

1

00:00:00,000 --> 00:00:05,000

I'm Dr. Travis Taylor.

2

00:00:05,000 --> 00:00:10,000

As an astrophysicist, aerospace engineer, and an optical scientist with over 30 years

3

00:00:10,000 --> 00:00:16,000

of experience working with NASA and the Department of Defense, I've always been intensely curious

4

00:00:16,000 --> 00:00:18,000

about the unknowns in the universe.

5

00:00:18,000 --> 00:00:25,000

So in 2021, when our own government acknowledged that unidentified aerial phenomena, or UAPs,

6

00:00:25,000 --> 00:00:32,000

are real, it was no surprise to see how the media, the public, and Congress wanted answers.

7

00:00:32,000 --> 00:00:39,000

Right now, I'm headed back to a place called Skinwalker Ranch to rejoin the team as we begin

8

00:00:39,000 --> 00:00:43,000

our third year investigating a number of unexplained phenomena.

9

00:00:43,000 --> 00:00:45,000

Look at this going nuts.

10

00:00:45,000 --> 00:00:48,000

We've experienced everything from dangerous spikes in radiation.

11

00:00:48,000 --> 00:00:49,000

It just jumped to 18.

12

00:00:49,000 --> 00:00:50,000

We need to get out of here, guys.

13

00:00:50,000 --> 00:00:51,000

Let's get out of here.

14

00:00:51,000 --> 00:00:54,000

Evidence of unidentified phenomena are real.

15

00:00:54,000 --> 00:00:57,000

Evidence of mysterious underground structures.

16

00:00:57,000 --> 00:01:03,000

This thing is a thousand feet long to inexplicable equipment failures.

17

00:01:03,000 --> 00:01:05,000

Something's turning this off.

18

00:01:05,000 --> 00:01:09,000

North is that way, and it's pointing south.

19

00:01:09,000 --> 00:01:10,000

This is crazy.

20

00:01:10,000 --> 00:01:14,000

But the most extraordinary thing we've witnessed so far are numerous UAPs.

21

00:01:14,000 --> 00:01:15,000

Look, look, look.

22

00:01:15,000 --> 00:01:16,000

What is that?

23

00:01:16,000 --> 00:01:17,000

Hey, wait, wait, wait, wait.

24

00:01:17,000 --> 00:01:20,000

There's something here.

25

00:01:20,000 --> 00:01:23,000

Just like the public, our team wants answers too.

26

00:01:23,000 --> 00:01:29,000

And this 512 acre property just might happen.

27

00:01:29,000 --> 00:01:33,000

There is a ranch in northern Utah.

28

00:01:33,000 --> 00:01:40,000

It is considered the epicenter of the strangest and most disturbing phenomena on Earth.

29

00:01:40,000 --> 00:01:49,000

Animal mutilations, bizarre UFO sightings, and unusual energies that have proven harmful to humans.

30

00:01:49,000 --> 00:01:56,000

For 20 years, the federal government tried to find answers and failed.

31

00:01:56,000 --> 00:02:03,000

Now, a new team of dedicated scientists, researchers, and experts has taken over.

32

00:02:03,000 --> 00:02:16,000

They are determined to solve the mystery and reveal the secret of Skinwalker Ranch.

33

00:02:19,000 --> 00:02:28,000

Skinwalker Command Center, Dragon, this is Cameron Ward, entering the airspace of the Skinwalker Ranch at this time.

34

00:02:28,000 --> 00:02:32,000

I'm Brandon Fugel, the owner of Skinwalker Ranch.

35

00:02:32,000 --> 00:02:37,000

One of the reasons why I acquired the ranch in the first place was due to the mystery.

36

00:02:37,000 --> 00:02:41,000

With Skinwalker Ranch, truth is stranger than fiction.

37

00:02:41,000 --> 00:02:48,000

And the reality of the phenomenon at Skinwalker Ranch has become even more compelling.

38

00:02:49,000 --> 00:02:58,000

Governor Herbert, it is a privilege to be entering Skinwalker Ranch with you today, to meet with the team and to be fully briefed.

39

00:02:58,000 --> 00:03:02,000

Well, Brandon, thank you very much. We're honored to be here with you.

40

00:03:03,000 --> 00:03:09,000

As our investigation has progressed, I felt it important to bring in a higher level of oversight.

41

00:03:09,000 --> 00:03:18,000

Governor Herbert has very real interest in what is happening at Skinwalker Ranch and is committed to assist us.

42

00:03:19,000 --> 00:03:28,000

You can see ahead of us what many refer to as Skinwalker Ridge, which is a main point of interest that runs the entire expanse of the property.

43

00:03:28,000 --> 00:03:39,000

We're also flying over the infamous Triangle area that seems to also be a center of gravity for strange activity and events.

44

00:03:42,000 --> 00:03:47,000

Welcome to Skinwalker Ranch. I think the greatest scientific investigation of our time.

45

00:03:48,000 --> 00:04:02,000

Our team has reassembled to resume our investigation for the summer and our plans are as ambitious as any we have ever formed together as a group.

46

00:04:02,000 --> 00:04:04,000

I really am excited about this work.

47

00:04:06,000 --> 00:04:07,000

That looks like they're here.

48

00:04:08,000 --> 00:04:10,000

I can't wait to get this investigation underway.

49

00:04:11,000 --> 00:04:17,000

Not only is there so much unfinished business from last year, but the world has literally changed overnight.

50

00:04:17,000 --> 00:04:23,000

And now we have even more to uncover with the connection between the ranch and UAPs from around the world.

51

00:04:24,000 --> 00:04:27,000

And with government officials involved, it's going to be an exciting summer.

52

00:04:28,000 --> 00:04:29,000

Here we go.

53

00:04:29,000 --> 00:04:34,000

This year, we're going to push experiments beyond anything that's ever happened here on Skinwalker Ranch.

54

00:04:35,000 --> 00:04:38,000

Dragon, how's it going? How are you?

55

00:04:38,000 --> 00:04:47,000

I will tell you that each one of us is more determined than ever to understand what's truly happening on this crazy ranch.

56

00:04:48,000 --> 00:04:52,000

Team, it's good to see everyone assembled and good to welcome Dr. Taylor Back.

57

00:04:52,000 --> 00:04:53,000

Thanks, Brandon.

58

00:04:53,000 --> 00:05:00,000

I'd like to introduce everyone to former Governor Gary Herbert and also his former Chief of Staff, Derek Miller.

59

00:05:00,000 --> 00:05:04,000

Thank you, Brandon, for the invitation to come out and spend a day with you.

60

00:05:04,000 --> 00:05:07,000

What's happening here at Skinwalker Ranch is important.

61

00:05:07,000 --> 00:05:13,000

Government has a role to play in this issue if for no other reason than for national defense.

62

00:05:13,000 --> 00:05:18,000

I think a lot of people are fascinated by what you all are doing here.

63

00:05:18,000 --> 00:05:22,000

The fact that you've had so many different unexplained phenomena.

64

00:05:22,000 --> 00:05:26,000

What I like about what you're doing here is it's based on science.

65

00:05:27,000 --> 00:05:33,000

Things that we can do with the scientific method and do the research and try to understand what is taking place.

66

00:05:34,000 --> 00:05:38,000

I know I'm really anxious to hear what you have to say and see what I can learn here today.

67

00:05:39,000 --> 00:05:44,000

Which begs the question, what is the main objective as we move forward?

68

00:05:44,000 --> 00:05:47,000

There are a number of things that we want to follow up on.

69

00:05:47,000 --> 00:05:55,000

We've done various events down at Homestead 2 and have had phenomena occur that we've captured on various instruments.

70

00:05:56,000 --> 00:06:03,000

Over the course of the last two years, Homestead 2 has been a bona fide hotspot of unexplained

phenomena.

