

1

00:00:00,000 --> 00:00:02,000

Senator Lee, thank you for joining us.

2

00:00:02,000 --> 00:00:04,000

When members of the Senate discuss things in the sky,

3

00:00:04,000 --> 00:00:06,000

they can't explain. We need to know what's there.

4

00:00:06,000 --> 00:00:07,000

Absolutely.

5

00:00:07,000 --> 00:00:11,000

We're going to try to stimulate phenomena above the triangle

6

00:00:11,000 --> 00:00:13,000

all through the anomalous zone.

7

00:00:13,000 --> 00:00:16,000

Oh, there's two hits! Holy cow, look at that!

8

00:00:18,000 --> 00:00:21,000

The moment they launched the rockets, you could see all of them come up.

9

00:00:21,000 --> 00:00:23,000

We're looking at something formation flying.

10

00:00:26,000 --> 00:00:28,000

That thing took a major detour.

11

00:00:28,000 --> 00:00:30,000

We're about to launch the big rocket.

12

00:00:31,000 --> 00:00:33,000

Oh my goodness!

13

00:00:33,000 --> 00:00:35,000

Hey, you back at the rocket!

14

00:00:35,000 --> 00:00:37,000

You seen anything?

15

00:00:37,000 --> 00:00:38,000

It's gone.

16

00:00:40,000 --> 00:00:43,000

There is a ranch in northern Utah.

17

00:00:44,000 --> 00:00:47,000

It is considered the epicenter of the strangest

18

00:00:48,000 --> 00:00:51,000

and most disturbing phenomena on Earth.

19

00:00:51,000 --> 00:00:53,000

Animal mutilations,

20

00:00:53,000 --> 00:00:56,000

bizarre UFO sightings,

21

00:00:56,000 --> 00:01:00,000

and unusual energies that have proven harmful to humans.

22

00:01:01,000 --> 00:01:05,000

For 20 years, the federal government tried to find answers

23

00:01:05,000 --> 00:01:07,000

and failed.

24

00:01:07,000 --> 00:01:11,000

Now, a new team of dedicated scientists,

25

00:01:11,000 --> 00:01:14,000

researchers, and experts has taken over.

26

00:01:14,000 --> 00:01:18,000

They are determined to solve the mystery and reveal

27

00:01:21,000 --> 00:01:24,000

the secret of Skinwalker Ranch.

28

00:01:27,000 --> 00:01:30,000

Anybody seen the rocket?

29

00:01:30,000 --> 00:01:32,000

I'm looking.

30

00:01:32,000 --> 00:01:34,000

Where are you? You back at the rocket.

31

00:01:35,000 --> 00:01:37,000

You seen anything?

32

00:01:37,000 --> 00:01:39,000

Did anybody ever see the shoot pop?

33

00:01:39,000 --> 00:01:42,000

I didn't hear a pop. I didn't see anything.

34

00:01:42,000 --> 00:01:44,000

It's gone.

35

00:01:44,000 --> 00:01:48,000

If it was laundarded, we'd probably heard that thing thud big time.

36

00:01:48,000 --> 00:01:49,000

Yeah.

37

00:01:50,000 --> 00:01:54,000

During our last and most ambitious experiment of the year,

38

00:01:54,000 --> 00:01:57,000

one of the strangest things we've ever witnessed

39

00:01:57,000 --> 00:01:59,000

on Skinwalker Ranch just occurred.

40

00:01:59,000 --> 00:02:01,000

Yeah, guys, why don't we go into the tent?

41

00:02:01,000 --> 00:02:04,000

I think the scale and it's guys are coming over to join us.

42

00:02:04,000 --> 00:02:05,000

Sounds great.

43

00:02:05,000 --> 00:02:09,000

A high-powered rocket capable of reaching a speed of 800 miles per hour

44

00:02:09,000 --> 00:02:12,000

and an altitude of 10,000 feet

45

00:02:12,000 --> 00:02:16,000

seems to have just vanished after we launched it up through the anomalous zone

46

00:02:16,000 --> 00:02:18,000

above the triangle.

47

00:02:18,000 --> 00:02:20,000

Who knows what happened to that rocket?

48

00:02:20,000 --> 00:02:22,000

Who knows where it went?

49

00:02:22,000 --> 00:02:25,000

I mean, it went out of sight and I'd never heard it come down.

50

00:02:25,000 --> 00:02:26,000

Nope.

51

00:02:26,000 --> 00:02:27,000

I don't know what happened to it.

52

00:02:27,000 --> 00:02:30,000

So we're talking about 10,000 feet or higher?

53

00:02:30,000 --> 00:02:31,000

Yeah.

54

00:02:31,000 --> 00:02:32,000

Yeah.

55

00:02:32,000 --> 00:02:34,000

Probably right over 10,000 feet.

56

00:02:34,000 --> 00:02:35,000

Okay.

57

00:02:35,000 --> 00:02:36,000

About 1.5.

58

00:02:36,000 --> 00:02:38,000

So you broke the sound barrier?

59

00:02:38,000 --> 00:02:39,000

Broke the sound barrier.

60

00:02:39,000 --> 00:02:41,000

That's all sly.

61

00:02:41,000 --> 00:02:46,000

What's most incredible about this is that 10,000 feet above the triangle

62

00:02:46,000 --> 00:02:51,000

is right where a radar balloon scan that we conducted earlier this year

63

00:02:51,000 --> 00:02:55,000

detected a shift in time of a quarter of a second.

64

00:02:55,000 --> 00:02:57,000

Go for launch.

65

00:02:57,000 --> 00:02:59,000

Off it goes.

66

00:02:59,000 --> 00:03:03,000

We lost a quarter second of time.

67

00:03:03,000 --> 00:03:04,000

Really?

68

00:03:04,000 --> 00:03:07,000

For data like this, a quarter of a second is huge.

69

00:03:07,000 --> 00:03:12,000

And believe it or not, that actually offers evidence of what many scientists,

70

00:03:12,000 --> 00:03:17,000

including Albert Einstein, have believed would be a side effect of a nearby,

71

00:03:17,000 --> 00:03:19,000

traversable wormhole.

72

00:03:19,000 --> 00:03:24,000

Could that be what we really just discovered high above Skinwalker Ranch?

73

00:03:24,000 --> 00:03:27,000

The rockets acted way more erratic than I was expecting.

74

00:03:27,000 --> 00:03:31,000

It works really, you know, something we normally never see.

75

00:03:31,000 --> 00:03:32,000

Yeah.

76

00:03:32,000 --> 00:03:35,000

And then the fact that you couldn't launch them all at once and all of a sudden you

77

00:03:35,000 --> 00:03:36,000

can launch them all at once.

78

00:03:36,000 --> 00:03:39,000

None of this, it just doesn't jive.

79

00:03:39,000 --> 00:03:41,000

Well, how you guys doing?

80

00:03:41,000 --> 00:03:46,000

Tell us about, in the first flight, it looked like he had about three or four drones that

81

00:03:46,000 --> 00:03:47,000

seemed to fail.

82

00:03:47,000 --> 00:03:49,000

And the second one there was ten.

83

00:03:49,000 --> 00:03:50,000

Is that typical?

84

00:03:50,000 --> 00:03:51,000

No, not at all.

85

00:03:51,000 --> 00:03:53,000

We've never had them fail that early.

86

00:03:53,000 --> 00:03:54,000

Really?

87

00:03:54,000 --> 00:03:55,000

Never.

88

00:03:55,000 --> 00:03:57,000

That's absolutely unheard of.

89

00:03:57,000 --> 00:03:59,000

Wow.

90

00:03:59,000 --> 00:04:00,000

So just think about it.

91

00:04:00,000 --> 00:04:07,000

We have just conducted the most ambitious, most complex, really the largest scale collection

92

00:04:07,000 --> 00:04:10,000

of experiments that we've ever done here so far.

93

00:04:10,000 --> 00:04:14,000

And, you know, as you mentioned, we probably got about a terabyte of data to look through.

