

1

00:00:00,000 --> 00:00:02,000

Oh, wow.

2

00:00:02,000 --> 00:00:04,000

We've been wanting to fly a pattern of drones

3

00:00:04,000 --> 00:00:06,000

over the triangle and the Eastfield.

4

00:00:06,000 --> 00:00:08,000

Our cell hole groans out of line

5

00:00:08,000 --> 00:00:10,000

what you see from my perspective.

6

00:00:10,000 --> 00:00:12,000

They're clearly out of place.

7

00:00:12,000 --> 00:00:13,000

Yeah, we've got eyes on that.

8

00:00:13,000 --> 00:00:15,000

I have 80 disconnected.

9

00:00:15,000 --> 00:00:17,000

They're coming home.

10

00:00:17,000 --> 00:00:21,000

Three, two, one.

11

00:00:21,000 --> 00:00:23,000

We got something right there.

12

00:00:23,000 --> 00:00:26,000

There's a thing hovering over the launch site.

13

00:00:26,000 --> 00:00:29,000

So there's a gap in the data from the triangle

14

00:00:29,000 --> 00:00:31,000

at the top of the maze to her.

15

00:00:31,000 --> 00:00:34,000

Somehow we've got to get inside the maze.

16

00:00:35,000 --> 00:00:39,000

There is a ranch in northern Utah.

17

00:00:39,000 --> 00:00:43,000

It is considered the epicenter of the strangest

18

00:00:43,000 --> 00:00:47,000

and most disturbing phenomena on Earth.

19

00:00:47,000 --> 00:00:49,000

Animal mutilations,

20

00:00:49,000 --> 00:00:51,000

bizarre UFO sightings,

21

00:00:51,000 --> 00:00:53,000

and unusual energies

22

00:00:53,000 --> 00:00:56,000

that have proven harmful to humans.

23

00:00:56,000 --> 00:00:59,000

For 20 years, the federal government

24

00:00:59,000 --> 00:01:02,000

tried to find answers and failed.

25

00:01:02,000 --> 00:01:06,000

Now, a new team of dedicated scientists,

26

00:01:06,000 --> 00:01:10,000

researchers, and experts has taken over.

27

00:01:10,000 --> 00:01:14,000

They are determined to solve the mystery and reveal

28

00:01:16,000 --> 00:01:20,000

the secret of Skinwalker Ranch.

29

00:01:26,000 --> 00:01:28,000

Pete!

30

00:01:28,000 --> 00:01:30,000

Hey, Pete.

31

00:01:30,000 --> 00:01:32,000

I want you to meet some friends of mine.

32

00:01:32,000 --> 00:01:33,000

All right.

33

00:01:33,000 --> 00:01:36,000

After our experiment at the triangle last week

34

00:01:36,000 --> 00:01:39,000

actually revealed that there might be a connection to the Mesa,

35

00:01:39,000 --> 00:01:42,000

we invited Pete Kelsey and his colleague,

36

00:01:42,000 --> 00:01:44,000

ground penetrating radar expert,

37

00:01:44,000 --> 00:01:48,000

Jan Frank, to help us with a new investigation of that area.

38

00:01:48,000 --> 00:01:50,000

Well, welcome to the ranch.

39

00:01:50,000 --> 00:01:52,000

Thanks.

40

00:01:52,000 --> 00:01:54,000

You're happy to be here.

41

00:01:54,000 --> 00:01:57,000

So, Pete tells us that you've got some interesting technology

42

00:01:57,000 --> 00:01:58,000

that might help us out.

43

00:01:58,000 --> 00:01:59,000

That's amazing.

44

00:01:59,000 --> 00:02:02,000

Yeah, I make deep ground penetrating radar systems,

45

00:02:02,000 --> 00:02:04,000

and I've got one that I made for you guys

46

00:02:04,000 --> 00:02:06,000

that's a really, really small one.

47

00:02:06,000 --> 00:02:09,000

So we can get up over some of that really rough rock face

48

00:02:09,000 --> 00:02:11,000

that you wouldn't be able to drag your normal radar on.

49

00:02:11,000 --> 00:02:14,000

And I've got one that's a really deep penetrating ground-based system

50

00:02:14,000 --> 00:02:16,000

that looks like a snake, actually.

51

00:02:16,000 --> 00:02:18,000

We use this for the mining industry.

52

00:02:18,000 --> 00:02:19,000

Okay.

53

00:02:19,000 --> 00:02:21,000

What is it you're actually expecting to see?

54

00:02:21,000 --> 00:02:23,000

What are you looking for here?

55

00:02:23,000 --> 00:02:25,000

We've heard about caves inside of the Mesa.

56

00:02:25,000 --> 00:02:26,000

Okay.

57

00:02:26,000 --> 00:02:28,000

We're actually looking for also a structure

58

00:02:28,000 --> 00:02:31,000

that was impenetrable to our drilling.

59

00:02:31,000 --> 00:02:33,000

You know, as we went back into that Mesa,

60

00:02:33,000 --> 00:02:35,000

we were using a directional drilling technique

61

00:02:35,000 --> 00:02:37,000

that should have been able to turn upward,

62

00:02:37,000 --> 00:02:38,000

but could not.

63

00:02:38,000 --> 00:02:39,000

We couldn't get through that layer,

64

00:02:39,000 --> 00:02:41,000

so there's a dome shape there.

65

00:02:41,000 --> 00:02:43,000

And of course, we'll be especially interested

66

00:02:43,000 --> 00:02:45,000

if we see anything that looks unnatural.

67

00:02:45,000 --> 00:02:46,000

Absolutely.

68

00:02:46,000 --> 00:02:47,000

Beneath that surface.

69

00:02:47,000 --> 00:02:49,000

In our ongoing efforts to find the answers

70

00:02:49,000 --> 00:02:51,000

behind all the strange phenomena

71

00:02:51,000 --> 00:02:53,000

that occur on Skinwalker Ranch,

72

00:02:53,000 --> 00:02:56,000

we're now getting focused back on the Mesa.

73

00:02:56,000 --> 00:02:58,000

Oh, wow.

74

00:02:58,000 --> 00:03:00,000

Look at that.

75

00:03:00,000 --> 00:03:02,000

We were all baffled one week ago

76

00:03:02,000 --> 00:03:04,000

when the drone swarm we launched over the triangle

77

00:03:04,000 --> 00:03:06,000

to pinpoint an anomaly

78

00:03:06,000 --> 00:03:09,000

between 300 and 5,000 feet began malfunctioning.

79

00:03:09,000 --> 00:03:10,000

Oh, look at that one.

80

00:03:10,000 --> 00:03:11,000

One's found it.

81

00:03:11,000 --> 00:03:12,000

One's found it.

82

00:03:12,000 --> 00:03:13,000

Yeah, there goes the other one.

83

00:03:13,000 --> 00:03:14,000

There goes the other one.

84

00:03:14,000 --> 00:03:15,000

There goes the other one.

85

00:03:15,000 --> 00:03:16,000

Yeah, there goes the other one.

86

00:03:16,000 --> 00:03:17,000

They're going right at it.

87

00:03:17,000 --> 00:03:18,000

They're going crazy.

88

00:03:18,000 --> 00:03:20,000

Almost all of them disconnected right now.

89

00:03:20,000 --> 00:03:22,000

What I'm going to bring up now

90

00:03:22,000 --> 00:03:25,000

is the data from the terrestrial laser scanner.

91

00:03:25,000 --> 00:03:28,000

And then the LiDAR data that Pete recorded

92

00:03:28,000 --> 00:03:30,000

was missing a big chunk of data

93

00:03:30,000 --> 00:03:34,000

that somehow appeared right over that same spot

94

00:03:34,000 --> 00:03:37,000

where we drilled into the Mesa last year

95

00:03:37,000 --> 00:03:41,000

and discovered a 400-foot long dome-shaped metal object.

96

00:03:41,000 --> 00:03:42,000

Wow.

97

00:03:42,000 --> 00:03:45,000

The metal object made of the same kind of material

98

00:03:45,000 --> 00:03:49,000

that NASA uses to protect the outside of space shuttles.

99

00:03:49,000 --> 00:03:51,000

So now we're hoping that Yon,

100

00:03:51,000 --> 00:03:55,000

who is a world-renowned expert in ground-penetrating radar,

101

00:03:55,000 --> 00:03:58,000

has a technology that can help us figure out

102

00:03:58,000 --> 00:04:00,000

just what's inside the Mesa

103

00:04:00,000 --> 00:04:03,000

and how it might be related to the strange things

104

00:04:03,000 --> 00:04:05,000

that keep happening at the triangle.

105

00:04:05,000 --> 00:04:08,000

So how deep of penetration can you get?

106

00:04:08,000 --> 00:04:11,000

Usually we get down to 200, 300 feet with this,

107

00:04:11,000 --> 00:04:12,000

so it's pretty exciting.

108

00:04:12,000 --> 00:04:16,000

GPR works by sending radio waves into the ground.

109

00:04:16,000 --> 00:04:19,000

They reflect off anomalies like buried objects or voids

110

00:04:19,000 --> 00:04:23,000

to reveal an image of their shape as well as their depth.

111

00:04:23,000 --> 00:04:26,000

If there's a discontinuity or a void,

112

00:04:26,000 --> 00:04:28,000

we definitely should be able to see that.

113

00:04:28,000 --> 00:04:29,000

What about metal?

114

00:04:29,000 --> 00:04:32,000

Well, yeah, metal's a great target for radar.

115

00:04:32,000 --> 00:04:33,000

So if there's something metal there,

116

00:04:33,000 --> 00:04:35,000

we'd certainly be able to see that as well.

117

00:04:35,000 --> 00:04:36,000

Sounds like we've got a lot to do.

118

00:04:36,000 --> 00:04:37,000

We should probably get to it.

119

00:04:37,000 --> 00:04:38,000

Let's do it.

120

00:04:38,000 --> 00:04:39,000

All right, we'll see y'all.

121

00:04:39,000 --> 00:04:40,000

Y'all just follow us down there.

122

00:04:40,000 --> 00:04:41,000

OK.

