

RAY STANFORD

1
00:00:03,169 --> 00:00:01,730
this is that triangle you know there's

2
00:00:04,820 --> 00:00:03,179
explanation for everything that appeared

3
00:00:07,280 --> 00:00:04,830
in the Rendlesham forest incident

4
00:00:09,950 --> 00:00:07,290
it doesn't involve aliens at all it was

5
00:00:13,520 --> 00:00:09,960
completely silent it comes right over

6
00:00:15,320 --> 00:00:13,530
our head it's so classic flying-saucer

7
00:00:16,939 --> 00:00:15,330
really standing in the clearing he

8
00:00:18,560 --> 00:00:16,949
turned over to my father and held his

9
00:00:25,070 --> 00:00:18,570
hand and he looked in his eyes and said

10
00:00:27,920 --> 00:00:25,080
we're not alone welcome to podcast UFO

11
00:00:29,750 --> 00:00:27,930
for our live show during the show feel

12
00:00:32,420 --> 00:00:29,760
free to participate live in our chat

13
00:00:35,209 --> 00:00:32,430

room and don't forget to Like us on our

14

00:00:37,280 --> 00:00:35,219

very active Facebook page hello and

15

00:00:39,860 --> 00:00:37,290

welcome to the show I'm Martyn Willis

16

00:00:42,110 --> 00:00:39,870

your host and we have Alejandro Rojas

17

00:00:44,900 --> 00:00:42,120

coming up with UFO updates in just a

18

00:00:47,630 --> 00:00:44,910

second we our guest tonight is a long

19

00:00:50,270 --> 00:00:47,640

time and I mean longtime researcher for

20

00:00:51,830 --> 00:00:50,280

many many years and decades going all

21

00:00:54,380 --> 00:00:51,840

the way back to the 60s we have ray

22

00:00:57,819 --> 00:00:54,390

Stanford is going to be on he's also

23

00:01:00,319 --> 00:00:57,829

going to be talking about an amazing

24

00:01:03,319 --> 00:01:00,329

discovery that he made at the NASA

25

00:01:06,550 --> 00:01:03,329

Goddard Space Center

26
00:01:10,520 --> 00:01:06,560
which I was fortunate enough to actually

27
00:01:12,590 --> 00:01:10,530
go down there and see see kind of not

28
00:01:15,590 --> 00:01:12,600
exactly this discovery but other

29
00:01:17,870 --> 00:01:15,600
discoveries he made and yes dinosaurs

30
00:01:21,020 --> 00:01:17,880
were walking around at Goddard Space

31
00:01:22,460 --> 00:01:21,030
Center which i think is really something

32
00:01:25,880 --> 00:01:22,470
pretty amazing we're gonna be talking

33
00:01:29,270 --> 00:01:25,890
about that he is now known around the

34
00:01:33,200 --> 00:01:29,280
world for this actually as you know he's

35
00:01:37,039 --> 00:01:33,210
an amazing amateur paleontologist

36
00:01:39,010 --> 00:01:37,049
he has his discovery is beyond anything

37
00:01:41,480 --> 00:01:39,020
that people have found as far as

38
00:01:43,609 --> 00:01:41,490

dinosaur tracks go mammal tracks and

39

00:01:45,440 --> 00:01:43,619

dinosaurs tracks together anyway we'll

40

00:01:47,690 --> 00:01:45,450

be talking about that the latter part of

41

00:01:51,069 --> 00:01:47,700

the show first part of the show we're

42

00:01:53,240 --> 00:01:51,079

gonna be discussing UFOs his his

43

00:01:56,630 --> 00:01:53,250

detection system that he had many years

44

00:01:58,910 --> 00:01:56,640

ago what he found and then also about

45

00:02:01,429 --> 00:01:58,920

ancient discs you're not going to

46

00:02:04,550 --> 00:02:01,439

believe the way they look exactly like a

47

00:02:07,700 --> 00:02:04,560

flying saucer so we're going to have

48

00:02:10,040 --> 00:02:07,710

images people watching on YouTube we're

49

00:02:11,449 --> 00:02:10,050

going to have images come up on that so

50

00:02:13,940 --> 00:02:11,459

you can see what we're talking about and

51
00:02:15,650 --> 00:02:13,950
I want to thank everyone that's a

52
00:02:18,140 --> 00:02:15,660
towards the show we absolutely could not

53
00:02:19,640 --> 00:02:18,150
do it without you thanks so much anyone

54
00:02:21,710 --> 00:02:19,650
can help out doesn't matter where you

55
00:02:24,199 --> 00:02:21,720
listen all you have to do is check out

56
00:02:26,479 --> 00:02:24,209
podcast UFO comm all the informations

57
00:02:29,600 --> 00:02:26,489
there we have occasional blogs we have

58
00:02:31,699 --> 00:02:29,610
one a couple weeks old and so always

59
00:02:34,309 --> 00:02:31,709
welcome guest blogs if anyone's

60
00:02:36,590 --> 00:02:34,319
interested in doing that and I know I

61
00:02:38,210 --> 00:02:36,600
have a good feeling I know one of the

62
00:02:40,520 --> 00:02:38,220
stories out hondo is going to be talking

63
00:02:42,110 --> 00:02:40,530

about because never and the time that

64

00:02:46,059 --> 00:02:42,120

I've been doing the show have I received

65

00:02:48,410 --> 00:02:46,069

so many emails about a sighting that

66

00:02:52,610 --> 00:02:48,420

came up I hope he's giving a lot of

67

00:02:55,220 --> 00:02:52,620

email to Alejandro welcome yes oh hey

68

00:02:58,309 --> 00:02:55,230

hey how's it going good good

69

00:03:03,650 --> 00:02:58,319

so I would guess that you're getting a

70

00:03:05,180 --> 00:03:03,660

lot of email about this Irish flight

71

00:03:08,509 --> 00:03:05,190

commercial flight sighting all those

72

00:03:11,809 --> 00:03:08,519

planes that saw that sighting you an

73

00:03:15,199 --> 00:03:11,819

Irish commercial one no I'm kidding

74

00:03:16,580 --> 00:03:15,209

yes that is exactly the story I was

75

00:03:18,860 --> 00:03:16,590

going to talk about because it is all

76
00:03:22,550 --> 00:03:18,870
over the place in big news and it sounds

77
00:03:24,920 --> 00:03:22,560
like a great case yeah so the site that

78
00:03:27,740 --> 00:03:24,930
I feel has covered it very well

79
00:03:30,020 --> 00:03:27,750
concisely and thoroughly and as always

80
00:03:32,900 --> 00:03:30,030
done a great job is the drive the the

81
00:03:36,500 --> 00:03:32,910
war zone section oh yeah written by

82
00:03:38,539 --> 00:03:36,510
Tyler rogue away so it's a great article

83
00:03:43,009 --> 00:03:38,549
you can find links to this especially if

84
00:03:45,380 --> 00:03:43,019
you go to the open minds UFO news forum

85
00:03:46,940 --> 00:03:45,390
on Facebook you'll be able to see a lot

86
00:03:48,800 --> 00:03:46,950
of people talking about it and some of

87
00:03:51,560 --> 00:03:48,810
the information but it's a really cool

88
00:03:54,140 --> 00:03:51,570

case like some of the other ones that

89

00:03:55,160 --> 00:03:54,150

the drive has posted and you know I

90

00:03:59,180 --> 00:03:55,170

should add this because this is

91

00:04:00,830 --> 00:03:59,190

important to drive feels more like it's

92

00:04:03,800 --> 00:04:00,840

okay even though they're a credible

93

00:04:05,539 --> 00:04:03,810

defense website ever since the New York

94

00:04:08,180 --> 00:04:05,549

Times article talking about the DoD

95

00:04:11,449 --> 00:04:08,190

having a UFO investigation organization

96

00:04:13,580 --> 00:04:11,459

they feel more able and like it's okay

97

00:04:17,060 --> 00:04:13,590

to write about UFO stories so they have

98

00:04:18,920 --> 00:04:17,070

been from an aviation aerospace sort of

99

00:04:21,440 --> 00:04:18,930

perspective which is really interesting

100

00:04:25,219 --> 00:04:21,450

and thorough and so in their article

101
00:04:27,890 --> 00:04:25,229
they talk about these multiple witnesses

102
00:04:31,340 --> 00:04:27,900
all pilots in Ireland

103
00:04:35,090 --> 00:04:31,350
who saw this object it was pre-dawn on

104
00:04:38,150 --> 00:04:35,100
November 9th so very recently about 45

105
00:04:43,219 --> 00:04:38,160
minutes before the sunrise multiple UFOs

106
00:04:46,460 --> 00:04:43,229
being seen the ia a which is the Irish

107
00:04:48,110 --> 00:04:46,470
Aviation Authority said that following

108
00:04:51,140 --> 00:04:48,120
reports from a small number of aircraft

109
00:04:53,659 --> 00:04:51,150
on Friday November 9th of unusual air

110
00:04:55,520 --> 00:04:53,669
activity there was a report filed this

111
00:04:57,890 --> 00:04:55,530
report will be investigated under the

112
00:05:01,760 --> 00:04:57,900
normal confidential a current

113
00:05:03,379 --> 00:05:01,770

investigation process so they are not

114

00:05:13,400 --> 00:05:03,389

going to be sharing who knows if they'll

115

00:05:16,340 --> 00:05:13,410

show the results or even sure though say

116

00:05:19,400 --> 00:05:16,350

something but fortunately somehow the

117

00:05:21,110 --> 00:05:19,410

audio of many of these pilots has come

118

00:05:22,550 --> 00:05:21,120

available so you can listen to that I

119

00:05:25,430 --> 00:05:22,560

know they've got it right here on the

120

00:05:28,820 --> 00:05:25,440

drive but it's really interesting

121

00:05:31,070 --> 00:05:28,830

so one plane said that they weren't

122

00:05:34,610 --> 00:05:31,080

showing anything on the radar but they

123

00:05:37,070 --> 00:05:34,620

saw something moving extremely fast it

124

00:05:40,570 --> 00:05:37,080

was described as a very bright light

125

00:05:45,589 --> 00:05:40,580

they said it rapidly it flew alongside

126

00:05:48,200 --> 00:05:45,599

the left side of this 787 before it

127

00:05:51,520 --> 00:05:48,210

quote rapidly veered to the north and

128

00:05:58,060 --> 00:05:51,530

then disappeared at very high speed

129

00:06:01,100 --> 00:05:58,070

another pilot of a Atlantic Boeing 747

130

00:06:03,560 --> 00:06:01,110

said that there were multiple objects

131

00:06:05,420 --> 00:06:03,570

following the same trajectory and that

132

00:06:08,629 --> 00:06:05,430

they were moving at extremely high

133

00:06:10,460 --> 00:06:08,639

speeds then the other pilot kind of

134

00:06:13,820 --> 00:06:10,470

chimed in and said I'm glad it wasn't

135

00:06:17,420 --> 00:06:13,830

just me and another one said that the

136

00:06:19,730 --> 00:06:17,430

that they also saw these objects and

137

00:06:20,930 --> 00:06:19,740

that they were moving very fastly in

138

00:06:23,290 --> 00:06:20,940

fact their quote was that they were

139

00:06:25,610 --> 00:06:23,300

moving the speed they were moving was

140

00:06:30,260 --> 00:06:25,620

astronomical that it was something like

141

00:06:32,360 --> 00:06:30,270

Mach 2 so yeah very interesting exciting

142

00:06:34,279 --> 00:06:32,370

another really good one where pilots got

143

00:06:37,399 --> 00:06:34,289

involved again they said that there

144

00:06:40,700 --> 00:06:37,409

didn't seem to be any fear of collision

145

00:06:41,650 --> 00:06:40,710

or that they didn't there was no

146

00:06:44,110 --> 00:06:41,660

aggressive

147

00:06:46,620 --> 00:06:44,120

of maneuvering our behavior by these

148

00:06:48,820 --> 00:06:46,630

objects almost like they were coming in

149

00:06:50,890 --> 00:06:48,830

either taking a look or letting

150

00:06:54,190 --> 00:06:50,900

themselves be seen and then zooming off

151
00:06:58,570 --> 00:06:54,200
at a very fast speed kind of like what

152
00:07:01,540 --> 00:06:58,580
we saw in 2004 in San Diego with the

153
00:07:06,910 --> 00:07:01,550
Nimitz the tic-tac UFOs or even in 1952

154
00:07:09,100 --> 00:07:06,920
with Washington DC or in Chile and in

155
00:07:12,070 --> 00:07:09,110
many other countries the same sort of

156
00:07:14,080 --> 00:07:12,080
kind of flying edge demonstration of

157
00:07:17,320 --> 00:07:14,090
that this extreme technology and speed

158
00:07:20,200 --> 00:07:17,330
cruising off at very fast rate so yeah

159
00:07:22,210 --> 00:07:20,210
great sighting I'm wondering you know I

160
00:07:24,130 --> 00:07:22,220
mean every pilot now probably has their

161
00:07:25,750 --> 00:07:24,140
they're probably texting half the time

162
00:07:28,390 --> 00:07:25,760
because they have it on autopilot I'm

163
00:07:30,130 --> 00:07:28,400

surprised that or maybe they did maybe

164

00:07:32,050 --> 00:07:30,140

someone tried to snap a picture did you

165

00:07:34,600 --> 00:07:32,060

hear anything about that or read

166

00:07:39,460 --> 00:07:34,610

anything no I've heard nothing of any

167

00:07:41,110 --> 00:07:39,470

pictures being taken and I mean you know

168

00:07:43,900 --> 00:07:41,120

I just got off a long flight from

169

00:07:46,480 --> 00:07:43,910

Baltimore and you know it's really

170

00:07:48,880 --> 00:07:46,490

difficult to take pictures of especially

171

00:07:51,130 --> 00:07:48,890

a bright light off in the distance from

172

00:07:53,590 --> 00:07:51,140

the ground even if you're closer from an

173

00:07:55,120 --> 00:07:53,600

airplane so pictures are really

174

00:07:57,670 --> 00:07:55,130

difficult unless you have a great camera

175

00:08:01,630 --> 00:07:57,680

kind of like the one I'm using now it's

176

00:08:04,600 --> 00:08:01,640

set up and ready with a long lens then

177

00:08:06,880 --> 00:08:04,610

it's going to be really hard if it's not

178

00:08:08,409 --> 00:08:06,890

a professional now infrared is something

179

00:08:11,080 --> 00:08:08,419

different but of course commercial

180

00:08:12,460 --> 00:08:11,090

airlines don't carry an infrared radar

181

00:08:16,270 --> 00:08:12,470

what they're looking for things in the

182

00:08:18,310 --> 00:08:16,280

sky so yeah no information on that and I

183

00:08:20,230 --> 00:08:18,320

did want to add one more update the

184

00:08:22,810 --> 00:08:20,240

drive did reach out to the Irish

185

00:08:24,940 --> 00:08:22,820

government for the Irish Defense Forces

186

00:08:27,010 --> 00:08:24,950

in particular for answers they had a

187

00:08:29,950 --> 00:08:27,020

number of questions but they got one

188

00:08:32,380 --> 00:08:29,960

simple response which was the Defense

189

00:08:34,000 --> 00:08:32,390

Forces do not disclose their operational

190

00:08:37,089 --> 00:08:34,010

procedures for operational security

191

00:08:39,459 --> 00:08:37,099

reasons this incident is a matter for

192

00:08:41,320 --> 00:08:39,469

the Irish Aviation Authority so

193

00:08:44,110 --> 00:08:41,330

essentially they're not going to say

194

00:08:47,410 --> 00:08:44,120

anything and they're gonna leave it up

195

00:08:50,320 --> 00:08:47,420

to the to their ih you conduct the

196

00:08:54,250 --> 00:08:50,330

investigation and who knows if they'll

197

00:08:55,460 --> 00:08:54,260

have a response or not Wow now and when

198

00:08:59,300 --> 00:08:55,470

in a case like

199

00:09:01,910 --> 00:08:59,310

this I've just noticed that it seems

200

00:09:03,440 --> 00:09:01,920

like it's this has gone viral when I

201
00:09:07,430 --> 00:09:03,450
don't think you know you mentioned

202
00:09:09,920 --> 00:09:07,440
earlier that you know Pete that the guy

203
00:09:12,260 --> 00:09:09,930
from the war whatever it is they're the

204
00:09:14,450 --> 00:09:12,270
one that wrote the story the war is no

205
00:09:16,550 --> 00:09:14,460
none worse right he felt more

206
00:09:19,580 --> 00:09:16,560
comfortable writing about it since you

207
00:09:21,980 --> 00:09:19,590
know the December 16th you know story in

208
00:09:24,350 --> 00:09:21,990
the New York Times and I think that's I

209
00:09:25,910 --> 00:09:24,360
think that's having an effect across the

210
00:09:28,670 --> 00:09:25,920
board in this because the Washington

211
00:09:30,860 --> 00:09:28,680
Post I mean I can get you to a special

212
00:09:32,900 --> 00:09:30,870
screening on Thursday so just a couple

213
00:09:35,120 --> 00:09:32,910

days from now where you can watch the

214

00:09:38,420 --> 00:09:35,130

first couple episodes of the Blue Book

215

00:09:41,630 --> 00:09:38,430

Project Project Blue Book but email

216

00:09:43,490 --> 00:09:41,640

alejandro or contact at open minds TV

217

00:09:46,700 --> 00:09:43,500

and I can send you information on that

218

00:09:48,680 --> 00:09:46,710

wow that's amazing yeah free popcorn and

219

00:09:50,930 --> 00:09:48,690

pop - this is being put on by the

220

00:09:53,510 --> 00:09:50,940

publishers they're doing I'm gonna be

221

00:09:55,610 --> 00:09:53,520

doing a panel during one of these events

222

00:09:57,230 --> 00:09:55,620

and others will at other so I'm only

223

00:09:59,030 --> 00:09:57,240

able I've only in contact with the

224

00:10:00,830 --> 00:09:59,040

people doing the Las Vegas and Phoenix

225

00:10:03,980 --> 00:10:00,840

one so I can get people into that one

226

00:10:07,340 --> 00:10:03,990

for free and but keep an eye out for

227

00:10:10,250 --> 00:10:07,350

other events like this going on yeah I

228

00:10:12,260 --> 00:10:10,260

know Sam moranto sent out a notice so

229

00:10:14,810 --> 00:10:12,270

cool yeah that if that's in the Chicago

230

00:10:16,490 --> 00:10:14,820

area so that's going on cool and he's

231

00:10:18,620 --> 00:10:16,500

fairly easy I think he's fairly easy to

232

00:10:20,960 --> 00:10:18,630

find out I don't know if I think so I

233

00:10:24,230 --> 00:10:20,970

think he's on Facebook at least around

234

00:10:25,940 --> 00:10:24,240

Facebook excellent so we are we're

235

00:10:27,290 --> 00:10:25,950

running a little bit on time but I want

236

00:10:30,530 --> 00:10:27,300

you to talk about what you did last

237

00:10:34,850 --> 00:10:30,540

weekend if you have and kind of sure

238

00:10:36,410 --> 00:10:34,860

yeah I was at alien Con I guess to try

239

00:10:39,380 --> 00:10:36,420

to get through quickly we were selling

240

00:10:41,480 --> 00:10:39,390

stuff so we had a UFO Congress booth and

241

00:10:43,780 --> 00:10:41,490

I'm wearing the Hat kind of cuz my

242

00:10:46,580 --> 00:10:43,790

hair's a mess but also it's a cool hat

243

00:10:48,050 --> 00:10:46,590

but right over my shoulder here this was

244

00:10:50,240 --> 00:10:48,060

a big kit what we were selling at the

245

00:10:52,730 --> 00:10:50,250

table this hovering UFO that levitates

246

00:10:54,350 --> 00:10:52,740

this lamp that's also a Bluetooth

247

00:10:56,810 --> 00:10:54,360

speaker and we've got those up on the

248

00:10:59,630 --> 00:10:56,820

store now but they're super cool

249

00:11:03,080 --> 00:10:59,640

sopia besides ed I had several talks and

250

00:11:05,090 --> 00:11:03,090

a panel with Richard Dolan Stephen

251
00:11:07,130 --> 00:11:05,100
Bassett and Jason McClellan where we

252
00:11:09,170 --> 00:11:07,140
talked about disclosure and post

253
00:11:11,480 --> 00:11:09,180
disclosure mostly took a lot of

254
00:11:14,150 --> 00:11:11,490
from the audience The History Channel

255
00:11:17,360 --> 00:11:14,160
had a big presence there promoting their

256
00:11:18,890 --> 00:11:17,370
television show and you know it was

257
00:11:19,970 --> 00:11:18,900
there was a lot of people not as many as

258
00:11:25,640 --> 00:11:19,980
Pasadena

259
00:11:28,790 --> 00:11:25,650
there were a lot of people a whole lot

260
00:11:30,920 --> 00:11:28,800
of people as packed but still so it was

261
00:11:32,480 --> 00:11:30,930
a lot of fun one of the highlights for

262
00:11:34,850 --> 00:11:32,490
me was one of my talks was about

263
00:11:37,820 --> 00:11:34,860

Spielberg and of course J Allen Hynek

264

00:11:40,490 --> 00:11:37,830

had a big part of Close Encounters he

265

00:11:42,050 --> 00:11:40,500

was the guy who you know inspired

266

00:11:45,620 --> 00:11:42,060

Spielberg and gave him the case

267

00:11:47,180 --> 00:11:45,630

information and I talked a lot about

268

00:11:49,280 --> 00:11:47,190

Hynek because he's so important and I

269

00:11:51,470 --> 00:11:49,290

think he's so cool and a very important

270

00:11:53,510 --> 00:11:51,480

person and talked about in that he went

271

00:11:55,390 --> 00:11:53,520

in as a skeptic came out of believer and

272

00:11:58,460 --> 00:11:55,400

really started civilian UFO

273

00:12:03,610 --> 00:11:58,470

investigations winning and he helped the

274

00:12:06,650 --> 00:12:03,620

Air Force do investigations but after my

275

00:12:09,890 --> 00:12:06,660

talk this gentleman came up and

276

00:12:12,980 --> 00:12:09,900

introduced himself it was Paul Hynek J

277

00:12:15,230 --> 00:12:12,990

Allen Hynek son yes I was so thrilled

278

00:12:16,580 --> 00:12:15,240

and he was saying thank you for all the

279

00:12:18,470 --> 00:12:16,590

kind things that you said about my

280

00:12:20,540 --> 00:12:18,480

father I'd love to stay in contact and

281

00:12:23,000 --> 00:12:20,550

of course I said well would you mind

282

00:12:24,650 --> 00:12:23,010

coming on my podcast and he said yes so

283

00:12:28,370 --> 00:12:24,660

finally I'm able to get to someone

284

00:12:31,010 --> 00:12:28,380

before you do and I will have Paul Hynek

285

00:12:34,010 --> 00:12:31,020

on the podcast soon isn't that great

286

00:12:35,720 --> 00:12:34,020

does he look anything like his dad not

287

00:12:38,720 --> 00:12:35,730

really of course his dad always had a

288

00:12:41,150 --> 00:12:38,730

beard and a pipe but you know he's got a

289

00:12:45,350 --> 00:12:41,160

he had a jacket on a very professional

290

00:12:48,080 --> 00:12:45,360

tall slender guy and I looked him up and

291

00:12:51,590 --> 00:12:48,090

he's a professor an associate professor

292

00:12:55,130 --> 00:12:51,600

at Pepperdine along with a number of

293

00:12:59,090 --> 00:12:55,140

starting up companies he's a very you

294

00:13:01,910 --> 00:12:59,100

know successful businessman and so an

295

00:13:03,830 --> 00:13:01,920

impressive person so that was the the

296

00:13:05,330 --> 00:13:03,840

thrill of the conference besides and I

297

00:13:07,670 --> 00:13:05,340

tell you more about this later since

298

00:13:09,710 --> 00:13:07,680

we're running on we had a booth next to

299

00:13:11,660 --> 00:13:09,720

us that was selling meteorites and you

300

00:13:13,460 --> 00:13:11,670

can see online I videotaped a piece of

301
00:13:15,530 --> 00:13:13,470
Mars but they gave me a little meteorite

302
00:13:17,120 --> 00:13:15,540
so I'll show you guys that sometime on

303
00:13:18,920 --> 00:13:17,130
your watch or something did I hear about

304
00:13:20,660 --> 00:13:18,930
your something about your whoa no that

305
00:13:23,000 --> 00:13:20,670
was someone else's that was these guys

306
00:13:25,400 --> 00:13:23,010
the owner of that company

307
00:13:29,900 --> 00:13:25,410
he's an expert in this he has a slice of

308
00:13:32,990 --> 00:13:29,910
Mars as the face of his watch I'm

309
00:13:34,700 --> 00:13:33,000
amazing one-of-a-kind item probably

310
00:13:37,970 --> 00:13:34,710
worse at least tens of thousands of

311
00:13:41,600 --> 00:13:37,980
dollars a chunk of Mars that I held was

312
00:13:43,790 --> 00:13:41,610
worth at over \$40,000 now this is way

313
00:13:45,650 --> 00:13:43,800

now because people know it didn't come

314

00:13:49,130 --> 00:13:45,660

back from art so this is a meteorite

315

00:13:51,380 --> 00:13:49,140

landed right it come back right so it's

316

00:13:53,600 --> 00:13:51,390

a meteorite yeah so that's essentially

317

00:13:54,950 --> 00:13:53,610

what they deal in are meteorites and

318

00:13:56,330 --> 00:13:54,960

that's where this comes from because

319

00:13:57,650 --> 00:13:56,340

some people are like what do you mean

320

00:14:00,590 --> 00:13:57,660

somebody went to Mars and brought it

321

00:14:03,440 --> 00:14:00,600

back no it's a - meteorite so that's how

322

00:14:04,910 --> 00:14:03,450

we you know fortunately and I don't

323

00:14:07,490 --> 00:14:04,920

believe there's a whole lot of them but

324

00:14:09,830 --> 00:14:07,500

chunks that have been dislodged from

325

00:14:12,380 --> 00:14:09,840

Mars probably from asteroid strikes and

326

00:14:15,500 --> 00:14:12,390

things like that and even I think

327

00:14:17,770 --> 00:14:15,510

volcanic activity can push objects into

328

00:14:20,300 --> 00:14:17,780

the atmosphere high enough where it can

329

00:14:22,880 --> 00:14:20,310

escape the gravity of the planet and

330

00:14:24,680 --> 00:14:22,890

then float around for probably hundreds

331

00:14:26,750 --> 00:14:24,690

of thousands maybe millions of years

332

00:14:29,270 --> 00:14:26,760

before eventually landing on our planet

333

00:14:30,710 --> 00:14:29,280

and then through testing very similar to

334

00:14:33,890 --> 00:14:30,720

the type that we talked about with Chris

335

00:14:36,410 --> 00:14:33,900

Cogswell we're able to show in fact you

336

00:14:37,700 --> 00:14:36,420

know I that it kind of demonstrates that

337

00:14:39,470 --> 00:14:37,710

one of the things I was thinking of the

338

00:14:42,230 --> 00:14:39,480

criteria of proving something is from an

339

00:14:44,900 --> 00:14:42,240

ET civilization because that watch we

340

00:14:48,170 --> 00:14:44,910

just talked about is technology it is

341

00:14:50,150 --> 00:14:48,180

from space but it's not a technology

342

00:14:52,670 --> 00:14:50,160

that we're not aware of so we know this

343

00:14:54,770 --> 00:14:52,680

is something that's human built so that

344

00:14:57,350 --> 00:14:54,780

third threshold would have to be met

345

00:14:59,600 --> 00:14:57,360

which is that you know it's this space

346

00:15:01,760 --> 00:14:59,610

material being transformed into

347

00:15:03,500 --> 00:15:01,770

something using technology we don't know

348

00:15:05,570 --> 00:15:03,510

but it's a demonstration how his watch

349

00:15:07,940 --> 00:15:05,580

meets two of those three criteria and

350

00:15:10,670 --> 00:15:07,950

why it's so important that those three

351
00:15:14,300 --> 00:15:10,680
criteria be met before we call something

352
00:15:16,040 --> 00:15:14,310
