

1

00:00:00,000 --> 00:00:06,360

This program is rated PG and may contain mature subject matter.

2

00:00:06,360 --> 00:00:07,840

Viewer discretion is advised.

3

00:00:07,840 --> 00:00:11,040

Cut him out, Altitude.

4

00:00:11,040 --> 00:00:15,640

We spent the better part of the day running these magnetometry and LIDAR surveys.

5

00:00:15,640 --> 00:00:19,080

Here is the magnetic data of the homestead 2.

6

00:00:19,080 --> 00:00:20,080

Oh.

7

00:00:20,080 --> 00:00:21,080

Here's the triangle.

8

00:00:21,080 --> 00:00:22,080

Oh, look at that.

9

00:00:22,080 --> 00:00:26,040

I feel like we have to dig to get to the bottom of Skinwalker Ranch.

10

00:00:26,040 --> 00:00:27,040

Hey, guys.

11

00:00:27,040 --> 00:00:29,680

This thing is hopping all over the place.

12

00:00:29,680 --> 00:00:30,680

The north has been shipped.

13

00:00:30,680 --> 00:00:33,000

It's pointing towards where they're drilling.

14

00:00:33,000 --> 00:00:36,600

The drill's having some kind of effect on the magnetic field of the ranch.

15

00:00:36,600 --> 00:00:37,600

Look at that.

16

00:00:37,600 --> 00:00:39,600

That is some dark stuff.

17

00:00:39,600 --> 00:00:41,600

I don't know what to make of that.

18

00:00:41,600 --> 00:00:44,640

I got the data back from the analysis on that interesting black stuff.

19

00:00:44,640 --> 00:00:45,640

Take a look.

20

00:00:45,640 --> 00:00:50,680

That's all the stuff you would need to put together modern-day electronics.

21

00:00:50,680 --> 00:00:51,680

Oh.

22

00:00:51,680 --> 00:00:56,480

There is a ranch in northern Utah.

23

00:00:56,480 --> 00:01:05,080

It is considered the epicenter of the strangest and most disturbing phenomena on Earth.

24

00:01:05,080 --> 00:01:12,600

Animal mutilations, bizarre UFO sightings, and unusual energies that have proven harmful

25

00:01:12,600 --> 00:01:13,600

to humans.

26

00:01:13,600 --> 00:01:20,080

For 20 years, the federal government tried to find answers and failed.

27

00:01:20,080 --> 00:01:27,440

Now, a new team of dedicated scientists, researchers, and experts has taken over.

28

00:01:27,440 --> 00:01:38,360

They are determined to solve the mystery and reveal the secret of Skinwalker Ranch.

29

00:01:38,360 --> 00:01:41,640

All right.

30

00:01:41,640 --> 00:01:47,080

We got stuff crammed up in here.

31

00:01:47,200 --> 00:01:51,440

Well, I guess we set up over close to the doorway.

32

00:01:51,440 --> 00:01:58,040

Thomas, why don't you go ahead and go in there to where the wellhead is and get a clean spot

33

00:01:58,040 --> 00:02:00,280

and hook the wire to it.

34

00:02:00,280 --> 00:02:01,280

Okay.

35

00:02:01,280 --> 00:02:06,360

After more than two months of new investigations on Skinwalker Ranch, we're finally starting

36

00:02:06,360 --> 00:02:11,160

to make possible connections that might explain some of the bizarre phenomena that keep happening

37

00:02:11,160 --> 00:02:12,160

here.

38

00:02:12,160 --> 00:02:13,160

Oh.

39

00:02:13,160 --> 00:02:14,160

Look at that.

40

00:02:14,240 --> 00:02:21,640

The highly conductive black material we obtained last week, about 100 feet below the triangle

41

00:02:21,640 --> 00:02:27,360

area where we've also seen a bunch of weird things, including UFOs, was located right

42

00:02:27,360 --> 00:02:31,920

where a recent magnetometry survey revealed a huge anomaly.

43

00:02:31,920 --> 00:02:37,280

Well that same survey showed another similar feature right here beneath Homestead 2.

44

00:02:37,280 --> 00:02:41,400

We want to know if there could be some kind of connection between the high strangeness

45

00:02:41,400 --> 00:02:44,080

we've seen at both of these sites.

46

00:02:44,080 --> 00:02:48,440

So Eric and I have devised an experiment to actually measure the conductivity where we're

47

00:02:48,440 --> 00:02:55,280

going to use the well pipe and a conductor grounding rod separated by about 50 or 60

48

00:02:55,280 --> 00:02:56,280

feet.

49

00:02:56,280 --> 00:03:01,240

And we're going to connect those to a wire through a multimeter that will measure voltage

50

00:03:01,240 --> 00:03:08,120

and current and then that to a 12 volt car battery.

51

00:03:08,120 --> 00:03:11,840

Now the key here is that the circuit is open.

52

00:03:11,840 --> 00:03:14,320

The only thing connecting them is dirt.

53

00:03:14,320 --> 00:03:18,840

We got that end connected to the ground wire and that end is connected to the well.

54

00:03:18,840 --> 00:03:24,600

So if the dirt is highly conductive, then current should flow out of the battery through

55

00:03:24,600 --> 00:03:29,440

our measuring device, through the wire to the copper rod, through the dirt, up through

56

00:03:29,440 --> 00:03:33,000

the well, back through the wire and back to the battery.

57

00:03:33,000 --> 00:03:37,440

If that's the case, that'll tell us how conductive the dirt is.

58

00:03:37,440 --> 00:03:41,080

We do measure a lot of conductivity in the soil out here.

59

00:03:41,080 --> 00:03:47,000

Do you think that would explain some of the crazy feelings people have, some of the instrumentation

60

00:03:47,000 --> 00:03:49,880

going haywire, stuff like that?

61

00:03:49,880 --> 00:03:53,080

Maybe, but here's the thing that's missing, the battery.

62

00:03:53,080 --> 00:03:54,080

Right.

63

00:03:54,080 --> 00:03:55,960

We'd have to figure out where the battery's coming from.

64

00:03:55,960 --> 00:03:57,880

Yeah, we don't know what would energize that phenomenon.

65

00:03:57,880 --> 00:04:01,280

There's still a power source somewhere that we hadn't figured out, but we're hoping this

66

00:04:01,280 --> 00:04:04,080

will help us maybe get to that.

67

00:04:04,080 --> 00:04:09,120

I've wondered for a long time whether there might be some kind of underground energy source.

68

00:04:09,120 --> 00:04:15,440

Some people have expressed the belief that aliens are somehow involved and we may be

69

00:04:15,440 --> 00:04:23,360

onto why a conjectured alien civilization or some ancient Earth civilization may have

70

00:04:23,360 --> 00:04:27,640

used the area as a power storage.

71

00:04:27,640 --> 00:04:28,640

Are we ready to do this?

72

00:04:28,640 --> 00:04:29,640

I say we are.

73

00:04:29,640 --> 00:04:30,640

Is that the other end hooked up?

74

00:04:30,640 --> 00:04:31,640

Yep.

75

00:04:31,640 --> 00:04:32,640

All right, Eric.

76

00:04:32,640 --> 00:04:33,640

Hook it up.

77

00:04:33,640 --> 00:04:37,000

There, look at that.

78

00:04:37,000 --> 00:04:38,000

Wow.

79

00:04:38,000 --> 00:04:39,000

Wow, significant.

80

00:04:39,000 --> 00:04:45,040

That's almost a third of an amp.

81

00:04:45,040 --> 00:04:46,280

I was not expecting that.

82

00:04:46,280 --> 00:04:50,560

I was expecting it to be barely one little digit move.

83

00:04:50,560 --> 00:04:56,680

Point three amps is flowing through 50, 60 feet of soil here underneath the Skinwalker

84

00:04:56,680 --> 00:04:58,160

Ranch at Homestead 2.

85

00:04:58,160 --> 00:05:00,400

I've never seen anything like that.

86

00:05:00,400 --> 00:05:01,400

There should be nothing.

87

00:05:01,400 --> 00:05:02,720

It should be billions.

88

00:05:02,720 --> 00:05:05,240

There should be even trillions of an amp.

89

00:05:05,240 --> 00:05:09,720

It's like we have a transmission line, like a power line, running underground, but everywhere

90

00:05:09,720 --> 00:05:10,720

underground.

91

00:05:10,720 --> 00:05:11,720

And so what does that mean?

92

00:05:11,720 --> 00:05:15,640

It means if there's a power source or something that stimulates it, then electrical current

93

00:05:15,640 --> 00:05:19,640

is flowing all everywhere under the ground and everywhere electric current flows, a magnetic

94

00:05:19,640 --> 00:05:21,520

field is created.

95

00:05:21,520 --> 00:05:24,440

All right.

96

00:05:24,440 --> 00:05:28,000

Seeing how big that current is makes me think I might be able to power a flashlight off.

97

00:05:28,000 --> 00:05:29,000

Oh, yeah.

98

00:05:29,000 --> 00:05:30,000

You had it.

99

00:05:30,000 --> 00:05:33,240

I found it back here in the Pelican case.

100

00:05:33,240 --> 00:05:37,400

It should be pretty easy to test this out.

101

00:05:37,400 --> 00:05:40,000

So what I want to do is break you up right there.

102

00:05:40,000 --> 00:05:42,280

What we're doing, well, that was interesting.

103

00:05:42,280 --> 00:05:43,720

So that's connected directly to the power.

104

00:05:43,720 --> 00:05:45,600

Yeah, this should be because you just disconnected the power.

