

1

00:00:00,000 --> 00:00:06,360

This program is rated PG and may contain mature subject matter.

2

00:00:06,360 --> 00:00:07,800

Viewer discretion is advised.

3

00:00:07,800 --> 00:00:10,600

You got the trackers?

4

00:00:10,600 --> 00:00:11,600

Yes, we do.

5

00:00:11,600 --> 00:00:12,600

We've got the trackers.

6

00:00:12,600 --> 00:00:15,880

We've come up with this cattle tracking system that we're going to use.

7

00:00:15,880 --> 00:00:18,920

Right over there, you could see something open up in the sky.

8

00:00:18,920 --> 00:00:19,920

Something came out of it.

9

00:00:19,920 --> 00:00:23,120

It's really interesting that Steven mentioned the triangle.

10

00:00:23,120 --> 00:00:26,480

Look at the screen.

11

00:00:26,480 --> 00:00:30,960

There's something flickering right here.

12

00:00:30,960 --> 00:00:31,960

Back corner of the house.

13

00:00:31,960 --> 00:00:32,960

Back corner of the house.

14

00:00:32,960 --> 00:00:33,960

Guys, what's going on?

15

00:00:33,960 --> 00:00:34,960

It's moving.

16

00:00:34,960 --> 00:00:35,960

Something may be hacking us.

17

00:00:35,960 --> 00:00:36,960

Oh, crap.

18

00:00:36,960 --> 00:00:37,960

Look at that.

19

00:00:37,960 --> 00:00:39,360

We're actively being electronically attacked.

20

00:00:39,360 --> 00:00:40,360

I'm leaving the ranch.

21

00:00:40,360 --> 00:00:41,360

I'm getting a bad headache.

22

00:00:41,360 --> 00:00:44,520

That was freaky weird.

23

00:00:44,520 --> 00:00:46,720

I was just suddenly short of breath.

24

00:00:46,720 --> 00:00:47,720

That's not good either, Travis.

25

00:00:47,720 --> 00:00:50,760

I don't like this.

26

00:00:50,760 --> 00:00:52,120

Let's get you out of here.

27

00:00:52,120 --> 00:00:54,120

This static electricity feeling.

28

00:00:54,120 --> 00:01:00,360

This is an effect of these microwave and radio wave signals that are here.

29

00:01:00,360 --> 00:01:03,240

There is a ranch in northern Utah.

30

00:01:03,240 --> 00:01:11,840

It is considered the epicenter of the strangest and most disturbing phenomena on earth.

31

00:01:11,840 --> 00:01:19,400

Animal mutilations, bizarre UFO sightings, and unusual energies that have proven harmful

32

00:01:19,400 --> 00:01:21,120

to humans.

33

00:01:21,120 --> 00:01:27,120

For 20 years, the federal government tried to find answers and failed.

34

00:01:27,120 --> 00:01:34,120

Now, a new team of dedicated scientists, researchers, and experts has taken over.

35

00:01:34,120 --> 00:01:50,120

They are determined to solve the mystery and reveal the secret of Skinwalker Ranch.

36

00:01:51,120 --> 00:01:55,120

Hey, guys.

37

00:01:55,120 --> 00:01:56,120

James Kenan's with us.

38

00:01:56,120 --> 00:01:57,120

James, why don't you have a seat?

39

00:01:57,120 --> 00:01:58,120

Thank you.

40

00:01:58,120 --> 00:01:59,120

Hey.

41

00:01:59,120 --> 00:02:00,120

Nice to meet you.

42

00:02:00,120 --> 00:02:01,120

Nice to meet you, man.

43

00:02:01,120 --> 00:02:02,120

Have a seat.

44

00:02:02,120 --> 00:02:03,120

Thank you.

45

00:02:03,120 --> 00:02:09,120

We've spoken a little bit about James' area of expertise and study.

46

00:02:09,120 --> 00:02:13,320

He's a researcher and an author touching on a lot of the stuff that we're interested

47

00:02:13,320 --> 00:02:19,120

to hear at the ranch and has some interesting connections that he thinks he's found.

48

00:02:19,120 --> 00:02:20,120

All right.

49

00:02:20,120 --> 00:02:24,680

We've been applying hard science to figure out the bizarre phenomena that keep happening

50

00:02:24,680 --> 00:02:30,120

at Homestead 2 and other parts of the ranch, but so far, nothing definitive has been discovered.

51

00:02:30,120 --> 00:02:35,120

So, Eric Bard invited a researcher named James Kenan, who's been studying this area

52

00:02:35,120 --> 00:02:40,620

for more than 25 years and had a theory about what might be causing all the strange phenomena

53

00:02:40,620 --> 00:02:41,620

here.

54

00:02:41,620 --> 00:02:47,160

James had never been on the ranch, but Eric explained to me that he conducted vector magnetometer

55

00:02:47,160 --> 00:02:52,040

surveys of the surrounding area, measuring for the strength and the direction of magnetic

56

00:02:52,040 --> 00:02:56,320

anomalies, and what he found pointed him here.

57

00:02:56,320 --> 00:03:01,720

So my research started near the area.

58

00:03:01,720 --> 00:03:04,040

This is the Ewan Top Basin.

59

00:03:04,040 --> 00:03:07,160

See that area that I put a blue marker over?

60

00:03:07,160 --> 00:03:12,360

I went in there and wanted to take some vector magnetometer readings.

61

00:03:12,360 --> 00:03:19,400

However, when I went to go put my magnetometer away, I carry with me a standard compass,

62

00:03:19,400 --> 00:03:21,880

just the typical Boy Scout compass.

63

00:03:21,880 --> 00:03:24,560

I had it on a rock.

64

00:03:24,560 --> 00:03:30,080

It was spinning, uncontrollably spinning.

65

00:03:30,080 --> 00:03:34,880

And I thought to myself, well, maybe it's something in my backpack or with the rock.

66

00:03:34,880 --> 00:03:37,520

So I picked up the compass.

67

00:03:37,520 --> 00:03:42,480

I put everything down and I moved about five or six feet away and it continued.

68

00:03:42,480 --> 00:03:44,520

At about what rate?

69

00:03:44,520 --> 00:03:47,760

Faster than a second hand.

70

00:03:47,760 --> 00:03:54,000

One of the stories that we've heard on a few occasions is an old school magnetic compass

71

00:03:54,000 --> 00:03:57,160

would begin rotating wildly.

72

00:03:57,160 --> 00:04:01,240

We've seen this kind of thing before with other instrumentation.

73

00:04:01,240 --> 00:04:02,240

What do we make of it?

74

00:04:02,240 --> 00:04:03,520

I don't know.

75

00:04:03,520 --> 00:04:10,280

Other than the fact that something is altering the magnetic environment.

76

00:04:10,280 --> 00:04:16,560

So I continued to take magnetometer reads throughout this area, west of the ranch, east of the

77

00:04:16,560 --> 00:04:20,600

ranch, south of the ranch, on the mesa.

78

00:04:20,600 --> 00:04:25,400

Most of it was typical reads and we're talking hundreds of data points taken.

79

00:04:25,400 --> 00:04:32,320

But I had three reads that had the exact same transient magnetic read of anywhere from a

80

00:04:32,320 --> 00:04:37,160

negative to the mid-40s.

81

00:04:37,160 --> 00:04:41,160

What James reported was really interesting because a normal magnetic field reading for

82

00:04:41,160 --> 00:04:48,400

this desert area should be positive and in the single digits up to about 80 microteslas.

83

00:04:48,400 --> 00:04:53,920

For him to get negative readings and as much as minus 40 microteslas, that means there's

84

00:04:53,920 --> 00:05:02,240

something unusual underground such as a void or a large metallic object or even a structure.

85

00:05:02,240 --> 00:05:11,680

So not only was it here, but it was right here and I had one right there.

86

00:05:11,680 --> 00:05:19,480

When I plugged these three anomalies, they lined up in this imaginary straight line.

87

00:05:19,480 --> 00:05:22,560

Guess where it ran straight through?

88

00:05:22,560 --> 00:05:25,240

Skinwalker ranch.

89

00:05:25,240 --> 00:05:31,560

I believe there is something underground.