you know et technology someone just

353
00:15:20,090 --> 00:15:16,050
asked in the chat room did you recently

354
00:15:23,330 --> 00:15:20,100
meet with our Robert Bigelow I did not I

355
00:15:25,100 --> 00:15:23,340
wish I had just wanted to clear that up

356
00:15:29,020 --> 00:15:25,110
they they're just wondering if you had

357
00:15:31,940 --> 00:15:29,030
and then another thing in the chat right

358
00:15:33,800 --> 00:15:31,950
well go ahead finish that I was just

359
00:15:35,690 --> 00:15:33,810
going to say that part might have come

360
00:15:36,970 --> 00:15:35,700
from because I did go to a friends and

361
00:15:40,370 --> 00:15:36,980
family

362
00:15:44,210 --> 00:15:40,380
event where Jeremy Court Bell showed us

363
00:15:46,040 --> 00:15:44,220

his movie that the skinwalker movie very

364

00:15:49,970 --> 00:15:46,050

exciting we'll have news up tomorrow -

365

00:15:51,230 --> 00:15:49,980

about his new movie but we talked about

366

00:15:52,730 --> 00:15:51,240

how there were a lot of people there and

367

00:15:54,440 --> 00:15:52,740

we couldn't disclose all the people

368

00:15:55,790 --> 00:15:54,450

there so people might have assumed

369

00:15:58,360 --> 00:15:55,800

Bigelow there it was there but

370

00:16:01,490 --> 00:15:58,370

unfortunately he was not oh okay and

371

00:16:03,410 --> 00:16:01,500

someone also wrote on there the story

372

00:16:06,350 --> 00:16:03,420

that you were discussing earlier about

373

00:16:08,930 --> 00:16:06,360

the Irish you know UFO they're saying an

374

00:16:12,020 --> 00:16:08,940

Irish astronomer claims that it was a

375

00:16:14,870 --> 00:16:12,030

meteor and I wondered if you heard

376

00:16:17,180 --> 00:16:14,880

anything about that and and if there was

377

00:16:20,120 --> 00:16:17,190

any validity or possible validity to

378

00:16:22,430 --> 00:16:20,130

that I haven't heard a bit about that

379

00:16:26,000 --> 00:16:22,440

but you know a lot of people are

380

00:16:29,630 --> 00:16:26,010

pointing out that what was described

381

00:16:31,940 --> 00:16:29,640

does not seem to fit what this person

382

00:16:35,900 --> 00:16:31,950

was saying however you know depending on

383

00:16:37,640 --> 00:16:35,910

angles a meteor I can look strange I

384

00:16:40,430 --> 00:16:37,650

mean especially in a plane if it's

385

00:16:42,410 --> 00:16:40,440

running somewhat parallel to you which

386

00:16:45,650 --> 00:16:42,420

happens at times because they're up in

387

00:16:48,260 --> 00:16:45,660

the air it's I guess it's not something

388

00:16:50,150 --> 00:16:48,270

we can rule out yet but thus far I've

389

00:16:52,490 --> 00:16:50,160

seen a lot of people saying and it's not

390

00:16:54,770 --> 00:16:52,500

fitting all of the checkmarks of what

391

00:16:56,720 --> 00:16:54,780

was witnessed but would use a lot more

392

00:16:58,550 --> 00:16:56,730

have to go into it yeah would you see a

393

00:17:01,010 --> 00:16:58,560

meteor during the day I mean I guess

394

00:17:03,500 --> 00:17:01,020

it's possible if it's bright enough yeah

395

00:17:05,150 --> 00:17:03,510

I think you can you can see it in Italy

396

00:17:08,660 --> 00:17:05,160

betrayal because you know it's on fire

397

00:17:10,250 --> 00:17:08,670

and it's cruising along typically these

398

00:17:13,490 --> 00:17:10,260

things when they're falling apart there

399

00:17:15,650 --> 00:17:13,500

will be pieces of it that will flare so

400

00:17:18,560 --> 00:17:15,660

the brightness you'll see as various

401
00:17:20,270 --> 00:17:18,570
different flares of different I think

402
00:17:21,710 --> 00:17:20,280
you witnessed something like that where

403
00:17:23,750 --> 00:17:21,720
it's kind of more of a flickering where

404
00:17:26,390 --> 00:17:23,760
it gets super bright then it gets less

405
00:17:29,150 --> 00:17:26,400
brighten until it dims completely out as

406
00:17:32,270 --> 00:17:29,160
those pieces at Luminess or make the

407
00:17:34,850 --> 00:17:32,280
brightness burn off another thing it

408
00:17:38,060 --> 00:17:34,860
should be earthbound too I mean not not

409
00:17:40,070 --> 00:17:38,070
like a level path well it should be

410
00:17:42,260 --> 00:17:40,080
earthbound but when you're in the air

411
00:17:44,450 --> 00:17:42,270
and some of these things can come in at

412
00:17:46,610 --> 00:17:44,460
a very slight angle where it will look

413
00:17:49,310 --> 00:17:46,620

and and if you're on a plane you know

414

00:17:50,600 --> 00:17:49,320

it's difficult the angles get very

415

00:17:52,430 --> 00:17:50,610

strange

416

00:17:54,440 --> 00:17:52,440

so it's possible something that is

417

00:17:56,180 --> 00:17:54,450

actually coming down looks level and

418

00:17:57,680 --> 00:17:56,190

there have been and I think we could

419

00:18:00,140 --> 00:17:57,690

probably find them planes getting

420

00:18:01,970 --> 00:18:00,150

pictures of these things looking like

421

00:18:04,130 --> 00:18:01,980

they're there level to them but they

422

00:18:06,799 --> 00:18:04,140

actually are you know being pulled in by

423

00:18:08,900 --> 00:18:06,809

the gravity interesting well we went a

424

00:18:12,140 --> 00:18:08,910

little long sorry

425

00:18:14,180 --> 00:18:12,150

so anyway thank thanks so much yep thank

426

00:18:14,419 --> 00:18:14,190

you and we'll be talking next week all

427

00:18:19,910 --> 00:18:14,429

right

428

00:18:21,890 --> 00:18:19,920

going a little bit long that was really

429

00:18:25,370 --> 00:18:21,900

interesting I wanted to talk about that

430

00:18:26,570 --> 00:18:25,380

possible meteor part of that so Ray

431

00:18:28,460 --> 00:18:26,580

Stanford our guest

432

00:18:30,530 --> 00:18:28,470

he's been on a number of times I visited

433

00:18:33,970 --> 00:18:30,540

him a number of years ago did a show

434

00:18:37,640 --> 00:18:33,980

down there I saw some amazing things I

435

00:18:39,470 --> 00:18:37,650

consider ray a good friend and we are in

436

00:18:41,720 --> 00:18:39,480

touch all the time and it's a my

437

00:18:42,230 --> 00:18:41,730

pleasure to have him on ray welcome to

438

00:18:45,230 --> 00:18:42,240

the show

439

00:18:46,310 --> 00:18:45,240

Oh great to be here Morton yeah it's

440

00:18:47,900 --> 00:18:46,320

been a it's been a little while since

441

00:18:50,090 --> 00:18:47,910

you've been on I think it's been a few

442

00:18:53,500 --> 00:18:50,100

years I mean you got involved in this

443

00:18:56,049 --> 00:18:53,510

dinosaur tracking that just kind of

444

00:18:59,000 --> 00:18:56,059

consumed you completely

445

00:19:01,010 --> 00:18:59,010

well it's certainly time consuming when

446

00:19:03,020 --> 00:19:01,020

you're you first you make a discovery

447

00:19:04,880 --> 00:19:03,030

and it takes months to realize

448

00:19:07,340 --> 00:19:04,890

everything that's there and then you

449

00:19:09,500 --> 00:19:07,350

have to take even longer time writing it

450

00:19:10,730 --> 00:19:09,510

up in a careful way for a scientific

451

00:19:12,950 --> 00:19:10,740

paper yeah

452

00:19:14,990 --> 00:19:12,960

and you did all that and we will talk

453

00:19:17,030 --> 00:19:15,000

more about that in the second part of

454

00:19:18,110 --> 00:19:17,040

the show or the last the last part of

455

00:19:21,530 --> 00:19:18,120

the show

456

00:19:22,970 --> 00:19:21,540

but I just just wanted to say I that's

457

00:19:25,909 --> 00:19:22,980

the reason you haven't been on in a

458

00:19:28,549 --> 00:19:25,919

couple of years you've and you you know

459

00:19:30,560 --> 00:19:28,559

you've been on national Geographics been

460

00:19:31,010 --> 00:19:30,570

to your house all kinds of things have

461

00:19:33,830 --> 00:19:31,020

happened

462

00:19:36,200 --> 00:19:33,840

you spoke in that gartered Space Center

463

00:19:38,900 --> 00:19:36,210

and all that all it fascinating all

464

00:19:41,930 --> 00:19:38,910

fascinating things but we were going to

465

00:19:45,049 --> 00:19:41,940

talk when I visited you I couldn't

466

00:19:49,820 --> 00:19:45,059

believe the collection you had and some

467

00:19:53,090 --> 00:19:49,830

of the the discs that you had stone

468

00:19:55,760 --> 00:19:53,100

disks that look exactly like a flying

469

00:19:57,560 --> 00:19:55,770

saucer that are from ancient mounds so

470

00:19:59,870 --> 00:19:57,570

I'd like to talk a little bit about that

471

00:20:02,960 --> 00:19:59,880

but before we get into that subject in

472

00:20:03,900 --> 00:20:02,970

particular for the person that the first

473

00:20:06,720 --> 00:20:03,910

time hearing

474

00:20:09,210 --> 00:20:06,730

you on this show we do have a lot of new

475

00:20:11,280 --> 00:20:09,220

listeners and we're also over on kgr a

476

00:20:12,930 --> 00:20:11,290

radio with some new listeners I'd like

477

00:20:15,840 --> 00:20:12,940

for you to fill them in on your

478

00:20:19,290 --> 00:20:15,850

background and what got to fascinated in

479

00:20:21,570 --> 00:20:19,300

the topic to begin with well it's hard

480

00:20:22,980 --> 00:20:21,580

to say what got me fascinated just to

481

00:20:24,750 --> 00:20:22,990

mention of something that people can't

482

00:20:27,840 --> 00:20:24,760

explain flying around and doing strange

483

00:20:29,820 --> 00:20:27,850

things I think gets anybody that is in

484

00:20:32,490 --> 00:20:29,830

any way analytical even as a child as I

485

00:20:36,120 --> 00:20:32,500

was in 1947 I guess that was nine years

486

00:20:38,700 --> 00:20:36,130

old and I I couldn't stay away from it

487

00:20:40,650 --> 00:20:38,710

it just fascinates me I don't know what

488

00:20:42,690 --> 00:20:40,660

got into me I skinny little

489

00:20:44,790 --> 00:20:42,700

nine-year-old kid jumped off of a swing

490

00:20:46,200 --> 00:20:44,800

in the in the grade school yard and went

491

00:20:48,840 --> 00:20:46,210

over to the principal's wife and said

492

00:20:50,400 --> 00:20:48,850

mrs. Shelton when I grow up I'm going to

493

00:20:51,900 --> 00:20:50,410

try to find out what these flying

494

00:20:52,830 --> 00:20:51,910

saucers are and when I do I'm going to

495

00:20:55,800 --> 00:20:52,840

tell the whole world

496

00:21:00,420 --> 00:20:55,810

so she stomped off like a madman who

497

00:21:03,210 --> 00:21:00,430

just talked to her or medkit and I don't

498

00:21:05,880 --> 00:21:03,220

know it it catches an interest and I

499

00:21:08,880 --> 00:21:05,890

decided though after well in my teens

500

00:21:11,130 --> 00:21:08,890

teens sometimes are impulsive I got

501
00:21:15,600 --> 00:21:11,140
taken in by the hoaxes of George Adamski

502
00:21:17,130 --> 00:21:15,610
and the the contactee crowd but and

503
00:21:19,140 --> 00:21:17,140
interpreted some wonderful well

504
00:21:21,960 --> 00:21:19,150
documented well witness sightings that

505
00:21:25,310 --> 00:21:21,970
we had in in a in a vein that I

506
00:21:27,540 --> 00:21:25,320
considered to be now subjective I made a

507
00:21:29,220 --> 00:21:27,550
there's a lot of strange things that

508
00:21:31,640 --> 00:21:29,230
happen to you if you have a close

509
00:21:34,020 --> 00:21:31,650
encounter at least in my experience and

510
00:21:37,950 --> 00:21:34,030
and sometimes when you're inexperienced

511
00:21:40,290 --> 00:21:37,960
and highly excitable as a teenager you

512
00:21:43,140 --> 00:21:40,300
can kind of misinterpret it I mean we

513
00:21:45,540 --> 00:21:43,150

felt like somehow they were reading our

514

00:21:46,860 --> 00:21:45,550

minds and causing us to show up and see

515

00:21:48,480 --> 00:21:46,870

these things that I don't any longer

516

00:21:51,270 --> 00:21:48,490

think that's the case I think I have

517

00:21:53,760 --> 00:21:51,280

better explanations part but it got me

518

00:21:56,610 --> 00:21:53,770

after I wised up to a damn ski and and

519

00:21:58,950 --> 00:21:56,620

expose the evidence I had that his

520

00:22:01,050 --> 00:21:58,960

photographs and stories were hopes isn't

521

00:22:04,200 --> 00:22:01,060

exposed Daniel Deborah far another

522

00:22:07,260 --> 00:22:04,210

contactee I decided the way to go the

523

00:22:09,810 --> 00:22:07,270

only way to go was to try to use cameras

524

00:22:12,300 --> 00:22:09,820

and electronic instruments to get some

525

00:22:14,430 --> 00:22:12,310

kind of data that would be meaningful to

526
00:22:17,789 --> 00:22:14,440
mainstream science that would speak to

527
00:22:20,729 --> 00:22:17,799
physicists and real hard data

528
00:22:23,249 --> 00:22:20,739
hard scientists will say and it took me

529
00:22:26,369 --> 00:22:23,259
a long time to arrange finally the

530
00:22:30,419 --> 00:22:26,379
funding for that but by nineteen the

531
00:22:32,899 --> 00:22:30,429
early 70s I began to working with a

532
00:22:35,609 --> 00:22:32,909
nonprofit corporation bring in

533
00:22:37,739 --> 00:22:35,619
contributions that eventually built a

534
00:22:40,619 --> 00:22:37,749
system of tracking these things

535
00:22:43,889 --> 00:22:40,629
optically electronically it was a total

536
00:22:46,229 --> 00:22:43,899
of equipment facilities back then it was

537
00:22:47,879 --> 00:22:46,239
about somewhat over two million dollars

538
00:22:50,099 --> 00:22:47,889

now that would be of course the order I

539

00:22:53,159 --> 00:22:50,109

guess 30 or 40 million dollars yeah but

540

00:22:55,799 --> 00:22:53,169

we succeeded in in using this equipment

541

00:22:57,450 --> 00:22:55,809

in the field the first time it really

542

00:22:59,430 --> 00:22:57,460

got a great success was when he had a

543

00:23:00,989 --> 00:22:59,440

tip from a government scientist at White

544

00:23:02,789 --> 00:23:00,999

Sands that they were being plagued and

545

00:23:04,919 --> 00:23:02,799

we we snooped around there on the

546

00:23:06,529 --> 00:23:04,929

outskirts of White Sands but I don't

547

00:23:08,999 --> 00:23:06,539

want to get into that too much because

548

00:23:11,369 --> 00:23:09,009

I'd like to talk about something else

549

00:23:14,279 --> 00:23:11,379

that surprised me related to UFOs but

550

00:23:16,259 --> 00:23:14,289

but anxious and I guess you know what

551
00:23:18,090 --> 00:23:16,269
I'm talking about this point burden yeah

552
00:23:19,889 --> 00:23:18,100
yeah just to let you know ray we got

553
00:23:22,889 --> 00:23:19,899
about a couple of minutes here before we

554
00:23:25,649 --> 00:23:22,899
go into our first break so I may have to

555
00:23:27,930 --> 00:23:25,659
interrupt you if it comes to that but um

556
00:23:31,499 --> 00:23:27,940
yes I saw your collection at your house

557
00:23:35,879 --> 00:23:31,509
and it's fascinating and yeah I'd like

558
00:23:37,470 --> 00:23:35,889
for you to talk about that okay well I I

559
00:23:39,269 --> 00:23:37,480
had gotten interested in Indian

560
00:23:41,430 --> 00:23:39,279
artifacts back when my dad worked in an

561
00:23:44,820 --> 00:23:41,440
oil field was bringing home Indian

562
00:23:46,409 --> 00:23:44,830
merits and I began to study them become

563
00:23:48,779 --> 00:23:46,419

fascinated and eventually I began to

564

00:23:54,419 --> 00:23:48,789

collect other types of Indian artifacts

565

00:23:57,899 --> 00:23:54,429

well then back in the the 1980s the

566

00:23:59,519 --> 00:23:57,909

latter part of the 1980s I had gone to

567

00:24:02,460 --> 00:23:59,529

several Indian artifact auctions and

568

00:24:05,840 --> 00:24:02,470

seebik catalogue from an option called

569

00:24:08,970 --> 00:24:05,850

old born auction in Findlay Ohio and

570

00:24:11,999 --> 00:24:08,980

there was a picture of a thing that

571

00:24:17,070 --> 00:24:12,009

looked just like a domed disc with spots

572

00:24:19,590 --> 00:24:17,080

around his dome and and flange and I I

573

00:24:24,029 --> 00:24:19,600

said oh my gosh and I looked at the text

574

00:24:27,869 --> 00:24:24,039

below and it said him Indian hematite

575

00:24:29,970 --> 00:24:27,879

disc and it said that it's it had an

576

00:24:31,710 --> 00:24:29,980

exclamation mark this looks like a UFO

577

00:24:34,020 --> 00:24:31,720

so I called the

578

00:24:35,789 --> 00:24:34,030

the owner of the auction house and I

579

00:24:37,409 --> 00:24:35,799

said look I want to buy that he said I

580

00:24:39,899 --> 00:24:37,419

can't sell it to you it's already in the

581

00:24:41,430 --> 00:24:39,909

catalog and this was a hardcopy catalog

582

00:24:44,460 --> 00:24:41,440

this was not back in the days of

583

00:24:46,169 --> 00:24:44,470

Internet auctions and he said but you

584

00:24:48,870 --> 00:24:46,179

know he said these came out of a

585

00:24:51,419 --> 00:24:48,880

collection from back the turn of the

586

00:24:55,409 --> 00:24:51,429

19th in the early part of the 20th

587

00:24:59,610 --> 00:24:55,419

century an old guy back in in Hancock

588

00:25:01,380 --> 00:24:59,620

County Illinois I had had collected a

589

00:25:03,360 --> 00:25:01,390

bunch of Indian artifacts and when he

590

00:25:05,700 --> 00:25:03,370

died his family stored these things and

591

00:25:07,529 --> 00:25:05,710

recently they decided well maybe these

592

00:25:10,200 --> 00:25:07,539

are worth something and they brought

593

00:25:12,360 --> 00:25:10,210

them in to him and he said it was

594

00:25:13,409 --> 00:25:12,370

astonishing here was two discs that

595

00:25:16,260 --> 00:25:13,419

looked just like they were flying

596

00:25:18,330 --> 00:25:16,270

saucers and they've been dug up way back

597

00:25:20,430 --> 00:25:18,340

there before we ever heard of Kenneth

598

00:25:24,960 --> 00:25:20,440

Arnold and his sighting and descriptions

599

00:25:26,789 --> 00:25:24,970

of discs by other people and so what I

600

00:25:28,470 --> 00:25:26,799

did he said that you know there's one in

601
00:25:31,830 --> 00:25:28,480
the catalog I've got one here on my desk

602
00:25:33,480 --> 00:25:31,840
and he he said it astonishes people come

603
00:25:35,730 --> 00:25:33,490
in people come in and accuse me of being

604
00:25:37,289 --> 00:25:35,740
some kind of a UFO not having this model

605
00:25:39,480 --> 00:25:37,299
of a UFO on my desk and I explained to

606
00:25:41,880 --> 00:25:39,490
him wait I wasn't responsible for that

607
00:25:44,520 --> 00:25:41,890
and Indian made it maybe 2,000 years ago

608
00:25:47,430 --> 00:25:44,530
and so I said look I want to buy that

609
00:25:49,230 --> 00:25:47,440
one and I did and eventually I also

610
00:25:53,490 --> 00:25:49,240
bought from the guy that got the other

611
00:25:54,750 --> 00:25:53,500
one at auction I got another one and the

612
00:25:57,360 --> 00:25:54,760
one we're seeing on the screen now

613
00:26:00,270 --> 00:25:57,370

actually I was the last one of the most

614

00:26:03,299 --> 00:26:00,280

disk-like type that I got and that's

615

00:26:05,190 --> 00:26:03,309

from Illinois but from from further to

616

00:26:08,130 --> 00:26:05,200

the southwestern part of the state of

617

00:26:10,950 --> 00:26:08,140

Illinois and I don't have to top my head

618

00:26:12,630 --> 00:26:10,960

recall the actual size of it but it's

619

00:26:15,419 --> 00:26:12,640

between three and four inches in

620

00:26:17,460 --> 00:26:15,429

diameter and it looks the part

621

00:26:19,649 --> 00:26:17,470

and I have no explanation of what they

622

00:26:22,260 --> 00:26:19,659

were trying to represent unless we make

623

00:26:23,730 --> 00:26:22,270

the presumption that that an Indian not

624

00:26:25,230 --> 00:26:23,740

having a camera saw something that

625

00:26:26,700 --> 00:26:25,240

impressed him a lot and he said I'll

626
00:26:29,850 --> 00:26:26,710
make it out of stone and show my buddies

627
00:26:32,250 --> 00:26:29,860
what I saw but that we don't know here's

628
00:26:35,100 --> 00:26:32,260
here's two more three more actually

629
00:26:37,830 --> 00:26:35,110
these were the early ones that before

630
00:26:39,720 --> 00:26:37,840
they - you have top and bottom on the

631
00:26:42,000 --> 00:26:39,730
left in the the blue green and the red

632
00:26:45,120 --> 00:26:42,010
now those were the ones from from over

633
00:26:45,760 --> 00:26:45,130
in Western Illinois and you can see the

634
00:26:47,650 --> 00:26:45,770
size

635
00:26:49,000 --> 00:26:47,660
and everything there and one of them was

636
00:26:50,260 --> 00:26:49,010
the one that was in the auction it was

637
00:26:51,790 --> 00:26:50,270
the one that I bought and they have an

638
00:26:53,710 --> 00:26:51,800

old one of them as the old sticker down

639

00:26:55,540 --> 00:26:53,720

at the bottom right you see you can't

640

00:26:59,410 --> 00:26:55,550

read it their business Piedra collection

641

00:27:01,510 --> 00:26:59,420

and Hancock County Illinois and that was

642

00:27:03,669 --> 00:27:01,520

the old collection that that it was in

643

00:27:06,790 --> 00:27:03,679

the one on the ride is even more

644

00:27:09,070 --> 00:27:06,800

dramatic and larger and it was found a

645

00:27:11,230 --> 00:27:09,080

little further east on the Illinois

646

00:27:15,370 --> 00:27:11,240

River and that we go to the next slide

647

00:27:18,190 --> 00:27:15,380

we might be able to to see I don't know

648

00:27:20,700 --> 00:27:18,200

if you can get that up but that that was

649

00:27:24,160 --> 00:27:20,710

found while they were clearing trees in

650

00:27:27,040 --> 00:27:24,170

1921 spring on the east bank of the

651

00:27:29,560 --> 00:27:27,050

Illinois River in Havana Illinois at the

652

00:27:32,380 --> 00:27:29,570

time there was a rise there there there

653

00:27:33,730 --> 00:27:32,390

you see on the left where it was the the

654

00:27:35,770 --> 00:27:33,740

red line that goes and bends down and

655

00:27:39,610 --> 00:27:35,780

shows Havana and it points up to it and

656

00:27:41,830 --> 00:27:39,620

this thing was it was found when they

657

00:27:43,690 --> 00:27:41,840

were digging up trees and the roots pull

658

00:27:45,130 --> 00:27:43,700

this thing up but they didn't realize

659

00:27:47,500 --> 00:27:45,140

there was a mound there at that time the

660

00:27:50,070 --> 00:27:47,510

mound there was only about 12 feet high

661

00:27:54,220 --> 00:27:50,080

but it's about an acre in size and and

662

00:27:57,460 --> 00:27:54,230

it's it's now been of course both carbon

663

00:28:00,040 --> 00:27:57,470

dated about 2,000 years old plus or

664

00:28:03,640 --> 00:28:00,050

minus 230 maybe or so on either side of

665

00:28:07,390 --> 00:28:03,650

2,000 years ago and interestingly also

666

00:28:11,020 --> 00:28:07,400

at that same site they found 22 beads

667

00:28:12,970 --> 00:28:11,030

made out of nickel iron meteorite two

668

00:28:17,169 --> 00:28:12,980

over and locally here in the Indus myth

669

00:28:20,110 --> 00:28:17,179

Sounion and I mean this is enough to

670

00:28:22,150 --> 00:28:20,120

just boggle my mind I mean I realized

671

00:28:23,710 --> 00:28:22,160

that these these have an excellent

672

00:28:25,450 --> 00:28:23,720

collection background I have the whole

673

00:28:26,890 --> 00:28:25,460

collection background that the disc

674

00:28:30,850 --> 00:28:26,900

number three up there in the upper right

675

00:28:33,310 --> 00:28:30,860

of who owned it across time and I just

676

00:28:35,140 --> 00:28:33,320

mentioned that the the dealer knew and

677

00:28:38,200 --> 00:28:35,150

minders and UFOs that he was interested

678

00:28:39,400 --> 00:28:38,210

in his wife and I believe a daughter

679

00:28:41,470 --> 00:28:39,410

wears two because they had seen

680

00:28:43,060 --> 00:28:41,480

something remarkable in their backyard

681

00:28:46,540 --> 00:28:43,070

at close range about 20 feet in diameter

682

00:28:47,980 --> 00:28:46,550

and he said I said if you ever come

683

00:28:50,260 --> 00:28:47,990

across another one of these things he

684

00:28:51,760 --> 00:28:50,270

said well I know an old guy that has has

685

00:28:53,770 --> 00:28:51,770

one but he didn't wanna part with it

686

00:28:56,049 --> 00:28:53,780

well they took him or at least two three

687

00:28:58,210 --> 00:28:56,059

maybe four years to talk him into

688

00:28:59,289 --> 00:28:58,220

selling it the finally he sold it and I

689

00:29:02,200 --> 00:28:59,299

bought it for

690

00:29:04,899 --> 00:29:02,210

the the alien artifacts with their good

691

00:29:06,460 --> 00:29:04,909

background information and so I've just

692

00:29:08,049 --> 00:29:06,470

been thrilled to have these and there

693

00:29:10,720 --> 00:29:08,059

was the one more that we showed first in

694

00:29:12,399 --> 00:29:10,730

the introductory slide there that that

695

00:29:14,379 --> 00:29:12,409

makes four of the ones that look just

696

00:29:18,220 --> 00:29:14,389

like what the the world today think so

697

00:29:20,590 --> 00:29:18,230

is a flying saucer UFO yes yes that's

698

00:29:23,879 --> 00:29:20,600

great okay well we're gonna head to

699

00:29:27,609 --> 00:29:23,889

break ray so everyone that's listening

700

00:29:29,710 --> 00:29:27,619

over at kgr radio we'll be back in just

701
00:29:32,379 --> 00:29:29,720
a few minutes my guest is Ray Stanford

702
00:29:42,159 --> 00:29:32,389
this is podcast UFO hang and they'll

703
00:29:46,479 --> 00:29:42,169
we'll be right back alright Martin go

