

SCOTT DESCHAINED

1
00:00:09,770 --> 00:00:06,410
hello and welcome to the show on Martin

2
00:00:12,080 --> 00:00:09,780
Wilshire host and we have a interesting

3
00:00:13,930 --> 00:00:12,090
show for you tonight we have Scott

4
00:00:19,429 --> 00:00:13,940
Duchene he's going to be talking about

5
00:00:21,529 --> 00:00:19,439
the possible living sky our UFOs organic

6
00:00:24,620 --> 00:00:21,539
could they be living creatures could

7
00:00:28,009 --> 00:00:24,630
some of them be it's going to be

8
00:00:29,990 --> 00:00:28,019
fascinating I think and so I want to

9
00:00:32,720 --> 00:00:30,000
thank everyone that helps out with the

10
00:00:34,819 --> 00:00:32,730
show supports the show anyone can do

11
00:00:37,220 --> 00:00:34,829
that you can find that information on

12
00:00:40,160 --> 00:00:37,230
our website podcast UFO comm we have a

13
00:00:44,030 --> 00:00:40,170

new blog a we have a guest blogger and

14

00:00:47,180 --> 00:00:44,040

Tasmania and he wrote a blog about of

15

00:00:49,220 --> 00:00:47,190

UFO world and his thoughts on that

16

00:00:52,670 --> 00:00:49,230

living there all his life down in

17

00:00:54,860 --> 00:00:52,680

Tasmania so that is on our on our

18

00:00:58,639 --> 00:00:54,870

website as well

19

00:01:04,119 --> 00:00:58,649

and let's see we are I should say I am

20

00:01:07,670 --> 00:01:04,129

in a new studio I moved last week and so

21

00:01:10,789 --> 00:01:07,680

notice the Internet has had a little bit

22

00:01:13,340 --> 00:01:10,799

issue here so I'm hoping it's not going

23

00:01:16,490 --> 00:01:13,350

to affect the show tonight I'm trying to

24

00:01:20,570 --> 00:01:16,500

get that worked out between now and next

25

00:01:22,190 --> 00:01:20,580

week and fix anything that's going on

26

00:01:26,690 --> 00:01:22,200

with that if there is if there are

27

00:01:28,249 --> 00:01:26,700

issues and I think that's about all I

28

00:01:30,830 --> 00:01:28,259

want to talk about I'm gonna let

29

00:01:31,510 --> 00:01:30,840

Alejandro go for from here how you doing

30

00:01:34,730 --> 00:01:31,520

alejandro

31

00:01:36,649 --> 00:01:34,740

good how are you I'm exhausted but I'm

32

00:01:39,350 --> 00:01:36,659

good really

33

00:01:41,480 --> 00:01:39,360

yeah yeah from all that moving i I don't

34

00:01:44,289 --> 00:01:41,490

know that I've ever heard of someone

35

00:01:46,580 --> 00:01:44,299

taking as long as you did and I know

36

00:01:48,590 --> 00:01:46,590

that it wasn't because you were messing

37

00:01:51,710 --> 00:01:48,600

around you were hauling stuff the entire

38

00:01:53,719 --> 00:01:51,720

time you have some some days from 6:00

39

00:01:57,709 --> 00:01:53,729

in the morning until 1:00 the following

40

00:02:00,170 --> 00:01:57,719

morning it was really moly yeah when you

41

00:02:03,200 --> 00:02:00,180

have a big place you tend to put things

42

00:02:07,160 --> 00:02:03,210

in places and then you you had no idea

43

00:02:09,410 --> 00:02:07,170

that you had things so oh yeah I can

44

00:02:13,820 --> 00:02:09,420

only imagine it's hard enough to to move

45

00:02:15,650 --> 00:02:13,830

from you know 1500 2000 square-foot

46

00:02:18,800 --> 00:02:15,660

place but a place two to three times at

47

00:02:20,090 --> 00:02:18,810

I can I can only imagine yeah yeah I

48

00:02:24,980 --> 00:02:20,100

just want to put everything in a big

49

00:02:28,970 --> 00:02:24,990

pile and burn it anyway so what's going

50

00:02:32,300 --> 00:02:28,980

on in the UFO world so UFOs yeah there's

51
00:02:34,100 --> 00:02:32,310
quite a bit going on at least you know

52
00:02:35,720 --> 00:02:34,110
there's a lot of news around and a lot

53
00:02:37,610 --> 00:02:35,730
of people have seen this and and we've

54
00:02:39,110 --> 00:02:37,620
talked about this in fact we've been one

55
00:02:42,020 --> 00:02:39,120
of the few outlets to talk about this

56
00:02:44,480 --> 00:02:42,030
but to the Stars Academy of course ran

57
00:02:47,360 --> 00:02:44,490
by Tom DeLonge an organization looking

58
00:02:49,850 --> 00:02:47,370
into the UFOs in paranormal some of the

59
00:02:52,310 --> 00:02:49,860
other members are people in intelligence

60
00:02:54,699 --> 00:02:52,320
and scientists and of course Lou

61
00:02:59,930 --> 00:02:54,709
Elizondo who used to run the DoD project

62
00:03:03,080 --> 00:02:59,940
investigating UFOs so there was an SEC

63
00:03:05,240 --> 00:03:03,090

filing that came out and it's because

64

00:03:07,940 --> 00:03:05,250

they're a public corporation they're

65

00:03:10,490 --> 00:03:07,950

kind of a new type of corporation where

66

00:03:13,100 --> 00:03:10,500

it's it's kind of a crowdfunding base

67

00:03:16,520 --> 00:03:13,110

type of thing where you know you can buy

68

00:03:19,310 --> 00:03:16,530

shares to be part of this company well a

69

00:03:22,550 --> 00:03:19,320

filing came out that said they were

70

00:03:25,460 --> 00:03:22,560

thirty seven thousand dollars in debt

71

00:03:27,229 --> 00:03:25,470

and so people started assuming and you

72

00:03:29,300 --> 00:03:27,239

saw these videos popping up especially

73

00:03:33,290 --> 00:03:29,310

with conspiracy people and stuff oh you

74

00:03:35,330 --> 00:03:33,300

know into the Stars is owes all this

75

00:03:37,610 --> 00:03:35,340

money they're going under this was just

76
00:03:39,350 --> 00:03:37,620
a big scam to steal people money from

77
00:03:42,259 --> 00:03:39,360
people there were even some people

78
00:03:44,390 --> 00:03:42,269
saying that they must have spent this 37

79
00:03:45,860 --> 00:03:44,400
million dollars or no they they weren't

80
00:03:46,970 --> 00:03:45,870
saying they must have they were saying

81
00:03:49,040 --> 00:03:46,980
this is what happened

82
00:03:52,310 --> 00:03:49,050
they spent this 37 million dollars

83
00:03:54,080 --> 00:03:52,320
building an alien technology spaceship

84
00:03:56,509 --> 00:03:54,090
and now they don't want to share it with

85
00:03:58,670 --> 00:03:56,519
anybody and that's where the money must

86
00:04:00,199 --> 00:03:58,680
have went no of this sort of thing well

87
00:04:01,550 --> 00:04:00,209
what's funny about that is if they had

88
00:04:03,800 --> 00:04:01,560

built a spaceship like that it probably

89

00:04:07,100 --> 00:04:03,810

would cost more than 37 million dollars

90

00:04:09,080 --> 00:04:07,110

but as you know I've been trying to

91

00:04:12,670 --> 00:04:09,090

point out to people if you look at that

92

00:04:16,460 --> 00:04:12,680

filing it was for equity stock

93

00:04:18,620 --> 00:04:16,470

compensation so it's kind of a paper

94

00:04:21,050 --> 00:04:18,630

thing it's not real money it's not money

95

00:04:24,290 --> 00:04:21,060

that they spent it's and and I'm not

96

00:04:26,150 --> 00:04:24,300

gonna say I understand it but it's kind

97

00:04:27,710 --> 00:04:26,160

of been on the Internet and of course

98

00:04:29,210 --> 00:04:27,720

I've addressed it

99

00:04:32,810 --> 00:04:29,220

and we've talked about it I think on the

100

00:04:35,480 --> 00:04:32,820

show but it went big in the last couple

101
00:04:38,660 --> 00:04:35,490
of days especially when arstechnica

102
00:04:40,880 --> 00:04:38,670
wrote a story about it and that got

103
00:04:43,700 --> 00:04:40,890
picked up by Mashable and some other

104
00:04:46,550 --> 00:04:43,710
news outlets so it kind of got out there

105
00:04:48,500 --> 00:04:46,560
but Ars Technica kind of took the

106
00:04:50,450 --> 00:04:48,510
perspective and the verbage that you

107
00:04:52,790 --> 00:04:50,460
heard from kind of the conspiracy

108
00:04:56,780 --> 00:04:52,800
theories and and and from the the social

109
00:04:58,760 --> 00:04:56,790
media out there and obviously the to the

110
00:05:00,740 --> 00:04:58,770
stars people got a little upset in

111
00:05:03,410 --> 00:05:00,750
particular tom delonge he posted a

112
00:05:04,910 --> 00:05:03,420
couple things on social media saying you

113
00:05:08,230 --> 00:05:04,920

know this guy got it all completely

114

00:05:11,300 --> 00:05:08,240

wrong and they need to retract that and

115

00:05:13,700 --> 00:05:11,310

that got deleted yesterday but there's a

116

00:05:17,780 --> 00:05:13,710

another response that's kind of a little

117

00:05:20,780 --> 00:05:17,790

more formal and explanatory that came

118

00:05:23,540 --> 00:05:20,790

out from to the stars today now I am NOT

119

00:05:25,160 --> 00:05:23,550

and I've sought the help of some people

120

00:05:28,340 --> 00:05:25,170

who know about accounting and corporate

121

00:05:30,980 --> 00:05:28,350

accounting but they've tried to explain

122

00:05:33,710 --> 00:05:30,990

it and I know to the Stars tries to

123

00:05:36,050 --> 00:05:33,720

explain it here but it's over my head

124

00:05:38,510 --> 00:05:36,060

and I think it'll be over a lot of

125

00:05:40,970 --> 00:05:38,520

people's heads but essentially what he's

126

00:05:42,890 --> 00:05:40,980

saying is that it's not real debt I mean

127

00:05:44,690 --> 00:05:42,900

what they've been doing like a lot of

128

00:05:47,480 --> 00:05:44,700

early companies still don't pay their

129

00:05:49,550 --> 00:05:47,490

people in stock so a lot of these people

130

00:05:52,159 --> 00:05:49,560

are practically essentially volunteers

131

00:05:54,050 --> 00:05:52,169

which isn't too surprising because of

132

00:05:55,940 --> 00:05:54,060

course if you look at mutual UFO network

133

00:05:59,690 --> 00:05:55,950

any of these organizations out there

134

00:06:02,150 --> 00:05:59,700

they're all volunteers but this these

135

00:06:03,890 --> 00:06:02,160

guys are getting paid in a stock so that

136

00:06:05,540 --> 00:06:03,900

if the company does well you know at

137

00:06:08,300 --> 00:06:05,550

some point this stock will be worth

138

00:06:11,090 --> 00:06:08,310

something and so that's what that number

139

00:06:15,170 --> 00:06:11,100

relates to is actual stock it's not

140

00:06:18,409 --> 00:06:15,180

money they owe or anything now they

141

00:06:22,220 --> 00:06:18,419

didn't address part of that SEC filing

142

00:06:25,610 --> 00:06:22,230

which just say something to the to the

143

00:06:29,600 --> 00:06:25,620

effect that this could be an issue for

144

00:06:31,520 --> 00:06:29,610

their viability going forward in fact it

145

00:06:33,890 --> 00:06:31,530

calls it a growing concern and that says

146

00:06:36,320 --> 00:06:33,900

these factors raised doubt about the

147

00:06:37,880 --> 00:06:36,330

company's ability to continue as a going

148

00:06:41,959 --> 00:06:37,890

concern

149

00:06:44,179 --> 00:06:41,969

so obviously it's it's something that is

150

00:06:48,469 --> 00:06:44,189

you know internally something they're

151
00:06:50,299 --> 00:06:48,479
working on but it's not what it was you

152
00:06:53,149 --> 00:06:50,309
know it's not debt like they said it was

153
00:06:54,919 --> 00:06:53,159
and in fact to the Stars has reached out

154
00:06:58,339 --> 00:06:54,929
to many of the news outlets who have

155
00:07:00,859 --> 00:06:58,349
posted corrections to their stories

156
00:07:04,100 --> 00:07:00,869
Ars Technica i guess has not done that

157
00:07:08,029 --> 00:07:04,110
yet but many other outlets have so you

158
00:07:10,279 --> 00:07:08,039
know it's it's not what it's been

159
00:07:11,749 --> 00:07:10,289
portrayed out there and of course a lot

160
00:07:13,850 --> 00:07:11,759
of people jumping the gun before they

161
00:07:16,219 --> 00:07:13,860
got information and and as we've said

162
00:07:18,559 --> 00:07:16,229
you know we'll wait for more information

163
00:07:20,600 --> 00:07:18,569

and it appears to be what we thought it

164

00:07:22,519 --> 00:07:20,610

was it's not like you know this this

165

00:07:24,559 --> 00:07:22,529

huge debt like people are trying to make

166

00:07:26,600 --> 00:07:24,569

it out to be nor have they built an

167

00:07:28,639 --> 00:07:26,610

alien spacecraft or anything like that

168

00:07:30,289 --> 00:07:28,649

in fact we know what they're up to

169

00:07:33,199 --> 00:07:30,299

because there's posting videos about

170

00:07:35,569 --> 00:07:33,209

what they're up to they're up to you

171

00:07:39,469 --> 00:07:35,579

know looking into the these materials

172

00:07:40,789 --> 00:07:39,479

and apparently they have some materials

173

00:07:44,329 --> 00:07:40,799

that they believe have been retrieved

174

00:07:46,999 --> 00:07:44,339

from UFOs or anomalous occurrences which

175

00:07:49,399 --> 00:07:47,009

are showing some promise apparently that

176

00:07:52,040 --> 00:07:49,409

they are doing some scientific studies

177

00:07:54,799 --> 00:07:52,050

and have found some of this stuff to be

178

00:07:57,469 --> 00:07:54,809

genuinely a not anomalous and I know

179

00:07:59,359 --> 00:07:57,479

over time and I don't think it's going

180

00:08:01,609 --> 00:07:59,369

to be the too distant future they want

181

00:08:03,859 --> 00:08:01,619

to share their findings so it'll be

182

00:08:06,559 --> 00:08:03,869

great to see that information once it

183

00:08:08,449 --> 00:08:06,569

comes out but of course that sort of

184

00:08:11,059 --> 00:08:08,459

work that they're doing the lab testing

185

00:08:13,459 --> 00:08:11,069

while it's expensive isn't millions of

186

00:08:16,669 --> 00:08:13,469

millions of dollars and in fact in this

187

00:08:18,229 --> 00:08:16,679

SEC filing you can't see those numbers I

188

00:08:20,149 --> 00:08:18,239

mean they everything they're doing all

189

00:08:21,829 --> 00:08:20,159

these numbers are there and you can see

190

00:08:24,079 --> 00:08:21,839

that these operating costs have cost

191

00:08:27,169 --> 00:08:24,089

them you know a hundred thousand or so

192

00:08:30,169 --> 00:08:27,179

dollars so it's been expensive but and

193

00:08:32,420 --> 00:08:30,179

that's what precludes this testing to

194

00:08:35,269 --> 00:08:32,430

happen in this field often is that it is

195

00:08:38,329 --> 00:08:35,279

expensive and you know expects it for an

196

00:08:40,249 --> 00:08:38,339

average person is in the thousands to

197

00:08:42,019 --> 00:08:40,259

tens of thousands the normal person out

198

00:08:44,299 --> 00:08:42,029

on this you know volunteer can't afford

199

00:08:46,730 --> 00:08:44,309

to pay that to get this stuff analyzed

200

00:08:48,889 --> 00:08:46,740

so it is I feel beneficial that they're

201
00:08:50,210 --> 00:08:48,899
doing this and we'll see what happens

202
00:08:52,759 --> 00:08:50,220
with the material at least we'll learn

203
00:08:55,880 --> 00:08:52,769
more about some of the materials out

204
00:08:58,220 --> 00:08:55,890
there that have been suspected to be an

205
00:08:59,810 --> 00:08:58,230
so that's some new sets out there

206
00:09:01,970 --> 00:08:59,820
because those stories have been running

207
00:09:05,240 --> 00:09:01,980
and you know how it is with the new

208
00:09:07,670 --> 00:09:05,250
cycle once the wrong story gets out that

209
00:09:10,310 --> 00:09:07,680
is the predominant story and typically

210
00:09:12,019 --> 00:09:10,320
Corrections you know they they either

211
00:09:13,790 --> 00:09:12,029
don't get out there you never hear about

212
00:09:16,730 --> 00:09:13,800
them so yeah that's that's the story

213
00:09:19,790 --> 00:09:16,740

that people remember and write and fall

214

00:09:22,880 --> 00:09:19,800

back on now was so this was a public

215

00:09:24,829 --> 00:09:22,890

filing is that how this get out exactly

216

00:09:28,639 --> 00:09:24,839

it's a public miling at something that

217

00:09:31,790 --> 00:09:28,649

they have to do this filing let's see

218

00:09:34,430 --> 00:09:31,800

was posted on june 30th 2018 so it's

219

00:09:37,430 --> 00:09:34,440

been out there for a while before people

220

00:09:38,870 --> 00:09:37,440

kind of ran across it but of course this

221

00:09:40,970 --> 00:09:38,880

is the Securities and Exchange

222

00:09:42,620 --> 00:09:40,980

Commission and since they are a

223

00:09:44,780 --> 00:09:42,630

corporation that are dealing in shares

224

00:09:47,389 --> 00:09:44,790

that's why they have to you know follow

225

00:09:49,790 --> 00:09:47,399

the rules and regulations and some of

226

00:09:52,100 --> 00:09:49,800

that is to disclose and and to write

227

00:09:54,850 --> 00:09:52,110

these reports so there is one actually

228

00:09:58,069 --> 00:09:54,860

from last year you can go find as well

229

00:10:00,680 --> 00:09:58,079

but yet this was the latest update now

230

00:10:05,600 --> 00:10:00,690

when they when they do something like

231

00:10:07,610 --> 00:10:05,610

this you said that Tom Tom made some

232

00:10:09,530 --> 00:10:07,620

type of statement did he just did he

233

00:10:11,780 --> 00:10:09,540

clear it all up and say hey everyone

234

00:10:14,509 --> 00:10:11,790

everything's ok you know stop worrying

235

00:10:20,480 --> 00:10:14,519

or anything what was essentially what he

236

00:10:23,630 --> 00:10:20,490

wrote the gist was explaining I guess to

237

00:10:25,610 --> 00:10:23,640

begin this is kind of an introduction

238

00:10:27,470 --> 00:10:25,620

we appreciate the professionalism and

239

00:10:29,240 --> 00:10:27,480

most media channels who have taken the

240

00:10:31,550 --> 00:10:29,250

steps to update their articles and

241

00:10:36,139 --> 00:10:31,560

inform their readers of their mistake

242

00:10:38,120 --> 00:10:36,149

and you know gets into how essentially

243

00:10:41,630 --> 00:10:38,130

just saying this isn't debt like people

244

00:10:44,389 --> 00:10:41,640

keep saying like many other startups you

245

00:10:47,050 --> 00:10:44,399

know we're paying our people in stock

246

00:10:50,180 --> 00:10:47,060

and so this is a stockholder equity

247

00:10:52,340 --> 00:10:50,190

deficit number that looks like this big

248

00:10:57,050 --> 00:10:52,350

number that we oh but it's not if you

249

00:11:00,410 --> 00:10:57,060

look at the details the notes under on

250

00:11:02,540 --> 00:11:00,420

that same SEC filing you'll see more

251

00:11:04,240 --> 00:11:02,550

information about that I've looked at

252

00:11:08,329 --> 00:11:04,250

those notes I just don't understand

253

00:11:09,710 --> 00:11:08,339

accounting speak so I don't get it it's

254

00:11:11,360 --> 00:11:09,720

it's often like talking

255

00:11:13,040 --> 00:11:11,370

about multiple dimensions and the

256

00:11:16,069 --> 00:11:13,050

science behind that that's when that's

257

00:11:18,259 --> 00:11:16,079

way over my head - so so that's

258

00:11:20,269 --> 00:11:18,269

essentially what he was saying he said

259

00:11:21,619 --> 00:11:20,279

you know Tom DeLonge that was from - the

260

00:11:23,179 --> 00:11:21,629

stars Tom Doyle and personally said I

261

00:11:26,179 --> 00:11:23,189

want to mention that I appreciate you

262

00:11:29,360 --> 00:11:26,189

know those who have reached out and

263

00:11:32,420 --> 00:11:29,370

those journalists who have been

264

00:11:36,470 --> 00:11:32,430

correcting things but that's about all

265

00:11:38,179 --> 00:11:36,480

they've said so they didn't speak to

266

00:11:42,230 --> 00:11:38,189

that point of whether or not you know

267

00:11:44,540 --> 00:11:42,240

that the state of the company you know I

268

00:11:47,360 --> 00:11:44,550

don't think that doesn't appear they

269

00:11:49,639 --> 00:11:47,370

want to make comment on that as of yet

270

00:11:50,990 --> 00:11:49,649

but I haven't reviewed all the

271

00:11:53,509 --> 00:11:51,000

corrections and maybe one of those

272

00:11:55,160 --> 00:11:53,519

Corrections will speak to that okay

273

00:11:58,790 --> 00:11:55,170

great we have just a couple minutes

274

00:12:00,710 --> 00:11:58,800

anything else um I guess that's the big

275

00:12:06,050 --> 00:12:00,720

news that people will see out there

276

00:12:07,400 --> 00:12:06,060

right now otherwise you know really yeah

277

00:12:08,780 --> 00:12:07,410

that's the biggest thing out there

278

00:12:10,189 --> 00:12:08,790

otherwise I would say there's lots of

279

00:12:11,689 --> 00:12:10,199

news out there about project Bluebook

280

00:12:14,030 --> 00:12:11,699

because I New York comic-con

281

00:12:18,019 --> 00:12:14,040

a week or so ago and those are some

282

00:12:20,749 --> 00:12:18,029

really neat stories out there so I would

283

00:12:22,610 --> 00:12:20,759

recommend people take a look at that you

284

00:12:23,929 --> 00:12:22,620

know excitements growing for this

285

00:12:25,850 --> 00:12:23,939

television show that will be coming out

286

00:12:29,619 --> 00:12:25,860

January 1 about Project Blue Book and

287

00:12:31,990 --> 00:12:29,629

dr. J Allen Hynek oh it's January 1 Wow

288

00:12:36,049 --> 00:12:32,000

so they're really promoting this I had

289

00:12:38,420 --> 00:12:36,059

yeah I think it's January I'm pretty

290

00:12:43,699 --> 00:12:38,430

sure it is now you're making me question

291

00:12:46,069 --> 00:12:43,709

but well anyone anyone can look that up

292

00:12:49,069 --> 00:12:46,079

all they have to do is yeah Google it's

293

00:12:50,600 --> 00:12:49,079

coming up very soon is is what we need

294

00:12:52,579 --> 00:12:50,610

to know yeah right

295

00:12:54,079 --> 00:12:52,589

all right and J anywhere he's coming up

296

00:12:55,790 --> 00:12:54,089

really quick you know the holidays come

297

00:12:57,350 --> 00:12:55,800

you know how it is after Halloween all

298

00:12:59,629 --> 00:12:57,360

of a sudden it's Thanksgiving then it's

299

00:13:01,369 --> 00:12:59,639

Christmas and you're like whoa where did

300

00:13:03,170 --> 00:13:01,379

those three months go you know about

301

00:13:05,389 --> 00:13:03,180

three or four days ago I had to go to

302

00:13:07,069 --> 00:13:05,399

Home Depot for something and I walked in

303

00:13:12,429 --> 00:13:07,079

the door and it was Santa Claus and

304

00:13:16,009 --> 00:13:12,439

Christmas trees and when it's October oh

305

00:13:18,710 --> 00:13:16,019

my gosh you're kidding no I took a

306

00:13:21,799 --> 00:13:18,720

picture of it and put it on Facebook and

307

00:13:23,510 --> 00:13:21,809

it's like you know I was joking with the

308

00:13:25,070 --> 00:13:23,520

girl there said is this for next year

309

00:13:28,220 --> 00:13:25,080

you know you're doing it earlier and

310

00:13:29,870 --> 00:13:28,230

earlier all the time anyway

311

00:13:33,980 --> 00:13:29,880

I mean it's Halloween we need our

312

00:13:36,800 --> 00:13:33,990

costume still ya know well anyway all

313

00:13:38,600 --> 00:13:36,810

right well thanks alejandro and all

314

00:13:40,640 --> 00:13:38,610

right thank you we'll be talking next

315

00:13:42,740 --> 00:13:40,650

weekend everyone up don't forget to

316

00:13:44,840 --> 00:13:42,750

check out Alejandro's livestream show

317

00:13:47,750 --> 00:13:44,850

especially you people that like to watch

318

00:13:50,840 --> 00:13:47,760

on youtube now it's every Thursday and

319

00:13:53,240 --> 00:13:50,850

go ahead give them the the picture it's

320

00:13:55,970 --> 00:13:53,250

called UFOs seriously it's every

321

00:13:58,130 --> 00:13:55,980

Thursday at 6 p.m. Arizona time which is

322

00:13:59,870 --> 00:13:58,140

currently aligned with Pacific and yep

323

00:14:02,900 --> 00:13:59,880

you can just go to the open minds TV

324

00:14:05,630 --> 00:14:02,910

YouTube channel and go check it out

325

00:14:08,180 --> 00:14:05,640

there yeah and you won't be aligned too

326

00:14:09,950 --> 00:14:08,190

much longer we go into do we change on

327

00:14:10,790 --> 00:14:09,960

daylight savings time fairly soon I

328

00:14:13,040 --> 00:14:10,800

think

329

00:14:16,370 --> 00:14:13,050

oh we do yeah I always forget when that

330

00:14:18,920 --> 00:14:16,380

is okay yeah so we're changing yeah yeah

331

00:14:20,270 --> 00:14:18,930

and that's what's nice about Arizona we

332

00:14:22,210 --> 00:14:20,280

don't do that but it's so cause it's

333

00:14:24,530 --> 00:14:22,220

trouble because everybody else does but

334

00:14:26,120 --> 00:14:24,540

of course on there you'll be able to ask

335

00:14:28,340 --> 00:14:26,130

questions live and I try to answer

336

00:14:30,020 --> 00:14:28,350

questions and then I go over all of the

337

00:14:31,760 --> 00:14:30,030

UFO news for the week of course which

338

