

UFO | QUICK LOOK

OH MY!

SILVER CUBE,
SPHERE, ACORN, AND
METALLIC BLIMP UFOS

1
00:00:03,429 --> 00:00:01,829
three new ufo photos were recently

2
00:00:05,190 --> 00:00:03,439
released that show three separate

3
00:00:08,240 --> 00:00:05,200
objects photographed by the weapons

4
00:00:14,910 --> 00:00:08,250
systems operator of a navy f-18 fighter

5
00:00:23,830 --> 00:00:17,710
jet

6
00:00:25,589 --> 00:00:23,840
[Music]

7
00:00:28,070 --> 00:00:25,599
i'm jason and today we're going to take

8
00:00:30,390 --> 00:00:28,080
a quick look at these ufo photos

9
00:00:32,470 --> 00:00:30,400
on april 6th the media outlet mystery

10
00:00:35,590 --> 00:00:32,480
wire published an article titled

11
00:00:37,430 --> 00:00:35,600
mystery objects remain unidentified the

12
00:00:39,750 --> 00:00:37,440
objects referred to here are from an

13
00:00:40,950 --> 00:00:39,760

incident back in 2019 where the weapons

14

00:00:42,869 --> 00:00:40,960

systems operator

15

00:00:44,869 --> 00:00:42,879

of an f-18 fighter jet took photos of a

16

00:00:46,790 --> 00:00:44,879

ufo with his iphone

17

00:00:48,389 --> 00:00:46,800

media outlet the debrief published one

18

00:00:50,950 --> 00:00:48,399

of those photos to its website

19

00:00:51,990 --> 00:00:50,960

on december 3rd 2020 with details

20

00:00:53,990 --> 00:00:52,000

explaining that quote

21

00:00:56,069 --> 00:00:54,000

according to three us officials who had

22

00:00:58,950 --> 00:00:56,079

seen it the photos showed an

23

00:01:00,709 --> 00:00:58,960

unidentified silver cube-shaped object

24

00:01:02,229 --> 00:01:00,719

the report is said to have indicated the

25

00:01:04,390 --> 00:01:02,239

object was hovering or

26

00:01:06,710 --> 00:01:04,400

completely motionless when military

27

00:01:08,710 --> 00:01:06,720

pilots encountered it end quote

28

00:01:10,070 --> 00:01:08,720

as was expected that photo received a

29

00:01:12,070 --> 00:01:10,080

lot of attention online

30

00:01:13,510 --> 00:01:12,080

and some even pointed out that the shape

31

00:01:16,310 --> 00:01:13,520

and appearance of the object

32

00:01:18,789 --> 00:01:16,320

in that photo strongly resembled a mylar

33

00:01:23,429 --> 00:01:18,799

batman balloon

34

00:01:27,590 --> 00:01:25,670

jumping now to april 6th the article

35

00:01:29,590 --> 00:01:27,600

published on mysterywire's website by

36

00:01:32,310 --> 00:01:29,600

investigative journalist george knapp

37

00:01:33,429 --> 00:01:32,320

added three more ufo photos to this same

38

00:01:36,630 --> 00:01:33,439

incident

39

00:01:39,670 --> 00:01:36,640
occurred on march 4th

40

00:01:39,990 --> 00:01:39,680
2019 and he explains quote an f-18

41

00:01:42,469 --> 00:01:40,000
weapon

42

00:01:44,389 --> 00:01:42,479
systems operator seated behind the pilot

43

00:01:46,149 --> 00:01:44,399
used his iphone to capture images of

44

00:01:47,590 --> 00:01:46,159
three different objects he encountered

45

00:01:49,749 --> 00:01:47,600
in the same airspace

46

00:01:51,510 --> 00:01:49,759
end quote knapp references these photos

47

00:01:52,950 --> 00:01:51,520
using the names reportedly assigned to

48

00:01:56,069 --> 00:01:52,960
each by the navy

49

00:01:57,109 --> 00:01:56,079