94

00:04:14,000 --> 00:04:16,000

That's not an exaggeration.

95

00:04:16,000 --> 00:04:20,000

Eric, I can't wait for us to download that and play back through it frame by frame.

96

00:04:20,000 --> 00:04:21,000

Oh, yeah.

97

00:04:21,000 --> 00:04:26,000

I'm anxious to go collect those trackers, retrieve those from the drones, and then I'm

98

00:04:26,000 --> 00:04:27,000

ready to break it down.

99

00:04:27,000 --> 00:04:29,000

Go take a look at the data.

100

00:04:29,000 --> 00:04:30,000

Yeah, I think so.

101

00:04:30,000 --> 00:04:32,000

I think it's time for us to pack it up.

102

00:04:32,000 --> 00:04:34,000

Yeah, I think it's going to be a great night.

103

00:04:34,000 --> 00:04:35,000

All right.

104

00:04:35,000 --> 00:04:36,000

Great work, everybody.

105

00:04:36,000 --> 00:04:43,000

Thank you very much.

106

00:04:43,000 --> 00:04:48,600

After Eric spent several days reviewing the massive amounts of data we collected during

107

00:04:48,600 --> 00:04:53,500

our final experiment, Brandon Fugol asked the team to meet at his offices in Salt Lake

108

00:04:53,500 --> 00:04:59,000

City for a briefing and to discuss everything else we documented this year.

109

00:04:59,000 --> 00:05:01,000

It's great to be back with everyone.

110

00:05:01,000 --> 00:05:03,000

Thank you for coming together.

111

00:05:03,000 --> 00:05:08,000

I appreciate Governor Herbert joining us for this historic briefing.

112

00:05:08,000 --> 00:05:15,000

We were joined not only by former Governor of Utah, Gary Herbert, but also Jim Royston,

113

00:05:15,000 --> 00:05:21,000

the CEO of Omitec and former Executive Director of the International Space Station Laboratory,

114

00:05:21,000 --> 00:05:27,000

as well as Jay Stratton, who worked with Robert Bigelow to investigate the ranch in the early

115

00:05:27,000 --> 00:05:33,000

2000s and was a career defense intelligence senior leader who was my boss when I took

116

00:05:33,000 --> 00:05:40,000

part in the federal government's UAP task force between 2019 and 2022.

117

00:05:40,000 --> 00:05:46,000

I think it's important that we dive right into the material and the findings from the

118

00:05:46,000 --> 00:05:52,000

recent months of investigation and research, which has been more groundbreaking and historic

119

00:05:52,000 --> 00:05:54,000

than ever before.

120

00:05:54,000 --> 00:06:00,000

As principal investigator, since the beginning, Eric, would you mind taking us through some

121

00:06:00,000 --> 00:06:02,000

of the observations?

122

00:06:02,000 --> 00:06:07,000

Yes, so what I have to show you are data hot off the presses.

123

00:06:07,000 --> 00:06:12,000

This is something we've just done, one of our biggest, if not the biggest experiment that

124

00:06:12,000 --> 00:06:13,000

we've ever performed on the ranch.

125

00:06:13,000 --> 00:06:14,000

This was done at the Triangle.

126

00:06:14,000 --> 00:06:22,000

It involves powerful lasers, many rockets being launched, and we added the element of

127

00:06:22,000 --> 00:06:26,000

hundreds of drones being flown at the same time in formation.

128

00:06:26,000 --> 00:06:33,000

And I have the GPS positions of some of those drones represented here in the colors that

129

00:06:33,000 --> 00:06:36,000

you see on the screen here in the model.

130

00:06:36,000 --> 00:06:45,000

So what you see are the raw data from those trackers, and what may jump out at you immediately

131

00:06:45,000 --> 00:06:48,000

is that there are some anomalies.

132

00:06:48,000 --> 00:06:50,000

Okay.

133

00:06:50,000 --> 00:06:55,000

Those are the yellow points that you see that appear to go beneath the ground.

134

00:06:55,000 --> 00:06:56,000

Wow.

135

00:06:56,000 --> 00:06:57,000

Whoa.

136

00:06:57,000 --> 00:07:00,000

It's insane.

137

00:07:00,000 --> 00:07:06,000

This was only one of many experiments where we've seen GPS trackers above ground somehow

138

00:07:06,000 --> 00:07:09,000

appear to go deep under the surface.

139

00:07:09,000 --> 00:07:12,000

I think we're right at about the spot where we started to feel the fear.

140

00:07:12,000 --> 00:07:19,000

In fact, earlier this year, Jay Stratton toured hotspots with us where he himself experienced

141

00:07:19,000 --> 00:07:22,000

strange phenomena more than a decade ago.

142

00:07:22,000 --> 00:07:30,000

And the GPS tracker we had on our vehicle collected data that went more than a thousand feet underground.

143

00:07:30,000 --> 00:07:35,000

I have no idea what could possibly cause that.

144

00:07:35,000 --> 00:07:40,000

Now, during this drone experiment, we were also collecting thermal imaging.

145

00:07:40,000 --> 00:07:41,000

Yeah.

146

00:07:41,000 --> 00:07:49,000

We had the FLIR camera set up looking at a portion of the Mesa and at a swath of the sky.

147

00:07:49,000 --> 00:07:54,000

And there are, in fact, some things that show up in that footage that really catch my attention.

148

00:07:54,000 --> 00:07:55,000

Yeah.

149

00:07:55,000 --> 00:08:00,000

I do want to share one of the rocket launches in the thermal footage.

150

00:08:00,000 --> 00:08:03,000

Okay.

151

00:08:03,000 --> 00:08:06,000

So here we see the rockets have launched.

152

00:08:06,000 --> 00:08:09,000

This was a simultaneous launch of a pair of rockets.

153

00:08:09,000 --> 00:08:11,000

Yeah, that's awesome.

154

00:08:11,000 --> 00:08:17,000

So besides the rocket launch itself, you may notice that there are things showing up in the thermal

155

00:08:17,000 --> 00:08:20,000

that we did not see with our eyes.

156

00:08:20,000 --> 00:08:27,000

So I'd like to show you this in a different representation.

157

00:08:27,000 --> 00:08:29,000

Here we have a relief.

158

00:08:29,000 --> 00:08:32,000

It gives it a three-dimensional quality.

159

00:08:32,000 --> 00:08:38,000

And some of the features show up a little more clearly when we look at them this way.

160

00:08:38,000 --> 00:08:39,000

Whoa.

161

00:08:39,000 --> 00:08:44,000

Wow, look at that.

162

00:08:44,000 --> 00:08:45,000

Oh, yeah.

163

00:08:45,000 --> 00:08:47,000

You clearly see the object.

164

00:08:47,000 --> 00:08:48,000

You seeing it move across?

165

00:08:48,000 --> 00:08:50,000

I see it.

166

00:08:50,000 --> 00:08:53,000

I mean, you see it when it appears.

167

00:08:53,000 --> 00:08:57,000

So I'm going to take us back just a little in the timeline.

168

00:08:57,000 --> 00:09:01,000

That object is clearly there, but it didn't fly in.

169

00:09:01,000 --> 00:09:03,000

It didn't come up over the horizon.

170

00:09:03,000 --> 00:09:06,000

It just appeared in that spot.

171

00:09:06,000 --> 00:09:08,000

How did it get there?

172

00:09:08,000 --> 00:09:12,000

Explain how it would appear out of thin air.

173

00:09:12,000 --> 00:09:16,000

We've seen a lot of UAPs in the skies above Skinwalker Ranch.

174

00:09:16,000 --> 00:09:22,000

And seeing this one appear out of nowhere on the same night where a rocket may have disappeared

175

00:09:22,000 --> 00:09:28,000

around 10,000 feet above the triangle just makes me wonder if they could be related.

176

00:09:28,000 --> 00:09:31,000

That's really interesting there.

177

00:09:31,000 --> 00:09:32,000

I don't know what that is, Eric.

178

00:09:32,000 --> 00:09:34,000

That's a good catch.

