**CHRIS
LEHTO**

**MARC
D'ANTONIO**

UNIDENTIFIED SHOOT-DOWNS

1
00:00:02,460 --> 00:00:07,580
foreign

2
00:01:02,229 --> 00:00:25,060
[Music]

3
00:01:07,010 --> 00:01:04,490
welcome to show on Martin willischer

4
00:01:11,570 --> 00:01:07,020
host and I'm wearing my special swamp

5
00:01:13,490 --> 00:01:11,580
gas shirt tonight so I want to thank you

6
00:01:15,710 --> 00:01:13,500
all for tuning in this is a real this is

7
00:01:18,410 --> 00:01:15,720
a special show because of sort of it's

8
00:01:21,289 --> 00:01:18,420
kind of a fluid topic right now and

9
00:01:24,590 --> 00:01:21,299
these shoot downs and what better guests

10
00:01:26,690 --> 00:01:24,600
could I possibly have on than a former

11
00:01:29,510 --> 00:01:26,700
fighter pilot along with an astronomer

12
00:01:31,190 --> 00:01:29,520
Chris Leto and Mark d'antonio they're

13
00:01:36,050 --> 00:01:31,200

coming right up in just a second Happy

14

00:01:39,050 --> 00:01:36,060

Valentine's Day everyone and uh yeah so

15

00:01:41,149 --> 00:01:39,060

this is a this is a balloon gate and I

16

00:01:43,010 --> 00:01:41,159

thought what a perfect thing to say this

17

00:01:44,749 --> 00:01:43,020

is a balloon gate what the heck is going

18

00:01:47,030 --> 00:01:44,759

on we're going to be talking all about

19

00:01:51,649 --> 00:01:47,040

that and I I love this graphic right

20

00:01:55,429 --> 00:01:53,749

I think it's funny I hope you're getting

21

00:01:58,030 --> 00:01:55,439

a good laugh out of it I'll probably put

22

00:02:01,969 --> 00:01:58,040

it in the show notes as well

23

00:02:04,069 --> 00:02:01,979

so uh I want to thank everyone that

24

00:02:09,169 --> 00:02:04,079

supports the show anyone can do that

25

00:02:13,390 --> 00:02:09,179

over at podcast ufo.com and this is uh

26

00:02:15,890 --> 00:02:13,400

the uh blog that was done this week is

27

00:02:17,570 --> 00:02:15,900

is a second in the series I think

28

00:02:21,050 --> 00:02:17,580

there's going to be more and this is

29

00:02:24,050 --> 00:02:21,060

called UFO abductology under attack the

30

00:02:25,910 --> 00:02:24,060

first Sharks fired uh talks all about

31

00:02:29,630 --> 00:02:25,920

um the different people that have got

32

00:02:31,250 --> 00:02:29,640

involved in the the UFO Abduction topic

33

00:02:33,130 --> 00:02:31,260

and again it's the second one in the

34

00:02:36,770 --> 00:02:33,140

series check that out over at podcast

35

00:02:39,650 --> 00:02:36,780

ufo.com without further Ado I'm bringing

36

00:02:42,110 --> 00:02:39,660

in the handsome and well-dressed Chris

37

00:02:43,970 --> 00:02:42,120

lato welcome to the show

38

00:02:45,890 --> 00:02:43,980

hello Martin thanks for being here all

39

00:02:47,690 --> 00:02:45,900

right yeah thanks for inviting me yeah

40

00:02:50,330 --> 00:02:47,700

you bet you're you're used to being the

41

00:02:52,369 --> 00:02:50,340

host that's why you said that so I know

42

00:02:55,130 --> 00:02:52,379

and mark the Antonio Mark thanks so much

43

00:02:57,350 --> 00:02:55,140

for being here hey thanks Martin good to

44

00:02:59,150 --> 00:02:57,360

see you Chris nice to meet you yeah nice

45

00:03:01,610 --> 00:02:59,160

to meet you mark are you doing that

46

00:03:04,369 --> 00:03:01,620

Brady you Brady Bunch type of thing you

47

00:03:06,650 --> 00:03:04,379

you got that down he knows how to the

48

00:03:08,750 --> 00:03:06,660

reason it's hard to do yeah it's because

49

00:03:10,729 --> 00:03:08,760

it's our first opposite everything shows

50

00:03:13,070 --> 00:03:10,739

opposite like yeah once you get that in

51
00:03:15,710 --> 00:03:13,080
your head okay I'm actually pointing to

52
00:03:18,610 --> 00:03:15,720
to the yeah to the middle he's there

53
00:03:22,130 --> 00:03:18,620
he's there yeah yeah

54
00:03:23,930 --> 00:03:22,140
that's right so I think we are uh you

55
00:03:25,790 --> 00:03:23,940
know I mean I I just uh Chris wasn't

56
00:03:27,589 --> 00:03:25,800
aware but you know last week I talked

57
00:03:31,070 --> 00:03:27,599
about it I was lucky enough to be

58
00:03:32,869 --> 00:03:31,080
actually under the balloon and for just

59
00:03:35,509 --> 00:03:32,879
out out of my car for five minutes when

60
00:03:37,130 --> 00:03:35,519
that got shot down and I witnessed the

61
00:03:42,050 --> 00:03:37,140
whole thing which was really exciting

62
00:03:44,570 --> 00:03:42,060
and but uh but more is happening and you

63
00:03:46,430 --> 00:03:44,580

know there's uh I I think the uh you

64

00:03:48,770 --> 00:03:46,440

know a lot of the UFO world out there on

65

00:03:51,350 --> 00:03:48,780

Twitter especially you see there's all

66

00:03:54,289 --> 00:03:51,360

kinds of theories and things going all

67

00:03:56,330 --> 00:03:54,299

over the place so I I would like to have

68

00:03:57,770 --> 00:03:56,340

a nice balanced look at what we think is

69

00:03:59,750 --> 00:03:57,780

going on

70

00:04:02,210 --> 00:03:59,760

I said all along and I've got some

71

00:04:05,390 --> 00:04:02,220

criticisms of it but I don't think it's

72

00:04:08,089 --> 00:04:05,400

alien but I'm going to keep an open mind

73

00:04:12,890 --> 00:04:08,099

I mean the reason I want to say that is

74

00:04:15,170 --> 00:04:12,900

because uh about what is it 97 or 90

75

00:04:18,050 --> 00:04:15,180

some odd percent of everything that

76
00:04:19,849 --> 00:04:18,060
starts out as a UFO is explained and so

77
00:04:21,229 --> 00:04:19,859
I'm thinking it's possible that's the

78
00:04:22,969 --> 00:04:21,239
same going to be the same type of thing

79
00:04:25,969 --> 00:04:22,979
with these things that are shot down but

80
00:04:27,409 --> 00:04:25,979
I have no idea and uh we are here to

81
00:04:29,570 --> 00:04:27,419
talk about it I don't know who wants to

82
00:04:32,270 --> 00:04:29,580
take it first

83
00:04:35,890 --> 00:04:32,280
well I mean I I just because you brought

84
00:04:39,050 --> 00:04:35,900
up how uh 99 of these things are known

85
00:04:41,030 --> 00:04:39,060
uh the thing to understand in the case

86
00:04:43,370 --> 00:04:41,040
of these objects are right

87
00:04:45,530 --> 00:04:43,380
is Let's Take It on the path of what

88
00:04:49,129 --> 00:04:45,540

they could be okay

89

00:04:50,450 --> 00:04:49,139

they could be more spy balloons okay but

90

00:04:52,610 --> 00:04:50,460

we know for a fact that there was at

91

00:04:54,290 --> 00:04:52,620

least one and it was here and it was

92

00:04:56,810 --> 00:04:54,300

shot down off Myrtle Beach you captured

93

00:04:58,070 --> 00:04:56,820

it uh which was a great capture by the

94

00:05:00,350 --> 00:04:58,080

way and thank you for sending that to me

95

00:05:03,110 --> 00:05:00,360

because I really enjoyed seeing that

96

00:05:04,189 --> 00:05:03,120

um and there it is yeah and uh the

97

00:05:07,850 --> 00:05:04,199

second thing they could be if they're

98

00:05:10,850 --> 00:05:07,860

not another spy balloon is they could be

99

00:05:12,409 --> 00:05:10,860

an actual weather balloon now a couple

100

00:05:14,870 --> 00:05:12,419

things make me think that's possible

101

00:05:16,610 --> 00:05:14,880

first of all when you look at these

102

00:05:19,070 --> 00:05:16,620

normal weather balloons when they're

103

00:05:20,930 --> 00:05:19,080

launched they when they launched the the

104

00:05:24,170 --> 00:05:20,940

latex ones of the ones that typically

105

00:05:26,330 --> 00:05:24,180

are lost or probably around uh five to

106

00:05:28,070 --> 00:05:26,340

six feet in diameter at the ground but

107

00:05:30,230 --> 00:05:28,080

by the time they get into the air and

108

00:05:32,330 --> 00:05:30,240

they expand in the upper atmosphere

109

00:05:36,950 --> 00:05:32,340

they could be the size of a car

110

00:05:39,350 --> 00:05:36,960

right and so that is interesting because

111

00:05:41,870 --> 00:05:39,360

that's exactly the size they said this

112

00:05:45,409 --> 00:05:41,880

other one was it was the size of a car

113

00:05:47,450 --> 00:05:45,419

well that made me think was that a maybe

114

00:05:49,790 --> 00:05:47,460

a mistaken weather balloon

115

00:05:51,650 --> 00:05:49,800

you know because and and and Crystal

116

00:05:54,409 --> 00:05:51,660

probably even say you know when you're

117

00:05:56,210 --> 00:05:54,419

approaching something at a at the

118

00:05:57,529 --> 00:05:56,220

hundreds of miles an hour you're

119

00:05:59,689 --> 00:05:57,539

effectively approaching something that's

120

00:06:02,029 --> 00:05:59,699

not moving if it's a balloon and so if

121

00:06:03,409 --> 00:06:02,039

you're approaching it you have split

122

00:06:06,770 --> 00:06:03,419

seconds to figure out what you're

123

00:06:08,510 --> 00:06:06,780

actually looking at so I imagine that

124

00:06:09,890 --> 00:06:08,520

that makes the identification very very

125

00:06:11,150 --> 00:06:09,900

difficult you don't have time to say oh

126

00:06:13,610 --> 00:06:11,160

it looks like it has a payload they

127

00:06:15,590 --> 00:06:13,620

think I saw an iPhone you know you don't

128

00:06:18,770 --> 00:06:15,600

have time for that I don't think yeah

129

00:06:21,650 --> 00:06:18,780

you know what do you think Chris

130

00:06:23,749 --> 00:06:21,660

yeah I I tend to agree with Mark

131

00:06:26,270 --> 00:06:23,759

especially after this last

132

00:06:27,950 --> 00:06:26,280

uh the Lake Huron sighting he basically

133

00:06:30,110 --> 00:06:27,960

says you know the guy says it's it's

134

00:06:32,510 --> 00:06:30,120

difficult to see it's about the size of

135

00:06:35,450 --> 00:06:32,520

a four-wheeler and if you let me share

136

00:06:37,309 --> 00:06:35,460

my my screen here Martin Knight balloon

137

00:06:39,350 --> 00:06:37,319

that we launched yep just since Mark

138

00:06:41,090 --> 00:06:39,360

Mark mentioned the

139

00:06:42,770 --> 00:06:41,100
the weather balloon so this is the

140

00:06:46,309 --> 00:06:42,780
weather balloon that we basically

141

00:06:49,070 --> 00:06:46,319
launched uh last June this was we

142

00:06:50,930 --> 00:06:49,080
launched two one from Vernal

143

00:06:53,629 --> 00:06:50,940
um from Vernal Utah to launch the UAP

144

00:06:57,409 --> 00:06:53,639
society and one from Germany to launch

145

00:06:59,029 --> 00:06:57,419
the sky 360. and that's uh what your I

146

00:07:01,909 --> 00:06:59,039
think what what Mark's talking about is

147

00:07:03,830 --> 00:07:01,919
this is at the ground level

148

00:07:06,110 --> 00:07:03,840
um and so that's about how big it is and

149

00:07:08,930 --> 00:07:06,120
this will expand to actually 36 feet

150

00:07:12,529 --> 00:07:08,940
across so 12 meters across up at 110 000

151
00:07:15,830 --> 00:07:12,539
feet and then it will uh break and the

152
00:07:17,570 --> 00:07:15,840
the wire the lines actually you know

153
00:07:19,550 --> 00:07:17,580
there was I believe four lines coming

154
00:07:22,969 --> 00:07:19,560
down to our payload

155
00:07:28,790 --> 00:07:22,979
and so you had the payload below it

156
00:07:32,629 --> 00:07:30,770
so is there there is a payload on that

157
00:07:34,490 --> 00:07:32,639
of something yeah you'll see it right

158
00:07:36,589 --> 00:07:34,500
here so first there's a parachute so

159
00:07:39,710 --> 00:07:36,599
this is the parachute right yeah this

160
00:07:41,510 --> 00:07:39,720
goes up to 110 000 feet blows up it gets

161
00:07:44,270 --> 00:07:41,520
to the size you know 40 feet across is

162
00:07:45,950 --> 00:07:44,280
pretty big This is Your Parachute and

163
00:07:49,370 --> 00:07:45,960

then we have a payload here I think it

164

00:07:50,629 --> 00:07:49,380

could be up to uh uh three kilograms I

165

00:07:52,850 --> 00:07:50,639

believe

166

00:07:54,950 --> 00:07:52,860

the most expensive part was the helium

167

00:07:58,189 --> 00:07:54,960

so the helium it was kind of we were

168

00:07:59,990 --> 00:07:58,199

kind of in a restricted helium time

169

00:08:00,529 --> 00:08:00,000

and that was about

170

00:08:05,390 --> 00:08:00,539

um

171

00:08:08,749 --> 00:08:05,400

and then the payload actually I have the

172

00:08:09,589 --> 00:08:08,759

payload over here I can go grab it uh in

173

00:08:12,230 --> 00:08:09,599

a second

174

00:08:14,990 --> 00:08:12,240

yeah if you close it I'll go grab it

175

00:08:19,790 --> 00:08:17,029

I've seen you know they have these uh

176

00:08:21,890 --> 00:08:19,800

kits online that you can buy to send uh

177

00:08:23,390 --> 00:08:21,900

that was the you know besides a spy

178

00:08:26,869 --> 00:08:23,400

balloon and an actual weather balloon

179

00:08:30,469 --> 00:08:26,879

you have these which are uh civilian

180

00:08:32,389 --> 00:08:30,479

launched uh uh balloons to space and you

181

00:08:35,029 --> 00:08:32,399

can buy the kit and I think that's

182

00:08:37,310 --> 00:08:35,039

probably what you did right yeah so we

183

00:08:39,829 --> 00:08:37,320

we because they have it you can build it

184

00:08:41,630 --> 00:08:39,839

all yourself right but this uh this came

185

00:08:43,490 --> 00:08:41,640

in a special kit just makes it so easy

186

00:08:45,889 --> 00:08:43,500

and we planned this whole thing in in

187

00:08:48,050 --> 00:08:45,899

about a month really Alexei novitsky did

188

00:08:50,810 --> 00:08:48,060

did all the work basically

189

00:08:53,930 --> 00:08:50,820

um so this is your the payload you know

190

00:08:56,090 --> 00:08:53,940

it basically comes in uh

191

00:08:57,710 --> 00:08:56,100

you have all your cameras in here so

192

00:09:00,530 --> 00:08:57,720

everything kind of set up

193

00:09:03,350 --> 00:09:00,540

so we had an iPhone going down we wanted

194

00:09:05,389 --> 00:09:03,360

to live stream it and then we had uh uh

195

00:09:08,150 --> 00:09:05,399

also our sensors

196

00:09:10,430 --> 00:09:08,160

um there was a megahertz gigahertz

197

00:09:11,990 --> 00:09:10,440

detector in there as well

198

00:09:13,370 --> 00:09:12,000

um so yeah this is this is a payload

199

00:09:15,829 --> 00:09:13,380

which is normally going to hang down by

200

00:09:16,790 --> 00:09:15,839

these lines right and so you'll see

201
00:09:21,050 --> 00:09:16,800
these

202
00:09:23,090 --> 00:09:21,060
and so I don't know that could have been

203
00:09:25,310 --> 00:09:23,100
at least this is uh what we had as our

204
00:09:27,889 --> 00:09:25,320
weather balloon that we sent up

205
00:09:30,889 --> 00:09:27,899
well let me ask you this uh this is uh

206
00:09:34,550 --> 00:09:30,899
directed at either one of you as

207
00:09:36,949 --> 00:09:34,560
um it it seems to me that they were

208
00:09:37,970 --> 00:09:36,959
talking about that these

209
00:09:40,730 --> 00:09:37,980
um

210
00:09:43,790 --> 00:09:40,740
though at least a couple of objects they

211
00:09:46,730 --> 00:09:43,800
saw well one was a cylinder shape and

212
00:09:48,889 --> 00:09:46,740
one was octagonal and so but they're not

213
00:09:50,870 --> 00:09:48,899

talking about balloons and I'm not

214

00:09:54,170 --> 00:09:50,880

saying it was like a structured object

215

00:09:57,590 --> 00:09:54,180

but it makes me wonder you know

216

00:09:59,750 --> 00:09:57,600

um they said no no source of uh

217

00:10:01,790 --> 00:09:59,760

uh they didn't understand why it was

218

00:10:03,769 --> 00:10:01,800

floating or something I thought I heard

219

00:10:05,210 --> 00:10:03,779

something like that am I uh or read

220

00:10:08,210 --> 00:10:05,220

something like that am I getting that

221

00:10:10,790 --> 00:10:08,220

part wrong no I I heard you I heard that

222

00:10:12,769 --> 00:10:10,800

I read that part of the story and uh or

223

00:10:14,150 --> 00:10:12,779

a story and it said uh yeah they

224

00:10:16,550 --> 00:10:14,160

couldn't understand why it was floating

225

00:10:17,990 --> 00:10:16,560

and the next thought in my head was

226

00:10:19,670 --> 00:10:18,000

helium

227

00:10:21,949 --> 00:10:19,680

okay because I thought it might have

228

00:10:24,250 --> 00:10:21,959

been a balloon okay because you know

229

00:10:26,509 --> 00:10:24,260

Occam's razor right I mean

230

00:10:28,670 --> 00:10:26,519

sometimes the simplest explanation is

231

00:10:32,150 --> 00:10:28,680

the correct one and we want to exhaust

232

00:10:34,850 --> 00:10:32,160

all of those expectations expected

233

00:10:37,009 --> 00:10:34,860

results before we wander down the true

234

00:10:39,170 --> 00:10:37,019

unknown path right so you put these

235

00:10:40,790 --> 00:10:39,180

things through a real rigorous analysis

236

00:10:42,949 --> 00:10:40,800

and then what comes out of that funnel

237

00:10:45,170 --> 00:10:42,959

of analysis at the bottom if it falls

238

00:10:46,790 --> 00:10:45,180

into your hand that's a true unknown see

239

00:10:48,769 --> 00:10:46,800

there it is right there you can and you

240

00:10:51,769 --> 00:10:48,779

can't do anything with it okay maybe you

241

00:10:53,389 --> 00:10:51,779

may not understand it okay because our

242

00:10:55,610 --> 00:10:53,399

science may not be able to penetrate if

243

00:10:57,050 --> 00:10:55,620

it's a true unknown at this point but at

244

00:11:01,069 --> 00:10:57,060

least we'll know it's a true unknown and

245

00:11:03,230 --> 00:11:01,079

I know I know for a fact that our armed

246

00:11:05,630 --> 00:11:03,240

services see these things I mean you

247

00:11:07,430 --> 00:11:05,640

remember my story okay and then it's not

248

00:11:09,110 --> 00:11:07,440

just my story it's the story of many

249

00:11:11,630 --> 00:11:09,120

other people who were in the submarine

250

00:11:15,410 --> 00:11:11,640

Force I wasn't I was a privileged guest

251
00:11:17,150 --> 00:11:15,420
and we actually saw they saw a very fast

252
00:11:19,670 --> 00:11:17,160
moving object underwater that was moving

253
00:11:22,730 --> 00:11:19,680
several hundred knots okay

254
00:11:24,769 --> 00:11:22,740
was that a machine anomaly well you

255
00:11:26,630 --> 00:11:24,779
might say that maybe but it did leave a

256
00:11:28,550 --> 00:11:26,640
trace on the on the sonar they were able

257
00:11:31,009 --> 00:11:28,560
to deduce its bearing in range they were

258
00:11:32,870 --> 00:11:31,019
able to give it a a speed and then when

259
00:11:35,690 --> 00:11:32,880
I did a job for the Joint Chiefs four

260
00:11:37,190 --> 00:11:35,700
years later I asked one of the Chiefs

261
00:11:38,509 --> 00:11:37,200
what can you tell me about this fast

262
00:11:41,210 --> 00:11:38,519
mover program

263
00:11:43,310 --> 00:11:41,220

and I kind of was hesitant you know the

264

00:11:46,250 --> 00:11:43,320

story and then he said I can't talk

265

00:11:47,750 --> 00:11:46,260

about that program I'm sorry Mark huh I

266

00:11:49,250 --> 00:11:47,760

was in DC when I was asking this

267

00:11:52,610 --> 00:11:49,260

question I was driving home like this

268

00:11:54,710 --> 00:11:52,620

holy cow it's real holy cow it's real he

269

00:11:56,690 --> 00:11:54,720

didn't say it didn't exist that's right

270

00:11:58,550 --> 00:11:56,700

and see but see that's the thing right

271

00:12:01,850 --> 00:11:58,560

and you know guys like Chris you know

272

00:12:04,490 --> 00:12:01,860

they they fly fighter jets and I think

273

00:12:07,730 --> 00:12:04,500

that his job is to keep himself safe and

274

00:12:09,410 --> 00:12:07,740

bring the hardware back and to do the

275

00:12:11,210 --> 00:12:09,420

mission carry on the mission right and

276

00:12:12,769 --> 00:12:11,220

so he's going to do that to the best of

277

00:12:16,250 --> 00:12:12,779

his ability obviously he did a good job

278

00:12:19,190 --> 00:12:16,260

there he is okay that's right and so I

279

00:12:21,769 --> 00:12:19,200

think that that being the case

280

00:12:24,650 --> 00:12:21,779

um you know we can defer to what they

281

00:12:25,730 --> 00:12:24,660

see in the cockpit over something that I

282

00:12:28,370 --> 00:12:25,740

think

283

00:12:30,470 --> 00:12:28,380

all right so when we talk about the

284

00:12:32,449 --> 00:12:30,480

Nimitz incident right they say well you

285

00:12:34,130 --> 00:12:32,459

know favor talks about these particular

286

00:12:36,650 --> 00:12:34,140

Tic-Tac shapes in the way that what they

287

00:12:38,750 --> 00:12:36,660

were doing okay I analyzed all the

288

00:12:39,889 --> 00:12:38,760

videos that were released so far they

289

00:12:43,310 --> 00:12:39,899

were released

290

00:12:44,930 --> 00:12:43,320

none of those videos uh are definitive

291

00:12:46,850 --> 00:12:44,940

you can't look at any one of those and

292

00:12:49,670 --> 00:12:46,860

say aha Smoking Gun

293

00:12:52,670 --> 00:12:49,680

right they all have problems and they

294

00:12:55,509 --> 00:12:52,680

all could be other objects all of them

295

00:12:59,690 --> 00:12:55,519

so far I analyzed the three that's it

296

00:13:02,569 --> 00:12:59,700

but there's some others from uh you know

297

00:13:04,210 --> 00:13:02,579

a ranch that had some interesting uh you

298

00:13:06,769 --> 00:13:04,220

know characteristics and stuff like that

299

00:13:09,410 --> 00:13:06,779

and it's very tempting to say they're

300

00:13:11,930 --> 00:13:09,420

just balloons I get it all right but the

301
00:13:13,670 --> 00:13:11,940
fact is you have to be open-minded I am

302
00:13:15,170 --> 00:13:13,680
and as you know open-minded enough to

303
00:13:18,230 --> 00:13:15,180
know that maybe they're not all balloons

304
00:13:20,569 --> 00:13:18,240
this octagonal shape one

305
00:13:23,030 --> 00:13:20,579
the octagonal shape was that something

306
00:13:24,590 --> 00:13:23,040
that the the pilot said as he was

307
00:13:25,850 --> 00:13:24,600
zooming by at several hundred miles an

308
00:13:27,949 --> 00:13:25,860
hour

309
00:13:29,569 --> 00:13:27,959
um or you know and the cylindrical shape

310
00:13:32,870 --> 00:13:29,579
again same thing

311
00:13:35,750 --> 00:13:32,880
so how what's the quality of that

312
00:13:37,670 --> 00:13:35,760
observation right we'd like to know and

313
00:13:39,949 --> 00:13:37,680

was it film Chris do you think it would

314

00:13:41,990 --> 00:13:39,959

be filmed something like that

315

00:13:44,030 --> 00:13:42,000

yeah well I just did a live stream of

316

00:13:47,629 --> 00:13:44,040

the Lake Huron audio

317

00:13:49,310 --> 00:13:47,639

oh yes I can play a minute of it and he

318

00:13:50,509 --> 00:13:49,320

describes it actually this most recent

319

00:13:52,250 --> 00:13:50,519

one

320

00:13:54,829 --> 00:13:52,260

um yeah go ahead can you play that yeah

321

00:13:56,930 --> 00:13:54,839

let me bring it up quickly and uh I

322

00:13:58,970 --> 00:13:56,940

think I wrote down when he

323

00:14:01,250 --> 00:13:58,980

when he describes it

324

00:14:03,410 --> 00:14:01,260

don't they have to have I mean it's the

325

00:14:06,889 --> 00:14:03,420

videos being captured if they're gonna

326

00:14:11,389 --> 00:14:09,230

yeah on all of all of our missions we

327

00:14:13,370 --> 00:14:11,399

turn on the tapes

328

00:14:15,290 --> 00:14:13,380

yep so they they should it's all

329

00:14:18,410 --> 00:14:15,300

recorded and they say in here that they

330

00:14:21,170 --> 00:14:18,420

lock it up with the Turning pod and uh

331

00:14:23,690 --> 00:14:21,180

the the missile has a good track on it

332

00:14:25,190 --> 00:14:23,700

so the missile's tracking it he just

333

00:14:26,930 --> 00:14:25,200

can't tell what it is with his eyes

334

00:14:29,210 --> 00:14:26,940

because they have to fly by it so fast

335

00:14:32,930 --> 00:14:29,220

Chris I just saw you shut off the audio

336

00:14:35,030 --> 00:14:32,940

on the on the film itself oh sorry did

337

00:14:39,250 --> 00:14:35,040

it shut off I thought I turned it okay

338

00:14:43,310 --> 00:14:41,210

so close

339

00:14:44,810 --> 00:14:43,320

did you hear that he says it's so small

340

00:14:47,210 --> 00:14:44,820

and and

341

00:14:51,350 --> 00:14:47,220

um going so slow you can't see it until

342

00:14:59,389 --> 00:14:52,910

I'd be more worried about hitting it

343

00:15:05,090 --> 00:15:01,600

uh

344

00:15:05,100 --> 00:15:14,030

[Music]