the sphere the acorn and the metallic

50

00:01:59,749 --> 00:01:57,119
blimp

51
00:02:01,190 --> 00:01:59,759
the acorn photo is a less clear version

52
00:02:01,830 --> 00:02:01,200
of that object we already saw back in

53
00:02:03,109 --> 00:02:01,840
december

54
00:02:05,429 --> 00:02:03,119
so there's not much new for us to

55
00:02:07,190 --> 00:02:05,439
analyze with this photo it still bears a

56
00:02:09,589 --> 00:02:07,200
resemblance to that batman balloon

57
00:02:11,589 --> 00:02:09,599
or some other balloon but remember the

58
00:02:12,790 --> 00:02:11,599
claim that this thing was completely

59
00:02:14,710 --> 00:02:12,800
motionless

60
00:02:16,869 --> 00:02:14,720
knapp also reported that it was said

61
00:02:17,910 --> 00:02:16,879
that it was able to remain stationary in

62
00:02:20,710 --> 00:02:17,920
high winds

63
00:02:23,030 --> 00:02:20,720

with no movement beyond the capabilities

64

00:02:25,430 --> 00:02:23,040

of known balloons or drones

65

00:02:26,150 --> 00:02:25,440

knapp also points out that quote two

66

00:02:27,990 --> 00:02:26,160

years later

67

00:02:31,030 --> 00:02:28,000

after careful study by the uap task

68

00:02:32,070 --> 00:02:31,040

force the objects remain unidentified in

69

00:02:34,470 --> 00:02:32,080

quote

70

00:02:36,630 --> 00:02:34,480

these are fascinating statements however

71

00:02:37,750 --> 00:02:36,640

we in the general public who have read

72

00:02:40,309 --> 00:02:37,760

the available information

73

00:02:41,830 --> 00:02:40,319

are working with very limited data we

74

00:02:43,190 --> 00:02:41,840

don't know what additional information

75

00:02:43,990 --> 00:02:43,200

contributed to the claim that the

76

00:02:45,910 --> 00:02:44,000

apparent

77

00:02:47,589 --> 00:02:45,920

motionless behavior of this object was

78

00:02:49,270 --> 00:02:47,599

quote beyond the capability of known

79

00:02:51,670 --> 00:02:49,280

balloons or drones in quote

80

00:02:53,589 --> 00:02:51,680

or who made that claim we've been told

81

00:02:56,309 --> 00:02:53,599

that the uap task force report

82

00:02:58,470 --> 00:02:56,319

noted that but we don't know who or what

83

00:03:00,869 --> 00:02:58,480

contributed to that claim

84

00:03:02,630 --> 00:03:00,879

drones can and do hover in place and

85

00:03:03,589 --> 00:03:02,640

balloons can certainly appear motionless

86

00:03:05,190 --> 00:03:03,599

in the sky

87

00:03:07,430 --> 00:03:05,200

even if it's windy where you're

88

00:03:08,470 --> 00:03:07,440

observing it from for the occupants of

89

00:03:10,630 --> 00:03:08,480

the f-18

90

00:03:13,110 --> 00:03:10,640

they cruise at approximately 700 miles

91

00:03:15,190 --> 00:03:13,120

per hour so a small balloon in the sky

92

00:03:16,710 --> 00:03:15,200

would appear motionless to those who are

93

00:03:19,110 --> 00:03:16,720

traveling at that speed

94

00:03:20,949 --> 00:03:19,120

so for the uap task force to reportedly

95

00:03:22,550 --> 00:03:20,959

state that this object demonstrated

96

00:03:23,509 --> 00:03:22,560

capabilities beyond those of known

97

00:03:25,430 --> 00:03:23,519

balloons

98

00:03:27,350 --> 00:03:25,440

we have to assume that they are working