179

00:09:34,000 --> 00:09:36,000

There are some other things showing up.

180

00:09:36,000 --> 00:09:37,000

Wait a minute.

181

00:09:37,000 --> 00:09:38,000

You see the next thing I've got for you.

182

00:09:38,000 --> 00:09:39,000

Oh, there's more?

183

00:09:39,000 --> 00:09:41,000

Oh, yeah.

184

00:09:41,000 --> 00:09:47,000

In this case, I have what I classify as ensembles of targets moving as if in formation.

185

00:09:47,000 --> 00:09:51,000

I want you to focus on this part of the screen here.

186

00:09:51,000 --> 00:09:52,000

Whoa.

187

00:09:52,000 --> 00:09:53,000

Oh, my God.

188

00:09:53,000 --> 00:09:54,000

You see what's happening?

189

00:09:54,000 --> 00:09:55,000

Now look what happens.

190

00:09:55,000 --> 00:09:57,000

Oh, my gosh.

191

00:09:57,000 --> 00:09:59,000

It's slowed down and changing position.

192

00:09:59,000 --> 00:10:01,000

That's huge.

193

00:10:01,000 --> 00:10:03,000

What was that?

194

00:10:03,000 --> 00:10:05,000

Now there's like four or five of them.

195

00:10:05,000 --> 00:10:08,000

Did you see that?

196

00:10:08,000 --> 00:10:10,000

I thought it was one object.

197

00:10:10,000 --> 00:10:12,000

They broke apart.

198

00:10:18,000 --> 00:10:20,000

What was that?

199

00:10:20,000 --> 00:10:22,000

I thought it was one object.

200

00:10:22,000 --> 00:10:23,000

They broke apart.

201

00:10:23,000 --> 00:10:26,000

Now there's multiple of them.

202

00:10:26,000 --> 00:10:28,000

I got to see that again.

203

00:10:28,000 --> 00:10:30,000

You got it.

204

00:10:33,000 --> 00:10:36,000

So there they come up from the bottom right of the screen.

205

00:10:36,000 --> 00:10:40,000

You see them right there, and then as they move in, you say they.

206

00:10:40,000 --> 00:10:42,000

It looks like one object.

207

00:10:42,000 --> 00:10:44,000

Wait, wait, you see it?

208

00:10:44,000 --> 00:10:46,000

That is one object right there.

209

00:10:46,000 --> 00:10:47,000

That's one object.

210

00:10:47,000 --> 00:10:49,000

And then right here, watch.

211

00:10:49,000 --> 00:10:51,000

Right there, there, there.

212

00:10:51,000 --> 00:10:53,000

They didn't split it right there.

213

00:10:53,000 --> 00:10:55,000

Is it split or is it just morphed?

214

00:10:55,000 --> 00:10:57,000

I can dive in.

215

00:10:57,000 --> 00:10:59,000

So here they are.

216

00:10:59,000 --> 00:11:03,000

You can see that there are discrete objects in this set.

217

00:11:03,000 --> 00:11:05,000

Yeah.

218

00:11:06,000 --> 00:11:08,000

Like they're cell dividing.

219

00:11:08,000 --> 00:11:11,000

And this is absolutely fascinating.

220

00:11:11,000 --> 00:11:16,000

When we first saw this UAP split into smaller ones during our experiment last week,

221

00:11:16,000 --> 00:11:18,000

it was certainly baffling.

222

00:11:18,000 --> 00:11:21,000

But when Eric refined the footage and zoomed in,

223

00:11:21,000 --> 00:11:26,000

so much more detail was revealed, and it was absolutely shocking.

224

00:11:26,000 --> 00:11:29,000

So I'm going to remove that filter.

225

00:11:31,000 --> 00:11:33,000

Here is our raw data, Brandon.

226

00:11:33,000 --> 00:11:35,000

It's on the thermal though.

227

00:11:35,000 --> 00:11:36,000

It's thermal.

228

00:11:36,000 --> 00:11:37,000

Yeah.

229

00:11:37,000 --> 00:11:39,000

No, it's a fleet.

230

00:11:39,000 --> 00:11:40,000

Flying formation.

231

00:11:40,000 --> 00:11:42,000

They are flying formation.

232

00:11:42,000 --> 00:11:46,000

So what you're looking at is something that is warmer than the ambient.

233

00:11:46,000 --> 00:11:50,000

The first thing I would think is I'm looking at a flock of birds.

234

00:11:50,000 --> 00:11:53,000

Geese is what I would think of, a flying in a V or something.

235

00:11:53,000 --> 00:11:54,000

Yeah.

236

00:11:54,000 --> 00:11:57,000

But this is in fact in the middle of the night.

237

00:11:57,000 --> 00:12:01,000

Regardless of night, it doesn't follow bird patterns.

238

00:12:01,000 --> 00:12:05,000

Where they're so tight, they're in one ball, and then they break off.

239

00:12:05,000 --> 00:12:06,000

Think about it.

240

00:12:06,000 --> 00:12:12,000

Yeah, if they are formation flying, something is communicating their formation with each other.

241

00:12:12,000 --> 00:12:18,000

Or each one of them is making individual measurements quickly so that they don't fly into each other.

242

00:12:18,000 --> 00:12:28,000

If they're being controlled from somewhere, then there's a signal that would be being broadcast between them updating their information.

243

00:12:28,000 --> 00:12:34,000

Could these things have been formation flying through remote or somehow in communication with each other?

244

00:12:34,000 --> 00:12:39,000

With Jay's extensive experience with UAPs, I'd like your perspective.

245

00:12:39,000 --> 00:12:44,000

You're awfully quiet, but I see that, is this the first time you've seen something like this?

246

00:12:44,000 --> 00:12:46,000

It's one being quiet.

247

00:12:46,000 --> 00:12:50,000

There's something going on here that's really very strange.

248

00:12:50,000 --> 00:12:55,000

So I have a similar event from the same experiment.

249

00:12:55,000 --> 00:12:56,000

Really?

250

00:12:56,000 --> 00:12:57,000

Yes.

251

00:12:57,000 --> 00:12:59,000

Another one, very similar to this.

252

00:12:59,000 --> 00:13:06,000

This is from later during the course of this exercise.

253

00:13:06,000 --> 00:13:09,000

You're looking at the raw thermodynamic footage.

254

00:13:09,000 --> 00:13:11,000

Oh, and it just appeared.

255

00:13:11,000 --> 00:13:14,000

It didn't come up over the horizon, they were just there.

256

00:13:14,000 --> 00:13:16,000

What's the number count?

257

00:13:16,000 --> 00:13:17,000

Four?

258

00:13:17,000 --> 00:13:18,000

Four or five?

259

00:13:18,000 --> 00:13:19,000

I think five or six.

260

00:13:19,000 --> 00:13:20,000

Oh, it looked more of them split off.

261

00:13:20,000 --> 00:13:21,000

And how fast are they going?

262

00:13:21,000 --> 00:13:24,000

Is the question.

263

00:13:24,000 --> 00:13:29,000

The other thing that I find kind of peculiar about this is the uniformity of this motion.

264

00:13:29,000 --> 00:13:30,000

It's so smooth.

265

00:13:30,000 --> 00:13:36,000

You know, normally when I see, at least in the near field, when I see birds flying through my field of view,

266

00:13:36,000 --> 00:13:38,000

I see very erratic type of movement.

267

00:13:38,000 --> 00:13:43,000

You know, I see the movement of the wings and I also see direction changes.

268

00:13:43,000 --> 00:13:50,000

This is eerily uniform, you know, as it moves through our field of view.

269

00:13:50,000 --> 00:13:53,000

The interesting thing to me is that you've got it two different times,

270

00:13:53,000 --> 00:13:56,000

looking at the same field of view, the same direction,

271

00:13:56,000 --> 00:13:59,000

didn't change the camera's viewpoint,

272

00:13:59,000 --> 00:14:03,000

which suggests being a common spot for whatever this is.