71

00:06:03,000 --> 00:06:07,000

It is freezing cold right here in front of the Homestead.

72

00:06:07,000 --> 00:06:13,000

We've seen crazy energy readings, radiation spikes, we were just exposed to ionizing radiation,

73

00:06:13,000 --> 00:06:20,000

and thermal imaging anomalies that might even be explained scientifically as wormholes like Albert Einstein described.

74

00:06:21,000 --> 00:06:25,000

It remains a location that we need to put more focus on.

75

00:06:26,000 --> 00:06:38,000

I would propose that we work to engage the phenomenon, that we work to interact with whatever intelligence is here on or above the property.

76

00:06:39,000 --> 00:06:48,000

We've talked about some things over in the past about how we might, if there is something that will

respond to stimulus to first get it to respond, we've kind of done that.

77

00:06:48,000 --> 00:06:51,000

Now the next thing is trying to understand what the response is.

78

00:06:51,000 --> 00:06:55,000

You know, there's a lot that I'm learning, there's a lot that we don't know.

79

00:06:55,000 --> 00:07:00,000

There's certainly a lot of phenomena here that is occurring that we don't have explanation for.

80

00:07:00,000 --> 00:07:06,000

Governor, I doubt whatever this phenomenon is is stopped by the barbed wire fence along the property.

81

00:07:06,000 --> 00:07:19,000

Well, a key aspect of our investigation has been community engagement, working with the surrounding residents in order to determine whether these events are confined to the property

82

00:07:19,000 --> 00:07:24,000

or whether it involves other points of interest within the basin.

83

00:07:24,000 --> 00:07:37,000

Jim, Tom Lewis, Candace, you're in a unique position to work with the community to help document what is happening not only on the property, but also in the expanded area.

84

00:07:37,000 --> 00:07:38,000

Yeah, absolutely.

85

00:07:38,000 --> 00:07:39,000

Yeah, nothing I'd rather be doing.

86

00:07:39,000 --> 00:07:51,000

Hopefully you can open some doors for us, Governor, even going back to Washington, D.C. that may be able to bring resource and insight that will help us advance the investigation.

87

00:07:51,000 --> 00:07:57,000

I do know people, and so keeping me informed will help us maybe expand the circle here of people who can get engaged.

88

00:07:57,000 --> 00:08:06,000

Governor, we have a spot that's above the ranch in what we call the Triangle that we think is right at about a mile high from the surface.

89

00:08:06,000 --> 00:08:15,000

And we think that we're getting anomalous energy readings coming from that spot in the sky above the ranch, and we measure with all these different scientific instruments.

90

00:08:18,000 --> 00:08:23,000

The Triangle has been a mystery to us since the very early days of our investigation here at Skinwalker Ranch.

91

00:08:26,000 --> 00:08:30,000

We've stimulated UAP activity when we fire rockets up through it.

92

00:08:30,000 --> 00:08:31,000

What's this?

93

00:08:31,000 --> 00:08:32,000

What's this?

94

00:08:32,000 --> 00:08:34,000

We got something. We got something. We got something right here.

95

00:08:34,000 --> 00:08:37,000

We drilled down below and found a strange substance.

96

00:08:37,000 --> 00:08:45,000

Take any modern-day fighter plane or spacecraft and you crush it up, and then you take a sample of it. You're probably going to get these materials.

97

00:08:45,000 --> 00:08:55,000

We triangulated a phantom signal from directly one mile up, and last year when we tried to get a closer look, something was tracking us under Brandon's helicopter.

98

00:08:55,000 --> 00:09:01,000

So I'm showing radar altimeter, showing we're only 40 feet above the ground right now.

99

00:09:02,000 --> 00:09:03,000

That's not good.

100

00:09:04,000 --> 00:09:05,000

So something could be under us?

101

00:09:06,000 --> 00:09:07,000

40-something feet under us?

102

00:09:07,000 --> 00:09:10,000

It showed something under us 40 feet below us.

103

00:09:11,000 --> 00:09:12,000

Holy crap.

104

00:09:14,000 --> 00:09:20,000

So it lends you down various paths of imagination as to what that could be.

105

00:09:20,000 --> 00:09:23,000

Was it some advanced stealth vehicle?

106

00:09:23,000 --> 00:09:24,000

I'm sorry to interrupt.

107

00:09:27,000 --> 00:09:30,000

I'm getting some unusual air traffic. I want to go check that out inside.

108

00:09:30,000 --> 00:09:31,000

I'll be right back.

109

00:09:31,000 --> 00:09:32,000

What?

110

00:09:36,000 --> 00:09:40,000

Eric's got a built-in system where he can track all of the air traffic above the ranch.

111

00:09:40,000 --> 00:09:44,000

So when he jumped up and ran inside, we're all wondering like, what's going on?

112

00:09:47,000 --> 00:09:48,000

Travis, you got to see this.

113

00:09:56,000 --> 00:09:57,000

What's going on, Eric?

114

00:09:57,000 --> 00:09:58,000

So check this out.

115

00:10:00,000 --> 00:10:01,000

That's crazy.

116

00:10:03,000 --> 00:10:08,000

Looks to me like we've got a Gulfstream G5.

117

00:10:08,000 --> 00:10:09,000

Look at that.

118

00:10:10,000 --> 00:10:12,000

So this is a National Science Foundation.

119

00:10:12,000 --> 00:10:16,000

National Science Foundation, United States Gulfstream Aerospace G5.

120

00:10:16,000 --> 00:10:22,000

He's doing some sort of a grid survey pattern right over us and we're right here.

121

00:10:22,000 --> 00:10:29,000

Right in the middle of our team meeting with former Governor Gary Herbert, Eric suddenly detected a government aircraft flying a plane.

122

00:10:30,000 --> 00:10:35,000

It's a very distinct pattern, about 45,000 feet above Skinwalker Ranch.

123

00:10:36,000 --> 00:10:38,000

This pattern is shifting to the Northwest.

124

00:10:38,000 --> 00:10:41,000

Without instrumentation, without an autopilot coupled, you cannot do it.

125

00:10:41,000 --> 00:10:46,000

And then furthermore, to do it at 45,000 feet, it will mess with air traffic control.

126

00:10:46,000 --> 00:10:48,000

They have to get specific permission to do this grid.

127

00:10:48,000 --> 00:10:50,000

They're in controlled airspace.

128

00:10:50,000 --> 00:10:57,000

So what type of survey could they be doing at that sort of elevation in that sort of a pattern?

129

00:10:57,000 --> 00:10:58,000

Would it be LiDAR?

130

00:10:58,000 --> 00:10:59,000

Would it be...

131

00:10:59,000 --> 00:11:01,000

This looks to me like a certain...

132

00:11:01,000 --> 00:11:09,000

A pattern you would do if you were doing very detailed 3D mapping and LiDAR imagery, like reconnaissance.

133

00:11:11,000 --> 00:11:16,000

The National Science Foundation is an independent federal organization created by Congress.

134

00:11:16,000 --> 00:11:21,000

But why would the federal government be flying a reconnaissance mission above Skinwalker Ranch?

135

00:11:22,000 --> 00:11:23,000

What are they trying to collect?

136

00:11:23,000 --> 00:11:25,000

That's not a sightseeing tour in a grid pattern like that.

137

00:11:25,000 --> 00:11:27,000

And why were they doing it right here?

138

00:11:27,000 --> 00:11:28,000

Well, right above the ranch.

139

00:11:29,000 --> 00:11:31,000

It's not a coincidence.

140

00:11:31,000 --> 00:11:35,000

I mean, this has been pre-planned and predetermined to do this for whatever purpose.

141

00:11:35,000 --> 00:11:41,000

It may be that there is some interest on the federal level, which we knew happened way before you got the ranch.