105

00:05:45,600 --> 00:05:46,600

It was this.

106

00:05:46,600 --> 00:05:47,600

Wait, what?

107

00:05:47,600 --> 00:05:49,080

That just went off?

108

00:05:49,080 --> 00:05:51,080

Yeah, just as you disconnected that, this electricity.

109

00:05:51,080 --> 00:05:52,720

Is that off the lightning mirror?

110

00:05:52,720 --> 00:05:54,440

Yeah, now that's interesting.

111

00:05:54,440 --> 00:05:56,680

That is very interesting.

112

00:05:56,680 --> 00:06:01,520

When we took the battery out of the circuit, the lightning detector would go off.

113

00:06:01,520 --> 00:06:04,520

I don't think I have a good understanding of why that happened.

114

00:06:04,520 --> 00:06:06,520

Do it again.

115

00:06:06,520 --> 00:06:10,000

What the hell?

116

00:06:10,000 --> 00:06:11,000

Wow.

117

00:06:11,000 --> 00:06:13,520

What's that?

118

00:06:13,520 --> 00:06:18,080

You're conducting energy up through the ground.

119

00:06:18,080 --> 00:06:21,040

It's somehow triggering that thing.

120

00:06:21,040 --> 00:06:22,040

What?

121

00:06:22,040 --> 00:06:23,040

That's repeatable.

122

00:06:23,040 --> 00:06:25,280

Look at that.

123

00:06:25,280 --> 00:06:29,480

For Eric's lightning detector to go off during this experiment, not only verify that the

124

00:06:29,480 --> 00:06:36,640

ground here at Homestead 2 is strangely conductive just like the triangle area, but also that

125

00:06:36,640 --> 00:06:39,320

we may have stimulated some kind of phenomenon.

126

00:06:39,320 --> 00:06:46,360

Or as Thomas Winterton always says, a response from the ranch.

127

00:06:46,360 --> 00:06:49,960

There's enough current flowing through the ground off of a 12-volt battery to set the

128

00:06:49,960 --> 00:06:50,960

lightning detector.

129

00:06:50,960 --> 00:06:51,960

That's right.

130

00:06:51,960 --> 00:06:52,960

This is crazy.

131

00:06:53,160 --> 00:06:57,520

I tell you what we're seeing here is a phenomena that I don't think a lot of people have a

132

00:06:57,520 --> 00:06:58,680

good grasp on.

133

00:06:58,680 --> 00:07:04,880

I think this whole area is acting like a power supply.

134

00:07:04,880 --> 00:07:07,640

And it's storing up power.

135

00:07:07,640 --> 00:07:12,560

And then we're suddenly letting it go when we disconnect from the car battery.

136

00:07:12,560 --> 00:07:16,880

And as it's draining out quickly, it looks like a lightning bolt.

137

00:07:16,880 --> 00:07:20,600

It's like an energy reservoir here.

138

00:07:20,600 --> 00:07:24,640

Where was the power coming from that went into the earth that created that lightning

139

00:07:24,640 --> 00:07:27,240

discharge that made Eric's meter go off?

140

00:07:27,240 --> 00:07:29,640

I have no idea about that.

141

00:07:29,640 --> 00:07:34,680

But maybe the same conductive material we found beneath the triangle area is also here

142

00:07:34,680 --> 00:07:36,360

under Homestead 2.

143

00:07:36,360 --> 00:07:40,480

And if so, maybe this is leading us down a path on how to find the answer.

144

00:07:40,480 --> 00:07:42,480

I want to see if the flashlight works.

145

00:07:42,480 --> 00:07:43,480

Look it up.

146

00:07:43,480 --> 00:07:45,160

I have a feeling it's going to work.

147

00:07:45,160 --> 00:07:48,600

With that much energy, we're still getting more than a quarter of an amp.

148

00:07:48,600 --> 00:07:51,600

Well, let's see what we get when we hook this up.

149

00:07:51,600 --> 00:07:55,560

Oh, it hardly seems possible.

150

00:07:55,560 --> 00:08:00,960

We've got this giant resistor or whatever the ground is, a 50-something feet that we're

151

00:08:00,960 --> 00:08:03,000

running electricity through.

152

00:08:03,000 --> 00:08:08,160

We're using the earth as part of our electrical circuit grid.

153

00:08:08,160 --> 00:08:13,680

I was really surprised to see how much current can actually flow through the ground here.

154

00:08:13,680 --> 00:08:14,680

That's pretty crazy.

155

00:08:14,680 --> 00:08:20,120

It shows us that this soil really is highly conductive and can even possibly store energy.

156

00:08:20,120 --> 00:08:25,120

Is it possible there could be a power source somewhere under the ranch or above the ranch

157

00:08:25,120 --> 00:08:26,600

somehow connecting?

158

00:08:26,600 --> 00:08:31,240

Maybe that's why Skinwalker Ranch is the area of so many UFO sightings and so many of these

159

00:08:31,240 --> 00:08:32,960

events.

160

00:08:32,960 --> 00:08:33,960

Maybe.

161

00:08:33,960 --> 00:08:38,280

Thomas' question about UFO phenomena seemed a lot less far-fetched to me today than when

162

00:08:38,280 --> 00:08:40,080

I first came to the ranch last year.

163

00:08:40,640 --> 00:08:44,840

I don't know if the cause of these energy spikes is from something below the ground or from

164

00:08:44,840 --> 00:08:48,760

something high above like we've also seen at the triangle area.

165

00:08:48,760 --> 00:08:53,560

So I thought what we needed next was to conduct an even more aggressive experiment.

166

00:08:53,560 --> 00:09:01,280

We just saw when we put current into the ground that we're seeing phenomena, right?

167

00:09:01,280 --> 00:09:06,400

I think we've got to put power into ground to see if we can stimulate whatever this phenomena

168

00:09:06,400 --> 00:09:11,000

is and see if that phenomena shows itself.

169

00:09:11,000 --> 00:09:13,960

So how do you get enough power into the ground?

170

00:09:13,960 --> 00:09:22,240

I think we install a Tesla coil and we turn that thing on high and maybe we can scan it

171

00:09:22,240 --> 00:09:26,000

across the frequencies that it works on and it'll resonate with the surface and charge

172

00:09:26,000 --> 00:09:28,840

it up and make it start ringing or do whatever it does.

173

00:09:28,840 --> 00:09:31,480

Well, you're talking about something on a much bigger scale.

174

00:09:31,480 --> 00:09:32,480

Much larger scale.

175

00:09:33,480 --> 00:09:36,400

Well, I think we should call Brandon and talk to him about it.

176

00:09:36,400 --> 00:09:37,400

Heck yeah.

177

00:09:37,400 --> 00:09:43,600

I want to bring the biggest Tesla coil I can, plug it into the ground and we might can find

178

00:09:43,600 --> 00:09:45,360

where the power source is.

179

00:09:45,360 --> 00:09:46,360

Interdrive.

180

00:09:46,360 --> 00:09:47,360

Oh, wow.

181

00:09:47,360 --> 00:10:01,920

There's no way that coil can produce that frequency.

182

00:10:02,880 --> 00:10:06,120

We've invited Brandon out here on the ranch again to discuss the results of the soil

183

00:10:06,120 --> 00:10:07,520

conductivity test.

184

00:10:07,520 --> 00:10:13,240

And we had electrical current transferring through the ground for long ranges, which is

185

00:10:13,240 --> 00:10:14,240

really, really strange.

186

00:10:14,240 --> 00:10:16,280

Good to have you back.

187

00:10:16,280 --> 00:10:20,440

So we feel like it's time to discuss with Brandon the game plan we've put together.

188

00:10:20,440 --> 00:10:21,440

Hey guys.

189

00:10:21,440 --> 00:10:23,280

And get his blessing.

190

00:10:23,280 --> 00:10:27,800

This is his ranch and I want to make sure he knows what we're doing and what the possible

191

00:10:27,800 --> 00:10:30,440

ramifications of what we do are.

192

00:10:30,440 --> 00:10:32,040

So what do you have to show me?

193

00:10:32,040 --> 00:10:36,560

We are discussing setting up a very different kind of experiment.

194

00:10:36,560 --> 00:10:39,840

It's something that Travis has suggested.

195

00:10:39,840 --> 00:10:47,240

Well, so we did, we've done some experiments down at Homestead 2 where we created a circuit

196

00:10:47,240 --> 00:10:54,800

with a 12 volt car battery and put a flashlight in the loop and part of the circuit was 70

197

00:10:54,800 --> 00:10:56,680

something feet of dirt.

198

00:10:56,680 --> 00:10:58,680

Okay.

199

00:10:58,680 --> 00:11:05,520

And the flashlight would still come on with dirt as being one of the wires in the circuit.

200

00:11:05,520 --> 00:11:07,440

Wow.

201

00:11:07,440 --> 00:11:13,280

For you to be able to power a light bulb just by virtue of plugging it into the land, that's

202

00:11:13,280 --> 00:11:14,280

extraordinary.

203

00:11:14,280 --> 00:11:15,400

It is extraordinary.

204

00:11:15,400 --> 00:11:24,680

And that led me to think about how the dirt in the ranch is highly conductive and might

205

00:11:24,680 --> 00:11:27,760

be working like a battery.

206

00:11:27,760 --> 00:11:34,200

The ranch itself could be storing energy because we actually disconnected the battery,

207

00:11:34,200 --> 00:11:35,200

right?

208

00:11:35,200 --> 00:11:36,200

Yup.

209

00:11:36,200 --> 00:11:37,200

That was the remarkable part.