273

00:14:03,000 --> 00:14:04,000

Exactly.

274

00:14:04,000 --> 00:14:12,000

So this all happened within that same area where we saw the UAP coming out of the Mesa and into the triangle.

275

00:14:12,000 --> 00:14:16,000

Three weeks ago, we conducted an experiment at the triangle

276

00:14:16,000 --> 00:14:21,000

by launching rockets horizontally from the top of the Mesa and vertically from the ground as well.

277

00:14:25,000 --> 00:14:26,000

Oh, wow.

278

00:14:26,000 --> 00:14:28,000

That was cool.

279

00:14:28,000 --> 00:14:34,000

And what a camera mounted on Brandon's helicopter captured absolutely left us stunned.

280

00:14:35,000 --> 00:14:37,000

Well, Eric, do we have that footage?

281

00:14:37,000 --> 00:14:38,000

Yeah.

282

00:14:38,000 --> 00:14:39,000

Yeah.

283

00:14:42,000 --> 00:14:46,000

So I want to draw your attention to this area.

284

00:14:46,000 --> 00:14:51,000

I want you to watch this part of the sky very carefully.

285

00:14:53,000 --> 00:14:54,000

Yeah, I see it.

286

00:14:54,000 --> 00:14:56,000

Watch as that object descends.

287

00:14:56,000 --> 00:15:01,000

Now, it disappears and it gets really interesting here.

288

00:15:01,000 --> 00:15:07,000

We continue in the helicopter towards the east on the lower left hand portion of the screen.

289

00:15:07,000 --> 00:15:10,000

Suddenly a light comes right out of the Mesa.

290

00:15:10,000 --> 00:15:11,000

Oh, my gosh.

291

00:15:11,000 --> 00:15:13,000

That's scary.

292

00:15:13,000 --> 00:15:15,000

Okay, I'm going to take us back.

293

00:15:19,000 --> 00:15:20,000

That's crazy.

294

00:15:21,000 --> 00:15:22,000

It's stunning.

295

00:15:22,000 --> 00:15:23,000

Wow.

296

00:15:23,000 --> 00:15:24,000

Yeah, wow.

297

00:15:25,000 --> 00:15:32,000

How many times have we been told from junior Hicks, from other folks around,

298

00:15:32,000 --> 00:15:38,000

from the Bigelow era folks that they've seen things fly in and out of the Mesa?

299

00:15:38,000 --> 00:15:45,000

Well, we actually have it on camera now of something flying in and out of the Mesa.

300

00:15:47,000 --> 00:15:56,000

For generations, the indigenous Navajo and Yut nations near the ranch have passed down stories about interdimensional portals or wormholes,

301

00:15:56,000 --> 00:16:01,000

allowing UAPs to actually fly in to and out of the Mesa.

302

00:16:01,000 --> 00:16:11,000

And now we've not only seen this phenomenon for ourselves, but a number of other UAPs just appear out of nowhere and then simply vanish.

303

00:16:11,000 --> 00:16:23,000

So could the UAP that appeared out of nowhere last week and split into smaller objects that flew in a uniform formation have possibly emerged from a wormhole above Skinwalker Ranch?

304

00:16:24,000 --> 00:16:34,000

Estimating the distance from where this thing flew into the ground and where it came out of the ground and the amount of time that passes in the video

305

00:16:34,000 --> 00:16:41,000

suggests it was doing about 300 miles per hour underneath the surface of the ground if this is the same object in flying through the Mesa.

306

00:16:41,000 --> 00:16:43,000

300 mile an hour through dirt.

307

00:16:43,000 --> 00:16:45,000

Who knows what we're seeing?

308

00:16:45,000 --> 00:16:51,000

It's beyond coincidence that we see phenomena appearing left and right.

309

00:16:51,000 --> 00:16:59,000

And I'd say some of the most stunning UAP phenomena ever captured on camera, not just at Skinwalker Ranch, but anywhere.

310

00:16:59,000 --> 00:17:02,000

I mean, you've seen a lot, Jay.

311

00:17:02,000 --> 00:17:17,000

I mean, to see clear as day a luminous object literally descend from the sky quickly and then leave the Mesa and pass right below the helicopter.

312

00:17:18,000 --> 00:17:27,000

No, in one place to capture all this with the quality of the cameras and etc. that we have is, I don't know anywhere else.

313

00:17:27,000 --> 00:17:34,000

There's a reason why U.S. government organizations like NIDS and OSAP contracted this location as an observatory.

314

00:17:34,000 --> 00:17:39,000

And it's really lived up to that. Absolutely.

315

00:17:39,000 --> 00:17:40,000

So crazy.

316

00:17:40,000 --> 00:17:50,000

So crazy. Well, within the region of the Triangle, we have seen an unprecedented number of strange events and anomalies.

317

00:17:50,000 --> 00:17:57,000

Recently, some of the most perplexing data that we've collected comes from work that we've done with UGM.

318

00:17:57,000 --> 00:18:00,000

Yep, and that's something to definitely dig into.

319

00:18:01,000 --> 00:18:19,000

Recently, some of the most perplexing data that we've collected comes from work that we've done with UGM, a LiDAR survey, the area right there at the Triangle.

320

00:18:19,000 --> 00:18:27,000

And there are features showing up in the data that I just don't understand, especially the reflectivity aspect of the data that has just really got us all scratching our heads.

321

00:18:27,000 --> 00:18:33,000

Yeah, so we have, I'd say, one of the most probably advanced small LiDAR scanners that we put on the drone.

322

00:18:33,000 --> 00:18:37,000

It does upwards of 400,000 scans per second.

323

00:18:37,000 --> 00:18:44,000

For this particular instance, we said, let's scan as we're going to launch a rocket.

324

00:18:44,000 --> 00:18:45,000

Yeah.

325

00:18:45,000 --> 00:18:53,000

About a month ago, Jim and his colleagues from Omnitech, which all have extensive government intelligence backgrounds,

326

00:18:53,000 --> 00:19:01,000

helped us scan the Triangle with an advanced LiDAR scanner while we launched a rocket up through the anomalous zone above the Triangle.

327

00:19:01,000 --> 00:19:04,000

Three, two, one.

328

00:19:05,000 --> 00:19:08,000

Well, right at that 31-foot blob level.

329

00:19:08,000 --> 00:19:09,000

We got a good shoot.

330

00:19:09,000 --> 00:19:10,000

A good shoot.

331

00:19:10,000 --> 00:19:18,000

The LiDAR's infrared lasers detected the rocket passing through and displacing something we couldn't see with the naked eye.

332

00:19:18,000 --> 00:19:19,000

Look at that.

333

00:19:19,000 --> 00:19:20,000

That's interesting.

334

00:19:20,000 --> 00:19:29,000

And then, when Jim further processed the data, it showed a perfectly circular formation at the Triangle with a black void right in the center.

335

00:19:29,000 --> 00:19:30,000

What are we looking at?

336

00:19:30,000 --> 00:19:31,000

A black hole.

337

00:19:31,000 --> 00:19:35,000

Well, that could be a shadow of a wormhole.

338

00:19:38,000 --> 00:19:49,000

That brings us to the data, which is the most detailed scientifically instrumented experiment I think that we've done with high-level scientific equipment.

339

00:19:49,000 --> 00:19:53,000

And that's the thing that really excites me about this particular measurement.

340

00:19:53,000 --> 00:20:01,000

So this is one of the most fascinating pieces of data so far in the nearly four years that I've been coming out to the ranch.

341

00:20:01,000 --> 00:20:04,000

And so I'm really excited about what we got from this.

342

00:20:04,000 --> 00:20:05,000

Going to the next slide, Eric.

343

00:20:05,000 --> 00:20:08,000

So here's the data.

344

00:20:08,000 --> 00:20:10,000

This is straight from the LiDAR.

345

00:20:10,000 --> 00:20:13,000

So look at some of this area here.

346

00:20:13,000 --> 00:20:16,000

You can see this is the road that makes the triangle.

