

1

00:00:00,000 --> 00:00:03,000

Hey, we got a light that's moving.

2

00:00:03,000 --> 00:00:04,000

Yeah, right there.

3

00:00:04,000 --> 00:00:05,000

That's the inside of light.

4

00:00:05,000 --> 00:00:06,000

It just vanished.

5

00:00:06,000 --> 00:00:10,000

Oh, we got a malfunction.

6

00:00:10,000 --> 00:00:11,000

Everybody watch out.

7

00:00:11,000 --> 00:00:14,000

There's something in the sky above the rocket right here.

8

00:00:14,000 --> 00:00:18,000

We may be looking at the anomaly for the first time, guys.

9

00:00:18,000 --> 00:00:21,000

We have a helicopter right over the triangle right now.

10

00:00:21,000 --> 00:00:27,000

It's pretty clear somebody is taking an interest in what we're doing.

11

00:00:27,000 --> 00:00:31,000

There is a ranch in northern Utah.

12

00:00:31,000 --> 00:00:39,000

It is considered the epicenter of the strangest and most disturbing phenomena on Earth.

13

00:00:39,000 --> 00:00:48,000

Animal mutilations, bizarre UFO sightings, and unusual energies that have proven harmful to humans.

14

00:00:48,000 --> 00:00:54,000

For 20 years, the federal government tried to find answers and failed.

15

00:00:54,000 --> 00:01:02,000

Now, a new team of dedicated scientists, researchers, and experts has taken over.

16

00:01:02,000 --> 00:01:15,000

They are determined to solve the mystery and reveal the secret of Skinwalker Ranch.

17

00:01:15,000 --> 00:01:18,000

Well, we got the rockets.

18

00:01:18,000 --> 00:01:20,000

Eric and Payloads are in here.

19

00:01:20,000 --> 00:01:21,000

Oh, wow.

20

00:01:21,000 --> 00:01:22,000

But look at that.

21

00:01:22,000 --> 00:01:25,000

That thing blew up out of the side.

22

00:01:25,000 --> 00:01:28,000

I've never in my life seen one of these little motors do that.

23

00:01:28,000 --> 00:01:35,000

I've seen them off the bottom or the top, but I've launched thousands of that particular motor and never seen that in my life.

24

00:01:35,000 --> 00:01:37,000

Never.

25

00:01:37,000 --> 00:01:41,000

After seeing another UAP during a rocket experiment at the triangle last night,

26

00:01:41,000 --> 00:01:46,000

we couldn't wait to review the high-speed camera footage that Burdett Anderson recorded.

27

00:01:46,000 --> 00:01:52,000

We had just launched a rocket up through the previously identified anomalous zone between 300 and 5,000 feet high.

28

00:01:52,000 --> 00:01:59,000

And right after the rocket cleared the launch tower, it appeared to hit something and mysteriously exploded.

29

00:01:59,000 --> 00:02:01,000

You've got to see what Burdett captured on the high-speed.

30

00:02:01,000 --> 00:02:02,000

I can't wait.

31

00:02:02,000 --> 00:02:03,000

It is unbelievable.

32

00:02:03,000 --> 00:02:12,000

So after all the time we've spent investigating how the triangle might be connected to the weird phenomena that we've seen on Skinwalker Ranch,

33

00:02:12,000 --> 00:02:18,000

we were really hoping that Burdett's high-speed camera system, which takes a thousand pictures per second,

34

00:02:18,000 --> 00:02:21,000

would help us figure out just what in the heck destroyed our rocket.

35

00:02:21,000 --> 00:02:30,000

Now before we go any further, before you hit the play button, look at that screen really closely and see if you see anything that shouldn't be there.

36

00:02:30,000 --> 00:02:32,000

One of these things is not like the others.

37

00:02:32,000 --> 00:02:37,000

Well, I'm seeing something there that I don't see in the surveillance camera footage.

38

00:02:37,000 --> 00:02:38,000

Where do you see it?

39

00:02:38,000 --> 00:02:40,000

Well, high in the screen towards the center.

40

00:02:40,000 --> 00:02:41,000

There you go.

41

00:02:41,000 --> 00:02:46,000

Now watch as it moves a little more into the video what that becomes.

42

00:02:46,000 --> 00:02:47,000

Okay.

43

00:02:47,000 --> 00:02:49,000

Look at that.

44

00:02:49,000 --> 00:02:50,000

Okay.

45

00:02:50,000 --> 00:02:57,000

It's clearly becoming illuminated or something and it's growing in size and it looks like an object right there.

46

00:02:57,000 --> 00:02:59,000

Look, the rocket's not even close to it yet.

47

00:02:59,000 --> 00:03:03,000

Yeah, so there is, I mean, there is some flare.

48

00:03:03,000 --> 00:03:04,000

Sure.

49

00:03:04,000 --> 00:03:06,000

But which is to be expected, but there's something else going on.

50

00:03:06,000 --> 00:03:07,000

Yep.

51

00:03:07,000 --> 00:03:09,000

Now watch what happens right here.

52

00:03:09,000 --> 00:03:11,000

Watch how much of the rocket gets there.

53

00:03:11,000 --> 00:03:12,000

Boom.

54

00:03:12,000 --> 00:03:13,000

Right.

55

00:03:13,000 --> 00:03:17,000

At exactly the same level where we first see this thing, this rocket's exploding.

56

00:03:17,000 --> 00:03:22,000

Oh yeah, you can see how the shock wave has cleared out the trail.

57

00:03:22,000 --> 00:03:24,000

You can measure the distance on this, right?

58

00:03:24,000 --> 00:03:25,000

Yeah, as a matter of fact.

59

00:03:25,000 --> 00:03:26,000

You know what I mean?

60

00:03:26,000 --> 00:03:28,000

Yeah, I did some measuring on that already actually.

61

00:03:28,000 --> 00:03:35,000

So basically this long line on the right was measuring from the base of where the rocket started.

62

00:03:35,000 --> 00:03:40,000

And then this other green point up here is where the, about where the explosion took place.

63

00:03:40,000 --> 00:03:42,000

Okay, and how high is that?

64

00:03:42,000 --> 00:03:45,000

31 feet.

65

00:03:45,000 --> 00:03:52,000

Didn't the lock guys tell us that the flight computer on the big rocket last summer went 31 feet?

66

00:03:52,000 --> 00:03:53,000

Wow.

67

00:03:53,000 --> 00:03:55,000

Isn't that what they told us?

68

00:03:55,000 --> 00:03:58,000

You gotta be kidding me.

69

00:03:58,000 --> 00:04:07,000

Last fall, a team from Lock Precision built a custom 15 foot tall rocket that exploded right after launch.

70

00:04:07,000 --> 00:04:10,000

That motor blew.

71

00:04:10,000 --> 00:04:12,000

Just like what happened last night.

72

00:04:12,000 --> 00:04:19,000

And then moments later, we saw UAP ascend high above the triangle and vanish into thin air.

73

00:04:19,000 --> 00:04:21,000

Oh my gosh, it disappeared.

74

00:04:21,000 --> 00:04:22,000

Can you replay that?

75

00:04:22,000 --> 00:04:30,000

Could this blob like thing that appeared just 31 feet high be the anomaly that we've been trying to pinpoint at the triangle for the last four years?

76

00:04:30,000 --> 00:04:33,000

If so, then what the heck could it be?

77

00:04:33,000 --> 00:04:37,000

And how might it be related to the UAPs we keep seeing?

78

00:04:37,000 --> 00:04:41,000

Could this be a portal or maybe even just a force field?

79

00:04:41,000 --> 00:04:43,000

Caleb, it's a great question.

80

00:04:43,000 --> 00:04:49,000

We've gotta dig through this data and this video and do a lot more analysis and a lot more thinking.