345

00:15:19,850 --> 00:15:16,610

so I don't I I couldn't tell if he says

346

00:15:21,170 --> 00:15:19,860

octagon shape there that maybe where he

347

00:15:24,650 --> 00:15:21,180

said it just before he said he said

348

00:15:25,850 --> 00:15:24,660

octagonal okay uh before that and he

349

00:15:26,689 --> 00:15:25,860

says he was looking for Strings he

350

00:15:28,670 --> 00:15:26,699

couldn't really tell if there were

351
00:15:29,930 --> 00:15:28,680
strings and by four wheeler does he mean

352
00:15:33,590 --> 00:15:29,940
an ATV

353
00:15:35,990 --> 00:15:33,600
yeah okay so not like a four one or a

354
00:15:37,670 --> 00:15:36,000
four wheel drive car but an ATV yeah

355
00:15:39,829 --> 00:15:37,680
that's what I understood it as a

356
00:15:41,090 --> 00:15:39,839
four-wheeler okay that's what I

357
00:15:45,050 --> 00:15:41,100
understood and then I think it's just

358
00:15:45,060 --> 00:15:57,350
but yeah do you know

359
00:16:02,810 --> 00:16:00,470
so it basically says um I'm able to pick

360
00:16:05,269 --> 00:16:02,820
it up about a mile away and then you

361
00:16:07,670 --> 00:16:05,279
know 15 seconds later he's passing it so

362
00:16:09,050 --> 00:16:07,680
basically you'd have to and it's very

363
00:16:11,449 --> 00:16:09,060

difficult to see so it sounds like it's

364

00:16:12,949 --> 00:16:11,459

really small so they can get they can

365

00:16:14,509 --> 00:16:12,959

see it with the targeting pod and it

366

00:16:16,810 --> 00:16:14,519

sounds like it's shaped like a container

367

00:16:19,610 --> 00:16:16,820

is what he says shaped like a container

368

00:16:22,930 --> 00:16:19,620

with strings hanging down but looks like

369

00:16:25,069 --> 00:16:22,940

nothing is attached to those strings

370

00:16:26,930 --> 00:16:25,079

this one this one particularly because

371

00:16:28,850 --> 00:16:26,940

it's going with the wind you know the

372

00:16:30,650 --> 00:16:28,860

trekking with the wind it's small it

373

00:16:32,030 --> 00:16:30,660

sounds like it's a balloon you know the

374

00:16:36,110 --> 00:16:32,040

other ones are more interesting the one

375

00:16:37,610 --> 00:16:36,120

the one over uh dead horse oh yeah yep I

376

00:16:39,110 --> 00:16:37,620

can uh

377

00:16:40,550 --> 00:16:39,120

well that one that has the strings

378

00:16:43,670 --> 00:16:40,560

hanging down it's almost like it lost

379

00:16:45,470 --> 00:16:43,680

the payload yeah exactly like it lost a

380

00:16:48,590 --> 00:16:45,480

payload that's that's what I was saying

381

00:16:49,790 --> 00:16:48,600

is you know if these could it be these

382

00:16:53,090 --> 00:16:49,800

strings

383

00:16:54,170 --> 00:16:53,100

exactly hang on a second oh yeah okay I

384

00:16:56,030 --> 00:16:54,180

don't know

385

00:16:58,269 --> 00:16:56,040

um and they're mad at how many hundreds

386

00:17:01,249 --> 00:16:58,279

of dollars of healing they lost

387

00:17:03,290 --> 00:17:01,259

yeah this was the cylinder one that's

388

00:17:05,630 --> 00:17:03,300

shaped like a cylinder F22 shot down

389

00:17:07,309 --> 00:17:05,640

over the ice so somewhere on the sea ice

390

00:17:08,689 --> 00:17:07,319

they're out there

391

00:17:11,049 --> 00:17:08,699

um looking that around

392

00:17:14,390 --> 00:17:11,059

and then

393

00:17:16,429 --> 00:17:14,400

the final one basically they launched

394

00:17:19,250 --> 00:17:16,439

out of Elmendorf so this was shot down

395

00:17:22,730 --> 00:17:19,260

f-35s initially went and investigated it

396

00:17:24,350 --> 00:17:22,740

in the first F-35 or one of the F-35 set

397

00:17:26,329 --> 00:17:24,360

is sensors it was kind of messing with

398

00:17:28,069 --> 00:17:26,339

the sensors and they said this was

399

00:17:29,210 --> 00:17:28,079

shaped like a cylinder so that one's

400

00:17:31,850 --> 00:17:29,220

pretty cool with me and that was at

401
00:17:34,549 --> 00:17:31,860
forty thousand feet but

402
00:17:37,490 --> 00:17:34,559
um and then the next uh I guess the next

403
00:17:39,169 --> 00:17:37,500
day so later on Saturday

404
00:17:41,270 --> 00:17:39,179
um they launched out of Elmendorf here

405
00:17:43,490 --> 00:17:41,280
and this is where they flew into Canada

406
00:17:45,289 --> 00:17:43,500
into the Yukon

407
00:17:47,510 --> 00:17:45,299
and so somewhere over here in the middle

408
00:17:49,490 --> 00:17:47,520
of Yukon is where they shot down

409
00:17:51,250 --> 00:17:49,500
um and I've heard no information on this

410
00:17:53,930 --> 00:17:51,260
one I don't know anything on this one

411
00:17:55,610 --> 00:17:53,940
altitudes or what it looked like or

412
00:17:57,230 --> 00:17:55,620
anything but I know that the special

413
00:17:58,789 --> 00:17:57,240

forces are going there the Canadian

414

00:18:01,250 --> 00:17:58,799

Special Forces

415

00:18:03,529 --> 00:18:01,260

well there's debris for sure so

416

00:18:06,350 --> 00:18:03,539

and this was a that was a joint one

417

00:18:07,850 --> 00:18:06,360

right it wasn't that uh Canada asked the

418

00:18:09,409 --> 00:18:07,860

U.S to shoot it down or something like

419

00:18:11,750 --> 00:18:09,419

that Norad

420

00:18:15,409 --> 00:18:11,760

um was involved

421

00:18:18,710 --> 00:18:15,419

um I believe and yeah they they that's

422

00:18:20,810 --> 00:18:18,720

right uh they did ask the US to shoot it

423

00:18:22,190 --> 00:18:20,820

down and Chris uh before the show

424

00:18:23,390 --> 00:18:22,200

started I believe before the show

425

00:18:26,930 --> 00:18:23,400

started I don't think it was during the

426
00:18:28,310 --> 00:18:26,940
show you said that the uh The Sidewinder

427
00:18:30,409 --> 00:18:28,320
was probably unarmed when it hit the

428
00:18:32,570 --> 00:18:30,419
balloon and just used Like a Torpedo

429
00:18:35,630 --> 00:18:32,580
type of situation not a torpedo but a

430
00:18:38,270 --> 00:18:35,640
harpoon Harpoon type of situation and

431
00:18:40,310 --> 00:18:38,280
what do you think of the other two or

432
00:18:42,230 --> 00:18:40,320
three the other three shoot sounds were

433
00:18:44,450 --> 00:18:42,240
do you think they were actually using

434
00:18:46,909 --> 00:18:44,460
Weaponry that uh

435
00:18:48,770 --> 00:18:46,919
the uh you know where they've blown out

436
00:18:51,409 --> 00:18:48,780
of the sky basically do you have any I

437
00:18:53,650 --> 00:18:51,419
does anyone have any idea I mean how

438
00:18:56,570 --> 00:18:53,660

much of this I don't I don't know I was

439

00:18:58,669 --> 00:18:56,580

it makes sense that they took out the

440

00:19:01,730 --> 00:18:58,679

Warhead on the first one you know the

441

00:19:04,490 --> 00:19:01,740

the shoot down over uh Myrtle Beach yeah

442

00:19:05,990 --> 00:19:04,500

they wanted that technology and they but

443

00:19:07,850 --> 00:19:06,000

the thing is they had a lot of time you

444

00:19:09,470 --> 00:19:07,860

know they really had three four days to

445

00:19:11,029 --> 00:19:09,480

figure out what they're gonna do and

446

00:19:14,029 --> 00:19:11,039

they decided look

447

00:19:16,370 --> 00:19:14,039

you know this thing's up you know 70 000

448

00:19:18,890 --> 00:19:16,380

feet it's not going to get any real data

449

00:19:20,630 --> 00:19:18,900

on us and we'll just shoot it down when

450

00:19:23,390 --> 00:19:20,640

it's over the water

451
00:19:25,730 --> 00:19:23,400
um you know so there was no real I guess

452
00:19:28,070 --> 00:19:25,740
hurry in that case they had they had

453
00:19:30,110 --> 00:19:28,080
time to take out Warheads out of the

454
00:19:32,210 --> 00:19:30,120
missile you know I think normally but

455
00:19:33,289 --> 00:19:32,220
these guys the F-22 is I think the

456
00:19:34,490 --> 00:19:33,299
reason they're shooting is they're

457
00:19:36,529 --> 00:19:34,500
probably the ones with all the life

458
00:19:39,529 --> 00:19:36,539
weapons you know having live weapons is

459
00:19:41,810 --> 00:19:39,539
is not a normal thing those are very you

460
00:19:43,850 --> 00:19:41,820
know explosive dangerous weapons

461
00:19:45,710 --> 00:19:43,860
normally we have training weapons so I

462
00:19:47,750 --> 00:19:45,720
think the f-22s they're probably just on

463
00:19:50,210 --> 00:19:47,760

alert to defend the you know that

464

00:19:52,190 --> 00:19:50,220

Western uh Alaska airspace the aid is

465

00:19:55,070 --> 00:19:52,200

and so they probably just happen to have

466

00:19:56,810 --> 00:19:55,080

the the live weapons you know most

467

00:19:57,830 --> 00:19:56,820

likely the f-18s that showed up just

468

00:20:00,650 --> 00:19:57,840

didn't have

469

00:20:02,090 --> 00:20:00,660

you know live missiles on them so I

470

00:20:03,770 --> 00:20:02,100

would if I had to guess I'd say they're

471

00:20:06,049 --> 00:20:03,780

probably live because these other three

472

00:20:07,490 --> 00:20:06,059

shoot Downs I don't I doubt they would

473

00:20:08,870 --> 00:20:07,500

have well I don't know they could

474

00:20:10,490 --> 00:20:08,880

probably make it happen I don't know how

475

00:20:12,529 --> 00:20:10,500

hard that is but I don't know if they

476

00:20:15,890 --> 00:20:12,539

have the time to really uh take out the

477

00:20:18,650 --> 00:20:15,900

WarHeads well when was an F-16 right

478

00:20:21,110 --> 00:20:18,660

yeah there was a Duluth F-16

479

00:20:23,110 --> 00:20:21,120

um these were f-22s and f-35s I think I

480

00:20:26,690 --> 00:20:23,120

flew at eielson Air Force Base actually

481

00:20:29,570 --> 00:20:26,700

uh for four years it was awesome it's a

482

00:20:30,830 --> 00:20:29,580

you know two mile long runway for the uh

483

00:20:32,450 --> 00:20:30,840

shuttle

484

00:20:34,669 --> 00:20:32,460

but there's nothing here you know Ice

485

00:20:37,150 --> 00:20:34,679

Road Truckers have you ever watched that

486

00:20:40,310 --> 00:20:37,160

show yeah oh yeah that's this road

487

00:20:44,330 --> 00:20:40,320

that's this road ice road goes up

488

00:20:46,850 --> 00:20:44,340

through uh this range

489

00:20:48,470 --> 00:20:46,860

and then uh up to prudo Bay so that's

490

00:20:50,510 --> 00:20:48,480

really where they they shut it down

491

00:20:53,090 --> 00:20:50,520

essentially was up by on that right off

492

00:20:56,270 --> 00:20:53,100

the Ice Road Truckers uh Road

493

00:20:56,990 --> 00:20:56,280

I've had some crazy uh crazy trips up

494

00:20:59,870 --> 00:20:57,000

there

495

00:21:02,270 --> 00:20:59,880

yes I should say to the person listening

496

00:21:03,650 --> 00:21:02,280

to the audio of this if you want all

497

00:21:05,510 --> 00:21:03,660

these visuals you're probably going to

498

00:21:07,549 --> 00:21:05,520

have to go over to the show notes and

499

00:21:09,470 --> 00:21:07,559

actually if you watch the video of this

500

00:21:11,029 --> 00:21:09,480

part at least part of the show you'll

501
00:21:15,529 --> 00:21:11,039
understand more what we're talking about

502
00:21:17,529 --> 00:21:15,539
a lot of this is graphic but um so so

503
00:21:20,630 --> 00:21:17,539
this the thing

504
00:21:23,029 --> 00:21:20,640
as far as we know Chris

505
00:21:24,890 --> 00:21:23,039
um is this the first thing this is the

506
00:21:26,690 --> 00:21:24,900
first thing the balloon last Saturday on

507
00:21:29,630 --> 00:21:26,700
the fourth was the first thing that was

508
00:21:30,710 --> 00:21:29,640
shot out of the sky over U.S right

509
00:21:32,510 --> 00:21:30,720
yes

510
00:21:36,110 --> 00:21:32,520
so in many years

511
00:21:38,390 --> 00:21:36,120
and and like 65 years or something

512
00:21:40,070 --> 00:21:38,400
I I just learned that today to be honest

513
00:21:41,029 --> 00:21:40,080

I didn't know that it's a very

514

00:21:43,789 --> 00:21:41,039

interesting

515

00:21:46,490 --> 00:21:43,799

yeah I mean I don't know what else uh

516

00:21:49,909 --> 00:21:46,500

what else there was shot out of the sky

517

00:21:51,770 --> 00:21:49,919

really over you the US itself well

518

00:21:53,690 --> 00:21:51,780

remember okay

519

00:21:56,090 --> 00:21:53,700

um it's controversial but there was the

520

00:21:58,490 --> 00:21:56,100

Battle of Los Angeles remember yeah that

521

00:22:08,230 --> 00:21:58,500

was uh that was before Roswell though

522

00:22:13,010 --> 00:22:11,149

yeah yeah the the world's foremost

523

00:22:15,529 --> 00:22:13,020

expert on that of course is David Marler

524

00:22:18,289 --> 00:22:15,539

that's right in Albuquerque so yep uh

525

00:22:19,310 --> 00:22:18,299

David's uh David would be uh all up on

526

00:22:23,630 --> 00:22:19,320

that so he could tell you everything

527

00:22:25,250 --> 00:22:23,640

yeah that was 1942. okay yeah well I

528

00:22:27,230 --> 00:22:25,260

mean we do shoot missiles all the time

529

00:22:29,149 --> 00:22:27,240

to be honest

530

00:22:30,529 --> 00:22:29,159

um usually over the water they have

531

00:22:32,149 --> 00:22:30,539

tests

532

00:22:34,850 --> 00:22:32,159

you know test there's probably test

533

00:22:37,130 --> 00:22:34,860

sites over there but whiskey 122 may be

534

00:22:38,930 --> 00:22:37,140

where they actually employ weapons

535

00:22:41,149 --> 00:22:38,940

you know maybe they're like hey it'll go

536

00:22:42,230 --> 00:22:41,159

right into this area why don't we just

537

00:22:45,049 --> 00:22:42,240

meet it there

538

00:22:48,049 --> 00:22:45,059

so I I mean we shoot a lot of weapons

539

00:22:49,970 --> 00:22:48,059

um just for training for practice you

540

00:22:52,130 --> 00:22:49,980

actually have to use the missiles I just

541

00:22:55,430 --> 00:22:52,140

found this out if you talk to my buddies

542

00:22:57,529 --> 00:22:55,440

Acosta analyst and actually you have to

543

00:23:00,230 --> 00:22:57,539

pay we pay millions of dollars to

544

00:23:02,570 --> 00:23:00,240

destroy old missiles you know 20 after

545

00:23:05,450 --> 00:23:02,580

20 years whatever the contract is yeah

546

00:23:07,850 --> 00:23:05,460

so I believe that one of the things I'd

547

00:23:10,490 --> 00:23:07,860

like to do while we're all doing this

548

00:23:13,130 --> 00:23:10,500

show is I would really like to answer a

549

00:23:14,210 --> 00:23:13,140

lot of people have questions and I'm

550

00:23:15,590 --> 00:23:14,220

going to say the people that are

551
00:23:18,350 --> 00:23:15,600
watching now there's quite a few people

552
00:23:20,690 --> 00:23:18,360
on board and if you uh have a question

553
00:23:23,450 --> 00:23:20,700
please go into chat and please use all

554
00:23:24,890 --> 00:23:23,460
caps so I can see your questions but I

555
00:23:27,110 --> 00:23:24,900
think there are

556
00:23:29,270 --> 00:23:27,120
so many people out there we want to know

557
00:23:31,010 --> 00:23:29,280
what the heck's going on and I'm just

558
00:23:33,110 --> 00:23:31,020
like I said this is a very fluid thing

559
00:23:34,669 --> 00:23:33,120
this show maybe tonight we may be

560
00:23:36,649 --> 00:23:34,679
talking about this tomorrow we may know

561
00:23:40,310 --> 00:23:36,659
everything you know that's very possible

562
00:23:43,490 --> 00:23:40,320
that could happen so but it's uh

563
00:23:46,909 --> 00:23:43,500

as far as what we really know is not a

564

00:23:48,529 --> 00:23:46,919

whole lot and I'm wondering uh I guess

565

00:23:51,110 --> 00:23:48,539

I'll ask you Chris because you've been

566

00:23:51,830 --> 00:23:51,120

involved in this type of thing

567

00:23:54,049 --> 00:23:51,840

um

568

00:23:55,730 --> 00:23:54,059

do you think that we'll know or do you

569

00:23:58,070 --> 00:23:55,740

think this is a matter of uh National

570

00:24:01,850 --> 00:23:58,080

Security and and it'll be uh I don't

571

00:24:09,470 --> 00:24:05,270

uh so in my my uh video I released just

572

00:24:10,970 --> 00:24:09,480

uh last hour I basically say that um I

573

00:24:13,310 --> 00:24:10,980

don't think any government or military

574

00:24:16,730 --> 00:24:13,320

will give up actual

575

00:24:19,010 --> 00:24:16,740

100 knowledge proof of alien technology

576

00:24:20,450 --> 00:24:19,020

I just don't think they're gonna do it I

577

00:24:25,450 --> 00:24:20,460

think there's there's too much to gain

578

00:24:27,950 --> 00:24:25,460

in in you know way too much to lose

579

00:24:29,570 --> 00:24:27,960

so I just don't think no matter what

580

00:24:31,190 --> 00:24:29,580

they're not going to do it if they can I

581

00:24:32,990 --> 00:24:31,200

think we'd have to find out the

582

00:24:35,510 --> 00:24:33,000

information you're gonna have to pull it

583

00:24:37,610 --> 00:24:35,520

out of their hands you know if it's

584

00:24:39,890 --> 00:24:37,620

there they have it hasn't come out in 80

585

00:24:41,510 --> 00:24:39,900

years so I see no reason why it would

586

00:24:44,510 --> 00:24:41,520

possibly change now you know I'm just

587

00:24:46,310 --> 00:24:44,520

you know you can't look back history is

588

00:24:49,010 --> 00:24:46,320

no indicator of future success and I'm

589

00:24:50,510 --> 00:24:49,020

like well we have nothing else to go on

590

00:24:53,510 --> 00:24:50,520

um so I would say no

591

00:24:54,950 --> 00:24:53,520

um I'm very optimistic we have tons of

592

00:24:56,930 --> 00:24:54,960

information already just from the radio

593

00:24:58,310 --> 00:24:56,940

calls I mean already the you know it

594

00:25:00,230 --> 00:24:58,320

happened on Sunday

595

00:25:02,149 --> 00:25:00,240

and look at the quality of video that I

596

00:25:03,890 --> 00:25:02,159