90

00:05:31,560 --> 00:05:35,360

There's all kinds of rumors that have been floating around this ranch since the day that

91

00:05:35,360 --> 00:05:36,920

I stepped foot on it.

92

00:05:36,920 --> 00:05:43,880

Whether it be underground tunnels, underground bases, alien craft that's buried under here.

93

00:05:43,880 --> 00:05:51,160

And so a lot of stories all indicating that there may be something under Skinwalker Ranch.

94

00:05:51,160 --> 00:05:56,920

When you look at this, you're cutting right directly through my focal and origin point,

95

00:05:56,920 --> 00:06:05,480

which is this location of Skinwalker Ranch.

96

00:06:05,480 --> 00:06:08,040

It looks like a shark tooth.

97

00:06:08,040 --> 00:06:09,280

That's interesting.

98

00:06:09,280 --> 00:06:11,760

That is very interesting.

99

00:06:11,760 --> 00:06:16,800

James Keenan, who studied the area but never been on the ranch before, has pinpointed a

100

00:06:16,800 --> 00:06:19,640

location that he called a shark tooth.

101

00:06:19,640 --> 00:06:23,760

Well, we know that as the triangle.

102

00:06:23,760 --> 00:06:26,640

We call it that after an experiment last year.

103

00:06:27,360 --> 00:06:33,040

Where we measured anomalous energy spikes from three different locations across the ranch

104

00:06:33,040 --> 00:06:40,600

that all pointed or triangulated to this same spot, except about a mile high above the ranch.

105

00:06:40,600 --> 00:06:46,000

And just last week, Stephen Wall, the nephew of the Shermans, who were so scared by what

106

00:06:46,000 --> 00:06:51,400

they kept seeing in the 1990s that they sold the ranch and refused to ever come back, he

107

00:06:51,400 --> 00:06:57,120

shared a crazy story about a possible portal appearing high above the triangle as well.

108

00:06:57,120 --> 00:07:00,320

Right over there, you could see something open up in the sky.

109

00:07:00,320 --> 00:07:01,320

Something came out of it.

110

00:07:01,320 --> 00:07:05,680

It come working its way up through them Russian olive trees and it went straight up and that

111

00:07:05,680 --> 00:07:07,960

hole closed.

112

00:07:07,960 --> 00:07:13,640

So even though we've been focusing our investigation of the triangle area high above the ground,

113

00:07:13,640 --> 00:07:18,200

the fact that James is getting anomalous readings at this spot below the ground makes

114

00:07:18,200 --> 00:07:22,400

me wonder if that's where we need to look next.

115

00:07:22,400 --> 00:07:24,600

So what do you think it is?

116

00:07:24,600 --> 00:07:32,080

There seems to be the potential or the possibility for a tunnel system with a water feature going

117

00:07:32,080 --> 00:07:37,200

like this straight down for miles.

118

00:07:37,200 --> 00:07:41,800

So do you think a cavity or a tunnel could be an explanation for the anomaly?

119

00:07:41,800 --> 00:07:43,880

Yes, absolutely.

120

00:07:43,880 --> 00:07:51,520

Caverns with water flowing underneath the ranch might explain some strange magnetic

121

00:07:51,520 --> 00:07:57,600

anomalies if it's mineral water or their salt or other ionic materials in the water

122

00:07:57,600 --> 00:07:59,440

that can carry an electric current.

123

00:07:59,440 --> 00:08:04,680

It might also explain something that happened earlier this year.

124

00:08:04,680 --> 00:08:07,720

That's a lot of water that went away.

125

00:08:07,720 --> 00:08:12,760

A few weeks ago, we dug into a strange and deep pit that Thomas found near Homestead

126

00:08:12,760 --> 00:08:13,760

too.

127

00:08:13,760 --> 00:08:18,760

When we couldn't get to the bottom of it, we poured 45,000 gallons of dyed water into

128

00:08:18,760 --> 00:08:22,040

it just to see if it would appear somewhere else on the ranch.

129

00:08:22,040 --> 00:08:23,840

It all just disappeared.

130

00:08:23,840 --> 00:08:28,360

So now I'm wondering if James is really on to something that could not only explain where

131

00:08:28,360 --> 00:08:35,120

all that water went, but just maybe what's behind the weird phenomena on Skinwalker Ranch.

132

00:08:35,120 --> 00:08:37,560

What do you want from us about that spot?

133

00:08:37,560 --> 00:08:48,040

Do a grid pattern search to see if there could be an explanation below ground.

134

00:08:48,040 --> 00:08:54,840

Well, we're more than happy to pack you into the jeeps and head out and let you continue

135

00:08:54,840 --> 00:08:55,840

your search.

136

00:08:55,840 --> 00:08:56,840

Sounds good.

137

00:08:56,840 --> 00:08:57,840

Let's do it.

138

00:08:57,840 --> 00:09:03,360

All right.

139

00:09:03,360 --> 00:09:08,400

Thomas the team is very cautious about disturbing the ground on Skinwalker Ranch because bizarre

140

00:09:08,400 --> 00:09:12,280

injuries have coincided with digging.

141

00:09:12,280 --> 00:09:17,800

We let James conduct a non-invasive vector magnetometer survey right at the triangle to

142

00:09:17,800 --> 00:09:21,400

see if he could confirm any anomalies.

143

00:09:21,400 --> 00:09:26,920

So James, you've personally seen caverns that seem like they're traveling down this direction.

144

00:09:26,920 --> 00:09:27,920

Correct.

145

00:09:27,920 --> 00:09:30,320

And most of these were filled with water.

146

00:09:30,320 --> 00:09:31,320

Okay.

147

00:09:31,320 --> 00:09:37,440

Let's start making measurements.

148

00:09:37,440 --> 00:09:40,920

Can I have somebody log the numbers from a distance?

149

00:09:40,920 --> 00:09:46,960

I'll call them out.

150

00:09:46,960 --> 00:09:51,960

So we're 48.641, 43.842.

151

00:09:51,960 --> 00:09:54,320

It's 49.941.

152

00:09:54,320 --> 00:09:56,600

That's weird.

153

00:09:56,600 --> 00:09:58,680

Hey, guys.

154

00:09:58,680 --> 00:10:00,600

So I got something interesting here.

155

00:10:00,600 --> 00:10:08,480

We went from a peak value of 49.870 down to a 43 to about a 45.

156

00:10:08,480 --> 00:10:13,720

The value is moving without me moving.

157

00:10:13,720 --> 00:10:18,640

James's initial reading of about 49 micro-teslas was pretty normal.

158

00:10:18,640 --> 00:10:24,040

But then for him to almost immediately get a six-point drop, that makes no sense to me.

159

00:10:24,040 --> 00:10:28,080

The natural ground shouldn't be that inconsistent.

160

00:10:28,080 --> 00:10:29,600

So right now it's changing.

161

00:10:29,600 --> 00:10:30,600

Correct.

162

00:10:30,600 --> 00:10:33,640

It's just climbing right now to 48.

163

00:10:33,640 --> 00:10:36,720

It's just all over the place right here.

164

00:10:36,720 --> 00:10:40,760

When his readings then started jumping back and forth, that made me even more intrigued

165

00:10:40,760 --> 00:10:42,600

about what could be causing it.

166

00:10:42,600 --> 00:10:47,440

Something strange is definitely going on here below this triangle area.

167

00:10:47,440 --> 00:10:48,440

41.328.

168

00:10:48,440 --> 00:10:49,440

Oh, hey.

169

00:10:49,440 --> 00:10:52,360

Whoa, whoa, whoa, whoa, whoa.

170

00:10:52,360 --> 00:10:53,880

It's dropping.

171

00:10:53,880 --> 00:10:56,440

It dropped all the way down to 31.

172

00:10:56,440 --> 00:10:58,440

What the heck?

173

00:10:59,440 --> 00:11:01,840

We need to look underground.

174

00:11:01,840 --> 00:11:03,880

I brought a ground penetrating radar.

175

00:11:03,880 --> 00:11:06,800

Hey, why don't you come take a look at this?

176

00:11:06,800 --> 00:11:08,520

That's going crazy.

177

00:11:08,520 --> 00:11:11,000

Ground beneath us is super conductive.

178

00:11:11,000 --> 00:11:12,000

What the heck?

179

00:11:12,000 --> 00:11:19,160

We should start excavating.

