

1

00:00:00,000 --> 00:00:02,000

This is something sacred here.

2

00:00:02,000 --> 00:00:06,000

This area is used to keep the evil on that side.

3

00:00:06,000 --> 00:00:10,000

Hey, Travis, I think the shadow of some other aircraft.

4

00:00:10,000 --> 00:00:14,000

There's nothing within 50 miles of the ranch.

5

00:00:14,000 --> 00:00:19,000

What half, what bank is that?

6

00:00:19,000 --> 00:00:23,000

Something doesn't want us to collect data from the triangle.

7

00:00:23,000 --> 00:00:28,000

The Cessna flew 62 and a half miles below the mesa.

8

00:00:28,000 --> 00:00:30,000

On Earth.

9

00:00:30,000 --> 00:00:34,000

There is a ranch in northern Utah.

10

00:00:34,000 --> 00:00:38,000

It is considered the epicenter of the strangest

11

00:00:38,000 --> 00:00:42,000

and most disturbing phenomena on Earth.

12

00:00:42,000 --> 00:00:46,000

Animal mutilations, bizarre UFO sightings,

13

00:00:46,000 --> 00:00:51,000

and unusual energies that have proven harmful to humans.

14

00:00:51,000 --> 00:00:57,000

For 20 years, the federal government tried to find answers and failed.

15

00:00:57,000 --> 00:01:02,000

Now, a new team of dedicated scientists, researchers,

16

00:01:02,000 --> 00:01:05,000

and experts has taken over.

17

00:01:05,000 --> 00:01:10,000

They are determined to solve the mystery and reveal

18

00:01:10,000 --> 00:01:15,000

the secret of Skinwalker Ranch.

19

00:01:24,000 --> 00:01:26,000

Oh, here they are.

20

00:01:28,000 --> 00:01:31,000

We're right in here somewhere, Greg.

21

00:01:33,000 --> 00:01:36,000

After last week's Cessna experiment at the triangle,

22

00:01:36,000 --> 00:01:39,000

our attempt to collect usable data of the anomaly

23

00:01:39,000 --> 00:01:42,000

once again left us with more questions than answers.

24

00:01:42,000 --> 00:01:44,000

Guys, I appreciate y'all coming out.

25

00:01:44,000 --> 00:01:47,000

So to help us get a better look at the triangle anomaly,

26

00:01:47,000 --> 00:01:50,000

we invited Richard Tinney, Chuck Hartz, and David Molten

27

00:01:50,000 --> 00:01:54,000

from the Salt Lake Astronomical Society out to the ranch.

28

00:01:54,000 --> 00:01:57,000

They're going to help us with tonight's experiment at the triangle.

29

00:01:57,000 --> 00:02:00,000

So I have to ask you, what you know about the ranch?

30

00:02:00,000 --> 00:02:02,000

What have you heard about this place?

31

00:02:02,000 --> 00:02:05,000

I'm a little familiar with the history of it,

32

00:02:05,000 --> 00:02:07,000

just because, you know, being a Utah native

33

00:02:07,000 --> 00:02:09,000

and hearing the stories over the years.

34

00:02:09,000 --> 00:02:12,000

I have some family in the area, some friends,

35

00:02:12,000 --> 00:02:15,000

and they tell me stories of things they've seen on the road

36

00:02:15,000 --> 00:02:17,000

and weird stuff.

37

00:02:17,000 --> 00:02:20,000

So you know something of the phenomenology that we've been studying here?

38

00:02:20,000 --> 00:02:22,000

Yes, a little bit.

39

00:02:22,000 --> 00:02:25,000

And I'm going to be candid. This is all brand new to me.

40

00:02:25,000 --> 00:02:29,000

I have no prior knowledge of what's going on.

41

00:02:29,000 --> 00:02:30,000

Better yet.

42

00:02:30,000 --> 00:02:35,000

So guys, we have an anomaly in the sky in that direction,

43

00:02:35,000 --> 00:02:38,000

almost due west from right here.

44

00:02:38,000 --> 00:02:41,000

It's in an area we call the triangle, and it's above that.

45

00:02:41,000 --> 00:02:47,000

We've seen GPS anomalies and a radio signal actually coming from that area.

46

00:02:47,000 --> 00:02:52,000

What we would like to do is look through the anomaly at an astronomical object

47

00:02:52,000 --> 00:02:55,000

and see if they seem to look where they're supposed to

48

00:02:55,000 --> 00:02:59,000

or if they're obscured, moved, or something along those lines.

49

00:02:59,000 --> 00:03:01,000

So here's the plan.

50

00:03:01,000 --> 00:03:04,000

You guys start getting set up, and what I would like to do is,

51

00:03:04,000 --> 00:03:08,000

so you can see the area that we're talking about that has the anomaly in it,

52

00:03:08,000 --> 00:03:10,000

Dragon and I are going to take a rocket out there

53

00:03:10,000 --> 00:03:14,000

and set it up in this spot and launch it right underneath where we are.

54

00:03:14,000 --> 00:03:17,000

You guys try and capture it through the telescopes.

55

00:03:17,000 --> 00:03:18,000

Does that make sense?

56

00:03:18,000 --> 00:03:19,000

Yeah.

57

00:03:19,000 --> 00:03:20,000

Okay.

58

00:03:20,000 --> 00:03:21,000

All right, let's go.

59

00:03:21,000 --> 00:03:25,000

The plan is to have Richard, Chuck, and Dave focus their high-powered telescopes

60

00:03:25,000 --> 00:03:28,000

up at that mile-high area above the triangle

61

00:03:28,000 --> 00:03:33,000

while we launch more rockets in an attempt to stimulate UAP activity.

62

00:03:33,000 --> 00:03:36,000

That's very impressive. How tall is that? 10 feet?

63

00:03:36,000 --> 00:03:41,000

Yeah, it's 100 inches from the mirror down there up to the IPC, actually.

64

00:03:41,000 --> 00:03:45,000

This was a big experiment with a lot of moving parts.

65

00:03:45,000 --> 00:03:46,000

I'm up and running.

66

00:03:46,000 --> 00:03:49,000

These guys have brought out six different telescopes

67

00:03:49,000 --> 00:03:53,000

that can capture high-definition imagery all the way out to outer space.

68

00:03:53,000 --> 00:03:58,000

Each one also features a computerized database of planets and constellations

69

00:03:58,000 --> 00:04:02,000

so it can lock onto a known object in the sky above the triangle

70

00:04:02,000 --> 00:04:05,000

and track that object's motion precisely.

71

00:04:05,000 --> 00:04:08,000

And changing the appearance of that object's motion

72

00:04:08,000 --> 00:04:12,000

means that there's a gravitational anomaly above the triangle

73

00:04:12,000 --> 00:04:14,000

bending the starlight in a way it shouldn't.

74

00:04:14,000 --> 00:04:15,000

Hey, Caleb.

75

00:04:15,000 --> 00:04:16,000

Hey, Eric.

76

00:04:16,000 --> 00:04:18,000

You called us in?

77

00:04:18,000 --> 00:04:20,000

Yeah, so I've got this tracking camera ready.

78

00:04:20,000 --> 00:04:23,000

This is the PTZ that goes with the All Sky.

79

00:04:23,000 --> 00:04:27,000

So this is the one that you're going to pair with the Sky-Facing one?

80

00:04:27,000 --> 00:04:28,000

Yeah, yeah.

81

00:04:28,000 --> 00:04:30,000

So we've got that fish-eye camera that's looking basically horizon to the right.

82

00:04:30,000 --> 00:04:31,000

Is that one right there, right?

83

00:04:31,000 --> 00:04:32,000

Right here.

84

00:04:32,000 --> 00:04:35,000

Meanwhile, Eric had Thomas and Caleb help install

85

00:04:35,000 --> 00:04:38,000

his new All Sky UAP tracking camera system

86

00:04:38,000 --> 00:04:42,000

so we could have even more eyes on the anomalous area above the triangle.

87

00:04:42,000 --> 00:04:47,000

This is a smart system that will hopefully help us to avoid missing anything that comes on our airspace.

88

00:04:47,000 --> 00:04:49,000

Well, this is amazing.

89

00:04:49,000 --> 00:04:52,000

If you're ready to put that up, I'll work with you in here on it.

90

00:04:52,000 --> 00:04:53,000

Okay.

91

00:04:53,000 --> 00:04:54,000

We'll go get her done.

92

00:04:54,000 --> 00:04:55,000

All right.