81

00:04:49,000 --> 00:04:51,000

Who knows what it is?

82

00:04:51,000 --> 00:04:53,000

I'll give you this. It's definitely suggestive.

83

00:04:53,000 --> 00:04:55,000

Yes, I'm not ruining it out.

84

00:04:55,000 --> 00:05:04,000

For a thousand years, there's been stories about interdimensional portals on Skinwalker Ranch among the local indigenous tribes.

85

00:05:04,000 --> 00:05:12,000

And even from when the federal government worked with Robert Bigelow to investigate the property back in the 1990s and early 2000s.

86

00:05:12,000 --> 00:05:15,000

Alright, let's turn this thing on.

87

00:05:15,000 --> 00:05:17,000

What is that?

88

00:05:17,000 --> 00:05:29,000

But what really makes me wonder if it could be true is that in 2019, I detected an energy pulse oscillating the entire spectrum from 35 MHz to 1.6 GHz.

89

00:05:29,000 --> 00:05:33,000

That's an immense amount of energy that I just don't understand.

90

00:05:33,000 --> 00:05:41,000

This is the kind of energy that many scientists have suggested might be required to create or be a product of a wormhole.

91

00:05:41,000 --> 00:05:44,000

So is Caleb's question about portals crazy?

92

00:05:44,000 --> 00:05:46,000

I don't know. Maybe not.

93

00:05:46,000 --> 00:05:49,000

Let's just walk through it.

94

00:05:49,000 --> 00:05:55,000

Step through it. Right here you see the flares. That's the instant of explosion apparently.

95

00:05:55,000 --> 00:06:02,000

What's interesting, go back one step by that. That flare is gone. There's a flare right here, right?

96

00:06:02,000 --> 00:06:05,000

Go one more forward now.

97

00:06:05,000 --> 00:06:12,000

And you see, is that camera flare or is that actually light bouncing off of something that's in front of it?

98

00:06:12,000 --> 00:06:21,000

Uh-huh. I noticed something before the explosion. A few frames back that got my attention to the left of that plume.

99

00:06:21,000 --> 00:06:26,000

I'll bet if we take it back a bit, it'll show up.

100

00:06:26,000 --> 00:06:27,000

There.

101

00:06:27,000 --> 00:06:30,000

I saw it. I was bright, dude. I didn't see that before.

102

00:06:30,000 --> 00:06:32,000

Right there. Okay, back up.

103

00:06:32,000 --> 00:06:34,000

So you're talking about this right here?

104

00:06:34,000 --> 00:06:36,000

There it is. Look at that.

105

00:06:36,000 --> 00:06:38,000

That.

106

00:06:38,000 --> 00:06:45,000

It's in one frame. There's a bright light just above the mesa. It's pretty suspicious.

107

00:06:45,000 --> 00:06:52,000

I don't see anything to account for it directly. I don't see anything that would have mechanically interfered with the launch.

108

00:06:52,000 --> 00:06:57,000

What we have are a lot of separate pieces of what seems to be an incomplete puzzle.

109

00:06:57,000 --> 00:07:04,000

We've got something producing a bright spot here in the sky that lasts one millisecond.

110

00:07:04,000 --> 00:07:09,000

This is a very short, fast event.

111

00:07:09,000 --> 00:07:22,000

Well, you know, this may be the first time we've actually got evidence of there being some physical something above the triangle, the object, whether it's a portal or a UFO or whatever else.

112

00:07:22,000 --> 00:07:24,000

I don't know, but it's something.

113

00:07:24,000 --> 00:07:35,000

Well, this and the rest of what we've seen taken in the aggregate, including the UAP or the possible UAP that you guys tracked directly overhead and what was up with that helicopter.

114

00:07:35,000 --> 00:07:41,000

You know, I went forward. Everything we've got, who knows, we may have even missed additional clues in what you've given us.

115

00:07:41,000 --> 00:07:44,000

So we've got our work cut out for us.

116

00:07:44,000 --> 00:07:46,000

Well, Burdett, I really appreciate it.

117

00:07:46,000 --> 00:07:47,000

Absolutely.

118

00:07:47,000 --> 00:07:53,000

I guess the last thing we need to do is report back to Brandon to tell him about that helicopter.

119

00:07:53,000 --> 00:07:56,000

Yeah, this will blow his mind.

120

00:08:02,000 --> 00:08:03,000

You there?

121

00:08:03,000 --> 00:08:05,000

We are in motion.

122

00:08:05,000 --> 00:08:08,000

Copy that, Caleb. Thank you.

123

00:08:08,000 --> 00:08:22,000

After we told Brandon Fugle, the owner of Skinwalker Ranch, about what happened at the triangle and the helicopter, he said he would look into it with some of his associates in the state government and then personally come out to the ranch and report back to us.

124

00:08:22,000 --> 00:08:29,000

So while waiting for that, we turned our focus back to another major spot of interest in our current investigations, the Mesa.

125

00:08:29,000 --> 00:08:33,000

If it's possible, I'd like to bring him in a little further back.

126

00:08:33,000 --> 00:08:38,000

Last week, we conducted new ground penetrating radar scans of the Mesa.

127

00:08:38,000 --> 00:08:52,000

Where one year ago, we drilled up against what the data suggests could be a buried 400 foot long metal object shaped like a dome and possibly even made of materials similar to those that NASA uses to build space shuttles.

128

00:08:52,000 --> 00:08:55,000

We're just going to have to see what we got.

129

00:08:55,000 --> 00:09:06,000

The new scans identified a number of possibly metal anomalies, including a vertical one behind the dome shaped object that's 20 feet wide and over 100 feet tall.

130

00:09:06,000 --> 00:09:08,000

Whatever this is, is as tall as the Mesa.

131

00:09:08,000 --> 00:09:14,000

So now, we're trying a different method to figure out just what could be buried inside the Mesa.

132

00:09:14,000 --> 00:09:20,000

He's going to be moving this crane over this way. He'll be driving right up to about right here.

133

00:09:24,000 --> 00:09:26,000

You can come just a little bit more if you want.

134

00:09:26,000 --> 00:09:35,000

I've arranged for a crane to come in and to lift a lot of these big rocks out of the way and hopefully get some answers as to what sits inside that Mesa.

135

00:09:35,000 --> 00:09:39,000

Okay, we'll run our outriggers out and then we'll take a peek.

136

00:09:39,000 --> 00:09:52,000

Sometimes when we're making changes to the landscape, even small changes, something unusual happens, often something that we can measure so that we will be stationed nearby the activity with detectors of various kinds.

137

00:09:52,000 --> 00:09:53,000

I think that's good.

138

00:09:53,000 --> 00:09:59,000

Hopefully, this will yield some very interesting results as Thomas makes the initial changes to the Mesa.

139

00:09:59,000 --> 00:10:01,000

Is it light, are they?

140

00:10:01,000 --> 00:10:02,000

No.

141

00:10:02,000 --> 00:10:03,000

There.

142

00:10:03,000 --> 00:10:04,000

There you go.

143

00:10:04,000 --> 00:10:05,000

Good.

144

00:10:05,000 --> 00:10:06,000

You good?

145

00:10:09,000 --> 00:10:22,000

The fact that there is a metallic substance in this Mesa that has the same properties as space shuttle tiles for re-entry, what in the world are we dealing with and how did it get here?

146

00:10:23,000 --> 00:10:25,000

Yeah, I want to get your eyes on this.

147

00:10:25,000 --> 00:10:27,000

I've got a 1.6 on the Omni.

148

00:10:27,000 --> 00:10:28,000

Take a look.

149

00:10:28,000 --> 00:10:30,000

Yeah, watch this for a second.

150

00:10:30,000 --> 00:10:32,000

What?