704
00:29:47,129 --> 00:29:46,489
minutes how many or four minutes okay

705
00:29:52,479 --> 00:29:47,139
got it

706
00:29:55,119 --> 00:29:52,489
well yeah ray so we're still live on

707
00:29:58,419 --> 00:29:55,129
YouTube right and just to let you know I

708
00:30:00,190 --> 00:29:58,429
just want and Ray at the you're gonna be

709
00:30:02,379 --> 00:30:00,200
surprised at this because you didn't I

710
00:30:05,710 --> 00:30:02,389
forgot to tell you and the opening part

711
00:30:09,039 --> 00:30:05,720
is uh we're gonna the second break we're

712
00:30:11,830 --> 00:30:09,049
going to be playing a video of that's on

713
00:30:13,960 --> 00:30:11,840

YouTube we downloaded it on YouTube and

714

00:30:18,849 --> 00:30:13,970

it's basically going to be when you're

715

00:30:22,180 --> 00:30:18,859

at NASA the video of you showing the

716

00:30:23,769 --> 00:30:22,190

tracks on site and you you bring the

717

00:30:24,970 --> 00:30:23,779

little dinosaur with you and all that so

718

00:30:29,680 --> 00:30:24,980

we're going to show that in the second

719

00:30:31,389 --> 00:30:29,690

break okay yeah yeah the only thing is

720

00:30:33,070 --> 00:30:31,399

ray unfortunately you're not going to

721

00:30:34,659 --> 00:30:33,080

hear anything the audio just doesn't go

722

00:30:36,180 --> 00:30:34,669

through the software system so you're

723

00:30:38,440 --> 00:30:36,190

not going to hear anything on that but

724

00:30:40,169 --> 00:30:38,450

you'll just hear silence but everyone

725

00:30:42,940 --> 00:30:40,179

else will hear it on YouTube and also

726

00:30:47,950 --> 00:30:42,950

people that listen to the podcast so

727

00:30:49,599 --> 00:30:47,960

anyway okay this I guess in this break

728

00:30:51,310 --> 00:30:49,609

we have just three minutes that goes

729

00:30:56,710 --> 00:30:51,320

really fast and I blabbed a little too

730

00:30:58,389 --> 00:30:56,720

much I wanted to know if you can tell

731

00:31:00,340 --> 00:30:58,399

the listening audience how you basically

732

00:31:05,019 --> 00:31:00,350

ended up so close to Goddard Space

733

00:31:09,039 --> 00:31:05,029

Center well I went to a divorce my

734

00:31:10,680 --> 00:31:09,049

former marriage and and came up here and

735

00:31:13,090 --> 00:31:10,690

ultimately married a wonderful lady

736

00:31:14,820 --> 00:31:13,100

named Sheila and she would

737

00:31:17,650 --> 00:31:14,830

working at Goddard Space Flight Center

738

00:31:19,299 --> 00:31:17,660

eventually she became the contracting

739

00:31:25,470 --> 00:31:19,309

officers technical representative over

740

00:31:28,060 --> 00:31:25,480

the entire equipment and facilities

741

00:31:30,549 --> 00:31:28,070

servicing of the last three Hubble Space

742

00:31:32,590 --> 00:31:30,559

Telescope servicing missions and she's

743

00:31:35,440 --> 00:31:32,600

got a big commendation from the

744

00:31:37,240 --> 00:31:35,450

government for that work and she was

745

00:31:40,180 --> 00:31:37,250

very interested been interested in UFOs

746

00:31:42,909 --> 00:31:40,190

for years and we've been we've been

747

00:31:44,680 --> 00:31:42,919

married about 32 I guess years now and

748

00:31:46,090 --> 00:31:44,690

that brought me because we were only

749

00:31:48,250 --> 00:31:46,100

three miles from Goddard Space Flight

750

00:31:50,770 --> 00:31:48,260

Center and so I was frequently over

751
00:31:52,330 --> 00:31:50,780
there and one day I was there I picked

752
00:31:53,830 --> 00:31:52,340
her up for lunch I dropped her back off

753
00:31:55,270 --> 00:31:53,840
and was passing through a parking lot

754
00:31:57,850 --> 00:31:55,280
and I saw a rock sticking out of the

755
00:32:00,159 --> 00:31:57,860
grass and and the story is history now

756
00:32:02,710 --> 00:32:00,169
that I went over there and there was the

757
00:32:04,240 --> 00:32:02,720
beginning of what has been declared to

758
00:32:06,220 --> 00:32:04,250
be the the most important discovery of

759
00:32:08,830 --> 00:32:06,230
showing an erection of mammals and

760
00:32:09,880 --> 00:32:08,840
dinosaurs has this ever been found and

761
00:32:10,930 --> 00:32:09,890
it was right there at Goddard Space

762
00:32:12,909 --> 00:32:10,940
Flight Center

763
00:32:14,560 --> 00:32:12,919

I can't believe well first of all just

764

00:32:15,909 --> 00:32:14,570

say we'll get into that the second part

765

00:32:18,159 --> 00:32:15,919

of the show more and well I actually

766

00:32:20,289 --> 00:32:18,169

want you to bring that up again I don't

767

00:32:23,740 --> 00:32:20,299

understand how anyone would notice a

768

00:32:25,960 --> 00:32:23,750

rock sticking up in the grass first of

769

00:32:28,779 --> 00:32:25,970

all and then second of all haha you know

770

00:32:30,430 --> 00:32:28,789

they all the excavation they did there

771

00:32:33,039 --> 00:32:30,440

with all the buildings I showed me

772

00:32:34,810 --> 00:32:33,049

around there when when I visited and you

773

00:32:36,549 --> 00:32:34,820

know all the buildings there all the

774

00:32:39,039 --> 00:32:36,559

parking lots

775

00:32:41,710 --> 00:32:39,049

there's probably a lot more there that

776

00:32:44,500 --> 00:32:41,720

was either destroyed or covered over but

777

00:32:47,140 --> 00:32:44,510

that's right it's just a was this near

778

00:32:50,350 --> 00:32:47,150

I'm thinking near and possibly an

779

00:32:53,649 --> 00:32:50,360

ancient riverbed or something how how no

780

00:32:56,080 --> 00:32:53,659

it was in a deltaic floodplain about 110

781

00:32:59,649 --> 00:32:56,090

million years ago that frequently

782

00:33:02,919 --> 00:32:59,659

flooded and in fact we've found a lot of

783

00:33:05,380 --> 00:33:02,929

evidence I have found to the fossils of

784

00:33:08,169 --> 00:33:05,390

baby notice ours that apparently drowned

785

00:33:10,090 --> 00:33:08,179

and probably one of these floods they

786

00:33:11,830 --> 00:33:10,100

there were a nest where an sto because

787

00:33:13,720 --> 00:33:11,840

so many baby tracks the eggs

788

00:33:18,490 --> 00:33:13,730

disintegrate because of the high acid in

789

00:33:20,020 --> 00:33:18,500

this rather swampy environment but it it

790

00:33:22,240 --> 00:33:20,030

was a wonderful place for life if you

791

00:33:24,549 --> 00:33:22,250

didn't get drown in a flood if you're a

792

00:33:27,279 --> 00:33:24,559

dinosaur or a mammal back in that time

793

00:33:31,419 --> 00:33:27,289

well okay yeah we only have about

794

00:33:33,729 --> 00:33:31,429

about 20 seconds left right race 35:35

795

00:33:35,379 --> 00:33:33,739

okay so yeah we'll talk about that in

796

00:33:37,690 --> 00:33:35,389

the second part of the show more but

797

00:33:40,330 --> 00:33:37,700

also I know you had a sighting right

798

00:33:41,739 --> 00:33:40,340

there we can talk at Goddard or right

799

00:33:43,719 --> 00:33:41,749

near Goddard I remember you telling me

800

00:33:45,519 --> 00:33:43,729

you were driving over that way

801
00:33:55,089 --> 00:33:45,529
so we'll be getting back to the show

802
00:34:01,450 --> 00:33:55,099
here in just a second here I think hang

803
00:34:13,470 --> 00:34:01,460
in there one on YouTube I guess I

804
00:34:18,700 --> 00:34:17,440
okay we got bumper music here Martin

805
00:34:22,200 --> 00:34:18,710
ready to come back

806
00:34:26,370 --> 00:34:22,210
alright alright here we go in five four

807
00:34:29,110 --> 00:34:26,380
three two

808
00:34:32,380 --> 00:34:29,120
alright welcome back my guest is race

809
00:34:35,140 --> 00:34:32,390
stanford and during the break we spoke a

810
00:34:36,340 --> 00:34:35,150
little bit about the area that it lives

811
00:34:39,909 --> 00:34:36,350
in we're going to be talking more about

812
00:34:43,810 --> 00:34:39,919
that later but we when we're wrapping up

813
00:34:46,960 --> 00:34:43,820

we're ready to I still want to talk more

814

00:34:51,940 --> 00:34:46,970

about these discs and what the possible

815

00:34:54,550 --> 00:34:51,950

use was for them but the the question on

816

00:34:57,670 --> 00:34:54,560

that array have they found any of these

817

00:35:01,810 --> 00:34:57,680

in other areas or is it only in this

818

00:35:04,260 --> 00:35:01,820

particular area the the discs that look

819

00:35:09,040 --> 00:35:04,270

like what we think is a UFO looks like

820

00:35:13,450 --> 00:35:09,050

they have been found only in in Havana

821

00:35:16,870 --> 00:35:13,460

Illinois and an Hancock County Illinois

822

00:35:19,300 --> 00:35:16,880

and of west of there and there's one

823

00:35:22,480 --> 00:35:19,310

down to the south west of there the

824

00:35:23,830 --> 00:35:22,490

first one that we showed earlier but if

825

00:35:24,910 --> 00:35:23,840

we can go in and look at some of the

826

00:35:28,480 --> 00:35:24,920

pictures I can explain to you a little

827

00:35:29,920 --> 00:35:28,490

more about them but it that it looks

828

00:35:32,170 --> 00:35:29,930

like here's to the hypothesis when I

829

00:35:36,090 --> 00:35:32,180

found these things I said I wonder if

830

00:35:38,860 --> 00:35:36,100

these were the first things that that we

831

00:35:41,080 --> 00:35:38,870

that they made and they and what I found

832

00:35:42,640 --> 00:35:41,090

out is I didn't have a confirmation of

833

00:35:44,590 --> 00:35:42,650

the time I thought maybe you know the

834

00:35:46,810 --> 00:35:44,600

Indians that they they feel like you

835

00:35:48,430 --> 00:35:46,820

make an effigy of something it takes on

836

00:35:50,170 --> 00:35:48,440

to some extent many of the feel the

837

00:35:53,470 --> 00:35:50,180

properties such as the Kachina dolls out

838

00:35:55,240 --> 00:35:53,480

west my Hopi and but if you look at this

839

00:35:56,770 --> 00:35:55,250

picture on the left you you see these

840

00:36:00,130 --> 00:35:56,780

disciplines become more and more or less

841

00:36:02,800 --> 00:36:00,140

like we typically think of a UFO and

842

00:36:05,230 --> 00:36:02,810

more and more practical rounded edges

843

00:36:07,090 --> 00:36:05,240

well I believed I had pathi sized that

844

00:36:09,970 --> 00:36:07,100

the original ones which would have been

845

00:36:12,220 --> 00:36:09,980

few of course were in response to

846

00:36:14,770 --> 00:36:12,230

observation or at least visual if not

847

00:36:17,440 --> 00:36:14,780

intellectual contact with the objects

848

00:36:21,070 --> 00:36:17,450

and are there arguments and that it

849

00:36:23,200 --> 00:36:21,080

became something that they transferred

850

00:36:24,670 --> 00:36:23,210

into a game even as the Mayans begin to

851
00:36:25,390 --> 00:36:24,680
have a ball game that they say is

852
00:36:27,160 --> 00:36:25,400
somehow relate

853
00:36:29,050 --> 00:36:27,170
to the motion of planets I'm not sure

854
00:36:30,370 --> 00:36:29,060
that but if that's the white pants

855
00:36:33,940 --> 00:36:30,380
interpretation or really the Mayan

856
00:36:36,550 --> 00:36:33,950
interpretation but in this case I had no

857
00:36:39,760 --> 00:36:36,560
evidence that these were the oldest but

858
00:36:43,060 --> 00:36:39,770
as it happened years later after I had

859
00:36:44,590 --> 00:36:43,070
gotten these objects there it became out

860
00:36:46,360 --> 00:36:44,600
of scientific publication with

861
00:36:49,660 --> 00:36:46,370
information on the carbon dating of the

862
00:36:52,210 --> 00:36:49,670
the one there you see on the left and it

863
00:36:55,600 --> 00:36:52,220

would place it right around 2000 either

864

00:36:59,050 --> 00:36:55,610

plus or minus 2000 years before the

865

00:37:01,150 --> 00:36:59,060

present time but as we get closer to the

866

00:37:02,650 --> 00:37:01,160

present time they got these more rounded

867

00:37:04,360 --> 00:37:02,660

edges well the Indians had a game when

868

00:37:05,530 --> 00:37:04,370

the white man came that looked the disc

869

00:37:07,570 --> 00:37:05,540

their reasoning it looked more like the

870

00:37:10,810 --> 00:37:07,580

one on the far right in fact there was

871

00:37:13,780 --> 00:37:10,820

at that time and they had a game that

872

00:37:17,290 --> 00:37:13,790

they they called chunky and you could

873

00:37:18,310 --> 00:37:17,300

you would roll a disc and throw a spear

874

00:37:22,600 --> 00:37:18,320

that looks for all the world like a

875

00:37:24,580 --> 00:37:22,610

mothership and the the if they came

876

00:37:25,960 --> 00:37:24,590

close to each other that gave points to

877

00:37:29,290 --> 00:37:25,970

the person I guess I did the throwing

878

00:37:30,640 --> 00:37:29,300

and the rolling of the disc and the

879

00:37:31,870 --> 00:37:30,650

interesting thing is that the Indians

880

00:37:34,180 --> 00:37:31,880

were well about this the white man

881

00:37:37,030 --> 00:37:34,190

didn't like it they went for a different

882

00:37:39,490 --> 00:37:37,040

kind of Indian game but the Indians were

883

00:37:41,890 --> 00:37:39,500

big on betting on this they bet none of

884

00:37:44,560 --> 00:37:41,900

their land lion Loren cause he's a guy

885

00:37:46,510 --> 00:37:44,570

who bet their wives it was said and Wow

886

00:37:49,690 --> 00:37:46,520

it was probably training them though

887

00:37:52,330 --> 00:37:49,700

intuitively too by judging the speed of

888

00:37:54,220 --> 00:37:52,340

the disc and throwing the what you know

889

00:37:56,100 --> 00:37:54,230

we just look at this today in the

890

00:38:00,340 --> 00:37:56,110

reports of UFOs we hear of these long

891

00:38:01,840 --> 00:38:00,350

very narrow cigar stretched out cigar

892

00:38:04,020 --> 00:38:01,850

type things that we might call a

893

00:38:06,610 --> 00:38:04,030

mothership in our interpretation and

894

00:38:09,160 --> 00:38:06,620

you've got the discs that supposedly go

895

00:38:10,690 --> 00:38:09,170

to and from them well in this game

896

00:38:12,580 --> 00:38:10,700

you've got a thing this shaped like the

897

00:38:14,620 --> 00:38:12,590

mothership and you've got the disc that

898

00:38:16,870 --> 00:38:14,630

they were rolling on the ground and the

899

00:38:19,150 --> 00:38:16,880

the points the greater points for game

900

00:38:21,970 --> 00:38:19,160

by The Closer that they stop to one

901
00:38:25,390 --> 00:38:21,980
another both laterally and distally so

902
00:38:27,730 --> 00:38:25,400
it could be taken as a UFO mothership

903
00:38:32,560 --> 00:38:27,740
docking kind of game that they called

904
00:38:34,900 --> 00:38:32,570
chunky and we can't prove that but it's

905
00:38:36,970 --> 00:38:34,910
a hypothesis that tends to be confirmed

906
00:38:39,190 --> 00:38:36,980
in my mind at least a little bit by the

907
00:38:41,230 --> 00:38:39,200
fact that the tremendous a

908
00:38:43,089 --> 00:38:41,240
support the 2000 year old age of the

909
00:38:45,250 --> 00:38:43,099
ones that looked most like UFOs and as

910
00:38:48,490 --> 00:38:45,260
you get more and more toward the white

911
00:38:50,589 --> 00:38:48,500
man's coming they change here's a map

912
00:38:53,349 --> 00:38:50,599
that you see over on the Left where disc

913
00:38:55,569 --> 00:38:53,359

1 and 2 were found those stood above and

914

00:38:57,190 --> 00:38:55,579

then the far right corner disc 3 it's

915

00:38:59,170 --> 00:38:57,200

interesting that right up there beyond

916

00:39:02,079 --> 00:38:59,180

it is the Glassford impact structure

917

00:39:04,150 --> 00:39:02,089

that's where a piece of an asteroid get

918

00:39:06,579 --> 00:39:04,160

back a long long time ago before the

919

00:39:09,700 --> 00:39:06,589

indians time but i figured to ask myself

920

00:39:11,470 --> 00:39:09,710

why would these UFOs have been spending

921

00:39:13,120 --> 00:39:11,480

a lot of time i don't have any idea

922

00:39:15,190 --> 00:39:13,130

maybe they were staying two people but

923

00:39:17,650 --> 00:39:15,200

maybe they were also looking at the

924

00:39:20,620 --> 00:39:17,660

impact history if we can move on to the

925

00:39:22,270 --> 00:39:20,630

next slide there's some I don't know if

926
00:39:26,319 --> 00:39:22,280
you have the next slide that can come up

927
00:39:28,210 --> 00:39:26,329
conveniently but it's quite

928
00:39:30,180 --> 00:39:28,220
interesting when you look at that area

929
00:39:33,069 --> 00:39:30,190
of the country that has the greatest

930
00:39:34,599 --> 00:39:33,079
concentration of impact structures there

931
00:39:36,910 --> 00:39:34,609
you see in the map at the lower left

932
00:39:39,540 --> 00:39:36,920
inside the green circle that's the area

933
00:39:42,069 --> 00:39:39,550
where these kinds of discs are found and

934
00:39:44,440 --> 00:39:42,079
then if we go into the next slide I'll

935
00:39:47,230 --> 00:39:44,450
compare it to something else that might

936
00:39:50,950 --> 00:39:47,240
be another reason why the UFOs would be

937
00:39:52,690 --> 00:39:50,960
studying that area I'm not sure how easy

938
00:39:56,380 --> 00:39:52,700

is to get back to I'm into the next

939

00:39:58,569 --> 00:39:56,390

slide but it what it shows is okay at

940

00:40:01,290 --> 00:39:58,579

upper right this is a New Madrid fault

941

00:40:04,180 --> 00:40:01,300

that's the earthquake causing fault and

942

00:40:05,589 --> 00:40:04,190

the intense is the most intense errors

943

00:40:08,740 --> 00:40:05,599

in the red but it goes all the way over

944

00:40:11,410 --> 00:40:08,750

and into the yellow areas and it now

945

00:40:13,780 --> 00:40:11,420

let's go one more slide and compare that

946

00:40:16,030 --> 00:40:13,790

to the area where most of the hematite

947

00:40:18,069 --> 00:40:16,040

discs and other hematite objects were

948

00:40:21,339 --> 00:40:18,079

made by the Indians and it's quite

949

00:40:22,599 --> 00:40:21,349

fascinating if we can get over there

950

00:40:24,849 --> 00:40:22,609

realize that there seemed to be some

951
00:40:26,319 --> 00:40:24,859
problem navigating there we go no it's

952
00:40:29,079 --> 00:40:26,329
not right just to let you know there's a

953
00:40:31,210 --> 00:40:29,089
30-second delay on YouTube okay

954
00:40:34,089 --> 00:40:31,220
30-second okay I'll do it immediately

955
00:40:36,880 --> 00:40:34,099
but it takes 30 seconds okay good

956
00:40:39,640 --> 00:40:36,890
yeah okay I got it and anyway this thing

957
00:40:42,940 --> 00:40:39,650
you see and white and red that was that

958
00:40:44,710 --> 00:40:42,950
was published years ago by in a book by

959
00:40:46,809 --> 00:40:44,720
Warren K Morehead called hematite

960
00:40:49,120 --> 00:40:46,819
implements of the United States isn't it

961
00:40:50,980 --> 00:40:49,130
fascinating how the whole pattern both

962
00:40:53,050 --> 00:40:50,990
the the white one with the lion Aranda

963
00:40:54,850 --> 00:40:53,060

and the red one echo the new

964

00:40:56,710 --> 00:40:54,860

default effects well that is easy

965

00:40:58,570 --> 00:40:56,720

perhaps who understand geologically

966

00:41:00,640 --> 00:40:58,580

because if you're having faulting in

967

00:41:03,700 --> 00:41:00,650

that area you're also altering the

968

00:41:06,520 --> 00:41:03,710

course of not only surface waters but

969

00:41:08,920 --> 00:41:06,530

underground waters and hematite is it's

970

00:41:11,350 --> 00:41:08,930

usually is often farmed in aquatic

971

00:41:13,540 --> 00:41:11,360

situations where the minerals are

972

00:41:15,610 --> 00:41:13,550

carried and the the iron oxide grows

973

00:41:16,720 --> 00:41:15,620

inverse crystalline forms having several

974

00:41:19,360 --> 00:41:16,730

different colors depending on the

975

00:41:21,940 --> 00:41:19,370

crystalline form but so it's not

976

00:41:25,120 --> 00:41:21,950

mysterious that they take on the same

977

00:41:26,470 --> 00:41:25,130

form but keep in mind that this could be

978

00:41:28,330 --> 00:41:26,480

an area that was of interest because

979

00:41:30,280 --> 00:41:28,340

this is a major earthquake fault it's

980

00:41:32,890 --> 00:41:30,290

not compared to the San Andreas out west

981

00:41:34,540 --> 00:41:32,900

but it's said that they have been felt

982

00:41:37,270 --> 00:41:34,550

earthquakes from this even over here in

983

00:41:43,410 --> 00:41:37,280

the Washington DC Maryland area sometime

984

00:41:46,360 --> 00:41:43,420

ago so let's move on now and a little

985

00:41:46,570 --> 00:41:46,370

well I'm gonna have to see the next

986

00:41:49,990 --> 00:41:46,580

slide

987

00:41:52,240 --> 00:41:50,000

I know it's the one that's in but it's

988

00:41:55,210 --> 00:41:52,250

coming up understand yeah and here we go

989

00:41:57,910 --> 00:41:55,220

now this one was from the Ford Action

990

00:42:01,060 --> 00:41:57,920

culture and it's small it's only one

991

00:42:03,790 --> 00:42:01,070

point six three inches in our five

992

00:42:05,530 --> 00:42:03,800

whatever that says yeah in diameter but

993

00:42:07,450 --> 00:42:05,540

it almost looks like a disc with

994

00:42:09,790 --> 00:42:07,460

construction panels and by the way don't

995

00:42:12,730 --> 00:42:09,800

let anybody fool you you'll hear these

996

00:42:14,140 --> 00:42:12,740

stories fictional stories that oh man

997

00:42:16,180 --> 00:42:14,150

these discs when you see them they have

998

00:42:18,190 --> 00:42:16,190

no construction Templer nothing well if

999

00:42:19,840 --> 00:42:18,200

you're seeing a plasma covered as I've

1000

00:42:21,490 --> 00:42:19,850

learned in my study with instruments

1001

00:42:24,700 --> 00:42:21,500

yeah you won't see the panel's but if

1002

00:42:28,150 --> 00:42:24,710

the plasma is off you will see panels I

1003

00:42:30,490 --> 00:42:28,160

knew an Indian that that ran the Taos

1004

00:42:32,860 --> 00:42:30,500

Indian horse ranch in Taos New Mexico

1005

00:42:35,800 --> 00:42:32,870

and his wife and he was telling me about

1006

00:42:39,040 --> 00:42:35,810

how one Indian summer he took a group of

1007

00:42:40,840 --> 00:42:39,050

tourists up by horseback up into near

1008

00:42:43,420 --> 00:42:40,850

the area of their their sacred mountain

1009

00:42:44,650 --> 00:42:43,430

there and a whole group in broad

1010

00:42:48,400 --> 00:42:44,660

daylight of disc

1011

00:42:50,260 --> 00:42:48,410

pasture he said ray if I'd had a rock if

1012

00:42:52,540 --> 00:42:50,270

night had been guts to do it I could

1013

00:42:54,550 --> 00:42:52,550

have hit them with a rock they passed so

1014

00:42:57,850 --> 00:42:54,560

close to us and he said you could

1015

00:43:00,760 --> 00:42:57,860

actually see panels that looked like

1016

00:43:03,370 --> 00:43:00,770

units of construction that that they

1017

00:43:05,800 --> 00:43:03,380

were made of so anyway let's take a look

1018

00:43:06,940 --> 00:43:05,810

at this and maybe that's to stretch the

1019

00:43:08,920 --> 00:43:06,950

imagination that this

1020

00:43:11,650 --> 00:43:08,930

possess a UFO but when we go to the next

1021

00:43:13,540 --> 00:43:11,660

slide it may not be such a stretch of

1022

00:43:15,880 --> 00:43:13,550

imagination we go get some crumbs yeah

1023

00:43:18,280 --> 00:43:15,890

great just one thing we have to make

1024

00:43:20,050 --> 00:43:18,290

sure that we kind of explain things

1025

00:43:22,000 --> 00:43:20,060

because a lot of people listening to the

1026

00:43:23,530 --> 00:43:22,010

show the majority of the people

1027

00:43:26,589 --> 00:43:23,540

listening to the show YouTube's it's a

1028

00:43:28,569 --> 00:43:26,599

small small audience so we have to kind

1029

00:43:31,240 --> 00:43:28,579

of explain what I mean it's a great

1030

00:43:35,020 --> 00:43:31,250

visual and just to let the listener know

1031

00:43:40,750 --> 00:43:35,030

on on podcasts UFO that listens to the

1032

00:43:42,819 --> 00:43:40,760

podcast or over at kgr a radio and the

1033

00:43:46,599 --> 00:43:42,829

dark matter digital network the radio

1034

00:43:49,450 --> 00:43:46,609

stations that play this show that I will

1035

00:43:51,730 --> 00:43:49,460

get something up on my website in the

1036

00:43:53,680 --> 00:43:51,740

show notes if you want to take a look

1037

00:43:56,079 --> 00:43:53,690

over there a podcast well invite people

1038

00:43:59,050 --> 00:43:56,089

to read yeah what I've written on the

1039

00:44:01,359 --> 00:43:59,060

slides here and there's nothing really

1040

00:44:03,430 --> 00:44:01,369

complicated to understand this is a disc

1041

00:44:05,800 --> 00:44:03,440

that's quite small to an 8 inch in

1042

00:44:09,550 --> 00:44:05,810

diameter we found years ago and it is it

1043

00:44:12,280 --> 00:44:09,560

was found in southern Ohio in the fort

1044

00:44:14,140 --> 00:44:12,290

ancient culture area and it sure looks

1045

00:44:16,089 --> 00:44:14,150

like ladders the interesting thing to me

1046

00:44:18,280 --> 00:44:16,099

is having studied the physics of these

1047

00:44:20,020 --> 00:44:18,290

objects is that when you have a dipole

1048

00:44:21,990 --> 00:44:20,030

or magnetic field and we have actual

1049

00:44:24,220 --> 00:44:22,000

films of this visible data I do the

1050

00:44:27,339 --> 00:44:24,230

plasma being circulating the magnetic

1051
00:44:28,750 --> 00:44:27,349
field glowing gas circulating if you

1052
00:44:29,980 --> 00:44:28,760
wanted to go in and the thing you're