93

00:04:58,000 --> 00:05:01,000

It's at the triangle where we've repeatedly detected

94

00:05:01,000 --> 00:05:05,000

dangerously high energy spikes about 5,000 feet up.

95

00:05:07,000 --> 00:05:08,000

Look at this guy, y'all!

96

00:05:08,000 --> 00:05:09,000

UAP right there!

97

00:05:09,000 --> 00:05:10,000

Yep.

98

00:05:10,000 --> 00:05:11,000

Let's see it.

99

00:05:11,000 --> 00:05:16,000

And also launched rockets that stimulated numerous UAPs to suddenly appear.

100

00:05:16,000 --> 00:05:18,000

Yeah, that'd be s\*\*\*ing me.

101

00:05:18,000 --> 00:05:20,000

I'm really excited to have these.

102

00:05:20,000 --> 00:05:26,000

It'll just be nice to be able to actually zoom in on stuff and track it across the sky.

103

00:05:27,000 --> 00:05:29,000

Hey, Eric.

104

00:05:29,000 --> 00:05:32,000

Tom's about to put the camera up for you.

105

00:05:32,000 --> 00:05:33,000

Perfect.

106

00:05:33,000 --> 00:05:35,000

I've got him in view.

107

00:05:35,000 --> 00:05:39,000

Adding to our surveillance program, we have set up an All Sky camera.

108

00:05:39,000 --> 00:05:44,000

This is a fisheye lens that sees from horizon to horizon and straight overhead,

109

00:05:44,000 --> 00:05:47,000

taking in the entire canopy of the sky.

110

00:05:47,000 --> 00:05:54,000

We're also adding a directable telescopic camera that is able to identify, track and follow

111

00:05:54,000 --> 00:05:57,000

objects that appear in the sky over the ranch.

112

00:05:57,000 --> 00:05:59,000

We just about got it, Caleb.

113

00:05:59,000 --> 00:06:05,000

We're looking at the skies over the triangle and over the ranch in a lot of different ways.

114

00:06:05,000 --> 00:06:06,000

Hey, Eric, it's Caleb.

115

00:06:06,000 --> 00:06:07,000

We got the camera up.

116

00:06:07,000 --> 00:06:09,000

Can you see on the network?

117

00:06:09,000 --> 00:06:11,000

I've got it, guys.

118

00:06:11,000 --> 00:06:12,000

It looks good.

119

00:06:12,000 --> 00:06:15,000

You can see pretty much everything we need to see from that position.

120

00:06:15,000 --> 00:06:17,000

Awesome.

121

00:06:17,000 --> 00:06:20,000

One thing off the checklist.

122

00:06:20,000 --> 00:06:24,000

This new All Sky camera system is really vital to our experiment.

123

00:06:24,000 --> 00:06:30,000

The telescopes will be locked on to the anomaly above the triangle with a very narrow field of view.

124

00:06:30,000 --> 00:06:37,000

So if UAP appear anywhere else on the ranch, we need to make sure we can capture them on video.

125

00:06:37,000 --> 00:06:41,000

The camera system will also be able to monitor the ranch cattle.

126

00:06:41,000 --> 00:06:44,000

Because of how the cows have acted in the past when UAP appeared,

127

00:06:44,000 --> 00:06:48,000

they will make perfect biosensors during the experiment.

128

00:06:48,000 --> 00:06:49,000

All right.

129

00:06:49,000 --> 00:06:52,000

That's all we got.

130

00:06:52,000 --> 00:06:54,000

I guess we'll just set it up in the center.

131

00:06:54,000 --> 00:06:55,000

Yeah.

132

00:06:55,000 --> 00:06:58,000

As we prepare for our most advanced experiment yet,

133

00:06:58,000 --> 00:07:01,000

Dragon and I went down to the triangle to set up for the first rocket.

134

00:07:01,000 --> 00:07:03,000

Put it down so it's traced.

135

00:07:03,000 --> 00:07:04,000

There we go.

136

00:07:04,000 --> 00:07:06,000

You think it's far enough away from the truck?

137

00:07:06,000 --> 00:07:10,000

Uh, well, that depends on who you're asking.

138

00:07:10,000 --> 00:07:13,000

Who's truck is it?

139

00:07:13,000 --> 00:07:16,000

Since we only have an approximate zone of interest,

140

00:07:16,000 --> 00:07:18,000

this experiment will have two goals.

141

00:07:18,000 --> 00:07:24,000

First, we want to record the best footage possible of any UAP that might appear.

142

00:07:24,000 --> 00:07:27,000

If you want to lock it out right there while we work on it, that's fine.

143

00:07:27,000 --> 00:07:28,000

That's fine.

144

00:07:28,000 --> 00:07:30,000

So you can do it about like that and lock it.

145

00:07:30,000 --> 00:07:31,000

All right. I got the motor.

146

00:07:31,000 --> 00:07:37,000

And second, we want to pinpoint the exact spot that these things could be originating from.

147

00:07:37,000 --> 00:07:40,000

I'm thinking that right there is a pretty good angle.

148

00:07:40,000 --> 00:07:41,000

Okay.

149

00:07:41,000 --> 00:07:42,000

You locked in?

150

00:07:42,000 --> 00:07:43,000

Yep.

151

00:07:43,000 --> 00:07:44,000

All right.

152

00:07:44,000 --> 00:07:46,000

We're going to turn these lights on right when we get ready to go.

153

00:07:46,000 --> 00:07:50,000

Oh, and there's a special light we put in the nose cone, too.

154

00:07:50,000 --> 00:07:54,000

For this rocket, we have LED lights blinking all over the thing.

155

00:07:54,000 --> 00:07:57,000

So the astronomers out here can find the thing in the sky.

156

00:07:57,000 --> 00:07:58,000

That's fine.

157

00:07:58,000 --> 00:07:59,000

All right.

158

00:07:59,000 --> 00:08:01,000

And then we'll turn these on right before we go.

159

00:08:01,000 --> 00:08:05,000

Once we were done, all we needed was the dart and the telescope's ready to go.

160

00:08:05,000 --> 00:08:09,000

Well, you can call them and tell them that we're going to be good go whenever they are.

161

00:08:09,000 --> 00:08:10,000

Okay.

162

00:08:15,000 --> 00:08:17,000

Hey, there's Tom and Candace.

163

00:08:17,000 --> 00:08:18,000

Hello.

164

00:08:18,000 --> 00:08:19,000

How are the neighbors? How you doing, kiddo?

165

00:08:19,000 --> 00:08:20,000

Good to see you.

166

00:08:20,000 --> 00:08:21,000

Good to see you.

167

00:08:21,000 --> 00:08:27,000

While we waited for the sun to go down, Jim Morris, Tom Lewis, and Candace Lindy were

168

00:08:27,000 --> 00:08:31,000

continuing their effort to meet with the members of the community who have their own stories

169

00:08:31,000 --> 00:08:33,000

about bizarre phenomena.

170

00:08:33,000 --> 00:08:37,000

Nice to have Addy come up here and visit with us and compare notes as neighbors.

171

00:08:37,000 --> 00:08:39,000

You're our closest neighbor.

172

00:08:39,000 --> 00:08:41,000

We run into you every once in a while.

173

00:08:41,000 --> 00:08:43,000

Addy is part of the U-Tribe.

174

00:08:43,000 --> 00:08:48,000

And she has a few things she wants to share with us that may help us with the investigation

175

00:08:48,000 --> 00:08:49,000

here on the ranch.

176

00:08:49,000 --> 00:08:53,000

She just had witnessed something that I thought would be pretty profound.

177

00:08:53,000 --> 00:08:55,000

Yeah, well, it was actually a couple of nights ago.

178

00:08:55,000 --> 00:08:56,000

Oh, okay.

179

00:08:56,000 --> 00:08:57,000

So what happened the other night?

180

00:08:57,000 --> 00:09:04,000

Well, me and a friend was bringing in groceries, and he called me out to look up at the sky.

181

00:09:04,000 --> 00:09:06,000

And there was a big old bright light.

182

00:09:06,000 --> 00:09:07,000

Here it is.

183

00:09:07,000 --> 00:09:09,000

It was so quiet.

184

00:09:09,000 --> 00:09:13,000

Yeah, and it was heading up north, and then it stops.

185

00:09:13,000 --> 00:09:18,000

But usually when you see an anomaly out here, they disappear because it's like they know you see it.

186

00:09:18,000 --> 00:09:20,000

But this one didn't do that.

187

00:09:20,000 --> 00:09:25,000

And then it started to go faster north, and then it's gone.

188

00:09:25,000 --> 00:09:28,000

Well, if you've seen this type of thing before.