151

00:10:32,000 --> 00:10:35,000

The center is at 1.6, right?

152

00:10:35,000 --> 00:10:37,000

Okay, so there's a transient.

153

00:10:37,000 --> 00:10:39,000

It was silent when it came back.

154

00:10:39,000 --> 00:10:40,000

Wow.

155

00:10:40,000 --> 00:10:56,000

Just as the crane was about to start removing boulders from the site where we detected the anomalous objects, Eric's main energy detector, called a spectrum analyzer, got a reading at the mysterious 1.6 gigahertz radio frequency that we've seen during a number of our experiments.

156

00:10:56,000 --> 00:11:00,000

And it's a signal that I can't rule out being some kind of communication.

157

00:11:00,000 --> 00:11:06,000

But if it is, who or what is trying to communicate with us and from where?

158

00:11:06,000 --> 00:11:07,000

That's crazy.

159

00:11:07,000 --> 00:11:08,000

You see how it's intermittent?

160

00:11:08,000 --> 00:11:09,000

Yeah, yeah.

161

00:11:09,000 --> 00:11:10,000

Something's happening.

162

00:11:10,000 --> 00:11:12,000

We're getting close.

163

00:11:12,000 --> 00:11:17,000

Well, it's not giving me the option to pick up my counterweight right now.

164

00:11:17,000 --> 00:11:19,000

You what?

165

00:11:19,000 --> 00:11:21,000

It won't allow me to pick it up right now.

166

00:11:21,000 --> 00:11:24,000

You're not operating the way it usually does?

167

00:11:24,000 --> 00:11:28,000

No, it's giving me a glitch here.

168

00:11:28,000 --> 00:11:30,000

Hang on for a sec.

169

00:11:30,000 --> 00:11:36,000

Hey guys, I would say that you're not going to believe this, but you're probably going to believe this.

170

00:11:36,000 --> 00:11:39,000

We're having some issues up here with the crane.

171

00:11:39,000 --> 00:11:41,000

No, we're going to believe it, given what you see.

172

00:11:41,000 --> 00:11:43,000

What kind of issues are you having, Tom?

173

00:11:43,000 --> 00:11:48,000

So the electronics in the crane are not allowing him to pick up the counterweight.

174

00:11:48,000 --> 00:11:50,000

He's sitting here shaking his head.

175

00:11:50,000 --> 00:11:52,000

He can't get his head wrapped around.

176

00:11:52,000 --> 00:11:55,000

I'm just wondering what's going on.

177

00:11:55,000 --> 00:11:58,000

Are you guys seeing anything down there?

178

00:11:58,000 --> 00:12:00,000

Oh yeah.

179

00:12:22,000 --> 00:12:29,000

At the same time, air-spectrum analyzer picked up the 1.6 gigahertz signal that we detected during a lot of our experiments,

180

00:12:29,000 --> 00:12:33,000

especially when we started digging on Skinwalker Ranch.

181

00:12:33,000 --> 00:12:35,000

Hey Thomas, can you hear me?

182

00:12:35,000 --> 00:12:37,000

Yeah, go ahead.

183

00:12:37,000 --> 00:12:39,000

Did you get them to rotate the arm?

184

00:12:39,000 --> 00:12:46,000

I'll ask him, but he's telling me that the cranes, the electronics aren't letting him do anything right now.

185

00:12:47,000 --> 00:12:54,000

So now if we are taking big metal objects and intimately connecting them to the ground,

186

00:12:54,000 --> 00:12:59,000

and we're seeing an electromagnetic signal come out in the direction of those big metal objects,

187

00:12:59,000 --> 00:13:02,000

is the source of that signal inside the ground?

188

00:13:02,000 --> 00:13:06,000

Maybe what people have been seeing all this time was when you dig things happen,

189

00:13:06,000 --> 00:13:10,000

they're touching the source that's sending out the signal.

190

00:13:10,000 --> 00:13:13,000

We've seen people react when we've seen it pop up.

191

00:13:13,000 --> 00:13:15,000

Yeah, we have.

192

00:13:15,000 --> 00:13:18,000

We've seen it all sorts of instances with medical episodes,

193

00:13:18,000 --> 00:13:25,000

and the one footprint that's left behind is that 1.6 gigahertz signal.

194

00:13:25,000 --> 00:13:31,000

Dragon was dead right that there have been a number of times that we detected the 1.6 gigahertz signal

195

00:13:31,000 --> 00:13:34,000

when we started digging or drilling on the ranch.

196

00:13:34,000 --> 00:13:43,000

Heck, a few years ago, Thomas Winerton ended up in the hospital with a serious head injury after building a road on the mesa.

197

00:13:43,000 --> 00:13:47,000

Could the 1.6 gigahertz signal be the cause of that injury?

198

00:13:47,000 --> 00:13:50,000

And did it come from whatever is buried inside the mesa?

199

00:13:50,000 --> 00:13:56,000

That possibility made us all anxious to see what would happen as this operation continued.

200

00:13:57,000 --> 00:14:01,000

What was that, just typical or is that something that's not typical?

201

00:14:01,000 --> 00:14:05,000

It's not real typical.

202

00:14:05,000 --> 00:14:08,000

Normally this crane works flawless.

203

00:14:09,000 --> 00:14:11,000

Whoa!

204

00:14:11,000 --> 00:14:13,000

What?

205

00:14:16,000 --> 00:14:18,000

We're good now.

206

00:14:19,000 --> 00:14:21,000

Boy, I'm so curious to know what happened.

207

00:14:21,000 --> 00:14:26,000

It wouldn't let me get in the right position to swing over and pick the car and wait up,

208

00:14:26,000 --> 00:14:30,000

but I mean, right now it's okay.

209

00:14:31,000 --> 00:14:33,000

So you're good to go now?

210

00:14:33,000 --> 00:14:37,000

Yeah, we're good to go, and we'll position on that first rock whenever you're ready.

211

00:14:38,000 --> 00:14:42,000

Well, he's got things squared away now, we think, so he's gonna go ahead and boom out.

212

00:14:42,000 --> 00:14:45,000

We'll see if we can start moving some rock.

213

00:14:45,000 --> 00:14:47,000

Heck yeah, heck yeah.

214

00:14:53,000 --> 00:14:55,000

Right there, that's good.

215

00:14:55,000 --> 00:14:56,000

Okay.

216

00:14:56,000 --> 00:14:58,000

Watch out.

217

00:15:00,000 --> 00:15:04,000

Hey guys, we got the first rock in the air.

218

00:15:04,000 --> 00:15:06,000

Got it?

219

00:15:06,000 --> 00:15:08,000

He's gonna swing that way so we're ready.

220

00:15:08,000 --> 00:15:14,000

Look here, the 1.6 signal has grown some with whatever he's doing there.

221

00:15:14,000 --> 00:15:16,000

Oh yeah.

222

00:15:18,000 --> 00:15:24,000

So think about this, if there is some metal dome shaped structure under the ground,

223

00:15:24,000 --> 00:15:32,000

and we just put a big metal rod above it, we've just created a big dish that we would be seeing the signal from.

224

00:15:37,000 --> 00:15:41,000

What is energizing the whole system?

225

00:15:41,000 --> 00:15:45,000

Where is the energy source? Where is the signal coming from?

226

00:15:45,000 --> 00:15:47,000

Easy, easy, easy.

227

00:15:47,000 --> 00:15:55,000

We've been looking for this source of this 1.6 gigahertz now for three years, going on four, and we've never found it.

228

00:15:55,000 --> 00:16:02,000

This might be the closest experiment we've come to that is tying us into that signal and where it's coming from.

229

00:16:03,000 --> 00:16:06,000

Dumb.

230

00:16:10,000 --> 00:16:12,000

Well they're gone.

231

00:16:12,000 --> 00:16:14,000

How does that happen?

