Chris Lehto @ChrisOtis78

Martin | PodcastUFO.com

1
00:00:13,920 --> 00:00:05,430
foreign

2
00:00:31,550 --> 00:00:21,650
[Music]

3
00:00:37,549 --> 00:00:34,729
hello and welcome I'm excited that I'm

4
00:00:38,590 --> 00:00:37,559
doing this uh collaborative with Chris

5
00:00:42,110 --> 00:00:38,600
later

6
00:00:44,330 --> 00:00:42,120
he is a retired F-16 that's been on the

7
00:00:45,950 --> 00:00:44,340
show a number of times and I I always

8
00:00:50,090 --> 00:00:45,960
enjoy talking to him we decided to do

9
00:00:52,069 --> 00:00:50,100
this a collaboration about the recent or

10
00:00:54,229 --> 00:00:52,079
just the other day the all domain

11
00:00:57,170 --> 00:00:54,239
anomaly resolution office the hearing

12
00:00:58,130 --> 00:00:57,180
that was held and there are two parts of

13
00:01:01,910 --> 00:00:58,140

this

14

00:01:04,450 --> 00:01:01,920

part one is over on Chris Chris's uh

15

00:01:07,550 --> 00:01:04,460

YouTube channel that's Lido files over

16

00:01:10,730 --> 00:01:07,560

uh over on YouTube and we're going to

17

00:01:13,310 --> 00:01:10,740

link each other's shows in the uh in the

18

00:01:14,270 --> 00:01:13,320

notes in the text as well as we'll put

19

00:01:16,550 --> 00:01:14,280

them

20

00:01:18,830 --> 00:01:16,560

down in a comments so you can quickly

21

00:01:21,050 --> 00:01:18,840

switch over and possibly we can even do

22

00:01:22,670 --> 00:01:21,060

like an end screen type thing that will

23

00:01:24,770 --> 00:01:22,680

uh all you have to do is Click at the

24

00:01:26,929 --> 00:01:24,780

end of the video but I suggest you start

25

00:01:28,730 --> 00:01:26,939

with Chris's and we'll flow over to here

26

00:01:31,370 --> 00:01:28,740

we're gonna we've been doing sort of a

27

00:01:34,070 --> 00:01:31,380

chronological order without further

28

00:01:36,850 --> 00:01:34,080

delay Chris welcome

29

00:01:39,530 --> 00:01:36,860

hi welcome thanks Mark Martin

30

00:01:41,030 --> 00:01:39,540

this is this has been fun yeah welcome

31

00:01:44,210 --> 00:01:41,040

to both of our channels yeah that's

32

00:01:46,069 --> 00:01:44,220

right it's fun to do a collab yeah it's

33

00:01:47,990 --> 00:01:46,079

you know it's much better than working

34

00:01:49,490 --> 00:01:48,000

alone I think getting different eyes

35

00:01:51,530 --> 00:01:49,500

different different views on the same

36

00:01:54,530 --> 00:01:51,540

thing is great thank you thank you and

37

00:01:56,510 --> 00:01:54,540

you uh I was watching your uh your

38

00:01:58,069 --> 00:01:56,520

um you know hate to break it to you guys

64

00:03:02,089 --> 00:03:00,060

but there's nothing to see there and

65

00:03:04,309 --> 00:03:02,099

then he goes to this slide and he says

66

00:03:06,170 --> 00:03:04,319

which is pretty darn interesting yeah

67

00:03:08,390 --> 00:03:06,180

look at all these you know we have all

68

00:03:10,250 --> 00:03:08,400

these different shapes and the big one

69

00:03:13,729 --> 00:03:10,260

we talk about more in the other in our

70

00:03:15,949 --> 00:03:13,739

in our actual uh interview was this

71

00:03:18,110 --> 00:03:15,959

stationary to Mach 2. this is this is

72

00:03:19,970 --> 00:03:18,120

really the the velocity there I don't

73

00:03:22,070 --> 00:03:19,980

know how you explain that so we talk

74

00:03:23,990 --> 00:03:22,080

about it more on my channel so go check

75

00:03:25,910 --> 00:03:24,000

that out but I'll just hit play here so

101
00:04:35,510 --> 00:04:33,960
you're going to be in this involved

102
00:04:36,890 --> 00:04:35,520
again I don't think we should have been

103
00:04:39,050 --> 00:04:36,900
involved in the world I think war is a

104
00:04:42,770 --> 00:04:39,060
bad thing but you know I'm there to do a

105
00:04:45,469 --> 00:04:42,780
job if and so I think having Mass uh

106
00:04:47,570 --> 00:04:45,479
drones overhead is the best way to to

107
00:04:50,510 --> 00:04:47,580
fight this this sort of Insurgency right

108
00:04:52,070 --> 00:04:50,520
and so this is one of those drones a

109
00:04:54,110 --> 00:04:52,080
Reaper

110
00:04:56,990 --> 00:04:54,120
I guess on on a mission is what it looks

111
00:04:59,110 --> 00:04:57,000
like and then comes up with this video

112
00:05:06,050 --> 00:04:59,120
um so that's what he says in there MQ-9

113
00:05:08,930 --> 00:05:07,670

you want to go ahead and click that and

114

00:05:10,670 --> 00:05:08,940

play it

115

00:05:12,950 --> 00:05:10,680

here's the video

116

00:05:15,050 --> 00:05:12,960

you'll see it come through the top of

117

00:05:18,469 --> 00:05:15,060

the screen there it goes and then the

118

00:05:20,570 --> 00:05:18,479

camera will slew to follow it

119

00:05:22,730 --> 00:05:20,580

you'll see it pop in and out of the

120

00:05:25,310 --> 00:05:22,740

screen field of view there

121

00:05:27,050 --> 00:05:25,320

this is essentially all of the data we

122

00:05:29,990 --> 00:05:27,060

have associated with this event from

123

00:05:34,790 --> 00:05:32,090

it is going to be virtually impossible

124

00:05:38,330 --> 00:05:34,800

to fully identify that

125

00:05:40,550 --> 00:05:38,340

just based off of that video

126
00:05:42,409 --> 00:05:40,560
yeah what did you think of that Martin

127
00:05:45,590 --> 00:05:42,419
well I think it's quite an extraordinary

128
00:05:47,210 --> 00:05:45,600
video for one and uh I noticed that

129
00:05:48,350 --> 00:05:47,220
there are some places that are blanked

130
00:05:53,870 --> 00:05:48,360
out

131
00:05:56,210 --> 00:05:53,880
you know they you know it would be a top

132
00:05:58,670 --> 00:05:56,220
secret type of situation they don't want

133
00:06:00,050 --> 00:05:58,680
uh adversaries to know exactly what the

134
00:06:04,370 --> 00:06:00,060
readings are or something like that

135
00:06:06,110 --> 00:06:04,380
possibly but also I wonder uh was it and

136
00:06:08,749 --> 00:06:06,120
I'm asking you this question because you

137
00:06:11,510 --> 00:06:08,759
probably would know uh is this an

138
00:06:13,490 --> 00:06:11,520

at a keyboard okay that's what it would

164

00:07:09,050 --> 00:07:06,960

be yeah he slows it nothing is tracking

165

00:07:11,330 --> 00:07:09,060

this thing and that's why uh that's the

166

00:07:12,950 --> 00:07:11,340

no to your second question is there's

167

00:07:14,689 --> 00:07:12,960

nothing tracking this so you couldn't

168

00:07:16,909 --> 00:07:14,699

tell the actual speed

169

00:07:19,189 --> 00:07:16,919

I see so if it had like an automatic

170

00:07:22,309 --> 00:07:19,199

tracking situation then it would give

171

00:07:24,650 --> 00:07:22,319

more data on it yep so if it locks on

172

00:07:27,230 --> 00:07:24,660

so I'll hit play here

173

00:07:29,510 --> 00:07:27,240

so you see that's a manual slew down

174

00:07:31,370 --> 00:07:29,520

manual slow you know you can kind of

175

00:07:33,409 --> 00:07:31,380

feel them

176
00:07:35,570 --> 00:07:33,419
and now and it turns there you see how

177
00:07:37,790 --> 00:07:35,580
it kind of It kind of turned

178
00:07:38,930 --> 00:07:37,800
so I could tell that he's going towards

179
00:07:40,850 --> 00:07:38,940
that thing

180
00:07:42,350 --> 00:07:40,860
and now he sees it and now he sleeps

181
00:07:44,990 --> 00:07:42,360
faster

182
00:07:47,570 --> 00:07:45,000
so it's definitely human slewed

183
00:07:49,010 --> 00:07:47,580