00:14:34,220 --> 00:14:31,770

you can see at open minds dot t be

339

00:14:36,290 --> 00:14:34,230

excellent all right I'll talk to you

340

00:14:37,940 --> 00:14:36,300

next week all right talk to you next

341

00:14:41,600 --> 00:14:37,950

week have a great show all right thank

342

00:14:46,160 --> 00:14:41,610

you so our guest our guest this evening

343

00:14:49,010 --> 00:14:46,170

is Scott Abdul Shan and he has a couple

344

00:14:52,550 --> 00:14:49,020

of books the sky is alive the living sky

345

00:14:55,730 --> 00:14:52,560

and we're gonna be talking about all

346

00:14:58,610 --> 00:14:55,740

that and so much more fascinating topic

347

00:15:00,140 --> 00:14:58,620

welcome to the show Scott Thank You

348

00:15:02,600 --> 00:15:00,150

Martin thank you for having me

349

00:15:04,790 --> 00:15:02,610

yes and we have in the background you

350

00:15:07,190 --> 00:15:04,800

have some posters going when we pop up

351
00:15:11,090 --> 00:15:07,200
on full screen we'll be able to show the

352
00:15:13,400 --> 00:15:11,100
people watching YouTube that so I

353
00:15:17,000 --> 00:15:13,410
thought this was fascinating because I

354
00:15:20,600 --> 00:15:17,010
remember what your your subject is

355
00:15:22,850 --> 00:15:20,610
because I I've watched a video one time

356
00:15:26,120 --> 00:15:22,860
I remember it clearly it looked like a

357
00:15:28,520 --> 00:15:26,130
jellyfish and it looked like something

358
00:15:31,310 --> 00:15:28,530
living and a few people have talked

359
00:15:33,350 --> 00:15:31,320
about you know experiences were they

360
00:15:35,390 --> 00:15:33,360
were thinking things were alive that's a

361
00:15:37,040 --> 00:15:35,400
whole nother subject I'll I'll talk to

362
00:15:41,360 --> 00:15:37,050
you about as we get into it a little bit

363
00:15:45,620 --> 00:15:41,370

more but what what caused you to look

364

00:15:47,389 --> 00:15:45,630

into this and and also what made you

365

00:15:49,759 --> 00:15:47,399

take this approach that I don't think

366

00:15:54,290 --> 00:15:49,769

anyone else has ever taken well actually

367

00:15:57,259 --> 00:15:54,300

it's not my idea totally I've taken it

368

00:15:59,900 --> 00:15:57,269

sort of some logical conclusions or some

369

00:16:01,790 --> 00:15:59,910

logical next steps but I'm sure a lot of

370

00:16:03,550 --> 00:16:01,800

folks who were interested in UFOs are

371

00:16:05,980 --> 00:16:03,560

familiar with the name Kenneth Arnold

372

00:16:08,540 --> 00:16:05,990

he's the gentleman whose sighting in

373

00:16:12,680 --> 00:16:08,550

1947 sparked the whole term flying

374

00:16:15,130 --> 00:16:12,690

saucer well he studied UFOs the rest of

375

00:16:17,800 --> 00:16:15,140

his life and he came to the conclusion

376

00:16:20,690 --> 00:16:17,810

that they were some kind of natural

377

00:16:23,540 --> 00:16:20,700

flora or fauna of the atmosphere that

378

00:16:25,370 --> 00:16:23,550

they were living things and it's kind of

379

00:16:27,470 --> 00:16:25,380

a mystery to me why more people don't

380

00:16:29,840 --> 00:16:27,480

pay attention everybody sort of lionized

381

00:16:31,670 --> 00:16:29,850

is Kenneth Arnold but nobody pays

382

00:16:32,990 --> 00:16:31,680

attention in those conclusions that he

383

00:16:36,290 --> 00:16:33,000

had I know there's been interviews with

384

00:16:37,850 --> 00:16:36,300

his daughter where she talks about some

385

00:16:40,910 --> 00:16:37,860

of his conclusions but he talked to

386

00:16:44,269 --> 00:16:40,920

pilots many pilots during his research

387

00:16:47,000 --> 00:16:44,279

during his study of UFOs and a lot of

388

00:16:49,370 --> 00:16:47,010

them told him stories of life like UFOs

389

00:16:51,680 --> 00:16:49,380

that are approaching planes so what you

390

00:16:53,720 --> 00:16:51,690

described earlier people saying oh it

391

00:16:55,699 --> 00:16:53,730

looked like a jellyfish no it moved and

392

00:16:58,160 --> 00:16:55,709

you know that's a very common thing in

393

00:17:02,060 --> 00:16:58,170

fact that's what sort of led me into the

394

00:17:05,480 --> 00:17:02,070

that whole area of study looking at you

395

00:17:08,059 --> 00:17:05,490

know once we started finding that you

396

00:17:09,620 --> 00:17:08,069

could have visual evidence of UFOs may

397

00:17:12,309 --> 00:17:09,630

have always been fascinated by scary

398

00:17:16,010 --> 00:17:12,319

stories and once we started having

399

00:17:19,069 --> 00:17:16,020

videotapes and DVDs I decided to look

400

00:17:22,159 --> 00:17:19,079

closely and a lot of the UFO evidence so

401
00:17:24,409 --> 00:17:22,169
you had people who didn't have access to

402
00:17:26,449 --> 00:17:24,419
a camera before all of a sudden

403
00:17:29,360 --> 00:17:26,459
recording these things and now everybody

404
00:17:30,980 --> 00:17:29,370
with a phone as a camera so all of a

405
00:17:32,210 --> 00:17:30,990
sudden you're seeing you know thousands

406
00:17:36,230 --> 00:17:32,220
and thousands and thousands of

407
00:17:38,840 --> 00:17:36,240
recordings of these objects and you look

408
00:17:40,040 --> 00:17:38,850
at them and so many of them well first

409
00:17:42,409 --> 00:17:40,050
of all as I'm sure you're well aware

410
00:17:44,390 --> 00:17:42,419
most of them are blurry or indistinct or

411
00:17:46,190 --> 00:17:44,400
you can't tell what it is but the few

412
00:17:48,530 --> 00:17:46,200
where they are clear they don't really

413
00:17:50,060 --> 00:17:48,540

look like mechanical craft but a lot of

414

00:17:52,340 --> 00:17:50,070

them look like

415

00:17:54,890 --> 00:17:52,350

what we call you know the kind of

416

00:17:57,800 --> 00:17:54,900

organisms that we see living in Earth's

417

00:18:00,470 --> 00:17:57,810

oceans and that's so it sort of started

418

00:18:02,330 --> 00:18:00,480

me down that Avenue is looking

419

00:18:05,300 --> 00:18:02,340

considering the possibility that our

420

00:18:08,000 --> 00:18:05,310

atmosphere might be a habitat it's

421

00:18:09,500 --> 00:18:08,010

similar to Earth's oceans and the more

422

00:18:12,290 --> 00:18:09,510

I've looked the more I've found it's

423

00:18:14,630 --> 00:18:12,300

just a fascinating topic and there's all

424

00:18:16,730 --> 00:18:14,640

kinds of evidence out there all kinds of

425

00:18:19,880 --> 00:18:16,740

visual evidence and the best thing about

426

00:18:22,490 --> 00:18:19,890

it is that it provides a clear path for

427

00:18:23,960 --> 00:18:22,500

study going forward we're not just

428

00:18:25,580 --> 00:18:23,970

looking at things in the past and saying

429

00:18:27,500 --> 00:18:25,590

oh what was it what was it and arguing

430

00:18:29,180 --> 00:18:27,510

about what it was there's actually

431

00:18:31,100 --> 00:18:29,190

different specific ways we can go

432

00:18:33,200 --> 00:18:31,110

forward and study this and try and find

433

00:18:35,450 --> 00:18:33,210

out if this is really a provable

434

00:18:38,840 --> 00:18:35,460

hypothesis well a couple of things I

435

00:18:41,600 --> 00:18:38,850

thought of in this whole topic of yours

436

00:18:44,870 --> 00:18:41,610

and and one of them is are these things

437

00:18:49,520 --> 00:18:44,880

actually supposed to be floating or how

438

00:18:53,030 --> 00:18:49,530

do they maintain you know weightlessness

439

00:18:55,540 --> 00:18:53,040

you know less than air as they say you

440

00:18:57,920 --> 00:18:55,550

know no and then navigate and all that

441

00:19:01,700 --> 00:18:57,930

that's a good question a lot of people

442

00:19:03,050 --> 00:19:01,710

ask that they go how do they stay up you

443

00:19:05,690 --> 00:19:03,060

know that why don't they just fall out

444

00:19:08,330 --> 00:19:05,700

of the sky and to really understand the

445

00:19:09,920 --> 00:19:08,340

topic one of the reasons that it's it's

446

00:19:12,890 --> 00:19:09,930

kind of simple but it's kind of

447

00:19:14,420 --> 00:19:12,900

revolutionary in a lot of ways but one

448

00:19:16,610 --> 00:19:14,430

of the challenges to understanding the

449

00:19:17,990 --> 00:19:16,620

topic is you have to understand several

450

00:19:20,300 --> 00:19:18,000

different things first you have to think

451
00:19:21,800 --> 00:19:20,310
of the atmosphere you have to understand

452
00:19:24,650 --> 00:19:21,810
a little bit about the Earth's

453
00:19:27,620 --> 00:19:24,660
atmosphere and then you have to

454
00:19:30,020 --> 00:19:27,630
understand a little bit about the UFO

455
00:19:32,120 --> 00:19:30,030
problem you know what what we see with

456
00:19:34,120 --> 00:19:32,130
the question of UFOs why are you know

457
00:19:36,290 --> 00:19:34,130
the whole nature of the phenomena and

458
00:19:38,990 --> 00:19:36,300
then there's where you take sort of a

459
00:19:41,810 --> 00:19:39,000
wrong sort of a left turn and you have

460
00:19:45,250 --> 00:19:41,820
to look at the type of organisms that we

461
00:19:48,170 --> 00:19:45,260
find in Earth's other fluid environment

462
00:19:50,450 --> 00:19:48,180
the ocean but let's go let's start with

463
00:19:53,090 --> 00:19:50,460

the atmosphere we think of the

464

00:19:55,030 --> 00:19:53,100

atmosphere I heard somebody once say the

465

00:19:57,770 --> 00:19:55,040

goldfish don't know what water is

466

00:20:00,410 --> 00:19:57,780

because they swim in it all the time now

467

00:20:02,060 --> 00:20:00,420

we don't think of the atmosphere as a

468

00:20:03,139 --> 00:20:02,070

habitat because we just take it for

469

00:20:06,289 --> 00:20:03,149

granted

470

00:20:08,810 --> 00:20:06,299

is this giant environment it's this you

471

00:20:11,839 --> 00:20:08,820

know vaporous cloud that surrounds the

472

00:20:14,629 --> 00:20:11,849

planet it's huge it has five million

473

00:20:17,389 --> 00:20:14,639

times more volume than Earth's oceans

474

00:20:19,879 --> 00:20:17,399

and we tend to think of it as just empty

475

00:20:22,639 --> 00:20:19,889

space but it's not there's huge amounts

476

00:20:24,649 --> 00:20:22,649

of water and minerals and energy just

477

00:20:28,489 --> 00:20:24,659

coursing through the atmosphere on a

478

00:20:30,259 --> 00:20:28,499

scale we can't even imagine so closer to

479

00:20:32,629 --> 00:20:30,269

the earth the atmosphere is more dense

480

00:20:35,209 --> 00:20:32,639

and as we rise higher it gets less dense

481

00:20:37,070 --> 00:20:35,219

until at the edge of space there's not

482

00:20:39,709 --> 00:20:37,080

really a hard line there it's just kind

483

00:20:41,209 --> 00:20:39,719

of some kind of transfer back and forth

484

00:20:43,639 --> 00:20:41,219

between the edge of space and Earth's

485

00:20:46,700 --> 00:20:43,649

atmosphere so things moving through the

486

00:20:49,909 --> 00:20:46,710

atmosphere don't have to float they just

487

00:20:52,129 --> 00:20:49,919

have to be less dense than what's

488

00:20:53,989 --> 00:20:52,139

immediately below them so it's like

489

00:20:55,129 --> 00:20:53,999

asking you know why don't fish just sink

490

00:20:57,019 --> 00:20:55,139

to the bottom of the ocean

491

00:20:59,269 --> 00:20:57,029

well they maintain their buoyancy

492

00:21:01,549 --> 00:20:59,279

through that fluid environment and

493

00:21:03,769 --> 00:21:01,559

that's how I'm proposing is that the

494

00:21:06,139 --> 00:21:03,779

types of organisms that we seem to see

495

00:21:09,229 --> 00:21:06,149

in the atmosphere or the kind that can

496

00:21:11,269 --> 00:21:09,239

maintain that sort of buoyancy now I

497

00:21:13,909 --> 00:21:11,279

understand you just said that there's

498

00:21:16,820 --> 00:21:13,919

five million times more volume in the

499

00:21:17,180 --> 00:21:16,830

atmosphere than all the oceans but right

500

00:21:19,940 --> 00:21:17,190

now

501
00:21:21,879 --> 00:21:19,950
don't you I mean it seems to me that if

502
00:21:26,359 --> 00:21:21,889
there was actually something up there

503
00:21:28,989 --> 00:21:26,369
wouldn't it be detected more often or is

504
00:21:31,700 --> 00:21:28,999
it just that it's so vast I mean is it

505
00:21:34,249 --> 00:21:31,710
all kinds of things come to mind how do

506
00:21:38,149 --> 00:21:34,259
these things breed where do they hang

507
00:21:39,139 --> 00:21:38,159
out for the most part what do they eat -

508
00:21:42,339 --> 00:21:39,149
they eat birds

509
00:21:45,169 --> 00:21:42,349
I mean oh well that's a good question

510
00:21:46,759 --> 00:21:45,179
those are great questions and part of it

511
00:21:49,879 --> 00:21:46,769
comes down to another challenge about

512
00:21:51,739 --> 00:21:49,889
this hypothesis it's accepting I mean we

513
00:21:54,950 --> 00:21:51,749

tend to think we're humans tend to think

514

00:21:57,320 --> 00:21:54,960

that we're the grand pooh-bah of the you

515

00:21:59,690 --> 00:21:57,330

know the the food chain we're at the top

516

00:22:02,060 --> 00:21:59,700

of the food chain but if you think of

517

00:22:04,579 --> 00:22:02,070

our planets environment and the

518

00:22:06,229 --> 00:22:04,589

different habitats that are there you

519

00:22:08,329 --> 00:22:06,239

know it's two-thirds three-quarters of

520

00:22:11,239 --> 00:22:08,339

the planet is oceans we can't live in

521

00:22:13,549 --> 00:22:11,249

the oceans enveloping the whole planet

522

00:22:16,249 --> 00:22:13,559

or the at the atmosphere we can't live

523

00:22:16,549 --> 00:22:16,259

in the atmosphere our habitat is just

524

00:22:20,360 --> 00:22:16,559

this

525

00:22:22,159 --> 00:22:20,370

tiny skin on the surface of the land we

526

00:22:24,769 --> 00:22:22,169

can't live below the surface of the land

527

00:22:27,580 --> 00:22:24,779

we live on the surface in the land so if

528

00:22:30,110 --> 00:22:27,590

you think about our perspective that's

529

00:22:32,539 --> 00:22:30,120

our perspective right on the surface of

530

00:22:35,570 --> 00:22:32,549

the earth now if you think in the past

531

00:22:39,169 --> 00:22:35,580

we've only been having power to air

532

00:22:40,430 --> 00:22:39,179

flight for a little over 100 years so we

533

00:22:42,110 --> 00:22:40,440

don't we tend to think that we

534

00:22:45,009 --> 00:22:42,120

understand what's up there but we really

535

00:22:51,310 --> 00:22:45,019

don't now there's a possibility that

536

00:22:56,989 --> 00:22:51,320

there is an entire realm of life that's

537

00:22:59,330 --> 00:22:56,999

too fast too smart and possibly you know

538

00:23:01,850 --> 00:22:59,340

- indistinct - good at disguising itself

539

00:23:03,739 --> 00:23:01,860

for us to perceive and you ask why don't

540

00:23:07,310 --> 00:23:03,749

we see them all the time well we do as

541

00:23:09,409 --> 00:23:07,320

you're aware one of the mysteries of the

542

00:23:11,690 --> 00:23:09,419

UFO phenomena is how many people see

543

00:23:15,320 --> 00:23:11,700

them and people see them all the time

544

00:23:17,930 --> 00:23:15,330

and that was come to me one of the one

545

00:23:20,119 --> 00:23:17,940

of the bits of kind of evidence is sort

546

00:23:22,609 --> 00:23:20,129

of cemented in my mind that this was a

547

00:23:24,739 --> 00:23:22,619

real possibility I said okay let's test

548

00:23:26,960 --> 00:23:24,749

this hypothesis you know if these are

549

00:23:30,200 --> 00:23:26,970

living creatures you know if they're up

550

00:23:31,820 --> 00:23:30,210

in the atmosphere wouldn't people see

551
00:23:34,580 --> 00:23:31,830
them and I thought well what's the most

552
00:23:37,730 --> 00:23:34,590
credible evidence that we can find I

553
00:23:40,190 --> 00:23:37,740
said let's go look at the NASA program

554
00:23:42,109 --> 00:23:40,200
let's see what you know the astronauts

555
00:23:43,399 --> 00:23:42,119
have seen let's go look at what the

556
00:23:47,239 --> 00:23:43,409
shuttle and the space station have

557
00:23:50,539 --> 00:23:47,249
recorded and what I found just boggle my

558
00:23:53,119 --> 00:23:50,549
mind you're probably aware of some of

559
00:23:54,710 --> 00:23:53,129
the the footage that's out there some of

560
00:23:57,739 --> 00:23:54,720
the shuttle footage it's out there

561
00:23:59,899 --> 00:23:57,749
that's been reported as you know UFO

562
00:24:01,879 --> 00:23:59,909
sightings and unexplained objects but if

563
00:24:04,789 --> 00:24:01,889

you look at these things there are just

564

00:24:07,249 --> 00:24:04,799

hours and hours and hours of unexplained

565

00:24:10,489 --> 00:24:07,259

objects moving through the atmosphere

566

00:24:12,680 --> 00:24:10,499

okay snow from the sorry from the

567

00:24:14,419 --> 00:24:12,690

capsule windows we actually have to go

568

00:24:18,680 --> 00:24:14,429

to break here so I'm gonna have to okay

569

00:24:21,710 --> 00:24:18,690

we'll have to come back to this but so

570

00:24:23,779 --> 00:24:21,720

let's just come back to this I'm gonna

571

00:24:25,609 --> 00:24:23,789

ask the question are these things that

572

00:24:29,119 --> 00:24:25,619

they have filmed right outside right

573

00:24:30,140 --> 00:24:29,129

outside the window basically and okay so

574

00:24:31,910 --> 00:24:30,150

hang in there

575

00:24:36,140 --> 00:24:31,920

everyone we're gonna go to break right

576

00:24:37,880 --> 00:24:36,150

now and we are on K GRA radio and this

577

00:24:44,590 --> 00:24:37,890

is Martin Willis my guest is Scott

578

00:24:50,390 --> 00:24:48,050

right guys we just got just over four

579

00:24:50,830 --> 00:24:50,400

minutes in this break got it okay thank

580

00:24:53,470 --> 00:24:50,840

you

581

00:24:56,870 --> 00:24:53,480

so we'll happen we'll go back to that

582

00:24:58,640 --> 00:24:56,880

looking out the window of a capsule or

583

00:25:03,650 --> 00:24:58,650

whatever it is Space Station or all that

584

00:25:08,030 --> 00:25:03,660

yeah it sounds great yeah so anyway you

585

00:25:11,540 --> 00:25:08,040

you actually I didn't ask this in the

586

00:25:13,310 --> 00:25:11,550

the main part of the show but what

587

00:25:18,410 --> 00:25:13,320

actually got you interested in the topic

588

00:25:20,720 --> 00:25:18,420

of UFOs to begin with well my brother

589

00:25:22,760 --> 00:25:20,730

used to read me I don't know if you

590

00:25:25,240 --> 00:25:22,770

remember Frank Edwards stranger than

591

00:25:29,210 --> 00:25:25,250

science during them of those books yeah

592

00:25:31,220 --> 00:25:29,220

he used to read those to a my sister and

593

00:25:34,040 --> 00:25:31,230

my brother and I and scare the pants off

594

00:25:35,330 --> 00:25:34,050

of us and so of course I wanted to find

595

00:25:39,350 --> 00:25:35,340

out you know what's really going on you

596

00:25:41,390 --> 00:25:39,360

know so you can blame Frank Edwards and

597

00:25:42,740 --> 00:25:41,400

then of course I started researching the

598

00:25:46,100 --> 00:25:42,750

you know reading the greats like John

599

00:25:49,660 --> 00:25:46,110

keel and I haven't Sanderson and in fact

600

00:25:55,130 --> 00:25:52,040

postulating that UFOs might be living

601
00:25:56,930 --> 00:25:55,140
creatures so yeah like I said it's not

602
00:25:58,460 --> 00:25:56,940
it's not my original idea my idea is

603
00:26:01,220 --> 00:25:58,470
just to say oh they're kind of similar

604
00:26:02,570 --> 00:26:01,230
to the organisms it's not a stretch of

605
00:26:05,000 --> 00:26:02,580
the imagination to think they might be

606
00:26:06,980 --> 00:26:05,010
very similar to the organisms we find in

607
00:26:09,740 --> 00:26:06,990
the oceans but yeah that's you know the

608
00:26:11,930 --> 00:26:09,750
whole idea the scary story aspect of it

609
00:26:15,590 --> 00:26:11,940
is what got me interested in it and have

610
00:26:19,130 --> 00:26:15,600
you have you explored other topics as

611
00:26:22,720 --> 00:26:19,140
well you've written other books well

612
00:26:25,850 --> 00:26:22,730
yeah yeah my career was actually

613
00:26:28,790 --> 00:26:25,860

producing educational booklets for

614

00:26:30,170 --> 00:26:28,800

different organizations so that's one of

615

00:26:32,000 --> 00:26:30,180

the things that sort of led me into this

616

00:26:34,760 --> 00:26:32,010

area as well I studied I did a lot of

617

00:26:38,480 --> 00:26:34,770

work for conservation agencies where I

618

00:26:40,330 --> 00:26:38,490

studied them living things habitats

619

00:26:42,620 --> 00:26:40,340

Natural Resources how all those things

620

00:26:43,940 --> 00:26:42,630

interacted to create an environment to

621

00:26:46,280 --> 00:26:43,950

make life possible

622

00:26:48,590 --> 00:26:46,290

and so it got me thinking about the

623

00:26:50,480 --> 00:26:48,600

resources in the atmosphere and that's

624

00:26:52,100 --> 00:26:50,490

sort of I thought well gosh you got all

625

00:26:52,850 --> 00:26:52,110

these resources in the atmosphere for a

626
00:26:54,800 --> 00:26:52,860
habitat

627
00:26:56,810 --> 00:26:54,810
I wonder what's there and sure enough

628
00:26:57,980 --> 00:26:56,820
everywhere we look you know we find more

629
00:27:00,500 --> 00:26:57,990
things and that's what's something we

630
00:27:02,210 --> 00:27:00,510
can talk about too is some of the areas

631
00:27:03,680 --> 00:27:02,220
in the atmosphere where we find things

632
00:27:06,290 --> 00:27:03,690
that seem to look like living things

633
00:27:08,630 --> 00:27:06,300
yeah I've heard of I've heard of

634
00:27:11,510 --> 00:27:08,640
scientists say that the atmosphere

635
00:27:14,900 --> 00:27:11,520
around Earth is like the skin of an

636
00:27:16,460 --> 00:27:14,910
apple it's not right it's not in

637
00:27:19,130 --> 00:27:16,470
comparison to the earth we don't have a

638
00:27:22,100 --> 00:27:19,140

lot of it which right and that's a

639

00:27:23,060 --> 00:27:22,110

that's what's it's kind of in fact it's

640

00:27:25,760 --> 00:27:23,070

one of the things that's kind of

641

00:27:29,050 --> 00:27:25,770

important about why we need to study

642

00:27:32,000 --> 00:27:29,060

this is because you know if these things

643

00:27:34,090 --> 00:27:32,010

all I mean we can talk when we get back

644

00:27:36,350 --> 00:27:34,100

to from the break we can talk about

645

00:27:39,130 --> 00:27:36,360

sprites I don't know if you've heard

646

00:27:42,380 --> 00:27:39,140

anything about those yeah yeah yeah

647

00:27:45,400 --> 00:27:42,390

documentary on that before they write

648

00:27:50,780 --> 00:27:45,410

reverse lightning it actually goes up

649

00:27:53,930 --> 00:27:50,790

right yeah well they uh I was one of my

650

00:27:56,360 --> 00:27:53,940

um one of my contacts sent me something

651
00:27:59,180 --> 00:27:56,370
recently about an astronaut who was I

652
00:28:02,120 --> 00:27:59,190
think it was STS shuttle mission 115

653
00:28:03,650 --> 00:28:02,130
where he just was interviewed by someone

654
00:28:05,870 --> 00:28:03,660
that he said that the things that they

655
00:28:07,280 --> 00:28:05,880
saw there look like they were organic

656
00:28:09,830 --> 00:28:07,290
and there was that was interesting

657
00:28:11,300 --> 00:28:09,840
because for an astronaut to say that it

658
00:28:15,140 --> 00:28:11,310
was kind of a big that's a big deal

659
00:28:17,020 --> 00:28:15,150
right yeah yeah there's been a few that

660
00:28:19,640 --> 00:28:17,030
have said some pretty interesting things

661
00:28:21,140 --> 00:28:19,650
yeah and the accordant I don't know

662
00:28:23,240 --> 00:28:21,150
you're familiar with them

663
00:28:26,720 --> 00:28:23,250

Martin Stubbs the fellow that recorded a

664

00:28:28,750 --> 00:28:26,730

lot of this footage no he was a he was a

665

00:28:32,090 --> 00:28:28,760

Canadian public access television

666

00:28:35,330 --> 00:28:32,100

director and in the early days a lot of

667

00:28:38,660 --> 00:28:35,340

the shuttle feeds down from you know the

668

00:28:42,320 --> 00:28:38,670

shuttle they were you know unsecured and

669

00:28:44,150 --> 00:28:42,330

so he was there with the public access

670

00:28:45,920 --> 00:28:44,160

television station in Canada and he

671

00:28:47,480 --> 00:28:45,930

would just record you know just keep

672

00:28:50,630 --> 00:28:47,490

changing the tapes out recording all the

673

00:28:53,270 --> 00:28:50,640

stuff from the shuttle hang on I think

674

00:28:55,490 --> 00:28:53,280

we're about ready to go back great ok

675

00:28:59,220 --> 00:28:55,500