232

00:16:17,000 --> 00:16:21,000

Well I can verify that you've got nothing over here now.

233

00:16:21,000 --> 00:16:23,000

That's a little creepy.

234

00:16:24,000 --> 00:16:28,000

We were all baffled when the 1.6 gigahertz signal stopped broadcasting,

235

00:16:28,000 --> 00:16:33,000

but then we realized it happened exactly when Alan had stopped moving the boulders.

236

00:16:33,000 --> 00:16:37,000

It just looked like more evidence that the two things were connected.

237

00:16:37,000 --> 00:16:41,000

We're getting about to the end of what we can do safely.

238

00:16:41,000 --> 00:16:43,000

You agree?

239

00:16:43,000 --> 00:16:48,000

Yeah. The bottom rocks are supporting the whole hillside, so any more would cause a slight.

240

00:16:48,000 --> 00:16:52,000

It's a very dangerous area to work in with loose rocks.

241

00:16:52,000 --> 00:16:55,000

Everything you never know what may happen.

242

00:16:55,000 --> 00:17:02,000

Okay, well we'll keep that in mind. Looking at it, I think we get an excavator in here, clean that up nice.

243

00:17:02,000 --> 00:17:09,000

We'll have a perfect place to get the drill into, and we'll head straight for that anomaly that we saw in the data.

244

00:17:09,000 --> 00:17:16,000

It was disappointing to have to stop removing the boulders, but safety is always the priority.

245

00:17:16,000 --> 00:17:22,000

We're not giving up on figuring out what the dome shaped object and the vertical anomaly that we've detected in the Mesa are.

246

00:17:22,000 --> 00:17:26,000

So we've got to bring a drill rig back out here and get to the bottom of this.

247

00:17:26,000 --> 00:17:28,000

Thanks for having us.

248

00:17:28,000 --> 00:17:29,000

Good start.

249

00:17:29,000 --> 00:17:32,000

There's an anomaly in there. We just got to get to it.

250

00:17:33,000 --> 00:17:42,000

The next day, Brandon Fugel alerted us that he and his brother Cameron were bringing Utah Attorney General Sean Reyes to the ranch to hear from the police.

251

00:17:42,000 --> 00:17:45,000

The police are looking for a way to get him to the ranch.

252

00:17:45,000 --> 00:17:48,000

We're looking for a way to get him to the ranch.

253

00:17:48,000 --> 00:17:51,000

We're looking for a way to get him to the ranch.

254

00:17:51,000 --> 00:17:54,000

We're looking for a way to get him to the ranch.

255

00:17:54,000 --> 00:18:07,000

The next day, Brandon Fugel alerted us that he and his brother Cameron were bringing Utah Attorney General Sean Reyes to the ranch to hear more about the mysterious helicopter that showed up during our last experiment at the triangle.

256

00:18:07,000 --> 00:18:14,000

So we were all eager to hear his perspective and figure out as a group what our next investigation there should be.

257

00:18:14,000 --> 00:18:16,000

We've been anxious to get here.

258

00:18:16,000 --> 00:18:24,000

I understand with some very suspicious activity occurring and some concerns over our airspace.

259

00:18:24,000 --> 00:18:32,000

It was important to have Attorney General Sean Reyes come back and get a briefing on what is happening here with our investigation.

260

00:18:32,000 --> 00:18:35,000

Gentlemen, great to be back with you in person.

261

00:18:35,000 --> 00:18:38,000

I've been monitoring and keeping tabs with Brandon.

262

00:18:38,000 --> 00:18:40,000

I know you all are doing great things out here.

263

00:18:40,000 --> 00:18:45,000

Well, General, I think we have some evidence and some information to show you guys.

264

00:18:45,000 --> 00:18:52,000

Brandon, General Reyes, you know that we sometimes see air traffic over the ranch.

265

00:18:52,000 --> 00:18:58,000

Sometimes they can't identify the craft using ADS-B or any other method available to us.

266

00:18:58,000 --> 00:19:02,000

And we had an event like that very recently.

267

00:19:02,000 --> 00:19:06,000

So I'm going to bring up the All Sky camera.

268

00:19:07,000 --> 00:19:11,000

I'm hoping that the sound will carry through for this.

269

00:19:22,000 --> 00:19:26,000

That sounds like blackhawk to me.

270

00:19:26,000 --> 00:19:27,000

Really?

271

00:19:27,000 --> 00:19:28,000

Yeah.

272

00:19:28,000 --> 00:19:30,000

I've been around aviation my whole life.

273

00:19:30,000 --> 00:19:34,000

I've been around every type of helicopter and airplane military and civilian.

274

00:19:34,000 --> 00:19:37,000

And you can get a lot from the tail rotor sounds of these aircraft.

275

00:19:37,000 --> 00:19:40,000

That sounds crazy. It sounds crazy.

276

00:19:40,000 --> 00:19:46,000

Okay, so in your opinion, based off of the sound, this sounds to you like a military helicopter.

277

00:19:46,000 --> 00:19:48,000

Sounds to me like a blackhawk to me.

278

00:19:48,000 --> 00:19:52,000

I mean, as crazy as it sounds, it's almost like, is this a men in black type of a thing?

279

00:20:00,000 --> 00:20:02,000

Tell me you got ADS-B dad on it.

280

00:20:02,000 --> 00:20:03,000

No.

281

00:20:03,000 --> 00:20:04,000

No?

282

00:20:04,000 --> 00:20:08,000

I did not get a signal from this helicopter.

283

00:20:08,000 --> 00:20:11,000

It is not legal to turn your ADS-B off like that.

284

00:20:11,000 --> 00:20:13,000

Unless you're military.

285

00:20:14,000 --> 00:20:20,000

If that really was a blackhawk military helicopter that flew over the ranch the other night,

286

00:20:20,000 --> 00:20:29,000

it just makes me wonder, did they just happen to show up right after we saw that mysterious blob destroy our rocket over the triangle?

287

00:20:29,000 --> 00:20:33,000

Or are we under constant secret surveillance out here?

288

00:20:34,000 --> 00:20:35,000

We're a sovereign state.

289

00:20:35,000 --> 00:20:42,000

We have our own constitutional rights and violations of our states, sovereignty and our states' rights.

290

00:20:42,000 --> 00:20:45,000

We have to take very, very seriously.

291

00:20:46,000 --> 00:20:53,000

Well, I'm glad to have the top law enforcement officer in the state of Utah here just to get eyes on it and give your perspective.

292

00:20:53,000 --> 00:20:58,000

I have a lot of friends and a lot of assets in this state and I would love to get to the bottom of this.

293

00:20:58,000 --> 00:21:01,000

So next time we get together, hopefully I'll have some information.

294

00:21:01,000 --> 00:21:13,000

A covert military helicopter entering the airspace and then hovering south of Homestead 1, watching the experiments.

295

00:21:13,000 --> 00:21:18,000

It's no surprise that it's created some concern for the Attorney General.

296

00:21:18,000 --> 00:21:24,000

Well, as we're teeing up our next series of experiments in order to better understand what the hell is going on here,

297

00:21:24,000 --> 00:21:27,000

I think we're hopefully going to see some more results.

298

00:21:28,000 --> 00:21:33,000

So how do you feel about using the helicopter for more experiments over the triangle area?

299

00:21:33,000 --> 00:21:35,000

Well, I think we have to.

300

00:21:35,000 --> 00:21:37,000

We're getting such compelling data.

301

00:21:37,000 --> 00:21:39,000

I want to explore further.

302

00:21:39,000 --> 00:21:43,000

The helicopter is safe and I've pre-flighted it and I feel good about it today.

303

00:21:43,000 --> 00:21:44,000

Let's do it.

