I

1991

01:37:57,490 --> 01:37:53,960

got this I got it all up a 4.5 billion

1992

01:38:00,460 --> 01:37:57,500

years okay earth is 4.5 billion years

1993

01:38:04,830 --> 01:38:00,470

okay the universe

1994

01:38:08,890 --> 01:38:04,840

they say current science wants to say is

1995

01:38:12,340 --> 01:38:08,900

13.8 billion years yeah so it's kind of

1996

01:38:14,020 --> 01:38:12,350

it's like on the same scale there but

1997

01:38:15,460 --> 01:38:14,030

then when you go and you look at the

1998

01:38:22,360 --> 01:38:15,470

Milky Way galaxy

1999

01:38:25,390 --> 01:38:22,370

13.5 billion years ago

2000

01:38:27,880 --> 01:38:25,400

that's very close that that means it's

2001

01:38:31,060 --> 01:38:27,890

one of the first one of the first

2002

01:38:35,470 --> 01:38:31,070

galaxies after the Big Bang that's what

2003

01:38:38,610 --> 01:38:35,480

they think can you see why I have

2004

01:38:42,310 --> 01:38:38,620

trouble with this in that I think it the

2005

01:38:45,340 --> 01:38:42,320

creationists are still trying to make

2006

01:38:47,830 --> 01:38:45,350

they get their way to these people that

2007

01:38:50,530 --> 01:38:47,840

come up with these figures and it's

2008

01:38:53,890 --> 01:38:50,540

still being were made out to be the

2009

01:38:55,960 --> 01:38:53,900

center of the universe it continues what

2010

01:38:58,240 --> 01:38:55,970

do you do you understand what I'm

2011

01:39:00,220 --> 01:38:58,250

talking about well I certainly agree

2012

01:39:03,160 --> 01:39:00,230

with you and I wonder if it isn't true

2013

01:39:06,070 --> 01:39:03,170

all over the universe the local galactic

2014

01:39:08,220 --> 01:39:06,080

neighborhood if you will tone it down a

2015

01:39:13,480 --> 01:39:08,230

little bit from the universe if

2016

01:39:15,190 --> 01:39:13,490

everybody for some time until they get

2017

01:39:16,960 --> 01:39:15,200

the truth from going out there and

2018

01:39:19,900 --> 01:39:16,970

making better observations and so forth

2019

01:39:21,850 --> 01:39:19,910

I think everybody will think of

2020

01:39:25,540 --> 01:39:21,860

themselves as being of central

2021

01:39:31,060 --> 01:39:25,550

importance but I like to think they are

2022

01:39:32,629 --> 01:39:31,070

and so yeah I think mankind or people

2023

01:39:33,889 --> 01:39:32,639

kind universal kai

2024

01:39:37,250 --> 01:39:33,899

I don't know what else to call the

2025

01:39:39,859 --> 01:39:37,260

residents of the universe has an ego

2026

01:39:42,830 --> 01:39:39,869

problem we all like to think we're

2027

01:39:44,810 --> 01:39:42,840

important and whether you say it's

2028

01:39:47,449 --> 01:39:44,820

Bishop Ussher who said everything was

2029

01:39:49,929 --> 01:39:47,459

created in 4004 BC I don't know whether

2030

01:39:53,540 --> 01:39:49,939

he said a Sunday afternoon but you know

2031

01:39:55,879 --> 01:39:53,550

that's not very long ago when you say

2032

01:39:58,009 --> 01:39:55,889

you know 13 billion years then you say

2033

01:40:01,239 --> 01:39:58,019

what do we know about what happened 13

2034

01:40:02,689 --> 01:40:01,249

billion years ago damn little is all I

2035

01:40:08,600 --> 01:40:02,699

know

2036

01:40:11,509 --> 01:40:08,610

worldwide at aliens look like earthlings

2037

01:40:13,639 --> 01:40:11,519

I say maybe it's the other way around

2038

01:40:15,080 --> 01:40:13,649

maybe it's earthlings look like aliens

2039

01:40:17,359 --> 01:40:15,090

because we may have been somebody's

2040

01:40:18,859 --> 01:40:17,369

colony penal colony of course they

2041

01:40:20,270 --> 01:40:18,869

dumped all the bad boys and girls here

2042

01:40:22,729 --> 01:40:20,280