1053
00:44:31,960 --> 00:44:29,990
still hovering above the ground by the

1054
00:44:34,420 --> 00:44:31,970
use of this energy you'd want to go in

1055
00:44:36,730 --> 00:44:34,430
the place of minimal magnetic strength

1056
00:44:39,069 --> 00:44:36,740
or zero magnetic strength you'd want to

1057
00:44:40,750 --> 00:44:39,079
go in through the center like that and

1058
00:44:42,670 --> 00:44:40,760
you'd also want to open your landing

1059
00:44:44,470 --> 00:44:42,680
gear otherwise it would cause some

1060
00:44:46,359 --> 00:44:44,480
problems I won't get into but this

1061
00:44:48,700 --> 00:44:46,369
certainly looks like somebody might be

1062
00:44:53,230 --> 00:44:48,710
illustrating the way they left and went

1063
00:44:55,450 --> 00:44:53,240

into a disc we can't prove it that I

1064

00:44:57,849 --> 00:44:55,460

can't think of any other explanation and

1065

00:45:00,250 --> 00:44:57,859

it'd be keep in mind that this was the

1066

00:45:02,079 --> 00:45:00,260

fort ancient culture people might say

1067

00:45:04,359 --> 00:45:02,089

well that wasn't a Kiva an underground

1068

00:45:06,220 --> 00:45:04,369

round ceremonial structure that they

1069

00:45:09,130 --> 00:45:06,230

have um Arizona New Mexico the problem

1070

00:45:11,380 --> 00:45:09,140

with that hypothesis is that Kiva's did

1071

00:45:15,370 --> 00:45:11,390

not exist in that part of the world in

1072

00:45:17,050 --> 00:45:15,380

you know hi oh and northwestern Kentucky

1073

00:45:19,690 --> 00:45:17,060

and

1074

00:45:22,210 --> 00:45:19,700

a few adjacent areas they simply did not

1075

00:45:24,790 --> 00:45:22,220

exist no excavation has ever turned up

1076
00:45:27,760 --> 00:45:24,800
any evidence that it was a Kiva culture

1077
00:45:29,620 --> 00:45:27,770
or that Kiva's existed so I think we can

1078
00:45:31,570 --> 00:45:29,630
dismiss the idea that it represents that

1079
00:45:33,280 --> 00:45:31,580
but it sure looks like the way somebody

1080
00:45:35,380 --> 00:45:33,290
might be and I had this for several

1081
00:45:38,170 --> 00:45:35,390
years and just the other day I came

1082
00:45:39,670 --> 00:45:38,180
across another disc with the letters and

1083
00:45:41,890 --> 00:45:39,680
we can take a look at that when we get

1084
00:45:45,700 --> 00:45:41,900
over there it was made of a different

1085
00:45:48,220 --> 00:45:45,710
material this is a sandstone compact

1086
00:45:50,770 --> 00:45:48,230
science stone but the other one is a

1087
00:45:53,080 --> 00:45:50,780
semi translucent kind of a greenish

1088
00:45:55,350 --> 00:45:53,090

stone that interesting has a peaceful

1089

00:45:58,570 --> 00:45:55,360

magnetic component to it there it is and

1090

00:46:00,490 --> 00:45:58,580

if you look they're going down toward 4

1091

00:46:02,560 --> 00:46:00,500

o'clock it's an arrow looking letter but

1092

00:46:04,870 --> 00:46:02,570

look at the one on the left it looks

1093

00:46:06,190 --> 00:46:04,880

much brighter as if the person drawing

1094

00:46:07,840 --> 00:46:06,200

those on there wanted to show

1095

00:46:09,790 --> 00:46:07,850

perspective well what that would suggest

1096

00:46:11,830 --> 00:46:09,800

is he's saying well like it was really

1097

00:46:14,080 --> 00:46:11,840

not right there at us it was up above us

1098

00:46:15,940 --> 00:46:14,090

so the letter looks big close up and

1099

00:46:17,590 --> 00:46:15,950

gets smaller with distance I'm not

1100

00:46:19,480 --> 00:46:17,600

saying that's what it was but that's my

1101

00:46:21,490 --> 00:46:19,490

interpretation of it let's look at

1102

00:46:24,340 --> 00:46:21,500

another picture that way I just shot one

1103

00:46:28,540 --> 00:46:24,350

another angle on it so that you can see

1104

00:46:31,270 --> 00:46:28,550

the some people might see these a little

1105

00:46:34,960 --> 00:46:31,280

better in the next slide but yes

1106

00:46:36,400 --> 00:46:34,970

actually this is magnetic - yeah it's

1107

00:46:38,500 --> 00:46:36,410

magnae not strongly magnetic but it's

1108

00:46:40,060 --> 00:46:38,510

very simply magnetic it surprised me and

1109

00:46:41,650 --> 00:46:40,070

let me mention that all those beautiful

1110

00:46:43,750 --> 00:46:41,660

discs your is saying made of hematite

1111

00:46:46,300 --> 00:46:43,760

they must have some magnetite of them

1112

00:46:47,950 --> 00:46:46,310

because they are very appreciative some

1113

00:46:49,870 --> 00:46:47,960

of them stronger than others but just

1114

00:46:51,820 --> 00:46:49,880

interesting but here again we see these

1115

00:46:55,180 --> 00:46:51,830

letters going into the central place

1116

00:46:58,480 --> 00:46:55,190

which by the way I could submit to me

1117

00:47:01,270 --> 00:46:58,490

the most credible UFO cases where

1118

00:47:02,110 --> 00:47:01,280

occupants were seeing see e Teresa's

1119

00:47:04,810 --> 00:47:02,120

honey would have said Close Encounters

1120

00:47:07,150 --> 00:47:04,820

of the Third Kind described occupants

1121

00:47:09,670 --> 00:47:07,160

going in and out of the middle of the

1122

00:47:12,550 --> 00:47:09,680

crap in one case they are very credible

1123

00:47:15,190 --> 00:47:12,560

with some children in in I mean it was

1124

00:47:17,650 --> 00:47:15,200

in France the occupancy small documents

1125

00:47:19,900 --> 00:47:17,660

floated up in the air and went down into

1126

00:47:21,700 --> 00:47:19,910

the the middle center of the object

1127

00:47:23,530 --> 00:47:21,710

which would be the top of a magnetic pad

1128

00:47:25,330 --> 00:47:23,540

if you want to presume based on the

1129

00:47:28,060 --> 00:47:25,340

evidence that I recorded that there is a

1130

00:47:30,640 --> 00:47:28,070

two-pole magnetic field around this

1131

00:47:33,850 --> 00:47:30,650

object that is moving plasma for

1132

00:47:37,210 --> 00:47:33,860

jarick action and support Wow yeah

1133

00:47:39,340 --> 00:47:37,220

interesting so again just to let the

1134

00:47:40,990 --> 00:47:39,350

listener know that these images I'm

1135

00:47:44,920 --> 00:47:41,000

gonna try to figure out how to this is

1136

00:47:47,470 --> 00:47:44,930

actually a what is it called a slide

1137

00:47:49,270 --> 00:47:47,480

presentation PowerPoint I'm gonna try to

1138

00:47:51,790 --> 00:47:49,280

figure out how to get this up on my

1139

00:47:53,440 --> 00:47:51,800

website so everybody can enjoy these

1140

00:47:55,900 --> 00:47:53,450

until I'll be great there's so

1141

00:47:57,790 --> 00:47:55,910

interesting ray how many when I was at

1142

00:47:59,140 --> 00:47:57,800

your house I mean it was I looking all

1143

00:48:02,770 --> 00:47:59,150

around at your dinosaur tracks

1144

00:48:05,890 --> 00:48:02,780

everywhere but you were able to amass a

1145

00:48:07,900 --> 00:48:05,900

good collection of these well they're

1146

00:48:09,760 --> 00:48:07,910

only four of the ones that look most

1147

00:48:12,160 --> 00:48:09,770

like this and then you get the gradient

1148

00:48:14,200 --> 00:48:12,170

such as I showed in that time frame

1149

00:48:17,110 --> 00:48:14,210

thing or well ago I didn't know show

1150

00:48:19,180 --> 00:48:17,120

nearly all of them but I collected of

1151
00:48:22,480 --> 00:48:19,190
course these disc shape ones they're

1152
00:48:25,390 --> 00:48:22,490
very rare I only know of two genuine

1153
00:48:28,810 --> 00:48:25,400
ones of that that are left out that I

1154
00:48:32,530 --> 00:48:28,820
like to get in into my as I call it my

1155
00:48:35,380 --> 00:48:32,540
hematite beautiful hair and the rest of

1156
00:48:37,300 --> 00:48:35,390
them are transitional toward the more

1157
00:48:41,430 --> 00:48:37,310
practical aspects of the game which I

1158
00:48:44,650 --> 00:48:41,440
take as being a a UFO mothership

1159
00:48:47,350 --> 00:48:44,660
symbolically manifested docking game

1160
00:48:49,810 --> 00:48:47,360
from the Indians seeing these things go

1161
00:48:52,390 --> 00:48:49,820
up to an elongated thing in the sky and

1162
00:48:55,150 --> 00:48:52,400
it's otherwise it's a very very strange

1163
00:48:57,130 --> 00:48:55,160

game to trigger why somebody would ever

1164

00:48:59,500 --> 00:48:57,140

come up with such a thing that in fact

1165

00:49:02,440 --> 00:48:59,510

is so odd that it had no appeal to the

1166

00:49:05,740 --> 00:49:02,450

white man at all and but here's here's

1167

00:49:07,060 --> 00:49:05,750

some of them on the table the and you

1168

00:49:09,760 --> 00:49:07,070

see the one there with the ladders you

1169

00:49:11,530 --> 00:49:09,770

can compare the size to the two brown

1170

00:49:13,120 --> 00:49:11,540

ones but the little odd figure which is

1171

00:49:15,340 --> 00:49:13,130

actually from the Shanghai culture of

1172

00:49:17,260 --> 00:49:15,350

Peru those are the ones from Western

1173

00:49:19,960 --> 00:49:17,270

Illinois the beautiful one on the left

1174

00:49:21,400 --> 00:49:19,970

the dark brown one that one is from a

1175

00:49:24,910 --> 00:49:21,410

central owner they're on the Illinois

1176

00:49:27,220 --> 00:49:24,920

River had Havana the east side found in

1177

00:49:28,690 --> 00:49:27,230

1921 I go back and say that those two

1178

00:49:30,280 --> 00:49:28,700

brown ones were found either in the

1179

00:49:33,130 --> 00:49:30,290

latter part of the 19th century or the

1180

00:49:36,310 --> 00:49:33,140

very first part before Piedra died of

1181

00:49:38,710 --> 00:49:36,320

the 20 the 20th century you can see

1182

00:49:40,870 --> 00:49:38,720

different sizes of the disc and you'll

1183

00:49:43,330 --> 00:49:40,880

notice around some of these have much

1184

00:49:44,480 --> 00:49:43,340

rounder edges and there's one down there

1185

00:49:46,100 --> 00:49:44,490

at the four o'clock position

1186

00:49:48,590 --> 00:49:46,110

that is actually cone-shaped that has a

1187

00:49:50,180 --> 00:49:48,600

does have a convex bottom it's a very

1188

00:49:52,700 --> 00:49:50,190

high grade hard hematite very dense

1189

00:49:54,800 --> 00:49:52,710

hematite and leave or not there's been a

1190

00:49:56,780 --> 00:49:54,810

UFO film by some physicists that I think

1191

00:49:59,780 --> 00:49:56,790

we're going to see in a bit here that

1192

00:50:01,490 --> 00:49:59,790

was shaped just like that it was a movie

1193

00:50:03,410 --> 00:50:01,500

film 16 millimeter movie film was taken

1194

00:50:06,560 --> 00:50:03,420

by two physicists at Oak Ridge National

1195

00:50:09,320 --> 00:50:06,570

Laboratory back I think in the 60s early

1196

00:50:12,859 --> 00:50:09,330

70s ever get to date Wow

1197

00:50:14,510 --> 00:50:12,869

so we can move on yeah yeah yeah I we

1198

00:50:16,550 --> 00:50:14,520

got we're taking a break in just about

1199

00:50:20,030 --> 00:50:16,560

two minutes or so just to let you know

1200

00:50:22,520 --> 00:50:20,040

and during the two minutes the people in

1201
00:50:24,980 --> 00:50:22,530
YouTube are gonna get a video that we're

1202
00:50:28,520 --> 00:50:24,990
going to be showing of your exploration

1203
00:50:31,480 --> 00:50:28,530
down in at Goddard that's coming up in a

1204
00:50:33,920 --> 00:50:31,490
little bit so and we just have about

1205
00:50:38,510 --> 00:50:33,930
about a minute and a half before we go

1206
00:50:41,630 --> 00:50:38,520
to break so did you have you actually

1207
00:50:43,609 --> 00:50:41,640
seen any of these like in a museum or

1208
00:50:49,130 --> 00:50:43,619
any you know any any other type of

1209
00:50:50,390 --> 00:50:49,140
collections well yes oh the now of

1210
00:50:53,090 --> 00:50:50,400
course if the collection these came out

1211
00:50:55,730 --> 00:50:53,100
of and and and but there are there are

1212
00:50:57,680 --> 00:50:55,740
people who have discs not of them I

1213
00:51:00,620 --> 00:50:57,690

don't know well I only know of two other

1214

00:51:02,990 --> 00:51:00,630

sources that have that the UFO like once

1215

00:51:05,540 --> 00:51:03,000

when I'm is now owned by a farmer that

1216

00:51:08,300 --> 00:51:05,550

is about 90 years old and he got it from

1217

00:51:09,740 --> 00:51:08,310

another elderly farmer out in Illinois

1218

00:51:12,410 --> 00:51:09,750

and I'm waiting to get it because it is

1219

00:51:15,470 --> 00:51:12,420

a Edison spectacular disc too but it was

1220

00:51:18,530 --> 00:51:15,480

also dug up just a long long time ago

1221

00:51:21,500 --> 00:51:18,540

and but these are the few these this is

1222

00:51:23,390 --> 00:51:21,510

worthy that this thing started out and I

1223

00:51:25,820 --> 00:51:23,400

think the idea of the game but the game

1224

00:51:28,880 --> 00:51:25,830

became contagious just like soccer has

1225

00:51:31,430 --> 00:51:28,890

taken over the u.s. in recent years the

1226

00:51:33,290 --> 00:51:31,440

the first there were that they hope

1227

00:51:35,420 --> 00:51:33,300

wells and then the Mississippians took

1228

00:51:39,140 --> 00:51:35,430

it up and Cahokia down there that has

1229

00:51:42,380 --> 00:51:39,150

the biggest structure by Indians in

1230

00:51:44,510 --> 00:51:42,390

North America it their biggest mound

1231

00:51:46,700 --> 00:51:44,520

there they took up this game big-time

1232

00:51:48,890 --> 00:51:46,710

they had a the the the whole Cahokia

1233

00:51:51,710 --> 00:51:48,900

site had a big huge central feel for

1234

00:51:54,230 --> 00:51:51,720

playing this game of chunky and as it

1235

00:51:57,050 --> 00:51:54,240

turns out some anthropologists have

1236

00:51:58,340 --> 00:51:57,060

theorized that it in fact this caused

1237

00:52:01,010 --> 00:51:58,350

the spread

1238

00:52:04,130 --> 00:52:01,020

of the Cahokia Cahokia empire because

1239

00:52:05,840 --> 00:52:04,140

they got people involved with the game

1240

00:52:06,860 --> 00:52:05,850

and as they became involved in a game

1241

00:52:09,110 --> 00:52:06,870

and got to know each other

1242

00:52:12,080 --> 00:52:09,120

they took on more the traits and the the

1243

00:52:14,090 --> 00:52:12,090

culture and thus the the Empire spread

1244

00:52:16,190 --> 00:52:14,100

we don't know but that is it makes

1245

00:52:18,170 --> 00:52:16,200

pretty good reasoning to me what we do

1246

00:52:21,050 --> 00:52:18,180

know is that chunk this game became an

1247

00:52:23,750 --> 00:52:21,060

obsession how about that okay so we're

1248

00:52:26,750 --> 00:52:23,760

ready to go to break all right we're on

1249

00:52:30,950 --> 00:52:26,760

with ray stanford and we'll be right

1250

00:52:33,980 --> 00:52:30,960

back right after these messages what I

1251
00:52:35,990 --> 00:52:33,990
found here is is the back footprint of a

1252
00:52:37,970 --> 00:52:36,000
large armored dinosaur called a notice

1253
00:52:41,390 --> 00:52:37,980
are called a notes are because they had

1254
00:52:43,820 --> 00:52:41,400
big nodes and sometimes protective items

1255
00:52:46,880 --> 00:52:43,830
across all right we've got just over

1256
00:52:49,220 --> 00:52:46,890
four minutes in this break all right

1257
00:52:52,220 --> 00:52:49,230
thank you all right you're welcome here

1258
00:52:54,110 --> 00:52:52,230
is is the back footprint of a large

1259
00:52:55,970 --> 00:52:54,120
armored dinosaur called a notice are

1260
00:52:58,310 --> 00:52:55,980
called a notice are because they had big

1261
00:53:00,500 --> 00:52:58,320
nodes and sometimes real pointed items

1262
00:53:02,780 --> 00:53:00,510
protective items across their back and

1263
00:53:05,110 --> 00:53:02,790

even sometimes up on their shoulders and

1264

00:53:08,420 --> 00:53:05,120

sometimes even by the side of the head

1265

00:53:11,090 --> 00:53:08,430

it's is really quite a rare find notice

1266

00:53:12,980 --> 00:53:11,100

our tracks are not often found there are

1267

00:53:15,320 --> 00:53:12,990

some out west and up in British Columbia

1268

00:53:17,690 --> 00:53:15,330

in Canada but we don't have a whole lot

1269

00:53:19,310 --> 00:53:17,700

of them in the US and this is one of the

1270

00:53:21,310 --> 00:53:19,320

few and that I have found right here in

1271

00:53:24,980 --> 00:53:21,320

Maryland in the eastern United States

1272

00:53:26,870 --> 00:53:24,990

the hematite can be red it can be dark

1273

00:53:28,520 --> 00:53:26,880

colored or when he gets water into it is

1274

00:53:31,400 --> 00:53:28,530

called limonite it can be yellow and go

1275

00:53:33,440 --> 00:53:31,410

and according to other people doing

1276

00:53:35,060 --> 00:53:33,450

track work Maryland's tracks are the

1277

00:53:36,710 --> 00:53:35,070

most beautiful dinosaur tracks color

1278

00:53:38,570 --> 00:53:36,720

wise that have ever been found anywhere

1279

00:53:39,950 --> 00:53:38,580

in the world the most thrilling thing

1280

00:53:40,790 --> 00:53:39,960

about finding this when I've found other

1281

00:53:42,650 --> 00:53:40,800

notice are tracks

1282

00:53:45,710 --> 00:53:42,660

but what really throw me about this one

1283

00:53:47,900 --> 00:53:45,720

was because I found it a Goddard Space

1284

00:53:50,300 --> 00:53:47,910

Flight Center and I love the paradox

1285

00:53:53,300 --> 00:53:50,310

here space scientists may walk along

1286

00:53:56,840 --> 00:53:53,310

here and they're walking exactly where

1287

00:53:58,700 --> 00:53:56,850

this big bungling heavy armored dinosaur

1288

00:54:01,010 --> 00:53:58,710

walked maybe a hundred ten hundred and

1289

00:54:03,020 --> 00:54:01,020

twelve million years ago I feel like

1290

00:54:05,540 --> 00:54:03,030

what we need all of us need to be aware

1291

00:54:07,160 --> 00:54:05,550

of preserving this wonderful pass to

1292

00:54:09,320 --> 00:54:07,170

this beautiful blue planet of ours I

1293

00:54:10,060 --> 00:54:09,330

mean if we don't preserve it and we've

1294

00:54:12,370 --> 00:54:10,070

don't

1295

00:54:14,770 --> 00:54:12,380

look down and spot these things they

1296

00:54:16,900 --> 00:54:14,780

could be torn up by machinery and so on

1297

00:54:19,120 --> 00:54:16,910

so I ask people to consider themselves

1298

00:54:21,760 --> 00:54:19,130

and custodians do the right thing

1299

00:54:23,830 --> 00:54:21,770

notify someone at a museum someone that

1300

00:54:25,630 --> 00:54:23,840

would know and can help and see that it

1301

00:54:30,510 --> 00:54:25,640

contributes to scientific knowledge if

1302

00:54:34,330 --> 00:54:30,520

it has that capability all right so

1303

00:54:40,270 --> 00:54:34,340

we're back and we're back with race

1304

00:54:42,430 --> 00:54:40,280

we're still in the youtube break but ray

1305

00:54:45,070 --> 00:54:42,440

I wanted to just take a look we do get

1306

00:54:50,080 --> 00:54:45,080

some messages where people have

1307

00:54:54,970 --> 00:54:50,090

questions and someone wanted to let me

1308

00:54:56,920 --> 00:54:54,980

just see so do you think would you

1309

00:54:58,750 --> 00:54:56,930

consider someone was saying that you you

1310

00:55:01,390 --> 00:54:58,760

probably have one of the best

1311

00:55:02,320 --> 00:55:01,400

collections outside of a museum of these

1312

00:55:04,870 --> 00:55:02,330

chukka

1313

00:55:07,570 --> 00:55:04,880

whatever they are stones would you say

1314

00:55:09,010 --> 00:55:07,580

that's possible well not of the discs

1315

00:55:12,420 --> 00:55:09,020

total there's some people have more the

1316

00:55:14,980 --> 00:55:12,430

discs but I have I have most of the

1317

00:55:16,480 --> 00:55:14,990

ufo-like ones there are as I said

1318

00:55:17,980 --> 00:55:16,490

there's two that I know for sure that

1319

00:55:20,830 --> 00:55:17,990

I've that I've seen one of them I'm held

1320

00:55:23,140 --> 00:55:20,840

in my hand that that are out there that

1321

00:55:24,430 --> 00:55:23,150

I am been able to acquire yet but you

1322

00:55:26,470 --> 00:55:24,440

know these were that like the first

1323

00:55:28,180 --> 00:55:26,480

photos somebody got off a UFO this is

1324

00:55:30,760 --> 00:55:28,190

the Indians photos you might say I think

1325

00:55:34,990 --> 00:55:30,770

if I'm interpreting it correctly of what

1326

00:55:36,880 --> 00:55:35,000

she or he observed and then laborious

1327

00:55:39,130 --> 00:55:36,890

Lee made imagine making this out of

1328

00:55:40,960 --> 00:55:39,140

hematite which has a tremendous hardness

1329

00:55:42,280 --> 00:55:40,970

just to work with it is the challenge

1330

00:55:44,980 --> 00:55:42,290

yeah

1331

00:55:49,030 --> 00:55:44,990

do they did they make any stone tools

1332

00:55:51,460 --> 00:55:49,040

out of that yes they there are there are

1333

00:55:53,740 --> 00:55:51,470

quite a few little cells used in

1334

00:55:56,110 --> 00:55:53,750

splitting wood that they made out of it

1335

00:55:58,330 --> 00:55:56,120

and there are also some other fancier

1336

00:56:01,210 --> 00:55:58,340

objects that are made out of hematite it

1337

00:56:03,130 --> 00:56:01,220

was a beloved material but you don't see

1338

00:56:04,810 --> 00:56:03,140

as many as the hematite collectors would

1339

00:56:07,660 --> 00:56:04,820

like to see because it was just hard to

1340

00:56:10,450 --> 00:56:07,670

to work with and there are various

1341

00:56:11,950 --> 00:56:10,460

grades of hematite and the Indians like

1342

00:56:13,390 --> 00:56:11,960

hematite so much that they what they

1343

00:56:15,700 --> 00:56:13,400

found out something that most people

1344

00:56:17,410 --> 00:56:15,710

don't know but they would take lemonade

1345

00:56:19,810 --> 00:56:17,420

which is a hydrated iron oxide which

1346

00:56:21,820 --> 00:56:19,820

hematite is and they would fire it and

1347

00:56:23,950 --> 00:56:21,830

make it hard on the outside lose its

1348

00:56:26,770 --> 00:56:23,960

water and it would make it hard and he

1349

00:56:28,870 --> 00:56:26,780

on the outside but I have objects that

1350

00:56:31,000 --> 00:56:28,880

show broken open that probe I'm annoyed

1351

00:56:33,820 --> 00:56:31,010

that they discovered this process that

1352

00:56:35,470 --> 00:56:33,830

you could dehydrate the the limonite and

1353

00:56:36,700 --> 00:56:35,480

turn it into hematite so I you would

1354

00:56:38,800 --> 00:56:36,710

have to give the engine some credit for

1355

00:56:40,480 --> 00:56:38,810

a little bit of petrol chemistry there

1356

00:56:42,850 --> 00:56:40,490

were College that I think we're ready to

1357

00:56:45,580 --> 00:56:42,860

go back aren't we race we are that's

1358

00:56:47,170 --> 00:56:45,590

correct hey I'm ready aside all right

1359

00:56:48,310 --> 00:56:47,180

here we go commercial free for the

1360

00:56:54,910 --> 00:56:48,320

second hour yep

1361

00:56:58,120 --> 00:56:54,920

in five four three two all right welcome

1362

00:57:00,730 --> 00:56:58,130

back my guest is Ray Stanford and we've

1363

00:57:04,300 --> 00:57:00,740

been talking ancient artifacts that sure

1364

00:57:09,280 --> 00:57:04,310

look a heck of a lot like what they call

1365

00:57:11,910 --> 00:57:09,290

a flying saucer any triangle ones that

1366

00:57:16,630 --> 00:57:11,920

wouldn't really work in this game right

1367

00:57:18,520 --> 00:57:16,640

now the yeah in fact I did find two I

1368

00:57:20,890 --> 00:57:18,530

was coming back from the note effect

1369

00:57:22,690 --> 00:57:20,900

auction in Ohio and I I was in West

1370

00:57:24,640 --> 00:57:22,700

Virginia and I stopped by one of these

1371

00:57:26,290 --> 00:57:24,650

brand-new store they're what they were

1372

00:57:29,050 --> 00:57:26,300

selling their various kinds of frozen

1373

00:57:31,090 --> 00:57:29,060

yogurt and there was a big cliff over to

1374

00:57:31,780 --> 00:57:31,100

the side I'm the property adjacent to it

1375

00:57:34,150 --> 00:57:31,790

and I went over there

1376
00:57:36,210 --> 00:57:34,160
and lo and behold there had washed out

1377
00:57:40,690 --> 00:57:36,220
of the cliff and fallen down below to

1378
00:57:42,370 --> 00:57:40,700
black stone objects that were rounded

1379
00:57:44,560 --> 00:57:42,380
just like in a matter of fact just very

1380
00:57:46,180 --> 00:57:44,570
much like one of the triangular UFOs

1381
00:57:48,970 --> 00:57:46,190
that I filmed from an airliner they're

1382
00:57:50,800 --> 00:57:48,980
9,000 feet on 12 1277

1383
00:57:52,660 --> 00:57:50,810
I'm not saying those were UFO effigies

1384
00:57:54,970 --> 00:57:52,670
but I've noticed donation of what they

1385
00:57:57,370 --> 00:57:54,980
were I still have one of them somebody I

1386
00:57:58,660 --> 00:57:57,380
think put one of them in the pocket and

1387
00:58:00,880 --> 00:57:58,670
walked out of my living room with it but

1388
00:58:02,980 --> 00:58:00,890

they the other one I still have and it

1389

00:58:04,690 --> 00:58:02,990

does look like God what I filmed except

1390

00:58:06,630 --> 00:58:04,700

what I film had more details than this

1391

00:58:09,850 --> 00:58:06,640

does yeah how about that

1392

00:58:12,280 --> 00:58:09,860

so ray I don't know you know we got an

1393

00:58:15,880 --> 00:58:12,290

hour left here we can we can go into

1394

00:58:20,410 --> 00:58:15,890

your into the dinosaur I know it's it's

1395

00:58:22,720 --> 00:58:20,420

off the UFO topic but I do I do mention

1396

00:58:25,630 --> 00:58:22,730

that on my show occasionally about once

1397

