**MATTHEW
SZYDAGIS**

**KEVIN
KNUTH**

**GARY
VOORHIS**

1
00:00:12,540 --> 00:00:05,560

foreign

2
00:00:37,030 --> 00:00:28,800

[Music]

3
00:00:42,229 --> 00:00:39,889

your host and for those of you watching

4
00:00:44,389 --> 00:00:42,239

on YouTube or Facebook you can see I'm

5
00:00:46,610 --> 00:00:44,399

on my boat I've been saying that I was

6
00:00:48,830 --> 00:00:46,620

going to be on that again this year last

7
00:00:51,709 --> 00:00:48,840

year I was not on a doc this talk has

8
00:00:52,970 --> 00:00:51,719

Wi-Fi last year I was it was a mess I

9
00:00:54,470 --> 00:00:52,980

ran out of data in the middle of the

10
00:00:56,330 --> 00:00:54,480

show and all that but we're good to go

11
00:00:58,849 --> 00:00:56,340

here I want to show everyone the little

12
00:01:01,549 --> 00:00:58,859

setup here we go I took this just before

13
00:01:02,750 --> 00:01:01,559

the show okay this is just before the

14

00:01:11,950 --> 00:01:02,760

show

15

00:01:11,960 --> 00:01:16,789

and a little behind the scenes

16

00:01:21,770 --> 00:01:20,210

so that's it that's the old boat

17

00:01:25,670 --> 00:01:21,780

um so I'm really excited about the show

18

00:01:28,850 --> 00:01:25,680

tonight we have uh Matthew shadagas we

19

00:01:31,370 --> 00:01:28,860

have Kevin knuth and Gary Voorhees we're

20

00:01:34,370 --> 00:01:31,380

a great cast for us tonight we're going

21

00:01:36,469 --> 00:01:34,380

to have uh talk about uapx and all kinds

22

00:01:38,990 --> 00:01:36,479

of things that should be very

23

00:01:41,749 --> 00:01:39,000

interesting and just to let you know

24

00:01:44,330 --> 00:01:41,759

coming up on Thursday night at 8pm

25

00:01:47,149 --> 00:01:44,340

Eastern I have Katie Grabowski and she

26

00:01:49,550 --> 00:01:47,159

is going to be talking about a uh a

27

00:01:51,350 --> 00:01:49,560

ranch that she grew up on spent some

28

00:01:53,929 --> 00:01:51,360

time at in Colorado where there was a

29

00:01:56,870 --> 00:01:53,939

lot of high strangers strangeness going

30

00:01:59,389 --> 00:01:56,880

on a lot of Investigation into it and

31

00:02:02,630 --> 00:01:59,399

it's fascinating I heard her talk

32

00:02:04,370 --> 00:02:02,640

um she told this story out in Pine Bush

33

00:02:06,889 --> 00:02:04,380

when I was out there was very very

34

00:02:08,990 --> 00:02:06,899

interesting our blog this week a UFO

35

00:02:11,089 --> 00:02:09,000

landing in a meeting with Eisenhower by

36

00:02:12,710 --> 00:02:11,099

Charles Lear and there was a clip

37

00:02:14,570 --> 00:02:12,720

there's a clip going around there's a

38

00:02:16,430 --> 00:02:14,580

really I hope you get a chance to check

39

00:02:17,030 --> 00:02:16,440

out this

40

00:02:18,650 --> 00:02:17,040

um

41

00:02:21,350 --> 00:02:18,660

YouTube channel I want to say it's

42

00:02:23,330 --> 00:02:21,360

called eyes on Cinema and there's it

43

00:02:25,550 --> 00:02:23,340

seems like hundreds of really great

44

00:02:27,650 --> 00:02:25,560

vintage UFO clips and interviews and

45

00:02:29,449 --> 00:02:27,660

things like that so uh check that out

46

00:02:32,089 --> 00:02:29,459

there was an interview with a New

47

00:02:35,270 --> 00:02:32,099

Hampshire a legislator that said that he

48

00:02:37,729 --> 00:02:35,280

was uh talking to Eisenhower years ago

49

00:02:40,009 --> 00:02:37,739

and about this type of thing whether

50

00:02:41,809 --> 00:02:40,019

it's true or not I have no idea but that

51
00:02:43,070 --> 00:02:41,819
is a great Channel I'm trying to get a

52
00:02:46,250 --> 00:02:43,080
hold of the person that runs the channel

53
00:02:47,570 --> 00:02:46,260
too do a show with them so I want to

54
00:02:49,790 --> 00:02:47,580
thank everyone that supports the show

55
00:02:53,270 --> 00:02:49,800
anyone can do that all you have to do is

56
00:02:56,030 --> 00:02:53,280
go over to podcast ufo.com and see

57
00:02:58,130 --> 00:02:56,040
support the show and thank you all that

58
00:03:01,790 --> 00:02:58,140
listen to the show every week and show

59
00:03:04,430 --> 00:03:01,800
up here and face Facebook and on YouTube

60
00:03:05,690 --> 00:03:04,440
always appreciate it and we're not going

61
00:03:08,330 --> 00:03:05,700
to be able to have time to take some

62
00:03:10,250 --> 00:03:08,340
calls but I will try to take some of

63
00:03:13,130 --> 00:03:10,260

your questions in chat if you do Post

64

00:03:15,170 --> 00:03:13,140

questions please do put them in caps so

65

00:03:18,050 --> 00:03:15,180

that I catch them all right I'm going to

66

00:03:20,570 --> 00:03:18,060

add Matthew welcome Matthew

67

00:03:22,070 --> 00:03:20,580

and Kevin welcome Kevin

68

00:03:24,890 --> 00:03:22,080

and Gary

69

00:03:26,809 --> 00:03:24,900

hi everyone thanks so much I know this

70

00:03:28,490 --> 00:03:26,819

is going to be fun I'm really excited to

71

00:03:32,809 --> 00:03:28,500

talk to you I don't know who wants to

72

00:03:34,809 --> 00:03:32,819

take it first but um I Heard a uapx uh I

73

00:03:37,070 --> 00:03:34,819

don't know was it uh it was

74

00:03:39,649 --> 00:03:37,080

pre-covered that seems the only way I

75

00:03:41,690 --> 00:03:39,659

judge about everything these days and uh

76
00:03:44,210 --> 00:03:41,700
so I don't know who wants to take it but

77
00:03:46,610 --> 00:03:44,220
does anyone want to talk about the

78
00:03:50,449 --> 00:03:46,620
beginnings of that and your what your

79
00:03:52,610 --> 00:03:50,459
goals are and I know you work with data

80
00:03:55,429 --> 00:03:52,620
and you want to share the data with

81
00:03:56,929 --> 00:03:55,439
everyone and it's a non-profit or it's

82
00:03:58,789 --> 00:03:56,939
going to be a non-profit I don't know is

83
00:04:01,429 --> 00:03:58,799
it now a non-profit

84
00:04:02,990 --> 00:04:01,439
yeah uh currently we're a non-profit

85
00:04:05,690 --> 00:04:03,000
based out of Florida

86
00:04:07,610 --> 00:04:05,700
um we just made a switch from Oregon to

87
00:04:10,490 --> 00:04:07,620
Florida but originally we were an Oregon

88
00:04:12,289 --> 00:04:10,500

non-profit uh me and Kevin Day it

89

00:04:14,270 --> 00:04:12,299

started the company it called me up one

90

00:04:16,849 --> 00:04:14,280

day and it's like hey uh you want to

91

00:04:19,249 --> 00:04:16,859

start a company with me like all right

92

00:04:21,409 --> 00:04:19,259

whatever I didn't actually even take

93

00:04:23,810 --> 00:04:21,419

them serious at first and then sure

94

00:04:26,390 --> 00:04:23,820

enough uh you know now it's you know

95

00:04:29,210 --> 00:04:26,400

four years later we've done our first

96

00:04:32,450 --> 00:04:29,220

expedition and uh we're still still

97

00:04:35,210 --> 00:04:32,460

crunching the data from that so uh yeah

98

00:04:38,150 --> 00:04:35,220

come a long ways with you know

99

00:04:39,230 --> 00:04:38,160

barely anything so we're doing pretty

100

00:04:42,469 --> 00:04:39,240

good

101
00:04:43,550 --> 00:04:42,479
yeah and what if I watched and I had

102
00:04:47,870 --> 00:04:43,560
Caroline

103
00:04:50,629 --> 00:04:47,880
uh quarry on and uh you all were on the

104
00:04:53,749 --> 00:04:50,639
the chair in the sky tearing this guy

105
00:04:56,510 --> 00:04:53,759
whatever you want to call it and uh I

106
00:04:59,629 --> 00:04:56,520
thought it was the equipment was amazing

107
00:05:02,390 --> 00:04:59,639
that you had there and you did catch an

108
00:05:04,850 --> 00:05:02,400
anomaly and then a couple of things in

109
00:05:07,189 --> 00:05:04,860
the sky that was pretty interesting and

110
00:05:08,689 --> 00:05:07,199
I I had thought you know many times too

111
00:05:10,670 --> 00:05:08,699
bad there couldn't be like a permanent

112
00:05:13,189 --> 00:05:10,680
setup with so much equipment like that

113
00:05:15,350 --> 00:05:13,199

because I think about anywhere you could

114

00:05:17,330 --> 00:05:15,360

locate yourself something's going to

115

00:05:21,850 --> 00:05:17,340

happen overhead sooner or later you know

116

00:05:27,230 --> 00:05:24,230

there can be a lot of apartment set up

117

00:05:29,930 --> 00:05:27,240

say I encourage people to go out to uh

118

00:05:31,430 --> 00:05:29,940

you know purchase things like UFO dapps

119

00:05:34,189 --> 00:05:31,440

which is a

120

00:05:36,409 --> 00:05:34,199

a product by Ron olsh which is

121

00:05:39,830 --> 00:05:36,419

highlighted in the movie that's actually

122

00:05:41,450 --> 00:05:39,840

the equipment we caught the anomaly on

123

00:05:42,770 --> 00:05:41,460

um so that atmospheric anomaly that

124

00:05:45,550 --> 00:05:42,780

we're still trying to figure out what it

125

00:05:48,650 --> 00:05:45,560

is uh he that's that's the actual system

126

00:05:53,330 --> 00:05:48,660

that provided us with most of the data

127

00:05:58,370 --> 00:05:57,050

wow wow and so I don't know well first

128

00:06:00,170 --> 00:05:58,380

of all

129

00:06:02,210 --> 00:06:00,180

um I know you've all been on my show in

130

00:06:06,230 --> 00:06:02,220

the past but why don't we go around

131

00:06:08,510 --> 00:06:06,240

Matthew uh first of all can you

132

00:06:11,930 --> 00:06:08,520

who do we have do we have extra guests

133

00:06:14,330 --> 00:06:11,940

okay uh Matthew can you give your

134

00:06:16,430 --> 00:06:14,340

background and and what's your you know

135

00:06:17,510 --> 00:06:16,440

what you're actually doing in in the

136

00:06:18,590 --> 00:06:17,520

projects

137

00:06:21,650 --> 00:06:18,600

sure

138

00:06:24,469 --> 00:06:21,660

so yeah I'm a professor Matthew shidogas

139

00:06:26,629 --> 00:06:24,479

I'm at University at Albany SUNY

140

00:06:29,749 --> 00:06:26,639

together with uh Kevin

141

00:06:32,510 --> 00:06:29,759

and uh so he's the Kevin's the one who

142

00:06:35,510 --> 00:06:32,520

got me into this I think and Gary and

143

00:06:39,590 --> 00:06:35,520

Kevin Day recruited Kevin Kevin knewith

144

00:06:42,529 --> 00:06:39,600

um but yeah my uh so my uh uh real day

145

00:06:44,770 --> 00:06:42,539

job is to is it as as an experimental

146

00:06:47,749 --> 00:06:44,780

Astro particle physicist and I

147

00:06:49,490 --> 00:06:47,759

specialize in direct detection uh

148

00:06:50,450 --> 00:06:49,500

techniques looking for particle dark

149

00:06:54,529 --> 00:06:50,460

matter

150

00:06:56,089 --> 00:06:54,539

and uh for on uapx my um doing a little

151
00:06:57,710 --> 00:06:56,099
bit of everything taught myself some

152
00:06:59,749 --> 00:06:57,720
image processing that I knew a little

153
00:07:03,469 --> 00:06:59,759
bit about in graduate school

154
00:07:06,650 --> 00:07:03,479
um but but my um but the biggest thing I

155
00:07:09,170 --> 00:07:06,660
look at is uh radiation detection to see

156
00:07:11,870 --> 00:07:09,180
what kinds of anomalies there exist

157
00:07:13,610 --> 00:07:11,880
above naturally occurring uh uh

158
00:07:17,510 --> 00:07:13,620
background radiation see if they might

159
00:07:20,809 --> 00:07:17,520
have some sort of uh a connection to UAP

160
00:07:22,010 --> 00:07:20,819
interesting and Kevin

161
00:07:23,930 --> 00:07:22,020
yes I'm

162
00:07:27,469 --> 00:07:23,940
also a professor at the University of

163
00:07:31,010 --> 00:07:27,479

Albany in the physics department

164

00:07:32,990 --> 00:07:31,020

my work is currently mainly focused in

165

00:07:35,809 --> 00:07:33,000

astrophysics and some work in

166

00:07:37,430 --> 00:07:35,819

theoretical physics so I am interested

167

00:07:42,110 --> 00:07:37,440

in

168

00:07:45,129 --> 00:07:42,120

around other stars and

169

00:07:47,629 --> 00:07:45,139

um and I also do some work in Quantum

170

00:07:49,129 --> 00:07:47,639

Quantum foundations the foundations of

171

00:07:50,990 --> 00:07:49,139

physics and quantum mechanics and

172

00:07:54,710 --> 00:07:51,000

relativity that sort of thing

173

00:07:56,510 --> 00:07:54,720

so all fascinating this book you both of

174

00:08:00,050 --> 00:07:56,520

what you and Matthew do just fascinates

175

00:08:01,730 --> 00:08:00,060

me yeah well that's part of my problem I

176

00:08:05,150 --> 00:08:01,740

bright shiny things that I can't help

177

00:08:08,570 --> 00:08:05,160

but run towards so um yeah and uaps are

178

00:08:10,430 --> 00:08:08,580

just another bright shiny thing so so

179

00:08:11,990 --> 00:08:10,440

um that's a good thing though and and

180

00:08:14,089 --> 00:08:12,000

hopefully we'll we'll be learning

181

00:08:16,010 --> 00:08:14,099

something which will be great Kevin I

182

00:08:18,110 --> 00:08:16,020

remember when you were on my show the

183

00:08:20,089 --> 00:08:18,120

first time you mentioned that you were

184

00:08:21,650 --> 00:08:20,099

going to this conference a lot and this

185

00:08:23,570 --> 00:08:21,660

guy started talking about earthquake

186

00:08:26,689 --> 00:08:23,580

lights and everyone thought he was kind

187

00:08:28,369 --> 00:08:26,699

of a lunatic and then ends up he really

188

00:08:30,650 --> 00:08:28,379

had something there and you said this is

189

00:08:32,930 --> 00:08:30,660

the type of ground floor that I want to

190

00:08:35,329 --> 00:08:32,940

be in on when it comes to UAP I remember

191

00:08:38,870 --> 00:08:35,339

you saying yeah that was that was that

192

00:08:40,969 --> 00:08:38,880

was a long time ago when I was I was at

193

00:08:43,610 --> 00:08:40,979

um what was a research scientist at NASA

194

00:08:46,509 --> 00:08:43,620

Ames Research Center in um in the Bay

195

00:08:49,910 --> 00:08:46,519

Area in California and it was around

196

00:08:53,150 --> 00:08:49,920

2003 and I had gotten some funding from

197

00:08:55,970 --> 00:08:53,160

NASA to study planetary nebulae which

198

00:08:56,990 --> 00:08:55,980

are clouds of gas surrounding dying

199

00:09:00,530 --> 00:08:57,000

Stars

200

00:09:02,150 --> 00:09:00,540

we were using Hubble images to create

201
00:09:06,050 --> 00:09:02,160
three-dimensional models of these things

202
00:09:09,410 --> 00:09:06,060
so we were at a at a NASA meeting uh

203
00:09:12,710 --> 00:09:09,420
just local at that at the um on base

204
00:09:14,870 --> 00:09:12,720
where um we

205
00:09:16,550 --> 00:09:14,880
where we had post basically a large

206
00:09:18,230 --> 00:09:16,560
poster displaying our work and

207
00:09:20,810 --> 00:09:18,240
describing what we were doing and my

208
00:09:24,110 --> 00:09:20,820
poster happened to be next to

209
00:09:25,910 --> 00:09:24,120
um Friedman Freud which who was a a

210
00:09:28,910 --> 00:09:25,920
researcher who had gotten some funding

211
00:09:30,530 --> 00:09:28,920
to look into earthquake lights

212
00:09:31,790 --> 00:09:30,540
and I had never heard of earthquake

213
00:09:33,590 --> 00:09:31,800

lights I thought these were kind of

214

00:09:35,329 --> 00:09:33,600

strange so I talked to him and he

215

00:09:38,110 --> 00:09:35,339

basically walked me through his work and

216

00:09:40,670 --> 00:09:38,120

he described that you know people see

217

00:09:44,090 --> 00:09:40,680

often see lights appearing above the

218

00:09:46,790 --> 00:09:44,100

ground during earthquakes and

219

00:09:48,290 --> 00:09:46,800

um he explained that scientists don't

220

00:09:49,730 --> 00:09:48,300

necessarily believe they're real they

221

00:09:51,769 --> 00:09:49,740

think that people are hallucinating

222

00:09:53,090 --> 00:09:51,779

because oh they're under all this stress

223

00:09:54,829 --> 00:09:53,100

from an earthquake so they're of course

224

00:09:58,550 --> 00:09:54,839

seeing lights and crazy things like this

225

00:10:02,269 --> 00:09:58,560

man he was working under the hypothesis

226

00:10:04,069 --> 00:10:02,279

that when you have a lot of stress in

227

00:10:06,050 --> 00:10:04,079

the Earth's crust

228

00:10:08,389 --> 00:10:06,060

um you've got a lot of quartz

229

00:10:10,250 --> 00:10:08,399

um in the Rock and you get what's called

230

00:10:12,290 --> 00:10:10,260

a piezoelectric effect so a lot of

231

00:10:15,050 --> 00:10:12,300

pressure on on a quartz crystal give you

232

00:10:17,329 --> 00:10:15,060

a separation of electric charge in high

233

00:10:18,710 --> 00:10:17,339

electric fields and he was postulating

234

00:10:21,650 --> 00:10:18,720

that these electric Fields were

235

00:10:23,990 --> 00:10:21,660

basically ionizing the air above the

236

00:10:28,130 --> 00:10:24,000

ground and creating lights

237

00:10:29,630 --> 00:10:28,140

and um and he was his idea was that if

238

00:10:31,490 --> 00:10:29,640

this is actually happening you should be

239

00:10:33,590 --> 00:10:31,500

able to predict earthquakes or at least

240

00:10:35,329 --> 00:10:33,600

measure the amount of stress

241

00:10:36,590 --> 00:10:35,339

in the ground by looking at these

242

00:10:39,050 --> 00:10:36,600

electric fields

243

00:10:40,430 --> 00:10:39,060

and um so I kind of asked around I

244

00:10:42,050 --> 00:10:40,440

thought well this is strange this sounds

245

00:10:43,190 --> 00:10:42,060

really cool but I've never heard of this

246

00:10:44,690 --> 00:10:43,200

and

247

00:10:47,449 --> 00:10:44,700

I asked some of the other researchers

248

00:10:49,190 --> 00:10:47,459

and they at the at Nasa and they said

249

00:10:50,750 --> 00:10:49,200

well yeah he's been working he's been

250

00:10:53,389 --> 00:10:50,760

talking about this for 20 years and

251
00:10:55,069 --> 00:10:53,399
nobody believes they're real and see

252
00:10:57,290 --> 00:10:55,079
people are just hallucinating these

253
00:10:59,569 --> 00:10:57,300
things and it's seems like it's nonsense

254
00:11:01,250 --> 00:10:59,579
but you know what he's saying makes kind

255
00:11:03,110 --> 00:11:01,260
of make could make some sense but it's

256
00:11:04,370 --> 00:11:03,120
hard to imagine that this is a real

257
00:11:05,750 --> 00:11:04,380
thing you this would have been

258
00:11:08,509 --> 00:11:05,760
discovered already

259
00:11:09,410 --> 00:11:08,519
and and it turns out that

260
00:11:12,350 --> 00:11:09,420
um

261
00:11:13,130 --> 00:11:12,360
now it's made about five years ago there

262
00:11:16,009 --> 00:11:13,140
were

263
00:11:18,470 --> 00:11:16,019

um earthquake earthquake lights recorded

264

00:11:20,690 --> 00:11:18,480

um by security cameras

265

00:11:22,910 --> 00:11:20,700

um during two earthquakes I think one in

266

00:11:24,470 --> 00:11:22,920

South America one in Japan within a few

267