race are we ready to go

676

00:29:05,280 --> 00:28:59,230

indeed all right all right here we go in

677

00:29:07,230 --> 00:29:05,290

five four three two all right welcome

678

00:29:10,140 --> 00:29:07,240

back this is Martin Willis my guest is

679

00:29:13,110 --> 00:29:10,150

Scott Dechaine and Scott we were talking

680

00:29:15,930 --> 00:29:13,120

just before the break about what people

681

00:29:22,650 --> 00:29:15,940

had been filming outside of the window

682

00:29:24,270 --> 00:29:22,660

of NASA spacecraft or actually the space

683

00:29:27,330 --> 00:29:24,280

station as well I believe

684

00:29:29,400 --> 00:29:27,340

but if correct me if I'm wrong but a lot

685

00:29:32,820 --> 00:29:29,410

of the footage are you talking about

686

00:29:35,730 --> 00:29:32,830

this footage that people caught that was

687

00:29:39,390 --> 00:29:35,740

transmitted or that as someone can

688

00:29:42,890 --> 00:29:39,400

actually get the files now oh yeah

689

00:29:45,120 --> 00:29:42,900

there's a whole range of different

690

00:29:48,110 --> 00:29:45,130

pieces of footage that have been caught

691

00:29:51,360 --> 00:29:48,120

over the years of the decades of

692

00:29:53,070 --> 00:29:51,370

exploration as a matter of fact you know

693

00:29:55,380 --> 00:29:53,080

you don't have to look very far to find

694

00:29:58,680 --> 00:29:55,390

this evidence the first time we put a

695

00:30:02,310 --> 00:29:58,690

man into orbit John Glenn he reported

696

00:30:04,590 --> 00:30:02,320

the famous Firefly incident where he saw

697

00:30:07,170 --> 00:30:04,600

these objects these luminous particles

698

00:30:09,120 --> 00:30:07,180

all around his capsule as he moved there

699

00:30:11,550 --> 00:30:09,130

through the you know around the planet

700

00:30:14,370 --> 00:30:11,560

and he saw them near dawn each time as

701
00:30:18,000 --> 00:30:14,380
he came into the dawn area of the

702
00:30:20,070 --> 00:30:18,010
atmosphere and after that you know if

703
00:30:22,920 --> 00:30:20,080
you think about the astronauts orbiting

704
00:30:25,410 --> 00:30:22,930
the planet I mean their first impulse

705
00:30:26,850 --> 00:30:25,420
their first concern is safety to do

706
00:30:27,660 --> 00:30:26,860
everything correct oh they can get back

707
00:30:31,950 --> 00:30:27,670
down safely

708
00:30:33,630 --> 00:30:31,960
so when we had a chance to remain in

709
00:30:35,040 --> 00:30:33,640
orbit for longer times with the space

710
00:30:37,320 --> 00:30:35,050
station and we're during the shuttle

711
00:30:39,150 --> 00:30:37,330
program they had a little more time to

712
00:30:42,060 --> 00:30:39,160
focus on the things that were outside

713
00:30:44,970 --> 00:30:42,070

the craft and when they started looking

714

00:30:46,650 --> 00:30:44,980

outside the craft they actually recorded

715

00:30:48,630 --> 00:30:46,660

some amazing stuff some of it was by

716

00:30:52,670 --> 00:30:48,640

design but some of it was by accident

717

00:30:54,990 --> 00:30:52,680

and they they used some different

718

00:30:57,690 --> 00:30:55,000

cameras that would reveal things that

719

00:31:03,360 --> 00:30:57,700

weren't visible to the naked eye for

720

00:31:07,380 --> 00:31:03,370

example the shuttle mission 39 in its

721

00:31:08,580 --> 00:31:07,390

they call them STS STS 39 in 1991 they

722

00:31:11,610 --> 00:31:08,590

used a

723

00:31:15,029 --> 00:31:11,620

type of camera called cirrus which is an

724

00:31:16,919 --> 00:31:15,039

acronym for a camera that allowed to

725

00:31:18,630 --> 00:31:16,929

look into the infrared spectrum well

726

00:31:21,539 --> 00:31:18,640

when they trailed it when they pointed

727

00:31:24,269 --> 00:31:21,549

it outside they saw this whole swarm of

728

00:31:26,970 --> 00:31:24,279

things moving by the camera they look

729

00:31:30,240 --> 00:31:26,980

like you know pulsing squid which are

730

00:31:33,180 --> 00:31:30,250

one of the types of organisms that are

731

00:31:35,460 --> 00:31:33,190

very prominent in Earth's oceans and

732

00:31:38,130 --> 00:31:35,470

they're perfectly suited for moving in

733

00:31:40,200 --> 00:31:38,140

an fluid environment and they've also

734

00:31:42,840 --> 00:31:40,210

been reported flying so we know that

735

00:31:45,149 --> 00:31:42,850

squid fly and we know they would come

736

00:31:46,769 --> 00:31:45,159

out of the water and we know that some

737

00:31:48,750 --> 00:31:46,779

of them are bigger than we even imagined

738

00:31:49,740 --> 00:31:48,760

now is it a big stretch to think that

739

00:31:51,510 --> 00:31:49,750

some of them move up through the

740

00:31:58,980 --> 00:31:51,520

atmosphere well this particular piece of

741

00:32:01,049 --> 00:31:58,990

footage from sts-48 a pulse and a move

742

00:32:04,409 --> 00:32:01,059

they change direction as they're going

743

00:32:08,430 --> 00:32:04,419

by that's just one example some of the

744

00:32:12,480 --> 00:32:08,440

there's also some very famous examples

745

00:32:14,789 --> 00:32:12,490

there was a gentleman in Canada named

746

00:32:18,090 --> 00:32:14,799

Martin Stubbs who was a public-access

747

00:32:21,360 --> 00:32:18,100

television program manager who used to

748

00:32:22,980 --> 00:32:21,370

record the satellite downlink from the

749

00:32:25,590 --> 00:32:22,990

space shuttle that was before was

750

00:32:27,149 --> 00:32:25,600

secured and he recorded hours and hours

751
00:32:29,490 --> 00:32:27,159
and hours of footage the guy is a hero

752
00:32:31,880 --> 00:32:29,500
because a lot of this stuff would have

753
00:32:34,830 --> 00:32:31,890
just been lost to obscurity otherwise

754
00:32:37,950 --> 00:32:34,840
and one of the most famous things that

755
00:32:41,760 --> 00:32:37,960
he recorded was space shuttle mission 75

756
00:32:43,830 --> 00:32:41,770
STS 75 where there was the so-called

757
00:32:46,320 --> 00:32:43,840
tether incident and that was one thing

758
00:32:49,560 --> 00:32:46,330
when I started looking for it I have

759
00:32:51,720 --> 00:32:49,570
have you seen that video yeah yeah it's

760
00:32:54,960 --> 00:32:51,730
just it's mind-boggling it's a piece of

761
00:32:57,899 --> 00:32:54,970
history and when I first saw that it was

762
00:33:01,710 --> 00:32:57,909
just like it was like looking through a

763
00:33:04,680 --> 00:33:01,720

microscope for the first time and it's

764

00:33:08,519 --> 00:33:04,690

interesting I've shown that to different

765

00:33:09,510 --> 00:33:08,529

scientists and you know people a

766

00:33:11,610 --> 00:33:09,520

scientists aren't actually pretty

767

00:33:14,760 --> 00:33:11,620

skeptical but when you show them this

768

00:33:18,480 --> 00:33:14,770

actual footage taken by the astronaut

769

00:33:20,549 --> 00:33:18,490

that's it a lot of them say they look

770

00:33:21,850 --> 00:33:20,559

like living things I there was a I have

771

00:33:24,610 --> 00:33:21,860

an interview

772

00:33:26,259 --> 00:33:24,620

on my website and I have a website and a

773

00:33:28,360 --> 00:33:26,269

YouTube channel called a living sky

774

00:33:30,220 --> 00:33:28,370

living sky comm the YouTube channel is

775

00:33:33,070 --> 00:33:30,230

the living sky I have an interview with

776

00:33:35,500 --> 00:33:33,080

a scientist who studies freshwater

777

00:33:38,740 --> 00:33:35,510

jellyfish I didn't even know there were

778

00:33:40,750 --> 00:33:38,750

such things but apparently in fresh

779

00:33:42,630 --> 00:33:40,760

bodies of bodies of fresh water around

780

00:33:44,919 --> 00:33:42,640

the United States and around the world

781

00:33:47,919 --> 00:33:44,929

millions of jellyfish will sometimes

782

00:33:49,810 --> 00:33:47,929

appear and I kept asking him and asking

783

00:33:51,370 --> 00:33:49,820

where are they coming from where they

784

00:33:54,909 --> 00:33:51,380

come and he said well some people think

785

00:33:56,980 --> 00:33:54,919

they move through the sky so I said okay

786

00:33:59,019 --> 00:33:56,990

you're saying jellyfish might move

787

00:34:01,509 --> 00:33:59,029

through this guy you want to let take a

788

00:34:03,700 --> 00:34:01,519

look at some of this NASA footage so I

789

00:34:07,200 --> 00:34:03,710

showed it to this jellyfish expert and

790

00:34:11,220 --> 00:34:07,210

he's going they look like jellyfish so

791

00:34:14,020 --> 00:34:11,230

if that's interesting that's it yeah

792

00:34:17,109 --> 00:34:14,030

yeah all right so I I have a question

793

00:34:21,339 --> 00:34:17,119

I'm gonna just came to mind here what

794

00:34:22,510 --> 00:34:21,349

happens when say well first of all we

795

00:34:25,629 --> 00:34:22,520

haven't talked about the size of these

796

00:34:26,919 --> 00:34:25,639

creatures if they are creatures but they

797

00:34:31,950 --> 00:34:26,929

must be massive

798

00:34:36,389 --> 00:34:31,960

if so okay so what happens when one dies

799

00:34:39,899 --> 00:34:36,399

does its carcass just float in space and

800

00:34:43,000 --> 00:34:39,909

disappear or does it ever crash land

801
00:34:44,859 --> 00:34:43,010
that's a great question well the

802
00:34:46,980 --> 00:34:44,869
interesting thing first let's go we

803
00:34:50,349 --> 00:34:46,990
talked about the atmosphere a little bit

804
00:34:51,700 --> 00:34:50,359
let's go and then and look at the UFO

805
00:34:53,290 --> 00:34:51,710
mystery and then we'll go back I'm going

806
00:34:58,359 --> 00:34:53,300
to circle back to the whole idea of the

807
00:35:00,609 --> 00:34:58,369
invertebrates okay um we know that

808
00:35:03,010 --> 00:35:00,619
there's massive amounts of water moving

809
00:35:05,020 --> 00:35:03,020
through the atmosphere somebody the jet

810
00:35:06,910 --> 00:35:05,030
stream somebody calculated there's more

811
00:35:09,190 --> 00:35:06,920
water moving through the sky in the jet

812
00:35:11,800 --> 00:35:09,200
stream stream then there is moving in

813
00:35:13,240 --> 00:35:11,810

the Amazon River if somebody is a

814

00:35:14,760 --> 00:35:13,250

calculated there's more water moving

815

00:35:17,440 --> 00:35:14,770

through the air over the United States

816

00:35:19,660 --> 00:35:17,450

then in all the rivers combined so

817

00:35:23,200 --> 00:35:19,670

there's a huge amount of water up there

818

00:35:24,700 --> 00:35:23,210

and the big question about UFO is is one

819

00:35:27,880 --> 00:35:24,710

of the things that mist is mysterious if

820

00:35:30,000 --> 00:35:27,890

people see so many of them there's so

821

00:35:32,500 --> 00:35:30,010

many different kinds that people report

822

00:35:33,940 --> 00:35:32,510

but yet they keep seeing them again and

823

00:35:35,410 --> 00:35:33,950

again and again and they see them in

824

00:35:35,710 --> 00:35:35,420

large numbers they seem in a lot of

825

00:35:42,220 --> 00:35:35,720

different

826

00:35:45,150 --> 00:35:42,230

UFOs that people seem to report most are

827

00:35:49,000 --> 00:35:45,160

the disk shape or the saucer shape and

828

00:35:51,460 --> 00:35:49,010

the cigar shape or the rocket shape and

829

00:35:54,220 --> 00:35:51,470

those parallel is two of the most

830

00:35:56,920 --> 00:35:54,230

successful types of organisms in the

831

00:35:59,140 --> 00:35:56,930

oceans the jellyfish and the squid and

832

00:36:01,870 --> 00:35:59,150

both of those are perfectly suited for

833

00:36:04,900 --> 00:36:01,880

living in a fluid environment jellyfish

834

00:36:07,150 --> 00:36:04,910

is made up mostly of the environment in

835

00:36:09,940 --> 00:36:07,160

which it lives so it in the water it's

836

00:36:11,680 --> 00:36:09,950

mostly water it's just very little

837

00:36:14,800 --> 00:36:11,690

organic matter in addition to the water

838

00:36:17,890 --> 00:36:14,810

the squid is like a perfect living jet

839

00:36:20,020 --> 00:36:17,900

it can control its own buoyancy it's a

840

00:36:24,490 --> 00:36:20,030

great predator and it can camouflage

841

00:36:26,890 --> 00:36:24,500

itself and not only is is bioluminescent

842

00:36:28,420 --> 00:36:26,900

but it can camouflage itself even to the

843

00:36:30,280 --> 00:36:28,430

extent that it can make one side of

844

00:36:33,010 --> 00:36:30,290

itself one color and the other side

845

00:36:37,120 --> 00:36:33,020

another color now an invertebrate isn't

846

00:36:39,880 --> 00:36:37,130

limited by its skeleton so they do grow

847

00:36:42,060 --> 00:36:39,890

to huge sizes we know in the ocean that

848

00:36:44,829 --> 00:36:42,070

some of the largest organisms are

849

00:36:46,839 --> 00:36:44,839

jellyfish and squid in fact have been

850

00:36:48,880 --> 00:36:46,849

some reports of monster jellyfish and

851
00:36:53,589 --> 00:36:48,890
one in the Indian Ocean almost swallowed

852
00:36:56,230 --> 00:36:53,599
a steamer in a steamer there was a storm

853
00:36:59,410 --> 00:36:56,240
and the bow of the ship went under the

854
00:37:02,230 --> 00:36:59,420
water when it came up it was fouled and

855
00:37:05,800 --> 00:37:02,240
a jellyfish they said the the slime was

856
00:37:07,630 --> 00:37:05,810
6 feet deep on the on the on the ship on

857
00:37:09,670 --> 00:37:07,640
the deck of the ship and they had to

858
00:37:11,530 --> 00:37:09,680
call another ship to spray boiling water

859
00:37:14,079 --> 00:37:11,540
on it to get it off one good man died

860
00:37:17,050 --> 00:37:14,089
one sailor died so we know that there's

861
00:37:18,790 --> 00:37:17,060
huge jellyfish in the ocean now if we

862
00:37:21,130 --> 00:37:18,800
look in the atmosphere and again the

863
00:37:22,870 --> 00:37:21,140

thing about this is it's not I'm not

864

00:37:25,240 --> 00:37:22,880

saying this is the case I'm just saying

865

00:37:28,720 --> 00:37:25,250

this is a hypothesis this is something

866

00:37:30,550 --> 00:37:28,730

that is worthy of further study if we

867

00:37:32,320 --> 00:37:30,560

think that there are organisms moving

868

00:37:35,680 --> 00:37:32,330

through the atmosphere like jellyfish

869

00:37:39,670 --> 00:37:35,690

they may be composed mostly of water and

870

00:37:41,500 --> 00:37:39,680

water vapor so when they do die it's

871

00:37:43,540 --> 00:37:41,510

like a jellyfish on the beach you know

872

00:37:46,180 --> 00:37:43,550

when they come on the beach you can

873

00:37:48,130 --> 00:37:46,190

watch and almost as you watch they they

874

00:37:49,420 --> 00:37:48,140

sublimate the water just evaporates

875

00:37:52,780 --> 00:37:49,430

until there's nothing there

876

00:37:55,180 --> 00:37:52,790

so there's a possibility that some of

877

00:37:57,460 --> 00:37:55,190

these organisms as they die and

878

00:38:00,070 --> 00:37:57,470

decompose they may just either sublimate

879

00:38:02,800 --> 00:38:00,080

turn back into vapor or perhaps they

880

00:38:05,110 --> 00:38:02,810

actually deposit you know rain or water

881

00:38:08,260 --> 00:38:05,120

vapor at the lower levels of the

882

00:38:12,340 --> 00:38:08,270

atmosphere in the ocean we talk they

883

00:38:14,740 --> 00:38:12,350

talk about a constant snow falling of

884

00:38:17,200 --> 00:38:14,750

decayed matter at the bottom of the

885

00:38:19,570 --> 00:38:17,210

ocean is organisms on the higher level

886

00:38:20,710 --> 00:38:19,580

decay and eventually wax its way down to

887

00:38:23,200 --> 00:38:20,720

the very bottom of the ocean

888

00:38:26,280 --> 00:38:23,210

there's snow now we're living at the

889

00:38:28,740 --> 00:38:26,290

bottom of an ocean the ocean of air

890

00:38:31,300 --> 00:38:28,750

who's to say what's going on up there

891

00:38:34,870 --> 00:38:31,310

doesn't affect us down here and affect

892

00:38:36,640 --> 00:38:34,880

our weather and our climate so but only

893

00:38:41,350 --> 00:38:36,650

further studies gonna prove if that's

894

00:38:43,180 --> 00:38:41,360

true or not yeah yeah and you would also

895

00:38:48,220 --> 00:38:43,190

think that there are changes in the

896

00:38:51,100 --> 00:38:48,230

atmosphere you know the ozone for one it

897

00:38:53,740 --> 00:38:51,110

seems like if there were actually living

898

00:38:55,840 --> 00:38:53,750

things up there that we haven't detected

899

00:38:58,530 --> 00:38:55,850

or haven't seen or science at least

900

00:39:02,590 --> 00:38:58,540

hasn't seen I mean there has been no

901
00:39:05,200 --> 00:39:02,600
actual like science on this has there as

902
00:39:08,140 --> 00:39:05,210
far as you know well that's the question

903
00:39:10,030 --> 00:39:08,150
I I don't think there is and and it's a

904
00:39:12,780 --> 00:39:10,040
puzzle to me I've talked a lot of

905
00:39:15,160 --> 00:39:12,790
different scientists and I've tried to

906
00:39:16,930 --> 00:39:15,170
spark an interest in further study of

907
00:39:19,330 --> 00:39:16,940
this and the FATA fact one of my goals

908
00:39:22,030 --> 00:39:19,340
is to try and get younger people who

909
00:39:24,430 --> 00:39:22,040
might be interested in the mystery of

910
00:39:26,860 --> 00:39:24,440
UFOs and in science to look at this as a

911
00:39:29,560 --> 00:39:26,870
possibility because with the technology

912
00:39:32,770 --> 00:39:29,570
we have now I predict it's just a matter

913
00:39:34,630 --> 00:39:32,780

of time until we use the right tools and

914

00:39:37,950 --> 00:39:34,640

look up there we're gonna find living

915

00:39:40,420 --> 00:39:37,960

things there are so many possible

916

00:39:43,060 --> 00:39:40,430

lifelike phenomena at almost every level

917

00:39:47,050 --> 00:39:43,070

of the atmosphere where we look now

918

00:39:48,790 --> 00:39:47,060

there is a science and this is a it's

919

00:39:52,570 --> 00:39:48,800

kind of easy to label things there is a

920

00:39:54,730 --> 00:39:52,580

science called Aero biology and you know

921

00:39:57,070 --> 00:39:54,740

we have marine biology and there's Aero

922

00:39:59,080 --> 00:39:57,080

biology an era biology was initially

923

00:40:01,600 --> 00:39:59,090

formed to study the spread of diseases

924

00:40:03,220 --> 00:40:01,610

in hospitals and you know germs move

925

00:40:07,030 --> 00:40:03,230

through the different wards

926
00:40:08,170 --> 00:40:07,040
and now it studies the spread of pests

927
00:40:10,450 --> 00:40:08,180
and insects

928
00:40:12,130 --> 00:40:10,460
you know spores moving through the

929
00:40:14,920 --> 00:40:12,140
atmosphere rising up moving and

930
00:40:17,170 --> 00:40:14,930
infecting crops and stuff but as far as

931
00:40:21,130 --> 00:40:17,180
I can tell nobody is studying the

932
00:40:24,040 --> 00:40:21,140
possibility of megafauna you know giant

933
00:40:25,930 --> 00:40:24,050
organisms moving through the atmosphere

934
00:40:28,990 --> 00:40:25,940
now one of the things that you mentioned

935
00:40:30,790 --> 00:40:29,000
Martin before was the size of these

936
00:40:33,370 --> 00:40:30,800
organisms the potential size of these

937
00:40:35,980 --> 00:40:33,380
organisms jellyfish have an amazingly

938
00:40:39,430 --> 00:40:35,990

complex life cycle they reproduce

939

00:40:44,109 --> 00:40:39,440

sexually and asexually they can have in

940

00:40:47,890 --> 00:40:44,119

tiny eggs and tiny of larval forms and

941

00:40:49,859 --> 00:40:47,900

then when they can they can reproduce a

942

00:40:52,270 --> 00:40:49,869

stack so they can keep budding off

943

00:40:54,970 --> 00:40:52,280

Medusa which are the traditional bell

944

00:40:57,550 --> 00:40:54,980

shaped jellyfish that we think of and

945

00:40:59,230 --> 00:40:57,560

when those but off they mature and

946

00:41:01,750 --> 00:40:59,240

become sexually mature but they can keep

947

00:41:03,640 --> 00:41:01,760

growing and growing and growing and it's

948

00:41:06,579 --> 00:41:03,650

kind of similar to what we see with a

949

00:41:10,390 --> 00:41:06,589

lot of UFO reports we see many different

950

00:41:12,960 --> 00:41:10,400

shapes in many different sizes now one

951
00:41:15,490 --> 00:41:12,970
of the other area that really kind of

952
00:41:18,130 --> 00:41:15,500
you know forces you know convinced me I

953
00:41:21,010 --> 00:41:18,140
was going down the right path here was

954
00:41:22,540 --> 00:41:21,020
when we look at habitats when we're

955
00:41:24,730 --> 00:41:22,550
looking for living things we look at

956
00:41:28,510 --> 00:41:24,740
where habitats overlap we call it the

957
00:41:30,130 --> 00:41:28,520
edge effect so for example you know an

958
00:41:32,380 --> 00:41:30,140
organism might live at the edge of a

959
00:41:33,790 --> 00:41:32,390
forest and the edge of a field or the

960
00:41:35,200 --> 00:41:33,800
edge of the ocean and the edge of the

961
00:41:36,819 --> 00:41:35,210
shore well that's where we find a lot of

962
00:41:38,950 --> 00:41:36,829
living things because they can access

963
00:41:41,200 --> 00:41:38,960

the resources from both of those

964

00:41:43,960 --> 00:41:41,210

habitats they go back and forth and get

965

00:41:45,339 --> 00:41:43,970

both of those sets of resources so I

966

00:41:49,390 --> 00:41:45,349

said well let's look in the sky and

967

00:41:51,309 --> 00:41:49,400

where's an edge in the sky and I said

968

00:41:53,650 --> 00:41:51,319

what about the tops of thunderstorms

969

00:41:56,050 --> 00:41:53,660

because at any given moment there are

970

00:41:59,829 --> 00:41:56,060

200 massive thunderstorms moving around

971

00:42:02,079 --> 00:41:59,839

the planet all the time and I said what

972

00:42:05,740 --> 00:42:02,089

are they finding above thunderstorms

973

00:42:07,300 --> 00:42:05,750

well in the past 30 years we've just

974

00:42:09,000 --> 00:42:07,310

started looking above the tops of

975

00:42:12,099 --> 00:42:09,010

thunderstorms and we'd found these

976
00:42:16,390 --> 00:42:12,109
phenomena which scientists call sprites

977
00:42:17,109 --> 00:42:16,400
and initially they thought that these

978
00:42:18,910 --> 00:42:17,119
were just

979
00:42:21,190 --> 00:42:18,920
electrical phenomena they thought that

980
00:42:23,319 --> 00:42:21,200
they were a kind of lightning but as we

981
00:42:24,700 --> 00:42:23,329
look further I mean when scientists

982
00:42:27,099 --> 00:42:24,710
first found these they started saying ah

983
00:42:29,230 --> 00:42:27,109
they look like giant jellyfish they and

984
00:42:30,910 --> 00:42:29,240
they they use the term it's a new aerial

985
00:42:34,059 --> 00:42:30,920
best GRE it's a whole set of new

986
00:42:36,700 --> 00:42:34,069
organisms that we've seen up there but

987
00:42:39,130 --> 00:42:36,710
the problem that a lot of people run up

988
00:42:43,690 --> 00:42:39,140

against is these things are you know 45

989

00:42:45,849 --> 00:42:43,700

to 100 miles tall and they live above

990

00:42:47,109 --> 00:42:45,859

the tops of thunderstorms if you see

991

00:42:49,359 --> 00:42:47,119

pictures of these things you'll see

992

00:42:50,769 --> 00:42:49,369

little thunderstorms along the bottom

993

00:42:52,779 --> 00:42:50,779

and you know how big thunderstorms are

994

00:42:57,059 --> 00:42:52,789

and here are the sprites towering above

995

00:42:59,589 --> 00:42:57,069

them so the question is you know are

996

00:43:02,279 --> 00:42:59,599

those actually living things now they

997

00:43:05,470 --> 00:43:02,289

sins have found that the same sprites

998

00:43:07,720 --> 00:43:05,480

persist they we perceive them from 30

999

00:43:10,509 --> 00:43:07,730

minutes so it doesn't sound like

1000

00:43:13,900 --> 00:43:10,519

strictly an electrical phenomena we

1001
00:43:16,150 --> 00:43:13,910
found that they produce waves

1002
00:43:18,309 --> 00:43:16,160
gravitational waves and against

1003
00:43:20,529 --> 00:43:18,319
scientists have said it's like this

1004
00:43:23,460 --> 00:43:20,539
something enormous swimming in the

1005
00:43:26,620 --> 00:43:23,470
atmosphere and they've also recorded

1006
00:43:29,170 --> 00:43:26,630
ultrasound you know in trieste sorry

1007
00:43:31,059 --> 00:43:29,180
infrasound huge waves again as if

1008
00:43:35,979 --> 00:43:31,069
something enormous was swimming in the

1009
00:43:38,440 --> 00:43:35,989
atmosphere now the more we look up there

1010
00:43:40,210 --> 00:43:38,450
the more of these sprites we find as a

1011
00:43:43,960 --> 00:43:40,220
matter of fact you know one of the last

1012
00:43:45,279 --> 00:43:43,970
shuttle missions shuttle Columbia the

1013