and that's why we're so nasty to each

2043

01:40:28,549 --> 01:40:22,739

other you know so there are a lot of

2044

01:40:30,709 --> 01:40:28,559

ways to look at these things oh uh how

2045

01:40:32,359 --> 01:40:30,719

about like in a year or so you're gonna

2046

01:40:33,770 --> 01:40:32,369

get the itch and you're gonna come back

2047

01:40:37,069 --> 01:40:33,780

out and you're gonna do a few things

2048

01:40:39,859 --> 01:40:37,079

what do you think well I I know that

2049

01:40:41,810 --> 01:40:39,869

next year's Mew fund convention and

2050

01:40:45,679 --> 01:40:41,820

Irvine to California which is

2051

01:40:49,939 --> 01:40:45,689

unbelievable banja log in 2019 I will be

2052

01:40:53,149 --> 01:40:49,949

the keynote speaker oh yeah I've agreed

2053

01:40:54,439 --> 01:40:53,159

to that yeah I got to be alive to do

2054

01:40:58,580 --> 01:40:54,449

that because I don't know how to breach

2055

01:41:00,620 --> 01:40:58,590

that barrier you know but yeah and you

2056

01:41:02,659 --> 01:41:00,630

know I I do have something on my side

2057

01:41:05,929 --> 01:41:02,669

genetics if you will both my parents

2058

01:41:11,719 --> 01:41:05,939

live to be 90 so I've got six more six

2059

01:41:12,979 --> 01:41:11,729

more years to go on both sides well over

2060

01:41:15,589 --> 01:41:12,989

a hundred you're gonna do over honor

2061

01:41:18,139 --> 01:41:15,599

again I'll try hey Eric thanks for the

2062

01:41:23,500 --> 01:41:18,149

call all right thanks a lot bye-bye all

2063

01:41:28,299 --> 01:41:23,510

right another one coming in all right

2064

01:41:32,060 --> 01:41:28,309

looks like it's coming up hello caller

2065

01:41:34,459 --> 01:41:32,070

that went away Oh No okay so the person

2066

01:41:36,549 --> 01:41:34,469

will probably call right back but so the

2067

01:41:39,229 --> 01:41:36,559

question I had you were you at that

2068

01:41:39,830 --> 01:41:39,239

regarding Bill more will you actually

2069

01:41:42,500 --> 01:41:39,840

add that

2070

01:41:45,229 --> 01:41:42,510

on event or how soon after that did you

2071

01:41:49,669 --> 01:41:45,239

hear about when he came out and said he

2072

01:41:51,379 --> 01:41:49,679

was a disinformation I was there you

2073

01:41:53,510 --> 01:41:51,389

were there and I was rather upset with

2074

01:41:58,250 --> 01:41:53,520

middle part of the time there as you can

2075

01:42:00,140 --> 01:41:58,260

imagine and I it bothered me like I say

2076

01:42:01,070 --> 01:42:00,150

we have different standards and that's

2077

01:42:03,320 --> 01:42:01,080

not surprising

2078

01:42:07,040 --> 01:42:03,330

now our backgrounds are drastically

2079

01:42:09,430 --> 01:42:07,050

different what you do for a living as a

2080

01:42:12,439 --> 01:42:09,440

nuclear physicist you can't get by with

2081

01:42:16,100 --> 01:42:12,449

opinions about most things you gotta

2082

01:42:17,689 --> 01:42:16,110

have a fax you got that data caller

2083

01:42:20,390 --> 01:42:17,699

you're gonna have to wait on hold and

2084

01:42:23,810 --> 01:42:20,400

please mute your mute your computer or

2085

01:42:29,270 --> 01:42:23,820

whatever you're listening on well just

2086

01:42:31,839 --> 01:42:29,280

that bill and I you know and Jamie we

2087

01:42:34,310 --> 01:42:31,849

did work together we did work hard

2088

01:42:36,109 --> 01:42:34,320

gathering information collecting data

2089

01:42:39,560 --> 01:42:36,119

and Bill had big they had big plans

2090

01:42:42,530 --> 01:42:39,570

about Jamie's Hollywood and so you know

2091

01:42:46,790 --> 01:42:42,540

make a big special production and so

2092

01:42:48,620 --> 01:42:46,800