might be able to make only because I'm

597

00:25:05,870 --> 00:25:03,900

also you I'm leveraging all the other

598

00:25:08,029 --> 00:25:05,880

YouTubers out there who are making

599

00:25:10,190 --> 00:25:08,039

excellent content so I just watch their

600

00:25:11,690 --> 00:25:10,200

videos I get more data you know so it's

601
00:25:13,669 --> 00:25:11,700
kind of like this neural network that we

602
00:25:15,590 --> 00:25:13,679
have now I think that's where it's going

603
00:25:19,010 --> 00:25:15,600
to come from from us you're saying the

604
00:25:21,169 --> 00:25:19,020
key word Chris okay and I hate to say

605
00:25:24,230 --> 00:25:21,179
this but YouTube okay the bottom line

606
00:25:27,409 --> 00:25:24,240
here is that back when Roswell happened

607
00:25:30,769 --> 00:25:27,419
we did not have the media that we have

608
00:25:34,870 --> 00:25:30,779
now we had a newspaper yeah right and a

609
00:25:39,289 --> 00:25:37,490
yeah I got one in the closet just like a

610
00:25:42,110 --> 00:25:39,299
relic okay it's actually from an old

611
00:25:44,810 --> 00:25:42,120
Battleship uh it goes with the decor so

612
00:25:48,289 --> 00:25:44,820
when it what to me it means is that when

613
00:25:51,169 --> 00:25:48,299

we look at uh the current climate and

614

00:25:55,970 --> 00:25:51,179

the way information travels now we get

615

00:25:57,649 --> 00:25:55,980

an incredible panoply of information and

616

00:26:00,710 --> 00:25:57,659

because of this environment and the

617

00:26:04,370 --> 00:26:00,720

mechanisms to disseminate it we also get

618

00:26:07,190 --> 00:26:04,380

a tremendous amount of false uh data and

619

00:26:09,830 --> 00:26:07,200

hoaxes like someone's I saw one today

620

00:26:11,029 --> 00:26:09,840

first shot first shot of the dead horse

621

00:26:13,909 --> 00:26:11,039

UFO

622

00:26:15,529 --> 00:26:13,919

and it was like a daytime shot of the

623

00:26:17,029 --> 00:26:15,539

UFO lying in the ice

624

00:26:17,930 --> 00:26:17,039

and I wrote what's wrong with this

625

00:26:20,149 --> 00:26:17,940

picture

626

00:26:21,409 --> 00:26:20,159

it's February in dead horse above the

627

00:26:22,990 --> 00:26:21,419

Arctic Circle

628

00:26:26,390 --> 00:26:23,000

it ain't light out

629

00:26:29,029 --> 00:26:26,400

okay it's actually it's it's permanent

630

00:26:30,710 --> 00:26:29,039

it's it's semi semi-dusk why somebody

631

00:26:33,649 --> 00:26:30,720

dust the whole day and then you get a

632

00:26:35,930 --> 00:26:33,659

dark night okay so you know that's

633

00:26:37,370 --> 00:26:35,940

hoaxer's not thinking so I said science

634

00:26:39,590 --> 00:26:37,380

wins again you know that kind of thing

635

00:26:41,630 --> 00:26:39,600

but either way but the thing is with the

636

00:26:43,510 --> 00:26:41,640

with the rapid with the rapidity of the

637

00:26:46,430 --> 00:26:43,520

media the way it disseminates you know

638

00:26:48,590 --> 00:26:46,440

uh we will see things that we probably

639

00:26:50,210 --> 00:26:48,600

shouldn't you know I've mentioned before

640

00:26:52,850 --> 00:26:50,220

I was working on a project for the Navy

641

00:26:55,190 --> 00:26:52,860

that I uh we're creating this this

642

00:26:56,870 --> 00:26:55,200

object at the time it was classified and

643

00:27:00,490 --> 00:26:56,880

it was a flying object and they were

644

00:27:03,049 --> 00:27:00,500

testing it in a lake in in Idaho

645

00:27:04,909 --> 00:27:03,059

uh and because there was a base in that

646

00:27:07,970 --> 00:27:04,919

Lake actually that nobody knew about

647

00:27:09,950 --> 00:27:07,980

well they were testing it there and

648

00:27:11,269 --> 00:27:09,960

someone saw it flying and they they came

649

00:27:12,409 --> 00:27:11,279

down from the resort at the other end of

650

00:27:16,130 --> 00:27:12,419

the lake and started taking pictures of

651

00:27:17,810 --> 00:27:16,140

it I got the pictures I'm like oh

652

00:27:20,090 --> 00:27:17,820

I know what this is

653

00:27:21,769 --> 00:27:20,100

it's actually something it's no longer

654

00:27:24,049 --> 00:27:21,779

classified in fact they say it's no

655

00:27:27,049 --> 00:27:24,059

longer in in Play It's called project

656

00:27:29,029 --> 00:27:27,059

Cormorant like the bird the Cormorant

657

00:27:30,409 --> 00:27:29,039

um well project Cormorant was something

658

00:27:32,029 --> 00:27:30,419

I was working on for the Navy I was

659

00:27:34,850 --> 00:27:32,039

building engineering models of this we

660

00:27:37,070 --> 00:27:34,860

call it the birdie well I called the

661

00:27:38,450 --> 00:27:37,080

program office down in DC and I said uh

662

00:27:39,529 --> 00:27:38,460

guys someone's taking pictures of the

663

00:27:42,649 --> 00:27:39,539

birdie

664

00:27:44,810 --> 00:27:42,659

uh you know and just to be fair they're

665

00:27:46,549 --> 00:27:44,820

gonna one one photographer is going to

666

00:27:48,710 --> 00:27:46,559

be get 10 more and five more after that

667

00:27:50,510 --> 00:27:48,720

and 16 more eventually they're gonna

668

00:27:51,769 --> 00:27:50,520

take pictures that you don't want them

669

00:27:54,529 --> 00:27:51,779

to see

670

00:27:56,269 --> 00:27:54,539

just letting you know and at first I

671

00:27:57,710 --> 00:27:56,279

told them they would be confusing with a

672

00:27:59,029 --> 00:27:57,720

UFO thing which is why I got it they

673

00:28:00,529 --> 00:27:59,039

said ah good let them let them think

674

00:28:02,930 --> 00:28:00,539

it's a UFO

675

00:28:04,970 --> 00:28:02,940

right leverage it let it let them think

676

00:28:07,430 --> 00:28:04,980

it's a UFO and that's when I said well

677

00:28:08,810 --> 00:28:07,440

if they think it's UFO guess what you're

678

00:28:11,149 --> 00:28:08,820

going to get many more people here

679

00:28:13,970 --> 00:28:11,159

tomorrow and that's probably not what

680

00:28:15,230 --> 00:28:13,980

you want and I had a deafening silence

681

00:28:17,269 --> 00:28:15,240

that followed on the other end of the

682

00:28:19,370 --> 00:28:17,279

phone and the next day I got a statement

683

00:28:22,070 --> 00:28:19,380

which I disseminated to everybody and

684

00:28:25,070 --> 00:28:22,080

they all went home oh it's one of ours

685

00:28:28,250 --> 00:28:25,080

you know and then they went home yeah

686

00:28:30,350 --> 00:28:28,260

hey I I asked for questions boy did they

687

00:28:32,210 --> 00:28:30,360

come in so uh hopefully we can go

688

00:28:33,890 --> 00:28:32,220

through them uh at least some of them

689

00:28:35,810 --> 00:28:33,900

you know sort of quickly here's the

690

00:28:38,930 --> 00:28:35,820

first one here Dr Richard could the

691

00:28:41,810 --> 00:28:38,940

cylinder have been a balloon

692

00:28:44,510 --> 00:28:41,820

any anybody if you look at the blimp uh

693

00:28:46,610 --> 00:28:44,520

the acorn sphere blimp remember that

694

00:28:48,950 --> 00:28:46,620

it's the F-18 pilot from the back seat

695

00:28:50,769 --> 00:28:48,960

took all those photos I wish we could

696

00:28:53,149 --> 00:28:50,779

have known whether it was vertical or

697

00:28:55,310 --> 00:28:53,159

horizontal I mean you would think a

698

00:28:57,409 --> 00:28:55,320

cylinder would be horizontal if it was

699

00:28:59,990 --> 00:28:57,419

some type of you know helium fill well

700

00:29:03,110 --> 00:29:00,000

it can also it could also have been just

701
00:29:05,630 --> 00:29:03,120
it could have been an oblong uh pill

702
00:29:07,669 --> 00:29:05,640
shape too and look like a cylinder

703
00:29:10,370 --> 00:29:07,679
especially at high speed if you're

704
00:29:13,669 --> 00:29:10,380
passing it right potentially so it's

705
00:29:15,409 --> 00:29:13,679
possible that uh it might have been a

706
00:29:16,490 --> 00:29:15,419
pill-shaped thing kind of like the Tic

707
00:29:18,649 --> 00:29:16,500
Tac and we don't know whether it was

708
00:29:20,269 --> 00:29:18,659
vertical or horizontal but could it have

709
00:29:21,830 --> 00:29:20,279
been a balloon I would say yes it could

710
00:29:23,269 --> 00:29:21,840
have been a balloon

711
00:29:25,490 --> 00:29:23,279
um of some kind I mean I've seen

712
00:29:28,490 --> 00:29:25,500
balloons that are round on the top round

713
00:29:30,710 --> 00:29:28,500

on the bottom and and and and are made

714

00:29:31,789 --> 00:29:30,720

from a section A Gore that is actually a

715

00:29:34,190 --> 00:29:31,799

cylinder

716

00:29:36,590 --> 00:29:34,200

I've seen that I put something up there

717

00:29:39,230 --> 00:29:36,600

yeah sorry about that uh yeah there was

718

00:29:42,169 --> 00:29:39,240

one uh if you remember the acorn blimp

719

00:29:43,490 --> 00:29:42,179

yeah was that the one shot on the right

720

00:29:45,049 --> 00:29:43,500

side of the cockpit window yeah right

721

00:29:46,789 --> 00:29:45,059

here yeah there you go I have you

722

00:29:49,430 --> 00:29:46,799

remember that they took it just left the

723

00:29:52,070 --> 00:29:49,440

East Coast as well

724

00:29:53,690 --> 00:29:52,080

it was uh look like I got I got that

725

00:29:55,789 --> 00:29:53,700

case actually and that when I analyzed

726

00:29:58,789 --> 00:29:55,799

it I found that to be uh in all

727

00:30:02,210 --> 00:29:58,799

likelihood a mylar balloon at altitude

728

00:30:04,490 --> 00:30:02,220

okay so you think it is Milo I do

729

00:30:07,370 --> 00:30:04,500

um you know that was my my my finding

730

00:30:08,990 --> 00:30:07,380

and I said I was I was 90 that it was a

731

00:30:10,610 --> 00:30:09,000

mylar balloon at altitude I mean it had

732

00:30:12,710 --> 00:30:10,620

all the all Hallmarks it had the

733

00:30:14,269 --> 00:30:12,720

wrinkles it had the little uh it even

734

00:30:16,430 --> 00:30:14,279

had the little pucker at the bottom for

735

00:30:17,470 --> 00:30:16,440

the filler valve and kind of a thing and

736

00:30:19,789 --> 00:30:17,480

uh

737

00:30:23,029 --> 00:30:19,799

they can go pretty high in altitude

738

00:30:24,710 --> 00:30:23,039

mylar yet he can and they they'll

739

00:30:26,930 --> 00:30:24,720

they'll get I mean if you're ever taking

740

00:30:28,970 --> 00:30:26,940

a potato chip bag from 1 000 feet and

741

00:30:30,769 --> 00:30:28,980

gone up to Wells like say from Phoenix

742

00:30:33,110 --> 00:30:30,779

and go on the Flagstaff with it that

743

00:30:34,610 --> 00:30:33,120

potato chip bag is really really tight

744

00:30:37,490 --> 00:30:34,620

if you open it it's gonna go boom

745

00:30:39,710 --> 00:30:37,500

because it's that air inside is at the

746

00:30:40,490 --> 00:30:39,720

the ambient pressure that it was from

747

00:30:41,930 --> 00:30:40,500

Phoenix

748

00:30:44,570 --> 00:30:41,940

right

749

00:30:45,950 --> 00:30:44,580

um so as it goes up in altitude okay the

750

00:30:47,389 --> 00:30:45,960

pressure gets lower and that pressure is

751
00:30:49,669 --> 00:30:47,399
still pushing out and it pushes the bag

752
00:30:51,529 --> 00:30:49,679
out further so the the mylar balloons

753
00:30:54,110 --> 00:30:51,539
stretching and grow in the same way they

754
00:30:55,970 --> 00:30:54,120
don't grow physically because they're

755
00:30:57,769 --> 00:30:55,980
not allowed to they're not like latex

756
00:31:00,169 --> 00:30:57,779
which stretches mylar doesn't stretch

757
00:31:02,450 --> 00:31:00,179
that's correct but the wrinkles get

758
00:31:04,130 --> 00:31:02,460
really tight can it just wouldn't it

759
00:31:06,950 --> 00:31:04,140
just blow up at a certain altitude or

760
00:31:08,690 --> 00:31:06,960
not it could possibly you know have a

761
00:31:09,649 --> 00:31:08,700
little uh you know fissure in it and

762
00:31:11,330 --> 00:31:09,659
break yes

763
00:31:14,090 --> 00:31:11,340

and they do I mean sometimes they'll

764

00:31:16,070 --> 00:31:14,100

probably just go you know and just fall

765

00:31:17,690 --> 00:31:16,080

you know so uh another question here

766

00:31:19,909 --> 00:31:17,700

could they have been a lighter than

767

00:31:21,769 --> 00:31:19,919

aircraft

768

00:31:23,330 --> 00:31:21,779

um and what would that be like that

769

00:31:24,769 --> 00:31:23,340

would also be like a blimp or something

770

00:31:26,810 --> 00:31:24,779

like that right

771

00:31:28,269 --> 00:31:26,820

like a kite I've seen some weird you

772

00:31:32,630 --> 00:31:28,279

remember there's like this Pittsburgh

773

00:31:35,810 --> 00:31:32,640

NFL game and there's a strange

774

00:31:37,130 --> 00:31:35,820

kind optic flying over I mean yeah I

775

00:31:39,350 --> 00:31:37,140

think they did that on purpose didn't

776

00:31:41,870 --> 00:31:39,360

they to uh

777

00:31:42,950 --> 00:31:41,880

uh to be controversial was that the one

778

00:31:45,590 --> 00:31:42,960

at the game

779

00:31:49,669 --> 00:31:45,600

no I just remember uh like some sort of

780

00:31:51,289 --> 00:31:49,679

uh Square Sky kite I maybe not a

781

00:31:53,149 --> 00:31:51,299

dirigible but something like that could

782

00:31:55,430 --> 00:31:53,159

have

783

00:31:58,070 --> 00:31:55,440

yeah I

784

00:31:59,870 --> 00:31:58,080

I again but the answer you know the

785

00:32:01,430 --> 00:31:59,880

question is Right could it have been yes

786

00:32:02,630 --> 00:32:01,440

it could have I mean we can't say it's

787

00:32:05,990 --> 00:32:02,640

not

788

00:32:07,789 --> 00:32:06,000

um you know I for sure uh but yeah I

789

00:32:09,649 --> 00:32:07,799

mean I'm pretty I'm pretty confident it

790

00:32:12,769 --> 00:32:09,659

could have been a balloon too

791

00:32:14,090 --> 00:32:12,779

so this one is an interesting question

792

00:32:17,930 --> 00:32:14,100

what do you think of them shooting

793

00:32:19,250 --> 00:32:17,940

missiles at unknowns as a protocol I

794

00:32:21,350 --> 00:32:19,260

think that could definitely get carried

795

00:32:23,029 --> 00:32:21,360

away myself what does everyone else

796

00:32:27,169 --> 00:32:23,039

think about that I don't know what he

797

00:32:29,090 --> 00:32:27,179

thinks yeah I was just texting with my

798

00:32:31,010 --> 00:32:29,100

my fighter pilot buddy this morning and

799

00:32:33,409 --> 00:32:31,020

we both think it's very weird

800

00:32:35,510 --> 00:32:33,419

you know we could in a check ride you

801
00:32:37,370 --> 00:32:35,520
would if you shot something unidentified

802
00:32:39,049 --> 00:32:37,380
I mean if you're approved to shoot it

803
00:32:40,850 --> 00:32:39,059
that makes sense

804
00:32:43,310 --> 00:32:40,860
but just shooting something that's

805
00:32:46,070 --> 00:32:43,320
unidentified just seems very strange to

806
00:32:48,169 --> 00:32:46,080
me I mean listening to the engagement I

807
00:32:49,430 --> 00:32:48,179
understand it you know I think they

808
00:32:50,570 --> 00:32:49,440
think it's a balloon they're told to

809
00:32:52,250 --> 00:32:50,580
shoot this thing down they're just gonna

810
00:32:53,990 --> 00:32:52,260
they're gonna take it down

811
00:32:56,090 --> 00:32:54,000
and they want to make sure it's unmanned

812
00:32:56,870 --> 00:32:56,100
first of all right in a situation like

813
00:32:58,669 --> 00:32:56,880

that

814

00:33:00,649 --> 00:32:58,679

yeah I think they know it's unmanned in

815

00:33:03,470 --> 00:33:00,659

at the Lake Huron case because it's so

816

00:33:06,950 --> 00:33:03,480

small right you can't fit a person into

817

00:33:09,230 --> 00:33:06,960

that space and lift them with that much

818

00:33:11,870 --> 00:33:09,240

helium it could be a little tiny alien

819

00:33:14,570 --> 00:33:11,880

you know you don't know right but it's

820

00:33:18,409 --> 00:33:14,580

not a man that we know about so yeah it

821

00:33:20,690 --> 00:33:18,419

doesn't count yeah poor aliens okay yeah

822

00:33:23,289 --> 00:33:20,700

but that's but that's a good point right

823

00:33:25,789 --> 00:33:23,299

I mean you you think about this and and

824

00:33:26,810 --> 00:33:25,799

you know helium has a certain lifting

825

00:33:28,310 --> 00:33:26,820

capacity

826

00:33:30,049 --> 00:33:28,320

do you have any idea how much it takes

827

00:33:31,730 --> 00:33:30,059

to lift a person

828

00:33:34,730 --> 00:33:31,740

remember the guy that flew around in his

829

00:33:36,049 --> 00:33:34,740

lawn chair yeah how many balloons did he

830

00:33:38,529 --> 00:33:36,059

have over his head

831

00:33:41,029 --> 00:33:38,539

uh probably 80

832

00:33:42,830 --> 00:33:41,039

83 two and a half three foot balloons is

833

00:33:44,810 --> 00:33:42,840

that the guy on his couch one guy went

834

00:33:47,630 --> 00:33:44,820

on his car no no this this was a guy in

835

00:33:49,310 --> 00:33:47,640

a chair actually uh he ended up dying

836

00:33:50,930 --> 00:33:49,320

actually from the incident yeah they

837

00:33:53,330 --> 00:33:50,940

don't all die though some of them no

838

00:33:55,810 --> 00:33:53,340

some actually survived to be Darwin

839

00:33:58,909 --> 00:33:55,820

Award winners later

840

00:34:01,789 --> 00:33:58,919

okay here's uh another one why did the

841

00:34:03,130 --> 00:34:01,799

why this one's to you Chris why oh why

842

00:34:05,870 --> 00:34:03,140

would they use

843

00:34:08,750 --> 00:34:05,880

unencrypted Communications to carry out

844

00:34:10,550 --> 00:34:08,760

the shootout that's a good question

845

00:34:11,990 --> 00:34:10,560

yeah I mean Communications are always

846

00:34:15,290 --> 00:34:12,000

difficult

847

