

1

00:00:00,000 --> 00:00:06,000

As we survey just over the east field here and in the vicinity of the triangle.

2

00:00:06,000 --> 00:00:07,000

Alright, we're going.

3

00:00:07,000 --> 00:00:13,000

We want to understand whether we're dealing with a persistent effect in those two regions of the ranch.

4

00:00:13,000 --> 00:00:16,000

What? We are getting an anomaly in the air right now.

5

00:00:16,000 --> 00:00:19,000

You're at 300 feet and we're detecting an object.

6

00:00:19,000 --> 00:00:20,000

You're kidding.

7

00:00:20,000 --> 00:00:24,000

I don't know why, but I feel really nervous about this.

8

00:00:24,000 --> 00:00:27,000

We're getting buffeted from the wind a little bit.

9

00:00:27,000 --> 00:00:29,000

Whoa, whoa, whoa.

10

00:00:29,000 --> 00:00:30,000

We're getting our asses kicked.

11

00:00:30,000 --> 00:00:32,000

The helicopter just moved.

12

00:00:32,000 --> 00:00:35,000

Whatever it was, it was trying to push us off.

13

00:00:35,000 --> 00:00:36,000

What can that be?

14

00:00:36,000 --> 00:00:38,000

It tends to have a shape to it.

15

00:00:38,000 --> 00:00:39,000

Oh my gosh.

16

00:00:39,000 --> 00:00:40,000

This is crazy.

17

00:00:40,000 --> 00:00:42,000

You guys caught something amazing.

18

00:00:43,000 --> 00:00:47,000

There is a ranch in northern Utah.

19

00:00:47,000 --> 00:00:54,000

It is considered the epicenter of the strangest and most disturbing phenomena on earth.

20

00:00:54,000 --> 00:01:04,000

Animal mutilations, bizarre UFO sightings, and unusual energies that have proven harmful to humans.

21

00:01:04,000 --> 00:01:10,000

For 20 years, the federal government tried to find answers and failed.

22

00:01:10,000 --> 00:01:17,000

Now, a new team of dedicated scientists, researchers, and experts has taken over.

23

00:01:17,000 --> 00:01:23,000

They are determined to solve the mystery and reveal.

24

00:01:23,000 --> 00:01:28,000

The secret of Skinwalker Ranch.

25

00:01:38,000 --> 00:01:40,000

Oh yeah, they're here.

26

00:01:41,000 --> 00:01:42,000

Hey guys.

27

00:01:42,000 --> 00:01:49,000

After our experiments last week above the triangle and over the east field, where we detected anomalies 300 feet in the air,

28

00:01:49,000 --> 00:01:54,000

and Brandon's helicopter was pushed around by some kind of invisible force.

29

00:01:54,000 --> 00:01:56,000

Man, you got a big crew with you.

30

00:01:56,000 --> 00:02:05,000

We invited the team from Sky Elements out to the ranch to see if they could help us verify and also identify just what could be happening in those two areas.

31

00:02:05,000 --> 00:02:08,000

We got Preston, Tyler, and the team.

32

00:02:08,000 --> 00:02:10,000

Welcome to the Skinwalker Ranch.

33

00:02:10,000 --> 00:02:11,000

Thanks.

34

00:02:11,000 --> 00:02:12,000

Love to be here.

35

00:02:12,000 --> 00:02:19,000

Now, unfortunately, Pete Kelsey was afraid that his lidar scanner may not have gotten accurate data.

36

00:02:19,000 --> 00:02:27,000

So here we are over the east field, and there's where I said, you know what, we've got an anomaly in a spot again.

37

00:02:27,000 --> 00:02:31,000

He advised the vendor looked at this and went, how are you ghosting?

38

00:02:31,000 --> 00:02:38,000

And to cut to the chase, I don't think this is 100% conclusive in either direction.

39

00:02:38,000 --> 00:02:40,000

I agree with that.

40

00:02:40,000 --> 00:02:44,000

Something was clearly happening to the helicopter in both locations.

41

00:02:44,000 --> 00:02:57,000

So now we're hoping that Sky Elements can run a safer and much more comprehensive scan over the triangle and the east field with their cutting edge drone technology to get us better data and hopefully some answers.

42

00:02:57,000 --> 00:03:02,000

I was going to ask how much homework you guys have done on this before you said yes.

43

00:03:02,000 --> 00:03:03,000

Very little.

44

00:03:03,000 --> 00:03:08,000

We've flown in a lot of, you know, complex locations, so we're looking forward to it.

45

00:03:08,000 --> 00:03:09,000

Tell them, Pete.

46

00:03:09,000 --> 00:03:12,000

I've lost three drones here.

47

00:03:12,000 --> 00:03:15,000

One over the triangle where we'll be flying tonight.

48

00:03:15,000 --> 00:03:21,000

It's worth mentioning that during some of our helicopter exercises also we've had unusual air current patterns.

49

00:03:21,000 --> 00:03:27,000

There was a lot of buffeting of the helicopter during our study of this anomaly that we're talking about in the vicinity of the triangle.

50

00:03:27,000 --> 00:03:30,000

So I might see the drone struggling to maintain position.

51

00:03:30,000 --> 00:03:36,000

I don't think we've ever brought expert on where their equipment has operated the way that it was

designed to operate.

52

00:03:36,000 --> 00:03:41,000

And so if you have malfunctions we need to know.

53

00:03:41,000 --> 00:03:45,000

Why don't you tell us a little bit about Sky Elements and what you guys do?

54

00:03:45,000 --> 00:03:53,000

So we take, you know, 100, 200 drones, or even a thousand drones and make a synchronized swarm to make all kinds of images or shapes or anything like that.

55

00:03:53,000 --> 00:03:57,000

And I brought Kyle and Tyler out here with me to help manage everything and get this going today.

56

00:03:57,000 --> 00:03:58,000

Very cool.

57

00:03:58,000 --> 00:04:02,000

We've been wanting to fly a pattern of drones over certain anomalies that we have.

58

00:04:02,000 --> 00:04:07,000

We have two specific anomalies, the east field and the one at the triangle.

59

00:04:07,000 --> 00:04:10,000

In the first place we want to start is the triangle.

60

00:04:10,000 --> 00:04:16,000

The idea of the experiment is to take Sky Elements drones, which are typically used for huge light shows,

61

00:04:16,000 --> 00:04:22,000

and launch them over the triangle and the east field to watch their illuminated formations against the night sky.

62

00:04:22,000 --> 00:04:26,000

That will make it easy to see any deviations in their pre-programmed patterns.

63

00:04:26,000 --> 00:04:34,000

And hopefully determine the exact location of the anomalies that we encountered last week about 300 feet in the air.

64

00:04:34,000 --> 00:04:44,000

The team from Sky Elements will fly the illuminated swarm of 200 drones in a huge rectangular formation over both locations, starting with the triangle.

65

00:04:44,000 --> 00:04:50,000

Eric is going to put GPS devices on the four drones placed at each corner of the swarm.

66

00:04:50,000 --> 00:04:55,000

This will help us monitor the drone's exact position above our target areas during the experiment.

67

00:04:55,000 --> 00:05:00,000

So if anything pushes the drones out of formation or something even crazier happens to them,

68

00:05:00,000 --> 00:05:08,000

those GPS trackers will hopefully help us pinpoint the location of any anomalies and figure out what they could be.

69

00:05:08,000 --> 00:05:20,000

I will be watching from the ground with a terrestrial laser scanner, so we will have visual and forensic point cloud data of your every move when we're done.

70

00:05:20,000 --> 00:05:22,000

So how many drones did you bring with you tonight?

71

00:05:22,000 --> 00:05:23,000

We brought 200 with us.

72

00:05:23,000 --> 00:05:25,000

200, and we're going to be able to fly them all at once?

73

00:05:25,000 --> 00:05:26,000

Absolutely.

74

00:05:26,000 --> 00:05:27,000

Alright, cool.

75

00:05:27,000 --> 00:05:31,000

In addition to the GPS data we're recording during the drone experiment,

76

00:05:31,000 --> 00:05:39,000

Pete Kelsey is going to conduct expansive ground-based 3D LiDAR scans with what's known as a terrestrial scanner.

77

00:05:39,000 --> 00:05:44,000

It emits infrared laser light that will create a detailed map of the target areas,

78

00:05:44,000 --> 00:05:51,000

and at the same time can help identify anomalies that the naked eye isn't able to see.

79

00:05:51,000 --> 00:05:55,000

One more thing, once we get out there I kind of want to see what your flight plan is,

80

00:05:55,000 --> 00:05:58,000

because also we're going to launch a couple rockets tonight,

81

00:05:58,000 --> 00:06:05,000

and I need to make sure we launch the rockets in a place where the recovery and the launch is going to be completely safe from your flight path.

82

00:06:05,000 --> 00:06:06,000

Absolutely.

83

00:06:06,000 --> 00:06:07,000

Once we get over that I can show you all that.