142

00:11:41,000 --> 00:11:43,000

It's someone listening to what we're doing.

143

00:11:43,000 --> 00:11:46,000

And if so, for what purpose?

144

00:11:46,000 --> 00:11:48,000

That's the weird part, yeah.

145

00:11:49,000 --> 00:11:55,000

Between 2008 and 2013, when Robert Bigelow was the owner of Skinwalker Ranch,

146

00:11:55,000 --> 00:12:03,000

there was a black-budget Pentagon-funded program that studied many of the claims associated with the ranch.

147

00:12:03,000 --> 00:12:08,000

I have a hard time believing that following the government investigation, that they just simply lost interest.

148

00:12:08,000 --> 00:12:12,000

Well, I gotta tell you that it gives us some things to think about.

149

00:12:12,000 --> 00:12:14,000

Yeah, nice. Let's get back to it.

150

00:12:15,000 --> 00:12:23,000

I don't believe it was a coincidence that in the midst of briefing Governor Herbert on the next phase of our investigation,

151

00:12:23,000 --> 00:12:31,000

Eric Bard discovered a strange craft above the property conducting surveillance.

152

00:12:31,000 --> 00:12:42,000

I believe this is potential evidence that we're not only being monitored, but there are other active programs that may involve what we're doing here right now.

153

00:12:42,000 --> 00:12:45,000

Which begs the question, what are our next steps?

154

00:12:45,000 --> 00:12:53,000

Well, the consensus among us is that we want to be able to use the helicopter to return to that 5,000-foot point over the Mesa,

155

00:12:53,000 --> 00:12:55,000

you know, over what we call the Triangle.

156

00:12:55,000 --> 00:12:56,000

Okay.

157

00:12:56,000 --> 00:13:00,000

And we want to find the right way to engage that spot, take additional measurements.

158

00:13:00,000 --> 00:13:01,000

Sure.

159

00:13:02,000 --> 00:13:06,000

And I think we need to drop packages with payloads on them from the helicopter.

160

00:13:06,000 --> 00:13:10,000

What would you like to drop? What do you have in mind to drop through that area?

161

00:13:10,000 --> 00:13:17,000

You know, I have an idea of involving GPS, you know, coming through perhaps on descent down through that area.

162

00:13:17,000 --> 00:13:23,000

Any kind of measurement payload that we can either take with us up there, fly through the area, up the area, drop through it,

163

00:13:23,000 --> 00:13:27,000

I think that's worth our time. I think it warrants effort on our part.

164

00:13:27,000 --> 00:13:28,000

Yeah.

165

00:13:28,000 --> 00:13:29,000

That's exciting.

166

00:13:30,000 --> 00:13:40,000

We're going up to 6,000 feet, so we can drop GPS trackers down through that 5,000-foot region where we've detected all this anomalous energy and seen the UAPs.

167

00:13:40,000 --> 00:13:48,000

Now, if there's anything unusual in the data, that could be just what we need to pinpoint the exact spot where these anomalies are occurring.

168

00:13:48,000 --> 00:13:56,000

Cameron, are you willing to re-engage with the helicopter to conduct further experiments above that area?

169

00:13:56,000 --> 00:14:02,000

Of course, if we can do it safely, I'm okay with that. At any point, any of us feel uneasy, we need to call it off.

170

00:14:02,000 --> 00:14:04,000

We need to terminate that experiment.

171

00:14:04,000 --> 00:14:14,000

I think we should proceed with urgency, and I'd like to immediately schedule really engaging with the helicopter and conducting this experiment.

172

00:14:14,000 --> 00:14:17,000

That's, I think, the logical next step.

173

00:14:17,000 --> 00:14:20,000

Okay, yeah. We can plan that.

174

00:14:20,000 --> 00:14:27,000

We're proud of this effort. This is truly a multidisciplinary effort, so thank you for your commitment.

175

00:14:27,000 --> 00:14:28,000

Onward.

176

00:14:30,000 --> 00:14:32,000

Eric, guess what we got? Stuff to do.

177

00:14:32,000 --> 00:14:33,000

We do.

178

00:14:45,000 --> 00:14:46,000

All right.

179

00:14:46,000 --> 00:14:51,000

We've got a lot of work to do to get set up for this experiment over the triangle.

180

00:14:51,000 --> 00:15:00,000

With our first experiment taking place in the sky above the ranch, we called in the guys from Live View Technologies to set us up with some high-tech camera systems around the property.

181

00:15:00,000 --> 00:15:10,000

They'll give us the ability to film in high definition, 360 degrees, all around the ranch 24-7, and they also have thermal and night vision technologies for total coverage.

182

00:15:10,000 --> 00:15:12,000

You want to hand me the center camera?

183

00:15:12,000 --> 00:15:21,000

When the experiment is over, we'll be able to keep the cameras up and running indefinitely, so they'll be able to cover the ranch and the sky during all of our future experiments.

184

00:15:21,000 --> 00:15:26,000

We got several more to go, so I suggest we head down and go put those other ones up.

185

00:15:26,000 --> 00:15:27,000

Yeah, sounds good.

186

00:15:29,000 --> 00:15:33,000

So these are the actual ones. I'll leave it to you and Eric to figure out the foam and the packing.

187

00:15:33,000 --> 00:15:39,000

I think we can just put them back together just like that and wrap it with some packing tape.

188

00:15:39,000 --> 00:15:40,000

Do you think that works?

189

00:15:40,000 --> 00:15:41,000

I think that's great.

190

00:15:41,000 --> 00:15:48,000

While Eric and the LVT team are installing our new camera system across the ranch, Dragon and I are preparing for the GPS experiment.

191

00:15:48,000 --> 00:15:50,000

Alright, so this will go here.

192

00:15:50,000 --> 00:15:55,000

We've painted the tubes different colors so that we can be sure to see them on the descent.

193

00:15:55,000 --> 00:16:01,000

Depending on the clouds and the sun, we won't know which color is most visible until we start to drop them.

194

00:16:01,000 --> 00:16:07,000

Now I'm really excited because I know there's something up there, and I've been dying to get a closer look.

195

00:16:07,000 --> 00:16:13,000

So hopefully with this experiment, we'll solve the mystery of the anomaly above the triangle.

196

00:16:13,000 --> 00:16:14,000

Alright man, okay thanks Trump.

197

00:16:14,000 --> 00:16:15,000

Yeah, thank you.

198

00:16:19,000 --> 00:16:22,000

This is a perfect location for this thing.

199

00:16:22,000 --> 00:16:30,000

You know, if there's any spot I'm interested in locating one of these units, it's on top of this mesa on this ridge line, and this would be the spot.

200

00:16:30,000 --> 00:16:31,000

Yeah, okay.

201

00:16:31,000 --> 00:16:38,000

We now have thermal, night vision and daylight cameras positioned along the north, south, east and west perimeters of the ranch.

202

00:16:38,000 --> 00:16:41,000

All our cameras will be focused on the triangle for this experiment.

203

00:16:41,000 --> 00:16:42,000

We're ready to go.

204

00:16:42,000 --> 00:16:44,000

All we need now is camera.

205

00:16:44,000 --> 00:16:45,000

Good job guys.

206

00:16:45,000 --> 00:16:47,000

Alright, this is awesome.

207

00:16:47,000 --> 00:16:51,000

To have this up here, I mean who knows what we're gonna catch.

208

00:16:51,000 --> 00:16:55,000

I'm confident that if something happens, we're going to detect it with this new system.

209

00:16:55,000 --> 00:16:57,000

This is the eye in the sky.

210

00:17:17,000 --> 00:17:19,000

Hey Eric, the camera's here.

211

00:17:19,000 --> 00:17:21,000

Great, bring mine in.

212

00:17:21,000 --> 00:17:25,000

What happened during last year's exercise was frightening, quite honestly.