189

00:09:28,000 --> 00:09:31,000

Yeah, I've actually seen it before a few times.

190

00:09:31,000 --> 00:09:38,000

And my grandpa would talk about different anomalies he would see and things that would happen around the farm.

191

00:09:38,000 --> 00:09:40,000

And what is an example?

192

00:09:40,000 --> 00:09:47,000

One night he was out in the forer, and he noticed the cows were looking up at the sky,

193

00:09:47,000 --> 00:09:56,000

and there was a big old bright ball very low to the ground, and it rose up, and then it just disappeared.

194

00:09:56,000 --> 00:10:03,000

Well, her story rings about because we had this strange incident with this cow that just died all of a sudden.

195

00:10:03,000 --> 00:10:05,000

Still don't know why it happened.

196

00:10:06,000 --> 00:10:09,000

What in the world?

197

00:10:09,000 --> 00:10:13,000

There were some strange events around the death of that cow.

198

00:10:13,000 --> 00:10:15,000

Does that black object, the cow?

199

00:10:15,000 --> 00:10:18,000

Yeah, the cow is right here.

200

00:10:18,000 --> 00:10:21,000

I'm going to do this very slowly, frame by frame.

201

00:10:21,000 --> 00:10:27,000

So here, I can't help but also notice that there's something happening here.

202

00:10:27,000 --> 00:10:29,000

Oh, there, right there.

203

00:10:29,000 --> 00:10:34,000

I mean, having correlated stories, very similar, that was very interesting.

204

00:10:35,000 --> 00:10:38,000

So we have the lights with the cow.

205

00:10:38,000 --> 00:10:40,000

Anything else come to mind?

206

00:10:40,000 --> 00:10:44,000

My grandpa's seen some, I guess he'd say it was a skin walker.

207

00:10:47,000 --> 00:10:50,000

I don't know if I want to talk about this one though.

208

00:10:59,000 --> 00:11:02,000

People out here, they've lived in the area.

209

00:11:02,000 --> 00:11:08,000

They've grown up with these, this phenomenon called the skin walker.

210

00:11:08,000 --> 00:11:13,000

This is when the Navajo and the Utes got into more than a squirmish.

211

00:11:13,000 --> 00:11:18,000

Back in the mid-1800s, the Navajos ended up cursing the Utes.

212

00:11:18,000 --> 00:11:26,000

A skin walker is a shape shifter, so there's a fear associated with talking about these things.

213

00:11:26,000 --> 00:11:28,000

It is scary to talk about.

214

00:11:28,000 --> 00:11:29,000

Yeah.

215

00:11:29,000 --> 00:11:34,000

On the flip side though, what we're trying to do is we're trying to get as many stories as we can get.

216

00:11:34,000 --> 00:11:35,000

Yeah.

217

00:11:35,000 --> 00:11:43,000

Because it helps paint a picture of what's maybe going on in this particular area on Skin Walker Ranch.

218

00:11:43,000 --> 00:11:45,000

But the U-Winner Basin in general.

219

00:11:45,000 --> 00:11:46,000

Yeah.

220

00:11:46,000 --> 00:11:50,000

And the more people talk about that, the easier it gets for other people who talk about it.

221

00:11:50,000 --> 00:11:51,000

Okay.

222

00:11:52,000 --> 00:11:58,000

My grandpa went out in the field and he noticed a tall, dark figure watching him.

223

00:11:58,000 --> 00:12:00,000

He was watching him cut hay.

224

00:12:00,000 --> 00:12:05,000

And each time he would go around the field, it would get closer and closer.

225

00:12:05,000 --> 00:12:08,000

And he said it looked like it had like a long cloak.

226

00:12:08,000 --> 00:12:13,000

And then when he got closer to it, it just vanished.

227

00:12:13,000 --> 00:12:14,000

Disappeared.

228

00:12:14,000 --> 00:12:16,000

I don't know why.

229

00:12:16,000 --> 00:12:20,000

There's some scary things that have gone on over the years on this ranch.

230

00:12:20,000 --> 00:12:21,000

Yeah.

231

00:12:21,000 --> 00:12:31,000

To have witnessed testimony to the reality of what we're experiencing at the ranch is both thrilling and it's also terrifying.

232

00:12:31,000 --> 00:12:36,000

What we're dealing with here is something not to be taken lightly.

233

00:12:36,000 --> 00:12:38,000

Well, thank you for coming up.

234

00:12:38,000 --> 00:12:40,000

You are our closest neighbor.

235

00:12:40,000 --> 00:12:41,000

Yeah.

236

00:12:41,000 --> 00:12:42,000

You know.

237

00:12:42,000 --> 00:12:43,000

I really appreciate it.

238

00:12:43,000 --> 00:12:44,000

It's always good to see you.

239

00:12:44,000 --> 00:12:45,000

It's good to see you guys.

240

00:12:45,000 --> 00:12:46,000

Thanks for being so receptive.

241

00:12:46,000 --> 00:12:47,000

I'm going to walk Danny home.

242

00:12:47,000 --> 00:12:48,000

We'll see you soon.

243

00:12:48,000 --> 00:12:49,000

What lies ahead?

244

00:12:49,000 --> 00:13:03,000

I think we have before us a great challenge to understand the origin and the agenda associated with the phenomena with what we are interacting with on Skinwalker Ranch.

245

00:13:10,000 --> 00:13:12,000

Hey, Bryant, go ahead.

246

00:13:12,000 --> 00:13:14,000

We're going to say another two minutes.

247

00:13:14,000 --> 00:13:16,000

Time frame starting.

248

00:13:16,000 --> 00:13:20,000

As soon as it was dark enough to see the stars, it was time to start the experiment.

249

00:13:20,000 --> 00:13:29,000

I want to fire rockets straight up from the inside of the triangle while the astronomers view and capture incredibly close images of the anomaly.

250

00:13:29,000 --> 00:13:32,000

And hopefully they can record something we can analyze later.

251

00:13:32,000 --> 00:13:35,000

And you've got a good view of their position.

252

00:13:35,000 --> 00:13:36,000

Yeah, I think.

253

00:13:36,000 --> 00:13:37,000

Great.

254

00:13:37,000 --> 00:13:39,000

Whenever they're ready.

255

00:13:39,000 --> 00:13:40,000

All right.

256

00:13:40,000 --> 00:13:42,000

So let's lock it about right there.

257

00:13:42,000 --> 00:13:43,000

Like that?

258

00:13:43,000 --> 00:13:44,000

Yep.

259

00:13:44,000 --> 00:13:45,000

The wind's picking up a little bit more.

260

00:13:45,000 --> 00:13:46,000

Hey, Bryant, Travis.

261

00:13:46,000 --> 00:13:48,000

You guys ready for launch?

262

00:13:48,000 --> 00:13:50,000

We're waiting on you.

263

00:13:50,000 --> 00:13:51,000

Yeah, we are, Eric.

264

00:13:51,000 --> 00:13:55,000

Anytime you're ready, we can start the timer, go radio silence, and we will launch.

265

00:13:55,000 --> 00:13:56,000

Please stand by.

266

00:13:56,000 --> 00:13:58,000

Give me a moment.

267

00:14:00,000 --> 00:14:05,000

I'm having trouble getting my computerized mount aligned.

268

00:14:06,000 --> 00:14:08,000

Hey, Bryant, please hold.

269

00:14:08,000 --> 00:14:09,000

We're not ready.

270

00:14:09,000 --> 00:14:10,000

Hold an account.

271

00:14:10,000 --> 00:14:11,000

No problem.

272

00:14:11,000 --> 00:14:12,000

We'll hold.

273

00:14:12,000 --> 00:14:13,000

Just let us know.

274

00:14:14,000 --> 00:14:21,000

Don't let me distract you, but if you can describe briefly what is the function that you're trying to do that it's not?

275

00:14:21,000 --> 00:14:26,000

When I first set up the mount, I have to aim it at a couple of stars.

276

00:14:26,000 --> 00:14:29,000

And that builds a model of the sky in the computer.

277

00:14:29,000 --> 00:14:31,000

It's not letting me do that.

278

00:14:31,000 --> 00:14:37,000

I've had this particular telescope over 10 years now, and I have never had a problem like this.

279

00:14:39,000 --> 00:14:40,000

Okay, now it's moving.

280

00:14:40,000 --> 00:14:42,000

It's not the light that's turning it off, is it?

281

00:14:42,000 --> 00:14:43,000

No.

282

00:14:44,000 --> 00:14:56,000

It becomes clear that things are getting really strange really fast, and we're having difficulty performing even the most basic calibration exercises with the telescopes in order to locate themselves in space.