00:43:47,739 --> 00:43:45,289

one the one that crashed the woman at

1014

00:43:49,989 --> 00:43:47,749

one of the film at their last missions

1015

00:43:51,489 --> 00:43:49,999

was studying sprites in the atmosphere

1016

00:43:54,670 --> 00:43:51,499

and they found that sprites are much

1017

00:43:56,049 --> 00:43:54,680

more numerous than they first then

1018

00:43:58,239 --> 00:43:56,059

anybody first thought so

1019

00:43:59,979 --> 00:43:58,249

we have no idea how many of these things

1020

00:44:02,739 --> 00:43:59,989

are up there and the problem that we

1021

00:44:05,259 --> 00:44:02,749

have is we're small and they're huge how

1022

00:44:07,150 --> 00:44:05,269

would we even begin to get a look at

1023

00:44:08,859 --> 00:44:07,160

those so that we could have to change

1024

00:44:11,140 --> 00:44:08,869

our perspective to truly study that

1025

00:44:13,979 --> 00:44:11,150

phenomena to see if you know they are

1026

00:44:18,479 --> 00:44:13,989

living things up there now what about

1027

00:44:21,690 --> 00:44:18,489

what about say satellites and other

1028

00:44:24,009 --> 00:44:21,700

observational equipment I know we've had

1029

00:44:26,650 --> 00:44:24,019

atmospheric satellites up there studying

1030

00:44:29,589 --> 00:44:26,660

you know the atmosphere it seems like

1031

00:44:30,520 --> 00:44:29,599

there would what I'm getting at it seems

1032

00:44:32,980 --> 00:44:30,530

like there's

1033

00:44:35,460 --> 00:44:32,990

there's not really detection and I

1034

00:44:37,900 --> 00:44:35,470

wonder what you have to say about that

1035

00:44:39,280 --> 00:44:37,910

actually there is a lot of detection and

1036

00:44:41,320 --> 00:44:39,290

I think it's mostly it's not so much a

1037

00:44:44,590 --> 00:44:41,330

matter of detection but it's a matter of

1038

00:44:46,750 --> 00:44:44,600

attitude and nobody's nobody's actually

1039

00:44:50,650 --> 00:44:46,760

looking at it you know looking for

1040

00:44:53,200 --> 00:44:50,660

life-forms we've seen repeatedly from

1041

00:44:56,190 --> 00:44:53,210

the International Space Station we've

1042

00:44:58,990 --> 00:44:56,200

seen a lot of different objects recorded

1043

00:45:00,690 --> 00:44:59,000

around the space station but what I

1044

00:45:03,910 --> 00:45:00,700

would love to see is someone actually

1045

00:45:06,400 --> 00:45:03,920

putting a camera outside to look for

1046

00:45:08,230 --> 00:45:06,410

living things that might pass by the

1047

00:45:09,940 --> 00:45:08,240

state station no matter as a matter of

1048

00:45:12,700 --> 00:45:09,950

fact I think it would be very simple to

1049

00:45:15,700 --> 00:45:12,710

set up some kind of collection device to

1050

00:45:18,910 --> 00:45:15,710

actually you know record and it's

1051
00:45:21,550 --> 00:45:18,920
actually sort of Corral and recorded in

1052
00:45:22,840 --> 00:45:21,560
detail any kind of object that might

1053
00:45:24,760 --> 00:45:22,850
move by there I mean there's some

1054
00:45:26,980 --> 00:45:24,770
fascinating footage there dozens and

1055
00:45:30,010 --> 00:45:26,990
dozens of pieces of footage of objects

1056
00:45:31,210 --> 00:45:30,020
moving by the space station but one of

1057
00:45:32,770 --> 00:45:31,220
the problems is you know when you're

1058
00:45:35,890 --> 00:45:32,780
looking out the window something moves

1059
00:45:38,020 --> 00:45:35,900
by quickly it's so you only get a few

1060
00:45:39,850 --> 00:45:38,030
seconds to record something some of the

1061
00:45:43,150 --> 00:45:39,860
best footage is when the the shuttles

1062
00:45:46,450 --> 00:45:43,160
were approaching the space station they

1063
00:45:48,070 --> 00:45:46,460

would actually see objects moving around

1064

00:45:50,350 --> 00:45:48,080

the space station like hovering around

1065

00:45:54,520 --> 00:45:50,360

it in a matter of fact there's there's

1066

00:45:56,230 --> 00:45:54,530

one amazing clip where the shuttle is

1067

00:45:58,480 --> 00:45:56,240

approaching the space station to dock

1068

00:46:00,370 --> 00:45:58,490

and you're looking at and you're looking

1069

00:46:03,190 --> 00:46:00,380

at all of the different objects moving

1070

00:46:04,990 --> 00:46:03,200

around it and then you'll notice that

1071

00:46:07,090 --> 00:46:05,000

there's one huge one that's just kind of

1072

00:46:09,010 --> 00:46:07,100

moving along the side of the space

1073

00:46:14,140 --> 00:46:09,020

station like it's you know looking in

1074

00:46:17,890 --> 00:46:14,150

the window yeah I predict yeah like I

1075

00:46:19,960 --> 00:46:17,900

said if you look at some of the some of

1076

00:46:21,040 --> 00:46:19,970

the amazing stuff that's going on now is

1077

00:46:23,230 --> 00:46:21,050

through some of the infrared

1078

00:46:24,430 --> 00:46:23,240

night-vision footage that's gone out

1079

00:46:27,670 --> 00:46:24,440

there have you looked at any of those oh

1080

00:46:31,090 --> 00:46:27,680

yeah yeah and I know that we only we see

1081

00:46:33,090 --> 00:46:31,100

in a very small spectrum of I don't know

1082

00:46:36,310 --> 00:46:33,100

what the percentages are but I know that

1083

00:46:38,800 --> 00:46:36,320

we only see a certain amount with our

1084

00:46:40,330 --> 00:46:38,810

eyes basically and there's some way more

1085

00:46:42,190 --> 00:46:40,340

that can be going on that we can't see

1086

00:46:43,330 --> 00:46:42,200

so when you're talking about infrared

1087

00:46:44,860 --> 00:46:43,340

you know that's

1088

00:46:47,800 --> 00:46:44,870

little more the spectrum or a different

1089

00:46:49,540 --> 00:46:47,810

one part of it right so you know there's

1090

00:46:51,760 --> 00:46:49,550

the detection I mean people are seeing

1091

00:46:54,810 --> 00:46:51,770

if you're looking and you couldn't look

1092

00:46:56,890 --> 00:46:54,820

into your eyes grow tired and all the

1093

00:46:58,270 --> 00:46:56,900

objects that people have recorded with

1094

00:46:59,770 --> 00:46:58,280

some of the night-vision cameras that

1095

00:47:04,150 --> 00:46:59,780

are out there it's a there's an amazing

1096

00:47:06,100 --> 00:47:04,160

amount of stuff also people have

1097

00:47:09,220 --> 00:47:06,110

recorded sprites whenever people look at

1098

00:47:11,140 --> 00:47:09,230

them look for them they find them above

1099

00:47:14,020 --> 00:47:11,150

the Thunder tops of thunderstorms I mean

1100

00:47:16,840 --> 00:47:14,030

they can be perceived they can be

1101
00:47:20,740 --> 00:47:16,850
detected and they can be photographed

1102
00:47:22,630 --> 00:47:20,750
but nobody's really hunting them like a

1103
00:47:23,860 --> 00:47:22,640
biologist trying to say well is this a

1104
00:47:25,420 --> 00:47:23,870
living thing or looking at him let's

1105
00:47:27,990 --> 00:47:25,430
lightning is an atmospheric phenomena

1106
00:47:30,640 --> 00:47:28,000
now I've talked to some scientists who

1107
00:47:32,140 --> 00:47:30,650
studied sprite and it's interesting cuz

1108
00:47:34,330 --> 00:47:32,150
there's a divide some of them go hi

1109
00:47:37,870 --> 00:47:34,340
you're nuts you're out of your mind and

1110
00:47:40,780 --> 00:47:37,880
some of them go hmm that's pretty

1111
00:47:42,100 --> 00:47:40,790
interesting so yeah one of the things I

1112
00:47:46,500 --> 00:47:42,110
wanted to talk to you about because I've

1113
00:47:49,000 --> 00:47:46,510

heard the images that they have filmed

1114

00:47:51,070 --> 00:47:49,010

there was one particular scene and you

1115

00:47:53,950 --> 00:47:51,080

probably have seen it where it looks

1116

00:47:56,830 --> 00:47:53,960

almost like a donut going by the window

1117

00:47:58,810 --> 00:47:56,840

almost like it's alive all right yeah

1118

00:48:02,290 --> 00:47:58,820

you know the one I'm talking about but

1119

00:48:04,780 --> 00:48:02,300

that's the supposed answer was that that

1120

00:48:07,690 --> 00:48:04,790

was dust what do you have to say about

1121

00:48:10,140 --> 00:48:07,700

about that well I think people are quick

1122

00:48:12,340 --> 00:48:10,150

to rush to an answer it's almost as if

1123

00:48:14,950 --> 00:48:12,350

we feel comfortable when we have an

1124

00:48:16,780 --> 00:48:14,960

answer to something and this is where I

1125

00:48:19,360 --> 00:48:16,790

think it's important I think a lot of

1126
00:48:21,760 --> 00:48:19,370
times in the study of UFOs people get

1127
00:48:24,640 --> 00:48:21,770
caught up and arguing about what

1128
00:48:26,710 --> 00:48:24,650
happened and looking at things and

1129
00:48:28,120 --> 00:48:26,720
saying you know what was it this was a

1130
00:48:30,430 --> 00:48:28,130
dad and arguing about possible

1131
00:48:33,340 --> 00:48:30,440
explanations and that's why I think it's

1132
00:48:35,830 --> 00:48:33,350
important that we moved forward with the

1133
00:48:38,290 --> 00:48:35,840
hypothesis and test the hypothesis let's

1134
00:48:40,690 --> 00:48:38,300
take some of the best equipment that we

1135
00:48:43,900 --> 00:48:40,700
have and go to some of these likely

1136
00:48:45,580 --> 00:48:43,910
habitats in the atmosphere and looking

1137
00:48:48,880 --> 00:48:45,590
them like hunters like biologists and

1138
00:48:50,290 --> 00:48:48,890

say okay let's see if we can record

1139

00:48:52,420 --> 00:48:50,300

these things let's see if we can get a

1140

00:48:54,700 --> 00:48:52,430

really close look not some blurry thing

1141

00:48:56,200 --> 00:48:54,710

from afar we're you know caught somebody

1142

00:48:59,349 --> 00:48:56,210

by surprise

1143

00:49:02,380 --> 00:48:59,359

I mean there are numerous unexplained

1144

00:49:05,490 --> 00:49:02,390

luminous atmospheric phenomena that

1145

00:49:07,540 --> 00:49:05,500

occur regularly around the planet and

1146

00:49:10,630 --> 00:49:07,550

some of them are so regular they have

1147

00:49:12,520 --> 00:49:10,640

festivals and parties with them but

1148

00:49:16,120 --> 00:49:12,530

nobody's looking at them like a

1149

00:49:17,770 --> 00:49:16,130

biologist so you know if we go there and

1150

00:49:19,540 --> 00:49:17,780

instead of argue about something in the

1151

00:49:22,810 --> 00:49:19,550

past let's see if we can get some

1152

00:49:24,270 --> 00:49:22,820

irrefutable evidence and see if we can

1153

00:49:28,630 --> 00:49:24,280

possibly explain some of these things

1154

00:49:31,420 --> 00:49:28,640

okay one scientist okay now one

1155

00:49:34,150 --> 00:49:31,430

scientist William Corliss was a former

1156

00:49:36,310 --> 00:49:34,160

NASA engineer who did a great series of

1157

00:49:39,010 --> 00:49:36,320

books about unexplained phenomena and I

1158

00:49:42,370 --> 00:49:39,020

talked to him about this possibility and

1159

00:49:46,990 --> 00:49:42,380

he came up with he said you'll need a

1160

00:49:49,060 --> 00:49:47,000

body yes yes I've been told things like

1161

00:49:52,480 --> 00:49:49,070

that before that's right for evidence

1162

00:49:54,339 --> 00:49:52,490

all right we're gonna be going to to a

1163

00:49:56,349 --> 00:49:54,349

break in a few minutes so just okay I

1164

00:50:00,010 --> 00:49:56,359

want to tell you this story first of all

1165

00:50:02,320 --> 00:50:00,020

I want to tell the people in chat if

1166

00:50:04,000 --> 00:50:02,330

anyone has a question there for our

1167

00:50:07,050 --> 00:50:04,010

guests during the chat I will read them

1168

00:50:09,700 --> 00:50:07,060

the questions off while we go on break

1169

00:50:12,700 --> 00:50:09,710

something I just thought of should have

1170

00:50:14,440 --> 00:50:12,710

tried a long time ago but because I

1171

00:50:16,750 --> 00:50:14,450

can't watch the chat during the show

1172

00:50:18,190 --> 00:50:16,760

when I'm doing the show with you and so

1173

00:50:21,040 --> 00:50:18,200

this will give the people an opportunity

1174

00:50:23,200 --> 00:50:21,050

now to pose some questions for you I

1175

00:50:26,800 --> 00:50:23,210

want to talk we have three minutes I

1176
00:50:30,400 --> 00:50:26,810
want to tell you of a longtime supporter

1177
00:50:32,410 --> 00:50:30,410
of the show very early on he listens to

1178
00:50:35,109 --> 00:50:32,420
every show he wanted me to tell you

1179
00:50:39,280 --> 00:50:35,119
about his UFO sighting that he had back

1180
00:50:41,320 --> 00:50:39,290
in 1990 he just couldn't believe his

1181
00:50:42,640 --> 00:50:41,330
eyes because it looked like I don't know

1182
00:50:44,740 --> 00:50:42,650
what you want to call my herd of

1183
00:50:47,890 --> 00:50:44,750
dolphins it looked like dolphins

1184
00:50:50,320 --> 00:50:47,900
swimming a whole bunch of how and that's

1185
00:50:53,200 --> 00:50:50,330
pretty bizarre well that's one thing

1186
00:50:54,670 --> 00:50:53,210
that is important about trying to

1187
00:50:57,670 --> 00:50:54,680
explain this is because people see these

1188
00:50:59,770 --> 00:50:57,680

things and you're aware this is it it

1189

00:51:01,630 --> 00:50:59,780

baffles people and they get confused and

1190

00:51:03,099 --> 00:51:01,640

some people and they really want an

1191

00:51:06,160 --> 00:51:03,109

answer and sometimes people go down

1192

00:51:07,599 --> 00:51:06,170

these avenues where they don't find and

1193

00:51:09,099 --> 00:51:07,609

they think they're crazy they don't find

1194

00:51:10,090 --> 00:51:09,109

that some kind of peace with what

1195

00:51:13,570 --> 00:51:10,100

they've seen

1196

00:51:16,450 --> 00:51:13,580

and if we can somehow prove that these

1197

00:51:18,270 --> 00:51:16,460

things are natural not they're amazing

1198

00:51:20,890 --> 00:51:18,280

but natural they're amazing nonetheless

1199

00:51:23,050 --> 00:51:20,900

then it maybe will let people feel like

1200

00:51:24,250 --> 00:51:23,060

you know they're not out of their minds

1201
00:51:26,080 --> 00:51:24,260
and they've seen something that's you

1202
00:51:27,250 --> 00:51:26,090
know totally natural but that is one of

1203
00:51:29,590 --> 00:51:27,260
the things that a lot of people report

1204
00:51:30,850 --> 00:51:29,600
is these groups and that's in fact one

1205
00:51:32,410 --> 00:51:30,860
of the things they have in common with

1206
00:51:34,120 --> 00:51:32,420
marine and vertebrates you know they

1207
00:51:35,890 --> 00:51:34,130
have group behavior they move together

1208
00:51:38,440 --> 00:51:35,900
and they interact with each other that's

1209
00:51:40,570 --> 00:51:38,450
reported and it's recorded in a lot of

1210
00:51:43,180 --> 00:51:40,580
different a lot of evidence going back

1211
00:51:44,710 --> 00:51:43,190
to Kenneth Arnold you know right the

1212
00:51:48,100 --> 00:51:44,720
grouping of nine or whatever it was

1213
00:51:50,110 --> 00:51:48,110

right number how many so all right well

1214

00:51:51,220 --> 00:51:50,120

one thing I did would have mentioned to

1215

00:51:52,840 --> 00:51:51,230

you you mentioned the two different

1216

00:51:55,120 --> 00:51:52,850

types of shapes of people saying well

1217

00:52:00,100 --> 00:51:55,130

now it seems one of the majority of

1218

00:52:01,120 --> 00:52:00,110

sightings are triangle UFOs right you

1219

00:52:02,800 --> 00:52:01,130

know the only thing I could think of

1220

00:52:05,740 --> 00:52:02,810

that it's like am an array or stingray

1221

00:52:08,410 --> 00:52:05,750

or something well I kept biologic yeah

1222

00:52:09,900 --> 00:52:08,420

that that puzzled me too until I started

1223

00:52:13,000 --> 00:52:09,910

I actually read an article about them

1224

00:52:14,950 --> 00:52:13,010

the bioluminescent organs in squid and

1225

00:52:18,670 --> 00:52:14,960

that's one of the things that marine

1226
00:52:20,620 --> 00:52:18,680
invertebrates have their bioluminescent

1227
00:52:22,780 --> 00:52:20,630
they produced their own light in many

1228
00:52:25,120 --> 00:52:22,790
different ways in fact I read an

1229
00:52:27,730 --> 00:52:25,130
estimate that 90% of marine life is

1230
00:52:29,890 --> 00:52:27,740
bioluminescent and I in this particular

1231
00:52:31,600 --> 00:52:29,900
study of squid they showed that in the

1232
00:52:34,810 --> 00:52:31,610
front of a lot of the squid

1233
00:52:37,150 --> 00:52:34,820
there was a triangle-shaped light

1234
00:52:39,640 --> 00:52:37,160
producing organ yeah it had one to three

1235
00:52:41,710 --> 00:52:39,650
different light producing organs so I

1236
00:52:44,200 --> 00:52:41,720
don't know that's not that's not proof

1237
00:52:47,890 --> 00:52:44,210
but it's possibility than these things

1238
00:52:49,060 --> 00:52:47,900

ever and produce light it's just you

1239

00:52:51,790 --> 00:52:49,070

know it's a possibility cuz that

1240

00:52:54,160 --> 00:52:51,800

triangle shape was puzzling me too well

1241

00:52:56,710 --> 00:52:54,170

the thing about the light you mentioned

1242

00:52:59,650 --> 00:52:56,720

that and a lot of people have talked

1243

00:53:02,200 --> 00:52:59,660

about a light that they see on a UFO as

1244

00:53:05,020 --> 00:53:02,210

different than a normal light you know

1245

00:53:07,930 --> 00:53:05,030

that's right you do hear a lot about and

1246

00:53:11,650 --> 00:53:07,940

and so maybe it is what is it called bio

1247

00:53:14,410 --> 00:53:11,660

luminous bioluminescence right yeah it's

1248

00:53:17,590 --> 00:53:14,420

living living light right it's produced

1249

00:53:18,910 --> 00:53:17,600

in many different ways some organisms

1250

00:53:22,290 --> 00:53:18,920

can produce it through a chemical

1251
00:53:23,980 --> 00:53:22,300
reaction and some of them actually have

1252
00:53:26,500 --> 00:53:23,990
symbiotic bacteria

1253
00:53:29,350 --> 00:53:26,510
that live within these light producing

1254
00:53:32,710 --> 00:53:29,360
organs that they use to produce light

1255
00:53:34,630 --> 00:53:32,720
it's it's fascinating yeah isn't it okay

1256
00:53:37,540 --> 00:53:34,640
well we're ready to go on break we'll

1257
00:53:39,250 --> 00:53:37,550
we'll go back on a different topic right

1258
00:53:41,980 --> 00:53:39,260
after the break this is Martyn Willis my

1259
00:53:44,080 --> 00:53:41,990
guest is Scott Dechaine we're on kgr

1260
00:53:52,980 --> 00:53:44,090
radio and we'll be right back right

1261
00:53:58,120 --> 00:53:56,200
all right brother we are in the clear

1262
00:53:59,620 --> 00:53:58,130
and we've got four minutes just over

1263
00:54:02,670 --> 00:53:59,630

four minutes in this break all right

1264

00:54:05,550 --> 00:54:02,680

thank you all right so I'm going to ask

1265

00:54:07,950 --> 00:54:05,560

I'm going to ask you a couple of

1266

00:54:10,570 --> 00:54:07,960

questions that people have been posting

1267

00:54:13,150 --> 00:54:10,580

great Martin I'm not bending your ear

1268

00:54:14,980 --> 00:54:13,160

too much am i oh no not at all and also

1269

00:54:17,980 --> 00:54:14,990

we can open up I'm gonna open up the

1270

00:54:20,290 --> 00:54:17,990

phone line no no I this is interesting

1271

00:54:24,340 --> 00:54:20,300

does God have any thoughts about how

1272

00:54:27,880 --> 00:54:24,350

they get here travel from a bee or

1273

00:54:31,000 --> 00:54:27,890

through dimensions there's a few

1274

00:54:35,410 --> 00:54:31,010

questions okay do you think there are

1275

00:54:37,960 --> 00:54:35,420

always here or do you think they came

1276
00:54:40,530 --> 00:54:37,970
from somewhere else that's another good

1277
00:54:45,490 --> 00:54:42,940
you asking me an hour oh yeah yeah yeah

1278
00:54:48,640 --> 00:54:45,500
that's a question oh well I think you

1279
00:54:50,940 --> 00:54:48,650
know you if you read about some of the

1280
00:54:53,730 --> 00:54:50,950
speculation about life on other planets

1281
00:54:56,020 --> 00:54:53,740
you know Carl Sagan and arthur c clarke

1282
00:55:00,099 --> 00:54:56,030
speculated that you know we might find

1283
00:55:02,770 --> 00:55:00,109
life on Jupiter and on Europa you know

1284
00:55:04,870 --> 00:55:02,780
Saturn's moon Europa and they speculated

1285
00:55:07,660 --> 00:55:04,880
it might be like giant jellyfish you

1286
00:55:12,910 --> 00:55:07,670
know gas filled the fluid filled

1287
00:55:14,920 --> 00:55:12,920
organism and we think about we like to

1288
00:55:17,260 --> 00:55:14,930

draw lines as humans and say oh here's

1289

00:55:18,910 --> 00:55:17,270

the ocean and here's the atmosphere and

1290

00:55:20,830 --> 00:55:18,920

here's space but there's not really a

1291

00:55:22,150 --> 00:55:20,840

hard line you know things are moving

1292

00:55:24,609 --> 00:55:22,160

there and they're changing all the time

1293

00:55:29,170 --> 00:55:24,619

things are moving between those

1294

00:55:31,030 --> 00:55:29,180

different realms all the time we see at

1295

00:55:32,470 --> 00:55:31,040

the surface of the ocean there's not

1296

00:55:33,010 --> 00:55:32,480

really a hard line it's more like an

1297

00:55:35,080 --> 00:55:33,020

interface

1298

00:55:37,319 --> 00:55:35,090

you know things move in and out you know

1299

00:55:42,259 --> 00:55:37,329

molecules of water and organisms go in

1300

00:55:46,650 --> 00:55:42,269

out of the ocean all the time so I think

1301

00:55:50,789 --> 00:55:46,660

that earth is probably regularly seeded

1302

00:55:53,489 --> 00:55:50,799

by different you know organisms that hit

1303

00:55:55,529 --> 00:55:53,499

the atmosphere and I I don't know

1304

00:55:58,769 --> 00:55:55,539

there's probably a number of different

1305

00:56:00,900 --> 00:55:58,779

ways that they're dispersed but I think

1306

00:56:03,209 --> 00:56:00,910

when they a certain number of them find

1307

00:56:05,819 --> 00:56:03,219

a hospitable habitat in Earth's

1308

00:56:08,370 --> 00:56:05,829

atmosphere and they blossom that's why

1309

00:56:11,489 --> 00:56:08,380

sometimes we see you know these huge

1310

00:56:14,880 --> 00:56:11,499

swarms of UFOs they call them armadas a

1311

00:56:16,559 --> 00:56:14,890

floatie Azure you know flaps were

1312

00:56:19,049 --> 00:56:16,569

sometimes there's a lot of them I think

1313

00:56:22,229 --> 00:56:19,059

when they it's just like a red tide in

1314

00:56:23,759 --> 00:56:22,239

the ocean when you see a group of

1315

00:56:25,979 --> 00:56:23,769

organisms especially in vertebrates

1316

00:56:28,079 --> 00:56:25,989

they'll lay in a dormant state there

1317

00:56:30,209 --> 00:56:28,089

will be millions of like tiny jellyfish

1318

00:56:32,400 --> 00:56:30,219

in like a dormant state just ready to go

1319

00:56:33,749 --> 00:56:32,410

and then when the conditions are right

1320

00:56:35,279 --> 00:56:33,759

when the water gets warm and

1321

00:56:37,469 --> 00:56:35,289

everything's right there just boom they

1322

00:56:39,959 --> 00:56:37,479

mature and that's why we sometimes see

1323

00:56:42,059 --> 00:56:39,969

him appear by the millions and I think

1324

00:56:44,459 --> 00:56:42,069

that might be what's happening you know

1325

00:56:47,789 --> 00:56:44,469

at the edge of space that sometimes we

1326

00:56:50,759 --> 00:56:47,799

see and I know there was a scientist

1327

00:56:55,499 --> 00:56:50,769

named Louis Frank who was studying the

1328

00:56:58,019 --> 00:56:55,509

atmosphere and he started to see what he

1329

00:57:00,719 --> 00:56:58,029

thought were things of water coming into

1330

00:57:02,849 --> 00:57:00,729

the atmosphere and he postulated that

1331

00:57:07,709 --> 00:57:02,859

there were many comments you know watery

1332

00:57:09,870 --> 00:57:07,719

comments in the atmosphere okay we're

1333

00:57:12,120 --> 00:57:09,880

ready to go back sorry okay sorry I'm

1334

00:57:14,339 --> 00:57:12,130

bending your ear again no no no that's a

1335

00:57:18,180 --> 00:57:14,349

little less than four minutes but okay

1336

00:57:20,819 --> 00:57:18,190

okay we're ready okay we're ready to go

1337

00:57:24,359 --> 00:57:20,829

about the music is this now rolling yep

1338

00:57:24,359 --> 00:57:24,369

Martin sounds good okay

1339

00:57:35,549 --> 00:57:27,749

Scott you all set yes sir all right here

1340

00:57:37,109 --> 00:57:35,559

we go in five four three two all right

1341

00:57:38,959 --> 00:57:37,119

everyone we're back this is Martin

1342

00:57:42,120 --> 00:57:38,969

Willis my guest is Scott - Shane and

1343

00:57:45,150 --> 00:57:42,130

Scott we had some questions emailed in

1344

00:57:48,390 --> 00:57:45,160

from Kerry he writes some good questions

1345