213

00:17:25,000 --> 00:17:30,000

Before we ask Cameron to go up to the triangle, we want him to see the video from last year's experiment.

214

00:17:30,000 --> 00:17:32,000

He needs to know what we're seeing.

215

00:17:32,000 --> 00:17:34,000

Hey Eric, how are you?

216

00:17:34,000 --> 00:17:35,000

How are you doing man?

217

00:17:35,000 --> 00:17:36,000

Good.

218

00:17:36,000 --> 00:17:37,000

Good to see you brother.

219

00:17:37,000 --> 00:17:38,000

Good to see you.

220

00:17:38,000 --> 00:17:45,000

Before we go back into the sky for this experiment, I do want to get your eyes on some things that we caught during last year's exercise.

221

00:17:45,000 --> 00:17:46,000

I'd love to see it.

222

00:17:46,000 --> 00:17:48,000

I'm going to show you a thing.

223

00:17:48,000 --> 00:17:50,000

I just want to see if you notice anything.

224

00:17:50,000 --> 00:17:51,000

Okay.

225

00:17:58,000 --> 00:17:59,000

Is anything jumped out at you?

226

00:17:59,000 --> 00:18:00,000

No.

227

00:18:00,000 --> 00:18:01,000

Would you like to see it again?

228

00:18:01,000 --> 00:18:02,000

Yeah, I'd like to see it again.

229

00:18:02,000 --> 00:18:03,000

Alright.

230

00:18:03,000 --> 00:18:05,000

Let's go take a look at some frames.

231

00:18:05,000 --> 00:18:08,000

So watch very carefully for a change in the blue background.

232

00:18:12,000 --> 00:18:15,000

Okay, so we're going to go ahead and take a look at some frames.

233

00:18:16,000 --> 00:18:19,000

Oh, you see that?

234

00:18:19,000 --> 00:18:21,000

Yeah, look at that.

235

00:18:25,000 --> 00:18:28,000

I'd like to show you another sequence.

236

00:18:30,000 --> 00:18:35,000

So as you can imagine, I've been searching frame by frame through anything we've got.

237

00:18:37,000 --> 00:18:38,000

Wow.

238

00:18:39,000 --> 00:18:40,000

That's just crazy right there.

239

00:18:40,000 --> 00:18:41,000

Oh yeah.

240

00:18:41,000 --> 00:18:42,000

Right under the helicopter.

241

00:18:42,000 --> 00:18:43,000

That's crazy.

242

00:18:43,000 --> 00:18:44,000

You know, that's very suggestive.

243

00:18:44,000 --> 00:18:45,000

We were in there.

244

00:18:47,000 --> 00:18:50,000

Could this explain what happened last year with Cameron's altimeter?

245

00:18:50,000 --> 00:18:56,000

I don't know, but something flew under the helicopter back and forth multiple times.

246

00:18:58,000 --> 00:19:03,000

Velocity changes, it starts climbing, and it was faster than the helicopter as well.

247

00:19:04,000 --> 00:19:06,000

It got way too close to the helicopter.

248

00:19:06,000 --> 00:19:07,000

Way.

249

00:19:07,000 --> 00:19:08,000

It concerns me.

250

00:19:08,000 --> 00:19:09,000

Way too close.

251

00:19:10,000 --> 00:19:15,000

Whatever it is, if it happened to pass through our rotor system, it could be catastrophic.

252

00:19:15,000 --> 00:19:16,000

Oh yeah.

253

00:19:16,000 --> 00:19:19,000

But it seemed to stay outside of the helicopter's boundary.

254

00:19:19,000 --> 00:19:22,000

Which suggests that it didn't want to collide into us either.

255

00:19:22,000 --> 00:19:23,000

No.

256

00:19:24,000 --> 00:19:27,000

Yeah, you know, I was staring out the window looking as far down as I could.

257

00:19:27,000 --> 00:19:28,000

I never saw anything.

258

00:19:28,000 --> 00:19:29,000

I didn't say anything.

259

00:19:29,000 --> 00:19:30,000

I saw nothing.

260

00:19:31,000 --> 00:19:34,000

It was concerning that something could be right underneath the aircraft.

261

00:19:34,000 --> 00:19:38,000

As a pilot, you've got to be ready for anything, but they don't train you for...

262

00:19:38,000 --> 00:19:40,000

things that you can't see.

263

00:19:41,000 --> 00:19:44,000

So that's what I wanted to share with you, Cameron.

264

00:19:44,000 --> 00:19:50,000

And going into this, I was asking, you know, if you're comfortable conducting another experiment with us.

265

00:19:52,000 --> 00:19:55,000

Now that you've seen this, what do you think?

266

00:19:57,000 --> 00:20:00,000

You do what you think is the safest thing to do.

267

00:20:01,000 --> 00:20:07,000

Well, it's all about risk mitigation, risk versus reward.

268

00:20:07,000 --> 00:20:11,000

I think there's a lot that we need to still discover or research here.

269

00:20:11,000 --> 00:20:16,000

As long as safety is our first concern, and we always prioritize that, I'm okay with this experiment.

270

00:20:18,000 --> 00:20:19,000

Let's get up there.

271

00:20:19,000 --> 00:20:20,000

Sounds good.

272

00:20:20,000 --> 00:20:22,000

We've got to get those instruments packed and ready to go.

273

00:20:22,000 --> 00:20:23,000

Okay, let's go.

274

00:20:23,000 --> 00:20:24,000

Thanks, Eric.

275

00:20:26,000 --> 00:20:27,000

We got it.

276

00:20:31,000 --> 00:20:32,000

Alright, guys.

277

00:20:32,000 --> 00:20:34,000

I think this is it.

278

00:20:34,000 --> 00:20:40,000

We need another bite at this happen, and Cameron knows this airspace better than anyone hands down period.

279

00:20:40,000 --> 00:20:48,000

Now we just got to get up there and get to work and hope this time we get to finish our experiment before something else happens to shut us down.

280

00:20:48,000 --> 00:20:49,000

We love this.

281

00:20:49,000 --> 00:20:55,000

Last time we had the helicopter up above the triangle, it was saying that there was something underneath of it,

282

00:20:55,000 --> 00:20:59,000

sometimes as close as 38 feet when it was up at this 5,000 foot mark.

283

00:21:00,000 --> 00:21:02,000

So I'm going to be watching carefully.

284

00:21:02,000 --> 00:21:04,000

We've got a telescope set up.

285

00:21:04,000 --> 00:21:05,000

We've got cameras set up.

286

00:21:05,000 --> 00:21:07,000

I'm going to take this up the ladder.

287

00:21:07,000 --> 00:21:16,000

And our hope is that if Cameron encounters any of the same anomalies he did last time he was flying, that we'll be able to capture it and see it.

288

00:21:16,000 --> 00:21:18,000

We are all ready.

289

00:21:18,000 --> 00:21:19,000

Take off.

290

00:21:19,000 --> 00:21:20,000

Eric says the sooner the better.

291

00:21:20,000 --> 00:21:21,000

Fuel pump on.

292

00:21:21,000 --> 00:21:22,000

Check, check, check.

293

00:21:22,000 --> 00:21:23,000

Slides checked.

294

00:21:23,000 --> 00:21:24,000

All engines start.

295

00:21:26,000 --> 00:21:32,000

Bryant and Travis will be onboard the helicopter releasing the GPS trackers into the air.

296

00:21:32,000 --> 00:21:38,000

Thomas and I will be observing from down on the ground at the observation point in the east field.

297

00:21:38,000 --> 00:21:39,000

Do you want me to hand that up to you?

298

00:21:39,000 --> 00:21:40,000

Yeah, go for it.

299

00:21:40,000 --> 00:21:45,000

I will be monitoring the GPS units and the ground.