210

00:11:37,200 --> 00:11:38,200

Why?

211

00:11:38,200 --> 00:11:41,600

Why would the land be conducting electricity?

212

00:11:41,600 --> 00:11:49,120

It's got something in it that's layers of conduct, more conductive soil than normal

213

00:11:49,120 --> 00:11:50,120

soil.

214

00:11:50,120 --> 00:11:56,160

Just like the materials that we found in this sample underneath the ranch out of the triangle.

215

00:11:56,160 --> 00:11:59,360

And if you got a conductive layer and then a non-conductive layer, then another one and

216

00:11:59,360 --> 00:12:05,640

so on, that's the way a battery looks if you take a battery apart and look in it.

217

00:12:05,640 --> 00:12:11,160

And the ground itself might be acting like a battery and it might be charging just due

218

00:12:11,160 --> 00:12:16,600

to weather moving over the area.

219

00:12:16,600 --> 00:12:17,760

Is this normal?

220

00:12:17,760 --> 00:12:20,400

Is this something that you see typically in other locations?

221

00:12:20,400 --> 00:12:21,400

No.

222

00:12:21,400 --> 00:12:23,080

It's one thing for the soil to be conductive.

223

00:12:23,080 --> 00:12:26,360

That's another thing for it to have the kind of structure that Travis was talking about,

224

00:12:26,360 --> 00:12:30,920

where you actually, by the arrangement of those conductors, can store energy.

225

00:12:30,920 --> 00:12:31,920

Right.

226

00:12:31,920 --> 00:12:34,600

Well, and power a light bulb just through our land.

227

00:12:34,600 --> 00:12:39,920

It's very similar to the things that Nikola Tesla wanted to do to send power around the

228

00:12:39,920 --> 00:12:43,280

world through the earth.

229

00:12:43,280 --> 00:12:47,440

Nikola Tesla was one of the most brilliant scientists and inventors regarding electricity

230

00:12:47,440 --> 00:12:48,440

to ever live.

231

00:12:49,440 --> 00:12:54,800

And as early as 1899, he began working on an experiment in Colorado, attempting to figure

232

00:12:54,800 --> 00:13:00,480

out how to provide power from America to Europe using large energy transmitters he invented

233

00:13:00,480 --> 00:13:05,160

called Tesla coils, which had to be connected to the soil.

234

00:13:05,160 --> 00:13:09,920

Although he was able to send energy underground for miles, the ultimate goal of the experiment

235

00:13:09,920 --> 00:13:11,520

was never achieved.

236

00:13:11,520 --> 00:13:16,760

However, I believe that if he'd been able to run his experiment through the kind of

237

00:13:16,760 --> 00:13:22,640

weirdly conductive soil that's here on Skinwalker Ranch, it just might have worked.

238

00:13:22,640 --> 00:13:29,320

I think that there's something specific about this area that's so highly conductive.

239

00:13:29,320 --> 00:13:30,320

Wow.

240

00:13:30,320 --> 00:13:35,160

You start thinking about this, maybe it would make more sense as to why it could cause phenomena

241

00:13:35,160 --> 00:13:37,160

to take place, and then what do they say?

242

00:13:37,160 --> 00:13:39,160

Bad things happen when you dig.

243

00:13:39,160 --> 00:13:42,960

You stick something in the ground, it'll trigger the thing to go off.

244

00:13:42,960 --> 00:13:45,960

Eric's lightning meter goes off all the time, especially when we're digging.

245

00:13:46,160 --> 00:13:48,160

It could be charging and discharging.

246

00:13:48,160 --> 00:13:54,680

Now, if you wanted to get really crazy with it, you know, one of the more exotic explanations

247

00:13:54,680 --> 00:14:00,280

could be like, well, if you were in advanced civilization, you would say the earth is

248

00:14:00,280 --> 00:14:03,480

a battery, where's the best place to go pre-charger cable in?

249

00:14:03,480 --> 00:14:04,480

Like a charging station.

250

00:14:04,480 --> 00:14:05,480

Yeah.

251

00:14:05,480 --> 00:14:09,440

Just like electric car charging stations, but this is happening naturally.

252

00:14:09,440 --> 00:14:10,920

Wow.

253

00:14:10,920 --> 00:14:16,720

It could be that what we're seeing is part of the explanation for things witnessed by

254

00:14:16,720 --> 00:14:23,720

folks who have lived here or visited the property, including UFOs, UAPs, and even the orb phenomenology

255

00:14:23,720 --> 00:14:25,840

said to frequent the ranch.

256

00:14:25,840 --> 00:14:32,840

You're speaking now to a very real, tangible phenomenon that you've discovered here on

257

00:14:32,840 --> 00:14:34,840

the property.

258

00:14:34,840 --> 00:14:37,600

Yeah.

259

00:14:37,600 --> 00:14:43,360

The history of this property is rich with high strangeness, with all sorts of reports

260

00:14:43,360 --> 00:14:45,360

and anomalies.

261

00:14:45,360 --> 00:14:51,560

Shortly after I acquired the ranch, I began to see many of the same things that people

262

00:14:51,560 --> 00:14:56,520

have reported going back not only decades, but generations.

263

00:14:56,520 --> 00:14:59,080

We've seen strange luminescent phenomena.

264

00:14:59,080 --> 00:15:01,280

We've seen strange lights.

265

00:15:01,280 --> 00:15:06,040

We've seen, you know, sections of the mesa illuminated.

266

00:15:06,040 --> 00:15:10,720

This is the Shermans who bought the property in the early 90s.

267

00:15:10,720 --> 00:15:14,360

Witnessed with their own eyes, UFO activity over the property.

268

00:15:14,360 --> 00:15:17,240

We have surprisingly had the same experiences.

269

00:15:17,240 --> 00:15:18,240

I can't deny it.

270

00:15:18,240 --> 00:15:21,960

I've seen it with my own eyes, with multiple witnesses.

271

00:15:21,960 --> 00:15:27,400

I'd like to hear, you know, what you'd propose the best course or path may be.

272

00:15:27,400 --> 00:15:32,400

So what I would like to do, Brandon, is I would like to call a colleague of mine and

273

00:15:32,400 --> 00:15:38,680

find the biggest Tesla coil that I can find available and energize the ranch as powerfully

274

00:15:38,680 --> 00:15:44,920

as I can, number one, to see how far away we can transmit energy across the ranch.

275

00:15:44,920 --> 00:15:48,760

And also, maybe it would stimulate something.

276

00:15:48,760 --> 00:15:56,560

You know, I'm most worried that you may unleash power that you're not prepared to handle

277

00:15:56,560 --> 00:15:58,280

here on the property.

278

00:15:58,280 --> 00:16:01,160

So I want to make sure that we take proper precautions.

279

00:16:01,160 --> 00:16:05,160

It's definitely something we have to be very cautious about, but Travis knows what he's

280

00:16:05,160 --> 00:16:10,120

doing in this regard, and I don't think any of us are going to run willy-nilly around

281

00:16:10,120 --> 00:16:12,600

here and take undue risks.

282

00:16:12,600 --> 00:16:19,440

So if we reach a point where we're seeing a phenomena, then that'll be where we realize,

283

00:16:19,440 --> 00:16:25,200

okay, we need to back off and observe and understand this before we really kick it too

284

00:16:25,200 --> 00:16:26,200

hard.

285

00:16:26,200 --> 00:16:30,640

Well, I think it's both exciting and terrifying at the same time.

286

00:16:30,640 --> 00:16:36,360

And I hope you're all really prepared for the potential risks associated with that.

287

00:16:36,360 --> 00:16:39,800

I trust these three guys completely.

288

00:16:39,800 --> 00:16:43,760

And I know these two will carry it out the way that it should be carried out.

289

00:16:43,760 --> 00:16:48,000

And I know that if something goes wrong, they'll keep us safe.

290

00:16:48,000 --> 00:16:49,000

Okay.

291

00:16:49,000 --> 00:16:52,040

Travis, how soon can you do these experiments?

292

00:16:52,040 --> 00:16:55,480

Well, I've talked to a colleague of mine, and he's ready to bring some equipment out,

293

00:16:55,480 --> 00:16:56,480

like now.

294

00:16:56,480 --> 00:16:58,040

I mean, any day now.

295

00:16:58,040 --> 00:17:05,040

So right now we're looking at the triangle area to do the experiment.

296

00:17:05,040 --> 00:17:09,320

Now that we've determined that the soil at Homestead 2 is just as strangely conductive

297

00:17:09,320 --> 00:17:14,200

as it is at the triangle area, I want to conduct the Tesla coil experiment in the triangle

298

00:17:14,200 --> 00:17:15,760

for two reasons.

299

00:17:15,760 --> 00:17:20,320

One, it doesn't have the tree cover, so it's not as much of a fire hazard.

300

00:17:20,320 --> 00:17:25,520

And two, I'm really curious to see if sending a lot of electricity into the ground might

301

00:17:25,520 --> 00:17:29,960

stimulate phenomena either between or at both sides.

302

00:17:29,960 --> 00:17:34,320

Maybe this experiment could finally help reveal just exactly what it is we're dealing

303

00:17:34,320 --> 00:17:36,160

with on Skinwalker Ranch.

304

00:17:36,160 --> 00:17:41,880

Well, I'm very interested to see what kind of results come from this experiment.

305

00:17:41,880 --> 00:17:46,800

So proceed accordingly and be careful.

306

00:17:46,800 --> 00:17:50,040

Now, one thing we need to keep in mind here is the danger.