00:57:51,240 --> 00:57:48,400

and so I have not even looked at him

1346

00:57:53,490 --> 00:57:51,250

I've been pretty busy so let me just

1347

00:57:56,790 --> 00:57:53,500

read this one the first one what are

1348

00:57:59,040 --> 00:57:56,800

your thoughts on conscious connection of

1349

00:58:01,080 --> 00:57:59,050

two UFOs I've often heard that

1350

00:58:04,440 --> 00:58:01,090

individuals get an overwhelming feeling

1351
00:58:06,450 --> 00:58:04,450
to look up or step outside which often

1352
00:58:10,740 --> 00:58:06,460
leads to a sighting of a craft at that

1353
00:58:13,350 --> 00:58:10,750
moment that's an interesting question I

1354
00:58:16,440 --> 00:58:13,360
can't begin to speculate on that but I

1355
00:58:19,110 --> 00:58:16,450
do know that there are many times where

1356
00:58:21,980 --> 00:58:19,120
people have sensed that there was

1357
00:58:24,600 --> 00:58:21,990
something in their air in their you know

1358
00:58:29,000 --> 00:58:24,610
area above them and looked up and seen a

1359
00:58:33,540 --> 00:58:29,010
UFO now this kind of brings up another

1360
00:58:36,510 --> 00:58:33,550
area I don't know I've seen there's

1361
00:58:38,280 --> 00:58:36,520
several different UFO videos there just

1362
00:58:40,340 --> 00:58:38,290
like I've literally looked at thousands

1363
00:58:42,810 --> 00:58:40,350

and thousands of these but there are

1364

00:58:45,180 --> 00:58:42,820

several of them where it appears that

1365

00:58:49,230 --> 00:58:45,190

the object of it is a living creature

1366

00:58:52,620 --> 00:58:49,240

seems to be looking at us as much as we

1367

00:58:53,940 --> 00:58:52,630

are looking at it so I don't know if we

1368

00:58:55,650 --> 00:58:53,950

can somehow you know sometimes you're in

1369

00:58:57,300 --> 00:58:55,660

a theater and you turn around and you

1370

00:58:59,310 --> 00:58:57,310

look and somebody's looking right at you

1371

00:59:01,770 --> 00:58:59,320

I don't know if we can sensed it we're

1372

00:59:05,130 --> 00:59:01,780

being watched and look up and see them

1373

00:59:08,870 --> 00:59:05,140

or if it's something more but this kind

1374

00:59:11,700 --> 00:59:08,880

of brings up another point which is the

1375

00:59:15,240 --> 00:59:11,710

jellyfish when the body that we see of

1376

00:59:17,400 --> 00:59:15,250

some jellyfish is the compact dense body

1377

00:59:21,120 --> 00:59:17,410

it's just part of their body and they

1378

00:59:24,180 --> 00:59:21,130

have a trailing mass of tentacles and

1379

00:59:26,970 --> 00:59:24,190

make stand many times beyond their body

1380

00:59:29,670 --> 00:59:26,980

you know the main body length and we see

1381

00:59:32,550 --> 00:59:29,680

that with a lot of recorded people we

1382

00:59:34,350 --> 00:59:32,560

recorded UFOs with photographs and

1383

00:59:37,080 --> 00:59:34,360

videos we see trailing tails or

1384

00:59:40,200 --> 00:59:37,090

tentacles people describe them like you

1385

00:59:42,660 --> 00:59:40,210

know badminton birdies or parachutes or

1386

00:59:45,480 --> 00:59:42,670

ice cream cones and I would urge people

1387

00:59:47,550 --> 00:59:45,490

that they if they are near UFO I mean

1388

00:59:50,520 --> 00:59:47,560

these organisms some of them can be

1389

00:59:52,980 --> 00:59:50,530

venomous and toxic so and we see some of

1390

00:59:56,520 --> 00:59:52,990

the physical effects on people of UFOs

1391

00:59:58,440 --> 00:59:56,530

they're almost exactly parallel the

1392

01:00:00,840 --> 00:59:58,450

effects that people have from being

1393

01:00:03,330 --> 01:00:00,850

exposed to an invertebrate toxin so if

1394

01:00:05,960 --> 01:00:03,340

you see a UFO I would advise not going

1395

01:00:09,300 --> 01:00:05,970

anywhere near it and trying to seek

1396

01:00:13,040 --> 01:00:09,310

really Wow that's it yeah no no y-you

1397

01:00:15,990 --> 01:00:13,050

can you've heard many other reports of

1398

01:00:17,970 --> 01:00:16,000

people who have been exposed to UFOs

1399

01:00:20,790 --> 01:00:17,980

close encounters a lot of people have

1400

01:00:21,690 --> 01:00:20,800

you know the irritation the skier skin

1401
01:00:26,010 --> 01:00:21,700
irritation

1402
01:00:28,140 --> 01:00:26,020
sometimes a long-term neurological and

1403
01:00:31,380 --> 01:00:28,150
physical effects and like I said they've

1404
01:00:32,970 --> 01:00:31,390
almost exactly parallel the effects of

1405
01:00:34,200 --> 01:00:32,980
invertebrate toxin you know in

1406
01:00:37,220 --> 01:00:34,210
vertebrates have some of the most toxic

1407
01:00:40,220 --> 01:00:37,230
substances that they use to hunt and

1408
01:00:44,220 --> 01:00:40,230
that sort of leads into another area of

1409
01:00:46,830 --> 01:00:44,230
when you look into you know what if if

1410
01:00:48,210 --> 01:00:46,840
you play what if that leads into a whole

1411
01:00:50,910 --> 01:00:48,220
nother area you know well if there is

1412
01:00:52,590 --> 01:00:50,920
this whole realm of life above us you

1413
01:00:54,720 --> 01:00:52,600

know could some of them be predators and

1414

01:00:56,970 --> 01:00:54,730

you think well if you saw predators if

1415

01:00:59,190 --> 01:00:56,980

there are there are predators you might

1416

01:01:02,040 --> 01:00:59,200

see things like you know cattle

1417

01:01:05,100 --> 01:01:02,050

mutilations or David Politis is missing

1418

01:01:06,510 --> 01:01:05,110

for 1/1 and so there seems to be you

1419

01:01:08,580 --> 01:01:06,520

know that kind of evidence too in that

1420

01:01:10,800 --> 01:01:08,590

in that area which is kind of disturbing

1421

01:01:12,480 --> 01:01:10,810

area to think about but right right I

1422

01:01:17,130 --> 01:01:12,490

don't even know if I've told you this

1423

01:01:18,720 --> 01:01:17,140

but we do take calls and okay so we're

1424

01:01:21,990 --> 01:01:18,730

gonna post the call number up there now

1425

01:01:24,930 --> 01:01:22,000

if anyone would like to call in or if

1426

01:01:27,450 --> 01:01:24,940

you're over on KCRA radio and you want

1427

01:01:29,880 --> 01:01:27,460

to hear the the write this down the

1428

01:01:33,060 --> 01:01:29,890

column number is six oh three nine six

1429

01:01:35,880 --> 01:01:33,070

seven four OH three oh and you're

1430

01:01:37,410 --> 01:01:35,890

welcome to call and and ask our guest

1431

01:01:39,570 --> 01:01:37,420

two questions someone named Todd and

1432

01:01:44,430 --> 01:01:39,580

chat said he wanted to call in so the

1433

01:01:46,110 --> 01:01:44,440

lines are open so let me let me go ahead

1434

01:01:47,700 --> 01:01:46,120

and mark I'm sorry well I wanted to

1435

01:01:50,880 --> 01:01:47,710

share one experience about

1436

01:01:53,640 --> 01:01:50,890

bioluminescence that it kind of might

1437

01:01:56,100 --> 01:01:53,650

point to the possibility that some of

1438

01:01:57,300 --> 01:01:56,110

these organisms you know some of the

1439

01:01:59,610 --> 01:01:57,310

objects that we see might be

1440

01:02:01,920 --> 01:01:59,620

bioluminescent organisms you know many

1441

01:02:04,860 --> 01:02:01,930

levels of the atmosphere if you think of

1442

01:02:06,810 --> 01:02:04,870

the ocean the ocean of air is an

1443

01:02:09,120 --> 01:02:06,820

environment you think where where it

1444

01:02:11,190 --> 01:02:09,130

would be good habitat niches for

1445

01:02:12,510 --> 01:02:11,200

organisms to live you think okay at the

1446

01:02:15,860 --> 01:02:12,520

bottom of the ocean there's like

1447

01:02:18,060 --> 01:02:15,870

crevices there's faults there's caves

1448

01:02:18,630 --> 01:02:18,070

what do we see around those things and

1449

01:02:20,579 --> 01:02:18,640

we see

1450

01:02:23,339 --> 01:02:20,589

the places around the earth or you know

1451

01:02:26,069 --> 01:02:23,349

mystery lights earthquake lights spook

1452

01:02:27,690 --> 01:02:26,079

lights and so those are areas of

1453

01:02:29,400 --> 01:02:27,700

promising research that we can study

1454

01:02:32,579 --> 01:02:29,410

those while are actually on the ground I

1455

01:02:35,730 --> 01:02:32,589

went out with the Travel Channel show

1456

01:02:38,370 --> 01:02:35,740

America Declassified to Marfa to Marfa

1457

01:02:40,230 --> 01:02:38,380

Texas to study the Marfa lights out

1458

01:02:43,200 --> 01:02:40,240

there and those are a recurring

1459

01:02:44,730 --> 01:02:43,210

phenomena you see them all different

1460

01:02:46,980 --> 01:02:44,740

times of the year in these mysterious

1461

01:02:49,410 --> 01:02:46,990

lights moving around the the desert

1462

01:02:52,049 --> 01:02:49,420

planes out there and we went out there

1463

01:02:53,609 --> 01:02:52,059

with a FLIR camera you know the

1464

01:02:56,849 --> 01:02:53,619

forward-looking infrared you know the

1465

01:02:58,740 --> 01:02:56,859

big van I can see people at nighttime

1466

01:03:00,990 --> 01:02:58,750

eight miles away it can see him out in

1467

01:03:03,029 --> 01:03:01,000

the desert and we had some you know

1468

01:03:05,640 --> 01:03:03,039

former military guys that were running

1469

01:03:07,370 --> 01:03:05,650

that and they were very seasoned vets

1470

01:03:10,890 --> 01:03:07,380

about you know using this equipment and

1471

01:03:14,940 --> 01:03:10,900

within it hours of being there we saw

1472

01:03:16,170 --> 01:03:14,950

these unexplained lights that were you

1473

01:03:20,910 --> 01:03:16,180

know in the middle of the desert when

1474

01:03:23,160 --> 01:03:20,920

nothing was out there and they produced

1475

01:03:25,259 --> 01:03:23,170

a visible light signature you could see

1476

01:03:27,329 --> 01:03:25,269

them with a low with the highly

1477

01:03:30,660 --> 01:03:27,339

sensitive visible lights but they didn't

1478

01:03:33,630 --> 01:03:30,670

show up on the FLIR which measures heat

1479

01:03:35,549 --> 01:03:33,640

so they didn't produce heat but they

1480

01:03:38,160 --> 01:03:35,559

produced light now the only form of

1481

01:03:41,249 --> 01:03:38,170

light that we know of that produces

1482

01:03:44,069 --> 01:03:41,259

light without heat is by oh my oh I knew

1483

01:03:45,740 --> 01:03:44,079

you're gonna say that yeah so it's not

1484

01:03:48,269 --> 01:03:45,750

proof that that there are

1485

01:03:50,279 --> 01:03:48,279

bioluminescence but because an organism

1486

01:03:52,140 --> 01:03:50,289

uses energy to produce that light and it

1487

01:03:54,960 --> 01:03:52,150

has to be very efficient about producing

1488

01:03:56,490 --> 01:03:54,970

that light so it's not proof but it's

1489

01:03:59,160 --> 01:03:56,500

definitely you know shows that there's

1490

01:04:01,470 --> 01:03:59,170

further possibility to study great we

1491

01:04:07,170 --> 01:04:01,480

have a call caller your first name where

1492

01:04:10,079 --> 01:04:07,180

you calling from Virginia did you say

1493

01:04:11,970 --> 01:04:10,089

Scott Todd Oh

1494

01:04:14,249 --> 01:04:11,980

todd todd yeah in the chat room yeah

1495

01:04:16,920 --> 01:04:14,259

yeah your your your connection phone

1496

01:04:18,480 --> 01:04:16,930

connections not perfect so try to talk

1497

01:04:23,370 --> 01:04:18,490

clearly if you would you have a question

1498

01:04:26,279 --> 01:04:23,380

for our guests sure that kind of an

1499

01:04:27,990 --> 01:04:26,289

observation about where someone then I

1500

01:04:31,740 --> 01:04:28,000

have a question for kind of both you

1501

01:04:32,430 --> 01:04:31,750

guys it's more pertaining to like Ernest

1502

01:04:36,390 --> 01:04:32,440

it's

1503

01:04:39,630 --> 01:04:36,400

thought it first no sprites I went from

1504

01:04:43,230 --> 01:04:39,640

what I've seen what I've heard the soft

1505

01:04:45,450 --> 01:04:43,240

documentary on it they the electrical

1506

01:04:49,099 --> 01:04:45,460

power they're a lot stronger than like a

1507

01:04:51,480 --> 01:04:49,109

normal like and they actually the

1508

01:04:55,250 --> 01:04:51,490

strength electricity so that's so strong

1509

01:04:59,099 --> 01:04:55,260

it actually damages the ionosphere and

1510

01:05:01,050 --> 01:04:59,109

it creates pockets where Liao's like you

1511

01:05:04,020 --> 01:05:01,060

know cosmic radiation from the Sun in

1512

01:05:06,420 --> 01:05:04,030

there I have to study which other

1513

01:05:07,680 --> 01:05:06,430

existing the the second base like you

1514

01:05:10,589 --> 01:05:07,690

know organic and traveling through space

1515

01:05:13,230 --> 01:05:10,599

one thing that hydrogen is one of the

1516

01:05:15,660 --> 01:05:13,240

most common elements in the interstellar

1517

01:05:21,030 --> 01:05:15,670

space though they possibly fit use that

1518

01:05:25,069 --> 01:05:21,040

for fuel for consumption right I was I

1519

01:05:28,109 --> 01:05:25,079

don't know hey to a lot of these

1520

01:05:31,140 --> 01:05:28,119

invertebrates they enter a form in their

1521

01:05:34,140 --> 01:05:31,150

life cycle when they're kind of in

1522

01:05:37,950 --> 01:05:34,150

stasis they kind of they go into a cyst

1523

01:05:40,079 --> 01:05:37,960

form and it's incredibly durable this

1524

01:05:42,180 --> 01:05:40,089

one jellyfish scientists told me they

1525

01:05:44,460 --> 01:05:42,190

tried to kill these cysts they radiated

1526

01:05:46,530 --> 01:05:44,470

them they froze them and they couldn't

1527

01:05:48,750 --> 01:05:46,540

kill him they take them after ten years

1528

01:05:51,000 --> 01:05:48,760

being frozen they put them back in water

1529

01:05:53,400 --> 01:05:51,010

and they'd go boom they just come back

1530

01:05:56,579 --> 01:05:53,410

to life so you know if these kind of

1531

01:05:58,140 --> 01:05:56,589

organisms do move through you know vast

1532

01:06:02,480 --> 01:05:58,150

reaches of space and they're in this

1533

01:06:03,660 --> 01:06:02,490

kind of you know kind of a static form

1534

01:06:06,870 --> 01:06:03,670

hibernation

1535

01:06:08,400 --> 01:06:06,880

right all right but and then when they

1536

01:06:10,980 --> 01:06:08,410

hit you know the warm moist atmosphere

1537

01:06:12,960 --> 01:06:10,990

of the planet of our planet or some

1538

01:06:14,609 --> 01:06:12,970

other planet they might all of a sudden

1539

01:06:16,589 --> 01:06:14,619

you know blossom in the life and we see

1540

01:06:20,069 --> 01:06:16,599

that with UFOs that kind of activity

1541

01:06:22,559 --> 01:06:20,079

where we see a swarm or a floatie 'or an

1542

01:06:23,970 --> 01:06:22,569

armada of ufos when they reach there

1543

01:06:26,930 --> 01:06:23,980

right it's like all of a sudden they go

1544

01:06:29,700 --> 01:06:26,940

boom and just appear out of nowhere

1545

01:06:31,040 --> 01:06:29,710

all right well Todd hey thank you for

1546

01:06:34,819 --> 01:06:31,050

the call

1547

01:06:38,430 --> 01:06:34,829

yeah I got one quick thing what I yeah

1548

01:06:40,589 --> 01:06:38,440

all right so it's kind of really in the

1549

01:06:44,040 --> 01:06:40,599

furtiveness I grab a tractor-trailer and

1550

01:06:46,200 --> 01:06:44,050

uh up in currently what I'm doing right

1551

01:06:49,470 --> 01:06:46,210

now delivering water for female

1552

01:06:51,690 --> 01:06:49,480

- well Florida so everybody talks about

1553

01:06:53,880 --> 01:06:51,700

you know zero-point energy and

1554

01:06:56,810 --> 01:06:53,890

disclosure and we got this

1555

01:06:58,230 --> 01:06:56,820

no-nobody the big whole industry

1556

01:07:00,360 --> 01:06:58,240

wouldn't want to come up there

1557

01:07:04,980 --> 01:07:00,370

monopolies and everybody go off the grid

1558

01:07:07,530 --> 01:07:04,990

and whatnot so my thoughts were doing

1559

01:07:09,000 --> 01:07:07,540

what I'm doing right now thinking I'm

1560

01:07:11,280 --> 01:07:09,010

like you know the insurance industry

1561

01:07:14,250 --> 01:07:11,290

well probably not as big as the whole

1562

01:07:16,860 --> 01:07:14,260

industry but pretty big history industry

1563

01:07:21,510 --> 01:07:16,870

and uh if they do have zero point

1564

01:07:23,010 --> 01:07:21,520

industry zero point energy and you know

1565

01:07:25,440 --> 01:07:23,020

if everybody got it because everybody

1566

01:07:28,140 --> 01:07:25,450

folks contributing to global warming and

1567

01:07:29,910 --> 01:07:28,150

we all know the fossil fuels do that the

1568

01:07:32,310 --> 01:07:29,920

damage that these hurricanes and

1569

01:07:34,290 --> 01:07:32,320

typhoons up on the other end of the

1570

01:07:36,870 --> 01:07:34,300

world cause is to the insurance

1571

01:07:38,850 --> 01:07:36,880

industries you think you know if they

1572

01:07:42,230 --> 01:07:38,860

could get off of our addiction to fossil

1573

01:07:45,150 --> 01:07:42,240

fuel and you know we would be able to

1574

01:07:51,140 --> 01:07:45,160

pollute the environment and cause

1575

01:07:56,040 --> 01:07:51,150

problems that what do you guess on that

1576

01:07:58,350 --> 01:07:56,050

your name won't answer well I don't know

1577

01:08:00,450 --> 01:07:58,360

you know what they have out there you

1578

01:08:01,920 --> 01:08:00,460

know this is you know quite a bit off

1579

01:08:05,430 --> 01:08:01,930

the topic of what we're talking about

1580

01:08:08,010 --> 01:08:05,440

but yeah all right no that's all right

1581

01:08:10,290 --> 01:08:08,020

and I don't really understand if they

1582

01:08:12,900 --> 01:08:10,300

really have you know something in the

1583

01:08:14,310 --> 01:08:12,910

works that we don't know about you know

1584

01:08:16,080 --> 01:08:14,320

free energy type of thing and I know

1585

01:08:19,380 --> 01:08:16,090

that it would totally change the world

1586

01:08:23,010 --> 01:08:19,390

if they did and it would be first in

1587

01:08:25,230 --> 01:08:23,020

economic crash and then I think things

1588

01:08:27,860 --> 01:08:25,240

would rebuild and you know that's my own

1589

01:08:33,120 --> 01:08:27,870

opinion but it can get really political

1590

01:08:35,970 --> 01:08:33,130

but I I don't know if if that's being

1591

01:08:38,160 --> 01:08:35,980

held back and there's there's technology

1592

01:08:40,920 --> 01:08:38,170

we just don't know about yet or not I

1593

01:08:42,720 --> 01:08:40,930

have no idea it's a puzzle well it's a

1594

01:08:46,050 --> 01:08:42,730

big question and that's always been the

1595

01:08:48,030 --> 01:08:46,060

case in the human progress is you know

1596

01:08:49,770 --> 01:08:48,040

any kind of revolutionary idea meets a

1597

01:08:51,720 --> 01:08:49,780

lot of resistance because like you said

1598

01:08:55,680 --> 01:08:51,730

it's gonna disrupt the whole

1599

01:08:57,720 --> 01:08:55,690

establishment of you know power so you

1600

01:08:59,939 --> 01:08:57,730

know you got to kind of trust the good

1601
01:09:02,669 --> 01:08:59,949
ideas like in nature they're gonna

1602
01:09:04,559 --> 01:09:02,679
and somehow succeed but I have a quote

1603
01:09:07,620 --> 01:09:04,569
on my wall from Mark Twain that says a

1604
01:09:10,769 --> 01:09:07,630
man with a new idea is a crank until the

1605
01:09:14,820 --> 01:09:10,779
idea succeeded so yes you know great

1606
01:09:16,800 --> 01:09:14,830
sayings yeah but you know that's why you

1607
01:09:18,959 --> 01:09:16,810
look at some of the ideas like I'm sure

1608
01:09:20,760 --> 01:09:18,969
you've heard of Nikola Tesla you know he

1609
01:09:22,800 --> 01:09:20,770
developed so Hut's but some of his ideas

1610
01:09:24,450 --> 01:09:22,810
for free energy you know he predicted

1611
01:09:26,459 --> 01:09:24,460
we'd have you having free energy by now

1612
01:09:28,530 --> 01:09:26,469
would be grabbing it from the sky yeah

1613
01:09:30,990 --> 01:09:28,540

right but they never materialized

1614

01:09:34,829 --> 01:09:31,000

because you can't put a meter on free

1615

01:09:39,240 --> 01:09:34,839

energy so it's hard it's hard demand

1616

01:09:41,849 --> 01:09:39,250

yeah you know it's just like the the

1617

01:09:43,829 --> 01:09:41,859

whole industry when it all boils down to

1618

01:09:46,559 --> 01:09:43,839

that by you know the powers to be money

1619

01:09:49,079 --> 01:09:46,569

right if I wants money so you disrupting

1620

01:09:51,360 --> 01:09:49,089

one industry the oil industry but like

1621

01:09:52,890 --> 01:09:51,370

the internet industry is pretty massive

1622

01:09:54,780 --> 01:09:52,900

too and though my thinking all the

1623

01:09:56,910 --> 01:09:54,790

billions of dollars and damage that

1624

01:09:58,830 --> 01:09:56,920

these hurricanes caused and typhoons

1625

01:10:01,680 --> 01:09:58,840

Falls if there's a way to mitigate that

1626
01:10:04,830 --> 01:10:01,690
and lower that you know they were kind

1627
01:10:07,290 --> 01:10:04,840
of want to go to that you know so I'm

1628
01:10:10,200 --> 01:10:07,300
done room well it's you know it's kind

1629
01:10:11,520 --> 01:10:10,210
of interesting to think we think we can

1630
01:10:13,860 --> 01:10:11,530
manipulate the weather but there are

1631
01:10:16,350 --> 01:10:13,870
such vast forces I don't know if well I

1632
01:10:18,180 --> 01:10:16,360
mean in a way you know we're fortunate

1633
01:10:21,090 --> 01:10:18,190
now that we can see these things ahead

1634
01:10:22,890 --> 01:10:21,100
of time and try and avoid you know the

1635
01:10:24,750 --> 01:10:22,900
disasters try and move people out and

1636
01:10:26,340 --> 01:10:24,760
get ready you know hunker down just

1637
01:10:29,070 --> 01:10:26,350
think about how fortunate we are to be

1638
01:10:30,780 --> 01:10:29,080

able to see on satellites you know

1639

01:10:32,040 --> 01:10:30,790

weather satellites other storms coming

1640

01:10:34,050 --> 01:10:32,050

and you know we can move out of the way

1641

01:10:36,030 --> 01:10:34,060

or in the past I mean they were a

1642

01:10:37,350 --> 01:10:36,040

hundred years ago they had no idea which

1643

01:10:39,180 --> 01:10:37,360

is hitting right yeah

1644

01:10:40,439 --> 01:10:39,190

massive tragedies if you look at some of

1645

01:10:42,360 --> 01:10:40,449

the tragedies through history some of

1646

01:10:46,550 --> 01:10:42,370

the storms we're talking a loss of

1647

01:10:52,260 --> 01:10:50,010

galliston anyway yeah I appreciate

1648

01:10:54,300 --> 01:10:52,270

taking my comp time great show Martin

1649

01:10:56,010 --> 01:10:54,310

all right hey thanks Todd let me ask you

1650

01:10:58,439 --> 01:10:56,020

before you head out Todd let me ask you

1651
01:11:02,600 --> 01:10:58,449
real quick you ever had you ever hear

1652
01:11:05,220 --> 01:11:02,610
the the coho quite down in West Point

1653
01:11:10,410 --> 01:11:05,230
Hope like yeah down in West Point

1654
01:11:13,680 --> 01:11:10,420
Virginia no I can't see it but I I live

1655
01:11:15,330 --> 01:11:13,690
about 30 minutes away from West Point

1656
01:11:17,070 --> 01:11:15,340
that yeah check that out because I

1657
01:11:19,680 --> 01:11:17,080
actually did it went down there and did

1658
01:11:21,360 --> 01:11:19,690
a whole field study down there and

1659
01:11:23,189 --> 01:11:21,370
there's a one of those weird lights down

1660
01:11:25,560 --> 01:11:23,199
there people I've seen there and we got

1661
01:11:27,780 --> 01:11:25,570
some really cool images down there it's

1662
01:11:29,490 --> 01:11:27,790
a mysterious area and the Great Dismal

1663
01:11:33,479 --> 01:11:29,500

Swamp you ever hear that down there near

1664

01:11:38,520 --> 01:11:33,489

the coast oh yeah oh yeah that's a

1665

01:11:41,580 --> 01:11:38,530

creepy place to innit yeah yeah yeah all

1666

01:11:43,350 --> 01:11:41,590

right yeah how do you spell that real

1667

01:11:50,010 --> 01:11:43,360

quick already damn suck it up

1668

01:11:52,740 --> 01:11:50,020

Co Hoch Co H Oh Kate not if you go to my

1669

01:11:55,530 --> 01:11:52,750

ad if you go to the the YouTube channel

1670

01:11:57,120 --> 01:11:55,540

the living sky and look for light on the

1671

01:11:59,729 --> 01:11:57,130

tracks you'll see we have a trailer

1672

01:12:06,360 --> 01:11:59,739

there for the production we're doing on

1673

01:12:07,830 --> 01:12:06,370

that awesome oh yeah there's some guys

1674

01:12:10,070 --> 01:12:07,840

singing there but they have a song about

1675

01:12:15,680 --> 01:12:10,080

the late it's that popular down there so

1676

01:12:18,270 --> 01:12:15,690

Wow yeah okay awesome well thank you

1677