00:34:17,510 --> 00:34:15,300

so it's always just a pain in the ass if

848

00:34:19,490 --> 00:34:17,520

I'm sure in the future they will use

849

00:34:22,730 --> 00:34:19,500

encrypted comps if I have to guess after

850

00:34:24,230 --> 00:34:22,740

this after the the Chinese balloon is

851
00:34:26,990 --> 00:34:24,240
shot because they don't also don't want

852
00:34:28,669 --> 00:34:27,000
to give away their their tactics as well

853
00:34:30,470 --> 00:34:28,679
um but it's difficult to get all the

854
00:34:32,089 --> 00:34:30,480
players on to the correct you know

855
00:34:34,790 --> 00:34:32,099
Communications are always an issue you

856
00:34:36,290 --> 00:34:34,800
know as a as a YouTuber now imagine if

857
00:34:39,349 --> 00:34:36,300
we're trying to keep this a secret

858
00:34:41,869 --> 00:34:39,359
conversation that no one can hack

859
00:34:43,250 --> 00:34:41,879
you know of course Mark won't be won't

860
00:34:45,369 --> 00:34:43,260
have the correct codes

861
00:34:48,050 --> 00:34:45,379
you know something will happen

862
00:34:51,829 --> 00:34:48,060
to uh talk like this so they can't read

863
00:34:53,270 --> 00:34:51,839

my my lips you know Chris you come from

864

00:34:55,550 --> 00:34:53,280

different bases if it's thrown together

865

00:34:58,250 --> 00:34:55,560

quickly you're not prepared to do War so

866

00:34:59,870 --> 00:34:58,260

you know in our normal daily training we

867

00:35:01,790 --> 00:34:59,880

don't they I'm guessing they don't use

868

00:35:03,109 --> 00:35:01,800

unencrypted so when they go to do the

869

00:35:04,670 --> 00:35:03,119

training now and adding all these

870

00:35:07,609 --> 00:35:04,680

different elements

871

00:35:09,230 --> 00:35:07,619

but yeah I think looking at this now I

872

00:35:12,829 --> 00:35:09,240

think it's pretty obvious they should

873

00:35:17,390 --> 00:35:12,839

use encrypted were these air guard

874

00:35:19,550 --> 00:35:17,400

yes so it was uh uh Duluth 148th Fighter

875

00:35:23,329 --> 00:35:19,560

Wing out of Minnesota

876

00:35:26,390 --> 00:35:23,339

okay so the Air National Guard

877

00:35:28,490 --> 00:35:26,400

um unless it's uh I I'm guessing here

878

00:35:30,650 --> 00:35:28,500

but I would guess that it's unencrypted

879

00:35:32,089 --> 00:35:30,660

because that's how they carry on every

880

00:35:33,950 --> 00:35:32,099

day anyway

881

00:35:36,109 --> 00:35:33,960

I don't think they use encrypted right

882

00:35:38,810 --> 00:35:36,119

during a regular training runs and so

883

00:35:41,569 --> 00:35:38,820

forth they're probably not right

884

00:35:44,930 --> 00:35:41,579

yeah I mean

885

00:35:47,810 --> 00:35:44,940

yeah you're not basically you just use

886

00:35:51,050 --> 00:35:47,820

code words uh you're not giving out the

887

00:35:53,390 --> 00:35:51,060

information you know but like uh if you

888

00:35:55,730 --> 00:35:53,400

had the Chinese if they happen to have

889

00:35:58,490 --> 00:35:55,740

which is legal by the way a fishing

890

00:35:59,630 --> 00:35:58,500

vessel that had a radar on it 13 miles

891

00:36:02,510 --> 00:35:59,640

off the coast

892

00:36:04,849 --> 00:36:02,520

then they can track all the airplanes

893

00:36:07,849 --> 00:36:04,859

and listen to the communication and now

894

00:36:10,010 --> 00:36:07,859

if I know your planes and now and I have

895

00:36:12,109 --> 00:36:10,020

the communication if I know location and

896

00:36:15,290 --> 00:36:12,119

communication now I can kind of put

897

00:36:17,390 --> 00:36:15,300

peace tactics together and such so yeah

898

00:36:18,950 --> 00:36:17,400

I think it's I was kind of surprised to

899

00:36:20,270 --> 00:36:18,960

be honest that there that we got

900

00:36:22,550 --> 00:36:20,280

everything I

901
00:36:24,770 --> 00:36:22,560
you know but I think for that is

902
00:36:27,349 --> 00:36:24,780
they're not used to it uh

903
00:36:29,990 --> 00:36:27,359
and the the people they needed to talk

904
00:36:31,670 --> 00:36:30,000
to weren't able to go encrypted that's

905
00:36:33,650 --> 00:36:31,680
probably what would happen

906
00:36:35,329 --> 00:36:33,660
Chris how often do they change the code

907
00:36:36,950 --> 00:36:35,339
words are they always the same or do

908
00:36:38,810 --> 00:36:36,960
they change them out

909
00:36:40,970 --> 00:36:38,820
I mean that's where you get into com set

910
00:36:42,589 --> 00:36:40,980
com security it's like the highest level

911
00:36:44,270 --> 00:36:42,599
of security you know

912
00:36:46,490 --> 00:36:44,280
I don't know I don't even know that

913
00:36:48,170 --> 00:36:46,500

information and I'm sorry so normally

914

00:36:49,910 --> 00:36:48,180

it's changed out you know every day

915

00:36:51,290 --> 00:36:49,920

they'll change out

916

00:36:53,390 --> 00:36:51,300

there's different radios we have

917

00:36:55,970 --> 00:36:53,400

anti-jam radios that change out then you

918

00:36:57,890 --> 00:36:55,980

have encrypted radios which is just

919

00:36:59,270 --> 00:36:57,900

codes basically but if they're from

920

00:37:02,410 --> 00:36:59,280

different bases maybe they don't have

921

00:37:05,810 --> 00:37:02,420

the same codes put in yeah

922

00:37:08,630 --> 00:37:05,820

so uh this person is worried about these

923

00:37:11,089 --> 00:37:08,640

events leading to a war and wants an

924

00:37:15,829 --> 00:37:11,099

opinion How likely could that be

925

00:37:18,710 --> 00:37:15,839

uh I personally don't think it's uh you

926
00:37:21,230 --> 00:37:18,720
know these are all unmanned and uh you

927
00:37:22,849 --> 00:37:21,240
know things happen a lot when uh you

928
00:37:25,370 --> 00:37:22,859
know we don't even get into a war when

929
00:37:28,310 --> 00:37:25,380
something's accidentally shot down you

930
00:37:30,109 --> 00:37:28,320
know and there's a live life uh lost so

931
00:37:32,270 --> 00:37:30,119
I I don't believe this would leave lead

932
00:37:34,069 --> 00:37:32,280
to war but you know you never you never

933
00:37:36,109 --> 00:37:34,079
know anyone want to give an opinion on

934
00:37:37,790 --> 00:37:36,119
that

935
00:37:38,750 --> 00:37:37,800
um I think it'd be very stupid if it

936
00:37:40,609 --> 00:37:38,760
happened

937
00:37:45,349 --> 00:37:40,619
I would

938
00:37:46,970 --> 00:37:45,359

have a long history of infiltrating

939

00:37:49,130 --> 00:37:46,980

China's airspace they have a long

940

00:37:52,849 --> 00:37:49,140

history of infiltrating ours same thing

941

00:37:56,450 --> 00:37:52,859

with Russia okay and remember Gary

942

00:37:59,270 --> 00:37:56,460

Powers being shot down in the U2 we

943

00:38:01,670 --> 00:37:59,280

didn't go to war yeah okay so I mean

944

00:38:04,190 --> 00:38:01,680

obviously things do happen they're

945

00:38:06,710 --> 00:38:04,200

controversial but the step to go to war

946

00:38:08,750 --> 00:38:06,720

is a very very wide step and I don't

947

00:38:11,030 --> 00:38:08,760

believe that that's one that would be

948

00:38:12,890 --> 00:38:11,040

taken lightly just because you know it

949

00:38:17,210 --> 00:38:12,900

wasn't gonna be called the balloon War

950

00:38:18,470 --> 00:38:17,220

99 Luft balloons you know it's like so I

951
00:38:20,270 --> 00:38:18,480
don't know I don't think it would lead

952
00:38:21,050 --> 00:38:20,280
to war to be honest I think that that's

953
00:39:05,750 --> 00:38:21,060
a

954
00:39:08,690 --> 00:39:05,760
things it you know I don't know it seems

955
00:39:10,370 --> 00:39:08,700
kind of a if if they really know what

956
00:39:11,030 --> 00:39:10,380
they're doing then they're feigning kind

957
00:39:13,670 --> 00:39:11,040
of

958
00:39:15,290 --> 00:39:13,680
uh naivety you know they're basically

959
00:39:16,310 --> 00:39:15,300
just throwing these these things up and

960
00:39:17,930 --> 00:39:16,320
saying well we don't know what they're

961
00:39:19,130 --> 00:39:17,940
doing but they also look like they don't

962
00:39:22,130 --> 00:39:19,140
know what they're doing

963
00:39:24,890 --> 00:39:22,140

yeah you know one thing too is uh

964

00:39:27,109 --> 00:39:24,900

the Chinese balloon that got shot down

965

00:39:29,450 --> 00:39:27,119

how many of our parts are actually on

966

00:39:30,109 --> 00:39:29,460

this balloon

967

00:39:31,790 --> 00:39:30,119

um

968

00:39:35,170 --> 00:39:31,800

I heard

969

00:39:38,630 --> 00:39:35,180

um from some sources that I know

970

00:39:40,370 --> 00:39:38,640

that they're actually uh a fairly a

971

00:39:43,250 --> 00:39:40,380

substantial number of American-made

972

00:39:45,950 --> 00:39:43,260

Parts on their spy balloon

973

00:39:48,589 --> 00:39:45,960

and some of those companies as a result

974

00:39:51,470 --> 00:39:48,599

have been blacklisted as a result of

975

00:39:54,050 --> 00:39:51,480

this of this project of this incident

976

00:39:58,130 --> 00:39:54,060

and um I looked up the government

977

00:40:00,710 --> 00:39:58,140

document the other day and found like 15

978

00:40:03,109 --> 00:40:00,720

companies that because they supplied the

979

00:40:05,690 --> 00:40:03,119

products for the Chinese spy balloon

980

00:40:07,490 --> 00:40:05,700

there have been blacklisted so that's

981

00:40:08,930 --> 00:40:07,500

like wow talk about destroying your

982

00:40:11,510 --> 00:40:08,940

business overnight

983

00:40:13,430 --> 00:40:11,520

sure you know wow yeah I never thought

984

00:40:15,050 --> 00:40:13,440

of that aspect Chris are you trying to

985

00:40:17,390 --> 00:40:15,060

bring up some more footage or is it

986

00:40:19,069 --> 00:40:17,400

you're just uh poking around I was just

987

00:40:20,870 --> 00:40:19,079

bringing up the uh the balloon again

988

00:40:23,030 --> 00:40:20,880

just to try and

989

00:40:25,609 --> 00:40:23,040

reference it

990

00:40:28,730 --> 00:40:25,619

yeah I don't know uh

991

00:40:30,530 --> 00:40:28,740

I'm curious about that that uh third

992

00:40:33,410 --> 00:40:30,540

shoot down to really see what that one

993

00:40:34,790 --> 00:40:33,420

is you know do you think Martin that the

994

00:40:37,910 --> 00:40:34,800

Special Forces

995

00:40:40,250 --> 00:40:37,920

the Canadian government the U.S if they

996

00:40:42,410 --> 00:40:40,260

found some crazy alien technology would

997

00:40:44,630 --> 00:40:42,420

they would they related to us

998

00:40:46,190 --> 00:40:44,640

hmm

999

00:40:47,690 --> 00:40:46,200

well

1000

00:41:00,589 --> 00:40:47,700

I

1001
00:41:02,089 --> 00:41:00,599
where it could be something that they

1002
00:41:05,810 --> 00:41:02,099
couldn't explain

1003
00:41:07,550 --> 00:41:05,820
and I think they'd be very very slow in

1004
00:41:09,589 --> 00:41:07,560
releasing that and I'd like to know what

1005
00:41:13,609 --> 00:41:09,599
you think Mark

1006
00:41:16,609 --> 00:41:13,619
I think the uh on the Canadian side

1007
00:41:19,490 --> 00:41:16,619
um I think for a lot of their technology

1008
00:41:20,329 --> 00:41:19,500
they rely on us so I don't think they

1009
00:41:23,150 --> 00:41:20,339
can

1010
00:41:24,890 --> 00:41:23,160
try to evaluate this without us if it

1011
00:41:27,290 --> 00:41:24,900
was to be something like that

1012
00:41:29,329 --> 00:41:27,300
so they they would consider themselves a

1013
00:41:30,890 --> 00:41:29,339

partner and they'd rather be aligned

1014

00:41:32,810 --> 00:41:30,900

with us than not when it comes to

1015

00:41:35,569 --> 00:41:32,820

something like this so I have a feeling

1016

00:41:37,430 --> 00:41:35,579

again gut feeling that they would

1017

00:41:39,230 --> 00:41:37,440

probably

1018

00:41:41,510 --> 00:41:39,240

have to share it with us and they may

1019

00:41:43,250 --> 00:41:41,520

not want to like Chris suggested but I I

1020

00:41:45,109 --> 00:41:43,260

think that they would probably have to

1021

00:41:46,550 --> 00:41:45,119

in the end in order to find out what it

1022

00:41:48,650 --> 00:41:46,560

is

1023

00:41:50,390 --> 00:41:48,660

um just a thought

1024

00:41:54,589 --> 00:41:50,400

and Chris why don't you answer your own

1025

00:42:00,650 --> 00:41:57,109

yeah I don't know you know I guess it

1026
00:42:02,089 --> 00:42:00,660
comes down to Canadian uh culture do you

1027
00:42:04,550 --> 00:42:02,099
think that they're

1028
00:42:06,650 --> 00:42:04,560
if if Trudeau found if they came to

1029
00:42:08,329 --> 00:42:06,660
Trudeau and were like this is a alien

1030
00:42:10,490 --> 00:42:08,339
technology

1031
00:42:12,530 --> 00:42:10,500
you know you live up in Maine what do

1032
00:42:15,470 --> 00:42:12,540
you think I think the Canadians I I

1033
00:42:17,089 --> 00:42:15,480
don't know I don't know I I think we

1034
00:42:19,310 --> 00:42:17,099
have a better chance that it landed in

1035
00:42:21,890 --> 00:42:19,320
Canada you just have more people there

1036
00:42:25,250 --> 00:42:21,900
and there's more people at the murder

1037
00:42:27,130 --> 00:42:25,260
you know so there's more witnesses so

1038
00:42:29,870 --> 00:42:27,140

maybe uh something will happen you know

1039

00:42:31,609 --> 00:42:29,880

or I don't know I tend to think yeah

1040

00:42:32,990 --> 00:42:31,619

maybe they will to actually tell us

1041

00:42:34,310 --> 00:42:33,000

what's their

1042

00:42:37,490 --> 00:42:34,320

I don't know I still can't believe it

1043

00:42:38,510 --> 00:42:37,500

yeah here's another question that came

1044

00:42:39,770 --> 00:42:38,520

in

1045

00:42:41,390 --> 00:42:39,780

um does

1046

00:42:43,849 --> 00:42:41,400

what do you think do you think we'll

1047

00:42:45,710 --> 00:42:43,859

ever see this footage

1048

00:42:47,510 --> 00:42:45,720

um I think if it's something benign it's

1049

00:42:50,030 --> 00:42:47,520

possible but

1050

00:42:52,430 --> 00:42:50,040

if it's something that Still Remains

1051
00:42:55,790 --> 00:42:52,440
unexplainable and we don't know what it

1052
00:42:59,150 --> 00:42:55,800
is then probably not

1053
00:43:04,550 --> 00:42:59,160
I suspect that uh

1054
00:43:07,910 --> 00:43:04,560
with the clearance World in play uh that

1055
00:43:09,470 --> 00:43:07,920
all footage is going to be impounded uh

1056
00:43:11,990 --> 00:43:09,480
you know as soon as the plane lands that

1057
00:43:14,930 --> 00:43:12,000
stuff gets offloaded uh if it's not

1058
00:43:16,670 --> 00:43:14,940
already off into a server and it'll get

1059
00:43:18,349 --> 00:43:16,680
encrypted at both ends right and then

1060
00:43:20,809 --> 00:43:18,359
it's going to just be stuck there for

1061
00:43:22,849 --> 00:43:20,819
review and that's probably a very

1062
00:43:25,190 --> 00:43:22,859
lengthy process

1063
00:43:28,430 --> 00:43:25,200

um having done some of that stuff not

1064

00:43:31,010 --> 00:43:28,440

with the Air Force but with navy side uh

1065

00:43:32,510 --> 00:43:31,020

I know that it takes forever to get

1066

00:43:36,950 --> 00:43:32,520

anything even

1067

00:43:39,530 --> 00:43:36,960

simple uh non-uh secret stuff it takes a

1068

00:43:42,130 --> 00:43:39,540

long time to get it out of the Navy so I

1069

00:43:44,930 --> 00:43:42,140

imagine it'll it'll come out someday

1070

00:43:47,210 --> 00:43:44,940

especially if they're just balloons

1071

00:43:49,370 --> 00:43:47,220

because there's nothing they use that

1072

00:43:52,010 --> 00:43:49,380

nobody knows about they know about aim

1073

00:43:55,130 --> 00:43:52,020

nines okay so they'll you they'll

1074

00:43:56,990 --> 00:43:55,140

they'll they'll release that I think but

1075

00:43:58,790 --> 00:43:57,000

um

1076

00:44:01,190 --> 00:43:58,800

the politics has to be right though

1077

00:44:03,950 --> 00:44:01,200

that's the thing it's all comes down to

1078

00:44:05,630 --> 00:44:03,960

politics too you know what are we going

1079

00:44:07,370 --> 00:44:05,640

to get out if we release this what do we

1080

00:44:08,870 --> 00:44:07,380

get for it you know we get elected again

1081

00:44:09,950 --> 00:44:08,880

I mean whatever you know I don't know

1082

00:44:12,470 --> 00:44:09,960

how to

1083

00:44:15,109 --> 00:44:12,480

so I don't know but um I don't think

1084

00:44:17,690 --> 00:44:15,119

there'll be uh a real reason to keep it

1085

00:44:19,849 --> 00:44:17,700

secret you know what do you think Chris

1086

00:44:21,589 --> 00:44:19,859

I just I don't think it will need to be

1087

00:44:23,690 --> 00:44:21,599

kept secret but they haven't released

1088

00:44:26,030 --> 00:44:23,700

any footage you know all the footage we

1089

00:44:30,230 --> 00:44:26,040

have was leaked essentially or I mean I

1090

00:44:34,010 --> 00:44:31,670

you did it

1091

00:44:36,589 --> 00:44:34,020

Force basically I don't know it seems

1092

00:44:38,390 --> 00:44:36,599

like they get lucky Lou Elizondo kind of

1093

00:44:40,790 --> 00:44:38,400

got lucky getting those Declassified but

1094

00:44:41,690 --> 00:44:40,800

yeah I don't know if has it happened

1095

00:44:44,750 --> 00:44:41,700

since

1096

00:44:49,250 --> 00:44:44,760

have we gotten any footage of anything

1097

00:44:52,730 --> 00:44:49,260

oh we had some uh footage from uh of the

1098

00:44:55,250 --> 00:44:52,740

ranch in Colorado that was released and

1099

00:44:57,650 --> 00:44:55,260

I gotta look at that stuff and

1100

00:45:01,130 --> 00:44:57,660

none of that stuff was

1101
00:45:04,910 --> 00:45:01,140
convincing to me and okay I'm skeptical

1102
00:45:07,670 --> 00:45:04,920
but I'm also open-minded and uh my

1103
00:45:09,170 --> 00:45:07,680
skepticism drives the analysis I'm not