um to keep this thing in in the in the

184
00:07:50,510 --> 00:07:49,020
frame otherwise it would be right in the

185
00:07:53,270 --> 00:07:50,520
center you know if it was locked up I

186
00:07:55,790 --> 00:07:53,280
got it like a tiny pod will normally

187
00:07:57,050 --> 00:07:55,800
lock on it'll go right in the center

188
00:07:59,390 --> 00:07:57,060

201
00:08:25,610 --> 00:08:23,039
looking down uh what type of speed do

202
00:08:26,990 --> 00:08:25,620
they have to stay at to keep

203
00:08:29,390 --> 00:08:27,000
um airborne

204
00:08:31,850 --> 00:08:29,400
yeah I mean my knowledge is from you

205
00:08:33,889 --> 00:08:31,860
know many years ago I guess about drones

206
00:08:35,510 --> 00:08:33,899
in particular but they were super slow I

207
00:08:36,709 --> 00:08:35,520
mean jokingly slow we made fun of them

208
00:08:38,990 --> 00:08:36,719
all the time

209
00:08:40,969 --> 00:08:39,000
and and that's another reason like a

210
00:08:43,430 --> 00:08:40,979
predator it was flying like less than

211
00:08:46,490 --> 00:08:43,440
100 knots you know it's like yeah yeah

212
00:08:48,370 --> 00:08:46,500
Cessna speeds or a predator actually

213
00:08:51,230 --> 00:08:48,380

226
00:09:15,769 --> 00:09:14,220
know and so

227
00:09:17,329 --> 00:09:15,779
they weren't very we were much more

228
00:09:19,070 --> 00:09:17,339
useful we were like your quick reaction

229
00:09:20,870 --> 00:09:19,080
force to where if guys were getting

230
00:09:22,490 --> 00:09:20,880
attacked we would fly there and try and

231
00:09:24,949 --> 00:09:22,500
help them you know

232
00:09:26,090 --> 00:09:24,959
um lucky you know we're sending the

233
00:09:27,230 --> 00:09:26,100
Predator you know you're going to be

234
00:09:28,970 --> 00:09:27,240
waiting there a long time you're going

235
00:09:32,030 --> 00:09:28,980
to die essentially uh

236
00:09:34,310 --> 00:09:32,040
oh dear wow so what is your opinion of

237
00:09:37,910 --> 00:09:34,320
this this video

238
00:09:39,650 --> 00:09:37,920

251
00:10:12,889 --> 00:10:10,019
from the angles but you you couldn't

252
00:10:16,130 --> 00:10:12,899
really tell but once once they lost they

253
00:10:19,090 --> 00:10:16,140
locked on on that particular video

254
00:10:22,070 --> 00:10:19,100
don't they have all the data from that

255
00:10:24,410 --> 00:10:22,080
unfortunately no because uh the

256
00:10:27,290 --> 00:10:24,420
targeting pod like I'm saying uh is just

257
00:10:29,329 --> 00:10:27,300
a visual tracker so it actually it

258
00:10:31,430 --> 00:10:29,339
actually has to get the distance from

259
00:10:34,310 --> 00:10:31,440
another source and that's why it has a

260
00:10:36,530 --> 00:10:34,320
laser um it has a laser to do distance

261
00:10:38,630 --> 00:10:36,540
ranging hmm

262
00:10:41,269 --> 00:10:38,640
uh the problem is that laser burns out

263
00:10:44,750 --> 00:10:41,279

276
00:11:13,069 --> 00:11:10,440
a few hundred meters I guess at the end

277
00:11:15,769 --> 00:11:13,079
of the day right um it's based on how

278
00:11:17,930 --> 00:11:15,779
far you can get your sensors apart

279
00:11:19,370 --> 00:11:17,940
you know if you just have if you're if

280
00:11:20,930 --> 00:11:19,380
you're only if one of your eyes is out

281
00:11:22,670 --> 00:11:20,940
right your depth perception is knocked

282
00:11:24,650 --> 00:11:22,680
down dramatically and then that's really

283
00:11:26,569 --> 00:11:24,660
the situation we're in okay we have no

284
00:11:29,329 --> 00:11:26,579
other way to range this thing we're

285
00:11:31,730 --> 00:11:29,339
basically looking at it with one eye

286
00:11:34,750 --> 00:11:31,740
um and in a targeting pod we would use a

287
00:11:36,829 --> 00:11:34,760
laser or use the radar

288
00:11:38,630 --> 00:11:36,839

I don't know if you can back it up just

289

00:11:41,750 --> 00:11:38,640

a little bit to the where they show the

290

00:11:45,530 --> 00:11:44,569

uh because uh yeah right there

291

00:11:47,090 --> 00:11:45,540

um do you think that's a true

292

00:11:49,310 --> 00:11:47,100

magnification of what they're seeing it

293

00:11:50,930 --> 00:11:49,320

looks like it is

294

00:11:52,790 --> 00:11:50,940

yeah

295

00:11:55,550 --> 00:11:52,800

um so that would have to be a spherical

296

00:11:56,509 --> 00:11:55,560

total spherical and not like some type

297

00:11:58,970 --> 00:11:56,519

of disc

298

00:12:00,889 --> 00:11:58,980

because of the angle

299

00:12:04,130 --> 00:12:00,899

um it was some type of disc or something

300

00:12:05,650 --> 00:12:04,140

like that uh you would see an odd shape

301
00:12:08,630 --> 00:12:05,660
but you're seeing perfectly round here

302
00:12:12,190 --> 00:12:08,640
so don't don't you think this is rather

303
00:12:15,170 --> 00:12:12,200
extraordinary that whatever that

304
00:12:16,850 --> 00:12:15,180
spherical thing is was traveling the way

305
00:12:19,490 --> 00:12:16,860
it was

306
00:12:22,370 --> 00:12:19,500
well that's the problem is because it

307
00:12:24,949 --> 00:12:22,380
could there's no way to prove

308
00:12:27,769 --> 00:12:24,959
that it's not just a round balloon

309
00:12:28,910 --> 00:12:27,779
halfway between the sensor and the

310
00:12:31,250 --> 00:12:28,920
ground

311
00:12:34,009 --> 00:12:31,260
oh there's no way to tell it seems like

312
00:12:35,630 --> 00:12:34,019
it's moving though it I know you're

313
00:12:38,150 --> 00:12:35,640

talking about the speed of the Drone but

314

00:12:40,610 --> 00:12:38,160

still the it seems like it's going on

315

00:12:42,350 --> 00:12:40,620

for a quite a clip if that's real time

316

00:12:45,530 --> 00:12:42,360

filming

317

00:12:48,530 --> 00:12:47,030

I see what you're saying so you're

318

00:12:51,710 --> 00:12:48,540

saying is there a way that we can prove

319

00:12:55,490 --> 00:12:51,720

but the thing is the the it's it's

320

00:12:57,710 --> 00:12:55,500

confusing because the the the camera is

321

00:13:00,590 --> 00:12:57,720

so good at locking onto the ground and

322

00:13:02,629 --> 00:13:00,600

it's called Ground stabilizing yeah

323

00:13:05,629 --> 00:13:02,639

so right now the camera is ground

324

00:13:09,470 --> 00:13:05,639

stabilized to this location

325

00:13:11,930 --> 00:13:09,480

so meaning you will it normally we hold

326

00:13:12,949 --> 00:13:11,940

like three to five miles around this in

327

00:13:20,930 --> 00:13:12,959

a circle

328

00:13:22,430 --> 00:13:20,940

um but the the sensor right now is

329

00:13:25,370 --> 00:13:22,440

definitely moving

330

00:13:26,930 --> 00:13:25,380

at at least 100 knots as I would say so

331

00:13:29,870 --> 00:13:26,940

100 miles an hour

332

00:13:31,790 --> 00:13:29,880

at the minimum so maybe because we could

333

00:13:34,430 --> 00:13:31,800

look up Reaper let me just look it up oh

334

00:13:35,750 --> 00:13:34,440

I'm just the uppering yeah meanwhile

335

00:13:37,550 --> 00:13:35,760

could you just Play that video a little

336

00:13:39,530 --> 00:13:37,560

bit just yes let me play it and I'll

337

00:13:44,750 --> 00:13:39,540

look that up and yeah you keep it

338

00:13:50,810 --> 00:13:47,629

I mean to me it seems almost impossible

339

00:13:52,670 --> 00:13:50,820

if that's real time filming for that to

340

00:13:56,030 --> 00:13:52,680

be a balloon I mean that's moving right

341

00:13:58,190 --> 00:13:56,040

along no matter if it's uh close to the

342