00:11:28,009 --> 00:11:24,480

days of each other

268

00:11:30,710 --> 00:11:28,019

and um and this was finally enough to

269

00:11:32,990 --> 00:11:30,720

convince some scientists that hey wait a

270

00:11:36,170 --> 00:11:33,000

minute this is actually real and yeah

271

00:11:39,769 --> 00:11:36,180

I'm fortunate for him he he was he's

272

00:11:41,150 --> 00:11:39,779

still around and um he was all over the

273

00:11:43,850 --> 00:11:41,160

news because

274

00:11:45,710 --> 00:11:43,860

he was the world's expert on earthquake

275

00:11:47,449 --> 00:11:45,720

lights because he's the only person who

276

00:11:49,069 --> 00:11:47,459

ever studied them

277

00:11:51,710 --> 00:11:49,079

um you know but this is one of these

278

00:11:53,629 --> 00:11:51,720

examples of of a thing where

279

00:11:56,210 --> 00:11:53,639

people were unable unwilling to believe

280

00:11:59,090 --> 00:11:56,220

they were real and and scientists didn't

281

00:12:01,069 --> 00:11:59,100

study it and so nobody knew about it and

282

00:12:03,230 --> 00:12:01,079

did you hear did you hear what you said

283

00:12:06,170 --> 00:12:03,240

though you said that I would have known

284

00:12:08,690 --> 00:12:06,180

about it that's that's a lot of that's

285

00:12:12,370 --> 00:12:08,700

it unfortunately that's not science and

286

00:12:14,389 --> 00:12:12,380

that's that's what you do here uh

287

00:12:17,389 --> 00:12:14,399

scientists are supposed to study things

288

00:12:20,449 --> 00:12:17,399

that aren't known and um yeah and it's

289

00:12:22,009 --> 00:12:20,459

and and uabs are just another example of

290

00:12:24,350 --> 00:12:22,019

this people have been seeing these

291

00:12:26,210 --> 00:12:24,360

things literally for thousands of years

292

00:12:28,910 --> 00:12:26,220

I mean there are reports from Roman

293

00:12:32,150 --> 00:12:28,920

times that aren't that different than

294

00:12:34,310 --> 00:12:32,160

the reports nowadays and right we have

295

00:12:36,170 --> 00:12:34,320

this strange impression and congress's

296

00:12:37,910 --> 00:12:36,180

basic you know falsely given this

297

00:12:40,730 --> 00:12:37,920

impression that this has somehow been a

298

00:12:42,769 --> 00:12:40,740

problem since 2004. oh this has been

299

00:12:46,250 --> 00:12:42,779

going on for hundreds of years I have

300

00:12:47,930 --> 00:12:46,260

reports of UAP is coming of discs coming

301
00:12:50,269 --> 00:12:47,940
out of the water hovering above ships

302
00:12:52,190 --> 00:12:50,279
and then taking off into the sky going

303
00:12:55,009 --> 00:12:52,200
back into the 1800s

304
00:12:57,230 --> 00:12:55,019
I have this and we're debating he's like

305
00:12:59,750 --> 00:12:57,240
oh are these maybe Russian or Chinese

306
00:13:02,990 --> 00:12:59,760
it's like what if it's from 1990 it's

307
00:13:06,949 --> 00:13:03,000
not yeah here's here's an account right

308
00:13:08,750 --> 00:13:06,959
here from 1796 I believe it is which was

309
00:13:11,269 --> 00:13:08,760
found in a ship's log which I think is

310
00:13:12,829 --> 00:13:11,279
really amazing a lot of these are found

311
00:13:16,610 --> 00:13:12,839
in ships log because they kept good

312
00:13:19,550 --> 00:13:16,620
records and that's right and and this is

313
00:13:21,590 --> 00:13:19,560

fair and in addition to that uaps

314

00:13:24,470 --> 00:13:21,600

apparently are seem to be associated

315

00:13:27,590 --> 00:13:24,480

with water so which is why the U.S Navy

316

00:13:30,230 --> 00:13:27,600

was seeing them and um so they appear in

317

00:13:32,509 --> 00:13:30,240

ship slugs and going back into the 1700s

318

00:13:34,129 --> 00:13:32,519

yeah that's right and nobody talks about

319

00:13:36,230 --> 00:13:34,139

this I don't think people want to talk

320

00:13:38,030 --> 00:13:36,240

about it because yeah it kind of throws

321

00:13:39,889 --> 00:13:38,040

the narrative away from the whole oh

322

00:13:42,410 --> 00:13:39,899

they could be Chinese or Russian or

323

00:13:45,530 --> 00:13:42,420

maybe somebody has advanced Tech yeah

324

00:13:47,449 --> 00:13:45,540

somebody has advanced Tech we don't what

325

00:13:48,910 --> 00:13:47,459

I would like to know about this yeah

326

00:13:51,110 --> 00:13:48,920

that's right

327

00:13:54,889 --> 00:13:51,120

this doesn't get talked about I think

328

00:13:56,750 --> 00:13:54,899

that's important yes uh so Gary uh right

329

00:13:58,670 --> 00:13:56,760

before though uh right after you talk

330

00:14:00,290 --> 00:13:58,680

I'm going to show the picture that

331

00:14:03,889 --> 00:14:00,300

everyone has been talking about I got

332

00:14:05,750 --> 00:14:03,899

about 50 emails the uh Calvin uh UFO but

333

00:14:07,009 --> 00:14:05,760

Gary uh why don't you give your

334

00:14:11,389 --> 00:14:07,019

background a little bit about yourself

335

00:14:17,990 --> 00:14:14,870

um so Gary Voorhees uh I'm sure that

336

00:14:19,850 --> 00:14:18,000

horse has been beaten to death uh I was

337

00:14:22,970 --> 00:14:19,860

uh part of the crew that tracked unknown

338

00:14:24,889 --> 00:14:22,980

aircraft 2004 with uh the USS Nimitz

339

00:14:25,790 --> 00:14:24,899

Carrier Group

340

00:14:27,889 --> 00:14:25,800

um

341

00:14:29,810 --> 00:14:27,899

and honestly I think that uh the only

342

00:14:32,389 --> 00:14:29,820

reason they just they picked that point

343

00:14:34,490 --> 00:14:32,399

is because of liability uh they start to

344

00:14:37,430 --> 00:14:34,500

admit anything past that it starts to

345

00:14:41,030 --> 00:14:37,440

become pretty pretty big liable issues

346

00:14:43,189 --> 00:14:41,040

so but uh other than that I'm uh the

347

00:14:47,389 --> 00:14:43,199

president of uapx uh one of the

348

00:14:49,790 --> 00:14:47,399

co-founders and uh continue to run the

349

00:14:53,030 --> 00:14:49,800

day-to-day operations of uapx

350

00:14:56,090 --> 00:14:53,040

along with all these guys believe me uh

351
00:14:57,710 --> 00:14:56,100
I only do a small bit of the work so

352
00:15:00,710 --> 00:14:57,720
these these guys

353
00:15:04,670 --> 00:15:00,720
uh carry most of the load

354
00:15:06,050 --> 00:15:04,680
and let's talk about uh I know in

355
00:15:09,050 --> 00:15:06,060
um you know tearing this guy there was

356
00:15:10,610 --> 00:15:09,060
all this equipment I know uh you know

357
00:15:13,069 --> 00:15:10,620
David

358
00:15:16,910 --> 00:15:13,079
um Mason had a lot of that equipment but

359
00:15:18,949 --> 00:15:16,920
do you now have equipment that you can

360
00:15:20,870 --> 00:15:18,959
set up again and are you set up

361
00:15:22,910 --> 00:15:20,880
somewhere do you set up occasionally do

362
00:15:24,889 --> 00:15:22,920
you have like certain events that you

363
00:15:25,910 --> 00:15:24,899

try to put together how does all that

364

00:15:28,370 --> 00:15:25,920

work

365

00:15:30,949 --> 00:15:28,380

uh well we're currently we've got some

366

00:15:33,970 --> 00:15:30,959

projects uh that we're not talking about

367

00:15:37,550 --> 00:15:33,980

yet but we are planning on a second uh

368

00:15:40,550 --> 00:15:37,560

uh a second trip out uh to California if

369

00:15:42,590 --> 00:15:40,560

we can uh and then also we're also

370

00:15:45,230 --> 00:15:42,600

talking about setting up a permit

371

00:15:48,829 --> 00:15:45,240

station as a uh like a

372

00:15:52,189 --> 00:15:48,839

a control study at a a farm in New York

373

00:15:55,249 --> 00:15:52,199

uh that doesn't have a ton of reports

374

00:15:59,269 --> 00:15:55,259

for UAP and that's going to be uh you

375

00:16:00,530 --> 00:15:59,279

know our uh our our litmus for exactly

376

00:16:04,550 --> 00:16:00,540

what

377

00:16:05,990 --> 00:16:04,560

uh that's just going to be uh

378

00:16:08,689 --> 00:16:06,000

where we're going to be testing

379

00:16:10,370 --> 00:16:08,699

everything off of based on based off of

380

00:16:12,350 --> 00:16:10,380

you know the activity we might find

381

00:16:13,850 --> 00:16:12,360

there but we don't expect to find

382

00:16:16,249 --> 00:16:13,860

anything there which is exactly why

383

00:16:18,470 --> 00:16:16,259

we're going to set something up there

384

00:16:20,269 --> 00:16:18,480

um that's going to be on private

385

00:16:24,050 --> 00:16:20,279

property so that we can you know

386

00:16:27,110 --> 00:16:24,060

maintain it without worry and then uh we

387

00:16:29,150 --> 00:16:27,120

have a collaborator in California that

388

00:16:32,030 --> 00:16:29,160

may be willing to let us set something

389

00:16:34,129 --> 00:16:32,040

permanently up on their roof so uh but

390

00:16:35,449 --> 00:16:34,139

we're we're playing around with a couple

391

00:16:37,430 --> 00:16:35,459

of different places but we're looking

392

00:16:39,530 --> 00:16:37,440

for a second location to set up a

393

00:16:41,870 --> 00:16:39,540

permanent installation and then on top

394

00:16:46,069 --> 00:16:41,880

of that we will have uh you know the

395

00:16:47,930 --> 00:16:46,079

Osiris and uh you know Jeremy with his

396

00:16:49,370 --> 00:16:47,940

truck that we are able to do you know

397

00:16:52,129 --> 00:16:49,380

mobile

398

00:16:54,230 --> 00:16:52,139

yeah we're good about we can mobilize to

399

00:16:55,970 --> 00:16:54,240

areas and check them out and just scout

400

00:16:56,870 --> 00:16:55,980

out areas and see whether they're even

401
00:16:59,269 --> 00:16:56,880
worth

402
00:17:02,150 --> 00:16:59,279
spending the money to go do a full

403
00:17:03,410 --> 00:17:02,160
research project on so

404
00:17:05,569 --> 00:17:03,420
um

405
00:17:08,150 --> 00:17:05,579
yeah and we do have equipment yeah we

406
00:17:11,270 --> 00:17:08,160
have uh UFO depths clear cameras uh

407
00:17:14,750 --> 00:17:11,280
we've got uh everything that was useful

408
00:17:17,029 --> 00:17:14,760
with getting data in the movie we have

409
00:17:19,250 --> 00:17:17,039
so uh there are three the three devices

410
00:17:20,689 --> 00:17:19,260
that we primarily got our data from was

411
00:17:24,710 --> 00:17:20,699
the UFO dap

412
00:17:27,230 --> 00:17:24,720
the flare cameras and uh a muon detector

413
00:17:28,970 --> 00:17:27,240

called The Cosmic watch which detects

414

00:17:32,450 --> 00:17:28,980

different types of energy levels and

415

00:17:34,250 --> 00:17:32,460

radiation Matthew knows he's he's our

416

00:17:36,110 --> 00:17:34,260

he's our radiation guy he can tell you

417

00:17:37,909 --> 00:17:36,120

you know four four hours worth of

418

00:17:40,370 --> 00:17:37,919

information on that that beautiful

419

00:17:42,409 --> 00:17:40,380

little device but uh through correlating

420

00:17:44,210 --> 00:17:42,419

the data between those three devices we

421

00:17:47,450 --> 00:17:44,220

that's where we're able to get most of

422

00:17:48,890 --> 00:17:47,460

our information uh unfortunately a lot

423

00:17:51,710 --> 00:17:48,900

of the rest of the stuff was just really

424

00:17:54,350 --> 00:17:51,720

pretty to look at okay here comes a

425

00:17:57,169 --> 00:17:54,360

question here how can we use the methods

426
00:17:59,890 --> 00:17:57,179
of Natural Science to study beings who

427
00:18:02,270 --> 00:17:59,900
can trick our instruments there's been

428
00:18:06,289 --> 00:18:02,280
before you discount that question you

429
00:18:09,610 --> 00:18:06,299
know I mean you go to the um the Tic Tac

430
00:18:12,409 --> 00:18:09,620
supposedly there was some type of radar

431
00:18:14,630 --> 00:18:12,419
issues that could have been something

432
00:18:15,770 --> 00:18:14,640
that was you know messed with or

433
00:18:18,830 --> 00:18:15,780
something like that I mean I don't

434
00:18:21,289 --> 00:18:18,840
really know exactly but I heard that and

435
00:18:22,850 --> 00:18:21,299
I don't know how true that is that there

436
00:18:26,330 --> 00:18:22,860
was some type of problem with the radar

437
00:18:27,890 --> 00:18:26,340
when these Tic Tacs were in the area

438
00:18:29,990 --> 00:18:27,900

um well we never had a problem with spy

439

00:18:33,529 --> 00:18:30,000

except for when it accelerated too fast

440

00:18:36,110 --> 00:18:33,539

for us to track them and uh and I'm not

441

00:18:38,630 --> 00:18:36,120

sure if the actual Radars on the on the

442

00:18:40,370 --> 00:18:38,640

f-18s were actually able to even track

443

00:18:44,270 --> 00:18:40,380

them at all I think they were getting

444

00:18:46,190 --> 00:18:44,280

data off of Link 16 to uh know where

445

00:18:48,770 --> 00:18:46,200

these these objects were

446

00:18:51,950 --> 00:18:48,780

um but the Princeton and the the

447

00:18:54,430 --> 00:18:51,960

phaserated uh radar off of the Hawkeye

448

00:18:57,830 --> 00:18:54,440

were able to track them no problem

449

00:18:58,630 --> 00:18:57,840

that's true go ahead I would like to add

450

00:19:01,010 --> 00:18:58,640

that

451

00:19:03,289 --> 00:19:01,020

well I would ask the person asking a

452

00:19:05,150 --> 00:19:03,299

question what's the alternative you give

453

00:19:07,370 --> 00:19:05,160

up you don't try to study at all there's

454

00:19:09,289 --> 00:19:07,380

no alternative except giving up which

455

00:19:12,470 --> 00:19:09,299

obviously you don't we want to do or

456

00:19:14,630 --> 00:19:12,480

switching to a belief

457

00:19:16,730 --> 00:19:14,640

um instead of instead of collection of

458

00:19:19,490 --> 00:19:16,740

facts which if you look at the history

459

00:19:21,529 --> 00:19:19,500

of science I mean it's done pretty well

460

00:19:23,330 --> 00:19:21,539

so far right the reason why we're on a

461

00:19:26,990 --> 00:19:23,340

computer right now and you've got Wi-Fi

462

00:19:30,110 --> 00:19:27,000

on the dock is because science works so

463

00:19:32,409 --> 00:19:30,120

so saying that well science might not

464

00:19:34,850 --> 00:19:32,419

work in this case so let's not even try

465

00:19:37,490 --> 00:19:34,860

that's uh that's your doomed to failure

466

00:19:40,250 --> 00:19:37,500

from the start then so so you you still

467

00:19:42,110 --> 00:19:40,260

have to try regardless of of because

468

00:19:43,130 --> 00:19:42,120

there's like I said there's no it's an

469

00:19:44,690 --> 00:19:43,140

alternative

470

00:19:46,909 --> 00:19:44,700

well you know it's kind of how I feel

471

00:19:48,830 --> 00:19:46,919

about seti at least they're they're

472

00:19:51,289 --> 00:19:48,840

trying you know I mean it's it's better

473

00:19:53,390 --> 00:19:51,299

than not trying yeah exactly yeah well

474

00:19:54,710 --> 00:19:53,400

it boils down to like the Edison you

475

00:19:56,810 --> 00:19:54,720

know thing you know how many how many

476
00:19:58,130 --> 00:19:56,820
times try everything and then when when

477
00:20:00,049 --> 00:19:58,140
you don't find it when you know that's

478
00:20:02,330 --> 00:20:00,059
one thing that doesn't work you know

479
00:20:05,750 --> 00:20:02,340
yeah elimination yeah and another thing

480
00:20:08,149 --> 00:20:05,760
that we we're doing to eliminate the

481
00:20:10,490 --> 00:20:08,159
possibility of problems is that we're

482
00:20:13,490 --> 00:20:10,500
using many different types of equipment

483
00:20:14,810 --> 00:20:13,500
we're looking for we're you know we're

484
00:20:16,669 --> 00:20:14,820
watching the infrared light we're

485
00:20:18,169 --> 00:20:16,679
recording infrared images recording

486
00:20:21,049 --> 00:20:18,179
visible images

487
00:20:24,950 --> 00:20:21,059
we're recording um higher energy

488
00:20:26,990 --> 00:20:24,960

particles and radiation we're recording

489

00:20:28,970 --> 00:20:27,000

um going to be recording magnetic fields

490

00:20:32,930 --> 00:20:28,980

and electric fields and we're looking

491

00:20:34,970 --> 00:20:32,940

for looking at Spectra so we've got many

492

00:20:37,970 --> 00:20:34,980

different types of equipment out here

493

00:20:40,430 --> 00:20:37,980

and if you know one of them somehow gets

494

00:20:43,010 --> 00:20:40,440

spoofed will get spoofed and we'll see

495

00:20:45,529 --> 00:20:43,020

that as an anomaly right and we just

496

00:20:47,210 --> 00:20:45,539

work with what we get but I think using

497

00:20:50,510 --> 00:20:47,220

as many different types of equipment as

498

00:20:53,870 --> 00:20:50,520

we can help improv first it provides as

499

00:20:56,390 --> 00:20:53,880

much data as possible and um and it'll

500

00:20:59,570 --> 00:20:56,400

help us learn more about these things

501
00:21:02,870 --> 00:20:59,580
do you think what we can observe

502
00:21:05,630 --> 00:21:02,880
you know do you think we're seeing more

503
00:21:06,890 --> 00:21:05,640
as I say UAP or UFOs whatever you want

504
00:21:09,590 --> 00:21:06,900
to call them

505
00:21:12,529 --> 00:21:09,600
um because of the Spectra that we're

506
00:21:15,529 --> 00:21:12,539
looking in compared to like the Fleur uh

507
00:21:17,029 --> 00:21:15,539
cameras and things like that uh no do

508
00:21:18,770 --> 00:21:17,039
you think we're seeing more that they

509
00:21:20,330 --> 00:21:18,780
were there all the time but we're seeing

510
00:21:24,350 --> 00:21:20,340
them now when we didn't see them before

511
00:21:26,390 --> 00:21:24,360
anyone I uh I I The Perfect Analogy is

512
00:21:28,010 --> 00:21:26,400
the blue car analogy you know you never

513
00:21:29,270 --> 00:21:28,020

see blue cars until somebody tells you

514

00:21:31,549 --> 00:21:29,280

hey I've never seen any blue cars

515

00:21:33,049 --> 00:21:31,559

anymore you know this is prevalent in

516

00:21:34,909 --> 00:21:33,059

the news we've got Congress meeting

517

00:21:36,830 --> 00:21:34,919

about it we've got movies coming out

518

00:21:38,990 --> 00:21:36,840

about it you know it's it's never been

519

00:21:40,549 --> 00:21:39,000

more prevalent in human society than

520

00:21:43,430 --> 00:21:40,559

right now or at least in the United

521

00:21:45,289 --> 00:21:43,440

States so whenever that happens you just

522

00:21:47,510 --> 00:21:45,299

have people looking more often and when

523

00:21:49,850 --> 00:21:47,520

you have yeah I think 1952 was a

524

00:21:51,830 --> 00:21:49,860

comparable year it seems like well yeah

525

00:21:53,390 --> 00:21:51,840

everyone was making this guy back then

526

00:21:55,370 --> 00:21:53,400

you know and they were seeing them all

527

00:21:56,930 --> 00:21:55,380

over the they had big flaps during that

