

ROGUE PLANET

UFO NEWS BRIEF

1  
00:00:02,869 --> 00:00:01,400  
greetings people of Earth this is your

2  
00:00:08,059 --> 00:00:02,879  
rug planet UFO news brief for the week

3  
00:00:09,560 --> 00:00:08,069  
of august 31st 2015 a weird-looking UFO

4  
00:00:11,450 --> 00:00:09,570  
is photographed in the costa rican town

5  
00:00:13,100 --> 00:00:11,460  
of sudoku loan and the outskirts of San

6  
00:00:14,690 --> 00:00:13,110  
Jose the photographer submitted the

7  
00:00:16,250 --> 00:00:14,700  
photos and a description of the incident

8  
00:00:18,500 --> 00:00:16,260  
to move on the mutual UFO network-- the

9  
00:00:20,120 --> 00:00:18,510  
witness describes I was on soccer field

10  
00:00:21,620 --> 00:00:20,130  
so dark hovering object against sky to

11  
00:00:23,210 --> 00:00:21,630  
the east at first I thought it was a

12  
00:00:25,340 --> 00:00:23,220  
photography drone I grabbed my camera

13  
00:00:26,599 --> 00:00:25,350

and started capturing the object then it

14

00:00:28,550 --> 00:00:26,609

was not pretty sure what it was because

15

00:00:30,380 --> 00:00:28,560

I could not see propellers like the ones

16

00:00:32,330 --> 00:00:30,390

on a drone the object had a manta ray

17

00:00:33,740 --> 00:00:32,340

shape surface did not reflect sunlight

18

00:00:36,110 --> 00:00:33,750

much despite it was a bright morning

19

00:00:38,119 --> 00:00:36,120

object hovered downtown similar to a

20

00:00:39,860 --> 00:00:38,129

drone type flight it descended a few

21

00:00:42,410 --> 00:00:39,870

meters and flew slowly toward north

22

00:00:44,540 --> 00:00:42,420

object ended up near a hill where I lost

23

00:00:46,279 --> 00:00:44,550

sight wandered with tree canopy sighting

24

00:00:47,450 --> 00:00:46,289

lasted around 11 minutes some who have

25

00:00:48,950 --> 00:00:47,460

viewed the photos suggest that the

26  
00:00:50,690 --> 00:00:48,960  
object is simply a bug close to the

27  
00:00:52,760 --> 00:00:50,700  
camera but if the witness did actually

28  
00:00:54,770 --> 00:00:52,770  
observe the object in the sky as claimed

29  
00:00:56,630 --> 00:00:54,780  
and the bug possibility can be ruled out

30  
00:00:58,700 --> 00:00:56,640  
one good possibility is a balloon of

31  
00:01:00,560 --> 00:00:58,710  
some sort but with nothing more to go on

32  
00:01:02,599 --> 00:01:00,570  
but a few photos in one witness's

33  
00:01:03,770 --> 00:01:02,609  
testimony it's really impossible to

34  
00:01:05,929 --> 00:01:03,780  
definitively identify the

35  
00:01:07,460 --> 00:01:05,939  
strange-looking aerial object deciding

36  
00:01:09,200 --> 00:01:07,470  
took place back on march twenty second

37  
00:01:10,789 --> 00:01:09,210  
it's unclear why the witness submitted

38  
00:01:15,649 --> 00:01:10,799

deciding to move on more than five

39

00:01:17,120 --> 00:01:15,659

months after the incident nasa's new

40

00:01:19,160 --> 00:01:17,130

horizons spacecraft completed its

41

00:01:20,749 --> 00:01:19,170

historic Pluto flyby on july fourteenth

42

00:01:22,640 --> 00:01:20,759

the data collected reveals exciting

43

00:01:24,920 --> 00:01:22,650

details about the dwarf planet like icy

44

00:01:26,960 --> 00:01:24,930

mountain ranges flowing ice in an eerie

45

00:01:28,580 --> 00:01:26,970

atmospheric haze scientists are still

46

00:01:30,380 --> 00:01:28,590

receiving and evaluating the data from

47

00:01:32,120 --> 00:01:30,390

New Horizons but preliminary information

48

00:01:33,230 --> 00:01:32,130

suggests the Pluto could potentially

49

00:01:35,120 --> 00:01:33,240

join the list of worlds in our solar

50

00:01:37,280 --> 00:01:35,130

system where alien life might exist

51  
00:01:38,899 --> 00:01:37,290  
British physicist and Professor Brian

52  
00:01:41,240 --> 00:01:38,909  
Cox explained in a recent interview with

53  
00:01:43,069 --> 00:01:41,250  
UK media outlet the times that New

54  
00:01:45,499 --> 00:01:43,079  
Horizons data suggests that there may

55  
00:01:47,749 --> 00:01:45,509  
well be a subsurface ocean on Pluto he

56  
00:01:49,609 --> 00:01:47,759  
added this means if our understanding of

57  
00:01:51,350 --> 00:01:49,619  
life on Earth is even slightly correct

58  
00:01:53,810 --> 00:01:51,360  
that you could have living things there

59  
00:01:55,700 --> 00:01:53,820  
later Cox took to Twitter to clarify to

60  
00:01:57,740 --> 00:01:55,710  
be precise liquid water is necessary but

61  