00:13:59,389 --> 00:13:58,200

camera or far from the camera especially

343

00:14:01,670 --> 00:13:59,399

far from the camera that would be moving

344

00:14:04,009 --> 00:14:01,680

right along

345

00:14:05,389 --> 00:14:04,019

you may there may be something there

346

00:14:13,850 --> 00:14:05,399

actually

347

00:14:17,449 --> 00:14:15,590

so this is your

348

00:14:19,670 --> 00:14:17,459

that's what it was up yes that's what

349

00:14:21,949 --> 00:14:19,680

was flying so this is your MQ-9 so this

350

00:14:24,590 --> 00:14:21,959

is a bigger Predator B so it is it's a

351
00:14:26,690 --> 00:14:24,600

little it is a predator but larger

352
00:14:28,310 --> 00:14:26,700

um so maybe they have a turbo jet engine

353
00:14:29,810 --> 00:14:28,320

looks like back here or maybe it's still

354
00:14:31,550 --> 00:14:29,820

just a Cessna engine

355
00:14:33,829 --> 00:14:31,560

but this thing's bigger and can carry

356
00:14:34,790 --> 00:14:33,839

weapons let's look at the speed on this

357
00:14:38,449 --> 00:14:34,800

thing

358
00:14:41,870 --> 00:14:38,459

there's only 300 300 plus

359
00:14:47,030 --> 00:14:43,750

and

360
00:14:48,829 --> 00:14:47,040

because they're stabilized on that

361
00:14:51,110 --> 00:14:48,839

Target on the ground or I don't know if

362
00:14:53,870 --> 00:14:51,120

you want to call it a Target but uh

363
00:14:56,870 --> 00:14:53,880

because they're stabilized on that

364

00:14:58,850 --> 00:14:56,880

as they're traveling all you see is that

365

00:15:00,350 --> 00:14:58,860

I mean you don't it doesn't it appears

366

00:15:03,230 --> 00:15:00,360

like they're almost sitting still but

367

00:15:05,930 --> 00:15:03,240

they're not really sitting still

368

00:15:08,389 --> 00:15:05,940

exactly the stabilization

369

00:15:10,009 --> 00:15:08,399

yeah the reaper so it has it has a jet

370

00:15:12,829 --> 00:15:10,019

engine turbo prop

371

00:15:15,410 --> 00:15:12,839

but yeah the original Predator only had

372

00:15:16,370 --> 00:15:15,420

uh a piston it had a basically assess an

373

00:15:19,490 --> 00:15:16,380

engine

374

00:15:22,189 --> 00:15:19,500

so this thing is flying faster did they

375

00:15:23,569 --> 00:15:22,199

actually say uh what year this was they

426
00:17:37,010 --> 00:17:34,140
within you know it could be wind can be

427
00:17:38,630 --> 00:17:37,020
up to 100 knots up at altitude yeah we

428
00:17:40,070 --> 00:17:38,640
don't really know how high this Predator

429
00:17:41,690 --> 00:17:40,080
is he says all we have is the video

430
00:17:42,650 --> 00:17:41,700
actually they do know they have all that

431
00:17:44,210 --> 00:17:42,660
information

432
00:17:47,890 --> 00:17:44,220
so they should have that they should

433
00:17:50,450 --> 00:17:47,900
have the winds at altitude yeah

434
00:17:52,610 --> 00:17:50,460
wind direction as well because that that

435
00:17:54,350 --> 00:17:52,620
plays into it yeah so they have that

436
00:17:57,409 --> 00:17:54,360
information from the video but he says

437
00:17:59,450 --> 00:17:57,419
it will still be basically impossible

438
00:18:01,370 --> 00:17:59,460

476
00:19:42,710 --> 00:19:39,960
these in a fuller context

477
00:19:44,930 --> 00:19:42,720
how are we going to get more data we are

478
00:19:46,970 --> 00:19:44,940
working with the joint staff to issue

479
00:19:50,029 --> 00:19:46,980
guidance to all the services and

480
00:19:51,590 --> 00:19:50,039
commands that will then establish what

481
00:19:53,690 --> 00:19:51,600
are the reporting requirements the

482
00:19:55,970 --> 00:19:53,700
timeliness and all of the data that is

483
00:19:59,870 --> 00:19:55,980
required to be delivered to us and

484
00:20:01,850 --> 00:19:59,880
retained from all the associated sensors

485
00:20:04,010 --> 00:20:01,860
that historically hasn't been the case

486
00:20:09,230 --> 00:20:04,020
and it's been happenstance that data has

487
00:20:12,409 --> 00:20:10,610
okay

488
00:20:14,210 --> 00:20:12,419

what do you think of as data collection

489

00:20:15,770 --> 00:20:14,220

explanation when he talks through his

490

00:20:18,710 --> 00:20:15,780

processes

491

00:20:21,110 --> 00:20:18,720

I think it I think it makes sense you

492

00:20:24,409 --> 00:20:21,120

know I mean the the one part uh we we

493

00:20:26,510 --> 00:20:24,419

touched on in the last uh video that you

494

00:20:28,610 --> 00:20:26,520

and I did together I thought about and

495

00:20:30,350 --> 00:20:28,620

wanted to address a little bit so he

496

00:20:34,130 --> 00:20:30,360

said you know if it ever

497

00:20:36,230 --> 00:20:34,140

uh shows basically or hints to the

498

00:20:38,990 --> 00:20:36,240

possibility of extraterrestrial will

499

00:20:41,930 --> 00:20:39,000

pass it along to NASA and it kind of you

500

00:20:44,270 --> 00:20:41,940

know is is that the uh is is that where

501
00:20:46,190 --> 00:20:44,280
it's killed or do you I mean it would be

502
00:20:48,830 --> 00:20:46,200
nice if you pass along to NASA then

503
00:20:50,390 --> 00:20:48,840
we'll decide whether we'll you know

504
00:20:53,510 --> 00:20:50,400
release it to the public or something

505
00:20:55,789 --> 00:20:53,520
like that that's a question I have like

506
00:20:58,610 --> 00:20:55,799
um if if that was ever found would we

507
00:21:01,010 --> 00:20:58,620
ever know if if it was ever discovered

508
00:21:02,330 --> 00:21:01,020
that it was blatantly extraterrestrial

509
00:21:04,250 --> 00:21:02,340
somehow

510
00:21:06,169 --> 00:21:04,260
would we ever know

511
00:21:10,130 --> 00:21:06,179
would we ever be

512
00:21:12,409 --> 00:21:10,140
uh you know privy to that information

513
00:21:14,510 --> 00:21:12,419

576

00:23:46,070 --> 00:23:45,120
capability right you're trustable to

577

00:23:47,990 --> 00:23:46,080
that level

578

00:23:50,450 --> 00:23:48,000
still they want to minimize all of the

579

00:23:52,610 --> 00:23:50,460
information that that is out there

580

00:23:54,169 --> 00:23:52,620
so for sure it like she mentioned at the

581

00:23:55,490 --> 00:23:54,179
beginning is there they've had huge

582

00:23:58,909 --> 00:23:55,500
stigma issues

583

00:24:02,810 --> 00:23:58,919
else you know basically getting the

584

00:24:05,029 --> 00:24:02,820
money uh getting the system set up

585

00:24:08,390 --> 00:24:05,039
um getting it you know the people there

586

00:24:10,190 --> 00:24:08,400
essentially then chances are that it's

587

00:24:12,409 --> 00:24:10,200
still going to affect you know

588

00:24:15,230 --> 00:24:12,419

601
00:24:51,049 --> 00:24:48,539
don't know if you noticed that but every

602
00:24:53,690 --> 00:24:51,059
every time she spoke it was all about

603
00:24:56,690 --> 00:24:53,700
you know China or Russia our adversaries

604
00:24:59,210 --> 00:24:56,700
and uh I don't know if we can if we can

605
00:25:01,190 --> 00:24:59,220
get to that at any point

606
00:25:04,070 --> 00:25:01,200
um I don't know if you can see that

607
00:25:06,710 --> 00:25:04,080
oh let's see um is there opener opening

608
00:25:08,630 --> 00:25:06,720
remarks so okay yeah let's hear that

609
00:25:11,930 --> 00:25:08,640
Pearsons are pretty much spot on I think

610
00:25:14,750 --> 00:25:11,940
to what she wanted yeah testimony today

611
00:25:16,490 --> 00:25:14,760
I'll keep these remarks very brief so

612
00:25:18,890 --> 00:25:16,500
that we have maximum time for your

613