180

00:11:19,160 --> 00:11:20,160

It's dropping.

181

00:11:20,160 --> 00:11:21,160

Yeah.

182

00:11:21,160 --> 00:11:24,720

It dropped all the way down to 31.

183

00:11:24,720 --> 00:11:25,960

So I don't know how to interpret this.

184

00:11:25,960 --> 00:11:28,160

I've got values from 49.

185

00:11:28,160 --> 00:11:30,520

There's a 31.

186

00:11:30,520 --> 00:11:35,240

James Keenan, a researcher who believes there could be some kind of underground flooded

187

00:11:35,240 --> 00:11:40,560

cavern or tunnel system here at the so-called triangle area, has just picked up a series

188

00:11:40,560 --> 00:11:45,040

of anomalous readings with a handheld magnetometer.

189

00:11:45,040 --> 00:11:46,440

So 31 to 49.

190

00:11:46,440 --> 00:11:47,440

Correct.

191

00:11:47,440 --> 00:11:48,440

Okay.

192

00:11:48,440 --> 00:11:54,040

James's readings did indicate a very strange disturbance in the magnetic field here underground.

193

00:11:54,040 --> 00:11:58,560

So who knows if that could mean he's right about a flooded cavern or tunnel or some kind

194

00:11:58,560 --> 00:12:03,040

of unknown structure which people have speculated about in the past as well.

195

00:12:03,040 --> 00:12:07,160

So I think the next step is to get some ground penetrating radar equipment out here and see

196

00:12:07,160 --> 00:12:12,040

if we can get better data or even an image of just what it could be.

197

00:12:12,040 --> 00:12:14,440

Well, James, this is great stuff.

198

00:12:14,440 --> 00:12:18,440

I think we've pretty much covered this area and, you know, something weird about this

199

00:12:18,440 --> 00:12:19,440

spot.

200

00:12:20,200 --> 00:12:24,600

So, you know, I say we just shut down, load up, and head back to the command center.

201

00:12:24,600 --> 00:12:25,600

Sounds good to me.

202

00:12:25,600 --> 00:12:26,600

All right.

203

00:12:26,600 --> 00:12:27,600

Well, I appreciate you doing this.

204

00:12:27,600 --> 00:12:37,640

What's going on, guys?

205

00:12:37,640 --> 00:12:41,240

We just reviewed the footage from the game camps.

206

00:12:41,240 --> 00:12:42,240

Oh, cool.

207

00:12:42,240 --> 00:12:46,280

Well, I was working with Thomas Winerton to arrange for a ground penetrating radar

208

00:12:46,280 --> 00:12:48,800

expert to come check out the triangle area.

209

00:12:48,800 --> 00:12:53,120

The ranch caretakers, Candace Lindy and Tom Lewis, who have been helping monitor the

210

00:12:53,120 --> 00:12:58,280

cattle on the ranch this summer, showed some very peculiar surveillance footage to Eric

211

00:12:58,280 --> 00:12:59,280

Bard.

212

00:12:59,280 --> 00:13:04,880

This one by the Cow Tree had a few things on it that we wanted you to get your eyes on.

213

00:13:04,880 --> 00:13:05,880

Okay.

214

00:13:05,880 --> 00:13:06,880

Yeah.

215

00:13:06,880 --> 00:13:07,880

And...

216

00:13:07,880 --> 00:13:09,200

Yeah, start with that one.

217

00:13:09,200 --> 00:13:10,200

Okay.

218

00:13:10,200 --> 00:13:11,200

This one here?

219

00:13:11,200 --> 00:13:12,200

Mm-hmm.

220

00:13:12,200 --> 00:13:13,200

There.

221

00:13:13,200 --> 00:13:14,200

Okay.

222

00:13:14,200 --> 00:13:15,200

What?

223

00:13:15,200 --> 00:13:18,200

What are we looking at here?

224

00:13:19,080 --> 00:13:21,160

Yeah, what is that?

225

00:13:21,160 --> 00:13:22,160

We don't know.

226

00:13:25,160 --> 00:13:30,120

And it's there, and then it's not in each of the frames before and after.

227

00:13:30,120 --> 00:13:31,120

Okay.

228

00:13:31,120 --> 00:13:33,040

With these game camps, everything's in focus.

229

00:13:33,040 --> 00:13:35,040

Everything's pretty clear.

230

00:13:35,040 --> 00:13:37,480

And that is very unclear.

231

00:13:37,480 --> 00:13:38,480

Okay.

232

00:13:40,480 --> 00:13:43,640

This particular photograph, I couldn't tell what it was.

233

00:13:43,640 --> 00:13:49,200

It looked like something flying in the sky to me that was cloaked and really bizarre.

234

00:13:49,200 --> 00:13:54,840

So I don't have any idea what that would be in a natural sense.

235

00:13:54,840 --> 00:13:59,320

And because this is Skinwalker Ranch, I kind of have to wonder what's going on.

236

00:13:59,320 --> 00:14:04,760

I got to tell you, I'm scratching my head on some of the features that I see here.

237

00:14:04,760 --> 00:14:09,160

I'm not sure what to make of this unusual dark spot in the sky.

238

00:14:09,160 --> 00:14:12,920

It's not unlike some of the other things that we've seen in our footage in the past.

239

00:14:12,920 --> 00:14:19,000

So we're going to be studying that image and look for more like it in coming days.

240

00:14:19,000 --> 00:14:24,240

Then we noticed the cows left this area and didn't come back.

241

00:14:24,240 --> 00:14:25,240

In the same timeframe.

242

00:14:25,240 --> 00:14:26,240

Yeah.

243

00:14:26,240 --> 00:14:30,120

Well, I've got some of the recent movement cow tracker data.

244

00:14:30,120 --> 00:14:32,640

This is cumulative data for the summer.

245

00:14:32,640 --> 00:14:33,640

Okay.

246

00:14:33,640 --> 00:14:42,880

So this is really almost like a snapshot of where the herd were.

247

00:14:42,880 --> 00:14:48,760

We have the movement system, the GPS tags in the ears of some of the cattle that allow

248

00:14:48,760 --> 00:14:53,040

us to study the movement of the herd over the course of time.

249

00:14:53,040 --> 00:14:58,280

One surprising result is where they tend not to congregate as if they're avoiding certain

250

00:14:58,280 --> 00:14:59,800

regions of the property.

251

00:14:59,800 --> 00:15:05,000

We have indications of these tags being as far out of the field as here.

252

00:15:05,000 --> 00:15:06,000

Okay.

253

00:15:06,000 --> 00:15:09,080

And we even have them going down into the Serengeti, right?

254

00:15:09,080 --> 00:15:10,080

Yeah.

255

00:15:10,080 --> 00:15:11,080

Down here.

256

00:15:11,080 --> 00:15:17,440

So we're in the area, our regions within our own field where the cows seem to avoid that.

257

00:15:17,440 --> 00:15:19,440

They've been here every day, every morning.

258

00:15:19,440 --> 00:15:21,120

So they love to hang out here.

259

00:15:21,120 --> 00:15:29,520

And you're saying they left and correlative with that we have the puff of smoke.

260

00:15:29,520 --> 00:15:33,480

What made the footage of this blurry object and the correlation of the cattle movement

261

00:15:33,480 --> 00:15:39,240

away from that area so compelling is that it was in that location where last year one

262

00:15:39,240 --> 00:15:44,320

of the cows suddenly died and not from natural causes.

263

00:15:44,320 --> 00:15:48,880

So it makes us all wonder, what is going on with that particular area?

264

00:15:48,880 --> 00:15:54,120

Does it have to do with whatever was captured in the footage or could it be something below

265

00:15:54,120 --> 00:15:56,600

ground there?

266

00:15:56,600 --> 00:15:58,600

Okay.

267

00:15:58,600 --> 00:16:01,360

Well, keep them coming.

268

00:16:01,360 --> 00:16:02,360

All right.

269

00:16:02,360 --> 00:16:03,360

Yeah, I know.

270

00:16:03,360 --> 00:16:04,360

Thank you for your time.

271

00:16:04,360 --> 00:16:05,360

We'll see you later.

272

00:16:05,360 --> 00:16:06,360

Okay.

273

00:16:06,360 --> 00:16:15,480

Looks like Mull is here.