300

00:21:45,000 --> 00:21:50,000

We're going to allow the tracking devices to log their positions on an internal SD card.

301

00:21:50,000 --> 00:21:53,000

There's a light blinking pattern when things are working right.

302

00:21:53,000 --> 00:21:54,000

Okay.

303

00:21:54,000 --> 00:22:05,000

And we're also going to try to measure the signals coming from those GPS trackers in real time as they broadcast their positions and see if any interesting features show up as they fall.

304

00:22:15,000 --> 00:22:17,000

Okay, we've got the triangle location set.

305

00:22:17,000 --> 00:22:19,000

All the warning systems look good.

306

00:22:19,000 --> 00:22:20,000

We're set.

307

00:22:20,000 --> 00:22:27,000

There have been a lot of theories and ideas tossed out about what could be above the ranch.

308

00:22:27,000 --> 00:22:33,000

Could it be a portal or a wormhole or some massive energy source or even a gravitational field?

309

00:22:33,000 --> 00:22:43,000

Those sound like far off ideas to me, but we know that there's something strange going on up there and we need to get more data to determine what it is.

310

00:22:45,000 --> 00:22:47,000

We're 1600 feet above the ground.

311

00:22:47,000 --> 00:22:53,000

Winds are just up to five knots out of the southeast.

312

00:22:53,000 --> 00:22:57,000

And you can see the triangle off to the side there, Travis.

313

00:22:57,000 --> 00:22:59,000

Yep, yeah, I've got eyes on it.

314

00:22:59,000 --> 00:23:01,000

All right, perfect.

315

00:23:01,000 --> 00:23:02,000

Eric, this is Cameron.

316

00:23:02,000 --> 00:23:09,000

We're through 10,000 feet above sea level, 5,000 foot over the ranch, approaching 6,000 foot over the ranch.

317

00:23:09,000 --> 00:23:12,000

We're about ready to drop that whenever you're ready.

318

00:23:12,000 --> 00:23:17,000

We have eyes on you and we are ready.

319

00:23:17,000 --> 00:23:20,000

Okay, Thomas, we're right at the spot over the triangle.

320

00:23:20,000 --> 00:23:25,000

Cameron had the exact GPS coordinates of the triangle from last year's experiments that he locked onto.

321

00:23:25,000 --> 00:23:30,000

His instruments all said we were right over the triangle.

322

00:23:30,000 --> 00:23:32,000

Here we go on a countdown five, four, three, four.

323

00:23:32,000 --> 00:23:34,000

Well, wait, are we over the triangle?

324

00:23:34,000 --> 00:23:35,000

No, we're not.

325

00:23:35,000 --> 00:23:37,000

That's a negative.

326

00:23:37,000 --> 00:23:41,000

We have eyes on you and you're not anywhere close to the triangle.

327

00:23:42,000 --> 00:23:44,000

That's not good.

328

00:23:44,000 --> 00:23:46,000

Huh.

329

00:23:46,000 --> 00:23:49,000

Stand by, stand by on that drop.

330

00:23:49,000 --> 00:23:52,000

This makes absolutely no sense to me.

331

00:23:52,000 --> 00:23:56,000

The GPS had us locked to the triangle, saying we were right above it.

332

00:23:56,000 --> 00:23:58,000

Then all of a sudden we weren't.

333

00:23:58,000 --> 00:24:02,000

It's like something pushed us off course without us even realizing it.

334

00:24:02,000 --> 00:24:03,000

That's crazy.

335

00:24:03,000 --> 00:24:04,000

Makes no sense.

336

00:24:12,000 --> 00:24:18,000

GPS said we were right over the triangle, but Dragon and I could see we were way off the mark.

337

00:24:18,000 --> 00:24:24,000

Cameron's GPS has never malfunctioned like this and it just doesn't happen in this kind of helicopter.

338

00:24:24,000 --> 00:24:31,000

It's as if something was messing with our GPS and telling us we're somewhere we're not.

339

00:24:31,000 --> 00:24:33,000

Stand by, stand by on that drop.

340

00:24:33,000 --> 00:24:37,000

So this helicopter has the latest in technological advances.

341

00:24:37,000 --> 00:24:40,000

It's got top of the line avionics and instrumentation.

342

00:24:40,000 --> 00:24:44,000

The have something like this happen is very untypical.

343

00:24:44,000 --> 00:24:47,000

We don't see anything here, nothing on the radar altimeter.

344

00:24:47,000 --> 00:24:51,000

I think if you get where I can see the triangle.

345

00:24:51,000 --> 00:24:52,000

Okay, let's do that.

346

00:24:52,000 --> 00:24:55,000

You'll go slightly northeast.

347

00:24:55,000 --> 00:24:56,000

Northeast?

348

00:24:56,000 --> 00:24:57,000

Slightly.

349

00:24:57,000 --> 00:24:58,000

Alright, right there.

350

00:24:58,000 --> 00:24:59,000

I'll hold that heading right there.

351

00:24:59,000 --> 00:25:07,000

Since we couldn't rely on the instruments to get us over the target, we had to go old school on this one and just eyeball the drop side.

352

00:25:07,000 --> 00:25:10,000

I think we're going to keep going.

353

00:25:10,000 --> 00:25:15,000

I've got the triangle immediately beneath us on the left side.

354

00:25:15,000 --> 00:25:21,000

I actually look straight down my leg and use it sort of as a barrel site and I'm right over the triangle.

355

00:25:21,000 --> 00:25:27,000

Alright, so we should contact Eric and tell him that we're getting close to launching one of the bottles.

356

00:25:27,000 --> 00:25:29,000

Hey Thomas, this is Cameron.

357

00:25:29,000 --> 00:25:32,000

We're through 10,000 feet above sea level, 5,000 foot over the ranch.

358

00:25:32,000 --> 00:25:36,000

We're about ready to drop that test bottle whenever you're ready.

359

00:25:36,000 --> 00:25:37,000

We're ready?

360

00:25:37,000 --> 00:25:39,000

Yeah, I'm getting nothing.

361

00:25:39,000 --> 00:25:42,000

There's no data and I'm not getting the raw signal.

362

00:25:42,000 --> 00:25:45,000

So we're not picking up telemetry signals.

363

00:25:45,000 --> 00:25:48,000

The light that's supposed to be blinking green.

364

00:25:48,000 --> 00:25:52,000

This is telling me we're getting no data.

365

00:25:52,000 --> 00:25:54,000

I can't lock onto them.

366

00:25:54,000 --> 00:25:57,000

Clearly something is interfering with the signals.

367

00:25:57,000 --> 00:25:58,000

We copied on that.

368

00:25:58,000 --> 00:26:00,000

It messes with GPS.

369

00:26:00,000 --> 00:26:01,000

How about that?

370

00:26:01,000 --> 00:26:09,000

It's like something was jamming us or blocking our signal and we needed to start tossing these sensors out the door before something else happened that would shut us down.

371

00:26:09,000 --> 00:26:16,000

They should be landing right in the triangle, so we'll just have to go collect them after the experiment in order to get the data.

372

00:26:16,000 --> 00:26:18,000

We're willing to try.

373

00:26:18,000 --> 00:26:23,000

Maybe if it got away from the helicopter it'll pick up some telemetry, but it's up to you Eric, do you recall?

374

00:26:23,000 --> 00:26:26,000

Yeah, at some point we're just going to have to make the call.

375

00:26:26,000 --> 00:26:33,000

Alright, so it sounds like Eric's willing to go ahead and just drop even without a signal to see if we can pick it up as it tumbles down to Earth.

376

00:26:33,000 --> 00:26:35,000

Alright, so I'm going to drop this GPS right now.

377

00:26:35,000 --> 00:26:38,000

Three, two, one, package away.

378

00:26:38,000 --> 00:26:40,000

Package away!