347

00:20:16,000 --> 00:20:18,000

And the triangle looks about like this.

348

00:20:18,000 --> 00:20:19,000

Right?

349

00:20:19,000 --> 00:20:23,000

Now, as you notice, there's a black spot here.

350

00:20:23,000 --> 00:20:26,000

So black is no data returned at all.

351

00:20:26,000 --> 00:20:30,000

That is a shadow of something you would think.

352

00:20:30,000 --> 00:20:31,000

But of what?

353

00:20:31,000 --> 00:20:38,000

How can there be a spot right here where the drone is literally right here moving back and forth, making this measurement,

354

00:20:38,000 --> 00:20:40,000

shining the laser at the ground.

355

00:20:40,000 --> 00:20:48,000

The beam should hit the ground, bounce off of the dirt, come right back up to the drone, and paint just like it painted the rest of the area.

356

00:20:48,000 --> 00:20:50,000

That should be filled in.

357

00:20:50,000 --> 00:20:53,000

So it's really odd what that is.

358

00:20:53,000 --> 00:20:54,000

Eric, you can go to the next one.

359

00:20:54,000 --> 00:21:01,000

Now, with the LiDARs going, the rocket goes up, what you should see is one line getting painted of the rocket going up.

360

00:21:01,000 --> 00:21:03,000

And that's what we expected to see.

361

00:21:03,000 --> 00:21:12,000

And so when we go back and look at the data, you see multiple paths that look like you're looking at the rocket through a bunch of mirrors.

362

00:21:12,000 --> 00:21:19,000

And it creates an arc that's kind of going around this anomaly.

363

00:21:19,000 --> 00:21:20,000

How could that be possible?

364

00:21:20,000 --> 00:21:21,000

What are we seeing?

365

00:21:21,000 --> 00:21:28,000

Something is bending the light, making it think that there are multiple rockets being launched in different locations.

366

00:21:28,000 --> 00:21:31,000

And I got thinking, well, what on earth could do that?

367

00:21:31,000 --> 00:21:33,000

All right, next slide, Eric.

368

00:21:33,000 --> 00:21:38,000

So are we seeing a wormhole, or portal?

369

00:21:38,000 --> 00:21:41,000

Now, if it is a portal, what would that look like?

370

00:21:41,000 --> 00:21:54,000

Well, if you think about the typical Einstein-Rosen bridge that what a wormhole is, you have normal space, and there's a hole literally in that that connects us to another part of space that moves through elsewhere.

371

00:21:54,000 --> 00:22:04,000

And they're really far apart, but somehow you connect them through what looks like two funnels stuck together at the throats of each funnel, and you would travel through it making the distance shorter.

372

00:22:04,000 --> 00:22:07,000

So there's a clear anomaly in the LIDAR data.

373

00:22:07,000 --> 00:22:09,000

There's something strange going on.

374

00:22:09,000 --> 00:22:10,000

Absolutely something strange.

375

00:22:10,000 --> 00:22:11,000

I'll explain it.

376

00:22:11,000 --> 00:22:22,000

Is it possible that the strange boy, Jim Royston, and the Omni-Tech team detected with their LIDAR, really is an image of a wormhole above the triangle?

377

00:22:24,000 --> 00:22:26,000

Oh, we got a malfunction. Everybody watch out.

378

00:22:26,000 --> 00:22:29,000

There's something in the sky above the rocket right here.

379

00:22:29,000 --> 00:22:36,000

Could that explain the blob that destroyed our rocket earlier this year, about 31 feet in the air?

380

00:22:36,000 --> 00:22:37,000

Go for launch.

381

00:22:37,000 --> 00:22:39,000

That is a heck of a payload.

382

00:22:39,000 --> 00:22:40,000

Wow.

383

00:22:40,000 --> 00:22:46,000

Or the quarter-second shift in time that was recorded nearly 10,000 feet high.

384

00:22:46,000 --> 00:22:49,000

We did have some clock anomalies.

385

00:22:49,000 --> 00:22:52,000

Right where our rocket disappeared last week.

386

00:22:52,000 --> 00:22:55,000

We lost a quarter-second of time.

387

00:22:55,000 --> 00:22:57,000

Oh my goodness, a quarter of a second is huge.

388

00:22:57,000 --> 00:23:01,000

Nobody's ever measured any anomaly like that on the planet.

389

00:23:01,000 --> 00:23:02,000

Exactly.

390

00:23:03,000 --> 00:23:05,000

It came right out of the mesa.

391

00:23:05,000 --> 00:23:10,000

Does it also explain where the UAPs we see come from?

392

00:23:10,000 --> 00:23:11,000

What the hell was it?

393

00:23:11,000 --> 00:23:14,000

And why they sometimes vanish into thin air.

394

00:23:14,000 --> 00:23:15,000

Wow.

395

00:23:15,000 --> 00:23:17,000

This is stunning.

396

00:23:17,000 --> 00:23:24,000

And finally, does it prove the traditions of the indigenous people of this area who have believed for generations

397

00:23:24,000 --> 00:23:29,000

that there are portals or wormholes here on Skinwalker Range?

398

00:23:29,000 --> 00:23:36,000

The visual representation of what your scans have picked up, it's jaw dropping.

399

00:23:36,000 --> 00:23:44,000

But then you add on top of that the fact that we're seeing UFO or UAP activity within this region and airspace.

400

00:23:44,000 --> 00:23:45,000

Yeah.

401

00:23:45,000 --> 00:23:50,000

When you start adding all of that up, we're looking at something that is game changing,

402

00:23:50,000 --> 00:23:58,000

that will rewrite history potentially as it relates to our understanding of the planet, physics, and really the nature of reality.

403

00:23:58,000 --> 00:23:59,000

That's right.

404

00:24:00,000 --> 00:24:01,000

Well, here's the thing.

405

00:24:01,000 --> 00:24:04,000

We have so much more to cover, right?

406

00:24:05,000 --> 00:24:12,000

You know, we've been talking about everything that may be above the triangle and what has been recorded.

407

00:24:12,000 --> 00:24:17,000

The mesa continues to be a main point of geographic interest on this property.

408

00:24:17,000 --> 00:24:18,000

Yep.

409

00:24:18,000 --> 00:24:21,000

Let's talk about what may be beneath.

410

00:24:21,000 --> 00:24:22,000

Yeah.

411

00:24:31,000 --> 00:24:37,000

The mesa continues to be a main point of geographic interest on this property.

412

00:24:37,000 --> 00:24:40,000

Let's talk about what may be beneath.

413

00:24:40,000 --> 00:24:41,000

Sure.

414

00:24:41,000 --> 00:24:46,000

Well, Brandon, we pulled the metal out of the mesa last year and that's really been the elephant on the ranch.

415

00:24:46,000 --> 00:24:48,000

What is sitting inside the mesa?

416

00:24:48,000 --> 00:24:53,000

You know, we had this dome object that we hit up against as we were trying to drill in last year.

417

00:24:53,000 --> 00:24:57,000

And so, obviously, that was a before-furn of mine, especially mine this year.

418

00:24:57,000 --> 00:24:58,000

Yeah.

419

00:24:59,000 --> 00:25:07,000

Aside from the crazy mystery of the triangle, the mesa may also be a key to getting answers about the phenomena on Skinwalker Range.

420

00:25:07,000 --> 00:25:12,000

Boy, that thing sounds like it's hitting something.

421

00:25:12,000 --> 00:25:20,000

Last year, a drilling operation scraped along the bottom of what we believe to be a 400-foot-long dome-shaped metallic object.

422

00:25:21,000 --> 00:25:22,000

What is that?

423

00:25:22,000 --> 00:25:24,000

It was impossible to penetrate.

424

00:25:24,000 --> 00:25:27,000

What do you think it was when you first saw it?

425

00:25:27,000 --> 00:25:30,000

I wondered if it was like metal flakes or something.

426

00:25:30,000 --> 00:25:32,000

That's exactly the same impression I got.