forth and we had our disagreements too

2093

01:42:54,919 --> 01:42:48,630

because I felt you got to stick closer

2094

01:42:58,520 --> 01:42:54,929

to the facts and well thank you well I'd

2095

01:43:00,169 --> 01:42:58,530

be untrue to myself and to being the

2096

01:43:04,280 --> 01:43:00,179

professional organizations to which I

2097

01:43:07,669 --> 01:43:04,290

work to which I belong if I wasn't

2098

01:43:11,689 --> 01:43:07,679

concerned about facts first and opinions

2099

01:43:13,760 --> 01:43:11,699

later it's just the way things are when

2100

01:43:16,970 --> 01:43:13,770

you work for GE or Westinghouse or one

2101
01:43:20,720 --> 01:43:16,980
of these outfits they don't want baloney

2102
01:43:25,910 --> 01:43:20,730
yeah I'm sure or meatloaf you know they

2103
01:43:27,589 --> 01:43:25,920
want steak first cut right caller you're

2104
01:43:30,169 --> 01:43:27,599
on the line now your first name and

2105
01:43:31,580 --> 01:43:30,179
where are you calling from hi my name is

2106
01:43:34,490 --> 01:43:31,590
Kevin I'm from Pittsburgh Pennsylvania

2107
01:43:38,209 --> 01:43:34,500
Stan's old stomping ground right

2108
01:43:39,560 --> 01:43:38,219
welcome to the show Kevin hi Stan hey I

2109
01:43:41,570 --> 01:43:39,570
just bought one of your books off your

2110
01:43:42,919 --> 01:43:41,580
website I have to tell ya you know I've

2111
01:43:46,550 --> 01:43:42,929
been waiting awhile and I figured

2112
01:43:48,800 --> 01:43:46,560
tonight's the night start yet well good

2113
01:43:53,000 --> 01:43:48,810

the more people will buy the books the

2114

01:43:53,450 --> 01:43:53,010

faster they go flowing and the point you

2115

01:43:55,400 --> 01:43:53,460

know

2116

01:43:59,500 --> 01:43:55,410

people think authors make a ton of money

2117

01:44:02,870 --> 01:43:59,510

and there are some who do but you know

2118

01:44:05,210 --> 01:44:02,880

royalties aren't that great I make more

2119

01:44:07,160 --> 01:44:05,220

money selling the books that I can buy

2120

01:44:10,280 --> 01:44:07,170

at a very good discount from the

2121

01:44:12,560 --> 01:44:10,290

publisher my publisher he's good to us

2122

01:44:15,370 --> 01:44:12,570

yeah so I carry books around I ship

2123

01:44:18,320 --> 01:44:15,380

books ahead and all that sort of thing

2124

01:44:19,910 --> 01:44:18,330

go ahead well I I just want I just

2125

01:44:21,800 --> 01:44:19,920

wanted to start adding to my collection

2126

01:44:23,810 --> 01:44:21,810

I I love to work and I've always loved

2127

01:44:25,190 --> 01:44:23,820

your work and thank you so much for all

2128

01:44:28,550 --> 01:44:25,200

you've done I just have one quick

2129

01:44:30,740 --> 01:44:28,560

question for you sure out of out of all

2130

01:44:32,360 --> 01:44:30,750

of your years in this in this field and

2131

01:44:34,670 --> 01:44:32,370

you're studying and do you've

2132

01:44:38,150 --> 01:44:34,680

interviewed and and everything that goes

2133

01:44:40,370 --> 01:44:38,160

along with it can you tell us maybe what

2134

01:44:42,680 --> 01:44:40,380

is your biggest disappointment or who

2135

01:44:44,480 --> 01:44:42,690

has been your biggest disappointment and

2136

01:44:47,030 --> 01:44:44,490

you don't have to mention names but I

2137

01:44:48,950 --> 01:44:47,040

just wanted to know you know what is

2138

01:44:53,690 --> 01:44:48,960

really sometimes maybe turned you off to

2139

01:44:56,270 --> 01:44:53,700

all this well there are some people who

2140

01:44:58,580 --> 01:44:56,280

have climbed the heights of ufology if

2141

01:45:01,370 --> 01:44:58,590

you will featured at conferences and

2142

01:45:04,820 --> 01:45:01,380

stuff that I find are not being

