

**MAJ. (RET.)
DAVID TOON**

1
00:00:30,630 --> 00:00:29,349
hello and welcome to the show of martin

2
00:00:32,630 --> 00:00:30,640
willis your host

3
00:00:34,310 --> 00:00:32,640
and first and foremost i have to say

4
00:00:37,430 --> 00:00:34,320
there are scheduled guests

5
00:00:38,950 --> 00:00:37,440
um she felt ill uh to

6
00:00:41,270 --> 00:00:38,960
she's just not feeling well enough to do

7
00:00:42,310 --> 00:00:41,280
the show this evening and unfortunately

8
00:00:45,350 --> 00:00:42,320
we're going to be talking about the

9
00:00:47,590 --> 00:00:45,360
berkshires ufo so she had to cancel

10
00:00:49,029 --> 00:00:47,600
and uh she's going to be will reschedule

11
00:00:52,389 --> 00:00:49,039
her at some point

12
00:00:54,790 --> 00:00:52,399
probably sometime in january um

13
00:00:56,709 --> 00:00:54,800

so uh luckily i was able to get a

14

00:00:58,229 --> 00:00:56,719

fill-in guest i'll be talking about that

15

00:01:01,349 --> 00:00:58,239

in just a minute

16

00:01:04,070 --> 00:01:01,359

and uh before uh before our

17

00:01:04,869 --> 00:01:04,080

our the show you know the main guest of

18

00:01:07,429 --> 00:01:04,879

the show

19

00:01:08,230 --> 00:01:07,439

we have uh the honor of having ben smith

20

00:01:11,590 --> 00:01:08,240

uh

21

00:01:14,870 --> 00:01:11,600

he is a former cia operative and

22

00:01:15,830 --> 00:01:14,880

he was featured in roswell the first

23

00:01:17,749 --> 00:01:15,840

witness

24

00:01:19,429 --> 00:01:17,759

as a part of history's greatest

25

00:01:22,469 --> 00:01:19,439

mysteries

26

00:01:24,950 --> 00:01:22,479

and that premieres on the twelfth

27

00:01:26,469 --> 00:01:24,960

on the history channel at nine pm so

28

00:01:27,510 --> 00:01:26,479

you're going to have to check that out

29

00:01:29,510 --> 00:01:27,520

because uh

30

00:01:31,749 --> 00:01:29,520

one of the perks of doing the show is i

31

00:01:34,630 --> 00:01:31,759

get to see screeners ahead of time

32

00:01:35,510 --> 00:01:34,640

and uh i really like it but you know i

33

00:01:37,749 --> 00:01:35,520

can't really

34

00:01:39,990 --> 00:01:37,759

talk about them on the show that's kind

35

00:01:43,030 --> 00:01:40,000

of like the double-edged sword i get to

36

00:01:43,990 --> 00:01:43,040

i get to watch but i can't give anything

37

00:01:46,630 --> 00:01:44,000

away

38

00:01:48,149 --> 00:01:46,640

so i i have to delicately talk about it

39

00:01:50,789 --> 00:01:48,159

but i want to tell you

40

00:01:51,590 --> 00:01:50,799

you're going to watch you're going to

41

00:01:54,789 --> 00:01:51,600

love to watch

42

00:01:56,069 --> 00:01:54,799

this program um a lot of times people

43

00:01:58,389 --> 00:01:56,079

will say to me well

44

00:02:00,149 --> 00:01:58,399

roswell again you know haven't we heard

45

00:02:02,709 --> 00:02:00,159

everything about roswell

46

00:02:04,230 --> 00:02:02,719

well um there is definitely you're

47

00:02:07,350 --> 00:02:04,240

definitely going to watch

48

00:02:07,990 --> 00:02:07,360

this and get a lot out of it and we'll

49

00:02:11,510 --> 00:02:08,000

be talking

50

00:02:12,070 --> 00:02:11,520

to our guests about that um it's one of

51

00:02:14,390 --> 00:02:12,080

the better

52

00:02:16,390 --> 00:02:14,400

programs it's so well put together and

53

00:02:19,430 --> 00:02:16,400

it's going to be a series of

54

00:02:21,430 --> 00:02:19,440

three three programs six hours

55

00:02:22,710 --> 00:02:21,440

and uh so i got to watch the first you

56

00:02:25,030 --> 00:02:22,720

know the first uh

57

00:02:26,150 --> 00:02:25,040

seri of the series and really really

58

00:02:29,670 --> 00:02:26,160

liked it a lot

59

00:02:32,550 --> 00:02:29,680

our filling guest is retired major david

60

00:02:33,830 --> 00:02:32,560

tune and he is going to be talking about

61

00:02:36,869 --> 00:02:33,840

his study on imagery

62

00:02:39,110 --> 00:02:36,879

analysis of nasa archive solar

63

00:02:41,030 --> 00:02:39,120

satellite photos and we're going to be

64

00:02:43,589 --> 00:02:41,040

talking about that there's some

65

00:02:44,229 --> 00:02:43,599

really quite unusual pictures you sent

66

00:02:46,390 --> 00:02:44,239

me

67

00:02:47,430 --> 00:02:46,400

we'll show those on youtube that they're

68

00:02:49,589 --> 00:02:47,440

going to be in

69

00:02:51,990 --> 00:02:49,599

the show notes you'll see them there as

70

00:02:52,630 --> 00:02:52,000

well uh just a couple things christmas

71

00:02:54,309 --> 00:02:52,640

is coming

72

00:02:55,670 --> 00:02:54,319

if you wanted to get yourself a

73

00:02:58,470 --> 00:02:55,680

christmas present

74

00:02:59,509 --> 00:02:58,480

be sure to check out our podcast ufo

75

00:03:02,229 --> 00:02:59,519

t-shirts

76
00:03:02,710 --> 00:03:02,239
and more just click on the merchandise

77
00:03:04,790 --> 00:03:02,720
tab

78
00:03:06,869 --> 00:03:04,800
on our website and also we're going to

79
00:03:08,070 --> 00:03:06,879
give away you know the show right before

80
00:03:09,589 --> 00:03:08,080
christmas we're going to give away a

81
00:03:12,470 --> 00:03:09,599
couple of t-shirts

82
00:03:12,869 --> 00:03:12,480
to callers of the lot at the live show

83
00:03:15,030 --> 00:03:12,879
and

84
00:03:16,309 --> 00:03:15,040
while you're over at podcast ufo uh

85
00:03:19,190 --> 00:03:16,319
check out our latest

86
00:03:20,470 --> 00:03:19,200
blog by charles lear and the title of

87
00:03:23,589 --> 00:03:20,480
this blog is

88
00:03:25,350 --> 00:03:23,599

pancakes from the ufo now

89

00:03:27,430 --> 00:03:25,360

that there really is an encounter that

90

00:03:30,390 --> 00:03:27,440

had to do with uh

91

00:03:32,149 --> 00:03:30,400

supposed aliens uh cooking pancakes it's

92

00:03:34,470 --> 00:03:32,159

really a strange

93

00:03:35,509 --> 00:03:34,480

uh but very interesting case and

94

00:03:37,830 --> 00:03:35,519

sometimes

95

00:03:41,110 --> 00:03:37,840

you know as i said a few times kind of

96

00:03:43,110 --> 00:03:41,120

feel this way that sometimes the weirder

97

00:03:44,949 --> 00:03:43,120

the almost the more credible some of

98

00:03:46,390 --> 00:03:44,959

these stories are but i i do cross the

99

00:03:49,270 --> 00:03:46,400

line at uh

100

00:03:50,550 --> 00:03:49,280

pancakes that that that is just a little

101
00:03:52,229 --> 00:03:50,560
a little too much

102
00:03:55,110 --> 00:03:52,239
also if you want to buy yourself one of

103
00:03:57,670 --> 00:03:55,120
my paintings i have ufo paintings

104
00:03:58,149 --> 00:03:57,680
and uh traditional art uh that i paint

105
00:04:01,589 --> 00:03:58,159
um

106
00:04:03,429 --> 00:04:01,599
and that is on martinwillisart.com

107
00:04:06,229 --> 00:04:03,439
and all you have to do uh if you want to

108
00:04:09,030 --> 00:04:06,239
purchase something is enter the code ufo

109
00:04:10,949 --> 00:04:09,040
and you'll get half off so if you want

110
00:04:13,110 --> 00:04:10,959
to buy yourself a christmas present

111
00:04:14,309 --> 00:04:13,120
now my friend to the north uh jordan

112
00:04:16,629 --> 00:04:14,319
bonaparte

113
00:04:18,229 --> 00:04:16,639

uh he has a podcast that just came out

114

00:04:20,069 --> 00:04:18,239

uh this morning

115

00:04:21,509 --> 00:04:20,079

and uh so it's this latest one on the

116

00:04:23,909 --> 00:04:21,519

nighttime podcast

117

00:04:24,790 --> 00:04:23,919

and it's a tribute to stanton friedman

118

00:04:26,870 --> 00:04:24,800

and he talks

119

00:04:29,110 --> 00:04:26,880

with his nephew who's actually a past

120

00:04:31,350 --> 00:04:29,120

guest on this show paul kimball

121

00:04:33,189 --> 00:04:31,360

and i really really enjoyed this uh

122

00:04:35,110 --> 00:04:33,199

podcast and i think you will too if you

123

00:04:37,430 --> 00:04:35,120

liked uh stanton friedman

124

00:04:40,230 --> 00:04:37,440

and what he's done it's such a well done

125

00:04:41,990 --> 00:04:40,240

show check that out nighttime podcast

126

00:04:43,830 --> 00:04:42,000

and uh if you support the show i want to

127

00:04:45,350 --> 00:04:43,840

thank you very much i couldn't do this

128

00:04:47,430 --> 00:04:45,360

without your help

129

00:04:48,629 --> 00:04:47,440

and uh if you want to become a supporter

130

00:04:50,469 --> 00:04:48,639

for a little as

131

00:04:53,510 --> 00:04:50,479

two dollars a month or more all you have

132

00:04:56,710 --> 00:04:53,520

to do is go to our patreon page which is

133

00:05:00,150 --> 00:04:56,720

patreon.com martin willis podcast ufo

134

00:05:02,550 --> 00:05:00,160

and that link's also on our our uh web

135

00:05:04,230 --> 00:05:02,560

site our live show just a little more

136

00:05:06,310 --> 00:05:04,240

housekeeping our live show

137

00:05:08,390 --> 00:05:06,320

coming up is going to be on sunday this

138

00:05:09,990 --> 00:05:08,400

week instead of the regular tuesday

139

00:05:11,590 --> 00:05:10,000

because we're recording with someone in

140

00:05:14,230 --> 00:05:11,600

germany sunday at 2 p.m

141

00:05:15,909 --> 00:05:14,240

eastern time that'll be tim mcmillan

142

00:05:16,950 --> 00:05:15,919

he's going to be talking about his uh

143

00:05:19,990 --> 00:05:16,960

debrief

144

00:05:24,150 --> 00:05:20,000

website and there's a lot of uh

145

00:05:26,950 --> 00:05:24,160

a lot of uh interesting pictures and

146

00:05:28,710 --> 00:05:26,960

stories that they've come up with so uh

147

00:05:30,790 --> 00:05:28,720

that is it for right now

148

00:05:32,230 --> 00:05:30,800

and i'm going to bring in our guest

149

00:05:35,749 --> 00:05:32,240

welcome to the show

150

00:05:38,870 --> 00:05:35,759

ben hello thanks for

151
00:05:41,830 --> 00:05:38,880
thanks for being on my pleasure

152
00:05:42,469 --> 00:05:41,840
it looked like you were having some fun

153
00:05:45,749 --> 00:05:42,479
when i saw

154
00:05:47,510 --> 00:05:45,759
that that video so can you uh before we

155
00:05:50,310 --> 00:05:47,520
get into what the show is about

156
00:05:53,189 --> 00:05:50,320
and all that can you uh give your your

157
00:05:55,749 --> 00:05:53,199
background you're a retired or or former

158
00:05:58,309 --> 00:05:55,759
cia operative

159
00:05:59,029 --> 00:05:58,319
and uh so let's let's talk uh how you

160
00:06:00,469 --> 00:05:59,039
get into that

161
00:06:02,870 --> 00:06:00,479
and what you're interested in did you

162
00:06:05,029 --> 00:06:02,880
have an interest in ufos

163
00:06:05,990 --> 00:06:05,039

uh yeah i can do all that so my name is

164

00:06:07,670 --> 00:06:06,000

ben smith for for

165

00:06:09,110 --> 00:06:07,680

all the audience out there um i grew up

166

00:06:11,110 --> 00:06:09,120

in the pacific northwest

167

00:06:12,469 --> 00:06:11,120

i went to school here in new york city

168

00:06:14,550 --> 00:06:12,479

and um

169

00:06:17,029 --> 00:06:14,560

after graduate school at international

170

00:06:21,990 --> 00:06:17,039

affairs i decided well how can i serve

171

00:06:23,510 --> 00:06:22,000

and i met a recruiter at the cia and um

172

00:06:25,270 --> 00:06:23,520

applied online i filled out an

173

00:06:27,110 --> 00:06:25,280

application sent it off into the

174

00:06:28,629 --> 00:06:27,120

to the ether and uh you know a couple

175

00:06:30,070 --> 00:06:28,639

months later got a response and

176

00:06:32,070 --> 00:06:30,080

started the recruitment process went

177

00:06:33,590 --> 00:06:32,080

through all the training and uh became

178

00:06:36,070 --> 00:06:33,600

what's called a case officer

179

00:06:38,469 --> 00:06:36,080

or operations officer in hollywood they

180

00:06:40,790 --> 00:06:38,479

like to call it an undercover operative

181

00:06:41,590 --> 00:06:40,800

and my job was to recruit and handle

182

00:06:44,710 --> 00:06:41,600

sources

183

00:06:46,309 --> 00:06:44,720

or assets

184

00:06:48,629 --> 00:06:46,319

to collect intelligence for the us

185

00:06:50,950 --> 00:06:48,639

government so got a lot of reps

186

00:06:52,309 --> 00:06:50,960

dealing with all types of people from

187

00:06:55,350 --> 00:06:52,319

emotionally unstable

188

00:06:57,589 --> 00:06:55,360

up to you know intelligence officers to

189

00:06:59,830 --> 00:06:57,599

terrorist sympathizers many with

190

00:07:02,150 --> 00:06:59,840

incredible claims saying hey i've got

191

00:07:03,830 --> 00:07:02,160

something that's really going to make uh

192

00:07:06,230 --> 00:07:03,840

the world change and i want to give it

193

00:07:08,550 --> 00:07:06,240

to uncle sam and you know it's my job to

194

00:07:09,749 --> 00:07:08,560

meet the person bet the person validate

195

00:07:11,510 --> 00:07:09,759

try to suss out

196

00:07:13,749 --> 00:07:11,520

are they telling the truth and if they

197

00:07:15,029 --> 00:07:13,759

are why or why not or

198

00:07:17,670 --> 00:07:15,039

maybe they're not and maybe it's to

199

00:07:20,070 --> 00:07:17,680

deceive or to hurt me or or others

200

00:07:21,589 --> 00:07:20,080

so i got a lot of practice in that realm

201
00:07:23,909 --> 00:07:21,599
kind of just wrestling in the mud with

202
00:07:25,029 --> 00:07:23,919
with difficult questions um i've always

203
00:07:28,950 --> 00:07:25,039
been a fan

204
00:07:30,629 --> 00:07:28,960
of uh science fiction and i grew up

205
00:07:32,790 --> 00:07:30,639
you know with the specter of aliens and

206
00:07:34,870 --> 00:07:32,800
some great uh media out there and

207
00:07:36,629 --> 00:07:34,880
you know personally i think the universe

208
00:07:39,270 --> 00:07:36,639
is so vast that there's

209
00:07:39,990 --> 00:07:39,280
uh an enormous possibility that the

210
00:07:42,950 --> 00:07:40,000
intelligent life

211
00:07:44,390 --> 00:07:42,960
exists there whether it's come to to our

212
00:07:45,830 --> 00:07:44,400
planet yet i'm still

213
00:07:47,430 --> 00:07:45,840

in the process of learning that's part

214

00:07:48,869 --> 00:07:47,440

of why i jumped into this investigation

215

00:07:51,270 --> 00:07:48,879

because i wanted to get

216

00:07:51,990 --> 00:07:51,280

uh firsthand knowledge of of the issues

217

00:07:53,909 --> 00:07:52,000

and and the

218

00:07:55,510 --> 00:07:53,919

witnesses and the evidence that's out

219

00:07:56,230 --> 00:07:55,520

there and wrestle with it and say hey

220

00:07:59,350 --> 00:07:56,240

what are the

221

00:08:01,670 --> 00:07:59,360

if if i'm writing a cable right now to

222

00:08:02,550 --> 00:08:01,680

washington dc to the president what do i

223

00:08:04,869 --> 00:08:02,560

say about

224

00:08:05,909 --> 00:08:04,879

aliens so uh that was the spirit in

225

00:08:08,950 --> 00:08:05,919

which i came at this

226

00:08:10,710 --> 00:08:08,960

this history channel program wow wow

227

00:08:11,990 --> 00:08:10,720

uh yeah it's interesting and you know

228

00:08:13,430 --> 00:08:12,000

you make a good point

229

00:08:15,270 --> 00:08:13,440

it's and i've said this a number of

230

00:08:17,830 --> 00:08:15,280

times in the show you know i mean

231

00:08:18,469 --> 00:08:17,840

um you know there's got to be life i

232

00:08:20,790 --> 00:08:18,479

mean it just

233

00:08:21,749 --> 00:08:20,800

makes no sense that there wouldn't be i

234

00:08:24,950 --> 00:08:21,759

mean life

235

00:08:25,350 --> 00:08:24,960

does everything it can do to be you know

236

00:08:28,230 --> 00:08:25,360

i mean

237

00:08:30,150 --> 00:08:28,240

you look on you know on the incredible

238

00:08:32,550 --> 00:08:30,160

situations where life

239

00:08:33,350 --> 00:08:32,560

is um you know it doesn't matter the

240

00:08:36,310 --> 00:08:33,360

temperature

241

00:08:36,949 --> 00:08:36,320

like uh you know near volcanoes and in

242

00:08:40,070 --> 00:08:36,959

acidic

243

00:08:43,110 --> 00:08:40,080

uh water i mean it's just amazing how

244

00:08:44,070 --> 00:08:43,120

life just does whatever it can to be and

245

00:08:45,509 --> 00:08:44,080

uh

246

00:08:47,829 --> 00:08:45,519

you know but whether it turns into

247

00:08:49,350 --> 00:08:47,839

intelligent life that's uh that's hard

248

00:08:51,030 --> 00:08:49,360

to say and whether we're intelligent or

249

00:08:54,470 --> 00:08:51,040

not i don't know sometimes

250

00:08:56,310 --> 00:08:54,480

but uh and i've wondered why would we be

251

00:08:57,990 --> 00:08:56,320

so special that we'd be visited

252

00:08:59,509 --> 00:08:58,000

you know if there's a lot of life out

253

00:09:02,630 --> 00:08:59,519

there i mean that's another

254

00:09:04,949 --> 00:09:02,640

right another question to this but um

255

00:09:08,230 --> 00:09:04,959

you know some scientists have said to me

256

00:09:11,269 --> 00:09:08,240

you know well uh you know life

257

00:09:12,550 --> 00:09:11,279

like planets i mean with as much water

258

00:09:15,030 --> 00:09:12,560

and life as we have here

259

00:09:16,310 --> 00:09:15,040

might be something you know unusual it

260

00:09:19,350 --> 00:09:16,320

could be

261

00:09:21,350 --> 00:09:19,360

you know yeah

262

00:09:23,110 --> 00:09:21,360

and from a national security standpoint

263

00:09:24,389 --> 00:09:23,120

it's it's critical right like even if

264

00:09:26,389 --> 00:09:24,399

there's the smallest chance

265

00:09:28,389 --> 00:09:26,399

of alien contact here we should be

266

00:09:29,829 --> 00:09:28,399

taking it seriously just as the military

267

00:09:31,590 --> 00:09:29,839

takes the smallest

268

00:09:33,030 --> 00:09:31,600

national security threat in whatever

269

00:09:34,710 --> 00:09:33,040

country that may be

270

00:09:36,150 --> 00:09:34,720

uh you know that's a pretty significant

271

00:09:36,470 --> 00:09:36,160

one that there might be people visiting

272

00:09:39,190 --> 00:09:36,480

us

273

00:09:40,870 --> 00:09:39,200

uh from other worlds so uh yeah that's

274

00:09:43,030 --> 00:09:40,880

the way i i approach the issue

275

00:09:44,550 --> 00:09:43,040

um i'm not a i don't consider myself a

276

00:09:47,110 --> 00:09:44,560

debunker i'm not here

277

00:09:49,190 --> 00:09:47,120

to with a predetermined bias it says oh

278

00:09:51,750 --> 00:09:49,200

well this has to be fake i'm not

279

00:09:52,230 --> 00:09:51,760

i don't have any first-hand um accounts

280

00:09:55,110 --> 00:09:52,240

or

281

00:09:57,430 --> 00:09:55,120

um close encounters of my own but um you

282

00:10:00,550 --> 00:09:57,440

know i'm open-minded and i want to be

283

00:10:02,710 --> 00:10:00,560

convinced either way how did you uh

284

00:10:03,670 --> 00:10:02,720

how did how did the show find your you

285

00:10:05,990 --> 00:10:03,680

find the show

286

00:10:07,430 --> 00:10:06,000

how did that happen uh well i had done

287

00:10:11,190 --> 00:10:07,440

that that show in colombia

288

00:10:13,670 --> 00:10:11,200

looking for pablo escobar's money and um

289

00:10:15,829 --> 00:10:13,680

fantastic to me i've been pitching

290

00:10:16,389 --> 00:10:15,839

projects all over town new york city hey

291

00:10:18,150 --> 00:10:16,399

i wanna

292

00:10:19,509 --> 00:10:18,160

um these are some ideas that i have

293

00:10:20,949 --> 00:10:19,519

things i want to investigate and a

294

00:10:22,630 --> 00:10:20,959

friend of mine informed me that history

295

00:10:23,190 --> 00:10:22,640

channel was looking for an investigator

296

00:10:26,230 --> 00:10:23,200

to

297

00:10:28,470 --> 00:10:26,240

and i

298

00:10:29,670 --> 00:10:28,480

lobbied pretty hard for the job i got

299

00:10:31,509 --> 00:10:29,680

multiple people to send in

300

00:10:33,190 --> 00:10:31,519

recommendations and say hey

301
00:10:34,630 --> 00:10:33,200
that's me i want to be that there i want

302
00:10:37,110 --> 00:10:34,640
to be on the debris field i want to talk

303
00:10:40,790 --> 00:10:37,120
to witnesses and see what we can learn

304
00:10:42,389 --> 00:10:40,800
and how much background work did you

305
00:10:44,710 --> 00:10:42,399
were you involved in in getting that

306
00:10:46,630 --> 00:10:44,720
thing started

307
00:10:48,790 --> 00:10:46,640
the ball was already rolling uh the

308
00:10:51,910 --> 00:10:48,800
marcel children who featured prominently

309
00:10:53,030 --> 00:10:51,920
in the um the docu-series on history

310
00:10:54,630 --> 00:10:53,040
this is the saturday

311
00:10:55,990 --> 00:10:54,640
um you know they they got the ball

312
00:10:57,030 --> 00:10:56,000
rolling they were the ones pushing

313
00:10:58,710 --> 00:10:57,040

production company

314

00:11:00,230 --> 00:10:58,720

bringing the evidence this this new

315

00:11:02,790 --> 00:11:00,240

journal that we can discuss

316

00:11:04,310 --> 00:11:02,800

um yeah belong to their grandfather to

317

00:11:04,949 --> 00:11:04,320

history channel and saying hey what can

318

00:11:06,550 --> 00:11:04,959

be done

319

00:11:08,389 --> 00:11:06,560

and then um that ball was already

320

00:11:10,230 --> 00:11:08,399

rolling so i had a lot of ketchup to do

321

00:11:11,910 --> 00:11:10,240

um i've i've done a lot of my own

322

00:11:14,069 --> 00:11:11,920

vehicle research but i was new to

323

00:11:15,190 --> 00:11:14,079

the roswell incident so i had to spend

324

00:11:16,710 --> 00:11:15,200

time with don schmidt

325

00:11:18,230 --> 00:11:16,720

and some of the greats and reading their

326

00:11:20,870 --> 00:11:18,240

work and their research and

327

00:11:21,829 --> 00:11:20,880

and jumping right in to the deep end but

328

00:11:23,590 --> 00:11:21,839

um

329

00:11:25,829 --> 00:11:23,600

once i got out there and part of the

330

00:11:28,630 --> 00:11:25,839

investigation and meeting the um

331

00:11:30,069 --> 00:11:28,640

the uh the marcel grandchildren it was

332

00:11:32,310 --> 00:11:30,079

game on from there

333

00:11:33,910 --> 00:11:32,320

yeah yeah they're great i've talked to

334

00:11:36,230 --> 00:11:33,920

uh jesse iii

335

00:11:37,030 --> 00:11:36,240

yeah he's been on the show before uh

336

00:11:39,910 --> 00:11:37,040

great guy

337

00:11:40,310 --> 00:11:39,920

um he was working on flying cars at one

338

00:11:42,150 --> 00:11:40,320

time

339

00:11:43,430 --> 00:11:42,160

i'm wondering yeah he's got a pretty

340

00:11:45,350 --> 00:11:43,440

cool got some patents

341

00:11:46,470 --> 00:11:45,360

uh you know this is one of the benefits

342

00:11:48,470 --> 00:11:46,480

of even something

343

00:11:49,509 --> 00:11:48,480

like roswell right here the grandson of

344

00:11:51,269 --> 00:11:49,519

the first witness

345

00:11:52,870 --> 00:11:51,279

has invented some crazy new propulsion

346

00:11:54,629 --> 00:11:52,880

technology that could change you know

347

00:11:55,670 --> 00:11:54,639

transportation as we know it so it's

348

00:11:57,190 --> 00:11:55,680

pretty exciting

349

00:11:59,670 --> 00:11:57,200

well i've been waiting for a flying car

350

00:12:01,509 --> 00:11:59,680

since the 1960s

351
00:12:03,110 --> 00:12:01,519
seems like we should have one by now but

352
00:12:06,550 --> 00:12:03,120
uh wow uh

353
00:12:07,269 --> 00:12:06,560
yes uh the what without spoiling

354
00:12:10,629 --> 00:12:07,279
anything

355
00:12:12,230 --> 00:12:10,639
um on this of the series of three there

356
00:12:15,269 --> 00:12:12,240
what do you think is the most compelling

357
00:12:17,030 --> 00:12:15,279
part of the roswell case

358
00:12:19,990 --> 00:12:17,040
well from the get-go what really caught

359
00:12:22,310 --> 00:12:20,000
my eye was obviously the u.s government

360
00:12:24,150 --> 00:12:22,320
uh press release that they had recovered

361