123

00:04:43,000 --> 00:04:47,000

Even before we discovered this mysterious metal object,

124

00:04:47,000 --> 00:04:50,000

there were all kinds of rumors about the Mesa

125

00:04:50,000 --> 00:04:52,000

going back to when Robert Bigelow

126

00:04:52,000 --> 00:04:54,000

and the federal government investigated here

127

00:04:54,000 --> 00:04:57,000

from the 1990s to the early 2000s.

128

00:04:59,000 --> 00:05:01,000

X marks the spot, Pete.

129

00:05:01,000 --> 00:05:02,000

X marks the spot.

130

00:05:02,000 --> 00:05:06,000

I've heard all kinds of crazy stories about this Mesa.

131

00:05:06,000 --> 00:05:09,000

There's spacecraft going in it, tunnels, caverns,

132

00:05:09,000 --> 00:05:10,000

underground bases.

133

00:05:10,000 --> 00:05:12,000

What kind of mysteries lie inside?

134

00:05:14,000 --> 00:05:18,000

For decades, there have been reports of underground chambers

135

00:05:18,000 --> 00:05:21,000

or tunnels beneath the Mesa

136

00:05:21,000 --> 00:05:24,000

that may hold the key to understanding the secrets

137

00:05:24,000 --> 00:05:26,000

of Skinwalker Ranch.

138

00:05:26,000 --> 00:05:28,000

The deeper we can see into that pile of rocks,

139

00:05:28,000 --> 00:05:29,000

into that Mesa,

140

00:05:29,000 --> 00:05:31,000

the more we're going to understand

141

00:05:31,000 --> 00:05:32,000

what it is we're messing with out here.

142

00:05:32,000 --> 00:05:33,000

OK.

143

00:05:33,000 --> 00:05:35,000

It'll be interesting to see what's underground.

144

00:05:35,000 --> 00:05:36,000

So that's the antenna?

145

00:05:36,000 --> 00:05:38,000

Well, that's the entire radar.

146

00:05:38,000 --> 00:05:39,000

These are the antennas right here.

147

00:05:39,000 --> 00:05:40,000

This is just a separator.

148

00:05:40,000 --> 00:05:41,000

It's all fiberglass.

149

00:05:41,000 --> 00:05:42,000

Keep it as light as possible.

150

00:05:42,000 --> 00:05:45,000

We can't use carbon fiber because it's conductive, of course.

151

00:05:45,000 --> 00:05:48,000

Y'all just brought two devices that we'll use to scan the Mesa.

152

00:05:48,000 --> 00:05:51,000

One is a unit that Tom Winerton will actually wear

153

00:05:51,000 --> 00:05:53,000

while he hikes over the area

154

00:05:53,000 --> 00:05:56,000

where we drilled against the dome-shaped object last year.

155

00:05:56,000 --> 00:06:00,000

And meanwhile, Y'all and Caleb will run the other device

156

00:06:00,000 --> 00:06:02,000

back and forth on top of the Mesa

157

00:06:02,000 --> 00:06:05,000

to see if anything else might be hidden inside there

158

00:06:05,000 --> 00:06:07,000

like we've heard about in the past.

159

00:06:07,000 --> 00:06:09,000

Well, it looks like we're just about set up.

160

00:06:09,000 --> 00:06:11,000

So talk us through what you're going to do.

161

00:06:11,000 --> 00:06:13,000

Well, you have a couple of GPR systems here.

162

00:06:13,000 --> 00:06:15,000

So this one here, what's really nice about it,

163

00:06:15,000 --> 00:06:16,000

it's a very long wavelength,

164

00:06:16,000 --> 00:06:18,000

which means we're going to get good penetration.

165

00:06:18,000 --> 00:06:20,000

And because it's handheld,

166

00:06:20,000 --> 00:06:22,000

it gives us the ability to get into areas

167

00:06:22,000 --> 00:06:23,000

that are really difficult terrain.

168

00:06:23,000 --> 00:06:24,000

OK.

169

00:06:24,000 --> 00:06:25,000

So we're set up over here.

170

00:06:25,000 --> 00:06:26,000

Yeah.

171

00:06:26,000 --> 00:06:28,000

We're going to be doing the usual data logging.

172

00:06:28,000 --> 00:06:29,000

We've got the SDR.

173

00:06:29,000 --> 00:06:31,000

We've got the Geiger counter running.

174

00:06:31,000 --> 00:06:32,000

OK.

175

00:06:32,000 --> 00:06:33,000

All right, man. Let's get going.

176

00:06:33,000 --> 00:06:34,000

OK.

177

00:06:34,000 --> 00:06:35,000

Sounds good.

178

00:06:35,000 --> 00:06:36,000

With all that we have going on

179

00:06:36,000 --> 00:06:37,000

and to the extent possible,

180

00:06:37,000 --> 00:06:40,000

I'm keeping a close eye on the RF spectrum analyzer

181

00:06:40,000 --> 00:06:42,000

to see if any unusual signals show up.

182

00:06:42,000 --> 00:06:44,000

Are you centered on 45?

183

00:06:44,000 --> 00:06:47,000

That would be 44.5 something.

184

00:06:47,000 --> 00:06:48,000

Good enough.

185

00:06:48,000 --> 00:06:50,000

Nearly every time we run experiments on the ranch,

186

00:06:50,000 --> 00:06:53,000

we detect mysterious energy spikes,

187

00:06:53,000 --> 00:06:57,000

especially one measuring 1.6 gigahertz,

188

00:06:57,000 --> 00:07:00,000

which I think could be some kind of communication signal.

189

00:07:00,000 --> 00:07:02,000

Go ahead and turn it on.

190

00:07:02,000 --> 00:07:03,000

I've turned it on.

191

00:07:03,000 --> 00:07:04,000

OK.

192

00:07:04,000 --> 00:07:05,000

Got a transmitter and receiver working right now.

193

00:07:05,000 --> 00:07:06,000

OK.

194

00:07:06,000 --> 00:07:07,000

And it creates its own little website.

195

00:07:07,000 --> 00:07:08,000

It's like a little access point.

196

00:07:08,000 --> 00:07:09,000

OK.

197

00:07:09,000 --> 00:07:10,000

So even though we're not on the internet here,

198

00:07:10,000 --> 00:07:12,000

I'm going to talk to it with my phone.

199

00:07:12,000 --> 00:07:13,000

OK.

200

00:07:13,000 --> 00:07:18,000

And you are good.

201

00:07:22,000 --> 00:07:23,000

Go.

202

00:07:26,000 --> 00:07:27,000

Are you guys transmitting something?

203

00:07:27,000 --> 00:07:28,000

No.

204

00:07:28,000 --> 00:07:29,000

No.

205

00:07:29,000 --> 00:07:30,000

Hey, Eric.

206

00:07:30,000 --> 00:07:31,000

Travis, are you guys transmitting anything?

207

00:07:31,000 --> 00:07:32,000

Are you transmitting something?

208

00:07:32,000 --> 00:07:33,000

No.

209

00:07:33,000 --> 00:07:34,000

No.

210

00:07:34,000 --> 00:07:35,000

We're not transmitting at all.

211

00:07:35,000 --> 00:07:36,000

What are you seeing?

212

00:07:36,000 --> 00:07:40,000

I've never seen this signal before.

213

00:07:40,000 --> 00:07:43,000

What the hell?

214

00:07:43,000 --> 00:07:46,000

This waveform is not supposed to be happening right now.

215

00:07:46,000 --> 00:07:48,000

Where's it coming from?

216

00:07:48,000 --> 00:07:49,000

Yeah, that's a good question.

217

00:07:49,000 --> 00:07:50,000

Where's it coming from?

218

00:07:50,000 --> 00:07:52,000

Let's weigh back from the truck here

219

00:07:52,000 --> 00:07:56,000

just to be absolutely certain.

220

00:07:56,000 --> 00:07:57,000

OK.

221

00:07:57,000 --> 00:07:59,000

Do you have a cell phone on you something?

222

00:07:59,000 --> 00:08:00,000

I mean, I got one in my back pocket.

223

00:08:00,000 --> 00:08:02,000

Yeah, let's just take that out if you don't mind.

224

00:08:02,000 --> 00:08:03,000

Turn it off.

225

00:08:03,000 --> 00:08:04,000

Yeah, I'll turn it off.

226

00:08:04,000 --> 00:08:05,000

Yeah, OK.

227

00:08:05,000 --> 00:08:06,000

Manning it.

228

00:08:06,000 --> 00:08:07,000

What the hell?

229

00:08:07,000 --> 00:08:09,000

So that's a normal waveform there just for a second, right?

230

00:08:09,000 --> 00:08:10,000

Yeah, I see it.

231

00:08:10,000 --> 00:08:12,000

Yeah, but it's freaking out.

232

00:08:12,000 --> 00:08:15,000

John actually built the systems he brought out here.

233

00:08:15,000 --> 00:08:16,000

He understands them completely.

234

00:08:16,000 --> 00:08:19,000

He is the guy for ground penetrating radar.

235

00:08:19,000 --> 00:08:21,000

As soon as we got one of his systems off the truck

236

00:08:21,000 --> 00:08:25,000

and turned it on, it was instantly detecting a signal

237

00:08:25,000 --> 00:08:27,000

that John had never seen before.

238

00:08:27,000 --> 00:08:30,000

In thousands of experiments using this device,

239

00:08:30,000 --> 00:08:32,000

he was baffled and confused.

240

00:08:32,000 --> 00:08:34,000

I find that really interesting.

241

00:08:34,000 --> 00:08:36,000

So you've not seen that before?

242

00:08:36,000 --> 00:08:40,000

No, actually, I have not.

243

00:08:40,000 --> 00:08:41,000

And I tested it this morning.

244

00:08:41,000 --> 00:08:43,000

So I'm going to go scroll through the spectrum analyzer.

245

00:08:43,000 --> 00:08:45,000

You tested it this morning and it was working?

246

00:08:45,000 --> 00:08:46,000

Yeah, yeah.

247

00:08:46,000 --> 00:08:48,000

It's a little strange.

248

00:08:48,000 --> 00:08:49,000

There's nothing I can do about it.

249

00:08:49,000 --> 00:08:50,000

I think we're just going to run with it

250

00:08:50,000 --> 00:08:52,000

and see if we can filter it out.

251

00:08:52,000 --> 00:08:53,000

I understood.