00:25:20,630 --> 00:25:18,900

651
00:26:59,510 --> 00:26:56,640
yeah now I can't disagree with what she

652
00:27:01,190 --> 00:26:59,520
is saying in any type of way but uh I

653
00:27:03,649 --> 00:27:01,200
think she's pretty much laser focused

654
00:27:05,930 --> 00:27:03,659
that whatever it is people are

655
00:27:08,810 --> 00:27:05,940
witnessing is you know adversarial

656
00:27:13,370 --> 00:27:08,820
instead of you know looking at what are

657
00:27:15,289 --> 00:27:13,380
the other possibilities of it you know

658
00:27:17,750 --> 00:27:15,299
that kind of that's what stands out with

659
00:27:20,930 --> 00:27:17,760
missed Rosen

660
00:27:23,210 --> 00:27:20,940
Rosen uh yeah she was uh the other uh

661
00:27:24,470 --> 00:27:23,220
Senator yeah can we pull up that yeah

662
00:27:27,169 --> 00:27:24,480
part of the video I need a little

663
00:27:29,029 --> 00:27:27,179

676
00:27:56,690 --> 00:27:54,779
think some cost-effective measures might

677
00:27:58,730 --> 00:27:56,700
be that we can

678
00:28:00,049 --> 00:27:58,740
um get what we need out of that or take

679
00:28:02,210 --> 00:28:00,059
them down whatever's appropriate

680
00:28:04,669 --> 00:28:02,220
whatever the appropriate measure is uh

681
00:28:06,470 --> 00:28:04,679
pausing here so she's this question was

682
00:28:08,330 --> 00:28:06,480
she talked about we shot down the three

683
00:28:09,909 --> 00:28:08,340
balloons yeah and a half a million

684
00:28:12,830 --> 00:28:09,919
dollar missile yeah

685
00:28:15,370 --> 00:28:12,840
I mean this is our Expendable assets you

686
00:28:18,049 --> 00:28:15,380
know we would shoot you know

687
00:28:20,750 --> 00:28:18,059
she's talking about an affordable way

688
00:28:23,330 --> 00:28:20,760

where else in defense do we worry about

689

00:28:25,310 --> 00:28:23,340

affordable ways we spend more on defense

690

00:28:27,590 --> 00:28:25,320

than any other country uh you know

691

00:28:30,830 --> 00:28:27,600

several countries combined uh I mean

692

00:28:33,350 --> 00:28:30,840

they do a lot to to minimize it um I

693

00:28:34,430 --> 00:28:33,360

mean I I agree you know I think you

694

00:28:38,810 --> 00:28:34,440

don't want to

695

00:28:40,789 --> 00:28:38,820

your method you know to shoot these

696

00:28:42,830 --> 00:28:40,799

expensive missiles I'm sure they're

697

00:28:46,010 --> 00:28:42,840

talking about it all in all the fighter

698

00:28:47,750 --> 00:28:46,020

bars Etc to using cheaper Rockets or

699

00:28:49,669 --> 00:28:47,760

guns or something

700

00:28:50,950 --> 00:28:49,679

yeah especially when something is just

701

00:28:53,810 --> 00:28:50,960

sitting there

702

00:28:56,750 --> 00:28:53,820

such an easy target you know I mean

703

00:28:58,909 --> 00:28:56,760

that's right it's not so easy

704

00:29:00,830 --> 00:28:58,919

um I'm not surprised that the missile

705

00:29:03,529 --> 00:29:00,840

missed or didn't fuse on the first one

706

00:29:04,850 --> 00:29:03,539

you know just because they're fuse you

707

00:29:06,590 --> 00:29:04,860

don't want it you don't want it to be so

708

00:29:08,810 --> 00:29:06,600

easy to fuse that it just fuses off

709

00:29:10,970 --> 00:29:08,820

anything oh that's right I mean it could

710

00:29:12,590 --> 00:29:10,980

that'd be very dangerous could cause uh

711

00:29:14,870 --> 00:29:12,600

major problems I know they waited till

712

00:29:16,430 --> 00:29:14,880

it was over the water you know which was

713

00:29:18,830 --> 00:29:16,440

a smart move

714

00:29:21,769 --> 00:29:18,840

well also you know everything in the

715

00:29:24,049 --> 00:29:21,779

military again is considered uh you want

716

00:29:26,510 --> 00:29:24,059

to make it adversary proof

717

00:29:28,909 --> 00:29:26,520

so that's why you know military-grade

718

00:29:31,130 --> 00:29:28,919

equipment it may not it'll be bigger and

719

00:29:33,950 --> 00:29:31,140

bulkier in everything but it should work

720

00:29:36,830 --> 00:29:33,960

against you know enemy action is is the

721

00:29:39,049 --> 00:29:36,840

idea so if your fuse is so easy to set

722

00:29:41,470 --> 00:29:39,059

off then they can exploit that you know

723

00:29:44,389 --> 00:29:41,480

and set off your fuses

724

00:29:48,110 --> 00:29:44,399

would also be very bad so let's see how

725

00:29:50,029 --> 00:29:48,120

he answers here okay sounds good so that

726
00:29:51,649 --> 00:29:50,039
that is actually wrapped into the plan

727
00:29:54,169 --> 00:29:51,659
ORD that we're working with joint step

728
00:29:56,630 --> 00:29:54,179
to send out what are the commands need

729
00:29:59,750 --> 00:29:56,640
from both a capabilities perspective for

730
00:30:02,990 --> 00:29:59,760
kinetic and non-kinetic engagements what

731
00:30:07,310 --> 00:30:03,000
are the response functions of the of the

732
00:30:09,230 --> 00:30:07,320
particular wings or or navy uh what have

733
00:30:12,169 --> 00:30:09,240
you and then

734
00:30:13,730 --> 00:30:12,179
what authorities do they need so one of

735
00:30:15,830 --> 00:30:13,740
the one of the challenges that we've

736
00:30:18,590 --> 00:30:15,840
seen is is you know there's an

737
00:30:21,710 --> 00:30:18,600
authorities issues with the with the

738
00:30:22,970 --> 00:30:21,720

owners operators of those ranges that

739

00:30:27,049 --> 00:30:22,980

they need to work through and we're

740

00:30:30,049 --> 00:30:27,059

working that with joint staff and OSD so

741

00:30:32,269 --> 00:30:30,059

the big picture we need to do all that

742

00:30:33,889 --> 00:30:32,279

if you want to get down to the specifics

743

00:30:36,289 --> 00:30:33,899

for you know there are non-kinetic

744

00:30:37,789 --> 00:30:36,299

options to engage pretty much everything

745

00:30:40,490 --> 00:30:37,799

yeah

746

00:30:42,889 --> 00:30:40,500

so non-kinetic again not you're not

747

00:30:46,610 --> 00:30:42,899

shooting it but you're going to

748

00:30:48,409 --> 00:30:46,620

you know minimize its effects or you

749

00:30:50,450 --> 00:30:48,419

know if it's an electronic system you'll

750

00:30:53,450 --> 00:30:50,460

jam it right you're not you're not

751
00:30:57,470 --> 00:30:53,460
killing it but you are affecting it

752
00:31:03,950 --> 00:31:01,549
right so um do you want to move on to

753
00:31:07,549 --> 00:31:03,960
this particular uh

754
00:31:10,010 --> 00:31:07,559
I I think in closing about the open

755
00:31:12,370 --> 00:31:10,020
hearings

756
00:31:14,690 --> 00:31:12,380
um you know I mean what they have

757
00:31:17,450 --> 00:31:14,700
are they going to allow the access to

758
00:31:19,310 --> 00:31:17,460
the public is is basically

759
00:31:21,409 --> 00:31:19,320
you know the I think I find that

760
00:31:24,049 --> 00:31:21,419
interesting myself

761
00:31:26,630 --> 00:31:24,059
yeah hugely interesting yeah that was uh

762
00:31:28,789 --> 00:31:26,640
and I wrote that down as as a big you

763
00:31:30,830 --> 00:31:28,799

know one of my main notes is Jilla brand

764

00:31:32,210 --> 00:31:30,840

here asking about this NDA and I think

765

00:31:33,289 --> 00:31:32,220

it really highlights the relationship

766

00:31:35,690 --> 00:31:33,299

between

767

00:31:38,149 --> 00:31:35,700

Jilla brand and Kirkpatrick

768

00:31:39,769 --> 00:31:38,159

and yeah and was pretty impressed with

769

00:31:41,810 --> 00:31:39,779

Jilla brand I think it seems like she's