2143

01:45:07,100 --> 01:45:04,830

scientific or careful or with what they

2144

01:45:08,600 --> 01:45:07,110

say and how they describe it or don't go

2145

01:45:12,620 --> 01:45:08,610

for the evidence they go for the

2146

01:45:15,290 --> 01:45:12,630

proclamation which I find unacceptable

2147

01:45:17,030 --> 01:45:15,300

just because of my background I could

2148

01:45:20,230 --> 01:45:17,040

never have gotten away with that kind of

2149

01:45:23,990 --> 01:45:20,240

stuff when I was working as a physicist

2150

01:45:27,580 --> 01:45:24,000

that's probably and also I guess I was

2151

01:45:30,200 --> 01:45:27,590

an optimist and I was hoping that the

2152

01:45:33,020 --> 01:45:30,210

lid would be blown off the cosmic

2153

01:45:37,970 --> 01:45:33,030

Watergate by now you know that I can

2154

01:45:41,390 --> 01:45:37,980

relax and say told you so but I haven't

2155

01:45:43,370 --> 01:45:41,400

seen you know well I think I think

2156

01:45:45,290 --> 01:45:43,380

you've pride I think you've pried the

2157

01:45:47,780 --> 01:45:45,300

lid off a little bit I have to say that

2158

01:45:52,340 --> 01:45:47,790

well I've tried with Roswell in

2159

01:45:53,600 --> 01:45:52,350

particular and I get a real kick out of

2160

01:45:55,640 --> 01:45:53,610

the people's reaction when I show

2161

01:45:58,400 --> 01:45:55,650

blackened-out documents and whited out

2162

01:46:00,920 --> 01:45:58,410

documents if people say what's he

2163

01:46:04,220 --> 01:46:00,930

talking about well the National Security

2164

01:46:06,700 --> 01:46:04,230

Agency the NSA or no such agency as some

2165

01:46:08,810 --> 01:46:06,710

people say hey

2166

01:46:12,050 --> 01:46:08,820

when we use the Freedom of Information

2167

01:46:16,910 --> 01:46:12,060

Act we went after them for their UFO

2168

01:46:20,810 --> 01:46:16,920

stuff this is years ago and they really

2169

01:46:25,010 --> 01:46:20,820

gave us nothing but they had found 156

2170

01:46:27,020 --> 01:46:25,020

top secret hombra UFO documents and we

2171

01:46:29,900 --> 01:46:27,030

finally got copies of some of these

2172

01:46:33,410 --> 01:46:29,910

things they're all whited out you could

2173

01:46:36,830 --> 01:46:33,420

read one cents per page one sentence per

2174

01:46:38,330 --> 01:46:36,840

page and you can't read what's under the

2175

01:46:40,130 --> 01:46:38,340

whiteout because you're getting a zero

2176

01:46:44,210 --> 01:46:40,140

so you know you're not getting the

2177

01:46:46,870 --> 01:46:44,220

originals and so I that was a

2178

01:46:48,979 --> 01:46:46,880

disappointment but it's certainly proof

2179

01:46:51,820 --> 01:46:48,989

the same happens with the CIA

2180

01:46:55,550 --> 01:46:51,830

incidentally we got 800 pages of

2181

01:46:59,300 --> 01:46:55,560

material through secret and I later got

2182

01:47:02,210 --> 01:46:59,310

a few dozen pages of top secret material

2183

01:47:04,490 --> 01:47:02,220

but you know you could read ten words on

2184

01:47:07,729 --> 01:47:04,500

some of the pages if you were lucky you

2185

01:47:11,330 --> 01:47:07,739

know so and then when I get people tell

2186

01:47:13,970 --> 01:47:11,340

me it's hard to gather all this stuff

2187

01:47:16,040 --> 01:47:13,980

and put it out publishers aren't

2188

01:47:17,660 --> 01:47:16,050

interested in informing the public

2189

01:47:20,060 --> 01:47:17,670

they're interested in publishing books

2190

01:47:21,620 --> 01:47:20,070

and making money nothing against my

2191

01:47:22,970 --> 01:47:21,630

publisher he's always been cooperative

2192

01:47:24,110 --> 01:47:22,980

and they've always gotten the books

2193