379

00:26:43,000 --> 00:26:45,000

I have eyes on the package.

380

00:26:45,000 --> 00:26:47,000

Excellent.

381

00:26:47,000 --> 00:26:49,000

Okay, here comes the next drop.

382

00:26:49,000 --> 00:26:55,000

Counting five, four, three, two, one, cargo away.

383

00:27:05,000 --> 00:27:09,000

The majority of the packages are landing north of the Mesa.

384

00:27:09,000 --> 00:27:12,000

Drop the rest of them further to the south.

385

00:27:12,000 --> 00:27:16,000

I think there is a headwind loft here Cameron, is that right?

386

00:27:16,000 --> 00:27:19,000

That is incorrect, we've actually got a tailwind pushing us right now.

387

00:27:19,000 --> 00:27:23,000

Wow, because it looked like it pulled the bottle behind us.

388

00:27:23,000 --> 00:27:25,000

Still doesn't match where those things are flying east of here.

389

00:27:25,000 --> 00:27:26,000

Yeah, right?

390

00:27:26,000 --> 00:27:28,000

Yeah, that's great.

391

00:27:28,000 --> 00:27:34,000

Again, why would they drift that way when the wind, it's pretty good, a wind out of the east blowing to the west.

392

00:27:34,000 --> 00:27:37,000

Alright, I am right over the target, tell them I'm ready to drop.

393

00:27:37,000 --> 00:27:39,000

And we're ready to drop if you're ready.

394

00:27:39,000 --> 00:27:40,000

Ready when you are.

395

00:27:40,000 --> 00:27:44,000

Five, four, three, two, one, funnel and drop.

396

00:27:47,000 --> 00:27:53,000

Eric, it's in the air somewhere, are you picking up data?

397

00:27:53,000 --> 00:27:58,000

I'm getting nothing, but we are not picking up telemetry signals from packages.

398

00:27:58,000 --> 00:28:03,000

We know that Eric's GPS trackers were working when we put them in the helicopter.

399

00:28:03,000 --> 00:28:05,000

Have Roger copy on that.

400

00:28:05,000 --> 00:28:07,000

Let's start throwing these others out.

401

00:28:07,000 --> 00:28:08,000

Yeah, you tell us try it.

402

00:28:08,000 --> 00:28:09,000

We're gonna throw the others out.

403

00:28:09,000 --> 00:28:14,000

The GPS unit still weren't transmitting data and that was making me a little bit nervous.

404

00:28:14,000 --> 00:28:20,000

So I wanted to get these tubes out the door as fast as we could and hope we could find them later.

405

00:28:20,000 --> 00:28:23,000

Dropping multiple payloads, let us know what you get.

406

00:28:33,000 --> 00:28:35,000

I'm getting no data.

407

00:28:36,000 --> 00:28:39,000

We've got to retrieve those cards or we've got nothing.

408

00:28:39,000 --> 00:28:40,000

We have eyes on them.

409

00:28:40,000 --> 00:28:43,000

Yeah, we're right over, I'm right over.

410

00:28:43,000 --> 00:28:50,000

We were dropping multiple bottles one after another after another just to try and get as many of them out the door as we possibly could.

411

00:28:50,000 --> 00:28:51,000

We're duckling.

412

00:28:51,000 --> 00:28:53,000

I ain't stopping.

413

00:28:53,000 --> 00:29:01,000

We threw out the last 20 GPS trackers just hoping that we'd be able to get good data, even though Eric couldn't track them.

414

00:29:01,000 --> 00:29:03,000

You guys have any more to drop?

415

00:29:03,000 --> 00:29:05,000

When you are in position, go ahead and drop.

416

00:29:05,000 --> 00:29:10,000

So five, four, three, two, one, track is dropping.

417

00:29:10,000 --> 00:29:12,000

Package is away.

418

00:29:14,000 --> 00:29:17,000

Cameron, what elevation are you at at this present moment?

419

00:29:17,000 --> 00:29:20,000

We're 5,000 feet above the surface.

420

00:29:21,000 --> 00:29:23,000

I'm getting a raw signal.

421

00:29:23,000 --> 00:29:24,000

Come on.

422

00:29:24,000 --> 00:29:26,000

Copy that, thank you.

423

00:29:26,000 --> 00:29:28,000

Eric just started receiving data.

424

00:29:28,000 --> 00:29:30,000

We say go ahead with it.

425

00:29:30,000 --> 00:29:34,000

Alright, we're going to drop this last bottle right over the triangle.

426

00:29:34,000 --> 00:29:35,000

Are you ready?

427

00:29:35,000 --> 00:29:36,000

Go ahead when you're ready.

428

00:29:36,000 --> 00:29:37,000

Alright, drop it now.

429

00:29:37,000 --> 00:29:39,000

Drop it down.

430

00:29:40,000 --> 00:29:43,000

Look how it went back.

431

00:29:43,000 --> 00:29:45,000

Yeah, it went way back.

432

00:29:45,000 --> 00:29:47,000

What the heck?

433

00:29:47,000 --> 00:29:49,000

It's in the air.

434

00:29:51,000 --> 00:29:53,000

They're going behind us.

435

00:29:55,000 --> 00:29:57,000

I lost it.

436

00:29:57,000 --> 00:29:58,000

Where'd he go?

437

00:29:58,000 --> 00:29:59,000

Where'd he go?

438

00:29:59,000 --> 00:30:00,000

Where'd he go?

439

00:30:00,000 --> 00:30:06,000

You know, I had eyes on it until it got probably a couple hundred feet above the ground and then I lost eyes on it.

440

00:30:06,000 --> 00:30:11,000

They're throwing out this tube with this long 20-foot red ribbon.

441

00:30:11,000 --> 00:30:15,000

I'm getting eyes on this package and all of a sudden I can't see it from the ground.

442

00:30:15,000 --> 00:30:17,000

It disappeared.

443

00:30:17,000 --> 00:30:19,000

That's interesting.

444

00:30:19,000 --> 00:30:24,000

Finally, we get a good GPS signal for the first time in this dang experiment.

445

00:30:24,000 --> 00:30:33,000

But as the GPS 2 was dropping through the zone of the triangle, we were tracking it and tracking it, and then it just disappeared along with its signal.

446

00:30:33,000 --> 00:30:35,000

It was there one minute and then it was gone.

447

00:30:35,000 --> 00:30:39,000

Thomas had eyes on it too and he said it just disappeared out of thin air.

448

00:30:39,000 --> 00:30:41,000

That makes no sense.

449

00:30:41,000 --> 00:30:42,000

Where'd it go?

450

00:30:42,000 --> 00:30:43,000

I lost it.

451

00:30:43,000 --> 00:30:46,000

It just disappeared.

452

00:30:54,000 --> 00:30:57,000

So all packages have been delivered, correct?

453

00:30:57,000 --> 00:30:59,000

All back to drop.

454

00:30:59,000 --> 00:31:01,000

We can return to base.

455

00:31:01,000 --> 00:31:04,000

Can you guys see some of the packages on the ground up there?

456

00:31:04,000 --> 00:31:09,000

That'll look here and then we'll go to the club.

457

00:31:09,000 --> 00:31:15,000

Eric would like to make it clear that if we do not retrieve any of the packages, we have zero data.

458

00:31:15,000 --> 00:31:20,000

On the surface, this seems like a very simple and straightforward experiment.

459

00:31:20,000 --> 00:31:28,000

And yet here we are once again baffled because the packages that are dropped out of the helicopter, one, are not landing where we think they should.

460

00:31:28,000 --> 00:31:30,000

And we're not even finding them.

461

00:31:30,000 --> 00:31:36,000

And I'm sitting here just shaking my head thinking, here's another experiment in the triangle that just didn't go as planned.