528

00:21:58,789 --> 00:21:56,940

those years too that's right and then

529

00:22:01,549 --> 00:21:58,799

and then it died out with the economic

530

00:22:03,289 --> 00:22:01,559

crisis and you know once once and

531

00:22:05,090 --> 00:22:03,299

especially during the Depression you you

532

00:22:06,950 --> 00:22:05,100

didn't you didn't hear about UFOs during

533

00:22:09,350 --> 00:22:06,960

then you know so when everybody's trying

534

00:22:12,169 --> 00:22:09,360

to you know live that's a different

535

00:22:14,029 --> 00:22:12,179

story so yeah here's another question

536

00:22:16,130 --> 00:22:14,039

just popped in uh Gary have you been

537

00:22:17,930 --> 00:22:16,140

able to bait UFOs

538

00:22:20,870 --> 00:22:17,940

no but we might have something in the

539

00:22:22,789 --> 00:22:20,880

works to try to do that and how we can't

540

00:22:25,549 --> 00:22:22,799

talk about that though we can't talk

541

00:22:28,370 --> 00:22:25,559

about that yeah well

542

00:22:31,610 --> 00:22:28,380

you know a lot of people have told me

543

00:22:34,370 --> 00:22:31,620

well this now see E5 and all that you

544

00:22:38,270 --> 00:22:34,380

know like they can summon it in and then

545

00:22:40,250 --> 00:22:38,280

you hear uh and I I have no real comment

546

00:22:43,610 --> 00:22:40,260

on people that listen to my show know

547

00:22:45,470 --> 00:22:43,620

how how I feel about Dr Stephen Greer uh

548

00:22:47,390 --> 00:22:45,480

so we don't have to really go there I

549

00:22:49,070 --> 00:22:47,400

don't know I don't get mail I have I

550

00:22:52,310 --> 00:22:49,080

have I have I have a short comment to

551

00:22:53,510 --> 00:22:52,320

make be kind okay folks I'll try if it's

552

00:23:00,289 --> 00:22:53,520

real

553

00:23:02,630 --> 00:23:00,299

do your C5 several thousand times and

554

00:23:04,730 --> 00:23:02,640

then do it wrong on purpose or not do it

555

00:23:07,250 --> 00:23:04,740

as a control and that will prove that it

556

00:23:08,930 --> 00:23:07,260

works no I'm dead serious and like you

557

00:23:11,450 --> 00:23:08,940

can't do it one time be like oh my god

558

00:23:13,250 --> 00:23:11,460

it worked that's not how science works

559

00:23:16,190 --> 00:23:13,260

you need to do something hundreds if not

560

00:23:17,930 --> 00:23:16,200

thousands of times more and even that's

561

00:23:20,029 --> 00:23:17,940

not good enough you also need a control

562

00:23:22,010 --> 00:23:20,039

to show that what you're doing actually

563

00:23:24,110 --> 00:23:22,020

makes a difference I haven't seen

564

00:23:25,610 --> 00:23:24,120

anything close to that from the C5

565

00:23:27,350 --> 00:23:25,620

people and if you say them it's like oh

566

00:23:29,270 --> 00:23:27,360

you don't understand blah blah blah

567

00:23:31,789 --> 00:23:29,280

you're just a non-believer but I'm sorry

568

00:23:34,330 --> 00:23:31,799

but that's how science works is you need

569

00:23:37,070 --> 00:23:34,340

to do multiple trials

570

00:23:39,430 --> 00:23:37,080

I would add another thing that that's

571

00:23:42,230 --> 00:23:39,440

important to keep in mind is that

572

00:23:45,529 --> 00:23:42,240

we don't know we don't yet know what

573

00:23:47,630 --> 00:23:45,539

these objects all are right and

574

00:23:49,730 --> 00:23:47,640

if you are looking at something and you

575

00:23:51,529 --> 00:23:49,740

don't know what it is and you believed

576

00:23:52,909 --> 00:23:51,539

you performed some kind of procedure and

577

00:23:54,710 --> 00:23:52,919

made it appear

578

00:23:57,049 --> 00:23:54,720

you don't actually know what you made up

579

00:23:59,029 --> 00:23:57,059

here so how do you know that it worked

580

00:24:01,010 --> 00:23:59,039

and in what sense did it work that

581

00:24:03,110 --> 00:24:01,020

doesn't even you can't even draw those

582

00:24:05,990 --> 00:24:03,120

conclusions reasonably

583

00:24:07,669 --> 00:24:06,000

so you have to go back here so so if you

584

00:24:09,529 --> 00:24:07,679

don't know what you're looking at you

585

00:24:11,630 --> 00:24:09,539

can't know that your procedure to summon

586

00:24:14,630 --> 00:24:11,640

it worked

587

00:24:18,049 --> 00:24:14,640

um and and that's that's uh inherently

588

00:24:19,549 --> 00:24:18,059

the already the big problem there so

589

00:24:21,470 --> 00:24:19,559

you know if you can show that it's an

590

00:24:23,149 --> 00:24:21,480

alien spacecraft and then you can show

591

00:24:24,710 --> 00:24:23,159

that when you do this you summon an

592

00:24:26,930 --> 00:24:24,720

alien spacecraft every time that's fine

593

00:24:28,789 --> 00:24:26,940

but but we don't know that these lights

594

00:24:30,169 --> 00:24:28,799

in the sky that people are seeing are

595

00:24:31,430 --> 00:24:30,179

being summoned because we don't even

596

00:24:32,990 --> 00:24:31,440

know what they are

597

00:24:34,490 --> 00:24:33,000

but they haven't been able to show what

598

00:24:36,470 --> 00:24:34,500

they are no one's shown what they are

599

00:24:38,510 --> 00:24:36,480

yet so right right I think that's

600

00:24:41,950 --> 00:24:38,520

important to remember we're trying to

601
00:24:48,289 --> 00:24:45,590
yeah as for as for the company itself we

602
00:24:50,390 --> 00:24:48,299
we base nothing in ce5

603
00:24:52,789 --> 00:24:50,400
um I actually there's a there's a small

604
00:24:55,669 --> 00:24:52,799
uh Ranch near me called the Darby Ranch

605
00:24:57,470 --> 00:24:55,679
that does ce5 and you know I can't I

606
00:24:59,210 --> 00:24:57,480
can't talk about whether it works or not

607
00:25:01,970 --> 00:24:59,220
I'll be honest every single time I've

608
00:25:04,610 --> 00:25:01,980
gone there to check it out uh I've seen

609
00:25:06,350 --> 00:25:04,620
absolutely nothing but they you know

610
00:25:08,450 --> 00:25:06,360
they they have

611
00:25:10,909 --> 00:25:08,460
you know catalogs and catalogs of

612
00:25:13,010 --> 00:25:10,919
pictures of you know thing things you

613
00:25:14,870 --> 00:25:13,020

know I don't know what they are uh but

614

00:25:17,750 --> 00:25:14,880

you know they seem pretty confident that

615

00:25:20,510 --> 00:25:17,760

they can do it but I've yet to be at one

616

00:25:23,029 --> 00:25:20,520

that actually has summoned anything and

617

00:25:25,730 --> 00:25:23,039

well I have a friend that went to a one

618

00:25:27,590 --> 00:25:25,740

in New York and it was

619

00:25:30,529 --> 00:25:27,600

uh well

620

00:25:32,090 --> 00:25:30,539

it was pretty interesting I'm gonna try

621

00:25:35,110 --> 00:25:32,100

to be kind

622

00:25:38,210 --> 00:25:35,120

um but um they were seeing something

623

00:25:39,890 --> 00:25:38,220

when the sun was just right but it was

624

00:25:41,570 --> 00:25:39,900

probably I don't know do you see space

625

00:25:44,149 --> 00:25:41,580

junk reflected I don't know what it was

626
00:25:45,590 --> 00:25:44,159
they were seeing and then uh when it was

627
00:25:47,810 --> 00:25:45,600
cloudy

628
00:25:51,049 --> 00:25:47,820
um The Invisible UFO landed in the

629
00:25:53,990 --> 00:25:51,059
backyard and it was there all you had to

630
00:25:56,690 --> 00:25:54,000
do is just know what was there yeah so

631
00:25:57,909 --> 00:25:56,700
yeah that's uh to like the King's new

632
00:26:02,570 --> 00:25:57,919
clothes

633
00:26:04,909 --> 00:26:02,580
yeah exactly but yeah yeah I would I

634
00:26:06,890 --> 00:26:04,919
would imagine that if this technique

635
00:26:09,110 --> 00:26:06,900
somehow really did work that you would

636
00:26:11,570 --> 00:26:09,120
be able to get excellent data and we

637
00:26:13,370 --> 00:26:11,580
would have seen that though yeah but

638
00:26:15,289 --> 00:26:13,380

that doesn't seem to be the case well

639

00:26:17,990 --> 00:26:15,299

it's written it's written right into the

640

00:26:19,730 --> 00:26:18,000

rules that you have to abide by when you

641

00:26:21,289 --> 00:26:19,740

go to one of these things you know you

642

00:26:23,870 --> 00:26:21,299

can't have weapons you have to have good

643

00:26:26,269 --> 00:26:23,880

intentions you know everything those

644

00:26:28,970 --> 00:26:26,279

aliens yeah look I mean well you know I

645

00:26:30,710 --> 00:26:28,980

I never brought my done with me when I

646

00:26:32,450 --> 00:26:30,720

went to the Darby Ranch just because I

647

00:26:34,909 --> 00:26:32,460

respected you know I really did I I

648

00:26:36,830 --> 00:26:34,919

wanted to give it it's it's it's it's

649

00:26:40,490 --> 00:26:36,840

it's true shake you know I want to

650

00:26:43,490 --> 00:26:40,500

follow their rules do it wholeheartedly

651
00:26:45,409 --> 00:26:43,500
you know I I meditate on a regular basis

652
00:26:49,549 --> 00:26:45,419
so I mean meditation wasn't a problem

653
00:26:51,470 --> 00:26:49,559
for me I find it a great Focus but

654
00:26:53,210 --> 00:26:51,480
I still didn't see anything and they

655
00:26:54,649 --> 00:26:53,220
still couldn't produce any any real

656
00:26:57,289 --> 00:26:54,659
evidence to me that they could do

657
00:26:59,570 --> 00:26:57,299
anything but I only went twice you know

658
00:27:01,490 --> 00:26:59,580
I'm going to continue to go and whenever

659
00:27:03,169 --> 00:27:01,500
I have a chance they do it they meet

660
00:27:03,830 --> 00:27:03,179
once a month

661
00:27:06,890 --> 00:27:03,840
um

662
00:27:08,810 --> 00:27:06,900
but yet you know and and I if I do see

663
00:27:11,330 --> 00:27:08,820

something I will be the first one to hop

664

00:27:14,029 --> 00:27:11,340

on here and be like look it's you know

665

00:27:17,110 --> 00:27:14,039

it's it's it's real this happens it

666

00:27:21,889 --> 00:27:20,810

I have a question because if if you if

667

00:27:24,789 --> 00:27:21,899

you

668

00:27:27,470 --> 00:27:24,799

have to have good intentions and and

669

00:27:28,850 --> 00:27:27,480

positive thoughts and not bring weapons

670

00:27:33,289 --> 00:27:28,860

and things like this

671

00:27:35,269 --> 00:27:33,299

why are Earth's militaries almost all of

672

00:27:36,830 --> 00:27:35,279

them saying these things

673

00:27:39,409 --> 00:27:36,840

I think they're more interested in

674

00:27:41,389 --> 00:27:39,419

nuclear and missions right I mean that

675

00:27:42,649 --> 00:27:41,399

would be clearly clearly there are

676

00:27:46,070 --> 00:27:42,659

nuclear weapon sites don't have good

677

00:27:49,789 --> 00:27:46,080

intentions for for anybody and um

678

00:27:51,769 --> 00:27:49,799

they're frequented by UFOs so I mean so

679

00:27:53,210 --> 00:27:51,779

I mean maybe yeah you could you I mean

680

00:27:55,850 --> 00:27:53,220

you could make up an answer to that of

681

00:27:58,130 --> 00:27:55,860

course but it just seems suspicious it

682

00:27:59,870 --> 00:27:58,140

seems a little strange people that

683

00:28:02,690 --> 00:27:59,880

meditate in nukes are the two two

684

00:28:05,990 --> 00:28:02,700

attractors nothing that's suspicious to

685

00:28:08,510 --> 00:28:06,000

me again is if it works okay yeah here I

686

00:28:10,430 --> 00:28:08,520

go extreme high resolution picture of

687

00:28:12,710 --> 00:28:10,440

the ship Landing oh wait

688

00:28:14,210 --> 00:28:12,720

why not right that doesn't make any it

689

00:28:16,370 --> 00:28:14,220

doesn't make any sense why can't I just

690

00:28:18,289 --> 00:28:16,380

if if you can call them down then let's

691

00:28:20,750 --> 00:28:18,299

get some high resolution stuff you know

692

00:28:23,750 --> 00:28:20,760

the the camera on my phone can show like

693

00:28:25,549 --> 00:28:23,760

a speck of dust on my cat's whisker so

694

00:28:27,169 --> 00:28:25,559

let's get a high resolution if they're

695

00:28:29,570 --> 00:28:27,179

actually landing and you can call them

696

00:28:33,289 --> 00:28:29,580

down but reproducibility remember that's

697

00:28:35,690 --> 00:28:33,299

the key to science it it like you take

698

00:28:37,490 --> 00:28:35,700

hydrogen and oxygen under the under you

699

00:28:39,710 --> 00:28:37,500

know proper conditions and energy and

700

00:28:41,630 --> 00:28:39,720

stuff you make water it's not like oh

701
00:28:44,029 --> 00:28:41,640
you know the hydrogen the oxygen atoms

702
00:28:45,710 --> 00:28:44,039
are just not feeling it today so they're

703
00:28:47,990 --> 00:28:45,720
not going to make a water molecule today

704
00:28:51,169 --> 00:28:48,000
that's not how the world works

705
00:28:52,970 --> 00:28:51,179
that's how Yuri Geller works yeah I know

706
00:28:54,529 --> 00:28:52,980
I know Johnny I can't believe we still

707
00:28:56,690 --> 00:28:54,539
talking about for the sake of those

708
00:28:59,090 --> 00:28:56,700
involved let's just hope that that

709
00:29:01,269 --> 00:28:59,100
meditation doesn't summon nuclear

710
00:29:04,970 --> 00:29:01,279
weapons

711
00:29:06,649 --> 00:29:04,980
that would be really bad if it summons

712
00:29:09,310 --> 00:29:06,659
these ships it's someone something far

713
00:29:11,169 --> 00:29:09,320

worse than nuclear weapons yeah you know

714

00:29:13,610 --> 00:29:11,179

yeah

715

00:29:17,330 --> 00:29:13,620

I'd like to talk about this photo every

716

00:29:20,450 --> 00:29:17,340

I've I got probably 35 conservatively 35

717

00:29:24,409 --> 00:29:20,460

emails in the last few days about this

718

00:29:26,870 --> 00:29:24,419

Calvin this is in Scotland uh back in

719

00:29:29,990 --> 00:29:26,880

1990 supposedly this was taken there

720

00:29:34,010 --> 00:29:30,000

were some witnesses there was low-flying

721

00:29:36,110 --> 00:29:34,020

um uh military uh planes that made a

722

00:29:37,669 --> 00:29:36,120

couple passes supposedly it hovered for

723

00:29:40,250 --> 00:29:37,679

about 10 minutes and then went vertical

724

00:29:43,010 --> 00:29:40,260

and then shot straight up mick West says

725

00:29:43,789 --> 00:29:43,020

it's a kite uh Gary you thought it might

726

00:29:45,409 --> 00:29:43,799

be

727

00:29:48,169 --> 00:29:45,419

um spliced in there a mountain a

728

00:29:50,750 --> 00:29:48,179

reflection on a lake but

729

00:29:52,549 --> 00:29:50,760

I don't know hopefully we'll find out

730

00:29:55,850 --> 00:29:52,559

more about this

731

00:29:58,130 --> 00:29:55,860

um it does look very the the ship itself

732

00:30:00,289 --> 00:29:58,140

whatever it is does look very rough but

733

00:30:03,409 --> 00:30:00,299

that doesn't you know how's it supposed

734

00:30:05,330 --> 00:30:03,419

to look I have no idea but um anyone uh

735

00:30:06,830 --> 00:30:05,340

Matthew I hadn't heard your comment you

736

00:30:09,889 --> 00:30:06,840

had not seen this picture though Matthew

737

00:30:11,269 --> 00:30:09,899

right I had not yeah I have a very

738

00:30:14,510 --> 00:30:11,279

general comment though that's going to

739

00:30:16,430 --> 00:30:14,520

annoy you know viewers no no you you get

740

00:30:20,450 --> 00:30:16,440

it no but this is why you know this is

741

00:30:24,230 --> 00:30:20,460

why we founded uapx because we need our

742

00:30:26,269 --> 00:30:24,240

own data because it's so hard to know

743

00:30:29,330 --> 00:30:26,279

what's in someone else's picture it was

744

00:30:32,149 --> 00:30:29,340

years ago this eyewitness said that and

745

00:30:34,130 --> 00:30:32,159

so this is why we need our own data

746

00:30:36,649 --> 00:30:34,140

because then we know the data provenance

747

00:30:39,310 --> 00:30:36,659

we know exactly what we're doing and

748

00:30:41,930 --> 00:30:39,320

especially like Kevin said earlier the

749

00:30:43,730 --> 00:30:41,940

multi-modal sensors what was really

750

00:30:46,310 --> 00:30:43,740

frustrating all these UFO pictures you

751
00:30:47,810 --> 00:30:46,320
got one picture you can't tell size and

752
00:30:49,430 --> 00:30:47,820
shape of an object that way you need at

753
00:30:51,409 --> 00:30:49,440
least two cameras to be able to

754
00:30:53,389 --> 00:30:51,419
triangulate or you need a reference

755
00:30:54,190 --> 00:30:53,399
point in that one camera to do with one

756
00:30:56,930 --> 00:30:54,200
camera

757
00:30:59,649 --> 00:30:56,940
so that's why we're trying to change the

758
00:31:01,850 --> 00:30:59,659
game in uapx it's what we call

759
00:31:03,710 --> 00:31:01,860
multi-messenger you know you will you

760
00:31:05,990 --> 00:31:03,720
followed your UAP studies you get the

761
00:31:07,610 --> 00:31:06,000
same object from multiple angles and

762
00:31:11,389 --> 00:31:07,620
different wavelengths in different ways

763
00:31:12,710 --> 00:31:11,399

so that you can't call it a kite or or

764

00:31:14,149 --> 00:31:12,720

you know reflection of a mountain you

765

00:31:15,529 --> 00:31:14,159

know when something's anomalous because

766

00:31:17,690 --> 00:31:15,539

you have it from so many different

767

00:31:19,430 --> 00:31:17,700

perspectives so I have no idea what that

768

00:31:22,250 --> 00:31:19,440

is maybe it's some anomalous awesome

769

00:31:24,529 --> 00:31:22,260

thing or it's a splice in Mountain like

770

00:31:26,570 --> 00:31:24,539

Gary said or you know it's too dirty

771

00:31:28,909 --> 00:31:26,580

like in The Three Stooges you take two

772

00:31:30,769 --> 00:31:28,919

dirty and you take two dirty um paper

773

00:31:32,570 --> 00:31:30,779

plates and staple them together you can

774

00:31:35,450 --> 00:31:32,580

get a UFO as well so it's called Billy

775

00:31:38,090 --> 00:31:35,460

Meyer yeah it's impossible to know and

776

00:31:40,730 --> 00:31:38,100

so I'm not saying that it's it's it's

777

00:31:43,490 --> 00:31:40,740

wrong or hoaxed or anything of the sort

778

00:31:45,830 --> 00:31:43,500

I'm just saying it's almost impossible

779

00:31:47,810 --> 00:31:45,840

to know once enough years have passed

780

00:31:51,110 --> 00:31:47,820

that's why we need our own data and new

781

00:31:53,210 --> 00:31:51,120

new data well let me ask you this anyone

782

00:31:56,149 --> 00:31:53,220

can answer it or you can all have your

783

00:31:57,769 --> 00:31:56,159

own opinion but why

784

00:31:59,630 --> 00:31:57,779

um I understand you're your separate

785

00:32:02,330 --> 00:31:59,640

thing but there's like the Galileo

786

00:32:05,690 --> 00:32:02,340

project there's Chris O'Brien is doing

787

00:32:08,570 --> 00:32:05,700

something Mark d'antonio with uh he was

788

00:32:10,130 --> 00:32:08,580