283

00:14:56,000 --> 00:14:58,000

For some reason this doesn't surprise me.

284

00:15:00,000 --> 00:15:04,000

Hey, we're all set up here to launch this rocket whenever you guys are ready with your equipment.

285

00:15:05,000 --> 00:15:06,000

We're not ready.

286

00:15:06,000 --> 00:15:11,000

The object I just slewed to a little while ago is now no longer in the database.

287

00:15:12,000 --> 00:15:13,000

This is junk right now.

288

00:15:13,000 --> 00:15:16,000

This is just thousands of dollars of worth of junk.

289

00:15:16,000 --> 00:15:18,000

So what do you mean that it's not in there?

290

00:15:18,000 --> 00:15:21,000

This has thousands of objects in the database.

291

00:15:21,000 --> 00:15:25,000

Stars, planets, galaxies, everything.

292

00:15:25,000 --> 00:15:27,000

And if you enter it and hit it, it will slew to that object.

293

00:15:27,000 --> 00:15:32,000

I had it on one earlier, and that object is no longer in the database.

294

00:15:32,000 --> 00:15:34,000

They're listed alphabetically.

295

00:15:35,000 --> 00:15:36,000

The one that you started with.

296

00:15:36,000 --> 00:15:37,000

Right.

297

00:15:37,000 --> 00:15:39,000

It had to be in there for me to slew to it.

298

00:15:39,000 --> 00:15:41,000

Does this operate off GPS?

299

00:15:41,000 --> 00:15:45,000

No, we're doing it all manual so that we don't have to rely on GPS.

300

00:15:46,000 --> 00:15:48,000

The one I'm looking for is called Razzle Geethy.

301

00:15:49,000 --> 00:15:51,000

The one we want is not there.

302

00:15:51,000 --> 00:15:53,000

The one that's right for?

303

00:15:53,000 --> 00:15:56,000

No, but that's the star where the anomaly is.

304

00:15:56,000 --> 00:15:59,000

So the star of the anomaly is not showing up?

305

00:15:59,000 --> 00:16:00,000

Not in the database.

306

00:16:00,000 --> 00:16:03,000

And it was a little while ago.

307

00:16:03,000 --> 00:16:04,000

Are you hearing this, Eric?

308

00:16:05,000 --> 00:16:11,000

I find it really mysterious that as soon as we attempt to lock onto stars that are above the triangle,

309

00:16:11,000 --> 00:16:18,000

they are being deleted one at a time from the star catalog on the internal memory of his telescope computer.

310

00:16:18,000 --> 00:16:19,000

I don't even know how that's possible.

311

00:16:19,000 --> 00:16:23,000

What is gaining access to the memory of this system?

312

00:16:23,000 --> 00:16:26,000

It doesn't want me to slew to the anomaly.

313

00:16:27,000 --> 00:16:32,000

See, that's the one we want.

314

00:16:32,000 --> 00:16:33,000

That's the one not there.

315

00:16:33,000 --> 00:16:35,000

It's not there.

316

00:16:36,000 --> 00:16:41,000

Hey, Eric, we are ready to roll when you guys tell us to.

317

00:16:43,000 --> 00:16:45,000

Another star just disappeared from the database.

318

00:16:45,000 --> 00:16:47,000

You have got to be kidding me.

319

00:16:47,000 --> 00:16:50,000

There's nothing in the anomaly area that is in the database anymore.

320

00:16:50,000 --> 00:16:53,000

Now, you're not connected to network.

321

00:16:53,000 --> 00:16:57,000

You're not pulling anything from the cloud or anything that would be updating.

322

00:16:57,000 --> 00:17:03,000

As soon as I try to point it to the anomaly area, any object, and that's a big piece of sky.

323

00:17:03,000 --> 00:17:07,000

There are a lot of things in the catalog in that part of the sky.

324

00:17:07,000 --> 00:17:12,000

And I can find things all around the perimeter of it, but nothing in the middle.

325

00:17:15,000 --> 00:17:17,000

We're dealing with an issue over here.

326

00:17:17,000 --> 00:17:22,000

As these stars are tracking into the anomaly, they are disappearing off the menu of the telescope.

327

00:17:22,000 --> 00:17:29,000

We're not even able to train the telescope off the stars because as the stars enter that area,

328

00:17:29,000 --> 00:17:33,000

they are disappearing off the menu of the telescope.

329

00:17:35,000 --> 00:17:37,000

That's actually crazy.

330

00:17:37,000 --> 00:17:38,000

So let me get this straight.

331

00:17:38,000 --> 00:17:46,000

Ask them if they mean it's disappearing from the menu in the computer for the telescopes of potential stars they could look at,

332

00:17:46,000 --> 00:17:48,000

or if they're literally disappearing.

333

00:17:48,000 --> 00:17:55,000

They are disappearing from the menu, disappearing from the internal catalog in the computer that's running the scope.

334

00:17:55,000 --> 00:18:03,000

It was baffling that telescopes of this caliber, design, and from different manufacturers would all glitch like that.

335

00:18:03,000 --> 00:18:08,000

In fact, we've had so many sophisticated equipment failures take place during our experiments

336

00:18:08,000 --> 00:18:13,000

that it's almost become a sign that something strange is about to happen on the ranch.

337

00:18:13,000 --> 00:18:15,000

We really need to launch this rocket.

338

00:18:15,000 --> 00:18:17,000

Come on, Dragon, let's get this rocket ready.

339

00:18:17,000 --> 00:18:18,000

Be advised, guys.

340

00:18:18,000 --> 00:18:22,000

We're about to shoot the rocket and shoot it right through whatever this is.

341

00:18:22,000 --> 00:18:23,000

No.

342

00:18:23,000 --> 00:18:24,000

Hurry up, whatever something happens.

343

00:18:24,000 --> 00:18:26,000

We need to launch this rocket now.

344

00:18:34,000 --> 00:18:36,000

We need to launch this rocket now.

345

00:18:36,000 --> 00:18:37,000

I want it to go.

346

00:18:37,000 --> 00:18:46,000

When the professional grade astronomical telescope has failed, I knew this could be one of those times where ranch activity really starts to kick up.

347

00:18:46,000 --> 00:18:48,000

Tell them to get ready for a countdown.

348

00:18:48,000 --> 00:18:51,000

We're going to launch in two minutes.

349

00:18:51,000 --> 00:18:53,000

Okay, we're going to launch this rocket in two minutes.

350

00:18:53,000 --> 00:19:00,000

So I wanted to start launching rockets as fast as we could and see if we could get a response from the anomaly above the train.

351

00:19:00,000 --> 00:19:04,000

Five, four, three, two, one.

352

00:19:04,000 --> 00:19:08,000

Five, four, three, two, one.

353

00:19:08,000 --> 00:19:12,000

That one shot up there.

354

00:19:12,000 --> 00:19:14,000

There it is.

355

00:19:14,000 --> 00:19:16,000

All right.

356

00:19:16,000 --> 00:19:18,000

Are you capturing stuff?

357

00:19:18,000 --> 00:19:19,000

This scope is pretty dead.

358

00:19:19,000 --> 00:19:25,000

I mean, I aimed it manually in the anomaly area and then the camera wouldn't work.

359

00:19:25,000 --> 00:19:29,000

I couldn't get a feed from the camera to the laptop.

360

00:19:30,000 --> 00:19:33,000

And this camera suddenly not working when I'm pointing it over there.

361

00:19:33,000 --> 00:19:34,000

Really?

362

00:19:34,000 --> 00:19:35,000

Yeah.

363

00:19:35,000 --> 00:19:36,000

Your camera's not working?

364

00:19:36,000 --> 00:19:37,000

This one's not working on the...

365

00:19:37,000 --> 00:19:39,000

So when you point this towards the triangle, it's not working?

366

00:19:39,000 --> 00:19:41,000

Nothing's showing up on the camera.

367

00:19:43,000 --> 00:19:51,000

It's hard to explain why so many things go wrong anytime we tried to swing the telescopes in the direction of the anomaly.

368

00:19:51,000 --> 00:20:02,000

You know, we were able to image find outside of that, but the minute we get inside there, a number of mechanical problems seem to occur, which is inexplicable.

369

00:20:02,000 --> 00:20:06,000

All three of you have had glitches here that you don't see other places.

370

00:20:06,000 --> 00:20:08,000

Never had them before.

371

00:20:13,000 --> 00:20:16,000

I can't get any of the cameras at the bait pen to come up.