00:12:25,190 --> 00:12:24,160
a flying disc right like when has that

362
00:12:28,470 --> 00:12:25,200
happened

363
00:12:31,190 --> 00:12:28,480

no other country has done it

364

00:12:32,550 --> 00:12:31,200

i think they learned their lives why did

365

00:12:33,750 --> 00:12:32,560

they make this mistake did they were

366

00:12:35,829 --> 00:12:33,760

they really that excited

367

00:12:37,670 --> 00:12:35,839

if it's a cover story for something else

368

00:12:40,470 --> 00:12:37,680

it's a really bad cover story you know

369

00:12:41,590 --> 00:12:40,480

uh yeah and talking to someone like uh

370

00:12:43,190 --> 00:12:41,600

jesse marcel's

371

00:12:45,030 --> 00:12:43,200

grandchildren he doesn't seem like the

372

00:12:46,150 --> 00:12:45,040

kind of guy that would participate in

373

00:12:48,389 --> 00:12:46,160

creating kind of

374

00:12:49,590 --> 00:12:48,399

that kind of cockamamie for backup like

375

00:12:51,590 --> 00:12:49,600

a better word right

376

00:12:53,030 --> 00:12:51,600

and usually a cover story and i've used

377

00:12:55,670 --> 00:12:53,040

them myself in the field

378

00:12:56,069 --> 00:12:55,680

to protect uh sources and methods is hey

379

00:12:58,150 --> 00:12:56,079

like

380

00:12:59,350 --> 00:12:58,160

we want attention to go away these

381

00:13:00,310 --> 00:12:59,360

aren't the droids you're looking for

382

00:13:02,150 --> 00:13:00,320

right so yeah

383

00:13:03,829 --> 00:13:02,160

so that the government would say hey we

384

00:13:04,870 --> 00:13:03,839

got this and the thing and now it

385

00:13:07,190 --> 00:13:04,880

suddenly attracted

386

00:13:08,949 --> 00:13:07,200

world attention to if it was just a top

387

00:13:09,750 --> 00:13:08,959

secret research program well now you've

388

00:13:11,350 --> 00:13:09,760

kind of

389

00:13:12,710 --> 00:13:11,360

made the whole situation worse so that

390

00:13:14,710 --> 00:13:12,720

really jumped out at me and seemed like

391

00:13:15,750 --> 00:13:14,720

an anomaly in terms of national security

392

00:13:17,990 --> 00:13:15,760

practice

393

00:13:19,509 --> 00:13:18,000

although this is in the early phases of

394

00:13:21,269 --> 00:13:19,519

sort of the national security regime

395

00:13:22,550 --> 00:13:21,279

after world war ii

396

00:13:24,150 --> 00:13:22,560

the government's still learning a lot

397

00:13:24,790 --> 00:13:24,160

and how to develop and protect secrets

398

00:13:27,110 --> 00:13:24,800

but um

399

00:13:28,949 --> 00:13:27,120

it just seemed like a just the wrong

400

00:13:30,550 --> 00:13:28,959

step at the wrong time

401
00:13:32,629 --> 00:13:30,560
it really does and i know we talked a

402
00:13:34,710 --> 00:13:32,639
little bit off air and you know that was

403
00:13:36,150 --> 00:13:34,720
my comment to you as well that i thought

404
00:13:38,230 --> 00:13:36,160
that was you know why would

405
00:13:39,750 --> 00:13:38,240
why on earth would they say they

406
00:13:41,750 --> 00:13:39,760
captured a flying disc

407
00:13:42,949 --> 00:13:41,760
you know i mean it doesn't even all it's

408
00:13:43,509 --> 00:13:42,959
going to do is like you said draw

409
00:13:45,030 --> 00:13:43,519
attention

410
00:13:46,949 --> 00:13:45,040
if they were trying to cover it up

411
00:13:50,150 --> 00:13:46,959
another story up with it

412
00:13:52,629 --> 00:13:50,160
right no not a good idea because uh

413
00:13:53,750 --> 00:13:52,639

you know it when you know the viral

414

00:13:55,509 --> 00:13:53,760

wasn't even a word

415

00:13:57,269 --> 00:13:55,519

used when it came to this thing but it

416

00:13:59,110 --> 00:13:57,279

went everywhere right and

417

00:14:00,550 --> 00:13:59,120

the you know what the mystery one of the

418

00:14:02,870 --> 00:14:00,560

big mysteries of this

419

00:14:04,870 --> 00:14:02,880

is to me and and and i don't know if you

420

00:14:07,990 --> 00:14:04,880

agree with me or not but

421

00:14:10,949 --> 00:14:08,000

that this thing just went quiet until

422

00:14:12,629 --> 00:14:10,959

you know like 1980 i mean totally quiet

423

00:14:14,470 --> 00:14:12,639

you never heard anyone talking about

424

00:14:16,710 --> 00:14:14,480

roswell anyone that's been

425

00:14:17,670 --> 00:14:16,720

was in the ufo field all that time ahead

426
00:14:20,710 --> 00:14:17,680
of time

427
00:14:21,030 --> 00:14:20,720
you know uh right may have never heard

428
00:14:23,750 --> 00:14:21,040
about

429
00:14:25,509 --> 00:14:23,760
roswell if they grew up like if they

430
00:14:29,269 --> 00:14:25,519
were paying attention to the roswell

431
00:14:31,750 --> 00:14:29,279
in the 60s and 70s and until 1980 they

432
00:14:34,069 --> 00:14:31,760
never heard of roswell

433
00:14:34,949 --> 00:14:34,079
and yeah that was a confusing um not

434
00:14:37,350 --> 00:14:34,959
confusing but

435
00:14:38,870 --> 00:14:37,360
a question that i had why you know

436
00:14:40,150 --> 00:14:38,880
researchers like don schmidt and kevin

437
00:14:41,030 --> 00:14:40,160
randall and stanton friedman and

438
00:14:42,470 --> 00:14:41,040

everyone else you know

439

00:14:44,310 --> 00:14:42,480

this is a serious government cover-up

440

00:14:45,910 --> 00:14:44,320

there were abuses of constitutional

441

00:14:49,350 --> 00:14:45,920

rights there were threats to

442

00:14:51,910 --> 00:14:49,360

families and um and careers

443

00:14:53,269 --> 00:14:51,920

um which could could make for that kind

444

00:14:56,629 --> 00:14:53,279

of effective silence

445

00:14:58,310 --> 00:14:56,639

um but what else could it be

446

00:14:59,750 --> 00:14:58,320

you know i'm still in the midst of

447

00:15:02,629 --> 00:14:59,760

figuring that out

448

00:15:03,269 --> 00:15:02,639

and why would they why would they be so

449

00:15:05,509 --> 00:15:03,279

um

450

00:15:07,350 --> 00:15:05,519

forceful if it was just a weather

451

00:15:09,110 --> 00:15:07,360

balloon you know with these people

452

00:15:10,949 --> 00:15:09,120

right they threaten these people because

453

00:15:14,069 --> 00:15:10,959

of a weather balloon

454

00:15:15,509 --> 00:15:14,079

or or you know a mogul even i mean

455

00:15:17,590 --> 00:15:15,519

it because they wouldn't know what it

456

00:15:20,150 --> 00:15:17,600

was if even if they found

457

00:15:21,430 --> 00:15:20,160

one of the moguls and so this is a time

458

00:15:24,310 --> 00:15:21,440

where the government has

459

00:15:26,949 --> 00:15:24,320

basically lied to the people four or

460

00:15:29,990 --> 00:15:26,959

five times when it comes to roswell

461

00:15:31,990 --> 00:15:30,000

and do you find that unusual or in with

462

00:15:33,829 --> 00:15:32,000

your background do you

463

00:15:35,430 --> 00:15:33,839

yeah that's certainly a changing story

464

00:15:36,629 --> 00:15:35,440

is always a sign of deception right i

465

00:15:38,230 --> 00:15:36,639

mean that's the first thing that police

466

00:15:41,030 --> 00:15:38,240

do when they question witnesses

467

00:15:42,710 --> 00:15:41,040

is um you know they like to evaluate the

468

00:15:43,990 --> 00:15:42,720

changes to their story over time with

469

00:15:45,670 --> 00:15:44,000

more questions uh

470

00:15:47,030 --> 00:15:45,680

and you know that's in the case of our

471

00:15:48,550 --> 00:15:47,040

government that's happened

472

00:15:50,389 --> 00:15:48,560

multiple times as you said and the

473

00:15:50,990 --> 00:15:50,399

latest you know the latest word as of

474

00:15:55,030 --> 00:15:51,000

the

475

00:15:57,110 --> 00:15:55,040

force

476
00:15:58,069 --> 00:15:57,120
wasn't convincing either right the other

477
00:16:01,829 --> 00:15:58,079
they couldn't produce

478
00:16:02,790 --> 00:16:01,839
physical evidence they could just make

479
00:16:05,189 --> 00:16:02,800
best guesses

480
00:16:05,910 --> 00:16:05,199
um so that's not convincing either so

481
00:16:07,590 --> 00:16:05,920
you know

482
00:16:09,030 --> 00:16:07,600
i'm a big supporter of the government

483
00:16:09,990 --> 00:16:09,040
and a lot of national security programs

484
00:16:11,990 --> 00:16:10,000
that they have

485
00:16:13,509 --> 00:16:12,000
but sometimes you got to own up to the

486
00:16:15,670 --> 00:16:13,519
problems that you create and

487
00:16:17,189 --> 00:16:15,680
i think taking this seriously and the

488
00:16:20,550 --> 00:16:17,199

public's response to

489

00:16:21,590 --> 00:16:20,560

the rockwell report um requires you know

490

00:16:23,189 --> 00:16:21,600

more immediacy

491

00:16:24,949 --> 00:16:23,199

and more seriousness from the government

492

00:16:25,829 --> 00:16:24,959

um i know the air the air force did its

493

00:16:27,509 --> 00:16:25,839

job

494

00:16:28,790 --> 00:16:27,519

you know i'm pretty convinced by the

495

00:16:30,389 --> 00:16:28,800

report that they did their best to find

496

00:16:31,910 --> 00:16:30,399

documents but there's some shady

497

00:16:33,829 --> 00:16:31,920

circumstances but they're the only ones

498

00:16:35,590 --> 00:16:33,839

who really took it seriously so

499

00:16:38,150 --> 00:16:35,600

i would like to see that kind of effort

500

00:16:40,230 --> 00:16:38,160

among multiple agencies

501

00:16:41,350 --> 00:16:40,240

well there's something a little

502

00:16:43,189 --> 00:16:41,360

confusing to me and

503

00:16:45,189 --> 00:16:43,199

and i don't know if it was ever cleared

504

00:16:46,069 --> 00:16:45,199

up with all the research and all the

505

00:16:48,629 --> 00:16:46,079

work you've done

506

00:16:50,629 --> 00:16:48,639

on this but i'm still confused about

507

00:16:51,829 --> 00:16:50,639

this i try to get clear answers from

508

00:16:55,590 --> 00:16:51,839

like don schmidt

509

00:16:59,189 --> 00:16:55,600

and kevin randle on this and that is

510

00:17:02,069 --> 00:16:59,199

the the bodies you know

511

00:17:03,590 --> 00:17:02,079

where were the bodies were not in the

512

00:17:06,549 --> 00:17:03,600

middle of the debris but

513

00:17:07,669 --> 00:17:06,559

people claim they saw bodies um and

514

00:17:09,750 --> 00:17:07,679

they're supposedly

515

00:17:10,949 --> 00:17:09,760

on another so many miles away there was

516

00:17:14,470 --> 00:17:10,959

another

517

00:17:17,189 --> 00:17:14,480

right

518

00:17:17,990 --> 00:17:17,199

which is really i've never really gotten

519

00:17:20,949 --> 00:17:18,000

a clear answer

520

00:17:22,630 --> 00:17:20,959

on any of that that's something we uh

521

00:17:24,710 --> 00:17:22,640

you know we started ground zero in

522

00:17:26,470 --> 00:17:24,720

the investigation uh starting on

523

00:17:28,870 --> 00:17:26,480

saturday so tune in uh but

524

00:17:31,029 --> 00:17:28,880

is look uh let's start at ground zero

525

00:17:31,350 --> 00:17:31,039

the the known debris field established

526

00:17:34,470 --> 00:17:31,360

by

527

00:17:36,950 --> 00:17:34,480

back brazil and jesse marcel

528

00:17:38,470 --> 00:17:36,960

and sheridan cavett and the original

529

00:17:40,630 --> 00:17:38,480

crew of witnesses who went out to that

530

00:17:42,710 --> 00:17:40,640

debris field and handled it

531

00:17:44,710 --> 00:17:42,720

and then branch out from there to see

532

00:17:47,190 --> 00:17:44,720

where this investigations take us now

533

00:17:48,150 --> 00:17:47,200

eventually we do consider and weigh

534

00:17:50,710 --> 00:17:48,160

other possible

535

00:17:52,150 --> 00:17:50,720

uh crash zones you know the debris field

536

00:17:52,789 --> 00:17:52,160

as it's known is called the skip site

537

00:17:55,350 --> 00:17:52,799

where

538

00:17:55,990 --> 00:17:55,360

uh some theorists uh suggest that you

539

00:17:57,350 --> 00:17:56,000

know

540

00:17:58,870 --> 00:17:57,360

something made impact with the earth

541

00:18:00,150 --> 00:17:58,880

scattered debris and continued its

542

00:18:03,510 --> 00:18:00,160

trajectory across

543

00:18:04,950 --> 00:18:03,520

you know some miles uh east so uh

544

00:18:06,470 --> 00:18:04,960

you know when we're looking for evidence

545

00:18:08,390 --> 00:18:06,480

you know we're opening our aperture

546

00:18:10,390 --> 00:18:08,400

pretty wide but we're starting at that

547

00:18:11,990 --> 00:18:10,400

debris field um and that is something

548

00:18:14,710 --> 00:18:12,000

you know those those

549

00:18:15,510 --> 00:18:14,720

uh the reports of bodies come in the

550

00:18:17,830 --> 00:18:15,520

years later

551

00:18:18,870 --> 00:18:17,840

um we don't have even jesse marcel

552

00:18:20,870 --> 00:18:18,880

although he

553

00:18:22,870 --> 00:18:20,880

um eventually kind of suspects and

554

00:18:25,110 --> 00:18:22,880

believes that there were bodies involved

555

00:18:26,230 --> 00:18:25,120

um he doesn't ever say he saw them which

556

00:18:29,909 --> 00:18:26,240

was an interesting

557

00:18:32,470 --> 00:18:29,919

sort of um foundation for me and

558

00:18:33,750 --> 00:18:32,480

and why myself and bungalow and his

559

00:18:35,510 --> 00:18:33,760

bungalow entertainment the production

560

00:18:38,549 --> 00:18:35,520

company in history decided to focus

561

00:18:40,230 --> 00:18:38,559

at first on jesse marcel senior

562

00:18:41,590 --> 00:18:40,240

and then you know there's the situation

563

00:18:44,390 --> 00:18:41,600

where they say they ordered

564

00:18:45,350 --> 00:18:44,400

child sized coffins at the funeral

565

00:18:48,150 --> 00:18:45,360

funeral home

566

00:18:48,549 --> 00:18:48,160

and yeah the nurse that saw the bodies

567

00:18:59,270 --> 00:18:48,559

and

568

00:19:01,350 --> 00:18:59,280

unscramble what really happened

569

00:19:03,270 --> 00:19:01,360

and then what do you think uh you know

570

00:19:03,909 --> 00:19:03,280

it's it's almost like the whole thing is

571

00:19:07,750 --> 00:19:03,919

begun

572

00:19:10,310 --> 00:19:07,760

going to become as time goes on

573

00:19:11,990 --> 00:19:10,320

um unless there you know we actually

574

00:19:13,750 --> 00:19:12,000

know that we are being visited

575

00:19:15,750 --> 00:19:13,760

if it stays the way it is and time goes

576

00:19:18,070 --> 00:19:15,760

on roswell has turned into

577

00:19:19,909 --> 00:19:18,080

you know a parade in the summer and you

578

00:19:20,230 --> 00:19:19,919

know people wearing tinfoil hats and you

579

00:19:23,430 --> 00:19:20,240

know

580

00:19:25,669 --> 00:19:23,440

it it gets crazy and um

581

00:19:27,430 --> 00:19:25,679

and i think it just kind of muddies the

582

00:19:29,029 --> 00:19:27,440

water for the

583

00:19:31,270 --> 00:19:29,039

for you know what could have happened

584

00:19:33,270 --> 00:19:31,280

there yeah that uh

585

00:19:35,590 --> 00:19:33,280

it is an interesting part and why it

586

00:19:37,510 --> 00:19:35,600

makes it like um

587

00:19:39,590 --> 00:19:37,520

not a touchy subject but one that that

588

00:19:41,029 --> 00:19:39,600

doesn't weigh with a lot of credibility

589

00:19:44,150 --> 00:19:41,039

in terms of like mainstream

590

00:19:46,470 --> 00:19:44,160

journalism and scientific uh outlets and

591

00:19:49,830 --> 00:19:46,480

and publications uh is because sort of

592

00:19:51,029 --> 00:19:49,840

the pageantry that's sort of uh evolved

593

00:19:54,630 --> 00:19:51,039

out of this this

594

00:19:56,870 --> 00:19:54,640

this mythology regardless of if an alien

595

00:19:59,029 --> 00:19:56,880

ufo crash really happened there there's

596

00:20:00,549 --> 00:19:59,039

a mythology now that detracts from sort

597

00:20:03,270 --> 00:20:00,559

of something that can and some people's

598

00:20:04,950 --> 00:20:03,280

eyes are distract from the real um

599

00:20:06,950 --> 00:20:04,960

from the real investigation but at the

600

00:20:08,310 --> 00:20:06,960

same time that's a fun part and it's

601
00:20:10,149 --> 00:20:08,320
creating its own culture and

602
00:20:11,590 --> 00:20:10,159
it will it may have its own dividends

603
00:20:12,630 --> 00:20:11,600
later on and we talked about jesse

604
00:20:15,029 --> 00:20:12,640
marcel senior

605
00:20:16,470 --> 00:20:15,039
or i'm sorry the third and his new

606
00:20:20,310 --> 00:20:16,480
propulsion gyro

607
00:20:23,029 --> 00:20:20,320
gyro motion propulsion system you know

608
00:20:24,870 --> 00:20:23,039
inspired by the events and the creative

609
00:20:27,350 --> 00:20:24,880
culture that sprung out of

610
00:20:28,470 --> 00:20:27,360
1947 regardless of what crash there so i

611
00:20:30,950 --> 00:20:28,480
think there's

612
00:20:33,110 --> 00:20:30,960
there's value in in weighing waiting

613
00:20:35,110 --> 00:20:33,120

into this territory and really embracing

614

00:20:37,909 --> 00:20:35,120

kind of the weird but also

615

00:20:39,830 --> 00:20:37,919

the the rigorous uh analysis and finding

616

00:20:40,870 --> 00:20:39,840

a way to marry those together and that's

617

00:20:44,070 --> 00:20:40,880

what we tried to do

618

00:20:45,750 --> 00:20:44,080

in the show just one last question how

619

00:20:48,549 --> 00:20:45,760

did you how were you able to film that

620

00:20:50,870 --> 00:20:48,559

with the the covet situation

621

00:20:52,390 --> 00:20:50,880

so it did impact uh the later stages of

622

00:20:53,430 --> 00:20:52,400

our investigation fortunately we had

623

00:20:56,390 --> 00:20:53,440

done most of

624

00:20:56,870 --> 00:20:56,400

um our heavy lifting before uh uh

625

00:20:59,830 --> 00:20:56,880

through

626
00:21:00,230 --> 00:20:59,840
february mid-march and then we had to

627
00:21:02,710 --> 00:21:00,240
put

628
00:21:04,149 --> 00:21:02,720
some plans on hold so we didn't get to

629
00:21:05,669 --> 00:21:04,159
chase all of the leads

630
00:21:06,950 --> 00:21:05,679
so that's why i'm hoping this show is a

631
00:21:08,549 --> 00:21:06,960
big success and you're in your viewers

632
00:21:10,230 --> 00:21:08,559
tune in because uh

633
00:21:12,070 --> 00:21:10,240
with more viewership we get more

634
00:21:13,270 --> 00:21:12,080
resources and we can continue to

635
00:21:15,909 --> 00:21:13,280
continue the search for

636
00:21:16,950 --> 00:21:15,919
um a conclusive you know evidence the

637
00:21:19,830 --> 00:21:16,960
smoking gun

638
00:21:20,710 --> 00:21:19,840

i think we're we've tipped the scales uh

639

00:21:22,870 --> 00:21:20,720

and

640

00:21:23,830 --> 00:21:22,880

we are pushing forward with compelling

641

00:21:26,070 --> 00:21:23,840

arguments and

642

00:21:27,029 --> 00:21:26,080

and evidence but um it's not over and

643

00:21:28,470 --> 00:21:27,039

covid kind of

644

00:21:30,789 --> 00:21:28,480

took a hit in some of the witnesses i

645

00:21:31,750 --> 00:21:30,799

want in meeting it took a hit and i

646

00:21:32,390 --> 00:21:31,760

wasn't able to meet some of the

647

00:21:35,430 --> 00:21:32,400

witnesses

648

00:21:36,149 --> 00:21:35,440

i wanted to meet um and you know doing

649

00:21:38,630 --> 00:21:36,159

things

650

00:21:40,149 --> 00:21:38,640

virtually as an intelligence office

651
00:21:41,750 --> 00:21:40,159
former intelligence officer

652
00:21:43,029 --> 00:21:41,760
is not always optimal in terms when you

653
00:21:43,669 --> 00:21:43,039
want to really just sit across from

654
00:21:46,549 --> 00:21:43,679
somebody

655
00:21:47,270 --> 00:21:46,559
and and hear their story and and feel

656
00:21:51,350 --> 00:21:47,280
and

657
00:21:53,750 --> 00:21:51,360
how you

658
00:21:55,830 --> 00:21:53,760
evaluate this kind of intelligence yeah

659
00:21:59,190 --> 00:21:55,840
zoom it's not going to work on zoom

660
00:22:01,270 --> 00:21:59,200
yes it's harder yeah uh thanks so much

661
00:22:02,149 --> 00:22:01,280
and one more plug it's coming up this uh

662
00:22:04,230 --> 00:22:02,159
saturday and

663
00:22:05,510 --> 00:22:04,240

just the name and title of the show in

664

00:22:07,990 --> 00:22:05,520

the history channel

665

00:22:09,669 --> 00:22:08,000

call one more yeah yeah so the show is

666

00:22:11,750 --> 00:22:09,679

called roswell the first witness

667

00:22:12,789 --> 00:22:11,760

it airs on history channel at 9 00 p.m

668

00:22:15,110 --> 00:22:12,799

on saturday

669

00:22:15,909 --> 00:22:15,120

that's uh this coming december 12th it's

670

00:22:18,630 --> 00:22:15,919

it's three

671

00:22:19,350 --> 00:22:18,640

uh three two hours special so six hours

672

00:22:21,350 --> 00:22:19,360

total

673

00:22:23,270 --> 00:22:21,360

and uh you're gonna see new evidence and

674

00:22:25,430 --> 00:22:23,280

new um technology

675

00:22:26,950 --> 00:22:25,440

applied to this problem this question

676

00:22:27,990 --> 00:22:26,960

for that you've never seen before so

677

00:22:30,710 --> 00:22:28,000

it's pretty exciting

678

00:22:31,029 --> 00:22:30,720

and we got drones and everything drones

679

00:22:33,029 --> 00:22:31,039

yeah

680

00:22:34,470 --> 00:22:33,039

you know you name it cryptography you

681

00:22:37,190 --> 00:22:34,480

know any kind of cool stuff

682

00:22:39,110 --> 00:22:37,200

we're bringing it yeah excellent thanks

683

00:22:41,750 --> 00:22:39,120

so much i really appreciate it and

684

00:22:43,270 --> 00:22:41,760

thank you i hope it does real well i

685

00:22:46,470 --> 00:22:43,280

appreciate it appreciate all right

686

00:22:50,230 --> 00:22:46,480

take care all right our next guest

687

00:22:54,310 --> 00:22:50,240

is uh whoops is uh bro uh i'm sorry

688

00:22:57,430 --> 00:22:54,320

uh major retired uh david tune and

689

00:22:58,470 --> 00:22:57,440

uh he is a last minute guy he was so

690

00:23:01,430 --> 00:22:58,480

nice to be

691

00:23:02,549 --> 00:23:01,440

uh coming on the show and uh i'm so glad

692

00:23:05,270 --> 00:23:02,559

to have him on

693

00:23:06,630 --> 00:23:05,280

welcome to the show whoops thank you i

694

00:23:09,830 --> 00:23:06,640

got a right side of you here

695

00:23:11,029 --> 00:23:09,840

yeah all right how are you doing great

696

00:23:12,950 --> 00:23:11,039

how about yourself martin

697

00:23:15,110 --> 00:23:12,960

i'm doing great thanks so much for

698

00:23:17,669 --> 00:23:15,120

filling in at the last minute it really

699

00:23:19,350 --> 00:23:17,679

oh boy that was a close one that's the

700

00:23:20,230 --> 00:23:19,360

one thing about doing a live show you

701
00:23:23,029 --> 00:23:20,240
never

702
00:23:24,870 --> 00:23:23,039
if someone falls uh um you know she has

703
00:23:26,470 --> 00:23:24,880
migraine headache and she can't she

704
00:23:28,789 --> 00:23:26,480
couldn't be on the show and

705
00:23:30,070 --> 00:23:28,799
and i wouldn't want her to be uh feeling

706
00:23:32,070 --> 00:23:30,080
that way so

707
00:23:33,750 --> 00:23:32,080
anyway i was so glad uh you were willing

708
00:23:36,710 --> 00:23:33,760
to just jump on

709
00:23:37,270 --> 00:23:36,720
and put everything else aside and thanks

710
00:23:39,590 --> 00:23:37,280
again

711
00:23:40,870 --> 00:23:39,600
so let's uh let's hear your your you've

712
00:23:42,549 --> 00:23:40,880
got quite a background

713
00:23:44,070 --> 00:23:42,559

and you've only been really looking into

714

00:23:44,789 --> 00:23:44,080

this topic for about three years but

715

00:23:46,549 --> 00:23:44,799

let's uh

716

00:23:48,390 --> 00:23:46,559

let's hear let's hear about your

717

00:23:51,029 --> 00:23:48,400

background well i'm

718

00:23:52,149 --> 00:23:51,039

originally from phoenix arizona so i

719

00:23:55,190 --> 00:23:52,159

grew up in the desert

720

00:23:57,190 --> 00:23:55,200

and uh started my military career i had

721

00:23:59,350 --> 00:23:57,200

about 18.