working uh with someone else trying to

789

00:32:12,169 --> 00:32:10,140

get all this equipment there's so many

790

00:32:14,389 --> 00:32:12,179

people that have the similar type of

791

00:32:17,269 --> 00:32:14,399

idea you're using what it sounds like

792

00:32:19,269 --> 00:32:17,279

really expensive equipment and I and I

793

00:32:21,649 --> 00:32:19,279

wonder how weatherproof some of that is

794

00:32:24,049 --> 00:32:21,659

but I'm just wondering

795

00:32:26,570 --> 00:32:24,059

why can't there be more cooperation this

796

00:32:28,549 --> 00:32:26,580

is for everyone you know this this is

797

00:32:31,490 --> 00:32:28,559

could be the greatest story of all time

798

00:32:33,529 --> 00:32:31,500

if if it's if we discover what these

799

00:32:36,769 --> 00:32:33,539

things are but have you thought about

800

00:32:39,289 --> 00:32:36,779

like working with someone or you want to

801
00:32:41,330 --> 00:32:39,299
say stay your own separate entity

802
00:32:43,549 --> 00:32:41,340
well uh anybody that's serious about

803
00:32:45,230 --> 00:32:43,559
doing uaps that can leave their ego at

804
00:32:47,450 --> 00:32:45,240
the door and work

805
00:32:49,610 --> 00:32:47,460
shoulder to shoulder with us we welcome

806
00:32:51,649 --> 00:32:49,620
wholeheartedly

807
00:32:53,509 --> 00:32:51,659
um but see the the big the big thing is

808
00:32:55,310 --> 00:32:53,519
you have to check the ego at the door

809
00:32:57,529 --> 00:32:55,320
and you have to bring something to the

810
00:32:59,149 --> 00:32:57,539
table uh I'm not gonna I'm not gonna I'm

811
00:33:01,549 --> 00:32:59,159
not gonna put a plate a plate out for

812
00:33:03,590 --> 00:33:01,559
you if you didn't contribute you know

813
00:33:05,870 --> 00:33:03,600

and that's just the simple fact of the

814

00:33:07,789 --> 00:33:05,880

matter that's that's real life

815

00:33:11,690 --> 00:33:07,799

um we already collaborate with the seu

816

00:33:13,909 --> 00:33:11,700

uh okay yeah that's right I know I know

817

00:33:17,029 --> 00:33:13,919

above Kevin and Matthew were involved

818

00:33:18,950 --> 00:33:17,039

with them yes so you know uh it's an

819

00:33:21,230 --> 00:33:18,960

open invitation to literally anybody

820

00:33:22,970 --> 00:33:21,240

that's serious about UAP studies you

821

00:33:24,649 --> 00:33:22,980

know a lot of the reason why we

822

00:33:27,950 --> 00:33:24,659

frustrate everybody is because we take

823

00:33:29,570 --> 00:33:27,960

so long to produce anything it's because

824

00:33:31,370 --> 00:33:29,580

we're doing real science we're not we're

825

00:33:32,990 --> 00:33:31,380

not this isn't this isn't you know we're

826

00:33:34,250 --> 00:33:33,000

not going to be able to just Photoshop

827

00:33:37,549 --> 00:33:34,260

some pictures and throw them out there

828

00:33:39,230 --> 00:33:37,559

for you guys uh you know this is you

829

00:33:41,690 --> 00:33:39,240

know we may not find anything worth it

830

00:33:44,570 --> 00:33:41,700

we may debunk every damn piece of

831

00:33:46,490 --> 00:33:44,580

footage and anomaly we have and then

832

00:33:48,710 --> 00:33:46,500

we'll come out we'll give a report about

833

00:33:51,409 --> 00:33:48,720

how it was all debunked and that we

834

00:33:53,450 --> 00:33:51,419

found nothing and that's just that's why

835

00:33:56,509 --> 00:33:53,460

it's building a foundation for this

836

00:33:58,570 --> 00:33:56,519

field rather than just coming out and

837

00:34:01,990 --> 00:33:58,580

appeasing people with pretty pictures

838

00:34:04,730 --> 00:34:02,000

well I I agree with that philosophy 100

839

00:34:06,350 --> 00:34:04,740

yeah go ahead Matthew I don't think I

840

00:34:07,970 --> 00:34:06,360

mean oh I'm sorry

841

00:34:09,649 --> 00:34:07,980

um I don't think any of us have any

842

00:34:12,169 --> 00:34:09,659

problems working with other groups like

843

00:34:14,030 --> 00:34:12,179

like Gary noted we're we're

844

00:34:17,710 --> 00:34:14,040

collaborating with SCU and Matthew and I

845

00:34:22,190 --> 00:34:17,720

have been members with Su for years now

846

00:34:24,770 --> 00:34:22,200

pre-covered and um and and I'm also

847

00:34:27,829 --> 00:34:24,780

and associate with the Galileo project

848

00:34:29,450 --> 00:34:27,839

and I'm friends and you know often

849

00:34:32,450 --> 00:34:29,460

talking with people from the Galileo

850

00:34:34,730 --> 00:34:32,460

project so we are you know we

851
00:34:36,730 --> 00:34:34,740
there is some degree of collaboration

852
00:34:39,169 --> 00:34:36,740
there's some well

853
00:34:42,730 --> 00:34:39,179
hold on Kevin we have to make it very

854
00:34:45,889 --> 00:34:42,740
clear we we have no direct affiliation

855
00:34:48,169 --> 00:34:45,899
company-wise with the Lao project that

856
00:34:50,990 --> 00:34:48,179
is true yes me and Kevin are Affiliates

857
00:34:53,690 --> 00:34:51,000
personally with the Galileo project

858
00:34:58,310 --> 00:34:53,700
right yeah so we don't have any official

859
00:35:02,930 --> 00:35:00,410
of the scientist I'm you know I know

860
00:35:05,510 --> 00:35:02,940
some of the astronomers that are on on

861
00:35:08,329 --> 00:35:05,520
the project and we talk to each other we

862
00:35:10,190 --> 00:35:08,339
compare notes we they and sometimes ask

863
00:35:12,349 --> 00:35:10,200

us what equipment do you use what did

864

00:35:14,089 --> 00:35:12,359

you find you know and and we share some

865

00:35:15,890 --> 00:35:14,099

of that information and that's that's

866

00:35:19,190 --> 00:35:15,900

common in science and that work that

867

00:35:21,410 --> 00:35:19,200

happens all the time and in some ways I

868

00:35:23,990 --> 00:35:21,420

think it's good that we have different

869

00:35:26,210 --> 00:35:24,000

projects because

870

00:35:27,890 --> 00:35:26,220

um first it increases our chance of

871

00:35:29,390 --> 00:35:27,900

success you know we're looking in

872

00:35:30,950 --> 00:35:29,400

different places we're using different

873

00:35:32,930 --> 00:35:30,960

equipment slightly different

874

00:35:34,609 --> 00:35:32,940

methodologies

875

00:35:37,849 --> 00:35:34,619

um some groups might be more successful

876

00:35:40,490 --> 00:35:37,859

than others and that's that will be good

877

00:35:43,430 --> 00:35:40,500

um and um it also

878

00:35:45,710 --> 00:35:43,440

means that there are more scientists

879

00:35:48,109 --> 00:35:45,720

involved when you have multiple groups

880

00:35:50,390 --> 00:35:48,119

each group has multiple scientists there

881

00:35:53,810 --> 00:35:50,400

are more scientists involved and that is

882

00:35:56,210 --> 00:35:53,820

going to continue to snowball and

883

00:35:57,829 --> 00:35:56,220

convince other scientists that hey there

884

00:35:59,690 --> 00:35:57,839

might be something to this we should

885

00:36:01,430 --> 00:35:59,700

maybe look into this and

886

00:36:02,930 --> 00:36:01,440

convince others to get involved and

887

00:36:08,410 --> 00:36:02,940

that's that's how some of these other

888

00:36:13,310 --> 00:36:11,450

I have a great deal to say about this

889

00:36:16,310 --> 00:36:13,320

question about your your points uh

890

00:36:18,109 --> 00:36:16,320

Martin so the um first there's a good

891

00:36:20,870 --> 00:36:18,119

analogy with my field of Dark Matter

892

00:36:22,849 --> 00:36:20,880

research where we have the exact same

893

00:36:26,089 --> 00:36:22,859

thing if not more there are dozens of

894

00:36:29,270 --> 00:36:26,099

groups around around the world and and

895

00:36:31,130 --> 00:36:29,280

part of the reason why is everyone wants

896

00:36:32,630 --> 00:36:31,140

to be the first to get that you know

897

00:36:34,910 --> 00:36:32,640

Nobel Prize and not sure I understand

898

00:36:37,910 --> 00:36:34,920

but the other part of it is is Kevin's

899

00:36:41,390 --> 00:36:37,920

right you do need some differences

900

00:36:44,030 --> 00:36:41,400

because then you can you can um find out

901
00:36:47,150 --> 00:36:44,040
what works and what doesn't so if there

902
00:36:48,710 --> 00:36:47,160
was just one project looking you know

903
00:36:50,630 --> 00:36:48,720
looking into this that would be really

904
00:36:53,390 --> 00:36:50,640
really bad right if you had just one

905
00:36:55,609 --> 00:36:53,400
monolithic project so there needs to be

906
00:36:57,770 --> 00:36:55,619
some kind of balance but I do agree that

907
00:36:59,089 --> 00:36:57,780
we could stand to use a lot more uh

908
00:37:01,970 --> 00:36:59,099
collaboration so I'll give you an

909
00:37:04,730 --> 00:37:01,980
example of what happened at the SCU

910
00:37:06,589 --> 00:37:04,740
conference in in Alabama at countless

911
00:37:08,690 --> 00:37:06,599
people coming to me and coffee breaks

912
00:37:11,870 --> 00:37:08,700
and stuff about their great idea for a

913
00:37:14,329 --> 00:37:11,880

UAP you know detection sense or

914

00:37:15,770 --> 00:37:14,339

something I'm like great why but why

915

00:37:18,050 --> 00:37:15,780

don't instead of doing your own thing

916

00:37:20,030 --> 00:37:18,060

why don't you merge your ideas with

917

00:37:22,310 --> 00:37:20,040

existing systems who are people who are

918

00:37:24,109 --> 00:37:22,320

who might be farther along like Ron ulch

919

00:37:25,130 --> 00:37:24,119

that Gary mentioned or has the UFO dap

920

00:37:27,349 --> 00:37:25,140

system

921

00:37:28,970 --> 00:37:27,359

and then but then they never contact us

922

00:37:30,950 --> 00:37:28,980

again they disappear because part of

923

00:37:33,050 --> 00:37:30,960

that is human nature everyone wants to

924

00:37:34,730 --> 00:37:33,060

do their own thing I think I do think

925

00:37:36,430 --> 00:37:34,740

it's heartbreaking I do think we do need

926

00:37:40,130 --> 00:37:36,440

more collaboration

927

00:37:41,630 --> 00:37:40,140

not 100 though like I said all jammed

928

00:37:43,609 --> 00:37:41,640

into one project that wouldn't work

929

00:37:45,589 --> 00:37:43,619

that's not good so it's very healthy

930

00:37:48,349 --> 00:37:45,599

that we've got the Galileo project we

931

00:37:49,970 --> 00:37:48,359

have uapx it's very very healthy but you

932

00:37:52,130 --> 00:37:49,980

know as Gary point out we're already you

933

00:37:55,609 --> 00:37:52,140

know we're really liaisoning with SCU

934

00:37:58,010 --> 00:37:55,619

we're trying to reduce competition and

935

00:38:02,050 --> 00:37:58,020

increase collaboration uapx is already

936

00:38:07,010 --> 00:38:04,490

uh Gary hold that thought for a second

937

00:38:09,290 --> 00:38:07,020

what I have to say about what I've seen

938

00:38:12,349 --> 00:38:09,300

in the over 10 years that I've been

939

00:38:14,510 --> 00:38:12,359

doing this show is science like

940

00:38:15,650 --> 00:38:14,520

absolutely having nothing to do with the

941

00:38:18,589 --> 00:38:15,660

topic

942

00:38:21,109 --> 00:38:18,599

and then it's slowly growing and growing

943

00:38:23,210 --> 00:38:21,119

and I love that the SCU comes along and

944

00:38:25,370 --> 00:38:23,220

all and people of Science and I always

945

00:38:28,370 --> 00:38:25,380

said why doesn't science want to look at

946

00:38:30,770 --> 00:38:28,380

this this is such an amazing thing uh

947

00:38:33,410 --> 00:38:30,780

and then the what I got for replies was

948

00:38:36,470 --> 00:38:33,420

well no one will fund them you need

949

00:38:38,870 --> 00:38:36,480

funding if you have some way to close a

950

00:38:42,109 --> 00:38:38,880

project if you have a an end to a

951
00:38:43,069 --> 00:38:42,119
project that you can cite like that's

952
00:38:45,050 --> 00:38:43,079
the only way you're going to get any

953
00:38:48,109 --> 00:38:45,060
funding for that type of thing but I

954
00:38:51,470 --> 00:38:48,119
think I've just seen everything changed

955
00:38:53,150 --> 00:38:51,480
since I want to say 2017. everything has

956
00:38:56,510 --> 00:38:53,160
totally changed and and I wouldn't be

957
00:38:57,829 --> 00:38:56,520
having this show with you tonight if it

958
00:39:01,190 --> 00:38:57,839
wasn't for that

959
00:39:02,810 --> 00:39:01,200
for that change but go ahead Gary

960
00:39:06,530 --> 00:39:02,820
well the the other point I want to make

961
00:39:08,329 --> 00:39:06,540
is that if you know we encourage as many

962
00:39:10,550 --> 00:39:08,339
people to start as many groups as they

963
00:39:11,870 --> 00:39:10,560

want uh just because there's a you know

964

00:39:14,089 --> 00:39:11,880

100 groups doesn't mean there couldn't

965

00:39:16,970 --> 00:39:14,099

be just 100 collaborations you know one

966

00:39:19,130 --> 00:39:16,980

group comes yeah I I I I will be if

967

00:39:21,770 --> 00:39:19,140

Galileo project happens to be the first

968

00:39:23,810 --> 00:39:21,780

people to get solid evidence on UAP I'll

969

00:39:25,970 --> 00:39:23,820

be happier than a heck and I will be

970

00:39:27,950 --> 00:39:25,980

looking exactly what they're using and I

971

00:39:30,290 --> 00:39:27,960

will be replicating their their research

972

00:39:32,390 --> 00:39:30,300

you know we will be we'll be the first

973

00:39:34,790 --> 00:39:32,400

ones to peer review their stuff I mean

974

00:39:38,210 --> 00:39:34,800

there's not many people and teams of

975

00:39:40,849 --> 00:39:38,220

scientists in this field period so no

976

00:39:43,609 --> 00:39:40,859

matter who ends up with something

977

00:39:49,910 --> 00:39:43,619

they're gonna need peer review including

978

00:39:52,670 --> 00:39:49,920

us so we need peers so we so we we even

979

00:39:55,190 --> 00:39:52,680

if we don't even if you don't like us

980

00:39:57,589 --> 00:39:55,200

that's fine all we have to do is work

981

00:39:59,270 --> 00:39:57,599

together towards a common goal you know

982

00:40:00,530 --> 00:39:59,280

let's be like New Yorkers we all hate

983

00:40:02,870 --> 00:40:00,540

each other until we have to come

984

00:40:04,430 --> 00:40:02,880

together you know hey we get that was

985

00:40:05,870 --> 00:40:04,440

the time to come together

986

00:40:08,770 --> 00:40:05,880

um pieces of equipment that we want to

987

00:40:10,970 --> 00:40:08,780

add a lot yeah

988

00:40:14,690 --> 00:40:10,980

let me just let me read the question

989

00:40:16,250 --> 00:40:14,700

just for the audio uh uh so the uh Mark

990

00:40:18,109 --> 00:40:16,260

is asking Gary's is there a piece of

991

00:40:20,390 --> 00:40:18,119

equipment to detect UFOs that you would

992

00:40:21,950 --> 00:40:20,400

like to add or will be adding in the

993

00:40:23,690 --> 00:40:21,960

future investigation so that was a

994

00:40:26,270 --> 00:40:23,700

question go ahead Gary

995

00:40:30,050 --> 00:40:26,280

um I think uh stuff for uh doing

996

00:40:34,609 --> 00:40:30,060

Spectrum analysis on light uh stuff for

997

00:40:36,530 --> 00:40:34,619

uh you know more more and more modes of

998

00:40:38,030 --> 00:40:36,540

light capture

999

00:40:40,370 --> 00:40:38,040

um uh we're actually working on a

1000

00:40:43,309 --> 00:40:40,380

modified UFO depth system that's going

1001
00:40:45,290 --> 00:40:43,319
to have several DSLR cameras that will

1002
00:40:46,250 --> 00:40:45,300
have different types of light filters on

1003
00:40:48,470 --> 00:40:46,260
them

1004
00:40:51,109 --> 00:40:48,480
um that will all be in tandem with the

1005
00:40:53,510 --> 00:40:51,119
US the UFO depth camera pointing at the

1006
00:40:55,609 --> 00:40:53,520
same object so that we can get a

1007
00:40:58,309 --> 00:40:55,619
multi-spectral analysis of these

1008
00:41:00,950 --> 00:40:58,319
pictures on top of everything else

1009
00:41:04,790 --> 00:41:00,960
um you know a higher end FLIR cameras

1010
00:41:07,870 --> 00:41:04,800
that have better resolution or as uh as

1011
00:41:12,290 --> 00:41:07,880
as people who might say as range

1012
00:41:14,390 --> 00:41:12,300
but uh that's it's an inside joke sorry

1013
00:41:16,370 --> 00:41:14,400

but uh you know we wanna we will just

1014

00:41:17,870 --> 00:41:16,380

keep upping the game you know and to

1015

00:41:21,230 --> 00:41:17,880

those that say that they can't start

1016

00:41:23,690 --> 00:41:21,240

something with nothing we had nothing we

1017

00:41:26,450 --> 00:41:23,700

literally had nothing and we utilized

1018

00:41:29,030 --> 00:41:26,460

whatever tools came along and we're in

1019

00:41:30,650 --> 00:41:29,040

all volunteer organization you know most

1020

00:41:33,589 --> 00:41:30,660

of the stuff we do is coming out of

1021

00:41:35,630 --> 00:41:33,599

pocket or by very very few donations we

1022

00:41:37,849 --> 00:41:35,640

got our first major donation just

1023

00:41:40,190 --> 00:41:37,859

recently and we're like squirreling it

1024

00:41:41,750 --> 00:41:40,200

away and just you know picking you know

1025

00:41:44,150 --> 00:41:41,760

picking at it a little bit at a time

1026

00:41:46,250 --> 00:41:44,160

just so we can keep the lights on so it

1027

00:41:48,910 --> 00:41:46,260

it doesn't you don't have to

1028

00:41:52,010 --> 00:41:48,920

have a million dollar organization or a

1029

00:41:55,370 --> 00:41:52,020

harvard-backed you know study program a

1030

00:41:59,150 --> 00:41:55,380

program backing you if you want to do it

1031

00:42:00,589 --> 00:41:59,160

do it I don't have a PhD I I'm honestly

1032

00:42:02,630 --> 00:42:00,599

the least likely person that should be

1033

00:42:04,849 --> 00:42:02,640

running this company but somehow it

1034

00:42:06,950 --> 00:42:04,859

works you know These Guys these guys

1035

00:42:08,569 --> 00:42:06,960

Follow Me Through The Fray and they we

1036

00:42:09,829 --> 00:42:08,579

all work together and I just try to

1037

00:42:12,589 --> 00:42:09,839

provide them with everything that they

1038

00:42:16,130 --> 00:42:12,599

need really I'm I'm I'm just their admin

1039

00:42:19,430 --> 00:42:16,140

B so

1040

00:42:21,410 --> 00:42:19,440

yeah here's a here's a Dr Richard one

1041

00:42:23,329 --> 00:42:21,420

more time who Matthew I think you are

1042

00:42:25,370 --> 00:42:23,339

addressing him the methods of Natural

1043

00:42:26,870 --> 00:42:25,380

Sciences won't work but the methods of

1044

00:42:28,430 --> 00:42:26,880

philosophy might what do you think of

1045

00:42:30,890 --> 00:42:28,440

that oh that's a comment or an

1046

00:42:33,109 --> 00:42:30,900