274

00:16:15,480 --> 00:16:17,800

You guys remember Zack?

275

00:16:17,800 --> 00:16:20,720

Looks like some new equipment.

276

00:16:20,720 --> 00:16:21,720

Hey, Zack.

277

00:16:21,720 --> 00:16:22,720

Hey, how's it going?

278

00:16:22,720 --> 00:16:24,480

Hey, awesome to have you back.

279

00:16:24,480 --> 00:16:25,480

Welcome back, man.

280

00:16:25,480 --> 00:16:26,480

Good to see you.

281

00:16:26,480 --> 00:16:27,480

Good to see you.

282

00:16:27,480 --> 00:16:30,960

I'm thrilled to have Zack Zyla coming back out to the ranch.

283

00:16:30,960 --> 00:16:35,360

We're going to be taking a careful look in the triangle area where we got those very

284

00:16:35,360 --> 00:16:38,720

strange vector magnetometer readings with James Keenan.

285

00:16:38,720 --> 00:16:39,720

What did you bring?

286

00:16:39,720 --> 00:16:42,440

I brought a ground penetrating radar.

287

00:16:42,440 --> 00:16:47,200

Hopefully we can see down to maybe 10 to 15 feet, but more realistically, probably 6

288

00:16:47,200 --> 00:16:48,200

to 10.

289

00:16:48,200 --> 00:16:49,200

All right.

290

00:16:49,200 --> 00:16:50,200

Sounds good.

291

00:16:50,200 --> 00:16:58,360

I feel like we've looked above in this particular place pretty good, and so now it's time to

292

00:16:58,360 --> 00:17:03,080

GPR in the triangle and see if we can draw our attention to specific places that we

293

00:17:03,080 --> 00:17:04,080

should dig.

294

00:17:04,080 --> 00:17:05,080

All right.

295

00:17:05,080 --> 00:17:08,520

We're going to go down it and get this done as quick as we can.

296

00:17:08,520 --> 00:17:11,080

GPR is ground penetrating radar.

297

00:17:11,080 --> 00:17:15,960

We're broadcasting radar waves down into the ground and looking at the reflections in order

298

00:17:15,960 --> 00:17:19,560

to get an idea of what may be beneath the surface.

299

00:17:19,560 --> 00:17:22,840

So I kind of see the triangle comes to a point right where our trucks are.

300

00:17:22,840 --> 00:17:26,440

Do you mind if we kind of start right here, kind of cross this flag, and then we'll start

301

00:17:26,440 --> 00:17:28,000

just kind of going back and forth?

302

00:17:28,000 --> 00:17:29,000

You're the expert.

303

00:17:29,000 --> 00:17:30,000

That's perfect.

304

00:17:30,000 --> 00:17:31,000

Let's go.

305

00:17:31,000 --> 00:17:33,660

Do what you need to.

306

00:17:33,660 --> 00:17:38,380

This is an area where we've seen unusual signals using other equipment.

307

00:17:38,380 --> 00:17:42,300

There may be something beneath the ground there, and we want to see if anything stands

308

00:17:42,300 --> 00:17:43,300

out.

309

00:17:43,300 --> 00:17:44,300

Interesting.

310

00:17:44,300 --> 00:17:53,540

Hey, why don't you come take a look at this?

311

00:17:53,540 --> 00:17:57,380

That's going crazy.

312

00:17:57,380 --> 00:17:58,380

What the heck?

313

00:17:58,380 --> 00:18:01,380

We ready to do this?

314

00:18:01,380 --> 00:18:02,380

Let's dig.

315

00:18:03,100 --> 00:18:04,100

Isn't this, guys?

316

00:18:04,100 --> 00:18:05,100

I don't know what's going on with it.

317

00:18:05,100 --> 00:18:06,100

It's detecting everywhere.

318

00:18:06,100 --> 00:18:07,100

It's like we're triggering something.

319

00:18:07,100 --> 00:18:08,100

Yeah.

320

00:18:08,100 --> 00:18:10,100

Do you hear the gamma rays just go off?

321

00:18:10,100 --> 00:18:11,100

That's weird.

322

00:18:11,100 --> 00:18:12,100

What the heck?

323

00:18:12,100 --> 00:18:19,740

There's something about this hole.

324

00:18:19,740 --> 00:18:21,620

That's going crazy.

325

00:18:21,620 --> 00:18:25,220

We're putting out an electromagnetic signal into the ground, and the ground's really

326

00:18:25,220 --> 00:18:27,500

making that whole thing ring.

327

00:18:27,500 --> 00:18:29,700

You see all these black and white lines?

328

00:18:29,700 --> 00:18:37,420

This is actually because the soil in the ground beneath us is highly conductive.

329

00:18:37,420 --> 00:18:42,060

Certain minerals in the soil like salt, which is common to this area, could make the ground

330

00:18:42,060 --> 00:18:47,460

conductive, but so could water or a water flow like James Kenan suggested to us when

331

00:18:47,460 --> 00:18:52,780

he said he believes there could be flooded tunnels under the triangle area.

332

00:18:52,780 --> 00:18:58,540

Right here, you can see something kind of weird going on in terms of maybe ground moving.

333

00:18:58,540 --> 00:19:02,420

Someone kind of dug up, mushed around, and then backfilled everything.

334

00:19:02,420 --> 00:19:07,900

So that point right there, you're saying that's been disturbed possibly is in this triangle?

335

00:19:07,900 --> 00:19:11,380

Yeah, within kind of the two areas of the road.

336

00:19:11,380 --> 00:19:13,060

What the heck?

337

00:19:13,060 --> 00:19:17,380

Now that we have confirmation that the soil has been disturbed, does that mean that someone

338

00:19:17,380 --> 00:19:20,940

just dug here in the past or was something actually buried here?

339

00:19:20,940 --> 00:19:24,740

Or more to the point, was something constructed under the ground?

340

00:19:24,740 --> 00:19:27,900

There's really only one way to figure that out.

341

00:19:27,900 --> 00:19:33,740

Do you think it'd be a good next step that we potentially start excavating?

342

00:19:33,740 --> 00:19:36,300

I think it could be justified.

343

00:19:36,300 --> 00:19:37,300

Real?

344

00:19:37,300 --> 00:19:43,300

Well, that's, that is interesting.

345

00:19:43,300 --> 00:19:47,860

It was a mandate given to me that we were to be very cautious, in particular with digging

346

00:19:47,860 --> 00:19:49,360

activities.

347

00:19:49,360 --> 00:19:56,020

But I know that there are answers that we're trying to get to the bottom of that may actually

348

00:19:56,020 --> 00:19:59,140

require more of that sort of activity.

349

00:19:59,140 --> 00:20:03,180

So if we do it in a safe manner, then I'm prepared to let the team dig.

350

00:20:03,180 --> 00:20:04,180

Okay.

351

00:20:04,180 --> 00:20:05,180

Okay.

352

00:20:05,180 --> 00:20:08,740

Well, let's get this loaded up.

353

00:20:08,740 --> 00:20:09,740

Thanks again for coming out.

354

00:20:09,740 --> 00:20:20,860

Thanks for having me again.

355

00:20:20,860 --> 00:20:25,380

We do have a mini excavator on the ranch that Brandon, the ranch owner, has given permission

356

00:20:25,380 --> 00:20:29,900

for us to conduct shallow digs with when we find evidence of anomalies.

357

00:20:29,900 --> 00:20:33,140

So I think we need to take that step next and see what we find.

358

00:20:33,140 --> 00:20:35,420

We ready to do this?

359

00:20:35,420 --> 00:20:36,420

Let's dig.

360

00:20:36,420 --> 00:20:40,420

Now, as we conduct our shallow dig for more scientific evidence of what could be buried

361

00:20:40,420 --> 00:20:43,940

in the Triangle area, we're going to be very cautious.

362

00:20:43,940 --> 00:20:47,820

Since we already had a strange experience this year when we dug up the pit at Homestead

363

00:20:47,820 --> 00:20:52,500

2, you guys should take a look at Caleb's phone.

364

00:20:52,500 --> 00:20:54,220

I don't have any control over it.

365

00:20:54,220 --> 00:20:57,020

It just goes right past my passcode.

366

00:20:57,020 --> 00:21:00,820

Something strange happened to Caleb's phone like it was being hacked.