01:47:25,430 --> 01:47:24,120

where they were supposed to be when they

2194

01:47:31,130 --> 01:47:25,440

were supposed to be there and stuff like

2195

01:47:34,490 --> 01:47:31,140

that but processing the truth is not the

2196

01:47:37,340 --> 01:47:34,500

goal of publishing a book from the

2197

01:47:39,830 --> 01:47:37,350

publishers viewpoint what good is a book

2198

01:47:42,140 --> 01:47:39,840

if you can't sell it cost your money to

2199

01:47:46,910 --> 01:47:42,150

print it and you got to pay the author

2200

01:47:48,979 --> 01:47:46,920

something not a lot so it's been

2201

01:47:51,050 --> 01:47:48,989

described well some anyone hey Martin

2202

01:47:52,400 --> 01:47:51,060

Stan thank you so much I'll get off the

2203

01:47:54,710 --> 01:47:52,410

hook somebody else called hey Martin

2204

01:47:56,630 --> 01:47:54,720

thanks much great show and Stan thank

2205

01:47:58,940 --> 01:47:56,640

you so much for all these years of just

2206

01:48:00,979 --> 01:47:58,950

just keeping our minds moving thank you

2207

01:48:03,260 --> 01:48:00,989

so much Mike great Kevin thanks to the

2208

01:48:05,810 --> 01:48:03,270

call the line to you later

2209

01:48:08,510 --> 01:48:05,820

yeah I know lines open someone can call

2210

01:48:11,030 --> 01:48:08,520

and if they'd like Stan and we may get

2211

01:48:13,040 --> 01:48:11,040

interrupted again but you were telling

2212

01:48:15,770 --> 01:48:13,050

me at some point before we got a call

2213

01:48:17,459 --> 01:48:15,780

and kind of stopped talking about it why

2214

01:48:19,709 --> 01:48:17,469

you were disappointed in two

2215

01:48:22,439 --> 01:48:19,719

stars with what them and we have a call

2216

01:48:24,180 --> 01:48:22,449

coming in I will try to get set so this

2217

01:48:27,689 --> 01:48:24,190

is the last call actually I'm going to

2218

01:48:33,540 --> 01:48:27,699

take we have we have about 10 minutes

2219

01:48:35,009 --> 01:48:33,550

left and let's see it come up caller

2220

01:48:36,959 --> 01:48:35,019

you're on the line you're gonna be down

2221

01:48:38,370 --> 01:48:36,969

to Columbia right yes that's right the

2222

01:48:42,060 --> 01:48:38,380

capital of the state of South Carolina

2223

01:48:44,040 --> 01:48:42,070

is that drenched it was but I've checked

2224

01:48:46,379 --> 01:48:44,050

and they're not flooded out oh that's

2225

01:48:48,450 --> 01:48:46,389

good to know I was worried I'd have to

2226

01:48:52,649 --> 01:48:48,460

cancel the trip because I have to float

2227

01:48:56,969 --> 01:48:52,659

that this this caller is our resident

2228

01:48:59,279 --> 01:48:56,979

skeptic oh yeah so but I don't suppose

2229

01:49:01,770 --> 01:48:59,289

we have a lot of skeptical things to say

2230

01:49:03,359 --> 01:49:01,780

to Stan just over the years I am old

2231

01:49:05,160 --> 01:49:03,369

enough to remember what research was

2232

01:49:07,649 --> 01:49:05,170

like before there were search engines

2233

01:49:10,290 --> 01:49:07,659

and an internet searches and that sort

2234

01:49:11,520 --> 01:49:10,300

of thing you really had to really get in

2235

01:49:17,430 --> 01:49:11,530

there and do the work and I do

2236

01:49:20,910 --> 01:49:17,440

appreciate that and I do also have a

2237

01:49:24,899 --> 01:49:20,920

question sure I wanted I wanted to ask

2238

01:49:26,700 --> 01:49:24,909

him with mj-12 and that's the subject

2239

01:49:30,719 --> 01:49:26,710

that has not come up this evening I just

2240

01:49:31,259 --> 01:49:30,729

want that you're right sorry yeah no

2241

01:49:33,899 --> 01:49:31,269

problem

2242

01:49:36,029 --> 01:49:33,909

I wanted to ask him when he first got

2243

01:49:39,299 --> 01:49:36,039