opportunity don't Matthew just be nice

1047

00:42:35,750 --> 00:42:33,119

it's a different it's a different field

1048

00:42:37,790 --> 00:42:35,760

he's gonna hate me but I'm sorry but it

1049

00:42:41,030 --> 00:42:37,800

it's just my opinion but if you look at

1050

00:42:44,030 --> 00:42:41,040

history you know actually science has

1051
00:42:45,470 --> 00:42:44,040
been able to slowly take over what used

1052
00:42:46,609 --> 00:42:45,480
to be philosophy I'll give you an

1053
00:42:48,230 --> 00:42:46,619
example

1054
00:42:50,930 --> 00:42:48,240
um I don't want to be mean but this is a

1055
00:42:54,589 --> 00:42:50,940
really relevant example I think is you

1056
00:42:56,930 --> 00:42:54,599
know just just uh in recent memory in

1057
00:42:59,630 --> 00:42:56,940
this in in just in the previous Century

1058
00:43:03,050 --> 00:42:59,640
even in the latter half of that Century

1059
00:43:04,790 --> 00:43:03,060
um cosmology used to be like an armchair

1060
00:43:06,230 --> 00:43:04,800
thing like well how did the universe

1061
00:43:08,089 --> 00:43:06,240
start I don't know how do you think

1062
00:43:10,130 --> 00:43:08,099
Universe start and now you know we've

1063
00:43:11,870 --> 00:43:10,140

got like the age of the universe the

1064

00:43:13,490 --> 00:43:11,880

multiple significant figures you know

1065

00:43:15,530 --> 00:43:13,500

what would Aristotle you know say about

1066

00:43:17,690 --> 00:43:15,540

about that I think philosophy is

1067

00:43:19,250 --> 00:43:17,700

important it has has its place a

1068

00:43:22,069 --> 00:43:19,260

philosophy can talk for example about

1069

00:43:24,829 --> 00:43:22,079

ethics something that science cannot

1070

00:43:27,290 --> 00:43:24,839

directly speak to is morality and ethics

1071

00:43:29,930 --> 00:43:27,300

science is about what is possible not

1072

00:43:32,089 --> 00:43:29,940

what should be done so so don't so I

1073

00:43:35,210 --> 00:43:32,099

will throw Dr Richard a bonus philosophy

1074

00:43:38,150 --> 00:43:35,220

is important and it has its place but

1075

00:43:40,130 --> 00:43:38,160

but also I'm not sure yes I know it

1076

00:43:42,109 --> 00:43:40,140

still exists of course it does I know

1077

00:43:43,970 --> 00:43:42,119

professors of philosophy but I'm saying

1078

00:43:47,150 --> 00:43:43,980

but that many questions that used to be

1079

00:43:49,430 --> 00:43:47,160

strictly philosophy then got answered by

1080

00:43:51,530 --> 00:43:49,440

science and now there was less less for

1081

00:43:53,870 --> 00:43:51,540

philosophy well I think people are I

1082

00:43:57,010 --> 00:43:53,880

think people are also mistaking the the

1083

00:44:00,349 --> 00:43:57,020

science of philosophy being uh you know

1084

00:44:02,930 --> 00:44:00,359

philosophy allows us to dream of the

1085

00:44:05,510 --> 00:44:02,940

questions that we need science to answer

1086

00:44:08,030 --> 00:44:05,520

and so they're they're really two

1087

00:44:10,309 --> 00:44:08,040

separate things and until

1088

00:44:13,250 --> 00:44:10,319

you know you can't you can't compare the

1089

00:44:16,550 --> 00:44:13,260

two you know like I think a lot of

1090

00:44:19,370 --> 00:44:16,560

things I have a philosophy of life I

1091

00:44:21,589 --> 00:44:19,380

have a philosophy in my marriage I have

1092

00:44:26,089 --> 00:44:21,599

a philosophy for everything that I do in

1093

00:44:29,150 --> 00:44:26,099

my life philosophy is just a means for a

1094

00:44:31,430 --> 00:44:29,160

tool utilized to get me motivated to get

1095

00:44:35,809 --> 00:44:31,440

to my goals and to ask the questions and

1096

00:44:37,790 --> 00:44:35,819

then I use science and you know uh to to

1097

00:44:40,970 --> 00:44:37,800

answer the questions that I get from my

1098

00:44:42,710 --> 00:44:40,980

full thinking through philosophy so

1099

00:44:44,750 --> 00:44:42,720

there's always a place for a philosophy

1100

00:44:46,190 --> 00:44:44,760

we're always going to need it because if

1101

00:44:48,290 --> 00:44:46,200

we don't then we're not dreaming anymore

1102

00:44:50,210 --> 00:44:48,300

and we're not looking for the the

1103

00:44:52,250 --> 00:44:50,220

unknown anymore we're not we're not

1104

00:44:55,250 --> 00:44:52,260

dreaming up I mean who dreamed up the

1105

00:44:57,950 --> 00:44:55,260

first uh UAP nobody somebody saw the

1106

00:44:59,690 --> 00:44:57,960

thing and then philosophy took over well

1107

00:45:02,569 --> 00:44:59,700

what could it be there you go there's

1108

00:45:05,870 --> 00:45:02,579

philosophy that that is what we need we

1109

00:45:08,650 --> 00:45:05,880

do need philosophy but when people want

1110

00:45:11,569 --> 00:45:08,660

to just solely rely on that as a fact

1111

00:45:12,890 --> 00:45:11,579

unfortunately that just it's not it's

1112

00:45:15,530 --> 00:45:12,900

that's not real

1113

00:45:17,750 --> 00:45:15,540

okay now next question popped up from

1114

00:45:20,450 --> 00:45:17,760

Mike is it problematic getting papers

1115

00:45:21,829 --> 00:45:20,460

published on this subject that is a very

1116

00:45:23,630 --> 00:45:21,839

good question I think I'll let these

1117

00:45:24,710 --> 00:45:23,640

guys take that

1118

00:45:29,750 --> 00:45:24,720

I

1119

00:45:31,430 --> 00:45:29,760

honest we've we've only at this point

1120

00:45:32,450 --> 00:45:31,440

I've only published one paper on the

1121

00:45:35,390 --> 00:45:32,460

topic

1122

00:45:37,550 --> 00:45:35,400

and that was

1123

00:45:40,730 --> 00:45:37,560

and I was at received difficult because

1124

00:45:42,910 --> 00:45:40,740

I published it through a

1125

00:45:46,190 --> 00:45:42,920

through a conference proceedings

1126

00:45:47,930 --> 00:45:46,200

which which made that where where

1127

00:45:49,550 --> 00:45:47,940

you know in the conference I've been

1128

00:45:53,210 --> 00:45:49,560

attending that conference for 20 years

1129

00:45:54,589 --> 00:45:53,220

and so people were willing to hear me

1130

00:45:57,230 --> 00:45:54,599

out and

1131

00:45:59,410 --> 00:45:57,240

and they then requested that I publish a

1132

00:46:03,290 --> 00:45:59,420

full paper on it and I did

1133

00:46:04,490 --> 00:46:03,300

received oh it was I was pretty well

1134

00:46:08,270 --> 00:46:04,500

received

1135

00:46:12,109 --> 00:46:10,130

the the most of the people attending the

1136

00:46:14,329 --> 00:46:12,119

conference were intrigued and interested

1137

00:46:17,210 --> 00:46:14,339

that was my talk on the flight

1138

00:46:19,309 --> 00:46:17,220

characteristics of uaps oh yes sir I

1139

00:46:21,650 --> 00:46:19,319

remember that yeah there were there

1140

00:46:22,490 --> 00:46:21,660

there it was very funny because

1141

00:46:25,370 --> 00:46:22,500

um

1142

00:46:28,010 --> 00:46:25,380

one of my close friends and colleagues

1143

00:46:29,809 --> 00:46:28,020

was there who was very passionate

1144

00:46:32,270 --> 00:46:29,819

was um

1145

00:46:34,670 --> 00:46:32,280

very upset by my talk and and and

1146

00:46:36,530 --> 00:46:34,680

basically stood up and while I was

1147

00:46:39,230 --> 00:46:36,540

talking about how you know scientists

1148

00:46:41,329 --> 00:46:39,240

how people aren't open-minded enough to

1149

00:46:44,390 --> 00:46:41,339

even consider the possibilities

1150

00:46:47,329 --> 00:46:44,400

and and at some point he stood up and he

1151

00:46:49,910 --> 00:46:47,339

said oh I refuse to believe this is true

1152

00:46:51,710 --> 00:46:49,920

he goes you could take me to a UFO and

1153

00:46:54,410 --> 00:46:51,720

give me a tour and I still wouldn't

1154

00:46:55,970 --> 00:46:54,420

believe it and I and and my other

1155

00:46:59,150 --> 00:46:55,980

colleagues told him to sit down and be

1156

00:47:01,430 --> 00:46:59,160

quiet and be respectful and I and I

1157

00:47:02,950 --> 00:47:01,440

thanked him because I said thank you for

1158

00:47:06,950 --> 00:47:02,960

illustrating

1159

00:47:10,190 --> 00:47:06,960

how passionate people are against this

1160

00:47:12,890 --> 00:47:10,200

topic and how this is very very innate

1161

00:47:14,870 --> 00:47:12,900

and people don't want to believe it and

1162

00:47:17,270 --> 00:47:14,880

that's really the problem it's it isn't

1163

00:47:18,890 --> 00:47:17,280

they they don't want it to be true to

1164

00:47:20,569 --> 00:47:18,900

the degree where they don't want to look

1165

00:47:22,370 --> 00:47:20,579

at data they don't want to even consider

1166

00:47:24,290 --> 00:47:22,380

data well people didn't want the Earth

1167

00:47:26,690 --> 00:47:24,300

to go around the the Sun or for

1168

00:47:29,270 --> 00:47:26,700

Jupiter's to have moons that didn't mean

1169

00:47:31,370 --> 00:47:29,280

it was the same the same types of

1170

00:47:34,190 --> 00:47:31,380

feelings were there as well this is a

1171

00:47:35,809 --> 00:47:34,200

this is these these issues change World

1172

00:47:38,809 --> 00:47:35,819

Views and people don't like their World

1173

00:47:41,809 --> 00:47:38,819

Views being changed and and in reference

1174

00:47:44,089 --> 00:47:41,819

to the previous question on philosophy I

1175

00:47:47,210 --> 00:47:44,099

wanted to add that

1176
00:47:50,089 --> 00:47:47,220
um a lot of that the the the supposition

1177
00:47:51,950 --> 00:47:50,099
that Natural Science won't work that's

1178
00:47:53,390 --> 00:47:51,960
that's a supposition we don't know that

1179
00:47:55,309 --> 00:47:53,400
Natural Science won't work in just

1180
00:47:57,890 --> 00:47:55,319
explaining these things people are

1181
00:47:59,870 --> 00:47:57,900
claiming this because they believe that

1182
00:48:03,349 --> 00:47:59,880
this is somehow Supernatural or Pretty

1183
00:48:07,430 --> 00:48:03,359
Natural and and my feelings on that

1184
00:48:10,309 --> 00:48:07,440
topic are that if it exists it's natural

1185
00:48:13,010 --> 00:48:10,319
period that's it yeah there's an

1186
00:48:14,990 --> 00:48:13,020
explanation for it and and it's like if

1187
00:48:17,630 --> 00:48:15,000
there's some kind of consistency then

1188
00:48:20,329 --> 00:48:17,640

there's an explanation what we're going

1189

00:48:22,010 --> 00:48:20,339

to do is look for that explanation I had

1190

00:48:24,770 --> 00:48:22,020

a quote on this that got cut out of the

1191

00:48:27,049 --> 00:48:24,780

movie though which is that uh men there

1192

00:48:29,089 --> 00:48:27,059

there are instances not obviously not

1193

00:48:31,670 --> 00:48:29,099

often but there are instances of what is

1194

00:48:34,069 --> 00:48:31,680

at one point called Supernatural or

1195

00:48:35,750 --> 00:48:34,079

paranormal is just natural that we

1196

00:48:37,250 --> 00:48:35,760

haven't explained yet you know think of

1197

00:48:38,990 --> 00:48:37,260

the earthquake lights earlier people

1198

00:48:41,390 --> 00:48:39,000

used to think oh it's like you know the

1199

00:48:43,190 --> 00:48:41,400

the Lost Souls of people dying in the

1200

00:48:45,230 --> 00:48:43,200

who are going to die in the earthquake

1201
00:48:46,329 --> 00:48:45,240
or died or something like and their orbs

1202
00:48:48,170 --> 00:48:46,339
or something and turns out it's

1203
00:48:51,950 --> 00:48:48,180
piezoelectricity you see what I mean is

1204
00:48:53,109 --> 00:48:51,960
that not everything that's um that is

1205
00:48:55,730 --> 00:48:53,119
seen

1206
00:48:58,670 --> 00:48:55,740
and is considered initially to be

1207
00:49:00,650 --> 00:48:58,680
somehow not natural or unnatural that's

1208
00:49:02,870 --> 00:49:00,660
that can end up being something science

1209
00:49:04,670 --> 00:49:02,880
just hasn't caught up with yet and

1210
00:49:06,530 --> 00:49:04,680
explained yet and sometimes that's

1211
00:49:08,150 --> 00:49:06,540
because we're not allowed to and there's

1212
00:49:09,230 --> 00:49:08,160
a lot of circularity like Kevin and I've

1213
00:49:12,109 --> 00:49:09,240

been talking about the reason why some

1214

00:49:14,329 --> 00:49:12,119

hard to publish papers and uaps is

1215

00:49:16,069 --> 00:49:14,339

because or or might be as Kevin says

1216

00:49:17,569 --> 00:49:16,079

we're about to find out

1217

00:49:19,430 --> 00:49:17,579

um is because there aren't any papers

1218

00:49:21,770 --> 00:49:19,440

why are there no papers because it's

1219

00:49:23,990 --> 00:49:21,780

hard to see it's like it's an oxygen

1220

00:49:27,109 --> 00:49:24,000

someone needs to have the courage

1221

00:49:28,790 --> 00:49:27,119

to break through the oxymoron and that's

1222

00:49:30,589 --> 00:49:28,800

we're going to try to do on you and I

1223

00:49:33,170 --> 00:49:30,599

think with respect to your comment

1224

00:49:36,370 --> 00:49:33,180

Matthew another example is the fact that

1225

00:49:40,309 --> 00:49:36,380

the sun used to be considered a god

1226

00:49:42,290 --> 00:49:40,319

true yes I would be used to be

1227

00:49:44,930 --> 00:49:42,300

Supernatural or like lightning right

1228

00:49:46,670 --> 00:49:44,940

lightning comes from Thor Zeus before we

1229

00:49:49,910 --> 00:49:46,680

understood Maxwell's equations lightning

1230

00:49:52,970 --> 00:49:49,920

was magic right so yeah yeah well I'd be

1231

00:49:57,109 --> 00:49:52,980

remiss if I didn't bring up in the uh

1232

00:49:58,910 --> 00:49:57,119

tear in the sky the anomaly and uh what

1233

00:50:01,670 --> 00:49:58,920

because a lot of people have asked me is

1234

00:50:03,349 --> 00:50:01,680

there has there been any conclusion on

1235

00:50:07,430 --> 00:50:03,359

that strange

1236

00:50:09,230 --> 00:50:07,440

tear in the sky whatever it was uh what

1237

00:50:10,490 --> 00:50:09,240

do you what's what's up what's the

1238

00:50:13,250 --> 00:50:10,500

update with that

1239

00:50:16,849 --> 00:50:13,260

well uh we we still refer to it in the

1240

00:50:19,069 --> 00:50:16,859

company as a atmospheric anomaly uh

1241

00:50:21,890 --> 00:50:19,079

we're still researching it

1242

00:50:24,290 --> 00:50:21,900

um we're still we still have to make

1243

00:50:27,230 --> 00:50:24,300

sure that there it is no pick no type of

1244

00:50:28,910 --> 00:50:27,240

a lens issue we're actually buying an

1245

00:50:31,849 --> 00:50:28,920

entirely

1246

00:50:34,609 --> 00:50:31,859

new UFO dap with all of the same things

1247

00:50:37,670 --> 00:50:34,619

to retest the conditions to make sure

1248

00:50:40,130 --> 00:50:37,680

that it's not a radiation uh spot you

1249

00:50:41,630 --> 00:50:40,140

know radiation spots on the CCD uh

1250

00:50:44,390 --> 00:50:41,640

making sure that there's no type of

1251
00:50:46,670 --> 00:50:44,400
camera problems or if that if it can be

1252
00:50:48,109 --> 00:50:46,680
replicated you know if we can replicate

1253
00:50:50,210 --> 00:50:48,119
it we know that it was something that

1254
00:50:52,130 --> 00:50:50,220
happened you know and it wasn't an

1255
00:50:53,210 --> 00:50:52,140
actual event you know basically we're

1256
00:50:56,290 --> 00:50:53,220
going to do everything we can to

1257
00:51:00,230 --> 00:50:56,300
disprove this as as like in a you know a

1258
00:51:02,150 --> 00:51:00,240
uh some type of anomalous event but it

1259
00:51:04,670 --> 00:51:02,160
you know it appears to be a really

1260
00:51:06,230 --> 00:51:04,680
really interesting atmospheric anomaly

1261
00:51:07,970 --> 00:51:06,240
that I don't believe that anybody's

1262
00:51:10,069 --> 00:51:07,980
actually seen before

1263
00:51:11,870 --> 00:51:10,079

okay great now listen I just have to

1264

00:51:15,410 --> 00:51:11,880

tell you that in just a minute here

1265

00:51:17,329 --> 00:51:15,420

we're going off kgra radio and I feel

1266

00:51:19,069 --> 00:51:17,339

like I have a couple more questions I'd

1267

00:51:22,670 --> 00:51:19,079

like to ask can we continue a little bit

1268

00:51:24,770 --> 00:51:22,680

for 15 minutes longer

1269

00:51:26,930 --> 00:51:24,780

um and we'll be on YouTube and and

1270

00:51:28,549 --> 00:51:26,940

Facebook and we'll and twitch and we'll

1271

00:51:29,809 --> 00:51:28,559

also be in the audio podcast if that's

1272

00:51:31,970 --> 00:51:29,819

all right with all you guys and putting

1273

00:51:34,849 --> 00:51:31,980

you all on the spot right now yeah so

1274

00:51:37,670 --> 00:51:34,859

about 15 minutes longer and so I

1275

00:51:40,730 --> 00:51:37,680

probably I'm going to at this point

1276

00:51:42,349 --> 00:51:40,740

um I'm going to ask you uh Kevin you

1277

00:51:44,870 --> 00:51:42,359

mentioned earlier what do you think

1278

00:51:46,609 --> 00:51:44,880

about the James Webb images they're just

1279

00:51:49,190 --> 00:51:46,619

fantastic aren't they

1280

00:51:52,430 --> 00:51:49,200

oh they're beautiful and amazing yeah

1281

00:51:54,170 --> 00:51:52,440

this is this is a huge breakthrough and

1282

00:51:56,150 --> 00:51:54,180

it's going to give us a whole new window

1283

00:51:58,250 --> 00:51:56,160

on the universe and

1284

00:52:00,829 --> 00:51:58,260

um there it's a huge deal

1285

00:52:03,290 --> 00:52:00,839

it is now I'm gonna go we're gonna just

1286

00:52:04,790 --> 00:52:03,300

take a little 30 second break not long

1287

00:52:06,829 --> 00:52:04,800

enough for you to get up and get a glass

1288

00:52:09,109 --> 00:52:06,839

of water or anything but I'm gonna say

1289

00:52:11,390 --> 00:52:09,119

goodbye to everyone over at khra Radio

1290

00:52:13,309 --> 00:52:11,400

thank you all and we'll be back next

1291

00:52:15,470 --> 00:52:13,319

week with Randall Nickerson he's going

1292

00:52:18,650 --> 00:52:15,480

to be talking about the Ariel School

1293

00:52:20,750 --> 00:52:18,660

phenomenon video but he's going I'm

1294

00:52:23,990 --> 00:52:20,760

giving him a platform where he's going

1295

00:52:29,290 --> 00:52:24,000

to rant and that is about Netflix it

1296

00:52:33,770 --> 00:52:31,790

he's wonderful and he gave us he's a

1297

00:52:34,849 --> 00:52:33,780

wonderful dog and it was a brilliant

1298

00:52:37,549 --> 00:52:34,859

movie yeah

1299

00:52:39,829 --> 00:52:37,559

all right so don't go anywhere everyone

1300

00:52:42,410 --> 00:52:39,839

um and I'm saying goodbye over at kgra

1301

00:52:44,810 --> 00:52:42,420

Radio we'll be back in 30 seconds for

1302

00:53:02,050 --> 00:52:44,820

those of you in Facebook and on YouTube

1303

00:53:02,060 --> 00:53:12,589

[Music]