462

00:31:39,000 --> 00:31:40,000

Yeah.

463

00:31:40,000 --> 00:31:42,000

I think we had any of this far south.

464

00:31:42,000 --> 00:31:43,000

No, I don't think so.

465

00:31:43,000 --> 00:31:46,000

Guide me where we ought to go and we'll start looking.

466

00:31:46,000 --> 00:31:52,000

I think some of them went north and east too, so we should go a little bit that way.

467

00:32:00,000 --> 00:32:03,000

Red, red, right below us.

468

00:32:03,000 --> 00:32:05,000

Okay, why don't we grab that one?

469

00:32:05,000 --> 00:32:07,000

Yeah, I need to find a splatter of fire.

470

00:32:10,000 --> 00:32:11,000

Although...

471

00:32:14,000 --> 00:32:19,000

From the triangle we're about 2,800 feet.

472

00:32:19,000 --> 00:32:20,000

That's great.

473

00:32:20,000 --> 00:32:23,000

There's no reason it should have drifted over here.

474

00:32:23,000 --> 00:32:25,000

The wind's a lot, we're not doing that.

475

00:32:25,000 --> 00:32:27,000

And the wind was coming out of the door.

476

00:32:27,000 --> 00:32:29,000

That makes no sense.

477

00:32:29,000 --> 00:32:34,000

When we dropped the payload packages, they actually moved against the wind.

478

00:32:34,000 --> 00:32:36,000

These packages have no propulsion.

479

00:32:36,000 --> 00:32:39,000

They should have gone with the wind like a kite.

480

00:32:39,000 --> 00:32:40,000

How about that?

481

00:32:40,000 --> 00:32:42,000

It makes no sense.

482

00:32:44,000 --> 00:32:48,000

Do you copy? This is Cameron, everybody on the ground, copy?

483

00:32:48,000 --> 00:32:50,000

All right, here you are.

484

00:32:50,000 --> 00:32:55,000

Hey, Tom, we've got one package. We're looking for others. We're doing a search grid up here.

485

00:32:55,000 --> 00:32:57,000

Yeah, they've only found one package.

486

00:32:57,000 --> 00:32:59,000

That's all we need.

487

00:33:00,000 --> 00:33:02,000

Right here.

488

00:33:02,000 --> 00:33:04,000

Right there in front of us.

489

00:33:04,000 --> 00:33:06,000

Sit down here.

490

00:33:13,000 --> 00:33:16,000

So this is a start.

491

00:33:21,000 --> 00:33:23,000

Now we're coming back to land at this time.

492

00:33:23,000 --> 00:33:26,000

Copy that. We'll meet you at the helipad.

493

00:33:26,000 --> 00:33:28,000

All right, let's head back.

494

00:33:28,000 --> 00:33:34,000

I know that I saw a triangle right below us, and for these bottles to land so far off target,

495

00:33:34,000 --> 00:33:38,000

it's like some invisible force just pushed them away.

496

00:33:38,000 --> 00:33:42,000

I don't know what that could be, but I hope the data gives us some answers.

497

00:33:42,000 --> 00:33:44,000

Hey, guys.

498

00:33:44,000 --> 00:33:45,000

Hey there.

499

00:33:45,000 --> 00:33:46,000

Hey, Trev.

500

00:33:46,000 --> 00:33:47,000

That was a fun flight.

501

00:33:47,000 --> 00:33:48,000

It was, yeah.

502

00:33:48,000 --> 00:33:49,000

I'll bet.

503

00:33:49,000 --> 00:33:51,000

Did you guys get any data?

504

00:33:51,000 --> 00:33:54,000

That remains to be seen. The answer is in that bottle.

505

00:33:54,000 --> 00:33:59,000

The weird thing is from our perspective, the bottles didn't land where they were supposed to,

506

00:33:59,000 --> 00:34:02,000

according to the wind indication from the instrument.

507

00:34:02,000 --> 00:34:03,000

That's crazy.

508

00:34:03,000 --> 00:34:05,000

That's really odd.

509

00:34:05,000 --> 00:34:10,000

That just makes the data on that card, if we have any, that much more interesting.

510

00:34:10,000 --> 00:34:14,000

Well, actually, we've got some work cut out for us, because there's still a bunch of them scattered out across up there,

511

00:34:14,000 --> 00:34:20,000

and there's some down on the south end, so we're going to have to go do some, you know, expeditions to find them, right?

512

00:34:20,000 --> 00:34:26,000

But first and foremost, we should get as much of the data crunched and look at.

513

00:34:26,000 --> 00:34:28,000

Yeah, I'm getting impatient to standing here.

514

00:34:28,000 --> 00:34:31,000

I want to get that, I want to get that data out of that bottle.

515

00:34:31,000 --> 00:34:34,000

This is going to be amazing data and very useful thing.

516

00:34:34,000 --> 00:34:35,000

Excellent.

517

00:34:35,000 --> 00:34:38,000

I've got more flights I've got to go on today, so I've got to head back out.

518

00:34:38,000 --> 00:34:39,000

All right, thanks, Tim.

519

00:34:39,000 --> 00:34:40,000

Thank you.

520

00:34:40,000 --> 00:34:41,000

Appreciate you.

521

00:34:41,000 --> 00:34:49,000

Hopefully, we will be able to retrieve the onboard data intact and get our first real glimpse at what might be happening with GPS in the sky.

522

00:34:49,000 --> 00:34:51,000

In the skies above the ranch.

523

00:34:59,000 --> 00:35:02,000

You guys ready to look at some GPS data from that helicopter drone?

524

00:35:02,000 --> 00:35:03,000

Heck yeah.

525

00:35:03,000 --> 00:35:04,000

Heck yeah.

526

00:35:04,000 --> 00:35:08,000

So we had two bottles that were recovered so far, right?

527

00:35:08,000 --> 00:35:12,000

Yeah, we've retrieved two of them so far, and we're lucky to have what we've got.

528

00:35:12,000 --> 00:35:17,000

Of the GPS trackers that we released from the helicopter, we managed to retrieve two of them,

529

00:35:17,000 --> 00:35:20,000

and it appears the data are intact.

530

00:35:20,000 --> 00:35:23,000

At this point, we don't know the location of the others.

531

00:35:23,000 --> 00:35:28,000

I've had a preliminary look at the data, and there are some interesting discrepancies.

532

00:35:28,000 --> 00:35:34,000

What I want to show you are the two separate GPS data payloads.

533

00:35:34,000 --> 00:35:39,000

All right, now, let me explain what you're looking at here.

534

00:35:39,000 --> 00:35:40,000

You can probably guess.

535

00:35:40,000 --> 00:35:47,000

These blue cubes that I'm using represent the position of the GPS payloads.

536

00:35:47,000 --> 00:35:52,000

This is where things start getting strange.

537

00:35:52,000 --> 00:35:59,000

These blue cubes appear to be 50 feet, 70 feet below the surface of the mesa.

538

00:35:59,000 --> 00:36:01,000

Looks like you smashed into the mesa.

539

00:36:01,000 --> 00:36:03,000

What the heck?

540

00:36:04,000 --> 00:36:05,000

How?

541

00:36:11,000 --> 00:36:17,000

The blue cubes that represent the GPS sensor as we were on our way up to the 5,000 foot point

542

00:36:17,000 --> 00:36:22,000

show that the helicopter actually went into the mesa and came back out again.

543

00:36:22,000 --> 00:36:28,000

Obviously, that didn't happen, but something made our GPS think that it did.

544

00:36:29,000 --> 00:36:32,000

How far below ground are those points there in the mesa?

545

00:36:32,000 --> 00:36:34,000

Do you have that information?

546

00:36:34,000 --> 00:36:36,000

I'm sure. We can actually look below the mesa.