00:02:00,289 --> 00:01:57,750  
not sufficient for life and there might

62  
00:02:01,520 --> 00:02:00,299  
be subsurface liquid water on Pluto NASA

63  
00:02:03,170 --> 00:02:01,530

will receive more information from New

64

00:02:04,850 --> 00:02:03,180

Horizons in the coming weeks but it will

65

00:02:06,709 --> 00:02:04,860

probably be a long while before we can

66

00:02:10,330 --> 00:02:06,719

determine if luto is indeed home to

67

00:02:14,210 --> 00:02:12,710

exploring subsurface oceans for life on

68

00:02:16,370 --> 00:02:14,220

alien worlds is high on the priority

69

00:02:18,110 --> 00:02:16,380

list for astrobiologists NASA already

70

00:02:19,820 --> 00:02:18,120

plans to launch a spacecraft bound for

71

00:02:22,100 --> 00:02:19,830

Jupiter's exciting moon Europa in the

72

00:02:23,840 --> 00:02:22,110

2020s NASA is also considering a mission

73

00:02:25,640 --> 00:02:23,850

to Saturn's moon Enceladus and one

74

00:02:28,580 --> 00:02:25,650

possible concept is called the

75

00:02:30,530 --> 00:02:28,590

intelligence life finder or LF Enceladus

76

00:02:34,010 --> 00:02:30,540

like Europa likely has a liquid water

77

00:02:35,780 --> 00:02:34,020

ocean beneath it's icy surface obviously

78

00:02:37,340 --> 00:02:35,790

it would be amazing to send a lander to

79

00:02:39,470 --> 00:02:37,350

drill through the ice to collect water

80

00:02:41,330 --> 00:02:39,480

samples although such missions are being

81

00:02:44,210 --> 00:02:41,340

developed the e.l.f concept takes a

82

00:02:46,190 --> 00:02:44,220

simpler approach relatively nothing is

83

00:02:48,290 --> 00:02:46,200

simple in space geysers on Enceladus

84

00:02:50,420 --> 00:02:48,300

view water eyes salts and carbon

85

00:02:52,010 --> 00:02:50,430

containing organics into space the ELS

86

00:02:53,870 --> 00:02:52,020

spacecraft would fly through the plumes

87

00:02:55,610 --> 00:02:53,880

and gather samples NASA's Cassini

88

00:02:57,590 --> 00:02:55,620

spacecraft has flown through these

89

00:02:59,570 --> 00:02:57,600

plumes but lacks the equipment to search

90

00:03:01,160 --> 00:02:59,580

for life dlf would have the onboard

91

00:03:03,170 --> 00:03:01,170

ability to search for biological

92

00:03:04,790 --> 00:03:03,180

activity dlf concept principal

93

00:03:06,740 --> 00:03:04,800

investigator Jonathan lanaya told

94

00:03:08,330 --> 00:03:06,750

space.com we think we have the highest

95

00:03:10,729 --> 00:03:08,340

chance of success of getting an

96

00:03:12,740 --> 00:03:10,739

indicator of alien life for really any

97

00:03:14,570 --> 00:03:12,750

mission at this point if NASA selects

98

00:03:19,600 --> 00:03:14,580

the LF horn Enceladus mission it could

99

00:03:23,930 --> 00:03:21,560

billionaire and presidential candidate

100

00:03:25,130 --> 00:03:23,940

Donald Trump loves attention and recent

101

00:03:26,720 --> 00:03:25,140

photo suggests that he might have

102

00:03:28,550 --> 00:03:26,730

attracted some extraterrestrial

103

00:03:30,020 --> 00:03:28,560

attention Trump was in Des Moines Iowa

104

00:03:31,970 --> 00:03:30,030

on August fifteenth at the Iowa State

105

00:03:33,830 --> 00:03:31,980

Fair he was reportedly giving some kids

106

00:03:35,449 --> 00:03:33,840

riding his helicopter someone on the

107

00:03:37,009 --> 00:03:35,459

ground photograph the helicopter as it

108

00:03:39,110 --> 00:03:37,019

flew overhead when this photographer

109

00:03:40,759 --> 00:03:39,120

looked at the photo later that day a UFO

110

00:03:42,380 --> 00:03:40,769

was in the photo behind the helicopter

111

00:03:44,390 --> 00:03:42,390

the photographer submitted the photo to

112

00:03:46,009 --> 00:03:44,400

MUFON and Iowa's MUFON chapter is

113

00:03:47,569 --> 00:03:46,019

reportedly investigating but as

114

00:03:49,430 --> 00:03:47,579

Huffington Post journalist Lee Spiegel

115

00:03:51,410 --> 00:03:49,440

points out there's probably a perfectly

116

00:03:53,479 --> 00:03:51,420

humdrum explanation for whatever it was

117

00:03:55,520 --> 00:03:53,489

trailing America's foremost reality TV

118

00:03:58,370 --> 00:03:55,530

billionaire but until officials know for

119

00:03:59,569 --> 00:03:58,380

sure we'll file it under a UFO this is

120

00:04:00,949 --> 00:03:59,579

just a sample of the UFO and

121

00:04:02,509 --> 00:04:00,959

extraterrestrial related stories that

122

00:04:04,990 --> 00:04:02,519

made headlines this week for more check