1304

00:53:12,599 --> 00:53:17,230

foreign

1305

00:53:22,190 --> 00:53:19,490

we have the three guests here we'll

1306

00:53:23,809 --> 00:53:22,200

bring them right back on but um I had a

1307

00:53:25,609 --> 00:53:23,819

boat just pulling right next to me

1308

00:53:28,609 --> 00:53:25,619

hopefully it won't be too noisy here I

1309

00:53:32,030 --> 00:53:28,619

might have to uh I might have to mute my

1310

00:53:34,250 --> 00:53:32,040

mic but I have a so I have I know you

1311

00:53:35,690 --> 00:53:34,260

base your things on science mostly but

1312

00:53:37,670 --> 00:53:35,700

I'm I'm gonna ask

1313

00:53:38,450 --> 00:53:37,680

some philosophical questions a little

1314

00:53:40,970 --> 00:53:38,460

bit

1315

00:53:43,190 --> 00:53:40,980

um why would you think that if these

1316

00:53:45,290 --> 00:53:43,200

objects are visiting us from wherever

1317

00:53:46,430 --> 00:53:45,300

they're visiting us why would they have

1318

00:53:49,490 --> 00:53:46,440

lights

1319

00:53:50,930 --> 00:53:49,500

does anyone want to does anyone want to

1320

00:53:53,210 --> 00:53:50,940

take that

1321

00:53:54,589 --> 00:53:53,220

so I got that oh why do you turn on your

1322

00:53:57,049 --> 00:53:54,599

porch light

1323

00:53:58,609 --> 00:53:57,059

I I got I got the best answer from Eric

1324

00:54:01,069 --> 00:53:58,619

Davis on this actually they're not like

1325

00:54:03,530 --> 00:54:01,079

okay they're just they're just um

1326
00:54:05,450 --> 00:54:03,540
invisible light from infrared microwave

1327
00:54:08,270 --> 00:54:05,460
radar and radio frequencies that are

1328
00:54:10,549 --> 00:54:08,280
Doppler blue shifted up into the visible

1329
00:54:12,829 --> 00:54:10,559
now that that that is going to explain

1330
00:54:14,750 --> 00:54:12,839
glows that's not going to explain what

1331
00:54:16,790 --> 00:54:14,760
sometimes looks like discrete lights

1332
00:54:19,370 --> 00:54:16,800
that look like navigation lights but

1333
00:54:21,650 --> 00:54:19,380
that's the best explanation I've ever

1334
00:54:24,010 --> 00:54:21,660
heard from anyone it's not mine like I

1335
00:54:26,750 --> 00:54:24,020
said it's Eric's

1336
00:54:28,370 --> 00:54:26,760
go ahead go ahead go ahead my real

1337
00:54:31,069 --> 00:54:28,380
opinion on lights is that we're not

1338
00:54:32,990 --> 00:54:31,079

dealing with just one phenomenon yeah uh

1339

00:54:34,730 --> 00:54:33,000

you know we we probably have multi

1340

00:54:37,370 --> 00:54:34,740

multitude of phenomenon we probably have

1341

00:54:40,789 --> 00:54:37,380

uh man-made man-made objects that people

1342

00:54:42,710 --> 00:54:40,799

are seeing we're seeing uh you know you

1343

00:54:44,450 --> 00:54:42,720

know uaps that we can't under you know

1344

00:54:48,289 --> 00:54:44,460

we don't know what they're from you know

1345

00:54:50,990 --> 00:54:48,299

they off-world uaps on world uaps uh

1346

00:54:52,970 --> 00:54:51,000

orbs all kinds of stuff so you know when

1347

00:54:55,309 --> 00:54:52,980

you say lights you really got to be more

1348

00:54:57,170 --> 00:54:55,319

specific yeah I mean the items the

1349

00:54:58,970 --> 00:54:57,180

objects have lights on them is what I

1350

00:55:01,670 --> 00:54:58,980

meant because they're probably man-made

1351

00:55:04,309 --> 00:55:01,680

then nuts and bolts I don't know I I

1352

00:55:08,150 --> 00:55:04,319

also have you know we have two accounts

1353

00:55:09,589 --> 00:55:08,160

we have uh Charles Halt and a good

1354

00:55:12,289 --> 00:55:09,599

friend of mine who's on the Antiques

1355

00:55:14,270 --> 00:55:12,299

Roadshow uh James Callahan both saw

1356

00:55:16,789 --> 00:55:14,280

something very similar they saw an

1357

00:55:19,370 --> 00:55:16,799

object turn into lights I know that

1358

00:55:21,349 --> 00:55:19,380

sounds crazy and my friend from the

1359

00:55:23,809 --> 00:55:21,359

Antiques Roadshow was with a bunch of

1360

00:55:26,390 --> 00:55:23,819

witnesses at his college and and this

1361

00:55:29,270 --> 00:55:26,400

thing was box shaped it shot up in the

1362

00:55:31,190 --> 00:55:29,280

sky a jet went after it afterburner and

1363

00:55:34,670 --> 00:55:31,200

all that and the thing burst into five

1364

00:55:36,890 --> 00:55:34,680

lights and then was a sequencing back

1365

00:55:38,329 --> 00:55:36,900

and forth and that's very similar I

1366

00:55:40,250 --> 00:55:38,339

talked to Charles halt about it and he

1367

00:55:44,089 --> 00:55:40,260

said is it you know basically what he

1368

00:55:45,829 --> 00:55:44,099

saw happen to that object and that

1369

00:55:48,589 --> 00:55:45,839

looked like an eyeball that burst into

1370

00:55:49,309 --> 00:55:48,599

lights uh so I mean really bizarre I

1371

00:55:54,349 --> 00:55:49,319

mean

1372

00:55:55,970 --> 00:55:54,359

this point but yeah I think I think

1373

00:55:57,770 --> 00:55:55,980

that's part of the problem is we don't

1374

00:56:00,829 --> 00:55:57,780

really we don't know what these things

1375

00:56:03,410 --> 00:56:00,839

are and they probably and it's difficult

1376

00:56:06,770 --> 00:56:03,420

to generalize because there can be

1377

00:56:08,450 --> 00:56:06,780

multiple explanations and then and the

1378

00:56:09,710 --> 00:56:08,460

answer for each explanation could be

1379

00:56:11,630 --> 00:56:09,720

different so

1380

00:56:13,609 --> 00:56:11,640

so we're in a very difficult situation

1381

00:56:14,870 --> 00:56:13,619

right now trying to answer these

1382

00:56:17,569 --> 00:56:14,880

questions

1383

00:56:19,190 --> 00:56:17,579

um and then you know I mean a lot of the

1384

00:56:27,470 --> 00:56:19,200

uh

1385

00:56:29,930 --> 00:56:27,480

that again I agree could be part of the

1386

00:56:31,430 --> 00:56:29,940

part of it and all of it I don't believe

1387

00:56:34,250 --> 00:56:31,440

it's all of it but it could be part of

1388

00:56:36,049 --> 00:56:34,260

it but I mean the problem I was having

1389

00:56:39,109 --> 00:56:36,059

when I was interviewing scientists

1390

00:56:41,450 --> 00:56:39,119

before any of you was that uh people

1391

00:56:44,210 --> 00:56:41,460

like Seth shostak and other Skeptics

1392

00:56:46,309 --> 00:56:44,220

would say there's absolutely no way that

1393

00:56:49,630 --> 00:56:46,319

anything could travel it wouldn't make

1394

00:56:53,210 --> 00:56:49,640

any sense of the distances and no no no

1395

00:56:56,750 --> 00:56:53,220

why people people said that about Lord

1396

00:57:00,250 --> 00:56:56,760

Kelvin said that heavier than air flying

1397

00:57:04,490 --> 00:57:02,809

Matthew what did you rarely know we

1398

00:57:06,530 --> 00:57:04,500

barely can get off the planet at this

1399

00:57:09,049 --> 00:57:06,540

point we don't we're not experts on this

1400

00:57:11,030 --> 00:57:09,059

this is an engineering question not a

1401
00:57:13,870 --> 00:57:11,040
physics question and Engineering is

1402
00:57:16,490 --> 00:57:13,880
about finding workarounds to of problems

1403
00:57:19,670 --> 00:57:16,500
and we don't know how to do this yet

1404
00:57:21,650 --> 00:57:19,680
that's all there is to it I'm so sick of

1405
00:57:24,230 --> 00:57:21,660
hearing this argument repeated that I'm

1406
00:57:26,450 --> 00:57:24,240
actually inspired by Kevin to I'm going

1407
00:57:28,609 --> 00:57:26,460
to write a medium essay about this

1408
00:57:31,309 --> 00:57:28,619
debunking all these stupid repeated

1409
00:57:33,770 --> 00:57:31,319
ideas from scientists who are ordinarily

1410
00:57:35,390 --> 00:57:33,780
brilliant all of a sudden these

1411
00:57:37,549 --> 00:57:35,400
brilliant scientists forget special

1412
00:57:39,109 --> 00:57:37,559
relativity that they should have been

1413
00:57:41,450 --> 00:57:39,119

teaching are teaching to their

1414

00:57:44,210 --> 00:57:41,460

undergrads time dilation and length

1415

00:57:46,069 --> 00:57:44,220

contraction help you so like Kevin said

1416

00:57:48,530 --> 00:57:46,079

it's not a question of physics it's a

1417

00:57:50,089 --> 00:57:48,540

question of engineering and Humanity has

1418

00:57:52,250 --> 00:57:50,099

already shown again and again and again

1419

00:57:54,589 --> 00:57:52,260

and again with air travel and the local

1420

00:57:57,589 --> 00:57:54,599

space travel we're capable of doing that

1421

00:57:59,450 --> 00:57:57,599

Engineers can find clever loopholes in

1422

00:58:02,569 --> 00:57:59,460

the existing laws of physics you don't

1423

00:58:04,490 --> 00:58:02,579

need any FTL you don't need any warp

1424

00:58:05,809 --> 00:58:04,500

drives you don't eat any wormholes

1425

00:58:07,730 --> 00:58:05,819

there'd be nice don't get me wrong

1426
00:58:09,470 --> 00:58:07,740
they'd be icing on the cake but you just

1427
00:58:11,030 --> 00:58:09,480
use good old-fashioned relativistic time

1428
00:58:14,270 --> 00:58:11,040
dilation that we've known about since

1429
00:58:17,630 --> 00:58:14,280
what 1905 and it's two thousand you know

1430
00:58:20,450 --> 00:58:17,640
22. so I hate hearing that over and over

1431
00:58:22,730 --> 00:58:20,460
again it's too far it would take too

1432
00:58:24,829 --> 00:58:22,740
long it sounds like the same old

1433
00:58:26,870 --> 00:58:24,839
arguments we've heard about air travel

1434
00:58:29,270 --> 00:58:26,880
being impossible and space travel going

1435
00:58:32,270 --> 00:58:29,280
back centuries why do human beings

1436
00:58:34,609 --> 00:58:32,280
intelligent scientists make the same

1437
00:58:36,650 --> 00:58:34,619
mistakes over and over again claiming

1438
00:58:39,589 --> 00:58:36,660

that something is difficult

1439

00:58:41,510 --> 00:58:39,599

is impossible I'm sorry but there's an

1440

00:58:43,670 --> 00:58:41,520

Infinity of difference between difficult

1441

00:58:45,650 --> 00:58:43,680

and impossible because difficult means

1442

00:58:48,349 --> 00:58:45,660

possible so it's very very different

1443

00:58:51,289 --> 00:58:48,359

than impossible yeah that is a great

1444

00:58:53,030 --> 00:58:51,299

answer I love that that really is and

1445

00:58:54,710 --> 00:58:53,040

you know I mean I've always thought

1446

00:58:56,569 --> 00:58:54,720

maybe it's just something we don't know

1447

00:58:59,150 --> 00:58:56,579

you know we we wouldn't be able to

1448

00:59:01,789 --> 00:58:59,160

figure it out and um and then I heard

1449

00:59:03,289 --> 00:59:01,799

another this is another one that I

1450

00:59:04,849 --> 00:59:03,299

really liked and I think it might have

1451
00:59:08,089 --> 00:59:04,859
started with a shock Valley might have

1452
00:59:10,250 --> 00:59:08,099
said it first or something like that but

1453
00:59:12,829 --> 00:59:10,260
um I'm just throwing these things at you

1454
00:59:14,990 --> 00:59:12,839
and that is uh we may not even be able

1455
00:59:17,270 --> 00:59:15,000
to understand what they are

1456
00:59:19,250 --> 00:59:17,280
I love that one I don't even know that's

1457
00:59:21,710 --> 00:59:19,260
very possible we don't know yet what the

1458
00:59:23,150 --> 00:59:21,720
situation is and yeah it could take it

1459
00:59:25,130 --> 00:59:23,160
could mean that these things are so

1460
00:59:27,049 --> 00:59:25,140
different that it's going to take a long

1461
00:59:28,730 --> 00:59:27,059
long time for us to start to get a

1462
00:59:31,030 --> 00:59:28,740
handle on this new theories might be

1463
00:59:34,069 --> 00:59:31,040

needed who knows

1464

00:59:36,650 --> 00:59:34,079

and uh and for the most part

1465

00:59:38,630 --> 00:59:36,660

you know I it seems like whatever they

1466

00:59:43,370 --> 00:59:38,640

are of benign you know you do hear about

1467

00:59:46,309 --> 00:59:43,380

things every once in a while but um uh I

1468

00:59:48,049 --> 00:59:46,319

guess here's another thing about Crash

1469

00:59:50,329 --> 00:59:48,059

retrieval you know there's a lot of

1470

00:59:52,010 --> 00:59:50,339

people that ask that question do we have

1471

00:59:53,870 --> 00:59:52,020

something do we not how could they

1472

00:59:55,670 --> 00:59:53,880

possibly crash here

1473

00:59:58,870 --> 00:59:55,680

um you know on and on and on

1474

01:00:02,210 --> 00:59:58,880

um any thoughts on that

1475

01:00:04,549 --> 01:00:02,220

I have about any technology any type of

1476

01:00:05,750 --> 01:00:04,559

technology is fallible so you know

1477

01:00:08,270 --> 01:00:05,760

whether it's whether it's off world

1478

01:00:11,150 --> 01:00:08,280

technology or it's our technology it can

1479

01:00:13,130 --> 01:00:11,160

it can it has it has a only a finite use

1480

01:00:15,530 --> 01:00:13,140

I mean eventually it's going to fail so

1481

01:00:17,569 --> 01:00:15,540

and and if you're not from here Earth is

1482

01:00:20,750 --> 01:00:17,579

a very hostile and

1483

01:00:24,069 --> 01:00:20,760

yes especially around military bases

1484

01:00:27,109 --> 01:00:24,079

yeah there's a lot of gun nuts here but

1485

01:00:28,549 --> 01:00:27,119

my original take on it was I was I

1486

01:00:30,650 --> 01:00:28,559

always thought that if they're so

1487

01:00:33,589 --> 01:00:30,660

Advanced or are they crashing so often

1488

01:00:35,089 --> 01:00:33,599

but but but the thing is I've become

1489

01:00:37,609 --> 01:00:35,099

increasingly convinced there might be

1490

01:00:38,990 --> 01:00:37,619

something to this this comes up you know

1491

01:00:40,910 --> 01:00:39,000

all the time this came up during the

1492

01:00:42,829 --> 01:00:40,920

Congressional hearing and I noticed

1493

01:00:45,049 --> 01:00:42,839

their sneaky answered no we don't have

1494

01:00:47,109 --> 01:00:45,059

Parts you know in the government

1495

01:00:49,670 --> 01:00:47,119

possession yeah but what about

1496

01:00:50,930 --> 01:00:49,680

contractors yeah yeah so if I was if I

1497

01:00:52,490 --> 01:00:50,940

was sitting on the committee oh I

1498

01:00:54,589 --> 01:00:52,500

wouldn't have allowed to get away with

1499

01:00:56,690 --> 01:00:54,599

that I would have been like

1500

01:00:58,970 --> 01:00:56,700

um how about those independent foia

1501
01:01:03,049 --> 01:00:58,980
exempt contractors you're hiding all the

1502
01:01:04,849 --> 01:01:03,059
parts with so so yeah I've grown now I'm

1503
01:01:06,890 --> 01:01:04,859
not convinced they're necessarily you

1504
01:01:08,870 --> 01:01:06,900
know we have like you know alien bodies

1505
01:01:11,329 --> 01:01:08,880
in the freezer because I think I'm I'm

1506
01:01:13,010 --> 01:01:11,339
with Kevin on this one is that you know

1507
01:01:16,549 --> 01:01:13,020
who knows we could have you know Von

1508
01:01:21,170 --> 01:01:16,559
Neumann probes AI like Avi Lopez says so

1509
01:01:23,809 --> 01:01:21,180
I I I I I I I I have some a tiny action

1510
01:01:25,970 --> 01:01:23,819
of me thinks is possible we might have

1511
01:01:28,609 --> 01:01:25,980
some we might have some parts but I'm

1512
01:01:31,130 --> 01:01:28,619
much more skeptical that there's like we

1513
01:01:33,289 --> 01:01:31,140

have like bodies in in the freezer I

1514

01:01:34,789 --> 01:01:33,299

don't know in right Patterson right or

1515

01:01:37,849 --> 01:01:34,799

Roswell or something so no they're in

1516

01:01:40,190 --> 01:01:37,859

formaldehyde jars okay formaldehyde yeah

1517

01:01:41,809 --> 01:01:40,200

but no I I've gotten increasingly

1518

01:01:44,930 --> 01:01:41,819

convinced that there might be something

1519

01:01:48,650 --> 01:01:44,940

to Parts but my take on it is if it is

1520

01:01:50,630 --> 01:01:48,660

true we have almost no hope of reverse

1521

01:01:53,089 --> 01:01:50,640

engineering and I've argued this with um

1522

01:01:54,609 --> 01:01:53,099

Hal putoff and Eric Davis stuff like I

1523

01:01:57,770 --> 01:01:54,619

feel like if we do have any parts

1524

01:02:00,289 --> 01:01:57,780

imagine taking your laptop that you're

1525

01:02:03,289 --> 01:02:00,299

on right now Martin give it to the most

1526

01:02:05,510 --> 01:02:03,299

brilliant scientists of the 1890s give

1527

01:02:06,950 --> 01:02:05,520

it to Michael Faraday do you think he

1528

01:02:09,950 --> 01:02:06,960

would ever figure it out

1529

01:02:12,049 --> 01:02:09,960

he would die trying he and by the time

1530

01:02:14,210 --> 01:02:12,059

they figured out Humanity will have

1531

01:02:16,390 --> 01:02:14,220

already already have in our own I I feel

1532

01:02:20,930 --> 01:02:16,400

like if we do have Parts we're like

1533

01:02:23,109 --> 01:02:20,940

1890s scientists given a PC or Mac

1534

01:02:25,609 --> 01:02:23,119

laptop from today

1535

01:02:27,710 --> 01:02:25,619

we will we don't know our heads we

1536

01:02:29,930 --> 01:02:27,720

wouldn't know our head from our ass with

1537

01:02:32,450 --> 01:02:29,940

and so that's why you still have to try

1538

01:02:35,150 --> 01:02:32,460

but you still have to try I'm not saying

1539

01:02:37,309 --> 01:02:35,160

don't try you must try yeah absolutely

1540

01:02:38,630 --> 01:02:37,319

there are hammers yeah yeah I don't know

1541

01:02:41,690 --> 01:02:38,640

how they would even think of taking it

1542

01:02:44,270 --> 01:02:41,700

apart like yeah no no it's that's that

1543

01:02:46,970 --> 01:02:44,280

does make a lot of sense and you know it

1544

01:02:49,069 --> 01:02:46,980

just and and you know a lot of people

1545

01:02:51,589 --> 01:02:49,079

too here's here's another thing that you

1546

01:02:53,569 --> 01:02:51,599

hear a lot of people say and you know uh

1547

01:02:55,430 --> 01:02:53,579

Kevin you mentioned you saw the Ariel

1548

01:02:58,789 --> 01:02:55,440

phenomenon which I thought was a

1549

01:03:02,150 --> 01:02:58,799

fantastic film and

1550

01:03:05,630 --> 01:03:02,160

um there's the telepathy

1551

01:03:07,910 --> 01:03:05,640

um that you hear about and that is just

1552

01:03:10,309 --> 01:03:07,920

fascinating to me because

1553

01:03:13,069 --> 01:03:10,319

um it a lot of it what people are

1554

01:03:14,930 --> 01:03:13,079

talking about that they hear is you know

1555

01:03:16,970 --> 01:03:14,940

maybe seeing a vision of a destruction

1556