307

00:17:50,040 --> 00:17:53,960

We're running this coil at a greater power than I've ever ran it before.

308

00:17:53,960 --> 00:17:55,960

I don't know what's going to happen here.

309

00:17:55,960 --> 00:18:00,960

All right, let's fire this thing up, Cameron.

310

00:18:00,960 --> 00:18:04,960

Okay, coming up.

311

00:18:04,960 --> 00:18:07,960

What's up, Cameron?

312

00:18:07,960 --> 00:18:11,960

Good to see you, man.

313

00:18:11,960 --> 00:18:13,960

How you doing, brother?

314

00:18:13,960 --> 00:18:15,640

Good to see you, man.

315

00:18:15,640 --> 00:18:19,640

Cameron Prince is a good buddy of mine who's also an engineer and an expert on Nikola

316

00:18:19,640 --> 00:18:20,640

Tesla.

317

00:18:20,640 --> 00:18:24,240

So I arranged with him to bring some different sized Tesla coils out to the ranch so we

318

00:18:24,240 --> 00:18:29,040

could see what would happen if we shot a lot of electricity into the ground at the triangle

319

00:18:29,040 --> 00:18:30,040

area.

320

00:18:30,040 --> 00:18:33,960

Now, if the ranch really does respond to being poked, I wanted to see what might show up

321

00:18:33,960 --> 00:18:35,600

if we zapped it.

322

00:18:35,600 --> 00:18:39,880

One of the things we've measured are weird radio and microwave signals that we can't

323

00:18:39,880 --> 00:18:40,880

source.

324

00:18:40,880 --> 00:18:46,760

And they bounce around, and we've discovered an anomaly in the soil here that we think

325

00:18:46,760 --> 00:18:49,280

that we can stimulate with a Tesla coil.

326

00:18:49,280 --> 00:18:50,280

Wow.

327

00:18:50,280 --> 00:18:51,920

It's just feeling like energy of some sort.

328

00:18:51,920 --> 00:18:53,880

Yep, and it's really unusual.

329

00:18:53,880 --> 00:18:56,640

I mean, that's the only way I could explain it, right?

330

00:18:56,640 --> 00:19:01,480

Yeah, and I'm excited you're here because maybe this will help ease that confusion,

331

00:19:01,480 --> 00:19:03,000

and we'll be able to get some answers.

332

00:19:03,000 --> 00:19:04,000

Sounds really cool.

333

00:19:04,000 --> 00:19:06,720

All right, well, show us what you brought, man.

334

00:19:06,720 --> 00:19:08,400

Okay, I'd love to see it.

335

00:19:08,400 --> 00:19:12,840

I know these guys can't wait to see it.

336

00:19:12,840 --> 00:19:17,640

So I brought four coils, two small ones that are actually solid state, and we can vary

337

00:19:17,640 --> 00:19:18,760

the frequency there.

338

00:19:18,760 --> 00:19:23,880

So this anomaly is sensitive to certain frequencies or pulse rate.

339

00:19:23,880 --> 00:19:26,320

We've got a lot of versatility to do different things.

340

00:19:26,320 --> 00:19:30,320

The large coil, it stands about nine foot tall, and that's what you see here with the

341

00:19:30,320 --> 00:19:31,920

big donut there.

342

00:19:31,920 --> 00:19:36,480

That sits on top, and that's what collects that energy until it breaks out, and we start

343

00:19:36,480 --> 00:19:37,480

hitting the ground with it.

344

00:19:37,480 --> 00:19:40,280

So we're going to dump a big bucket of energy on the ground.

345

00:19:40,280 --> 00:19:46,600

That's exactly what we're going to do, not just on the ground, in and through the ground.

346

00:19:46,960 --> 00:19:51,560

Tesla was the creator of AC Current, which we use today, but he wanted to do away with

347

00:19:51,560 --> 00:19:55,520

the wires and actually transmit that energy wirelessly.

348

00:19:55,520 --> 00:19:59,240

So the Tesla coil was created with that in mind.

349

00:19:59,240 --> 00:20:05,760

So a Tesla coil is an air core transformer that takes AC voltage and boost it up to a

350

00:20:05,760 --> 00:20:10,040

very high degree in order to create the lightning.

351

00:20:10,040 --> 00:20:15,840

So what I'd like to do, guys, I think we should load up, cross through the triangle, and head

352

00:20:15,840 --> 00:20:16,840

that way.

353

00:20:16,840 --> 00:20:17,840

Sounds good.

354

00:20:17,840 --> 00:20:18,840

All right, man.

355

00:20:18,840 --> 00:20:19,840

Perfect.

356

00:20:19,840 --> 00:20:29,560

Bringing a Tesla coil on the ranch is a culmination of hundreds of hours of experiments and research

357

00:20:29,560 --> 00:20:32,720

and finding magnetic anomalies in the ground.

358

00:20:32,720 --> 00:20:35,000

So this is what we call a triangle.

359

00:20:35,000 --> 00:20:37,920

The hope is by pumping all this energy into the ground.

360

00:20:37,920 --> 00:20:44,160

One, we're going to learn more about the conductive properties here at the ranch, and two, maybe

361

00:20:44,160 --> 00:20:45,520

we'll wake something up.

362

00:20:45,520 --> 00:20:49,200

Well, so, Cameron, why don't you just pull up down there by that yellow flag and we'll

363

00:20:49,200 --> 00:20:50,520

start staging the equipment at?

364

00:20:50,520 --> 00:20:51,520

Sounds good.

365

00:20:51,520 --> 00:20:52,520

All right, man.

366

00:20:52,520 --> 00:20:56,520

It's like every other experiment that we perform.

367

00:20:56,520 --> 00:20:58,720

We're not sure what to expect.

368

00:20:58,720 --> 00:21:03,240

Maybe when we turn the device on, we'll see something in the sky above, or maybe we'll

369

00:21:03,240 --> 00:21:05,240

measure something in the ground below.

370

00:21:05,240 --> 00:21:07,400

It'll work.

371

00:21:07,400 --> 00:21:10,180

We're going to be putting so much power through the ground.

372

00:21:10,180 --> 00:21:13,980

If there's something underground, it's bound to feed back into that.

373

00:21:13,980 --> 00:21:16,980

And we might see something occur.

374

00:21:16,980 --> 00:21:18,820

So we might be interacting with something.

375

00:21:18,820 --> 00:21:19,820

That's what I'm hoping.

376

00:21:19,820 --> 00:21:20,820

OK.

377

00:21:20,820 --> 00:21:25,500

Because so many weird things tend to happen at night on the ranch, like the strange lights

378

00:21:25,500 --> 00:21:30,380

we've seen on the Mesa or the reports and evidence that we've experienced ourselves

379

00:21:30,380 --> 00:21:32,300

with possible portals.

380

00:21:32,300 --> 00:21:35,460

We thought it would be best to start our experiments once the sun went down.

381

00:21:41,180 --> 00:21:46,420

All right, Cameron, I think we've got all of our instruments set up.

382

00:21:46,420 --> 00:21:50,140

This is the audio spectrum that Eric's looking at on this screen.

383

00:21:50,140 --> 00:21:54,300

We've got a different frequency antenna set up here on a spectrum analyzer.

384

00:21:54,300 --> 00:21:58,780

So we're going to be looking at all these different pieces of data while we're running

385

00:21:58,780 --> 00:21:59,780

this thing.

386

00:21:59,780 --> 00:22:03,020

We'll start kind of using that as a measurement of the conductivity of the soil.

387

00:22:03,020 --> 00:22:04,020

OK.

388

00:22:04,020 --> 00:22:06,100

One thing we need to keep in mind here is the danger.

389

00:22:06,100 --> 00:22:10,100

We're running this coil at a greater power than I've ever ran it before.

390

00:22:10,100 --> 00:22:14,260

We were talking about a more conductive ground than I've ever worked with before.

391

00:22:14,260 --> 00:22:15,860

So we've got to keep safety in mind.

392

00:22:15,860 --> 00:22:17,620

I don't know what's going to happen here.

393

00:22:17,620 --> 00:22:18,620

Yeah.

394

00:22:18,620 --> 00:22:22,540

Pumping this much electricity into the ground and into the atmosphere, who knows what it

395

00:22:22,540 --> 00:22:24,380

could possibly stimulate?

396

00:22:24,380 --> 00:22:26,300

Hopefully we're prepared for whatever happens.

397

00:22:26,300 --> 00:22:27,660

If something happens, we don't know.

398

00:22:27,660 --> 00:22:29,980

And if a portal opens up over there, I'm going in.

399

00:22:29,980 --> 00:22:35,020

So let's fire up the Tesla coil and see what happens.

400

00:22:35,020 --> 00:22:40,060

Because of the potential danger of this experiment, we decided to use the smaller coils first.

401

00:22:40,060 --> 00:22:45,100

Now, I also stuck some fluorescent light bulbs in the ground and handed some out to the

402

00:22:45,100 --> 00:22:46,100

team.

403

00:22:46,100 --> 00:22:50,860

Since our bodies are natural conductors of electricity, if we saw the bulbs light up,

404

00:22:50,860 --> 00:22:54,860

it would mean that the ground was conducting current and it would verify the experiment

405

00:22:54,860 --> 00:22:55,860

was working.

406

00:22:55,860 --> 00:23:00,020

Then it would just be a matter of seeing what other things might happen.

407

00:23:00,020 --> 00:23:01,020

All right.

408

00:23:01,020 --> 00:23:02,540

Let's fire this thing up, Cameron.