01:12:20,400 --> 01:12:18,280

alright thanks a lot yeah

1678

01:12:22,590 --> 01:12:20,410

all right so we have the line open if

1679

01:12:27,840 --> 01:12:22,600

anyone else would like to give give a

1680

01:12:29,970 --> 01:12:27,850

call let me ask this other question and

1681

01:12:31,459 --> 01:12:29,980

I think we kind of answered this do you

1682

01:12:33,930 --> 01:12:31,469

think it's possible that the orb

1683

01:12:35,820 --> 01:12:33,940

phenomena there's some sort of life form

1684

01:12:40,350 --> 01:12:35,830

opposed to the nuts and bolts looking

1685

01:12:42,240 --> 01:12:40,360

craft absolutely I think if you look we

1686

01:12:46,650 --> 01:12:42,250

actually did I did a compilation of some

1687

01:12:50,160 --> 01:12:46,660

more videos on the YouTube channel the

1688

01:12:52,680 --> 01:12:50,170

living sky I think you know if you think

1689

01:12:54,209 --> 01:12:52,690

of again the invertebrates have a whole

1690

01:12:54,479 --> 01:12:54,219

different life cycle on what we're used

1691

01:12:57,450 --> 01:12:54,489

to

1692

01:13:02,820 --> 01:12:57,460

they reproduce in many different ways

1693

01:13:05,180 --> 01:13:02,830

and these big if there are organisms in

1694

01:13:09,090 --> 01:13:05,190

the atmosphere yeah they're gonna drop

1695

01:13:11,340 --> 01:13:09,100

tons of you know eggs that turn into

1696

01:13:13,920 --> 01:13:11,350

these kind of you know miniature sort of

1697

01:13:15,840 --> 01:13:13,930

larval forms and we might see them

1698

01:13:17,520 --> 01:13:15,850

moving around like these swarms of orbs

1699

01:13:19,860 --> 01:13:17,530

and if you look at some of the swarms of

1700

01:13:21,630 --> 01:13:19,870

orbs that people have seen I mean a lot

1701

01:13:24,330 --> 01:13:21,640

of them you know you got to be skeptical

1702

01:13:25,950 --> 01:13:24,340

a lot of them look like dust pollen

1703

01:13:27,329 --> 01:13:25,960

particles that are caught in their

1704

01:13:29,009 --> 01:13:27,339

artifacts of the camera

1705

01:13:31,049 --> 01:13:29,019

but some of them you look at and then

1706

01:13:33,899 --> 01:13:31,059

you go these things are moving around

1707

01:13:35,759 --> 01:13:33,909

they're interacting with people and so

1708

01:13:38,579 --> 01:13:35,769

yeah I think that some of those may be

1709

01:13:41,699 --> 01:13:38,589

alive now Wow how do you cap how do you

1710

01:13:43,379 --> 01:13:41,709

capture one right you know yeah and it's

1711

01:13:45,419 --> 01:13:43,389

like capturing a jellyfish it's gonna go

1712

01:13:47,489 --> 01:13:45,429

poof it's gonna disappear so how do you

1713

01:13:50,699 --> 01:13:47,499

capture one I think I remember something

1714

01:13:53,579 --> 01:13:50,709

about an orb in a back yard where it

1715

01:13:55,109 --> 01:13:53,589

sort of like attacked this little girl I

1716

01:13:57,839 --> 01:13:55,119

don't know if you ever heard that whole

1717

01:13:59,879 --> 01:13:57,849

story oh my gosh yeah but anyway we have

1718

01:14:03,179 --> 01:13:59,889

a caller on the line calling your first

1719

01:14:04,079 --> 01:14:03,189

name where you calling from Brian from

1720

01:14:09,540 --> 01:14:04,089

Frederick Maryland

1721

01:14:11,909 --> 01:14:09,550

hi Brian welcome mark hi guys are you

1722

01:14:20,040 --> 01:14:11,919

doing all right how are you you have a

1723

01:14:21,809 --> 01:14:20,050

question for Scott I do okay now with

1724

01:14:24,409 --> 01:14:21,819

the eyeball that like explained was like

1725

01:14:26,579 --> 01:14:24,419

a red eyeball that kernel whole city saw

1726

01:14:29,429 --> 01:14:26,589

could that could you think that could

1727

01:14:32,939 --> 01:14:29,439

have been like a living UFO type of deal

1728

01:14:38,969 --> 01:14:32,949

I do also uh also beyond the face

1729

01:14:40,619 --> 01:14:38,979

phenomena too that the cable little

1730

01:14:43,559 --> 01:14:40,629

sparks flying around or whatever that's

1731

01:15:01,139 --> 01:14:52,619

face fireflies phenomenon that even done

1732

01:15:03,750 --> 01:15:01,149

Glenn no before John Glenn first name

1733

01:15:08,520 --> 01:15:03,760

document or no you don't talk about the

1734

01:15:12,599 --> 01:15:08,530

guy George Adamski is that you're

1735

01:15:14,009 --> 01:15:12,609

talking about okay I didn't know he had

1736

01:15:22,199 --> 01:15:14,019

seen those kind of things that's

1737

01:15:24,809 --> 01:15:22,209

interesting Gemini and then also how

1738

01:15:26,250 --> 01:15:24,819

about the out from the tether footage

1739

01:15:30,809 --> 01:15:26,260

you know how they slowed it down and

1740

01:15:32,699 --> 01:15:30,819

they show the look like like organisms

1741

01:15:34,979 --> 01:15:32,709

organisms in the fishbowl I mean through

1742

01:15:38,159 --> 01:15:34,989

exactly isn't that mind-boggling stuff

1743

01:15:40,600 --> 01:15:38,169

isn't it yeah so like all that could it

1744

01:15:42,609 --> 01:15:40,610

be living stuff and what about the space

1745

01:15:44,590 --> 01:15:42,619

we like like if that's something that

1746

01:15:48,609 --> 01:15:44,600

could be the same thing to the space

1747

01:15:50,109 --> 01:15:48,619

would basically phenomena oh right yeah

1748

01:15:52,930 --> 01:15:50,119

well that's the thing if you start

1749

01:15:54,340 --> 01:15:52,940

looking and saying well what if and you

1750

01:15:55,720 --> 01:15:54,350

start looking there's a ton of evidence

1751

01:15:57,939 --> 01:15:55,730

out there it sounds like you're familiar

1752

01:16:01,870 --> 01:15:57,949

with a lot of it and you start looking

1753

01:16:03,580 --> 01:16:01,880

at it yeah well if you start looking at

1754

01:16:05,140 --> 01:16:03,590

it like that so that's the thing I mean

1755

01:16:06,669 --> 01:16:05,150

you've seen that there's a lot of it out

1756

01:16:08,379 --> 01:16:06,679

there I would like to get up there and

1757

01:16:10,390 --> 01:16:08,389

actually you know get a good close look

1758

01:16:11,770 --> 01:16:10,400

even if we just put a net outside the

1759

01:16:14,560 --> 01:16:11,780

space station see if you can catch

1760

01:16:16,930 --> 01:16:14,570

something out there you know right yeah

1761

01:16:19,030 --> 01:16:16,940

but that's that's the thing I think all

1762

01:16:21,850 --> 01:16:19,040

we got to do is get people's mind around

1763

01:16:23,830 --> 01:16:21,860

the idea that these actually might be

1764

01:16:27,459 --> 01:16:23,840

living things and then start looking at

1765

01:16:29,530 --> 01:16:27,469

him looking for them like that I think

1766

01:16:32,740 --> 01:16:29,540

it was on the greatest story ever denied

1767

01:16:34,209 --> 01:16:32,750

they said that a study said they planted

1768

01:16:35,709 --> 01:16:34,219

there was they thought there was actual

1769

01:16:37,870 --> 01:16:35,719

living critters out there that's like

1770

01:16:40,169 --> 01:16:37,880

that's a quote problem that's right

1771

01:16:42,970 --> 01:16:40,179

it's got carpenter that's right yeah

1772

01:16:44,260 --> 01:16:42,980

yeah yeah he said that a couple

1773

01:16:47,070 --> 01:16:44,270

different times on a couple different

1774

01:16:49,780 --> 01:16:47,080

occasions and it's interesting because

1775

01:16:52,930 --> 01:16:49,790

he said that right at right after John

1776

01:16:54,129 --> 01:16:52,940

Glenn flew for the first time he said

1777

01:16:56,169 --> 01:16:54,139

that they thought that they might be

1778

01:16:59,830 --> 01:16:56,179

living critters it and then they did a

1779

01:17:02,560 --> 01:16:59,840

50-year anniversary production on John

1780

01:17:04,479 --> 01:17:02,570

Glenn's friendship 7 flight and he was

1781

01:17:09,340 --> 01:17:04,489

still talking about it he said that all

1782

01:17:11,530 --> 01:17:09,350

the best yeah he said all the best yeah

1783

01:17:13,300 --> 01:17:11,540

all the best scientific minds of the

1784

01:17:14,709 --> 01:17:13,310

time we're thinking about it that they

1785

01:17:17,890 --> 01:17:14,719

might be living creatures out there now

1786

01:17:19,570 --> 01:17:17,900

I don't know if they did any study about

1787

01:17:21,160 --> 01:17:19,580

that I can't find any evidence that they

1788

01:17:29,320 --> 01:17:21,170

did any further study on that direction

1789

01:17:30,850 --> 01:17:29,330

which seems to me it was what I said it

1790

01:17:32,140 --> 01:17:30,860

would be suppressed if anything I mean

1791

01:17:33,850 --> 01:17:32,150

like what they would let that get out

1792

01:17:39,310 --> 01:17:33,860

well why do you think they would

1793

01:17:41,500 --> 01:17:39,320

suppress that because I mean whatever

1794

01:17:44,470 --> 01:17:41,510

how would they have evolved up there I

1795

01:17:46,780 --> 01:17:44,480

mean there's evolution I like that well

1796

01:17:48,010 --> 01:17:46,790

I wonder about that I mean I you know

1797

01:17:50,379 --> 01:17:48,020

part of me thinks well either they do

1798

01:17:52,600 --> 01:17:50,389

know about it and then they're not

1799

01:17:53,980 --> 01:17:52,610

telling anybody or they don't know about

1800

01:17:57,460 --> 01:17:53,990

it they just haven't looked in

1801

01:18:00,280 --> 01:17:57,470

no we're well that's the possibility

1802

01:18:02,140 --> 01:18:00,290

where do they come from if you think you

1803

01:18:04,240 --> 01:18:02,150

know they might be coming into the

1804

01:18:06,550 --> 01:18:04,250

atmosphere all the time and we only see

1805

01:18:08,890 --> 01:18:06,560

them you know when they blossom in the

1806

01:18:10,720 --> 01:18:08,900

warm moist air I mean they might be you

1807

01:18:12,970 --> 01:18:10,730

know like seeding the atmosphere from

1808

01:18:20,970 --> 01:18:12,980

vast regions of space as we travel

1809

01:18:26,860 --> 01:18:25,240

right well one scientist found out he

1810

01:18:30,310 --> 01:18:26,870

started looking at the atmosphere and

1811

01:18:31,780 --> 01:18:30,320

dining that there were these blobs of

1812

01:18:34,120 --> 01:18:31,790

water that were coming into the

1813

01:18:36,900 --> 01:18:34,130

atmosphere and his name is Louis Franck

1814

01:18:40,420 --> 01:18:36,910

any was at the University of Iowa and he

1815

01:18:41,800 --> 01:18:40,430

he said well these might be watery

1816

01:18:43,030 --> 01:18:41,810

comets that are hitting the atmosphere

1817

01:18:44,590 --> 01:18:43,040

many comets

1818

01:18:46,750 --> 01:18:44,600

he said there were these house-sized

1819

01:18:48,760 --> 01:18:46,760

comets that are hitting the atmosphere

1820

01:18:49,990 --> 01:18:48,770

and they're in the atmosphere you know

1821

01:18:51,520 --> 01:18:50,000

not just occasionally but he said

1822

01:18:55,090 --> 01:18:51,530

thousands of times a day

1823

01:18:56,830 --> 01:18:55,100

and a lot of scientists said oh you're

1824

01:18:59,460 --> 01:18:56,840

crazy or nuts it was incredible the

1825

01:19:01,660 --> 01:18:59,470

controversy that this guy stirred up and

1826

01:19:03,220 --> 01:19:01,670

they said let's go test it and they

1827

01:19:06,640 --> 01:19:03,230

actually went and looked and they found

1828

01:19:08,050 --> 01:19:06,650

out that there are indeed these blobs

1829

01:19:09,580 --> 01:19:08,060

these things of water hitting the

1830

01:19:14,080 --> 01:19:09,590

atmosphere boom boom boom boom boom all

1831

01:19:15,820 --> 01:19:14,090

the time now are all those mini comets

1832

01:19:18,190 --> 01:19:15,830

are they all sterile or do some of them

1833

01:19:19,990 --> 01:19:18,200

contain organic matter and some of them

1834

01:19:22,630 --> 01:19:20,000

contain organic matter do they might can

1835

01:19:24,880 --> 01:19:22,640

possibly contain you know some kind of

1836

01:19:26,980 --> 01:19:24,890

cysts or some kind of spores of some

1837

01:19:28,330 --> 01:19:26,990

other kind of organisms that actually

1838

01:19:29,680 --> 01:19:28,340

are hitting the earth all the time I

1839

01:19:37,140 --> 01:19:29,690

don't know this is these are questions

1840

01:19:43,920 --> 01:19:39,160

thanks for your questions that's great

1841

01:19:46,450 --> 01:19:43,930

stuff all right all right yeah take care

1842

01:19:48,310 --> 01:19:46,460

one of the one of the main things I

1843

01:19:50,500 --> 01:19:48,320

thought of Escarpment we first started

1844

01:19:54,340 --> 01:19:50,510

talking is you know most of the time

1845

01:19:58,660 --> 01:19:54,350

people talk about you know UFOs shooting

1846

01:20:02,770 --> 01:19:58,670

off at an incredible speed and so that

1847

01:20:05,350 --> 01:20:02,780

would take all of the organic you know

1848

01:20:07,760 --> 01:20:05,360

your thoughts of a living creature kind

1849

01:20:10,440 --> 01:20:07,770

of out of the picture wouldn't it

1850

01:20:14,520 --> 01:20:10,450

no as a matter of fact when you if you

1851

01:20:16,740 --> 01:20:14,530

think about how these organisms move it

1852

01:20:19,860 --> 01:20:16,750

makes perfect sense the way some of the

1853

01:20:22,470 --> 01:20:19,870

UFOs behave I actually went and

1854

01:20:24,300 --> 01:20:22,480

identified ten different ways that UFOs

1855

01:20:26,550 --> 01:20:24,310

parallel marine and vertebrates and one

1856

01:20:28,350 --> 01:20:26,560

of them is in how they move

1857

01:20:31,770 --> 01:20:28,360

you know how they how they propel

1858

01:20:33,960 --> 01:20:31,780

themselves again well divided in the two

1859

01:20:37,950 --> 01:20:33,970

different areas of the jellyfish in the

1860

01:20:41,120 --> 01:20:37,960

squid an Australian Air Force colonel

1861

01:20:43,080 --> 01:20:41,130

did an analysis of how jellyfish move

1862

01:20:46,800 --> 01:20:43,090

and he found out that they actually

1863

01:20:48,210 --> 01:20:46,810

produce with a small flecks of their

1864

01:20:50,310 --> 01:20:48,220

muscle they're like a ring of muscle

1865

01:20:54,360 --> 01:20:50,320

with a small flecks of their muscle they

1866

01:20:56,760 --> 01:20:54,370

produce a vortex and they actually ride

1867

01:20:59,820 --> 01:20:56,770

on that vortex so they flex and then

1868

01:21:02,340 --> 01:20:59,830

ride that vortex away so they can

1869

01:21:03,960 --> 01:21:02,350

actually float virtually motionless and

1870

01:21:07,560 --> 01:21:03,970

all of a sudden just go poof and then

1871

01:21:09,300 --> 01:21:07,570

they're gone and that seems to parallel

1872

01:21:12,900 --> 01:21:09,310

out of the behavior that people report

1873

01:21:14,460 --> 01:21:12,910

with disc-shaped UFOs they will they

1874

01:21:17,100 --> 01:21:14,470

actually seem to pulse a lot of them

1875

01:21:19,650 --> 01:21:17,110

report that they pulse they change shape

1876

01:21:22,260 --> 01:21:19,660

as they move in fact that's why you see

1877

01:21:25,290 --> 01:21:22,270

sometimes people report different shapes

1878

01:21:27,630 --> 01:21:25,300

some people say oh it's like a circle

1879

01:21:29,310 --> 01:21:27,640

some people say it was like a curve and

1880

01:21:32,070 --> 01:21:29,320

but they're actually seeing different

1881

01:21:35,700 --> 01:21:32,080

aspects of the same object when they're

1882

01:21:36,900 --> 01:21:35,710

reporting different shape so the

1883

01:21:38,790 --> 01:21:36,910

jellyfish can actually hover

1884

01:21:40,700 --> 01:21:38,800

motionlessly people we tend to think of

1885

01:21:43,200 --> 01:21:40,710

a jellyfish which is very passive

1886

01:21:45,240 --> 01:21:43,210

organisms just sort of you know move

1887

01:21:46,560 --> 01:21:45,250

around wherever the waves take them but

1888

01:21:48,030 --> 01:21:46,570

they're actually really good swimmers

1889

01:21:50,940 --> 01:21:48,040

you know the mature ones are very good

1890

01:21:52,650 --> 01:21:50,950

swimmers they ride currents and they can

1891

01:21:55,350 --> 01:21:52,660

actually you know they surf through the

1892

01:21:57,150 --> 01:21:55,360

currents and they can actually change

1893

01:21:59,430 --> 01:21:57,160

their direction with that muscular

1894

01:22:02,760 --> 01:21:59,440

pulsing and create their own vortexes

1895

01:22:05,430 --> 01:22:02,770

and move if you look at some of the more

1896

01:22:08,640 --> 01:22:05,440

interesting UFO videos you can actually

1897

01:22:10,980 --> 01:22:08,650

see some of these disks seem to you know

1898

01:22:12,480 --> 01:22:10,990

they kind of ride the the wind and they

1899

01:22:13,920 --> 01:22:12,490

kind of will move and they'll go back

1900

01:22:15,540 --> 01:22:13,930

and then they'll you know they'll kind

1901

01:22:17,340 --> 01:22:15,550

of catch the wind like a sail they'll

1902

01:22:18,900 --> 01:22:17,350

open themselves up and catch the wind

1903

01:22:20,220 --> 01:22:18,910

and zip and then they kind of tack

1904

01:22:23,970 --> 01:22:20,230

against it and come back

1905

01:22:25,890 --> 01:22:23,980

it's fascinating stuff now squid on the

1906

01:22:28,229 --> 01:22:25,900

other hand they have they can produce

1907

01:22:30,600 --> 01:22:28,239

within themselves different chemicals

1908

01:22:33,180 --> 01:22:30,610

that change their buoyancy so they can

1909

01:22:35,520 --> 01:22:33,190

move up and down and hover in different

1910

01:22:37,050 --> 01:22:35,530

aspects but within their bodies they

1911

01:22:39,360 --> 01:22:37,060

actually have these chambers that are

1912

01:22:41,550 --> 01:22:39,370

like living Jets so they squeeze and

1913

01:22:43,530 --> 01:22:41,560

then they produce these Jets that just

1914

01:22:46,170 --> 01:22:43,540

let them go zipping away and that's how

1915

01:22:47,940 --> 01:22:46,180

we people who often reported the cigar

1916

01:22:49,860 --> 01:22:47,950

shaped things they tended hover and move

1917

01:22:52,530 --> 01:22:49,870

slowly and then all of a sudden they go

1918

01:22:56,610 --> 01:22:52,540

they're just gone quicker than you can

1919

01:23:00,210 --> 01:22:56,620

even imagine so it's very much it's it's

1920

01:23:02,220 --> 01:23:00,220

almost like a affirmation of the

1921

01:23:04,920 --> 01:23:02,230

parallels with the organisms rather than

1922

01:23:07,620 --> 01:23:04,930

a refutation but you know the only the

1923

01:23:10,650 --> 01:23:07,630

difference is here we're talking fluid

1924

01:23:12,180 --> 01:23:10,660

compared to you know an atmosphere and

1925

01:23:14,430 --> 01:23:12,190

and then if we're talking up upper

1926

01:23:17,010 --> 01:23:14,440

atmosphere we're talking very thin so

1927

01:23:19,740 --> 01:23:17,020

they don't really have they don't really

1928

01:23:22,320 --> 01:23:19,750

have the matter to propel them as far as

1929

01:23:23,729 --> 01:23:22,330

as far as I can well that's that's where

1930

01:23:25,470 --> 01:23:23,739

we that's where again it's that

1931

01:23:28,050 --> 01:23:25,480

perception of our atmosphere is being

1932

01:23:30,180 --> 01:23:28,060

insubstantial when really there's a huge

1933

01:23:33,060 --> 01:23:30,190

amount of force and energy there's a

1934

01:23:34,950 --> 01:23:33,070

huge amount of gas and vapor within the

1935

01:23:37,140 --> 01:23:34,960

atmosphere so there's a lot for them to

1936

01:23:38,940 --> 01:23:37,150

work with it's just the fact that we

1937

01:23:41,490 --> 01:23:38,950

moved through it we don't think of it as

1938

01:23:42,900 --> 01:23:41,500

something substantial but if you think

1939

01:23:47,430 --> 01:23:42,910

of the different pressures and they're

1940

01:23:48,840 --> 01:23:47,440

involved in the amount of yeah you ought

1941

01:23:51,030 --> 01:23:48,850

to check some time on the amount of

1942

01:23:53,100 --> 01:23:51,040

energy and the amount of water that's

1943

01:23:55,470 --> 01:23:53,110

like in one funder cloud it's it's just

1944

01:23:58,680 --> 01:23:55,480

incredible the amount of material it's

1945

01:24:01,290 --> 01:23:58,690

above our heads it's not like it's all

1946

01:24:03,479 --> 01:24:01,300

empty its full of you know energy and

1947

01:24:06,780 --> 01:24:03,489

minerals and water vapor and other gases

1948

01:24:09,600 --> 01:24:06,790

so and mostly nitrogen but it's it's a

1949

01:24:11,220 --> 01:24:09,610

huge and it's very it's a very

1950

01:24:13,200 --> 01:24:11,230

substantial environment from the move

1951

01:24:15,750 --> 01:24:13,210

around in you're going to think about

1952

01:24:19,050 --> 01:24:15,760

mass and gravity you know how word is

1953

01:24:22,380 --> 01:24:19,060

all very play into how something can

1954

01:24:26,550 --> 01:24:22,390

move about and stay up in the atmosphere

1955

01:24:28,830 --> 01:24:26,560

floating ready in the day out well

1956

01:24:31,830 --> 01:24:28,840

that's a good question I mean like I

1957

01:24:33,600 --> 01:24:31,840

said it's a hypothesis and why the ideal

1958

01:24:37,200 --> 01:24:33,610

to me it would be the

1959

01:24:40,710 --> 01:24:37,210

near some of these sprites and see if

1960

01:24:42,420 --> 01:24:40,720

you could possibly know tag one and see

1961

01:24:44,670 --> 01:24:42,430

well where does it go where does it move

1962

01:24:46,860 --> 01:24:44,680

how does it you know how does it move

1963

01:24:48,720 --> 01:24:46,870

through the atmosphere it does it

1964

01:24:50,330 --> 01:24:48,730

persist does it keep going another thing

1965

01:24:53,090 --> 01:24:50,340

that would be great is to actually get

1966

01:24:57,300 --> 01:24:53,100

there's a chemical that actually reveals

1967

01:24:59,550 --> 01:24:57,310

the presence of DNA which we you know is

1968

01:25:01,380 --> 01:24:59,560

the it's the building block of all life

1969

01:25:03,120 --> 01:25:01,390

that we know of and it would be

1970

01:25:05,760 --> 01:25:03,130

interesting to me to go to some of these

1971

01:25:08,370 --> 01:25:05,770

areas where these objects are seen and

1972

01:25:11,460 --> 01:25:08,380

you know Dow's the atmosphere and see if

1973

01:25:14,210 --> 01:25:11,470

there is any DNA but it's revealed there

1974

01:25:16,260 --> 01:25:14,220

it's a big question but if you think I

1975

01:25:18,150 --> 01:25:16,270

didn't want to do it here because I

1976

01:25:19,260 --> 01:25:18,160

don't really have my computer in front

1977

01:25:22,260 --> 01:25:19,270

of me I don't want to do it but if you

1978

01:25:25,530 --> 01:25:22,270

take a cup a glass of water just to give

1979

01:25:26,850 --> 01:25:25,540

you an idea of the amount of energy in

1980

01:25:32,040 --> 01:25:26,860

the atmosphere the amount of substance

1981

01:25:34,230 --> 01:25:32,050

in the atmosphere and if you put a piece

1982

01:25:36,750 --> 01:25:34,240

of cardboard on top of the water and

1983

01:25:38,610 --> 01:25:36,760

then if you turn the glass upside down

1984

01:25:41,940 --> 01:25:38,620

like I'm not gonna do it here get a

1985

01:25:44,370 --> 01:25:41,950

glass yeah right well glass yeah it

1986

01:25:45,900 --> 01:25:44,380

won't fall and the reason is the force

1987

01:25:49,500 --> 01:25:45,910

the pressure of the atmosphere is

1988

01:25:51,870 --> 01:25:49,510

pushing up on the bottom of that piece

1989

01:25:54,060 --> 01:25:51,880

of board more than the force of the

1990

01:25:55,530 --> 01:25:54,070

water is pushing down so that's the kind

1991

01:25:59,810 --> 01:25:55,540

of forces in the atmosphere that we're

1992

01:26:02,850 --> 01:25:59,820

talking about now if you're seeing

1993

01:26:04,890 --> 01:26:02,860

organisms that you know can use their

1994

01:26:08,100 --> 01:26:04,900

bodies to propel themselves with some

1995

01:26:12,330 --> 01:26:08,110

kind of vortex you might find actual

1996

01:26:13,400 --> 01:26:12,340

tracks and traces of them and you know

1997

01:26:15,990 --> 01:26:13,410

what is I don't know if you remember

1998

01:26:19,860 --> 01:26:16,000

what Terrance meeting are you familiar

1999

01:26:21,360 --> 01:26:19,870

with his theories on crop circles he

2000

01:26:23,730 --> 01:26:21,370

came up with the idea that there had to

2001

01:26:26,280 --> 01:26:23,740

be some kind of weather phenomena called

2002

01:26:28,770 --> 01:26:26,290

the plasma vortex something that came

2003

01:26:33,210 --> 01:26:28,780

down and quickly went when and you know

2004

01:26:35,970 --> 01:26:33,220

swirled the plant material now England

2005

01:26:38,100 --> 01:26:35,980