01:03:19,730 --> 01:03:16,980

of a planet and one of the things

1557

01:03:21,770 --> 01:03:19,740

in the Ariel school they showed them

1558

01:03:23,690 --> 01:03:21,780

things but they never said how to fix it

1559

01:03:25,730 --> 01:03:23,700

or anything there wasn't any of that it

1560

01:03:28,190 --> 01:03:25,740

was just showing them this is what's

1561

01:03:30,589 --> 01:03:28,200

going to happen or or happening or

1562

01:03:32,150 --> 01:03:30,599

whatever they all had that feeling like

1563

01:03:35,089 --> 01:03:32,160

that they didn't have any feeling of how

1564

01:03:38,990 --> 01:03:35,099

to fix it just this this for me is

1565

01:03:42,529 --> 01:03:39,000

puzzling and intriguing it's I don't

1566

01:03:46,069 --> 01:03:42,539

know what the heck is going on I

1567

01:03:47,990 --> 01:03:46,079

and especially puzzled because I did my

1568

01:03:50,150 --> 01:03:48,000

PhD thesis was in physics and

1569

01:03:52,250 --> 01:03:50,160

Neuroscience and my postdoctoral work

1570

01:03:53,930 --> 01:03:52,260

was in Neuroscience so and I know a bit

1571

01:03:57,470 --> 01:03:53,940

about brain computer interface and that

1572

01:03:59,750 --> 01:03:57,480

sort of thing and human brains are still

1573

01:04:01,309 --> 01:03:59,760

two humans are still sufficiently

1574

01:04:02,870 --> 01:04:01,319

different from one another that you

1575

01:04:04,789 --> 01:04:02,880

can't just take a brain computer

1576
01:04:06,770 --> 01:04:04,799
interface device on one person and put

1577
01:04:08,710 --> 01:04:06,780
it on another and get it to work so you

1578
01:04:11,150 --> 01:04:08,720
can't get a computer to

1579
01:04:13,250 --> 01:04:11,160
telepathically through equipment to

1580
01:04:15,410 --> 01:04:13,260
communicate with the human brain

1581
01:04:17,990 --> 01:04:15,420
so I don't know how an alien would do it

1582
01:04:20,930 --> 01:04:18,000
or whatever the heck these things are

1583
01:04:22,370 --> 01:04:20,940
um it makes me suspicious makes me think

1584
01:04:24,349 --> 01:04:22,380
maybe it's some kind of Technology

1585
01:04:25,789 --> 01:04:24,359
rather than biology

1586
01:04:27,349 --> 01:04:25,799
um if it was biology there's no reason

1587
01:04:28,490 --> 01:04:27,359
they would be compatible with us

1588
01:04:30,529 --> 01:04:28,500

especially if they're from another

1589

01:04:32,630 --> 01:04:30,539

planet so that doesn't make sense

1590

01:04:34,490 --> 01:04:32,640

so I find the whole thing very confusing

1591

01:04:36,710 --> 01:04:34,500

and then of course

1592

01:04:38,270 --> 01:04:36,720

so so I don't physically see how it's

1593

01:04:41,210 --> 01:04:38,280

possible

1594

01:04:43,789 --> 01:04:41,220

um yet that's what is reported by by

1595

01:04:45,770 --> 01:04:43,799

lots of the kids who encountered them at

1596

01:04:48,650 --> 01:04:45,780

the aerial in the Ariel phenomena at the

1597

01:04:51,529 --> 01:04:48,660

Ariel school and and other people who

1598

01:04:53,270 --> 01:04:51,539

claim to have such encounters so so I

1599

01:04:56,089 --> 01:04:53,280

really don't know what to make of this I

1600

01:04:59,630 --> 01:04:56,099

find it very perplexing and

1601
01:05:02,329 --> 01:04:59,640
but it's intriguing and it it's one of I

1602
01:05:04,069 --> 01:05:02,339
I try to tell you know my fellow

1603
01:05:05,210 --> 01:05:04,079
scientists who are working on these

1604
01:05:08,569 --> 01:05:05,220
things

1605
01:05:10,970 --> 01:05:08,579
the the it's very difficult to deal with

1606
01:05:13,609 --> 01:05:10,980
anecdotal data because it isn't data

1607
01:05:15,549 --> 01:05:13,619
it's there's stories right so how do you

1608
01:05:19,490 --> 01:05:15,559
how do you know what to pay attention to

1609
01:05:20,569 --> 01:05:19,500
and so the trick that I use typically is

1610
01:05:23,270 --> 01:05:20,579
to

1611
01:05:27,170 --> 01:05:23,280
you know the the the the statements or

1612
01:05:30,109 --> 01:05:27,180
the events that are not expected are

1613
01:05:32,270 --> 01:05:30,119

those that are providing the most

1614

01:05:37,309 --> 01:05:32,280

information

1615

01:05:39,289 --> 01:05:37,319

there so so so those are the most

1616

01:05:42,890 --> 01:05:39,299

informative and if you have

1617

01:05:44,750 --> 01:05:42,900

many stories that where they all provide

1618

01:05:47,390 --> 01:05:44,760

the same where they all have the same

1619

01:05:48,950 --> 01:05:47,400

unexpected component that's something to

1620

01:05:50,210 --> 01:05:48,960

pay attention to it doesn't mean it's

1621

01:05:51,109 --> 01:05:50,220

correct it doesn't mean that's what

1622

01:05:53,390 --> 01:05:51,119

happened it doesn't mean their

1623

01:05:55,250 --> 01:05:53,400

interpretation is correct but but it

1624

01:05:57,230 --> 01:05:55,260

means you should pay attention and

1625

01:05:59,270 --> 01:05:57,240

that's what I try to do

1626

01:06:02,630 --> 01:05:59,280

um yeah it's interesting you're right I

1627

01:06:04,789 --> 01:06:02,640

mean it's not just there it's it's been

1628

01:06:06,890 --> 01:06:04,799

other other people have also claimed

1629

01:06:08,990 --> 01:06:06,900

over the years so pay attention to it

1630

01:06:10,670 --> 01:06:09,000

you don't have to believe it but paid

1631

01:06:12,529 --> 01:06:10,680

it's something you ought to be paying

1632

01:06:13,630 --> 01:06:12,539

attention to that's the way I look at it

1633

01:06:16,430 --> 01:06:13,640

and

1634

01:06:18,950 --> 01:06:16,440

of course if it is telepathic

1635

01:06:20,329 --> 01:06:18,960

communication then yeah you do have to

1636

01:06:22,490 --> 01:06:20,339

ask the question what were they trying

1637

01:06:24,710 --> 01:06:22,500

to accomplish by showing these little

1638

01:06:27,710 --> 01:06:24,720

kids pictures of the destruction of the

1639

01:06:29,930 --> 01:06:27,720

earth I mean how what are you trying to

1640

01:06:32,089 --> 01:06:29,940

accomplish here there's it looks like

1641

01:06:35,089 --> 01:06:32,099

there's this incredible social

1642

01:06:36,529 --> 01:06:35,099

disconnect if anything I have to tell

1643

01:06:38,270 --> 01:06:36,539

you this I have to tell you this one

1644

01:06:40,910 --> 01:06:38,280

story I'm losing losing a little bit of

1645

01:06:42,950 --> 01:06:40,920

light here but I had I had this guy on

1646

01:06:47,270 --> 01:06:42,960

that contacted me named Albert Wayne he

1647

01:06:49,910 --> 01:06:47,280

talked about a uh case back in on I-95

1648

01:06:51,589 --> 01:06:49,920

going from Massachusetts down to New

1649

01:06:54,589 --> 01:06:51,599

York with him and his girlfriend pulled

1650

01:06:56,750 --> 01:06:54,599

over and this object he saw was like

1651

01:06:59,210 --> 01:06:56,760

across the street and he described it

1652

01:07:00,710 --> 01:06:59,220

was really very strange looking and then

1653

01:07:03,109 --> 01:07:00,720

all of a sudden in an instant it was

1654

01:07:04,750 --> 01:07:03,119

over them and they look up and he says I

1655

01:07:07,609 --> 01:07:04,760

don't want to say it that it was

1656

01:07:09,890 --> 01:07:07,619

silhouettes of beings looking down and

1657

01:07:12,529 --> 01:07:09,900

then he says and all of a sudden I felt

1658

01:07:14,390 --> 01:07:12,539

in my head don't worry

1659

01:07:15,410 --> 01:07:14,400

we're not going to hurt you we're just

1660

01:07:18,170 --> 01:07:15,420

observing

1661

01:07:20,510 --> 01:07:18,180

that was what he got and but the the

1662

01:07:22,010 --> 01:07:20,520

most crazy thing about that story is

1663

01:07:23,870 --> 01:07:22,020

everyone that had pulled over on the

1664

01:07:25,549 --> 01:07:23,880

side of the road and was watching this

1665

01:07:27,890 --> 01:07:25,559

thing and then it shot over to where it

1666

01:07:29,990 --> 01:07:27,900

was again and the trees were waving back

1667

01:07:32,750 --> 01:07:30,000

and forth like a hurricane below it and

1668

01:07:35,930 --> 01:07:32,760

then it shot off but everyone that drove

1669

01:07:37,190 --> 01:07:35,940

off on I-95 took the he said to his

1670

01:07:39,710 --> 01:07:37,200

girlfriend

1671

01:07:41,990 --> 01:07:39,720

we should go get an ice cream afterwards

1672

01:07:44,890 --> 01:07:42,000

everyone turned on the first exit they

1673

01:07:46,609 --> 01:07:44,900

all pulled into to a Howard Johnson's

1674

01:07:49,089 --> 01:07:46,619

and

1675

01:07:51,589 --> 01:07:49,099

um for ice cream that's really weird

1676

01:07:53,569 --> 01:07:51,599

it's an amazing story where you had

1677

01:07:55,789 --> 01:07:53,579

people pulled over for several miles on

1678

01:07:58,690 --> 01:07:55,799

iPhone 95 I remember that that happened

1679

01:08:01,250 --> 01:07:58,700

at one point this was in the 70s yeah

1680

01:08:03,890 --> 01:08:01,260

yeah math things go ahead yeah there's a

1681

01:08:07,190 --> 01:08:03,900

specific point that Kevin also and you

1682

01:08:09,410 --> 01:08:07,200

had mentioned about you know visions of

1683

01:08:12,470 --> 01:08:09,420

the the end of the end of the world

1684

01:08:16,189 --> 01:08:12,480

right yeah um I have a very cynical take

1685

01:08:18,590 --> 01:08:16,199

on this which is that um if we are if

1686

01:08:20,749 --> 01:08:18,600

aliens are real

1687

01:08:23,209 --> 01:08:20,759

maybe they're doing an anthropological

1688

01:08:25,309 --> 01:08:23,219

study and saying look this is how a

1689

01:08:28,010 --> 01:08:25,319

civilization self-destructs watch you

1690

01:08:29,570 --> 01:08:28,020

know you know covet Ukraine and all this

1691

01:08:31,550 --> 01:08:29,580

Putin's gonna launch you know maybe

1692

01:08:33,709 --> 01:08:31,560

nuclear missiles maybe you know this is

1693

01:08:37,490 --> 01:08:33,719

all it's very cynical but what if we're

1694

01:08:40,729 --> 01:08:37,500

an anthropological study of like this is

1695

01:08:43,550 --> 01:08:40,739

what what not to do well observe as as

1696

01:08:45,649 --> 01:08:43,560

Humanity destroys itself and it's a it's

1697

01:08:49,010 --> 01:08:45,659

a live anthropology study for some

1698

01:08:51,829 --> 01:08:49,020

extraterrestrial graduate PhD class or

1699

01:08:53,990 --> 01:08:51,839

something and you know zenoanthropology

1700

01:08:56,450 --> 01:08:54,000

or something so sometimes that that

1701
01:08:59,030 --> 01:08:56,460
thought keeps me up at night because I

1702
01:09:01,849 --> 01:08:59,040
worry that it's a little too plausible

1703
01:09:05,930 --> 01:09:01,859
yeah yeah it's really uh

1704
01:09:07,970 --> 01:09:05,940
it really you know does make a pot you

1705
01:09:10,729 --> 01:09:07,980
know I mean I remember I had Dr Jeffrey

1706
01:09:13,249 --> 01:09:10,739
Bennett astrophysicist on my show and he

1707
01:09:15,950 --> 01:09:13,259
said that him and his fellow colleagues

1708
01:09:18,349 --> 01:09:15,960
at Nasa would kind of talk about any

1709
01:09:21,530 --> 01:09:18,359
civilization that could get through the

1710
01:09:24,769 --> 01:09:21,540
bottleneck of uh technology without

1711
01:09:27,590 --> 01:09:24,779
blowing themselves up will probably be

1712
01:09:30,349 --> 01:09:27,600
traveling the Stars which I thought was

1713
01:09:31,910 --> 01:09:30,359

you know that one line any they get

1714

01:09:34,189 --> 01:09:31,920

through the bottleneck of Technology

1715

01:09:36,829 --> 01:09:34,199

without blowing themselves up I think

1716

01:09:38,930 --> 01:09:36,839

that is for any sophisticated

1717

01:09:41,450 --> 01:09:38,940

how Society will go through that

1718

01:09:43,130 --> 01:09:41,460

bottleneck and I feel like we're kind of

1719

01:09:45,530 --> 01:09:43,140

in the bottle I think we have a hatred

1720

01:09:48,249 --> 01:09:45,540

bottle actually we hate each we hate we

1721

01:09:49,970 --> 01:09:48,259

hate ourselves how how would we greet

1722

01:09:53,149 --> 01:09:49,980

extraterrestrials right

1723

01:09:54,770 --> 01:09:53,159

yeah that's yeah good point

1724

01:09:56,990 --> 01:09:54,780

um here's a can of worms that I don't

1725

01:10:01,669 --> 01:09:57,000

know if I really want to open because uh

1726

01:10:04,490 --> 01:10:01,679

I did a Blog on Bob Lazar and uh

1727

01:10:07,430 --> 01:10:04,500

that I don't basically boils down to

1728

01:10:09,890 --> 01:10:07,440

like I don't buy his story and I've

1729

01:10:12,110 --> 01:10:09,900

looked into it deeply and I have never

1730

01:10:14,330 --> 01:10:12,120

been more attacked uh since I've done

1731

01:10:16,330 --> 01:10:14,340

this show than me having that opinion

1732

01:10:18,709 --> 01:10:16,340

all these people saying they'll never

1733

01:10:20,689 --> 01:10:18,719

know again

1734

01:10:21,410 --> 01:10:20,699

all right I'm sorry I'm just jumping in

1735

01:10:23,709 --> 01:10:21,420

here

1736

01:10:27,050 --> 01:10:23,719

okay just be prepared for hate mail

1737

01:10:29,570 --> 01:10:27,060

that's fine they can look hate me for

1738

01:10:30,890 --> 01:10:29,580

this opinion if you want I don't care

1739

01:10:35,330 --> 01:10:30,900

um

1740

01:10:38,689 --> 01:10:35,340

I find that his

1741

01:10:41,930 --> 01:10:38,699

he knows clearly knows enough physics to

1742

01:10:45,229 --> 01:10:41,940

be able to describe some of these things

1743

01:10:47,630 --> 01:10:45,239

in the you know the common vernacular

1744

01:10:48,649 --> 01:10:47,640

that we use you know the technical Tech

1745

01:10:52,250 --> 01:10:48,659

speak

1746

01:10:55,189 --> 01:10:52,260

he clearly knows enough physics and

1747

01:10:57,229 --> 01:10:55,199

what he doesn't do is he doesn't go into

1748

01:11:01,130 --> 01:10:57,239

enough detail

1749

01:11:03,050 --> 01:11:01,140

to allow a physicist to realize that

1750

01:11:07,610 --> 01:11:03,060

he's wrong

1751

01:11:10,970 --> 01:11:08,990

because

1752

01:11:12,649 --> 01:11:10,980

somebody doesn't know physics right who

1753

01:11:15,229 --> 01:11:12,659

knows just enough physics to tell an

1754

01:11:17,149 --> 01:11:15,239

interesting story and wake up make up an

1755

01:11:21,530 --> 01:11:17,159

interesting story will easily cross the

1756

01:11:23,090 --> 01:11:21,540

line into nonsense where a professional

1757

01:11:24,590 --> 01:11:23,100

physicist will be listening would be

1758

01:11:25,729 --> 01:11:24,600

able to say oh they clearly don't know

1759

01:11:26,750 --> 01:11:25,739

what they're talking about this is

1760

01:11:29,570 --> 01:11:26,760

nonsense

1761

01:11:32,390 --> 01:11:29,580

and that would be done

1762

01:11:34,910 --> 01:11:32,400

very he never provides enough

1763

01:11:37,070 --> 01:11:34,920

information for you to verify that what

1764

01:11:39,470 --> 01:11:37,080

he's talking about is correct physics

1765

01:11:42,310 --> 01:11:39,480

wise but he also doesn't provide enough

1766

01:11:45,830 --> 01:11:42,320

information for you to falsify it

1767

01:11:48,530 --> 01:11:45,840

and I think that that's on purpose

1768

01:11:50,870 --> 01:11:48,540

because that's a very fine that's a very

1769

01:11:52,430 --> 01:11:50,880

delicate line and it takes somebody who

1770

01:11:53,630 --> 01:11:52,440

knows what they're doing to be able to

1771

01:11:57,290 --> 01:11:53,640

walk it

1772

01:12:01,310 --> 01:11:57,300

and so for that reason I think that it's

1773

01:12:03,169 --> 01:12:01,320

on purpose and I think he's purposefully

1774

01:12:05,450 --> 01:12:03,179

um I think that he's not telling the

1775

01:12:06,669 --> 01:12:05,460

truth he's not completely honest I don't

1776

01:12:10,070 --> 01:12:06,679

know whether

1777

01:12:12,530 --> 01:12:10,080

I'm definitely but I don't think it's

1778

01:12:14,630 --> 01:12:12,540

100 true well I'm definitely with you on

1779

01:12:17,030 --> 01:12:14,640

that Kevin I I think that it's uh like

1780

01:12:20,750 --> 01:12:17,040

my personal view on him is it's a mixed

1781

01:12:22,850 --> 01:12:20,760

bag I believe that he did work in some

1782

01:12:25,189 --> 01:12:22,860

type of government lab saw probably

1783

01:12:26,870 --> 01:12:25,199

things he didn't understand and

1784

01:12:29,330 --> 01:12:26,880

basically filled in the gaps for the

1785

01:12:31,130 --> 01:12:29,340

media and had a great story to begin

1786

01:12:34,669 --> 01:12:31,140

with kept it simple in his first

1787

01:12:36,770 --> 01:12:34,679

interview and then as the well what else

1788

01:12:38,149 --> 01:12:36,780

I think him did it because I get I get

1789

01:12:40,490 --> 01:12:38,159

asked questions all the time but what

1790

01:12:43,209 --> 01:12:40,500

else do you know and I go I've told you

1791

01:12:46,130 --> 01:12:43,219

everything I don't have anything else

1792

01:12:47,810 --> 01:12:46,140

and I think he got caught up with that

1793

01:12:49,850 --> 01:12:47,820

and he just honestly I think he made

1794

01:12:51,410 --> 01:12:49,860

some up to keep himself safe so

1795

01:12:52,910 --> 01:12:51,420

that the government's like well he's

1796

01:12:54,169 --> 01:12:52,920

he's shooting himself in the foot so

1797

01:12:56,810 --> 01:12:54,179

nobody's gonna believe him well there's

1798

01:12:58,790 --> 01:12:56,820

one caveat also to um to what Kevin said

1799

01:13:01,250 --> 01:12:58,800

I do think he has said one thing that

1800

01:13:03,290 --> 01:13:01,260

was falsifiable the whole element 115

1801
01:13:04,669 --> 01:13:03,300
thing which is then discovered and of

1802
01:13:06,890 --> 01:13:04,679
course it's not stable because it's too

1803
01:13:08,810 --> 01:13:06,900
damn heavy and then of course then the

1804
01:13:10,910 --> 01:13:08,820
retreat to oh well you know there's this

1805
01:13:13,070 --> 01:13:10,920
magical way of making it stable that we

1806
01:13:14,810 --> 01:13:13,080
haven't discovered yet if I was him I

1807
01:13:16,250 --> 01:13:14,820
would have gone much higher like

1808
01:13:18,470 --> 01:13:16,260
something we won't discover for

1809
01:13:21,350 --> 01:13:18,480
centuries like element like unhexactium

1810
01:13:23,209 --> 01:13:21,360
once 68 because then it's not just not

1811
01:13:25,010 --> 01:13:23,219