409

00:23:02,540 --> 00:23:03,540

OK.

410

00:23:03,540 --> 00:23:04,540

Coming up.

411

00:23:04,540 --> 00:23:05,540

There you go.

412

00:23:05,540 --> 00:23:12,540

Oh, that's pretty bright right there.

413

00:23:12,540 --> 00:23:14,540

Over there.

414

00:23:14,540 --> 00:23:16,540

That one lighting up.

415

00:23:16,540 --> 00:23:17,540

It is lighting up.

416

00:23:17,540 --> 00:23:18,540

Yeah, you can see it.

417

00:23:18,540 --> 00:23:19,540

You can see it light up.

418

00:23:19,540 --> 00:23:20,540

Hey Travis.

419

00:23:20,540 --> 00:23:21,540

Yeah.

420

00:23:21,540 --> 00:23:23,540

The whole night's floor is going up and down.

421

00:23:23,540 --> 00:23:24,540

All right.

422

00:23:24,540 --> 00:23:25,540

Bring it down.

423

00:23:25,540 --> 00:23:26,540

Hey, wait, wait, wait, wait.

424

00:23:26,540 --> 00:23:27,540

What is that?

425

00:23:27,540 --> 00:23:28,540

Right there.

426

00:23:28,540 --> 00:23:29,540

Look at how fast this goes.

427

00:23:29,540 --> 00:23:30,540

And then look at it streak off.

428

00:23:30,540 --> 00:23:31,540

Look at it streak off.

429

00:23:31,540 --> 00:23:32,540

Right on.

430

00:23:32,540 --> 00:23:33,540

That is crazy.

431

00:23:33,540 --> 00:23:34,540

There you go.

432

00:23:34,540 --> 00:23:35,540

Over there.

433

00:23:35,540 --> 00:23:36,540

That one.

434

00:23:36,540 --> 00:23:55,940

Cameron brought two smaller Tesla coils that he can control with a solid state box that

435

00:23:55,940 --> 00:23:58,540

changes the tone and frequency of them.

436

00:23:58,540 --> 00:24:00,540

Oh, it is working.

437

00:24:00,540 --> 00:24:01,540

It is working.

438

00:24:01,540 --> 00:24:09,020

Hopefully we can trigger whatever this phenomena is by adjusting the output of the energy that

439

00:24:09,020 --> 00:24:10,540

we're sending out.

440

00:24:10,540 --> 00:24:15,540

Woo, you can smell that ozone.

441

00:24:15,540 --> 00:24:16,540

That's it.

442

00:24:16,540 --> 00:24:17,540

All right.

443

00:24:17,540 --> 00:24:21,540

I'll go back and see what Eric saw on the instruments.

444

00:24:21,540 --> 00:24:22,540

OK.

445

00:24:22,540 --> 00:24:24,540

All right, Eric, what did you see?

446

00:24:24,540 --> 00:24:27,540

If you want, you can take a look at this last screen capture.

447

00:24:27,540 --> 00:24:28,540

Nice ring.

448

00:24:28,540 --> 00:24:29,540

Oh, wow.

449

00:24:29,540 --> 00:24:33,540

Well, that smacked in the bell, but the bell ring back.

450

00:24:33,540 --> 00:24:36,540

I didn't see anything that I would call a response.

451

00:24:36,540 --> 00:24:41,060

Eric's detecting devices only registered energy levels that appeared to have been produced

452

00:24:41,060 --> 00:24:44,980

by the electricity coming out of the small Tesla coils.

453

00:24:44,980 --> 00:24:48,540

So the only thing I could think of to do next was to up the ante.

454

00:24:48,540 --> 00:24:49,540

Maybe we need more power.

455

00:24:49,540 --> 00:24:50,540

More power.

456

00:24:50,540 --> 00:24:51,540

OK.

457

00:24:51,540 --> 00:24:54,900

Well, Cameron, I can't wait to see what happens to that bigger coil when you pump it with

458

00:24:54,900 --> 00:24:56,940

more power than you've ever done.

459

00:24:56,940 --> 00:24:59,940

So let's fire up the Tesla coil and see what happens.

460

00:24:59,940 --> 00:25:01,740

Let's rock and roll.

461

00:25:01,740 --> 00:25:06,940

It's possible we need an even bigger Tesla coil firing at maximum power, and then hopefully

462

00:25:06,940 --> 00:25:11,860

if there's a bigger power supply here somewhere, it might stimulate it.

463

00:25:11,860 --> 00:25:15,980

It might trigger some kind of communication signal or a response.

464

00:25:15,980 --> 00:25:18,940

And maybe it's something we can detect and locate.

465

00:25:18,940 --> 00:25:21,340

All right, I'm bringing up the big coil.

466

00:25:21,340 --> 00:25:22,340

Everybody stand back.

467

00:25:22,340 --> 00:25:23,340

All right.

468

00:25:23,340 --> 00:25:24,340

OK.

469

00:25:24,340 --> 00:25:26,340

Here it goes.

470

00:25:26,740 --> 00:25:27,740

Ready?

471

00:25:27,740 --> 00:25:28,740

Yeah.

472

00:25:28,740 --> 00:25:30,740

In it goes.

473

00:25:36,740 --> 00:25:37,740

Whoa, look at that.

474

00:25:37,740 --> 00:25:39,740

Oh, that's cool.

475

00:25:40,740 --> 00:25:41,740

Oh, wow.

476

00:25:41,740 --> 00:25:43,740

Check it out.

477

00:25:45,740 --> 00:25:47,740

Oh, yeah!

478

00:25:49,740 --> 00:25:51,740

Yeah, what are we seeing here?

479

00:25:51,740 --> 00:25:53,740

The whole floor raises like that.

480

00:25:53,740 --> 00:25:55,740

When did you notice that first?

481

00:25:56,140 --> 00:25:58,140

What are you doing about halfway through?

482

00:25:58,140 --> 00:26:03,140

As I was watching the different spectrum analyzers and some of this different equipment, I started

483

00:26:03,140 --> 00:26:06,140

seeing these strange signals coming back.

484

00:26:06,140 --> 00:26:07,140

Hey, Travis!

485

00:26:07,140 --> 00:26:08,140

Yeah!

486

00:26:08,140 --> 00:26:11,140

The whole noise floor is going up and down.

487

00:26:11,140 --> 00:26:12,140

OK.

488

00:26:12,140 --> 00:26:15,140

All right, bring it down, Cameron.

489

00:26:18,140 --> 00:26:22,140

So what we're seeing over here is that the noise floor is continuing to hop up and down.

490

00:26:22,140 --> 00:26:23,140

Really?

491

00:26:23,140 --> 00:26:24,140

Yeah.

492

00:26:24,140 --> 00:26:25,140

Check it out.

493

00:26:25,540 --> 00:26:26,540

Wow, look at that.

494

00:26:26,540 --> 00:26:27,540

That just happened.

495

00:26:27,540 --> 00:26:28,540

Whoa!

496

00:26:28,540 --> 00:26:29,540

That was the first time that happened.

497

00:26:29,540 --> 00:26:32,540

That was out at 400 kilohertz.

498

00:26:32,540 --> 00:26:35,540

So this entire thing's just been bouncing and still going.

499

00:26:35,540 --> 00:26:36,540

Yeah, it's crazy.

500

00:26:36,540 --> 00:26:37,540

Look at that.

501

00:26:37,540 --> 00:26:41,340

The noise floor refers to all the normal energy interference you'd expect to see on the spectrum

502

00:26:41,340 --> 00:26:46,940

analyzer coming from sources like our cell phones or telephone lines or even camera

503

00:26:46,940 --> 00:26:47,940

equipment.

504

00:26:47,940 --> 00:26:53,540

So to see the spiking energy fluctuations continue even after we shut the test coil off,

505

00:26:53,940 --> 00:26:57,940

well, that's evidence that a much bigger energy source was being detected.

506

00:26:57,940 --> 00:26:58,940

Oh, crap.

507

00:26:58,940 --> 00:26:59,940

Look at that.

508

00:26:59,940 --> 00:27:06,140

A few weeks ago, we witnessed something very similar right after we conducted an experiment

509

00:27:06,140 --> 00:27:07,140

at Homestead 2.

510

00:27:07,140 --> 00:27:12,140

Somehow, I mean, we're actively being electronically attacked right there.

511

00:27:12,140 --> 00:27:15,240

That is a transmitter somewhere doing that.

512

00:27:15,240 --> 00:27:20,140

And then suddenly, both Thomas and I started to feel sick.

513

00:27:20,140 --> 00:27:22,140

That was freaking weird.

514

00:27:23,140 --> 00:27:25,140

That's how dizzy I was, then.

515

00:27:25,140 --> 00:27:27,140

Guys, I'm leaving the ranch.

516

00:27:27,140 --> 00:27:28,140

I'm getting a bad headache.

517

00:27:28,140 --> 00:27:29,140

Are you serious?

518

00:27:29,140 --> 00:27:31,140

I'm dead serious.

519

00:27:31,140 --> 00:27:36,140

So these sudden energy spikes that were being detected by the spectrum analyzer may very

520

00:27:36,140 --> 00:27:41,140

well have been evidence that we were stimulating a response from something on the ranch.

521

00:27:41,140 --> 00:27:45,140

But what that was, we had no idea, at least not at that point.

522

00:27:45,140 --> 00:27:48,140

There's no way that coil can produce that frequency.

523

00:27:48,140 --> 00:27:50,140

It's too high.