367

00:21:00,820 --> 00:21:02,620

Something here is crying out for help.

368

00:21:02,620 --> 00:21:04,860

Or is it giving us a warning?

369

00:21:04,860 --> 00:21:06,380

You know, I'm a scientist.

370

00:21:06,380 --> 00:21:11,660

Things have reasons for happening, but so many strange things happen here that I can't

371

00:21:11,660 --> 00:21:12,660

explain.

372

00:21:12,660 --> 00:21:13,660

All right.

373

00:21:13,660 --> 00:21:15,460

You start feeling anything funny?

374

00:21:15,460 --> 00:21:16,460

Let each other know.

375

00:21:16,460 --> 00:21:17,460

Okay?

376

00:21:17,460 --> 00:21:18,460

Yep.

377

00:21:18,460 --> 00:21:19,460

Got it.

378

00:21:19,460 --> 00:21:20,460

Thank you.

379

00:21:20,460 --> 00:21:21,460

All right.

380

00:21:21,460 --> 00:21:32,380

While Thomas digs with the mini excavator, Dragon and Caleb will be sifting through the spoils

381

00:21:32,380 --> 00:21:33,380

for anything metallic.

382

00:21:33,380 --> 00:21:36,340

They might explain why the soil here is so conductive.

383

00:21:36,340 --> 00:21:41,900

Now, Eric and I will be monitoring our spectrum analyzer, our gamma ray detector, the lightning

384

00:21:41,900 --> 00:21:46,300

strike meter, and we'll use a metal detector to see if anything else happens as we disturb

385

00:21:46,300 --> 00:21:47,300

the ground.

386

00:21:47,300 --> 00:21:59,980

No, there's something right here.

387

00:21:59,980 --> 00:22:00,980

Next scoop.

388

00:22:00,980 --> 00:22:01,980

Yeah.

389

00:22:01,980 --> 00:22:02,980

Yeah.

390

00:22:02,980 --> 00:22:03,980

Yeah.

391

00:22:03,980 --> 00:22:04,980

Yeah.

392

00:22:04,980 --> 00:22:05,980

Yeah.

393

00:22:05,980 --> 00:22:06,980

Yeah.

394

00:22:06,980 --> 00:22:07,980

Yeah.

395

00:22:07,980 --> 00:22:08,980

Yeah.

396

00:22:08,980 --> 00:22:09,980

Yeah.

397

00:22:09,980 --> 00:22:10,980

Yeah.

398

00:22:10,980 --> 00:22:11,980

Yeah.

399

00:22:11,980 --> 00:22:12,980

Yeah.

400

00:22:12,980 --> 00:22:13,980

Yeah.

401

00:22:13,980 --> 00:22:14,980

Yeah.

402

00:22:14,980 --> 00:22:15,980

Yeah.

403

00:22:15,980 --> 00:22:16,980

Yeah.

404

00:22:16,980 --> 00:22:17,980

Yeah.

405

00:22:17,980 --> 00:22:18,980

Yeah.

406

00:22:18,980 --> 00:22:20,820

This weird, Eric.

407

00:22:20,820 --> 00:22:22,820

Look, nothing's happening.

408

00:22:22,820 --> 00:22:24,660

The floor is going nuts.

409

00:22:24,660 --> 00:22:25,660

Okay.

410

00:22:25,660 --> 00:22:28,260

I'll say keep on digging.

411

00:22:28,260 --> 00:22:29,340

Yeah.

412

00:22:29,340 --> 00:22:33,940

Then come back here and see if it gets the same reading.

413

00:22:33,940 --> 00:22:38,140

Oh, what, what the?

414

00:22:38,140 --> 00:22:43,060

I don't understand what could be making the metal detector register strong hits and then

415

00:22:43,060 --> 00:22:44,060

nothing.

416

00:22:44,060 --> 00:22:48,060

Once again, it's a transient anomaly that is occurring.

417

00:22:48,060 --> 00:22:50,060

What the heck?

418

00:22:50,060 --> 00:22:52,060

Oh, it smokes.

419

00:22:52,060 --> 00:22:54,060

What's going on with it?

420

00:22:54,060 --> 00:22:57,060

So now, since people warn against digging,

421

00:22:57,060 --> 00:22:59,060

could these readings be because of that,

422

00:22:59,060 --> 00:23:03,060

or is there something here underground causing it?

423

00:23:05,060 --> 00:23:07,060

Well, it was a lot stronger this time.

424

00:23:07,060 --> 00:23:09,060

I didn't even have to make it all the way to the ground before it went off.

425

00:23:09,060 --> 00:23:11,060

What the heck?

426

00:23:11,060 --> 00:23:14,060

I'm a foot from the ground now.

427

00:23:15,060 --> 00:23:18,060

I'm not making it all the way to the bottom, but when I come up, I'll hold.

428

00:23:18,060 --> 00:23:20,060

Okay.

429

00:23:20,060 --> 00:23:22,060

That's weird, man.

430

00:23:23,060 --> 00:23:27,060

The deeper we dug there, the stronger the signal was getting on the metal detector.

431

00:23:27,060 --> 00:23:31,060

But we found no metal object at all in the spoils at that point.

432

00:23:31,060 --> 00:23:35,060

So it made me think we must be getting closer and closer

433

00:23:35,060 --> 00:23:38,060

to a really large metal object or structure.

434

00:23:39,060 --> 00:23:41,060

Do you have a camera?

435

00:23:41,060 --> 00:23:43,060

Just go off.

436

00:23:43,060 --> 00:23:45,060

There it goes again.

437

00:23:47,060 --> 00:23:49,060

Yeah, 24 micro-inch per hour.

438

00:23:49,060 --> 00:23:51,060

What does that mean?

439

00:23:51,060 --> 00:23:54,060

Well, what we're seeing is more than double the normal background level.

440

00:23:56,060 --> 00:23:58,060

Now it's just like, weak down.

441

00:23:58,060 --> 00:23:59,060

It's malfunctioning.

442

00:23:59,060 --> 00:24:00,060

What's going on?

443

00:24:00,060 --> 00:24:03,060

What in the world is detecting everywhere?

444

00:24:03,060 --> 00:24:05,060

There's something about this hole.

445

00:24:05,060 --> 00:24:09,060

Well, is it me or is this almost like we're triggering something?

446

00:24:09,060 --> 00:24:11,060

Yeah.

447

00:24:12,060 --> 00:24:14,060

What the crap?

448

00:24:16,060 --> 00:24:17,060

Look, there's nothing now.

449

00:24:17,060 --> 00:24:20,060

This thing was going crazy a minute ago.

450

00:24:20,060 --> 00:24:23,060

Something weird just happened here.

451

00:24:23,060 --> 00:24:25,060

It'll be natural or unnatural. I don't know.

452

00:24:25,060 --> 00:24:27,060

What's charging it?

453

00:24:27,060 --> 00:24:30,060

Is this whole ranch a big generator?

454

00:24:30,060 --> 00:24:35,060

Well, we've heard how many stories about the possibilities of something underneath the ground,

455

00:24:35,060 --> 00:24:39,060

whether it be caverns, a base.

456

00:24:39,060 --> 00:24:43,060

So who's to say it couldn't be something even more crazy?

457

00:24:44,060 --> 00:24:48,060

We've heard stories of individuals going into these deep caves or caverns,

458

00:24:48,060 --> 00:24:54,060

and we've even heard crazy stories about these openings that lead to some sort of an underground base.

459

00:24:54,060 --> 00:24:58,060

We need to be careful of that and definitely study this area more.

460

00:24:58,060 --> 00:25:01,060

Yeah, the really exotic explanation is there's something under the ground here

461

00:25:01,060 --> 00:25:04,060

that's either using this or causing this.

462

00:25:04,060 --> 00:25:09,060

We just got to keep going deeper because it's certainly not at eight foot deep.

463

00:25:09,060 --> 00:25:12,060

We've now gone as deep as we can with this mini excavator.

464

00:25:12,060 --> 00:25:15,060

So whatever's here is deeper than we can actually reach today.

465

00:25:15,060 --> 00:25:20,060

I think what we need to do next is to conduct a deeper magnetometry scan of this area

466

00:25:20,060 --> 00:25:23,060

to figure out just what's causing these energy spikes.