252

00:08:53,000 --> 00:08:56,000

When I first came on this ranch, I just thought,

253

00:08:56,000 --> 00:08:58,000

look, there's a lot of hype around it

254

00:08:58,000 --> 00:09:01,000

and I'm sure everything can be explained, right?

255

00:09:01,000 --> 00:09:03,000

Then weird things started happening.

256

00:09:03,000 --> 00:09:05,000

I had that weird interference that just has

257

00:09:05,000 --> 00:09:07,000

no simple geological explanation.

258

00:09:07,000 --> 00:09:09,000

I'm going to start recording this.

259

00:09:09,000 --> 00:09:10,000

Okay, well, I'm going to head up the mesa.

260

00:09:10,000 --> 00:09:11,000

Okay.

261

00:09:11,000 --> 00:09:12,000

So careful.

262

00:09:12,000 --> 00:09:15,000

Having pulled metal 400 feet inside the mesa

263

00:09:15,000 --> 00:09:18,000

and now strongly suspecting that there could have

264

00:09:18,000 --> 00:09:21,000

actually been a cavern that went deep into the mesa.

265

00:09:21,000 --> 00:09:24,000

I'm praying that the information that we get from the GPR

266

00:09:24,000 --> 00:09:27,000

is finally going to answer some of the questions we have

267

00:09:27,000 --> 00:09:30,000

as far as what was this object we were bumping up against

268

00:09:30,000 --> 00:09:32,000

with the drill last year?

269

00:09:32,000 --> 00:09:33,000

Man, he's up there.

270

00:09:33,000 --> 00:09:35,000

Look at him.

271

00:09:35,000 --> 00:09:37,000

What you're going to do for me is drag this.

272

00:09:37,000 --> 00:09:38,000

It doesn't have to be a straight line

273

00:09:38,000 --> 00:09:41,000

because you're tracking exactly where you are at all times, right?

274

00:09:41,000 --> 00:09:44,000

And this is going to be taking an image of the ground, essentially.

275

00:09:44,000 --> 00:09:46,000

It's a representation of what's underground.

276

00:09:46,000 --> 00:09:48,000

So one's a transmitter, one's a receiver,

277

00:09:48,000 --> 00:09:51,000

and it's going to stretch out behind you about five, six meters.

278

00:09:51,000 --> 00:09:52,000

Okay.

279

00:09:52,000 --> 00:09:54,000

As Thomas is going up the mesa there,

280

00:09:54,000 --> 00:09:56,000

I've been tasked with escorting Jan.

281

00:09:56,000 --> 00:09:59,000

He's got a very powerful GPR system

282

00:09:59,000 --> 00:10:01,000

that's been used all over the world.

283

00:10:01,000 --> 00:10:03,000

So this is a very deep penetrating radar.

284

00:10:03,000 --> 00:10:07,000

In fact, it's probably the world's deepest GPR system.

285

00:10:07,000 --> 00:10:09,000

I'm excited to see what kind of results we get,

286

00:10:09,000 --> 00:10:12,000

and I'm here to help him out with scanning as much as we can.

287

00:10:12,000 --> 00:10:14,000

All right, let's hope the GPS works.

288

00:10:14,000 --> 00:10:19,000

There are so many questions I have about Skinwalker Ranch.

289

00:10:19,000 --> 00:10:22,000

I want to know the answer to so many things.

290

00:10:22,000 --> 00:10:25,000

If I had to pick one that I wanted the answer to, like, right now,

291

00:10:25,000 --> 00:10:28,000

it would be what's inside the mesa.

292

00:10:28,000 --> 00:10:31,000

We're just going to have to see what we got.

293

00:10:41,000 --> 00:10:42,000

Hey, guys.

294

00:10:42,000 --> 00:10:43,000

What's going on, guy?

295

00:10:43,000 --> 00:10:44,000

So what you got here?

296

00:10:44,000 --> 00:10:47,000

I'm really interested in what you found, Jan.

297

00:10:47,000 --> 00:10:48,000

Absolutely.

298

00:10:48,000 --> 00:10:49,000

Yeah, I can't wait.

299

00:10:49,000 --> 00:10:52,000

The day after we ran ground penetrating radar scans

300

00:10:52,000 --> 00:10:54,000

over the spot on the mesa,

301

00:10:54,000 --> 00:10:58,000

where we discovered the massive dome-shaped metal object last year

302

00:10:58,000 --> 00:11:01,000

and also up on top of the ridge of the mesa,

303

00:11:01,000 --> 00:11:03,000

Pete Kelsey and Jan Frank joined us

304

00:11:03,000 --> 00:11:07,000

to present the process data of what they had found.

305

00:11:07,000 --> 00:11:11,000

We'll start off with the small, lightweight one.

306

00:11:12,000 --> 00:11:14,000

This is the... This is my walking path.

307

00:11:14,000 --> 00:11:16,000

This is your path, yes.

308

00:11:16,000 --> 00:11:19,000

Now, do you recall when we were out in the field,

309

00:11:19,000 --> 00:11:21,000

we were getting a lot of interference?

310

00:11:21,000 --> 00:11:22,000

Mm-hmm.

311

00:11:22,000 --> 00:11:24,000

I have not seen that before.

312

00:11:24,000 --> 00:11:26,000

The data is almost unusable.

313

00:11:26,000 --> 00:11:30,000

There's just a huge amount of interference in this area.

314

00:11:32,000 --> 00:11:34,000

Right, interference from...

315

00:11:34,000 --> 00:11:35,000

What?

316

00:11:35,000 --> 00:11:37,000

Yes, what?

317

00:11:37,000 --> 00:11:42,000

Usually, good GPR data looks like a slightly textured surface

318

00:11:42,000 --> 00:11:46,000

that might show subtle waves that represent natural ground features.

319

00:11:46,000 --> 00:11:50,000

So any stark changes or bizarre shapes that stand out

320

00:11:50,000 --> 00:11:53,000

could be things that aren't natural, like voids or objects.

321

00:11:53,000 --> 00:11:57,000

But most of the GPR data that Thomas got over the drill site

322

00:11:57,000 --> 00:12:02,000

was a checkered mess of strange shapes that didn't make any sense,

323

00:12:02,000 --> 00:12:06,000

which Jan believed were caused by the mysterious interference

324

00:12:06,000 --> 00:12:10,000

that his device detected even before we ran his scans.

325

00:12:10,000 --> 00:12:15,000

So we were all at a loss as to what the interference could have been caused by.

326

00:12:15,000 --> 00:12:18,000

Could this signal be coming from the ground?

327

00:12:18,000 --> 00:12:21,000

It could be coming from anywhere we don't know, right?

328

00:12:21,000 --> 00:12:25,000

It is something that's strong enough to overwhelm the radar.

329

00:12:25,000 --> 00:12:28,000

What exactly is responsible for this interference?

330

00:12:28,000 --> 00:12:32,000

I can't help but wonder, is there something actually within the Mesa

331

00:12:32,000 --> 00:12:35,000

generating radio frequency signals

332

00:12:35,000 --> 00:12:37,000

that could be causing interference?

333

00:12:37,000 --> 00:12:40,000

What would be the cause of this kind of interference?

334

00:12:40,000 --> 00:12:42,000

Do you think it's an environmental thing?

335

00:12:42,000 --> 00:12:46,000

Well, the weird part is, it works now.

336

00:12:46,000 --> 00:12:48,000

When I take it away from the ranch.

337

00:12:48,000 --> 00:12:49,000

That's what I was gonna ask you.

338

00:12:49,000 --> 00:12:50,000

I know you were gonna ask that.

339

00:12:50,000 --> 00:12:52,000

I wanted to know if we could do it controlled.

340

00:12:52,000 --> 00:12:53,000

And it sounds like you've already done it.

341

00:12:53,000 --> 00:12:54,000

I can't replicate it.

342

00:12:57,000 --> 00:13:00,000

That is such an interesting observation.

343

00:13:00,000 --> 00:13:03,000

We can actually recover a little bit of the data,

344

00:13:03,000 --> 00:13:06,000

but actually like 10% of it, okay?

345

00:13:06,000 --> 00:13:08,000

10% of this data is useful.

346

00:13:08,000 --> 00:13:09,000

And that's what we're seeing.

347

00:13:09,000 --> 00:13:12,000

We've detected a number of weird frequencies and signals

348

00:13:12,000 --> 00:13:14,000

during our experiments on the ranch,

349

00:13:14,000 --> 00:13:18,000

but never like the one that interfered with Yon's GPR machines.

350

00:13:18,000 --> 00:13:21,000

And hearing that he was only able to recover 10%

351

00:13:21,000 --> 00:13:23,000

of what was recorded on the Mesa

352

00:13:23,000 --> 00:13:27,000

made us all pretty nervous that we wouldn't get any new information

353

00:13:27,000 --> 00:13:30,000

about just what may be buried inside there.

354

00:13:30,000 --> 00:13:33,000

What we can make out of that remaining 10%,

355

00:13:33,000 --> 00:13:36,000

I'm trying to see if there are any hyperbolic shapes

356

00:13:36,000 --> 00:13:37,000

or things that look like horseshoes

357

00:13:37,000 --> 00:13:40,000

that would indicate that that could be a void

358

00:13:40,000 --> 00:13:42,000

or something discreet in the ground.

359

00:13:42,000 --> 00:13:44,000

And where do you see something like that?

360

00:13:44,000 --> 00:13:48,000

Well, there's subtle hints of things that pop out like here.

361

00:13:51,000 --> 00:13:53,000

There's another one here.

362

00:13:54,000 --> 00:13:57,000

There's quite a few of them that are just scattered around.

363

00:13:58,000 --> 00:14:03,000

So what that tells us are there's a series of discreet anomalies.

364

00:14:03,000 --> 00:14:06,000

These are something that's different than rock, right?

365

00:14:06,000 --> 00:14:10,000

I was amazed that the GPR data over the area

366

00:14:10,000 --> 00:14:12,000

where we've encountered the dome-shaped object

367

00:14:12,000 --> 00:14:16,000

showed numerous and distinct other objects or voids

368

00:14:16,000 --> 00:14:18,000

that might not be natural.

369

00:14:18,000 --> 00:14:21,000

Now, I'm nowhere near ready to buy into the rumors

370

00:14:21,000 --> 00:14:23,000

that an alien base is buried in the Mesa.