372

00:20:16,000 --> 00:20:19,000

You're not getting a response from any of our cameras out there?

373

00:20:19,000 --> 00:20:22,000

No. No. Everything's dead out there.

374

00:20:24,000 --> 00:20:26,000

I can't get through to anything.

375

00:20:26,000 --> 00:20:31,000

So when he pointed that big telescope towards the triangle, the screen went black.

376

00:20:31,000 --> 00:20:33,000

Now that is really spooky.

377

00:20:33,000 --> 00:20:35,000

Makes you feel crazy.

378

00:20:35,000 --> 00:20:40,000

Hey, Travis, we're not even able to train the telescope on the stars.

379

00:20:40,000 --> 00:20:45,000

So what's going into the computer and telling the computer and the telescope that the star isn't there?

380

00:20:45,000 --> 00:20:47,000

Never heard of such a thing.

381

00:20:47,000 --> 00:20:55,000

Since the telescope computers wouldn't align with the stars, the astronomers had to align them manually.

382

00:20:55,000 --> 00:20:59,000

But when they moved the telescopes to look at the anomaly, the telescopes failed.

383

00:20:59,000 --> 00:21:03,000

Their cameras wouldn't get an image through the triangle anomaly.

384

00:21:03,000 --> 00:21:09,000

Before it was the computers that weren't working, and now it's the actual cameras connected to the telescopes.

385

00:21:10,000 --> 00:21:12,000

Hey, Bryant, Travis, do you copy?

386

00:21:12,000 --> 00:21:13,000

We got you. Go ahead.

387

00:21:13,000 --> 00:21:18,000

We can fixate on stars elsewhere, but not the ones over the anomaly.

388

00:21:18,000 --> 00:21:19,000

No kidding.

389

00:21:19,000 --> 00:21:27,000

So I think it'd be a good idea just to shine the laser straight up to provide a reference that we can fixate on.

390

00:21:27,000 --> 00:21:29,000

That's what we're going to do.

391

00:21:29,000 --> 00:21:32,000

Okay, if you're ready, we will shine it right now.

392

00:21:32,000 --> 00:21:35,000

Go right up the launch rail.

393

00:21:35,000 --> 00:21:43,000

Since the telescope's computer wasn't working, Eric got the idea to have Caleb aim a military-grade laser pointer up through the triangle

394

00:21:43,000 --> 00:21:50,000

so that Chuck could manually focus on it to see if anything strange could be identified in the anomalous zone.

395

00:21:50,000 --> 00:21:51,000

There you go.

396

00:21:51,000 --> 00:21:53,000

Okay, Caleb is shining the laser straight up.

397

00:21:53,000 --> 00:21:55,000

Can you see it?

398

00:21:56,000 --> 00:21:58,000

Have you got it in there now?

399

00:21:58,000 --> 00:21:59,000

Yeah, that's it.

400

00:21:59,000 --> 00:22:00,000

Okay, good.

401

00:22:00,000 --> 00:22:02,000

Yes, we can see the green laser.

402

00:22:04,000 --> 00:22:05,000

Hey, Travis.

403

00:22:05,000 --> 00:22:07,000

What? Yeah? Yeah, Caleb?

404

00:22:07,000 --> 00:22:12,000

There's points where it looks like the beam, like, disconnects from itself.

405

00:22:12,000 --> 00:22:13,000

What?

406

00:22:13,000 --> 00:22:15,000

Where you are now?

407

00:22:15,000 --> 00:22:16,000

Yeah.

408

00:22:16,000 --> 00:22:17,000

What?

409

00:22:21,000 --> 00:22:22,000

I don't know.

410

00:22:23,000 --> 00:22:25,000

It's just weird.

411

00:22:25,000 --> 00:22:27,000

You see that?

412

00:22:27,000 --> 00:22:28,000

Yeah, I did see that.

413

00:22:28,000 --> 00:22:29,000

It's like it jumps.

414

00:22:29,000 --> 00:22:30,000

Yeah, right there.

415

00:22:30,000 --> 00:22:31,000

Do it again.

416

00:22:31,000 --> 00:22:33,000

Right there, look, it just suddenly got shorter.

417

00:22:33,000 --> 00:22:35,000

You see how it looks like it's cutting off?

418

00:22:35,000 --> 00:22:36,000

Yeah, it's like there's something there.

419

00:22:36,000 --> 00:22:38,000

There's something there.

420

00:22:42,000 --> 00:22:47,000

When Caleb pointed the laser up through the triangle, we expected it to just go straight up.

421

00:22:47,000 --> 00:22:51,000

But as he's moving it around, it looks like it actually gets shorter.

422

00:22:51,000 --> 00:22:56,000

Like it's being cut off at a certain point by an object or something that we can't see.

423

00:22:56,000 --> 00:23:00,000

And it's right there in the anomalous zone above the triangle.

424

00:23:01,000 --> 00:23:04,000

Hey, guys, y'all are not gonna believe this.

425

00:23:04,000 --> 00:23:06,000

Chances are we're gonna believe anything you say, Travis.

426

00:23:06,000 --> 00:23:12,000

Caleb is pointing the laser pointer up into the sky, and it's like it hits something,

427

00:23:12,000 --> 00:23:16,000

and it only goes a certain distance, and then he moves it and it goes further.

428

00:23:17,000 --> 00:23:20,000

Don't you see it being, Don't you see that?

429

00:23:23,000 --> 00:23:26,000

Then the end of the laser bends.

430

00:23:28,000 --> 00:23:29,000

Did you see that?

431

00:23:29,000 --> 00:23:30,000

Yeah.

432

00:23:30,000 --> 00:23:34,000

We're getting something, and the laser beam is literally bending.

433

00:23:35,000 --> 00:23:37,000

What in the hell is that?

434

00:23:37,000 --> 00:23:39,000

I can see it like bending itself.

435

00:23:39,000 --> 00:23:40,000

I'm watching two beams.

436

00:23:40,000 --> 00:23:42,000

I am literally watching two beams from right here.

437

00:23:42,000 --> 00:23:44,000

It makes a Y out of the beam.

438

00:23:46,000 --> 00:23:49,000

And then the laser actually splits into a Y.

439

00:23:50,000 --> 00:23:54,000

We can see two beams happening when it hits something up there.

440

00:23:54,000 --> 00:23:56,000

God, I wish I could see that from here.

441

00:23:56,000 --> 00:23:59,000

That's insane, dude.

442

00:23:59,000 --> 00:24:03,000

Travis, any sense of how high up this object is?

443

00:24:03,000 --> 00:24:05,000

Somewhere about 2,000 feet up.

444

00:24:07,000 --> 00:24:10,000

We really need to launch this rocket through that.

445

00:24:10,000 --> 00:24:12,000

Come on, Dragon, let's get this rocket ready.

446

00:24:12,000 --> 00:24:14,000

We can shoot it right through where that is.

447

00:24:14,000 --> 00:24:20,000

All I could think was that maybe we finally pinpointed the anomaly above the triangle where the laser beam was splitting.

448

00:24:20,000 --> 00:24:25,000

So it was definitely time to fire a rocket up there and see what would happen.

449

00:24:25,000 --> 00:24:26,000

I want it to go.

450

00:24:26,000 --> 00:24:28,000

Keep that laser beam up there, Caleb.

451

00:24:28,000 --> 00:24:30,000

I'm going to try to point this rocket there.

452

00:24:30,000 --> 00:24:33,000

This is not going anything like what I would have expected.

453

00:24:33,000 --> 00:24:36,000

I'll tell you right now, I got chills everywhere.

454

00:24:37,000 --> 00:24:39,000

I need to tilt it just a little.

455

00:24:40,000 --> 00:24:41,000

Probably right there.

456

00:24:42,000 --> 00:24:43,000

Alright, Caleb.

457

00:24:43,000 --> 00:24:45,000

Right there, Travis, right there.

458

00:24:45,000 --> 00:24:47,000

Alright, that's where I'm pointing.

459

00:24:47,000 --> 00:24:48,000

I'm pointing right at that.

460

00:24:48,000 --> 00:24:49,000

Right there.

461

00:24:49,000 --> 00:24:51,000

Okay, everybody clear back.

462

00:24:54,000 --> 00:24:56,000

We've seen a lot of weird stuff.

463

00:24:56,000 --> 00:25:04,000

I'm hoping the rocket's going to go right through that spot and they can see if something weird happens to its trajectory through the telescope while it's going.

464

00:25:05,000 --> 00:25:10,000

Five, four, three, two, one.