84

00:06:07,000 --> 00:06:08,000

Alright.

85

00:06:08,000 --> 00:06:11,000

Well, I suggest we get out there and get set up, we'll lose a daylight.

86

00:06:11,000 --> 00:06:12,000

Let's do it.

87

00:06:17,000 --> 00:06:20,000

The opportunity to bring drones out here and put them up in the air

88

00:06:20,000 --> 00:06:23,000

is something I'm really excited to witness.

89

00:06:23,000 --> 00:06:25,000

We have a big job ahead of us.

90

00:06:25,000 --> 00:06:29,000

I mean, this is a big setup, and it requires a lot of people to make it work successfully.

91

00:06:29,000 --> 00:06:30,000

Alright, ready?

92

00:06:30,000 --> 00:06:33,000

You got to start getting your stuff out and let's figure out where you got to be.

93

00:06:33,000 --> 00:06:37,000

It's going to be interesting to see if these drones can keep their position,

94

00:06:37,000 --> 00:06:41,000

and if they don't start falling out of the sky like we've seen with other drones.

95

00:06:41,000 --> 00:06:43,000

Which way they go, like that?

96

00:06:44,000 --> 00:06:49,000

While we were getting everything set up at the triangle for the drone experiment,

97

00:06:51,000 --> 00:06:54,000

Okay.

98

00:06:54,000 --> 00:06:59,000

Nearby ranch manager Jim Morse, along with ranch caretakers Candace Lindy and Tom Lewis,

99

00:06:59,000 --> 00:07:01,000

Hey, how you doing?

100

00:07:01,000 --> 00:07:06,000

We're meeting with Lloyd Arrive, a DJ at Nady Voltage Res Radio.

101

00:07:06,000 --> 00:07:12,000

Over the last four years, we've found that bizarre things happen outside the boundaries of Skinwalker Ranch,

102

00:07:12,000 --> 00:07:19,000

and Brandon Fugle had recently heard from Lloyd that he had quite a story to share about a place known as Bottle Hollow.

103

00:07:19,000 --> 00:07:27,000

It's a reservoir about a mile north of the ranch where a lot of strange phenomena have been reported in the past by local residents.

104

00:07:29,000 --> 00:07:31,000

So how long have you lived out here?

105

00:07:31,000 --> 00:07:35,000

Well, I lived here when I was a little kid with my grandparent and grandma.

106

00:07:35,000 --> 00:07:36,000

So you're a ute?

107

00:07:36,000 --> 00:07:39,000

I'm a ute, yeah, I'm northern ute, I'm Uncle Paul Green.

108

00:07:39,000 --> 00:07:40,000

Okay, fantastic.

109

00:07:40,000 --> 00:07:49,000

So you understand the genealogy or the lineage here associated with the Navajo and the ute and the Navajo cursing the ground out here?

110

00:07:49,000 --> 00:07:56,000

Yeah, yeah, it's just the stories that goes on with the natives or with the utes around here.

111

00:07:56,000 --> 00:08:03,000

The lore of the Skinwalker really initiated back in the mid-1800s.

112

00:08:03,000 --> 00:08:09,000

This is when the Navajo and the utes got into more than a squirmish.

113

00:08:09,000 --> 00:08:14,000

The Navajos ended up cursing the utes with the Skinwalker.

114

00:08:14,000 --> 00:08:19,000

A transformation of a human being into an animal form.

115

00:08:19,000 --> 00:08:24,000

Some Native Americans don't talk about it because they don't want that curse put on them.

116

00:08:24,000 --> 00:08:30,000

So there's a level not only of just respect but fear of this lore.

117

00:08:32,000 --> 00:08:36,000

Well, we over there at the Skinwalker Ranch are very respectful.

118

00:08:36,000 --> 00:08:41,000

We're out here as guests, so we appreciate any kind of feedback that you can give us.

119

00:08:41,000 --> 00:08:48,000

So it's my understanding that you got some photographs to show us that you captured over by Bottle Hollow?

120

00:08:48,000 --> 00:08:49,000

Yes, I did.

121

00:08:49,000 --> 00:08:56,000

I created an event that set up on Bottle Hollow and played music on the Fourth of July weekend.

122

00:08:56,000 --> 00:09:05,000

We were tearing down the equipment and this lady that lives on the other side of the lake, she invited us to go get some food.

123

00:09:05,000 --> 00:09:11,000

So we were down the way down and we noticed the canopy up there.

124

00:09:11,000 --> 00:09:13,000

It was a quick snap.

125

00:09:15,000 --> 00:09:18,000

You notice that dot on top of it?

126

00:09:18,000 --> 00:09:19,000

Oh, wow.

127

00:09:19,000 --> 00:09:24,000

But it didn't come towards it, it just went over around and it head towards the Skinwalker.

128

00:09:24,000 --> 00:09:25,000

Wow.

129

00:09:26,000 --> 00:09:27,000

Amazing.

130

00:09:27,000 --> 00:09:28,000

Amazing.

131

00:09:33,000 --> 00:09:39,000

And it was up there and that's where it hovered, went back and forth and then finally disappeared.

132

00:09:39,000 --> 00:09:41,000

Did it make any sound that you could hear?

133

00:09:41,000 --> 00:09:43,000

No, no, no.

134

00:09:43,000 --> 00:09:48,000

It's not a plane, it's not a helicopter, it's just an object that's up there.

135

00:09:49,000 --> 00:09:51,000

That's pretty profound.

136

00:09:51,000 --> 00:09:55,000

We see those from time to time over on Skinwalker.

137

00:09:55,000 --> 00:09:56,000

Yeah.

138

00:09:57,000 --> 00:10:04,000

I look at this photo he brings up on his computer and immediately you can see this is a UAP of some sort.

139

00:10:04,000 --> 00:10:11,000

And it's very similar to the one that we saw right above the account that died in the ranch four years ago.

140

00:10:11,000 --> 00:10:19,000

So connections like this that we're looking for in the surrounding community may help us with the investigation on the ranch.

141

00:10:19,000 --> 00:10:24,000

So when you took this photograph, you were what, maybe a quarter mile away from the lake?

142

00:10:24,000 --> 00:10:25,000

Yeah, yeah.

143

00:10:25,000 --> 00:10:26,000

From Bottle Hollow.

144

00:10:26,000 --> 00:10:28,000

You said it was Sunday morning, was it in the morning?

145

00:10:28,000 --> 00:10:29,000

It was in the afternoon.

146

00:10:29,000 --> 00:10:30,000

Afternoon?

147

00:10:30,000 --> 00:10:33,000

It was an afternoon that it was there.

148

00:10:33,000 --> 00:10:38,000

Is there anything else that you've seen in this area around Bottle Hollow?

149

00:10:39,000 --> 00:10:40,000

Yeah.

150

00:10:41,000 --> 00:10:48,000

One night we're coming up here, me and my nephew, his name is Isaac, and we come up on Bottle Hollow.

151

00:10:49,000 --> 00:10:55,000

And we see the bright light from the same area where this was, but it was in the evening time.

152

00:10:55,000 --> 00:11:00,000

I was flashing my car light and just messing around, but it flashed back.

153

00:11:01,000 --> 00:11:05,000

Then it turned into a red glowing orb.

154

00:11:06,000 --> 00:11:08,000

It was just going so slow.

155

00:11:08,000 --> 00:11:09,000

It was weird.

156

00:11:09,000 --> 00:11:10,000

Yeah, yeah.

157

00:11:10,000 --> 00:11:16,000

It's just becoming more and more clear and evident that Bottle Hollow is a unique and special place.

158

00:11:17,000 --> 00:11:19,000

It's very close to the ranch.

159

00:11:19,000 --> 00:11:24,000

There's obviously some sort of connection to the ranch.

160

00:11:25,000 --> 00:11:28,000

And it deserves more research.

161

00:11:29,000 --> 00:11:33,000

Well, Lloyd, I appreciate that you reached out to us and wanted to share.

162

00:11:34,000 --> 00:11:40,000

Yeah, because we've met so many locals and some that are willing to share their stories, but not so much with the public.

163

00:11:41,000 --> 00:11:52,000

I believe there's a lot of natives that are out there that are willing to talk with you, you know, and I can plug that into my radio station to have them get in contact with you guys.

164

00:11:52,000 --> 00:11:53,000

Okay, that works.

165

00:11:53,000 --> 00:11:55,000

You know, I can do it like right now.

166

00:11:55,000 --> 00:11:56,000

Okay.

167

00:11:56,000 --> 00:11:57,000

You can do it right now.

168

00:11:57,000 --> 00:11:58,000

That's a lot of great.

169

00:11:58,000 --> 00:11:59,000

You know.

170

00:11:59,000 --> 00:12:07,000

Lloyd offered to put out a message on his radio station, calling for people to come forward with their stories.

171

00:12:07,000 --> 00:12:09,000

And that's very valuable.

172

00:12:10,000 --> 00:12:18,000

I like to give out information to anyone out there within the reservation that would like to get in contact with the skin walking ranch.