371

00:14:23,000 --> 00:14:25,000

But could there be a bunch of metal objects

372

00:14:25,000 --> 00:14:27,000

or tunnels of some kind in there?

373

00:14:27,000 --> 00:14:31,000

If so, what could they be and who put them there?

374

00:14:32,000 --> 00:14:34,000

I know you did another survey.

375

00:14:34,000 --> 00:14:35,000

We did quite a few.

376

00:14:35,000 --> 00:14:36,000

They actually got some data, right?

377

00:14:36,000 --> 00:14:37,000

Absolutely.

378

00:14:37,000 --> 00:14:38,000

I would love to see that.

379

00:14:38,000 --> 00:14:40,000

Great. Okay, let me switch to that.

380

00:14:42,000 --> 00:14:45,000

In addition to the stuff that I did at the toe of the Mesa,

381

00:14:45,000 --> 00:14:46,000

we climbed up to the top.

382

00:14:46,000 --> 00:14:49,000

And what I use is even deeper penetrating radar.

383

00:14:49,000 --> 00:14:50,000

This is a lower frequency.

384

00:14:50,000 --> 00:14:53,000

And this is actually the deepest penetrating GPR in the world.

385

00:14:53,000 --> 00:14:54,000

Wow.

386

00:14:54,000 --> 00:14:56,000

It's a very sensitive radar.

387

00:14:56,000 --> 00:14:57,000

Okay.

388

00:14:57,000 --> 00:14:58,000

So when we look at the cross section there,

389

00:14:58,000 --> 00:15:01,000

you can see where I am on the map at the top of the screen there.

390

00:15:01,000 --> 00:15:03,000

And you can see where the cursor is.

391

00:15:03,000 --> 00:15:06,000

Okay, so as we're scrolling along, everything's fine.

392

00:15:06,000 --> 00:15:09,000

And it keeps going fine until you get to...

393

00:15:12,000 --> 00:15:13,000

Hello.

394

00:15:13,000 --> 00:15:14,000

Look at that.

395

00:15:14,000 --> 00:15:16,000

Look at that.

396

00:15:17,000 --> 00:15:19,000

This is highly anomalous.

397

00:15:19,000 --> 00:15:22,000

And this is a good six, seven meters across.

398

00:15:22,000 --> 00:15:27,000

And it starts at about six, seven meters from the surface where I was.

399

00:15:27,000 --> 00:15:30,000

And it extends down to about 40 meters,

400

00:15:30,000 --> 00:15:33,000

which I guess about the height of the Mesa.

401

00:15:34,000 --> 00:15:35,000

Approximately.

402

00:15:35,000 --> 00:15:36,000

The base.

403

00:15:36,000 --> 00:15:37,000

Right. The base.

404

00:15:37,000 --> 00:15:39,000

The height of the Mesa.

405

00:15:39,000 --> 00:15:40,000

Right.

406

00:15:40,000 --> 00:15:42,000

Whatever this is, is as tall as the Mesa.

407

00:15:42,000 --> 00:15:43,000

Right.

408

00:15:44,000 --> 00:15:47,000

What in the hell are we looking at here?

409

00:15:47,000 --> 00:15:50,000

This is six or seven meters across.

410

00:15:50,000 --> 00:15:52,000

And the depth...

411

00:15:52,000 --> 00:15:53,000

From the surface?

412

00:15:53,000 --> 00:15:57,000

I mean, there's a bit of surface expression, but it's about five, six meters.

413

00:15:57,000 --> 00:16:01,000

And we know that it's about 120 feet deep, maybe 20 feet wide,

414

00:16:01,000 --> 00:16:04,000

and at least 12 feet north and south.

415

00:16:04,000 --> 00:16:05,000

At least.

416

00:16:05,000 --> 00:16:06,000

Right?

417

00:16:06,000 --> 00:16:07,000

So it could be bigger.

418

00:16:07,000 --> 00:16:12,000

So I can't tell you what that is, but it is highly anomalous.

419

00:16:13,000 --> 00:16:18,000

What's also interesting is, you know, we did 300 meters of line.

420

00:16:18,000 --> 00:16:19,000

We don't see anything else like that.

421

00:16:19,000 --> 00:16:20,000

We don't see anywhere else.

422

00:16:20,000 --> 00:16:21,000

No.

423

00:16:21,000 --> 00:16:24,000

So it's coincidental where your drill site is.

424

00:16:27,000 --> 00:16:31,000

What in the world could John have detected with his GPR device?

425

00:16:31,000 --> 00:16:35,000

It was right next to where we previously detected the dome-shaped metal object.

426

00:16:35,000 --> 00:16:40,000

And it was at least 20 feet wide by 120 feet tall.

427

00:16:40,000 --> 00:16:42,000

Are they connected or related in some way?

428

00:16:42,000 --> 00:16:46,000

We have to figure out how to get inside the Mesa to know for sure.

429

00:16:46,000 --> 00:16:51,000

I'll tell you right now, we know exactly which boulders we need to be moving out of the way.

430

00:16:51,000 --> 00:16:52,000

Yep.

431

00:16:52,000 --> 00:16:57,000

We've got a map right now of where there is an anomaly, and it's only tens of feet into the Mesa.

432

00:16:57,000 --> 00:17:02,000

We should be digging, drilling, moving rocks right there to find out what that is.

433

00:17:02,000 --> 00:17:06,000

We did horizontal drilling last summer into the Mesa,

434

00:17:07,000 --> 00:17:10,000

collecting strange material fragments.

435

00:17:10,000 --> 00:17:11,000

Check this out.

436

00:17:12,000 --> 00:17:16,000

Curious flakes of metal from within the Mesa itself.

437

00:17:16,000 --> 00:17:19,000

These are materials of unknown origin.

438

00:17:19,000 --> 00:17:20,000

Wow.

439

00:17:20,000 --> 00:17:22,000

Look at all the metal.

440

00:17:22,000 --> 00:17:29,000

It's my ambition and all of our ambition to determine what this material really is and what it's doing there.

441

00:17:29,000 --> 00:17:33,000

There's no telling how much of this metallic crap there is still in that hillside.

442

00:17:33,000 --> 00:17:37,000

We have to continue searching into the depths of the Mesa.

443

00:17:38,000 --> 00:17:43,000

We know we've got a lot of iron-bearing material coming out of there with those other elements,

444

00:17:43,000 --> 00:17:45,000

tellurium, europium.

445

00:17:45,000 --> 00:17:50,000

That seems artificially manufactured, not a natural process creating it.

446

00:17:50,000 --> 00:17:53,000

It's even been described as something having been made in a furnace.

447

00:17:53,000 --> 00:17:54,000

Yep.

448

00:17:54,000 --> 00:17:55,000

It's not natural.

449

00:17:56,000 --> 00:18:01,000

I could line up a crane company to come out and start moving those boulders off.

450

00:18:01,000 --> 00:18:05,000

Gonna have a little bit of site prep that needs to happen to get the crane back there.

451

00:18:05,000 --> 00:18:10,000

But I really think it'd be beneficial to pull those boulders off and then let's bring in a drilling rig

452

00:18:10,000 --> 00:18:13,000

and let's try to pierce the Mesa a little bit higher.

453

00:18:13,000 --> 00:18:18,000

I mean, if we do that, maybe that gets us up above that hard metal disc that's underneath.

454

00:18:18,000 --> 00:18:20,000

I'm all for it.

455

00:18:20,000 --> 00:18:21,000

Yes.

456

00:18:21,000 --> 00:18:26,000

And so, I mean, we've got our work cut out for us and we've got some spots that we didn't have before.

457

00:18:26,000 --> 00:18:29,000

And Yana, really appreciate the work that you do.

458

00:18:29,000 --> 00:18:30,000

It's my pleasure.

459

00:18:30,000 --> 00:18:31,000

It's absolutely amazing.

460

00:18:31,000 --> 00:18:33,000

I want to get out there and start throwing rocks.

461

00:18:35,000 --> 00:18:37,000

Let's go get a shovel and a pick and start.

462

00:18:53,000 --> 00:18:54,000

Hey, Jake.

463

00:18:54,000 --> 00:18:55,000

How are you?

464

00:18:55,000 --> 00:18:56,000

Good to see you.

465

00:18:56,000 --> 00:18:57,000

Good to see you.

466

00:18:57,000 --> 00:18:58,000

Hey, man.

467

00:18:58,000 --> 00:18:59,000

Hey, how you doing?

468

00:18:59,000 --> 00:19:03,000

A couple of days after Yon Frank presented us with the GPR data showing numerous anomalies in the Mesa

469

00:19:03,000 --> 00:19:06,000

near the dome-shaped metal object we discovered last year.

470

00:19:06,000 --> 00:19:08,000

Getting ready to move some dirt.

471

00:19:08,000 --> 00:19:15,000

Thomas Winerton brought local contractor Jake Huffman back out to the ranch to help prep the area for a major excavation

472

00:19:15,000 --> 00:19:18,000

so we can find out what could be buried in there.

473

00:19:18,000 --> 00:19:21,000

So Jake and I can bring this crane in.

474

00:19:21,000 --> 00:19:24,000

Obviously, we've got to get it across the canal.

475

00:19:24,000 --> 00:19:27,000

So we're just going to put a temporary little culvert in there.

476

00:19:27,000 --> 00:19:31,000

We can get the crane across and start moving some rocks.

477

00:19:31,000 --> 00:19:37,000

The crane needs 30 feet to be able to spread his outriggers out and we need to get him as close to those rocks as possible

478

00:19:37,000 --> 00:19:42,000

because we're estimating some of these rocks are going to weigh as much as 50,000 pounds.

479

00:19:42,000 --> 00:19:43,000

I believe it, yeah.

480

00:19:43,000 --> 00:19:48,000

So we're going to build a 30-foot by 30-foot pad back in there so we can get him right up next to those rocks.

481

00:19:48,000 --> 00:19:49,000

Sounds good.

482

00:19:49,000 --> 00:19:57,000

In order to get the giant 175-ton crane over to where we need to lift boulders off the Mesa,

483

00:19:57,000 --> 00:20:00,000

it's going to be a massive project.

484

00:20:00,000 --> 00:20:07,000

First, Tom and Jake will have to move tons of earth to form a bridge over the canal between the road and the Mesa.