99

00:03:29,509 --> 00:03:27,360

with significantly more data

100

00:03:31,110 --> 00:03:29,519

than what we've seen moving on to the

101
00:03:33,990 --> 00:03:31,120
sphere object

102
00:03:34,869 --> 00:03:34,000
all we have here is an out of focus

103
00:03:36,869 --> 00:03:34,879
something

104
00:03:38,869 --> 00:03:36,879
because the object is out of focus and

105
00:03:40,470 --> 00:03:38,879
because it's so far away

106
00:03:42,470 --> 00:03:40,480
most of what we see in the photo is

107
00:03:43,910 --> 00:03:42,480
digital noise and artifacts

108
00:03:45,910 --> 00:03:43,920
this is pretty common with cell phone

109
00:03:46,550 --> 00:03:45,920
cameras but even with professional

110
00:03:48,470 --> 00:03:46,560
cameras

111
00:03:50,470 --> 00:03:48,480
when an object is out of focus you

112
00:03:51,350 --> 00:03:50,480
really have absolutely no idea what that

113
00:03:54,630 --> 00:03:51,360

object is

114

00:03:55,910 --> 00:03:54,640

and what its true shape is and so on so

115

00:03:57,830 --> 00:03:55,920

we can come back to that point in a

116

00:03:59,750 --> 00:03:57,840

minute but let's quickly talk about the

117

00:04:01,589 --> 00:03:59,760

metallic blimp photo

118

00:04:04,149 --> 00:04:01,599

this is probably the most visually

119

00:04:06,949 --> 00:04:04,159

interesting photo of the three

120

00:04:09,750 --> 00:04:06,959

it's mostly in focus and you can see an

121

00:04:11,750 --> 00:04:09,760

elongated shape with curves and contours

122

00:04:14,390 --> 00:04:11,760

giving it an interesting shape when it

123

00:04:15,990 --> 00:04:14,400

comes to photos of ufos there's not a

124

00:04:16,629 --> 00:04:16,000

lot of useful information that can be

125

00:04:18,789 --> 00:04:16,639

gleaned

126
00:04:20,469 --> 00:04:18,799
from the images themselves especially

127
00:04:21,189 --> 00:04:20,479
when we're dealing with a tiny dot in

128
00:04:23,749 --> 00:04:21,199
the sky

129
00:04:26,310 --> 00:04:23,759
that's been blown up resulting in all

130
00:04:28,710 --> 00:04:26,320
sorts of digital artifacts and noise

131
00:04:30,230 --> 00:04:28,720
but they're still fun to look at so i

132
00:04:31,350 --> 00:04:30,240
took the three photos published by

133
00:04:33,270 --> 00:04:31,360
mystery wire

134
00:04:35,270 --> 00:04:33,280
and ran them through some software that

135
00:04:37,430 --> 00:04:35,280
utilizes artificial intelligence

136
00:04:40,070 --> 00:04:37,440
to enlarge the photos while maintaining

137
00:04:42,150 --> 00:04:40,080
as much of the quality as possible

138
00:04:43,670 --> 00:04:42,160

now two of these photos are pretty low

139

00:04:45,670 --> 00:04:43,680

quality to start with

140

00:04:48,150 --> 00:04:45,680

so the enlargement results aren't that

141

00:04:49,830 --> 00:04:48,160

great but the acorn image started out as

142

00:04:52,550 --> 00:04:49,840

a higher resolution image

143

00:04:53,909 --> 00:04:52,560

so the enlargement of that one is pretty

144

00:04:56,150 --> 00:04:53,919

interesting

145

00:04:58,390 --> 00:04:56,160

the metallic blimp photo almost takes on

146

00:05:00,469 --> 00:04:58,400

a shark appearance when it's enlarged

147

00:05:01,909 --> 00:05:00,479