304

00:21:44,000 --> 00:21:49,000

Well, with that, are you willing to stick around and participate in an experiment with us?

305

00:21:49,000 --> 00:21:50,000

Absolutely.

306

00:21:50,000 --> 00:21:52,000

Great. Let's prepare.

307

00:21:52,000 --> 00:21:53,000

Well, let's get moving.

308

00:21:53,000 --> 00:21:54,000

Yeah, we've got stuff to do.

309

00:21:54,000 --> 00:21:59,000

While we're figuring out our next move at the Mesa,

310

00:21:59,000 --> 00:22:06,000

Heaven Brand is helicopter here gives us the perfect opportunity to investigate for more evidence of the blob shaped thing

311

00:22:06,000 --> 00:22:16,000

we just encountered only 31 feet above the triangle and also to search the entire anomalous zone of as high as 5000 feet above ground level.

312

00:22:16,000 --> 00:22:18,000

What do we got going on guys?

313

00:22:18,000 --> 00:22:22,000

We're going to probe the triangle at or just beneath the anomaly.

314

00:22:22,000 --> 00:22:28,000

So we'll be releasing some projectiles and we're going to do high speed camera recording.

315

00:22:28,000 --> 00:22:33,000

As those projectiles fall, these are round dense black balls.

316

00:22:33,000 --> 00:22:38,000

Who knows, we may see some irregularity in the way they fall, the timing.

317

00:22:38,000 --> 00:22:40,000

Well gentlemen, let's proceed.

318

00:22:40,000 --> 00:22:41,000

All right.

319

00:22:41,000 --> 00:22:49,000

Our plan was to have Cameron fly Caleb and Eric above the triangle stopping at various altitudes between 1000 and 5000 feet high

320

00:22:49,000 --> 00:23:00,000

in order to drop small weighted balls down through the anomalous zone to see if their trajectory or velocity is affected in any way by anything out of the ordinary.

321

00:23:00,000 --> 00:23:01,000

Hey, Berdat.

322

00:23:01,000 --> 00:23:02,000

Hey, Thomas.

323

00:23:02,000 --> 00:23:03,000

Good to see you again.

324

00:23:03,000 --> 00:23:04,000

Good to see you, man.

325

00:23:04,000 --> 00:23:06,000

I'm all set up for you guys, so we're ready to rock.

326

00:23:06,000 --> 00:23:15,000

We've dropped objects through the anomalous zone above the triangle before, but this time high speed camera expert Berdat Anderson was there to record each drop.

327

00:23:15,000 --> 00:23:16,000

We have the cameras set up.

328

00:23:16,000 --> 00:23:18,000

Yeah, we've got two high speed cameras back here.

329

00:23:18,000 --> 00:23:23,000

I wanted to show you the framing to make sure that we're going to catch the helicopter drop and the anomaly properly.

330

00:23:23,000 --> 00:23:24,000

Okay.

331

00:23:24,000 --> 00:23:38,000

Since he could shoot 1500 frames per second, we were hoping he would be able to capture the best evidence yet of what could be the cause of all the phenomena we've witnessed at the triangle over the last four years.

332

00:23:38,000 --> 00:23:43,000

Before we start, I need to make sure that my GPS tracker is on.

333

00:23:43,000 --> 00:23:52,000

One of the high priority items for us is to collect the data log to GPS position information for the helicopter during both phases of this experiment.

334

00:23:52,000 --> 00:23:53,000

Okay.

335

00:23:53,000 --> 00:24:07,000

If we have a space-time anomaly at the triangle, as we have speculated, it could well be that the GPS data will give us an indication as to its arrival and departure during the experiment.

336

00:24:07,000 --> 00:24:09,000

All systems look good.

337

00:24:09,000 --> 00:24:10,000

Okay.

338

00:24:10,000 --> 00:24:11,000

Good.

339

00:24:11,000 --> 00:24:12,000

I got you.

340

00:24:12,000 --> 00:24:13,000

All good.

341

00:24:14,000 --> 00:24:22,000

We will be monitoring any response that we get from the anomaly using a small pan-held spectra-an device.

342

00:24:22,000 --> 00:24:31,000

And we'll be looking especially, of course, in that 1.6 gigahertz frequency range for what could be a response to our activity over the triangle.

343

00:24:31,000 --> 00:24:33,000

We're go. We're lift out at this time.

344

00:24:43,000 --> 00:24:44,000

Hey, Dragon.

345

00:24:44,000 --> 00:24:45,000

Go ahead, Travis.

346

00:24:45,000 --> 00:24:47,000

They just took off.

347

00:24:47,000 --> 00:24:48,000

Copy.

348

00:24:49,000 --> 00:24:50,000

Well, they're off.

349

00:24:50,000 --> 00:24:51,000

Yeah.

350

00:24:53,000 --> 00:24:56,000

I always feel a sense of conflict.

351

00:24:56,000 --> 00:25:05,000

Having my brother operating the helicopter above the ranch, but he is eager to be a part of the discovery.

352

00:25:09,000 --> 00:25:10,000

Cameron, do you copy?

353

00:25:10,000 --> 00:25:12,000

Yeah, I've got your left, sir.

354

00:25:12,000 --> 00:25:14,000

We're just about to hover over the triangle here.

355

00:25:17,000 --> 00:25:19,000

Right there.

356

00:25:19,000 --> 00:25:21,000

All right, Cameron, that's the spot.

357

00:25:21,000 --> 00:25:22,000

Okay.

358

00:25:22,000 --> 00:25:23,000

We're on a vacay.

359

00:25:23,000 --> 00:25:26,000

We'll give you the countdown to drop the payloads.

360

00:25:26,000 --> 00:25:27,000

Be ready.

361

00:25:28,000 --> 00:25:30,000

We can drop right now and we'll be good.

362

00:25:30,000 --> 00:25:31,000

All right, we're ready to drop.

363

00:25:31,000 --> 00:25:34,000

We can totally see the triangle at the right side of the aircraft.

364

00:25:36,000 --> 00:25:38,000

Okay, Cameron, in five.

365

00:25:40,000 --> 00:25:44,000

Three, two, one, go.

366

00:25:46,000 --> 00:25:47,000

Holy crap.

367

00:25:49,000 --> 00:25:51,000

There it is. See it right there?

368

00:25:51,000 --> 00:25:52,000

Yeah.

369

00:25:52,000 --> 00:25:53,000

There it is.

370

00:25:53,000 --> 00:25:56,000

Oh, so there, look, you see they just dropped another one.

371

00:25:56,000 --> 00:25:57,000

They're going to do five.

372

00:25:57,000 --> 00:25:59,000

I've seen at least three.

373

00:26:02,000 --> 00:26:03,000

It drops away.

374

00:26:03,000 --> 00:26:04,000

You can go, Cameron.

375

00:26:04,000 --> 00:26:05,000

It drops away.

376

00:26:05,000 --> 00:26:06,000

It drops away.

377

00:26:14,000 --> 00:26:19,000

Cameron, yeah, I've got a 1.6 gigahertz signal.

378

00:26:19,000 --> 00:26:22,000

I'm still trying to sort out why I'm getting it.

379

00:26:23,000 --> 00:26:24,000

That's crazy. All right.

380

00:26:29,000 --> 00:26:30,000

Holy crap.

381

00:26:31,000 --> 00:26:36,000

Hey, I was just getting some pretty sharp pains in my head.

382

00:26:36,000 --> 00:26:37,000

Okay.

383

00:26:37,000 --> 00:26:39,000

For now, I'm just going to leave the ranch for a while.

384

00:26:39,000 --> 00:26:40,000

Absolutely.

385

00:26:40,000 --> 00:26:44,000

Please just go make sure and then let us know how you're feeling once you get off.