when they first saw the documents he was

2244

01:49:40,770 --> 01:49:39,309

a little skeptical because Donald

2245

01:49:42,899 --> 01:49:40,780

Mendel's name was on them and I just

2246

01:49:44,850 --> 01:49:42,909

wanted Donald Menzel was a Harvard

2247

01:49:47,520 --> 01:49:44,860

University astronomer a very well-known

2248

01:49:51,180 --> 01:49:47,530

astronomer need written three anti UFO

2249

01:49:54,299 --> 01:49:51,190

books and so when we get these done the

2250

01:49:57,120 --> 01:49:54,309

mj-12 documents and it shows him as one

2251
01:50:01,200 --> 01:49:57,130
of the members of this incredibly secret

2252
01:50:03,209 --> 01:50:01,210
group majestic 12 your first thought is

2253
01:50:05,729 --> 01:50:03,219
oh that's baloney Menzel couldn't have

2254
01:50:06,660 --> 01:50:05,739
been a part of such a group but I had to

2255
01:50:09,979 --> 01:50:06,670
get permission for three different

2256
01:50:12,299 --> 01:50:09,989
people to look at his papers at Harvard

2257
01:50:13,770 --> 01:50:12,309
they couldn't just walk in off the

2258
01:50:18,209 --> 01:50:13,780
street in other words they were at the

2259
01:50:22,489 --> 01:50:18,219
archives there and was shocked frankly

2260
01:50:27,000 --> 01:50:22,499
pleased I must say but shocked to find

2261
01:50:30,760 --> 01:50:27,010
he was in touch with Jack Kennedy and it

2262
01:50:34,420 --> 01:50:30,770
was mental had a longer continuous

2263
01:50:36,100 --> 01:50:34,430

see asian with high classified material

2264

01:50:41,020 --> 01:50:36,110

with the NSC

2265

01:50:44,620 --> 01:50:41,030

NSA all these guys than anybody more

2266

01:50:48,910 --> 01:50:44,630

than 30 years and I was shocked by that

2267

01:50:51,190 --> 01:50:48,920

that he wrote to somebody that when

2268

01:50:54,780 --> 01:50:51,200

we're properly cleared to each other I

2269

01:50:56,380 --> 01:50:54,790

can tell you more he was a cryptologist

2270

01:51:01,150 --> 01:50:56,390

code breaker

2271

01:51:04,060 --> 01:51:01,160

code maker nobody knew that I mean and I

2272

01:51:07,540 --> 01:51:04,070

talked to families of all the 12 members

2273

01:51:09,610 --> 01:51:07,550

except one so I couldn't find I think

2274

01:51:12,520 --> 01:51:09,620

the family was gone or whatever it was

2275

01:51:14,080 --> 01:51:12,530

but Mendel was the biggest surprise ever

2276

01:51:17,260 --> 01:51:14,090

asking what was the biggest surprise in

2277

01:51:19,200 --> 01:51:17,270

my UFO research it was finding Menzel's

2278

01:51:22,750 --> 01:51:19,210

name on that list then being able to

2279

01:51:24,640 --> 01:51:22,760

prove that he had clearances that he did

2280

01:51:28,990 --> 01:51:24,650

all kinds of classified work and so

2281

01:51:32,350 --> 01:51:29,000

forth that was a shocker but I did the

2282

01:51:33,820 --> 01:51:32,360

homework it took a lot of effort I mean

2283

01:51:35,650 --> 01:51:33,830

and the people to say your mental

2284

01:51:38,320 --> 01:51:35,660

couldn't have led a double life well I

2285

01:51:41,140 --> 01:51:38,330

would like to point out to three names

2286

01:51:42,760 --> 01:51:41,150

Philby Burgess and MacLean these were

2287

01:51:46,300 --> 01:51:42,770

Russian spies who worked in British

2288

01:51:50,250 --> 01:51:46,310

intelligence you know you can keep

2289

01:51:52,480 --> 01:51:50,260

secrets and you can be inside an

2290

01:51:54,670 --> 01:51:52,490

organization that is working on the

2291

01:51:56,980 --> 01:51:54,680

opposite side from where you are and

2292

01:51:58,390 --> 01:51:56,990

they did those were just three names

2293

01:52:00,250 --> 01:51:58,400

there I'm sure there were many others