485

00:20:07,000 --> 00:20:16,000

Then they have to clear and level off a good-sized pad where they can park the crane close enough to remove many of the huge boulders.

486

00:20:16,000 --> 00:20:20,000

I think it's going to take us a couple days to get the pad ready.

487

00:20:20,000 --> 00:20:22,000

So I think we start slinging some dirt.

488

00:20:22,000 --> 00:20:23,000

Sounds good to me.

489

00:20:23,000 --> 00:20:24,000

Yeah.

490

00:20:24,000 --> 00:20:26,000

We'll get out of your way.

491

00:20:26,000 --> 00:20:28,000

Watch yourself.

492

00:20:29,000 --> 00:20:33,000

In preparation for our surgical examination of the Mesa, there's a lot of work that needs to be done.

493

00:20:33,000 --> 00:20:38,000

Thomas is having to put a culvert in place.

494

00:20:38,000 --> 00:20:40,000

How does that look?

495

00:20:40,000 --> 00:20:42,000

Good to me.

496

00:20:45,000 --> 00:20:53,000

What we're doing here with these excavators and this massive crane is by far the largest scale that we've ever done here on Skinwalker Ranch.

497

00:20:53,000 --> 00:20:55,000

Don't try to get across.

498

00:20:55,000 --> 00:20:57,000

This is a lot of work.

499

00:20:57,000 --> 00:21:03,000

It involves a lot of digging, but we need to get after it and I may just find out what's inside that Mesa.

500

00:21:03,000 --> 00:21:09,000

It'll hopefully help us with some answers as to what truly is going on on Skinwalker Ranch.

501

00:21:16,000 --> 00:21:22,000

I'm going to take the color camera and we're going to put it right up here.

502

00:21:23,000 --> 00:21:25,000

I think just pull in right in here.

503

00:21:25,000 --> 00:21:26,000

Yeah, that'll be good.

504

00:21:26,000 --> 00:21:31,000

Since it was going to take several days to complete the print work at the Mesa.

505

00:21:31,000 --> 00:21:32,000

Hey, Burtette.

506

00:21:32,000 --> 00:21:33,000

Everything okay?

507

00:21:33,000 --> 00:21:37,000

Yeah, so who wants to operate the camera while I tell him what to do back there?

508

00:21:37,000 --> 00:21:38,000

I can do it.

509

00:21:38,000 --> 00:21:45,000

Later that evening, we welcomed Burtette Anderson from a company called Photron Cameras to help us with a new experiment at the triangle.

510

00:21:45,000 --> 00:21:47,000

Let's hit the green button.

511

00:21:47,000 --> 00:21:52,000

He specializes in a high-speed camera system that can shoot thousands of frames per second.

512

00:21:52,000 --> 00:21:54,000

Everything's talking correctly.

513

00:21:54,000 --> 00:21:59,000

Our eyes basically detect somewhere between 24 and 30 frames per second.

514

00:21:59,000 --> 00:22:05,000

The advantage of using a high-speed camera out here is if you have things that are moving that you're just not quite catching,

515

00:22:05,000 --> 00:22:08,000

if you're ready for it, you can get a very good look at it.

516

00:22:08,000 --> 00:22:11,000

My camera will shoot at 100,000 or a million frames per second.

517

00:22:11,000 --> 00:22:13,000

Just load a rocket.

518

00:22:13,000 --> 00:22:14,000

Red one first?

519

00:22:14,000 --> 00:22:15,000

Yep.

520

00:22:15,000 --> 00:22:25,000

The plan was to launch rockets up through the triangle where we've seen numerous UAPs and detected what we believe to be some kind of anomaly between 300 and 5,000 feet.

521

00:22:25,000 --> 00:22:26,000

Okay, it's on?

522

00:22:26,000 --> 00:22:27,000

Yeah.

523

00:22:27,000 --> 00:22:34,000

While Burtette photographed each launch at 1,000 frames per second with both color and infrared cameras.

524

00:22:34,000 --> 00:22:36,000

Wait, what's this right here?

525

00:22:36,000 --> 00:22:37,000

What's this?

526

00:22:37,000 --> 00:22:38,000

We got something.

527

00:22:38,000 --> 00:22:39,000

We got something.

528

00:22:39,000 --> 00:22:44,000

When we've seen UAPs here in the past, the UAP appeared and vanished.

529

00:22:44,000 --> 00:22:46,000

We've gotten quick glimpses of them.

530

00:22:46,000 --> 00:22:48,000

Hey, look, UAP right there!

531

00:22:48,000 --> 00:22:49,000

Yep.

532

00:22:49,000 --> 00:22:53,000

But then they tend to just disappear before we can really see what they are.

533

00:22:53,000 --> 00:22:54,000

Are they always that bright?

534

00:22:54,000 --> 00:22:57,000

It's gone.

535

00:22:57,000 --> 00:22:58,000

Here we go.

536

00:22:58,000 --> 00:22:59,000

Let's go straight up.

537

00:22:59,000 --> 00:23:01,000

That's only when you're good.

538

00:23:01,000 --> 00:23:03,000

That's fine.

539

00:23:03,000 --> 00:23:11,000

So we're hoping that Burtette's cameras will help us get a much better look at anything that might appear in the sky during our rocket launches tonight.

540

00:23:11,000 --> 00:23:12,000

I hope that worked.

541

00:23:12,000 --> 00:23:13,000

Sorry.

542

00:23:13,000 --> 00:23:27,000

We learned about the investigations at Skinwalker Ranch through Travis and some of the things they hadn't done yet is tried to catch things in high speed because there's so many fast moving things that happen here that you don't get to grasp with your eye and that's kind of where our 4-tron cameras come into play.

543

00:23:27,000 --> 00:23:28,000

We got it.

544

00:23:28,000 --> 00:23:29,000

They slow down reality.

545

00:23:29,000 --> 00:23:38,000

So anything you can't see with your eye, we can catch with the cameras and anything you just kind of saw with your eye, we can slow it down so you can get a very good look at it.

546

00:23:38,000 --> 00:23:40,000

The rocket is ready to go.

547

00:23:40,000 --> 00:23:41,000

All right.

548

00:23:41,000 --> 00:23:42,000

Are you good?

549

00:23:42,000 --> 00:23:43,000

Yeah, it's on.

550

00:23:43,000 --> 00:23:44,000

We're good.

551

00:23:44,000 --> 00:23:46,000

Hey, Eric, do you copy?

552

00:23:46,000 --> 00:23:47,000

Yeah, go ahead.

553

00:23:47,000 --> 00:23:49,000

The advisor is going to go in one minute.

554

00:23:49,000 --> 00:23:50,000

One minute.

555

00:23:50,000 --> 00:23:51,000

All right, copy you.

556

00:23:51,000 --> 00:24:04,000

Eric was stationed in the command center during the experiment so he could monitor for any strange energy spikes out at the triangle and keep a close eye on the ranch surveillance camera pointed in this direction.

557

00:24:04,000 --> 00:24:05,000

All right, here we go.

558

00:24:05,000 --> 00:24:06,000

Here we go.

559

00:24:06,000 --> 00:24:07,000

Okay.

560

00:24:07,000 --> 00:24:08,000

We're hot.

561

00:24:08,000 --> 00:24:09,000

All right, everybody ready?

562

00:24:09,000 --> 00:24:10,000

Is everybody ready?

563

00:24:10,000 --> 00:24:13,000

Eric, be advised, the rocket's hot.

564

00:24:13,000 --> 00:24:14,000

We're going hot now.

565

00:24:14,000 --> 00:24:16,000

Copy you, Travis.

566

00:24:16,000 --> 00:24:20,000

All right, here we go in three, two, one.

567

00:24:24,000 --> 00:24:26,000

Hey, did you see that?

568

00:24:26,000 --> 00:24:30,000

It turned before you get to wherever the anomaly is.

569

00:24:30,000 --> 00:24:32,000

How many times have we seen that happen?

570

00:24:32,000 --> 00:24:33,000

Yeah.

571

00:24:33,000 --> 00:24:35,000

It's going to land right here behind us.

572

00:24:35,000 --> 00:24:44,000

Right after the first rocket launched, I noticed that in midair, it suddenly veered a little off course like it ran into something invisible that deflected it.

573

00:24:44,000 --> 00:24:50,000

Now, we've also seen that happen numerous times with other rockets and GPS devices at the triangle.

574

00:24:50,000 --> 00:24:56,000

So I was really eager to immediately launch another rocket to see what would happen next.

575

00:24:56,000 --> 00:24:58,000

Isn't that crazy?

576

00:24:58,000 --> 00:24:59,000

Gosh.

577

00:24:59,000 --> 00:25:02,000

I think one thing, it's another.

578

00:25:02,000 --> 00:25:04,000

Hey, Caleb, why don't you pull the Jeep around and shine a light over here?

579

00:25:04,000 --> 00:25:05,000

Yeah.

580

00:25:12,000 --> 00:25:16,000

Let me download this image real quick and then we can look at it again later.

581

00:25:16,000 --> 00:25:19,000

It won't take long because there's not much in there.

582

00:25:19,000 --> 00:25:21,000

Okay, we're as good as we're going to get.

583

00:25:21,000 --> 00:25:23,000

Hey, Eric, you copy?

584

00:25:23,000 --> 00:25:25,000

Yeah, go ahead, Travis.

585

00:25:25,000 --> 00:25:27,000

Great, we've got the next one on the pad.

586

00:25:27,000 --> 00:25:28,000

We good?

587

00:25:28,000 --> 00:25:29,000

Yes, sir.

588

00:25:29,000 --> 00:25:30,000

All right.

589

00:25:30,000 --> 00:25:37,000

Five, four, three, two, one.

590

00:25:40,000 --> 00:25:41,000

That is cool.

591

00:25:41,000 --> 00:25:42,000

That one was awesome.

592

00:25:42,000 --> 00:25:44,000

Well, that went up pretty high.

593

00:25:44,000 --> 00:25:46,000

That one may end up in the east field.

594

00:25:46,000 --> 00:25:49,000

Hey, we got a light that's right there that's moving.

595

00:25:49,000 --> 00:25:50,000

Where?

596

00:25:50,000 --> 00:25:52,000

Right there, right above us.