1104
00:45:11,569 --> 00:45:09,180
going to go into an analysis right and

1105
00:45:13,130 --> 00:45:11,579
say this is probably UFO I can't wait to

1106
00:45:15,589 --> 00:45:13,140
say it's UFO

1107
00:45:17,569 --> 00:45:15,599
you know I have to go in saying I don't

1108
00:45:19,190 --> 00:45:17,579
know what this is but I have to figure

1109
00:45:22,010 --> 00:45:19,200
out what it is and I'm going to remove

1110
00:45:23,930 --> 00:45:22,020
all the knowns and if the knowns can't

1111
00:45:25,910 --> 00:45:23,940
be removed well then too bad that's a

1112
00:45:27,290 --> 00:45:25,920
way of cookie crumbles you know so I

1113
00:45:30,410 --> 00:45:27,300

don't know

1114

00:45:31,970 --> 00:45:30,420

here's a uh here's a statement here

1115

00:45:35,630 --> 00:45:31,980

hello Martin I heard on the news today

1116

00:45:38,030 --> 00:45:35,640

that one of the UAP was metallic are the

1117

00:45:39,650 --> 00:45:38,040

guests aware of that

1118

00:45:42,589 --> 00:45:39,660

yeah

1119

00:45:45,230 --> 00:45:42,599

I I haven't heard it said metallic in

1120

00:45:47,690 --> 00:45:45,240

the uh uh because he gets a glint that's

1121

00:45:49,250 --> 00:45:47,700

what I heard in the Lake Huron he said

1122

00:45:51,770 --> 00:45:49,260

yeah I can tell it I think it's metallic

1123

00:45:55,130 --> 00:45:51,780

because it glints off the Sun

1124

00:45:56,510 --> 00:45:55,140

but that could be mylar too right yes

1125

00:45:57,950 --> 00:45:56,520

and it could also be a regular weather

1126

00:46:00,349 --> 00:45:57,960

balloon a weather balloon will also

1127

00:46:01,849 --> 00:46:00,359

glint given the right conditions

1128

00:46:04,490 --> 00:46:01,859

I've seen a regular weather balloon

1129

00:46:06,530 --> 00:46:04,500

looks like a point of light in the sky

1130

00:46:08,270 --> 00:46:06,540

but it's a weather balloon and it just

1131

00:46:10,550 --> 00:46:08,280

happens to if she does the weather

1132

00:46:12,829 --> 00:46:10,560

balloons the material they're made of

1133

00:46:15,349 --> 00:46:12,839

can reflect like glass under the right

1134

00:46:16,670 --> 00:46:15,359

conditions all right there's they're

1135

00:46:18,950 --> 00:46:16,680

dull white you say well those won't

1136

00:46:21,290 --> 00:46:18,960

reflect light but they do all right and

1137

00:46:23,450 --> 00:46:21,300

depending on what type of weather

1138

00:46:26,569 --> 00:46:23,460

balloon it is you can get more or less

1139

00:46:31,010 --> 00:46:26,579

of a glint and I've seen those Balloons

1140

00:46:33,589 --> 00:46:31,020

look just like big metal uh teardrops in

1141

00:46:35,450 --> 00:46:33,599

the sky and they're not they're actually

1142

00:46:38,089 --> 00:46:35,460

this very very thin material that's

1143

00:46:40,370 --> 00:46:38,099

actually completely clear

1144

00:46:42,950 --> 00:46:40,380

but they do glint like glass under the

1145

00:46:46,250 --> 00:46:42,960

right conditions if you uh share let me

1146

00:46:48,109 --> 00:46:46,260

share the screen here Martin well anyway

1147

00:46:49,910 --> 00:46:48,119

whoops

1148

00:46:51,230 --> 00:46:49,920

let's see

1149

00:46:53,210 --> 00:46:51,240

there we go

1150

00:46:56,569 --> 00:46:53,220

yeah there's just our our weather

1151
00:46:58,730 --> 00:46:56,579
balloon at a distance and

1152
00:47:01,130 --> 00:46:58,740
you can see it kind of

1153
00:47:04,069 --> 00:47:01,140
reflecting the Sun from the top

1154
00:47:13,210 --> 00:47:04,079
and it looks it looks kind of like a Tic

1155
00:47:18,349 --> 00:47:15,770
it's changing its shape slightly too as

1156
00:47:20,329 --> 00:47:18,359
it as it moves in the Wind You Know It

1157
00:47:21,890 --> 00:47:20,339
squashes and goes around again squashes

1158
00:47:22,970 --> 00:47:21,900
and goes around as it's going up in the

1159
00:47:25,309 --> 00:47:22,980
air

1160
00:47:26,210 --> 00:47:25,319
I I think it should be identifiable

1161
00:47:28,309 --> 00:47:26,220
though

1162
00:47:30,230 --> 00:47:28,319
um yeah

1163
00:47:32,690 --> 00:47:30,240

when they shoot these things down they

1164

00:47:35,390 --> 00:47:32,700

probably already recovered a lot of the

1165

00:47:37,609 --> 00:47:35,400

debris I would imagine they would have

1166

00:47:40,069 --> 00:47:37,619

recovered a lot of the debris by now

1167

00:47:41,390 --> 00:47:40,079

so they will know whether these things

1168

00:47:43,430 --> 00:47:41,400

you know they're talking about looked

1169

00:47:47,890 --> 00:47:43,440

metallic but they'll know whether it was

1170

00:47:50,990 --> 00:47:47,900

metallic or Not by the debris itself

1171

00:47:52,250 --> 00:47:51,000

but I still wonder what type of Weaponry

1172

00:47:54,950 --> 00:47:52,260

they used

1173

00:47:58,430 --> 00:47:54,960

if it was uh you know an explosion or if

1174

00:48:00,770 --> 00:47:58,440

it was again like a a harpoon type of

1175

00:48:02,870 --> 00:48:00,780

situation

1176

00:48:04,790 --> 00:48:02,880

I heard there was two missiles on Lake

1177

00:48:06,710 --> 00:48:04,800

Huron did you guys hear that as well I

1178

00:48:09,290 --> 00:48:06,720

haven't seen actual

1179

00:48:11,809 --> 00:48:09,300

I I have not heard anything about uh

1180

00:48:14,270 --> 00:48:11,819

here around other than you know the

1181

00:48:17,089 --> 00:48:14,280

stuff you you see on Facebook and other

1182

00:48:20,390 --> 00:48:17,099

places like that and I I treat that with

1183

00:48:22,010 --> 00:48:20,400

a grain of salt yeah I don't know so I

1184

00:48:23,930 --> 00:48:22,020

don't want to say that there was more

1185

00:48:25,670 --> 00:48:23,940

than one missile but if it's such a

1186

00:48:26,870 --> 00:48:25,680

small Target like you kind of mentioned

1187

00:48:29,030 --> 00:48:26,880

their

1188

00:48:31,190 --> 00:48:29,040

uh Martin if you don't hit it you know

1189

00:48:33,050 --> 00:48:31,200

if you don't spear it who that's why we

1190

00:48:35,329 --> 00:48:33,060

have fuses so they have a proximity

1191

00:48:37,430 --> 00:48:35,339

sensor that will actually explode

1192

00:48:39,589 --> 00:48:37,440

so it sounds like it just didn't fuse

1193

00:48:41,030 --> 00:48:39,599

most likely on that little tiny balloon

1194

00:48:43,130 --> 00:48:41,040

you know if that's or whatever it is

1195

00:48:45,050 --> 00:48:43,140

object assembling he called it a balloon

1196

00:48:47,030 --> 00:48:45,060

but if it didn't fuse then you may need

1197

00:48:49,730 --> 00:48:47,040

a second missile

1198

00:48:52,670 --> 00:48:49,740

Chris there's a question here are there

1199

00:48:55,130 --> 00:48:52,680

alternative methods to shooting down you

1200

00:48:58,849 --> 00:48:55,140

know objects like these

1201

00:49:01,490 --> 00:48:58,859

uh other than using a fighter jet there

1202

00:49:04,250 --> 00:49:01,500

must be right yeah there must be so yeah

1203

00:49:05,569 --> 00:49:04,260

I well didn't we used to actually

1204

00:49:07,910 --> 00:49:05,579

capture

1205

00:49:11,589 --> 00:49:07,920

but you know the sky hook can you get it

1206

00:49:13,970 --> 00:49:11,599

with a C-130 like 20 000 yeah

1207

00:49:17,329 --> 00:49:13,980

those big spread arms they can actually

1208

00:49:19,430 --> 00:49:17,339

fly right into the balloon uh uh wires

1209

00:49:21,829 --> 00:49:19,440

and and capture it

1210

00:49:23,270 --> 00:49:21,839

I think we this is before space you know

1211

00:49:25,670 --> 00:49:23,280

because you think about it you look back

1212

00:49:28,069 --> 00:49:25,680

you know we didn't until the 60s right

1213

00:49:31,010 --> 00:49:28,079

and I wouldn't been into space and so

1214

00:49:33,109 --> 00:49:31,020

until that then it was balloons so high

1215

00:49:35,690 --> 00:49:33,119

altitude balloons was

1216

00:49:38,450 --> 00:49:35,700

the only game in town getting up to

1217

00:49:40,910 --> 00:49:38,460

space right right but then when we went

1218

00:49:42,290 --> 00:49:40,920

to space it's kind we just totally

1219

00:49:44,690 --> 00:49:42,300

forgot about balloons we're like okay

1220

00:49:46,730 --> 00:49:44,700

whatever forget it yeah I think it's

1221

00:49:48,589 --> 00:49:46,740

just coming in now because it I think

1222

00:49:51,530 --> 00:49:48,599

you're going to go to space in a balloon

1223

00:49:52,910 --> 00:49:51,540

before you go to space in a rocket yeah

1224

00:49:55,490 --> 00:49:52,920

I think it's just going to be more

1225

00:49:58,130 --> 00:49:55,500

important in the future militarily and

1226

00:50:01,130 --> 00:49:58,140

for civilians well if you think about it

1227

00:50:04,190 --> 00:50:01,140

too okay what's the value of going up to

1228

00:50:05,630 --> 00:50:04,200

70 000 60 000 feet

1229

00:50:09,290 --> 00:50:05,640

um and looking down at the Earth the

1230

00:50:12,109 --> 00:50:09,300

value is that you're not at 252 miles

1231

00:50:13,609 --> 00:50:12,119

okay and you're actually like 20 to 22

1232

00:50:17,450 --> 00:50:13,619

times closer

1233

00:50:20,150 --> 00:50:17,460

to the planet and uh I was working on a

1234

00:50:23,270 --> 00:50:20,160

satellite project where a satellite from

1235

00:50:26,089 --> 00:50:23,280

orbit could recognize your face Chris

1236

00:50:28,190 --> 00:50:26,099

and see you from space okay and

1237

00:50:30,109 --> 00:50:28,200

recognize you as a human I've seen the

1238

00:50:32,569 --> 00:50:30,119

footage I've seen it I've worked on that

1239

00:50:35,150 --> 00:50:32,579

project as a I was a model maker and

1240

00:50:36,710 --> 00:50:35,160

making engineering models but I saw the

1241

00:50:39,410 --> 00:50:36,720

results and how it could how it could

1242

00:50:40,730 --> 00:50:39,420

work license plates from space at an

1243

00:50:42,230 --> 00:50:40,740

oblique angle looking through the air

1244

00:50:44,990 --> 00:50:42,240

they could read them off the backs of

1245

00:50:47,210 --> 00:50:45,000

cars or the fronts of cars okay that's

1246

00:50:49,250 --> 00:50:47,220

from space now if you're at sixty

1247

00:50:50,630 --> 00:50:49,260

thousand feet with a technology just

1248

00:50:52,069 --> 00:50:50,640

slightly less than that because it needs

1249

00:50:53,870 --> 00:50:52,079

to be light

1250

00:50:55,849 --> 00:50:53,880

um you've got the world at your disposal

1251
00:50:58,790 --> 00:50:55,859
you have loiter time that's days long

1252
00:51:01,910 --> 00:50:58,800
not just timed in seconds

1253
00:51:04,549 --> 00:51:01,920
okay all right and you have the ability

1254
00:51:07,130 --> 00:51:04,559
to be that much closer so you don't need

1255
00:51:09,470 --> 00:51:07,140
the highest resolution to get a very

1256
00:51:12,410 --> 00:51:09,480
Superior image to your satellite

1257
00:51:15,650 --> 00:51:12,420
right and that's uh so there is a place

1258
00:51:18,349 --> 00:51:15,660
for balloon spying right in in my view

1259
00:51:20,510 --> 00:51:18,359
and I think that uh I think we've

1260
00:51:22,670 --> 00:51:20,520
encountered a very public version of it

1261
00:51:25,130 --> 00:51:22,680
I think they've been doing it before but

1262
00:51:27,609 --> 00:51:25,140
now everyone's looking up I looked up

1263
00:51:29,690 --> 00:51:27,619

when I was coming home tonight

1264

00:51:31,549 --> 00:51:29,700

I see any balloons

1265

00:51:32,870 --> 00:51:31,559

you know yeah you know one of the

1266

00:51:35,210 --> 00:51:32,880

questions that I've heard out there and

1267

00:51:37,490 --> 00:51:35,220

I wondered if uh either one of you have

1268

00:51:39,589 --> 00:51:37,500

heard it is why are they why would they

1269

00:51:41,390 --> 00:51:39,599

use such primitive technology we're

1270

00:51:43,609 --> 00:51:41,400

talking let's go back to the Chinese

1271

00:51:47,690 --> 00:51:43,619

balloon itself you know why would they

1272

00:51:49,750 --> 00:51:47,700

use such primitive technology to surveil

1273

00:51:52,670 --> 00:51:49,760

uh either one of you want to take that

1274

00:51:56,030 --> 00:51:52,680

and by the way just in uh two minutes

1275

00:52:03,829 --> 00:51:59,089

your audio's cutting out there yeah I'll

1276

00:52:06,230 --> 00:52:03,839

just uh basically like Mark mentioned

1277

00:52:07,010 --> 00:52:06,240

uh is that balloons give an advantage

1278

00:52:09,470 --> 00:52:07,020

actually

1279

00:52:12,349 --> 00:52:09,480

we just kind of went to satellites but

1280

00:52:14,450 --> 00:52:12,359

like exact Mark I think what you're

1281

00:52:15,829 --> 00:52:14,460

saying is a low earth orbit right so a

1282

00:52:17,930 --> 00:52:15,839

low earth orbit satellite is going to go

1283

00:52:19,910 --> 00:52:17,940

by really quickly I don't know a minute

1284

00:52:22,130 --> 00:52:19,920

or how long it takes for an actual low

1285

00:52:23,930 --> 00:52:22,140

earth orbit to go by yeah you could you

1286

00:52:27,109 --> 00:52:23,940

like when you watch the ISS go by it's

1287

00:52:28,970 --> 00:52:27,119

252 miles up and by the time you call

1288

00:52:30,950 --> 00:52:28,980

out your kids onto the front lawn to see

1289

00:52:34,549 --> 00:52:30,960

it it's already halfway through its its

1290

00:52:37,609 --> 00:52:34,559

pass so it's going to be maybe that's

1291

00:52:40,370 --> 00:52:37,619

that particular guy maybe 25 seconds 35

1292

00:52:43,309 --> 00:52:40,380

seconds at the most right yeah

1293

00:52:44,990 --> 00:52:43,319

um and that's that's a lower that's Leo

1294

00:52:46,549 --> 00:52:45,000

low earth orbit object but if you

1295

00:52:48,530 --> 00:52:46,559

actually put something out at

1296

00:52:50,750 --> 00:52:48,540

geosynchronous or but that's 22 000

1297

00:52:53,150 --> 00:52:50,760

miles away and they can sit over the

1298

00:52:54,770 --> 00:52:53,160

same spot all day and all night and we

1299

00:52:56,270 --> 00:52:54,780

do we have tons of them out there but

1300

00:52:57,950 --> 00:52:56,280

you can't read license plates from that

1301
00:52:59,450 --> 00:52:57,960
one right you can't read license plates

1302
00:53:01,069 --> 00:52:59,460
from there you can't see it right you

1303
00:53:02,870 --> 00:53:01,079
can't get the same resolutions exactly

1304
00:53:04,250 --> 00:53:02,880
right yep so you can read a license

1305
00:53:07,490 --> 00:53:04,260
plate but it's like you're going by

1306
00:53:08,930 --> 00:53:07,500
right it's like there it is and now you

1307
00:53:11,390 --> 00:53:08,940
got to wait 90 minutes to see it again

1308
00:53:13,130 --> 00:53:11,400
if it's still there but in a balloon you

1309
00:53:15,109 --> 00:53:13,140
can loiter all day and this particular

1310
00:53:16,849 --> 00:53:15,119
balloon actually had from my

1311
00:53:20,329 --> 00:53:16,859
understanding had solar panels for power

1312
00:53:21,650 --> 00:53:20,339
and it had motors with propellers so it

1313
00:53:23,650 --> 00:53:21,660

could actually so we can actually

1314

00:53:26,870 --> 00:53:23,660

maneuver itself

1315

00:53:28,849 --> 00:53:26,880

or stay in one place yes well it's

1316

00:53:30,650 --> 00:53:28,859

fighting a jet stream so I have yeah

1317

00:53:33,650 --> 00:53:30,660

it's gonna have a little expectation

1318

00:53:35,329 --> 00:53:33,660

how was it at 60 000 feet are you in the

1319

00:53:37,970 --> 00:53:35,339

jet stream at that point

1320

00:53:39,230 --> 00:53:37,980

I I think that you're still subject to

1321

00:53:40,309 --> 00:53:39,240

the jet stream

1322

00:53:42,109 --> 00:53:40,319

hmm

1323

00:53:44,809 --> 00:53:42,119

okay well I want to say goodbye to

1324

00:53:47,990 --> 00:53:44,819

everyone over there at kgra Radio we'll

1325

00:53:51,650 --> 00:53:48,000

be back next week with Julie Olson about

1326

00:53:53,329 --> 00:53:51,660

a 1982 UFO encounter with actually

1327

00:53:55,970 --> 00:53:53,339

debris we're going to be talking about

1328

00:53:58,190 --> 00:53:55,980

that next week so uh thank you over at

1329

00:54:00,290 --> 00:53:58,200

kgra radio and if you two don't mind

1330

00:54:02,690 --> 00:54:00,300

continue on continuing a little bit

1331

00:54:04,670 --> 00:54:02,700

longer I know Chris what time in the

1332

00:54:07,790 --> 00:54:04,680

morning is it over there it's almost one

1333

00:54:09,410 --> 00:54:07,800

I woke up at six yeah I'm a little tired

1334

00:54:12,349 --> 00:54:09,420

but yeah I can go I can go a few more

1335

00:54:14,450 --> 00:54:12,359

minutes yeah okay yeah

1336

00:54:15,770 --> 00:54:14,460

um so I'm gonna look to see um I think

1337

00:54:18,109 --> 00:54:15,780

there's been some really good questions

1338

00:54:20,870 --> 00:54:18,119

tonight I really appreciate everyone in

1339

00:54:23,990 --> 00:54:20,880

chat and we have a good uh sizable

1340

00:54:25,790 --> 00:54:24,000

audience out there today and uh I I

1341

00:54:27,589 --> 00:54:25,800

thought there would be

1342

00:54:29,990 --> 00:54:27,599

um a lot of people really interested in

1343

00:54:32,210 --> 00:54:30,000

this and I don't think there's anyone

1344

00:54:33,470 --> 00:54:32,220

here on this little mini panel that we

1345

00:54:37,250 --> 00:54:33,480

have

1346

00:54:39,829 --> 00:54:37,260

that's saying that these are aliens or

1347

00:54:40,970 --> 00:54:39,839

uh you know extraterrestrials of some

1348

00:54:42,770 --> 00:54:40,980

kind

1349

00:54:43,370 --> 00:54:42,780

um but I I think

1350

00:54:45,950 --> 00:54:43,380

um

1351

00:54:47,450 --> 00:54:45,960

I do think though the one thing I guess