173

00:12:18,000 --> 00:12:26,000

If you've seen anything around the ball of hollow or any phenomenon within the basin, get in contact and share your stories.

174

00:12:27,000 --> 00:12:36,000

People aren't so willing right now anyway to share their stories in an official way, but with Lloyd's help, that will change.

175

00:12:36,000 --> 00:12:41,000

And thanks for listening to Native Votage Res Radio 90.3 FM.

176

00:12:41,000 --> 00:12:42,000

Cool.

177

00:12:42,000 --> 00:12:43,000

Thank you very much.

178

00:12:43,000 --> 00:12:44,000

Well, thank you guys.

179

00:12:44,000 --> 00:12:45,000

Thank you very much.

180

00:12:45,000 --> 00:12:46,000

Yeah, thanks.

181

00:12:46,000 --> 00:12:47,000

It's been a pleasure.

182

00:12:47,000 --> 00:12:48,000

Well, see you.

183

00:12:48,000 --> 00:12:49,000

Yes, thank you.

184

00:13:00,000 --> 00:13:03,000

I'm going to take our GPS modules and then we're going to do the experiment.

185

00:13:03,000 --> 00:13:04,000

So we're going to go over here and get it all done.

186

00:13:04,000 --> 00:13:05,000

All right, fantastic.

187

00:13:05,000 --> 00:13:12,000

Once the sun went down, we were finally ready to begin our experiment at the 300 foot altitude above the triangle.

188

00:13:13,000 --> 00:13:18,000

As the team from Sky Elements did their final check on the 200 drones.

189

00:13:18,000 --> 00:13:19,000

Perfect.

190

00:13:19,000 --> 00:13:22,000

Eric and I finished securing the GPS devices.

191

00:13:22,000 --> 00:13:23,000

Perfect.

192

00:13:23,000 --> 00:13:28,000

This will be interesting and I pretty much guarantee it's never been tried before.

193

00:13:28,000 --> 00:13:29,000

Oh, I'd agree with that.

194

00:13:30,000 --> 00:13:35,000

And Pete Kelsey got his LIDAR device ready to begin scanning the drones once they were launched.

195

00:13:36,000 --> 00:13:37,000

Here we go.

196

00:13:38,000 --> 00:13:40,000

I'm really excited to see the data we get from that.

197

00:13:40,000 --> 00:13:41,000

I think it's going to be really cool.

198

00:13:41,000 --> 00:13:42,000

Yeah.

199

00:13:44,000 --> 00:13:45,000

Hey, how's it going?

200

00:13:45,000 --> 00:13:46,000

Oh, we're getting there.

201

00:13:46,000 --> 00:13:47,000

We're about ready.

202

00:13:47,000 --> 00:13:48,000

How are y'all doing?

203

00:13:48,000 --> 00:13:50,000

We're trying to make sure everything runs smooth.

204

00:13:50,000 --> 00:13:52,000

For now, everything looks like it's good to go.

205

00:13:52,000 --> 00:13:53,000

We're ready to fly.

206

00:13:53,000 --> 00:13:54,000

Fantastic.

207

00:13:54,000 --> 00:13:55,000

New drones armed.

208

00:13:56,000 --> 00:13:57,000

Turning on lights.

209

00:13:59,000 --> 00:14:00,000

Lights are on.

210

00:14:00,000 --> 00:14:02,000

All right, we have drones armed, guys.

211

00:14:02,000 --> 00:14:04,000

All right, we're good here.

212

00:14:04,000 --> 00:14:09,000

Five, four, three, two, one.

213

00:14:11,000 --> 00:14:12,000

Oh, wow.

214

00:14:12,000 --> 00:14:13,000

Look at that.

215

00:14:18,000 --> 00:14:19,000

Look at that.

216

00:14:21,000 --> 00:14:22,000

Okay.

217

00:14:22,000 --> 00:14:24,000

I'm broadcasting 1.6 gigahertz.

218

00:14:26,000 --> 00:14:32,000

Right after the drones were launched, Eric started broadcasting the 1.6 gigahertz frequency signal

219

00:14:32,000 --> 00:14:35,000

that we recorded on the ranch during our previous experiments.

220

00:14:35,000 --> 00:14:38,000

All right, we'll be back after we launch the rocket.

221

00:14:38,000 --> 00:14:39,000

Okay.

222

00:14:39,000 --> 00:14:40,000

Let's go.

223

00:14:40,000 --> 00:14:44,000

And then Thomas and I headed to a position just west of the triangle

224

00:14:44,000 --> 00:14:47,000

so we could get a rocket ready to launch.

225

00:14:48,000 --> 00:14:51,000

Both of these tools seem to have stimulated phenomena to occur in the past,

226

00:14:51,000 --> 00:14:55,000

so we wanted to see how it might affect the drone's one.

227

00:14:56,000 --> 00:14:58,000

They just moved into place.

228

00:14:58,000 --> 00:15:00,000

Look how tight they are.

229

00:15:00,000 --> 00:15:01,000

Yep, yep.

230

00:15:01,000 --> 00:15:03,000

That looks perfect.

231

00:15:04,000 --> 00:15:05,000

All right, we're ready to roll.

232

00:15:06,000 --> 00:15:08,000

Show's rolling.

233

00:15:10,000 --> 00:15:11,000

They're moving.

234

00:15:11,000 --> 00:15:12,000

Yep.

235

00:15:15,000 --> 00:15:18,000

It should be just about over the triangle here, guys.

236

00:15:19,000 --> 00:15:20,000

Hey, look right here.

237

00:15:20,000 --> 00:15:21,000

What we got?

238

00:15:21,000 --> 00:15:22,000

Hey, look.

239

00:15:22,000 --> 00:15:24,000

We got drones that are out of sequence.

240

00:15:24,000 --> 00:15:25,000

Yeah, we do.

241

00:15:25,000 --> 00:15:28,000

There are several in the line right down the middle of it.

242

00:15:29,000 --> 00:15:30,000

Hey, Eric.

243

00:15:30,000 --> 00:15:32,000

Yeah, go ahead, Travis.

244

00:15:32,000 --> 00:15:34,000

Our cell hold drones out of line.

245

00:15:34,000 --> 00:15:36,000

We can see from our perspective.

246

00:15:36,000 --> 00:15:38,000

They are clearly out of place.

247

00:15:38,000 --> 00:15:40,000

Yeah, we've got eyes on that.

248

00:15:41,000 --> 00:15:43,000

When the 200 drones were first launched,

249

00:15:43,000 --> 00:15:46,000

their pre-programmed formation looked perfect.

250

00:15:46,000 --> 00:15:50,000

They were all in a tight, uniform pattern and lit up beautifully.

251

00:15:50,000 --> 00:15:51,000

Where are they?

252

00:15:51,000 --> 00:15:54,000

The pattern is directly over the triangle right now, Travis.

253

00:15:54,000 --> 00:15:56,000

They're going right through the anomaly.

254

00:15:57,000 --> 00:16:01,000

But then, right when they reached the 300 foot spot above the triangle,

255

00:16:01,000 --> 00:16:05,000

several of them were clearly diverted out of formation by something.

256

00:16:05,000 --> 00:16:08,000

Yeah, they're all out of position.

257

00:16:09,000 --> 00:16:11,000

Our drones use very sophisticated GPSs.

258

00:16:11,000 --> 00:16:12,000

We have a Wi-Fi network.

259

00:16:12,000 --> 00:16:14,000

We have a redundant RF network.

260

00:16:14,000 --> 00:16:16,000

These are precise positionings that we maintain.

261

00:16:16,000 --> 00:16:19,000

So having those drones out of position in that grid pattern

262

00:16:19,000 --> 00:16:21,000

was something very unusual.

263

00:16:21,000 --> 00:16:22,000

Hey, Tyler.

264

00:16:23,000 --> 00:16:25,000

I just lost three drones.

265

00:16:25,000 --> 00:16:26,000

Losing four?

266

00:16:26,000 --> 00:16:27,000

Losing five.

267

00:16:27,000 --> 00:16:29,000

Well, how many drones do you have connected?

268

00:16:29,000 --> 00:16:30,000

Two.

269

00:16:30,000 --> 00:16:32,000

So I have 80 disconnected.

270

00:16:32,000 --> 00:16:33,000

Uh-oh.

271

00:16:33,000 --> 00:16:34,000

Fail safe.

272

00:16:35,000 --> 00:16:36,000

Look at that.

273

00:16:37,000 --> 00:16:38,000

What is this?

274

00:16:38,000 --> 00:16:39,000

They're coming home.

275

00:16:40,000 --> 00:16:42,000

Hey, guys, everybody stand by close to the grid.

276

00:16:42,000 --> 00:16:44,000

We need to get these guys unplugged quick.

277

00:16:44,000 --> 00:16:45,000

I've never seen that.

278

00:16:47,000 --> 00:16:49,000

Something happened because those drones

279

00:16:49,000 --> 00:16:51,000

had to return to the ground unexpectedly.