386

00:26:44,000 --> 00:26:46,000

Thomas all of a sudden turned to me and said,

387

00:26:46,000 --> 00:26:49,000

I have a headache and I'm leaving the ranch.

388

00:26:49,000 --> 00:26:51,000

And given his history on this ranch,

389

00:26:51,000 --> 00:26:54,000

I was 100% on board with getting him out of here.

390

00:26:55,000 --> 00:26:56,000

That's not all right.

391

00:27:01,000 --> 00:27:02,000

I'm going to go get him.

392

00:27:06,000 --> 00:27:09,000

It proved to be a little bit more difficult for Cameron to get his helicopter in place

393

00:27:09,000 --> 00:27:11,000

for this 1,000 foot drop.

394

00:27:11,000 --> 00:27:14,000

And then as Thomas was siding up the launch pad that we have there

395

00:27:14,000 --> 00:27:17,000

to make sure that they were directly above the triangle,

396

00:27:17,000 --> 00:27:20,000

he started to talk about having some neck and head pain,

397

00:27:20,000 --> 00:27:21,000

which is very concerning.

398

00:27:21,000 --> 00:27:23,000

And we decided to get him off the ranch.

399

00:27:24,000 --> 00:27:25,000

Hey Travis, do you copy?

400

00:27:26,000 --> 00:27:27,000

Yeah, I copy.

401

00:27:28,000 --> 00:27:29,000

Hey.

402

00:27:29,000 --> 00:27:32,000

Thomas has started to get a bit of a tingling pain in his neck.

403

00:27:32,000 --> 00:27:35,000

So he's decided to go ahead and leave the ranch.

404

00:27:35,000 --> 00:27:37,000

Was Thomas all right?

405

00:27:37,000 --> 00:27:42,000

Yeah, but with his history, we figured probably best to just have him go.

406

00:27:42,000 --> 00:27:44,000

Understood.

407

00:27:44,000 --> 00:27:47,000

It seems like it's always Thomas that is targeted.

408

00:27:48,000 --> 00:27:50,000

Thomas told me the very first time I met him

409

00:27:50,000 --> 00:27:53,000

that the ranch responds to people differently.

410

00:27:53,000 --> 00:27:56,000

And as crazy as that sounds, I believe he's right.

411

00:27:56,000 --> 00:28:00,000

There's something going on here that seems to cause physiological effects

412

00:28:00,000 --> 00:28:03,000

sometimes specifically on him.

413

00:28:03,000 --> 00:28:06,000

So we're going to pay close attention to how he's doing.

414

00:28:06,000 --> 00:28:09,000

Let me know when you guys are ready to make the drops.

415

00:28:09,000 --> 00:28:10,000

We're watching you now.

416

00:28:10,000 --> 00:28:11,000

Copy.

417

00:28:11,000 --> 00:28:14,000

After completing the first set of ball drops over the triangle

418

00:28:14,000 --> 00:28:19,000

around the 1,000 foot altitude, Cameron ascended just above 5,000 feet

419

00:28:19,000 --> 00:28:23,000

so that Caleb could drop five more to see what would happen to them

420

00:28:23,000 --> 00:28:26,000

as they fell all the way through the anomalous zone.

421

00:28:26,000 --> 00:28:30,000

We're 10,000 feet above sea level, 5,000 foot over the ranch.

422

00:28:30,000 --> 00:28:32,000

It's interesting, the winds...

423

00:28:35,000 --> 00:28:38,000

I can feel it pushing us back to the east there. That's crazy.

424

00:28:38,000 --> 00:28:40,000

I can feel that.

425

00:28:40,000 --> 00:28:43,000

After Eric detected the 1.6 gigahertz signal

426

00:28:43,000 --> 00:28:46,000

and Thomas' health episode during the 1,000 foot drop,

427

00:28:46,000 --> 00:28:50,000

we didn't know what to expect once Cameron reached the mile-high zone.

428

00:28:50,000 --> 00:28:54,000

But as soon as he got up there, the helicopter was suddenly pushed around

429

00:28:54,000 --> 00:28:56,000

by major gusts of wind.

430

00:28:56,000 --> 00:28:59,000

Dang. That's insane.

431

00:28:59,000 --> 00:29:02,000

Hey, Dragon, how do you copy?

432

00:29:02,000 --> 00:29:04,000

Yeah, go ahead, Cameron.

433

00:29:04,000 --> 00:29:07,000

We're right on the point where I've got my GPS coordinates.

434

00:29:07,000 --> 00:29:10,000

So we want everyone far away from there.

435

00:29:10,000 --> 00:29:12,000

Copy that, Cameron. I think that's the way to go.

436

00:29:12,000 --> 00:29:15,000

We'll start clearing out of the way.

437

00:29:16,000 --> 00:29:18,000

How red are you?

438

00:29:18,000 --> 00:29:21,000

We're climbing about 1,500 feet a minute right now.

439

00:29:21,000 --> 00:29:24,000

I have eyes on triangle, so...

440

00:29:27,000 --> 00:29:29,000

Oh, getting some rain here.

441

00:29:29,000 --> 00:29:32,000

Yeah, we are getting rain.

442

00:29:32,000 --> 00:29:34,000

They're 5,000 feet?

443

00:29:34,000 --> 00:29:36,000

Uh...

444

00:29:36,000 --> 00:29:40,000

Oh, they're at 9,750 above sea level.

445

00:29:40,000 --> 00:29:43,000

It's about 4,000 feet or so

446

00:29:44,000 --> 00:29:46,000

above ground level.

447

00:29:46,000 --> 00:29:48,000

We're climbing.

448

00:29:48,000 --> 00:29:51,000

I'm going to call it when we get close.

449

00:29:51,000 --> 00:29:53,000

And I'm watching.

450

00:29:53,000 --> 00:29:57,000

So approaching the 10,000 foot above sea level mark,

451

00:29:57,000 --> 00:30:01,000

reducing the climb, slowing down.

452

00:30:01,000 --> 00:30:04,000

We're going to get back over that triangle here.

453

00:30:04,000 --> 00:30:06,000

Every time we get close, it's safe to be...

454

00:30:06,000 --> 00:30:08,000

We really get pushed off.

455

00:30:08,000 --> 00:30:10,000

The winds go from about 8 knots to 35.

456

00:30:10,000 --> 00:30:13,000

My engine run is picking up and then the compass spins.

457

00:30:15,000 --> 00:30:17,000

Okay, we're approaching.

458

00:30:17,000 --> 00:30:19,000

We're at 10,000 feet. Get ready.

459

00:30:19,000 --> 00:30:21,000

I'm over the beat, man.

460

00:30:21,000 --> 00:30:23,000

Okay, get ready.

461

00:30:23,000 --> 00:30:26,000

And slow it down just a little bit.

462

00:30:26,000 --> 00:30:29,000

We're about to drop. Make sure we're all clear.

463

00:30:29,000 --> 00:30:31,000

Keep going, Cameron.

464

00:30:31,000 --> 00:30:33,000

Left?

465

00:30:35,000 --> 00:30:37,000

Okay, you ready?

466

00:30:37,000 --> 00:30:39,000

Set, okay, drop.

467

00:30:41,000 --> 00:30:43,000

What the heck?

468

00:30:43,000 --> 00:30:45,000

We've got no GPS position.

469

00:30:45,000 --> 00:30:47,000

Holy crap, we lost the GPS.

470

00:30:49,000 --> 00:30:52,000

Why are they going so fast? Where are they going?

471

00:30:52,000 --> 00:30:54,000

That is weird.

472

00:30:54,000 --> 00:30:56,000

Dang.

473

00:30:56,000 --> 00:30:58,000

I swear I saw a flash.

474

00:30:58,000 --> 00:31:00,000

Okay.

475

00:31:04,000 --> 00:31:06,000

Hey, Cameron, do you copy?