465

00:25:11,000 --> 00:25:30,000

When Caleb pointed the laser up into the triangle, the beam bent, split, and appeared to hit something, which should be impossible.

466

00:25:30,000 --> 00:25:32,000

That looked like a beautiful flight.

467

00:25:32,000 --> 00:25:33,000

Straight up.

468

00:25:33,000 --> 00:25:38,000

So we decided to quickly launch a rocket and see if we couldn't hit whatever it was causing it.

469

00:25:38,000 --> 00:25:39,000

There we go.

470

00:25:39,000 --> 00:25:40,000

Yeah.

471

00:25:40,000 --> 00:25:42,000

I'll go grab that.

472

00:25:42,000 --> 00:25:44,000

Alright, I'll tell you what, Caleb.

473

00:25:44,000 --> 00:25:46,000

Just get it and just meet us back at the helipad.

474

00:25:46,000 --> 00:25:47,000

Drag it in and I'll break down.

475

00:25:47,000 --> 00:25:48,000

Okay.

476

00:25:48,000 --> 00:25:49,000

Load everything up and head back.

477

00:25:49,000 --> 00:26:00,000

After our rocket launch up into the triangle, I was eager to go join the others at the helipad and see if we could get a look through the telescopes and what might have caused the laser to bend and split like that.

478

00:26:00,000 --> 00:26:05,000

We're going to head back and then just go back to basic astronomical observation.

479

00:26:05,000 --> 00:26:06,000

Copy that.

480

00:26:06,000 --> 00:26:07,000

See you soon.

481

00:26:07,000 --> 00:26:09,000

Alright, let's do it.

482

00:26:11,000 --> 00:26:17,000

Well, cattle are acting very abnormal.

483

00:26:23,000 --> 00:26:26,000

We're sitting on the helipad and the cows start to really act up.

484

00:26:26,000 --> 00:26:27,000

They're mooing a lot.

485

00:26:27,000 --> 00:26:29,000

They're making a lot of noise.

486

00:26:31,000 --> 00:26:33,000

Eric, the cows have pushed in on us.

487

00:26:33,000 --> 00:26:36,000

Is it all of them or is it just a few?

488

00:26:36,000 --> 00:26:39,000

The whole herd has scattered through the entire field.

489

00:26:39,000 --> 00:26:43,000

Something's definitely scared them and stirred them up.

490

00:26:43,000 --> 00:26:44,000

What the heck?

491

00:26:44,000 --> 00:26:46,000

They've pushed all the way around the helipad.

492

00:26:47,000 --> 00:26:50,000

I'm getting something on the 1.6.

493

00:26:57,000 --> 00:26:59,000

Hey guys, so Thomas is out in the field.

494

00:27:00,000 --> 00:27:05,000

We often talk about these cows being biosensors.

495

00:27:05,000 --> 00:27:08,000

And after what's happened in the past with animals on this ranch,

496

00:27:08,000 --> 00:27:13,000

we always keep a keen eye on the cattle for any strange activity.

497

00:27:13,000 --> 00:27:18,000

Suddenly, they're acting weird while we're conducting this experiment at the triangle

498

00:27:18,000 --> 00:27:21,000

and there's also massive equipment failures.

499

00:27:21,000 --> 00:27:24,000

My first thought was we should be looking up.

500

00:27:24,000 --> 00:27:27,000

Everybody scan the skies, scan the skies.

501

00:27:29,000 --> 00:27:37,000

Look at this one right here.

502

00:27:37,000 --> 00:27:39,000

I don't know what that is.

503

00:27:39,000 --> 00:27:42,000

What the hell is that in the sky?

504

00:27:42,000 --> 00:27:43,000

To the south.

505

00:27:43,000 --> 00:27:44,000

There it is.

506

00:27:44,000 --> 00:27:46,000

It's moving real slow.

507

00:27:46,000 --> 00:27:47,000

I'm looking at it.

508

00:27:47,000 --> 00:27:50,000

There's no red or green or white lights on it.

509

00:27:53,000 --> 00:27:55,000

That thing is big and spherical.

510

00:27:55,000 --> 00:27:56,000

Yes it is.

511

00:27:56,000 --> 00:27:58,000

It's got a black dot in the center of it.

512

00:27:58,000 --> 00:28:00,000

What in the crap?

513

00:28:00,000 --> 00:28:05,000

I am seeing a double peak near 1.6 with some side bends.

514

00:28:05,000 --> 00:28:12,000

I noticed that the spectrum analyzer is giving us once again this mysterious 1.6 gigahertz signal.

515

00:28:12,000 --> 00:28:17,000

The 1.6 is often seen in conjunction with UAP activity.

516

00:28:17,000 --> 00:28:20,000

There's no red or green or white lights on it.

517

00:28:20,000 --> 00:28:23,000

It doesn't look like it's that far away either.

518

00:28:23,000 --> 00:28:26,000

Richard spots this object up in the sky.

519

00:28:26,000 --> 00:28:29,000

It's not blinking like an aircraft.

520

00:28:29,000 --> 00:28:31,000

It's not like anything I've ever seen before.

521

00:28:31,000 --> 00:28:36,000

It starts to track towards the east and then it started to turn towards the north.

522

00:28:36,000 --> 00:28:41,000

It's definitely one of the more incredible sightings that I've seen here on Skinwalker Ranch.

523

00:28:41,000 --> 00:28:43,000

It's coming up on Jupiter right now.

524

00:28:43,000 --> 00:28:44,000

Yes it is.

525

00:28:44,000 --> 00:28:45,000

It's going right under Jupiter.

526

00:28:45,000 --> 00:28:47,000

It's almost as big as Jupiter.

527

00:28:47,000 --> 00:28:48,000

That is bright.

528

00:28:48,000 --> 00:28:50,000

That ain't an airplane.

529

00:28:50,000 --> 00:28:53,000

Airplanes at night have to have navigational lights.

530

00:28:53,000 --> 00:28:57,000

Red and green and these lights will blink.

531

00:28:57,000 --> 00:29:05,000

And this object that I saw, it didn't have that deliberate direction that an airplane has.

532

00:29:05,000 --> 00:29:10,000

It seemed to be kind of lazy and slow moving, taking its time.

533

00:29:10,000 --> 00:29:13,000

Had no navigation lights, no landing lights.

534

00:29:13,000 --> 00:29:15,000

The entire object was glowing.

535

00:29:15,000 --> 00:29:18,000

I still see it, but it's getting dim.

536

00:29:19,000 --> 00:29:21,000

It just disappeared.

537

00:29:23,000 --> 00:29:25,000

Wow.

538

00:29:25,000 --> 00:29:29,000

It didn't move like anything that I've seen before.

539

00:29:29,000 --> 00:29:34,000

And it certainly, when we zeroed in on it, it didn't look like anything that I've seen before.

540

00:29:34,000 --> 00:29:38,000

And after all this, I'm going to have to just sit down and think for a few minutes.

541

00:29:38,000 --> 00:29:39,000

I don't know how to process this.

542

00:29:39,000 --> 00:29:40,000

Yeah.

543

00:29:40,000 --> 00:29:44,000

This is the kind of thing that makes us feel like it's targeted.

544

00:29:44,000 --> 00:29:45,000

Yeah.

545

00:29:45,000 --> 00:29:52,000

You know, the fact that you can pick up a star anywhere, but once you go to the spot that we're trying to observe, it doesn't work.

546

00:29:53,000 --> 00:29:59,000

How can something know that you were pointing that Dobsonian telescope in that direction?

547

00:29:59,000 --> 00:30:03,000

There's no electronic setting circles, no encoders.

548

00:30:03,000 --> 00:30:04,000

There's nothing.

549

00:30:04,000 --> 00:30:05,000

No GPS.

550

00:30:05,000 --> 00:30:06,000

There's nothing on that.

551

00:30:06,000 --> 00:30:07,000

Nope.

552

00:30:07,000 --> 00:30:09,000

You get away from the anomaly and everything's normal again.

553

00:30:09,000 --> 00:30:10,000

Wow.

554

00:30:10,000 --> 00:30:14,000

We were all mentally exhausted by whatever that was that appeared after our final rocket launch.

555

00:30:14,000 --> 00:30:17,000

It was the biggest UAP we've seen so far.

556

00:30:17,000 --> 00:30:22,000

And it appeared to have come closer than any of the others as well.

557

00:30:22,000 --> 00:30:29,000

And with the cows reacting the way they did, it makes me think that we're getting closer to answers here on Skinwalker Ranch.

558

00:30:29,000 --> 00:30:39,000

When I first contacted you guys and I told you that there might be a weird anomaly in the sky, what was your thought then versus what you think now?