is in a unique it's in a unique

2006

01:26:40,470 --> 01:26:38,110

environmental spot with the Gulf Stream

2007

01:26:42,830 --> 01:26:40,480

moving up there they have a lot of warm

2008

01:26:45,110 --> 01:26:42,840

water and they have a lot of UFO

2009

01:26:48,860 --> 01:26:45,120

phenomena moving over

2010

01:26:50,900 --> 01:26:48,870

British Isles and regularly there they

2011

01:26:53,150 --> 01:26:50,910

see this crop circle phenomena through

2012

01:26:56,000 --> 01:26:53,160

the summer months and there's actually

2013

01:26:58,640 --> 01:26:56,010

been recordings of these later objects

2014

01:27:00,800 --> 01:26:58,650

moving and as they move it seems like

2015

01:27:03,530 --> 01:27:00,810

they pulse and you can see the swirling

2016

01:27:05,570 --> 01:27:03,540

the swirls of the grain below them as

2017

01:27:07,280 --> 01:27:05,580

they move so that's another piece of

2018

01:27:09,290 --> 01:27:07,290

physical evidence it's a possibility

2019

01:27:11,390 --> 01:27:09,300

that these things are actually pulsing

2020

01:27:13,130 --> 01:27:11,400

producing a vortex and pulsing

2021

01:27:15,980 --> 01:27:13,140

repeatedly creating these kind of you

2022

01:27:17,120 --> 01:27:15,990

know multiple circles beneath them okay

2023

01:27:18,410 --> 01:27:17,130

I'm gonna ask you a kind of a strange

2024

01:27:21,910 --> 01:27:18,420

question I don't know if I've asked

2025

01:27:25,400 --> 01:27:21,920

anyone this question now if you were to

2026

01:27:28,820 --> 01:27:25,410

critique the whole thing if you were

2027

01:27:32,600 --> 01:27:28,830

what's your best skeptical argument

2028

01:27:34,880 --> 01:27:32,610

against this against you're against I

2029

01:27:38,990 --> 01:27:34,890

own I bought your own hypothesis yes

2030

01:27:42,860 --> 01:27:39,000

well you believe me it's a good question

2031

01:27:44,330 --> 01:27:42,870

because I wouldn't be doing this if I

2032

01:27:46,870 --> 01:27:44,340

didn't think there was something to it I

2033

01:27:49,610 --> 01:27:46,880

really I got nothing to gain from this

2034

01:27:52,250 --> 01:27:49,620

and I wouldn't be doing it if I hadn't

2035

01:27:55,970 --> 01:27:52,260

asked myself that question repeatedly I

2036

01:27:58,040 --> 01:27:55,980

mean I've said okay what if you know if

2037

01:28:01,130 --> 01:27:58,050

there was this wouldn't we see this and

2038

01:28:06,170 --> 01:28:01,140

what but wouldn't and to be honest that

2039

01:28:07,160 --> 01:28:06,180

my biggest I mean and I don't know if

2040

01:28:09,200 --> 01:28:07,170

it's a case of where it's you know a

2041

01:28:11,690 --> 01:28:09,210

self-reinforcing feedback loop I find a

2042

01:28:15,100 --> 01:28:11,700

justification for my own doubts but you

2043

01:28:19,580 --> 01:28:15,110

know the big question is you know why

2044

01:28:22,280 --> 01:28:19,590

don't we see the bodies more often you

2045

01:28:25,700 --> 01:28:22,290

know and now are you familiar with the

2046

01:28:29,350 --> 01:28:25,710

phenomena of angel hair right are you

2047

01:28:31,850 --> 01:28:29,360

talking about the the one UFO where

2048

01:28:34,070 --> 01:28:31,860

covered the trees they called it

2049

01:28:34,820 --> 01:28:34,080

something like that right it's not just

2050

01:28:36,830 --> 01:28:34,830

one

2051
01:28:38,000 --> 01:28:36,840
yeah there's it's it's repeatedly it's

2052
01:28:39,380 --> 01:28:38,010
been reported

2053
01:28:42,380 --> 01:28:39,390
you know angel hair these kind of

2054
01:28:44,420 --> 01:28:42,390
trailing tentacles beneath the the the

2055
01:28:46,250 --> 01:28:44,430
UFOs is they go by they leave this stuff

2056
01:28:49,010 --> 01:28:46,260
so it kind of sheds off them as they go

2057
01:28:54,140 --> 01:28:49,020
by well the problem with angel hair is

2058
01:28:56,540 --> 01:28:54,150
that it it sublimates it doesn't just

2059
01:28:58,520 --> 01:28:56,550
evaporate it just goes from semi solid

2060
01:29:00,350 --> 01:28:58,530
kind of a sticky

2061
01:29:02,779 --> 01:29:00,360
gelatinous stuff it just goes poof and

2062
01:29:04,279 --> 01:29:02,789
and just turns into gas it disappears so

2063
01:29:06,770 --> 01:29:04,289

people have tried to collect it but it

2064

01:29:10,220 --> 01:29:06,780

just disappears but the few samples that

2065

01:29:11,720 --> 01:29:10,230

they've capped and actually kept they

2066

01:29:14,629 --> 01:29:11,730

analyzed them they have a lot of the

2067

01:29:17,149 --> 01:29:14,639

same chemical compounds as marine life

2068

01:29:18,589 --> 01:29:17,159

they have the same organic compounds so

2069

01:29:21,609 --> 01:29:18,599

that's a big question why don't we see

2070

01:29:24,640 --> 01:29:21,619

more of them and then there's actually

2071

01:29:27,109 --> 01:29:24,650

there have been reported cases there in

2072

01:29:29,720 --> 01:29:27,119

Brazil there was a case and I think the

2073

01:29:32,720 --> 01:29:29,730

19 early 1960s a UFO was supposedly

2074

01:29:36,859 --> 01:29:32,730

exploded and they found these pieces of

2075

01:29:41,720 --> 01:29:36,869

metal that came from them and it came

2076

01:29:43,310 --> 01:29:41,730

from it and it was pure manganese and it

2077

01:29:45,260 --> 01:29:43,320

was purer than any kind of manganese

2078

01:29:47,899 --> 01:29:45,270

that people could have could have

2079

01:29:50,500 --> 01:29:47,909

produced I thought well what's up with

2080

01:29:52,790 --> 01:29:50,510

that and then I started looking at the

2081

01:29:57,169 --> 01:29:52,800

jellyfish as a matter of fact NASA did a

2082

01:29:58,700 --> 01:29:57,179

study into jellyfish in space where they

2083

01:30:00,890 --> 01:29:58,710

took a bunch of jellyfish up there to

2084

01:30:05,060 --> 01:30:00,900

see how they were orient in space really

2085

01:30:08,629 --> 01:30:05,070

if he could yes like Anacin side of the

2086

01:30:11,390 --> 01:30:08,639

the space station or something they took

2087

01:30:15,319 --> 01:30:11,400

it up in the shuttle yeah and they're

2088

01:30:17,600 --> 01:30:15,329

right and and had a doctor from the

2089

01:30:20,419 --> 01:30:17,610

University of Virginia University of

2090

01:30:25,580 --> 01:30:20,429

Medicine conducted this experiment

2091

01:30:28,609 --> 01:30:25,590

because they found the orienting system

2092

01:30:31,129 --> 01:30:28,619

of jellyfish was similar to a human

2093

01:30:34,100 --> 01:30:31,139

system they we have these little

2094

01:30:36,350 --> 01:30:34,110

particles called stato lifts their

2095

01:30:38,240 --> 01:30:36,360

little minerals in our ears that help us

2096

01:30:40,459 --> 01:30:38,250

orient to gravity to the Earth's

2097

01:30:42,799 --> 01:30:40,469

gravitational field and jellyfish have

2098

01:30:45,140 --> 01:30:42,809

similar organisms around the ring of

2099

01:30:48,260 --> 01:30:45,150

their body their little stato lifts

2100

01:30:50,510 --> 01:30:48,270

inside of stato cysts there's these

2101
01:30:53,689 --> 01:30:50,520
little organisms and they found that

2102
01:30:56,629 --> 01:30:53,699
when they farm in the space and caused

2103
01:30:58,939 --> 01:30:56,639
him to mature that the jellyfish could

2104
01:31:00,890 --> 01:30:58,949
orient to gravity even though they were

2105
01:31:02,270 --> 01:31:00,900
in space and they also matured normally

2106
01:31:07,520 --> 01:31:02,280
now I don't know why NASA was studying

2107
01:31:09,379 --> 01:31:07,530
jellyfish in space but the stato lifts

2108
01:31:12,140 --> 01:31:09,389
which is lit there's a stone you know

2109
01:31:13,850 --> 01:31:12,150
the state'll it's or actually made

2110
01:31:17,240 --> 01:31:13,860
mineral then one of the mineral is

2111
01:31:19,010 --> 01:31:17,250
manganese so was this proof that that

2112
01:31:22,300 --> 01:31:19,020
thing was a giant jellyfish dropping it

2113
01:31:26,000 --> 01:31:22,310

stat olace I don't know but it seems to

2114

01:31:27,860 --> 01:31:26,010

so and otherwise I think there's a lot

2115

01:31:29,689 --> 01:31:27,870

to be said for the theory but the only

2116

01:31:32,450 --> 01:31:29,699

you know I'm not like I'm not a believer

2117

01:31:35,810 --> 01:31:32,460

I'm proposing that this is a hypothesis

2118

01:31:38,660 --> 01:31:35,820

that needs to be studied and I think

2119

01:31:41,030 --> 01:31:38,670

that the best way to study it is through

2120

01:31:43,280 --> 01:31:41,040

long-term observation and that's one of

2121

01:31:45,530 --> 01:31:43,290

the challenges that we face is you know

2122

01:31:47,750 --> 01:31:45,540

we gotta look for UFOs we want to sit

2123

01:31:49,580 --> 01:31:47,760

there and look up in the sky and know

2124

01:31:51,709 --> 01:31:49,590

after an hour or so everybody's looking

2125

01:31:54,709 --> 01:31:51,719

at their watches or their phones but

2126

01:31:56,750 --> 01:31:54,719

these things happen not on a regular

2127

01:31:59,630 --> 01:31:56,760

schedule they might happen like any kind

2128

01:32:02,360 --> 01:31:59,640

of natural event only occasionally maybe

2129

01:32:03,770 --> 01:32:02,370

seasonally cyclical E and to really

2130

01:32:05,209 --> 01:32:03,780

capture to learn more about this

2131

01:32:08,270 --> 01:32:05,219

phenomenon we're gonna have to commit to

2132

01:32:09,830 --> 01:32:08,280

studying it on a long-term wide scale

2133

01:32:14,000 --> 01:32:09,840

basis you know go to different locations

2134

01:32:16,189 --> 01:32:14,010

and set up monitoring equipment that'll

2135

01:32:17,780 --> 01:32:16,199

you know let us look not only a visible

2136

01:32:20,120 --> 01:32:17,790

light but in the infrared and

2137

01:32:22,820 --> 01:32:20,130

ultraviolet spectrum and commit to doing

2138

01:32:23,780 --> 01:32:22,830

this over a long period of time but

2139

01:32:27,080 --> 01:32:23,790

that's going to be a substantial

2140

01:32:31,640 --> 01:32:27,090

undertaking another question I have for

2141

01:32:34,010 --> 01:32:31,650

you so if you're taking a flight and

2142

01:32:38,870 --> 01:32:34,020

you're up at 30,000 feet it's something

2143

01:32:41,360 --> 01:32:38,880

like you know 14 below outside at 30,000

2144

01:32:44,750 --> 01:32:41,370

feet and you would think that if there

2145

01:32:45,950 --> 01:32:44,760

are organisms and we're not seeing them

2146

01:32:49,640 --> 01:32:45,960

that they would have to be up higher

2147

01:32:50,540 --> 01:32:49,650

than that so and then we don't usually

2148

01:32:52,430 --> 01:32:50,550

come down

2149

01:32:53,840 --> 01:32:52,440

yeah there's different regions of the

2150

01:32:55,370 --> 01:32:53,850

atmosphere from what I understand

2151
01:32:57,260 --> 01:32:55,380
there's a region that's very cold and

2152
01:33:00,800 --> 01:32:57,270
then above that it gets very hot again

2153
01:33:02,899 --> 01:33:00,810
so well we're not talking yeah yeah and

2154
01:33:06,979 --> 01:33:02,909
then there's and I I we're not talking

2155
01:33:08,510 --> 01:33:06,989
about static environments we're talking

2156
01:33:11,380 --> 01:33:08,520
about these you know things are

2157
01:33:14,270 --> 01:33:11,390
constantly moving and there's little

2158
01:33:17,899 --> 01:33:14,280
areas of opportunity where the resources

2159
01:33:21,890 --> 01:33:17,909
are just right for things to flourish

2160
01:33:25,490 --> 01:33:21,900
to grow one of the the questions that

2161
01:33:27,860 --> 01:33:25,500
it's as foremost in my mind is them

2162
01:33:29,390 --> 01:33:27,870
the sightings that the astronauts have

2163
01:33:32,330 --> 01:33:29,400

had and the recordings that they've had

2164

01:33:34,700 --> 01:33:32,340

of these objects have been right at dawn

2165

01:33:37,580 --> 01:33:34,710

and you know we got this region and

2166

01:33:39,830 --> 01:33:37,590

again that's a perfect habitat edge of

2167

01:33:41,210 --> 01:33:39,840

Dawn that moves around the planet it's

2168

01:33:43,280 --> 01:33:41,220

moving around the planet all the time

2169

01:33:46,040 --> 01:33:43,290

you know there's a region of dawn and

2170

01:33:49,970 --> 01:33:46,050

it's where you know the harsh light

2171

01:33:52,940 --> 01:33:49,980

meets the cold darkness so right at that

2172

01:33:54,560 --> 01:33:52,950

region you got an area of moderation now

2173

01:33:56,630 --> 01:33:54,570

what if your something is not tied to

2174

01:33:59,300 --> 01:33:56,640

the surface and you can move through

2175

01:34:02,240 --> 01:33:59,310

that region and this is where we've seen

2176

01:34:04,640 --> 01:34:02,250

a lot of those objects in fact them you

2177

01:34:07,550 --> 01:34:04,650

know that STS 75 with the tether that

2178

01:34:09,260 --> 01:34:07,560

took place the shuttle was in night time

2179

01:34:12,440 --> 01:34:09,270

and they saw it as they were looking

2180

01:34:15,140 --> 01:34:12,450

towards dawn now is it because the

2181

01:34:18,350 --> 01:34:15,150

objects are only visible in that extreme

2182

01:34:21,080 --> 01:34:18,360

lighting condition or is there actually

2183

01:34:24,080 --> 01:34:21,090

you know a swarming of objects around

2184

01:34:26,270 --> 01:34:24,090

that that edge affect that habitat at

2185

01:34:28,280 --> 01:34:26,280

where the dawn exists in the atmosphere

2186

01:34:30,500 --> 01:34:28,290

and I think that'd be a prime region for

2187

01:34:32,210 --> 01:34:30,510

study if we put something up there to

2188

01:34:37,040 --> 01:34:32,220

actually observe right at that dawn

2189

01:34:40,520 --> 01:34:37,050

region now did you ever hear of the UFO

2190

01:34:42,740 --> 01:34:40,530

sighting and Space Lab back in 1974 or

2191

01:34:43,580 --> 01:34:42,750

something like that no tell me about

2192

01:34:46,010 --> 01:34:43,590

that

2193

01:34:49,040 --> 01:34:46,020

well I've actually I've actually spoken

2194

01:34:53,060 --> 01:34:49,050

to the astronaut boy his name slipping

2195

01:34:56,330 --> 01:34:53,070

my mind Henley recently passed away he

2196

01:34:57,680 --> 01:34:56,340

was a fourth man on the moon just can't

2197

01:35:00,890 --> 01:34:57,690

get his name out I'll think of it in a

2198

01:35:03,290 --> 01:35:00,900

minute but anyway it was a very very

2199

01:35:05,990 --> 01:35:03,300

large object but it was sort of organic

2200

01:35:10,430 --> 01:35:06,000

looking that's why I brought that up but

2201
01:35:11,540 --> 01:35:10,440
he would not talk about it I he just

2202
01:35:15,230 --> 01:35:11,550
didn't want to talk about it when I

2203
01:35:17,660 --> 01:35:15,240
asked him if he would arresting why do

2204
01:35:24,140 --> 01:35:17,670
you think was he afraid of being well

2205
01:35:28,580 --> 01:35:24,150
crazy is that yeah I mean obviously yeah

2206
01:35:34,430 --> 01:35:28,590
but I hate that when I forget someone's

2207
01:35:38,900 --> 01:35:34,440
name great guy - yeah anyway as far as

2208
01:35:39,410 --> 01:35:38,910
you know people reporting things that

2209
01:35:43,490 --> 01:35:39,420
they

2210
01:35:46,459 --> 01:35:43,500
tell you this quick story of Denise

2211
01:35:50,229 --> 01:35:46,469
stoner she was on the show I don't know

2212
01:35:54,620 --> 01:35:50,239
maybe three three years ago or so and

2213
01:35:56,689 --> 01:35:54,630

she was telling us story about you know

2214

01:35:58,280 --> 01:35:56,699

she believes that she was abducted and

2215

01:36:00,140 --> 01:35:58,290

her whole family was actually involved

2216

01:36:01,850 --> 01:36:00,150

in this because they were driving in a

2217

01:36:04,820 --> 01:36:01,860

car and the car

2218

01:36:06,680 --> 01:36:04,830

all of a sudden lost control and next

2219

01:36:10,939 --> 01:36:06,690

thing she knows she's on this craft

2220

01:36:12,560 --> 01:36:10,949

according to her and the thing that the

2221

01:36:18,140 --> 01:36:12,570

reason I'm bringing this up is she said

2222

01:36:21,110 --> 01:36:18,150

it was alive she said this alive Wow

2223

01:36:23,660 --> 01:36:21,120

I have you ever heard of people talk

2224

01:36:26,180 --> 01:36:23,670

about such things like that well yeah

2225

01:36:27,770 --> 01:36:26,190

that's and this is the you know I know

2226

01:36:35,050 --> 01:36:27,780

this topic sounds weird but it gets even

2227

01:36:39,080 --> 01:36:35,060

weirder still I mean okay well you think

2228

01:36:41,900 --> 01:36:39,090

throughout history other cultures have

2229

01:36:45,590 --> 01:36:41,910

talked about these beings coming down

2230

01:36:48,260 --> 01:36:45,600

from the sky in fact we've we've seen

2231

01:36:51,470 --> 01:36:48,270

the one artifact that's person you know

2232

01:36:54,140 --> 01:36:51,480

that's kind of lasted throughout history

2233

01:36:56,860 --> 01:36:54,150

and almost every continent or the

2234

01:36:59,030 --> 01:36:56,870

pyramids and you know that people

2235

01:37:00,860 --> 01:36:59,040

cultures bilbies they put a lot of

2236

01:37:04,130 --> 01:37:00,870

energy into building these things to

2237

01:37:07,010 --> 01:37:04,140

reach out to something that was coming

2238

01:37:09,260 --> 01:37:07,020

down and why were they doing that you

2239

01:37:12,890 --> 01:37:09,270

know what were they gods were they some

2240

01:37:15,229 --> 01:37:12,900

kind of you know bringer of abundance

2241

01:37:19,010 --> 01:37:15,239

where they somehow bringing you know

2242

01:37:20,570 --> 01:37:19,020

rain and minerals and seeds making the

2243

01:37:22,520 --> 01:37:20,580

land fertile or something and why were

2244

01:37:25,640 --> 01:37:22,530

they putting all this energy and they're

2245

01:37:28,100 --> 01:37:25,650

reaching up to the sky now if you think

2246

01:37:30,380 --> 01:37:28,110

you know you read at first I used to

2247

01:37:32,090 --> 01:37:30,390

discount and this gets in with a pretty

2248

01:37:34,520 --> 01:37:32,100

weird stuff I used to discount a lot of

2249

01:37:36,410 --> 01:37:34,530

stories about abductees and you know the

2250

01:37:40,070 --> 01:37:36,420

people talking about the experiments on

2251

01:37:42,080 --> 01:37:40,080

you know the people's seed cells and

2252

01:37:45,050 --> 01:37:42,090

stuff and and then you wonder you go

2253

01:37:46,910 --> 01:37:45,060

well who knows maybe there is something

2254

01:37:48,500 --> 01:37:46,920

to it but I don't even know about that I

2255

01:37:50,770 --> 01:37:48,510

think one of the questions you have to

2256

01:37:52,880 --> 01:37:50,780

ask yourself is you know what evidence

2257

01:37:54,620 --> 01:37:52,890

do we have and that's

2258

01:37:56,000 --> 01:37:54,630

really you have to that hold this to

2259

01:37:58,460 --> 01:37:56,010

this since it is something that's kind

2260

01:38:01,340 --> 01:37:58,470

of you know unsubstantiated at this

2261

01:38:03,770 --> 01:38:01,350

point it's it's very much on the fringe

2262

01:38:06,890 --> 01:38:03,780

I think we have to look at the highest

2263

01:38:09,110 --> 01:38:06,900

standards of evidence and you know as

2264

01:38:11,600 --> 01:38:09,120

believable as somebody might be we know

2265

01:38:14,210 --> 01:38:11,610

the FAL ability of human memory and you

2266

01:38:15,770 --> 01:38:14,220

just have to wonder now is I mean to me

2267

01:38:19,270 --> 01:38:15,780

it sounds like and maybe maybe she was

2268

01:38:22,370 --> 01:38:19,280

taken by something that was alive but

2269

01:38:24,680 --> 01:38:22,380

who knows I think that if there are

2270

01:38:27,290 --> 01:38:24,690

these things up there like any other

2271

01:38:29,960 --> 01:38:27,300

form of Wildlife you might have a whole

2272

01:38:32,690 --> 01:38:29,970

range of ones that are you know benign

2273

01:38:35,090 --> 01:38:32,700

they could care less what we do you

2274

01:38:36,740 --> 01:38:35,100

might have some that are hostile they

2275

01:38:38,990 --> 01:38:36,750

may actually pray on us and on our

2276

01:38:40,760 --> 01:38:39,000

livestock and you might have one that

2277

01:38:44,090 --> 01:38:40,770

may actually benefit us in some ways

2278

01:38:45,890 --> 01:38:44,100

ways we might even not even know so you

2279

01:38:47,810 --> 01:38:45,900

know it's kind of a comes full circle

2280

01:38:50,000 --> 01:38:47,820

even though they might not be aliens and

2281

01:38:52,340 --> 01:38:50,010

rocket ships they might be somehow

2282

01:38:53,570 --> 01:38:52,350

visitors alright I want to revisit that

2283

01:38:54,890 --> 01:38:53,580

because I want to ask you something

2284

01:38:57,320 --> 01:38:54,900

about that but we have a caller on the

2285

01:39:03,560 --> 01:38:57,330

line call me your first name and where

2286

01:39:06,950 --> 01:39:03,570

you calling from hey Bobby is a regular

2287

01:39:09,260 --> 01:39:06,960

and we met down in North Carolina how's

2288

01:39:12,050 --> 01:39:09,270

everybody holding out down there your

2289

01:39:15,430 --> 01:39:12,060

you never good you weren't hit your area

2290

01:39:17,540 --> 01:39:15,440

was not hit by the hurricane actually

2291

01:39:19,190 --> 01:39:17,550

yes actually it came right over us

2292

01:39:20,930 --> 01:39:19,200

there's a lot of places out here still

2293

01:39:23,210 --> 01:39:20,940

without power because wall the trees we

2294

01:39:24,860 --> 01:39:23,220

only had 40 50 ml that one gust but a

2295

01:39:28,490 --> 01:39:24,870

lot of trees came down taking that power

2296

01:39:30,380 --> 01:39:28,500

but I only lost power for maybe 30 40

2297

01:39:32,810 --> 01:39:30,390

minutes and then the cable was out for

2298

01:39:35,210 --> 01:39:32,820

two days and the phone service is

2299

01:39:38,180 --> 01:39:35,220

actually out a few days it's just ya

2300

01:39:39,830 --> 01:39:38,190

know but other reason call it is I don't

2301

01:39:42,770 --> 01:39:39,840

know he's aware there's a guy named

2302

01:39:44,660 --> 01:39:42,780

Trevor James constable who wrote a book

2303

01:39:47,570 --> 01:39:44,670

called the cosmic pulp of life

2304

01:39:49,100 --> 01:39:47,580

absolutely the revolution lady

2305

01:39:50,690 --> 01:39:49,110

biological power behind you I thought

2306

01:39:51,290 --> 01:39:50,700

these basically exactly what you're

2307

01:39:53,660 --> 01:39:51,300

talking about

2308

01:39:56,150 --> 01:39:53,670

yeah yeah that's like said I this is not

2309

01:39:57,860 --> 01:39:56,160

my you know I was not the first person

2310

01:40:01,040 --> 01:39:57,870

to think of this one of the things with

2311

01:40:03,200 --> 01:40:01,050

Trevor James constable is that he you

2312

01:40:06,200 --> 01:40:03,210

know what I'm saying is that these

2313

01:40:06,620 --> 01:40:06,210

things are perfectly natural within the

2314

01:40:09,860 --> 01:40:06,630

realm

2315

01:40:11,270 --> 01:40:09,870

science that we know of right now if we

2316

01:40:13,090 --> 01:40:11,280

look at the capabilities of

2317

01:40:15,800 --> 01:40:13,100

invertebrates that we know right now

2318

01:40:18,080 --> 01:40:15,810

these things are a possibility

2319

01:40:19,520 --> 01:40:18,090

well I loved hearing his stories but I

2320

01:40:21,020 --> 01:40:19,530

think he went off a little bit when he

2321

01:40:24,200 --> 01:40:21,030

started talking about them being some

2322

01:40:25,700 --> 01:40:24,210

kind of unknown energy beings and then

2323

01:40:27,379 --> 01:40:25,710

he started speculating about the nature

2324

01:40:29,600 --> 01:40:27,389

of you know them being some kind of pure

2325

01:40:33,080 --> 01:40:29,610

energy or something and what I'm saying

2326

01:40:34,520 --> 01:40:33,090

is that they could be very explainable

2327

01:40:37,550 --> 01:40:34,530

in terms of what we already know about

2328

01:40:39,649 --> 01:40:37,560

marine invertebrate biology at this

2329

01:40:42,080 --> 01:40:39,659

point but ya know there was a Trevor

2330

01:40:45,590 --> 01:40:42,090

Jane yeah they live in the sky he wrote

2331

01:40:48,890 --> 01:40:45,600

and then there was Ivan Sanderson wrote

2332

01:40:54,800 --> 01:40:48,900

a book called uninited visitors and as

2333

01:40:56,840 --> 01:40:54,810

I mentioned Kenneth Arnold in the

2334

01:40:59,030 --> 01:40:56,850

fifties or sixties and took in Fred

2335

01:41:01,430 --> 01:40:59,040

pictures in the desert I remember that

2336

01:41:03,979 --> 01:41:01,440

was Trevor James constable yeah okay

2337

01:41:06,020 --> 01:41:03,989

yeah hey there's a cool looking pictures