547

00:36:36,000 --> 00:36:45,000

These blue cubes that I'm using to represent the GPS data payloads appear to be 50 feet, 70 feet below the surface of the mesa.

548

00:36:46,000 --> 00:36:47,000

How?

549

00:36:47,000 --> 00:36:51,000

And I got to tell you, you were hundreds of feet above the mesa.

550

00:36:51,000 --> 00:36:57,000

It looks like the GPS data is inside the mesa in that location.

551

00:36:58,000 --> 00:37:03,000

But now here's something else that just staggers my mind.

552

00:37:03,000 --> 00:37:06,000

Look where we are when we throw the bottle out.

553

00:37:06,000 --> 00:37:10,000

We were right over the triangle when we threw the bottle out.

554

00:37:10,000 --> 00:37:12,000

Are you looking straight down at this point?

555

00:37:12,000 --> 00:37:13,000

Looking straight down.

556

00:37:13,000 --> 00:37:15,000

So this is crazy.

557

00:37:15,000 --> 00:37:16,000

You're right here.

558

00:37:16,000 --> 00:37:18,000

You're looking straight down.

559

00:37:18,000 --> 00:37:21,000

We're a quarter mile north of the triangle.

560

00:37:21,000 --> 00:37:33,000

The GPS data also shows us that when we were dropping the bottles over the triangle, we weren't anywhere near the triangle, even though to us in the helicopter, it looked like we were right over it.

561

00:37:33,000 --> 00:37:35,000

So what caused that?

562

00:37:35,000 --> 00:37:38,000

And when we were in the helicopter out, we looked straight down literally.

563

00:37:38,000 --> 00:37:41,000

My feet, my foot was right on the edge of the helicopter.

564

00:37:41,000 --> 00:37:46,000

I used my leg as sort of a sight, and I looked straight down and I was lying up to the center of the triangle.

565

00:37:47,000 --> 00:37:58,000

If you find all of that confusing, wait till I show you what happens when we lay our second data set on top of this.

566

00:37:58,000 --> 00:37:59,000

Look at that.

567

00:37:59,000 --> 00:38:03,000

These paths should be identical up to a certain point in time.

568

00:38:03,000 --> 00:38:05,000

Look what happens here.

569

00:38:05,000 --> 00:38:08,000

Look how they're overlaying each other for a minute up there.

570

00:38:08,000 --> 00:38:10,000

They're right on top of the triangle.

571

00:38:10,000 --> 00:38:14,000

Where you see white is where the two tracks are essentially identical.

572

00:38:16,000 --> 00:38:18,000

Hold it, Cal. Look at that.

573

00:38:18,000 --> 00:38:23,000

When we drop the payload, so we threw it out right there, and then look, it goes upwind.

574

00:38:23,000 --> 00:38:25,000

As if things aren't weird enough.

575

00:38:25,000 --> 00:38:28,000

First, the GPS thought we went into the mason.

576

00:38:28,000 --> 00:38:40,000

Now, we pinpointed an exact location above the triangle where we've measured strange energy readings in the past, and it looks like the GPS units bounced off to something we couldn't see.

577

00:38:40,000 --> 00:38:44,000

I wonder if that's the same thing that went under Cameron's helicopter last year.

578

00:38:45,000 --> 00:38:47,000

Alright, so, holy crap.

579

00:38:47,000 --> 00:38:58,000

Now look, so we now have a region in altitude that tells us there's some kind of phenomenon taking place right here that's messing with the GPS.

580

00:38:58,000 --> 00:39:00,000

That's important right there.

581

00:39:01,000 --> 00:39:03,000

That is something else.

582

00:39:03,000 --> 00:39:05,000

I was not expecting to see that.

583

00:39:05,000 --> 00:39:12,000

How many people have said in stories and books that there's a portal above the ranch?

584

00:39:13,000 --> 00:39:24,000

I don't know that I believe any of that, but what I do know is that experiment tells us that there's some anomalous something right there above the mesa over the triangle.

585

00:39:26,000 --> 00:39:27,000

Right.

586

00:39:27,000 --> 00:39:33,000

This is so exciting. It warrants us doing something even grander on scale, so.

587

00:39:33,000 --> 00:39:34,000

Well, agreed.

588

00:39:34,000 --> 00:39:36,000

Let's get to work. Eric has some amazing stuff.

589

00:39:36,000 --> 00:39:37,000

Great work, Eric.

590

00:39:38,000 --> 00:39:45,000

We've just started investigating again, and already there's a spot over the ranch that may be a key to finding the answers we're looking for.

591

00:39:45,000 --> 00:39:49,000

The question is, how far do we have to go to find out?

592

00:39:50,000 --> 00:39:58,000

This year we will be carrying our investigation deeper and higher and further than in previous years.

593

00:39:58,000 --> 00:40:02,000

As we move into this year's investigation, the ranch is a dangerous place.

594

00:40:02,000 --> 00:40:04,000

What's in store for us?

595

00:40:04,000 --> 00:40:11,000

When we start pushing further and poking the hornet's nest harder than we've ever poked before, how's the ranch going to kick back?

596

00:40:12,000 --> 00:40:22,000

Our journey with the investigation at Skinwalker Ranch continues, and not only continues to escalate, but continues to reveal new secrets.

597

00:40:23,000 --> 00:40:31,000

This is not just a scientific experiment or research project out in the middle of a remote location in the U.N. to Basin.

598

00:40:31,000 --> 00:40:33,000

The world is watching.

599

00:40:38,000 --> 00:40:40,000

You never know what's going to happen here at Skinwalker Ranch.

600

00:40:41,000 --> 00:40:42,000

What the hell is that?

601

00:40:42,000 --> 00:40:43,000

Right, right there.

602

00:40:43,000 --> 00:40:44,000

We got something.

603

00:40:44,000 --> 00:40:45,000

What the hell is that?

604

00:40:45,000 --> 00:40:47,000

We captured a UAP on camera.

605

00:40:49,000 --> 00:40:50,000

We need to see what's underground.

606

00:40:51,000 --> 00:40:54,000

There's something underneath this entire mason that's connected somehow.

607

00:40:54,000 --> 00:40:56,000

That looks like a big chunk of something.

608

00:40:56,000 --> 00:40:57,000

It definitely looks metallic.

609

00:40:57,000 --> 00:41:01,000

What scenario could we find metal 300 feet into this mason?

610

00:41:01,000 --> 00:41:04,000

That tells me that was done to hide something.

611

00:41:05,000 --> 00:41:08,000

This area is used to keep the evil on that side.

612

00:41:08,000 --> 00:41:10,000

We're getting a spike in radiation.

613

00:41:10,000 --> 00:41:12,000

There was a spike at 3400.

614

00:41:12,000 --> 00:41:14,000

Everybody out of here now.

615

00:41:14,000 --> 00:41:15,000

Hey.

616

00:41:15,000 --> 00:41:16,000

Are you okay?

617

00:41:16,000 --> 00:41:17,000

No.

618

00:41:17,000 --> 00:41:18,000

Condes blackout.

619

00:41:18,000 --> 00:41:22,000

Someone or something doesn't want us to collect data from the triangle.

620

00:41:22,000 --> 00:41:24,000

Hey look, UAP right there.

621

00:41:24,000 --> 00:41:25,000

Oh, I see it.

622

00:41:25,000 --> 00:41:26,000

We are not in control.

623

00:41:26,000 --> 00:41:27,000

What is that solid light?

624

00:41:27,000 --> 00:41:29,000

There's got a black dot in the center of it.

625

00:41:29,000 --> 00:41:30,000

What?

626

00:41:30,000 --> 00:41:32,000

Oh, sh**, let's go.

627

00:41:32,000 --> 00:41:33,000

Oh my god.

628

00:41:34,000 --> 00:41:36,000

Something malevolent is here.