467

00:25:23,060 --> 00:25:28,060

And if it really could be a structure or a flooded tunnel system like James Keenan told us.

468

00:25:28,060 --> 00:25:34,060

I don't know that we are any less confused, but you know, it definitely hammers home the point

469

00:25:34,060 --> 00:25:37,060

that we have to study this area way more.

470

00:25:37,060 --> 00:25:38,060

Yep.

471

00:25:38,060 --> 00:25:42,060

All right, well, let's pack it up and get out of here.

472

00:25:46,060 --> 00:25:50,060

Here is the magnetic data of the whole property.

473

00:25:50,060 --> 00:25:52,060

We've got homestead two.

474

00:25:52,060 --> 00:25:56,060

This is an extreme magnetic field and I'm going to compare it to the rest of the background.

475

00:25:56,060 --> 00:26:01,060

There's something going on in the ground, particularly there at the homestead area.

476

00:26:10,060 --> 00:26:12,060

Hey fellas, how y'all doing?

477

00:26:12,060 --> 00:26:14,060

Doing well, how are you?

478

00:26:14,060 --> 00:26:17,060

After our shallow dig with a mini excavator at the Triangle area

479

00:26:17,060 --> 00:26:21,060

didn't really find any definitive evidence of a structure or a tunnel,

480

00:26:21,060 --> 00:26:23,060

that means we need to dig much deeper.

481

00:26:23,060 --> 00:26:27,060

But before we can do anything more invasive or potentially risky like that,

482

00:26:27,060 --> 00:26:33,060

Brandon Fugle, the owner of Skinwalker Ranch, is going to want to see some hard scientific evidence.

483

00:26:33,060 --> 00:26:36,060

Everybody, I want you to meet the team from Juniper Unmanned.

484

00:26:36,060 --> 00:26:37,060

Hey, how are you?

485

00:26:37,060 --> 00:26:38,060

How are you?

486

00:26:38,060 --> 00:26:44,060

So we invited Juniper Unmanned, a company that specializes in both magnetometry and LiDAR technologies

487

00:26:44,060 --> 00:26:48,060

to help us perform a deeper and more comprehensive scan of the Triangle

488

00:26:48,060 --> 00:26:53,060

as well as other hot spots around the ranch where we keep seeing anomalies.

489

00:26:53,060 --> 00:26:57,060

There are a few locations of interest relative to the magnetic question.

490

00:26:57,060 --> 00:27:01,060

The homestead area out to the west is very interesting to us.

491

00:27:01,060 --> 00:27:06,060

There are a few concentrated regions here in the east field that are also,

492

00:27:06,060 --> 00:27:08,060

they have some interesting history.

493

00:27:08,060 --> 00:27:11,060

So no shortage of interesting sites on this ranch.

494

00:27:11,060 --> 00:27:12,060

Let's get it done.

495

00:27:12,060 --> 00:27:13,060

Great.

496

00:27:18,060 --> 00:27:22,060

We want to know if there could be a connection between the pit at homestead 2

497

00:27:22,060 --> 00:27:26,060

where all that water disappeared earlier this year and the Triangle area

498

00:27:26,060 --> 00:27:28,060

which may have flooded tunnels below it.

499

00:27:28,060 --> 00:27:33,060

So I'm really interested in what the magnetometry scan is going to tell us.

500

00:27:33,060 --> 00:27:35,060

You think this will work?

501

00:27:35,060 --> 00:27:38,060

Yeah, I think this will be a good place to get started.

502

00:27:38,060 --> 00:27:40,060

Well, hey, let us get out of your way, right?

503

00:27:40,060 --> 00:27:41,060

You guys get it going.

504

00:27:41,060 --> 00:27:42,060

I want to see it fly.

505

00:27:42,060 --> 00:27:44,060

Okay, I'm going to power up the drone.

506

00:27:45,060 --> 00:27:47,060

Taking off.

507

00:27:54,060 --> 00:27:56,060

Starting the route.

508

00:27:56,060 --> 00:28:00,060

Jennifer's drone is equipped with a sophisticated magnetometer device

509

00:28:00,060 --> 00:28:05,060

that will scan the entire area, sensing for any magnetic anomalies

510

00:28:05,060 --> 00:28:07,060

100 or more feet underground.

511

00:28:07,060 --> 00:28:12,060

So if there are tunnels or structures there, we should get a good indication of it.

512

00:28:14,060 --> 00:28:16,060

Turn them out of altitude.

513

00:28:18,060 --> 00:28:20,060

Turning onto its first line.

514

00:28:20,060 --> 00:28:21,060

It's really cool.

515

00:28:21,060 --> 00:28:23,060

The magnetometer is nice and stable.

516

00:28:23,060 --> 00:28:27,060

Of course, I'm very excited to see all the data that we're collecting.

517

00:28:27,060 --> 00:28:32,060

But I think the magnetic survey really holds the greatest promise

518

00:28:32,060 --> 00:28:35,060

for providing insights into some of the strange things that have happened

519

00:28:35,060 --> 00:28:38,060

out at the homesteads and at the point of the mesa.

520

00:28:38,060 --> 00:28:42,060

All right, so it's about to turn and head towards us.

521

00:28:42,060 --> 00:28:46,060

We spent the better part of the day running these magnetometry and LiDAR surveys

522

00:28:46,060 --> 00:28:50,060

in the Triangle area, Homestead 2, and the Eastern field.

523

00:28:50,060 --> 00:28:54,060

So hopefully once we process all the data, we'll have a much more complete picture

524

00:28:54,060 --> 00:28:58,060

of what could be going on both above and below the property.

525

00:28:58,060 --> 00:29:00,060

Magnetometer is nice and stable.

526

00:29:00,060 --> 00:29:04,060

Then we can talk to Brandon and decide as a team

527

00:29:04,060 --> 00:29:07,060

how much harder and deeper we are willing to poke this nest

528

00:29:07,060 --> 00:29:10,060

to get to the bottom of Skinwalker Ranch.

529

00:29:10,060 --> 00:29:12,060

Steer down.

530

00:29:16,060 --> 00:29:19,060

All right, guys, let's pack up. Let's get out of here.

531

00:29:25,060 --> 00:29:26,060

Hey, gentlemen.

532

00:29:26,060 --> 00:29:27,060

Hey, guys.

533

00:29:27,060 --> 00:29:28,060

How's it going?

534

00:29:28,060 --> 00:29:29,060

How's it going?

535

00:29:29,060 --> 00:29:34,060

We're pretty excited about the data that we've been able to produce for you all.

536

00:29:34,060 --> 00:29:38,060

Juniper compiled all this data pretty much the entire ranch.

537

00:29:38,060 --> 00:29:42,060

And we can't wait to see if there are any anomalous readings

538

00:29:42,060 --> 00:29:45,060

that they got under the ground here on the ranch.

539

00:29:45,060 --> 00:29:48,060

It would be better for us to go to those locations

540

00:29:48,060 --> 00:29:52,060

that you, gentlemen, found interesting in this survey.

541

00:29:54,060 --> 00:29:58,060

What I'm showing you here, this is our LiDAR point cloud

542

00:29:58,060 --> 00:30:01,060

of the entire section that we collected.

543

00:30:01,060 --> 00:30:04,060

That's the first area that I'd like to point out.

544

00:30:04,060 --> 00:30:08,060

It is just southeast of the helicopter pad.

545

00:30:08,060 --> 00:30:13,060

There are a couple of circles that show up in the ground surface.

546

00:30:13,060 --> 00:30:17,060

As you're walking along, you might not notice a difference in terrain.

547

00:30:17,060 --> 00:30:19,060

There is clearly a circle right here.

548

00:30:19,060 --> 00:30:21,060

And clearly see the circle there.

549

00:30:21,060 --> 00:30:23,060

That is very interesting.

550

00:30:23,060 --> 00:30:25,060

And then, you know, it's not far from where the cow died.

551

00:30:25,060 --> 00:30:27,060

Oh, it's right by that.

552

00:30:27,060 --> 00:30:30,060

Yeah, I mean, it's within 10 feet, right, or 20 feet, maybe.

553

00:30:30,060 --> 00:30:34,060

Looks like there is a depression going all the way around it.