00:58:28,810 --> 00:58:25,640

a month or so I do go off topic and this

1398

00:58:34,990 --> 00:58:28,820

this is kind of the show for that so but

1399

00:58:37,270 --> 00:58:35,000

before we go into that just just one

1400

00:58:37,900 --> 00:58:37,280

thing I would like to talk about the UFO

1401
00:58:42,310 --> 00:58:37,910
subject

1402
00:58:44,050 --> 00:58:42,320
you have seen I I know I asked you

1403
00:58:44,920 --> 00:58:44,060
before and you never really gave me an

1404
00:58:48,640 --> 00:58:44,930
answer

1405
00:58:52,510 --> 00:58:48,650
but I you have seen more UFOs than

1406
00:58:55,210 --> 00:58:52,520
anyone I've known you have filmed many

1407
00:58:57,820 --> 00:58:55,220
many UFOs and I guess the question I

1408
00:59:01,480 --> 00:58:57,830
have for you is why do you think that

1409
00:59:04,180 --> 00:59:01,490
you have all these sightings I mean okay

1410
00:59:06,460 --> 00:59:04,190
let me let me put that in a context okay

1411
00:59:08,859 --> 00:59:06,470
I've also found more dinosaur tracks

1412
00:59:11,080 --> 00:59:08,869
than anyone in the United States more

1413
00:59:13,480 --> 00:59:11,090

tracks of the flying reptiles pterosaurs

1414

00:59:15,790 --> 00:59:13,490

or pterodactyl people call them because

1415

00:59:19,210 --> 00:59:15,800

I'm looking for them I trained myself to

1416

00:59:21,160 --> 00:59:19,220

know how to look and to properly

1417

00:59:23,800 --> 00:59:21,170

evaluate what I'm looking at and that's

1418

00:59:26,980 --> 00:59:23,810

the clue now when you carry as I did for

1419

00:59:29,290 --> 00:59:26,990

30 years a heavy camera with a big glass

1420

00:59:33,010 --> 00:59:29,300

lens on your shoulder giving you a neck

1421

00:59:35,260 --> 00:59:33,020

ache often you ask yourself why the heck

1422

00:59:37,300 --> 00:59:35,270

am i doing this well you keep looking at

1423

00:59:39,490 --> 00:59:37,310

the sky to try to make it work well and

1424

00:59:41,470 --> 00:59:39,500

hope you see something and that is what

1425

00:59:42,940 --> 00:59:41,480

I did but let me mention that the films

1426
00:59:46,000 --> 00:59:42,950
I've been talking about most everyone

1427
00:59:48,700 --> 00:59:46,010
has multiple witnesses including

1428
00:59:50,920 --> 00:59:48,710
excellent witnesses and in other cases

1429
00:59:54,010 --> 00:59:50,930
not only the film's but electronic and

1430
00:59:56,830 --> 00:59:54,020
gravitational magnetic measurements

1431
00:59:58,930 --> 00:59:56,840
simultaneously in both daylight right

1432
01:00:01,420 --> 00:59:58,940
you know I remember when we were

1433
01:00:03,010 --> 01:00:01,430
discussing some of your some of your

1434
01:00:05,410 --> 01:00:03,020
sightings at least a couple of them and

1435
01:00:07,450 --> 01:00:05,420
probably more but I just remember you

1436
01:00:09,099 --> 01:00:07,460
mentioning this that you had a feeling

1437
01:00:11,590 --> 01:00:09,109
first and I want to tell you also that

1438
01:00:13,240 --> 01:00:11,600

yeah I've had other people and I'm not I

1439

01:00:15,130 --> 01:00:13,250

know you listen to the show a lot of the

1440

01:00:17,560 --> 01:00:15,140

time but I've had people on the show

1441

01:00:20,770 --> 01:00:17,570

that have told me exactly the same thing

1442

01:00:25,240 --> 01:00:20,780

and can you describe what that feeling

1443

01:00:27,460 --> 01:00:25,250

is well yes the now let me say that back

1444

01:00:29,859 --> 01:00:27,470

in my teens when I was a believer in

1445

01:00:31,720 --> 01:00:29,869

tour Danskin so forth I was able to get

1446

01:00:34,450 --> 01:00:31,730

that feeling for sighting and I thought

1447

01:00:35,740 --> 01:00:34,460

it was a telepathic message I don't

1448

01:00:38,620 --> 01:00:35,750

believe that any longer

1449

01:00:42,550 --> 01:00:38,630

we got a tip from a government scientist

1450

01:00:45,910 --> 01:00:42,560

at white sands in July of 1978 that if

1451

01:00:48,970 --> 01:00:45,920

his his sister had seen me on the Phil

1452

01:00:50,590 --> 01:00:48,980

Donahue show with Hynek and she called

1453

01:00:51,700 --> 01:00:50,600

and said my gosh my brother

1454

01:00:53,290 --> 01:00:51,710

who

1455

01:00:55,480 --> 01:00:53,300

he was a physical scientist out there

1456

01:00:57,280 --> 01:00:55,490

says that if you've got that equipment

1457

01:00:59,320 --> 01:00:57,290

you better get out there and sneak

1458

01:01:01,000 --> 01:00:59,330

around the periphery because we're being

1459

01:01:02,920 --> 01:01:01,010

plagued by them and have a directive to

1460

01:01:04,750 --> 01:01:02,930

get any kind of evidence that we can get

1461

01:01:07,000 --> 01:01:04,760

on this that we are capable of getting

1462

01:01:09,370 --> 01:01:07,010

and we went out there and we got a

1463

01:01:12,460 --> 01:01:09,380

spectacular results but what happened is

1464

01:01:15,220 --> 01:01:12,470

on the way out there our financier was

1465

01:01:17,470 --> 01:01:15,230

with us the guy that put huge money into

1466

01:01:19,420 --> 01:01:17,480

this wonderful guy he was in along with

1467

01:01:23,790 --> 01:01:19,430

us with my wife and me and our eight

1468

01:01:27,280 --> 01:01:23,800

week old baby and after we had a

1469

01:01:30,040 --> 01:01:27,290

sighting I just commented I said you

1470

01:01:33,550 --> 01:01:30,050

know I felt that before it happened and

1471

01:01:35,859 --> 01:01:33,560

they said that they did too and later on

1472

01:01:39,310 --> 01:01:35,869

they experienced this same feeling

1473

01:01:41,740 --> 01:01:39,320

before before the objects showed up but

1474

01:01:43,570 --> 01:01:41,750

what we found out during that event we

1475

01:01:45,849 --> 01:01:43,580

recorded the extreme low frequency

1476

01:01:47,320 --> 01:01:45,859

magnetism emitted by these objects it

1477

01:01:50,380 --> 01:01:47,330

had a direct correlation with their

1478

01:01:52,480 --> 01:01:50,390

manoeuvres and by golly when you look at

1479

01:01:56,020 --> 01:01:52,490

it in the context of scientific studies

1480

01:01:57,970 --> 01:01:56,030

unrelated to UFOs about how this e.l.f

1481

01:02:00,460 --> 01:01:57,980

in this range affects the human nervous

1482

01:02:02,680 --> 01:02:00,470

system and brain you begin to understand

1483

01:02:05,829 --> 01:02:02,690

something a part of it is in the deep

1484

01:02:07,870 --> 01:02:05,839

restful sleep range now if you're asleep

1485

01:02:10,870 --> 01:02:07,880

and one of these things comes around

1486

01:02:13,240 --> 01:02:10,880

that might explain why one of a couple

1487

01:02:14,770 --> 01:02:13,250

gets up to go to the bathroom sees an

1488

01:02:16,630 --> 01:02:14,780

incredible thing at close range out the

1489

01:02:20,320 --> 01:02:16,640

bathroom window can't well wake the

1490

01:02:22,060 --> 01:02:20,330

spouse to see it because it's weird they

1491

01:02:24,460 --> 01:02:22,070

cannot be awakened the way that might be

1492

01:02:27,220 --> 01:02:24,470

explained by the fact that when the LF

1493

01:02:30,160 --> 01:02:27,230

in this range is affecting the brain it

1494

01:02:32,380 --> 01:02:30,170

actually replicates what is impinging on

1495

01:02:34,480 --> 01:02:32,390

it and if it's deep restful sleep could

1496

01:02:37,290 --> 01:02:34,490

be very hard to to wake you up but if

1497

01:02:41,109 --> 01:02:37,300

you are awake it gives you a wonderful

1498

01:02:43,450 --> 01:02:41,119

rested relaxed feeling that we jokingly

1499

01:02:46,599 --> 01:02:43,460

call you would spell in the dictionary

1500

01:02:50,290 --> 01:02:46,609

you phor I a euphoria but we spell it

1501
01:02:52,060 --> 01:02:50,300
UFO RI a because based on the recordings

1502
01:02:53,680 --> 01:02:52,070
we made in broad daylight with multiple

1503
01:02:56,680 --> 01:02:53,690
witnesses and instrument recording and

1504
01:02:58,920 --> 01:02:56,690
film we believe that this range of

1505
01:03:01,560 --> 01:02:58,930
frequency it can be perceived

1506
01:03:03,910 --> 01:03:01,570
consciously and it makes you feel

1507
01:03:05,650 --> 01:03:03,920
surprisingly good you might feel like

1508
01:03:07,509 --> 01:03:05,660
when you wake up on

1509
01:03:09,460 --> 01:03:07,519
an autumn morning and the atmosphere is

1510
01:03:11,349 --> 01:03:09,470
so clear and ends atmospheric are that

1511
01:03:13,749 --> 01:03:11,359
kind of thing or you might be a teenage

1512
01:03:15,099 --> 01:03:13,759
a kid that all of a sudden realized hey

1513
01:03:16,740 --> 01:03:15,109

today's the day I have that secret

1514

01:03:19,210 --> 01:03:16,750

meeting in the woods with my best

1515

01:03:22,120 --> 01:03:19,220

girlfriend I mean is it kind of thing

1516

01:03:23,980 --> 01:03:22,130

this energy and it's a wonderful thing

1517

01:03:26,559 --> 01:03:23,990

and we call it euphoria and I believe

1518

01:03:29,170 --> 01:03:26,569

that people could be trained to become

1519

01:03:30,400 --> 01:03:29,180

walking talking UFO detectors but I'm

1520

01:03:33,210 --> 01:03:30,410

not going to go into the business of

1521

01:03:34,870 --> 01:03:33,220

training them well be called a god man

1522

01:03:38,740 --> 01:03:34,880

Wow

1523

01:03:41,589 --> 01:03:38,750

yeah I remember one of the sightings you

1524

01:03:43,599 --> 01:03:41,599

said was actually on an airline you

1525

01:03:45,609 --> 01:03:43,609

mentioned it you saw it back something

1526

01:03:47,230 --> 01:03:45,619

in the headrests 79 but I remember you

1527

01:03:50,529 --> 01:03:47,240

said you reached over and grabbed your

1528

01:03:52,539 --> 01:03:50,539

camera and well that's right well I tell

1529

01:03:56,109 --> 01:03:52,549

you what we had taken off from New York

1530

01:03:58,150 --> 01:03:56,119

this was 1277 panic flight night and as

1531

01:04:00,549 --> 01:03:58,160

we were coming up we were to what they

1532

01:04:02,470 --> 01:04:00,559

call pea soup we were in clouds and we

1533

01:04:05,650 --> 01:04:02,480

were flying out of New York City to

1534

01:04:08,140 --> 01:04:05,660

dallas-fort worth and verified and and

1535

01:04:10,029 --> 01:04:08,150

what happens is I felt this which I'd

1536

01:04:12,220 --> 01:04:10,039

experienced before and I said to my wife

1537

01:04:14,200 --> 01:04:12,230

who was right beside me of course in the

1538

01:04:15,880 --> 01:04:14,210

airline seat I said listen I said you're

1539

01:04:17,140 --> 01:04:15,890

trying to go to sleep but I feel it when

1540

01:04:18,640 --> 01:04:17,150

we get through the clouds there's going

1541

01:04:20,950 --> 01:04:18,650

to be one out there I can feel that so

1542

01:04:24,069 --> 01:04:20,960

strongly that I felt before and she said

1543

01:04:26,109 --> 01:04:24,079

look she was pregnant she were going to

1544

01:04:28,480 --> 01:04:26,119

have our first child in in May as it

1545

01:04:30,880 --> 01:04:28,490

turns out this was December and she said

1546

01:04:32,589 --> 01:04:30,890

look I've got to get some sleep I think

1547

01:04:33,160 --> 01:04:32,599

I'm coming down with a cold I have a

1548

01:04:35,079 --> 01:04:33,170

headache

1549

01:04:37,240 --> 01:04:35,089

I feel nauseated I've got to get don't

1550

01:04:38,410 --> 01:04:37,250

you if you see one you showed me enough

1551

01:04:43,359 --> 01:04:38,420

of these things since we got married

1552

01:04:45,359 --> 01:04:43,369

don't wake me up and I said okay and but

1553

01:04:47,440 --> 01:04:45,369

just what then she said wait a minute

1554

01:04:50,710 --> 01:04:47,450

wake me up here you see a mothership

1555

01:04:53,349 --> 01:04:50,720

because I haven't seen one do believe it

1556

01:04:54,640 --> 01:04:53,359

or not about two hours later when we got

1557

01:04:58,870 --> 01:04:54,650

out of the clouds there was this

1558

01:05:00,430 --> 01:04:58,880

beautiful object pacing our plane and I

1559

01:05:03,039 --> 01:05:00,440

said I've got to film you

1560

01:05:04,150 --> 01:05:03,049

I've got to film you guys and I grabbed

1561

01:05:06,460 --> 01:05:04,160

on my seat now unfortunately had the

1562

01:05:08,769 --> 01:05:06,470

case it had to ted-like pads on top at

1563

01:05:10,930 --> 01:05:08,779

the lockdown had to unlock them and I

1564

01:05:12,759 --> 01:05:10,940

got really upset I couldn't get it and

1565

01:05:14,920 --> 01:05:12,769

the thing took off like the proverbial

1566

01:05:17,529 --> 01:05:14,930

bat out of hell and shot straight up

1567

01:05:19,599 --> 01:05:17,539

this straight up at tremendous speed and

1568

01:05:22,299 --> 01:05:19,609

left but about two hours late

1569

01:05:24,549 --> 01:05:22,309

into the flight I saw what appeared to

1570

01:05:26,769 --> 01:05:24,559

be the same type of object but instead

1571

01:05:29,589 --> 01:05:26,779

of being looking with the surface of it

1572

01:05:32,049 --> 01:05:29,599

like liquid mercury it had a surface

1573

01:05:34,209 --> 01:05:32,059

that was so black it seemed to absorb

1574

01:05:36,370 --> 01:05:34,219

every light ray that hit unless it was

1575

01:05:38,349 --> 01:05:36,380

hit at a very narrow oblique angle and

1576

01:05:41,170 --> 01:05:38,359

then the sunlight would reflect off of

1577

01:05:44,079 --> 01:05:41,180

it there but I began to get film and I

1578

01:05:48,219 --> 01:05:44,089

got multiple minutes in broad daylight

1579

01:05:51,699 --> 01:05:48,229

this object and it led me my camera and

1580

01:05:53,109 --> 01:05:51,709

my camera of course to the big carrier

1581

01:05:55,089 --> 01:05:53,119

mothership whatever you want to call it

1582

01:05:57,719 --> 01:05:55,099

that was out there that we now know from

1583

01:06:02,529 --> 01:05:57,729

data in the film was about a hundred and

1584

01:06:04,779 --> 01:06:02,539

sixty five miles away from the camera

1585

01:06:06,370 --> 01:06:04,789

but it was huge and we have we have size

1586

01:06:08,769 --> 01:06:06,380

they don't miss big thing and these

1587

01:06:10,779 --> 01:06:08,779

objects were going to and from it like

1588

01:06:13,809 --> 01:06:10,789

crazy incredible speeds different

1589

01:06:16,509 --> 01:06:13,819

Wrangler objects they were discs and I

1590

01:06:18,999 --> 01:06:16,519

got wonderful film and the whole story

1591

01:06:20,469 --> 01:06:19,009

will really well documented I don't want

1592

01:06:23,019 --> 01:06:20,479

to get into that because we were going

1593

01:06:26,979 --> 01:06:23,029

to try to get into ten million years ago

1594

01:06:29,439 --> 01:06:26,989

yeah but that anyway that was a prime

1595

01:06:31,959 --> 01:06:29,449

example of feeling the euphoria and

1596

01:06:36,430 --> 01:06:31,969

being able to benefit by it and getting

1597

01:06:38,890 --> 01:06:36,440

a film right before we get into ten

1598

01:06:41,859 --> 01:06:38,900

million or more years ago I just wanted

1599

01:06:44,289 --> 01:06:41,869

to allow that if someone wanted to call

1600

01:06:47,289 --> 01:06:44,299

in we're gonna put the call in number up

1601

01:06:51,969 --> 01:06:47,299

and if you're over at kgr hey radio that

1602

01:06:54,400 --> 01:06:51,979

number is 603 967 403 open and what i'd

1603

01:06:56,920 --> 01:06:54,410

like to allow is if anyone wants to call

1604

01:06:59,769 --> 01:06:56,930

in and talk about UFOs before we change

1605

01:07:03,279 --> 01:06:59,779

the subject and so if no one if no-one

1606

01:07:05,199 --> 01:07:03,289

does speak right up then then we are

1607

01:07:08,589 --> 01:07:05,209

going to move on to the dinosaurs so

1608

01:07:10,180 --> 01:07:08,599

along those lines rate you actually had

1609

01:07:13,239 --> 01:07:10,190

a sighting when you went to pick she'll

1610

01:07:18,579 --> 01:07:13,249

up one day right at the thought yes yeah

1611

01:07:20,140 --> 01:07:18,589

yes oh that was in 1989 at that time

1612

01:07:22,049 --> 01:07:20,150

this was before she went with the Hubble

1613

01:07:25,269 --> 01:07:22,059

Space Telescope servicing missions and

1614

01:07:30,219 --> 01:07:25,279

she was in public affairs at Goddard and

1615

01:07:31,689 --> 01:07:30,229

I had back in those days before 9/11 so

1616

01:07:33,430 --> 01:07:31,699

you could park your car right in front

1617

01:07:35,710 --> 01:07:33,440

of building 8 which is he

1618

01:07:39,370 --> 01:07:35,720

administration building and I had in my

1619

01:07:41,020 --> 01:07:39,380

car with me in his case a thousand

1620

01:07:43,300 --> 01:07:41,030

millimeter telephoto on a 35-millimeter

1621

01:07:46,630 --> 01:07:43,310

camera that's a 20 power lens and it was

1622

01:07:49,569 --> 01:07:46,640

a high-quality expensive lens and I pull

1623

01:07:53,559 --> 01:07:49,579

up there and lo behold there is a disc

1624

01:07:57,760 --> 01:07:53,569

shaped UFO on the western horizon and at

1625

01:08:01,089 --> 01:07:57,770

that point in time it had what I now

1626
01:08:02,740 --> 01:08:01,099
know to have been plasma around his

1627
01:08:05,190 --> 01:08:02,750
surface but it was it was like a by

1628
01:08:11,890 --> 01:08:05,200
convex disc except it was like two cones

1629
01:08:16,390 --> 01:08:11,900
and flange to flange and but as I filmed

1630
01:08:21,099 --> 01:08:16,400
it it actually the plasma moved off its

1631
01:08:22,689 --> 01:08:21,109
surface and begin to contour the dipolar

1632
01:08:24,999 --> 01:08:22,699
magnetic field now people don't know

1633
01:08:27,970 --> 01:08:25,009
that term you would probably have though

1634
01:08:30,160 --> 01:08:27,980
in school have had a bar magnet under a

1635
01:08:31,959 --> 01:08:30,170
piece of paper and scattered shavings

1636
01:08:34,150 --> 01:08:31,969
around and you see that pattern it has

1637
01:08:36,700 --> 01:08:34,160
two poles north and south we're called

1638
01:08:38,170 --> 01:08:36,710

and that's a two-dimensional version of

1639

01:08:40,900 --> 01:08:38,180

it but this looked like a

1640

01:08:43,510 --> 01:08:40,910

three-dimensional version in the sky

1641

01:08:46,360 --> 01:08:43,520

because you can't see a magnetic field

1642

01:08:47,979 --> 01:08:46,370

but if there is plasma which is emitting

1643

01:08:50,410 --> 01:08:47,989

light because of the energy in it and

1644

01:08:52,990 --> 01:08:50,420

the electrons moving from one orbit to

1645

01:08:55,390 --> 01:08:53,000

another and emitting light you will be

1646

01:08:58,599 --> 01:08:55,400

able to see it and I could see it and I

1647

01:09:01,209 --> 01:08:58,609

got one absolutely I think it was the

1648

01:09:03,880 --> 01:09:01,219

fifth photograph spectacular beautiful

1649

01:09:05,800 --> 01:09:03,890

photograph of this beautiful field

1650

01:09:07,870 --> 01:09:05,810

around this object and at that point

1651
01:09:10,570 --> 01:09:07,880
once the plasma is off the surface you

1652
01:09:12,939 --> 01:09:10,580
can actually see that there are what I

1653
01:09:14,800 --> 01:09:12,949
call these compositional panels that I

1654
01:09:16,900 --> 01:09:14,810
talked about earlier like in that disk

1655
01:09:19,300 --> 01:09:16,910
we saw you can actually see them on the

1656
01:09:20,559 --> 01:09:19,310
surface it's not a blob of light it's

1657
01:09:22,539 --> 01:09:20,569
not something you can't see something

1658
01:09:24,930 --> 01:09:22,549
you can actually see the panel's but

1659
01:09:27,910 --> 01:09:24,940
most spectacularly this beautiful

1660
01:09:30,459 --> 01:09:27,920
three-dimensional magnetic field around

1661
01:09:33,849 --> 01:09:30,469
it so that was that was in November of

1662
01:09:36,550 --> 01:09:33,859
1989 taken from right in front of the

1663
01:09:38,740 --> 01:09:36,560

the administration building of the NASA

1664

01:09:41,320 --> 01:09:38,750

Goddard Space Flight Center when the

1665

01:09:47,499 --> 01:09:41,330

thing left I rushed in and told my wife

1666

01:09:52,780 --> 01:09:48,999

well I forget the name of them the local

1667

01:09:54,490 --> 01:09:52,790

UFO organization to tell him about it

1668

01:09:56,200 --> 01:09:54,500

but I made a drawing for Sheila and

1669

01:09:58,120 --> 01:09:56,210

SoulSilver and that was really when I

1670

01:10:00,100 --> 01:09:58,130

got the pictures back I was just so

1671

01:10:01,570 --> 01:10:00,110

thrilled because I can tell you to lie

1672

01:10:02,830 --> 01:10:01,580

about to convince me there you imagined

1673

01:10:05,020 --> 01:10:02,840

that part about the field that's just

1674

01:10:07,930 --> 01:10:05,030

good to be true but there it was on the

1675

01:10:10,060 --> 01:10:07,940

film just beautiful amazing amazing so

1676
01:10:12,220 --> 01:10:10,070
someone just tried to call in and they

1677
01:10:15,130 --> 01:10:12,230
hang up so if you are calling in just

1678
01:10:17,260 --> 01:10:15,140
keep in mind that I'm not going to

1679
01:10:19,660 --> 01:10:17,270
interrupt ray while I was talking so

1680
01:10:21,610 --> 01:10:19,670
just hang there and and then I'll

1681
01:10:23,380 --> 01:10:21,620
introduce you and also make sure that

1682
01:10:25,150 --> 01:10:23,390
you have your radio a computer or

1683
01:10:26,830 --> 01:10:25,160
whatever it is you're listening to make

1684
01:10:29,020 --> 01:10:26,840
sure they have that muted at that time

1685
01:10:31,150 --> 01:10:29,030
if you would so we're still taking calls

1686
01:10:32,860 --> 01:10:31,160
everyone wants to call in otherwise

1687
01:10:39,479 --> 01:10:32,870
we're going to switch a subject here

1688
01:10:42,220 --> 01:10:39,489

really quickly and so ray you have also

1689

01:10:45,100 --> 01:10:42,230

for the person that has not heard you

1690

01:10:47,470 --> 01:10:45,110

for the first time this is their first

1691

01:10:49,240 --> 01:10:47,480

time listening to you I want to say you

1692

01:10:54,760 --> 01:10:49,250

mentioned earlier about your your book

1693

01:10:56,260 --> 01:10:54,770

on Socorro but you have written the best

1694

01:10:58,750 --> 01:10:56,270

book there's been a couple of others or

1695

01:11:03,550 --> 01:10:58,760

at least one other or I'm not mentioning

1696

01:11:05,709 --> 01:11:03,560

of Lonnie Zamora daughter told you that

1697

01:11:08,229 --> 01:11:05,719

you had written the best account of what

1698

01:11:12,040 --> 01:11:08,239

happened well yes but you see Lonnie

1699

01:11:13,570 --> 01:11:12,050

told her that she when she turned 21 she

1700

01:11:15,760 --> 01:11:13,580

said dad you never won't talk about this

1701

01:11:17,650 --> 01:11:15,770

could you please I'm twenty what could

1702

01:11:21,010 --> 01:11:17,660

you please tell me what you saw going to

1703

01:11:23,260 --> 01:11:21,020

you and he said look si Ella file over

1704

01:11:25,090 --> 01:11:23,270

there everybody sent me articles people

1705

01:11:26,580 --> 01:11:25,100

writing about this nobody get rights if

1706

01:11:28,900 --> 01:11:26,590

you want the full story accurately

1707

01:11:31,060 --> 01:11:28,910

there's only one person that got it

1708

01:11:33,100 --> 01:11:31,070

right and that's ray Stanford in that

1709

01:11:33,580 --> 01:11:33,110

book over there that you see on the

1710

01:11:35,350 --> 01:11:33,590

shelf

1711

01:11:38,080 --> 01:11:35,360

and she's dead if you'll read that

1712

01:11:39,970 --> 01:11:38,090

you'll know everything get us all and

1713

01:11:41,860 --> 01:11:39,980

you'll learn a lot more and so she

1714

01:11:45,880 --> 01:11:41,870

contacted me and was very appreciative

1715

01:11:48,520 --> 01:11:45,890

Wow yeah yeah that's still in in my book

1716

01:11:51,450 --> 01:11:48,530

one of the best you know it's in that

1717

01:11:54,459 --> 01:11:51,460

definitely in the top ten of sightings

1718

01:11:56,490 --> 01:11:54,469

and we Justin said if you could be

1719

01:11:59,919 --> 01:11:56,500

biased would you agree with that

1720

01:12:01,799 --> 01:11:59,929

it is certainly in North America it is

1721

01:12:05,049 --> 01:12:01,809

the absolutely

1722

01:12:07,750 --> 01:12:05,059

best-documented coast encounter of the

1723

01:12:10,299 --> 01:12:07,760

third kind where a person where the

1724

01:12:13,479 --> 01:12:10,309

policeman Lonnie Zamora Socorro

1725

01:12:14,919 --> 01:12:13,489

policeman saw two diminutive arguments

1726

01:12:17,830 --> 01:12:14,929

in what appeared to be white coveralls

1727

01:12:19,810 --> 01:12:17,840

outside the craft yes it is certainly

1728

01:12:21,729 --> 01:12:19,820

North America's in my opinion most

1729

01:12:23,500 --> 01:12:21,739

credible close encounter of the third

1730

01:12:27,069 --> 01:12:23,510

kind and you were there

1731

01:12:28,750 --> 01:12:27,079

shortly after the one part I don't think

1732

01:12:30,699 --> 01:12:28,760

we've ever discussed on the show is how

1733

01:12:33,159 --> 01:12:30,709

you found out about it how did you find

1734

01:12:35,679 --> 01:12:33,169

out yeah well I didn't know about it and

1735

01:12:38,799 --> 01:12:35,689

I got a call from a friend of mine Bob

1736

01:12:42,129 --> 01:12:38,809

Mathews in in Corpus Christi Texas my

1737

01:12:45,819 --> 01:12:42,139

hometown down there and and he said my

1738

01:12:48,759 --> 01:12:45,829

gosh why aren't you in Socorro why

1739

01:12:50,979 --> 01:12:48,769

should I be encircled and he said well

1740

01:12:52,600 --> 01:12:50,989

the policemen there is seen a gravel

1741

01:12:55,889 --> 01:12:52,610