722

00:24:01,669 --> 00:23:59,360

i apologized i got married at 18 started

723

00:24:03,990 --> 00:24:01,679

my military career about 22

724

00:24:05,029 --> 00:24:04,000

and had a family going into the military

725

00:24:08,630 --> 00:24:05,039

and

726

00:24:10,470 --> 00:24:08,640

um as a kid i thought ufos are cool

727

00:24:11,669 --> 00:24:10,480

uh i think i bought one of the first

728

00:24:14,789 --> 00:24:11,679

issues of uh

729

00:24:17,029 --> 00:24:14,799

chariots of the gods and uh yeah

730

00:24:19,269 --> 00:24:17,039

and spent my spent my summers up in

731

00:24:20,710 --> 00:24:19,279

sedona i was fortunate enough to have a

732

00:24:23,190 --> 00:24:20,720

family and aunt and uncle who owned some

733

00:24:26,630 --> 00:24:23,200

land up there that

734

00:24:29,190 --> 00:24:26,640

afforded me the time to play around the

735

00:24:30,789 --> 00:24:29,200

creek area and run up and down the hills

736

00:24:33,510 --> 00:24:30,799

for many summers through my high school

737

00:24:35,909 --> 00:24:33,520

years and only to find out later it's

738

00:24:37,830 --> 00:24:35,919

you know the central vortex city it's

739

00:24:40,950 --> 00:24:37,840

it's it's where everything happens

740

00:24:42,950 --> 00:24:40,960

uh on a paranormal and spiritual level

741

00:24:44,789 --> 00:24:42,960

uh i just thought it was beautiful the

742

00:24:46,230 --> 00:24:44,799

mountains and such but uh

743

00:24:47,830 --> 00:24:46,240

kind of grew up that way got in the

744

00:24:51,669 --> 00:24:47,840

military um

745

00:24:54,470 --> 00:24:51,679

early on and jumped into the army

746

00:24:55,590 --> 00:24:54,480

i was in military intelligence and the

747

00:24:58,390 --> 00:24:55,600

uh

748

00:24:59,029 --> 00:24:58,400

the job i was doing at the time was 33

749

00:25:01,590 --> 00:24:59,039

sierra

750

00:25:03,430 --> 00:25:01,600

for the mos which is an intercept

751
00:25:07,510 --> 00:25:03,440
systems tactical repair

752
00:25:10,149 --> 00:25:07,520
and it dealt with just fixing stuff

753
00:25:11,190 --> 00:25:10,159
all the army gear that they had and so i

754
00:25:13,430 --> 00:25:11,200
was

755
00:25:15,430 --> 00:25:13,440
fortunate enough to go through some

756
00:25:16,710 --> 00:25:15,440
training at fort devon's massachusetts

757
00:25:17,590 --> 00:25:16,720
when it was the intelligence school for

758
00:25:20,789 --> 00:25:17,600
the army at the time

759
00:25:24,390 --> 00:25:20,799
back in 1984

760
00:25:27,029 --> 00:25:24,400
and i was there from 84 to 85 and uh

761
00:25:28,710 --> 00:25:27,039
came out of that did five years pretty

762
00:25:30,789 --> 00:25:28,720
much four and a half years at

763
00:25:33,909 --> 00:25:30,799

fort ord california working for the

764

00:25:37,430 --> 00:25:33,919

107th military intelligence unit there

765

00:25:40,549 --> 00:25:37,440

and decided to try to get out

766

00:25:41,990 --> 00:25:40,559

and you know raise a family in san jose

767

00:25:43,190 --> 00:25:42,000

because i was offered a job at harris

768

00:25:45,269 --> 00:25:43,200

corp

769

00:25:46,470 --> 00:25:45,279

and uh once they pulled me in the back

770

00:25:48,789 --> 00:25:46,480

and said hey we're gonna offer you this

771

00:25:52,230 --> 00:25:48,799

job but you got to know what the pay is

772

00:25:55,830 --> 00:25:52,240

and described the cost of living

773

00:25:57,350 --> 00:25:55,840

for san jose yeah

774

00:25:59,510 --> 00:25:57,360

just turns out it didn't work out the

775

00:26:01,909 --> 00:25:59,520

numbers didn't work out yeah

776

00:26:03,029 --> 00:26:01,919

i said thank you very much uh but i'm

777

00:26:05,190 --> 00:26:03,039

gonna have to

778

00:26:06,789 --> 00:26:05,200

stay in at this point and this is kind

779

00:26:08,390 --> 00:26:06,799

of the jimmy carter years where things

780

00:26:11,990 --> 00:26:08,400

are pretty bad

781

00:26:12,390 --> 00:26:12,000

and so i decided to raise my hand and

782

00:26:15,590 --> 00:26:12,400

put in

783

00:26:18,470 --> 00:26:15,600

six more on top of the four i just did

784

00:26:19,430 --> 00:26:18,480

and it um turns out that started my

785

00:26:22,789 --> 00:26:19,440

22-year

786

00:26:25,750 --> 00:26:22,799

army career but um

787

00:26:26,390 --> 00:26:25,760

after about a year of raising my hand

788

00:26:29,110 --> 00:26:26,400

and

789

00:26:29,750 --> 00:26:29,120

coming back in re-enlisting i decided i

790

00:26:32,789 --> 00:26:29,760

want to go

791

00:26:34,950 --> 00:26:32,799

fly helicopters so i told my

792

00:26:36,630 --> 00:26:34,960

my first sergeant commander hey i want

793

00:26:37,269 --> 00:26:36,640

to go to flight school and they laugh

794

00:26:39,990 --> 00:26:37,279

they go

795

00:26:41,510 --> 00:26:40,000

sure go ahead fill out the paperwork and

796

00:26:44,789 --> 00:26:41,520

uh good luck

797

00:26:47,669 --> 00:26:44,799

and so uh i did and uh got in

798

00:26:49,269 --> 00:26:47,679

make a long story short and uh left

799

00:26:51,669 --> 00:26:49,279

military intelligence went into

800

00:26:53,269 --> 00:26:51,679

uh aviation school at fort rucker

801
00:26:56,310 --> 00:26:53,279
alabama

802
00:26:58,710 --> 00:26:56,320
and this was uh back in 1990 91 and time

803
00:27:03,590 --> 00:26:58,720
frame because it was about a year long

804
00:27:06,710 --> 00:27:03,600
and spent the next 17 years

805
00:27:10,390 --> 00:27:06,720
both active duty national guard flying

806
00:27:12,789 --> 00:27:10,400
hueys scouts apaches made the rank of

807
00:27:14,710 --> 00:27:12,799
major on the lieutenant's kernel list

808
00:27:18,389 --> 00:27:14,720
before i retired

809
00:27:21,190 --> 00:27:18,399
and that pretty much brings us up to

810
00:27:24,549 --> 00:27:21,200
2006 when i retired

811
00:27:25,590 --> 00:27:24,559
and still i didn't have a whole n1

812
00:27:27,269 --> 00:27:25,600
combat tour

813
00:27:30,470 --> 00:27:27,279

in iraq but still didn't have a whole

814

00:27:33,590 --> 00:27:30,480

lot of connection to ufos

815

00:27:36,389 --> 00:27:33,600

just a just a mild background

816

00:27:38,549 --> 00:27:36,399

fascination with them but being a pilot

817

00:27:41,269 --> 00:27:38,559

you know you kind of appreciate

818

00:27:42,389 --> 00:27:41,279

trying to avoid things in the sky so let

819

00:27:44,630 --> 00:27:42,399

me ask you this

820

00:27:45,590 --> 00:27:44,640

um did you have to did you have to fly a

821

00:27:47,909 --> 00:27:45,600

small plane

822

00:27:49,909 --> 00:27:47,919

before you before you actually went into

823

00:27:53,190 --> 00:27:49,919

the helicopter or was it directly

824

00:27:55,269 --> 00:27:53,200

direct wow yeah i i did on my own i did

825

00:27:56,310 --> 00:27:55,279

about 20 hours in an assassin i'm 150

826

00:27:58,950 --> 00:27:56,320

152

827

00:28:00,710 --> 00:27:58,960

in fort ord california this is when i

828

00:28:02,310 --> 00:28:00,720

was a specialist i just couldn't afford

829

00:28:05,430 --> 00:28:02,320

it i'll be honest it

830

00:28:06,870 --> 00:28:05,440

flying costs money yeah it does yeah i i

831

00:28:08,950 --> 00:28:06,880

took private lessons yeah

832

00:28:13,430 --> 00:28:08,960

yeah yeah my wife said hey you know that

833

00:28:17,029 --> 00:28:14,789

i failed to remember that she goes it

834

00:28:19,110 --> 00:28:17,039

would be nice if it happened again

835

00:28:20,149 --> 00:28:19,120

yeah i quit my flying lessons to say the

836

00:28:23,590 --> 00:28:20,159

least yeah

837

00:28:26,149 --> 00:28:23,600

um but that's that's only time i put in

838

00:28:28,149 --> 00:28:26,159

uh for a fixed wing and uh it was years

839

00:28:29,590 --> 00:28:28,159

later before i got into the military and

840

00:28:30,950 --> 00:28:29,600

they

841

00:28:33,430 --> 00:28:30,960

put you right into helicopter training

842

00:28:36,389 --> 00:28:33,440

and off i went

843

00:28:36,950 --> 00:28:36,399

wow i've always always had like a dream

844

00:28:38,950 --> 00:28:36,960

of

845

00:28:39,990 --> 00:28:38,960

flying a helicopter or nothing i know

846

00:28:42,789 --> 00:28:40,000

i'll never do it

847

00:28:43,510 --> 00:28:42,799

but it it just it it was uh when i was

848

00:28:45,510 --> 00:28:43,520

younger i

849

00:28:47,110 --> 00:28:45,520

just thought oh my god i'd love to love

850

00:28:48,230 --> 00:28:47,120

to fly one of those

851
00:28:50,389 --> 00:28:48,240
and you know there's a couple of

852
00:28:52,950 --> 00:28:50,399
misconceptions tell me if i'm wrong

853
00:28:54,710 --> 00:28:52,960
you know the the misconception is if

854
00:28:55,990 --> 00:28:54,720
something happens in the air like the

855
00:28:58,149 --> 00:28:56,000
engine stalls or whatever

856
00:28:59,029 --> 00:28:58,159
that you drop like a rock but you don't

857
00:29:02,470 --> 00:28:59,039
it's like that

858
00:29:03,750 --> 00:29:02,480
the blade will move and it's slow it

859
00:29:05,510 --> 00:29:03,760
slows down the

860
00:29:07,590 --> 00:29:05,520
you know i mean it's called auto

861
00:29:10,789 --> 00:29:07,600
rotation exactly yeah

862
00:29:12,310 --> 00:29:10,799
and uh that's what saves you yeah and

863
00:29:14,310 --> 00:29:12,320

you know another thing um

864

00:29:15,830 --> 00:29:14,320

that a lot of people don't realize and

865

00:29:17,110 --> 00:29:15,840

when they first started developing

866

00:29:19,029 --> 00:29:17,120

helicopters

867

00:29:20,470 --> 00:29:19,039

they had one blade would go right after

868

00:29:22,710 --> 00:29:20,480

the other and then i forget what it's

869

00:29:25,750 --> 00:29:22,720

called but there was like an air pocket

870

00:29:26,389 --> 00:29:25,760

and um you know how they rotate they'll

871

00:29:30,149 --> 00:29:26,399

rotate

872

00:29:32,870 --> 00:29:30,159

wouldn't work

873

00:29:33,590 --> 00:29:32,880

it was just one simple design that made

874

00:29:50,310 --> 00:29:33,600

a

875

00:29:51,909 --> 00:29:50,320

do you just

876

00:29:54,389 --> 00:29:51,919

you just have so much training first

877

00:29:55,830 --> 00:29:54,399

that you you feel confident

878

00:29:58,710 --> 00:29:55,840

the army does a really good job of

879

00:30:01,909 --> 00:29:58,720

training uh that's that's what they do

880

00:30:03,029 --> 00:30:01,919

so stimulators yeah they have a lot of

881

00:30:05,750 --> 00:30:03,039

that time too

882

00:30:06,710 --> 00:30:05,760

yeah but uh it was they it's kind of

883

00:30:09,510 --> 00:30:06,720

like

884

00:30:10,070 --> 00:30:09,520

you're your parents just throwing you in

885

00:30:11,029 --> 00:30:10,080

the water

886

00:30:12,310 --> 00:30:11,039

in a pool and you think you're gonna

887

00:30:13,190 --> 00:30:12,320

drown but you're really you know

888

00:30:14,310 --> 00:30:13,200

paddling to

889

00:30:16,389 --> 00:30:14,320

keep your head above water and that's

890

00:30:19,029 --> 00:30:16,399

called swimming um

891

00:30:21,029 --> 00:30:19,039

the army kind of does that uh except

892

00:30:23,909 --> 00:30:21,039

they're very meticulous on

893

00:30:24,710 --> 00:30:23,919

when they set that scenario up for you

894

00:30:26,870 --> 00:30:24,720

so

895

00:30:28,230 --> 00:30:26,880

you're kind of ready for it i know that

896

00:30:29,990 --> 00:30:28,240

the first

897

00:30:31,430 --> 00:30:30,000

first time they pulled the power on me

898

00:30:33,190 --> 00:30:31,440

and said oh you know we're gonna

899

00:30:35,510 --> 00:30:33,200

we're gonna try an auto rotation

900

00:30:38,149 --> 00:30:35,520

conceptually i think i had it

901
00:30:40,149 --> 00:30:38,159
figured out but when the aircraft

902
00:30:43,190 --> 00:30:40,159
started to fall like a rock

903
00:30:45,350 --> 00:30:43,200
i realized this elevator is not going to

904
00:30:48,149 --> 00:30:45,360
make it

905
00:30:49,110 --> 00:30:48,159
and they just gently walk you through

906
00:30:51,110 --> 00:30:49,120
the process

907
00:30:52,950 --> 00:30:51,120
and pretty soon you realize man this is

908
00:30:55,510 --> 00:30:52,960
the safest safest maneuver

909
00:30:56,149 --> 00:30:55,520
ever because i don't need a runway i

910
00:30:59,590 --> 00:30:56,159
just need

911
00:31:01,509 --> 00:30:59,600
you know a little bit of land and um

912
00:31:02,950 --> 00:31:01,519
and some skill and they provide the

913
00:31:05,350 --> 00:31:02,960

skill set for you

914

00:31:06,470 --> 00:31:05,360

right right have you ever heard about

915

00:31:10,710 --> 00:31:06,480

the um

916

00:31:13,990 --> 00:31:10,720

the coin uh ufo sighting

917

00:31:17,269 --> 00:31:14,000

uh with the helicopter

918

00:31:19,190 --> 00:31:17,279

that now that that was something else um

919

00:31:20,310 --> 00:31:19,200

i was trying to see when exactly that

920

00:31:22,630 --> 00:31:20,320

happened

921

00:31:24,230 --> 00:31:22,640

and uh yeah have you looked into that

922

00:31:27,110 --> 00:31:24,240

that particular case

923

00:31:29,590 --> 00:31:27,120

not much uh funny you should ask that it

924

00:31:32,789 --> 00:31:29,600

wasn't until i got

925

00:31:35,430 --> 00:31:32,799

um out of the military and i s

926

00:31:37,669 --> 00:31:35,440

this is still part of my my story but at

927

00:31:38,789 --> 00:31:37,679

in 2006 i got in the military but then i

928

00:31:40,710 --> 00:31:38,799

turned right around and went back to

929

00:31:41,750 --> 00:31:40,720

iraq and afghanistan as a contractor for

930

00:31:44,549 --> 00:31:41,760

seven more years

931

00:31:46,470 --> 00:31:44,559

oh wow and uh so i did a little bit of

932

00:31:47,350 --> 00:31:46,480

logistics a little bit of aerostat

933

00:31:51,029 --> 00:31:47,360

flying

934

00:31:52,950 --> 00:31:51,039

um and my wife said you know

935

00:31:54,230 --> 00:31:52,960

it's probably time to come home be nice

936

00:31:57,509 --> 00:31:54,240

to see you i'm like

937

00:31:59,110 --> 00:31:57,519

okay maybe it is time and uh so she

938

00:32:01,269 --> 00:31:59,120

talked me into coming back home

939

00:32:02,149 --> 00:32:01,279

and i said one let me try one more

940

00:32:04,950 --> 00:32:02,159

contract

941

00:32:06,230 --> 00:32:04,960

i wanted to fly uh drones and i said

942

00:32:08,149 --> 00:32:06,240

well i've got plenty of

943

00:32:09,750 --> 00:32:08,159

you know flight time and i've got a

944

00:32:11,830 --> 00:32:09,760

combat tour i

945

00:32:13,430 --> 00:32:11,840

should be able to fly a drone right it's

946

00:32:15,750 --> 00:32:13,440

their aircraft

947

00:32:18,149 --> 00:32:15,760

so i went to a navmar to set up an

948

00:32:21,590 --> 00:32:18,159

interview to fly drones in 2000

949

00:32:25,430 --> 00:32:21,600

into 2000 so what was that

950

00:32:28,070 --> 00:32:25,440

no 2012 and 2013

951
00:32:31,029 --> 00:32:28,080
and i didn't do well it turns out they

952
00:32:34,549 --> 00:32:31,039
want you to fly off a little rc

953
00:32:36,149 --> 00:32:34,559
uh controller with your thumbs and uh

954
00:32:37,990 --> 00:32:36,159
i said you know what that makes a ton of

955
00:32:39,669 --> 00:32:38,000
sense i thought i was you know

956
00:32:41,990 --> 00:32:39,679
doing an interview for mission commander

957
00:32:45,350 --> 00:32:42,000
but they wanted a pilot

958
00:32:47,590 --> 00:32:45,360
so they put a drone over me and um

959
00:32:49,110 --> 00:32:47,600
at about 5000 feet and gave me this rc

960
00:32:51,350 --> 00:32:49,120
box and said hey can you fly this in

961
00:32:53,269 --> 00:32:51,360
circles and can you make it land

962
00:32:55,669 --> 00:32:53,279
and uh they said oh by the way the the

963
00:32:58,310 --> 00:32:55,679

drone cost a quarter million

964

00:33:00,310 --> 00:32:58,320

be careful with it and i've been human

965

00:33:02,870 --> 00:33:00,320

in august it's yuma there's

966

00:33:04,310 --> 00:33:02,880

there's such convective activity there's

967

00:33:05,990 --> 00:33:04,320

dust devils everywhere

968

00:33:07,269 --> 00:33:06,000

and even the uh computer couldn't hold

969

00:33:08,470 --> 00:33:07,279

this drone straight while we were

970

00:33:09,990 --> 00:33:08,480

sitting there chatting

971

00:33:11,909 --> 00:33:10,000

you see all the chip lights going off

972

00:33:13,509 --> 00:33:11,919

and all the warning for altitude

973

00:33:15,669 --> 00:33:13,519

they expect me to do a perfect circle

974

00:33:18,310 --> 00:33:15,679

left and right so he has me the box

975

00:33:19,750 --> 00:33:18,320

i'm all over the sky i didn't crash it

976

00:33:20,630 --> 00:33:19,760

but uh i was pretty sure they weren't

977

00:33:23,269 --> 00:33:20,640

gonna call me

978

00:33:24,310 --> 00:33:23,279

so on the way back home from from humid

979

00:33:26,230 --> 00:33:24,320

to phoenix

980

00:33:27,669 --> 00:33:26,240

i told my wife i said um they're not

981

00:33:30,389 --> 00:33:27,679

calling me i know why

982

00:33:32,470 --> 00:33:30,399

i didn't do well on the flight and uh

983

00:33:34,310 --> 00:33:32,480

she said well why don't you join them

984

00:33:35,669 --> 00:33:34,320

and i started giggling and i go how do

985

00:33:36,549 --> 00:33:35,679

you know what that means she goes well

986

00:33:39,269 --> 00:33:36,559

learn it

987

00:33:39,669 --> 00:33:39,279

i said okay she goes go to school again

988

00:33:41,750 --> 00:33:39,679

i mean

989

00:33:43,430 --> 00:33:41,760

you got a degree but get another one but

990

00:33:44,630 --> 00:33:43,440

do it in drones this time

991

00:33:46,870 --> 00:33:44,640

because you like that stuff you like

992

00:33:48,789 --> 00:33:46,880

flying i said yeah it's not a bad idea

993

00:33:51,350 --> 00:33:48,799

so i chose every riddle aeronautical

994

00:33:54,630 --> 00:33:51,360

university out of daytona beach

995

00:33:56,870 --> 00:33:54,640

and um 2013 started school there

996

00:33:57,909 --> 00:33:56,880

and got my second bachelor's of science

997

00:34:05,269 --> 00:33:57,919

in

998

00:34:07,750 --> 00:34:05,279

unmanned aircraft systems and uh

999

00:34:08,470 --> 00:34:07,760

the economy wasn't doing real well still

1000

00:34:11,669 --> 00:34:08,480

and uh

1001
00:34:14,790 --> 00:34:11,679
i started decided to stay for masters uh

1002
00:34:17,190 --> 00:34:14,800
did a human factors masters

1003
00:34:18,230 --> 00:34:17,200
economy still wasn't quite right i did a

1004
00:34:21,109 --> 00:34:18,240
masters in

1005
00:34:22,149 --> 00:34:21,119
aeronautics with space studies um and

1006
00:34:24,310 --> 00:34:22,159
then i found a job

1007
00:34:25,669 --> 00:34:24,320
in uh 2000. wow you could have just kept

1008
00:34:28,230 --> 00:34:25,679
going to school

1009
00:34:29,589 --> 00:34:28,240
yeah really i only had so much time

1010
00:34:30,950 --> 00:34:29,599
uncle sam only pays for like four and a

1011
00:34:32,230 --> 00:34:30,960
half years so i had to pack all that

1012
00:34:35,510 --> 00:34:32,240
into four and a half years

1013
00:34:37,829 --> 00:34:35,520

oh wow but um the longest

1014

00:34:40,069 --> 00:34:37,839

in the short of it is in 2015 after

1015

00:34:43,109 --> 00:34:40,079

about a year and a half of being in

1016

00:34:45,669 --> 00:34:43,119

school for unmanned aircraft systems

1017

00:34:47,030 --> 00:34:45,679

um i checked the weather and was going

1018

00:34:47,589 --> 00:34:47,040

to go to schools in january and i

1019

00:34:49,669 --> 00:34:47,599

thought well

1020

00:34:50,790 --> 00:34:49,679

i'm in florida weather changes all the

1021

00:34:51,909 --> 00:34:50,800

time i didn't know if i was going to

1022

00:34:53,430 --> 00:34:51,919

need an umbrella

1023

00:34:55,589 --> 00:34:53,440

so i did that little weather loop you

1024

00:34:57,270 --> 00:34:55,599

see sometimes on the weather charts

1025

00:34:59,589 --> 00:34:57,280

give you a four hour loop of where the

1026

00:35:01,349 --> 00:34:59,599

clouds are going and oh yeah

1027

00:35:03,430 --> 00:35:01,359

and i was just looking at that but it

1028

00:35:06,550 --> 00:35:03,440

was a clear day and on the

1029

00:35:07,990 --> 00:35:06,560

on the radar screen there

1030

00:35:10,630 --> 00:35:08,000

it was completely clear in the four-hour

1031

00:35:13,589 --> 00:35:10,640

loop except midway through

1032

00:35:15,109 --> 00:35:13,599

you could see five macro bursts hit

1033

00:35:17,510 --> 00:35:15,119

florida out of the blue

1034

00:35:20,150 --> 00:35:17,520

there's no clouds near anywhere and a

1035

00:35:22,630 --> 00:35:20,160

micro burst usually comes out of a cloud

1036

00:35:24,310 --> 00:35:22,640

that's past maturation that's falling

1037

00:35:26,310 --> 00:35:24,320

through it's collapsing

1038

00:35:28,230 --> 00:35:26,320

and a microburst is like a real high

1039

00:35:30,470 --> 00:35:28,240

wind straight down

1040

00:35:31,589 --> 00:35:30,480

yeah and it can just knock trees right

1041

00:35:34,950 --> 00:35:31,599

flat

1042

00:35:37,829 --> 00:35:34,960

including aircraft people yeah

1043

00:35:39,430 --> 00:35:37,839

so they have uh microburst detection

1044

00:35:40,710 --> 00:35:39,440

systems around airports just for that

1045

00:35:41,430 --> 00:35:40,720

reason because the planes are coming in

1046

00:35:43,030 --> 00:35:41,440

low

1047

00:35:45,030 --> 00:35:43,040

yeah and you don't want to be pushed to

1048

00:35:48,150 --> 00:35:45,040

the ground faster than you expected

1049

00:35:51,270 --> 00:35:48,160

so they they do that tracking but uh

1050

00:35:52,870 --> 00:35:51,280

on this day i even have it on my youtube

1051
00:35:55,750 --> 00:35:52,880
channel on this day i have a little

1052
00:35:57,190 --> 00:35:55,760
loop showing these five macro rings

1053
00:35:58,630 --> 00:35:57,200
they're not micro micro is pretty small

1054
00:36:00,950 --> 00:35:58,640
a couple miles out when the

1055
00:36:02,550 --> 00:36:00,960
when the air hits it blows out and you

1056
00:36:04,310 --> 00:36:02,560
know it does its thing for about 10-15

1057
00:36:07,670 --> 00:36:04,320
minutes ruins lots of stuff

1058
00:36:11,750 --> 00:36:07,680
but these are 50 to 100 mile diameter

1059
00:36:12,630 --> 00:36:11,760
cloud sets and and all at the same time

1060
00:36:15,030 --> 00:36:12,640
it wasn't just

1061
00:36:16,790 --> 00:36:15,040
a single burst clear or burst it was

1062
00:36:20,150 --> 00:36:16,800
five different places

1063
00:36:21,750 --> 00:36:20,160

so i i went to school and i'm looking

1064

00:36:23,349 --> 00:36:21,760

around and showed my buddies what i

1065

00:36:24,310 --> 00:36:23,359

would have recorded and i said have you

1066

00:36:25,990 --> 00:36:24,320

ever seen this because it

1067

00:36:28,230 --> 00:36:26,000

at every riddle you're surrounded by

1068

00:36:30,710 --> 00:36:28,240

pilots or pilot wannabes

1069

00:36:31,270 --> 00:36:30,720

and um they said man that's that's

1070

00:36:33,349 --> 00:36:31,280

really

1071

00:36:35,430 --> 00:36:33,359

weird and i said yeah it doesn't make

1072

00:36:38,550 --> 00:36:35,440

sense because it's nothing local

1073

00:36:41,829 --> 00:36:38,560

so it has to be spatial like

1074

00:36:42,550 --> 00:36:41,839

solar wind so i went to spaceweather.com

1075

00:36:44,790 --> 00:36:42,560

and started

1076
00:36:46,950 --> 00:36:44,800
looking at the loops of the satellite

1077
00:36:49,510 --> 00:36:46,960
solar satellite systems that are

1078
00:36:50,630 --> 00:36:49,520
um checking for cmes that are or bursts

1079
00:36:54,230 --> 00:36:50,640
that are coming our way

1080
00:36:57,589 --> 00:36:54,240
and that's how they track them and um

1081
00:37:00,630 --> 00:36:57,599
it was a calm calm day on the sun

1082
00:37:04,470 --> 00:37:00,640
for that time period however

1083
00:37:06,069 --> 00:37:04,480
during that 98 image loop for the day

1084
00:37:07,670 --> 00:37:06,079
i think it's every 15 minutes it took an

1085
00:37:10,230 --> 00:37:07,680
image you would see

1086
00:37:11,750 --> 00:37:10,240
not only just the stars and some cosmic

1087
00:37:15,589 --> 00:37:11,760
rays but

1088
00:37:18,550 --> 00:37:15,599

just odd things uh artifacts that

1089

00:37:19,990 --> 00:37:18,560

i wasn't real familiar with so i caught

1090

00:37:21,270 --> 00:37:20,000

a couple of them and took them to the

1091

00:37:24,390 --> 00:37:21,280

astrophysics guys

1092

00:37:27,270 --> 00:37:24,400

up on the third floor

1093

00:37:28,630 --> 00:37:27,280

besides building i was going through and

1094

00:37:30,310 --> 00:37:28,640

introduced myself and said hey i got

1095

00:37:30,790 --> 00:37:30,320

some really crazy pictures does anybody

1096

00:37:33,750 --> 00:37:30,800

know

1097

00:37:35,430 --> 00:37:33,760

anything about the soho satellite and

1098

00:37:35,990 --> 00:37:35,440

one of the professors wheeled out of his

1099

00:37:39,190 --> 00:37:36,000

office and said

1100

00:37:41,349 --> 00:37:39,200

i do and apparently he was uh

1101

00:37:42,390 --> 00:37:41,359

he had worked with that type of

1102

00:37:43,750 --> 00:37:42,400

apparatus

1103

00:37:45,589 --> 00:37:43,760

so we sat down and looked at some of the

1104

00:37:47,510 --> 00:37:45,599

pictures it's just uh

1105

00:37:49,670 --> 00:37:47,520

pardon me for interrupting you but is

1106

00:37:50,390 --> 00:37:49,680

this one of the pictures that you sent

1107

00:37:54,230 --> 00:37:50,400

me

1108

00:37:57,670 --> 00:37:54,240

like uh like here's this one yeah yes

1109

00:37:58,710 --> 00:37:57,680

and so yeah i showed him ten pictures

1110

00:38:02,069 --> 00:37:58,720

and he said no

1111

00:38:04,150 --> 00:38:02,079

none of those are uh weird

1112

00:38:06,310 --> 00:38:04,160

however the two of them were kind of

1113

00:38:07,589 --> 00:38:06,320

strange and i said that's what i thought

1114

00:38:09,190 --> 00:38:07,599

actually i thought all of more strange

1115

00:38:10,470 --> 00:38:09,200

but he said you got two of them that i

1116

00:38:11,829 --> 00:38:10,480

can't explain

1117

00:38:12,950 --> 00:38:11,839

i said that's all i needed to hear so i

1118

00:38:14,550 --> 00:38:12,960

went back home and started looking

1119

00:38:18,069 --> 00:38:14,560

through the archives again

1120

00:38:19,030 --> 00:38:18,079

nasa soho archives and about a year

1121

00:38:21,589 --> 00:38:19,040

later that picture

1122

00:38:23,190 --> 00:38:21,599

that you just showed is what i found it

1123

00:38:25,670 --> 00:38:23,200

happened to be on the same

1124

00:38:27,510 --> 00:38:25,680

date as my uh my daughter's birthday

1125

00:38:30,630 --> 00:38:27,520

february 1st

1126

00:38:32,790 --> 00:38:30,640

but i think it's 1996 or 97

1127

00:38:33,670 --> 00:38:32,800

but the odd thing about this is this

1128

00:38:36,069 --> 00:38:33,680

camera

1129

00:38:37,270 --> 00:38:36,079

uh is the c2 sensor on the soho

1130

00:38:41,109 --> 00:38:37,280

satellite

1131

00:38:41,670 --> 00:38:41,119

miles away from earth it's not near the

1132

00:38:43,589 --> 00:38:41,680

moon

1133

00:38:46,630 --> 00:38:43,599

it's not near earth it's not near space

1134

00:38:48,630 --> 00:38:46,640

debris it's just looking at the sun

1135

00:38:50,390 --> 00:38:48,640

between us and earth it looks at the sun

1136

00:38:51,990 --> 00:38:50,400

a million miles away from earth stays in

1137

00:38:55,349 --> 00:38:52,000

orbit with us

1138

00:38:57,430 --> 00:38:55,359

but that that pear-shaped series

1139

00:38:58,950 --> 00:38:57,440
of lights should not be near the

1140

00:39:02,230 --> 00:38:58,960
satellite

1141

00:39:03,670 --> 00:39:02,240
yet it was and

1142

00:39:06,710 --> 00:39:03,680
you actually think that was near the

1143

00:39:08,310 --> 00:39:06,720
satellite i mean it's so hard to tell

1144

00:39:10,230 --> 00:39:08,320
well what i did on this picture is i

1145

00:39:12,790 --> 00:39:10,240
zoomed in to the side of the sun

1146

00:39:13,990 --> 00:39:12,800
this picture is a zoom cropped portion

1147

00:39:15,510 --> 00:39:14,000
there should be the sun right in the

1148

00:39:18,630 --> 00:39:15,520
middle of this picture

1149

00:39:20,069 --> 00:39:18,640
um so the sun on this case is off to the

1150

00:39:22,870 --> 00:39:20,079
left

1151
00:39:24,069 --> 00:39:22,880
um and this is just the edge of the

1152
00:39:26,710 --> 00:39:24,079
photo itself

1153
00:39:28,550 --> 00:39:26,720
from nasa every picture has the sun

1154
00:39:30,550 --> 00:39:28,560
right dead center and has this uh

1155
00:39:32,310 --> 00:39:30,560
disc that blocks the light on a c2

1156
00:39:34,230 --> 00:39:32,320
center i've seen that yeah just shows

1157
00:39:35,829 --> 00:39:34,240
the the cme is popping off the sun

1158
00:39:37,589 --> 00:39:35,839
surface and so that's really the

1159
00:39:39,670 --> 00:39:37,599
function of it but

1160
00:39:40,950 --> 00:39:39,680
in its redness if you look off to the

1161
00:39:46,069 --> 00:39:40,960
edge of the frame

1162
00:39:51,670 --> 00:39:49,589
too organized too structured

1163
00:39:53,430 --> 00:39:51,680

for a comet comets don't have landing

1164

00:39:55,430 --> 00:39:53,440

lights or running lights

1165

00:39:57,349 --> 00:39:55,440

and asteroids pretty much don't either

1166

00:39:58,950 --> 00:39:57,359

so when this thing showed up

1167

00:40:00,790 --> 00:39:58,960

i knew i had found what i was looking

1168

00:40:02,390 --> 00:40:00,800

for um

1169

00:40:04,309 --> 00:40:02,400

and then i spent three days not talking

1170

00:40:06,870 --> 00:40:04,319

to anybody i didn't know

1171

00:40:08,470 --> 00:40:06,880