554

00:30:34,060 --> 00:30:36,060

What is it? Probably 50 feet across?

555

00:30:36,060 --> 00:30:39,060

I think there are about 10 to 20 feet across.

556

00:30:39,060 --> 00:30:44,060

Definitely does not look like a natural feature to us here at Congress.

557

00:30:44,060 --> 00:30:48,060

Yeah, I'm really anxious to have a look at the magnetometry results.

558

00:30:50,060 --> 00:30:54,060

Here is the magnetic data of the whole property.

559

00:30:55,060 --> 00:31:02,060

And as you'll see, we've got some hot, bright colors in the southeast,

560

00:31:02,060 --> 00:31:06,060

and it moves off to greens and blues, cooler colors to the north.

561

00:31:06,060 --> 00:31:11,060

The cooler colors represent lower magnetic intensity readings,

562

00:31:11,060 --> 00:31:13,060

and the warmer colors are higher.

563

00:31:13,060 --> 00:31:17,060

If I move a little to the west here, we have Homestead 2.

564

00:31:17,060 --> 00:31:19,060

Really?

565

00:31:19,060 --> 00:31:25,060

There's an extreme magnetic field anomaly compared to the rest of the background right there.

566

00:31:25,060 --> 00:31:31,060

You know what? And that's exactly where we always have trouble with, uh, with everything.

567

00:31:31,060 --> 00:31:32,060

Yeah, with everything.

568

00:31:32,060 --> 00:31:34,060

Can you zoom in a little bit closer right there?

569

00:31:34,060 --> 00:31:36,060

I don't see exactly where that is in the road.

570

00:31:36,060 --> 00:31:40,060

I mean, it's clearly a magnetic anomaly there.

571

00:31:40,060 --> 00:31:43,060

The really high magnetic readings at Homestead 2 are incredible.

572

00:31:43,060 --> 00:31:47,060

We've had so much happen there above ground this year with our portal investigations,

573

00:31:47,060 --> 00:31:51,060

but this scientific data is telling us there has to be something below ground,

574

00:31:51,060 --> 00:31:54,060

like a void or maybe even a structure.

575

00:31:54,060 --> 00:31:59,060

I really think we need to convince Brandon to let us drill a hole there and see what that is.

576

00:31:59,060 --> 00:32:05,060

We did a survey over the triangle, a magnetic survey.

577

00:32:05,060 --> 00:32:07,060

Here's the triangle.

578

00:32:07,060 --> 00:32:10,060

There's something going on right here.

579

00:32:10,060 --> 00:32:16,060

Could you stop right there and go a little bit more transparent with the magnetic data, just a little bit?

580

00:32:18,060 --> 00:32:19,060

Right there.

581

00:32:19,060 --> 00:32:25,060

What's really interesting about the magnetic anomaly at the triangle is how it looks like an elongated feature

582

00:32:25,060 --> 00:32:30,060

or possibly two main objects with something running between them.

583

00:32:30,060 --> 00:32:36,060

So from the lore about some kind of base under the ranch to James Keenan's theory about a tunnel,

584

00:32:36,060 --> 00:32:40,060

we really need Brandon's blessing to explore deeper underground there.

585

00:32:40,060 --> 00:32:45,060

Well, I'd say that's some interesting stuff and it gives us some things to dig deeper into

586

00:32:45,060 --> 00:32:48,060

and maybe even some spots to go look at a little closer.

587

00:32:48,060 --> 00:32:50,060

This is really great.

588

00:32:50,060 --> 00:32:53,060

It's a feature-rich report that we're getting out of this.

589

00:32:53,060 --> 00:32:54,060

Great, thank you very much.

590

00:32:54,060 --> 00:32:55,060

Thank you.

591

00:32:55,060 --> 00:32:56,060

Thank you very much.

592

00:32:56,060 --> 00:33:02,060

So it's telling us there's something going on in the ground, particularly there at the homestead area.

593

00:33:02,060 --> 00:33:06,060

So we're being led by the data to explore that even more deeply.

594

00:33:06,060 --> 00:33:12,060

And then around the triangle, the weird oscillating magnetic anomaly is weird.

595

00:33:12,060 --> 00:33:16,060

Maybe we just didn't dig deep enough to see if there's an opening down there.

596

00:33:16,060 --> 00:33:18,060

Drill more, drill deeper.

597

00:33:18,060 --> 00:33:19,060

I agree with that.

598

00:33:19,060 --> 00:33:22,060

Given that, I think we should call Brandon and talk to him about it.

599

00:33:22,060 --> 00:33:23,060

Yeah, let's do that.

600

00:33:23,060 --> 00:33:25,060

I'd like to know what he thinks as well.

601

00:33:25,060 --> 00:33:26,060

Okay.

602

00:33:42,060 --> 00:33:52,060

I see him now.

603

00:33:52,060 --> 00:33:55,060

Yep, there's dragons.

604

00:33:55,060 --> 00:34:02,060

After conducting comprehensive magnetometry and lidar scans across the ranch with the representatives from Juniper,

605

00:34:02,060 --> 00:34:09,060

we got the data back, which revealed that at each area of interest, the triangle, homestead 2, and in the eastern field,

606

00:34:09,060 --> 00:34:15,060

there appear to be anomalous features or possibly structures below the ranch.

607

00:34:15,060 --> 00:34:22,060

So we've asked Brandon to fly in from Salt Lake City to meet with us so we can explain why we now think it's necessary

608

00:34:22,060 --> 00:34:27,060

to do some excavations and deeper drilling than we've ever done before.

609

00:34:27,060 --> 00:34:28,060

Hey guys.

610

00:34:28,060 --> 00:34:32,060

To find out what could be causing the bizarre phenomena on his property.

611

00:34:32,060 --> 00:34:35,060

Hopefully, he'll agree.

612

00:34:35,060 --> 00:34:40,060

We want to brief you on some plans that we have for exploring even beneath the ground.

613

00:34:40,060 --> 00:34:46,060

What I'd like to do is I'd like to bring it up on the map and discuss the motivations, discuss the data that we have.

614

00:34:46,060 --> 00:34:51,060

Let's do it.

615

00:34:51,060 --> 00:34:56,060

I'd like to start with the area where we saw the passing of that cow last year.

616

00:34:56,060 --> 00:35:00,060

We did see some features in our lidar surveys.

617

00:35:00,060 --> 00:35:04,060

Possibly something beneath the ground could account for some of what's been reported.

618

00:35:04,060 --> 00:35:07,060

And we now know the cows are avoiding that spot.

619

00:35:07,060 --> 00:35:10,060

So it's interesting.

620

00:35:10,060 --> 00:35:18,060

I feel like there are few areas on the ranch, let alone anywhere in the world, where you could see that type of activity.

621

00:35:18,060 --> 00:35:20,060

It's a diversity of activities.

622

00:35:20,060 --> 00:35:26,060

In our second spot, you can tell it's right by the homestead 2 area.

623

00:35:26,060 --> 00:35:33,060

We had a magnetometer that would measure the amplitude and specific direction of the magnetic field.

624

00:35:33,060 --> 00:35:41,060

And in that spot, it showed there's extreme magnetic field anomaly right there.

625

00:35:41,060 --> 00:35:43,060

We definitely need to investigate it further.

626

00:35:43,060 --> 00:35:47,060

This seems to be a very real area of interest.

627

00:35:47,060 --> 00:35:49,060

Very real.

628

00:35:49,060 --> 00:35:52,060

Let's just continue across the property on our map.

629

00:35:52,060 --> 00:35:54,060

This triangle area.

630

00:35:54,060 --> 00:35:55,060

This is a long history.

631

00:35:55,060 --> 00:36:02,060

I mean, this is right underneath where last year we lost the balloon at 5,000 feet above the ranch.

632

00:36:02,060 --> 00:36:04,060

321 let it launch.

633

00:36:04,060 --> 00:36:11,060

Last year, we launched a weather balloon equipped with the energy detectors about a mile high above the triangle area, hoping to get some data.

634

00:36:11,060 --> 00:36:15,060

It's not, this is not updating.

635

00:36:15,060 --> 00:36:17,060

So somewhere the sensor stopped working.

636

00:36:17,060 --> 00:36:22,060

But the sensor suddenly just stopped returning data and we never found the balloon.