landed with some markup and Southside I

1742

01:12:59,469 --> 01:12:55,899

said oh my gosh and suddenly my mother

1743

01:13:01,179 --> 01:12:59,479

and father sent me a clipping out of

1744

01:13:03,489 --> 01:13:01,189

kitchen paper talking about it I think

1745

01:13:06,520 --> 01:13:03,499

it was headed long tall object has hot

1746

01:13:08,679 --> 01:13:06,530

feet which is kind of stupid but but

1747

01:13:11,979 --> 01:13:08,689

anyway I am a derangement and took off

1748

01:13:15,850 --> 01:13:11,989

for Sequoia and arrived there on Monday

1749

01:13:17,859 --> 01:13:15,860

it wasn't a Friday evening it that this

1750

01:13:19,839 --> 01:13:17,869

happened and I arrived there and I

1751

01:13:22,709 --> 01:13:19,849

happened to arrive the very time the

1752

01:13:26,409 --> 01:13:22,719

same time just a little bit after

1753

01:13:28,600 --> 01:13:26,419

Heineken arrives there and so now Hynek

1754

01:13:32,639 --> 01:13:28,610

knew me from correspondents on another

1755

01:13:35,620 --> 01:13:32,649

important UFO case back in 1959 and so

1756

01:13:37,299 --> 01:13:35,630

when I told Lonnie Zamora to tell him he

1757

01:13:39,159 --> 01:13:37,309

was going to be interviewed but I'm tell

1758

01:13:40,870 --> 01:13:39,169

him that race Stanford is here and would

1759

01:13:44,290 --> 01:13:40,880

like you know to get together on this

1760

01:13:46,449 --> 01:13:44,300

Hynek actually this over the protests of

1761

01:13:48,339 --> 01:13:46,459

New Mexico State Police Sergeant Samuel

1762

01:13:49,839 --> 01:13:48,349

Chavez who didn't like any of these

1763

01:13:51,399 --> 01:13:49,849

investigators coming you know what he

1764

01:13:54,879 --> 01:13:51,409

thought was a secret government crafted

1765

01:13:56,500 --> 01:13:54,889

it landed there Hayek insisted that they

1766

01:13:59,409 --> 01:13:56,510

let me come out the site while he was

1767

01:14:01,959 --> 01:13:59,419

questioning Zamora and Chavez and that's

1768

01:14:04,060 --> 01:14:01,969

how I got to the side and got turned on

1769

01:14:06,969 --> 01:14:04,070

to some remarkable things and wrote the

1770

01:14:08,889 --> 01:14:06,979

book which was published in 1976 it took

1771

01:14:12,250 --> 01:14:08,899

me years of research to try to make sure

1772

01:14:14,570 --> 01:14:12,260

that everything was accurate I did it so

1773

01:14:16,190 --> 01:14:14,580

well I had a lawyer read it before

1774

01:14:17,900 --> 01:14:16,200

I publish to make sure nobody could sue

1775

01:14:19,280 --> 01:14:17,910

me and he said right he missed your

1776

01:14:20,810 --> 01:14:19,290

calling he said I think you'd better go

1777

01:14:23,120 --> 01:14:20,820

back to school and become a lawyer and

1778

01:14:25,850 --> 01:14:23,130

in Austin later I had another lawyer

1779

01:14:27,710 --> 01:14:25,860

friend he said the same thing I really

1780

01:14:30,230 --> 01:14:27,720

did work though to make a good case and

1781

01:14:32,390 --> 01:14:30,240

it was it was a lot of fun but it nobody

1782

01:14:33,770 --> 01:14:32,400

knows the work that goes into an

1783

01:14:35,690 --> 01:14:33,780

important case like that if you're

1784

01:14:37,490 --> 01:14:35,700

really going to document it well I got

1785

01:14:39,410 --> 01:14:37,500

to tell you when we first started

1786

01:14:42,140 --> 01:14:39,420

talking back to several years ago I'm

1787

01:14:45,350 --> 01:14:42,150

thinking I don't know maybe six five or

1788

01:14:48,950 --> 01:14:45,360

six years ago you sent me the book and

1789

01:14:51,680 --> 01:14:48,960

it was an excellent read you still have

1790

01:14:53,780 --> 01:14:51,690

some of those books right yes I do have

1791

01:14:57,260 --> 01:14:53,790

I have they're they're the original

1792

01:14:59,210 --> 01:14:57,270

first edition and I have quite a few

1793

01:15:01,610 --> 01:14:59,220

copies left not a huge number because in

1794

01:15:02,870 --> 01:15:01,620

most of them sold but I have copies that

1795

01:15:04,510 --> 01:15:02,880

have you know the dust jacket they look

1796

01:15:07,040 --> 01:15:04,520

like you would have bought them back in

1797

01:15:09,140 --> 01:15:07,050

1976 and it you know people want to I

1798

01:15:12,950 --> 01:15:09,150

can tell them that they can can order

1799

01:15:15,620 --> 01:15:12,960

them and the cost is with with the

1800

01:15:16,850 --> 01:15:15,630

shipping is \$55 and that's cheap

1801

01:15:19,100 --> 01:15:16,860

compared to what some guys I know

1802

01:15:21,620 --> 01:15:19,110

various places have sold them for I know

1803

01:15:22,220 --> 01:15:21,630

people told them up to \$450 apiece right

1804

01:15:23,450 --> 01:15:22,230

Oh

1805

01:15:25,220 --> 01:15:23,460

sign them for you if you want them

1806

01:15:27,200 --> 01:15:25,230

signed with or without your name in the

1807

01:15:30,080 --> 01:15:27,210

signing and to get him to you for that

1808

01:15:32,140 --> 01:15:30,090

price by by Priority Mail with tracking

1809

01:15:34,490 --> 01:15:32,150

yeah well just anyone that wants to

1810

01:15:36,230 --> 01:15:34,500

anyone that wants to order a book and I

1811

01:15:38,030 --> 01:15:36,240

got to tell you it's one of my very

1812

01:15:40,910 --> 01:15:38,040

favorite books I really really enjoyed

1813

01:15:43,070 --> 01:15:40,920

it and I I let someone borrow it I've

1814

01:15:45,110 --> 01:15:43,080

been waiting to get it back they were

1815

01:15:47,540 --> 01:15:45,120

they loved it too

1816

01:15:50,210 --> 01:15:47,550

but anyway anyone wants to order a book

1817

01:15:52,220 --> 01:15:50,220

just write me at martinet podcast UFO

1818

01:15:54,620 --> 01:15:52,230

calm and I'll pass it along to Ray and

1819

01:15:56,540 --> 01:15:54,630

you're welcome - all right so we don't

1820

01:15:58,640 --> 01:15:56,550

have any callers on the UFO topic so

1821

01:16:02,210 --> 01:15:58,650

we're going to move on and we're gonna

1822

01:16:04,370 --> 01:16:02,220

talk about your discovery on the first

1823

01:16:07,370 --> 01:16:04,380

break you mentioned that you were in the

1824

01:16:09,740 --> 01:16:07,380

Goddard Space Center parking lot waiting

1825

01:16:11,360 --> 01:16:09,750

for Sheila and you happen to see a rock

1826

01:16:13,160 --> 01:16:11,370

stick out and something made you get out

1827

01:16:15,650 --> 01:16:13,170

of the car and go check it out is that

1828

01:16:17,810 --> 01:16:15,660

the first set of track you found other

1829

01:16:19,400 --> 01:16:17,820

tracks before that right oh yes I've

1830

01:16:22,760 --> 01:16:19,410

found hundreds and hundreds of them yeah

1831

01:16:27,380 --> 01:16:22,770

big beginning well it's been out 25

1832

01:16:28,280 --> 01:16:27,390

years and I blame my my oldest son who

1833

01:16:31,280 --> 01:16:28,290

talked me into buying a

1834

01:16:33,830 --> 01:16:31,290

book on tracking and dr. Martin luck

1835

01:16:37,750 --> 01:16:33,840

Facebook has now been my my track papers

1836

01:16:40,550 --> 01:16:37,760

he's been one of my co-authors and it

1837

01:16:42,140 --> 01:16:40,560

that that's that's how I got it got into

1838

01:16:43,550 --> 01:16:42,150

it I mean I really wasn't interested in

1839

01:16:45,260 --> 01:16:43,560

dinosaurs and tracking only

1840

01:16:46,880 --> 01:16:45,270

superficially for the purpose when my

1841

01:16:49,040 --> 01:16:46,890

kids are growing up I'm showing him the

1842

01:16:51,320 --> 01:16:49,050

tracks down in Texas but when we got

1843

01:16:55,010 --> 01:16:51,330

into it not begin to find these things I

1844

01:16:57,200 --> 01:16:55,020

mean I I have found hundreds of tracks

1845

01:16:59,150 --> 01:16:57,210

and small track waves of dinosaurs and

1846

01:17:00,590 --> 01:16:59,160

flying reptiles I have the only flying

1847

01:17:02,750 --> 01:17:00,600

reptile tracks that are up in family

1848

01:17:03,950 --> 01:17:02,760

eastern USA because people don't know

1849

01:17:06,110 --> 01:17:03,960

what to look for most people can

1850

01:17:07,610 --> 01:17:06,120

recognize one of the types of downstair

1851

01:17:08,960 --> 01:17:07,620

tractors your three toed track that you

1852

01:17:10,520 --> 01:17:08,970

might have seen in Close Encounters of

1853

01:17:13,160 --> 01:17:10,530

the Third Kind after t-rex could walk

1854

01:17:14,750 --> 01:17:13,170

there but most people don't know what a

1855

01:17:17,030 --> 01:17:14,760

flying reptiles track looked like but if

1856

01:17:19,070 --> 01:17:17,040

you studied Lockleys books you find out

1857

01:17:21,440 --> 01:17:19,080

and that's how I began to to find these

1858

01:17:23,090 --> 01:17:21,450

they're they're not all that they're

1859

01:17:25,010 --> 01:17:23,100

rare but not all that rare that you

1860

01:17:26,750 --> 01:17:25,020

can't find them around here now is there

1861

01:17:28,480 --> 01:17:26,760

a certain type of rock that you have to

1862

01:17:32,660 --> 01:17:28,490

look for where these impressions

1863

01:17:34,310 --> 01:17:32,670

actually stay remain yes in the first

1864

01:17:36,770 --> 01:17:34,320

place if you want to look for a dinosaur

1865

01:17:38,380 --> 01:17:36,780

age tracks whether it's from the mammals

1866

01:17:40,970 --> 01:17:38,390

or the flying rentals of the dinosaurs

1867

01:17:43,160 --> 01:17:40,980

what you do you go to your local

1868

01:17:44,750 --> 01:17:43,170

Geological Survey and you want to look

1869

01:17:46,850 --> 01:17:44,760

in stream beds where there are

1870

01:17:49,190 --> 01:17:46,860

outcroppings of rocks of the age of

1871

01:17:51,830 --> 01:17:49,200

dinosaurs here they are of course there

1872

01:17:55,010 --> 01:17:51,840

are what they're called lower cretaceous

1873

01:17:56,180 --> 01:17:55,020

are early cretaceous and the ones i find

1874

01:17:57,920 --> 01:17:56,190

are about a hundred ten out of twelve

1875

01:18:00,200 --> 01:17:57,930

million years old but you'll need to get

1876

01:18:02,780 --> 01:18:00,210

your geological maps and look for i'm

1877

01:18:05,060 --> 01:18:02,790

lee haeri they have a nice deep green

1878

01:18:06,680 --> 01:18:05,070

for that outcropping and you're not

1879

01:18:08,240 --> 01:18:06,690

going to find dinosaur tracks where

1880

01:18:11,660 --> 01:18:08,250

there were the rocks of the wrong age

1881

01:18:13,880 --> 01:18:11,670

but here locally they are they can

1882

01:18:16,070 --> 01:18:13,890

either be various shades of brown or

1883

01:18:19,190 --> 01:18:16,080

they can be beautiful even combinations

1884

01:18:21,500 --> 01:18:19,200

of hematite a red form of of loosely

1885

01:18:22,970 --> 01:18:21,510

consolidated hematite and limonite which

1886

01:18:24,770 --> 01:18:22,980

is yellow and that makes a beautiful

1887

01:18:26,240 --> 01:18:24,780

combination sometime you'll believe or

1888

01:18:28,760 --> 01:18:26,250

not you'll have a red track on a yellow

1889

01:18:30,380 --> 01:18:28,770

background or vice versa and that's that

1890

01:18:33,050 --> 01:18:30,390

has caused me and many other people that

1891

01:18:34,430 --> 01:18:33,060

have seen to say that Maryland has the

1892

01:18:36,980 --> 01:18:34,440

most beautiful dinosaur attraction in

1893

01:18:39,530 --> 01:18:36,990

the world how about that so you want

1894

01:18:41,060 --> 01:18:39,540

your discovery was was extremely

1895

01:18:41,760 --> 01:18:41,070

important and also because there were

1896

01:18:45,990 --> 01:18:41,770

mammals and

1897

01:18:48,960 --> 01:18:46,000

- right that's correct yeah the in fact

1898

01:18:52,610 --> 01:18:48,970

on the sled Goddard it's it's about two

1899

01:18:55,650 --> 01:18:52,620

square meters size about the size of a

1900

01:18:58,710 --> 01:18:55,660

decent size but not large not huge a

1901

01:19:00,210 --> 01:18:58,720

dining table and it's actually eight and

1902

01:19:02,730 --> 01:19:00,220

a half feet long and thirty nine inches

1903

01:19:05,460 --> 01:19:02,740

at the very widest and on there there

1904

01:19:08,850 --> 01:19:05,470

are nearly 100 let's be conservative and

1905

01:19:11,010 --> 01:19:08,860

say ninety footprints but at least forty

1906

01:19:13,980 --> 01:19:11,020

maybe a few more than forty of them are

1907

01:19:15,690 --> 01:19:13,990

by mammals and by at least three kinds

1908

01:19:18,360 --> 01:19:15,700

of mammals the tracks of which have

1909

01:19:20,670 --> 01:19:18,370

never been seen before including when we

1910

01:19:22,560 --> 01:19:20,680

published it the largest published track

1911

01:19:24,690 --> 01:19:22,570

of a mammal from the diner's race has

1912

01:19:27,200 --> 01:19:24,700

ever been seen bigger than a adult

1913

01:19:30,810 --> 01:19:27,210

Badgers track four inches long with very

1914

01:19:33,030 --> 01:19:30,820

evidence of very sharp claws but you had

1915

01:19:35,580 --> 01:19:33,040

these little mammals but if smaller ones

1916

01:19:38,820 --> 01:19:35,590

digging around in what back then was

1917

01:19:40,800 --> 01:19:38,830

clumps of feces from probably larger

1918

01:19:42,750 --> 01:19:40,810

dinosaurs from the looks of it and the

1919

01:19:45,240 --> 01:19:42,760

Flies had laid their eggs in there and

1920

01:19:47,040 --> 01:19:45,250

the larvae in jism - some big flies and

1921

01:19:48,510 --> 01:19:47,050

some big larvae and these mammals are

1922

01:19:50,490 --> 01:19:48,520

digging them out you can see where some

1923

01:19:51,870 --> 01:19:50,500

of them were dug out and you see their

1924

01:19:54,500 --> 01:19:51,880

claw marks where these little guys were

1925

01:20:00,380 --> 01:19:54,510

going after the goodie protein sources

1926

01:20:04,230 --> 01:20:00,390

and in the feces and all the while

1927

01:20:06,510 --> 01:20:04,240

tracking slowly four track ways through

1928

01:20:10,200 --> 01:20:06,520

the hole then going west are the tracks

1929

01:20:11,970 --> 01:20:10,210

of small flesh-eating dinosaurs and they

1930

01:20:13,890 --> 01:20:11,980

are we know they're tracking slowly

1931

01:20:16,590 --> 01:20:13,900

because of the close spacing of the

1932

01:20:19,200 --> 01:20:16,600

footprints we did a calculation we found

1933

01:20:21,510 --> 01:20:19,210

out these little guys were moving less

1934

01:20:23,550 --> 01:20:21,520

than 1/2 mile per hour but there's

1935

01:20:26,040 --> 01:20:23,560

method in the madness they wanted to

1936

01:20:28,110 --> 01:20:26,050

move slowly so it not be directed not

1937

01:20:30,060 --> 01:20:28,120

distract the mammals from their eating

1938

01:20:34,230 --> 01:20:30,070

the larvae so they can jump and eat the

1939

01:20:37,410 --> 01:20:34,240

mammals and and it is it's a it's a well

1940

01:20:39,780 --> 01:20:37,420

now a doggy-dog this idea I guess and

1941

01:20:42,210 --> 01:20:39,790

but that big mammal was so big it could

1942

01:20:43,770 --> 01:20:42,220

have eaten the mammals are in fact that

1943

01:20:45,150 --> 01:20:43,780

the theropod the smaller theropods they

1944

01:20:47,070 --> 01:20:45,160

were eating the mammals and it could

1945

01:20:48,990 --> 01:20:47,080

have eaten some of the flying reptiles

1946

01:20:50,610 --> 01:20:49,000

we have a footprint of a pretty

1947

01:20:55,260 --> 01:20:50,620

good-sized flying reptile probably had a

1948

01:20:55,740 --> 01:20:55,270

let's say a wingspan of say 18 feet 1518

1949

01:20:59,640 --> 01:20:55,750

feet

1950

01:21:01,620 --> 01:20:59,650

Wow and I do have elsewhere it is yet to

1951

01:21:03,990 --> 01:21:01,630

be published but I have a footprint of a

1952

01:21:05,610 --> 01:21:04,000

mammal left front footprint of another

1953

01:21:08,010 --> 01:21:05,620

mammal flying repple the pterosaur

1954

01:21:10,380 --> 01:21:08,020

you'll know miss pterodactyl maybe we

1955

01:21:12,000 --> 01:21:10,390

have one that is 15 inches long it's the

1956

01:21:15,000 --> 01:21:12,010

biggest ever found and we have the

1957

01:21:16,800 --> 01:21:15,010

feeding traces that are compatible size

1958

01:21:19,950 --> 01:21:16,810

with that so we're stuck that big beak

1959

01:21:21,960 --> 01:21:19,960

down into the mud and pulled up to pour

1960

01:21:24,960 --> 01:21:21,970

whatever was living under there out to

1961

01:21:27,690 --> 01:21:24,970

have a meal so tell me what what did

1962

01:21:30,270 --> 01:21:27,700

what did the Goddard Space Center have

1963

01:21:32,130 --> 01:21:30,280

to say about the discovery they were

1964

01:21:34,350 --> 01:21:32,140

delighted they were thrilled in fact

1965

01:21:39,210 --> 01:21:34,360

when the paper came out on the evening

1966

01:21:41,160 --> 01:21:39,220

of the 31st of January this year the

1967

01:21:44,130 --> 01:21:41,170

earth science of is throwing a big party

1968

01:21:46,560 --> 01:21:44,140

in in the building 33 which is the Earth

1969

01:21:48,540 --> 01:21:46,570

Science facility in the the atrium there

1970

01:21:50,670 --> 01:21:48,550

and we have the nice we have a full-size

1971

01:21:53,210 --> 01:21:50,680

total detailed three-dimensional

1972

01:21:55,410 --> 01:21:53,220

reproduction made from a latex mold and

1973

01:21:57,660 --> 01:21:55,420

carefully tailored exactly like the real

1974

01:21:59,520 --> 01:21:57,670

thing up there on the wall at an angle

1975

01:22:02,610 --> 01:21:59,530

with the map explaining it below which

1976

01:22:05,130 --> 01:22:02,620

will see some minutes of and the the

1977

01:22:06,780 --> 01:22:05,140

thing is that I mean they were packed in

1978

01:22:08,460 --> 01:22:06,790

there they were thrilled I'll tell you a

1979

01:22:10,740 --> 01:22:08,470

funny story to show you the human side

1980

01:22:12,710 --> 01:22:10,750

of this when I discovered this track and

1981

01:22:15,540 --> 01:22:12,720

finally announced it to public affairs

1982

01:22:17,010 --> 01:22:15,550

the well there's a section of Goddard

1983

01:22:19,170 --> 01:22:17,020

Space Flight Center that are known as

1984

01:22:20,910 --> 01:22:19,180

the facilities people and they were

1985

01:22:24,180 --> 01:22:20,920

beginning ready to build I did not know

1986

01:22:27,840 --> 01:22:24,190

this when I found this a 35 million

1987

01:22:29,910 --> 01:22:27,850

dollar flight projects facility and part

1988

01:22:31,890 --> 01:22:29,920

of it would have a pylon go right down

1989

01:22:35,430 --> 01:22:31,900

in the middle of where this was well

1990

01:22:37,680 --> 01:22:35,440

this means oh we got to stop and get

1991

01:22:39,960 --> 01:22:37,690

that thing out of here those tracks and

1992

01:22:41,340 --> 01:22:39,970

so here they're delayed and they're

1993

01:22:44,400 --> 01:22:41,350

worried about it costing money and they

1994

01:22:46,710 --> 01:22:44,410

were very upset and and let it be known

1995

01:22:48,660 --> 01:22:46,720

and what is this guy coming along

1996

01:22:50,820 --> 01:22:48,670

finding dinosaur and mammal tracks when

1997

01:22:53,940 --> 01:22:50,830

we were building of Earth space projects

1998

01:22:56,610 --> 01:22:53,950

flight projects facility well however I

1999

01:22:59,010 --> 01:22:56,620

have to say that the guy in charge of

2000

01:23:00,900 --> 01:22:59,020

that came up at the at the big party of

2001
01:23:02,460 --> 01:23:00,910
stone afterward and greeted me in the

2002
01:23:04,740 --> 01:23:02,470
most whatever I he said thank you

2003
01:23:06,570 --> 01:23:04,750
congratulations you know I was upset

2004
01:23:09,060 --> 01:23:06,580
when this happened but he said I want to

2005
01:23:09,480 --> 01:23:09,070
congratulate you this is wonderful and I

2006
01:23:13,050 --> 01:23:09,490
say

2007
01:23:15,210 --> 01:23:13,060
all's well that ends well and the the

2008
01:23:17,070 --> 01:23:15,220
authorities in fact we had the paper

2009
01:23:20,190 --> 01:23:17,080
shorter than I would have liked I wrote

2010
01:23:24,720 --> 01:23:20,200
it originally a lot longer but like I

2011
01:23:27,150 --> 01:23:24,730
talked but it it actually we reduced it

2012
01:23:28,620 --> 01:23:27,160
down because they wanted to go ahead and

2013
01:23:30,480 --> 01:23:28,630

get this thing published and the longer

2014

01:23:33,390 --> 01:23:30,490

your paper is the longer it takes the

2015

01:23:37,470 --> 01:23:33,400

peer reviewers to study it and pick it

2016

01:23:39,830 --> 01:23:37,480

apart if they can and so forth so and we

2017

01:23:42,900 --> 01:23:39,840

succeed it was published in nature's

2018

01:23:44,970 --> 01:23:42,910

scientific reports and everybody was

2019

01:23:46,770 --> 01:23:44,980

just thrilled the New York Times said of

2020

01:23:48,390 --> 01:23:46,780

beautiful coverage on it with very good

2021

01:23:52,140 --> 01:23:48,400

pictures as I show in the slides and

2022

01:23:55,440 --> 01:23:52,150

and so did the Washington Post and some

2023

01:23:58,470 --> 01:23:55,450

wonderful TV coverages were done on it

2024

01:24:00,300 --> 01:23:58,480

the best TV coverage was was on a

2025

01:24:04,110 --> 01:24:00,310

network that I don't normally watch it

2026

01:24:08,130 --> 01:24:04,120

was on the Fox News Sunday but the

2027

01:24:09,570 --> 01:24:08,140

wonderful interviewer there did a

2028

01:24:10,980 --> 01:24:09,580

marvelous job and he was deeply

2029

01:24:14,100 --> 01:24:10,990

appreciative and didn't bring any

2030

01:24:16,680 --> 01:24:14,110

politics into it at all and if one can

2031

01:24:18,990 --> 01:24:16,690

go there and say it it's it's the best

2032

01:24:21,510 --> 01:24:19,000

interview with me that was done this

2033

01:24:24,240 --> 01:24:21,520

whole time and I was I was all over the

2034

01:24:26,580 --> 01:24:24,250

world on TV and I was I had to sit there

2035

01:24:27,990 --> 01:24:26,590

day after day as media people would come

2036

01:24:31,380 --> 01:24:28,000

in and want to do their interviews and

2037

01:24:32,790 --> 01:24:31,390

one day I was there just sitting there

2038

01:24:34,740 --> 01:24:32,800

not waiting for the next interview and

2039

01:24:37,770 --> 01:24:34,750

here comes a an important looking guy

2040

01:24:41,280 --> 01:24:37,780

with guys in black suits Oh around him

2041

01:24:42,870 --> 01:24:41,290

boy yeah and but they looked like you

2042

01:24:44,730 --> 01:24:42,880

know that they might be Secret Service

2043

01:24:46,650 --> 01:24:44,740

people or something well it turns out

2044

01:24:49,710 --> 01:24:46,660

but then it they got close enough I

2045

01:24:53,250 --> 01:24:49,720

realized the the director of Goddard was

2046

01:24:59,100 --> 01:24:53,260

there but the guy with him was was the

2047

01:25:01,800 --> 01:24:59,110

what then was the the the congressman

2048

01:25:03,450 --> 01:25:01,810

Steny Hoyer he still gongon

2049

01:25:06,750 --> 01:25:03,460

but he was the the what's called a

2050

01:25:08,220 --> 01:25:06,760

Minority Whip at that time and he he was

2051

01:25:09,720 --> 01:25:08,230

coming there and he walked up and

2052

01:25:11,700 --> 01:25:09,730

stopped and I'm just sitting there not

2053

01:25:15,270 --> 01:25:11,710

really I didn't realize it was holier

2054

01:25:17,370 --> 01:25:15,280

but he stopped and he said who found

2055

01:25:20,850 --> 01:25:17,380

this wonderful thing he shouted that out

2056

01:25:22,770 --> 01:25:20,860

and I confessed and he said look he said

2057

01:25:23,040 --> 01:25:22,780

I has a question I'm excited interested

2058

01:25:24,660 --> 01:25:23,050

in there

2059

01:25:27,360 --> 01:25:24,670

and there you'll see a picture of him

2060

01:25:30,780 --> 01:25:27,370

with the director of the right side

2061

01:25:32,790 --> 01:25:30,790

Steve colleagues with him and he asked

2062

01:25:34,890 --> 01:25:32,800

wonderful questions I never expected

2063

01:25:36,630 --> 01:25:34,900

this of a politician but he was

2064

01:25:38,940 --> 01:25:36,640

genuinely interested in has some great

2065

01:25:42,030 --> 01:25:38,950

questions which I really appreciated

2066

01:25:44,040 --> 01:25:42,040

Wow isn't that something in then you

2067

01:25:46,860 --> 01:25:44,050

were at National Geographic right in the

2068

01:25:49,230 --> 01:25:46,870

magazine and oh that's right yeah they

2069

01:25:51,930 --> 01:25:49,240

did a coverage back in November of last

2070

01:25:55,020 --> 01:25:51,940

year of flying the flying reptiles

2071

01:25:56,490 --> 01:25:55,030

pterosaurs and they did a they have a

2072

01:25:59,220 --> 01:25:56,500

picture of me sitting in my living room

2073

01:26:01,440 --> 01:25:59,230

chair agent care in the corner of the

2074

01:26:04,560 --> 01:26:01,450

living room yeah yeah I got to see that

2075

01:26:07,440 --> 01:26:04,570

so this is this is kind of amazing so he

2076

01:26:10,380 --> 01:26:07,450

had let me just ask you this kind of an

2077

01:26:12,510 --> 01:26:10,390

oddball question at any point when you

2078

01:26:15,300 --> 01:26:12,520

were talking about dinosaurs did anyone

2079

01:26:19,680 --> 01:26:15,310

actually find any connection with you in

2080

01:26:22,410 --> 01:26:19,690

UFOs and talk to you about it yes a

2081

01:26:24,720 --> 01:26:22,420

field them did and and when I explained

2082

01:26:26,910 --> 01:26:24,730

that my approach to UFOs is just as