1352

00:54:51,170 --> 00:54:47,460

when I was thinking about the shoot

1353

00:54:52,670 --> 00:54:51,180

Downs is okay if a typical say there's

1354

00:54:56,270 --> 00:54:52,680

so many sightings a day I understand

1355

00:54:59,030 --> 00:54:56,280

NORAD cites about 10 000 items you know

1356

00:55:02,569 --> 00:54:59,040

objects a day to identify them things

1357

00:55:04,609 --> 00:55:02,579

like that but uh like to say a bona fide

1358

00:55:07,609 --> 00:55:04,619

peaceful

1359

00:55:15,589 --> 00:55:07,619

alien comes in

1360

00:55:23,329 --> 00:55:19,190

can't hear you

1361

00:55:25,490 --> 00:55:23,339

just censored himself

1362

00:55:26,870 --> 00:55:25,500

it's cutting out yeah the government the

1363

00:55:30,230 --> 00:55:26,880

government censored you Martin it's okay

1364

00:55:32,390 --> 00:55:30,240

we know the truth we know the truth are

1365

00:55:35,990 --> 00:55:32,400

you able to hear me now yes okay

1366

00:55:38,710 --> 00:55:36,000

basically what I just said is uh if

1367

00:55:40,910 --> 00:55:38,720

uh if we are shooting down everything

1368

00:55:42,410 --> 00:55:40,920

and you know these objects people are

1369

00:55:44,990 --> 00:55:42,420

seeing like the Tic Tac or whatever

1370

00:55:49,309 --> 00:55:45,000

they're seeing you know coming into the

1371

00:55:53,990 --> 00:55:51,170

yeah exactly no I think I get your

1372

00:55:57,770 --> 00:55:54,000

question yeah cut out again but um I

1373

00:55:59,809 --> 00:55:57,780

totally agree I mean well I guess first

1374

00:56:01,970 --> 00:55:59,819

thing is if you look at all the accounts

1375

00:56:03,349 --> 00:56:01,980

from the Foo Fighters and

1376

00:56:04,790 --> 00:56:03,359

it just looks like you're not gonna be

1377

00:56:06,410 --> 00:56:04,800

able to shoot these things down at least

1378

00:56:09,230 --> 00:56:06,420

all the all the things I've seen if it's

1379

00:56:10,670 --> 00:56:09,240

if it's really is if it's real aliens

1380

00:56:13,010 --> 00:56:10,680

Tic Tacs

1381

00:56:14,990 --> 00:56:13,020

Etc I mean you're not going to shoot it

1382

00:56:17,690 --> 00:56:15,000

and then if you look at the Foo Fighters

1383

00:56:20,510 --> 00:56:17,700

the bullet just went right into them

1384

00:56:22,549 --> 00:56:20,520

so I I I'd be surprised that we're able

1385

00:56:24,109 --> 00:56:22,559

to shoot it down but honestly if it

1386

00:56:26,329 --> 00:56:24,119

really is an alien spacecraft and come

1387

00:56:27,530 --> 00:56:26,339

can come here but let's say that they

1388

00:56:28,970 --> 00:56:27,540

can't get out of the way it does hit

1389

00:56:30,950 --> 00:56:28,980

them

1390

00:56:32,329 --> 00:56:30,960

um yeah I don't think shooting at

1391

00:56:34,130 --> 00:56:32,339

everything that we can't identify is a

1392

00:56:36,710 --> 00:56:34,140

good way to go yeah I don't think any

1393

00:56:38,150 --> 00:56:36,720

kinetic weapons are gonna you know be

1394

00:56:41,510 --> 00:56:38,160

able to do that much damage thermal

1395

00:56:43,609 --> 00:56:41,520

weapons and you know hurling lead

1396

00:56:45,950 --> 00:56:43,619

I mean

1397

00:56:48,829 --> 00:56:45,960

um I think after thousands of years of

1398

00:56:49,970 --> 00:56:48,839

evolution Beyond us that's something

1399

00:56:51,829 --> 00:56:49,980

they would have been able to work

1400

00:56:54,109 --> 00:56:51,839

through because they have to deal with

1401

00:56:56,890 --> 00:56:54,119

that kind of thing on the journey here

1402

00:56:59,390 --> 00:56:56,900

from there wherever they are there's a

1403

00:57:01,490 --> 00:56:59,400

micrometeoroid is basically like a piece

1404

00:57:02,690 --> 00:57:01,500

of you know flying lead actually like a

1405

00:57:04,370 --> 00:57:02,700

bullet going through them and it would

1406

00:57:06,349 --> 00:57:04,380

go right through the craft if it was uh

1407

00:57:08,569 --> 00:57:06,359

so they have to deal with all this stuff

1408

00:57:10,309 --> 00:57:08,579

if you two can hear me I'm gonna run and

1409

00:57:11,630 --> 00:57:10,319

get another if you can continue on

1410

00:57:12,650 --> 00:57:11,640

without me I'm gonna run and get another

1411

00:57:16,670 --> 00:57:12,660

mic

1412

00:57:19,670 --> 00:57:16,680

no problem but yeah I think that being

1413

00:57:20,870 --> 00:57:19,680

said though is if you look at Roswell it

1414

00:57:22,910 --> 00:57:20,880

was a radar

1415

00:57:25,609 --> 00:57:22,920

basically right that's what they say is

1416

00:57:29,089 --> 00:57:25,619

a is a radar or if you think of uh

1417

00:57:31,069 --> 00:57:29,099

nuclear weapons maybe like an EMP could

1418

00:57:33,290 --> 00:57:31,079

cause some issues but if you look at

1419

00:57:34,549 --> 00:57:33,300

like a missile a missile goes Mach 3

1420

00:57:37,430 --> 00:57:34,559

let's say

1421

00:57:40,069 --> 00:57:37,440

these things are going Mach 36 you know

1422

00:57:42,049 --> 00:57:40,079

if it's to be counted correctly so you

1423

00:57:43,910 --> 00:57:42,059

know it'd be like it'd be like getting

1424

00:57:45,650 --> 00:57:43,920

hit by something that runs slower than

1425

00:57:48,829 --> 00:57:45,660

you you know and dying you know like

1426

00:57:51,230 --> 00:57:48,839

something yeah uh I I think that there's

1427

00:57:52,849 --> 00:57:51,240

a I do a talk all over the country and

1428

00:57:55,250 --> 00:57:52,859

in fact I've got several of these

1429

00:57:57,309 --> 00:57:55,260

scheduled for the next couple months and

1430

00:58:01,010 --> 00:57:57,319

I actually talk about

1431

00:58:03,890 --> 00:58:01,020

uh some Advanced physics methodologies

1432

00:58:05,630 --> 00:58:03,900

that could be in play

1433

00:58:09,109 --> 00:58:05,640

um that an advanced species could use

1434

00:58:12,470 --> 00:58:09,119

that could actually get them to uh

1435

00:58:14,510 --> 00:58:12,480

be here or there uh and it's it's an

1436

00:58:17,089 --> 00:58:14,520

interdimensional theory that actually is

1437

00:58:19,010 --> 00:58:17,099

not Science Fiction it's actually deals

1438

00:58:20,630 --> 00:58:19,020

with string theory and a particular

1439

00:58:23,089 --> 00:58:20,640

variant of string theory called Randall

1440

00:58:24,770 --> 00:58:23,099

sundrome one where you actually have our

1441

00:58:27,109 --> 00:58:24,780

four dimensions and then you have a

1442

00:58:29,150 --> 00:58:27,119

Fifth Dimension and that Fifth Dimension

1443

00:58:31,010 --> 00:58:29,160

is a highly warped location and if you

1444

00:58:33,109 --> 00:58:31,020

can get into that Fifth Dimension you

1445

00:58:35,390 --> 00:58:33,119

could effectively punch out of x y z

1446

00:58:36,770 --> 00:58:35,400

moving through time go into this Fifth

1447

00:58:37,789 --> 00:58:36,780

Dimension then punch in anywhere else

1448

00:58:41,990 --> 00:58:37,799

you want

1449

00:58:44,349 --> 00:58:42,000

and as Fantastical as that sounds and as

1450

00:58:47,690 --> 00:58:44,359

silly in science fictiony as that sounds

1451

00:58:50,450 --> 00:58:47,700

it turns out that there's actually a

1452

00:58:53,809 --> 00:58:50,460

real basis to this and it has to do with

1453

00:58:55,670 --> 00:58:53,819

with particles that the Large Hadron

1454

00:58:58,190 --> 00:58:55,680

Collider it's CERN they're actually

1455

00:59:01,970 --> 00:58:58,200

studying right now these are called

1456

00:59:03,410 --> 00:59:01,980

collusicine particles and I know an

1457

00:59:05,630 --> 00:59:03,420

aerospace engineer and several

1458

00:59:08,150 --> 00:59:05,640

physicists who are you know right on

1459

00:59:10,010 --> 00:59:08,160

board with this concept of hey this is

1460

00:59:11,870 --> 00:59:10,020

probably how they're going to do it if

1461

00:59:13,730 --> 00:59:11,880

they can get here from there they're

1462

00:59:16,250 --> 00:59:13,740

going to punch out their space and punch

1463

00:59:17,990 --> 00:59:16,260

into ours and not have to travel the

1464

00:59:20,630 --> 00:59:18,000

intervening space in between

1465

00:59:23,210 --> 00:59:20,640

do this that's pretty interesting stuff

1466

00:59:24,890 --> 00:59:23,220

but one other point I guess that that I

1467

00:59:27,410 --> 00:59:24,900

thought of is

1468

00:59:29,870 --> 00:59:27,420

um still old technology does tend to

1469

00:59:31,789 --> 00:59:29,880

work you know like uh with all of our

1470

00:59:34,309 --> 00:59:31,799

fancy weapons and all of our fancy

1471

00:59:36,829 --> 00:59:34,319

systems and Radars and everything uh

1472

00:59:39,109 --> 00:59:36,839

bullets are still the primary weapon

1473

00:59:41,630 --> 00:59:39,119

you know so bullets are still going to

1474

00:59:44,150 --> 00:59:41,640

work they work very well and if you look

1475

00:59:46,309 --> 00:59:44,160

at in the the wars look in Iraq and

1476

00:59:49,010 --> 00:59:46,319

Afghanistan how we effectively lost was

1477

00:59:52,069 --> 00:59:49,020

from improvised explosive devices so

1478

00:59:53,329 --> 00:59:52,079

just very rudimentary explosive devices

1479

00:59:55,309 --> 00:59:53,339

but they're everywhere they're

1480

00:59:58,250 --> 00:59:55,319

ubiquitous they're simple

1481

01:00:01,010 --> 00:59:58,260

you know so I think that's why that's

1482

01:00:03,049 --> 01:00:01,020

why we're going the mass camera route is

1483

01:00:06,170 --> 01:00:03,059

just passive sensors you know we want

1484

01:00:07,730 --> 01:00:06,180

thousands of simple passive sensors uh

1485

01:00:10,430 --> 01:00:07,740

to try and correlate that data together

1486

01:00:13,069 --> 01:00:10,440

you know so the idea is simple but if

1487

01:00:16,250 --> 01:00:13,079

you Mass you know decentralize over many

1488

01:00:17,870 --> 01:00:16,260

thousands of units maybe we can break

1489

01:00:19,730 --> 01:00:17,880

through so even if they have amazingly

1490

01:00:22,370 --> 01:00:19,740

advanced technology over us

1491

01:00:24,589 --> 01:00:22,380

I still want to push to test you know I

1492

01:00:27,530 --> 01:00:24,599

still want to see if we can get through

1493

01:00:30,170 --> 01:00:27,540

I agree with that because most likely uh

1494

01:00:32,569 --> 01:00:30,180

they're using technology that at one

1495

01:00:34,430 --> 01:00:32,579

point or another takes them outside our

1496

01:00:37,010 --> 01:00:34,440

ability to see what they're doing quote

1497

01:00:40,190 --> 01:00:37,020

unquote because they moved into that

1498

01:00:42,049 --> 01:00:40,200

Fifth Dimension say now if that is what

1499

01:00:43,910 --> 01:00:42,059

happened and if that's really what's

1500

01:00:46,490 --> 01:00:43,920

happening and again string theory has to

1501
01:00:48,410 --> 01:00:46,500
be proven before they can actually say

1502
01:00:50,150 --> 01:00:48,420
that that's true they have to have a

1503
01:00:53,690 --> 01:00:50,160
test that can even prove String Theory

1504
01:00:55,430 --> 01:00:53,700
first that's correct and then that's but

1505
01:00:57,230 --> 01:00:55,440
um that's what the Large Hadron Collider

1506
01:00:58,970 --> 01:00:57,240
they're working on over there especially

1507
01:01:00,470 --> 01:00:58,980
with these KK particles that they're

1508
01:01:01,670 --> 01:01:00,480
doing the collusicline particles well

1509
01:01:04,609 --> 01:01:01,680
anyway okay

1510
01:01:08,329 --> 01:01:04,619
um the whole point here is that at some

1511
01:01:10,210 --> 01:01:08,339
point uh entering our dimensions and

1512
01:01:13,010 --> 01:01:10,220
leaving our dimensional space

1513
01:01:15,710 --> 01:01:13,020

they leave going each way what I call

1514

01:01:18,109 --> 01:01:15,720

skid marks okay yeah funny funny name

1515

01:01:20,089 --> 01:01:18,119

every 15 year old loves me okay but

1516

01:01:22,190 --> 01:01:20,099

these skid marks are

1517

01:01:25,130 --> 01:01:22,200

um are the signs that they're

1518

01:01:28,990 --> 01:01:25,140

transitioning to and from one place to

1519

01:01:32,930 --> 01:01:29,000

another uh example when they transition

1520

01:01:35,150 --> 01:01:32,940

out of our dimensional space we might

1521

01:01:37,910 --> 01:01:35,160

see a burst of gamma rays

1522

01:01:40,370 --> 01:01:37,920

okay when they transition in we might

1523

01:01:42,950 --> 01:01:40,380

see a similar burst of gamma rays

1524

01:01:45,470 --> 01:01:42,960

followed by an infrared signature

1525

01:01:47,870 --> 01:01:45,480

followed by potentially a high energy

1526

01:01:50,030 --> 01:01:47,880

signature and the ultraviolet end okay

1527

01:01:52,849 --> 01:01:50,040

and then they'll manifest to be seen

1528

01:01:54,349 --> 01:01:52,859

with our equipment right uh even easier

1529

01:01:56,270 --> 01:01:54,359

so

1530

01:01:58,670 --> 01:01:56,280

um that's the kind of thing that I was

1531

01:02:00,770 --> 01:01:58,680

after in when we were working with Doug

1532

01:02:02,990 --> 01:02:00,780

Trumbull you know to try and do this

1533

01:02:04,250 --> 01:02:03,000

this UFO detection system had he not

1534

01:02:05,750 --> 01:02:04,260

passed that we would have been doing it

1535

01:02:07,789 --> 01:02:05,760

so

1536

01:02:11,510 --> 01:02:07,799

um you know Jacques Valley was kind

1537

01:02:12,950 --> 01:02:11,520

enough to introduce me to Avi Loeb but I

1538

01:02:15,890 --> 01:02:12,960

worked with Avi in a couple projects

1539

01:02:18,530 --> 01:02:15,900

before this and so I know him and he's

1540

01:02:22,089 --> 01:02:18,540

trying to do a similar thing and again

1541

01:02:24,650 --> 01:02:22,099

using high tech to try and detect

1542

01:02:26,990 --> 01:02:24,660

these so-called skid marks of an

1543

01:02:30,289 --> 01:02:27,000

advanced species that might be utilizing

1544

01:02:32,150 --> 01:02:30,299

our near space that's very cool I think

1545

01:02:35,270 --> 01:02:32,160

that's where where it is right I mean

1546

01:02:37,789 --> 01:02:35,280

and if everyone has released everybody

1547

01:02:39,890 --> 01:02:37,799

has one of these okay these can be

1548

01:02:41,870 --> 01:02:39,900

leveraged into doing some amazing things

1549

01:02:43,849 --> 01:02:41,880

as well

1550

01:02:45,710 --> 01:02:43,859

you can actually detect gamma rays with

1551

01:02:47,690 --> 01:02:45,720

this thing did you know that

1552

01:02:49,430 --> 01:02:47,700

there's a gamma ray detector that you

1553

01:02:50,329 --> 01:02:49,440

can you put on your iPhone believe it or

1554

01:02:52,370 --> 01:02:50,339

not

1555

01:02:54,530 --> 01:02:52,380

it reminds me of uepx where they

1556

01:02:58,130 --> 01:02:54,540

detected a tear in the sky

1557

01:03:01,010 --> 01:02:58,140

they detected that muon theater the 43

1558

01:03:04,309 --> 01:03:01,020

megawatt muon detection and that queued

1559

01:03:06,230 --> 01:03:04,319

up their Optical UFO dap system yeah and

1560

01:03:07,670 --> 01:03:06,240

that's where they caught the tear in the

1561

01:03:08,990 --> 01:03:07,680

sky that's interesting yeah kind of

1562

01:03:11,210 --> 01:03:09,000

similar from the movie tearing this guy

1563

01:03:12,589 --> 01:03:11,220

yep for the movie tearing the sky that's

1564

01:03:14,630 --> 01:03:12,599

Carolyn's movie I was just talking to

1565

01:03:16,010 --> 01:03:14,640

her the other day uh because she's doing

1566

01:03:17,569 --> 01:03:16,020

another one and I'm in that one we're

1567

01:03:19,609 --> 01:03:17,579

going to be talking about that okay see

1568

01:03:21,230 --> 01:03:19,619

yeah I interviewed her she taught yeah

1569

01:03:23,150 --> 01:03:21,240

it was a great interview she mentioned

1570

01:03:24,650 --> 01:03:23,160

uh that movie but she couldn't release

1571

01:03:26,569 --> 01:03:24,660

any more details about it or something

1572

01:03:27,470 --> 01:03:26,579

she didn't talk about it how long ago

1573

01:03:30,170 --> 01:03:27,480

was that

1574

01:03:31,849 --> 01:03:30,180

a month I think okay

1575

01:03:35,390 --> 01:03:31,859

yeah

1576

01:03:38,390 --> 01:03:35,400

for the next one that's what we're doing

1577

01:03:39,470 --> 01:03:38,400

right now so all right cool yeah yeah so

1578

01:03:41,750 --> 01:03:39,480

you're gonna have a lot more interviews

1579

01:03:45,109 --> 01:03:41,760

with her I can tell you that so anything

1580

01:03:47,870 --> 01:03:45,119

here's a question uh any theories on

1581

01:03:49,609 --> 01:03:47,880

well first of all is my audio working it

1582

01:03:51,230 --> 01:03:49,619

should be working right yeah yep is

1583

01:03:53,210 --> 01:03:51,240

there any theories on why these balloons

1584

01:03:57,230 --> 01:03:53,220

were traveling at a relatively low

1585

01:03:59,450 --> 01:03:57,240

altitude of 60 000 feet is uh that's

1586

01:04:02,390 --> 01:03:59,460

kind of a high altitude for uh traveling

1587

01:04:04,549 --> 01:04:02,400

for a balloon but forty thousand

1588

01:04:06,829 --> 01:04:04,559

um I guess you'd consider that a low

1589

01:04:10,069 --> 01:04:06,839

altitude and I don't know if the

1590

01:04:13,010 --> 01:04:10,079

question is uh because of the there's

1591

01:04:15,230 --> 01:04:13,020

more of a visual at that point I mean

1592

01:04:16,730 --> 01:04:15,240

really at 40 000 feet it's just a car

1593

01:04:19,490 --> 01:04:16,740

sized balloon you probably won't see it

1594

01:04:22,250 --> 01:04:19,500

right yeah but still okay keep in mind

1595

01:04:25,430 --> 01:04:22,260

that for me okay if we consider this

1596