280

00:16:51,000 --> 00:16:54,000

So they all landed way sooner than they were supposed to.

281

00:16:54,000 --> 00:16:56,000

It's nothing that I can explain.

282

00:16:57,000 --> 00:16:58,000

Let's head back over there, shall we?

283

00:16:58,000 --> 00:16:59,000

Let's head back.

284

00:16:59,000 --> 00:17:02,000

We have only seen those drones return to home

285

00:17:02,000 --> 00:17:04,000

like that in extreme temperatures.

286

00:17:04,000 --> 00:17:08,000

When we're working in the snow or the excess heat,

287

00:17:08,000 --> 00:17:10,000

when those batteries are really getting pushed to the limit.

288

00:17:10,000 --> 00:17:12,000

But out here on Skinwalker Ranch,

289

00:17:12,000 --> 00:17:15,000

we only saw about 60 degrees at the lowest,

290

00:17:15,000 --> 00:17:17,000

and it's nothing that should have happened.

291

00:17:18,000 --> 00:17:20,000

Something interesting we're seeing,

292

00:17:20,000 --> 00:17:23,000

it appears the batteries are draining quicker than usual

293

00:17:23,000 --> 00:17:24,000

and what we usually see.

294

00:17:24,000 --> 00:17:25,000

How much quicker?

295

00:17:25,000 --> 00:17:27,000

We're seeing about 60 degrees.

296

00:17:27,000 --> 00:17:29,000

We usually see how much quicker.

297

00:17:29,000 --> 00:17:30,000

I don't know that I can quantify it,

298

00:17:30,000 --> 00:17:31,000

but I just noticed that some of them

299

00:17:31,000 --> 00:17:33,000

seem to be decreasing quicker than usual.

300

00:17:33,000 --> 00:17:34,000

Wow.

301

00:17:34,000 --> 00:17:36,000

Well then maybe we need to flack with it.

302

00:17:37,000 --> 00:17:40,000

So Eric warned us that weird things happen with electronics,

303

00:17:40,000 --> 00:17:42,000

and we're very confident in our systems.

304

00:17:42,000 --> 00:17:43,000

We've done hundreds of drone shows,

305

00:17:43,000 --> 00:17:45,000

but there is definitely something going on here

306

00:17:45,000 --> 00:17:47,000

that affects the batteries, the drone positioning,

307

00:17:47,000 --> 00:17:50,000

all kinds of things that are just very unusual

308

00:17:50,000 --> 00:17:51,000

and very unexplainable.

309

00:17:52,000 --> 00:17:54,000

So we have a couple options for what we can fly next.

310

00:17:54,000 --> 00:17:56,000

We can fly the grid again

311

00:17:56,000 --> 00:17:58,000

and see if we see the exact same behavior.

312

00:17:59,000 --> 00:18:00,000

Repeatability is really good.

313

00:18:00,000 --> 00:18:01,000

And we would do the exact same thing,

314

00:18:01,000 --> 00:18:03,000

we still got a rocket ready to go.

315

00:18:03,000 --> 00:18:04,000

Yes, I agree.

316

00:18:04,000 --> 00:18:06,000

Repeatability, given what we've seen

317

00:18:06,000 --> 00:18:08,000

and how unusual it is,

318

00:18:08,000 --> 00:18:10,000

I'd love to see if it would happen again.

319

00:18:10,000 --> 00:18:11,000

Oh yeah.

320

00:18:13,000 --> 00:18:14,000

All right, drones are ready.

321

00:18:14,000 --> 00:18:15,000

Let's roll.

322

00:18:15,000 --> 00:18:17,000

Preston, whenever you're ready.

323

00:18:17,000 --> 00:18:18,000

All right.

324

00:18:22,000 --> 00:18:23,000

Oh, there they are.

325

00:18:23,000 --> 00:18:24,000

I see them.

326

00:18:24,000 --> 00:18:25,000

There we go.

327

00:18:25,000 --> 00:18:27,000

Oh, that is cool.

328

00:18:27,000 --> 00:18:28,000

Yeah, that is cool.

329

00:18:30,000 --> 00:18:31,000

We are hot.

330

00:18:32,000 --> 00:18:34,000

The rocket is armed and ready to launch.

331

00:18:35,000 --> 00:18:36,000

Copy you.

332

00:18:36,000 --> 00:18:39,000

In three, two, one.

333

00:18:43,000 --> 00:18:44,000

Rocket just went, guys.

334

00:18:46,000 --> 00:18:47,000

Oh, there it goes.

335

00:18:47,000 --> 00:18:48,000

Oh, oh, oh, look at that one.

336

00:18:48,000 --> 00:18:49,000

Oh, we're following, we're following.

337

00:18:49,000 --> 00:18:50,000

One's following.

338

00:18:51,000 --> 00:18:52,000

Yeah, they're going to run into each other.

339

00:18:52,000 --> 00:18:53,000

They're going to run into each other.

340

00:18:53,000 --> 00:18:54,000

Holy cow, look at that.

341

00:18:54,000 --> 00:18:55,000

Look at those other ones.

342

00:18:55,000 --> 00:18:56,000

They're not coming down.

343

00:18:56,000 --> 00:18:57,000

Are they bringing them down?

344

00:18:57,000 --> 00:18:59,000

Well, that one's way, whoa.

345

00:18:59,000 --> 00:19:01,000

Whoa, what's going on there?

346

00:19:02,000 --> 00:19:03,000

And I've lost all of them,

347

00:19:03,000 --> 00:19:05,000

almost all of them disconnected right now.

348

00:19:10,000 --> 00:19:11,000

It's going crazy.

349

00:19:11,000 --> 00:19:12,000

Look at it, way out.

350

00:19:12,000 --> 00:19:13,000

Look at that.

351

00:19:13,000 --> 00:19:15,000

Just as soon as the swarm of drones

352

00:19:15,000 --> 00:19:16,000

flew over the triangle,

353

00:19:16,000 --> 00:19:18,000

something interfered with their controls

354

00:19:18,000 --> 00:19:22,000

and inexplicably altered their formation.

355

00:19:22,000 --> 00:19:25,000

Which Tyler and the team from Sky Elements

356

00:19:25,000 --> 00:19:27,000

had never experienced before, ever.

357

00:19:27,000 --> 00:19:29,000

This is really something.

358

00:19:29,000 --> 00:19:31,000

You can see them moving,

359

00:19:31,000 --> 00:19:33,000

trying to stabilize themselves.

360

00:19:33,000 --> 00:19:35,000

The amount of variability we saw

361

00:19:35,000 --> 00:19:37,000

specifically in the front and middle of that grin

362

00:19:37,000 --> 00:19:38,000

is not something we're used to seeing.

363

00:19:38,000 --> 00:19:39,000

We saw almost all of them disconnect,

364

00:19:39,000 --> 00:19:41,000

which is not something we've ever seen before.

365

00:19:42,000 --> 00:19:43,000

Y'all, look, do you see the line

366

00:19:43,000 --> 00:19:44,000

suddenly straightened up?

367

00:19:44,000 --> 00:19:45,000

I think they're moving to the south.

368

00:19:45,000 --> 00:19:46,000

Is that what they're doing?

369

00:19:46,000 --> 00:19:47,000

It's straightened up.

370

00:19:47,000 --> 00:19:48,000

It's getting better.

371

00:19:48,000 --> 00:19:49,000

30 seconds of landing.

372

00:19:49,000 --> 00:19:52,000

Something over the triangle clearly caused it,

373

00:19:52,000 --> 00:19:55,000

because as soon as the drones left that area to land,

374

00:19:55,000 --> 00:19:57,000

they immediately came back online

375

00:19:57,000 --> 00:20:00,000

and reassembled in their pre-programmed formation.

376

00:20:02,000 --> 00:20:03,000

We could what if all night,

377

00:20:03,000 --> 00:20:05,000

but what we have now is data.

378

00:20:05,000 --> 00:20:09,000

We have data that says there's something weird there.

379

00:20:09,000 --> 00:20:11,000

We've done so many experiments,

380

00:20:11,000 --> 00:20:14,000

trying to just get a handle on what could be causing the anomaly.

381

00:20:14,000 --> 00:20:16,000

We shined big lasers through it.

382

00:20:16,000 --> 00:20:17,000

We fired rockets through it.

383

00:20:17,000 --> 00:20:20,000

We've flown around it with LiDAR, GPS,

384

00:20:20,000 --> 00:20:21,000

and all sorts of things.

385

00:20:21,000 --> 00:20:24,000

And every single time we do something,

386

00:20:24,000 --> 00:20:29,000

we seem to find some effect on our experimental system.

387

00:20:29,000 --> 00:20:33,000

So there's no explanation that really fits

388

00:20:33,000 --> 00:20:37,000

unless it's some magic physics that we don't understand

389

00:20:37,000 --> 00:20:39,000

that's happening very localized up there.

390

00:20:39,000 --> 00:20:40,000

For sure.