770

00:31:42,830 --> 00:31:41,820

she's definitely on the case so this is

771

00:31:45,710 --> 00:31:42,840

where she's asking about the

772

00:31:49,669 --> 00:31:45,720

non-disclosure agreements and also she

773

00:31:52,430 --> 00:31:49,679

seems upset that they were they needed a

774

00:31:54,110 --> 00:31:52,440

system to do public discourse so when

775

00:31:56,029 --> 00:31:54,120

people actually have

776

00:31:57,649 --> 00:31:56,039

they want to bring forward testimony

777

00:31:59,090 --> 00:31:57,659

that they have a place to go and

778

00:32:01,370 --> 00:31:59,100

actually give the testimony and it

779

00:32:03,649 --> 00:32:01,380

sounds like that doesn't exist

780

00:32:06,289 --> 00:32:03,659

so she was she has iconic Warfare

781

00:32:08,690 --> 00:32:06,299

whether it's you know Laser Technology

782

00:32:11,510 --> 00:32:08,700

that's where this data having a good

783

00:32:14,389 --> 00:32:11,520

data collection Predictive Analytics you

784

00:32:16,190 --> 00:32:14,399

can perform make some assumptions and

785

00:32:18,769 --> 00:32:16,200

possibilities that's right and we will

786

00:32:20,930 --> 00:32:18,779

inform uh recommendations back to the

787

00:32:22,909 --> 00:32:20,940

department on here's what could work

788

00:32:23,930 --> 00:32:22,919

here's what we've seen work here's what

789

00:32:25,789 --> 00:32:23,940

doesn't work

790

00:32:28,190 --> 00:32:25,799

thank you so much thank you madam chair

791

00:32:30,350 --> 00:32:28,200

I appreciate it thank you very much

792

00:32:32,029 --> 00:32:30,360

um I just wanted to just talk a little

793

00:32:34,970 --> 00:32:32,039

bit about your Logistics who you report

794

00:32:36,950 --> 00:32:34,980

to how that's going uh whether you need

795

00:32:38,450 --> 00:32:36,960

different reporting lines

796

00:32:40,549 --> 00:32:38,460

um by Congressional legislation your

797

00:32:42,110 --> 00:32:40,559

office is administratively located with

798

00:32:43,970 --> 00:32:42,120

the office of the undersecretary of

799

00:32:45,889 --> 00:32:43,980

defense for intelligence security but

800

00:32:47,810 --> 00:32:45,899

you're not substantively subordinate to

801

00:32:49,430 --> 00:32:47,820

the under secretary rather you are a

802

00:32:51,110 --> 00:32:49,440

direct report to the deputy secretary

803

00:32:52,909 --> 00:32:51,120

are you taking Direction directly from

804

00:32:55,610 --> 00:32:52,919

the deputy secretary are you able to

805

00:32:58,850 --> 00:32:55,620

meet and brief the deputy secretary

806

00:33:00,950 --> 00:32:58,860

um is the office of USD ins

807

00:33:02,750 --> 00:33:00,960

um working with you to have the right

808

00:33:08,450 --> 00:33:02,760

framework

809

00:33:11,510 --> 00:33:08,460

so USD ins and the I currently report to

810

00:33:16,909 --> 00:33:11,520

USD ins

811

00:33:21,710 --> 00:33:18,409

the plan for how they're going to

812

00:33:28,430 --> 00:33:25,190

DOD and dni are working through that now

813

00:33:32,690 --> 00:33:28,440

I'd have to refer you back to USD ins on

814

00:33:37,310 --> 00:33:35,570

U.S defense intelligence security so do

815

00:33:39,049 --> 00:33:37,320

I need to update your reporting

816

00:33:40,310 --> 00:33:39,059

structure in the next defense bill or is

817

00:33:41,930 --> 00:33:40,320

this something that you think will work

818

00:33:43,610 --> 00:33:41,940

its way out or does it need further

819

00:33:45,470 --> 00:33:43,620

Clarity I think they're planning on

820

00:33:48,350 --> 00:33:45,480

coming back to you with an answer on

821

00:33:50,149 --> 00:33:48,360

what that plan is and I think at that

822

00:33:51,769 --> 00:33:50,159

time that will inform

823

00:33:53,330 --> 00:33:51,779

what you want to do

824

00:33:56,750 --> 00:33:53,340

okay thank you

825

00:33:59,870 --> 00:33:56,760

that was interesting so

826
00:34:01,130 --> 00:33:59,880
um as you know Dr Kirkpatrick Congress

827
00:34:02,810 --> 00:34:01,140
has mandated that your office

828
00:34:05,029 --> 00:34:02,820
established a discoverable and

829
00:34:07,490 --> 00:34:05,039
accessible electronic method for

830
00:34:10,310 --> 00:34:07,500
potential Witnesses of UAP incidents and

831
00:34:12,109 --> 00:34:10,320
potential participants in government UAP

832
00:34:13,849 --> 00:34:12,119
related activities to contact your

833
00:34:15,589 --> 00:34:13,859
office and tell their stories

834
00:34:16,810 --> 00:34:15,599
Congress will also set up a process

835
00:34:19,310 --> 00:34:16,820
whereby people

836
00:34:20,869 --> 00:34:19,320
subject to non-disclosure agreements

837
00:34:22,129 --> 00:34:20,879
preventing them from disclosing what

838
00:34:24,530 --> 00:34:22,139

they may have witnessed or participated

839

00:34:26,030 --> 00:34:24,540

in could tell you what they know that

840

00:34:28,609 --> 00:34:26,040

risk of Retribution from the or

841

00:34:30,169 --> 00:34:28,619

violation of their ndas have you

842

00:34:31,790 --> 00:34:30,179

submitted a public-facing website

843

00:34:34,490 --> 00:34:31,800

product for approval to your superiors

844

00:34:37,129 --> 00:34:34,500

and how long has it been under review

845

00:34:38,510 --> 00:34:37,139

that that's that public discourse so it

846

00:34:40,070 --> 00:34:38,520

seems like a pretty poignant question

847

00:34:43,790 --> 00:34:40,080

there about

848

00:34:47,329 --> 00:34:43,800

I have we submitted the first version of

849

00:34:51,950 --> 00:34:50,270

okay have an estimate from them when

850

00:34:56,030 --> 00:34:51,960

they will respond and when you'll have

851
00:34:57,950 --> 00:34:56,040
feedback on that no I don't okay we will

852
00:34:59,570 --> 00:34:57,960
Author a letter asking for that timely

853
00:35:02,329 --> 00:34:59,580
response

854
00:35:04,670 --> 00:35:02,339
um to your superiors oh

855
00:35:07,490 --> 00:35:04,680
when when do you expect that you will

856
00:35:10,550 --> 00:35:07,500
establish a public-facing discoverable

857
00:35:14,030 --> 00:35:10,560
um an access portal for people to use to

858
00:35:17,270 --> 00:35:14,040
contact your office as the law requires

859
00:35:20,270 --> 00:35:17,280
so I would like to First say thank you

860
00:35:22,730 --> 00:35:20,280
all very much for referring the

861
00:35:25,190 --> 00:35:22,740
witnesses that you have thus far to us I

862
00:35:27,310 --> 00:35:25,200
appreciate that we've brought in nearly

863
00:35:29,810 --> 00:35:27,320

two dozen so far

864

00:35:31,490 --> 00:35:29,820

that was amazing statement you know when

865

00:35:35,750 --> 00:35:31,500

he said that were you surprised by that

866

00:35:38,150 --> 00:35:35,760

Martin yeah yeah uh yeah because I it's

867

00:35:40,490 --> 00:35:38,160

something I didn't know before yeah

868

00:35:41,870 --> 00:35:40,500

definitely interesting yeah I guess we

869

00:35:44,150 --> 00:35:41,880

heard the rumors I'll continue here and

870

00:35:46,370 --> 00:35:44,160

see what he says and yeah very uh

871

00:35:49,030 --> 00:35:46,380

helpful I'd ask that you continue to do

872

00:35:52,250 --> 00:35:49,040

that until we have an approved plan

873

00:35:56,630 --> 00:35:52,260

we have a multi-phased approach for

874

00:36:02,930 --> 00:36:00,710

no uh socializing and have submitted for

875

00:36:04,390 --> 00:36:02,940

approval

876