524

00:27:50,140 --> 00:27:57,140

The ground is somehow acting like a transformer turning low frequency, lower power, into higher

525

00:27:57,140 --> 00:27:58,140

frequency, higher power.

526

00:27:58,140 --> 00:28:01,140

How is that possible?

527

00:28:01,140 --> 00:28:05,140

It means there's a transformer under the ground or something.

528

00:28:05,140 --> 00:28:11,640

We typically see a very strong resonant frequency of the coil and a couple of harmonics right

529

00:28:11,640 --> 00:28:12,640

near that.

530

00:28:12,640 --> 00:28:18,140

But one thing that was really odd is we saw a much higher frequency up in the megahertz

531

00:28:18,140 --> 00:28:22,140

range far beyond what the coil normally produces.

532

00:28:22,140 --> 00:28:27,140

You know, I can't explain this signal, but it did seem to be affected or provoked or

533

00:28:27,140 --> 00:28:29,140

started by the coil.

534

00:28:29,140 --> 00:28:30,640

But here's the other thing.

535

00:28:30,640 --> 00:28:35,140

I can't keep that quantum random number generator program up.

536

00:28:35,140 --> 00:28:38,140

It continues to shut down on its own.

537

00:28:38,140 --> 00:28:40,140

So I don't know what's happening here.

538

00:28:40,140 --> 00:28:44,140

This is unexpected because I've had no trouble whatsoever with this device.

539

00:28:44,140 --> 00:28:49,140

But something's turning this off and it doesn't correlate necessarily with turning this Tesla

540

00:28:49,140 --> 00:28:50,140

coil on.

541

00:28:50,140 --> 00:28:53,140

And you can't even get the software to come up and tell you what the...

542

00:28:53,140 --> 00:28:54,140

Oh, it'll come up.

543

00:28:54,140 --> 00:28:55,140

It'll come up for a short time.

544

00:28:55,140 --> 00:28:58,140

But then what happens is this entire interface just shuts down.

545

00:28:58,140 --> 00:29:01,140

I have tested that device to fly in space.

546

00:29:01,140 --> 00:29:02,140

Okay.

547

00:29:02,140 --> 00:29:06,140

Because I am about to fly four of them on the space station in December.

548

00:29:06,140 --> 00:29:07,140

And...

549

00:29:07,140 --> 00:29:09,140

So that should lay that concern to the rest of the way.

550

00:29:09,140 --> 00:29:11,140

That shouldn't be that.

551

00:29:11,140 --> 00:29:14,140

Some of our instruments have clearly been interfered with.

552

00:29:14,140 --> 00:29:19,140

And I'm asking myself whether this is an indication of stimulus and response.

553

00:29:19,140 --> 00:29:23,140

Are we dealing with something that is technological?

554

00:29:23,140 --> 00:29:27,140

Is there an other on the other side of the interaction?

555

00:29:27,140 --> 00:29:29,140

We all want to know the answer to this.

556

00:29:29,140 --> 00:29:34,140

I can't help wondering whether either we've done something to tweak this device, in other words,

557

00:29:34,140 --> 00:29:36,140

to damage it somehow.

558

00:29:36,140 --> 00:29:37,140

Right.

559

00:29:37,140 --> 00:29:42,140

Whether something more interesting is shutting down and preventing me from being able to

560

00:29:42,140 --> 00:29:43,140

use the device.

561

00:29:43,140 --> 00:29:45,140

I was thinking about that too.

562

00:29:45,140 --> 00:29:49,140

I mean, we're so focused on these instruments, something may be happening around us.

563

00:29:49,140 --> 00:29:52,140

These seem to be triggered by outside sources.

564

00:29:52,140 --> 00:29:53,140

Yeah.

565

00:29:53,140 --> 00:29:58,140

Could Eric be correct that something made our equipment just shut down and no longer be

566

00:29:58,140 --> 00:30:01,140

able to detect the strange energy signal?

567

00:30:01,140 --> 00:30:04,140

I approach these experiments from a scientific perspective.

568

00:30:04,140 --> 00:30:10,140

If he's right, then something with an intelligence would have to be the culprit.

569

00:30:10,140 --> 00:30:14,140

So we did have two anomalies that we can't really explain.

570

00:30:14,140 --> 00:30:19,140

And that's the fact that the signal from the Tesla coil was amplified and transformed into

571

00:30:19,140 --> 00:30:21,140

a higher frequency.

572

00:30:21,140 --> 00:30:23,140

That I can't explain.

573

00:30:23,140 --> 00:30:28,140

And that quantum random number generator quit working with this computer for some reason.

574

00:30:28,140 --> 00:30:33,140

When it comes to skin walker ranch, there seems to be an intelligence to it.

575

00:30:33,140 --> 00:30:39,140

Which I've always said you can't make this ranch tap dance on command.

576

00:30:39,140 --> 00:30:45,140

And our hope is by doing these projects that we can stimulate it, that we can maybe communicate

577

00:30:45,140 --> 00:30:46,140

with it.

578

00:30:46,140 --> 00:30:47,140

Maybe communicate with it.

579

00:30:47,140 --> 00:30:52,140

But if there is an intelligence, it seems like there's something about this triangle

580

00:30:52,140 --> 00:30:54,140

it does not want messed with.

581

00:30:54,140 --> 00:30:58,140

I don't know what it is, but it seems like when we're doing big experiments on the ranch,

582

00:30:58,140 --> 00:31:04,140

things happen to maybe thwart our efforts or at least throw a wrench in things.

583

00:31:04,140 --> 00:31:09,140

Without fail, we're going to have some equipment that malfunctions or things that are trying

584

00:31:09,140 --> 00:31:11,140

to stop us from what we're doing.

585

00:31:11,140 --> 00:31:15,140

Well, I mean, you've never seen anything like that with the big Tesla coil.

586

00:31:15,140 --> 00:31:16,140

No, nothing.

587

00:31:16,140 --> 00:31:17,140

I can't explain that.

588

00:31:17,140 --> 00:31:23,140

It doesn't surprise me at all after being out here doing research on the ranch for two summers now.

589

00:31:23,140 --> 00:31:25,140

I don't know what else we could do here.

590

00:31:25,140 --> 00:31:27,140

I'd like to go back and look at the data.

591

00:31:27,140 --> 00:31:29,140

So let's start packing up guys, right?

592

00:31:29,140 --> 00:31:31,140

Wow, look at that.

593

00:31:31,140 --> 00:31:32,140

Yeah.

594

00:31:32,140 --> 00:31:33,140

That's a real fly on.

595

00:31:33,140 --> 00:31:34,140

Yeah, look at that.

596

00:31:34,140 --> 00:31:35,140

Hey, wait, wait, wait, wait.

597

00:31:35,140 --> 00:31:36,140

What is that?

598

00:31:36,140 --> 00:31:37,140

Right there.

599

00:31:37,140 --> 00:31:38,140

Yes.

600

00:31:38,140 --> 00:31:39,140

You see that?

601

00:31:39,140 --> 00:31:40,140

Yes, yes.

602

00:31:40,140 --> 00:31:41,140

Look, it's in the clouds, whatever it is.

603

00:31:41,140 --> 00:31:42,140

Look how fast it's going.

604

00:31:42,140 --> 00:31:44,140

And then look, it's just streaked off right off the bat.

605

00:31:44,140 --> 00:31:45,140

It's crazy.

606

00:31:45,140 --> 00:31:46,140

Hey, guys.

607

00:31:46,140 --> 00:31:47,140

Hey.

608

00:31:47,140 --> 00:31:49,140

Did y'all find that footage?

609

00:31:49,140 --> 00:31:50,140

It takes you about.

610

00:31:50,140 --> 00:31:55,140

You know, I'm looking at the whole time interval and I'm watching that storm system move in.

611

00:31:55,140 --> 00:31:59,140

And, you know, looking for, you know, you were talking about there being some lightning strikes.

612

00:31:59,140 --> 00:32:01,140

Yeah, I was watching on my phone.

613

00:32:01,140 --> 00:32:02,140

Yeah.

614

00:32:02,140 --> 00:32:04,140

And looking due west to pretty much that view right there.

615

00:32:04,140 --> 00:32:05,140

Okay.

616

00:32:05,140 --> 00:32:10,140

The day after our Tesla coil experiment, I headed home for the weekend to think about what we

617

00:32:10,140 --> 00:32:13,140

had experienced and really just decompress a little.

618

00:32:13,140 --> 00:32:17,140

But while Eric and the team kept analyzing all the data we collected from the ranch,

619

00:32:17,140 --> 00:32:21,140

I was also remotely monitoring the security cameras mounted on my trailer that faced the

620

00:32:21,140 --> 00:32:22,140

triangle area.

621

00:32:22,140 --> 00:32:27,140

Now, if we've learned anything out here, it's that phenomena don't always happen immediately

622

00:32:27,140 --> 00:32:28,140

when we experiment.

623

00:32:28,140 --> 00:32:31,140

So do you have the sense that it would be in the field of view?

624

00:32:31,140 --> 00:32:33,140

It should be right there.

625

00:32:33,140 --> 00:32:34,140

Yeah.

626

00:32:34,140 --> 00:32:38,140

I wasn't sure if there was a correlation, but I saw that a really volatile lightning storm

627

00:32:38,140 --> 00:32:39,140

happened.

628

00:32:39,140 --> 00:32:44,140

So when I got back, I wanted to confirm with Eric what his surveillance system was.

629

00:32:44,140 --> 00:32:49,140

Just in case anything else may have been captured as well.

630

00:32:49,140 --> 00:32:52,140

Let's go forward to the point in time when you were seeing all that.