391

00:20:40,000 --> 00:20:42,000

I'm anxious to fly similar patterns,

392

00:20:42,000 --> 00:20:44,000

if not exactly the same pattern,

393

00:20:44,000 --> 00:20:46,000

in another interesting location on the ranch

394

00:20:46,000 --> 00:20:48,000

off to the east, where we've seen

395

00:20:48,000 --> 00:20:51,000

some very interesting effects in our surveys.

396

00:20:51,000 --> 00:20:52,000

Let's do it.

397

00:20:52,000 --> 00:20:53,000

Yeah, let's do it.

398

00:20:53,000 --> 00:20:57,000

After what we saw happen to the drone swarm at the Triangle,

399

00:20:57,000 --> 00:21:01,000

we couldn't wait to move about a half a mile over to the east field

400

00:21:01,000 --> 00:21:03,000

to run the experiment again.

401

00:21:03,000 --> 00:21:06,000

Since we've also detected aerial anomalies there in the past,

402

00:21:06,000 --> 00:21:08,000

we were hoping to get more clues

403

00:21:08,000 --> 00:21:12,000

about what could be causing all these crazy phenomena on the ranch.

404

00:21:12,000 --> 00:21:16,000

Where we're set up right here is almost exactly underneath

405

00:21:16,000 --> 00:21:18,000

the anomaly that your photogrammetry showed.

406

00:21:18,000 --> 00:21:22,000

Now, when he came out and did a photogrammetry scan of this area,

407

00:21:22,000 --> 00:21:25,000

for some reason, there were multiple pictures

408

00:21:25,000 --> 00:21:29,000

showing some type of spire that went up into the air several hundred feet.

409

00:21:29,000 --> 00:21:31,000

So there have been anomalies captured

410

00:21:31,000 --> 00:21:35,000

in two different times here a year apart.

411

00:21:35,000 --> 00:21:38,000

One year ago, using photogrammetry above the east field,

412

00:21:38,000 --> 00:21:42,000

Pete Kelsey detected a massive pillar-shaped anomaly.

413

00:21:42,000 --> 00:21:46,000

Just last week, when Pete scanned the same area with a LiDAR device

414

00:21:46,000 --> 00:21:50,000

from Brandon's helicopter, we were stunned when he detected

415

00:21:50,000 --> 00:21:52,000

something nearly 300 feet in the air,

416

00:21:52,000 --> 00:21:56,000

which matched up perfectly with the top of the pillar.

417

00:21:56,000 --> 00:21:57,000

I say we get these things in the air.

418

00:21:57,000 --> 00:21:58,000

Yeah, let's do it.

419

00:21:58,000 --> 00:21:59,000

Let's get it going.

420

00:21:59,000 --> 00:22:00,000

All right.

421

00:22:01,000 --> 00:22:03,000

Let's hook the igniter up.

422

00:22:03,000 --> 00:22:05,000

Thirty seconds to take off.

423

00:22:05,000 --> 00:22:07,000

Thirty seconds, guys!

424

00:22:08,000 --> 00:22:10,000

Ten seconds to lift.

425

00:22:12,000 --> 00:22:13,000

Oh, f\*\*\*!

426

00:22:13,000 --> 00:22:15,000

Had one go early.

427

00:22:15,000 --> 00:22:17,000

Yeah, I was gonna say, what the...

428

00:22:17,000 --> 00:22:18,000

I've never seen that.

429

00:22:18,000 --> 00:22:19,000

You know what?

430

00:22:19,000 --> 00:22:20,000

What?

431

00:22:20,000 --> 00:22:21,000

That's what I'm saying.

432

00:22:21,000 --> 00:22:24,000

Inexplicably, before Preston launched the drone swarm,

433

00:22:24,000 --> 00:22:30,000

one just took off on its own and ascended to its pre-programmed position.

434

00:22:30,000 --> 00:22:31,000

I've never seen that.

435

00:22:31,000 --> 00:22:32,000

GPS is on.

436

00:22:32,000 --> 00:22:34,000

Stay with it.

437

00:22:34,000 --> 00:22:36,000

Remain to take off.

438

00:22:36,000 --> 00:22:39,000

Hey, hey, here we go.

439

00:22:39,000 --> 00:22:41,000

They had one go early, Travis.

440

00:22:41,000 --> 00:22:42,000

I saw that.

441

00:22:42,000 --> 00:22:45,000

It's a very flying around by itself, ain't it?

442

00:22:45,000 --> 00:22:46,000

Yeah.

443

00:22:46,000 --> 00:22:47,000

One of them's acting.

444

00:22:47,000 --> 00:22:49,000

We all look, it flew up to it.

445

00:22:49,000 --> 00:22:50,000

Hey, have we got holes?

446

00:22:50,000 --> 00:22:51,000

Yeah, we've got it.

447

00:22:51,000 --> 00:22:52,000

How many?

448

00:22:53,000 --> 00:22:57,000

Once the swarm launched and joined the one that went rogue,

449

00:22:57,000 --> 00:22:59,000

almost immediately several of them went offline

450

00:22:59,000 --> 00:23:01,000

and fell out of formation.

451

00:23:01,000 --> 00:23:02,000

Four.

452

00:23:02,000 --> 00:23:03,000

I think there's four missing.

453

00:23:03,000 --> 00:23:04,000

Five.

454

00:23:04,000 --> 00:23:07,000

It made me think it could be connected to the anomaly

455

00:23:07,000 --> 00:23:09,000

that we've repeatedly detected there.

456

00:23:09,000 --> 00:23:12,000

So I wanted to see if we could stimulate some hard evidence to prove it.

457

00:23:12,000 --> 00:23:14,000

Rockets going hot.

458

00:23:14,000 --> 00:23:15,000

Everybody clear the rocket.

459

00:23:15,000 --> 00:23:22,000

Armed ignition in five, four, three, two, one.

460

00:23:22,000 --> 00:23:23,000

Rockets going.

461

00:23:28,000 --> 00:23:29,000

Where's the shoot?

462

00:23:29,000 --> 00:23:30,000

There it goes.

463

00:23:30,000 --> 00:23:31,000

There we go.

464

00:23:32,000 --> 00:23:36,000

I mean, that's a pretty nice, tight formation right there.

465

00:23:36,000 --> 00:23:38,000

It's a lot tighter than we'd see in the other location.

466

00:23:38,000 --> 00:23:39,000

Yeah, near the triangle.

467

00:23:39,000 --> 00:23:41,000

It wasn't like that.

468

00:23:41,000 --> 00:23:44,000

Oh, I ain't starting to see some wiggle in the middle.

469

00:23:44,000 --> 00:23:46,000

Yeah, right in the middle.

470

00:23:46,000 --> 00:23:47,000

Yeah, look in the middle.

471

00:23:47,000 --> 00:23:48,000

Look in the middle.

472

00:23:48,000 --> 00:23:51,000

Guys, the drone are kind of wiggling around.

473

00:23:51,000 --> 00:23:53,000

There's no wind at all.

474

00:23:53,000 --> 00:23:57,000

All right, as you come this way, look, the ones in the middle got stable again.

475

00:23:57,000 --> 00:24:01,000

So when we were right over there, there was some instability in the.

476

00:24:01,000 --> 00:24:03,000

That's right where you were in the helicopter, right?

477

00:24:03,000 --> 00:24:05,000

Yeah, you're exactly right.

478

00:24:05,000 --> 00:24:08,000

The closer that these drones flew this anomaly up in the air,

479

00:24:08,000 --> 00:24:11,000

the more interference that we were experiencing,

480

00:24:11,000 --> 00:24:13,000

the harder time they had staying in their pattern.

481

00:24:13,000 --> 00:24:16,000

It'll be interesting to see what kind of data we get from Eric,

482

00:24:16,000 --> 00:24:20,000

his GPS sensors, from Pete, his terrestrial scanner,

483

00:24:20,000 --> 00:24:23,000

as well as the data from Pete's drone up above.

484

00:24:23,000 --> 00:24:25,000

We got something right there.

485

00:24:25,000 --> 00:24:26,000

Right where?

486

00:24:26,000 --> 00:24:28,000

Right where my light's at.

487

00:24:28,000 --> 00:24:30,000

Yeah, that's it right there.

488

00:24:30,000 --> 00:24:34,000

Travis, this just changed directions.

489

00:24:34,000 --> 00:24:36,000

What is it?

490

00:24:38,000 --> 00:24:41,000

There it is, right there.

491

00:24:41,000 --> 00:24:45,000

There's a thing hovering over the launch site.

492

00:24:45,000 --> 00:24:47,000

Wow.

493

00:24:47,000 --> 00:24:48,000

Right there.

494

00:24:48,000 --> 00:24:50,000

That's crazy.

495

00:24:50,000 --> 00:24:52,000

It just disappeared.

496

00:24:52,000 --> 00:24:55,000

It went up into the cloud.

497

00:24:55,000 --> 00:24:57,000

They're coming back.