2083

01:26:28,200 --> 01:26:26,920

scientific and as skeptical as it is

2084

01:26:30,090 --> 01:26:28,210

when I come across something in the

2085

01:26:31,230 --> 01:26:30,100

stream bed and ask myself what it is I

2086

01:26:35,490 --> 01:26:31,240

try to be objective

2087

01:26:37,710 --> 01:26:35,500

and and those that have learned about it

2088

01:26:40,280 --> 01:26:37,720

and asked me about it we're quite

2089

01:26:42,990 --> 01:26:40,290

accepting of my position on it I don't

2090

01:26:45,510 --> 01:26:43,000

take the position and don't tell the

2091

01:26:47,370 --> 01:26:45,520

media gee man there's little dream in up

2092

01:26:48,900 --> 01:26:47,380

there is something like that I say that

2093

01:26:51,330 --> 01:26:48,910

apparently there is a sophisticated

2094

01:26:53,520 --> 01:26:51,340

technology that if we can tap it with

2095

01:26:56,910 --> 01:26:53,530

instruments and get into it it could be

2096

01:26:58,770 --> 01:26:56,920

of immense value to humankind and they

2097

01:27:00,090 --> 01:26:58,780

understand that and they now that of

2098

01:27:02,130 --> 01:27:00,100

course the New York Times article has

2099

01:27:04,170 --> 01:27:02,140

helped public relations on this I think

2100

01:27:07,800 --> 01:27:04,180

yeah although I'm not really impressed

2101
01:27:10,560 --> 01:27:07,810
with the the infrared videos still it

2102
01:27:12,150 --> 01:27:10,570
has helped a lot and so everything is

2103
01:27:14,340 --> 01:27:12,160
going quite well nobody has written me

2104
01:27:16,590 --> 01:27:14,350
off because I'm involved with scientific

2105
01:27:19,320 --> 01:27:16,600
UFO studies yeah that's that's good and

2106
01:27:20,880 --> 01:27:19,330
I know you know just just going back to

2107
01:27:22,800 --> 01:27:20,890
that just a little bit I know there are

2108
01:27:24,870 --> 01:27:22,810
people from Goddard that actually have

2109
01:27:27,510 --> 01:27:24,880
visited you and have talked to you about

2110
01:27:30,030 --> 01:27:27,520
about your your images and everything

2111
01:27:32,400 --> 01:27:30,040
else right well that's right in fact

2112
01:27:35,100 --> 01:27:32,410
there's one major major scientists

2113
01:27:36,870 --> 01:27:35,110

there's a senior scientist who in fact I

2114

01:27:37,210 --> 01:27:36,880

have reason to believe from what I've

2115

01:27:39,610 --> 01:27:37,220

heard they

2116

01:27:41,590 --> 01:27:39,620

is the most in scientific papers

2117

01:27:43,750 --> 01:27:41,600

scientifically cited his papers of any

2118

01:27:46,120 --> 01:27:43,760

any scientist at Goddard Space Flight

2119

01:27:48,430 --> 01:27:46,130

Center and he's been here several times

2120

01:27:50,340 --> 01:27:48,440

and three other times maybe four or five

2121

01:27:53,620 --> 01:27:50,350

of the times he's looked at those

2122

01:27:56,530 --> 01:27:53,630

hematite UFO discs and he said ray you

2123

01:27:59,940 --> 01:27:56,540

know those have to be the most

2124

01:28:04,420 --> 01:27:59,950

convincing evidence I've ever seen that

2125

01:28:05,890 --> 01:28:04,430

extraterrestrials visit us long ago now

2126

01:28:09,760 --> 01:28:05,900

here's you know here's a high-level

2127

01:28:11,140 --> 01:28:09,770

scientist saying this and he I don't say

2128

01:28:12,940 --> 01:28:11,150

what do you think of these he tells me

2129

01:28:15,070 --> 01:28:12,950

this spontaneously he keeps seeing them

2130

01:28:16,780 --> 01:28:15,080

and making that comment and it's been

2131

01:28:19,240 --> 01:28:16,790

back to reaction a lot of people now now

2132

01:28:21,580 --> 01:28:19,250

some of them though are intimidated they

2133

01:28:22,810 --> 01:28:21,590

don't ask that looks like flying saucers

2134

01:28:26,680 --> 01:28:22,820

I'm not going to get into this subject

2135

01:28:28,480 --> 01:28:26,690

but the this top level scientists and

2136

01:28:30,250 --> 01:28:28,490

others who have been there have had a

2137

01:28:33,970 --> 01:28:30,260

very positive and very open-minded

2138

01:28:37,240 --> 01:28:33,980

reaction yeah yeah so I was so glad

2139

01:28:38,860 --> 01:28:37,250

because that this this whole thing

2140

01:28:41,890 --> 01:28:38,870

happened to you going back to the

2141

01:28:44,560 --> 01:28:41,900

dinosaur thing just because I think that

2142

01:28:48,310 --> 01:28:44,570

you really had you know you have a lot

2143

01:28:50,140 --> 01:28:48,320

of respect due to you because I know

2144

01:28:53,100 --> 01:28:50,150

you've taken you know the UFO field

2145

01:28:56,890 --> 01:28:53,110

seriously and if you'd actually find

2146

01:28:59,380 --> 01:28:56,900

these tracks I know that you had in your

2147

01:29:02,110 --> 01:28:59,390

basement was that the molded copy and

2148

01:29:04,060 --> 01:29:02,120

that you had you I know you were looking

2149

01:29:05,940 --> 01:29:04,070

at this studying this thing for a long

2150

01:29:08,350 --> 01:29:05,950

time right in your basement right now

2151

01:29:11,680 --> 01:29:08,360

this was this is the actual one that's

2152

01:29:14,830 --> 01:29:11,690

displayed in building 33 and the gutters

2153

01:29:17,890 --> 01:29:14,840

Earth Science facility now it it was

2154

01:29:19,570 --> 01:29:17,900

made a latex mold was made of the actual

2155

01:29:22,150 --> 01:29:19,580

slab that I found after it was cleaned

2156

01:29:24,520 --> 01:29:22,160

off and then they cast it into some kind

2157

01:29:27,190 --> 01:29:24,530

of white material and then colored it

2158

01:29:28,570 --> 01:29:27,200

exactly to match and then I even as when

2159

01:29:30,400 --> 01:29:28,580

I find these in the stream bed you'll

2160

01:29:31,990 --> 01:29:30,410

find fine silt has drifted in the low

2161

01:29:34,150 --> 01:29:32,000

pledges and makes you notice tracks you

2162

01:29:36,190 --> 01:29:34,160

won't notice so they wanted me to make

2163

01:29:38,770 --> 01:29:36,200

the big notice or track and the one big

2164

01:29:40,900 --> 01:29:38,780

sauropod tracked visible I'm doing this

2165

01:29:42,730 --> 01:29:40,910

and I scattered some this silt around

2166

01:29:45,220 --> 01:29:42,740

and by gosh when you begin to fall into

2167

01:29:46,960 --> 01:29:45,230

other places and little patterns my gosh

2168

01:29:49,630 --> 01:29:46,970

there are a whole kind of tracks on here

2169

01:29:50,300 --> 01:29:49,640

and there were all these this drama of

2170

01:29:52,430 --> 01:29:50,310

the inner

2171

01:29:54,770 --> 01:29:52,440

fraction of these animals going on and

2172

01:29:58,070 --> 01:29:54,780

and when I saw that there were mammal

2173

01:29:59,810 --> 01:29:58,080

tracks with interaction of theropods and

2174

01:30:03,920 --> 01:29:59,820

these other these flying reptiles that

2175

01:30:06,320 --> 01:30:03,930

were landing right nearby I called this

2176

01:30:10,400 --> 01:30:06,330

chief scientist at Goddard and I said

2177

01:30:13,670 --> 01:30:10,410

Jim are you sitting down and he said yes

2178

01:30:15,860 --> 01:30:13,680

and I said look there are mammal tracks

2179

01:30:17,690 --> 01:30:15,870

over there with those and he's just ho

2180

01:30:20,300 --> 01:30:17,700

my gosh she said I think we got

2181

01:30:23,360 --> 01:30:20,310

something really really important I said

2182

01:30:25,400 --> 01:30:23,370

you bet we do and so there it was

2183

01:30:27,800 --> 01:30:25,410

it's the biggest congregation there were

2184

01:30:30,350 --> 01:30:27,810

more tracks on that slab at Goddard into

2185

01:30:32,060 --> 01:30:30,360

square meters then in the entire age of

2186

01:30:35,080 --> 01:30:32,070

dinosaurs from all the world had been

2187

01:30:39,170 --> 01:30:35,090

found summed together right there and

2188

01:30:41,480 --> 01:30:39,180

I'll have to say they were Tuesday chose

2189

01:30:43,070 --> 01:30:41,490

a good place that 110 million years ago

2190

01:30:45,040 --> 01:30:43,080

would be Goddard Space Flight Center I

2191

01:30:47,870 --> 01:30:45,050

can't say they smelled it coming but

2192

01:30:50,810 --> 01:30:47,880

anyway it was a popular place back then

2193

01:30:53,690 --> 01:30:50,820

now now the one thing did they go ahead

2194

01:30:55,700 --> 01:30:53,700

and build this building that they they

2195

01:30:57,740 --> 01:30:55,710

went and built it and they put one

2196

01:30:59,540 --> 01:30:57,750

column right down it had I not

2197

01:31:02,620 --> 01:30:59,550

discovered this at some time I think I'm

2198

01:31:05,840 --> 01:31:02,630

on an unconscious rescue mission because

2199

01:31:07,520 --> 01:31:05,850

and I not found this and I even found it

2200

01:31:08,840 --> 01:31:07,530

two weeks later I would never have

2201
01:31:10,700 --> 01:31:08,850
stopped him they would have gone ahead

2202
01:31:12,170 --> 01:31:10,710
and would have put this down and who

2203
01:31:14,120 --> 01:31:12,180
didn't he started this incredibly

2204
01:31:16,370 --> 01:31:14,130
scientifically important column but it

2205
01:31:18,200 --> 01:31:16,380
it had been cut out on the north side by

2206
01:31:20,630 --> 01:31:18,210
heavy equipment years before and on the

2207
01:31:23,570 --> 01:31:20,640
I'm sorry in the west side and the east

2208
01:31:26,000 --> 01:31:23,580
side and it but the piece was there

2209
01:31:28,940 --> 01:31:26,010
originally where it was when the animals

2210
01:31:31,490 --> 01:31:28,950
stepped on it and so that's that that's

2211
01:31:33,020 --> 01:31:31,500
what happened but at Goddard most of the

2212
01:31:35,030 --> 01:31:33,030
things have been ground up as you

2213
01:31:37,040 --> 01:31:35,040

suggested earlier by heavy equipment but

2214

01:31:38,930 --> 01:31:37,050

you'll find some tracks and pieces of

2215

01:31:41,450 --> 01:31:38,940

tracks that are around in the ravines

2216

01:31:43,310 --> 01:31:41,460

were they had dumped this stuff that

2217

01:31:46,010 --> 01:31:43,320

they moved to make the basements and the

2218

01:31:47,450 --> 01:31:46,020

buildings and so there's still some to

2219

01:31:50,330 --> 01:31:47,460

be found but we've tried to find other

2220

01:31:51,860 --> 01:31:50,340

big slabs but we cannot find any yeah I

2221

01:31:53,600 --> 01:31:51,870

mean I would think this is almost like a

2222

01:31:55,340 --> 01:31:53,610

gold rush in a way with something

2223

01:31:58,370 --> 01:31:55,350

important like this is found where you'd

2224

01:32:00,080 --> 01:31:58,380

really want to scout you know scout the

2225

01:32:02,720 --> 01:32:00,090

area so it sounds like you've done that

2226

01:32:04,100 --> 01:32:02,730

more or less that's right and we've

2227

01:32:06,439 --> 01:32:04,110

cautiously

2228

01:32:07,129 --> 01:32:06,449

cautions the people that Goddard is if

2229

01:32:09,260 --> 01:32:07,139

they're caught

2230

01:32:10,729 --> 01:32:09,270

finding and stealing these things they

2231

01:32:12,979 --> 01:32:10,739

could go to president and his government

2232

01:32:14,629 --> 01:32:12,989

property and we're very we try to be

2233

01:32:16,910 --> 01:32:14,639

very careful and to discourage that

2234

01:32:18,590 --> 01:32:16,920

although we did find a place for someone

2235

01:32:20,899 --> 01:32:18,600

that apparently dug out a track and not

2236

01:32:23,240 --> 01:32:20,909

only that but a major scientist got it

2237

01:32:24,770 --> 01:32:23,250

and I that got got hooked on trying to

2238

01:32:26,660 --> 01:32:24,780

track down a source after the find there

2239

01:32:28,580 --> 01:32:26,670

we were out one day and we found a track

2240

01:32:29,720 --> 01:32:28,590

but at that point you know how

2241

01:32:30,979 --> 01:32:29,730

government regulations are we didn't

2242

01:32:33,649 --> 01:32:30,989

have a clearance of where you would take

2243

01:32:35,090 --> 01:32:33,659

any tracks if you found them you leave

2244

01:32:36,680 --> 01:32:35,100

government property where it is so we

2245

01:32:38,810 --> 01:32:36,690

just moved it out of the stream said he

2246

01:32:40,820 --> 01:32:38,820

washed away and put it under a bush but

2247

01:32:42,530 --> 01:32:40,830

guess what the news had already broken

2248

01:32:44,629 --> 01:32:42,540

about the fines there somebody was

2249

01:32:46,189 --> 01:32:44,639

watching us we went back a couple days

2250

01:32:47,750 --> 01:32:46,199

later and somebody had seen us and had

2251
01:32:48,500 --> 01:32:47,760
stolen the track we don't know who stole

2252
01:32:53,419 --> 01:32:48,510
it

2253
01:32:55,430 --> 01:32:53,429
Wow Wow and so but there's no other

2254
01:32:57,200 --> 01:32:55,440
there's no type of detection I mean it

2255
01:32:59,450 --> 01:32:57,210
would just if you tried to detect

2256
01:33:01,459 --> 01:32:59,460
something like that like under the grass

2257
01:33:05,120 --> 01:33:01,469
or under you know the layer of dirt

2258
01:33:06,859 --> 01:33:05,130
layers of dirt there's just no way of

2259
01:33:10,280 --> 01:33:06,869
doing it because it would just show up

2260
01:33:13,160 --> 01:33:10,290
as a rock right yeah well we we have

2261
01:33:15,109 --> 01:33:13,170
some pictures that show a lady pulling

2262
01:33:17,060 --> 01:33:15,119
an interesting-looking red electronic

2263
01:33:19,790 --> 01:33:17,070

box and it's ground-penetrating radar

2264

01:33:22,459 --> 01:33:19,800

that they that goddard paid to be

2265

01:33:23,689 --> 01:33:22,469

brought in from new mexico and she went

2266

01:33:24,979 --> 01:33:23,699

over the area and there's several years

2267

01:33:26,540 --> 01:33:24,989

they thought oh my gosh we may be

2268

01:33:28,399 --> 01:33:26,550

hitting another slab of these tracks on

2269

01:33:30,500 --> 01:33:28,409

but isn't one of the pictures was quite

2270

01:33:32,540 --> 01:33:30,510

funny one guy dug down where the radar

2271

01:33:34,850 --> 01:33:32,550

said it should be and all you see is as

2272

01:33:36,020 --> 01:33:34,860

you see is the lower part of his hips

2273

01:33:38,750 --> 01:33:36,030

and his leg sticking out of the ground

2274

01:33:41,180 --> 01:33:38,760

and I put a thing there that he says

2275

01:33:43,550 --> 01:33:41,190

it's only clay it was an iron bearing

2276

01:33:45,770 --> 01:33:43,560

clay that was reflecting the radar and

2277

01:33:47,600 --> 01:33:45,780

so we did not succeed in finding any

2278

01:33:49,970 --> 01:33:47,610

other slabs and we have we have looked

2279

01:33:52,430 --> 01:33:49,980

all over Goddard for it and there are no

2280

01:33:54,800 --> 01:33:52,440

so far as we've been able to find anyway

2281

01:33:56,990 --> 01:33:54,810

and slabs like that right at the surface

2282

01:33:59,330 --> 01:33:57,000

but only in that case only only the a

2283

01:34:01,729 --> 01:33:59,340

big squeezed up edge of the notice our

2284

01:34:03,530 --> 01:34:01,739

tract was visible through the grass but

2285

01:34:07,729 --> 01:34:03,540

why would I notice it nobody else

2286

01:34:09,950 --> 01:34:07,739

because I track dinosaurs and it's like

2287

01:34:13,040 --> 01:34:09,960

an astrophysics to me said rape every

2288

01:34:14,540 --> 01:34:13,050

day for seven years four and five days a

2289

01:34:16,820 --> 01:34:14,550

week I've walked down there past that

2290

01:34:17,899 --> 01:34:16,830

within four to six feet of it going to

2291

01:34:20,060 --> 01:34:17,909

the cafeteria and I never

2292

01:34:22,009 --> 01:34:20,070

so I said yeah but your mind is looking

2293

01:34:26,000 --> 01:34:22,019

up you're an astrophysicist I'm looking

2294

01:34:27,469 --> 01:34:26,010

down or you're looking both I'm looking

2295

01:34:29,060 --> 01:34:27,479

both is the truth no matter but

2296

01:34:31,819 --> 01:34:29,070

hopefully not at the same time at least

2297

01:34:33,409 --> 01:34:31,829

when I'm driving I had parked I had

2298

01:34:34,909 --> 01:34:33,419

parked in the parking lot because I saw

2299

01:34:37,100 --> 01:34:34,919

this and I said I got to have a look I

2300

01:34:39,259 --> 01:34:37,110

walked over there oh my gosh Donna

2301
01:34:41,299 --> 01:34:39,269
noticed our tracks are rare and here's

2302
01:34:43,279 --> 01:34:41,309
the most beautiful big notice our track

2303
01:34:44,719 --> 01:34:43,289
that I've ever seen right there it got

2304
01:34:47,600 --> 01:34:44,729
her Space Flight Center now the notice

2305
01:34:50,629 --> 01:34:47,610
are is a like a armored an armored

2306
01:34:53,500 --> 01:34:50,639
dinosaur right yeah he's like a tank on

2307
01:34:56,270 --> 01:34:53,510
four legs yes he's very armored as that

2308
01:34:57,229 --> 01:34:56,280
as we saw in a model in some of the some

2309
01:34:58,459 --> 01:34:57,239
of the pictures from the public

2310
01:35:00,020 --> 01:34:58,469
defenders out there got some pictures I

2311
01:35:02,719 --> 01:35:00,030
brought a model of a notice are they

2312
01:35:03,949 --> 01:35:02,729
have these big ridged armored on and

2313
01:35:05,810 --> 01:35:03,959

some of them are actually big spikes

2314

01:35:07,310 --> 01:35:05,820

that stick out but if they're babies

2315

01:35:09,020 --> 01:35:07,320

they don't they they grow as they grow

2316

01:35:12,379 --> 01:35:09,030

older they get these rougher and rougher

2317

01:35:15,020 --> 01:35:12,389

surface now I do believe when I visited

2318

01:35:18,020 --> 01:35:15,030

you that in your own personal collection

2319

01:35:20,569 --> 01:35:18,030

you had a dinosaur track but there was

2320

01:35:23,449 --> 01:35:20,579

also a cat footprint am I getting that

2321

01:35:27,949 --> 01:35:23,459

right no nothing not a cat no no I I

2322

01:35:29,509 --> 01:35:27,959

have we we have bigger tracks of mammals

2323

01:35:32,209 --> 01:35:29,519

than the one that got heard that's four

2324

01:35:34,819 --> 01:35:32,219

inches long we have some spectacular

2325

01:35:38,419 --> 01:35:34,829

tracks that I've found and one of them

2326

01:35:40,040 --> 01:35:38,429

looks like a gigantic lion track

2327

01:35:42,529 --> 01:35:40,050

mountain lion but it's bigger than al

2328

01:35:43,640 --> 01:35:42,539

and an adult lion track and we don't see

2329

01:35:45,979 --> 01:35:43,650

the back of us you know if it was

2330

01:35:49,339 --> 01:35:45,989

elongated or if was shorter like it

2331

01:35:52,640 --> 01:35:49,349

would be on a feline a LAN or a mountain

2332

01:35:54,500 --> 01:35:52,650

lion or a cat but it is spectacular he

2333

01:35:56,270 --> 01:35:54,510

can even see between where the toenails

2334

01:35:58,879 --> 01:35:56,280

were on the toes you can see that it had

2335

01:36:01,219 --> 01:35:58,889

fur and it's just spectacular and I

2336

01:36:02,419 --> 01:36:01,229

found right beside it another piece that

2337

01:36:04,729 --> 01:36:02,429

they have equipment that broken years

2338

01:36:07,250 --> 01:36:04,739

ago with a nice three toe dinosaur track

2339

01:36:10,129 --> 01:36:07,260

walking the same substrate exactly that

2340

01:36:12,109 --> 01:36:10,139

this giant mammal had been walking now

2341

01:36:15,350 --> 01:36:12,119

ray you and I had a discussion about

2342

01:36:18,469 --> 01:36:15,360

this one time because um there is some

2343

01:36:20,779 --> 01:36:18,479

people kind of pushing a theory that you

2344

01:36:22,339 --> 01:36:20,789

know man walked beside dinosaur and I

2345

01:36:24,890 --> 01:36:22,349

believe it's in Texas somewhere where

2346

01:36:26,830 --> 01:36:24,900

they went through layers of rock and

2347

01:36:29,239 --> 01:36:26,840

they found footprints that look like

2348

01:36:30,739 --> 01:36:29,249

human footprints next to dinosaur

2349

01:36:31,460 --> 01:36:30,749

footprints and you had an answer for

2350

01:36:34,220 --> 01:36:31,470

yeah right

2351

01:36:36,950 --> 01:36:34,230

I indeed I have an answer for it it's

2352

01:36:39,140 --> 01:36:36,960

been investigated thoroughly and one of

2353

01:36:41,630 --> 01:36:39,150

the chief investigators of this is a

2354

01:36:43,580 --> 01:36:41,640

personal friend of mine and the to the

2355

01:36:45,170 --> 01:36:43,590

matter is that the tracks they call man

2356

01:36:46,670 --> 01:36:45,180

tracks they say well these were giants

2357

01:36:48,650 --> 01:36:46,680

well how come these tracks are three

2358

01:36:51,050 --> 01:36:48,660

feet long well it was a giant well it is

2359

01:36:53,240 --> 01:36:51,060

it's awfully narrow what it is is that

2360

01:36:55,790 --> 01:36:53,250

dinosaurs flesh-eating dinosaurs the

2361

01:36:57,380 --> 01:36:55,800

theropods when they wanted when if they

2362

01:36:58,970 --> 01:36:57,390

heard a roar of something that might be

2363

01:37:02,690 --> 01:36:58,980

dangerous they would lure their profile

2364

01:37:04,610 --> 01:37:02,700

or if it was so muddy that they didn't

2365

01:37:06,560 --> 01:37:04,620

want to sink down too much they would

2366

01:37:08,870 --> 01:37:06,570

lure off they were there three toes

2367

01:37:10,400 --> 01:37:08,880

normally walk down but they keep their

2368

01:37:12,680 --> 01:37:10,410

metal what I call the metatarsals the

2369

01:37:14,360 --> 01:37:12,690

bows beyond the toes upward but they

2370

01:37:16,160 --> 01:37:14,370

would lure their profile like a snow

2371

01:37:17,990 --> 01:37:16,170

chute to keep you from sinking in the

2372

01:37:19,850 --> 01:37:18,000

snow to keep them from sinking in the

2373

01:37:22,010 --> 01:37:19,860

mud and that's all in the world it is

2374

01:37:23,360 --> 01:37:22,020

what these dishonest people trying to

2375

01:37:25,400 --> 01:37:23,370

prove that the world's only five

2376

01:37:27,020 --> 01:37:25,410

thousand years old we're doing they

2377

01:37:29,150 --> 01:37:27,030

weren't telling you are showing you

2378

01:37:31,940 --> 01:37:29,160

upstream where the animal went up slope

2379

01:37:35,450 --> 01:37:31,950

and as he goes up slope he rises up on

2380

01:37:37,610 --> 01:37:35,460

his his toes what's called digitigrade

2381

01:37:39,710 --> 01:37:37,620

and went out of plantigrade we have a

2382

01:37:41,510 --> 01:37:39,720

fine example this and the gutter to slab

2383

01:37:43,340 --> 01:37:41,520

a smaller but at the same time for

2384

01:37:47,570 --> 01:37:43,350

dinosaur and when he walked through an

2385

01:37:49,610 --> 01:37:47,580

area that was wet then he lured down on

2386

01:37:52,430 --> 01:37:49,620

the metatarsals but you see as soon as

2387

01:37:56,390 --> 01:37:52,440

it climbs up the slope it gets back up

2388

01:37:59,420 --> 01:37:56,400

on his toes slowly again right what what

2389

01:38:02,480 --> 01:37:59,430

causes a track to be preserved or in

2390

01:38:05,720 --> 01:38:02,490

this case so many you know I think about

2391

01:38:10,090 --> 01:38:05,730

people walk every day and then how could

2392

01:38:14,030 --> 01:38:10,100

you no footprints be preserved yeah the

2393

01:38:16,790 --> 01:38:14,040

people don't realize what happens in the

2394

01:38:19,160 --> 01:38:16,800

first place in most of these cases the

2395

01:38:20,840 --> 01:38:19,170

tracks would we're probably exposed for

2396

01:38:22,430 --> 01:38:20,850

a little while maybe it enough slightly

2397

01:38:25,120 --> 01:38:22,440

dry out or there may have been a

2398

01:38:27,320 --> 01:38:25,130

low-grade water moved over them and

2399

01:38:29,270 --> 01:38:27,330

feral fat sick bacteria these are

2400

01:38:33,560 --> 01:38:29,280

bacteria that means bacteria that eat

2401

01:38:36,950 --> 01:38:33,570

iron they get in there and they excrete

2402

01:38:39,410 --> 01:38:36,960

hematite and it coats it and creates

2403

01:38:40,880 --> 01:38:39,420

basically an armor plating in some cases

2404

01:38:44,570 --> 01:38:40,890

that doesn't happen but there are a

2405

01:38:45,270 --> 01:38:44,580

bacterial slime that builds upon it it

2406

01:38:48,479 --> 01:38:45,280

drives out

2407

01:38:50,520 --> 01:38:48,489

little bit you've got this tiny little

2408

01:38:52,620 --> 01:38:50,530

microscopic bearer and then a flood

2409

01:38:55,890 --> 01:38:52,630

comes and covers it up but years later

2410

01:38:59,339 --> 01:38:55,900

when when they're trying to deepen the

2411

01:39:02,790 --> 01:38:59,349

streams for example here to keep water

2412

01:39:04,890 --> 01:39:02,800

out of their streets they they cut

2413

01:39:07,680 --> 01:39:04,900

through here and they break this sub the

2414

01:39:10,109 --> 01:39:07,690

upper layer off and it exposes these

2415

01:39:12,750 --> 01:39:10,119

layers where the tracks are it separates

2416

01:39:14,819 --> 01:39:12,760

that way because I think because mainly

2417

01:39:17,040 --> 01:39:14,829

the bacterial method was there where

2418

01:39:18,750 --> 01:39:17,050

there's one that it was farmed as iron

2419

01:39:20,490 --> 01:39:18,760

through the aren't eating bacteria or

2420

01:39:22,709 --> 01:39:20,500

whether it's another other types of

2421

01:39:27,299 --> 01:39:22,719

bacteria I think bacteria are largely

2422

01:39:29,580 --> 01:39:27,309

responsible for for this enabling the

2423

01:39:31,950 --> 01:39:29,590

substrate sits above it to separate and

2424

01:39:34,350 --> 01:39:31,960

sometimes we get thus the what was above

2425

01:39:36,000 --> 01:39:34,360

it that fill the track we've got it as

2426