631

00:32:52,140 --> 00:32:53,140

You had 231, right?

632

00:32:53,140 --> 00:32:54,140

That lightning.

633

00:32:54,140 --> 00:32:55,140

Let me...

634

00:32:55,140 --> 00:32:59,140

So here we are at 230.

635

00:32:59,140 --> 00:33:00,140

Okay.

636

00:33:00,140 --> 00:33:03,140

By this time, there should be lightning everywhere.

637

00:33:03,140 --> 00:33:04,140

Right.

638

00:33:04,140 --> 00:33:06,140

So I'm playing through at normal speed.

639

00:33:06,140 --> 00:33:08,140

So we're not skipping any frames.

640

00:33:08,140 --> 00:33:09,140

We shouldn't be in this.

641

00:33:09,140 --> 00:33:11,140

Well, that doesn't make any sense.

642

00:33:11,140 --> 00:33:14,140

That doesn't look at all like what I was watching.

643

00:33:14,140 --> 00:33:17,140

Now, I mean, I was watching a thunderstorm.

644

00:33:17,140 --> 00:33:21,140

This cloud was constantly just one big flicker.

645

00:33:21,140 --> 00:33:22,140

Okay.

646

00:33:22,140 --> 00:33:25,140

That makes no sense.

647

00:33:25,140 --> 00:33:31,140

We look at the exact same time that I texted Eric and there's not a lightning strike or

648

00:33:31,140 --> 00:33:35,140

a flash of lightning anything in the actual data.

649

00:33:35,140 --> 00:33:36,140

And I can't understand it.

650

00:33:36,140 --> 00:33:38,140

I was watching it on my phone.

651

00:33:38,140 --> 00:33:43,140

Now, Eric's camera is up on the mesa a couple hundred yards from my trailer, but it's the

652

00:33:43,140 --> 00:33:46,140

exact same perspective.

653

00:33:46,140 --> 00:33:50,140

Can you pull up my video from my camera?

654

00:33:50,140 --> 00:33:52,140

I can, Nellie.

655

00:33:52,140 --> 00:33:54,140

I don't understand that.

656

00:33:54,140 --> 00:33:57,140

I think it might be this one.

657

00:33:57,140 --> 00:33:59,140

You can tell me if this is a match.

658

00:33:59,140 --> 00:34:00,140

That's it.

659

00:34:00,140 --> 00:34:01,140

That's the view.

660

00:34:01,140 --> 00:34:02,140

Okay.

661

00:34:02,140 --> 00:34:03,140

Okay.

662

00:34:03,140 --> 00:34:05,140

Wow, look at that.

663

00:34:05,140 --> 00:34:06,140

Yeah.

664

00:34:06,140 --> 00:34:07,140

So this is what I was seeing.

665

00:34:07,140 --> 00:34:09,140

I see dust devils all through here.

666

00:34:09,140 --> 00:34:10,140

It was crazy.

667

00:34:10,140 --> 00:34:11,140

That's really violent.

668

00:34:11,140 --> 00:34:12,140

Yeah, look at that.

669

00:34:12,140 --> 00:34:13,140

Okay.

670

00:34:13,140 --> 00:34:16,140

I'm going to sneak up on that two-thirty time frame.

671

00:34:16,140 --> 00:34:18,140

There we go.

672

00:34:18,140 --> 00:34:19,140

Okay.

673

00:34:19,140 --> 00:34:22,140

Do you see anything that resembles what you saw?

674

00:34:22,140 --> 00:34:25,140

Nothing because this guy was flickering like crazy.

675

00:34:25,140 --> 00:34:27,140

Well, I don't see any lightning.

676

00:34:27,140 --> 00:34:28,140

Hey, wait, wait, wait, wait.

677

00:34:28,140 --> 00:34:29,140

What is that?

678

00:34:29,140 --> 00:34:30,140

Right there.

679

00:34:30,140 --> 00:34:31,140

Yes, you see in that?

680

00:34:31,140 --> 00:34:32,140

Yes.

681

00:34:32,140 --> 00:34:33,140

Yeah.

682

00:34:33,140 --> 00:34:34,140

Back up.

683

00:34:34,140 --> 00:34:35,140

Back up a couple of frames.

684

00:34:35,140 --> 00:34:36,140

All right.

685

00:34:36,140 --> 00:34:37,140

You got to see, look, right here.

686

00:34:37,140 --> 00:34:38,140

You see this?

687

00:34:38,140 --> 00:34:39,140

What is that?

688

00:34:39,140 --> 00:34:42,140

I don't know yet.

689

00:34:42,140 --> 00:34:45,140

It appears there.

690

00:34:45,140 --> 00:34:47,140

And then right there, right above the mesa.

691

00:34:47,140 --> 00:34:48,140

Right above the mesa.

692

00:34:48,140 --> 00:34:49,140

All right.

693

00:34:49,140 --> 00:34:51,140

So back it up before it and play through it.

694

00:34:51,140 --> 00:34:52,140

All right.

695

00:34:52,140 --> 00:34:57,140

Okay, so we're at 13-42-40.

696

00:34:57,140 --> 00:34:58,140

There it is.

697

00:34:58,140 --> 00:35:01,140

It comes in, it's there, and then it's gone.

698

00:35:01,140 --> 00:35:05,140

You got to see that?

699

00:35:05,140 --> 00:35:11,140

You don't generally see bugs flying around when it's blowing hard.

700

00:35:11,140 --> 00:35:16,140

So let's look at another camera angle and see if we can see if that was a bug or not.

701

00:35:16,140 --> 00:35:17,140

Sure.

702

00:35:17,140 --> 00:35:18,140

Okay.

703

00:35:18,140 --> 00:35:21,140

I'm at about the same time code here.

704

00:35:21,140 --> 00:35:25,140

Oh, look, look, right here, right here, look.

705

00:35:25,140 --> 00:35:26,140

See this?

706

00:35:26,140 --> 00:35:30,140

Look, it's in the clouds, whatever it is.

707

00:35:30,140 --> 00:35:31,140

Okay.

708

00:35:31,140 --> 00:35:36,140

All right, then it's just diving.

709

00:35:36,140 --> 00:35:39,140

Look how it's just diving straight down in it.

710

00:35:39,140 --> 00:35:40,140

And it's like hovering.

711

00:35:40,140 --> 00:35:41,140

That's weird.

712

00:35:41,140 --> 00:35:45,140

Yeah, you know what's interesting, though, is right there where it's hovering is about

713

00:35:45,140 --> 00:35:48,140

the perspective where it looked like it disappeared above the mesa.

714

00:35:48,140 --> 00:35:50,140

Where we saw it on the other camera, right?

715

00:35:50,140 --> 00:35:52,140

Look, it's got a wake behind it.

716

00:35:52,140 --> 00:35:53,140

It's going really fast.

717

00:35:53,140 --> 00:35:55,140

Look, it just straight off.

718

00:35:55,140 --> 00:35:58,140

What the hell is that?

719

00:35:58,140 --> 00:35:59,140

That is crazy.

720

00:35:59,140 --> 00:36:01,140

I got to see this again.

721

00:36:01,140 --> 00:36:03,140

Yeah, go all the way back.

722

00:36:03,140 --> 00:36:06,140

This is odd.

723

00:36:06,140 --> 00:36:08,140

All right, now look how fast it comes down.

724

00:36:08,140 --> 00:36:09,140

Now watch right here.

725

00:36:09,140 --> 00:36:11,140

It's like it goes behind and through this cloud.

726

00:36:11,140 --> 00:36:12,140

You see that?

727

00:36:12,140 --> 00:36:13,140

Yep.

728

00:36:13,140 --> 00:36:14,140

You can see a trail behind it.

729

00:36:14,140 --> 00:36:15,140

Look, it's leaving a trail.

730

00:36:15,140 --> 00:36:16,140

A trail, right?

731

00:36:16,140 --> 00:36:18,140

I can't understand that.

732

00:36:18,140 --> 00:36:21,140

Look how fast it's going.

733

00:36:21,140 --> 00:36:22,140

That's amazing.

734

00:36:22,140 --> 00:36:27,140

And then it goes straight down and then it stops right there.

735

00:36:27,140 --> 00:36:28,140

Look at that.

736

00:36:28,140 --> 00:36:31,140

And that's about how long it was stopped in that position,

737

00:36:31,140 --> 00:36:33,140

in the other camera.

738

00:36:33,140 --> 00:36:35,140

And then it just, boom, look at that.

739

00:36:35,140 --> 00:36:36,140

Wow.

740

00:36:36,140 --> 00:36:37,140

Gone.

741

00:36:37,140 --> 00:36:38,140

That's something.

742

00:36:38,140 --> 00:36:41,140

It really does look like it's moving fast as it exits.

743

00:36:41,140 --> 00:36:42,140

Yes.

744

00:36:42,140 --> 00:36:46,140

I've never seen a quadcopter, a hexcopter, anything like that do that.

745

00:36:46,140 --> 00:36:50,140

I've never seen fixed wing drones do something like that.

746

00:36:50,140 --> 00:36:52,140

And airplanes don't do that.

747

00:36:52,140 --> 00:36:59,140

Coincidence to this is really odd because you were alerted to what you thought was lightning

748

00:36:59,140 --> 00:37:00,140

going on.

749

00:37:00,140 --> 00:37:01,140

Right.

750

00:37:01,140 --> 00:37:05,140

And we wouldn't have even been looking at this footage had you not made a big deal out

751

00:37:05,140 --> 00:37:06,140

of lightning.