2294

01:52:00,760 --> 01:52:00,260

you know on both sides of the Iron

2295

01:52:04,810 --> 01:52:00,770

Curtain

2296

01:52:06,880 --> 01:52:04,820

but Menzel was a shock and I did talk to

2297

01:52:10,300 --> 01:52:06,890

his wife fight had talked to one of his

2298

01:52:12,550 --> 01:52:10,310

children I was very impressed I became a

2299

01:52:16,930 --> 01:52:12,560

fan of Donald as well I had one phone

2300

01:52:19,540 --> 01:52:16,940

conversation with him early on and he

2301
01:52:21,850 --> 01:52:19,550
said to me you can't be a scientist and

2302
01:52:27,130 --> 01:52:21,860
believe in flying saucers and I laughed

2303
01:52:29,980 --> 01:52:27,140
and he got angry all right Ryan hey

2304
01:52:32,250 --> 01:52:29,990
thanks for the call all right thank you

2305
01:52:36,250 --> 01:52:32,260
thank you I know

2306
01:52:37,660 --> 01:52:36,260
so we had someone would not if someone

2307
01:52:39,850 --> 01:52:37,670
what's that call someone's been trying

2308
01:52:42,040 --> 01:52:39,860
to call and they want to call back one

2309
01:52:45,010 --> 01:52:42,050
more time just for a quick one

2310
01:52:48,399 --> 01:52:45,020
then a quick comment or whatever then

2311
01:52:51,780 --> 01:52:48,409
call now or forever hold the dial or

2312
01:52:54,790 --> 01:52:51,790
whatever it is but so we were talking

2313
01:52:56,830 --> 01:52:54,800

about I'm not seeing that call coming in

2314

01:52:59,290 --> 01:52:56,840

so we're talking about why you were

2315

01:53:01,540 --> 01:52:59,300

disappointed and I don't want to end on

2316

01:53:03,339 --> 01:53:01,550

a negative note we only have a few

2317

01:53:05,649 --> 01:53:03,349

minutes left here but why were you

2318

01:53:07,839 --> 01:53:05,659

disappointed in to the stars because

2319

01:53:10,750 --> 01:53:07,849

there's not a lot going on

2320

01:53:12,250 --> 01:53:10,760

well yeah let me make one comment the

2321

01:53:15,819 --> 01:53:12,260

other shoot I've been waiting for the

2322

01:53:17,680 --> 01:53:15,829

shoe to drop for seven months it sounded

2323

01:53:20,589 --> 01:53:17,690

so promising I was so impressed with the

2324

01:53:24,010 --> 01:53:20,599

people and yet we haven't had there had

2325

01:53:27,609 --> 01:53:24,020

to be reports written we haven't seen

2326

01:53:28,569 --> 01:53:27,619

any of them now whether that just means

2327

01:53:32,109 --> 01:53:28,579

somebody's being stubborn about

2328

01:53:35,260 --> 01:53:32,119

declassifying that's probably the most

2329

01:53:37,149 --> 01:53:35,270

logical reaction but still that was the

2330

01:53:40,720 --> 01:53:37,159

disappointment that I thought the ball

2331

01:53:43,979 --> 01:53:40,730

was rolling and it stopped yeah yeah all

2332

01:53:47,680 --> 01:53:43,989

right Stan so we have two minutes left I

2333

01:53:50,200 --> 01:53:47,690

want if you would tell me what's been

2334

01:53:51,640 --> 01:53:50,210

the best thing about this for you I'm

2335

01:53:53,830 --> 01:53:51,650

sorry we're not gonna be taking any more

2336

01:53:58,149 --> 01:53:53,840

calls at this point what's been the best

2337

01:54:00,399 --> 01:53:58,159

part of ufology for you the opportunity

2338

01:54:02,350 --> 01:54:00,409

to talk to a lot of people in a lot of

2339

01:54:05,770 --> 01:54:02,360

places who were sharp people who know

2340

01:54:07,240 --> 01:54:05,780

him bits and pieces to tell me that you

2341

01:54:08,500 --> 01:54:07,250

know it would be easy to think while

2342

01:54:10,569 --> 01:54:08,510

Freedmen's the only one of the things

2343

01:54:12,129 --> 01:54:10,579

the way he does or has reached the

2344

01:54:14,979 --> 01:54:12,139