637

00:36:22,060 --> 00:36:25,060

We thought something up there must have caused that.

638

00:36:25,060 --> 00:36:31,060

But could it be because of this possible cabin or tunnel system we've now detected deep underground?

639

00:36:31,060 --> 00:36:39,060

So what have you observed most recently in this area that would cause you to believe that we need to dig deeper?

640

00:36:39,060 --> 00:36:43,060

Strange behavior of the metal detectors in very specific locations.

641

00:36:43,060 --> 00:36:51,060

We also have in the opinion of Zach Zyla that in fact, yes, our soil is unusually highly

conductive.

642

00:36:51,060 --> 00:36:53,060

I think that's noteworthy.

643

00:36:53,060 --> 00:36:55,060

There's something to it that's important.

644

00:36:55,060 --> 00:36:57,060

We need to see what's underground.

645

00:36:57,060 --> 00:37:06,060

We've identified multiple locations where we feel like there will be an insight payoff if we do some drilling.

646

00:37:06,060 --> 00:37:07,060

What are you recommending?

647

00:37:07,060 --> 00:37:10,060

We're not talking about poking small holes in the ground.

648

00:37:10,060 --> 00:37:20,060

These might be as much as 20 inches or so and we're going to hope to get down beyond 50 foot deep, maybe even to 100 foot deep, at least in a couple of spots.

649

00:37:22,060 --> 00:37:25,060

The ranch is a complicated place.

650

00:37:25,060 --> 00:37:30,060

There are great risks associated with any activity on the property.

651

00:37:30,060 --> 00:37:40,060

We're always concerned about disturbing the earth because we've seen some very disturbing things happen as we have disturbed the earth in the past,

652

00:37:40,060 --> 00:37:45,060

most notably Thomas Wendertons incident, but also others.

653

00:37:45,060 --> 00:37:50,060

This triangle area has unexpected similarities to the Homestead 2 area.

654

00:37:51,060 --> 00:37:53,060

Well, I have some interesting news to share.

655

00:37:53,060 --> 00:38:04,060

You know, I recently conferenced with Ryan Skinner, who has really gained the confidence of the Sherman family, specifically Gwen Sherman.

656

00:38:04,060 --> 00:38:14,060

And Gwen revealed that there is an actual location of the area on the ranch where the Sherman said not to dig.

657

00:38:20,060 --> 00:38:30,060

I was stunned when Brandon told us how he had just gotten a hold of new information about the Sherman family and another location where something strange could be buried underground on Skinwalker Ranch.

658

00:38:30,060 --> 00:38:33,060

I'd like to share with you the coordinates.

659

00:38:33,060 --> 00:38:36,060

40 degrees.

660

00:38:36,060 --> 00:38:39,060

15 minutes, 23.0652 seconds north.

661

00:38:44,060 --> 00:38:47,060

Erick, let's see where exactly that is.

662

00:38:47,060 --> 00:38:50,060

Is there a landmark or a rock right there?

663

00:38:50,060 --> 00:38:52,060

There's something right on the left.

664

00:38:52,060 --> 00:38:54,060

I don't know where it is.

665

00:38:54,060 --> 00:38:56,060

I don't know where it is.

666

00:38:56,060 --> 00:38:58,060

I don't know where it is.

667

00:38:58,060 --> 00:39:00,060

I don't know where it is.

668

00:39:00,060 --> 00:39:02,060

I don't know where it is.

669

00:39:02,060 --> 00:39:05,060

Is there a landmark or a rock right there?

670

00:39:05,060 --> 00:39:07,060

There's something right on that point.

671

00:39:07,060 --> 00:39:09,060

Look at that.

672

00:39:13,060 --> 00:39:21,060

It's really interesting to me that when Erick types in the coordinates and he puts the pen in, it shows up right in the middle of this rock.

673

00:39:21,060 --> 00:39:24,060

That is really an intriguing thing.

674

00:39:24,060 --> 00:39:26,060

Obviously, we need to go look at the rock.

675

00:39:26,060 --> 00:39:31,060

We need to walk around it and survey it, and then we need to maybe do some careful excavations.

676

00:39:31,060 --> 00:39:33,060

Excavation there.

677

00:39:37,060 --> 00:39:42,060

This spot is very near Homestead 2 and between Homestead 2 and the Triangle.

678

00:39:42,060 --> 00:39:48,060

So could there be some kind of connection between these three points that might reveal something if we can just get deep underground?

679

00:39:48,060 --> 00:39:52,060

Dragon, do you feel comfortable?

680

00:39:52,060 --> 00:40:13,060

After doing everything that we can in a non-invasive way, well, in talking with these guys and seeing where the investigation is, it's gotten to the point where, you know, we kind of need to really start exploring under the ground here.

681

00:40:13,060 --> 00:40:29,060

If you're prepared to take on that responsibility, then I'd like to proceed aggressively, especially while the weather permits.

682

00:40:29,060 --> 00:40:42,060

One thing that we have learned over the course of the last few years is that strange activity has been reported on this property going back at least to the early 1900s.

683

00:40:42,060 --> 00:40:45,060

Maybe even hundreds to thousands of years.

684

00:40:45,060 --> 00:40:57,060

Exactly. And I believe the search for the truth trumps any previous effort to try to cloak or really, I think, keep a lot of these events secret.

685

00:40:57,060 --> 00:41:10,060

And even though there has been warning given in the past, I feel like we have an imperative to dig both literally and figuratively to get to the bottom of what is at work at Skinwalker Ranch.

686

00:41:13,060 --> 00:41:19,060

We're going to find some answers to something that has baffled people for eons, maybe.

687

00:41:19,060 --> 00:41:25,060

I'm comfortable with executing immediately and taking a very aggressive approach on this property.

688

00:41:25,060 --> 00:41:27,060

I guess we've got marching orders.

689

00:41:27,060 --> 00:41:30,060

And we'll keep you updated and posted on everything as well.

690

00:41:30,060 --> 00:41:34,060

Okay. Well, with that, let's head out.

691

00:41:34,060 --> 00:41:45,060

There's no question that it's a distinct possibility that some of the phenomenon that are taking place on Skinwalker Ranch is associated with something beneath the ranch.

692

00:41:45,060 --> 00:41:53,060

I know that I have given a lot of pushback about disturbing the earth and digging and things of that nature.

693

00:41:53,060 --> 00:41:59,060

But I realize that for the investigation, it's probably a necessary exercise.

694

00:41:59,060 --> 00:42:01,060

The only way we're going to get answers is to dig.

695

00:42:01,060 --> 00:42:05,060

I'm not scared to dig, but I am cautious.

696

00:42:05,060 --> 00:42:11,060

The superstitious side of me that still believes that there's something that takes place when you dig on this ranch.

697

00:42:11,060 --> 00:42:17,060

What's said for a long time that when you start digging on the ranch, it stirs up activity.

698

00:42:17,060 --> 00:42:24,060

We are no longer in our comfort zone, and we are dealing with the ranch in a way that may never have been attempted before.

699

00:42:24,060 --> 00:42:30,060

This is a key moment where we're about to embark on the next frontier.

700

00:42:30,060 --> 00:42:44,060

We all take a deep breath, and we all carefully consider not only the risks, but also the gravity of what lies ahead and what we may yet reveal at Skinwalker Ranch.

701

00:42:48,060 --> 00:42:51,060

We're going to dig at this site in the cowardice.

702

00:42:51,060 --> 00:42:53,060

That is magnetic right there.

703

00:42:53,060 --> 00:42:54,060

It's crazy.

704

00:42:54,060 --> 00:42:57,060

We're going to poke three holes out of the triangle.

705

00:42:57,060 --> 00:43:00,060

Hey guys, this thing's hopping all over the place.

706

00:43:00,060 --> 00:43:02,060

Magnetic north has been shifted.

707

00:43:02,060 --> 00:43:04,060

It's pointing toward where they're drilling.

708

00:43:04,060 --> 00:43:08,060

The drill's having some kind of effect on the magnetic field of the ranch.

709

00:43:08,060 --> 00:43:11,060

The Sherman said not to dig right in the middle of that rock.

710

00:43:11,060 --> 00:43:13,060

Oh, crap, look at that.

711

00:43:13,060 --> 00:43:15,060

What is that?