00:36:06,890 --> 00:36:04,400
sometime

877
00:36:09,410 --> 00:36:06,900
and once that happens then we should be

878
00:36:11,690 --> 00:36:09,420
able to push all that out and get uh get

879
00:36:13,670 --> 00:36:11,700
this a little more automated great

880
00:36:16,550 --> 00:36:13,680
um what I would ask though is as you all

881
00:36:18,829 --> 00:36:16,560
continue to refer to us and refer

882
00:36:22,310 --> 00:36:18,839
witnesses to us I'd appreciate if you do

883
00:36:24,170 --> 00:36:22,320
that please try to prioritize the ones

884
00:36:24,910 --> 00:36:24,180
that you want to do because we do have a

885
00:36:28,130 --> 00:36:24,920
small

886
00:36:29,810 --> 00:36:28,140
research staff dealing with that

887
00:36:32,810 --> 00:36:29,820
thank you

888
00:36:34,130 --> 00:36:32,820

um and and well let's see if it goes any

889

00:36:36,290 --> 00:36:34,140

further let's see our next question here

890

00:36:38,030 --> 00:36:36,300

then do you have any uh plans for public

891

00:36:40,010 --> 00:36:38,040

engagement that you want to share now

892

00:36:42,589 --> 00:36:40,020

that you think it's important that the

893

00:36:45,470 --> 00:36:42,599

public knows what the plan is

894

00:36:48,190 --> 00:36:45,480

so we have a uh

895

00:36:50,630 --> 00:36:48,200

a number of public engagement

896

00:36:53,750 --> 00:36:50,640

recommendations according to our

897

00:36:55,730 --> 00:36:53,760

strategic plan and in public engagement

898

00:36:58,910 --> 00:36:55,740

does that mean a hearing is that what

899

00:37:01,010 --> 00:36:58,920

she's I'm not she's referring to not

900

00:37:02,510 --> 00:37:01,020

specific hmm

901
00:37:04,250 --> 00:37:02,520
that's kind of the impression I got

902
00:37:05,630 --> 00:37:04,260
right she just asked about the witnesses

903
00:37:07,130 --> 00:37:05,640
yeah

904
00:37:09,770 --> 00:37:07,140
um he knows what she's talking about

905
00:37:11,930 --> 00:37:09,780
obviously and so he says yeah thanks for

906
00:37:14,329 --> 00:37:11,940
24 Witnesses make sure you prioritize

907
00:37:16,130 --> 00:37:14,339
the ones that you want to do

908
00:37:17,930 --> 00:37:16,140
and then she says do you have any public

909
00:37:20,569 --> 00:37:17,940
engagements coming out do you have any

910
00:37:22,190 --> 00:37:20,579
public engagements um and late and I'm

911
00:37:24,829 --> 00:37:22,200
not sure exactly if he mentions it here

912
00:37:26,990 --> 00:37:24,839
but he mentions about the report is that

913
00:37:29,569 --> 00:37:27,000

they had to move up the report that was

914

00:37:31,130 --> 00:37:29,579

originally due October 31st the annual

915

00:37:32,150 --> 00:37:31,140

report they had to move it up to June or

916

00:37:35,030 --> 00:37:32,160

July

917

00:37:36,650 --> 00:37:35,040

yes I just feel like this I get the

918

00:37:38,329 --> 00:37:36,660

impression that there's going to be

919

00:37:40,609 --> 00:37:38,339

public engagements meaning these

920

00:37:42,410 --> 00:37:40,619

testimonies or Witnesses

921

00:37:43,670 --> 00:37:42,420

and I get the feeling that's going to

922

00:37:46,010 --> 00:37:43,680

happen in June or July I don't know

923

00:37:47,990 --> 00:37:46,020

what's your take on that yeah I mean

924

00:37:49,370 --> 00:37:48,000

that's what it it seems like

925

00:37:50,569 --> 00:37:49,380

um you know the only thing we can do I

926

00:37:53,030 --> 00:37:50,579

mean it was so

927

00:37:54,790 --> 00:37:53,040

unusual the way this one came up like

928

00:37:57,650 --> 00:37:54,800

all of a sudden it just popped up

929

00:37:59,750 --> 00:37:57,660

everywhere like in just a few days just

930

00:38:01,490 --> 00:37:59,760

couldn't be a hearing and I said on my

931

00:38:03,050 --> 00:38:01,500

show the other night like hey can anyone

932

00:38:05,150 --> 00:38:03,060

help me where do I find this I couldn't

933

00:38:09,230 --> 00:38:05,160

find anything and sure enough you know

934

00:38:11,089 --> 00:38:09,240

people sent uh so one of the things that

935

00:38:14,210 --> 00:38:11,099

kind of

936

00:38:16,970 --> 00:38:14,220

was extraordinary a couple of things as

937

00:38:19,609 --> 00:38:16,980

somewhere in there he talks about the

938

00:38:21,290 --> 00:38:19,619

government's historical UAP records and

939

00:38:23,270 --> 00:38:21,300

I think that and if you put that

940

00:38:25,910 --> 00:38:23,280

together with the testimonies that they

941

00:38:28,190 --> 00:38:25,920

have I know that Robert Salas from the

942

00:38:31,010 --> 00:38:28,200

1967 maelstrom

943

00:38:35,270 --> 00:38:31,020

uh you know when they the UFO shut down

944

00:38:36,890 --> 00:38:35,280

the uh the missile Warheads they're

945

00:38:38,810 --> 00:38:36,900

independent that are independently

946

00:38:40,510 --> 00:38:38,820

operated that's that's such an

947

00:38:44,390 --> 00:38:40,520

extraordinary

948

00:38:47,930 --> 00:38:44,400

uh situation back in 1967

949

00:38:49,370 --> 00:38:47,940

and you know they what are they saying

950

00:38:51,589 --> 00:38:49,380

about that I would like to know behind

951
00:38:53,930 --> 00:38:51,599
closed doors uh what they would be

952
00:38:56,630 --> 00:38:53,940
saying about that in particular National

953
00:38:59,450 --> 00:38:56,640
Security right there I mean

954
00:39:01,550 --> 00:38:59,460
you know they're you know they're there

955
00:39:04,550 --> 00:39:01,560
you know Bob sauce been going there for

956
00:39:05,930 --> 00:39:04,560
years yeah 24 Witnesses you know I was

957
00:39:07,670 --> 00:39:05,940
trying to think like who's on that list

958
00:39:10,550 --> 00:39:07,680
you know yeah

959
00:39:12,410 --> 00:39:10,560
uh be quite interesting and then who's

960
00:39:14,150 --> 00:39:12,420
going to get to you know are we ever

961
00:39:15,470 --> 00:39:14,160
going to get to see those testimonies or

962
00:39:17,690 --> 00:39:15,480
is it all going to be

963
00:39:19,970 --> 00:39:17,700

you know behind closed doors classified

964

00:39:21,890 --> 00:39:19,980

secret hearings

965

00:39:23,210 --> 00:39:21,900

yeah and someone wrote me this and I

966

00:39:27,589 --> 00:39:23,220

don't know if it's an email they're

967

00:39:30,349 --> 00:39:27,599

saying Dr Kirkpatrick himself is a UFO

968

00:39:32,990 --> 00:39:30,359

witness did you hear that

969

00:39:35,089 --> 00:39:33,000

no I've never heard that oh well I don't

970

00:39:37,010 --> 00:39:35,099

I I couldn't find any information on

971

00:39:41,150 --> 00:39:37,020

that it's just something no I mean he

972

00:39:44,870 --> 00:39:41,160

seems like a he seems like a skeptic

973

00:39:48,170 --> 00:39:44,880

yeah but scientific skeptic I mean it

974

00:39:49,730 --> 00:39:48,180

I'm ha reasonably happy with with him so

975

00:39:52,730 --> 00:39:49,740

far you know I'm happy he's out there he

976
00:39:54,349 --> 00:39:52,740
seems like he's gonna do the work do the

977
00:39:56,390 --> 00:39:54,359
scientific work to make it happen and

978
00:39:59,270 --> 00:39:56,400
that's what we want right I mean we

979
00:40:02,630 --> 00:39:59,280
can't yeah we can't be expecting them to

980
00:40:04,609 --> 00:40:02,640
give us UFO unless it's a guaranteed

981
00:40:06,829 --> 00:40:04,619
certainty right at least this guy right

982
00:40:11,569 --> 00:40:06,839
if there is UFOs in the government then

983
00:40:14,750 --> 00:40:11,579