what to do with it so and i found the

1172

00:40:11,190 --> 00:40:08,480

crime i found the crime scene

1173

00:40:12,870 --> 00:40:11,200

i just didn't know who to tell so i just

1174

00:40:15,829 --> 00:40:12,880

started collecting more of them

1175

00:40:17,589 --> 00:40:15,839

and that's what started my journey in

1176

00:40:20,870 --> 00:40:17,599

not only mufon i joined mufon

1177

00:40:22,309 --> 00:40:20,880

immediately in 2015 to to

1178

00:40:24,710 --> 00:40:22,319

start sharing some of the stuff i was

1179

00:40:27,270 --> 00:40:24,720

saying with that community

1180

00:40:29,589 --> 00:40:27,280

and also to continue my research while i

1181

00:40:32,470 --> 00:40:29,599

was at embryo

1182

00:40:33,510 --> 00:40:32,480

and when when uh when you're sharing

1183

00:40:36,630 --> 00:40:33,520

this with

1184

00:40:38,790 --> 00:40:36,640

say the ufo community what

1185

00:40:41,270 --> 00:40:38,800

what happens i mean what is the what's

1186

00:40:44,390 --> 00:40:41,280

the response

1187

00:40:46,870 --> 00:40:44,400

um normally

1188

00:40:49,510 --> 00:40:46,880

the first thing i get is wow or you hear

1189

00:40:51,990 --> 00:40:49,520

people talking amongst themselves

1190

00:40:53,270 --> 00:40:52,000

it's a little bit of a shock factor

1191

00:40:55,030 --> 00:40:53,280

because once you understand the

1192

00:40:56,390 --> 00:40:55,040

orientation the context of these

1193

00:41:00,230 --> 00:40:56,400

pictures

1194

00:41:02,069 --> 00:41:00,240

you realize that's not one of ours

1195

00:41:03,589 --> 00:41:02,079

it's organized we don't have anything

1196

00:41:05,829 --> 00:41:03,599

that goes a million miles out

1197

00:41:07,270 --> 00:41:05,839

and back we just have satellite sitting

1198

00:41:10,069 --> 00:41:07,280

out there

1199

00:41:11,589 --> 00:41:10,079

and um i sent you some samples of the

1200

00:41:13,589 --> 00:41:11,599

stereo a

1201
00:41:15,030 --> 00:41:13,599
satellite it's there's also a stereo b

1202
00:41:15,829 --> 00:41:15,040
which they sent out in opposite

1203
00:41:19,190 --> 00:41:15,839
directions

1204
00:41:21,109 --> 00:41:19,200
sure but um yeah those are like pictures

1205
00:41:24,230 --> 00:41:21,119
i sent you were at a time that there was

1206
00:41:27,190 --> 00:41:24,240
about 64 million miles away from earth

1207
00:41:28,790 --> 00:41:27,200
is this uh is this one of them uh that

1208
00:41:31,190 --> 00:41:28,800
is the sdo

1209
00:41:33,030 --> 00:41:31,200
uh that's that orbits around the earth

1210
00:41:34,150 --> 00:41:33,040
but it's a 4k system it has the best

1211
00:41:36,870 --> 00:41:34,160
clarity

1212
00:41:37,430 --> 00:41:36,880
there you go that's that's a stereo

1213
00:41:40,470 --> 00:41:37,440

picture

1214

00:41:43,109 --> 00:41:40,480

and that's right next to the sun um

1215

00:41:44,630 --> 00:41:43,119

and so there's some there's some really

1216

00:41:47,349 --> 00:41:44,640

interesting

1217

00:41:49,990 --> 00:41:47,359

artifacts and images that have objects

1218

00:41:53,829 --> 00:41:50,000

in them that are hard to

1219

00:41:56,150 --> 00:41:53,839

describe and um

1220

00:41:57,510 --> 00:41:56,160

i don't know that's right i'm trying to

1221

00:41:59,270 --> 00:41:57,520

tell people what the story is behind it

1222

00:42:03,349 --> 00:41:59,280

because i don't even know what they are

1223

00:42:07,270 --> 00:42:03,359

now about um uh is this the uh satellite

1224

00:42:09,270 --> 00:42:07,280

i mean is that a satellite image yes yes

1225

00:42:10,790 --> 00:42:09,280

that's perfect so that blocks out the

1226
00:42:11,910 --> 00:42:10,800
sun and you can just see what's going on

1227
00:42:14,150 --> 00:42:11,920
in the very

1228
00:42:15,510 --> 00:42:14,160
on the corona or whatever it is right on

1229
00:42:17,109 --> 00:42:15,520
the very edge of the sun

1230
00:42:18,950 --> 00:42:17,119
exactly that's a little bit zoomed in

1231
00:42:22,069 --> 00:42:18,960
too because the artif

1232
00:42:25,349 --> 00:42:22,079
the when you go into the soho

1233
00:42:25,990 --> 00:42:25,359
or even the uh sdoc 2 sided things

1234
00:42:29,990 --> 00:42:26,000
you'll

1235
00:42:32,470 --> 00:42:30,000
frame

1236
00:42:33,349 --> 00:42:32,480
so the sun and the obelisk that blocks

1237
00:42:35,349 --> 00:42:33,359
the sun

1238
00:42:36,550 --> 00:42:35,359

and you'll see pretty far out on both

1239

00:42:41,109 --> 00:42:36,560

sides

1240

00:42:41,750 --> 00:42:41,119

i think it's about a oh 1.2 million mile

1241

00:42:44,470 --> 00:42:41,760

spread

1242

00:42:45,829 --> 00:42:44,480

within the frame given the context of

1243

00:42:49,109 --> 00:42:45,839

the sun

1244

00:42:51,109 --> 00:42:49,119

and so the edge of it is when it

1245

00:42:51,670 --> 00:42:51,119

captures an image next to the edge of

1246

00:42:53,430 --> 00:42:51,680

the frame

1247

00:42:55,109 --> 00:42:53,440

you don't know because it's not

1248

00:42:55,990 --> 00:42:55,119

interacting with the sun's surface you

1249

00:42:58,630 --> 00:42:56,000

don't know

1250

00:43:00,309 --> 00:42:58,640

how close it is to the satellite because

1251

00:43:03,670 --> 00:43:00,319

there's no range finders

1252

00:43:06,309 --> 00:43:03,680

it just simply takes a picture but i

1253

00:43:07,510 --> 00:43:06,319

do have some photos within the grouping

1254

00:43:08,870 --> 00:43:07,520

that i've got

1255

00:43:11,430 --> 00:43:08,880

that shows some of these things

1256

00:43:13,670 --> 00:43:11,440

interacting with the sun surface

1257

00:43:14,550 --> 00:43:13,680

and it's disturbing to say the least so

1258

00:43:16,870 --> 00:43:14,560

then you know it's

1259

00:43:18,390 --> 00:43:16,880

93 million miles away and it's sitting

1260

00:43:20,150 --> 00:43:18,400

messing with the sun

1261

00:43:21,910 --> 00:43:20,160

so let me let me ask you this it's so

1262

00:43:24,069 --> 00:43:21,920

it's 93

1263

00:43:25,349 --> 00:43:24,079

million miles away or 92 point something

1264

00:43:28,470 --> 00:43:25,359

whatever it is

1265

00:43:31,670 --> 00:43:28,480

and uh if something is

1266

00:43:34,710 --> 00:43:31,680

close to the sun though it's going to

1267

00:43:36,390 --> 00:43:34,720

react in i mean with the temperature i

1268

00:43:38,150 --> 00:43:36,400

mean if you're if you're only a million

1269

00:43:41,510 --> 00:43:38,160

miles away from the sun you're fried

1270

00:43:42,710 --> 00:43:41,520

for the most part um with the technology

1271

00:43:45,190 --> 00:43:42,720

we have

1272

00:43:46,950 --> 00:43:45,200

uh that was true 10 years ago the parker

1273

00:43:48,550 --> 00:43:46,960

probe can get within 4 million miles of

1274

00:43:49,510 --> 00:43:48,560

the sun and it's doing so right now as

1275

00:43:52,150 --> 00:43:49,520

we speak

1276
00:43:52,870 --> 00:43:52,160
really wow we have technology that can

1277
00:43:55,349 --> 00:43:52,880
handle

1278
00:43:56,790 --> 00:43:55,359
the space environment at 4 million miles

1279
00:43:57,430 --> 00:43:56,800
and the higher temperatures and still

1280
00:43:59,750 --> 00:43:57,440
keep

1281
00:44:01,190 --> 00:43:59,760
the instruments at room temperature that

1282
00:44:01,589 --> 00:44:01,200
we consider room temperature they're

1283
00:44:04,150 --> 00:44:01,599
safe

1284
00:44:06,630 --> 00:44:04,160
it's amazing so if we can do that after

1285
00:44:08,630 --> 00:44:06,640
100 years of flight

1286
00:44:09,750 --> 00:44:08,640
pretty sure something more intelligent

1287
00:44:12,870 --> 00:44:09,760
than us

1288
00:44:14,710 --> 00:44:12,880

has got even cooler stuff and and

1289

00:44:15,910 --> 00:44:14,720

let's just say devil's advocate that

1290

00:44:19,109 --> 00:44:15,920

it's

1291

00:44:21,910 --> 00:44:19,119

this

1292

00:44:23,190 --> 00:44:21,920

um behind the wheel so to speak right

1293

00:44:26,309 --> 00:44:23,200

what

1294

00:44:28,710 --> 00:44:26,319

um any idea why they would want to be

1295

00:44:29,910 --> 00:44:28,720

near the sun why what they would get

1296

00:44:33,030 --> 00:44:29,920

besides energy

1297

00:44:37,109 --> 00:44:33,040

from the sun i think that's all they

1298

00:44:39,109 --> 00:44:37,119

are doing it for here's here's a

1299

00:44:40,309 --> 00:44:39,119

two hypothesis i've come up with in five

1300

00:44:43,589 --> 00:44:40,319

years even did

1301

00:44:47,190 --> 00:44:43,599

a master's paper on it um

1302

00:44:49,990 --> 00:44:47,200

the there is a

1303

00:44:51,430 --> 00:44:50,000

a likelihood that given the dark

1304

00:44:54,150 --> 00:44:51,440

programs

1305

00:44:54,550 --> 00:44:54,160

that are within the military and uh in

1306

00:44:55,990 --> 00:44:54,560

the

1307

00:44:57,589 --> 00:44:56,000

military industrial complex that

1308

00:45:01,349 --> 00:44:57,599

eisenhower warned us about

1309

00:45:04,550 --> 00:45:01,359

yeah um their advancements

1310

00:45:07,910 --> 00:45:04,560

have been so logarithmic

1311

00:45:11,109 --> 00:45:07,920

from the roswell crash forward that

1312

00:45:13,190 --> 00:45:11,119

when ben rich the ceo of skunk

1313

00:45:14,550 --> 00:45:13,200

works passed away a few years back and

1314

00:45:16,550 --> 00:45:14,560

said oh by the way we have the

1315

00:45:19,430 --> 00:45:16,560

technology to take e.t home

1316

00:45:20,790 --> 00:45:19,440

yeah i believed him i believe that

1317

00:45:24,630 --> 00:45:20,800

statement

1318

00:45:26,150 --> 00:45:24,640

and given that it was

1319

00:45:27,990 --> 00:45:26,160

here's the two things it's either

1320

00:45:30,550 --> 00:45:28,000

intelligent life that we don't control

1321

00:45:32,870 --> 00:45:30,560

or we have set up drones that can do the

1322

00:45:35,990 --> 00:45:32,880

same thing that we've learned

1323

00:45:39,030 --> 00:45:36,000

from reverse engineering their craft

1324

00:45:39,829 --> 00:45:39,040

that have crashed on our planet so i

1325

00:45:41,829 --> 00:45:39,839

don't think

1326
00:45:43,829 --> 00:45:41,839
astronauts are running out there and

1327
00:45:44,710 --> 00:45:43,839
running to the stars but i do think we

1328
00:45:48,309 --> 00:45:44,720
have

1329
00:45:51,589 --> 00:45:48,319
drones that do everything like that

1330
00:45:54,550 --> 00:45:51,599
you really think so wow yeah and i mean

1331
00:45:55,510 --> 00:45:54,560
i know they say that we won't know about

1332
00:45:59,109 --> 00:45:55,520
something

1333
00:46:00,150 --> 00:45:59,119
until like 15 years later on average

1334
00:46:01,910 --> 00:46:00,160
yeah it's probably a little more than

1335
00:46:03,190 --> 00:46:01,920
that yep yep when it comes to

1336
00:46:05,990 --> 00:46:03,200
experimental

1337
00:46:07,349 --> 00:46:06,000
but i i don't uh again it's it's it's

1338
00:46:08,950 --> 00:46:07,359

it's hard to fathom why

1339

00:46:11,270 --> 00:46:08,960

someone would want to go out near hang

1340

00:46:14,069 --> 00:46:11,280

out near the sun

1341

00:46:14,630 --> 00:46:14,079

well think of it this way if um being a

1342

00:46:17,270 --> 00:46:14,640

pilot

1343

00:46:18,870 --> 00:46:17,280

i think this way if if i were star

1344

00:46:21,349 --> 00:46:18,880

traveling that's how you

1345

00:46:22,870 --> 00:46:21,359

get to the next destination as you focus

1346

00:46:24,790 --> 00:46:22,880

on a star it's kind of what they did in

1347

00:46:26,390 --> 00:46:24,800

star trek

1348

00:46:28,069 --> 00:46:26,400

you know they go to different star

1349

00:46:29,670 --> 00:46:28,079

systems or planets and regions and the

1350

00:46:32,710 --> 00:46:29,680

only way you find that is with

1351

00:46:36,550 --> 00:46:32,720

stars we we navigate the seas

1352

00:46:37,910 --> 00:46:36,560

using stars some some pilots even c-17

1353

00:46:41,109 --> 00:46:37,920

pilots i know

1354

00:46:44,069 --> 00:46:41,119

would navigate their craft with stars

1355

00:46:47,670 --> 00:46:44,079

so if you're in space it's no different

1356

00:46:50,069 --> 00:46:47,680

if you're exploring a galaxy like ours

1357

00:46:51,030 --> 00:46:50,079

you simply identify where you're going

1358

00:46:53,510 --> 00:46:51,040

through the star

1359

00:46:55,589 --> 00:46:53,520

system and or star particular like

1360

00:46:57,190 --> 00:46:55,599

proxima a

1361

00:46:59,109 --> 00:46:57,200

and set your course for that once you

1362

00:47:00,630 --> 00:46:59,119

get there it's

1363

00:47:02,630 --> 00:47:00,640

it's real possible depending on your

1364

00:47:04,069 --> 00:47:02,640

level intelligence and advancement in

1365

00:47:06,069 --> 00:47:04,079

this galaxy

1366

00:47:07,829 --> 00:47:06,079

you may need a refuel i don't i don't

1367

00:47:09,430 --> 00:47:07,839

know what the economy is on some of

1368

00:47:12,150 --> 00:47:09,440

these ships

1369

00:47:12,870 --> 00:47:12,160

because i haven't had a ride on one yet

1370

00:47:16,069 --> 00:47:12,880

but i've

1371

00:47:19,430 --> 00:47:16,079

i've heard of a few folks that have so i

1372

00:47:21,910 --> 00:47:19,440

i don't know what i don't know but

1373

00:47:24,150 --> 00:47:21,920

when i catch something near the sun or

1374

00:47:28,309 --> 00:47:24,160

within the archives of nasa

1375

00:47:30,630 --> 00:47:28,319

imagery then i'm pretty sure

1376

00:47:32,390 --> 00:47:30,640

i'm on the right track i just don't know

1377

00:47:34,630 --> 00:47:32,400

if i'm seeing a ford or a chevy because

1378

00:47:36,870 --> 00:47:34,640

i don't know who's driving these things

1379

00:47:38,790 --> 00:47:36,880

well have you been has have you brought

1380

00:47:41,030 --> 00:47:38,800

this up and someone has argued

1381

00:47:42,870 --> 00:47:41,040

saying you know this is some type of

1382

00:47:45,829 --> 00:47:42,880

natural anomaly

1383

00:47:46,150 --> 00:47:45,839

oh sure um one of the papers i had to do

1384

00:47:49,349 --> 00:47:46,160

was

1385

00:47:52,950 --> 00:47:49,359

artifacts that

1386

00:47:56,549 --> 00:47:52,960

are caused through cosmic radiation

1387

00:47:59,750 --> 00:47:56,559

through camera sensor ccd

1388

00:48:02,549 --> 00:47:59,760

operation program operation

1389

00:48:03,270 --> 00:48:02,559

compression of data computers can do a

1390

00:48:07,349 --> 00:48:03,280

lot of

1391

00:48:11,349 --> 00:48:07,359

weird things charge transfer effect cte

1392

00:48:14,230 --> 00:48:11,359

uh where an object uh maybe a

1393

00:48:15,670 --> 00:48:14,240

even a cosmic ray striking the ccd then

1394

00:48:16,870 --> 00:48:15,680

it smears into a straight line where you

1395

00:48:18,790 --> 00:48:16,880

think oh there's

1396

00:48:20,470 --> 00:48:18,800

there's something that's trailing and

1397

00:48:23,430 --> 00:48:20,480

it's got a tail to it

1398

00:48:23,670 --> 00:48:23,440

and that does happen um but not all of

1399

00:48:27,109 --> 00:48:23,680

them

1400

00:48:28,870 --> 00:48:27,119

are like that and uh i can i can

1401

00:48:30,470 --> 00:48:28,880

now tell you which ones are which

1402

00:48:33,990 --> 00:48:30,480

because my electronics background

1403

00:48:37,589 --> 00:48:34,000

i know how ccds work and

1404

00:48:40,069 --> 00:48:37,599

did many papers on the sensors that go

1405

00:48:40,790 --> 00:48:40,079

onto these satellites so make a long

1406

00:48:43,750 --> 00:48:40,800

story short

1407

00:48:45,109 --> 00:48:43,760

yeah i had to go and learn as much as i

1408

00:48:47,589 --> 00:48:45,119

could about what i was seeing

1409

00:48:49,030 --> 00:48:47,599

because my initial take everything was a

1410

00:48:51,430 --> 00:48:49,040

ufo

1411

00:48:53,270 --> 00:48:51,440

and once the the good professors at

1412

00:48:55,750 --> 00:48:53,280

embry riddle padded me on the head and

1413

00:48:58,069 --> 00:48:55,760

and brought me back down to earth let me

1414

00:49:01,190 --> 00:48:58,079

help you with the science here son

1415

00:49:03,430 --> 00:49:01,200

and of course they're half my age and uh

1416

00:49:05,190 --> 00:49:03,440

they would they would walk it walk it

1417

00:49:08,390 --> 00:49:05,200

through on what i was saying

1418

00:49:10,549 --> 00:49:08,400

but when they would stop and hesitate

1419

00:49:11,990 --> 00:49:10,559

on a few of them i knew i had something

1420

00:49:14,230 --> 00:49:12,000

because that's what these guys do

1421

00:49:15,270 --> 00:49:14,240

that they have what a huge astronomy

1422

00:49:17,190 --> 00:49:15,280

department at emory

1423

00:49:19,349 --> 00:49:17,200

they have a huge telescope on the

1424

00:49:21,109 --> 00:49:19,359

science building there

1425

00:49:22,390 --> 00:49:21,119

a great department and a lot of smart

1426

00:49:24,309 --> 00:49:22,400

guys

1427

00:49:25,510 --> 00:49:24,319

and that's why i use them the way i did

1428

00:49:29,349 --> 00:49:25,520

is to help validate

1429

00:49:31,910 --> 00:49:29,359

some of the image artifacts being

1430

00:49:33,750 --> 00:49:31,920

more than artifacts uh and that's what

1431

00:49:35,190 --> 00:49:33,760

led me to start collecting these things

1432

00:49:39,030 --> 00:49:35,200

that they couldn't

1433

00:49:41,910 --> 00:49:39,040

define and how many have you collected

1434

00:49:42,470 --> 00:49:41,920

uh my files i have three different files

1435

00:49:46,230 --> 00:49:42,480

on

1436

00:49:48,230 --> 00:49:46,240

sdo soho and stereo a satellites

1437

00:49:50,630 --> 00:49:48,240

and between the three i have a little

1438

00:49:52,950 --> 00:49:50,640

more than fifty thousand images now

1439

00:49:54,390 --> 00:49:52,960

fifty thousand and work out for five

1440

00:49:56,790 --> 00:49:54,400

years yeah

1441

00:49:58,069 --> 00:49:56,800

and and when you were talking about at

1442

00:50:01,270 --> 00:49:58,079

the uh school

1443

00:50:02,790 --> 00:50:01,280

when you were getting opinions uh was

1444

00:50:04,309 --> 00:50:02,800

there at any point where

1445

00:50:06,150 --> 00:50:04,319

and you said they'd hesitate but was

1446

00:50:08,710 --> 00:50:06,160

there a point where they'd just say

1447

00:50:11,109 --> 00:50:08,720

i have no idea what that is i mean did

1448

00:50:14,950 --> 00:50:11,119

they ever admit to that

1449

00:50:18,790 --> 00:50:16,950

some of the pictures i sent you uh yeah

1450

00:50:20,470 --> 00:50:18,800

would be in that category

1451
00:50:21,829 --> 00:50:20,480
i'll go through those or maybe you can

1452
00:50:23,589 --> 00:50:21,839
talk and and

1453
00:50:24,950 --> 00:50:23,599
again i'm gonna have these images up in

1454
00:50:27,910 --> 00:50:24,960
the uh show notes

1455
00:50:29,670 --> 00:50:27,920
yeah review or listening to the audio uh

1456
00:50:30,069 --> 00:50:29,680
part of this but let's uh let's talk

1457
00:50:32,710 --> 00:50:30,079
about

1458
00:50:34,470 --> 00:50:32,720
uh this one uh that we're showing here

1459
00:50:34,870 --> 00:50:34,480
almost looks like a jet in a streak

1460
00:50:37,990 --> 00:50:34,880
behind

1461
00:50:41,190 --> 00:50:38,000
it exactly anytime i sound

1462
00:50:43,910 --> 00:50:41,200
i found something that that had um

1463
00:50:45,829 --> 00:50:43,920

all the gestalt principles of proximity

1464

00:50:47,750 --> 00:50:45,839

or organization that's when i stopped

1465

00:50:49,910 --> 00:50:47,760

and really took a look at it

1466

00:50:51,589 --> 00:50:49,920

this particular image is off the 131

1467

00:50:54,230 --> 00:50:51,599

angstrom sensor

1468

00:50:55,829 --> 00:50:54,240

from the sdo which flies around in a

1469

00:50:58,069 --> 00:50:55,839

figure eight pattern around earth but

1470

00:50:59,990 --> 00:50:58,079

it's got a it's got a 4k sensor on it so

1471

00:51:03,670 --> 00:51:00,000

it gives really nice

1472

00:51:06,230 --> 00:51:03,680

clarity to a solar system

1473

00:51:06,790 --> 00:51:06,240

for research this particular picture

1474

00:51:09,190 --> 00:51:06,800

shows

1475

00:51:09,990 --> 00:51:09,200

it looks like a refrigerator with three

1476

00:51:12,790 --> 00:51:10,000

perfectly

1477

00:51:14,150 --> 00:51:12,800

round dots in a perfect order right

1478

00:51:15,750 --> 00:51:14,160

behind each other

1479

00:51:18,230 --> 00:51:15,760

like they were mounted on top the

1480

00:51:21,270 --> 00:51:18,240

refrigerator and then there's this black

1481

00:51:24,390 --> 00:51:21,280

gap probably the same length

1482

00:51:27,109 --> 00:51:24,400

of the item itself or the object itself

1483

00:51:29,670 --> 00:51:27,119

and then there's a streak behind it

1484

00:51:32,390 --> 00:51:29,680

charge transfer effect

1485

00:51:32,870 --> 00:51:32,400

is always given to the streaks on an

1486

00:51:36,950 --> 00:51:32,880

image

1487

00:51:38,790 --> 00:51:36,960

however a ccd can't make up

1488

00:51:40,390 --> 00:51:38,800

a charge transfer effect the smear has

1489

00:51:42,790 --> 00:51:40,400

to be continuous

1490

00:51:44,790 --> 00:51:42,800

and because it shows the sensor is weak

1491

00:51:46,790 --> 00:51:44,800

through thermodynamic issues that it's

1492

00:51:49,589 --> 00:51:46,800

having at the time

1493

00:51:50,069 --> 00:51:49,599

it doesn't turn itself off and on at

1494

00:51:55,109 --> 00:51:50,079

will

1495

00:51:57,109 --> 00:51:55,119

so this is in this case a true trail

1496

00:51:58,470 --> 00:51:57,119

uh behind an object that's cutting to

1497

00:52:01,670 --> 00:51:58,480

the left side

1498

00:52:03,270 --> 00:52:01,680

of the sun as in context to the

1499

00:52:04,710 --> 00:52:03,280

solar satellite and from earth's

1500

00:52:07,030 --> 00:52:04,720

perspective

1501
00:52:08,549 --> 00:52:07,040
so you don't see the sun in this image

1502
00:52:10,150 --> 00:52:08,559
this is again the outer

1503
00:52:12,549 --> 00:52:10,160
portion of the sun so you know it didn't

1504
00:52:14,549 --> 00:52:12,559
come off in a cme it's not a

1505
00:52:16,790 --> 00:52:14,559
it's not just a random piece of the sun

1506
00:52:18,150 --> 00:52:16,800
flying out and a flare

1507
00:52:20,870 --> 00:52:18,160
because there's no flare in this

1508
00:52:23,670 --> 00:52:20,880
particular image it's quiet

1509
00:52:24,950 --> 00:52:23,680
but this particular object uh cut across

1510
00:52:27,430 --> 00:52:24,960
the frame

1511
00:52:29,109 --> 00:52:27,440
uh during the date time group that was

1512
00:52:31,430 --> 00:52:29,119
associated with it

1513
00:52:32,790 --> 00:52:31,440

and left this imprint now here's the

1514

00:52:36,150 --> 00:52:32,800

crazy part

1515

00:52:38,230 --> 00:52:36,160

there wasn't a a

1516

00:52:40,790 --> 00:52:38,240

a sign of this with the image before and

1517

00:52:42,710 --> 00:52:40,800

the image after it was completely blank

1518

00:52:44,309 --> 00:52:42,720

so within one frame this thing cut

1519

00:52:48,069 --> 00:52:44,319

across

1520

00:52:51,430 --> 00:52:48,079

1.2 million miles worth of field of view

1521

00:52:53,750 --> 00:52:51,440

and um that's pretty quick well now

1522

00:52:54,950 --> 00:52:53,760

it wouldn't be like an asteroid or a

1523

00:52:57,270 --> 00:52:54,960

comet with

1524

00:52:59,510 --> 00:52:57,280

not with it i mean we would know

1525

00:53:02,150 --> 00:52:59,520

everything that was going on there right

1526
00:53:03,030 --> 00:53:02,160
correct and asteroids and comets are

1527
00:53:05,990 --> 00:53:03,040
always seen

1528
00:53:07,750 --> 00:53:06,000
in frame by frame progression this this

1529
00:53:09,589 --> 00:53:07,760
is a single frame

1530
00:53:11,589 --> 00:53:09,599
that has no progression to it this

1531
00:53:14,309 --> 00:53:11,599
appeared and disappeared

1532
00:53:15,670 --> 00:53:14,319
um in one frame's worth of time which

1533
00:53:17,030 --> 00:53:15,680
could be but

1534
00:53:19,510 --> 00:53:17,040
it could be about five minutes of

1535
00:53:22,309 --> 00:53:19,520
transition uh

1536
00:53:23,589 --> 00:53:22,319
but my point is even at a couple of

1537
00:53:24,069 --> 00:53:23,599
seconds where i've measured some of

1538
00:53:25,589 --> 00:53:24,079

these

1539

00:53:27,589 --> 00:53:25,599

there's nothing behind nothing in front

1540

00:53:30,309 --> 00:53:27,599

of them and within

1541

00:53:32,069 --> 00:53:30,319

seconds to maybe 30 seconds is the most

1542

00:53:33,990 --> 00:53:32,079

resolution i've gotten

1543

00:53:35,190 --> 00:53:34,000

it's not there's no two frames of the

1544

00:53:38,870 --> 00:53:35,200

same thing

1545

00:53:41,270 --> 00:53:38,880

of this type of object it literally cuts

1546

00:53:43,430 --> 00:53:41,280

through the frame within seconds

1547

00:53:44,470 --> 00:53:43,440

don't know how it's doing it don't know

1548

00:53:47,829 --> 00:53:44,480

where it's going

1549

00:53:49,750 --> 00:53:47,839

um i just know that it's there and it

1550

00:53:53,510 --> 00:53:49,760

doesn't look like a natural object

1551
00:53:55,430 --> 00:53:53,520
by any means yeah um so we've got

1552
00:53:57,190 --> 00:53:55,440
let's see we've got two minutes uh

1553
00:53:58,710 --> 00:53:57,200
before we go into

1554
00:54:00,549 --> 00:53:58,720
or yeah two or three minutes before we

1555
00:54:01,510 --> 00:54:00,559
go into the next break but let me just

1556
00:54:03,270 --> 00:54:01,520
pull up on

1557
00:54:06,150 --> 00:54:03,280
the next image and you can talk about

1558
00:54:09,910 --> 00:54:06,160
this one this is another

1559
00:54:10,470 --> 00:54:09,920
bizarre one it is it's a 171 angstrom

1560
00:54:13,750 --> 00:54:10,480
off the

1561
00:54:15,990 --> 00:54:13,760
sdo and uh in this case

1562
00:54:17,589 --> 00:54:16,000
it has an organized pattern within the

1563
00:54:21,109 --> 00:54:17,599

grouping of

1564

00:54:23,270 --> 00:54:21,119

lines and dots and

1565

00:54:24,470 --> 00:54:23,280

what looks like a bright triangle that

1566

00:54:27,670 --> 00:54:24,480

that all kind of

1567

00:54:30,549 --> 00:54:27,680

hinges around the

1568

00:54:31,430 --> 00:54:30,559

pattern on this one is what caught my

1569

00:54:35,349 --> 00:54:31,440

eye

1570

00:54:38,470 --> 00:54:35,359

because it looks like just

1571

00:54:41,030 --> 00:54:38,480

looks like a fish bone

1572

00:54:42,549 --> 00:54:41,040

uh skeleton where you you flay the fish

1573

00:54:44,309 --> 00:54:42,559

and you get all these little parts

1574

00:54:45,589 --> 00:54:44,319

you got the head but you got the all

1575

00:54:48,789 --> 00:54:45,599

these little bones and spines

1576

00:54:49,750 --> 00:54:48,799

right behind it and that's what this

1577

00:54:52,230 --> 00:54:49,760

offers

1578

00:54:54,710 --> 00:54:52,240

here's here's the kicker after looking

1579

00:54:57,510 --> 00:54:54,720

at all these for about five years

1580

00:54:58,630 --> 00:54:57,520

my suspicion is we're only seeing parts

1581

00:55:01,910 --> 00:54:58,640

of the skin

1582

00:55:04,870 --> 00:55:01,920

of the craft or object

1583

00:55:06,630 --> 00:55:04,880

that's lit up and or these things have

1584

00:55:07,109 --> 00:55:06,640

organized themselves in such a way that

1585

00:55:10,870 --> 00:55:07,119

they're

1586

00:55:12,549 --> 00:55:10,880

structured but i think this is

1587

00:55:14,069 --> 00:55:12,559

the other possibility is this is just

1588

00:55:17,750 --> 00:55:14,079

one structure

1589

00:55:20,549 --> 00:55:17,760

and only parts of it are reflecting or

1590

00:55:21,270 --> 00:55:20,559

admitting the particular 171 angstrom

1591

00:55:22,950 --> 00:55:21,280

light

1592

00:55:25,270 --> 00:55:22,960

that this particular sensor was trying

1593

00:55:28,230 --> 00:55:25,280

to get off the sun

1594

00:55:29,030 --> 00:55:28,240

interesting well uh we are going to go

1595

00:55:32,069 --> 00:55:29,040

into break

1596

00:55:33,109 --> 00:55:32,079

and uh i did want to tell uh tell

1597

00:55:35,349 --> 00:55:33,119

everyone that

1598

00:55:37,349 --> 00:55:35,359

i'm going to play a uh i'm going to play

1599

00:55:38,069 --> 00:55:37,359

a silly video for those of you in

1600

00:55:41,190 --> 00:55:38,079

youtube

1601
00:55:42,390 --> 00:55:41,200
that i made uh actually when the uh i

1602
00:55:45,829 --> 00:55:42,400
made this when the

1603
00:55:48,390 --> 00:55:45,839
virus first started actually

1604
00:55:49,589 --> 00:55:48,400
and uh everyone was wearing masks and i

1605
00:55:50,950 --> 00:55:49,599
went into a store

1606
00:55:52,630 --> 00:55:50,960
and was trying to have a conversation

1607
00:55:53,910 --> 00:55:52,640
with a woman i couldn't understand

1608
00:55:56,069 --> 00:55:53,920
anything she said

1609
00:55:57,829 --> 00:55:56,079
so anyway i just a little bit of comic

1610
00:56:02,150 --> 00:55:57,839
relief

1611
00:56:04,789 --> 00:56:02,160
yep so everyone uh at kgra radio

1612
00:56:15,589 --> 00:56:04,799
i will be right back right after these

1613
00:56:22,069 --> 00:56:18,950

and indeed the duck with the ducklings

1614

00:56:25,349 --> 00:56:22,079

made it right across i-95 without

1615

00:56:27,750 --> 00:56:25,359

incident uh hold on just a minute folks

1616

00:56:29,030 --> 00:56:27,760

uh looks like we have some uh breaking

1617

00:56:32,630 --> 00:56:29,040

news here

1618

00:56:35,990 --> 00:56:32,640

uh what's that jet

1619

00:56:37,910 --> 00:56:36,000

trask oh mask mask

1620

00:56:45,430 --> 00:56:37,920

uh hang on folks just one second just

1621

00:56:48,789 --> 00:56:45,440

one second

1622

00:56:52,069 --> 00:56:48,799

so thank you

1623

00:56:55,270 --> 00:56:52,079

it looks like you have a real

1624

00:56:58,390 --> 00:56:55,280

breakthrough in october 19.