476

00:31:06,000 --> 00:31:08,000

Yeah, go ahead.

477

00:31:08,000 --> 00:31:10,000

What are you showing your altitude at?

478

00:31:10,000 --> 00:31:14,000

We're now descending to 9,400 feet above sea level.

479

00:31:14,000 --> 00:31:16,000

Copy that.

480

00:31:16,000 --> 00:31:18,000

I only got four.

481

00:31:18,000 --> 00:31:20,000

You've dropped all of them?

482

00:31:20,000 --> 00:31:23,000

We dropped more of them. We've got one more.

483

00:31:23,000 --> 00:31:25,000

Copy that.

484

00:31:25,000 --> 00:31:28,000

Now, he's still headed off to the west. Where is he going?

485

00:31:28,000 --> 00:31:31,000

I think something's wrong.

486

00:31:31,000 --> 00:31:33,000

We've got lighting.

487

00:31:33,000 --> 00:31:36,000

We're going to abort this mission and come back for safety's sake.

488

00:31:37,000 --> 00:31:40,000

Given the unknown nature of what we're dealing with here on Skinwucker Ranch,

489

00:31:40,000 --> 00:31:43,000

security and safety are very important.

490

00:31:43,000 --> 00:31:46,000

We don't know what it is that we're interacting with,

491

00:31:46,000 --> 00:31:50,000

so keeping it secure and keeping the scientific integrity

492

00:31:50,000 --> 00:31:53,000

of what we have going on here is of utmost importance.

493

00:31:53,000 --> 00:31:57,000

So we need Cameron to get back down on the ground safely.

494

00:31:57,000 --> 00:32:00,000

Dang. I'd call that a success, though.

495

00:32:00,000 --> 00:32:02,000

It was like right when we got over the triangle again.

496

00:32:02,000 --> 00:32:05,000

There are, of course, inherent dangers in flying in general,

497

00:32:05,000 --> 00:32:09,000

but I would say that this attempt to study this area

498

00:32:09,000 --> 00:32:11,000

has been a resounding success.

499

00:32:11,000 --> 00:32:14,000

We have all kinds of new data coming up,

500

00:32:14,000 --> 00:32:16,000

but I want to see what was captured.

501

00:32:16,000 --> 00:32:19,000

That was weird. That was weird.

502

00:32:24,000 --> 00:32:26,000

Hey, Brandon. Good to be back.

503

00:32:26,000 --> 00:32:29,000

It's good to see you. Hey, good to see you.

504

00:32:29,000 --> 00:32:33,000

Thankfully, Thomas Winerton felt better after getting off the ranch,

505

00:32:33,000 --> 00:32:36,000

and we were all very relieved that he was able to come back

506

00:32:36,000 --> 00:32:38,000

a couple of days after our experiment.

507

00:32:38,000 --> 00:32:42,000

It was good timing, too, because we were just about to review the data

508

00:32:42,000 --> 00:32:44,000

that we'd collected over the triangle

509

00:32:44,000 --> 00:32:47,000

with Brandon and Attorney General Sean Reyes.

510

00:32:47,000 --> 00:32:50,000

Hello. It's good to have you with us.

511

00:32:50,000 --> 00:32:51,000

Good to see you, all.

512

00:32:51,000 --> 00:32:56,000

So we're going to be looking at this for some of us for the very first time,

513

00:32:56,000 --> 00:32:58,000

and boy, do we have some interesting things coming out of it.

514

00:32:58,000 --> 00:33:01,000

Well, I'm interested and excited, Eric.

515

00:33:01,000 --> 00:33:03,000

While you were flying, Cameron,

516

00:33:03,000 --> 00:33:06,000

you probably remember that I attached a GPS locator,

517

00:33:06,000 --> 00:33:08,000

a data logging device to the helicopter.

518

00:33:08,000 --> 00:33:09,000

That's right.

519

00:33:09,000 --> 00:33:14,000

And so I'll share some data that shows the trajectory of the helicopter during that.

520

00:33:17,000 --> 00:33:18,000

Oh, wow.

521

00:33:18,000 --> 00:33:20,000

There are clearly some issues with this.

522

00:33:20,000 --> 00:33:22,000

They're glaring over the triangle.

523

00:33:22,000 --> 00:33:29,000

So my first question is, I really don't recall seeing you guys go

524

00:33:29,000 --> 00:33:33,000

way off of the ranch, like this big top circle that's there.

525

00:33:33,000 --> 00:33:36,000

That's a really prominent feature in the data.

526

00:33:36,000 --> 00:33:37,000

And that's miles.

527

00:33:37,000 --> 00:33:39,000

I know that's not what we did with the helicopter.

528

00:33:39,000 --> 00:33:40,000

That was my question.

529

00:33:40,000 --> 00:33:41,000

Not at all.

530

00:33:41,000 --> 00:33:44,000

I want to draw some attention to those vertical movements.

531

00:33:44,000 --> 00:33:48,000

I've actually measured the vertical distance from this point here

532

00:33:48,000 --> 00:33:51,000

to the top of whatever this maneuver is.

533

00:33:51,000 --> 00:33:54,000

It's 666.1 feet.

534

00:33:54,000 --> 00:33:55,000

Yeah, no way.

535

00:33:55,000 --> 00:33:56,000

Did you do anything?

536

00:33:56,000 --> 00:34:01,000

No, I would have had to be in a hover flying straight up in a hovering climb to do that

537

00:34:01,000 --> 00:34:02,000

maneuver.

538

00:34:02,000 --> 00:34:03,000

And I wouldn't have done that.

539

00:34:03,000 --> 00:34:05,000

It wouldn't have been safer ideal.

540

00:34:05,000 --> 00:34:07,000

We never did anything like that.

541

00:34:07,000 --> 00:34:08,000

That is strange.

542

00:34:08,000 --> 00:34:13,000

And did it happen right above the triangle?

543

00:34:13,000 --> 00:34:16,000

Geographically, it does not match up with what we were flying.

544

00:34:16,000 --> 00:34:18,000

He's having problems with his instruments.

545

00:34:18,000 --> 00:34:21,000

And I was feeling that buzz from that metal tower.

546

00:34:21,000 --> 00:34:26,000

I wonder if that is the period of time when you're seeing the anomaly in the GPS.

547

00:34:26,000 --> 00:34:32,000

Thomas' question was spot on because at the same time the helicopter GPS went haywire,

548

00:34:32,000 --> 00:34:34,000

he had his health episode.

549

00:34:34,000 --> 00:34:40,000

And this also happened right when Eric started detecting the 1.6 gigahertz signal over the triangle.

550

00:34:40,000 --> 00:34:47,000

So the question was, could something have caused all those things to happen simultaneously?

551

00:34:47,000 --> 00:34:49,000

I'm going to share some video.

552

00:34:49,000 --> 00:34:55,000

This is a video recording taken from ground level right at the triangle, looking up at

553

00:34:55,000 --> 00:34:57,000

the aircraft.

554

00:34:57,000 --> 00:34:59,000

And, well, it's best I just show you.

555

00:34:59,000 --> 00:35:00,000

Yeah.

556

00:35:00,000 --> 00:35:07,000

I'll just ask you if you see the picture about which I'm speaking.

557

00:35:07,000 --> 00:35:15,000

This, as you notice, it said embossed effect on the caption there because what's happening

558

00:35:15,000 --> 00:35:19,000

is I'm applying a filter to the video.

559

00:35:19,000 --> 00:35:24,000

When you adjust the contrast like that, we start to see unusual features.

560

00:35:24,000 --> 00:35:26,000

The circle's behind.

561

00:35:26,000 --> 00:35:31,000

This artifact right here, this feature right here.

562

00:35:31,000 --> 00:35:32,000

No.