498

00:24:57,000 --> 00:24:59,000

Yeah, they're moving down now.

499

00:24:59,000 --> 00:25:02,000

One of the brightest UAPs I've ever seen on the ranch

500

00:25:02,000 --> 00:25:06,000

appeared and moved slowly across the sky for several seconds,

501

00:25:06,000 --> 00:25:08,000

but then it just vanished.

502

00:25:08,000 --> 00:25:09,000

It was bright.

503

00:25:09,000 --> 00:25:10,000

Really bright.

504

00:25:10,000 --> 00:25:12,000

So where did it disappear?

505

00:25:12,000 --> 00:25:15,000

It came from the west and then it looked like it was below the cloud.

506

00:25:15,000 --> 00:25:17,000

And it disappeared.

507

00:25:17,000 --> 00:25:19,000

Hey guys, what do we have going on?

508

00:25:19,000 --> 00:25:21,000

Y'all didn't happen to see the thing overhead just a few minutes ago, did you?

509

00:25:21,000 --> 00:25:22,000

I actually did, yeah.

510

00:25:22,000 --> 00:25:23,000

You saw it?

511

00:25:23,000 --> 00:25:24,000

It was right.

512

00:25:24,000 --> 00:25:25,000

We both saw it.

513

00:25:25,000 --> 00:25:26,000

It was really bright.

514

00:25:26,000 --> 00:25:27,000

It was actually really low.

515

00:25:27,000 --> 00:25:28,000

It didn't really add up.

516

00:25:28,000 --> 00:25:29,000

It was like below the clouds.

517

00:25:29,000 --> 00:25:30,000

I agree.

518

00:25:30,000 --> 00:25:31,000

Yeah.

519

00:25:31,000 --> 00:25:33,000

And then it looked like it went into the cloud and then it never came out the other side.

520

00:25:33,000 --> 00:25:34,000

It never came out.

521

00:25:34,000 --> 00:25:35,000

I've got a question for you.

522

00:25:35,000 --> 00:25:38,000

You described something unusual that happened.

523

00:25:38,000 --> 00:25:40,000

Can you go through that again?

524

00:25:40,000 --> 00:25:43,000

We've never seen it to where we can see that all the drones are connected,

525

00:25:43,000 --> 00:25:46,000

but we can't communicate with them in some form or fashion.

526

00:25:46,000 --> 00:25:49,000

What was also very interesting is on this last flight,

527

00:25:49,000 --> 00:25:53,000

we had one drone start right before all the others.

528

00:25:53,000 --> 00:25:54,000

And we've never seen that.

529

00:25:54,000 --> 00:25:55,000

They all go together.

530

00:25:55,000 --> 00:25:56,000

They all have the same signal.

531

00:25:56,000 --> 00:26:00,000

Well, that one drone that took off was actually in the center of that region of the drones

532

00:26:00,000 --> 00:26:02,000

that didn't want to connect.

533

00:26:02,000 --> 00:26:04,000

Skylimits has done shows all over the country.

534

00:26:04,000 --> 00:26:05,000

We've done hundreds of shows.

535

00:26:05,000 --> 00:26:08,000

I've sent up thousands of drones and there's the issues we've seen this evening

536

00:26:08,000 --> 00:26:11,000

that have been things we've never seen before.

537

00:26:11,000 --> 00:26:13,000

Every single expert that we've brought on,

538

00:26:13,000 --> 00:26:19,000

I think the ranch is the perfect record of them seeing something they've never seen before.

539

00:26:19,000 --> 00:26:22,000

I think this experiment was one of the best things we've done

540

00:26:22,000 --> 00:26:24,000

with precision, with so many data points.

541

00:26:24,000 --> 00:26:29,000

You know how anxious I am to go pull the data off that laser scanner.

542

00:26:29,000 --> 00:26:30,000

Yeah.

543

00:26:30,000 --> 00:26:33,000

Between Eric's surveillance cameras and Pete's scanning devices,

544

00:26:33,000 --> 00:26:37,000

I can't wait to see what comes out in the data once it's all processed.

545

00:26:37,000 --> 00:26:42,000

Hopefully, we'll have more visual evidence of whatever we saw in the sky

546

00:26:42,000 --> 00:26:45,000

and be able to identify just what it was.

547

00:26:45,000 --> 00:26:47,000

Well guys, I think this was amazing.

548

00:26:47,000 --> 00:26:51,000

And we've got a lot of data to kind of absorb and analyze and think about,

549

00:26:51,000 --> 00:26:54,000

but I appreciate it and can't wait for you to pull the data off.

550

00:26:54,000 --> 00:26:57,000

But I say it's getting late. Let's call it a night.

551

00:26:57,000 --> 00:26:58,000

Great job, guys.

552

00:26:58,000 --> 00:26:59,000

Sounds like a plan.

553

00:26:59,000 --> 00:27:00,000

Thanks a lot.

554

00:27:00,000 --> 00:27:01,000

Thanks everybody.

555

00:27:01,000 --> 00:27:02,000

Thank you guys.

556

00:27:02,000 --> 00:27:03,000

Thanks for having us.

557

00:27:10,000 --> 00:27:12,000

We've got Pete Kelsey Q'd up for video conference.

558

00:27:12,000 --> 00:27:16,000

He's got a huge amount of data to share with us from the drone experiments

559

00:27:16,000 --> 00:27:19,000

that we've done out of the east field of the triangle.

560

00:27:19,000 --> 00:27:21,000

So I think we should just jump right in.

561

00:27:21,000 --> 00:27:22,000

Love to see it.

562

00:27:22,000 --> 00:27:26,000

Eric and I spent a couple of days after the drone experiment

563

00:27:26,000 --> 00:27:28,000

reviewing our surveillance footage of the UAP.

564

00:27:28,000 --> 00:27:29,000

Hey Pete.

565

00:27:29,000 --> 00:27:30,000

Hey guys.

566

00:27:30,000 --> 00:27:36,000

So we were eager to compare it to Pete's data that he collected with the terrestrial LiDAR scanner.

567

00:27:36,000 --> 00:27:40,000

I'd like to release the screen to you and see what you've got.

568

00:27:40,000 --> 00:27:43,000

Here we go. He's field.

569

00:27:43,000 --> 00:27:47,000

You can see the mesa here in the background.

570

00:27:47,000 --> 00:27:48,000

What is that?

571

00:27:48,000 --> 00:27:50,000

He's got to be the rocket.

572

00:27:51,000 --> 00:27:53,000

Well no, no, I'm talking about right there.

573

00:27:53,000 --> 00:27:54,000

Oh.

574

00:27:56,000 --> 00:27:57,000

That is way over there.

575

00:27:57,000 --> 00:27:58,000

That rocket never was.

576

00:27:58,000 --> 00:28:00,000

That's a mile away.

577

00:28:00,000 --> 00:28:03,000

We were shooting the rocket down right here, right?

578

00:28:03,000 --> 00:28:05,000

So what on earth is that?

579

00:28:05,000 --> 00:28:07,000

Exactly.

580

00:28:07,000 --> 00:28:08,000

That's my question.

581

00:28:08,000 --> 00:28:14,000

I want to know what in the heck it is that's showing up out there on the very edge of what that instrument can measure.

582

00:28:15,000 --> 00:28:19,000

That's an exact same spot where we saw the UAP come in.

583

00:28:19,000 --> 00:28:24,000

Yeah, and that dot up there to me seems a little bit unexplainable

584

00:28:24,000 --> 00:28:29,000

and is at about the right altitude of the thing that we saw in the sky.

585

00:28:29,000 --> 00:28:34,000

We were amazed by the 3D map of the east field and the mesa

586

00:28:34,000 --> 00:28:38,000

that Pete's terrestrial LiDAR scanner produced during the drone experiment

587

00:28:38,000 --> 00:28:42,000

because it also appeared to capture the UAP we saw off in the distance

588

00:28:42,000 --> 00:28:44,000

after the rocket was launched.

589

00:28:44,000 --> 00:28:47,000

We really wanted to verify if that's what it was.

590

00:28:47,000 --> 00:28:53,000

All right, so I think we need to look at the footage of the ball in the sky

591

00:28:53,000 --> 00:28:59,000

and see if it kind of fits in the same location as to what this anomaly is here in the LiDAR data.

592

00:28:59,000 --> 00:29:00,000

Yeah, let me bring that up.

593

00:29:03,000 --> 00:29:05,000

So there's the object.

594

00:29:07,000 --> 00:29:11,000

So tell me how this differs from what you saw with your own eyes.

595

00:29:11,000 --> 00:29:15,000

It was a lot brighter when we were looking at it in real time.

596

00:29:15,000 --> 00:29:16,000

Very bright.

597

00:29:16,000 --> 00:29:17,000

Very bright.

598

00:29:17,000 --> 00:29:23,000

And it came down and it kind of was going, I'm going to say, really slow.

599

00:29:23,000 --> 00:29:27,000

And then the turn went straight up into the clouds and it was gone.