and you could even maybe make out a sort

148

00:05:04,230 --> 00:05:01,919

of cinching at the bottom

149

00:05:05,830 --> 00:05:04,240

maybe like you would see on a balloon

150

00:05:07,830 --> 00:05:05,840

with the sphere photo

151

00:05:09,189 --> 00:05:07,840

because it's out of focus it doesn't

152

00:05:10,310 --> 00:05:09,199

really benefit at all from the

153

00:05:12,070 --> 00:05:10,320

enlargement

154

00:05:13,670 --> 00:05:12,080

but you can convince yourself that it

155

00:05:17,029 --> 00:05:13,680

looks like a smiley face

156

00:05:17,990 --> 00:05:17,039

so that's nice now the acorn photo is

157

00:05:19,189 --> 00:05:18,000

pretty cool

158

00:05:20,790 --> 00:05:19,199

this enlargement reveals some

159

00:05:22,469 --> 00:05:20,800

interesting details that make it look

160

00:05:24,310 --> 00:05:22,479

less like a batman balloon

161

00:05:26,310 --> 00:05:24,320

but interestingly makes it look more

162

00:05:27,990 --> 00:05:26,320

like a solar tetrahedron balloon

163

00:05:30,629 --> 00:05:28,000

and it too looks like it's cinched at

164

00:05:33,029 --> 00:05:30,639

the bottom exactly like a solar balloon

165

00:05:35,270 --> 00:05:33,039

i'm not saying that's what this is but

166

00:05:37,189 --> 00:05:35,280

it does bear a striking resemblance

167

00:05:38,629 --> 00:05:37,199

what else do we know about these photos

168

00:05:40,629 --> 00:05:38,639

where did they come from

169

00:05:41,830 --> 00:05:40,639

well we were told in the december 2020

170

00:05:43,189 --> 00:05:41,840

article from the debrief

171

00:05:45,110 --> 00:05:43,199

that these photos were part of a

172

00:05:47,590 --> 00:05:45,120

classified intelligence report

173

00:05:49,749 --> 00:05:47,600

on ufos from the pentagon's unidentified

174

00:05:52,070 --> 00:05:49,759

aerial phenomena task force

175

00:05:53,350 --> 00:05:52,080

george knapp had previously stated that

176

00:05:53,990 --> 00:05:53,360

he had been in possession of these

177

00:05:56,150 --> 00:05:54,000

photos

178

00:05:58,070 --> 00:05:56,160

for a couple of years and the new

179

00:05:59,830 --> 00:05:58,080

article on mysterywire.com

180

00:06:01,909 --> 00:05:59,840

provides additional information

181

00:06:03,590 --> 00:06:01,919

explaining that quote mysterywire first

182

00:06:05,590 --> 00:06:03,600

learned of the photos exactly two years

183

00:06:06,070 --> 00:06:05,600

ago during a private briefing hosted by

184

00:06:08,469 --> 00:06:06,080

robert

185

00:06:09,990 --> 00:06:08,479

bigelow and several others in las vegas

186

00:06:13,029 --> 00:06:10,000

on saturday april 6

187

00:06:14,150 --> 00:06:13,039

2019 end quote that raises so many

188

00:06:15,670 --> 00:06:14,160

questions

189

00:06:17,270 --> 00:06:15,680

sure bigelow has invested millions of

190

00:06:19,270 --> 00:06:17,280

dollars into ufo research

191

00:06:21,189 --> 00:06:19,280

and he was contracted for a period of

192

00:06:22,790 --> 00:06:21,199

time by the us government to study ufos

193

00:06:25,270 --> 00:06:22,800

and other strange subjects

194

00:06:26,790 --> 00:06:25,280

but as far as we know that contract

195

00:06:28,790 --> 00:06:26,800

ended in 2012.