01:04:26,750 --> 01:04:25,440

traveling a relatively low altitude uh

1597

01:04:29,030 --> 01:04:26,760

how do we know that balloon wasn't

1598

01:04:31,309 --> 01:04:29,040

transitioning to a higher altitude

1599

01:04:33,530 --> 01:04:31,319

okay if it's a balloon they're gonna

1600

01:04:35,690 --> 01:04:33,540

keep climbing until they reach that

1601
01:04:37,730 --> 01:04:35,700
equilibrium point okay and that

1602
01:04:39,049 --> 01:04:37,740
equilibrium point will be the weight of

1603
01:04:41,089 --> 01:04:39,059
the mass of the whole Mass they have

1604
01:04:43,430 --> 01:04:41,099
plus the buoyancy that the balloon gives

1605
01:04:45,890 --> 01:04:43,440
and they could technically reach a

1606
01:04:47,930 --> 01:04:45,900
neutral buoyancy position where they'll

1607
01:04:50,870 --> 01:04:47,940
just float in a certain altitude right

1608
01:04:52,910 --> 01:04:50,880
so but I don't know for sure whether

1609
01:04:55,250 --> 01:04:52,920
these this is so early in the game we

1610
01:04:57,650 --> 01:04:55,260
don't know whether this that 40 000 one

1611
01:04:59,809 --> 01:04:57,660
was translating to a higher altitude at

1612
01:05:01,309 --> 01:04:59,819
that point we still don't know that it

1613
01:05:02,510 --> 01:05:01,319

could have been true yeah I think they

1614

01:05:05,349 --> 01:05:02,520

were going the other way I think

1615

01:05:11,150 --> 01:05:08,089

yeah because like ours are our helium

1616

01:05:13,549 --> 01:05:11,160

balloon the one we sent up up to 110 000

1617

01:05:15,650 --> 01:05:13,559

feet and then it blew up you know we

1618

01:05:17,390 --> 01:05:15,660

didn't want it to go very far

1619

01:05:18,890 --> 01:05:17,400

but if we didn't if we put in less

1620

01:05:21,650 --> 01:05:18,900

healing because we were very concerned

1621

01:05:23,809 --> 01:05:21,660

right so we overfilled it uh that was

1622

01:05:25,670 --> 01:05:23,819

probably the biggest concern was that it

1623

01:05:27,770 --> 01:05:25,680

wouldn't go high enough it to explode

1624

01:05:29,089 --> 01:05:27,780

and so what would happen then is it

1625

01:05:31,490 --> 01:05:29,099

would just float around in the

1626

01:05:34,490 --> 01:05:31,500

stratosphere and and slowly descend as

1627

01:05:35,630 --> 01:05:34,500

it's leaking out helium yeah yep so I

1628

01:05:37,730 --> 01:05:35,640

think these are probably actually on the

1629

01:05:39,470 --> 01:05:37,740

way down like that balloon the Chinese

1630

01:05:41,690 --> 01:05:39,480

balloon this by balloon that was shut

1631

01:05:44,329 --> 01:05:41,700

down at 60 you know this five balloon at

1632

01:05:47,150 --> 01:05:44,339

64 000 feet it was probably much higher

1633

01:05:48,710 --> 01:05:47,160

earlier as it was crossing over the U.S

1634

01:05:51,109 --> 01:05:48,720

and that may have been why they elected

1635

01:05:52,670 --> 01:05:51,119

not to shoot it maybe earlier it's you

1636

01:05:58,390 --> 01:05:52,680

know a lot more difficult 100 000 feet

1637

01:06:04,069 --> 01:06:01,370

we'll eventually get I'm sure the

1638

01:06:05,089 --> 01:06:04,079

details on its altitude profile and what

1639

01:06:07,789 --> 01:06:05,099

it did

1640

01:06:09,349 --> 01:06:07,799

go ahead Martin I'm sorry no I do think

1641

01:06:10,609 --> 01:06:09,359

that we're going to continue to see

1642

01:06:14,210 --> 01:06:10,619

shootdowns

1643

01:06:19,730 --> 01:06:16,789

if they keep incur in doing these

1644

01:06:21,710 --> 01:06:19,740

incursions and probably

1645

01:06:23,390 --> 01:06:21,720

you know I mean they're using it for

1646

01:06:25,130 --> 01:06:23,400

political points too keep in mind right

1647

01:06:27,770 --> 01:06:25,140

I mean we got to be careful

1648

01:06:29,150 --> 01:06:27,780

yeah that's true yeah I think they're

1649

01:06:32,089 --> 01:06:29,160

probably not it's probably not necessary

1650

01:06:33,609 --> 01:06:32,099

you know I think they'll my feeling is

1651

01:06:35,870 --> 01:06:33,619

that uh

1652

01:06:37,670 --> 01:06:35,880

they've been a little trigger happy or

1653

01:06:40,069 --> 01:06:37,680

maybe the consensuses they've been too

1654

01:06:41,569 --> 01:06:40,079

trigger happy yeah like you know you

1655

01:06:43,370 --> 01:06:41,579

probably didn't need to shoot down any

1656

01:06:46,670 --> 01:06:43,380

of the balloons to be honest

1657

01:06:49,010 --> 01:06:46,680

um you could have tried to track them

1658

01:06:51,230 --> 01:06:49,020

no what about what about the Chinese

1659

01:06:52,730 --> 01:06:51,240

balloon in particular

1660

01:06:55,430 --> 01:06:52,740

um because you know the Chinese were

1661

01:06:57,770 --> 01:06:55,440

touting off that this thing was just a

1662

01:06:59,690 --> 01:06:57,780

weather balloon and if we did not shoot

1663

01:07:01,789 --> 01:06:59,700

it down we wouldn't in recover then we

1664

01:07:03,529 --> 01:07:01,799

wouldn't be able to say hey look you

1665

01:07:06,109 --> 01:07:03,539

know you have egg on your face this sir

1666

01:07:09,890 --> 01:07:06,119

egg foo young as someone said uh because

1667

01:07:11,510 --> 01:07:09,900

you know now you have to explain uh why

1668

01:07:12,710 --> 01:07:11,520

this you were saying it was a weather

1669

01:07:15,109 --> 01:07:12,720

balloon and it's not you were

1670

01:07:18,650 --> 01:07:15,119

surveilling us brinksmanship

1671

01:07:20,150 --> 01:07:18,660

in a word uh it's it's how governments

1672

01:07:22,730 --> 01:07:20,160

interact with each other at the public

1673

01:07:24,950 --> 01:07:22,740

level right uh they're gonna complain

1674

01:07:26,809 --> 01:07:24,960

and say that we violated this that and

1675

01:07:28,370 --> 01:07:26,819

the other thing how dare you shoot down

1676
01:07:29,569 --> 01:07:28,380
our balloon that we are flying over your

1677
01:07:31,190 --> 01:07:29,579
country

1678
01:07:33,650 --> 01:07:31,200
and how long would our balloon last

1679
01:07:36,589 --> 01:07:33,660
flying over their country okay yeah

1680
01:07:38,510 --> 01:07:36,599
wasn't there something like that exactly

1681
01:07:40,670 --> 01:07:38,520
yeah and they just shot one down

1682
01:07:42,549 --> 01:07:40,680
actually I don't know if it was ours but

1683
01:07:45,289 --> 01:07:42,559
they did just shoot another one down

1684
01:07:47,630 --> 01:07:45,299
so they're coming from somewhere

1685
01:07:49,549 --> 01:07:47,640
yeah um and there's probably some little

1686
01:07:51,770 --> 01:07:49,559
alien somewhere going hey Target let's

1687
01:07:53,510 --> 01:07:51,780
set up another one okay there we go

1688
01:07:55,190 --> 01:07:53,520

right there you know yeah it's a weather

1689

01:07:56,770 --> 01:07:55,200

balloon they spell my weather balloon

1690

01:07:59,809 --> 01:07:56,780

Mommy

1691

01:08:01,730 --> 01:07:59,819

I love that graphic Dean my friend Dean

1692

01:08:03,410 --> 01:08:01,740

sent that me that to me I think it's

1693

01:08:04,609 --> 01:08:03,420

good though that and someone said here's

1694

01:08:07,490 --> 01:08:04,619

the pizza and we're going to be

1695

01:08:10,250 --> 01:08:07,500

interviewing the pilot to the balloon

1696

01:08:12,109 --> 01:08:10,260

oh that's just great yeah

1697

01:08:20,349 --> 01:08:12,119

I saw that movie no way he's smiling

1698

01:08:25,070 --> 01:08:23,510

I forgot about that Mark what'd you say

1699

01:08:27,829 --> 01:08:25,080

Chris I'm sorry did you see they made a

1700

01:08:30,110 --> 01:08:27,839

UAP another UAP task force now

1701

01:08:33,229 --> 01:08:30,120

oh yeah yeah I saw that yeah yeah yeah

1702

01:08:35,510 --> 01:08:33,239

yeah or the balloon task force is that

1703

01:08:37,430 --> 01:08:35,520

what it's going to be all right is it a

1704

01:08:40,370 --> 01:08:37,440

balloon test for us I I don't know all I

1705

01:08:43,189 --> 01:08:40,380

saw was uh yeah that's right of course

1706

01:08:45,950 --> 01:08:43,199

I'm not sure you know I'll tell you

1707

01:08:48,229 --> 01:08:45,960

what's interesting he said okay uh that

1708

01:08:52,370 --> 01:08:48,239

is that blinking or whoever that is

1709

01:08:54,769 --> 01:08:52,380

who is that guy uh this is John Kirby oh

1710

01:08:56,870 --> 01:08:54,779

it's your Kirby Right Curry yeah Kirby

1711

01:08:57,829 --> 01:08:56,880

stated uh which I thought was really

1712

01:09:00,430 --> 01:08:57,839

interesting

1713

01:09:02,630 --> 01:09:00,440

he said uh when asked the question

1714

01:09:04,849 --> 01:09:02,640

literally ask the question could these

1715

01:09:09,050 --> 01:09:04,859

be alien spacecraft

1716

01:09:10,430 --> 01:09:09,060

I mean he should have said oh I I would

1717

01:09:11,749 --> 01:09:10,440

absolutely not think so or something

1718

01:09:13,249 --> 01:09:11,759

like that but no he said at this point

1719

01:09:14,689 --> 01:09:13,259

we don't know what they are

1720

01:09:16,430 --> 01:09:14,699

like wow

1721

01:09:19,490 --> 01:09:16,440

well that's interesting

1722

01:09:21,349 --> 01:09:19,500

you know because the the terms alien

1723

01:09:23,749 --> 01:09:21,359

spacecraft or extraterrestrial craft

1724

01:09:25,430 --> 01:09:23,759

were in that previous sentence and he

1725

01:09:27,769 --> 01:09:25,440

said we can't say what they are okay

1726

01:09:29,329 --> 01:09:27,779

because we don't know

1727

01:09:33,349 --> 01:09:29,339

so I thought that was pretty interesting

1728

01:09:35,809 --> 01:09:33,359

yeah uh I I pulled a uh there was a

1729

01:09:37,249 --> 01:09:35,819

headline that I did pull uh about that

1730

01:09:39,890 --> 01:09:37,259

what do you you want to turn that up

1731

01:09:42,110 --> 01:09:39,900

Chris uh no I was just playing yeah um

1732

01:09:43,550 --> 01:09:42,120

just interesting that they made this

1733

01:09:46,370 --> 01:09:43,560

task force now

1734

01:09:47,510 --> 01:09:46,380

yeah I'm curious to see so I I think

1735

01:09:49,070 --> 01:09:47,520

there'll be

1736

01:09:50,990 --> 01:09:49,080

I think there's other ways to track

1737

01:09:53,510 --> 01:09:51,000

these objects you probably don't need to

1738

01:09:56,689 --> 01:09:53,520

shoot them down we can probably capture

1739

01:09:58,370 --> 01:09:56,699

them using other methods but yeah I

1740

01:09:59,630 --> 01:09:58,380

don't know it was good to see I think I

1741

01:10:02,810 --> 01:09:59,640

was impressed with all the pilots

1742

01:10:04,910 --> 01:10:02,820

actions you know they were definitely

1743

01:10:07,729 --> 01:10:04,920

they did their job

1744

01:10:10,490 --> 01:10:07,739

yeah uh and

1745

01:10:14,930 --> 01:10:10,500

so but the only thing that that concerns

1746

01:10:17,270 --> 01:10:14,940

me also is uh you know maybe this won't

1747

01:10:21,169 --> 01:10:17,280

lead to a war or whatever but could this

1748

01:10:23,149 --> 01:10:21,179

lead to uh you know more surveillance I

1749

01:10:25,669 --> 01:10:23,159

mean do you think that this is going to

1750

01:10:27,470 --> 01:10:25,679

continue on or do you think this has

1751

01:10:29,270 --> 01:10:27,480

always been going on and we're just

1752

01:10:31,550 --> 01:10:29,280

discovering it

1753

01:10:35,149 --> 01:10:31,560

I think we've always known it's been

1754

01:10:37,010 --> 01:10:35,159

there I think that it won't stop and I

1755

01:10:40,490 --> 01:10:37,020

think it's just going to continue we

1756

01:10:42,770 --> 01:10:40,500

surveil them they surveil us okay the

1757

01:10:44,810 --> 01:10:42,780

Russians watch the two of us and the two

1758

01:10:47,209 --> 01:10:44,820

of us watch them and it

1759

01:10:49,669 --> 01:10:47,219

it's ongoing Everyone's Watching

1760

01:10:52,850 --> 01:10:49,679

everybody else it's the game of spycraft

1761

01:10:55,430 --> 01:10:52,860

and that and honestly

1762

01:10:57,709 --> 01:10:55,440

um it's actually comforting to know that

1763

01:10:59,450 --> 01:10:57,719

everybody's watching each other okay to

1764

01:11:01,970 --> 01:10:59,460

be honest with you because it means that

1765

01:11:04,490 --> 01:11:01,980

we'll know if something really really

1766

01:11:06,229 --> 01:11:04,500

bad is about to happen because someone's

1767

01:11:09,050 --> 01:11:06,239

going to be able to give it away you

1768

01:11:11,090 --> 01:11:09,060

know so in a way I hate to say it that

1769

01:11:13,729 --> 01:11:11,100

way but it's kind of comforting

1770

01:11:15,910 --> 01:11:13,739

you know We're Not The Only Game in Town

1771

01:11:19,550 --> 01:11:15,920

certainly we have plenty of Technology

1772

01:11:21,410 --> 01:11:19,560

uh we are probably the most feared

1773

01:11:23,209 --> 01:11:21,420

country in the world

1774

01:11:24,890 --> 01:11:23,219

um and we do have the most technology

1775

01:11:26,990 --> 01:11:24,900

and we have the most capability we're

1776

01:11:29,630 --> 01:11:27,000

the largest standing army in any of any

1777

01:11:31,189 --> 01:11:29,640

army in the planet okay and that has to

1778

01:11:33,770 --> 01:11:31,199

do with all the people that have guns of

1779

01:11:35,270 --> 01:11:33,780

their own you know so I don't think we

1780

01:11:39,410 --> 01:11:35,280

have to worry about

1781

01:11:42,530 --> 01:11:39,420

um an attack uh on our on our land mass

1782

01:11:44,209 --> 01:11:42,540

I mean Red Dawn would never happen not

1783

01:11:46,729 --> 01:11:44,219

in the current situation that's my

1784

01:11:48,410 --> 01:11:46,739

feeling so I think that we're pretty

1785

01:11:51,010 --> 01:11:48,420

secure in that way but I do think that

1786

01:11:53,870 --> 01:11:51,020

there's a lot of people that are

1787

01:11:56,149 --> 01:11:53,880

a little Trigger Happy in the government

1788

01:11:58,430 --> 01:11:56,159

you know and we gotta

1789

01:12:00,830 --> 01:11:58,440

bring them in for sure

1790

01:12:02,750 --> 01:12:00,840

now this comment supposedly they haven't

1791

01:12:05,689 --> 01:12:02,760

recovered anything other than the first

1792

01:12:07,370 --> 01:12:05,699

Chinese balloon are either one of you

1793

01:12:09,290 --> 01:12:07,380

have either one of you read anything

1794

01:12:10,669 --> 01:12:09,300

along these lines

1795

01:12:13,189 --> 01:12:10,679

I mean I would think that didn't

1796

01:12:14,630 --> 01:12:13,199

something go down on an ice Mass

1797

01:12:17,149 --> 01:12:14,640

and it seems yeah he was talking about

1798

01:12:20,990 --> 01:12:17,159

the dead horse up in prudo Bay Alaska on

1799

01:12:25,130 --> 01:12:22,970

it seems like that would be a slam dunk

1800

01:12:27,890 --> 01:12:25,140

for recovery

1801

01:12:31,130 --> 01:12:27,900

yeah I was I meant to look up the

1802

01:12:32,450 --> 01:12:31,140

weather I haven't but if it's clear you

1803

01:12:34,490 --> 01:12:32,460

should be able to just drive out there

1804

01:12:37,970 --> 01:12:34,500

and find it they did say that weather

1805

01:12:42,130 --> 01:12:37,980

was a factor uh out there so oh I see

1806

01:12:44,930 --> 01:12:42,140

yep and of course don't forget it's dark

1807

01:12:46,790 --> 01:12:44,940

okay it's not like it's daytime out

1808

01:12:48,709 --> 01:12:46,800

there you know it's gonna be dusk at the

1809

01:12:50,750 --> 01:12:48,719

minimum dark at the most you know for

1810

01:12:53,630 --> 01:12:50,760

most of that time

1811

01:12:55,790 --> 01:12:53,640

do we actually have lasers do either one

1812

01:12:59,030 --> 01:12:55,800

of you know do we have lasers that could

1813

01:13:00,830 --> 01:12:59,040

actually uh work for for something like

1814

01:13:03,890 --> 01:13:00,840

this that was the first thing I thought

1815

01:13:06,649 --> 01:13:03,900

of was the Airborne laser

1816

01:13:08,510 --> 01:13:06,659

I would yeah that's a great idea Mitch I

1817

01:13:12,709 --> 01:13:08,520

mean you're not you're not wasting uh a

1818

01:13:14,330 --> 01:13:12,719

600 000 missile if you miss if you're

1819

01:13:16,250 --> 01:13:14,340

shooting with a laser I'm sure there's

1820

01:13:17,930 --> 01:13:16,260

you know I mean there's great amount of

1821

01:13:20,330 --> 01:13:17,940

energy to produce the laser that would

1822

01:13:22,370 --> 01:13:20,340

do something uh but that's that's all

1823

01:13:25,970 --> 01:13:22,380

you're really uh using is the energy

1824

01:13:29,390 --> 01:13:25,980

part of it well in Hawaii and on the

1825

01:13:31,610 --> 01:13:29,400

Mauna Kea uh they they routinely beam a

1826

01:13:33,050 --> 01:13:31,620

green laser to the Moon to hit the Retro

1827

01:13:35,270 --> 01:13:33,060

reflector array which was made at my

1828

01:13:37,010 --> 01:13:35,280

University by the way and bring back the

1829

01:13:39,470 --> 01:13:37,020

signal so they could make gauge the

1830

01:13:42,350 --> 01:13:39,480

distance to the Moon okay

1831

01:13:44,149 --> 01:13:42,360

um that green laser is not high power

1832

01:13:46,310 --> 01:13:44,159

but you do have a problem of beam

1833

01:13:49,790 --> 01:13:46,320

Divergence the farther out the beam Goes

1834

01:13:52,370 --> 01:13:49,800

The Wider it gets and it spreads more so

1835

01:13:54,649 --> 01:13:52,380

if you're gonna pack a punch you have to

1836

01:13:56,330 --> 01:13:54,659

pack a punch that can work in a diverged

1837

01:13:58,550 --> 01:13:56,340

beam too because by the time it gets in

1838

01:14:00,350 --> 01:13:58,560

a balloon it's not going to be a being

1839

01:14:02,410 --> 01:14:00,360

this wide it can slice through your head

1840

01:14:05,630 --> 01:14:02,420