600

00:29:29,000 --> 00:29:32,000

Well, I took a shot of it with my cell phone, right?

601

00:29:32,000 --> 00:29:37,000

And so then from that, I did a 3D model of what the image looked like.

602

00:29:37,000 --> 00:29:38,000

And I have that.

603

00:29:38,000 --> 00:29:40,000

I have what you put together.

604

00:29:40,000 --> 00:29:41,000

I'll bring that up.

605

00:29:44,000 --> 00:29:48,000

So now if you notice, it clearly looks like it's two halves.

606

00:29:48,000 --> 00:29:51,000

And looking at it, it looks like it actually is an indentation, doesn't it?

607

00:29:51,000 --> 00:29:52,000

Mm-hmm.

608

00:29:52,000 --> 00:29:54,000

There's some dark spot to it.

609

00:29:54,000 --> 00:29:57,000

From modeling that, I put this together.

610

00:29:57,000 --> 00:30:00,000

And this is kind of my idea of what it looks like.

611

00:30:00,000 --> 00:30:04,000

There's dark spots on the end and it's like a dumbbell sort of.

612

00:30:04,000 --> 00:30:11,000

And it's interesting, it looks a lot like one of the UFOs that an F-18 pilot captured with a cell phone

613

00:30:11,000 --> 00:30:16,000

that they showed at the House Permanent Select Committee on Intelligence meeting back a few months ago.

614

00:30:17,000 --> 00:30:20,000

I was really struck by this UAP that we saw on the ranch

615

00:30:20,000 --> 00:30:27,000

because when I was the chief scientist for the federal government's UAP task force between 2020 and 2022,

616

00:30:27,000 --> 00:30:35,000

I reviewed a photograph of something very similar that was taken by an American naval pilot off the coast of Virginia in 2019.

617

00:30:35,000 --> 00:30:43,000

As a scientist, it was really compelling to see two possible examples of a similar, if not the

same, aerial phenomena.

618

00:30:44,000 --> 00:30:45,000

It's not a focus error.

619

00:30:45,000 --> 00:30:46,000

It's not bokeh effect.

620

00:30:46,000 --> 00:30:48,000

This is actually what it looked like.

621

00:30:48,000 --> 00:30:50,000

And we saw it with our own eyes.

622

00:30:50,000 --> 00:30:51,000

That's what this thing looked like.

623

00:30:53,000 --> 00:30:55,000

So you got a sense that this is nuts and bolts?

624

00:30:55,000 --> 00:31:00,000

I believe this might be a nuts and bolts aircraft and it was flying.

625

00:31:08,000 --> 00:31:18,000

You know, that UAP or UFO that we saw the night of the telescope last year was the closest, brightest object that I have seen in my time here on the ranch

626

00:31:18,000 --> 00:31:20,000

until we saw this one.

627

00:31:20,000 --> 00:31:23,000

This one was much lower.

628

00:31:23,000 --> 00:31:26,000

I think it was much brighter, bigger.

629

00:31:26,000 --> 00:31:29,000

And this one looks just like that one from the telescope night.

630

00:31:29,000 --> 00:31:31,000

That whole night was just so strange.

631

00:31:32,000 --> 00:31:34,000

Caleb and Thomas were exactly right.

632

00:31:35,000 --> 00:31:37,000

This scope is pretty dead.

633

00:31:37,000 --> 00:31:41,000

I aimed it manually in the anomaly area and then the camera wouldn't work.

634

00:31:42,000 --> 00:31:46,000

Last year, while we were trying to look through the triangle anomaly with high-powered telescopes,

635

00:31:46,000 --> 00:31:50,000

they malfunctioned just like the drone swarm did.

636

00:31:50,000 --> 00:31:53,000

What the hell is that in the sky?

637

00:31:53,000 --> 00:31:59,000

And then, suddenly, we saw an eerily similar UAP maneuver over the ranch.

638

00:31:59,000 --> 00:32:02,000

There's no red or green or white lights on it.

639

00:32:02,000 --> 00:32:04,000

It doesn't look like it's that far away either.

640

00:32:04,000 --> 00:32:07,000

It's going right under Jupiter and it's almost as big as Jupiter.

641

00:32:07,000 --> 00:32:09,000

That is bright.

642

00:32:09,000 --> 00:32:10,000

That ain't an airplane.

643

00:32:10,000 --> 00:32:12,000

It's getting dim.

644

00:32:12,000 --> 00:32:14,000

It just disappeared.

645

00:32:14,000 --> 00:32:18,000

I've got some data from the Eastfield exercise to share.

646

00:32:18,000 --> 00:32:22,000

So we put GPS sensors on four of the drones in that swarm,

647

00:32:22,000 --> 00:32:24,000

obviously not on all 200 of them.

648

00:32:24,000 --> 00:32:27,000

I can throw it up on the screen if that would help.

649

00:32:27,000 --> 00:32:28,000

Yeah.

650

00:32:28,000 --> 00:32:29,000

Okay.

651

00:32:29,000 --> 00:32:35,000

So this is the sum total of the data that we got off of all four of those drones.

652

00:32:35,000 --> 00:32:43,000

And you are seeing all of the maneuvers that those four individual drones underwent during the whole exercise.

653

00:32:43,000 --> 00:32:48,000

You know, I'm looking at perfectly well-behaved formation in the Eastfield exercise.

654

00:32:48,000 --> 00:32:50,000

It looks exactly like what I would have expected this to be.

655

00:32:50,000 --> 00:32:51,000

Yeah.

656

00:32:51,000 --> 00:32:52,000

Okay.

657

00:32:52,000 --> 00:32:56,000

I think what we ought to do is go over to the other part of the exercise at the triangle.

658

00:32:56,000 --> 00:32:58,000

I can't wait to get eyes on that.

659

00:32:58,000 --> 00:32:59,000

Okay.

660

00:32:59,000 --> 00:33:00,000

So here...

661

00:33:02,000 --> 00:33:04,000

Oh, wow.

662

00:33:04,000 --> 00:33:09,000

Whatever that is, it looks crazy as hell because I don't remember it ever looking like that.

663

00:33:09,000 --> 00:33:13,000

Eric's GPS devices were on the four corners of the drone swarm.

664

00:33:13,000 --> 00:33:20,000

So the data should have appeared just like it did over the Eastfield, all intact and in one large cube.

665

00:33:20,000 --> 00:33:27,000

But instead, it was scattered all around into a shade that looked nothing like what we saw during the actual experiment.

666

00:33:27,000 --> 00:33:32,000

So once again, something at the triangle completely distorted our GPS data.

667

00:33:32,000 --> 00:33:35,000

So there's a lot to discuss here.

668

00:33:35,000 --> 00:33:41,000

One of the really puzzling features of this is what happens when you look beneath the ground.

669

00:33:41,000 --> 00:33:43,000

Whoa.

670

00:33:43,000 --> 00:33:46,000

Looks like some of them are inside the mesa.

671

00:33:46,000 --> 00:33:47,000

Yep.

672

00:33:47,000 --> 00:33:49,000

Look how many of them are under the surface.

673

00:33:49,000 --> 00:33:53,000

Whoa, whoa, whoa, whoa, whoa, whoa.

674

00:33:53,000 --> 00:33:54,000

Looks like a tornado.

675

00:33:54,000 --> 00:33:55,000

Right.

676

00:33:55,000 --> 00:33:57,000

I don't recall any of the drones doing this.

677

00:33:57,000 --> 00:33:58,000

No.

678

00:33:58,000 --> 00:34:02,000

If I remember, all these GPS's were on the corners.

679

00:34:02,000 --> 00:34:03,000

Mm-hmm.

680

00:34:03,000 --> 00:34:05,000

So how's that in the middle?

681

00:34:05,000 --> 00:34:10,000

Turn that up again sideways, Eric, so we can see that tornado looking shape.

682

00:34:10,000 --> 00:34:11,000

Sure thing.

683

00:34:11,000 --> 00:34:12,000

You want to focus on this one here?

684

00:34:12,000 --> 00:34:16,000

Yeah, yeah, yeah.

685

00:34:16,000 --> 00:34:19,000

Look right there.

686

00:34:19,000 --> 00:34:26,000

If I was going to draw a wormhole two-dimensionally, that's what it looks like.

687

00:34:26,000 --> 00:34:30,000

There's two funnels connected at the throats of the funnels.

688

00:34:30,000 --> 00:34:31,000

I'm just saying.

689

00:34:31,000 --> 00:34:33,000

Something to think about.

690

00:34:33,000 --> 00:34:37,000

What more proof do we need that there is something going on out here?

691

00:34:37,000 --> 00:34:38,000

That's true.

692

00:34:38,000 --> 00:34:43,000

Obviously, there is something above the triangle that we've identified with multiple experiments

693

00:34:43,000 --> 00:34:47,000

that absolutely has its way with the GPS.

694

00:34:47,000 --> 00:34:49,000

This raises a lot of questions.