427

00:25:32,000 --> 00:25:39,000

But we did find metal fragments in the spoils such as europium, tellurium, aluminum, and selenium,

428

00:25:39,000 --> 00:25:43,000

which are components of water known as metamaterials.

429

00:25:43,000 --> 00:25:44,000

Now, this is interesting.

430

00:25:44,000 --> 00:25:49,000

The color reminds this individual of elemental selenium deposits.

431

00:25:49,000 --> 00:25:55,000

Selenium is an optical material that is being used in military experiments.

432

00:25:55,000 --> 00:25:56,000

Really?

433

00:25:56,000 --> 00:25:57,000

Yes.

434

00:25:57,000 --> 00:26:04,000

What makes this particularly interesting is that our own government is currently experimenting with these kinds of metamaterials

435

00:26:04,000 --> 00:26:08,000

for applications such as cloaking technology for aircraft.

436

00:26:10,000 --> 00:26:12,000

I'm really interested in what you found, John.

437

00:26:12,000 --> 00:26:13,000

Absolutely.

438

00:26:13,000 --> 00:26:14,000

Yeah, I can't wait.

439

00:26:14,000 --> 00:26:21,000

And then this year, we ran new state-of-the-art ground-penetrating radar scans that detected a second,

440

00:26:21,000 --> 00:26:26,000

possibly metallic anomaly positioned vertically right behind the dome-shaped object.

441

00:26:26,000 --> 00:26:29,000

What in the hell are we looking at here?

442

00:26:33,000 --> 00:26:36,000

It's hitting something really hard and smooth.

443

00:26:36,000 --> 00:26:39,000

What in the world is that?

444

00:26:39,000 --> 00:26:45,000

This time, we tried drilling into the top of the dome-shaped anomaly, and once again, we couldn't break through it.

445

00:26:45,000 --> 00:26:52,000

But even more perplexing was that after hours and hours of grinding away on it, the drill bit showed no damage.

446

00:26:53,000 --> 00:26:58,000

As if this dome-shaped thing is surrounded by some kind of frictionless force field.

447

00:27:00,000 --> 00:27:03,000

Both times, when you pulled the drill bit out, it was in perfect condition.

448

00:27:03,000 --> 00:27:07,000

We thought maybe the bit was damaged, but it was perfect condition.

449

00:27:07,000 --> 00:27:08,000

It wasn't even dull.

450

00:27:08,000 --> 00:27:10,000

No sign of wear on it.

451

00:27:11,000 --> 00:27:14,000

Is this thing inside the Mesa frictionless or have some barrier on it?

452

00:27:14,000 --> 00:27:16,000

That's special kind of lubricant.

453

00:27:16,000 --> 00:27:17,000

Some kind of super lubricant.

454

00:27:17,000 --> 00:27:18,000

Yeah.

455

00:27:18,000 --> 00:27:22,000

So we really don't know what it is that's inside the Mesa.

456

00:27:24,000 --> 00:27:26,000

We still had to figure out a way to get in there.

457

00:27:26,000 --> 00:27:35,000

But fortunately, the experiment we did with Lunason, the whole point of it was not just to measure the electric field and the time anomalies above the triangle.

458

00:27:35,000 --> 00:27:44,000

They have this technology that is a brand new sensor technology that should be able to show us maybe as much as three miles deep below the range.

459

00:27:44,000 --> 00:27:47,000

So I have Jeremiah pay to queue up on the video call.

460

00:27:47,000 --> 00:27:55,000

And so I'd like to bring him into this meeting and have him walk us through what his findings have been from that survey that was performed over the ranch.

461

00:27:55,000 --> 00:27:56,000

Awesome.

462

00:27:56,000 --> 00:27:57,000

I can't wait to see this.

463

00:27:59,000 --> 00:28:00,000

Greetings, Jeremiah.

464

00:28:00,000 --> 00:28:01,000

Thank you for joining.

465

00:28:01,000 --> 00:28:02,000

Yeah.

466

00:28:02,000 --> 00:28:03,000

Thank you, Brandon.

467

00:28:03,000 --> 00:28:04,000

Hello, everyone.

468

00:28:04,000 --> 00:28:05,000

Hey, Jeremiah.

469

00:28:05,000 --> 00:28:12,000

So we managed to actually extract some subsurface data from our balloon flight.

470

00:28:15,000 --> 00:28:16,000

Okay.

471

00:28:16,000 --> 00:28:17,000

I think we're good.

472

00:28:17,000 --> 00:28:18,000

We'll go for launch.

473

00:28:18,000 --> 00:28:28,000

Five weeks ago, Jeremiah Payt and his team from Lunason performed a low frequency radar scan 70,000 feet above the ranch.

474

00:28:28,000 --> 00:28:29,000

Fantastic.

475

00:28:29,000 --> 00:28:36,000

Which is actually what detected possible evidence of a wormhole some 10,000 feet above the triangle.

476

00:28:36,000 --> 00:28:46,000

However, the scan was also designed to collect data deep inside the Mesa and underground, which Jeremiah needed a lot more time to process and analyze.

477

00:28:46,000 --> 00:28:49,000

So we couldn't wait to hear those results.

478

00:28:49,000 --> 00:28:52,000

So I have some slides I can share.

479

00:28:52,000 --> 00:28:59,000

This is an actual rudimentary image of the subsurface under the ranch.

480

00:28:59,000 --> 00:29:00,000

Perfect.

481

00:29:00,000 --> 00:29:05,000

You've got a room full of people who are on the edge of their seats waiting to see what you've discovered.

482

00:29:05,000 --> 00:29:06,000

Absolutely.

483

00:29:06,000 --> 00:29:12,000

So here's a quick glance at the actual subsurface map here.

484

00:29:12,000 --> 00:29:17,000

This image is actually the underside of part of the Mesa.

485

00:29:17,000 --> 00:29:18,000

Okay.

486

00:29:18,000 --> 00:29:20,000

There were a number of anomalies.

487

00:29:20,000 --> 00:29:25,000

So each of these dots is color coded according to depth underground.

488

00:29:25,000 --> 00:29:28,000

And so the purple parts are much closer to the surface.

489

00:29:28,000 --> 00:29:34,000

So those tend to be in the range of around 10 meters or so below surface level.

490

00:29:34,000 --> 00:29:39,000

And the dots that are green tend to be a bit deeper, 15 to 20 meters.

491

00:29:39,000 --> 00:29:50,000

And then the yellow dots tend to be a little bit below that they seem quite out of place geologically would be the best way to put it.

492

00:29:50,000 --> 00:29:53,000

So many anomalies we saw underground.

493

00:29:53,000 --> 00:29:56,000

It appears to be voids beneath the surface.

494

00:29:56,000 --> 00:29:59,000

It does not seem to be consistent with the surrounding geology.

495

00:29:59,000 --> 00:30:02,000

These are fairly large targets.

496

00:30:02,000 --> 00:30:06,000

How big would you suspect some of these voids are?

497

00:30:06,000 --> 00:30:12,000

So these voids tend to be in the tens of feet from what we've seen.

498

00:30:12,000 --> 00:30:13,000

Whoa.

499

00:30:13,000 --> 00:30:18,000

And they also seem to be in a mostly linear form.

500

00:30:18,000 --> 00:30:19,000

Wow.

501

00:30:19,000 --> 00:30:22,000

This is a 2D rendering.

502

00:30:22,000 --> 00:30:28,000

We're seeing the throne above what we saw underground with the same sort of color coding.

503

00:30:28,000 --> 00:30:30,000

It definitely seems like a ton of type of structure.

504

00:30:30,000 --> 00:30:34,000

It's actually stretching into the Mesa itself.

505

00:30:34,000 --> 00:30:35,000

Wow.

506

00:30:35,000 --> 00:30:38,000

This really got our attention.

507

00:30:38,000 --> 00:30:39,000

Yeah.

508

00:30:39,000 --> 00:30:42,000

It's very, very interesting.

509

00:30:42,000 --> 00:30:47,000

So these structures right here, some of these are in the order of 60 feet wide.