597

00:25:52,000 --> 00:25:53,000

What, really?

598

00:25:53,000 --> 00:25:54,000

Right there.

599

00:25:54,000 --> 00:25:55,000

Where?

600

00:25:55,000 --> 00:25:57,000

Yeah, we got it.

601

00:25:57,000 --> 00:25:58,000

There is right there.

602

00:25:58,000 --> 00:26:00,000

No, this was moving pretty fast.

603

00:26:00,000 --> 00:26:02,000

What is that?

604

00:26:02,000 --> 00:26:04,000

That's not a plane.

605

00:26:11,000 --> 00:26:13,000

That's not a plane.

606

00:26:13,000 --> 00:26:19,000

Eric, we've got an orange light across the river on the southwest side,

607

00:26:19,000 --> 00:26:22,000

moving pretty fast about treetop height.

608

00:26:22,000 --> 00:26:23,000

Look at that.

609

00:26:23,000 --> 00:26:25,000

Still plenty bright.

610

00:26:25,000 --> 00:26:26,000

Dang.

611

00:26:26,000 --> 00:26:29,000

Hey, do you have any cameras in that direction?

612

00:26:29,000 --> 00:26:30,000

Yes, I do, Travis.

613

00:26:30,000 --> 00:26:32,000

I will take a look.

614

00:26:32,000 --> 00:26:34,000

Okay, it looks like it's turning north, doesn't it?

615

00:26:34,000 --> 00:26:36,000

It just looks like it's turning north.

616

00:26:36,000 --> 00:26:39,000

That ain't a satellite, guys.

617

00:26:39,000 --> 00:26:41,000

I don't know where it came from,

618

00:26:41,000 --> 00:26:45,000

but just after we launched our second rocket at the Triangle area,

619

00:26:45,000 --> 00:26:49,000

probably the most prominent UAP I've ever seen

620

00:26:49,000 --> 00:26:51,000

appeared over Skinwalker Ranch.

621

00:26:51,000 --> 00:26:54,000

Eric, we got something moving right overhead of us right now.

622

00:26:54,000 --> 00:26:57,000

It's moving slightly northeast.

623

00:26:57,000 --> 00:27:00,000

It's orange, and it doesn't look like a satellite.

624

00:27:00,000 --> 00:27:02,000

Do you see it in the camera?

625

00:27:02,000 --> 00:27:04,000

I'm going to try to track it.

626

00:27:06,000 --> 00:27:08,000

You see it?

627

00:27:08,000 --> 00:27:10,000

Hey, come on. Hey, it looks like it's sped up.

628

00:27:10,000 --> 00:27:13,000

Did it look like it just sped up, y'all?

629

00:27:13,000 --> 00:27:14,000

Yes, it did.

630

00:27:14,000 --> 00:27:16,000

It just sped up.

631

00:27:16,000 --> 00:27:19,000

Eric, it's almost right over you now,

632

00:27:19,000 --> 00:27:21,000

and it's moving really fast.

633

00:27:25,000 --> 00:27:27,000

I've not seen it.

634

00:27:29,000 --> 00:27:31,000

Travis, I don't have it.

635

00:27:31,000 --> 00:27:34,000

Ask Eric if he's got anything on the ADS-B.

636

00:27:34,000 --> 00:27:37,000

Eric, is there anything on the ADS-B?

637

00:27:37,000 --> 00:27:42,000

It would be going east northeast right now, directly over the ranch.

638

00:27:42,000 --> 00:27:44,000

Copy you. I'll check.

639

00:27:44,000 --> 00:27:47,000

I've never seen an aircraft maneuver like this thing,

640

00:27:47,000 --> 00:27:49,000

but Tomlinson was right to have Eric check

641

00:27:49,000 --> 00:27:52,000

his automatic-dependent surveillance broadcasting tracker.

642

00:27:52,000 --> 00:27:56,000

It monitors the signals that airplanes and jets are required by law to emit.

643

00:27:59,000 --> 00:28:02,000

I've got eyes on the ADS-B map.

644

00:28:02,000 --> 00:28:05,000

You know, I get aircraft as far out as 130 miles.

645

00:28:05,000 --> 00:28:08,000

There's nothing over us. There's nothing near us.

646

00:28:08,000 --> 00:28:12,000

It was clearly going do-nor and then it dog-leg and it sped up.

647

00:28:12,000 --> 00:28:15,000

Yeah, it came across, and then it, like, turned.

648

00:28:15,000 --> 00:28:18,000

Yeah. It's still going. Look at it.

649

00:28:18,000 --> 00:28:21,000

So, if that was a satellite, you'd have to go to the other side.

650

00:28:21,000 --> 00:28:24,000

Well, if that was a satellite, you'd expect it to start fading out.

651

00:28:24,000 --> 00:28:26,000

By now, it'd be fading out.

652

00:28:26,000 --> 00:28:29,000

That's no satellite.

653

00:28:29,000 --> 00:28:32,000

Dude, it just vanished.

654

00:28:32,000 --> 00:28:35,000

That thing stayed bright and just went away.

655

00:28:35,000 --> 00:28:37,000

Well, I don't see any more.

656

00:28:37,000 --> 00:28:40,000

Well, I think we ought to get that rocket up and see if we can make it replicate it.

657

00:28:40,000 --> 00:28:41,000

Yep, I hear you.

658

00:28:41,000 --> 00:28:43,000

That was not a satellite. So what was that?

659

00:28:43,000 --> 00:28:45,000

Right here over the ranch.

660

00:28:47,000 --> 00:28:49,000

Yeah, go ahead, Tomlinson.

661

00:28:49,000 --> 00:28:51,000

Yep. Okay.

662

00:28:51,000 --> 00:28:53,000

One more sparky rocket.

663

00:28:53,000 --> 00:28:55,000

Okay, perfect.

664

00:28:55,000 --> 00:29:00,000

We couldn't wait to see if launching another rocket would evoke the UAP to reappear

665

00:29:00,000 --> 00:29:03,000

or stimulate another one or who knows what else.

666

00:29:05,000 --> 00:29:09,000

And also, I hope that Burdette was getting great pictures

667

00:29:09,000 --> 00:29:11,000

that would help us figure out what it was.

668

00:29:11,000 --> 00:29:13,000

Put the wires up.

669

00:29:13,000 --> 00:29:15,000

Let me make sure it's off. Hang on.

670

00:29:16,000 --> 00:29:17,000

Are we good here?

671

00:29:17,000 --> 00:29:18,000

Yeah, yeah, we're good.

672

00:29:18,000 --> 00:29:20,000

Lights on. Lights on.

673

00:29:20,000 --> 00:29:21,000

Hey, Eric, be advised.

674

00:29:21,000 --> 00:29:25,000

We're ready for launch number three in about 15 seconds.

675

00:29:25,000 --> 00:29:26,000

Are you ready?

676

00:29:26,000 --> 00:29:28,000

I'm ready. Go ahead.

677

00:29:28,000 --> 00:29:29,000

Are you ready for that?

678

00:29:29,000 --> 00:29:30,000

Yes, sir. Yeah, we're good to go.

679

00:29:30,000 --> 00:29:31,000

All right.

680

00:29:31,000 --> 00:29:32,000

You're going in.

681

00:29:32,000 --> 00:29:38,000

Going in five, four, three, two, one.

682

00:29:40,000 --> 00:29:42,000

Oh, we got a malfunction. Everybody watch out.

683

00:29:42,000 --> 00:29:47,000

Oh, no.

684

00:29:47,000 --> 00:29:49,000

Oh, it's on fire.

685

00:29:49,000 --> 00:29:51,000

We got a fire. We got a fire.

686

00:29:53,000 --> 00:29:54,000

Oh, dang.

687

00:29:54,000 --> 00:29:59,000

We set the rocket up and we're ready to launch this thing as the launch starts.

688

00:29:59,000 --> 00:30:01,000

It looks like a perfect launch from the beginning.

689

00:30:01,000 --> 00:30:06,000

And what we see is that the rocket takes off, clears the tower,

690

00:30:06,000 --> 00:30:09,000

gets to somewhere I'm estimating between 30 and 50 feet,

691

00:30:09,000 --> 00:30:12,000

and then suddenly there's a big flash of light

692

00:30:12,000 --> 00:30:17,000

and what sounded like a pop, maybe even an explosion.

693

00:30:18,000 --> 00:30:19,000

It's burned down.

694

00:30:19,000 --> 00:30:20,000

The motor burned out.

695

00:30:21,000 --> 00:30:22,000

Holy crap.

696

00:30:23,000 --> 00:30:24,000

Hope you haven't seen that.

697

00:30:26,000 --> 00:30:27,000

What would cause that?

698

00:30:27,000 --> 00:30:28,000

What would cause that?

699

00:30:28,000 --> 00:30:30,000

The motor blew up.

700

00:30:30,000 --> 00:30:33,000

It deflagrated inside the rocket.

701

00:30:33,000 --> 00:30:34,000

Wow.

702

00:30:34,000 --> 00:30:36,000

Hey, Eric, you copy?

703

00:30:36,000 --> 00:30:38,000

I copy you, Travis.

704

00:30:38,000 --> 00:30:40,000

Looks like we had a lawn dart.

705

00:30:40,000 --> 00:30:42,000

Well, it was worse than that.

706

00:30:42,000 --> 00:30:46,000

At about 30 feet off the launch pad, the motor exploded.

707

00:30:46,000 --> 00:30:48,000

We're out of the tail section of the rocket,

708

00:30:48,000 --> 00:30:54,000

and then it lawn darted for probably 200 feet up and started a fire.

709

00:30:54,000 --> 00:30:56,000

Well, let's go look at the high speed

710

00:30:56,000 --> 00:30:58,000

because it should be right in that view.

711

00:30:58,000 --> 00:31:00,000

We recovered it.

712

00:31:00,000 --> 00:31:01,000

Oh, crap.

713

00:31:01,000 --> 00:31:03,000

That's what a night.

714

00:31:03,000 --> 00:31:04,000

What?

715

00:31:04,000 --> 00:31:05,000

That motor blew up.

716

00:31:05,000 --> 00:31:07,000

It literally exploded.

717

00:31:07,000 --> 00:31:11,000

I've never seen, I've seen experimental motors do that, Caleb,

718

00:31:11,000 --> 00:31:15,000

but I've never seen a store bought motor deflagrate like that.