it's it is so deep that he's not gonna

984
00:40:16,550 --> 00:40:14,760
just know about it you know he's he's

985
00:40:20,390 --> 00:40:16,560
not going to be briefed on it

986
00:40:22,550 --> 00:40:20,400
so yeah which uh always seems to bring

987
00:40:24,890 --> 00:40:22,560
us back to square one when it comes to

988
00:40:27,770 --> 00:40:24,900

things like this uh one of the things he

989

00:40:30,950 --> 00:40:27,780

he mentions uh he casually says or the

990

00:40:32,630 --> 00:40:30,960

extreme theories of extraterrestrials

991

00:40:34,750 --> 00:40:32,640

um you know I mean

992

00:40:39,470 --> 00:40:34,760

I don't think it's such an extreme

993

00:40:42,109 --> 00:40:39,480

Theory when uh the laws are defined I

994

00:40:44,510 --> 00:40:42,119

mean physics laws are defined you know

995

00:40:46,190 --> 00:40:44,520

in a lot of these these cases but

996

00:40:48,890 --> 00:40:46,200

um he does say we don't have any

997

00:40:51,290 --> 00:40:48,900

credible evidence so I guess you can use

998

00:40:54,770 --> 00:40:51,300

that uh as you know maybe it doesn't

999

00:40:57,530 --> 00:40:54,780

they don't have any hard data but um but

1000

00:40:59,210 --> 00:40:57,540

I I wouldn't call it extreme myself I

1001
00:41:00,710 --> 00:40:59,220
would just consider one of the theories

1002
00:41:03,290 --> 00:41:00,720
not does it have to be the extreme

1003
00:41:06,770 --> 00:41:03,300
Theory but I guess that goes back to the

1004
00:41:10,910 --> 00:41:08,030
the

1005
00:41:13,190 --> 00:41:10,920
in general yeah I think without a doubt

1006
00:41:15,290 --> 00:41:13,200
she mentioned it at the beginning the

1007
00:41:19,310 --> 00:41:15,300
stigma is still an issue

1008
00:41:21,829 --> 00:41:19,320
yeah I think it is and uh

1009
00:41:23,450 --> 00:41:21,839
the other way the other thing I found

1010
00:41:26,329 --> 00:41:23,460
really interesting somewhere along the

1011
00:41:30,130 --> 00:41:26,339
line he mentions that there may be a

1012
00:41:34,130 --> 00:41:30,140
possibility of to have a smartly

1013
00:41:36,950 --> 00:41:34,140

1026
00:42:04,250 --> 00:42:03,180
I did I missed so I wanted to play it

1027
00:42:06,530 --> 00:42:04,260
here but

1028
00:42:09,349 --> 00:42:06,540
I thought yeah Kirsten gillibrand I was

1029
00:42:11,870 --> 00:42:09,359
impressed by by her she seems like she's

1030
00:42:14,030 --> 00:42:11,880
she's on board knows she's got this

1031
00:42:16,430 --> 00:42:14,040
notebook I mean yeah I think that's who

1032
00:42:18,710 --> 00:42:16,440
you want I think we want yeah I'm I'm

1033
00:42:19,849 --> 00:42:18,720
happy her and and other Senators like

1034
00:42:21,530 --> 00:42:19,859
her

1035
00:42:23,930 --> 00:42:21,540
yeah keeping track of this you know she

1036
00:42:25,849 --> 00:42:23,940
seems like she's on top of it right yeah

1037
00:42:29,030 --> 00:42:25,859
I noticed the handwritten notebook there

1038
00:42:31,550 --> 00:42:29,040

too yeah coming free I don't know yeah

1039

00:42:33,530 --> 00:42:31,560

that's pretty good well I guess we could

1040

00:42:35,870 --> 00:42:33,540

call this a more or less a wrap you know

1041

00:42:37,790 --> 00:42:35,880

overall like this one in closing you

1042

00:42:40,790 --> 00:42:37,800

know overall you know I've had a lot of

1043

00:42:43,910 --> 00:42:40,800

people very disappointed in uh you know

1044

00:42:45,770 --> 00:42:43,920

the the situation of this hearing and

1045

00:42:47,030 --> 00:42:45,780

just saying you know it's uh it's more

1046

00:42:49,210 --> 00:42:47,040

of the same

1047

00:42:51,829 --> 00:42:49,220

you know blurring the lines and all that

1048

00:42:54,770 --> 00:42:51,839

uh I don't know what do you what is your

1049

00:42:58,250 --> 00:42:54,780

uh uh I heard someone say that uh they

1050

00:43:02,150 --> 00:42:58,260

did not uh disappoint us to disappoint

1051

00:43:04,609 --> 00:43:02,160

you know but I mean I I think a lot of

1052

00:43:06,829 --> 00:43:04,619

people that may be watching this may

1053

00:43:08,510 --> 00:43:06,839

think oh you know we want we want to

1054

00:43:10,970 --> 00:43:08,520

know evidence of extraterrestrial I

1055

00:43:12,950 --> 00:43:10,980

think we just have to be patient with

1056

00:43:15,290 --> 00:43:12,960

this and I think it's better than not

1057

00:43:17,210 --> 00:43:15,300

having anything I mean it's yeah I mean

1058

00:43:19,609 --> 00:43:17,220

they did not deliver anything like this

1059

00:43:22,250 --> 00:43:19,619

in the first hearing you know the first

1060

00:43:24,170 --> 00:43:22,260

thing was hey this is a joke you know we

1061

00:43:26,510 --> 00:43:24,180

don't know why we're here

1062

00:43:28,730 --> 00:43:26,520

yeah we're doing what you wanted

1063

00:43:30,410 --> 00:43:28,740

um so for me I've seen a total

1064

00:43:32,690 --> 00:43:30,420

turnaround you know this hearing was not

1065

00:43:34,849 --> 00:43:32,700

like the last one you know the last one

1066

00:43:36,470 --> 00:43:34,859

was kind of a dog and pony show and this

1067

00:43:38,089 --> 00:43:36,480

one was more of you know I liked it it

1068

00:43:40,250 --> 00:43:38,099

was in a smaller room

1069

00:43:43,430 --> 00:43:40,260

here's our questions why aren't you you

1070

00:43:46,190 --> 00:43:43,440

know fully funded you know why haven't

1071

00:43:47,390 --> 00:43:46,200

you created the Discord option that we

1072

00:43:49,430 --> 00:43:47,400

said you would

1073

00:43:51,109 --> 00:43:49,440

uh one of the issues and he said hey I

1074

00:43:53,329 --> 00:43:51,119

turned in I turned in my homework and

1075

00:43:55,609 --> 00:43:53,339

they just haven't let me you know they

1076
00:43:58,190 --> 00:43:55,619
haven't approved it so it seems like

1077
00:43:59,870 --> 00:43:58,200
they're kind of getting you know I don't

1078
00:44:03,230 --> 00:43:59,880
have much experience I haven't been in

1079
00:44:06,170 --> 00:44:03,240
this game for for that long you know but

1080
00:44:09,290 --> 00:44:06,180
they showed a full video you know yeah

1081
00:44:11,089 --> 00:44:09,300
no I like I like this video uh I think

1082
00:44:13,670 --> 00:44:11,099
it's really interesting it doesn't mean

1083
00:44:15,829 --> 00:44:13,680
that uh you know it's it's

1084
00:44:19,309 --> 00:44:15,839
extraterrestrial it's just a great

1085
00:44:21,050 --> 00:44:19,319
a great video that we'll be seeing

1086
00:44:25,370 --> 00:44:21,060
um we're all getting tired of looking at

1087
00:44:27,530 --> 00:44:25,380
the gimbal yeah over and over again uh

1088
00:44:29,390 --> 00:44:27,540

yeah I mean for me I can analyze this

1089

00:44:32,150 --> 00:44:29,400

you know I have something to work with

1090

00:44:35,089 --> 00:44:32,160

like there's some data that that idea

1091

00:44:37,250 --> 00:44:35,099

you had is not so bad you know

1092

00:44:39,589 --> 00:44:37,260

um is there a way to maybe nail it down

1093

00:44:40,970 --> 00:44:39,599

he says it's impossible but at least we

1094

00:44:43,130 --> 00:44:40,980

can try like we have something to try

1095

00:44:46,069 --> 00:44:43,140

with and we didn't even talk about the

1096

00:44:49,010 --> 00:44:46,079

uh the next video which was this one oh

1097

00:44:50,450 --> 00:44:49,020

yeah and it's yeah explained but it does

1098

00:44:55,150 --> 00:44:50,460

look pretty extraordinary when you're