disprovable

1812
01:13:26,630 --> 01:13:25,020
um but but yeah there are like Kevin

1813
01:13:29,510 --> 01:13:26,640

said bits and pieces of Truth there may

1814

01:13:31,490 --> 01:13:29,520

be islands of stability at higher at

1815

01:13:35,149 --> 01:13:31,500

higher atomic numbers on the periodic

1816

01:13:37,370 --> 01:13:35,159

table there may be stable elements at

1817

01:13:40,370 --> 01:13:37,380

extremely high numbers of neutrons but

1818

01:13:43,070 --> 01:13:40,380

unfortunately uh 115 is not one of them

1819

01:13:44,930 --> 01:13:43,080

and and so so there is already one

1820

01:13:47,030 --> 01:13:44,940

gigantic hole so I just wanted to add

1821

01:13:49,310 --> 01:13:47,040

that one caveat to it so Kevin is the

1822

01:13:51,169 --> 01:13:49,320

whole element 115. so so yeah I'm

1823

01:13:53,450 --> 01:13:51,179

extremely skeptical but one thing that

1824

01:13:55,669 --> 01:13:53,460

that forced me to reconsider some of my

1825

01:13:58,490 --> 01:13:55,679

skepticism was when I was watching the

1826
01:14:00,770 --> 01:13:58,500
podcast Lex Friedman's podcast and he

1827
01:14:03,229 --> 01:14:00,780
was interviewing Commander David fravor

1828
01:14:05,930 --> 01:14:03,239
and David fraver seeing how he's friends

1829
01:14:09,169 --> 01:14:05,940
with Bob Lazar and I'm like wow okay so

1830
01:14:10,669 --> 01:14:09,179
kidding no no this is this is in the

1831
01:14:12,709 --> 01:14:10,679
three-hour interview with Lex Friedman

1832
01:14:16,130 --> 01:14:12,719
and I was like wait fravers friends with

1833
01:14:17,990 --> 01:14:16,140
bubbles I'm like so then I hate to throw

1834
01:14:21,050 --> 01:14:18,000
some rain on that but you gotta remember

1835
01:14:25,010 --> 01:14:21,060
that yeah yeah uh yeah so

1836
01:14:28,070 --> 01:14:25,020
they were all in the same camp with uh

1837
01:14:29,990 --> 01:14:28,080
with uh corbel and no I know I know that

1838
01:14:33,070 --> 01:14:30,000

so I mean they're they're all gonna talk

1839

01:14:36,649 --> 01:14:33,080

to each other so I mean oh that's right

1840

01:14:38,149 --> 01:14:36,659

we're friends yes so whenever they say

1841

01:14:40,970 --> 01:14:38,159

that he's friends with them they could

1842

01:14:42,530 --> 01:14:40,980

be in a very general meeting you know it

1843

01:14:44,630 --> 01:14:42,540

may not be like we're buddies having

1844

01:14:46,130 --> 01:14:44,640

beers out back and I believe everything

1845

01:14:47,510 --> 01:14:46,140

he says I can just say yeah I'm friends

1846

01:14:50,510 --> 01:14:47,520

with them I've got plenty of friends

1847

01:14:53,090 --> 01:14:50,520

that I believe no he was supposed to be

1848

01:14:55,550 --> 01:14:53,100

talking about having barbecues with him

1849

01:14:58,250 --> 01:14:55,560

and his wife and Bob Lazar and his wife

1850

01:14:59,870 --> 01:14:58,260

no no like it was deep yeah it was

1851

01:15:02,030 --> 01:14:59,880

probably it was probably a recent type

1852

01:15:04,010 --> 01:15:02,040

of thing not a okay okay not like a back

1853

01:15:07,310 --> 01:15:04,020

in the day thing yeah all right I have

1854

01:15:10,310 --> 01:15:07,320

to say something I I uh I spoke with

1855

01:15:14,090 --> 01:15:10,320

uh well I probably can't someone in the

1856

01:15:15,470 --> 01:15:14,100

government okay that we all know I don't

1857

01:15:17,270 --> 01:15:15,480

know some informally in the government

1858

01:15:21,649 --> 01:15:17,280

that we all know

1859

01:15:23,870 --> 01:15:21,659

um and he was I'm just gonna give away

1860

01:15:26,209 --> 01:15:23,880

too much by saying this it had to do

1861

01:15:29,149 --> 01:15:26,219

with Joe Rogan it had to do with what

1862

01:15:30,830 --> 01:15:29,159

Bob Lazar supposedly told told Joe Rogan

1863

01:15:34,130 --> 01:15:30,840

off air and said he couldn't repeat it

1864

01:15:36,169 --> 01:15:34,140

and that was repeated to this person and

1865

01:15:38,330 --> 01:15:36,179

the first thing I have to say Okay so

1866

01:15:41,090 --> 01:15:38,340

Bob Lazar can talk publicly about

1867

01:15:44,270 --> 01:15:41,100

reverse engineering the most incredible

1868

01:15:46,729 --> 01:15:44,280

classified situation in the entire world

1869

01:15:49,189 --> 01:15:46,739

but he can't talk about why it's really

1870

01:15:51,050 --> 01:15:49,199

true that he did it I mean come on so

1871

01:15:54,890 --> 01:15:51,060

anyway that person

1872

01:15:57,470 --> 01:15:54,900

said that okay now I'm totally skeptical

1873

01:15:59,930 --> 01:15:57,480

of Bob Lazar after after look if bubbles

1874

01:16:01,490 --> 01:15:59,940

are look not knowing any physics we can

1875

01:16:03,350 --> 01:16:01,500

already try to debunk the physics like

1876

01:16:06,229 --> 01:16:03,360

Kevin said not knowing any physics let's

1877

01:16:08,990 --> 01:16:06,239

use logic here if he was for real he

1878

01:16:11,270 --> 01:16:09,000

would have already committed suicide

1879

01:16:13,189 --> 01:16:11,280

with two you know bullets to the back of

1880

01:16:15,709 --> 01:16:13,199

the the head out in the desert if he was

1881

01:16:19,689 --> 01:16:15,719

for real he would have been taken care

1882

01:16:22,310 --> 01:16:19,699

of already come on we can use logic um

1883

01:16:24,530 --> 01:16:22,320

that's a lot of supposition but I think

1884

01:16:27,350 --> 01:16:24,540

that I would

1885

01:16:30,169 --> 01:16:27,360

I would be interested in learning more

1886

01:16:33,229 --> 01:16:30,179

and hearing more of the boring horribly

1887

01:16:34,430 --> 01:16:33,239

boring technical details of anything you

1888

01:16:37,010 --> 01:16:34,440

know how did he find how did they find

1889

01:16:39,470 --> 01:16:37,020

out it was Element 115 what technique

1890

01:16:42,050 --> 01:16:39,480

did they use to to find the mass of the

1891

01:16:44,930 --> 01:16:42,060

those atoms how do they isolate them

1892

01:16:46,729 --> 01:16:44,940

and you know too because if you've got

1893

01:16:48,830 --> 01:16:46,739

to keep the one element well if you've

1894

01:16:51,770 --> 01:16:48,840

got to keep Element 115 inside the

1895

01:16:54,050 --> 01:16:51,780

device to keep it stable as was claimed

1896

01:16:55,729 --> 01:16:54,060

then to figure out that it's actually

1897

01:16:57,110 --> 01:16:55,739

Element 115 you're gonna have to take it

1898

01:17:00,050 --> 01:16:57,120

out of that device and put it in your

1899

01:17:01,610 --> 01:17:00,060

equipment that measures the mass so how

1900

01:17:03,770 --> 01:17:01,620

did they do that and what kind of mask

1901

01:17:05,689 --> 01:17:03,780

how did they figure out the mass yeah we

1902

01:17:08,390 --> 01:17:05,699

don't have traffic you provide those

1903

01:17:10,070 --> 01:17:08,400

details convincingly you're gonna you're

1904

01:17:12,770 --> 01:17:10,080

gonna have another support if possible

1905

01:17:14,870 --> 01:17:12,780

supporter that's a good thing it's

1906

01:17:17,570 --> 01:17:14,880

possible to provide those well he says

1907

01:17:19,610 --> 01:17:17,580

he has a sample he he has said on record

1908

01:17:21,290 --> 01:17:19,620

as a sample and then oh I can't give it

1909

01:17:22,790 --> 01:17:21,300

away because that's all I've got I'm

1910

01:17:24,890 --> 01:17:22,800

sorry that's if you have a

1911

01:17:26,689 --> 01:17:24,900

hundred grams give one gram to

1912

01:17:28,970 --> 01:17:26,699

scientists and Kevin and I go oh yeah

1913

01:17:30,770 --> 01:17:28,980

look there it is it's 1 15. run mass

1914

01:17:33,050 --> 01:17:30,780

spec on it and stuff like that so it's

1915

01:17:34,970 --> 01:17:33,060

convenient how like you can't even share

1916

01:17:36,229 --> 01:17:34,980

one drop of a sample that just doesn't

1917

01:17:38,510 --> 01:17:36,239

make any sense

1918

01:17:40,850 --> 01:17:38,520

yeah well you know he was a photo

1919

01:17:42,890 --> 01:17:40,860

processor and then he was a

1920

01:17:44,510 --> 01:17:42,900

photoprocessor that went bankrupt and

1921

01:17:46,970 --> 01:17:44,520

then was able to get a the highest

1922

01:17:49,070 --> 01:17:46,980

secure you know clearance possible in

1923

01:17:53,390 --> 01:17:49,080

eight days so there you go right there

1924

01:17:54,649 --> 01:17:53,400

yeah uh and which takes a year to get

1925

01:17:56,209 --> 01:17:54,659

um but anyway

1926

01:17:58,910 --> 01:17:56,219

um I'm going to get a lot of hate mail

1927

01:18:01,850 --> 01:17:58,920

for this so we can uh we can turn it on

1928

01:18:03,649 --> 01:18:01,860

I I guess uh we're we're at uh about 20

1929

01:18:05,350 --> 01:18:03,659

minutes welcome to the club I get a lot

1930

01:18:08,810 --> 01:18:05,360

of hate mail already

1931

01:18:11,149 --> 01:18:08,820

so I guess um I'm not so concerned about

1932

01:18:13,370 --> 01:18:11,159

that I'm I want I don't want to believe

1933

01:18:15,770 --> 01:18:13,380

things I want to know them

1934

01:18:17,810 --> 01:18:15,780

yeah that's a higher standard sorry this

1935

01:18:19,310 --> 01:18:17,820

is going to decrease the hate mail I

1936

01:18:21,050 --> 01:18:19,320

want to say one more thing which is I

1937

01:18:23,050 --> 01:18:21,060

would love for him for to be for real

1938

01:18:26,330 --> 01:18:23,060

that would be amazing

1939

01:18:27,770 --> 01:18:26,340

I am open to that possibility but given

1940

01:18:30,110 --> 01:18:27,780

what we just discussed last few minutes

1941

01:18:31,669 --> 01:18:30,120

there are some serious concerns that can

1942

01:18:33,229 --> 01:18:31,679

be right and I don't think it's all

1943

01:18:36,050 --> 01:18:33,239

nonsense at all

1944

01:18:37,610 --> 01:18:36,060

I I wouldn't be surprised if it was all

1945

01:18:40,570 --> 01:18:37,620

made up I don't think that that's the

1946

01:18:43,430 --> 01:18:40,580

case but but

1947

01:18:46,250 --> 01:18:43,440

he definitely didn't go to MIT I know

1948

01:18:49,070 --> 01:18:46,260

someone there in records and they have

1949

01:18:50,450 --> 01:18:49,080

all the access to any possible way that

1950

01:18:51,590 --> 01:18:50,460

he could have ever been there and he's

1951

01:18:53,330 --> 01:18:51,600

never been there

1952

01:18:55,970 --> 01:18:53,340

yeah right he didn't even know what

1953

01:18:57,350 --> 01:18:55,980

Square was out front of uh that he

1954

01:18:59,870 --> 01:18:57,360

didn't know Kendall Square was out in

1955

01:19:01,910 --> 01:18:59,880

front of MIT no it reminds me of Catch

1956

01:19:04,550 --> 01:19:01,920

Me If You Can the book and remember the

1957

01:19:06,410 --> 01:19:04,560

movie would like oh so you went to that

1958

01:19:08,270 --> 01:19:06,420

school oh do you remember Professor so

1959

01:19:10,070 --> 01:19:08,280

and so yeah no one can be that

1960

01:19:11,990 --> 01:19:10,080

thoroughly erased yeah he did not go to

1961

01:19:15,709 --> 01:19:12,000

MIT that's that's absolutely ridiculous

1962

01:19:17,570 --> 01:19:15,719

yeah so um to me as an appraiser when I

1963

01:19:18,770 --> 01:19:17,580

find something wrong in an estate or

1964

01:19:20,330 --> 01:19:18,780

something like that I look at everything

1965

01:19:23,930 --> 01:19:20,340

because I don't believe in anything

1966

01:19:27,470 --> 01:19:23,940

anymore you know so anyway

1967

01:19:30,770 --> 01:19:27,480

um I'd like to leave on a higher note

1968

01:19:32,630 --> 01:19:30,780

than Bob Lazar so I guess I'm going to

1969

01:19:35,570 --> 01:19:32,640

ask you what do you what do you expect

1970

01:19:38,149 --> 01:19:35,580

as coming down the pike for uapx what

1971

01:19:41,030 --> 01:19:38,159

are your hopes and anyone can can fill

1972

01:19:47,450 --> 01:19:44,090

I'm hoping that we can collect more data

1973

01:19:50,169 --> 01:19:47,460

and that we find things of interest now

1974

01:19:53,390 --> 01:19:50,179

we finally learned something

1975

01:19:56,450 --> 01:19:53,400

uh Matthew anything at this point would

1976

01:20:00,890 --> 01:19:56,460

be great yeah yeah I'm I'm hoping to my

1977

01:20:06,050 --> 01:20:00,900

my big hope is to get at a minimum at a

1978

01:20:08,390 --> 01:20:06,060

minimum one interesting publication in a

1979

01:20:10,850 --> 01:20:08,400

good scientific journal where we've gone

1980

01:20:14,270 --> 01:20:10,860

through in every hoop and so what what

1981

01:20:18,050 --> 01:20:14,280

my what what my vision is is I want to

1982

01:20:21,229 --> 01:20:18,060

go through every possible mundane

1983

01:20:24,050 --> 01:20:21,239

prosaic explanation rule it in or rule

1984

01:20:26,990 --> 01:20:24,060

it out as for our for our famous you

1985

01:20:29,570 --> 01:20:27,000

know Hole in the Sky especially is is is

1986

01:20:33,709 --> 01:20:29,580

is is even if we can't conclude what it

1987

01:20:36,770 --> 01:20:33,719

is what can we say that it's not I want

1988

01:20:39,050 --> 01:20:36,780

to test water droplet insect camera

1989

01:20:42,110 --> 01:20:39,060

glitch and see to what degree of

1990

01:20:44,689 --> 01:20:42,120

confidence can we rule in or rule out

1991

01:20:48,350 --> 01:20:44,699

all the different hypotheses and if we

1992

01:20:50,330 --> 01:20:48,360

could get even one one paper out on one

1993

01:20:53,030 --> 01:20:50,340

anomaly from even our first Expedition

1994

01:20:54,770 --> 01:20:53,040

it would be a massive massive

1995

01:20:57,169 --> 01:20:54,780

achievement I think for the field of UAP

1996

01:20:59,209 --> 01:20:57,179

studies where existing papers like

1997

01:21:01,490 --> 01:20:59,219

Kevin's excellent work with his with

1998

01:21:05,270 --> 01:21:01,500

friends on Su that's been analyzing

1999

01:21:07,850 --> 01:21:05,280

historical cases I'm not aware of anyone

2000

01:21:09,169 --> 01:21:07,860

going out getting their own data and

2001
01:21:11,629 --> 01:21:09,179
succeeding and getting something

2002
01:21:13,250 --> 01:21:11,639
published in a high quality high impact

2003
01:21:15,350 --> 01:21:13,260
scientific journal I think that's

2004
01:21:16,790 --> 01:21:15,360
unheard of and we want to break that

2005
01:21:19,370 --> 01:21:16,800
ceiling we want to break through that

2006
01:21:22,810 --> 01:21:19,380
ceiling and make that possible that that

2007
01:21:25,129 --> 01:21:22,820
would be a dream come true of as uh for

2008
01:21:26,990 --> 01:21:25,139
speaking for myself as part of the the

2009
01:21:29,930 --> 01:21:27,000
team of uapx

2010
01:21:31,910 --> 01:21:29,940
sounds great Gary any final words

2011
01:21:34,189 --> 01:21:31,920
yes uh

2012
01:21:36,350 --> 01:21:34,199
everybody stays skeptically open-minded

2013
01:21:39,950 --> 01:21:36,360

uh never never always questioned

2014

01:21:42,410 --> 01:21:39,960

everything and never just assume what

2015

01:21:44,450 --> 01:21:42,420

you want to be true is true uh you know

2016

01:21:49,729 --> 01:21:44,460

at uapx we want to build that Foundation

2017

01:21:52,970 --> 01:21:49,739

we want we want to bring this to

2018

01:21:57,410 --> 01:21:52,980

the scientific Community we want to have

2019

01:21:59,629 --> 01:21:57,420

a strong foundations and continue and we

2020

01:22:02,390 --> 01:21:59,639

raise our hands out to anybody serious

2021

01:22:05,390 --> 01:22:02,400

in the field that is an actual serious

2022

01:22:08,330 --> 01:22:05,400

request for anybody in the field that is

2023

01:22:11,390 --> 01:22:08,340

scientifically minded in an

2024

01:22:14,570 --> 01:22:11,400

serious need of any type of help always

2025

01:22:16,189 --> 01:22:14,580

reach out we even you you may it may

2026

01:22:18,590 --> 01:22:16,199

take me about three or four weeks to get

2027

01:22:21,470 --> 01:22:18,600

back to you but that's far for the

2028

01:22:24,649 --> 01:22:21,480

course when it comes to email uh but you

2029

01:22:26,629 --> 01:22:24,659

know we uh I'm really proud of the team

2030

01:22:29,390 --> 01:22:26,639

that we've developed and and where our

2031

01:22:31,330 --> 01:22:29,400

company has gone and you know I pray for

2032

01:22:34,669 --> 01:22:31,340

a billion dollar budget next year so

2033

01:22:39,590 --> 01:22:34,679

that's not gonna happen but I pray for

2034

01:22:42,050 --> 01:22:39,600

it so uh keep looking keep looking up

2035

01:22:44,030 --> 01:22:42,060

yeah that's how I end every show thank

2036

01:22:45,890 --> 01:22:44,040

you all very much it's been a real

2037

01:22:47,990 --> 01:22:45,900

pleasure I really enjoyed talking to you

2038

01:22:49,669 --> 01:22:48,000

tonight especially when I was asking you

2039

01:22:51,290 --> 01:22:49,679

your opinions

2040

01:22:53,149 --> 01:22:51,300

um it was uh it was a lot of fun thanks

2041

01:22:55,090 --> 01:22:53,159

so much and I'll be talking to you all

2042

01:22:57,770 --> 01:22:55,100

soon take care thank you so much Martin

2043

01:23:01,970 --> 01:22:57,780

Take Care thank you thank you for having

2044

01:23:03,709 --> 01:23:01,980

us bye yep you bet bye uh all right

2045

01:23:04,850 --> 01:23:03,719

everyone so wow I don't have any light

2046

01:23:06,770 --> 01:23:04,860

left here

2047

01:23:08,810 --> 01:23:06,780

um but thank you all for hanging in

2048

01:23:10,850 --> 01:23:08,820

there and I'll be back next week as I

2049

01:23:12,890 --> 01:23:10,860

mentioned uh with Randall Nickerson it

2050

01:23:13,850 --> 01:23:12,900

should be a very interesting show next

2051

01:23:15,649 --> 01:23:13,860

week we're going to talk a little bit

2052

01:23:18,290 --> 01:23:15,659

about the movie and I'm going to let him

2053

01:23:20,629 --> 01:23:18,300

rant about what happened with him and

2054

01:23:22,070 --> 01:23:20,639

Netflix it's very unfortunate and then

2055

01:23:24,830 --> 01:23:22,080

we'll talk about other things as well

2056

01:23:27,470 --> 01:23:24,840

it's not going to all be a soapbox for

2057

01:23:29,510 --> 01:23:27,480

him so all right everyone thanks again

2058

01:23:30,590 --> 01:23:29,520

and remember to keep your eyes to the

2059

01:23:31,850 --> 01:23:30,600

sky

2060

01:23:41,160 --> 01:23:31,860

thank you