conclusions he has well I know that's

2345

01:54:17,229 --> 01:54:14,989

not true because I've talked to so many

2346

01:54:19,839 --> 01:54:17,239

people in so many places in all 50

2347

01:54:21,669 --> 01:54:19,849

states ten provinces 19 other countries

2348

01:54:24,430 --> 01:54:21,679

and I have a question and answer period

2349

01:54:26,830 --> 01:54:24,440

after a real lecture and I do lots of

2350

01:54:32,879 --> 01:54:26,840

radio shows like this one and you know

2351

01:54:35,649 --> 01:54:32,889

television shows and so forth and so I

2352

01:54:39,430 --> 01:54:35,659

am disappointed that we haven't gotten

2353

01:54:42,129 --> 01:54:39,440

farther I will say that because I was

2354

01:54:44,649 --> 01:54:42,139

hoping that during my lifetime the truth

2355

01:54:46,839 --> 01:54:44,659

would be exposed and mankind would start

2356

01:54:49,299 --> 01:54:46,849

to realize that Earthlings are not

2357

01:54:51,069 --> 01:54:49,309

unique and not as important as they like

2358

01:54:54,790 --> 01:54:51,079

to think they are and maybe we can join

2359

01:54:58,420 --> 01:54:54,800

the galactic federation some time I hope

2360

01:54:59,410 --> 01:54:58,430

and one last quick question we have one

2361

01:55:02,340 --> 01:54:59,420

minute left

2362

01:55:05,800 --> 01:55:02,350

what's some advice that you would give

2363

01:55:09,640 --> 01:55:05,810

someone that's coming into the UFO field

2364

01:55:13,300 --> 01:55:09,650

now the biggest thing is do your

2365

01:55:15,490 --> 01:55:13,310

homework there look I've got a 10 page

2366

01:55:19,240 --> 01:55:15,500

reference list at the end of top-secret

2367

01:55:21,340 --> 01:55:19,250

magic and almost much any flying saucers

2368

01:55:21,910 --> 01:55:21,350

in science there's a lot of stuff out

2369

01:55:27,010 --> 01:55:21,920

there

2370

01:55:29,620 --> 01:55:27,020

large-scale scientific studies that most

2371

01:55:32,110 --> 01:55:29,630

people are totally unaware of so if you

2372

01:55:34,300 --> 01:55:32,120

want to get steeped in the facts they're

2373

01:55:36,550 --> 01:55:34,310

there but you got to look for him

2374

01:55:39,820 --> 01:55:36,560

I'm sorry blue books special report 14

2375

01:55:42,580 --> 01:55:39,830

is data and 30 201 sightings most people

2376

01:55:45,070 --> 01:55:42,590

have never heard of it that's really

2377

01:55:49,170 --> 01:55:45,080

amazing Stan I want to thank you

2378

01:55:53,320 --> 01:55:49,180

personally so much for all that you have

2379

01:55:55,330 --> 01:55:53,330

you've given to the field and it's been

2380

01:55:56,740 --> 01:55:55,340

such an honor to talk to you and one of

2381

01:55:58,540 --> 01:55:56,750

the things I've always liked about you

2382

01:56:00,490 --> 01:55:58,550

is you're approachable and you make

2383

01:56:02,710 --> 01:56:00,500

yourself approachable at any event and

2384

01:56:04,360 --> 01:56:02,720

also even on your website you give

2385

01:56:06,760 --> 01:56:04,370

information which is kind of daring I

2386

01:56:10,420 --> 01:56:06,770

don't even do that so anyway I mean how

2387

01:56:12,340 --> 01:56:10,430

they can reach me yes so thanks so much

2388

01:56:15,490 --> 01:56:12,350

I really appreciate it

2389

01:56:18,460 --> 01:56:15,500

appreciate it my pleasure go to Stanton

2390

01:56:20,440 --> 01:56:18,470

Friedman dot-com get the scoop yeah it's

2391

01:56:22,150 --> 01:56:20,450

all there and all right everyone so

2392

01:56:25,390 --> 01:56:22,160

that's it for the show next week we'll

2393

01:56:26,830 --> 01:56:25,400

be back with Joseph Burks and I want to

2394

01:56:30,640 --> 01:56:26,840

thank everyone for listening