1625

00:57:02,390 --> 00:56:58,400

yes it is this is actually

1626

00:57:05,910 --> 00:57:02,400

a clear a cure all you have to do

1627

00:57:06,549 --> 00:57:05,920

is when you get in the shower just take

1628

00:57:09,750 --> 00:57:06,559

a little

1629

00:57:10,710 --> 00:57:09,760

thing around your own face and then just

1630

00:57:13,990 --> 00:57:10,720

smell it

1631

00:57:17,910 --> 00:57:14,000

and then oh my goodness it works in

1632

00:57:19,109 --> 00:57:17,920

99 out of 100 cases it's the best

1633

00:57:22,069 --> 00:57:19,119

breakthrough

1634

00:57:23,430 --> 00:57:22,079

you've had since the beginning and

1635

00:57:26,150 --> 00:57:23,440

anyway that's it

1636

00:57:29,270 --> 00:57:26,160

i love ending your healthy note and we

1637

00:57:40,870 --> 00:57:29,280

see it tonight at the same time

1638

00:57:44,870 --> 00:57:40,880

same place and be well

1639

00:57:48,230 --> 00:57:44,880

my guest tonight is uh major

1640

00:57:49,750 --> 00:57:48,240

uh david tune retired and uh

1641

00:57:51,829 --> 00:57:49,760

gonna bring him right back in here we

1642

00:57:54,069 --> 00:57:51,839

are uh welcome back

1643

00:57:54,950 --> 00:57:54,079

thank you yeah that was my little comic

1644

00:57:56,870 --> 00:57:54,960

relief

1645

00:58:00,470 --> 00:57:56,880

for everybody uh i i don't want to give

1646

00:58:07,670 --> 00:58:04,390

yeah uh anyway uh we had a we do take uh

1647

00:58:08,870 --> 00:58:07,680

questions uh i did uh i didn't have time

1648

00:58:10,549 --> 00:58:08,880

to tell you but we're actually going to

1649

00:58:11,990 --> 00:58:10,559

be able to take calls too

1650

00:58:14,230 --> 00:58:12,000

in the last half hour but here's a

1651
00:58:17,030 --> 00:58:14,240
question here uh that bill

1652
00:58:18,549 --> 00:58:17,040
a bill uh napper has for you and the

1653
00:58:21,670 --> 00:58:18,559
question is does david

1654
00:58:23,910 --> 00:58:21,680
uh think nasa government should disclose

1655
00:58:27,190 --> 00:58:23,920
alien existence to the general public

1656
00:58:27,990 --> 00:58:27,200
even if the nasa gov don't know or can't

1657
00:58:30,870 --> 00:58:28,000
explain

1658
00:58:32,390 --> 00:58:30,880
why they are visiting us or do they you

1659
00:58:36,069 --> 00:58:32,400
know my question would be do they

1660
00:58:38,470 --> 00:58:36,079
do you think they know uh should they

1661
00:58:41,190 --> 00:58:38,480
disclose it i think they are

1662
00:58:42,630 --> 00:58:41,200
um it's a good question and it's a

1663
00:58:45,829 --> 00:58:42,640

common one

1664

00:58:47,990 --> 00:58:45,839

it it has been a series of leaks

1665

00:58:50,710 --> 00:58:48,000

for the last three or four years where

1666

00:58:52,870 --> 00:58:50,720

we have been given

1667

00:58:55,270 --> 00:58:52,880

some material from the military and most

1668

00:58:56,630 --> 00:58:55,280

folks trust the military because

1669

00:58:58,470 --> 00:58:56,640

they're there for the country they're

1670

00:59:00,150 --> 00:58:58,480

not trying to make a dollar

1671

00:59:02,950 --> 00:59:00,160

off of the videos they're shooting or

1672

00:59:05,109 --> 00:59:02,960

politicize that much yeah

1673

00:59:07,109 --> 00:59:05,119

so it's interesting that there's been a

1674

00:59:08,390 --> 00:59:07,119

slow drip of disclosure but what's even

1675

00:59:11,829 --> 00:59:08,400

more interesting

1676
00:59:13,030 --> 00:59:11,839
is when i was a kid how accurate star

1677
00:59:15,270 --> 00:59:13,040
trek was

1678
00:59:16,069 --> 00:59:15,280
now i look back on it i used to think

1679
00:59:19,430 --> 00:59:16,079
the

1680
00:59:22,309 --> 00:59:19,440
green lizard and captain kirk were just

1681
00:59:23,670 --> 00:59:22,319
that was a fun one uh those episodes

1682
00:59:25,270 --> 00:59:23,680
were great

1683
00:59:26,789 --> 00:59:25,280
but when you look back you know even the

1684
00:59:28,710 --> 00:59:26,799
tricorder readings you know

1685
00:59:31,430 --> 00:59:28,720
the digital things that they had that

1686
00:59:34,549 --> 00:59:31,440
didn't exist

1687
00:59:38,230 --> 00:59:34,559
that do now uh you have to wonder

1688
00:59:41,829 --> 00:59:38,240

were we fed through hollywood and

1689

00:59:45,589 --> 00:59:41,839

other media and movies the possibility

1690

00:59:48,549 --> 00:59:45,599

of something that was already known

1691

00:59:49,589 --> 00:59:48,559

and it's it was a a slow boil to get us

1692

00:59:52,470 --> 00:59:49,599

to a point of

1693

00:59:54,230 --> 00:59:52,480

acknowledgement i think we're still in

1694

00:59:57,270 --> 00:59:54,240

that process of discovery

1695

01:00:00,069 --> 00:59:57,280

and disclosure the government doesn't do

1696

01:00:01,510 --> 01:00:00,079

anything fast trust me i spent 22 years

1697

01:00:03,349 --> 01:00:01,520

in the military

1698

01:00:05,270 --> 01:00:03,359

i know how fast it goes when it comes to

1699

01:00:06,710 --> 01:00:05,280

bureaucracies

1700

01:00:09,990 --> 01:00:06,720

but this one's a big one they put out

1701

01:00:14,390 --> 01:00:10,000

some studies nasa even did a study

1702

01:00:16,549 --> 01:00:14,400

2012 and gave it to a religious

1703

01:00:20,150 --> 01:00:16,559

organization to

1704

01:00:20,950 --> 01:00:20,160

to survey folks on what effects would it

1705

01:00:24,230 --> 01:00:20,960

have

1706

01:00:25,109 --> 01:00:24,240

if the government suddenly disclosed

1707

01:00:28,309 --> 01:00:25,119

that

1708

01:00:30,230 --> 01:00:28,319

aliens existed and we were contacted or

1709

01:00:32,710 --> 01:00:30,240

contacting them

1710

01:00:33,670 --> 01:00:32,720

and it was um it was interesting it was

1711

01:00:36,789 --> 01:00:33,680

a million dollar

1712

01:00:38,710 --> 01:00:36,799

million five dollar contract and

1713

01:00:41,589 --> 01:00:38,720

that was just a few years ago about the

1714

01:00:44,870 --> 01:00:41,599

time they started leaking these military

1715

01:00:47,190 --> 01:00:44,880

videos so to answer your question

1716

01:00:48,150 --> 01:00:47,200

yes i think they should and i think they

1717

01:00:51,349 --> 01:00:48,160

are

1718

01:00:54,230 --> 01:00:51,359

at the government's pace

1719

01:00:56,390 --> 01:00:54,240

and i think what i've got in my

1720

01:00:59,670 --> 01:00:56,400

discoveries or is a part of that

1721

01:01:01,270 --> 01:00:59,680

but it's not coordinated so i may get a

1722

01:01:05,190 --> 01:01:01,280

little trip in a little black

1723

01:01:08,230 --> 01:01:05,200

uh van or or maybe some type of

1724

01:01:10,390 --> 01:01:08,240

ford excursion that's up armored but uh

1725

01:01:12,150 --> 01:01:10,400

i i do believe you are getting some

1726

01:01:15,349 --> 01:01:12,160

disclosure at this point

1727

01:01:16,950 --> 01:01:15,359

and it's it's drip by drip until

1728

01:01:19,430 --> 01:01:16,960

until it's time and i don't know when

1729

01:01:22,870 --> 01:01:19,440

that is but full disclosure

1730

01:01:24,549 --> 01:01:22,880

it still may be a few years away yeah i

1731

01:01:26,309 --> 01:01:24,559

i don't know i have mixed feelings

1732

01:01:29,190 --> 01:01:26,319

myself about

1733

01:01:30,150 --> 01:01:29,200

uh about the whole disclosure thing and

1734

01:01:31,430 --> 01:01:30,160

because uh

1735

01:01:33,589 --> 01:01:31,440

you know i brought this up on another

1736

01:01:36,789 --> 01:01:33,599

show i i watched

1737

01:01:40,309 --> 01:01:36,799

i watched a video that's on youtube

1738

01:01:43,109 --> 01:01:40,319

you know several years ago and it it

1739

01:01:44,390 --> 01:01:43,119

was shot back in the 1950s the late

1740

01:01:46,150 --> 01:01:44,400

1950s

1741

01:01:48,069 --> 01:01:46,160

and there was this old guy with a derby

1742

01:01:50,710 --> 01:01:48,079

hat and he's saying

1743

01:01:51,510 --> 01:01:50,720

i just have a feeling you know that i'm

1744

01:01:57,990 --> 01:01:51,520

gonna know

1745

01:01:59,190 --> 01:01:58,000

felt that way i do feel like the needle

1746

01:02:01,029 --> 01:01:59,200

has moved

1747

01:02:02,710 --> 01:02:01,039

in certain ways and then a lot of people

1748

01:02:03,270 --> 01:02:02,720

may argue well we've been on that road

1749

01:02:05,589 --> 01:02:03,280

before

1750

01:02:07,109 --> 01:02:05,599

we've we've had this you know happen

1751

01:02:09,670 --> 01:02:07,119

before we get close and

1752

01:02:10,710 --> 01:02:09,680

and what if uh lou alizondo is a

1753

01:02:13,510 --> 01:02:10,720

disinformation

1754

01:02:14,390 --> 01:02:13,520

agent or something you know i mean yeah

1755

01:02:18,549 --> 01:02:14,400

it would collapse

1756

01:02:21,270 --> 01:02:18,559

i'm not saying he is i'm not

1757

01:02:22,230 --> 01:02:21,280

going to start any rumors or or anything

1758

01:02:24,950 --> 01:02:22,240

like that but i mean

1759

01:02:25,670 --> 01:02:24,960

i've met him i know it's okay i was at a

1760

01:02:27,349 --> 01:02:25,680

symposium

1761

01:02:28,950 --> 01:02:27,359

uh two years ago with him at cherry hill

1762

01:02:30,789 --> 01:02:28,960

and smart dude i was here

1763

01:02:32,230 --> 01:02:30,799

i was there with him yeah i was there

1764

01:02:35,829 --> 01:02:32,240

with you yeah

1765

01:02:37,190 --> 01:02:35,839

i i actually uh i i i had met him and we

1766

01:02:39,029 --> 01:02:37,200

talked for over half an hour and i

1767

01:02:42,150 --> 01:02:39,039

realized after we got done talking

1768

01:02:43,109 --> 01:02:42,160

we never once talked about a ufo because

1769

01:02:45,029 --> 01:02:43,119

he's uh he's that

1770

01:02:46,150 --> 01:02:45,039

antique collector and i'm a i'm an

1771

01:02:49,029 --> 01:02:46,160

appraiser and

1772

01:02:50,710 --> 01:02:49,039

you know perfect so we got into that uh

1773

01:02:54,549 --> 01:02:50,720

but anyway

1774

01:02:56,069 --> 01:02:54,559

yeah yeah yeah anyway

1775

01:02:57,750 --> 01:02:56,079

you know i i don't know what to think

1776

01:02:58,230 --> 01:02:57,760

about disclosure but i would like since

1777

01:03:00,710 --> 01:02:58,240

you

1778

01:03:02,549 --> 01:03:00,720

were in the military um i'd like to

1779

01:03:05,670 --> 01:03:02,559

discuss what you think about the nimitz

1780

01:03:13,990 --> 01:03:09,829

i think the nimitz case is

1781

01:03:15,829 --> 01:03:14,000

is real i think it's highly probable

1782

01:03:17,589 --> 01:03:15,839

given the amount of detail that was

1783

01:03:20,230 --> 01:03:17,599

released

1784

01:03:21,190 --> 01:03:20,240

and the circumstances of which it was

1785

01:03:22,870 --> 01:03:21,200

found

1786

01:03:25,430 --> 01:03:22,880

again anytime you're getting these

1787

01:03:28,309 --> 01:03:25,440

military leaks and stories

1788

01:03:29,829 --> 01:03:28,319

it's it's interesting because it's it's

1789

01:03:33,349 --> 01:03:29,839

a part of the government

1790

01:03:35,510 --> 01:03:33,359

yet it's um

1791

01:03:36,710 --> 01:03:35,520

it's one that people tend to believe

1792

01:03:39,029 --> 01:03:36,720

more than they do

1793

01:03:40,150 --> 01:03:39,039

you know an agency like the fbi came out

1794

01:03:41,430 --> 01:03:40,160

and said yeah we

1795

01:03:42,470 --> 01:03:41,440

we've got a couple of little green men

1796

01:03:43,670 --> 01:03:42,480

we've been interviewing for a couple

1797

01:03:46,309 --> 01:03:43,680

years now

1798

01:03:47,190 --> 01:03:46,319

i'm just not a fan of that agency right

1799

01:03:49,029 --> 01:03:47,200

now

1800

01:03:50,549 --> 01:03:49,039

but uh when you're talking military

1801
01:03:53,109 --> 01:03:50,559
these guys

1802
01:03:53,990 --> 01:03:53,119
again are apolitical they're just doing

1803
01:03:56,950 --> 01:03:54,000
their job

1804
01:03:58,230 --> 01:03:56,960
and they report what they see plain and

1805
01:04:01,510 --> 01:03:58,240
simple

1806
01:04:03,750 --> 01:04:01,520
so uh it's hard to

1807
01:04:06,230 --> 01:04:03,760
distrust your your lying eyes when you

1808
01:04:08,789 --> 01:04:06,240
see a jet chasing a ufo

1809
01:04:10,549 --> 01:04:08,799
on actual footage and what's funny is

1810
01:04:13,029 --> 01:04:10,559
one of the things i did martin was

1811
01:04:15,589 --> 01:04:13,039
when they first started showing the the

1812
01:04:17,829 --> 01:04:15,599
jet fighter chases with these ufos

1813
01:04:20,230 --> 01:04:17,839

i looked around at the whole image

1814

01:04:22,549 --> 01:04:20,240

itself i'm looking at

1815

01:04:23,270 --> 01:04:22,559

uh is this a real display of a hud

1816

01:04:28,390 --> 01:04:23,280

system

1817

01:04:29,910 --> 01:04:28,400

right because that's what i used to fly

1818

01:04:32,069 --> 01:04:29,920

with in the apaches and

1819

01:04:34,230 --> 01:04:32,079

in one eye we'd have that same setup

1820

01:04:36,309 --> 01:04:34,240

just a little bit different

1821

01:04:37,990 --> 01:04:36,319

organization of the same data so i

1822

01:04:39,510 --> 01:04:38,000

started reading around the edges going

1823

01:04:41,589 --> 01:04:39,520

okay what's their altitude where's the

1824

01:04:45,670 --> 01:04:41,599

camera heading what's the azimuth

1825

01:04:46,789 --> 01:04:45,680

and um the i the iat gates that locked

1826
01:04:48,549 --> 01:04:46,799
onto the object

1827
01:04:50,390 --> 01:04:48,559
the apache has the same thing and i'm

1828
01:04:53,430 --> 01:04:50,400
like this is a real video

1829
01:04:54,150 --> 01:04:53,440
this this isn't teased uh or put

1830
01:04:58,150 --> 01:04:54,160
together

1831
01:04:58,630 --> 01:04:58,160
as a as a false flag so that's why i

1832
01:05:01,109 --> 01:04:58,640
give

1833
01:05:03,829 --> 01:05:01,119
the military a the credit for reporting

1834
01:05:06,230 --> 01:05:03,839
but b whoever is pushing this stuff out

1835
01:05:07,349 --> 01:05:06,240
um is doing the nation of service in the

1836
01:05:10,549 --> 01:05:07,359
world of service to say

1837
01:05:13,349 --> 01:05:10,559
it's it's been here for a bit and even

1838
01:05:15,510 --> 01:05:13,359

the military is dealing with it because

1839

01:05:16,470 --> 01:05:15,520

what we do is we set up safeguards for

1840

01:05:19,349 --> 01:05:16,480

our nation

1841

01:05:21,109 --> 01:05:19,359

if we can't protect our own on the seas

1842

01:05:23,750 --> 01:05:21,119

or on the air

1843

01:05:25,750 --> 01:05:23,760

that's a problem and uh so it is a

1844

01:05:28,390 --> 01:05:25,760

national security issue

1845

01:05:29,910 --> 01:05:28,400

but it's also a safety issue because as

1846

01:05:31,430 --> 01:05:29,920

a pilot i don't want to be banging into

1847

01:05:31,750 --> 01:05:31,440

a ufo if somebody knows it's sitting

1848

01:05:34,150 --> 01:05:31,760

there

1849

01:05:35,190 --> 01:05:34,160

just just tell me so here's a question

1850

01:05:38,309 --> 01:05:35,200

up here

1851

01:05:40,470 --> 01:05:38,319

does that mean you you

1852

01:05:42,470 --> 01:05:40,480

you do you believe the eyewitness

1853

01:05:45,829 --> 01:05:42,480

accounts is what you're saying

1854

01:05:50,390 --> 01:05:45,839

when it comes to the military pilots yes

1855

01:05:52,230 --> 01:05:50,400

yes and the reason is there's really no

1856

01:05:53,349 --> 01:05:52,240

there's not an official channel even in

1857

01:05:55,349 --> 01:05:53,359

the military it's not an official

1858

01:05:57,829 --> 01:05:55,359

channel if i see a ufo

1859

01:05:59,349 --> 01:05:57,839

uh the faa doesn't have a form where i

1860

01:06:02,630 --> 01:05:59,359

fill out a ufo site

1861

01:06:04,150 --> 01:06:02,640

ufo sighting form there's nothing

1862

01:06:05,910 --> 01:06:04,160

really official like that you can turn

1863

01:06:08,069 --> 01:06:05,920

in a report

1864

01:06:09,349 --> 01:06:08,079

uh but as far as something like that in

1865

01:06:11,109 --> 01:06:09,359

that category a

1866

01:06:13,510 --> 01:06:11,119

it normally means they'll let you sit

1867

01:06:15,349 --> 01:06:13,520

out for a couple of flights and have the

1868

01:06:16,950 --> 01:06:15,359

flight surgeon come in and look at you

1869

01:06:19,510 --> 01:06:16,960

yeah uh or

1870

01:06:19,990 --> 01:06:19,520

unfortunately yes yeah ptsd stress

1871

01:06:22,950 --> 01:06:20,000

whatever

1872

01:06:23,750 --> 01:06:22,960

they're going to find something um but

1873

01:06:27,750 --> 01:06:23,760

some of this

1874

01:06:31,109 --> 01:06:27,760

um footage is

1875

01:06:32,950 --> 01:06:31,119

uncontroversial it's it's just raw data

1876

01:06:34,630 --> 01:06:32,960

and that's why it's fascinating to sit

1877

01:06:37,670 --> 01:06:34,640

there and watch it

1878

01:06:39,430 --> 01:06:37,680

leak out because it gives the rest of us

1879

01:06:40,630 --> 01:06:39,440

who had a suspicion

1880

01:06:43,430 --> 01:06:40,640

these things are flying around the

1881

01:06:45,109 --> 01:06:43,440

airspace that even the military has to

1882

01:06:47,109 --> 01:06:45,119

deal with it from time to time

1883

01:06:49,430 --> 01:06:47,119

and it's okay to just call it what it is

1884

01:06:52,710 --> 01:06:49,440

we don't know we just don't know

1885

01:06:56,309 --> 01:06:52,720

now anytime during your your training

1886

01:06:59,670 --> 01:06:56,319

and and you know in in flight school etc

1887

01:07:00,069 --> 01:06:59,680

was the topic ever brought up if you see

1888

01:07:05,270 --> 01:07:00,079

something

1889

01:07:07,270 --> 01:07:05,280

a danger in the sky you know i mean a

1890

01:07:09,029 --> 01:07:07,280

safety aspect of course

1891

01:07:11,829 --> 01:07:09,039

that part's talking about but it never

1892

01:07:16,069 --> 01:07:11,839

bled over into

1893

01:07:17,910 --> 01:07:16,079

an anomalous object no and then this

1894

01:07:19,910 --> 01:07:17,920

even in school you don't talk about it

1895

01:07:22,789 --> 01:07:19,920

because it's not a thing

1896

01:07:24,630 --> 01:07:22,799

it's just not a topic the only thing

1897

01:07:25,430 --> 01:07:24,640

that you're taught in school is how to

1898

01:07:30,069 --> 01:07:25,440

identify

1899

01:07:32,789 --> 01:07:30,079

things that are in the air that are um

1900

01:07:33,190 --> 01:07:32,799

friend or foe yeah it's as simple as

1901

01:07:35,270 --> 01:07:33,200

that

1902

01:07:37,109 --> 01:07:35,280

it's it's all man-made and you do it by

1903

01:07:38,710 --> 01:07:37,119

silhouette you do it by

1904

01:07:41,109 --> 01:07:38,720

flight characteristics you do it by

1905

01:07:42,309 --> 01:07:41,119

whatever methodology you have but you're

1906

01:07:44,390 --> 01:07:42,319

never taught

1907

01:07:46,470 --> 01:07:44,400

well if you happen to see a ufo that

1908

01:07:48,870 --> 01:07:46,480

that those words are never uttered in

1909

01:07:53,670 --> 01:07:48,880

school

1910

01:07:56,710 --> 01:07:53,680

other pilots have you ever

1911

01:07:58,870 --> 01:07:56,720

has that subject ever come up like

1912

01:08:00,870 --> 01:07:58,880

you know in say a bar or something like

1913

01:08:04,630 --> 01:08:00,880

that

1914

01:08:09,029 --> 01:08:04,640

for me i've had discussions with

1915

01:08:11,349 --> 01:08:09,039

other pilots and i can't remember a time

1916

01:08:13,029 --> 01:08:11,359

where i came across a peer that would

1917

01:08:14,390 --> 01:08:13,039

talk about it

1918

01:08:16,789 --> 01:08:14,400

if they had they just didn't want to

1919

01:08:20,149 --> 01:08:16,799

talk about it

1920

01:08:23,269 --> 01:08:20,159

i have since

1921

01:08:25,829 --> 01:08:23,279

had a few folks that i've talked to that

1922

01:08:30,070 --> 01:08:25,839

were aviation related

1923

01:08:31,510 --> 01:08:30,080

that um they don't get into details but

1924

01:08:33,110 --> 01:08:31,520

they suspect that you know there's some

1925

01:08:35,030 --> 01:08:33,120

weird stuff that this certain day that

1926

01:08:36,950 --> 01:08:35,040

saw some lights it just

1927

01:08:39,269 --> 01:08:36,960

if you can't identify it you don't put

1928

01:08:40,709 --> 01:08:39,279

you a ufo label on it as a pilot that's

1929

01:08:42,470 --> 01:08:40,719

not where you go

1930

01:08:43,910 --> 01:08:42,480

you leave you just leave it as i don't

1931

01:08:45,269 --> 01:08:43,920

know what i saw

1932

01:08:47,590 --> 01:08:45,279

yeah there's a recording that i've

1933

01:08:50,630 --> 01:08:47,600

listened to where

1934

01:08:51,990 --> 01:08:50,640

they obviously encounter a ufo the

1935

01:08:53,990 --> 01:08:52,000

pilots

1936

01:08:56,070 --> 01:08:54,000

not just one plane but there's two of

1937

01:08:57,269 --> 01:08:56,080

them and they're talking to the tower do

1938

01:09:00,470 --> 01:08:57,279

you see this

1939

01:09:01,030 --> 01:09:00,480

and the i think the woman says do you

1940

01:09:03,030 --> 01:09:01,040

want

1941

01:09:04,630 --> 01:09:03,040

to call it a ufo and he said i'm not

1942

01:09:06,390 --> 01:09:04,640

calling it a ufo

1943

01:09:07,669 --> 01:09:06,400

you know they're you know they're

1944

01:09:10,630 --> 01:09:07,679

they're scared to

1945

01:09:11,189 --> 01:09:10,640

uh take that leap it still has a

1946

01:09:13,669 --> 01:09:11,199

negative

1947

01:09:15,110 --> 01:09:13,679

uh stigma in the military it's just

1948

01:09:17,669 --> 01:09:15,120

something you don't talk about

1949

01:09:19,189 --> 01:09:17,679

uh however if it's a hostile act that

1950

01:09:21,829 --> 01:09:19,199

you're seeing

1951

01:09:22,870 --> 01:09:21,839

you still say i have an unidentified

1952

01:09:24,950 --> 01:09:22,880

bogey uh

1953

01:09:26,950 --> 01:09:24,960

it's doing bogey yeah that's what they

1954

01:09:29,269 --> 01:09:26,960

say they give the terms

1955

01:09:31,669 --> 01:09:29,279

uh that could fit in that same category

1956

01:09:35,110 --> 01:09:31,679

but you never use the ufo term within

1957

01:09:37,430 --> 01:09:35,120

uh what they give you for military sake

1958

01:09:38,550 --> 01:09:37,440

so it may be unidentified but you're not

1959

01:09:39,590 --> 01:09:38,560

going to call it a ufo you're just going

1960

01:09:41,910 --> 01:09:39,600

to say i've got an

1961

01:09:43,110 --> 01:09:41,920

unidentified craft hostile axe and then

1962

01:09:45,990 --> 01:09:43,120

describe it

1963

01:09:47,349 --> 01:09:46,000

and location and uh that's that's kind

1964

01:09:50,789 --> 01:09:47,359

of how the military does it

1965

01:09:53,829 --> 01:09:50,799

so they keep it really agnostic

1966

01:09:57,110 --> 01:09:53,839

when you're also when you're

1967

01:09:59,990 --> 01:09:57,120

reporting say an object that you

1968

01:10:01,110 --> 01:10:00,000

know but it's not supposed to be there

1969

01:10:03,830 --> 01:10:01,120

do you ask

1970

01:10:05,510 --> 01:10:03,840

for a radar reading on it like uh you

1971

01:10:06,229 --> 01:10:05,520

know transponder in the whole works i

1972

01:10:09,030 --> 01:10:06,239

mean are you

1973

01:10:09,990 --> 01:10:09,040

are you supposed to communicate that

1974

01:10:12,070 --> 01:10:10,000

yeah exactly

1975

01:10:13,590 --> 01:10:12,080

um anytime you have something here with

1976

01:10:17,350 --> 01:10:13,600

you that you're not aware of

1977

01:10:20,149 --> 01:10:17,360

a you report it as a as a pie rep um

1978

01:10:21,430 --> 01:10:20,159

so other aircraft don't get near it uh

1979

01:10:24,070 --> 01:10:21,440

in case it's not

1980

01:10:25,110 --> 01:10:24,080

listed on let's say a nodem uh notice to

1981

01:10:27,910 --> 01:10:25,120

airmen

1982

01:10:30,950 --> 01:10:27,920

that will say hey we've got a a blimp or

1983

01:10:32,229 --> 01:10:30,960

an aerostat in this area

1984

01:10:33,669 --> 01:10:32,239

watch out for the wires that it's

1985

01:10:35,830 --> 01:10:33,679

connected to that type of thing or

1986

01:10:38,470 --> 01:10:35,840

there's a tower that you're not aware of

1987

01:10:39,990 --> 01:10:38,480

so yes you always report something that

1988

01:10:41,189 --> 01:10:40,000

catches you by surprise that you're not

1989

01:10:42,790 --> 01:10:41,199

aware of

1990

01:10:45,430 --> 01:10:42,800

because you don't know if you're going

1991

01:10:47,590 --> 01:10:45,440

to save the next guy behind you

1992

01:10:49,110 --> 01:10:47,600

for whatever tragedy maybe fall if he's

1993

01:10:51,669 --> 01:10:49,120

unaware as well

1994

01:10:52,950 --> 01:10:51,679

so yeah pilots do report as much as they

1995

01:10:56,310 --> 01:10:52,960

can

1996

01:10:58,310 --> 01:10:56,320

anything that is a threat or unusual

1997

01:11:00,149 --> 01:10:58,320

that is not on the maps or hasn't been

1998

01:11:02,790 --> 01:11:00,159

read before the flight

1999

01:11:03,350 --> 01:11:02,800

well okay i'm uh posting this for uh

2000

01:11:05,350 --> 01:11:03,360

bill

2001

01:11:07,510 --> 01:11:05,360

who's uh behind the scenes he's gonna be

2002

01:11:09,350 --> 01:11:07,520

screening calls later on but this is

2003

01:11:10,550 --> 01:11:09,360

this measure message up here is from

2004

01:11:13,270 --> 01:11:10,560

bill actually

2005

01:11:16,070 --> 01:11:13,280

and uh do you think the need for the

2006

01:11:19,030 --> 01:11:16,080

space force is due to our adversaries

2007

01:11:20,070 --> 01:11:19,040

or possibly a threat from unknowns that

2008

01:11:30,709 --> 01:11:20,080

cannot

2009

01:11:34,070 --> 01:11:32,550

i think we're way behind on the space

2010

01:11:35,669 --> 01:11:34,080

force thing uh

2011

01:11:37,830 --> 01:11:35,679

i'll i'll give you a little sample of

2012

01:11:40,390 --> 01:11:37,840

why i think that when i was

2013

01:11:41,669 --> 01:11:40,400

in military intelligence in california i

2014

01:11:43,590 --> 01:11:41,679

had a friend of mine at the naval post

2015

01:11:46,229 --> 01:11:43,600

graduate school working on

2016

01:11:46,950 --> 01:11:46,239

the star wars defense system that reagan