510

00:30:47,000 --> 00:30:48,000

60 feet?

511

00:30:48,000 --> 00:30:49,000

Yeah.

512

00:30:49,000 --> 00:30:50,000

Biggest room.

513

00:30:50,000 --> 00:30:52,000

Jeremiah, what do you conclude from this?

514

00:30:52,000 --> 00:30:58,000

If you were to speculate based on your expertise, what are we looking at here?

515

00:30:58,000 --> 00:31:05,000

The conclusion that this has all led me to is some sort of tunnel with a high metallic content.

516

00:31:05,000 --> 00:31:06,000

Wow.

517

00:31:06,000 --> 00:31:09,000

That is really interesting.

518

00:31:09,000 --> 00:31:10,000

Yeah.

519

00:31:10,000 --> 00:31:17,000

So it does seem like the evidence is very much in favor of an artificial explanation for

520

00:31:17,000 --> 00:31:18,000

this.

521

00:31:18,000 --> 00:31:22,000

So we're going to go ahead and do a little bit of a demo.

522

00:31:22,000 --> 00:31:25,000

So we're going to go ahead and do a demo.

523

00:31:25,000 --> 00:31:28,000

So we're going to go ahead and do a demo.

524

00:31:28,000 --> 00:31:34,000

So it does seem like the evidence is very much in favor of an artificial explanation

525

00:31:34,000 --> 00:31:35,000

for this.

526

00:31:35,000 --> 00:31:36,000

Yeah, absolutely.

527

00:31:36,000 --> 00:31:42,000

This seems to be almost tracing out an outline of a much larger structure within the Mesa

528

00:31:42,000 --> 00:31:45,000

and indeed under the entire ranch.

529

00:31:45,000 --> 00:31:47,000

Wow.

530

00:31:47,000 --> 00:31:53,000

In other words, it appears that you have confirmed that there is indeed a very sophisticated

531

00:31:53,000 --> 00:31:57,000

underground void or underground tunnel system in the Mesa.

532

00:31:57,000 --> 00:31:59,000

That is correct.

533

00:31:59,000 --> 00:32:01,000

Wow.

534

00:32:01,000 --> 00:32:02,000

Wow.

535

00:32:02,000 --> 00:32:05,000

Somebody has purposely built these tunnels.

536

00:32:05,000 --> 00:32:06,000

Yeah.

537

00:32:06,000 --> 00:32:13,000

And for what purpose would we see this kind of extraordinary system embedded in this Mesa

538

00:32:13,000 --> 00:32:15,000

and the Mesa is ancient?

539

00:32:15,000 --> 00:32:16,000

Right.

540

00:32:16,000 --> 00:32:17,000

Oh my gosh.

541

00:32:17,000 --> 00:32:19,000

What have we stumbled on?

542

00:32:19,000 --> 00:32:21,000

Yeah.

543

00:32:21,000 --> 00:32:27,000

Is this something of modern manufacture or is this something ancient that we are now

544

00:32:27,000 --> 00:32:28,000

revealing?

545

00:32:28,000 --> 00:32:33,000

I mean, we've got to take this to the next level and I think your efforts are really

546

00:32:33,000 --> 00:32:39,000

going to help us advance our research and find out what really lies beneath this very

547

00:32:39,000 --> 00:32:40,000

unusual property.

548

00:32:40,000 --> 00:32:41,000

Yes.

549

00:32:41,000 --> 00:32:42,000

Absolutely.

550

00:32:42,000 --> 00:32:43,000

Thank you.

551

00:32:43,000 --> 00:32:44,000

Yeah.

552

00:32:44,000 --> 00:32:49,000

It's that my firm conviction that the answers to the ranch are not on the ranch but under

553

00:32:49,000 --> 00:32:50,000

it.

554

00:32:50,000 --> 00:32:52,000

Well said.

555

00:32:52,000 --> 00:32:53,000

This was stunning.

556

00:32:53,000 --> 00:32:55,000

Jeremiah, thank you.

557

00:32:55,000 --> 00:33:01,000

Please thank your team and we look forward to being in touch to really escalate this and

558

00:33:01,000 --> 00:33:05,000

take whatever steps needed in order to delve into this even further.

559

00:33:05,000 --> 00:33:06,000

Thank you.

560

00:33:06,000 --> 00:33:07,000

Thank you so much.

561

00:33:07,000 --> 00:33:08,000

Thanks, Jeremiah.

562

00:33:08,000 --> 00:33:09,000

Amazing.

563

00:33:09,000 --> 00:33:12,000

I was not expecting that.

564

00:33:12,000 --> 00:33:13,000

No.

565

00:33:13,000 --> 00:33:19,960

Well, as we talk about next steps, let's lower the shades and really discuss what we need

566

00:33:19,960 --> 00:33:24,960

to do moving forward in light of this really revelatory data.

567

00:33:24,960 --> 00:33:28,960

You know, we don't know how deep the things in the Mesa go.

568

00:33:28,960 --> 00:33:34,380

We don't even know how to get to the things that are 30 meters away inside the Mesa.

569

00:33:34,380 --> 00:33:37,480

I still favor the less invasive.

570

00:33:37,480 --> 00:33:38,480

The less invasive.

571

00:33:38,480 --> 00:33:39,480

Exactly.

572

00:33:39,480 --> 00:33:44,080

The surgical approach to going into those structures, we obviously don't want to destroy

573

00:33:44,080 --> 00:33:46,880

the very thing that we're here to study.

574

00:33:46,880 --> 00:33:52,200

There are a lot of things that are compelling that are going to need further consideration

575

00:33:52,200 --> 00:33:53,200

and research.

576

00:33:53,200 --> 00:33:55,560

So there's a lot going on.

577

00:33:55,560 --> 00:33:56,560

Yeah.

578

00:33:56,560 --> 00:33:59,760

We've seen, you know, multiple compelling things.

579

00:33:59,760 --> 00:34:01,240

Yeah, absolutely.

580

00:34:01,240 --> 00:34:02,640

Yeah.

581

00:34:02,640 --> 00:34:07,240

Even if we get answers at the triangle and inside the Mesa, there are several more areas

582

00:34:07,240 --> 00:34:13,480

across the 512 acres of the property where truly bizarre things also occur.

583

00:34:13,480 --> 00:34:19,960

At Homestead 2, we've documented UAPs, energy spikes, and we've even unearthed meta materials

584

00:34:19,960 --> 00:34:25,400

in the same area similar to what we found in the Mesa.

585

00:34:25,400 --> 00:34:30,920

In the Eastfield, we documented a thermal anomaly right over a spiral of boulders that

586

00:34:30,920 --> 00:34:36,120

is believed to have been created by indigenous tribal members centuries ago in order to depict

587

00:34:36,120 --> 00:34:39,200

an interdimensional portal.

588

00:34:39,200 --> 00:34:46,880

And in the Southfield, we've captured footage of multiple UAPs, including one in broad daylight,

589

00:34:46,880 --> 00:34:51,720

and also found the mutilated carcasses of dead animals that died under very mysterious

590

00:34:51,720 --> 00:34:54,720

circumstances.

591

00:34:54,720 --> 00:35:00,480

Given the size and scale of the property, Jim, we're looking forward to having you engaged

592

00:35:00,480 --> 00:35:04,840

further and invite you to give us some idea of what you would recommend.

593

00:35:04,840 --> 00:35:06,720

What are the next steps?

594

00:35:06,720 --> 00:35:10,960

So it's persistent data collection.

595

00:35:10,960 --> 00:35:13,240

We really need to get sensors up.

596

00:35:13,240 --> 00:35:19,440

We need to treat it like a true operational environment and then collect data 24-7.

597

00:35:19,440 --> 00:35:20,920

We're focusing on the triangle.

598

00:35:20,920 --> 00:35:22,440

We see something happening there.

599

00:35:22,440 --> 00:35:26,480

But what's happening down at the petroglyphs at the same time?