1099

00:45:00,710 --> 00:44:58,910

this was a uh you know I would think

1100

00:45:03,050 --> 00:45:00,720

they would see the transponder right off

1101

00:45:05,150 --> 00:45:03,060

the fat right off the bat and just you

1102

00:45:07,370 --> 00:45:05,160

know say oh oh yeah that's what that was

1103

00:45:09,349 --> 00:45:07,380

yes you know I mean Southeast UAP

1104

00:45:11,750 --> 00:45:09,359

observed with the parent wake likely

1105

00:45:14,270 --> 00:45:11,760

resolved as commercial airliner

1106

00:45:18,069 --> 00:45:14,280

and video compression artifact so this

1107

00:45:21,109 --> 00:45:18,079

is what they say it's resolved at yeah

1108

00:45:25,010 --> 00:45:21,119

that was the same as the the same as the

1109

00:45:27,230 --> 00:45:25,020

Baghdad Phantom UAP it had these kind of

1110

00:45:29,630 --> 00:45:27,240

um signatures yeah the same structure

1111

00:45:32,329 --> 00:45:29,640

behind it and so that's what made me

1112

00:45:33,530 --> 00:45:32,339

think it was also a sensor if you look

1113

00:45:35,450 --> 00:45:33,540

here

1114

00:45:38,329 --> 00:45:35,460

uh might be tough to see but you have

1115

00:45:40,790 --> 00:45:38,339

you can actually see there's little gaps

1116

00:45:44,030 --> 00:45:40,800

but they're just the size they're the

1117

00:45:46,609 --> 00:45:44,040

same size as the actual object itself

1118

00:45:49,250 --> 00:45:46,619

so that's why yeah it does seem like

1119

00:45:50,750 --> 00:45:49,260

it's a it feels like a sensor artifact

1120

00:45:53,030 --> 00:45:50,760

[Music]

1121

00:45:55,849 --> 00:45:53,040

interesting maybe I can find the if we

1122

00:45:57,770 --> 00:45:55,859

look at the Baghdad Phantom real quick

1123

00:45:59,750 --> 00:45:57,780

and you know you're talking earlier

1124

00:46:03,230 --> 00:45:59,760

about the filters you know they changed

1125

00:46:04,849 --> 00:46:03,240

filters or now you know they have the

1126

00:46:05,990 --> 00:46:04,859

more data they get now from they're

1127

00:46:07,910 --> 00:46:06,000

seeing things that they didn't see

1128

00:46:12,530 --> 00:46:07,920

before because of the changing of the

1129

00:46:14,690 --> 00:46:12,540

filters and the floor videos are uh and

1130

00:46:16,550 --> 00:46:14,700

you know the the more new equipment it

1131

00:46:19,849 --> 00:46:16,560

seems that they have the more that they

1132

00:46:22,849 --> 00:46:19,859

see basically

1133

00:46:24,950 --> 00:46:22,859

yeah this is from Jeremy corbell's new

1134

00:46:27,290 --> 00:46:24,960

weaponized podcast

1135

00:46:28,430 --> 00:46:27,300

oh actually it's from his uh his older

1136

00:46:29,930 --> 00:46:28,440

Channel

1137

00:46:32,870 --> 00:46:29,940

but yeah let me

1138

00:46:35,750 --> 00:46:32,880

this object flew under controlled flight

1139

00:46:38,990 --> 00:46:35,760

with intelligent control oh yeah across

1140

00:46:41,030 --> 00:46:39,000

the screen from left to right

1141

00:46:42,829 --> 00:46:41,040

yeah so you see here

1142

00:46:46,370 --> 00:46:42,839

um so he caught this is the Baghdad

1143

00:46:47,809 --> 00:46:46,380

Phantom UAP yeah which was cool it was a

1144

00:46:50,930 --> 00:46:47,819

video as well

1145

00:46:51,950 --> 00:46:50,940

and and you know to me it looks like a

1146

00:46:54,050 --> 00:46:51,960

missile

1147

00:46:56,150 --> 00:46:54,060

um or some sort of projectile you know

1148

00:46:57,950 --> 00:46:56,160

it looks like a cruise missile to me um

1149

00:47:00,349 --> 00:46:57,960

you know I've had first glance in

1150

00:47:02,930 --> 00:47:00,359

uneducated glance it looks cigar shaped

1151
00:47:05,870 --> 00:47:02,940
like so many people talk about UFOs as

1152
00:47:08,630 --> 00:47:05,880
well you know but what it is that's true

1153
00:47:11,270 --> 00:47:08,640
yeah I guess it just longer

1154
00:47:14,809 --> 00:47:13,550
that was my first impression it didn't

1155
00:47:17,510 --> 00:47:14,819
seem it didn't I didn't get the

1156
00:47:20,510 --> 00:47:17,520
impression it was UAP but um yeah it's

1157
00:47:22,190 --> 00:47:20,520
too close to missiles but what I guess

1158
00:47:23,870 --> 00:47:22,200
why I brought it up the the point is is

1159
00:47:27,250 --> 00:47:23,880
what you'll see here is that has the

1160
00:47:29,089 --> 00:47:27,260
same kind of striations you see

1161
00:47:31,010 --> 00:47:29,099
uh

1162
00:47:32,809 --> 00:47:31,020
yeah I don't see a little there's a

1163
00:47:35,390 --> 00:47:32,819

little

1164

00:47:37,010 --> 00:47:35,400

and I can't see them here

1165

00:47:38,750 --> 00:47:37,020

I'm not sure where he's getting these

1166

00:47:41,150 --> 00:47:38,760

missiles it's like a little cup and pace

1167

00:47:43,309 --> 00:47:41,160

of this object

1168

00:47:44,030 --> 00:47:43,319

copy paste copy paste copy paste if you

1169

00:47:45,770 --> 00:47:44,040

see

1170

00:47:48,349 --> 00:47:45,780

um yeah

1171

00:47:50,390 --> 00:47:48,359

I'm not sure that's why they showed that

1172

00:47:52,430 --> 00:47:50,400

one in particular

1173

00:47:55,609 --> 00:47:52,440

because I think because this one came

1174

00:47:58,130 --> 00:47:55,619

out and they want 100 to prove it this

1175

00:48:00,170 --> 00:47:58,140

object flew yeah you see here it's

1176

00:48:02,390 --> 00:48:00,180

easier to see here I see it really

1177

00:48:03,950 --> 00:48:02,400

clearly yeah really clearly right and

1178

00:48:06,470 --> 00:48:03,960

that that did look weird to me because

1179

00:48:09,230 --> 00:48:06,480

it was some sort of some sort of Trail

1180

00:48:09,890 --> 00:48:09,240

some sort of wake Trail or something

1181

00:48:12,170 --> 00:48:09,900

um

1182

00:48:13,910 --> 00:48:12,180

but they say it's a sensor artifact is

1183

00:48:16,490 --> 00:48:13,920

what uh

1184

00:48:18,530 --> 00:48:16,500

that's what Kirkpatrick says

1185

00:48:22,190 --> 00:48:18,540

now if this was some type of missile

1186

00:48:24,109 --> 00:48:22,200

wouldn't they know that somehow or

1187

00:48:26,809 --> 00:48:24,119

whoever really who released that and how

1188

00:48:29,809 --> 00:48:26,819

did Jeremy get a hold of it that's

1189

00:48:32,150 --> 00:48:29,819

that's the uh he's this has happened a

1190

00:48:34,970 --> 00:48:32,160

few times it's that's pretty interesting

1191

00:48:37,069 --> 00:48:34,980

yeah it is quite interesting

1192

00:48:38,450 --> 00:48:37,079

so this one was an interesting and one

1193

00:48:44,030 --> 00:48:38,460

and I think they released it because of

1194

00:48:49,250 --> 00:48:46,970

yeah all right well hey Chris thank you

1195

00:48:51,710 --> 00:48:49,260

so much it's been all a real pleasure

1196

00:48:54,290 --> 00:48:51,720

and again I I if you're watching this

1197

00:48:55,550 --> 00:48:54,300

first stop and then jump well if you got

1198

00:48:57,109 --> 00:48:55,560

this far then you've watched the whole

1199

00:48:58,609 --> 00:48:57,119

thing but

1200

00:49:00,650 --> 00:48:58,619

don't forget to watch the first part

1201

00:49:03,109 --> 00:49:00,660

over at Chris's Channel and the link

1202

00:49:05,450 --> 00:49:03,119

will be below thank you so much Chris

1203

00:49:07,430 --> 00:49:05,460

yeah thanks yeah thanks Martin thanks

1204

00:49:09,230 --> 00:49:07,440

for the collab that was it was fun and

1205

00:49:12,230 --> 00:49:09,240

uh