196

00:06:31,189 --> 00:06:28,800

so why was robert bigelow involved in a

197

00:06:33,510 --> 00:06:31,199

briefing about ufos in 2019

198

00:06:35,430 --> 00:06:33,520

that's interesting and if these photos

199

00:06:37,670 --> 00:06:35,440

are from sensitive briefings prepared

200

00:06:39,990 --> 00:06:37,680

by the uap task force why were they

201
00:06:42,390 --> 00:06:40,000
being shown at an event in las vegas

202
00:06:43,670 --> 00:06:42,400
where a reporter was allowed to see them

203
00:06:45,430 --> 00:06:43,680
lots of questions

204
00:06:47,350 --> 00:06:45,440
i spent a bit of time during my ufo

205
00:06:49,189 --> 00:06:47,360
career photographing and studying

206
00:06:51,110 --> 00:06:49,199
strange aerial objects

207
00:06:53,589 --> 00:06:51,120
and i've analyzed hundreds maybe even

208
00:06:55,589 --> 00:06:53,599
thousands of ufo photos and videos

209
00:06:58,070 --> 00:06:55,599
so i've seen balloons do weird stuff in

210
00:06:59,110 --> 00:06:58,080
the sky balloons come in all shapes and

211
00:07:04,070 --> 00:06:59,120
sizes

212
00:07:05,830 --> 00:07:04,080
change as the balloon loses helium

213
00:07:07,670 --> 00:07:05,840

and as the balloon encounters different

214

00:07:08,469 --> 00:07:07,680

environmental conditions like wind

215

00:07:11,510 --> 00:07:08,479

currents

216

00:07:13,189 --> 00:07:11,520

sunlight and so on one unusual object i

217

00:07:16,070 --> 00:07:13,199

photographed in mexico city

218

00:07:16,950 --> 00:07:16,080

took on many different appearances first

219

00:07:19,350 --> 00:07:16,960

i have a photo

220

00:07:21,189 --> 00:07:19,360

of this object that's out of focus which

221

00:07:22,469 --> 00:07:21,199

provides a great example of how an out

222

00:07:25,350 --> 00:07:22,479

of focus object

223

00:07:25,830 --> 00:07:25,360

really masks the real appearance but

224

00:07:27,589 --> 00:07:25,840

yeah

225

00:07:29,990 --> 00:07:27,599

this object looks kind of crazy in the

226

00:07:32,469 --> 00:07:30,000

photos and it looked even crazier

227

00:07:33,909 --> 00:07:32,479

in person on the camera's display the

228

00:07:36,070 --> 00:07:33,919

thing was morphing shape

229

00:07:37,990 --> 00:07:36,080

changing colors and it looked like it

230

00:07:39,110 --> 00:07:38,000

was intelligently swimming through the

231

00:07:41,270 --> 00:07:39,120

sky

232

00:07:43,270 --> 00:07:41,280

in the end the object that wowed me at

233

00:07:44,309 --> 00:07:43,280

the time was most likely a simple

234

00:07:46,710 --> 00:07:44,319

weather balloon

235

00:07:48,469 --> 00:07:46,720

but because of the sun's reflection the

236

00:07:51,029 --> 00:07:48,479

slightly deflated balloon

237

00:07:52,309 --> 00:07:51,039

and the extreme altitude of the object

238

00:07:55,029 --> 00:07:52,319

the behavior and appearance

239

00:07:57,430 --> 00:07:55,039

was weird any number of variables can

240

00:08:00,469 --> 00:07:57,440

easily make normal things look weird

241

00:08:02,150 --> 00:08:00,479

it happens all the time yes i'm well

242

00:08:03,510 --> 00:08:02,160

aware of the assertions that a highly

243

00:08:05,270 --> 00:08:03,520

trained naval aviator

244

00:08:06,629 --> 00:08:05,280

would be able to easily identify a

245

00:08:08,230 --> 00:08:06,639

balloon in the sky

246

00:08:10,710 --> 00:08:08,240

and that's just an unrealistic

247

00:08:12,150 --> 00:08:10,720

expectation pilots and others in the sky

248

00:08:14,790 --> 00:08:12,160

aren't placed in front of a computer and

249

00:08:16,710 --> 00:08:14,800

shown absolutely every possible object

250

00:08:19,110 --> 00:08:16,720

that could conceivably be in the sky

251
00:08:21,029 --> 00:08:19,120
under every possible condition

252
00:08:22,309 --> 00:08:21,039
i'm not saying the acorn object was a

253
00:08:26,150 --> 00:08:22,319
batman balloon

254
00:08:27,830 --> 00:08:26,160
were in the sky

255
00:08:29,589 --> 00:08:27,840
that's probably not something fighter

256
00:08:32,149 --> 00:08:29,599
pilots have seen

257
00:08:33,829 --> 00:08:32,159
ever yes naval aviators are highly

258
00:08:35,589 --> 00:08:33,839
skilled and highly trained

259
00:08:37,430 --> 00:08:35,599
they're trained observers they're

260
00:08:39,110 --> 00:08:37,440
trained at operating their aircraft and

261
00:08:41,750 --> 00:08:39,120
the on-board systems

262
00:08:42,630 --> 00:08:41,760
but they're still humans they simply

263
00:08:45,110 --> 00:08:42,640

can't easily

264

00:08:45,910 --> 00:08:45,120

identify every and all possible objects

265

00:08:47,509 --> 00:08:45,920

in the sky

266