2017

01:11:49,590 --> 01:11:46,960

oh yeah

2018

01:11:50,870 --> 01:11:49,600

requested this this is for the older

2019

01:11:53,750 --> 01:11:50,880

audience

2020

01:11:55,030 --> 01:11:53,760

and uh some of those experiments and

2021

01:11:56,229 --> 01:11:55,040

research was done by the naval

2022

01:11:57,910 --> 01:11:56,239

postgraduate school

2023

01:11:59,750 --> 01:11:57,920

folks who were getting their masters and

2024

01:12:01,430 --> 01:11:59,760

phds and such

2025

01:12:03,430 --> 01:12:01,440

and a friend of mine was one of these

2026

01:12:06,550 --> 01:12:03,440

nuclear-type physicists

2027

01:12:10,070 --> 01:12:06,560

getting his ph.d and

2028

01:12:12,630 --> 01:12:10,080

one day he he said hey um

2029

01:12:13,830 --> 01:12:12,640

i've i'm working on reagan's stuff but

2030

01:12:15,910 --> 01:12:13,840

i'm having an issue

2031

01:12:18,149 --> 01:12:15,920

uh what do you know about electronics

2032

01:12:19,189 --> 01:12:18,159

equipment i laughed like i work with it

2033

01:12:21,270 --> 01:12:19,199

every day i

2034

01:12:22,790 --> 01:12:21,280

i fix all sorts of fun stuff some things

2035

01:12:25,510 --> 01:12:22,800

i can't talk about

2036

01:12:28,070 --> 01:12:25,520

he goes oh cool i've got an issue with

2037

01:12:30,630 --> 01:12:28,080

my oscilloscope it's not catching

2038

01:12:32,470 --> 01:12:30,640

the three different probe inputs on the

2039

01:12:33,189 --> 01:12:32,480

scope and the timing i need and i can't

2040

01:12:35,110 --> 01:12:33,199

get my

2041

01:12:36,470 --> 01:12:35,120

thesis completed and get a phd if i

2042

01:12:39,030 --> 01:12:36,480

don't get it

2043

01:12:40,630 --> 01:12:39,040

and i said all right what's your problem

2044

01:12:41,590 --> 01:12:40,640

so he describes how he's got this thing

2045

01:12:44,790 --> 01:12:41,600

wired

2046

01:12:46,149 --> 01:12:44,800

in the lab in some room and on the naval

2047

01:12:46,870 --> 01:12:46,159

post graduate school and i said all

2048

01:12:49,110 --> 01:12:46,880

right

2049

01:12:52,149 --> 01:12:49,120

well i got a mental picture but i think

2050

01:12:53,750 --> 01:12:52,159

i need to see the area he said okay

2051
01:12:55,510 --> 01:12:53,760
so he he said what's your clearance and

2052
01:12:56,709 --> 01:12:55,520
i told him and he goes okay let's let's

2053
01:12:58,870 --> 01:12:56,719
go take a look

2054
01:13:00,229 --> 01:12:58,880
so after church one night we were

2055
01:13:01,590 --> 01:13:00,239
sitting there talking in the parking lot

2056
01:13:02,830 --> 01:13:01,600
let me take you down and show you the

2057
01:13:05,110 --> 01:13:02,840
lab because i got to work on this

2058
01:13:06,630 --> 01:13:05,120
tomorrow and it takes me this big long

2059
01:13:08,870 --> 01:13:06,640
building down in the basement

2060
01:13:10,470 --> 01:13:08,880
there's one bulb and the basement's like

2061
01:13:12,070 --> 01:13:10,480
a football field long

2062
01:13:13,510 --> 01:13:12,080
there's one bulb in the center so it

2063
01:13:15,830 --> 01:13:13,520

looks like we're going into some

2064

01:13:17,910 --> 01:13:15,840

movie you know right out of you know

2065

01:13:19,030 --> 01:13:17,920

some sci-fi flick and i'm like uh are we

2066

01:13:20,070 --> 01:13:19,040

supposed to be here yeah you're going to

2067

01:13:22,229 --> 01:13:20,080

be interrogated

2068

01:13:23,750 --> 01:13:22,239

yeah and have i said something wrong to

2069

01:13:24,950 --> 01:13:23,760

you man did you have to report me on

2070

01:13:26,950 --> 01:13:24,960

something

2071

01:13:29,350 --> 01:13:26,960

so we get to the center of this building

2072

01:13:31,350 --> 01:13:29,360

on the basement he opens these two doors

2073

01:13:33,189 --> 01:13:31,360

into the lab clicks on the lights and i

2074

01:13:35,990 --> 01:13:33,199

swear i'm on a hollywood set

2075

01:13:37,430 --> 01:13:36,000

this lab was about a 20 foot by 20 foot

2076

01:13:39,750 --> 01:13:37,440

maybe 25 foot

2077

01:13:42,310 --> 01:13:39,760

square and it had stuff hanging

2078

01:13:45,669 --> 01:13:42,320

everywhere electronics it had

2079

01:13:47,270 --> 01:13:45,679

you know beakers it had glass it hit

2080

01:13:49,110 --> 01:13:47,280

it looked like a hollywood set and i

2081

01:13:50,470 --> 01:13:49,120

said this place is a mess

2082

01:13:52,630 --> 01:13:50,480

and what's the coffin doing in the

2083

01:13:53,990 --> 01:13:52,640

middle of the room he goes that's that's

2084

01:13:58,149 --> 01:13:54,000

not a coffin that's a

2085

01:14:01,590 --> 01:13:58,159

5 megawatt pulse laser like a what

2086

01:14:02,550 --> 01:14:01,600

a 5 megawatt what pulse laser really and

2087

01:14:04,229 --> 01:14:02,560

uh yeah

2088

01:14:05,910 --> 01:14:04,239

that's what i said really it looks like

2089

01:14:06,310 --> 01:14:05,920

a coffin because you got it bordered up

2090

01:14:08,470 --> 01:14:06,320

in

2091

01:14:10,870 --> 01:14:08,480

plywood and he goes no we got the ends

2092

01:14:13,990 --> 01:14:10,880

open so that's good

2093

01:14:16,229 --> 01:14:14,000

so he uh was showing me the target set

2094

01:14:17,030 --> 01:14:16,239

that he was firing this megawatt laser

2095

01:14:18,950 --> 01:14:17,040

into

2096

01:14:21,030 --> 01:14:18,960

looked like a diving helmet that's the

2097

01:14:22,470 --> 01:14:21,040

target six feet away from the

2098

01:14:24,470 --> 01:14:22,480

laser maybe it was 10 feet away from the

2099

01:14:26,550 --> 01:14:24,480

laser it looked like a diving helmet but

2100

01:14:29,270 --> 01:14:26,560

is where they put the vacuum

2101

01:14:29,590 --> 01:14:29,280

targets in so it set this little little

2102

01:14:32,070 --> 01:14:29,600

uh

2103

01:14:34,390 --> 01:14:32,080

chunk of metal dangling in front of this

2104

01:14:36,390 --> 01:14:34,400

glass inside this vacuumed

2105

01:14:37,590 --> 01:14:36,400

system and they had like three probes

2106

01:14:40,630 --> 01:14:37,600

sitting in there to pull the

2107

01:14:42,950 --> 01:14:40,640

voltage the current and the flash

2108

01:14:44,550 --> 01:14:42,960

and all the data like that some sensors

2109

01:14:45,750 --> 01:14:44,560

and he ran those sensors back to the

2110

01:14:48,950 --> 01:14:45,760

oscilloscope so when he

2111

01:14:50,310 --> 01:14:48,960

shot this piece of metal his paper was

2112

01:14:51,830 --> 01:14:50,320

to see what the effects were from a

2113

01:14:54,870 --> 01:14:51,840

laser strike on

2114

01:14:57,669 --> 01:14:54,880

metals like that's kind of cool

2115

01:14:58,870 --> 01:14:57,679

so he said goggle up i said oh man

2116

01:15:00,550 --> 01:14:58,880

really you're gonna fire this off in

2117

01:15:03,990 --> 01:15:00,560

front of me and he goes yeah

2118

01:15:05,510 --> 01:15:04,000

so um we goggle up he fires or he

2119

01:15:07,189 --> 01:15:05,520

sets everything up and you hear the hum

2120

01:15:10,070 --> 01:15:07,199

of all the equipment turns the

2121

01:15:11,590 --> 01:15:10,080

oscilloscope on and he goes all right

2122

01:15:12,870 --> 01:15:11,600

we're about to fire and he counts down

2123

01:15:15,990 --> 01:15:12,880

three two one

2124

01:15:18,709 --> 01:15:16,000

and hear us click i go

2125

01:15:20,470 --> 01:15:18,719

was that it and he goes yeah we just we

2126
01:15:22,470 --> 01:15:20,480
just shot that piece of metal i said

2127
01:15:24,229 --> 01:15:22,480
i was expecting something like pew pew

2128
01:15:25,110 --> 01:15:24,239
you know something really cool you see

2129
01:15:27,510 --> 01:15:25,120
the thing light up

2130
01:15:28,790 --> 01:15:27,520
he goes oh man it's a it's a like a 10

2131
01:15:32,950 --> 01:15:28,800
nanosecond

2132
01:15:35,830 --> 01:15:32,960
pulse laser it's just a packet of energy

2133
01:15:36,790 --> 01:15:35,840
and uh i said okay now what do we do he

2134
01:15:39,590 --> 01:15:36,800
looked at the scope

2135
01:15:40,630 --> 01:15:39,600
and he has a polaroid on it and the

2136
01:15:42,229 --> 01:15:40,640
three different

2137
01:15:43,990 --> 01:15:42,239
lines that were coming in from the

2138
01:15:45,669 --> 01:15:44,000

feedback were off

2139

01:15:46,709 --> 01:15:45,679

they weren't close to each other two

2140

01:15:47,830 --> 01:15:46,719

were right next to each other and one

2141

01:15:49,430 --> 01:15:47,840

was way off

2142

01:15:52,630 --> 01:15:49,440

make a long story short that was his

2143

01:15:55,030 --> 01:15:52,640

problem his theory and all his math

2144

01:15:56,870 --> 01:15:55,040

said that these three arcs are supposed

2145

01:16:00,229 --> 01:15:56,880

to be close to each other for pulse

2146

01:16:01,590 --> 01:16:00,239

light and current and uh he said if i

2147

01:16:03,750 --> 01:16:01,600

can't figure out how that

2148

01:16:05,590 --> 01:16:03,760

that third one gets over there or why my

2149

01:16:07,990 --> 01:16:05,600

my math is so far off

2150

01:16:08,630 --> 01:16:08,000

my calculations and i'm kind of stuck

2151

01:16:11,110 --> 01:16:08,640

i'm

2152

01:16:12,950 --> 01:16:11,120

two months away from graduation so we

2153

01:16:14,070 --> 01:16:12,960

put it all back down after about five or

2154

01:16:16,070 --> 01:16:14,080

six more shots

2155

01:16:17,430 --> 01:16:16,080

and it left the dent in this metal it

2156

01:16:18,709 --> 01:16:17,440

was pretty cool looking didn't go

2157

01:16:21,110 --> 01:16:18,719

straight through but it left a

2158

01:16:22,470 --> 01:16:21,120

pretty heavy dent we shot copper i think

2159

01:16:23,990 --> 01:16:22,480

that night

2160

01:16:26,149 --> 01:16:24,000

and uh we get in the parking lot we're

2161

01:16:27,990 --> 01:16:26,159

about to leave and uh i said have you

2162

01:16:30,310 --> 01:16:28,000

ever checked your leads

2163

01:16:31,910 --> 01:16:30,320

from your target to the oscope and he

2164

01:16:34,149 --> 01:16:31,920

goes why would i do that

2165

01:16:35,110 --> 01:16:34,159

i said you got 20 foot of room i mean

2166

01:16:36,709 --> 01:16:35,120

you've got to stretch

2167

01:16:38,149 --> 01:16:36,719

those leads all the way across this room

2168

01:16:39,910 --> 01:16:38,159

from the target to the

2169

01:16:41,189 --> 01:16:39,920

the scope have you ever pulled those

2170

01:16:42,149 --> 01:16:41,199

three leads out and he goes why would i

2171

01:16:43,590 --> 01:16:42,159

do that

2172

01:16:45,510 --> 01:16:43,600

i said what if one of those leads is

2173

01:16:47,270 --> 01:16:45,520

longer than the other

2174

01:16:49,030 --> 01:16:47,280

and he jumped out of the car started

2175

01:16:49,830 --> 01:16:49,040

running back to the room and i said oh

2176

01:16:52,709 --> 01:16:49,840

no

2177

01:16:53,750 --> 01:16:52,719

i think we're onto something he he tore

2178

01:16:56,310 --> 01:16:53,760

those three leads out

2179

01:16:57,590 --> 01:16:56,320

threw him out in the dark hallway and

2180

01:17:01,110 --> 01:16:57,600

sure enough

2181

01:17:03,750 --> 01:17:01,120

of the three leads one had

2182

01:17:05,990 --> 01:17:03,760

one extra 10 foot length of bnc cable on

2183

01:17:08,070 --> 01:17:06,000

it and it was causing the problem

2184

01:17:09,910 --> 01:17:08,080

and he took that off made sure all three

2185

01:17:11,430 --> 01:17:09,920

leads the exact same length went back in

2186

01:17:12,870 --> 01:17:11,440

fired that thing up again it was a

2187

01:17:15,669 --> 01:17:12,880

perfect picture

2188

01:17:18,310 --> 01:17:15,679

and he graduated two months later with

2189

01:17:21,430 --> 01:17:18,320

this phd

2190

01:17:23,990 --> 01:17:21,440

so if if that was happening and we were

2191

01:17:24,950 --> 01:17:24,000

we were testing effects of lasers in

2192

01:17:28,470 --> 01:17:24,960

space

2193

01:17:30,229 --> 01:17:28,480

in 1985 do i think we're on target with

2194

01:17:32,390 --> 01:17:30,239

space force now no

2195

01:17:33,990 --> 01:17:32,400

we're late there's there's been stuff

2196

01:17:35,510 --> 01:17:34,000

going on for a long time that we're just

2197

01:17:37,430 --> 01:17:35,520

late to the game

2198

01:17:39,990 --> 01:17:37,440

i think uh you know one of the things

2199

01:17:42,470 --> 01:17:40,000

you know this is of course

2200

01:17:43,110 --> 01:17:42,480

more or less off the topic of ufos but

2201

01:17:46,149 --> 01:17:43,120

still

2202

01:17:49,030 --> 01:17:46,159

um you know we have to be careful the

2203

01:17:50,470 --> 01:17:49,040

can you imagine having the dominance of

2204

01:17:52,950 --> 01:17:50,480

satellites

2205

01:17:54,630 --> 01:17:52,960

what that could do to a country as far

2206

01:17:55,590 --> 01:17:54,640

as crippling we could be totally

2207

01:17:57,189 --> 01:17:55,600

crippled

2208

01:17:59,350 --> 01:17:57,199

if our satellites were taken out and i

2209

01:18:00,070 --> 01:17:59,360

know the i think it was the chinese had

2210

01:18:02,790 --> 01:18:00,080

a uh

2211

01:18:04,149 --> 01:18:02,800

they had a a satellite destroy another

2212

01:18:08,390 --> 01:18:04,159

satellite

2213

01:18:10,630 --> 01:18:08,400

pretty scary to to read about that

2214

01:18:12,630 --> 01:18:10,640

it's a show of force and uh

2215

01:18:13,990 --> 01:18:12,640

unfortunately we were

2216

01:18:15,270 --> 01:18:14,000

going to show them we could do the same

2217

01:18:15,990 --> 01:18:15,280

thing we did the same thing and now

2218

01:18:17,750 --> 01:18:16,000

we've got

2219

01:18:19,110 --> 01:18:17,760

two satellites worth of debris hanging

2220

01:18:20,630 --> 01:18:19,120

out with all the other satellites that

2221

01:18:23,590 --> 01:18:20,640

are trying to orbit

2222

01:18:24,229 --> 01:18:23,600

yeah yeah we showed them but now we've

2223

01:18:26,630 --> 01:18:24,239

got a

2224

01:18:28,229 --> 01:18:26,640

a garbage problem that no one's cleaning

2225

01:18:30,470 --> 01:18:28,239

up on all three

2226

01:18:32,229 --> 01:18:30,480

the space debris is i heard how many

2227

01:18:34,550 --> 01:18:32,239

pieces of space debris it's

2228

01:18:35,270 --> 01:18:34,560

it's just uncanny i mean it's hard to

2229

01:18:37,030 --> 01:18:35,280

fathom

2230

01:18:39,430 --> 01:18:37,040

with what's floating around and if

2231

01:18:42,229 --> 01:18:39,440

you're going the wrong way

2232

01:18:44,070 --> 01:18:42,239

well yeah well even the iss the space

2233

01:18:45,830 --> 01:18:44,080

station up there it's traveling about 17

2234

01:18:48,790 --> 01:18:45,840

000 miles per hour and it's

2235

01:18:49,350 --> 01:18:48,800

it's got to not touch any of that debris

2236

01:18:50,470 --> 01:18:49,360

yeah

2237

01:18:52,950 --> 01:18:50,480

because it'll go right through the

2238

01:18:55,510 --> 01:18:52,960

systems there and so it was just

2239

01:18:56,470 --> 01:18:55,520

ridiculous to to read the history on

2240

01:18:59,750 --> 01:18:56,480

that

2241

01:19:02,550 --> 01:18:59,760

and um i i don't know you know

2242

01:19:04,149 --> 01:19:02,560

what it showed besides the capabilities

2243

01:19:07,110 --> 01:19:04,159

of both but

2244

01:19:08,310 --> 01:19:07,120

the fact that uh trump set up space

2245

01:19:10,229 --> 01:19:08,320

force is

2246

01:19:11,910 --> 01:19:10,239

a plus because i don't know why the

2247

01:19:15,270 --> 01:19:11,920

other presidents three decades ago

2248

01:19:18,390 --> 01:19:15,280

didn't we have we've

2249

01:19:20,310 --> 01:19:18,400

we've had the need for a long time now

2250

01:19:22,310 --> 01:19:20,320

martin the other issue no one's talking

2251

01:19:23,990 --> 01:19:22,320

about is what happens now that the

2252

01:19:25,990 --> 01:19:24,000

magnetic field of the earth is weakened

2253

01:19:27,590 --> 01:19:26,000

and we've got cmes

2254

01:19:30,709 --> 01:19:27,600

starting to fire back up on the sun in

2255

01:19:34,709 --> 01:19:32,550

china has nothing on the sun the sun can

2256

01:19:37,350 --> 01:19:34,719

do a lot of damage

2257

01:19:37,990 --> 01:19:37,360

well yeah i mean the fact i mean that's

2258

01:19:40,310 --> 01:19:38,000

they think

2259

01:19:41,590 --> 01:19:40,320

you know mars had the protective field

2260

01:19:43,430 --> 01:19:41,600

around it at one time

2261

01:19:44,709 --> 01:19:43,440

you know once you lose that you can be

2262

01:19:47,030 --> 01:19:44,719

toast it's scary

2263

01:19:49,110 --> 01:19:47,040

to think about that it's weakening and

2264

01:19:50,310 --> 01:19:49,120

uh they've actually seen a distance uh i

2265

01:19:52,790 --> 01:19:50,320

mean a difference over

2266

01:19:54,149 --> 01:19:52,800

kind of a short period of time which is

2267

01:19:57,750 --> 01:19:54,159

is not

2268

01:19:59,830 --> 01:19:57,760

worry about that's for sure

2269

01:20:01,110 --> 01:19:59,840

yeah all different ways here's another

2270

01:20:04,630 --> 01:20:01,120

question up here

2271

01:20:06,149 --> 01:20:04,640

is anyone studying the uh target grades

2272

01:20:08,550 --> 01:20:06,159

do you know what that is that were

2273

01:20:09,590 --> 01:20:08,560

crashed on the moon i'm not familiar

2274

01:20:12,629 --> 01:20:09,600

with that study

2275

01:20:14,550 --> 01:20:12,639

um so i i don't know it's it's a good

2276

01:20:15,510 --> 01:20:14,560

question and i'm i'm not familiar with

2277

01:20:17,430 --> 01:20:15,520

it i wish i

2278

01:20:18,870 --> 01:20:17,440

i had that kind of uh background in it

2279

01:20:20,070 --> 01:20:18,880

but i would have to

2280

01:20:21,990 --> 01:20:20,080

google that because i don't even know

2281

01:20:24,470 --> 01:20:22,000

what that is uh

2282

01:20:25,669 --> 01:20:24,480

i'm just not familiar with it myself but

2283

01:20:29,110 --> 01:20:25,679

i do know that

2284

01:20:32,149 --> 01:20:29,120

um one of the uh possibilities

2285

01:20:34,229 --> 01:20:32,159

uh jonathan or john brandenburg has

2286

01:20:35,510 --> 01:20:34,239

stated that mars was attacked about 200

2287

01:20:38,790 --> 01:20:35,520

000 years ago

2288

01:20:40,149 --> 01:20:38,800

dropped a couple of um air bombs uh on

2289

01:20:42,550 --> 01:20:40,159

cydonia

2290

01:20:43,350 --> 01:20:42,560

and his work is just extraordinary

2291

01:20:46,070 --> 01:20:43,360

because

2292

01:20:47,350 --> 01:20:46,080

he backs it with all the different

2293

01:20:48,149 --> 01:20:47,360

readings that have come back from the

2294

01:20:49,430 --> 01:20:48,159

rovers

2295

01:20:52,229 --> 01:20:49,440

the different isotopes that were

2296

01:20:53,110 --> 01:20:52,239

involved and whatever it was was nuclear

2297

01:20:55,990 --> 01:20:53,120

nature

2298

01:20:56,709 --> 01:20:56,000

so that was fascinating i remember what

2299

01:21:00,149 --> 01:20:56,719

these things are

2300

01:21:04,629 --> 01:21:00,159

okay these are these little tiny little

2301

01:21:07,270 --> 01:21:04,639

i'll try to see if i can uh pull one up

2302

01:21:08,550 --> 01:21:07,280

but i i'm not familiar with that that

2303

01:21:10,709 --> 01:21:08,560

that uh

2304

01:21:12,070 --> 01:21:10,719

that was discovered on the moon now i

2305

01:21:17,910 --> 01:21:12,080

know there was something that

2306

01:21:21,110 --> 01:21:19,430

trying to remember what it was bacteria

2307

01:21:22,629 --> 01:21:21,120

or something on it that was sitting in

2308

01:21:23,430 --> 01:21:22,639

space for a long time which is pretty

2309

01:21:25,350 --> 01:21:23,440

amazing

2310

01:21:27,189 --> 01:21:25,360

yep plankton they've had some little

2311

01:21:29,270 --> 01:21:27,199

small plankton on the

2312

01:21:31,189 --> 01:21:29,280

windshields of the space shuttle at that

2313

01:21:34,229 --> 01:21:31,199

time that's these guys

2314

01:21:36,229 --> 01:21:34,239

yep those guys can i remember seeing

2315

01:21:38,070 --> 01:21:36,239

them but those guys can last in anything

2316

01:21:39,750 --> 01:21:38,080

they're just tough tough as nails and

2317

01:21:41,590 --> 01:21:39,760

they're ugly as everything

2318

01:21:43,110 --> 01:21:41,600

yeah they're they're not only a mother

2319

01:21:46,310 --> 01:21:43,120

could love something like that

2320

01:21:49,590 --> 01:21:46,320

i think yeah but uh the other issue

2321

01:21:51,350 --> 01:21:49,600

um with with the earth is that we do

2322

01:21:52,629 --> 01:21:51,360

tend to be on a cycle of about every

2323

01:21:53,910 --> 01:21:52,639

twelve thousand twelve thousand five

2324

01:21:57,590 --> 01:21:53,920

hundred years

2325

01:22:00,229 --> 01:21:57,600

um and a real smart guy uh on

2326

01:22:01,350 --> 01:22:00,239

suspicious observers website on youtube

2327

01:22:03,350 --> 01:22:01,360

name ben davidson

2328

01:22:05,669 --> 01:22:03,360

has been leading the charge on showing

2329

01:22:07,910 --> 01:22:05,679

how the our sun

2330

01:22:10,070 --> 01:22:07,920

micro novas about every 12 thousand

2331

01:22:12,709 --> 01:22:10,080

years and it causes the extinction

2332

01:22:13,750 --> 01:22:12,719

events on the planet and it's

2333

01:22:15,430 --> 01:22:13,760

fascinating

2334

01:22:17,189 --> 01:22:15,440

uh if you keep going back every twelve

2335

01:22:19,350 --> 01:22:17,199

thousand twelve thousand five hundred

2336

01:22:22,629 --> 01:22:19,360

you'll get to the next extinction event

2337

01:22:24,950 --> 01:22:22,639

and it's and it's where are we right now

2338

01:22:25,750 --> 01:22:24,960

we're at 12 000. we're at the mayan

2339

01:22:29,189 --> 01:22:25,760

calendar 12

2340

01:22:30,709 --> 01:22:29,199

000. don't bother with life insurance

2341

01:22:31,830 --> 01:22:30,719

don't worry about china uh the

2342

01:22:34,149 --> 01:22:31,840

satellites are going to come out of the

2343

01:22:35,830 --> 01:22:34,159

air all by themselves

2344

01:22:37,910 --> 01:22:35,840

um i'm going to i'm going to be putting

2345

01:22:39,189 --> 01:22:37,920

up the phone number here in just a few

2346

01:22:41,350 --> 01:22:39,199

minutes but

2347

01:22:42,310 --> 01:22:41,360

i thought we could talk about a couple

2348

01:22:45,350 --> 01:22:42,320

of other

2349

01:22:45,750 --> 01:22:45,360

of these images and here's one right

2350

01:22:48,390 --> 01:22:45,760

here

2351
01:22:49,990 --> 01:22:48,400
can you describe this one and again for

2352
01:22:50,950 --> 01:22:50,000
the audio listener i'm going to have

2353
01:22:53,510 --> 01:22:50,960
these images

2354
01:22:55,189 --> 01:22:53,520
all in the show notes not a problem this

2355
01:22:58,629 --> 01:22:55,199
is off the stereo

2356
01:23:00,229 --> 01:22:58,639
ahead 304 angstrom and it's looking i

2357
01:23:03,350 --> 01:23:00,239
believe at the isotope

2358
01:23:06,149 --> 01:23:03,360
for hydrogen if not iron i

2359
01:23:07,510 --> 01:23:06,159
have to look at that again and you can

2360
01:23:10,709 --> 01:23:07,520
see there's no direct

2361
01:23:12,310 --> 01:23:10,719
line of energy from the sun surface to

2362
01:23:15,430 --> 01:23:12,320
this object

2363
01:23:18,790 --> 01:23:15,440

and so it's not a cme related object

2364

01:23:21,030 --> 01:23:18,800

it was only in one particular

2365

01:23:21,990 --> 01:23:21,040

frame but i'm glad you showed this one

2366

01:23:25,070 --> 01:23:22,000

because it shows

2367

01:23:28,390 --> 01:23:25,080

uh the proximity to the sun and the

2368

01:23:30,149 --> 01:23:28,400

unconnectivity of the sun to it

2369

01:23:32,070 --> 01:23:30,159

because cmes do throw things out like

2370

01:23:35,510 --> 01:23:32,080

you'll see just off to the left

2371

01:23:37,270 --> 01:23:35,520

um a filament that sometimes will erupt

2372

01:23:39,189 --> 01:23:37,280

off the surface of the sun and through

2373

01:23:42,149 --> 01:23:39,199

magnetic forces stay there or

2374

01:23:44,229 --> 01:23:42,159

launch into uh outer space as a cme some

2375

01:23:47,189 --> 01:23:44,239

type of

2376

01:23:48,470 --> 01:23:47,199

magnetic extrusion but this particular

2377

01:23:51,590 --> 01:23:48,480

object has a

2378

01:23:53,350 --> 01:23:51,600

white bright white into it what that

2379

01:23:55,990 --> 01:23:53,360

means for this particular sensor

2380

01:23:57,910 --> 01:23:56,000

is it's looking for the 304 angstrom

2381

01:24:00,790 --> 01:23:57,920

frequency

2382

01:24:01,510 --> 01:24:00,800

the white indicates it's maximized the

2383

01:24:04,870 --> 01:24:01,520

frequency

2384

01:24:08,310 --> 01:24:04,880

pixels there's no other place for this

2385

01:24:11,350 --> 01:24:08,320

energy to go so if the sun

2386

01:24:13,590 --> 01:24:11,360

is not white but in this case

2387

01:24:14,870 --> 01:24:13,600

you can see all the different attributes

2388

01:24:16,390 --> 01:24:14,880

of

2389

01:24:18,629 --> 01:24:16,400

what's really a black and white that's

2390

01:24:21,189 --> 01:24:18,639

that's falsely colored orange

2391

01:24:22,950 --> 01:24:21,199

but you'll see the different gray scales

2392

01:24:23,750 --> 01:24:22,960

and then they colorize it well in this

2393

01:24:25,910 --> 01:24:23,760

case

2394

01:24:26,870 --> 01:24:25,920

there's no gray scale for white white is

2395

01:24:29,750 --> 01:24:26,880

white

2396

01:24:30,629 --> 01:24:29,760

and so whatever this object is that has

2397

01:24:38,149 --> 01:24:30,639

a

2398

01:24:41,510 --> 01:24:38,159

structure

2399

01:24:44,070 --> 01:24:41,520

that is um i would say the length

2400

01:24:45,830 --> 01:24:44,080

of earth and a half in size in

2401
01:24:49,030 --> 01:24:45,840
comparison to the sun

2402
01:24:51,910 --> 01:24:49,040
wow if this is within the chromosphere

2403
01:24:54,470 --> 01:24:51,920
or photosphere of the sun

2404
01:24:57,750 --> 01:24:54,480
and this particular sensor stereo a is

2405
01:25:00,550 --> 01:24:57,760
64 million miles away from earth

2406