559

00:30:39,000 --> 00:30:41,000

I was really skeptical.

560

00:30:41,000 --> 00:30:43,000

And now we're just kind of freaked out.

561

00:30:43,000 --> 00:30:45,000

It's beyond bizarre.

562

00:30:45,000 --> 00:30:47,000

I don't know how to explain something like that.

563

00:30:47,000 --> 00:30:50,000

I was hoping to see things I'd never seen before and I wasn't disappointed.

564

00:30:50,000 --> 00:30:55,000

Until you come out here and experience this, you think it's like all made.

565

00:30:55,000 --> 00:30:56,000

It's too crazy.

566

00:30:56,000 --> 00:30:57,000

You can't make this up.

567

00:30:57,000 --> 00:31:01,000

I have no explanations for anything going on out here.

568

00:31:01,000 --> 00:31:02,000

All right.

569

00:31:02,000 --> 00:31:03,000

Appreciate it guys.

570

00:31:03,000 --> 00:31:04,000

This is good stuff.

571

00:31:04,000 --> 00:31:05,000

Crazy but good.

572

00:31:05,000 --> 00:31:06,000

Crazy but good.

573

00:31:06,000 --> 00:31:07,000

Yes.

574

00:31:07,000 --> 00:31:08,000

Crazy but good.

575

00:31:16,000 --> 00:31:17,000

Come on in.

576

00:31:17,000 --> 00:31:19,000

I want to get your eyes on this.

577

00:31:19,000 --> 00:31:22,000

Dude, I got to tell you what's going on over my trailer.

578

00:31:25,000 --> 00:31:32,000

I was sleeping pretty good and it's like something pounded into my trailer so hard the trailer actually moved.

579

00:31:34,000 --> 00:31:37,000

Was it the sound itself that woke you up?

580

00:31:37,000 --> 00:31:38,000

The sound woke me up.

581

00:31:38,000 --> 00:31:43,000

I mean, I just stood straight up from it because it was such a bang.

582

00:31:43,000 --> 00:31:49,000

It's like something like it's like got back to my Jeep into the trailer or something.

583

00:31:49,000 --> 00:31:51,000

I mean, the trailer literally did that.

584

00:31:51,000 --> 00:31:52,000

What time did you say it was?

585

00:31:52,000 --> 00:31:54,000

It was right at 5.13 a.m.

586

00:31:54,000 --> 00:31:58,000

You're not going to believe it but that's about the same time I woke up.

587

00:31:58,000 --> 00:32:00,000

I had nightmares.

588

00:32:00,000 --> 00:32:01,000

Really?

589

00:32:01,000 --> 00:32:02,000

It was like chill bumps.

590

00:32:02,000 --> 00:32:08,000

Couldn't go back to sleep so I've been looking around in the sky facing cameras looking at the stars.

591

00:32:08,000 --> 00:32:13,000

And there's something really interesting that I haven't seen before that I'd like to get your eyes on.

592

00:32:13,000 --> 00:32:14,000

Okay.

593

00:32:15,000 --> 00:32:17,000

Well, I see you're looking at Orion.

594

00:32:17,000 --> 00:32:18,000

Yeah.

595

00:32:18,000 --> 00:32:19,000

Okay.

596

00:32:19,000 --> 00:32:20,000

Oh, there.

597

00:32:20,000 --> 00:32:21,000

Right.

598

00:32:21,000 --> 00:32:22,000

What was that?

599

00:32:22,000 --> 00:32:23,000

Okay, that's what I'm trying to figure out.

600

00:32:26,000 --> 00:32:29,000

Yeah, look how bright that's the brightest thing in the sky.

601

00:32:32,000 --> 00:32:35,000

So if I go through frame by frame.

602

00:32:36,000 --> 00:32:37,000

Wow.

603

00:32:38,000 --> 00:32:41,000

Look, I mean that's a greater magnitude than Jupiter.

604

00:32:42,000 --> 00:32:51,000

The flash of light that Eric captured above the ranch on his new surveillance camera system was not only one of the most incredible anomalies that we've documented so far,

605

00:32:51,000 --> 00:32:57,000

but the time it appeared was at the exact moment in the morning when something hit my trailer.

606

00:32:57,000 --> 00:33:01,000

What could be that bright and still just be sitting in one spot in the sky?

607

00:33:01,000 --> 00:33:05,000

We don't have spacecraft that can do an orbit like that.

608

00:33:06,000 --> 00:33:07,000

Right?

609

00:33:08,000 --> 00:33:10,000

Where does it come from?

610

00:33:10,000 --> 00:33:16,000

This phenomenon was even more intense than the UAP we saw just hours earlier with the rest of the team.

611

00:33:16,000 --> 00:33:20,000

Could it really be connected to Eric's nightmares or the force that shook me away?

612

00:33:20,000 --> 00:33:21,000

I don't know.

613

00:33:21,000 --> 00:33:25,000

But it made this night of experiments even more compelling.

614

00:33:25,000 --> 00:33:29,000

And it's pretty convincing that when we poke this ranch, it responds.

615

00:33:30,000 --> 00:33:34,000

Travis, every time we get something new like this, I put it in front of Brandon.

616

00:33:34,000 --> 00:33:35,000

Oh.

617

00:33:35,000 --> 00:33:36,000

We got to get everybody's eyes open.

618

00:33:36,000 --> 00:33:39,000

You know, we got to show Dragon and Tom.

619

00:33:39,000 --> 00:33:41,000

This is the first of its kind.

620

00:33:41,000 --> 00:33:45,000

All right. Appreciate it. That's amazing, Eric. That's an amazing find right there.

621

00:33:55,000 --> 00:34:01,000

Later that afternoon, we asked Brandon to drop everything and come to the ranch and see the data we collected.

622

00:34:01,000 --> 00:34:04,000

That's a cool thing to see.

623

00:34:04,000 --> 00:34:09,000

These are things that we knew he would want to see for himself as soon as possible.

624

00:34:09,000 --> 00:34:10,000

Hey, guys.

625

00:34:11,000 --> 00:34:14,000

I understand that you have a few things to show me.

626

00:34:14,000 --> 00:34:18,000

As always, let's dive in.

627

00:34:18,000 --> 00:34:28,000

We invited some astronomers in a local Utah astronomy organization to bring some very high-tech telescopes with camera platform.

628

00:34:28,000 --> 00:34:30,000

And these are big telescopes.

629

00:34:30,000 --> 00:34:34,000

We set up and launched some rockets up through the anomaly at the triangle.

630

00:34:34,000 --> 00:34:39,000

And they would see this with these very calibrated and expensive telescopes.

631

00:34:39,000 --> 00:34:46,000

And something erased the information from a computer that's not connected to any network.

632

00:34:47,000 --> 00:34:48,000

Really?

633

00:34:48,000 --> 00:34:57,000

It appears that something is deliberately meddling with our systems, with the third-party experts in their systems, every time they're brought on the damn ranch.

634

00:34:58,000 --> 00:35:06,000

With all the craziness going on, we caught on camera a UAP, but this is something that I saw with my own eyes.

635

00:35:06,000 --> 00:35:12,000

And it's probably the most significant UAP that I have seen in my entire time on the ranch.

636

00:35:12,000 --> 00:35:16,000

So I've got it queued up. You've captured the footage. It's right here.

637

00:35:16,000 --> 00:35:17,000

We have it.

638

00:35:17,000 --> 00:35:18,000

Great. Show me.

639

00:35:22,000 --> 00:35:23,000

Wow.

640

00:35:24,000 --> 00:35:26,000

You've got to be kidding.

641

00:35:26,000 --> 00:35:29,000

It was so bright and it looked so close.

642

00:35:29,000 --> 00:35:33,000

This is a spherical-shaped object with structure.

643

00:35:33,000 --> 00:35:35,000

I can zoom in on this if you like.

644

00:35:35,000 --> 00:35:36,000

Yeah, zoom in on it.

645

00:35:36,000 --> 00:35:41,000

And look at there's a dot in the middle of it that everybody could see with their own eyes.

646

00:35:41,000 --> 00:35:42,000

You see right there?

647

00:35:42,000 --> 00:35:45,000

You definitely see that dot in the middle of it right there.

648

00:35:45,000 --> 00:35:49,000

If I had not seen it with my own eyes, I might would be tempted to say,

649

00:35:49,000 --> 00:35:54,000

okay, this is an optical phenomena in the camera lens that is slightly out of focus or something.

650

00:35:54,000 --> 00:35:57,000

But it looked like that to your own naked eye.