563

00:35:32,000 --> 00:35:33,000

Oh my gosh.

564

00:35:33,000 --> 00:35:35,000

Holy cow.

565

00:35:35,000 --> 00:35:36,000

What is that?

566

00:35:36,000 --> 00:35:38,000

And it's following you and it's like.

567

00:35:38,000 --> 00:35:40,000

There's something following.

568

00:35:40,000 --> 00:35:51,000

Gentlemen, what the heck is flying around in my state?

569

00:35:51,000 --> 00:35:58,000

That is probably the most significant thing I've seen flying next to the helicopter.

570

00:35:58,000 --> 00:35:59,000

Wow.

571

00:35:59,000 --> 00:36:05,000

It was great that we had high speed cameras recording our experiment over the triangle two days ago.

572

00:36:05,000 --> 00:36:11,000

Because at about the same time that our GPS device malfunctioned, Eric detected the 1.6

573

00:36:11,000 --> 00:36:14,000

gigahertz signal and Thomas got a sudden headache.

574

00:36:14,000 --> 00:36:20,000

We captured a clearest day UAP right next to the helicopter.

575

00:36:20,000 --> 00:36:22,000

This is in broad daylight.

576

00:36:22,000 --> 00:36:30,000

This is a physical UFO with the reflection off of one side glinting off of it.

577

00:36:30,000 --> 00:36:32,000

Like it's metallic or something.

578

00:36:32,000 --> 00:36:33,000

Yeah.

579

00:36:33,000 --> 00:36:40,000

That is a solid object with the same reflective quality that the helicopter exhibits right above it.

580

00:36:40,000 --> 00:36:42,000

Is there any chance you can zoom in on it?

581

00:36:42,000 --> 00:36:43,000

Certainly.

582

00:36:43,000 --> 00:36:45,000

That's all right.

583

00:36:45,000 --> 00:36:47,000

There we go.

584

00:36:47,000 --> 00:36:51,000

That's what I was wanting to see right there.

585

00:36:51,000 --> 00:36:53,000

It almost seems like there's a point here.

586

00:36:53,000 --> 00:36:55,000

I was just about to say.

587

00:36:55,000 --> 00:36:56,000

You see that?

588

00:36:56,000 --> 00:36:57,000

Kind of like a top.

589

00:36:57,000 --> 00:36:58,000

You know, like a triangle.

590

00:36:58,000 --> 00:37:14,000

Actually, if you think about the perspective you're looking at it, if you look at it, you can kind of see a hemisphere here and maybe a hemisphere that this could be very similar to the orb.

591

00:37:14,000 --> 00:37:22,000

It could be two spheres with a separation because it looks like there might be a separation right there.

592

00:37:22,000 --> 00:37:37,000

Just two weeks ago, we captured images of a UAP at night during our drone experiment that looked

very similar to the strange metallic aircraft that a Navy pilot photographed off the coast of Virginia in 2019.

593

00:37:37,000 --> 00:37:43,000

Now, we may have actually documented another mysterious craft in the anomalous zone above the triangle.

594

00:37:43,000 --> 00:37:44,000

So what the heck is it?

595

00:37:44,000 --> 00:37:46,000

And where did it come from?

596

00:37:46,000 --> 00:37:51,000

This might be the most convincing evidence I've seen, Brandon.

597

00:37:51,000 --> 00:38:03,000

Yeah, I'm glad you were there, Attorney General, because at least you saw that there were other strange things happening that seemed to correspond with what we've captured here with this camera.

598

00:38:03,000 --> 00:38:16,000

And this kind of phenomena being captured on camera, it is no surprise that we're seeing military craft immediately enter the scene above the ranch.

599

00:38:16,000 --> 00:38:17,000

Yeah.

600

00:38:17,000 --> 00:38:26,000

So, Brandon, I did some digging around, reached out to one of my contacts to check on the origin and destination of that Black Hawk.

601

00:38:26,000 --> 00:38:28,000

Oh, you found out some more information on that.

602

00:38:28,000 --> 00:38:34,000

I found this flight path that you can see on the screen.

603

00:38:34,000 --> 00:38:40,000

So the Black Hawk took off from Heber Valley Airport in Heber City, Utah.

604

00:38:40,000 --> 00:38:53,000

And this is what we call McDonald Airfield, came around over the ranch and then turned around and

made its way back down into the Salt Lake area.

605

00:38:53,000 --> 00:38:58,000

And you can see that in that yellow flight path.

606

00:38:58,000 --> 00:39:06,000

And when we called Brandon and asked what they were doing or who it was, they had no comment.

607

00:39:06,000 --> 00:39:11,000

It could be of a classified nature, but obviously they're not sharing any information.

608

00:39:11,000 --> 00:39:13,000

No information forthcoming.

609

00:39:13,000 --> 00:39:16,000

So it's confirmed it was a Black Hawk helicopter.

610

00:39:16,000 --> 00:39:19,000

Yes, sir, Black Hawk helicopter.

611

00:39:19,000 --> 00:39:31,000

How did they get here at just the right time to fly over and see the experiment and then hover and wait? I mean, they waited here five or ten minutes.

612

00:39:31,000 --> 00:39:35,000

Travis, that I cannot explain.

613

00:39:35,000 --> 00:39:39,000

This is absolute evidence that we're being monitored.

614

00:39:39,000 --> 00:39:41,000

There's no other explanation.

615

00:39:41,000 --> 00:39:44,000

Attorney General, thank you so much for patching in.

616

00:39:44,000 --> 00:39:46,000

You saw it first with us.

617

00:39:46,000 --> 00:39:52,000

We'll stay in touch and appreciate all of your help and your interest in our ongoing investigation.

618

00:39:52,000 --> 00:39:56,000

Mr. Feudal and your team, thank you. Always professionals.

619

00:39:56,000 --> 00:39:58,000

Thank you. All right, thanks.

620

00:39:59,000 --> 00:40:02,000

So we've got a lot to consider.

621

00:40:02,000 --> 00:40:07,000

This is some of the most stunning footage yet here at the ranch.

622

00:40:07,000 --> 00:40:11,000

So how do we follow up on this incredible data?

623

00:40:11,000 --> 00:40:12,000

That really is the question.

624

00:40:12,000 --> 00:40:15,000

Well, when this says we need to focus on the triangle.

625

00:40:15,000 --> 00:40:19,000

Yeah, all right. We just got to figure out what to do next. Move on.

626

00:40:19,000 --> 00:40:22,000

All right, let's get you out the door and thank you.

627

00:40:22,000 --> 00:40:24,000

Good to see you guys.

628

00:40:24,000 --> 00:40:34,000

We have definitely seen an elevated degree of interest from covert military units surveilling the property.

629

00:40:34,000 --> 00:40:43,000

The fact that they are not transponding, that they are cloaking their identity with intent and deliberately, and I think aggressively,

630

00:40:43,000 --> 00:40:53,000

monitoring our efforts is something that is both concerning, but it's also validating.

631

00:40:53,000 --> 00:40:59,000

That underscores how important the research is that it can work a ranch.

632

00:41:04,000 --> 00:41:08,000

We don't know what it is. There's a big anomaly in the ground penetrating radar right there.

633

00:41:08,000 --> 00:41:09,000

Wow.

634

00:41:12,000 --> 00:41:14,000

What in the hell is that thing?

635

00:41:14,000 --> 00:41:17,000

That doesn't look natural or like it should be there.

636

00:41:18,000 --> 00:41:20,000

There we go.

637

00:41:20,000 --> 00:41:22,000

Oh, there it is.

638

00:41:22,000 --> 00:41:24,000

I just saw a purple light over there.

639

00:41:24,000 --> 00:41:30,000

With our night vision, there's something right over Thomas down there in the sky, blinking at about 10 degrees up.