01:25:01,910 --> 01:25:00,560
this is not debris this is not a

2407
01:25:04,550 --> 01:25:01,920
satellite

2408
01:25:06,310 --> 01:25:04,560
this is pure space in the atmosphere of

2409
01:25:07,910 --> 01:25:06,320
the sun versus the satellite that took

2410
01:25:11,189 --> 01:25:07,920
the picture

2411
01:25:12,070 --> 01:25:11,199
and um again i used gestalt principles

2412
01:25:18,709 --> 01:25:12,080
to

2413
01:25:21,990 --> 01:25:18,719

and are not asteroids and are not known

2414

01:25:25,430 --> 01:25:22,000

and this particular object

2415

01:25:27,910 --> 01:25:25,440

has enough structure to it that

2416

01:25:29,270 --> 01:25:27,920

um it looks like the back end of

2417

01:25:31,910 --> 01:25:29,280

something that's hauling

2418

01:25:32,629 --> 01:25:31,920

but through our our solar system decided

2419

01:25:37,110 --> 01:25:32,639

to

2420

01:25:39,910 --> 01:25:37,120

sun

2421

01:25:40,390 --> 01:25:39,920

so good question if it's if it's

2422

01:25:41,990 --> 01:25:40,400

actually

2423

01:25:43,990 --> 01:25:42,000

interfering and interacting with the

2424

01:25:45,910 --> 01:25:44,000

sun's um

2425

01:25:47,030 --> 01:25:45,920

atmosphere you're looking at about an

2426

01:25:49,590 --> 01:25:47,040

earth and a half

2427

01:25:50,550 --> 01:25:49,600

size of a structured object cutting

2428

01:25:52,870 --> 01:25:50,560

across

2429

01:25:53,830 --> 01:25:52,880

you know i've heard that before when

2430

01:25:56,550 --> 01:25:53,840

people have seen

2431

01:25:56,870 --> 01:25:56,560

anomalies near the sun there they use

2432

01:26:00,149 --> 01:25:56,880

that

2433

01:26:01,990 --> 01:26:00,159

as a uh you know comparison it's

2434

01:26:03,830 --> 01:26:02,000

like earth size or twice the size of the

2435

01:26:07,110 --> 01:26:03,840

earth uh near the sun

2436

01:26:10,310 --> 01:26:07,120

uh unknown you know whatever it is

2437

01:26:11,910 --> 01:26:10,320

sure it's bizarre you'll also see the

2438

01:26:13,990 --> 01:26:11,920

the light on this one or the

2439

01:26:15,990 --> 01:26:14,000

back side of this this object that seems

2440

01:26:18,149 --> 01:26:16,000

to be flowing away from us

2441

01:26:19,430 --> 01:26:18,159

is pure white but there's no streak

2442

01:26:22,709 --> 01:26:19,440

there's no cte

2443

01:26:25,110 --> 01:26:22,719

there's the sensor is working perfectly

2444

01:26:25,750 --> 01:26:25,120

uh so there's no malfunction or thermal

2445

01:26:28,070 --> 01:26:25,760

runaway

2446

01:26:29,590 --> 01:26:28,080

on the sensor itself it's kind of iffy

2447

01:26:30,870 --> 01:26:29,600

this is giving you probably the purest

2448

01:26:32,870 --> 01:26:30,880

view of something

2449

01:26:33,990 --> 01:26:32,880

that was really there for that

2450

01:26:37,350 --> 01:26:34,000

particular frame that's

2451
01:26:38,229 --> 01:26:37,360
that's the scary part this to me as a

2452
01:26:41,590 --> 01:26:38,239
scientist

2453
01:26:43,669 --> 01:26:41,600
go i've

2454
01:26:46,229 --> 01:26:43,679
i've researched artifacts i've

2455
01:26:49,189 --> 01:26:46,239
researched all the camera problems

2456
01:26:50,870 --> 01:26:49,199
this is a real good pure example of this

2457
01:26:52,310 --> 01:26:50,880
was here and then it's gone

2458
01:26:54,550 --> 01:26:52,320
and it's something i can't explain but

2459
01:26:57,590 --> 01:26:54,560
it's really cool to look at

2460
01:26:58,950 --> 01:26:57,600
yeah i agree with that um so um if

2461
01:27:01,830 --> 01:26:58,960
anyone wants to call in

2462
01:27:03,189 --> 01:27:01,840
the show that phone number is up on the

2463
01:27:06,070 --> 01:27:03,199

screen if you're watching

2464

01:27:10,229 --> 01:27:06,080

on youtube or facebook or twitch that

2465

01:27:12,550 --> 01:27:10,239

number is 855-472-5483

2466

01:27:13,590 --> 01:27:12,560

and operators are standing by that's

2467

01:27:15,750 --> 01:27:13,600

bill that is

2468

01:27:17,910 --> 01:27:15,760

is standing by and he will take your

2469

01:27:18,550 --> 01:27:17,920

call so i i don't know do we look at

2470

01:27:21,750 --> 01:27:18,560

this one

2471

01:27:23,430 --> 01:27:21,760

yet no

2472

01:27:25,669 --> 01:27:23,440

is that the sun's surface is what we're

2473

01:27:27,590 --> 01:27:25,679

seeing yes to the left

2474

01:27:29,669 --> 01:27:27,600

uh the sun surface to the right where

2475

01:27:30,709 --> 01:27:29,679

the anomaly is it's the atmosphere or

2476

01:27:32,870 --> 01:27:30,719

the chromosphere

2477

01:27:35,270 --> 01:27:32,880

uh of which this object was cutting

2478

01:27:41,750 --> 01:27:38,629

again you can see the three or four

2479

01:27:44,790 --> 01:27:41,760

lengths of light coming from a dark

2480

01:27:47,350 --> 01:27:44,800

center or a some type of

2481

01:27:48,310 --> 01:27:47,360

center of of this object plus that

2482

01:27:53,030 --> 01:27:48,320

little smaller

2483

01:27:57,270 --> 01:27:55,430

this doesn't have an explanation because

2484

01:27:57,590 --> 01:27:57,280

asteroids and comets don't travel like

2485

01:28:01,030 --> 01:27:57,600

this

2486

01:28:04,390 --> 01:28:01,040

nor do they organize in straight lines

2487

01:28:06,870 --> 01:28:04,400

around a specific spot so i

2488

01:28:08,149 --> 01:28:06,880

i chose this one as an another example

2489

01:28:10,790 --> 01:28:08,159

of there's no streaking

2490

01:28:12,070 --> 01:28:10,800

there's no cte the sensor was working

2491

01:28:14,070 --> 01:28:12,080

fine

2492

01:28:15,189 --> 01:28:14,080

but there's enough anomalous

2493

01:28:17,350 --> 01:28:15,199

characteristics

2494

01:28:19,510 --> 01:28:17,360

that are not explained by anything in

2495

01:28:21,510 --> 01:28:19,520

astronomy right now

2496

01:28:24,390 --> 01:28:21,520

that would give you satisfaction of the

2497

01:28:27,510 --> 01:28:24,400

identity of this object

2498

01:28:28,390 --> 01:28:27,520

and here's the other fact astrobiology

2499

01:28:31,590 --> 01:28:28,400

is is

2500

01:28:34,790 --> 01:28:31,600

young astrobiology is the study of

2501

01:28:35,110 --> 01:28:34,800

life in space astrophysics is the study

2502

01:28:38,550 --> 01:28:35,120

of

2503

01:28:42,390 --> 01:28:38,560

processes on inorganic materials and

2504

01:28:44,310 --> 01:28:42,400

and forces the two worlds never touch um

2505

01:28:46,550 --> 01:28:44,320

there's computer systems that take all

2506

01:28:48,629 --> 01:28:46,560

this data from these satellites

2507

01:28:50,310 --> 01:28:48,639

and the lamsol computer will will tell

2508

01:28:52,070 --> 01:28:50,320

you you know where's a flare

2509

01:28:53,430 --> 01:28:52,080

or the filament is you know where the

2510

01:28:55,030 --> 01:28:53,440

eruptions are

2511

01:28:56,470 --> 01:28:55,040

but they're not looking for life nor was

2512

01:28:58,229 --> 01:28:56,480

a computer

2513

01:29:00,149 --> 01:28:58,239

ever designed or programmed in the

2514

01:29:03,189 --> 01:29:00,159

algorithms to look for life

2515

01:29:04,709 --> 01:29:03,199

it looks for processes so when you

2516

01:29:06,629 --> 01:29:04,719

you capture something like this and show

2517

01:29:08,310 --> 01:29:06,639

it to an astrophysicist they have

2518

01:29:09,910 --> 01:29:08,320

nothing for you

2519

01:29:12,229 --> 01:29:09,920

the computers won't get the computers

2520

01:29:15,270 --> 01:29:12,239

won't catch it they don't identify it

2521

01:29:17,750 --> 01:29:15,280

because it was never part of their field

2522

01:29:19,990 --> 01:29:17,760

of study and uh some of them just kind

2523

01:29:23,910 --> 01:29:20,000

of poo poo it off and try to find

2524

01:29:25,350 --> 01:29:23,920

an a explanation that fits their

2525

01:29:28,550 --> 01:29:25,360

paradigm

2526

01:29:30,390 --> 01:29:28,560

but i have enough evidence that requires

2527

01:29:31,590 --> 01:29:30,400

people to have a new paradigm

2528

01:29:33,350 --> 01:29:31,600

and it's time to start talking

2529

01:29:34,229 --> 01:29:33,360

astrobiology not just astrophysics

2530

01:29:36,470 --> 01:29:34,239

anymore

2531

01:29:38,790 --> 01:29:36,480

wow how about that uh so we have

2532

01:29:40,070 --> 01:29:38,800

jonathan on the line from north carolina

2533

01:29:43,270 --> 01:29:40,080

jonathan welcome

2534

01:29:44,070 --> 01:29:43,280

to the show well thank you for having me

2535

01:29:48,229 --> 01:29:44,080

on

2536

01:29:49,990 --> 01:29:48,239

week has been pretty extraordinary in

2537

01:29:51,350 --> 01:29:50,000

terms of ufo developments with the

2538

01:29:54,390 --> 01:29:51,360

article in the debrief

2539

01:29:55,830 --> 01:29:54,400

and then the israeli scientists coming

2540

01:29:58,550 --> 01:29:55,840

out and talking

2541

01:29:59,590 --> 01:29:58,560

about you know his claims with the ufos

2542

01:30:01,990 --> 01:29:59,600

and the government

2543

01:30:03,430 --> 01:30:02,000

and i guess my question is that there

2544

01:30:04,070 --> 01:30:03,440

there are people who are in high

2545

01:30:05,590 --> 01:30:04,080

positions

2546

01:30:07,830 --> 01:30:05,600

teams that are willing to leak you know

2547

01:30:09,590 --> 01:30:07,840

information and tell the people

2548

01:30:11,110 --> 01:30:09,600

public the truth but there seems to be

2549

01:30:12,870 --> 01:30:11,120

such hesitation

2550

01:30:14,629 --> 01:30:12,880

on the government and the question is

2551

01:30:16,470 --> 01:30:14,639

what do you think the public can do to

2552

01:30:19,189 --> 01:30:16,480

pressure the government to

2553

01:30:22,870 --> 01:30:19,199

release more and tell us the truth about

2554

01:30:26,310 --> 01:30:25,910

good question you can always petition

2555

01:30:29,830 --> 01:30:26,320

your

2556

01:30:31,990 --> 01:30:29,840

in the u.s

2557

01:30:34,390 --> 01:30:32,000

that's the only effect that we have for

2558

01:30:37,270 --> 01:30:34,400

u.s disclosure the

2559

01:30:39,350 --> 01:30:37,280

the fact that project blue book was

2560

01:30:41,430 --> 01:30:39,360

disbanded in the 1960s when mufon

2561

01:30:42,709 --> 01:30:41,440

decided to take up for it

2562

01:30:44,950 --> 01:30:42,719

shows that the government doesn't have

2563

01:30:45,830 --> 01:30:44,960

an active process that they want to talk

2564

01:30:49,270 --> 01:30:45,840

about

2565

01:30:50,629 --> 01:30:49,280

now lou alejandro was of course

2566

01:30:52,629 --> 01:30:50,639

one of the guys that had one of those

2567

01:30:55,110 --> 01:30:52,639

secret jobs watching

2568

01:30:57,110 --> 01:30:55,120

ufos for the us government for a while

2569

01:30:59,590 --> 01:30:57,120

and i'm pretty sure it's still going

2570

01:31:01,830 --> 01:30:59,600

when when an ex-government official says

2571

01:31:03,430 --> 01:31:01,840

they disbanded the program looking at

2572

01:31:05,350 --> 01:31:03,440

ufos you know for a fact

2573

01:31:07,270 --> 01:31:05,360

it's still going you're just not a part

2574

01:31:07,590 --> 01:31:07,280

of it i think there's more evidence of

2575

01:31:10,950 --> 01:31:07,600

that

2576

01:31:12,629 --> 01:31:10,960

actually yeah yeah so all those um

2577

01:31:14,149 --> 01:31:12,639

all those programs whether they've had

2578

01:31:16,229 --> 01:31:14,159

contact where they

2579

01:31:17,910 --> 01:31:16,239

they're in cahoots with them all those

2580

01:31:21,350 --> 01:31:17,920

different stories you hear

2581

01:31:23,350 --> 01:31:21,360

uh eventually enough will leak out

2582

01:31:24,629 --> 01:31:23,360

and you just still in the in this

2583

01:31:25,189 --> 01:31:24,639

current time have to make up your own

2584

01:31:27,990 --> 01:31:25,199

mind

2585

01:31:28,470 --> 01:31:28,000

we have enough data that individually

2586

01:31:32,950 --> 01:31:28,480

you

2587

01:31:36,070 --> 01:31:32,960

it or not where did it come from

2588

01:31:37,910 --> 01:31:36,080

and is it consistent uh with what you

2589

01:31:39,750 --> 01:31:37,920

understand both in physics

2590

01:31:41,350 --> 01:31:39,760

and the people telling you uh their

2591

01:31:44,550 --> 01:31:41,360

stories

2592

01:31:45,669 --> 01:31:44,560

i am the chief mufon investigator for

2593

01:31:48,070 --> 01:31:45,679

florida

2594

01:31:48,870 --> 01:31:48,080

i see all the stories and reports coming

2595

01:31:52,870 --> 01:31:48,880

into florida

2596

01:31:56,390 --> 01:31:52,880

every day and we as a group

2597

01:31:59,350 --> 01:31:56,400

try to determine what reports

2598

01:32:00,390 --> 01:31:59,360

are real and which ones aren't and and

2599

01:32:02,950 --> 01:32:00,400

quite frankly we

2600

01:32:03,830 --> 01:32:02,960

we run about a five to eight percent

2601
01:32:07,350 --> 01:32:03,840
unknown

2602
01:32:09,189 --> 01:32:07,360
uh we just don't know and and and

2603
01:32:11,750 --> 01:32:09,199
some of those still might be known but

2604
01:32:14,870 --> 01:32:11,760
we're running about that that average

2605
01:32:16,950 --> 01:32:14,880
so it's fascinating to see uh what we we

2606
01:32:18,070 --> 01:32:16,960
come up with just as citizen scientists

2607
01:32:19,830 --> 01:32:18,080
that the government

2608
01:32:22,229 --> 01:32:19,840
won't talk about don't have programs

2609
01:32:26,070 --> 01:32:22,239
that are um out there

2610
01:32:28,629 --> 01:32:26,080
and i i actually wrote a letter to

2611
01:32:30,629 --> 01:32:28,639
um my congressman one time and said hey

2612
01:32:32,629 --> 01:32:30,639
if you want to see some real fun stuff

2613
01:32:34,390 --> 01:32:32,639

i got a load of it and i don't know how

2614

01:32:36,870 --> 01:32:34,400

it fits into

2615

01:32:37,830 --> 01:32:36,880

uh the government scheme of things right

2616

01:32:40,070 --> 01:32:37,840

now

2617

01:32:41,189 --> 01:32:40,080

but it seems like they're a little busy

2618

01:32:45,110 --> 01:32:41,199

and

2619

01:32:45,990 --> 01:32:45,120

they may have um other issues they think

2620

01:32:48,790 --> 01:32:46,000

are

2621

01:32:51,270 --> 01:32:48,800

bigger but at the same time i can't

2622

01:32:52,870 --> 01:32:51,280

imagine anything bigger than this

2623

01:32:55,189 --> 01:32:52,880

which leads me to believe they already

2624

01:32:57,910 --> 01:32:55,199

have it

2625

01:32:58,709 --> 01:32:57,920

researched and under control and

2626

01:33:00,070 --> 01:32:58,719

invested

2627

01:33:01,910 --> 01:33:00,080

enough research into it where they're

2628

01:33:03,910 --> 01:33:01,920

comfortable with their position you're

2629

01:33:07,350 --> 01:33:03,920

just not going to know about it

2630

01:33:09,669 --> 01:33:07,360

and either for national security reasons

2631

01:33:11,590 --> 01:33:09,679

uh which i understand being in the

2632

01:33:15,030 --> 01:33:11,600

military myself as long as i have i i

2633

01:33:17,669 --> 01:33:15,040

get those concerns but eventually that

2634

01:33:19,590 --> 01:33:17,679

needs to fade away and we need to have

2635

01:33:21,590 --> 01:33:19,600

an adult discussion

2636

01:33:23,189 --> 01:33:21,600

on what's in our air space what's in our

2637

01:33:24,070 --> 01:33:23,199

seas and why are people seeing what

2638

01:33:28,149 --> 01:33:24,080

they're seeing

2639

01:33:29,510 --> 01:33:28,159

in mass now and in videos um it's

2640

01:33:31,350 --> 01:33:29,520

it's interesting to say the least we're

2641

01:33:34,310 --> 01:33:31,360

in an interesting time

2642

01:33:35,669 --> 01:33:34,320

but i think i think for us individually

2643

01:33:38,709 --> 01:33:35,679

the best you can do is write your

2644

01:33:40,870 --> 01:33:38,719

your congress people and say

2645

01:33:43,350 --> 01:33:40,880

when are you guys going to release that

2646

01:33:45,669 --> 01:33:43,360

or at least investigate this

2647

01:33:47,430 --> 01:33:45,679

and give us some some input on what you

2648

01:33:49,350 --> 01:33:47,440

found

2649

01:33:50,470 --> 01:33:49,360

and guess what you're not going to push

2650

01:33:51,430 --> 01:33:50,480

the government where it doesn't want to

2651

01:33:53,350 --> 01:33:51,440

go

2652

01:33:55,270 --> 01:33:53,360

but i think with enough reporting it'll

2653

01:33:57,110 --> 01:33:55,280

eventually get out there

2654

01:33:58,870 --> 01:33:57,120

and uh force the issue i just don't know

2655

01:34:02,229 --> 01:33:58,880

when that's going to take place

2656

01:34:03,990 --> 01:34:02,239

anything else jonathan uh no i just

2657

01:34:05,750 --> 01:34:04,000

wanted to say thank you for all the work

2658

01:34:07,510 --> 01:34:05,760

you're doing and you know because so

2659

01:34:08,950 --> 01:34:07,520

many people and even scientists are

2660

01:34:10,950 --> 01:34:08,960

reluctant to talk about this

2661

01:34:12,149 --> 01:34:10,960

unfortunately so just thank you that you

2662

01:34:13,430 --> 01:34:12,159

know you are willing to come out and

2663

01:34:14,950 --> 01:34:13,440

2663
speak publicly

2664

01:34:16,709 --> 01:34:14,960

and i think people like you need to be

2665

01:34:18,149 --> 01:34:16,719

you know encouraged and applauded for

2666

01:34:20,870 --> 01:34:18,159

talking about this and

2667

01:34:21,430 --> 01:34:20,880

hopefully more people will do so in in

2668

01:34:24,629 --> 01:34:21,440

the future

2669

01:34:25,830 --> 01:34:24,639

so thank you you're welcome and uh trust

2670

01:34:28,310 --> 01:34:25,840

the old guys i'm old

2671

01:34:30,310 --> 01:34:28,320

and so we we tend to speak more because

2672

01:34:31,910 --> 01:34:30,320

we just don't care anymore

2673

01:34:33,430 --> 01:34:31,920

we're done with i'm retired you know

2674

01:34:35,669 --> 01:34:33,440

what are they going to do to me

2675

01:34:36,470 --> 01:34:35,679

um it's so it's one of those type of

2676

01:34:38,629 --> 01:34:36,480

attitudes the

2677

01:34:40,709 --> 01:34:38,639

the old folks who are speaking you

2678

01:34:42,149 --> 01:34:40,719

really need to pay attention to because

2679

01:34:43,750 --> 01:34:42,159

they're telling you for a reason and

2680

01:34:45,109 --> 01:34:43,760

they're concerned enough to say

2681

01:34:46,390 --> 01:34:45,119

something even though it may be near the

2682

01:34:49,590 --> 01:34:46,400

end of their life

2683

01:34:53,189 --> 01:34:49,600

um it's important and so yeah

2684

01:34:56,229 --> 01:34:53,199

pay attention interesting

2685

01:34:57,750 --> 01:34:56,239

all right hey thank you for the call

2686

01:34:59,510 --> 01:34:57,760

well thank you for having me on thank

2687

01:35:01,430 --> 01:34:59,520

you all right

2688

01:35:03,350 --> 01:35:01,440

um i wanted to put up a couple more

2689

01:35:04,470 --> 01:35:03,360

clips but i think oh i know what i did

2690

01:35:09,189 --> 01:35:04,480

wrong

2691

01:35:10,950 --> 01:35:09,199

so um let's see uh we can talk about

2692

01:35:12,229 --> 01:35:10,960

is this one we didn't talk about that

2693

01:35:14,709 --> 01:35:12,239

one yet did we

2694

01:35:15,590 --> 01:35:14,719

we did not uh that's off the i think the

2695

01:35:17,350 --> 01:35:15,600

sdo

2696

01:35:19,910 --> 01:35:17,360

satellite system and the reason why i

2697

01:35:22,950 --> 01:35:19,920

threw that in is to show you that

2698

01:35:26,470 --> 01:35:22,960

it has two streaks two lines

2699

01:35:30,070 --> 01:35:26,480

but the bright spot is um about

2700

01:35:32,629 --> 01:35:30,080

the object's length behind the other

2701

01:35:34,149 --> 01:35:32,639

trail and this is one of those things

2702

01:35:36,149 --> 01:35:34,159

where astronomers can't

2703

01:35:37,830 --> 01:35:36,159

answer the question because what is

2704

01:35:40,390 --> 01:35:37,840

making the streaks

2705

01:35:42,070 --> 01:35:40,400

if there's only one side of the the

2706

01:35:44,070 --> 01:35:42,080

whole equation is bright and the other

2707

01:35:46,149 --> 01:35:44,080

side is dark

2708

01:35:47,750 --> 01:35:46,159

so it's not a it's not a charge transfer

2709

01:35:49,910 --> 01:35:47,760

effect

2710

01:35:51,750 --> 01:35:49,920

but you can't see what's causing the

2711

01:35:53,830 --> 01:35:51,760

second trail which

2712

01:35:55,590 --> 01:35:53,840

is obviously evident right next to the

2713

01:35:58,070 --> 01:35:55,600

first object

2714

01:35:59,990 --> 01:35:58,080

to the right so that's one this one's

2715

01:36:01,590 --> 01:36:00,000

fascinating for all the characteristics

2716

01:36:06,310 --> 01:36:01,600

it holds within

2717

01:36:11,030 --> 01:36:06,320

a astrobiology question

2718

01:36:13,189 --> 01:36:11,040

that astrophysicists stop at they can't

2719

01:36:15,430 --> 01:36:13,199

they can't answer the mail they don't

2720

01:36:17,910 --> 01:36:15,440

know what what they're saying

2721

01:36:19,750 --> 01:36:17,920

but an astrobiologist would say well

2722

01:36:20,229 --> 01:36:19,760

you're you're seeing probably the tail

2723

01:36:23,030 --> 01:36:20,239

end

2724

01:36:23,669 --> 01:36:23,040

of a structure that is still cloaked and

2725

01:36:26,390 --> 01:36:23,679

or

2726

01:36:27,030 --> 01:36:26,400

not visible to this particular ccd

2727

01:36:30,149 --> 01:36:27,040

looking for

2728

01:36:31,430 --> 01:36:30,159

only one spectrum of frequency or maybe

2729

01:36:34,550 --> 01:36:31,440

a real narrow band

2730

01:36:36,550 --> 01:36:34,560

of frequency that

2731

01:36:38,070 --> 01:36:36,560

makes it look like there's nothing there

2732

01:36:38,470 --> 01:36:38,080

and in fact there might be something

2733

01:36:39,990 --> 01:36:38,480

there

2734

01:36:41,830 --> 01:36:40,000

it's just not a full spectrum camera

2735

01:36:43,590 --> 01:36:41,840

like your eyes your eyes see a band of

2736

01:36:46,950 --> 01:36:43,600

colors it's it's a nice spread

2737

01:36:49,350 --> 01:36:46,960

in the spectral system uh of light

2738

01:36:51,510 --> 01:36:49,360

but that particular one is looking at

2739

01:36:54,709 --> 01:36:51,520

the the three or four angstrom

2740

01:36:56,390 --> 01:36:54,719

and you you cannot tell what the

2741

01:36:58,629 --> 01:36:56,400

second object is it's creating that

2742

01:36:59,669 --> 01:36:58,639

second trail and i found it fascinating

2743

01:37:01,830 --> 01:36:59,679

for that reason

2744

01:37:03,350 --> 01:37:01,840

well um well since your military i'm

2745

01:37:07,590 --> 01:37:03,360

going to ask you had had you

2746

01:37:10,629 --> 01:37:07,600

seen this on the debrief.org

2747

01:37:12,310 --> 01:37:10,639

that the i think the gentleman was

2748

01:37:15,430 --> 01:37:12,320

speaking about

2749

01:37:16,950 --> 01:37:15,440

there's a lot of news on this and in

2750

01:37:18,390 --> 01:37:16,960

particular it could be

2751
01:37:20,550 --> 01:37:18,400
people have speculated that was the

2752
01:37:22,790 --> 01:37:20,560
batman balloon i don't know if it's a

2753
01:37:25,270 --> 01:37:22,800
hundred percent

2754
01:37:28,310 --> 01:37:25,280
solid that's what it is and another

2755
01:37:31,270 --> 01:37:28,320
thing it was at like 20 between 27

2756
01:37:31,910 --> 01:37:31,280
000 feet and maybe 30. yeah it's got to

2757
01:37:33,189 --> 01:37:31,920
say

2758
01:37:35,109 --> 01:37:33,199
you look at the clouds in the first

2759
01:37:35,430 --> 01:37:35,119
picture and you can see he's pretty high

2760
01:37:37,590 --> 01:37:35,440
up

2761
01:37:39,669 --> 01:37:37,600
that's that's a pretty decent altitude

2762
01:37:40,870 --> 01:37:39,679
because you're way above the uh the scud

2763
01:37:43,430 --> 01:37:40,880

line down below

2764

01:37:45,109 --> 01:37:43,440

so i had a discussion with john uh

2765

01:37:46,229 --> 01:37:45,119

greenwald on this who does a lot of

2766

01:37:49,270 --> 01:37:46,239

research

2767

01:37:52,550 --> 01:37:49,280

and i said uh from from what i know

2768

01:37:54,550 --> 01:37:52,560

a mylar balloon cannot go

2769

01:37:56,070 --> 01:37:54,560

to this altitude matter of fact they

2770

01:37:59,910 --> 01:37:56,080

usually burst

2771

01:38:01,350 --> 01:37:59,920

or um deflate um when they hit about

2772

01:38:03,350 --> 01:38:01,360

seven thousand feet

2773

01:38:04,550 --> 01:38:03,360

and this thing is you know this thing's

2774

01:38:07,189 --> 01:38:04,560

way up there

2775

01:38:09,030 --> 01:38:07,199

um and he he said that no they actually

2776

01:38:10,470 --> 01:38:09,040

go higher than that but i don't know

2777

01:38:12,070 --> 01:38:10,480

i haven't been able to find any

2778

01:38:14,550 --> 01:38:12,080

information online

2779

01:38:16,629 --> 01:38:14,560

that the mylar balloons can go to you

2780

01:38:18,950 --> 01:38:16,639

know 27 000 feet

2781

01:38:19,750 --> 01:38:18,960

yeah i think it is possible i don't

2782

01:38:23,430 --> 01:38:19,760

think that's what this

2783

01:38:25,350 --> 01:38:23,440

is um but it's the problem

2784

01:38:26,550 --> 01:38:25,360

with this particular picture is it's got

2785

01:38:28,790 --> 01:38:26,560

really good symmetry

2786

01:38:29,750 --> 01:38:28,800

it has all the points in the right spot

2787

01:38:32,790 --> 01:38:29,760

they all seem to be

2788

01:38:36,629 --> 01:38:32,800

geometrically aligned and uh

2789

01:38:40,870 --> 01:38:36,639

that gives it away more maybe 40

2790

01:38:43,430 --> 01:38:40,880

49 51 51 towards man-made 49

2791

01:38:43,990 --> 01:38:43,440

percent not one of ours just because

2792

01:38:47,109 --> 01:38:44,000

it's so

2793

01:38:48,950 --> 01:38:47,119

well symmetried but so are saucers

2794

01:38:50,310 --> 01:38:48,960

they're they're perfectly round well

2795

01:38:52,229 --> 01:38:50,320

another picture i'm not sure if we're

2796

01:38:56,229 --> 01:38:52,239

going to be getting this or not

2797

01:38:58,229 --> 01:38:56,239

is a um is one a triangle that came out

2798

01:39:00,070 --> 01:38:58,239