01:39:37,140 --> 01:39:36,010

where you see the track as if it were

2427

01:39:39,240 --> 01:39:37,150

three dimensional and the other one

2428

01:39:40,319 --> 01:39:39,250

beneath it where it sinks down you got

2429

01:39:41,910 --> 01:39:40,329

both the top one and the bottom

2430

01:39:43,620 --> 01:39:41,920

sometimes we will find a piece and it

2431

01:39:44,910 --> 01:39:43,630

will we'll see a crack you jarred a

2432

01:39:47,040 --> 01:39:44,920

little bit and it comes loose and you've

2433

01:39:48,899 --> 01:39:47,050

got the nice infill on one side and the

2434

01:39:50,220 --> 01:39:48,909

track on the other it's really nice when

2435

01:39:52,410 --> 01:39:50,230

you're showing this to children for

2436

01:39:56,750 --> 01:39:52,420

example to help them understand what was

2437

01:40:03,930 --> 01:40:00,439

how can you guess how many years span

2438

01:40:05,540 --> 01:40:03,940

say for instance that slap it sounded

2439

01:40:09,870 --> 01:40:05,550

like there was maybe a predator

2440

01:40:12,930 --> 01:40:09,880

situation there but if not can many

2441

01:40:14,850 --> 01:40:12,940

years go by on the same in the same area

2442

01:40:17,580 --> 01:40:14,860

where these things are preserved or or

2443

01:40:20,129 --> 01:40:17,590

is this just something that is for you

2444

01:40:22,470 --> 01:40:20,139

know ephemeral to say a month or a week

2445

01:40:25,529 --> 01:40:22,480

or a day or whatever we believe that the

2446

01:40:27,750 --> 01:40:25,539

daughter tracks were probably made at in

2447

01:40:29,430 --> 01:40:27,760

shortest time a few hours and maybe no

2448

01:40:31,589 --> 01:40:29,440

more than a couple of days it could have

2449

01:40:33,419 --> 01:40:31,599

been a week but probably not because we

2450

01:40:35,760 --> 01:40:33,429

don't seem it him stepping on top of

2451
01:40:38,520 --> 01:40:35,770
each other but we do look at that slab

2452
01:40:41,189 --> 01:40:38,530
there's there's the iron stone which is

2453
01:40:43,080 --> 01:40:41,199
brown red and then you have white the

2454
01:40:45,209 --> 01:40:43,090
slab weighs about three and a half times

2455
01:40:46,350 --> 01:40:45,219
but you'll see a layer of softer white

2456
01:40:48,149 --> 01:40:46,360
stuff and then you see another iron

2457
01:40:50,549 --> 01:40:48,159
stone layer well if we ever get the

2458
01:40:53,040 --> 01:40:50,559
financing to cut that apart and dissolve

2459
01:40:54,479 --> 01:40:53,050
the softer white area we'll have another

2460
01:40:56,129 --> 01:40:54,489
layer with a bunch of tracks on it

2461
01:40:59,070 --> 01:40:56,139
probably we've got two other layers I

2462
01:41:01,710 --> 01:40:59,080
think beneath that these were maturely

2463
01:41:03,660 --> 01:41:01,720

you see and then as infill in the in the

2464

01:41:05,220 --> 01:41:03,670

floodplain kept bringing dirt down and

2465

01:41:06,960 --> 01:41:05,230

covering it up then you get to an area

2466

01:41:09,300 --> 01:41:06,970

where there was a high bacterial content

2467

01:41:11,250 --> 01:41:09,310

of the type that would leave the create

2468

01:41:12,660 --> 01:41:11,260

the iron stone and the stitch wouldn't

2469

01:41:16,290 --> 01:41:12,670

create the iron stone but sometimes

2470

01:41:19,290 --> 01:41:16,300

they're preserved in just self stone or

2471

01:41:23,310 --> 01:41:19,300

even sandstone that's been hardened by

2472

01:41:25,130 --> 01:41:23,320

by silica infusion and so there are many

2473

01:41:28,980 --> 01:41:25,140

ways of farms in which you can get

2474

01:41:31,680 --> 01:41:28,990

preserved but and you can have one on

2475

01:41:33,090 --> 01:41:31,690

top of the other it can get remarkable

2476

01:41:34,380 --> 01:41:33,100

and sometimes we have a wonderful

2477

01:41:36,150 --> 01:41:34,390

attraction which you see the tracone

2478

01:41:37,710 --> 01:41:36,160

topping turned over and you see the

2479

01:41:39,930 --> 01:41:37,720

negative everything you see the the

2480

01:41:42,360 --> 01:41:39,940

pushdown and you can even see where in

2481

01:41:44,490 --> 01:41:42,370

one case the dinosaur got his foot stuck

2482

01:41:46,770 --> 01:41:44,500

in the clay and twisted it to get his

2483

01:41:49,440 --> 01:41:46,780

toes out of the clay and lifted it out I

2484

01:41:51,300 --> 01:41:49,450

mean it's it's almost as if you could

2485

01:41:52,950 --> 01:41:51,310

get step in a time machine and actually

2486

01:41:54,990 --> 01:41:52,960

see it happening it's really wonderful

2487

01:41:57,660 --> 01:41:55,000

when you get to studying it oh I bet I

2488

01:42:02,130 --> 01:41:57,670

bet that's it's fascinating to me now

2489

01:42:04,290 --> 01:42:02,140

what about unknown or found species has

2490

01:42:08,040 --> 01:42:04,300

any of that appeared in Traxxas

2491

01:42:10,170 --> 01:42:08,050

themselves oh yes now we can't talk of

2492

01:42:13,730 --> 01:42:10,180

specific species of animals from tracks

2493

01:42:15,900 --> 01:42:13,740

we can talk about species of tracks and

2494

01:42:18,660 --> 01:42:15,910

in other words when you have a track

2495

01:42:20,760 --> 01:42:18,670

with that that's well documented several

2496

01:42:23,160 --> 01:42:20,770

examples and you can say it has certain

2497

01:42:25,140 --> 01:42:23,170

types of form and qualities to it then

2498

01:42:27,270 --> 01:42:25,150

just like an animal species you can

2499

01:42:29,340 --> 01:42:27,280

publish it as a trace species it's

2500

01:42:32,130 --> 01:42:29,350

called in the papers and it's no or

2501

01:42:33,420 --> 01:42:32,140

trace species and it's not telling you

2502

01:42:35,820 --> 01:42:33,430

the species of the dinosaur

2503

01:42:38,940 --> 01:42:35,830

it's the species of track for example no

2504

01:42:40,860 --> 01:42:38,950

one had ever found and and published the

2505

01:42:43,410 --> 01:42:40,870

tracks of a hipster off and on a plant

2506

01:42:45,330 --> 01:42:43,420

eating dinosaur but I repeatedly kept

2507

01:42:47,160 --> 01:42:45,340

finding them around here so I wrote a

2508

01:42:51,150 --> 01:42:47,170

paper and Martin luck they joined me on

2509

01:42:53,160 --> 01:42:51,160

it and and we published a paper about a

2510

01:42:56,460 --> 01:42:53,170

new what we would call is no species or

2511

01:42:58,380 --> 01:42:56,470

trace species and his name is hip still

2512

01:43:00,930 --> 01:42:58,390

awake no smell Anika so obviously with

2513

01:43:03,270 --> 01:43:00,940

Maryland but hip Civic means the trace

2514

01:43:04,680 --> 01:43:03,280

of a hip Salafi dot never been published

2515

01:43:06,510 --> 01:43:04,690

before but we had not only the back

2516

01:43:08,430 --> 01:43:06,520

footprint but the front footprint with

2517

01:43:10,320 --> 01:43:08,440

it in two examples one from up in

2518

01:43:11,730 --> 01:43:10,330

Baltimore and one down here and it was

2519

01:43:13,050 --> 01:43:11,740

just wonderful it tremendous

2520

01:43:15,180 --> 01:43:13,060

documentation and the

2521

01:43:17,190 --> 01:43:15,190

but the the type of the feet boat effect

2522

01:43:18,990 --> 01:43:17,200

in the fender are different from what

2523

01:43:20,130 --> 01:43:19,000

I've ever seen on any other dinosaur and

2524

01:43:22,470 --> 01:43:20,140

really get those two unique tracks

2525

01:43:25,560 --> 01:43:22,480

together you definitely got a hit Silla

2526

01:43:27,690 --> 01:43:25,570

weakness melon Dickus so we we're the

2527

01:43:30,420 --> 01:43:27,700

this is a Maryland gets credit for

2528

01:43:32,700 --> 01:43:30,430

providing the first example worldwide of

2529

01:43:35,040 --> 01:43:32,710

the hits of the tracks of hips aloft on

2530

01:43:36,870 --> 01:43:35,050

but we have also other new species of

2531

01:43:38,280 --> 01:43:36,880

dinosaur tracks yet to be published and

2532

01:43:42,360 --> 01:43:38,290

we published one in the Goddard paper

2533

01:43:45,330 --> 01:43:42,370

and we gave it a name that I'll tell you

2534

01:43:48,090 --> 01:43:45,340

I have trouble remembering this name I'm

2535

01:43:50,600 --> 01:43:48,100

80 years old but it was and it has

2536

01:43:53,190 --> 01:43:50,610

daughter dances after Goddard and so it

2537

01:43:57,420 --> 01:43:53,200

we've given Goddard a credit for it's

2538

01:43:58,950 --> 01:43:57,430

it's very so mammal track so it's it you

2539

01:44:00,540 --> 01:43:58,960

know which you you have to footprint

2540

01:44:03,000 --> 01:44:00,550

species but people should not mistake

2541

01:44:04,950 --> 01:44:03,010

them for our species of animal they're

2542

01:44:06,660 --> 01:44:04,960

really just a scientific classifications

2543

01:44:09,270 --> 01:44:06,670

of footprint even as we classify animals

2544

01:44:12,000 --> 01:44:09,280

as species now I know you and I have

2545

01:44:14,790 --> 01:44:12,010

talked briefly I don't know maybe a few

2546

01:44:16,440 --> 01:44:14,800

years ago about this but I never really

2547

01:44:18,570 --> 01:44:16,450

got your feeling on it I kind of have

2548

01:44:20,010 --> 01:44:18,580

mixed feelings myself but I'm you know

2549

01:44:21,840 --> 01:44:20,020

because I'm in the fine arts and the

2550

01:44:23,640 --> 01:44:21,850

antiques and the auction business I kind

2551
01:44:25,590 --> 01:44:23,650
of pay attention to things and you know

2552
01:44:28,230 --> 01:44:25,600
there was a t-rex

2553
01:44:30,720 --> 01:44:28,240
you know skeleton basically that was

2554
01:44:33,750 --> 01:44:30,730
found that sold for mill multi millions

2555
01:44:36,140 --> 01:44:33,760
of dollars and I add auction and I just

2556
01:44:38,130 --> 01:44:36,150
wondered what you thought about about

2557
01:44:40,170 --> 01:44:38,140
commercializing you know when something

2558
01:44:42,570 --> 01:44:40,180
goes to auction and I know it smells

2559
01:44:44,910 --> 01:44:42,580
iums that typically want to want to own

2560
01:44:47,430 --> 01:44:44,920
it and that's what the demand for that's

2561
01:44:50,040 --> 01:44:47,440
right well it's it's a is it really it's

2562
01:44:52,590 --> 01:44:50,050
a human problem that sometimes

2563
01:44:57,210 --> 01:44:52,600

interfaces and conflicts with the

2564

01:44:59,310 --> 01:44:57,220

scientific challenges and the I'll tell

2565

01:45:01,560 --> 01:44:59,320

you I am NOT impressed with museums

2566

01:45:03,150 --> 01:45:01,570

paying millions of dollars for t-rex

2567

01:45:05,880 --> 01:45:03,160

everybody knows you can go to a museum

2568

01:45:07,470 --> 01:45:05,890

that's got you've got good t-rex

2569

01:45:08,700 --> 01:45:07,480

skeletons they're not really skeleton

2570

01:45:11,130 --> 01:45:08,710

but they're made of casts of the bones

2571

01:45:13,890 --> 01:45:11,140

yes and they look exactly like the real

2572

01:45:16,380 --> 01:45:13,900

thing yeah and a museum in my opinion

2573

01:45:19,790 --> 01:45:16,390

has better ways to spend his money than

2574

01:45:24,540 --> 01:45:19,800

then I mean how many kids much you guess

2575

01:45:26,840 --> 01:45:24,550

enables a t-rex and it's so silly I mean

2576

01:45:29,300 --> 01:45:26,850

it's it should you

2577

01:45:32,060 --> 01:45:29,310

I've been in this gutter slab should be

2578

01:45:34,970 --> 01:45:32,070

displayed out in the Smithsonian and it

2579

01:45:37,310 --> 01:45:34,980

should encourage kids to learn what they

2580

01:45:38,810 --> 01:45:37,320

themselves can discover when you make

2581

01:45:40,700 --> 01:45:38,820

discoveries on there they could have an

2582

01:45:42,980 --> 01:45:40,710

interactive then enable them to make

2583

01:45:46,250 --> 01:45:42,990

discoveries and and they would feel

2584

01:45:48,890 --> 01:45:46,260

their own ability to do some rudimentary

2585

01:45:50,840 --> 01:45:48,900

science this is the kind of thing not

2586

01:45:53,750 --> 01:45:50,850

there you go it's over t-rex but

2587

01:45:55,970 --> 01:45:53,760

something else that goes deeper and gets

2588

01:45:57,620 --> 01:45:55,980

inside of them and lets them know that

2589

01:45:58,970 --> 01:45:57,630

there can be a more interesting world in

2590

01:46:01,310 --> 01:45:58,980

what they see in that little electronic

2591

01:46:02,140 --> 01:46:01,320

box on their hand and I feel strongly

2592

01:46:04,790 --> 01:46:02,150

about that

2593

01:46:07,040 --> 01:46:04,800

however the curator does shows Missoni

2594

01:46:08,660 --> 01:46:07,050

when I had made these discoveries on the

2595

01:46:10,100 --> 01:46:08,670

slab working on the reproduction side we

2596

01:46:12,110 --> 01:46:10,110

didn't know that many tracks were only

2597

01:46:14,450 --> 01:46:12,120

at all we just knew the the notice our

2598

01:46:16,280 --> 01:46:14,460

track and the baby and the big sauropod

2599

01:46:17,750 --> 01:46:16,290

track the rest of we didn't know but he

2600

01:46:20,240 --> 01:46:17,760

came over sight but the thing is

2601
01:46:21,620 --> 01:46:20,250
unfortunately by that time they are at

2602
01:46:24,290 --> 01:46:21,630
this new wing that's going to open up

2603
01:46:26,660 --> 01:46:24,300
the end of next year I think it is it

2604
01:46:28,730 --> 01:46:26,670
they already had as he said every bolt

2605
01:46:31,160 --> 01:46:28,740
and screw and the thing it already

2606
01:46:32,810 --> 01:46:31,170
planned they couldn't it could find a

2607
01:46:34,940 --> 01:46:32,820
way to get this in because everything

2608
01:46:37,700 --> 01:46:34,950
was pre-designed and bought in effect

2609
01:46:38,840 --> 01:46:37,710
through the contractors and so there's

2610
01:46:41,060 --> 01:46:38,850
nothing they could do about it

2611
01:46:43,310 --> 01:46:41,070
but I think that had the right display

2612
01:46:45,290 --> 01:46:43,320
with this and the idea that say Goddard

2613
01:46:47,270 --> 01:46:45,300

Space Flight Center were astrophysicist

2614

01:46:48,920 --> 01:46:47,280

or walking right over things they're

2615

01:46:50,960 --> 01:46:48,930

looking out into space millions of years

2616

01:46:53,210 --> 01:46:50,970

and not noticing the millions of years

2617

01:46:55,640 --> 01:46:53,220

down at their feet I think it would have

2618

01:46:57,170 --> 01:46:55,650

been a tremendous drawing Carter the

2619

01:46:58,910 --> 01:46:57,180

littles dynastar that I have down there

2620

01:47:01,400 --> 01:46:58,920

and little-noticed our track of a junior

2621

01:47:04,790 --> 01:47:01,410

notice are that I catered decided this

2622

01:47:06,740 --> 01:47:04,800

displayed I mean it has millions of

2623

01:47:08,180 --> 01:47:06,750

viewers a year I forget the figure but

2624

01:47:10,280 --> 01:47:08,190

there's it's over a million I think it

2625

01:47:13,310 --> 01:47:10,290

was at least two point something million

2626

01:47:15,440 --> 01:47:13,320

people would pass through there per year

2627

01:47:17,660 --> 01:47:15,450

but if they had a thing like this with

2628

01:47:19,040 --> 01:47:17,670

the to map down below by the way are we

2629

01:47:22,340 --> 01:47:19,050

going to be able to show any of those

2630

01:47:25,430 --> 01:47:22,350

pictures of the the the dinosaur the

2631

01:47:27,350 --> 01:47:25,440

slab with the map oh you know what ray I

2632

01:47:30,680 --> 01:47:27,360

think there was an issue with that maybe

2633

01:47:32,000 --> 01:47:30,690

I only was able to download one and I

2634

01:47:35,300 --> 01:47:32,010

thought they were the same I'd you

2635

01:47:37,880 --> 01:47:35,310

probably sent me two of oh yeah I'm

2636

01:47:39,890 --> 01:47:37,890

sorry about that terribly sorry that's

2637

01:47:40,450 --> 01:47:39,900

that's my fault I love the people to see

2638

01:47:42,850 --> 01:47:40,460

me

2639

01:47:45,970 --> 01:47:42,860

anyway in your promo though you had a

2640

01:47:48,880 --> 01:47:45,980

nice link in the promo for this you'll

2641

01:47:52,120 --> 01:47:48,890

find in there a nice link to a site that

2642

01:47:54,160 --> 01:47:52,130

I had not even seen and it shows the the

2643

01:47:56,140 --> 01:47:54,170

slab and the map that my wife and I

2644

01:47:58,240 --> 01:47:56,150

deliberately made to explain to you the

2645

01:48:00,280 --> 01:47:58,250

track so if somebody wants to go there

2646

01:48:02,020 --> 01:48:00,290

and click on that link I appreciate you

2647

01:48:03,910 --> 01:48:02,030

putting it in they can see that for

2648

01:48:08,740 --> 01:48:03,920

themselves and study it okay

2649

01:48:10,240 --> 01:48:08,750

all right great just let's see we we

2650

01:48:13,780 --> 01:48:10,250

have just like I think three or four

2651
01:48:15,970 --> 01:48:13,790
minutes left here ray so when I visited

2652
01:48:19,020 --> 01:48:15,980
you we're gonna shift gears a little bit

2653
01:48:21,790 --> 01:48:19,030
and I really appreciate your work and I

2654
01:48:24,940 --> 01:48:21,800
was absolutely thrilled I'm still very

2655
01:48:27,400 --> 01:48:24,950
thrilled of all the publicity you

2656
01:48:29,560 --> 01:48:27,410
actually got in your great work that you

2657
01:48:31,780 --> 01:48:29,570
did when it comes to the dinosaur

2658
01:48:35,050 --> 01:48:31,790
tracking I've it's it's been a lot of

2659
01:48:36,459 --> 01:48:35,060
fun and I've I've we've been in touch

2660
01:48:38,830 --> 01:48:36,469
through this whole time when you've gone

2661
01:48:42,729 --> 01:48:38,840
through this whole thing and and I'm

2662
01:48:45,160 --> 01:48:42,739
proud of Ray well thank you yeah but I

2663
01:48:48,940 --> 01:48:45,170

wanted to talk when you gave me the tour

2664

01:48:50,320 --> 01:48:48,950

I was actually that was very nice so we

2665

01:48:51,940 --> 01:48:50,330

spent some time with the gentleman with

2666

01:48:53,650 --> 01:48:51,950

the last name Bartlett they're a

2667

01:48:55,930 --> 01:48:53,660

satellite engineer I believe or

2668

01:48:59,709 --> 01:48:55,940

something but we know you gave me the

2669

01:49:02,110 --> 01:48:59,719

tour there at Goddard was it the James

2670

01:49:06,459 --> 01:49:02,120

Webb telescope that we saw them working

2671

01:49:08,620 --> 01:49:06,469

on turn remember well yes as a matter of

2672

01:49:10,560 --> 01:49:08,630

fact and I've had some nice conversation

2673

01:49:14,040 --> 01:49:10,570

with the Nobel laureate who's a

2674

01:49:18,880 --> 01:49:14,050

scientific head of that that project and

2675

01:49:20,590 --> 01:49:18,890

in a very very nice fellow but the other

2676

01:49:22,330 --> 01:49:20,600

Bartlett you mentioned he designed he

2677

01:49:24,850 --> 01:49:22,340

believed it not he was responsible for

2678

01:49:27,430 --> 01:49:24,860

the design of I think either 11 or 13 of

2679

01:49:30,400 --> 01:49:27,440

the instruments that are on the the

2680

01:49:33,010 --> 01:49:30,410

mavin arbiter Mars orbiter this in orbit

2681

01:49:34,780 --> 01:49:33,020

now that is studying things about the

2682

01:49:37,570 --> 01:49:34,790

upper atmosphere that gives us clues as

2683

01:49:38,110 --> 01:49:37,580

to what happened to change the Martian

2684

01:49:41,320 --> 01:49:38,120

atmosphere

2685

01:49:45,970 --> 01:49:41,330

oh they ages in the past and and and and

2686

01:49:47,740 --> 01:49:45,980

Bob did the design is a set of of most I

2687

01:49:50,500 --> 01:49:47,750

think of the instruments there were own

2688

01:49:52,870 --> 01:49:50,510

there I was amazed at how many he had

2689

01:49:54,370 --> 01:49:52,880

the big design port in yeah and he's the

2690

01:49:56,530 --> 01:49:54,380

guy that took you on a nice too

2691

01:49:59,530 --> 01:49:56,540

around Goddard that's right and I was

2692

01:50:01,810 --> 01:49:59,540

actually impressed that him along with

2693

01:50:04,209 --> 01:50:01,820

other you know other scientists there

2694

01:50:06,419 --> 01:50:04,219

that are kind of open-minded going back

2695

01:50:09,129 --> 01:50:06,429

to the UFO topic

2696

01:50:10,840 --> 01:50:09,139

they're very open-minded when you get

2697

01:50:12,479 --> 01:50:10,850

them privately I'm as I suspect some of

2698

01:50:14,680 --> 01:50:12,489

them if they were in the crowd of

2699

01:50:16,600 --> 01:50:14,690

Goddard employees there they might be a

2700

01:50:20,050 --> 01:50:16,610

little more intimidated I can't speak

2701
01:50:22,419 --> 01:50:20,060
for them but but privately I mean they

2702
01:50:24,399 --> 01:50:22,429
know me as a rational person who made

2703
01:50:26,470 --> 01:50:24,409
major world-class discoveries Eric got

2704
01:50:29,379 --> 01:50:26,480
it right under their feet and they

2705
01:50:32,500 --> 01:50:29,389
respect me and so when I begin to talk

2706
01:50:35,189 --> 01:50:32,510
about another type of hard evidence that

2707
01:50:38,050 --> 01:50:35,199
we've gotten in the way of films and

2708
01:50:41,680 --> 01:50:38,060
magnetometer and gravimeter and even

2709
01:50:44,680 --> 01:50:41,690
spectrographic recordings hard data from

2710
01:50:46,899 --> 01:50:44,690
UFOs they take notice and they realize

2711
01:50:49,180 --> 01:50:46,909
I'll say I'll say something I cannot

2712
01:50:52,990 --> 01:50:49,190
call the name but I can say that a

2713
01:50:55,990 --> 01:50:53,000

person with a PhD in a major physics a

2714

01:50:58,629 --> 01:50:56,000

field of physics and that has had the

2715

01:51:00,640 --> 01:50:58,639

highest levels of government clearance

2716

01:51:03,100 --> 01:51:00,650

because of projects he's worked on both

2717

01:51:04,419 --> 01:51:03,110

with the Navy and with the the

2718

01:51:09,310 --> 01:51:04,429

intelligence community and an interface

2719

01:51:10,600 --> 01:51:09,320

with NASA he has often had lunch and

2720

01:51:14,169 --> 01:51:10,610

he's not we've not called his name on

2721

01:51:17,229 --> 01:51:14,179

this show at all he has twice said

2722

01:51:19,990 --> 01:51:17,239

something quite remarkable to my wife

2723

01:51:21,970 --> 01:51:20,000

Sheila and me one day he totally said he

2724

01:51:23,590 --> 01:51:21,980

took up he stood up one day we were

2725

01:51:28,510 --> 01:51:23,600

getting ready to leave and he said ray

2726

01:51:31,300 --> 01:51:28,520

and Sheila anybody who is anyone and he

2727

01:51:33,390 --> 01:51:31,310

meant in you know in the inside of

2728

01:51:36,399 --> 01:51:33,400

scientific research with NASA and Sasori

2729

01:51:38,800 --> 01:51:36,409

knows about the extra-terrestrial

2730

01:51:39,850 --> 01:51:38,810

technology those are his exact words he

2731

01:51:42,040 --> 01:51:39,860

didn't say being based of the

2732

01:51:45,760 --> 01:51:42,050

extra-terrestrial technology that is

2733

01:51:47,680 --> 01:51:45,770

visiting our atmosphere and one day much

2734

01:51:51,520 --> 01:51:47,690

later he was there with us his son who

2735

01:51:53,740 --> 01:51:51,530

was also an engineer and our scientists

2736

01:51:56,140 --> 01:51:53,750

are sometime exactly what and we were

2737

01:51:58,090 --> 01:51:56,150

sitting there talking and he made the

2738

01:52:02,860 --> 01:51:58,100

exact same statement in front of his son

2739

01:52:04,810 --> 01:52:02,870

and to us and I do not ask people who

2740

01:52:06,640 --> 01:52:04,820

have learned things on the basis of

2741

01:52:08,200 --> 01:52:06,650

security éclairs I think it is unfair to

2742

01:52:11,470 --> 01:52:08,210

ask them to betray

2743

01:52:13,360 --> 01:52:11,480

their oath to their country - because

2744

01:52:15,370 --> 01:52:13,370

there may be reasons we don't understand

2745

01:52:17,500 --> 01:52:15,380

for national security I'm very cautious

2746

01:52:19,750 --> 01:52:17,510

about what I have gotten because I

2747

01:52:23,080 --> 01:52:19,760

realize some of it maybe this has been

2748

01:52:26,110 --> 01:52:23,090

my major holdback is that I feel that

2749

01:52:28,290 --> 01:52:26,120

I've got some material that is possibly

2750

01:52:31,360 --> 01:52:28,300

pertinent national security and I I

2751
01:52:34,360 --> 01:52:31,370
really I try to be conscious and I don't

2752
01:52:36,970 --> 01:52:34,370
I never want to offend or ask anybody to

2753
01:52:39,310 --> 01:52:36,980
offend their oath to the government in

2754
01:52:41,200 --> 01:52:39,320
their positions of security so I don't I

2755
01:52:41,860 --> 01:52:41,210
did not press this fellow father and say

2756
01:52:43,510 --> 01:52:41,870
wait a minute

2757
01:52:45,070 --> 01:52:43,520
what do you know how do you know it we

2758
01:52:47,830 --> 01:52:45,080
just did the omit his word well we're

2759
01:52:50,410 --> 01:52:47,840
out of time ray so I will also remind

2760
01:52:52,510 --> 01:52:50,420
people that if you want to get that

2761
01:52:54,459 --> 01:52:52,520
great book about the score case just to

2762
01:52:56,979 --> 01:52:54,469
email me thanks so much ray it's always

2763
01:52:59,020 --> 01:52:56,989

a pleasure a great pleasure okay thank

2764

01:53:01,660 --> 01:52:59,030

you all right all right everyone so

2765

01:53:02,800 --> 01:53:01,670

that's it for our show and thanks so

2766

01:53:04,810 --> 01:53:02,810

much for listening we're going to be

2767

01:53:07,420 --> 01:53:04,820

back next week with Terry Lovelace

2768

01:53:09,880 --> 01:53:07,430

should be a real great guest I'm really

2769

01:53:11,650 --> 01:53:09,890

looking forward to that and I want to