695

00:34:49,000 --> 00:34:52,000

I don't feel like I'm nearly done with this data.

696

00:34:52,000 --> 00:34:57,000

No, and I'm not comfortable with whatever it means yet either.

697

00:34:57,000 --> 00:34:59,000

There's something else going on here.

698

00:34:59,000 --> 00:35:02,000

Pete's got a bunch of data that he collected during the exercise.

699

00:35:02,000 --> 00:35:04,000

So, Pete, what have you got?

700

00:35:04,000 --> 00:35:06,000

Your terrestrial scanner.

701

00:35:06,000 --> 00:35:07,000

What else do you have here?

702

00:35:07,000 --> 00:35:12,000

All right, guys, what I'm going to bring up now is the data from the terrestrial laser scanner.

703

00:35:12,000 --> 00:35:19,000

After seeing Eric's bizarre GPS data, I couldn't wait to see Pete Kelsey's terrestrial LiDAR scanner data,

704

00:35:19,000 --> 00:35:23,000

since it created a 3D map of both areas where we conducted the drone experiments.

705

00:35:23,000 --> 00:35:29,000

The hope was that it would give us some possible clues as to what caused the phenomena.

706

00:35:29,000 --> 00:35:33,000

So, this is the data from the first slide we did at the triangle.

707

00:35:33,000 --> 00:35:36,000

You can see the mesa here in the background.

708

00:35:36,000 --> 00:35:38,000

I'll just come to the chase.

709

00:35:38,000 --> 00:35:45,000

The one part that's strange is right there.

710

00:35:45,000 --> 00:35:48,000

What is going on there?

711

00:35:48,000 --> 00:35:50,000

Is that a shadow?

712

00:35:50,000 --> 00:35:57,000

If I give you a straight down view,

713

00:35:57,000 --> 00:35:59,000

so there's a gap in the data.

714

00:35:59,000 --> 00:36:01,000

Where is the data?

715

00:36:01,000 --> 00:36:05,000

Well, you could see it all sitting off to the side there.

716

00:36:05,000 --> 00:36:07,000

It's back here.

717

00:36:07,000 --> 00:36:11,000

I've never seen that before.

718

00:36:11,000 --> 00:36:13,000

How far away is that?

719

00:36:13,000 --> 00:36:17,000

Well beyond the range of the scanner.

720

00:36:17,000 --> 00:36:25,000

So, I overlaid the data here in Google Earth.

721

00:36:25,000 --> 00:36:39,000

And what I thought was really interesting is the line almost spot on points right at the top of the mesa.

722

00:36:39,000 --> 00:36:41,000

Oh, wow.

723

00:36:41,000 --> 00:36:43,000

That's hard to believe.

724

00:36:43,000 --> 00:36:54,000

Look at that. It's pointing right towards the area where we drilled into that dome shaped metal object last year.

725

00:36:54,000 --> 00:36:56,000

That's very interesting.

726

00:36:56,000 --> 00:37:02,000

The results of our experiment two days ago at the triangle have just gotten even more bizarre.

727

00:37:02,000 --> 00:37:05,000

According to Pete Kelsey's computer model of his LIDAR scans,

728

00:37:05,000 --> 00:37:15,000

a huge chunk of the data is showing up over the mesa right where we drilled into a 400 foot long dome shaped metal object last year.

729

00:37:15,000 --> 00:37:21,000

And not only that, but a metal object made of materials that NASA uses on its own spacecraft.

730

00:37:21,000 --> 00:37:31,000

I guess the question that remains is what kind of phenomena could spoof your LIDAR system like that

731

00:37:31,000 --> 00:37:37,000

to make it push the data way off, make it think it's further than it is, and remove some of it.

732

00:37:37,000 --> 00:37:39,000

Have you ever seen that before?

733

00:37:39,000 --> 00:37:42,000

No. I can't explain it.

734

00:37:42,000 --> 00:37:52,000

Why do we keep getting GPS data that is inside the mesa and underneath the ground?

735

00:37:52,000 --> 00:37:56,000

This is an area where GPS has been spoofed how many different times?

736

00:37:56,000 --> 00:37:59,000

Yeah. I think we've about seen everything.

737

00:37:59,000 --> 00:38:02,000

That has a lot of data to digest.

738

00:38:02,000 --> 00:38:11,000

Guys, I gotta tell you, this is some of the best evidence that we've been able to capture, and it just goes to show we've got more work to do in both these places.

739

00:38:11,000 --> 00:38:12,000

100% agree with that.

740

00:38:12,000 --> 00:38:17,000

I'm really curious to hear from you two as to what the next steps are going to be.

741

00:38:17,000 --> 00:38:22,000

Every time we get these UAPs on video, we get a few seconds. What if we had a high speed camera?

742

00:38:22,000 --> 00:38:27,000

So those few seconds might be millions of frames or thousands of frames or at least hundreds of frames.

743

00:38:27,000 --> 00:38:40,000

Through my old government contacts with the UAP Task Force, I'm aware of camera systems that could photograph the triangle area in a much more comprehensive way to let us get the best look possible at aerial phenomena.

744

00:38:40,000 --> 00:38:48,000

It just might eliminate guesswork and help us identify these UAPs or UFOs if that's really what they are.

745

00:38:48,000 --> 00:38:51,000

Also, we've got a lot of work to do inside the mesa.

746

00:38:51,000 --> 00:38:52,000

Right.

747

00:38:52,000 --> 00:38:54,000

I've definitely got unfinished business out there.

748

00:38:54,000 --> 00:38:59,000

I agree. You can't look at the data we saw tonight and think that we're done with that, right?

749

00:38:59,000 --> 00:39:00,000

Yeah.

750

00:39:00,000 --> 00:39:01,000

We just gotta figure out what to do next.

751

00:39:01,000 --> 00:39:07,000

I would like to do some ground penetrating radar to see if we can get any insight beneath that

area.

752

00:39:07,000 --> 00:39:08,000

Yeah.

753

00:39:08,000 --> 00:39:09,000

Absolutely.

754

00:39:09,000 --> 00:39:14,000

Drilling has helped us to approximate where this mysterious metal object in the mesa is buried.

755

00:39:14,000 --> 00:39:21,000

But Eric is right. Using ground penetrating radar will help us better define this anomaly's dimensions.

756

00:39:21,000 --> 00:39:26,000

Then, we can figure out how to reveal just what the heck it really is.

757

00:39:26,000 --> 00:39:35,000

I'm excited. I think we've got more hard data. We've got as much hard data right now, I think, as even when I was with the UAP Task Force, the things we saw.

758

00:39:35,000 --> 00:39:36,000

Wow.

759

00:39:36,000 --> 00:39:37,000

Right.

760

00:39:37,000 --> 00:39:38,000

I think this is amazing.

761

00:39:38,000 --> 00:39:40,000

I'm ready to wrap it up. How are you guys?

762

00:39:40,000 --> 00:39:41,000

Yeah, let's wrap it up.

763

00:39:41,000 --> 00:39:42,000

Great stuff.

764

00:39:42,000 --> 00:39:43,000

I had all I can handle.

765

00:39:43,000 --> 00:39:44,000

Pete, thank you for joining us.

766

00:39:44,000 --> 00:39:45,000

My pleasure.

767

00:39:45,000 --> 00:39:46,000

See you later, Pete.

768

00:39:46,000 --> 00:39:47,000

Take care.

769

00:39:47,000 --> 00:39:50,000

Eric gives us awesome stuff, man.

770

00:39:50,000 --> 00:39:55,000

This spot on the mesa is turning out to be very interesting.

771

00:39:55,000 --> 00:39:58,000

It's compelling evidence of something unusual.

772

00:39:58,000 --> 00:40:00,000

This is clearly a spot of interest.

773

00:40:00,000 --> 00:40:04,000

We've got to get into the mesa somehow and find out what this is.

774

00:40:04,000 --> 00:40:07,000

We are here to be led by the data.

775

00:40:07,000 --> 00:40:14,000

We observe, we measure, and then our course is chosen based upon the data in hand.

776

00:40:14,000 --> 00:40:19,000

This approach has yielded some really powerful insights so far, some unexpected results,

777

00:40:19,000 --> 00:40:21,000

things I never anticipated.

778

00:40:21,000 --> 00:40:26,000

And this is how we're going to continue as we conduct this investigation on the ranch.

779

00:40:26,000 --> 00:40:33,000

These experiments continue to give us data, data helping us understand the nature of the phenomenon.

780

00:40:33,000 --> 00:40:41,000

There is something tied to both the airspace, above Skinwalker Ranch and also that which may lie below.

781

00:40:41,000 --> 00:40:49,000

Our future investigation will undoubtedly delve into these topics more than ever before.

782

00:41:11,000 --> 00:41:13,000

We've got the anomaly for the first time, guys.

783

00:41:13,000 --> 00:41:16,000

We have a helicopter right over the triangle.

784

00:41:16,000 --> 00:41:18,000

It's doing surveillance right now.