okay it's going to be a beam that's

1841

01:14:07,130 --> 01:14:05,640

possibly a foot or more wide so it's

1842

01:14:09,830 --> 01:14:07,140

going to have to have a lot of energy

1843

01:14:11,510 --> 01:14:09,840

and a lot of good collimated light and

1844

01:14:14,810 --> 01:14:11,520

good weather

1845

01:14:16,850 --> 01:14:14,820

you have to have clean crisp air between

1846

01:14:19,370 --> 01:14:16,860

you and that balloon in order to get

1847

01:14:21,890 --> 01:14:19,380

that energy beam there so can it be done

1848

01:14:24,470 --> 01:14:21,900

sure we have we have energy weapons of

1849

01:14:27,590 --> 01:14:24,480

sorts uh right now you know that we can

1850

01:14:29,209 --> 01:14:27,600

use but uh lasers are that's kind of

1851
01:14:31,790 --> 01:14:29,219
tough you could just beam a laser on it

1852
01:14:32,870 --> 01:14:31,800
sure you know if it was here I would

1853
01:14:34,610 --> 01:14:32,880
attempt it I would have attempted to

1854
01:14:38,209 --> 01:14:34,620
take one of my argon lasers and try and

1855
01:14:40,370 --> 01:14:38,219
Light It Up you know but Chris this

1856
01:14:42,290 --> 01:14:40,380
question's for you if they use the sky

1857
01:14:44,450 --> 01:14:42,300
blue balloons would they be harder to

1858
01:14:47,149 --> 01:14:44,460
shoot down don't they take a lock on

1859
01:14:48,890 --> 01:14:47,159
like an object through radar or do they

1860
01:14:51,169 --> 01:14:48,900
do it visually

1861
01:14:52,790 --> 01:14:51,179
yeah that was the kind of the issue I

1862
01:14:55,370 --> 01:14:52,800
was talking about is they had radar

1863
01:14:57,709 --> 01:14:55,380

locks most of the time and their missile

1864

01:14:59,630 --> 01:14:57,719

could see it in their targeting pop but

1865

01:15:01,790 --> 01:14:59,640

they couldn't see with their eyes until

1866

01:15:03,350 --> 01:15:01,800

I was too late yeah it was too small

1867

01:15:04,490 --> 01:15:03,360

right

1868

01:15:06,770 --> 01:15:04,500

um so yeah

1869

01:15:09,169 --> 01:15:06,780

they couldn't see it anyway you know the

1870

01:15:11,149 --> 01:15:09,179

the one over Lake Huron so if you

1871

01:15:12,830 --> 01:15:11,159

painted it blue yeah maybe it's even

1872

01:15:14,709 --> 01:15:12,840

harder to see I don't think it would

1873

01:15:17,030 --> 01:15:14,719

have mattered it's still difficult

1874

01:15:19,729 --> 01:15:17,040

but yeah it matters obviously if you

1875

01:15:22,070 --> 01:15:19,739

look at the planes you know in Alaska we

1876

01:15:24,709 --> 01:15:22,080

had these white and black painted Jets

1877

01:15:27,229 --> 01:15:24,719

and in the winter those things would

1878

01:15:28,250 --> 01:15:27,239

just disappear staring down you know but

1879

01:15:30,110 --> 01:15:28,260

in the summer

1880

01:15:32,149 --> 01:15:30,120

you could see him see him pretty easily

1881

01:15:33,070 --> 01:15:32,159

looked down so yeah it does matter

1882

01:15:36,050 --> 01:15:33,080

yeah

1883

01:15:38,330 --> 01:15:36,060

can I show uh uh my screen a little bit

1884

01:15:39,050 --> 01:15:38,340

here Martin can I uh hang up can I share

1885

01:15:41,689 --> 01:15:39,060

some

1886

01:15:43,970 --> 01:15:41,699

yeah sure oh you have a you know how to

1887

01:15:46,310 --> 01:15:43,980

share a screen on that Mark yeah I am

1888

01:15:47,450 --> 01:15:46,320

I'm just trying to uh

1889

01:15:56,330 --> 01:15:47,460

uh

1890

01:15:58,010 --> 01:15:56,340

only way to shoot them down lasers for

1891

01:15:59,630 --> 01:15:58,020

blasting them with radar I don't think

1892

01:16:01,010 --> 01:15:59,640

blasting them with radar would do

1893

01:16:03,470 --> 01:16:01,020

anything

1894

01:16:06,169 --> 01:16:03,480

um that that would be if it was under

1895

01:16:08,030 --> 01:16:06,179

some type of electrical control or

1896

01:16:09,770 --> 01:16:08,040

something and if it's a balloon it's not

1897

01:16:12,830 --> 01:16:09,780

going to do anything

1898

01:16:15,709 --> 01:16:12,840

no the radar the radar would just bounce

1899

01:16:19,130 --> 01:16:15,719

off you see yep we got an echo here it

1900

01:16:20,630 --> 01:16:19,140

is we see it yeah Mark are you are you

1901

01:16:23,149 --> 01:16:20,640

able to share your screen

1902

01:16:24,530 --> 01:16:23,159

yeah I just got so many screens here

1903

01:16:26,330 --> 01:16:24,540

where the heck these come from I mean

1904

01:16:29,050 --> 01:16:26,340

let me find them let me just

1905

01:16:32,510 --> 01:16:29,060

look at this there has been supposed

1906

01:16:36,350 --> 01:16:32,520

many shoot uh crashes at least right

1907

01:16:38,950 --> 01:16:36,360

suppose it crashes yeah yeah

1908

01:16:41,390 --> 01:16:38,960

uh so yeah I mean

1909

01:16:44,770 --> 01:16:41,400

oh here you go okay I'm gonna add this

1910

01:16:47,990 --> 01:16:44,780

now Mark yeah this is the rumored image

1911

01:16:49,910 --> 01:16:48,000

of the recovery of the Chinese balloon

1912

01:16:51,110 --> 01:16:49,920

are you saying you don't think it's a

1913

01:16:54,530 --> 01:16:51,120

real image

1914

01:16:57,729 --> 01:16:54,540

it's another Roswell thing this this to

1915

01:17:01,250 --> 01:16:57,739

me it looks almost too planned

1916

01:17:03,830 --> 01:17:01,260

okay it looks almost too planned and too

1917

01:17:04,970 --> 01:17:03,840

perfect so I'm not sure if this is the

1918

01:17:06,950 --> 01:17:04,980

real thing I'm just letting you know

1919

01:17:10,430 --> 01:17:06,960

that this is what's out there as the

1920

01:17:13,130 --> 01:17:10,440

rumored uh recovery uh

1921

01:17:16,430 --> 01:17:13,140

image for that balloon well I just

1922

01:17:20,510 --> 01:17:18,350

well you are a boater so you would know

1923

01:17:22,189 --> 01:17:20,520

I am and uh you know I was under the

1924

01:17:24,229 --> 01:17:22,199

objects and I just happened to be on

1925

01:17:27,290 --> 01:17:24,239

that no I'm just kidding of course yeah

1926

01:17:29,930 --> 01:17:27,300

yeah but anyway interesting yeah there

1927

01:17:34,010 --> 01:17:29,940

you go well that's it that's uh so let

1928

01:17:36,350 --> 01:17:34,020

me uh uh I'll stop that yeah interesting

1929

01:17:38,810 --> 01:17:36,360

so uh I've had a wonderful night with

1930

01:17:41,990 --> 01:17:38,820

you guys um I I guess I'd like to close

1931

01:17:44,510 --> 01:17:42,000

with um you know uh

1932

01:17:46,010 --> 01:17:44,520

do you think I don't know do you think

1933

01:17:48,410 --> 01:17:46,020

we're gonna know

1934

01:17:50,090 --> 01:17:48,420

uh what the heck's going on or do you

1935

01:17:51,590 --> 01:17:50,100

think this will just continue a mystery

1936

01:17:53,630 --> 01:17:51,600

I don't know why don't we start with you

1937

01:17:56,030 --> 01:17:53,640

Chris

1938

01:17:57,590 --> 01:17:56,040

I I think already we've learned a lot of

1939

01:17:59,810 --> 01:17:57,600
information

1940

01:18:01,910 --> 01:17:59,820
and they seem actually kind of

1941

01:18:03,470 --> 01:18:01,920
transparent at least to give initial

1942

01:18:04,970 --> 01:18:03,480
information you know they talk about

1943

01:18:06,890 --> 01:18:04,980
Northern command they talk about the

1944

01:18:09,110 --> 01:18:06,900
radars

1945

01:18:10,850 --> 01:18:09,120
so I don't know I'm optimistic that will

1946

01:18:13,070 --> 01:18:10,860
that will continue to to get more

1947

01:18:15,470 --> 01:18:13,080
information but we'll see I think they

1948

01:18:17,510 --> 01:18:15,480
better come out see we're very we're

1949

01:18:19,970 --> 01:18:17,520
very ephemeral about everything you know

1950

01:18:21,950 --> 01:18:19,980
I mean you have to search for the war in

1951

01:18:25,430 --> 01:18:21,960

Ukraine you have to look for something

1952

01:18:27,350 --> 01:18:25,440

that's really dramatic but we we were

1953

01:18:29,630 --> 01:18:27,360

going a million miles an hour with our

1954

01:18:32,270 --> 01:18:29,640

information and get bored with things

1955

01:18:34,370 --> 01:18:32,280

really fast uh I've been afraid that's

1956

01:18:36,649 --> 01:18:34,380

going to happen with the UFO topic UAP

1957

01:18:38,270 --> 01:18:36,659

Topic in general when it comes to the

1958

01:18:41,270 --> 01:18:38,280

government paying attention to it and

1959

01:18:43,970 --> 01:18:41,280

all that but uh I I don't I think that

1960

01:18:46,130 --> 01:18:43,980

if there's two things I personally think

1961

01:18:49,610 --> 01:18:46,140

they may stay quiet about it and then it

1962

01:18:51,950 --> 01:18:49,620

may just kind of Fade Away uh or if if

1963

01:18:53,570 --> 01:18:51,960

they get it out at the transparency they

1964

01:18:55,910 --> 01:18:53,580

better do it pretty quickly

1965

01:18:59,630 --> 01:18:55,920

uh what do you think Mark

1966

01:19:02,450 --> 01:18:59,640

I I think that uh just like with the

1967

01:19:04,910 --> 01:19:02,460

Nimitz incident stuff uh it took many

1968

01:19:07,370 --> 01:19:04,920

many many years before this stuff hit

1969

01:19:10,970 --> 01:19:07,380

the light of day however

1970

01:19:13,370 --> 01:19:10,980

now that it has and now that people are

1971

01:19:16,070 --> 01:19:13,380

tuned to it and now that mass media is

1972

01:19:19,189 --> 01:19:16,080

picking it up now that Tucker Carlson is

1973

01:19:22,130 --> 01:19:19,199

having uh UFO folks on his show all the

1974

01:19:24,290 --> 01:19:22,140

time all right and and Joe Rogan is

1975

01:19:27,290 --> 01:19:24,300

having people that are talking about it

1976

01:19:28,970 --> 01:19:27,300

all the time uh I have a feeling that

1977

01:19:31,850 --> 01:19:28,980

the information is going to move faster

1978

01:19:34,130 --> 01:19:31,860

and I think that we're going to see a

1979

01:19:36,290 --> 01:19:34,140

lot more of this coming out I think that

1980

01:19:37,910 --> 01:19:36,300

the government they may try to keep it

1981

01:19:40,250 --> 01:19:37,920

secret

1982

01:19:42,590 --> 01:19:40,260

um and you know certainly the the folks

1983

01:19:44,930 --> 01:19:42,600

in uniform will do so but you're going

1984

01:19:46,430 --> 01:19:44,940

to have people that are going to be

1985

01:19:49,550 --> 01:19:46,440

seeking the truth and they're gonna

1986

01:19:51,169 --> 01:19:49,560

they're gonna be like pitbulls and uh

1987

01:19:53,570 --> 01:19:51,179

they're gonna find out everything

1988

01:19:55,370 --> 01:19:53,580

they'll be people out there digging for

1989

01:19:57,110 --> 01:19:55,380

for answers and

1990

01:19:58,790 --> 01:19:57,120

I know that we're going to see more and

1991

01:20:01,189 --> 01:19:58,800

I I think that the government's going to

1992

01:20:05,030 --> 01:20:01,199

have to play ball

1993

01:20:08,450 --> 01:20:05,040

at this point right yeah uh yeah I think

1994

01:20:10,370 --> 01:20:08,460

so I I hope so too uh it's been a real

1995

01:20:12,350 --> 01:20:10,380

pleasure guys really it's really been a

1996

01:20:14,810 --> 01:20:12,360

lot of fun this has been a great time

1997

01:20:17,090 --> 01:20:14,820

and thank you so much for both of you

1998

01:20:19,729 --> 01:20:17,100

for taking the time I appreciate it so

1999

01:20:22,910 --> 01:20:19,739

uh how can they Chris you have a great

2000

01:20:25,430 --> 01:20:22,920

active Channel and uh I was lucky enough

2001

01:20:28,310 --> 01:20:25,440

to be the first guy to interview you on

2002

01:20:29,990 --> 01:20:28,320

UFOs and I've been on your show a couple

2003

01:20:31,910 --> 01:20:30,000

of times it's been a lot of fun and

2004

01:20:33,890 --> 01:20:31,920

you've you've really grown that YouTube

2005

01:20:35,990 --> 01:20:33,900

channel you do a wonderful job tell

2006

01:20:38,510 --> 01:20:36,000

everyone how to get your your channel

2007

01:20:41,630 --> 01:20:38,520

yeah thank you Martin uh just my name

2008

01:20:43,070 --> 01:20:41,640

Chris Ledo or uh lato files you can also

2009

01:20:44,810 --> 01:20:43,080

search for that but yeah I appreciate

2010

01:20:46,910 --> 01:20:44,820

all that I I appreciate all your

2011

01:20:48,050 --> 01:20:46,920

mentorship Martin uh it's been great you

2012

01:20:50,149 --> 01:20:48,060

know because you called me initially

2013

01:20:53,630 --> 01:20:50,159

right when I uh made my first video

2014

01:20:55,970 --> 01:20:53,640

about uh uaps and you said hey and you

2015

01:20:57,590 --> 01:20:55,980

want to be in my UFO show you know and I

2016

01:20:58,729 --> 01:20:57,600

had to think about it and it took I took

2017

01:20:59,930 --> 01:20:58,739

a few days to think about it you

2018

01:21:01,669 --> 01:20:59,940

remember I didn't get back to you right

2019

01:21:04,010 --> 01:21:01,679

away that's right that's right and that

2020

01:21:05,750 --> 01:21:04,020

was the thought was you know yeah and

2021

01:21:06,830 --> 01:21:05,760

that's where the stigma I was kind of

2022

01:21:08,930 --> 01:21:06,840

scared and I was like you know what

2023

01:21:11,810 --> 01:21:08,940

whatever you know I'm gonna say what I

2024

01:21:14,270 --> 01:21:11,820

what I believe is well are you glad you

2025

01:21:15,350 --> 01:21:14,280

did yeah definitely yeah where are you

2026

01:21:17,630 --> 01:21:15,360

done are you down there is that correct

2027

01:21:19,550 --> 01:21:17,640

yeah that's right yeah he's happy he did

2028

01:21:22,669 --> 01:21:19,560

yeah yeah it's been excellent yeah very

2029

01:21:25,010 --> 01:21:22,679

exciting and super interesting yeah yeah

2030

01:21:27,709 --> 01:21:25,020

it's a great topic and Mark uh you have

2031

01:21:29,810 --> 01:21:27,719

sky sky tour and it's a you do things

2032

01:21:31,790 --> 01:21:29,820

Sunday night is mostly or a lot more

2033

01:21:34,490 --> 01:21:31,800

than okay the the radio show is Sunday

2034

01:21:37,910 --> 01:21:34,500

night sky to a radio uh and that's six

2035

01:21:39,830 --> 01:21:37,920

to eight pm Eastern however uh we also

2036

01:21:43,130 --> 01:21:39,840

have Sky Tour live stream which is our

2037

01:21:44,510 --> 01:21:43,140

Observatory stream uh and we have our

2038

01:21:46,310 --> 01:21:44,520

remote Observatory out in the Arizona

2039

01:21:48,890 --> 01:21:46,320

desert which I run from here in

2040

01:21:51,649 --> 01:21:48,900

Connecticut and we show people the night

2041

01:21:53,450 --> 01:21:51,659

sky beautiful things uh we have a

2042

01:21:55,430 --> 01:21:53,460

wonderful patreon crowd we have

2043

01:21:57,709 --> 01:21:55,440

wonderful subscribers of all kinds who

2044

01:21:59,930 --> 01:21:57,719

just come from all over the world uh we

2045

01:22:04,310 --> 01:21:59,940

have people from China Mexico Indonesia

2046

01:22:06,350 --> 01:22:04,320

Japan all over Bulgaria uh and and they

2047

01:22:07,669 --> 01:22:06,360

come in and they spend evenings with us

2048

01:22:10,550 --> 01:22:07,679

to actually look at these gorgeous

2049

01:22:12,649 --> 01:22:10,560

objects unfold in seconds because I took

2050

01:22:14,930 --> 01:22:12,659

the time to do this right I think we

2051

01:22:16,490 --> 01:22:14,940

have a telescope that can uh it's

2052

01:22:19,310 --> 01:22:16,500

actually it's only one of its kind on

2053

01:22:22,790 --> 01:22:19,320

the planet right now it's a prototype

2054

01:22:25,189 --> 01:22:22,800

um and uh it pulls in things and Sky

2055

01:22:26,689 --> 01:22:25,199

objects 25 times faster than a normal

2056

01:22:28,970 --> 01:22:26,699

scope of its kind

2057

01:22:31,370 --> 01:22:28,980

so in seconds we see these beautiful

2058

01:22:34,490 --> 01:22:31,380

stunning objects including tons of

2059

01:22:36,830 --> 01:22:34,500

satellites yeah okay you don't you know

2060

01:22:39,310 --> 01:22:36,840

that's that's Sky Tour live that uh

2061

01:22:41,810 --> 01:22:39,320

skytour live.org

2062

01:22:44,330 --> 01:22:41,820

skytorlive.org I've been called the UFO

2063

01:22:46,729 --> 01:22:44,340

Matchmaker by uh Paul high neck and

2064

01:22:49,490 --> 01:22:46,739

people like that so I'd like to match

2065

01:22:51,649 --> 01:22:49,500

make YouTube guys Chris

2066

01:22:53,390 --> 01:22:51,659

uh please invite mark on your show

2067

01:22:56,030 --> 01:22:53,400

sometime it would be a great show you

2068

01:22:57,649 --> 01:22:56,040

two together yeah definitely please

2069

01:23:00,590 --> 01:22:57,659

enjoy that I'm putting you right on this

2070

01:23:03,530 --> 01:23:00,600

right on the spot so no that's great

2071

01:23:06,709 --> 01:23:03,540

anyway no thank you so much and uh Chris

2072

01:23:08,630 --> 01:23:06,719

get some rest and uh thank you so much

2073

01:23:09,729 --> 01:23:08,640

it was a good morning for you now yeah

2074

01:23:13,130 --> 01:23:09,739

yeah

2075

01:23:14,810 --> 01:23:13,140

a lot of fun all right take care nice to

2076

01:23:16,610 --> 01:23:14,820

meet you Chris all right guys see you

2077

01:23:18,770 --> 01:23:16,620

mark

2078

01:23:20,630 --> 01:23:18,780

all right bye Mark you take care okay

2079

01:23:23,090 --> 01:23:20,640

see you later Martin thank you all right

2080

01:23:25,970 --> 01:23:23,100

sure you bet all right everyone so next

2081

01:23:28,610 --> 01:23:25,980

week we have uh Julie Olson about a 1982

2082

01:23:31,250 --> 01:23:28,620

uh UFO encounter and check this out

2083

01:23:32,630 --> 01:23:31,260

remember it worked for me Keep Your Eyes

2084

01:23:39,169 --> 01:23:32,640

to the Sky

2085

01:23:39,179 --> 01:23:43,900

foreign