752

00:37:06,140 --> 00:37:08,140

The lightning disappears, but then all of a sudden we see this thing.

753

00:37:08,140 --> 00:37:10,140

That's a weird, totally strange coincidence.

754

00:37:10,140 --> 00:37:12,140

That just seems like a huge coincidence.

755

00:37:12,140 --> 00:37:13,140

Oh yeah.

756

00:37:13,140 --> 00:37:14,140

Yeah.

757

00:37:14,140 --> 00:37:19,260

The fact that we picked this thing up on multiple cameras from multiple systems looking from

758

00:37:19,260 --> 00:37:24,260

different angles and saw this thing, you know, it takes away a lot of the mundane explanation,

759

00:37:24,260 --> 00:37:28,260

that it was a bug on the lens or that it was a bird or something like that.

760

00:37:28,260 --> 00:37:31,260

I don't know what this was, but it's nothing I have an explanation for.

761

00:37:31,260 --> 00:37:35,260

That's clearly, I mean, call it a UFO if you want to, because I don't know what it is.

762

00:37:35,260 --> 00:37:37,260

It's flying and it's unidentified.

763

00:37:37,260 --> 00:37:38,260

Right.

764

00:37:38,260 --> 00:37:42,260

Maybe from the two cameras we can figure out how far away it is and how fast it's moving.

765

00:37:42,260 --> 00:37:43,260

That'll tell us something too.

766

00:37:43,260 --> 00:37:44,260

So I'll go play around with that too.

767

00:37:44,260 --> 00:37:45,260

Yeah, I like that.

768

00:37:45,260 --> 00:37:52,260

What I find interesting about this event is that it correlates with the experiment with the Tesla coil out at the triangle area.

769

00:37:52,260 --> 00:37:59,260

So there's room to speculate that there might be some relationship between this black object that shows up in our footage

770

00:37:59,260 --> 00:38:02,260

and whatever was taking place at night.

771

00:38:02,260 --> 00:38:08,260

So how do you feel about taking this file to share with Brandon and kind of get his eyes on this?

772

00:38:08,260 --> 00:38:09,260

Yeah, absolutely.

773

00:38:09,260 --> 00:38:10,260

Do it.

774

00:38:10,260 --> 00:38:11,260

Let's know when you get this thing done.

775

00:38:11,260 --> 00:38:12,260

All right.

776

00:38:12,260 --> 00:38:13,260

Thanks guys.

777

00:38:13,260 --> 00:38:14,260

Great.

778

00:38:14,260 --> 00:38:15,260

That's good stuff.

779

00:38:27,260 --> 00:38:28,260

Hey, Brandon.

780

00:38:28,260 --> 00:38:29,260

How's it going, Brandon?

781

00:38:29,260 --> 00:38:30,260

Hey, greetings gentlemen.

782

00:38:30,260 --> 00:38:31,260

How are you?

783

00:38:31,260 --> 00:38:38,260

So have you received and reviewed the footage of the dark object in the sky over the mesa during the recent storm?

784

00:38:38,260 --> 00:38:39,260

Yeah.

785

00:38:39,260 --> 00:38:44,260

I just reviewed it and I'm anxious to get your perspective on it.

786

00:38:44,260 --> 00:38:47,260

It's very intriguing.

787

00:38:47,260 --> 00:38:55,260

It's definitely maneuvering in a way that you typically don't see with any craft, drone or anything that I would call conventional.

788

00:38:55,260 --> 00:38:56,260

Right.

789

00:38:56,260 --> 00:39:03,260

When it does that one little, looks like an aerodynamic maneuver, but then it stops and hovers and then just darts off behind the mesa to the north.

790

00:39:03,260 --> 00:39:07,260

It's probably going a thousand mile an hour at that point.

791

00:39:07,260 --> 00:39:08,260

Yeah.

792

00:39:08,260 --> 00:39:15,260

The speed and the trajectory and just the erratic behavior of the object just kind of blew me away.

793

00:39:15,260 --> 00:39:16,260

Yeah, I agree.

794

00:39:16,260 --> 00:39:24,260

The only other thing I would say about it that's interesting to me also is that the object was over the triangle area.

795

00:39:24,260 --> 00:39:25,260

Wow.

796

00:39:25,260 --> 00:39:31,260

Perhaps this object had some kind of causal relationship with the exercise involving the Tesla coil.

797

00:39:31,260 --> 00:39:32,260

What do you say?

798

00:39:32,260 --> 00:39:33,260

Yeah.

799

00:39:33,260 --> 00:39:35,260

Well, there appears to be a connection.

800

00:39:35,260 --> 00:39:36,260

Right.

801

00:39:37,260 --> 00:39:45,260

To see in broad daylight once again, a strange object that is not only moving at speeds, but also trajectories, the DeVile description,

802

00:39:45,260 --> 00:40:01,260

following that Tesla experiment, it just leaves you not only baffled, but also I think further emboldened to understand what is really going on above and below Skinwalker Ranch.

803

00:40:01,260 --> 00:40:14,260

Of course, the question I have is anything showing up on the avionics transponder or any of the other tracking services that are monitoring all the commercial and private air traffic in the area?

804

00:40:14,260 --> 00:40:17,260

Well, that's really the right question and the answer is no.

805

00:40:17,260 --> 00:40:24,260

There are no self identifying aircraft or at least no transponding aircraft in the space at the time of that event.

806

00:40:24,260 --> 00:40:25,260

That is bizarre.

807

00:40:25,260 --> 00:40:34,260

Well, given the compelling evidence that you guys have collected, I think we more than ever have an imperative to get to the bottom of it.

808

00:40:34,260 --> 00:40:35,260

Agreed.

809

00:40:35,260 --> 00:40:41,260

This happened above the triangle and by the way, we've taken weather balloons up there.

810

00:40:41,260 --> 00:40:43,260

We lost the balloon right there.

811

00:40:43,260 --> 00:40:50,260

I think we just need to come up with a plan to get up there, look at it closer and let you know what we come up with.

812

00:40:50,260 --> 00:40:51,260

I agree.

813

00:40:51,260 --> 00:40:52,260

I agree.

814

00:40:52,260 --> 00:40:56,260

If there's something, we got to figure out a way to understand what these things are.

815

00:40:56,260 --> 00:40:58,260

Yeah, I think you're absolutely right.

816

00:40:58,260 --> 00:41:09,260

The fact that these events continue to occur repeatedly over the airspace of this 512 acre ranch, I think is beyond coincidence.

817

00:41:09,260 --> 00:41:10,260

Right.

818

00:41:10,260 --> 00:41:21,260

I think one thing that we've been able to verify over the course of the last few years and especially with this team is that whatever we're observing, it is unique to this area and unique to Skinwalker Ranch.

819

00:41:21,260 --> 00:41:30,260

I think getting to the bottom of why and the origin and the agenda associated with this phenomena is going to be job number one moving forward.

820

00:41:30,260 --> 00:41:31,260

Agreed.

821

00:41:31,260 --> 00:41:32,260

Agreed.

822

00:41:32,260 --> 00:41:33,260

Thanks for joining us, Brandon.

823

00:41:33,260 --> 00:41:34,260

Thanks for your time.

824

00:41:34,260 --> 00:41:35,260

Thank you so much.

825

00:41:35,260 --> 00:41:36,260

We'll stay in touch.

826

00:41:39,260 --> 00:41:49,260

As our investigation moves forward, the one thing in my mind that still is not resolved is there does seem to be some type of intelligence aspect to this.

827

00:41:49,260 --> 00:41:56,260

So many times the phenomena that takes place is so perfectly correlated with the activities that are going on.

828

00:41:56,260 --> 00:42:02,260

It makes me wonder what might we possibly see up above the ranch.

829

00:42:02,260 --> 00:42:11,260

The scientific method says if there's something unknown or you don't understand it, you design

experiments to study it and you report the results.

830

00:42:11,260 --> 00:42:14,260

We don't know what's happening here.

831

00:42:14,260 --> 00:42:19,260

Maybe we can figure out what it is, why it's here and where it came from.

832

00:42:19,260 --> 00:42:23,260

Be able to communicate with it if it wants to be communicated with.

833

00:42:23,260 --> 00:42:37,260

We truly have a unique opportunity to be able to prove the reality of strange phenomena and to be able to prove the reality that we're not alone in the universe.

834

00:42:37,260 --> 00:42:55,260

We've got a bunch of rockets launched right above the Triangle area where last year we saw UFO appear in the sky.

835

00:42:55,260 --> 00:42:56,260

There it goes.

836

00:42:56,260 --> 00:42:57,260

We have it on.

837

00:42:57,260 --> 00:42:59,260

Oh man, look at that.

838

00:42:59,260 --> 00:43:00,260

What is that?

839

00:43:00,260 --> 00:43:01,260

What's going on?

840

00:43:01,260 --> 00:43:02,260

Something beeping over there.

841

00:43:02,260 --> 00:43:03,260

Oh, buckets.

842

00:43:03,260 --> 00:43:04,260

Hey, you just feel that.

843

00:43:04,260 --> 00:43:05,260

We got something.

844

00:43:05,260 --> 00:43:08,260

We just saw the same UFO that we saw last year.

845

00:43:08,260 --> 00:43:09,260

There, look at that.

846

00:43:09,260 --> 00:43:10,260

Oh wow.

847

00:43:10,260 --> 00:43:13,260

What the hell would be dropping down toward the rocket?

848

00:43:13,260 --> 00:43:14,260

That is crazy.