719

00:31:15,000 --> 00:31:16,000

There.

720

00:31:16,000 --> 00:31:17,000

Got it.

721

00:31:17,000 --> 00:31:18,000

Hey, Travis.

722

00:31:18,000 --> 00:31:19,000

Yeah.

723

00:31:19,000 --> 00:31:21,000

We caught the malfunction on the high speed.

724

00:31:21,000 --> 00:31:22,000

Oh, really?

725

00:31:22,000 --> 00:31:23,000

Yeah.

726

00:31:25,000 --> 00:31:26,000

Hey, check this out.

727

00:31:26,000 --> 00:31:28,000

There's something on the camera.

728

00:31:28,000 --> 00:31:30,000

Something I've never seen before.

729

00:31:30,000 --> 00:31:31,000

Check this out.

730

00:31:31,000 --> 00:31:33,000

So as it's going, look what you've got.

731

00:31:33,000 --> 00:31:36,000

There's something in the sky above the rocket, right here.

732

00:31:36,000 --> 00:31:37,000

Yeah, look at that.

733

00:31:37,000 --> 00:31:38,000

Look at the light.

734

00:31:41,000 --> 00:31:43,000

No way.

735

00:31:43,000 --> 00:31:44,000

Look at that.

736

00:31:44,000 --> 00:31:45,000

I see.

737

00:31:45,000 --> 00:31:46,000

There is literally something.

738

00:31:46,000 --> 00:31:49,000

We're maybe looking at the anomaly for the first time, guys.

739

00:31:49,000 --> 00:31:51,000

That's crazy.

740

00:31:51,000 --> 00:31:52,000

Oh, but it's not.

741

00:31:52,000 --> 00:31:53,000

It's not.

742

00:31:53,000 --> 00:31:54,000

It's not.

743

00:31:54,000 --> 00:31:55,000

It's not.

744

00:31:55,000 --> 00:31:56,000

It's not.

745

00:31:56,000 --> 00:31:57,000

That's crazy.

746

00:31:57,000 --> 00:31:58,000

Oh, my god.

747

00:32:05,000 --> 00:32:07,000

There is literally something.

748

00:32:07,000 --> 00:32:10,000

We're maybe looking at the anomaly for the first time, guys.

749

00:32:10,000 --> 00:32:11,000

Yeah, look at that.

750

00:32:11,000 --> 00:32:12,000

Look at the light.

751

00:32:12,000 --> 00:32:13,000

All right, now the rocket gets there.

752

00:32:13,000 --> 00:32:14,000

Look how it works.

753

00:32:14,000 --> 00:32:15,000

It's going to close up right there.

754

00:32:15,000 --> 00:32:17,000

And then the rocket blows up right when it hits it.

755

00:32:17,000 --> 00:32:18,000

Oh, f**k.

756

00:32:18,000 --> 00:32:19,000

Yeah!

757

00:32:19,000 --> 00:32:20,000

Right here.

758

00:32:20,000 --> 00:32:21,000

Look at that.

759

00:32:21,000 --> 00:32:22,000

Yeah.

760

00:32:22,000 --> 00:32:24,000

Holy crap.

761

00:32:24,000 --> 00:32:26,000

All right, Bird-Dead, could you play it one more time?

762

00:32:26,000 --> 00:32:28,000

I want to make sure I saw what I think I just saw.

763

00:32:28,000 --> 00:32:32,000

After four years of investigating Skinwalker Ranch as a team,

764

00:32:32,000 --> 00:32:38,000

we finally got good visual evidence of something incredible at the triangle.

765

00:32:38,000 --> 00:32:40,000

Just as we launched the rocket,

766

00:32:40,000 --> 00:32:44,000

Bird-Dead Anderson captured some kind of blob-like feature

767

00:32:44,000 --> 00:32:48,000

on his high-speed camera that literally appeared out of nowhere

768

00:32:48,000 --> 00:32:50,000

and caused the rocket to explode.

769

00:32:50,000 --> 00:32:53,000

It was something that none of us could see with the naked eye.

770

00:32:53,000 --> 00:32:55,000

That cloud remained intact.

771

00:32:55,000 --> 00:32:59,000

The whole thing, this isn't an anomaly in the lands because it didn't move.

772

00:32:59,000 --> 00:33:03,000

Could this be the phenomena that causes the energy spikes we've detected?

773

00:33:03,000 --> 00:33:06,000

And is it related to the UAPs we've seen?

774

00:33:06,000 --> 00:33:10,000

All I know is we may finally be getting closer to possible answers.

775

00:33:10,000 --> 00:33:15,000

Think about all the rockets that hit about that same spot and veered off.

776

00:33:15,000 --> 00:33:18,000

So as you can see it right there, there's something in the sky.

777

00:33:18,000 --> 00:33:20,000

It's already illuminated by the light.

778

00:33:20,000 --> 00:33:21,000

Yeah.

779

00:33:21,000 --> 00:33:22,000

There's not a cloud in the sky.

780

00:33:22,000 --> 00:33:23,000

Not a cloud in the sky.

781

00:33:23,000 --> 00:33:24,000

And so what is it?

782

00:33:24,000 --> 00:33:25,000

There's no dust.

783

00:33:25,000 --> 00:33:27,000

And then look, it's almost there.

784

00:33:27,000 --> 00:33:28,000

Right there.

785

00:33:28,000 --> 00:33:31,000

It's like it hits right on something or zap or whatever.

786

00:33:31,000 --> 00:33:32,000

Boom.

787

00:33:32,000 --> 00:33:33,000

Boom.

788

00:33:33,000 --> 00:33:34,000

And it is exactly on the top of that.

789

00:33:34,000 --> 00:33:35,000

Oh, God.

790

00:33:35,000 --> 00:33:36,000

You can't make it up.

791

00:33:36,000 --> 00:33:37,000

Oh, yeah.

792

00:33:37,000 --> 00:33:41,000

Usually I can explain everything I've seen in a high-speed camera when I record it.

793

00:33:41,000 --> 00:33:45,000

But when we shot the third rocket, as soon as that rocket started illuminating,

794

00:33:45,000 --> 00:33:47,000

we saw something that wasn't there in the second shot.

795

00:33:47,000 --> 00:33:49,000

I can't explain what it is.

796

00:33:49,000 --> 00:33:52,000

I've never seen anything like that come off a photon camera.

797

00:33:52,000 --> 00:33:53,000

Holy crap.

798

00:33:53,000 --> 00:33:54,000

Oh, my God.

799

00:33:54,000 --> 00:33:58,000

Well, Travis, it's only 30 feet, 30, 40 feet above us.

800

00:33:58,000 --> 00:34:00,000

Oh, my God.

801

00:34:00,000 --> 00:34:04,000

40 feet high.

802

00:34:04,000 --> 00:34:11,000

One of the odds of that happening right there with other rockets in that same spot.

803

00:34:11,000 --> 00:34:18,000

Last year, we attempted to launch a 15-foot tall rocket through the anomaly above the triangle.

804

00:34:18,000 --> 00:34:20,000

There you go.

805

00:34:20,000 --> 00:34:21,000

Uh-oh.

806

00:34:21,000 --> 00:34:22,000

That motor blew.

807

00:34:22,000 --> 00:34:25,000

And it exploded in nearly the same spot.

808

00:34:25,000 --> 00:34:26,000

Oh.

809

00:34:26,000 --> 00:34:32,000

And shortly after that, we saw UAP appear over the triangle.

810

00:34:32,000 --> 00:34:33,000

Look at that.

811

00:34:33,000 --> 00:34:34,000

Look at that.

812

00:34:34,000 --> 00:34:37,000

Which then vanished into thin air.

813

00:34:37,000 --> 00:34:39,000

What did it disappear into?

814

00:34:39,000 --> 00:34:40,000

Is it a portal?

815

00:34:40,000 --> 00:34:43,000

Are we seeing portals open?

816

00:34:43,000 --> 00:34:44,000

Yeah.

817

00:34:44,000 --> 00:34:52,000

I couldn't possibly know what this phenomenon was, but we now have a clear location to focus our investigation.

818

00:34:52,000 --> 00:34:55,000

Okay, we caught something cool.

819

00:34:55,000 --> 00:34:57,000

Yeah!

820

00:34:57,000 --> 00:34:59,000

Ha!

821

00:34:59,000 --> 00:35:02,000

That's just more validation.

822

00:35:02,000 --> 00:35:04,000

We got to call Eric and tell him this.

823

00:35:04,000 --> 00:35:07,000

Eric, you're not going to believe what the high speed caught.

824

00:35:07,000 --> 00:35:09,000

There is a thing in the sky.

825

00:35:09,000 --> 00:35:11,000

The rocket hits it and explodes.

826

00:35:11,000 --> 00:35:13,000

That is unbelievable.

827

00:35:13,000 --> 00:35:16,000

I want to see that footage.

828

00:35:16,000 --> 00:35:18,000

My gosh!

829

00:35:18,000 --> 00:35:23,000

Ha-ha!

830

00:35:23,000 --> 00:35:25,000

Helicopter, helicopter!

831

00:35:25,000 --> 00:35:28,000

Helicopter coming right over.

832

00:35:28,000 --> 00:35:31,000

Eric, we got a helicopter right over the ranch right now.

833

00:35:31,000 --> 00:35:36,000

Are you getting it?

834

00:35:36,000 --> 00:35:40,000

I am getting no helicopter above the ranch on the ADSB receiver here.

835

00:35:40,000 --> 00:35:43,000

We have a helicopter right over the triangle.

836

00:35:43,000 --> 00:35:45,000

Hey, it just went dark.

837

00:35:45,000 --> 00:35:47,000

And it just vanished.

838

00:35:47,000 --> 00:35:48,000

But we're still here.

839

00:35:48,000 --> 00:35:50,000

There's this light right there.

840

00:35:50,000 --> 00:35:51,000

It went behind the anomaly.

841

00:35:51,000 --> 00:35:53,000

That's a bigger helicopter.

842

00:35:53,000 --> 00:35:55,000

Why right now?

843

00:35:55,000 --> 00:36:01,000

Why right now?

844

00:36:01,000 --> 00:36:03,000

Eric, it came over us.