651

00:35:57,000 --> 00:35:59,000

It was so bright, it had subtents.

652

00:35:59,000 --> 00:36:00,000

Look at that.

653

00:36:02,000 --> 00:36:03,000

That is extraordinary.

654

00:36:05,000 --> 00:36:07,000

And caught on multiple cameras.

655

00:36:07,000 --> 00:36:11,000

I'm telling you, watching it with my eyes standing there, not trying to hold a camera.

656

00:36:12,000 --> 00:36:20,000

The strange erratic movement is what really cemented to me that there is something extremely strange about this.

657

00:36:20,000 --> 00:36:27,000

I would tell you that I think there's enough data in the video footage that this is more than a UAP, that this is a UFO.

658

00:36:27,000 --> 00:36:31,000

This is an unidentified flying object. It's not just some aerial phenomena.

659

00:36:31,000 --> 00:36:32,000

Wow.

660

00:36:32,000 --> 00:36:39,000

It continues to shock me to this day that we saw yet again another UAP.

661

00:36:39,000 --> 00:36:42,000

And that's not the only thing that happened. It gets better.

662

00:36:42,000 --> 00:36:45,000

You know, the strangeness just continues.

663

00:36:45,000 --> 00:36:49,000

We have something to show you that I've personally never seen before.

664

00:36:49,000 --> 00:36:51,000

In fact, I didn't even think something like this was possible.

665

00:36:51,000 --> 00:36:54,000

So this is a little complex, but boy, is it a story.

666

00:36:54,000 --> 00:36:56,000

So I'll start from my perspective.

667

00:36:56,000 --> 00:36:57,000

Okay.

668

00:36:57,000 --> 00:36:59,000

I was asleep in my trailer.

669

00:36:59,000 --> 00:37:07,000

Something immediately made me raise straight up out of bed, fight or flight reflex.

670

00:37:07,000 --> 00:37:13,000

And let me tell you, as soon as something, anything like this ever happens to me, I always say, hey, telephone, what time is it?

671

00:37:13,000 --> 00:37:15,000

And it tells me 5.13 a.m.

672

00:37:15,000 --> 00:37:19,000

I had about 10 minutes after five o'clock in the morning.

673

00:37:19,000 --> 00:37:26,000

I was asleep just outside of the main control room and I startled awake from what you might consider a night terror.

674

00:37:26,000 --> 00:37:32,000

I decided I would go and look at the surveillance cameras.

675

00:37:32,000 --> 00:37:37,000

As I was looking, something caught my eye and that was a thing that I was looking for.

676

00:37:37,000 --> 00:37:40,000

I said, let me show you what I saw in the cameras.

677

00:37:40,000 --> 00:37:43,000

I will show you the actual footage.

678

00:37:43,000 --> 00:37:45,000

I want to get your eyes on it.

679

00:37:49,000 --> 00:37:54,000

I'm going to frame advance into this so you can see exactly what I saw.

680

00:37:56,000 --> 00:37:57,000

Whoa.

681

00:37:57,000 --> 00:37:59,000

I'm going to show you the footage.

682

00:37:59,000 --> 00:38:01,000

I'm going to show you the footage.

683

00:38:01,000 --> 00:38:03,000

I'm going to show you the footage.

684

00:38:03,000 --> 00:38:05,000

Oh.

685

00:38:05,000 --> 00:38:07,000

Whoa.

686

00:38:07,000 --> 00:38:08,000

Look out.

687

00:38:08,000 --> 00:38:10,000

Oh my gosh.

688

00:38:10,000 --> 00:38:15,000

It is such an intense burst that surpasses anything else in the sky.

689

00:38:15,000 --> 00:38:16,000

Can you play that again?

690

00:38:16,000 --> 00:38:17,000

Yeah.

691

00:38:19,000 --> 00:38:21,000

It's unexplainable, isn't it?

692

00:38:21,000 --> 00:38:23,000

This is crazy.

693

00:38:23,000 --> 00:38:29,000

From everything you are saying, there is absolutely no conventional explanation for this.

694

00:38:29,000 --> 00:38:31,000

Well, let me explain this.

695

00:38:31,000 --> 00:38:34,000

So as part of the search for extraterrestrial intelligence protocol,

696

00:38:34,000 --> 00:38:38,000

one of the first things you do if you think you picked up a radio signal from the stars

697

00:38:38,000 --> 00:38:43,000

or an optical signal from the stars is you carefully track its motion.

698

00:38:43,000 --> 00:38:48,000

And we've got the video here now tracking its motion as stellar motion,

699

00:38:48,000 --> 00:38:50,000

meaning it's following sidereal motion.

700

00:38:50,000 --> 00:38:52,000

That's the motion of the stars.

701

00:38:52,000 --> 00:38:56,000

We cannot build a spacecraft that can do that.

702

00:38:56,000 --> 00:39:01,000

We've been talking about the area over the triangle being some sort of anomaly,

703

00:39:01,000 --> 00:39:06,000

potentially a portal, one end of a wormhole, something.

704

00:39:06,000 --> 00:39:11,000

What if that's the other end of the wormhole?

705

00:39:12,000 --> 00:39:17,000

There's been so much lore around the idea that a portal or a wormhole

706

00:39:17,000 --> 00:39:23,000

between deep space and skinwalker ranch is the gateway for all the strange phenomena that happens here.

707

00:39:23,000 --> 00:39:28,000

Could this anomaly that Eric captured on his skycam be evidence that is true?

708

00:39:28,000 --> 00:39:33,000

I don't know, but I wonder if we're getting closer to an answer.

709

00:39:33,000 --> 00:39:42,000

This escalates the importance of what we're doing and the need to bring in individuals that can help shine a light on this

710

00:39:42,000 --> 00:39:45,000

and at least pull in a more collaborative approach.

711

00:39:45,000 --> 00:39:48,000

Yeah, I might reach out to some folks about some other instruments that might be useful.

712

00:39:48,000 --> 00:39:52,000

We've got logistics to take care of. I think we need to get moving in that direction.

713

00:39:52,000 --> 00:39:56,000

I know you are on a schedule, so I think this is a good place for us to end.

714

00:39:56,000 --> 00:39:57,000

Yeah, let's go.

715

00:39:57,000 --> 00:39:58,000

Was this compelling?

716

00:39:58,000 --> 00:40:00,000

Yeah. Hell yes.

717

00:40:02,000 --> 00:40:08,000

As mysterious events continue, I think it's absolutely true that what we've discovered here

718

00:40:08,000 --> 00:40:14,000

and what we're doing here ongoing could contribute to our understanding of the universe.

719

00:40:14,000 --> 00:40:19,000

We're seeing more strange phenomena over skinwalker ranch, over the triangle,

720

00:40:19,000 --> 00:40:24,000

and now we're seeing a strange flash of light occurring over the ranch to the south.

721

00:40:24,000 --> 00:40:28,000

Are they connected? It seems awfully likely that they are.

722

00:40:28,000 --> 00:40:33,000

We're going to have to find some answers and solve this mystery about what's going on out here.

723

00:40:33,000 --> 00:40:38,000

All of the adversity, the equipment malfunctions, and the great difficulties,

724

00:40:38,000 --> 00:40:43,000

we still captured on camera, stunning UFO activity.

725

00:40:44,000 --> 00:40:50,000

With astronomers present witnessing it, why are these things appearing?

726

00:40:50,000 --> 00:40:56,000

What is the origin and the agenda associated with the phenomenon that we are witnessing at skinwalker ranch?

727

00:40:56,000 --> 00:41:04,000

I think we've just barely scratched the surface of exploring what secrets the ranch holds.

728

00:41:05,000 --> 00:41:13,000

If we were to come in and dig again, would we get a response?

729

00:41:13,000 --> 00:41:16,000

Where you dig makes a difference.

730

00:41:16,000 --> 00:41:18,000

They died.

731

00:41:18,000 --> 00:41:20,000

We're getting a spike in radiation.

732

00:41:20,000 --> 00:41:24,000

There was a spike at 3400. Everybody out of here now.

733

00:41:24,000 --> 00:41:26,000

Eric, are you doing something at 1.6?

734

00:41:26,000 --> 00:41:27,000

I'm not broadcasting.

735

00:41:27,000 --> 00:41:30,000

That's a communication signal or something.

736

00:41:30,000 --> 00:41:32,000

This is out of the carriage house.

737

00:41:32,000 --> 00:41:34,000

What the hell is that?

738

00:41:34,000 --> 00:41:36,000

We captured a UAP on camera.