of the water supposedly

2799

01:39:02,629 --> 01:39:00,080

with lights on the corners and one in

2800

01:39:05,830 --> 01:39:02,639

the center supposedly

2801

01:39:06,790 --> 01:39:05,840

that took off uh and it took off on a

2802

01:39:08,950 --> 01:39:06,800

vertical

2803

01:39:10,470 --> 01:39:08,960

you know like this picture is right now

2804

01:39:12,550 --> 01:39:10,480

on a vertical

2805

01:39:13,750 --> 01:39:12,560

uh you know you wouldn't think it would

2806

01:39:15,430 --> 01:39:13,760

fly

2807

01:39:17,750 --> 01:39:15,440

like that the way something would take

2808

01:39:19,510 --> 01:39:17,760

off sideways uh you would think it would

2809

01:39:21,669 --> 01:39:19,520

go aerodynamic but uh

2810

01:39:22,709 --> 01:39:21,679

it did not another puzzle another

2811

01:39:24,550 --> 01:39:22,719

strange thing

2812

01:39:25,910 --> 01:39:24,560

well what's unfortunate on this one is

2813

01:39:26,629 --> 01:39:25,920

they don't have a video showing you

2814

01:39:28,310 --> 01:39:26,639

trajectory

2815

01:39:30,070 --> 01:39:28,320

is it stationary or is it moving with

2816

01:39:31,669 --> 01:39:30,080

the aircraft right

2817

01:39:33,270 --> 01:39:31,679

if it's moving with the aircraft and it

2818

01:39:33,590 --> 01:39:33,280

has no means of propulsion that we can

2819

01:39:36,870 --> 01:39:33,600

see

2820

01:39:38,390 --> 01:39:36,880

it's one of theirs and or one of our

2821

01:39:40,310 --> 01:39:38,400

really cool drones that we have that no

2822

01:39:42,550 --> 01:39:40,320

one's talking about

2823

01:39:43,590 --> 01:39:42,560

unfortunately i think there's a mix

2824

01:39:46,870 --> 01:39:43,600

going on right now

2825

01:39:48,310 --> 01:39:46,880

i really do and uh i think the way you

2826

01:39:49,430 --> 01:39:48,320

can tell which one's ours and which

2827

01:39:52,390 --> 01:39:49,440

one's theirs

2828

01:39:52,950 --> 01:39:52,400

if i were a betting man we do straight

2829

01:39:55,030 --> 01:39:52,960

lines

2830

01:39:56,550 --> 01:39:55,040

as a species look at your wings on your

2831

01:39:58,870 --> 01:39:56,560

plane look at

2832

01:40:00,310 --> 01:39:58,880

how we build things that fly there's a

2833

01:40:01,510 --> 01:40:00,320

straight line on it somewhere the

2834

01:40:03,189 --> 01:40:01,520

fuselage is straight

2835

01:40:05,030 --> 01:40:03,199

the wings are straight the tail sections

2836

01:40:05,669 --> 01:40:05,040

straight everything has a straight edge

2837

01:40:07,750 --> 01:40:05,679

to it

2838

01:40:11,270 --> 01:40:07,760

props have a good solid straight edge to

2839

01:40:13,189 --> 01:40:11,280

it but if you see a ball hovering

2840

01:40:15,030 --> 01:40:13,199

and you can't see the propeller you

2841

01:40:16,709 --> 01:40:15,040

can't see the helium and it's going

2842

01:40:18,870 --> 01:40:16,719

300 miles an hour right alongside of you

2843

01:40:21,990 --> 01:40:18,880

while you're you're flying in a jet

2844

01:40:25,750 --> 01:40:22,000

it's probably either one of theirs or we

2845

01:40:27,109 --> 01:40:25,760

have uh drones now that have levitation

2846

01:40:29,430 --> 01:40:27,119

capabilities

2847

01:40:31,669 --> 01:40:29,440

one or the other but if it's a freaky

2848

01:40:34,870 --> 01:40:31,679

shape like you just showed earlier

2849

01:40:35,510 --> 01:40:34,880

it's it's man it's 50 50. i it's hard to

2850

01:40:38,470 --> 01:40:35,520

tell

2851

01:40:40,070 --> 01:40:38,480

yeah um i've just got confirmation

2852

01:40:41,030 --> 01:40:40,080

earlier on that i'm going to have a

2853

01:40:43,590 --> 01:40:41,040

guest on

2854

01:40:45,510 --> 01:40:43,600

that had quite an amazing sighting he's

2855

01:40:47,669 --> 01:40:45,520

his family is astronomers

2856

01:40:48,790 --> 01:40:47,679

scientists and they were all out at a

2857

01:40:52,149 --> 01:40:48,800

family gathering

2858

01:40:55,510 --> 01:40:52,159

last uh july of 2019

2859

01:40:58,709 --> 01:40:55,520

and uh they saw tic tacs the tic tac

2860

01:40:59,510 --> 01:40:58,719

ufos and a saucer all together it's

2861

01:41:01,510 --> 01:40:59,520

quite a story

2862

01:41:03,430 --> 01:41:01,520

they're going to be coming on probably

2863

01:41:05,030 --> 01:41:03,440

in january sometime

2864

01:41:08,709 --> 01:41:05,040

but what do you think about you know

2865

01:41:12,070 --> 01:41:08,719

going back to the shape the tic tac ufo

2866

01:41:15,430 --> 01:41:12,080

funny you should ask that um

2867

01:41:17,990 --> 01:41:15,440

in in mufon we had a a case that i

2868

01:41:18,950 --> 01:41:18,000

had to process i got the case i actually

2869

01:41:20,629 --> 01:41:18,960

took it

2870

01:41:22,229 --> 01:41:20,639

uh because the gentleman had some videos

2871

01:41:24,149 --> 01:41:22,239

from his backyard party with his family

2872

01:41:25,910 --> 01:41:24,159

and hear the kids in the background

2873

01:41:28,390 --> 01:41:25,920

and he pulls his phone up and he says

2874

01:41:30,390 --> 01:41:28,400

look at those things by the clouds

2875

01:41:31,830 --> 01:41:30,400

and he's talking to you know his family

2876

01:41:32,070 --> 01:41:31,840

and little girls saying well what are

2877

01:41:33,669 --> 01:41:32,080

you

2878

01:41:35,910 --> 01:41:33,679

looking at daddy and he goes i don't

2879

01:41:38,470 --> 01:41:35,920

know and so when i put it through

2880

01:41:40,149 --> 01:41:38,480

adobe premiere pro is looking at the

2881

01:41:43,430 --> 01:41:40,159

video portion

2882

01:41:47,109 --> 01:41:43,440

i started zooming in and lo and behold

2883

01:41:48,470 --> 01:41:47,119

the dot he saw next to the clouds

2884

01:41:50,550 --> 01:41:48,480

and i estimated the clouds to be about

2885

01:41:53,910 --> 01:41:50,560

5000 feet agl

2886

01:41:55,350 --> 01:41:53,920

above ground level and he um was talking

2887

01:41:57,750 --> 01:41:55,360

about this one dot he goes look at this

2888

01:42:00,149 --> 01:41:57,760

dot it's flowing in and out of the cloud

2889

01:42:02,070 --> 01:42:00,159

so i pulled it up on the um adobe

2890

01:42:04,470 --> 01:42:02,080

program and i'm looking at it

2891

01:42:05,830 --> 01:42:04,480

and all of a sudden i see two or three

2892

01:42:07,910 --> 01:42:05,840

dots with it

2893

01:42:09,430 --> 01:42:07,920

that are going extremely fast in and out

2894

01:42:11,270 --> 01:42:09,440

of the field of view

2895

01:42:13,510 --> 01:42:11,280

so i slow everything down and i'm doing

2896

01:42:15,910 --> 01:42:13,520

frame by frame and realize there's two

2897

01:42:19,669 --> 01:42:15,920

other dots flying around this

2898

01:42:21,350 --> 01:42:19,679

other tic tac and when i got done with

2899

01:42:23,510 --> 01:42:21,360

the estimation

2900

01:42:25,510 --> 01:42:23,520

it looks like i was in the ballpark of 3

2901

01:42:27,430 --> 01:42:25,520

600 miles an hour

2902

01:42:29,189 --> 01:42:27,440

for the other two flying around but they

2903

01:42:30,790 --> 01:42:29,199

were a little bit lighter

2904

01:42:32,950 --> 01:42:30,800

man they were moving out and some of

2905

01:42:35,830 --> 01:42:32,960

them weren't straight lines

2906

01:42:37,430 --> 01:42:35,840

and uh it it it's still a case we have

2907

01:42:41,109 --> 01:42:37,440

within our files

2908

01:42:42,550 --> 01:42:41,119

and i say that to say this did a paper

2909

01:42:47,430 --> 01:42:42,560

on

2910

01:42:49,830 --> 01:42:47,440

do you guys think about

2911

01:42:50,629 --> 01:42:49,840

aircraft unknown aircraft moving through

2912

01:42:52,709 --> 01:42:50,639

the atmosphere

2913

01:42:54,149 --> 01:42:52,719

above sound level but they don't break

2914

01:42:55,830 --> 01:42:54,159

the sound waves there's

2915

01:42:57,510 --> 01:42:55,840

no sound barrier breaking you don't hear

2916

01:42:59,350 --> 01:42:57,520

that crack yeah

2917

01:43:00,950 --> 01:42:59,360

and uh it didn't take me long to do the

2918

01:43:02,870 --> 01:43:00,960

research on that

2919

01:43:04,390 --> 01:43:02,880

to realize that the military has some

2920

01:43:06,950 --> 01:43:04,400

patents out now

2921

01:43:08,149 --> 01:43:06,960

dealing with uh plasma discharges near

2922

01:43:11,430 --> 01:43:08,159

military vehicles

2923

01:43:13,189 --> 01:43:11,440

yes right before impact or explosion of

2924

01:43:14,950 --> 01:43:13,199

rpgs or whatever they're defending

2925

01:43:17,350 --> 01:43:14,960

against and it turns out

2926

01:43:18,149 --> 01:43:17,360

a plasma field is the best best

2927

01:43:21,270 --> 01:43:18,159

shockwave

2928

01:43:22,149 --> 01:43:21,280

absorber of everything it literally it

2929

01:43:23,990 --> 01:43:22,159

takes in

2930

01:43:25,510 --> 01:43:24,000

all the shock and it doesn't admit it

2931

01:43:27,430 --> 01:43:25,520

through the backside it doesn't get

2932

01:43:29,910 --> 01:43:27,440

through the plasma cloud

2933

01:43:30,709 --> 01:43:29,920

and then it dawned on me wait a second

2934

01:43:32,629 --> 01:43:30,719

if you have a

2935

01:43:33,910 --> 01:43:32,639

propulsion system that has high

2936

01:43:37,189 --> 01:43:33,920

magnetics

2937

01:43:39,430 --> 01:43:37,199

and uh electrical dielectric charges

2938

01:43:41,669 --> 01:43:39,440

involved it's going to create its own

2939

01:43:43,430 --> 01:43:41,679

plasma field around the vehicle itself

2940

01:43:45,750 --> 01:43:43,440

if it's high enough intensity

2941

01:43:47,189 --> 01:43:45,760

like tesla said it's intensity frequency

2942

01:43:50,149 --> 01:43:47,199

or vibration

2943

01:43:51,350 --> 01:43:50,159

and knowing that it dawned on me well

2944

01:43:54,629 --> 01:43:51,360

you've got a natural

2945

01:43:56,229 --> 01:43:54,639

plasma cloud around the surface outside

2946

01:43:57,830 --> 01:43:56,239

surface of your vehicle

2947

01:43:59,830 --> 01:43:57,840

you can go any speed you want and you're

2948

01:44:01,430 --> 01:43:59,840

not going to hear it

2949

01:44:03,270 --> 01:44:01,440

yeah there's there's someone that was

2950

01:44:06,229 --> 01:44:03,280

doing i was trying to look up the

2951

01:44:09,030 --> 01:44:06,239

person's name i want to say his name was

2952

01:44:12,310 --> 01:44:09,040

mirabeau but i can't i can't find him

2953

01:44:16,070 --> 01:44:12,320

he has been doing plasma research for

2954

01:44:18,070 --> 01:44:16,080

many many years as far as as far as that

2955

01:44:19,669 --> 01:44:18,080

goes i had a conversation with ray

2956

01:44:22,390 --> 01:44:19,679

stanford about this

2957

01:44:23,990 --> 01:44:22,400

and because he saw you know back in the

2958

01:44:27,109 --> 01:44:24,000

70s or 80s

2959

01:44:27,750 --> 01:44:27,119

he filmed a craft that actually had like

2960

01:44:30,870 --> 01:44:27,760

a

2961

01:44:33,430 --> 01:44:30,880

front of it

2962

01:44:34,390 --> 01:44:33,440

moving along which is pretty interesting

2963

01:44:36,790 --> 01:44:34,400

and and uh

2964

01:44:38,149 --> 01:44:36,800

i want to say the guy was mirabeau that

2965

01:44:41,430 --> 01:44:38,159

was actually doing some

2966

01:44:44,070 --> 01:44:41,440

study on that and uh that makes sense

2967

01:44:46,149 --> 01:44:44,080

uh the reason is if you're staring the

2968

01:44:50,070 --> 01:44:46,159

field within your craft

2969

01:44:52,629 --> 01:44:50,080

and you need one side of it to be um

2970

01:44:54,229 --> 01:44:52,639

off center so you can move to that other

2971

01:44:56,629 --> 01:44:54,239

side or have the back side

2972

01:44:57,350 --> 01:44:56,639

push you along then you're going to

2973

01:44:59,990 --> 01:44:57,360

shape the

2974

01:45:01,270 --> 01:45:00,000

the field around your craft into such a

2975

01:45:02,550 --> 01:45:01,280

configuration

2976

01:45:04,870 --> 01:45:02,560

as to extend the field out in the

2977

01:45:05,750 --> 01:45:04,880

direction you want to go what about uh

2978

01:45:08,229 --> 01:45:05,760

transmedia

2979

01:45:09,990 --> 01:45:08,239

like water would that thing working

2980

01:45:11,430 --> 01:45:10,000

through through water

2981

01:45:14,950 --> 01:45:11,440

only the people that were at the nimitz

2982

01:45:17,990 --> 01:45:17,030

yeah so so yeah i think any type of

2983

01:45:21,510 --> 01:45:18,000

plasma field

2984

01:45:24,870 --> 01:45:21,520

or uh cocoon of electrostatic

2985

01:45:27,350 --> 01:45:24,880

discharge like like they i think they're

2986

01:45:29,189 --> 01:45:27,360

they're using uh brown and townsend did

2987

01:45:30,790 --> 01:45:29,199

it back in the 40s and 50s

2988

01:45:32,070 --> 01:45:30,800

they showed that they could take a disc

2989

01:45:33,030 --> 01:45:32,080

and charge it up high enough to make it

2990

01:45:35,510 --> 01:45:33,040

float

2991

01:45:36,390 --> 01:45:35,520

so it's it's not new science i just

2992

01:45:38,470 --> 01:45:36,400

think it's

2993

01:45:40,390 --> 01:45:38,480

refined science and we're getting to see

2994

01:45:43,270 --> 01:45:40,400

either ours or theirs

2995

01:45:43,669 --> 01:45:43,280

using these these techniques of physics

2996

01:45:46,709 --> 01:45:43,679

that

2997

01:45:48,470 --> 01:45:46,719

are above most of us but are sure out

2998

01:45:50,149 --> 01:45:48,480

there and now are visible now

2999

01:45:51,750 --> 01:45:50,159

the rest of us just have to speculate

3000

01:45:52,870 --> 01:45:51,760

what's going on with the propulsion

3001
01:45:55,270 --> 01:45:52,880
system

3002
01:45:56,390 --> 01:45:55,280
wow very interesting i'm glad you know

3003
01:45:59,109 --> 01:45:56,400
something about

3004
01:46:00,790 --> 01:45:59,119
a lot of this it makes it um even more

3005
01:46:02,390 --> 01:46:00,800
interesting so we have time to take one

3006
01:46:06,990 --> 01:46:02,400
more call if someone like to call in

3007
01:46:10,229 --> 01:46:08,390
855-472-5483

3008
01:46:12,149 --> 01:46:10,239
again we have time for one more call if

3009
01:46:14,149 --> 01:46:12,159
someone would like to call in um

3010
01:46:15,590 --> 01:46:14,159
we looked at this one before i do

3011
01:46:18,950 --> 01:46:15,600
remember that

3012
01:46:19,830 --> 01:46:18,960
and uh this one i can't remember did we

3013
01:46:22,629 --> 01:46:19,840

do that one

3014

01:46:24,390 --> 01:46:22,639

we did not okay this is another flying

3015

01:46:26,070 --> 01:46:24,400

refrigerator across the surface

3016

01:46:29,030 --> 01:46:26,080

of the sun that's what you're seeing

3017

01:46:30,709 --> 01:46:29,040

around it this is a mid-sun picture

3018

01:46:32,709 --> 01:46:30,719

and uh the reason why i sent it to you

3019

01:46:36,310 --> 01:46:32,719

is because it's an organized structure

3020

01:46:37,830 --> 01:46:36,320

it has dots surfaces straight lines

3021

01:46:39,830 --> 01:46:37,840

it looks like it has some type of

3022

01:46:40,870 --> 01:46:39,840

propulsion means on the back side where

3023

01:46:42,870 --> 01:46:40,880

all the white is

3024

01:46:44,790 --> 01:46:42,880

again it's maxing out the sensor

3025

01:46:46,790 --> 01:46:44,800

whatever that frequency is looking at

3026

01:46:48,870 --> 01:46:46,800

can't handle any more of that intensity

3027

01:46:49,669 --> 01:46:48,880

so it's it's got more intensity than the

3028

01:46:51,750 --> 01:46:49,679

sun

3029

01:46:53,750 --> 01:46:51,760

does that help so whatever that

3030

01:46:54,629 --> 01:46:53,760

frequency is it's actually outshining

3031

01:46:57,910 --> 01:46:54,639

the sun

3032

01:46:59,990 --> 01:46:57,920

with that frequency so it's high

3033

01:47:01,750 --> 01:47:00,000

it's it's probably not as wide as you're

3034

01:47:03,189 --> 01:47:01,760

saying because sensors sometimes bleed

3035

01:47:05,030 --> 01:47:03,199

into the next pixel

3036

01:47:06,950 --> 01:47:05,040

when they get uh washed out there's

3037

01:47:07,990 --> 01:47:06,960

there's drain channels electrically into

3038

01:47:10,950 --> 01:47:08,000

other channels so it may

3039

01:47:12,550 --> 01:47:10,960

be maybe a thin line of one pixel long

3040

01:47:14,950 --> 01:47:12,560

you just don't know that because it

3041

01:47:15,669 --> 01:47:14,960

it spreads out a bit but the fascinating

3042

01:47:19,030 --> 01:47:15,679

part of this

3043

01:47:19,910 --> 01:47:19,040

is again there's a whole length behind

3044

01:47:22,790 --> 01:47:19,920

the object

3045

01:47:24,550 --> 01:47:22,800

and it looks like the energy propulsion

3046

01:47:27,830 --> 01:47:24,560

system that's completely

3047

01:47:30,149 --> 01:47:27,840

missing dark and then there's a trail

3048

01:47:31,189 --> 01:47:30,159

so the trail picks up out of complete

3049

01:47:33,830 --> 01:47:31,199

darkness

3050

01:47:35,030 --> 01:47:33,840

which means it's not a transfer charge

3051

01:47:37,109 --> 01:47:35,040

effect

3052

01:47:38,470 --> 01:47:37,119

otherwise it'd be a pure smear from the

3053

01:47:42,149 --> 01:47:38,480

beginning of the

3054

01:47:45,590 --> 01:47:42,159

of the um light intensity that caused it

3055

01:47:46,390 --> 01:47:45,600

and i think this is really a true object

3056

01:47:48,229 --> 01:47:46,400

with a true

3057

01:47:49,990 --> 01:47:48,239

intensity that can't be explained with a

3058

01:47:51,590 --> 01:47:50,000

trail behind it

3059

01:47:53,189 --> 01:47:51,600

that should not be there because the

3060

01:47:54,149 --> 01:47:53,199

pixels right in front of the trail are

3061

01:47:55,910 --> 01:47:54,159

dark

3062

01:47:58,149 --> 01:47:55,920

they shouldn't just start automatically

3063

01:47:59,270 --> 01:47:58,159

smearing unless there was a real smear

3064

01:48:02,470 --> 01:47:59,280

line there

3065

01:48:05,109 --> 01:48:02,480

or i call a trail well okay

3066

01:48:08,149 --> 01:48:05,119

let's see we have a of this came over

3067

01:48:11,189 --> 01:48:08,159

from the kgra radio station

3068

01:48:11,510 --> 01:48:11,199

and uh so this chat uh question is is

3069

01:48:13,990 --> 01:48:11,520

there

3070

01:48:16,149 --> 01:48:14,000

any info respective to what the

3071

01:48:18,709 --> 01:48:16,159

government knows on what is going

3072

01:48:20,629 --> 01:48:18,719

on in different departments or in the

3073

01:48:23,270 --> 01:48:20,639

nation's military or is this part of the

3074

01:48:26,709 --> 01:48:23,280

black operations

3075

01:48:29,430 --> 01:48:26,719

um i don't know any of that

3076

01:48:30,470 --> 01:48:29,440

uh individually and but i do know how

3077

01:48:32,229 --> 01:48:30,480

the government runs when

3078

01:48:35,830 --> 01:48:32,239

compartmentalized information

3079

01:48:38,229 --> 01:48:35,840

is is needed for a program

3080

01:48:39,430 --> 01:48:38,239

and i've been in programs where the guy

3081

01:48:39,990 --> 01:48:39,440

next to you does not know what you're

3082

01:48:42,709 --> 01:48:40,000

doing

3083

01:48:44,390 --> 01:48:42,719

you you just need to know yeah it's a

3084

01:48:47,510 --> 01:48:44,400

need to know basis

3085

01:48:49,669 --> 01:48:47,520

and the line on top gun is not

3086

01:48:52,310 --> 01:48:49,679

it's not far off you know if you were

3087

01:48:54,550 --> 01:48:52,320

told they'd have to kill you

3088

01:48:55,430 --> 01:48:54,560

some of this stuff is so dark and so

3089

01:48:57,430 --> 01:48:55,440

deep and and

3090

01:48:59,270 --> 01:48:57,440

has been doing it for so long uh that's

3091

01:49:01,510 --> 01:48:59,280

why area 51 s4

3092

01:49:03,590 --> 01:49:01,520

all these different places have such an

3093

01:49:05,109 --> 01:49:03,600

interesting and fascinating history to

3094

01:49:06,550 --> 01:49:05,119

it because no one can get to it there's

3095

01:49:09,830 --> 01:49:06,560

no visibility

3096

01:49:11,990 --> 01:49:09,840

um and that's on purpose

3097

01:49:13,189 --> 01:49:12,000

that's you don't do experiments at this

3098

01:49:16,790 --> 01:49:13,199

level

3099

01:49:20,229 --> 01:49:16,800

uh in the public arena because that's

3100

01:49:21,189 --> 01:49:20,239

that gives away all your knowledge to

3101
01:49:24,070 --> 01:49:21,199
your enemies

3102
01:49:25,270 --> 01:49:24,080
and uh for nationals you know defense

3103
01:49:28,229 --> 01:49:25,280
reasons

3104
01:49:29,589 --> 01:49:28,239
uh some of this stays secret the issue

3105
01:49:32,870 --> 01:49:29,599
is and what really

3106
01:49:36,149 --> 01:49:32,880
perturbs me is i think there's also some

3107
01:49:37,990 --> 01:49:36,159
um free energy

3108
01:49:39,510 --> 01:49:38,000
capability that government has that

3109
01:49:42,629 --> 01:49:39,520
should be released

3110
01:49:45,750 --> 01:49:42,639
we should know uh of systems that

3111
01:49:48,070 --> 01:49:45,760
offer energy that

3112
01:49:49,030 --> 01:49:48,080
is not coal based or petroleum-based

3113
01:49:52,550 --> 01:49:49,040

like we're doing it now

3114

01:49:53,910 --> 01:49:52,560

solar is still infant wind is is

3115

01:49:57,109 --> 01:49:53,920

is optimized it's not going to get any

3116

01:49:58,149 --> 01:49:57,119

better um it's all about money when it

3117

01:50:00,790 --> 01:49:58,159

comes to any of that

3118

01:50:02,229 --> 01:50:00,800

it really is um i wish that they think

3119

01:50:05,350 --> 01:50:02,239

it would destroy

3120

01:50:05,910 --> 01:50:05,360

the country for you know fossil fuels or

3121

01:50:08,149 --> 01:50:05,920

whatever

3122

01:50:09,270 --> 01:50:08,159

um it's going to be awful hard to come

3123

01:50:10,470 --> 01:50:09,280

out if they actually have that

3124

01:50:12,390 --> 01:50:10,480

capability

3125

01:50:14,390 --> 01:50:12,400

if there's no jobs that could be created

3126

01:50:16,149 --> 01:50:14,400

it's all leads back to money

3127

01:50:19,350 --> 01:50:16,159

how do you transition the whole society

3128

01:50:20,790 --> 01:50:19,360

that's the problem very slowly

3129

01:50:22,870 --> 01:50:20,800

very slowly is the only way you can do

3130

01:50:25,589 --> 01:50:22,880

it we only have a couple minutes left

3131

01:50:28,629 --> 01:50:25,599

the question here do you have something

3132

01:50:32,149 --> 01:50:28,639

to say about the giant wheel image from

3133

01:50:35,350 --> 01:50:32,159

soho i'm not familiar with that are you

3134

01:50:36,950 --> 01:50:35,360

the giant wheel image um if it's a

3135

01:50:39,109 --> 01:50:36,960

particular image

3136

01:50:40,950 --> 01:50:39,119

i'll need the date time group on it to

3137

01:50:42,310 --> 01:50:40,960

look it up and it's kind of hard to make

3138

01:50:43,910 --> 01:50:42,320

a decision

3139

01:50:46,390 --> 01:50:43,920

did you ever see an image from that

3140

01:50:48,629 --> 01:50:46,400

satellite that looked like a giant wheel

3141

01:50:50,070 --> 01:50:48,639

that you're did that ever does that ring

3142

01:50:52,709 --> 01:50:50,080

any type of bell at all

3143

01:50:53,189 --> 01:50:52,719

at all they're they're i have triangles

3144

01:50:56,390 --> 01:50:53,199

in my

3145

01:50:59,910 --> 01:50:56,400

my uh archives and i've seen uh

3146

01:51:02,390 --> 01:50:59,920

the c2 sensor it is so

3147

01:51:04,470 --> 01:51:02,400

there's a c2 sensor that has a

3148

01:51:05,669 --> 01:51:04,480

three-quarter inch wheel around the sun

3149

01:51:08,709 --> 01:51:05,679

just to the upper

3150

01:51:09,830 --> 01:51:08,719

right um about a half a solar distance

3151
01:51:13,189 --> 01:51:09,840
out

3152
01:51:15,910 --> 01:51:13,199
that is a microfilament that is

3153
01:51:17,510 --> 01:51:15,920
obscuring the optics it's consistent oh

3154
01:51:21,030 --> 01:51:17,520
and so that particular

3155
01:51:24,070 --> 01:51:21,040
that's an artifact or the

3156
01:51:27,109 --> 01:51:24,080
ccd itself uh are there

3157
01:51:28,070 --> 01:51:27,119
other objects out there that are not

3158
01:51:31,990 --> 01:51:28,080
related to that

3159
01:51:35,270 --> 01:51:32,000
that are circular square uh triangular

3160
01:51:36,629 --> 01:51:35,280
yep i've got them yeah well soon you're

3161
01:51:37,350 --> 01:51:36,639
going to have a website we have to end

3162
01:51:39,589 --> 01:51:37,360
the show now

3163
01:51:41,510 --> 01:51:39,599

but thank you so much uh and hopefully

3164

01:51:42,950 --> 01:51:41,520

um you will have that website up

3165

01:51:44,550 --> 01:51:42,960

and once you get it up let me know and i

3166

01:51:46,149 --> 01:51:44,560

will link it in the show notes

3167

01:51:47,990 --> 01:51:46,159

sounds good i'll do that thanks for

3168

01:51:49,830 --> 01:51:48,000

having me on you bet thanks a lot

3169

01:51:51,990 --> 01:51:49,840

i really appreciate it and thank you i

3170

01:51:55,030 --> 01:51:52,000

appreciate you filling in on last minute

3171

01:51:57,109 --> 01:51:55,040

thank you no problem take care

3172

01:51:58,310 --> 01:51:57,119

bye all right everyone so we will be

3173

01:52:01,189 --> 01:51:58,320

back uh

3174

01:52:03,430 --> 01:52:01,199

next week now actually we're going to be

3175

01:52:05,669 --> 01:52:03,440

back next week for the regular audio

3176
01:52:06,870 --> 01:52:05,679
uh podcast but uh if you want to listen

3177
01:52:10,149 --> 01:52:06,880
live to tim

3178
01:52:11,510 --> 01:52:10,159
mcmillan uh from thebrief.org

3179
01:52:14,070 --> 01:52:11,520
that everyone's talking about he's going

3180
01:52:14,870 --> 01:52:14,080
to be on the show on sunday this coming

3181
01:52:17,910 --> 01:52:14,880
sunday

3182
01:52:20,390 --> 01:52:17,920
the 13th at 2 p.m eastern time

3183
01:52:21,109 --> 01:52:20,400
if you want to um get a subscription to

3184
01:52:23,589 --> 01:52:21,119
youtube

3185
01:52:25,350 --> 01:52:23,599
then notifications you'll see that so we

3186
01:52:27,109 --> 01:52:25,360
got to run it now we got to

3187
01:52:28,790 --> 01:52:27,119
end the show so i want to thank you