00:08:49,670 --> 00:08:47,519

especially while speeding through the

267

00:08:51,509 --> 00:08:49,680

sky at hundreds of miles an hour

268

00:08:53,110 --> 00:08:51,519

in a case where an aviator might not be

269

00:08:56,310 --> 00:08:53,120

able to identify a weird thing in the

270

00:08:59,350 --> 00:08:56,320

sky that's not a failure by any means

271

00:09:01,269 --> 00:08:59,360

that's normal and should be expected

272

00:09:02,949 --> 00:09:01,279

and likewise it makes perfect sense for

273

00:09:05,190 --> 00:09:02,959

the incident to be reported

274

00:09:06,710 --> 00:09:05,200

some people also doubt that the navy and

275

00:09:08,389 --> 00:09:06,720

or the uap task force

276

00:09:11,190 --> 00:09:08,399

would include something mundane like a

277

00:09:13,750 --> 00:09:11,200

balloon in an intelligence report

278

00:09:15,750 --> 00:09:13,760

that is unlikely but not if they don't

279

00:09:18,150 --> 00:09:15,760

know that it's a balloon right

280

00:09:19,750 --> 00:09:18,160

again the navy and the uap task force is

281

00:09:22,550 --> 00:09:19,760

composed of people

282

00:09:22,949 --> 00:09:22,560

humans they aren't all-knowing and they

283

00:09:24,790 --> 00:09:22,959

too

284

00:09:26,470 --> 00:09:24,800

when presented with something odd or

285

00:09:27,350 --> 00:09:26,480

strange-looking that they haven't seen

286

00:09:29,670 --> 00:09:27,360

before

287

00:09:31,350 --> 00:09:29,680

label it as unidentified that's what

288

00:09:33,269 --> 00:09:31,360

unidentified is

289

00:09:35,269 --> 00:09:33,279

and remember the people in the uap task

290

00:09:37,430 --> 00:09:35,279

force aren't some elite group with

291

00:09:38,550 --> 00:09:37,440

decades of ufo research experience to

292

00:09:40,630 --> 00:09:38,560

pull from

293

00:09:43,430 --> 00:09:40,640

these are people who were only recently

294

00:09:45,829 --> 00:09:43,440

assigned to collect ufo data

295

00:09:47,910 --> 00:09:45,839

all this is new to them they don't have

296

00:09:50,070 --> 00:09:47,920

the benefit of years of exposure and

297

00:09:52,710 --> 00:09:50,080

attention to all things ufo

298

00:09:53,829 --> 00:09:52,720

like ufo researchers have and that's

299

00:09:56,389 --> 00:09:53,839

likely why

300

00:09:57,829 --> 00:09:56,399

they have been seemingly leaning heavily

301
00:10:00,230 --> 00:09:57,839
on ufo researchers

302
00:10:02,150 --> 00:10:00,240
to provide them with their information

303
00:10:04,389 --> 00:10:02,160
but that's all beside the point

304
00:10:07,030 --> 00:10:04,399
i'm not saying that the objects in these

305
00:10:08,949 --> 00:10:07,040
three ufo photos are balloons

306
00:10:11,670 --> 00:10:08,959
yes from the data we have the appearance

307
00:10:13,670 --> 00:10:11,680
and behavior is consistent with balloons

308
00:10:15,430 --> 00:10:13,680
that's just a possibility that

309
00:10:17,110 --> 00:10:15,440
responsible and objective researchers

310
00:10:18,870 --> 00:10:17,120
can and should consider

311
00:10:20,470 --> 00:10:18,880
they can also be extraterrestrial or

312
00:10:22,710 --> 00:10:20,480
interdimensional craft

313
00:10:24,389 --> 00:10:22,720

the possibilities are endless but

314

00:10:27,509 --> 00:10:24,399

without additional data

315

00:10:28,550 --> 00:10:27,519

all we can do is speculate we're forced

316

00:10:31,509 --> 00:10:28,560

to assume

317

00:10:33,430 --> 00:10:31,519

that the uap task force or whoever made

318

00:10:36,230 --> 00:10:33,440

determinations about these photos

319

00:10:37,030 --> 00:10:36,240

has much more data to work with and all

320

00:10:39,190 --> 00:10:37,040

we can do

321

00:10:40,230 --> 00:10:39,200

is hope that we eventually get to see

322

00:10:41,750 --> 00:10:40,240

some of that

323

00:10:43,829 --> 00:10:41,760

big thanks to george knapp for his

324

00:10:45,269 --> 00:10:43,839

reporting on this and for bringing these

325

00:10:46,949 --> 00:10:45,279

photos forward

326

00:10:49,190 --> 00:10:46,959

george is a longtime friend and i love

327

00:10:49,829 --> 00:10:49,200

him dearly he did a great job with his

328

00:10:51,509 --> 00:10:49,839

story

329

00:10:53,110 --> 00:10:51,519

reporting the details that he's been

330

00:10:55,670 --> 00:10:53,120

given so let's hope

331

00:10:57,350 --> 00:10:55,680

more details come our way and if you're

332

00:10:58,069 --> 00:10:57,360

interested in reading more about these

333

00:11:00,069 --> 00:10:58,079

photos

334

00:11:01,269 --> 00:11:00,079

and any new details that emerge related

335

00:11:04,069 --> 00:11:01,279

to these photos