2338

01:41:07,550 --> 01:41:06,030

aren't they they're words that I

2339

01:41:08,390 --> 01:41:07,560

couldn't find any online recently but

2340

01:41:10,490 --> 01:41:08,400

yeah that was nuts

2341

01:41:12,290 --> 01:41:10,500

if you want to actually seen I've

2342

01:41:13,760 --> 01:41:12,300

actually seen multiple UFOs I'm one of

2343

01:41:16,280 --> 01:41:13,770

those weird people that just happens to

2344

01:41:19,010 --> 01:41:16,290

look up and see stuff yeah and different

2345

01:41:21,229 --> 01:41:19,020

things and I'm not yet to see a

2346

01:41:23,750 --> 01:41:21,239

jellyfish though but I've seen blobs of

2347

01:41:26,330 --> 01:41:23,760

light now did you know did you feel like

2348

01:41:27,470 --> 01:41:26,340

we were talking earlier about feeling

2349

01:41:31,459 --> 01:41:27,480

like something was watching you and

2350

01:41:33,770 --> 01:41:31,469

looking up and seeing it or at least

2351

01:41:36,050 --> 01:41:33,780

three the times I happen to look right

2352

01:41:38,540 --> 01:41:36,060

directly at it and one of times my son

2353

01:41:40,280 --> 01:41:38,550

was them at the earlier this year

2354

01:41:42,770 --> 01:41:40,290

there's a report worse and aircraft are

2355

01:41:44,870 --> 01:41:42,780

talking to your tower out Midwest and

2356

01:41:46,610 --> 01:41:44,880

actually saw a white cylinder go

2357

01:41:48,350 --> 01:41:46,620

overhead the one plane was talking

2358

01:41:50,360 --> 01:41:48,360

another plan well I've seen that object

2359

01:41:52,669 --> 01:41:50,370

in North Carolina that's twice I mean a

2360

01:41:54,320 --> 01:41:52,679

lot of the times I was watching it it

2361

01:41:56,120 --> 01:41:54,330

was perfectly still it looked like a

2362

01:41:58,280 --> 01:41:56,130

white cigarette we need to kind of just

2363

01:42:00,320 --> 01:41:58,290

a white glow and my son was five feet

2364

01:42:01,970 --> 01:42:00,330

away I was throwing grass seed and I

2365

01:42:03,919 --> 01:42:01,980

told my son look look over there over

2366

01:42:06,500 --> 01:42:03,929

the treetops and he could not see it and

2367

01:42:08,570 --> 01:42:06,510

the minute I took my eyes away from him

2368

01:42:09,860 --> 01:42:08,580

and 20 black at it it was gone but I

2369

01:42:11,419 --> 01:42:09,870

mean the whole time on someone to look

2370

01:42:12,770 --> 01:42:11,429

at it he could not see it like I see it

2371

01:42:16,370 --> 01:42:12,780

well that's so weird

2372

01:42:17,959 --> 01:42:16,380

very good hey Thank You Martin Bobby you

2373

01:42:19,550 --> 01:42:17,969

ever get out to see the Brown Mountain

2374

01:42:20,569 --> 01:42:19,560

lights out there in Western North

2375

01:42:22,799 --> 01:42:20,579

Carolina

2376

01:42:24,569 --> 01:42:22,809

no I'd like you some time that's

2377

01:42:27,029 --> 01:42:24,579

probably about three or four hours away

2378

01:42:29,219 --> 01:42:27,039

so it's not too bad yeah that's worth

2379

01:42:31,620 --> 01:42:29,229

going to that's a it's a very creepy

2380

01:42:33,839 --> 01:42:31,630

very cool experience and you know if

2381

01:42:37,950 --> 01:42:33,849

you're lucky you go there and like fall

2382

01:42:39,330 --> 01:42:37,960

like this time of year you might huh I

2383

01:42:42,600 --> 01:42:39,340

get creeped out in the backyard in the

2384

01:42:44,819 --> 01:42:42,610

dark you know want to go to this place

2385

01:42:48,509 --> 01:42:44,829

then because it's like it's a big gorge

2386

01:42:50,040 --> 01:42:48,519

and it's yes it's like you know you're

2387

01:42:51,450 --> 01:42:50,050

out there and the wind's blowing and

2388

01:42:58,950 --> 01:42:51,460

there's nobody around and you're like a

2389

01:43:02,000 --> 01:42:58,960

little man okay thanks Bobby I I had

2390

01:43:04,709 --> 01:43:02,010

started think Who I had I had someone

2391

01:43:08,549 --> 01:43:04,719

talking about that Oh Matty Beckerman

2392

01:43:12,750 --> 01:43:08,559

did a movie about the Brown Mountain

2393

01:43:14,580 --> 01:43:12,760

lights yeah yeah that was fascinating so

2394

01:43:17,219 --> 01:43:14,590

have you actually visited and and

2395

01:43:20,310 --> 01:43:17,229

checked that out yes I have that was

2396

01:43:22,229 --> 01:43:20,320

very fascinating it was a you know the

2397

01:43:23,910 --> 01:43:22,239

the folks we were talking to everybody

2398

01:43:25,830 --> 01:43:23,920

down there has a story about the lights

2399

01:43:28,049 --> 01:43:25,840

and that's what's fascinating about the

2400

01:43:29,969 --> 01:43:28,059

these phenomena is you go to these areas

2401
01:43:32,549 --> 01:43:29,979
and ya ask people about these things and

2402
01:43:35,189 --> 01:43:32,559
people have seen them and they have some

2403
01:43:37,560 --> 01:43:35,199
great stories about you know the way the

2404
01:43:40,830 --> 01:43:37,570
lights interacted with people and

2405
01:43:42,810 --> 01:43:40,840
there's actually a there's a great story

2406
01:43:45,239 --> 01:43:42,820
down there some folks set up an

2407
01:43:49,680 --> 01:43:45,249
observation tower there in the late

2408
01:43:52,469 --> 01:43:49,690
1960s to watch the lights and they saw

2409
01:43:56,129 --> 01:43:52,479
the lights coming out of like fissures

2410
01:43:57,569 --> 01:43:56,139
in the ground and the lights came up and

2411
01:44:00,209 --> 01:43:57,579
the guys are up in the top and they

2412
01:44:02,700 --> 01:44:00,219
actually swarmed the guys in the in the

2413
01:44:06,120 --> 01:44:02,710

observation booth in the platform up

2414

01:44:09,870 --> 01:44:06,130

there and most of them felt faint and

2415

01:44:12,330 --> 01:44:09,880

one guy actually passed out so but but

2416

01:44:16,649 --> 01:44:12,340

when we went down there it was weird it

2417

01:44:20,729 --> 01:44:16,659

was early in the season and we saw some

2418

01:44:23,549 --> 01:44:20,739

like very faint bluish kind of lights

2419

01:44:25,469 --> 01:44:23,559

that were in crevices and in trees but

2420

01:44:27,600 --> 01:44:25,479

we didn't see any of the big lights

2421

01:44:29,790 --> 01:44:27,610

moving you know across the sky or down

2422

01:44:31,259 --> 01:44:29,800

through the forests and stuff but people

2423

01:44:33,930 --> 01:44:31,269

say that the lights seemed to come out

2424

01:44:34,350 --> 01:44:33,940

of the side of the hill go down to the

2425

01:44:36,060 --> 01:44:34,360

river

2426

01:44:38,130 --> 01:44:36,070

it's down below and then come back up

2427

01:44:40,920 --> 01:44:38,140

the hill but those are something that

2428

01:44:43,530 --> 01:44:40,930

are seen regularly there people have

2429

01:44:48,270 --> 01:44:43,540

speculated Plasma I think and there's

2430

01:44:51,030 --> 01:44:48,280

also a high level of copper in that area

2431

01:44:52,890 --> 01:44:51,040

and interesting yeah and I don't know if

2432

01:44:56,100 --> 01:44:52,900

that you know I mean it could be

2433

01:44:57,240 --> 01:44:56,110

something natural I mean yes yeah

2434

01:44:58,770 --> 01:44:57,250

well that's why I said the only way to

2435

01:45:02,700 --> 01:44:58,780

find out about these things is to look

2436

01:45:04,500 --> 01:45:02,710

closer now there is a phenomena in the

2437

01:45:07,230 --> 01:45:04,510

we actually like I said we went down to

2438

01:45:08,910 --> 01:45:07,240

this place in Virginia called West Point

2439

01:45:10,710 --> 01:45:08,920

where they said this lake they called

2440

01:45:13,350 --> 01:45:10,720

the Quahog light that people have seen

2441

01:45:16,050 --> 01:45:13,360

for generations and we went out there

2442

01:45:19,320 --> 01:45:16,060

with low light cameras and infrared

2443

01:45:20,790 --> 01:45:19,330

cameras and we when I went out there

2444

01:45:23,160 --> 01:45:20,800

over the course of a year and we got

2445

01:45:25,950 --> 01:45:23,170

some really cool footage but it was

2446

01:45:27,990 --> 01:45:25,960

frustrating because you realize you know

2447

01:45:31,290 --> 01:45:28,000

you're not gonna be there all the time

2448

01:45:34,020 --> 01:45:31,300

and if they are some kind of wildlife

2449

01:45:37,710 --> 01:45:34,030

you know John keel and some of his UFO

2450

01:45:39,530 --> 01:45:37,720

books wrote that the UFOs seem to not

2451

01:45:42,690 --> 01:45:39,540

they don't want to be seen by people

2452

01:45:44,130 --> 01:45:42,700

they go away from where people are which

2453

01:45:46,110 --> 01:45:44,140

if you were an organism that would

2454

01:45:48,120 --> 01:45:46,120

probably be pretty smart I mean we don't

2455

01:45:49,230 --> 01:45:48,130

we don't step on a red ant hill and you

2456

01:45:52,140 --> 01:45:49,240

know these organisms aren't going to

2457

01:45:54,270 --> 01:45:52,150

come near a city so you know if you're

2458

01:45:55,830 --> 01:45:54,280

gonna be out there making noise and you

2459

01:45:57,300 --> 01:45:55,840

know bustling around shining lights

2460

01:45:58,770 --> 01:45:57,310

there's a good chance that if they are

2461

01:46:00,780 --> 01:45:58,780

some kind of organism they're not going

2462

01:46:04,140 --> 01:46:00,790

to come out but even so we got some

2463

01:46:05,880 --> 01:46:04,150

really interesting footage and but it

2464

01:46:07,410 --> 01:46:05,890

showed the challenge to me of trying to

2465

01:46:09,950 --> 01:46:07,420

do something kind of field study and

2466

01:46:14,280 --> 01:46:09,960

they'll have to do it over a long term

2467

01:46:18,960 --> 01:46:14,290

getting back to possible jellyfish-like

2468

01:46:21,690 --> 01:46:18,970

creatures living in the sky okay let's

2469

01:46:24,530 --> 01:46:21,700

talk about intelligence I think of a

2470

01:46:27,720 --> 01:46:24,540

jellyfish is really not too intelligent

2471

01:46:31,200 --> 01:46:27,730

right but do you think that these things

2472

01:46:33,420 --> 01:46:31,210

have intelligence well it depends on how

2473

01:46:36,690 --> 01:46:33,430

we define intelligence I mean as humans

2474

01:46:40,320 --> 01:46:36,700

we define intelligence is thinking like

2475

01:46:42,480 --> 01:46:40,330

humans and solving human problems but if

2476

01:46:45,330 --> 01:46:42,490

you look at invertebrates and some of

2477

01:46:46,590 --> 01:46:45,340

the challenges of life that they saw you

2478

01:46:48,780 --> 01:46:46,600

know one could argue that they do have

2479

01:46:52,170 --> 01:46:48,790

their own form of intelligence I mean

2480

01:46:53,820 --> 01:46:52,180

they reproduce many different ways to

2481

01:46:56,370 --> 01:46:53,830

you know increase the odds that they're

2482

01:47:00,510 --> 01:46:56,380

going to continue to have their DNA

2483

01:47:02,220 --> 01:47:00,520

succeed they actually you know move

2484

01:47:04,740 --> 01:47:02,230

through different habitats they can go

2485

01:47:07,200 --> 01:47:04,750

into a static state and then when

2486

01:47:10,050 --> 01:47:07,210

conditions are in first some jellyfish

2487

01:47:12,270 --> 01:47:10,060

can actually regress in their maturity

2488

01:47:14,280 --> 01:47:12,280

and some people said that's some kind of

2489

01:47:17,010 --> 01:47:14,290

immortality they seem to go back to a

2490

01:47:18,840 --> 01:47:17,020

previous form of their life and then you

2491

01:47:23,460 --> 01:47:18,850

know they mature again when conditions

2492

01:47:24,570 --> 01:47:23,470

are right yeah I you know so we have to

2493

01:47:27,270 --> 01:47:24,580

think you know they have a different a

2494

01:47:28,800 --> 01:47:27,280

different nervous system than we do and

2495

01:47:31,830 --> 01:47:28,810

they don't build things but then they

2496

01:47:34,920 --> 01:47:31,840

they you know use minerals in their

2497

01:47:36,870 --> 01:47:34,930

environment to conduct their lives you

2498

01:47:38,730 --> 01:47:36,880

know we are used to looking at things

2499

01:47:41,030 --> 01:47:38,740

with our two eyes and we perceive the

2500

01:47:42,870 --> 01:47:41,040

world with our stereoscopic vision

2501

01:47:46,740 --> 01:47:42,880

jellyfish can have you know multiple

2502

01:47:48,600 --> 01:47:46,750

eyes maybe 27 eyes around the rim rim of

2503

01:47:50,310 --> 01:47:48,610

their body you know how are they

2504

01:47:53,130 --> 01:47:50,320

perceiving the world I don't know if we

2505

01:47:54,810 --> 01:47:53,140

can perceive that you know if we can

2506

01:47:58,080 --> 01:47:54,820

even think of how they're perceiving the

2507

01:47:59,880 --> 01:47:58,090

world in fact if you look at some UFO

2508

01:48:02,640 --> 01:47:59,890

videos like I said there's some where it

2509

01:48:04,170 --> 01:48:02,650

looks like they're looking down at us as

2510

01:48:05,310 --> 01:48:04,180

much as we're looking up at them it's a

2511

01:48:09,210 --> 01:48:05,320

little bit frightening to think you know

2512

01:48:13,910 --> 01:48:11,820

we have a caller just called in caller

2513

01:48:16,730 --> 01:48:13,920

your first name where you calling from

2514

01:48:20,430 --> 01:48:16,740

it's Brian again from Frederick Maryland

2515

01:48:24,900 --> 01:48:20,440

right you have having a new phone before

2516

01:48:27,990 --> 01:48:24,910

you call back just just giving you a

2517

01:48:29,700 --> 01:48:28,000

hard talk job I know I was just thinking

2518

01:48:31,260 --> 01:48:29,710

like when I was looking at the arm some

2519

01:48:33,630 --> 01:48:31,270

footage and stuff these things because

2520

01:48:35,700 --> 01:48:33,640

the trope of craft or whatever and it

2521

01:48:37,380 --> 01:48:35,710

was kind of pulsating like squids

2522

01:48:41,010 --> 01:48:37,390

pulsate you know how they change color

2523

01:48:43,560 --> 01:48:41,020

Oh tom yeah yeah that's the thing that

2524

01:48:46,380 --> 01:48:43,570

this yeah oh that's it's people

2525

01:48:48,600 --> 01:48:46,390

described UFOs is having colors like you

2526

01:48:50,730 --> 01:48:48,610

know they can't describe and you know

2527

01:48:52,230 --> 01:48:50,740

these organisms actually make all may

2528

01:48:53,940 --> 01:48:52,240

make their own kind of color if you look

2529

01:48:55,980 --> 01:48:53,950

at some of the bioluminescent organisms

2530

01:48:58,950 --> 01:48:55,990

the displays of light they have are just

2531

01:49:02,250 --> 01:48:58,960

like mind-boggling it's amazing you just

2532

01:49:04,710 --> 01:49:02,260

open me up to like a whole new world yes

2533

01:49:06,570 --> 01:49:04,720

I'm glad I could do that stunt and the

2534

01:49:10,770 --> 01:49:06,580

thing is it make scientific sense I mean

2535

01:49:12,720 --> 01:49:10,780

we're not you know I mean that's the to

2536

01:49:15,510 --> 01:49:12,730

me like suppose that's the most amazing

2537

01:49:17,970 --> 01:49:15,520

thing is life itself and you know nature

2538

01:49:19,800 --> 01:49:17,980

is like a composer you know it gets a

2539

01:49:21,120 --> 01:49:19,810

theme and it starts spinning variations

2540

01:49:22,860 --> 01:49:21,130

on a successful theme while these

2541

01:49:24,840 --> 01:49:22,870

organisms are the most some of the most

2542

01:49:26,910 --> 01:49:24,850

successful organisms in the oceans and

2543

01:49:29,180 --> 01:49:26,920

so why wouldn't we see them in the

2544

01:49:31,979 --> 01:49:29,190

atmosphere and it seems like we do so

2545

01:49:34,100 --> 01:49:31,989

yeah it's an interesting having for

2546

01:49:37,440 --> 01:49:34,110

further study yeah I'm glad to think so

2547

01:49:39,420 --> 01:49:37,450

I'm so sorry I didn't mean to take up

2548

01:49:41,910 --> 01:49:39,430

your time again I just popped in my head

2549

01:49:43,590 --> 01:49:41,920

I gotta say it no check it out I mean if

2550

01:49:46,290 --> 01:49:43,600

you're interested start looking at like

2551

01:49:51,780 --> 01:49:46,300

videos of squid and jellyfish and you

2552

01:49:53,340 --> 01:49:51,790

know what they can do is in my it makes

2553

01:49:56,460 --> 01:49:53,350

a lot of sense they're constantly

2554

01:49:58,170 --> 01:49:56,470

pulsating yeah yeah and just like a lot

2555

01:50:00,800 --> 01:49:58,180

of people report UFOs and a lot of the

2556

01:50:05,460 --> 01:50:00,810

footage shows is that pulsing movement

2557

01:50:07,770 --> 01:50:05,470

pulsating light coming from Italy right

2558

01:50:09,960 --> 01:50:07,780

well right I think he's he's out of a

2559

01:50:13,110 --> 01:50:09,970

signal all right well well thanks a lot

2560

01:50:15,900 --> 01:50:13,120

Brian thanks Brian

2561

01:50:17,460 --> 01:50:15,910

so yeah another thing you know I'm still

2562

01:50:20,100 --> 01:50:17,470

I'm still having a hard time with the

2563

01:50:23,190 --> 01:50:20,110

the buoyancy what keeps something up in

2564

01:50:26,100 --> 01:50:23,200

the air unless I somehow can make its

2565

01:50:29,729 --> 01:50:26,110

own helium or something like that right

2566

01:50:32,670 --> 01:50:29,739

right well let me just say I don't know

2567

01:50:35,820 --> 01:50:32,680

there's a there's an organism called the

2568

01:50:37,590 --> 01:50:35,830

luminous flying squid okay this is this

2569

01:50:39,090 --> 01:50:37,600

is a known that's the name that's the

2570

01:50:41,430 --> 01:50:39,100

common name it's not a scientific name

2571

01:50:44,940 --> 01:50:41,440

okay I mean they know that this organism

2572

01:50:48,090 --> 01:50:44,950

this squid jets out of the water and it

2573

01:50:50,460 --> 01:50:48,100

flies above the surface of the water for

2574

01:50:53,550 --> 01:50:50,470

you know over a mile it's been observed

2575

01:50:57,750 --> 01:50:53,560

for a mile yeah yeah and it produces

2576

01:51:00,630 --> 01:50:57,760

its up light yeah well that's the thing

2577

01:51:04,979 --> 01:51:00,640

is it you know we know that there are a

2578

01:51:07,290 --> 01:51:04,989

giant squid in the oceans that we can't

2579

01:51:09,750 --> 01:51:07,300

perceive I mean they I mean they they're

2580

01:51:12,510 --> 01:51:09,760

too smart they stay away from humans we

2581

01:51:13,440 --> 01:51:12,520

found some of the giant squid but then

2582

01:51:14,580 --> 01:51:13,450

they're saying now they're saying what

2583

01:51:16,259 --> 01:51:14,590

their colossal squid

2584

01:51:18,930 --> 01:51:16,269

you'll make a huge achill

2585

01:51:24,209 --> 01:51:18,940

Oh squid but there have been reported

2586

01:51:27,390 --> 01:51:24,219

stories of you know a sailor waking up

2587

01:51:29,700 --> 01:51:27,400

and he looks up in his the rigging of

2588

01:51:34,049 --> 01:51:29,710

his craft and there's a giant squid

2589

01:51:36,089 --> 01:51:34,059

caught in the rigging of a craft now how

2590

01:51:37,080 --> 01:51:36,099

did it get snared there was it was fun

2591

01:51:39,089 --> 01:51:37,090

must've been flying through the air

2592

01:51:40,950 --> 01:51:39,099

jumping you know through the air above

2593

01:51:44,100 --> 01:51:40,960

his craft and it got snagged there so

2594

01:51:45,870 --> 01:51:44,110

you know we hear reports I don't know if

2595

01:51:49,290 --> 01:51:45,880

you ever heard of the mystery rockets in

2596

01:51:51,660 --> 01:51:49,300

over Sweden then going into yeah the

2597

01:51:53,640 --> 01:51:51,670

coast rockets right the ghost rockets

2598

01:51:56,939 --> 01:51:53,650

going in and out of fjords and over in

2599

01:52:01,439 --> 01:51:56,949

Sweden now there's one of the earliest

2600

01:52:03,779 --> 01:52:01,449

UFO photographs is over a Swedish Harbor

2601
01:52:05,549 --> 01:52:03,789
and it's this object hovering over the

2602
01:52:08,399 --> 01:52:05,559
harbour you can see its shadow down on

2603
01:52:10,350 --> 01:52:08,409
the water and it looks the outline it's

2604
01:52:12,569 --> 01:52:10,360
not a great photograph it's from 1907

2605
01:52:15,089 --> 01:52:12,579
but the outline of it it looks just like

2606
01:52:18,209 --> 01:52:15,099
a squid so who's to say that those

2607
01:52:21,120 --> 01:52:18,219
aren't migrating into the warmer waters

2608
01:52:22,379 --> 01:52:21,130
in summer months and you know where the

2609
01:52:24,299 --> 01:52:22,389
fish are more numerous and then

2610
01:52:26,279 --> 01:52:24,309
migrating out when you know the weather

2611
01:52:28,169 --> 01:52:26,289
changes and I don't you've heard about

2612
01:52:30,899 --> 01:52:28,179
those ghost rockets and ghost submarines

2613
01:52:32,790 --> 01:52:30,909

how they confounded the defense agencies

2614

01:52:34,229 --> 01:52:32,800

because these objects would be under the

2615

01:52:35,609 --> 01:52:34,239

water moving around and they think they

2616

01:52:37,979 --> 01:52:35,619

were Soviet submarines but they could

2617

01:52:39,330 --> 01:52:37,989

never get close to them and the same

2618

01:52:40,709 --> 01:52:39,340

thing they go in they go through the

2619

01:52:44,129 --> 01:52:40,719

atmosphere into the water and then they

2620

01:52:46,589 --> 01:52:44,139

come back out and go away so they are

2621

01:52:48,239 --> 01:52:46,599

we're going to be able to to catch one I

2622

01:52:51,180 --> 01:52:48,249

don't know if we're gonna be able to tag

2623

01:52:53,040 --> 01:52:51,190

one that would be great but I think we

2624

01:52:56,029 --> 01:52:53,050

might be able to see one I mean I know

2625

01:52:59,189 --> 01:52:56,039

there have been a lot of sightings of

2626

01:53:00,989 --> 01:52:59,199

the fact I'm one of the next videos I

2627

01:53:02,520 --> 01:53:00,999

want to do is about you know the type of

2628

01:53:04,109 --> 01:53:02,530

squid legged objects that have been

2629

01:53:06,959 --> 01:53:04,119

recorded and the thing about them is

2630

01:53:07,739 --> 01:53:06,969

they're they're really fast and they're

2631

01:53:09,569 --> 01:53:07,749

very smart

2632

01:53:11,879 --> 01:53:09,579

nurse wood squid have some of the

2633

01:53:13,770 --> 01:53:11,889

largest nerves in the animal kingdom and

2634

01:53:17,399 --> 01:53:13,780

the largest eye that we know I know a

2635

01:53:19,140 --> 01:53:17,409

basketball right yeah yeah hey they are

2636

01:53:21,120 --> 01:53:19,150

out of time I can't believe it went by

2637

01:53:22,799 --> 01:53:21,130

so fast

2638

01:53:25,080 --> 01:53:22,809

all right so hey thanks so much for

2639

01:53:26,879 --> 01:53:25,090

interesting I don't know if I buy it all

2640

01:53:29,310 --> 01:53:26,889

but I think it's interesting and you

2641

01:53:32,339 --> 01:53:29,320

present it very well

2642

01:53:35,520 --> 01:53:32,349

I asked you to take a look on our DVD

2643

01:53:38,100 --> 01:53:35,530

not alone the extras on them are the raw

2644

01:53:39,629 --> 01:53:38,110

NASA footage uh-huh and I've had a lot

2645

01:53:41,850 --> 01:53:39,639

of people you know it's nice I sent out

2646

01:53:43,649 --> 01:53:41,860

their concept and a lot of people say I

2647

01:53:46,800 --> 01:53:43,659

don't get this but if you just let that

2648

01:53:49,350 --> 01:53:46,810

footage play just put it on in the

2649

01:53:51,419 --> 01:53:49,360

background and look at it it's it's

2650

01:53:54,479 --> 01:53:51,429

beyond words you're gonna be like what

2651
01:53:55,680 --> 01:53:54,489
the heck is that and it starts to make

2652
01:53:56,220 --> 01:53:55,690
sense when you like to look at the

2653
01:53:58,050 --> 01:53:56,230
footage

2654
01:54:00,450 --> 01:53:58,060
alright hey thanks so much god it's been

2655
01:54:04,169 --> 01:54:00,460
a real pleasure and thank you for having

2656
01:54:04,890 --> 01:54:04,179
me on all right all right take care all

2657
01:54:07,080 --> 01:54:04,900
right everyone

2658
01:54:09,569 --> 01:54:07,090
so that's it for the show thanks so much

2659
01:54:13,709 --> 01:54:09,579
for listening and we will be back next

2660
01:54:16,890 --> 01:54:13,719
week we have Nick Redfern on and we'll

2661
01:54:19,050 --> 01:54:16,900
be back next week and thanks again for

2662
01:54:20,459 --> 01:54:19,060
listening and I want to thank the people

2663
01:54:24,419 --> 01:54:20,469

that helped out with the show Alejandro

2664

01:54:29,220 --> 01:54:24,429

Rojas our guest Scott - Shane and Evan

2665

01:54:31,379 --> 01:54:29,230

in the background and Keith over at Dark

2666

01:54:35,100 --> 01:54:31,389

Matter digital network and race over at

2667

01:54:36,510 --> 01:54:35,110

kgr a radio thank them all and so that's