845

00:36:03,000 --> 00:36:05,000

We lost the lights for a second.

846

00:36:05,000 --> 00:36:10,000

And then it turned away from the anomaly and turned southeast.

847

00:36:10,000 --> 00:36:14,000

Well, whoever they were, they weren't transponding.

848

00:36:14,000 --> 00:36:17,000

A helicopter that size, not transponding.

849

00:36:17,000 --> 00:36:19,000

Well, did you see that light?

850

00:36:19,000 --> 00:36:21,000

Right after we did this.

851

00:36:21,000 --> 00:36:23,000

The helicopter looks like it's coming back around.

852

00:36:23,000 --> 00:36:25,000

Helicopter's turning back around, Eric.

853

00:36:25,000 --> 00:36:29,000

I've got eyes on him.

854

00:36:29,000 --> 00:36:31,000

Where did that just come out of?

855

00:36:31,000 --> 00:36:34,000

It's coming back.

856

00:36:34,000 --> 00:36:36,000

Eric, that helicopter's coming back at us.

857

00:36:36,000 --> 00:36:38,000

Do you see that?

858

00:36:38,000 --> 00:36:41,000

Yeah, I've got him.

859

00:36:41,000 --> 00:36:47,000

All right, now you're mine.

860

00:36:47,000 --> 00:36:52,000

Scan Travis, this aircraft is not transponding.

861

00:36:52,000 --> 00:36:56,000

The aircraft is not transponding.

862

00:36:56,000 --> 00:36:57,000

And it's slowing down.

863

00:36:57,000 --> 00:37:02,000

And it's doing, it's orbiting the ranch.

864

00:37:02,000 --> 00:37:12,000

It's doing surveillance right now at the ranch.

865

00:37:12,000 --> 00:37:17,000

We have a helicopter right over the triangle right now, right overhead.

866

00:37:17,000 --> 00:37:23,000

It's doing surveillance right now at the ranch.

867

00:37:23,000 --> 00:37:25,000

They're definitely watching.

868

00:37:25,000 --> 00:37:27,000

They're definitely over the ranch looking at us.

869

00:37:27,000 --> 00:37:32,000

Shortly after this UAP sighting, and after this rocket blows up,

870

00:37:32,000 --> 00:37:37,000

all of a sudden the helicopter comes flying directly over us.

871

00:37:37,000 --> 00:37:39,000

They're turning again.

872

00:37:39,000 --> 00:37:41,000

Yeah, they are clearly watching.

873

00:37:41,000 --> 00:37:44,000

And then we also had that other light that we saw earlier.

874

00:37:44,000 --> 00:37:46,000

Yep.

875

00:37:46,000 --> 00:37:48,000

As that helicopter's sitting there hovering,

876

00:37:48,000 --> 00:37:51,000

my mind is immediately trying to figure out who this could be

877

00:37:51,000 --> 00:37:54,000

that's watching us.

878

00:37:54,000 --> 00:37:58,000

Hey, Eric, are you sure that there's nothing on the ADSB?

879

00:37:58,000 --> 00:38:03,000

Travis, this helicopter is not transponding as far as I can tell.

880

00:38:03,000 --> 00:38:07,000

I'm getting aircraft 100 miles to the south of here.

881

00:38:07,000 --> 00:38:10,000

So it's not a connectivity issue.

882

00:38:10,000 --> 00:38:13,000

And he's staying right over us and orbiting and orbiting.

883

00:38:13,000 --> 00:38:17,000

Well, someone's taking an interest in what we're doing.

884

00:38:17,000 --> 00:38:18,000

There's nothing over us.

885

00:38:18,000 --> 00:38:20,000

There's nothing near us.

886

00:38:20,000 --> 00:38:23,000

And he has not shown up at all.

887

00:38:23,000 --> 00:38:27,000

This is an aircraft that is deliberately not transponding

888

00:38:27,000 --> 00:38:30,000

while flying over the ranch.

889

00:38:30,000 --> 00:38:33,000

All I know is there's an aircraft flying after night,

890

00:38:33,000 --> 00:38:35,000

which means they got night vision.

891

00:38:35,000 --> 00:38:37,000

There are not any commercial helicopters around here

892

00:38:37,000 --> 00:38:39,000

with night vision capability.

893

00:38:39,000 --> 00:38:42,000

The only thing this could be then is a military helicopter.

894

00:38:42,000 --> 00:38:46,000

What is the military doing flying over Skinwalker Ranch

895

00:38:46,000 --> 00:38:48,000

while we're doing this experiment

896

00:38:48,000 --> 00:38:52,000

and while we find something that we've never seen before?

897

00:38:52,000 --> 00:38:54,000

I don't like the feeling of that.

898

00:38:54,000 --> 00:38:57,000

I don't like it crap either.

899

00:38:57,000 --> 00:39:04,000

Hey, Eric, do you have any of the ranch cameras on the helicopter?

900

00:39:04,000 --> 00:39:08,000

Yeah, I've got multiple of the ranch cameras on him.

901

00:39:08,000 --> 00:39:12,000

He is sitting still and hovering watching us.

902

00:39:12,000 --> 00:39:14,000

That is exactly right.

903

00:39:14,000 --> 00:39:18,000

It's really spookiness and pissing us off at the same time.

904

00:39:18,000 --> 00:39:21,000

I'm right there with you, Travis.

905

00:39:21,000 --> 00:39:24,000

Well, Travis, it's pretty clear somebody is taking an interest

906

00:39:24,000 --> 00:39:26,000

in what we're doing.

907

00:39:26,000 --> 00:39:29,000

It really is a little bit scary.

908

00:39:32,000 --> 00:39:34,000

They're leaving.

909

00:39:34,000 --> 00:39:35,000

How long they said they were leaving?

910

00:39:35,000 --> 00:39:37,000

Like four or five minutes?

911

00:39:37,000 --> 00:39:40,000

Oh, 10 minutes.

912

00:39:40,000 --> 00:39:42,000

What the heck?

913

00:39:42,000 --> 00:39:45,000

Now they're headed back towards Roosevelt.

914

00:39:45,000 --> 00:39:48,000

They are all but gone now.

915

00:39:48,000 --> 00:39:52,000

It came by to show us that it knew we were doing something.

916

00:39:52,000 --> 00:39:53,000

I don't know.

917

00:39:53,000 --> 00:39:59,000

It's possible somebody saw rockets and they called, you know, ATF or something.

918

00:39:59,000 --> 00:40:00,000

And that was an ATF.

919

00:40:00,000 --> 00:40:02,000

ATF has a helicopter in the Unibasin?

920

00:40:02,000 --> 00:40:05,000

They could have hired somebody, right?

921

00:40:05,000 --> 00:40:07,000

There are no helicopters out here equipped with night vision.

922

00:40:07,000 --> 00:40:09,000

That's a good point.

923

00:40:09,000 --> 00:40:11,000

I mean, there's not a military base nearby.

924

00:40:11,000 --> 00:40:13,000

I mean, right here by that has helicopters.

925

00:40:13,000 --> 00:40:14,000

We're talking minutes.

926

00:40:14,000 --> 00:40:15,000

Yeah.

927

00:40:15,000 --> 00:40:16,000

Who alerted them that fast?

928

00:40:16,000 --> 00:40:17,000

Where was that helicopter?

929

00:40:17,000 --> 00:40:19,000

How did it get here so quick?

930

00:40:19,000 --> 00:40:21,000

It's well known that the federal government investigated

931

00:40:21,000 --> 00:40:23,000

Skinwalker Ranch in the past,

932

00:40:23,000 --> 00:40:27,000

but I'm not aware of any current government investigations here.

933

00:40:27,000 --> 00:40:30,000

So are we being spied on while we conduct our operations?

934

00:40:30,000 --> 00:40:33,000

I don't know, but I want to find out.

935

00:40:33,000 --> 00:40:35,000

What a night.

936

00:40:35,000 --> 00:40:38,000

Hey, look, we've got a lot of equipment here.

937

00:40:38,000 --> 00:40:39,000

It's getting late.

938

00:40:39,000 --> 00:40:41,000

Well, let's get cleaned up, shall we?

939

00:40:41,000 --> 00:40:42,000

Yes.

940

00:40:42,000 --> 00:40:43,000

All right.

941

00:40:43,000 --> 00:40:44,000

All right, well, let's pack up.

942

00:40:44,000 --> 00:40:46,000

Let's get wrapped up.

943

00:40:46,000 --> 00:40:49,000

The heck is going on in that space above this area?

944

00:40:49,000 --> 00:40:51,000

What are we seeing?

945

00:40:51,000 --> 00:40:53,000

Is there, in fact, exotic physics playing out in the space

946

00:40:53,000 --> 00:40:55,000

just above the triangle?

947

00:40:55,000 --> 00:40:58,000

That's what we hope to find out.

948

00:40:58,000 --> 00:41:02,000

We may have found a real unexplained phenomena

949

00:41:02,000 --> 00:41:07,000

above the triangle that nobody has ever seen ever before.

950

00:41:07,000 --> 00:41:09,000

Could this new anomaly, this blob,

951

00:41:09,000 --> 00:41:13,000

be the cause of each of these incidents over the triangle?

952

00:41:13,000 --> 00:41:16,000

We are on the verge of getting the very answers

953

00:41:16,000 --> 00:41:18,000

that we've been seeking for years.

954

00:41:18,000 --> 00:41:22,000

We've made incredible progress in documenting the reality of the phenomenon.

955

00:41:22,000 --> 00:41:26,000

We are just getting started and scratching the surface

956

00:41:26,000 --> 00:41:31,000

of what we are really dealing with here at Skinwalker Ranch.

957

00:41:43,000 --> 00:41:47,000

The signal seems to be coming from right there where that big crane is.

958

00:41:47,000 --> 00:41:50,000

We're going to probe that space out of the triangle.

959

00:41:50,000 --> 00:41:53,000

Caleb will be releasing projectiles.

960

00:41:53,000 --> 00:41:54,000

Where I saw a flash.

961

00:41:54,000 --> 00:41:55,000

Holy crap.

962

00:41:55,000 --> 00:41:58,000

This is a video recording taken from the triangle.

963

00:41:58,000 --> 00:41:59,000

Right there.

964

00:41:59,000 --> 00:42:01,000

Holy cow.