600

00:35:26,480 --> 00:35:32,600

As we bring these sensors on, we can see where they are, how they relate to each other,

601

00:35:32,600 --> 00:35:36,280

and then these sensors will actually start talking to each other.

602

00:35:36,280 --> 00:35:42,080

So the sensors, instead of waiting for one of us to go, oh, go take a look over there,

603

00:35:42,080 --> 00:35:44,880

the sensors will actually share data.

604

00:35:44,880 --> 00:35:51,240

So as we see a magnetic field start moving across the ranch, we'll all be able to look

605

00:35:51,240 --> 00:35:55,320

across and we can visualize where did it start from.

606

00:35:55,320 --> 00:36:01,680

Or if we see a UAP, these sensors will be smart enough to go, I saw something turn cameras

607

00:36:01,680 --> 00:36:03,600

in this direction.

608

00:36:03,600 --> 00:36:09,680

And then all this data will go into what we call our Athena engine, which is our AI engine.

609

00:36:09,680 --> 00:36:14,360

And what that will do is start aggregating all this data real time.

610

00:36:14,360 --> 00:36:19,640

And they'll start being able to really make sense out of this.

611

00:36:19,640 --> 00:36:25,080

We've documented so many kinds of phenomena over the last four years on Skinwalker Ranch.

612

00:36:25,080 --> 00:36:29,200

And even though we're starting to suspect some truly incredible possibilities for what

613

00:36:29,200 --> 00:36:34,520

causes them, Jim Royston and his colleagues at Amitech believe they can outfit the entire

614

00:36:34,520 --> 00:36:39,920

ranch with sensors that will use artificial intelligence to help give us definitive answers

615

00:36:39,920 --> 00:36:41,480

in the future.

616

00:36:41,480 --> 00:36:47,240

You're familiar, of course, Jim, with the fact that we have a lot of separate measurement

617

00:36:47,240 --> 00:36:48,240

tools.

618

00:36:48,240 --> 00:36:55,720

But the opportunity to put those into an always online mode and always bring in the data and

619

00:36:55,720 --> 00:37:00,160

the capacity to actually deal with all those data streams is something that we haven't

620

00:37:00,160 --> 00:37:03,560

had until just now.

621

00:37:03,560 --> 00:37:09,440

You're bringing the ability to process, filter, and taking a lot of that load off of, frankly,

622

00:37:09,440 --> 00:37:10,440

me.

623

00:37:10,440 --> 00:37:15,800

So having all of that come through an artificial intelligence machine learning system is going

624

00:37:15,800 --> 00:37:18,400

to be extremely enabling.

625

00:37:18,400 --> 00:37:22,600

So I imagine that the rate at which we are making discoveries is about to accelerate.

626

00:37:22,600 --> 00:37:23,480

Absolutely.

627

00:37:25,840 --> 00:37:29,320

It's really understanding the operational environment, right?

628

00:37:29,320 --> 00:37:30,320

Defining that.

629

00:37:30,320 --> 00:37:31,320

Yeah.

630

00:37:31,320 --> 00:37:35,360

I'm very optimistic about the collaboration opportunity with Amitech.

631

00:37:35,360 --> 00:37:39,840

This is a group of individuals with military intelligence experience.

632

00:37:39,840 --> 00:37:42,960

They have remarkable technologies at their disposal.

633

00:37:42,960 --> 00:37:47,480

We should help us to discern any interesting correlations or any interesting information

634

00:37:47,480 --> 00:37:48,480

that we have.

635

00:37:48,480 --> 00:37:52,720

And I think that's a great opportunity to have a chance to get to the point where we

636

00:37:52,720 --> 00:37:58,920

help us to discern any interesting correlations or patterns in what is otherwise a very complex

637

00:37:58,920 --> 00:38:01,400

data set here at the ranch.

638

00:38:01,400 --> 00:38:08,400

So if we're going to define an operational environment, it's got to be a secure environment.

639

00:38:08,400 --> 00:38:13,680

As part of that security suite, we will be integrating seismic sensors.

640

00:38:13,680 --> 00:38:20,000

So whether you're a rabbit or you're a mule deer or you're walking on two legs, whether

641

00:38:20,000 --> 00:38:25,360

you're running, crawling, we'll be able to identify it, where it is, and what's going

642

00:38:25,360 --> 00:38:26,360

on.

643

00:38:26,360 --> 00:38:27,360

Great.

644

00:38:27,360 --> 00:38:31,160

We are evolving towards a long-standing vision.

645

00:38:31,160 --> 00:38:36,120

If we do have something that's modifying space-time as we've speculated, we should be able to

646

00:38:36,120 --> 00:38:38,960

see more than one thing changing in correlation.

647

00:38:38,960 --> 00:38:43,560

Even if it's some exotic natural phenomena, we should be able to better understand it by

648

00:38:43,560 --> 00:38:48,880

putting that system in place, putting that network in place, and letting Athena do its

649

00:38:48,880 --> 00:38:49,880

job.

650

00:38:49,880 --> 00:38:50,880

Absolutely.

651

00:38:50,880 --> 00:38:51,880

And you know what?

652

00:38:51,880 --> 00:38:56,880

Frankly, I'll be curious to see no offense how much the ranch messes with your I-Tech

653

00:38:56,880 --> 00:39:02,160

equipment because we've seen a little already.

654

00:39:02,160 --> 00:39:05,880

It almost feels like if the ranch doesn't want you to collect something, you're not

655

00:39:05,880 --> 00:39:06,880

going to do it.

656

00:39:06,880 --> 00:39:07,880

I know it sounds crazy.

657

00:39:07,880 --> 00:39:10,240

It goes back to what Travis said the very first time he met with us.

658

00:39:10,240 --> 00:39:13,120

Well, it's just a place, right?

659

00:39:13,120 --> 00:39:14,120

Maybe not.

660

00:39:14,120 --> 00:39:15,120

Right there.

661

00:39:16,120 --> 00:39:17,920

Well, very good.

662

00:39:17,920 --> 00:39:23,600

We're excited and really appreciate all that you're bringing to the ranch.

663

00:39:23,600 --> 00:39:27,080

It's exciting to be part of it, so I appreciate that.

664

00:39:27,080 --> 00:39:32,400

The data that we're collecting and the things that I'm seeing on steroids from my first

665

00:39:32,400 --> 00:39:33,960

time stepping on this ranch.

666

00:39:33,960 --> 00:39:36,960

We've got a great team of good people here.

667

00:39:36,960 --> 00:39:39,160

Everything you've been doing is data-driven.

668

00:39:39,160 --> 00:39:43,480

The data will drive us to the conclusion, so keep me posted.

669

00:39:43,480 --> 00:39:47,240

I want to stay involved as much as I can.

670

00:39:47,240 --> 00:39:50,600

The answers are starting to come our way.

671

00:39:50,600 --> 00:39:55,920

We often speak of every investigation as just raising more questions.

672

00:39:55,920 --> 00:39:59,480

I actually feel like I'm starting to get some answers.

673

00:39:59,480 --> 00:40:05,600

I truly do believe that what we are really revealing here at Skinwalker Ranch is not

674

00:40:05,600 --> 00:40:11,000

just about Skinwalker Ranch, but it is about the very nature of our reality.

675

00:40:11,000 --> 00:40:14,960

This is a sobering effort, but it is truly exciting.

676

00:40:14,960 --> 00:40:20,320

Thank you all for engaging and being part of this incredible journey.

677

00:40:20,320 --> 00:40:23,520

So we'll proceed with all resource.

678

00:40:23,520 --> 00:40:26,160

All right, thanks.

679

00:40:26,160 --> 00:40:27,760

Look forward to moving ahead, gentlemen.

680

00:40:27,760 --> 00:40:28,760

Thanks, Brandon.

681

00:40:28,760 --> 00:40:30,760

Governor, thank you.

682

00:40:30,760 --> 00:40:31,760

Thank you.

683

00:40:31,760 --> 00:40:32,760

Absolutely.

684

00:40:32,760 --> 00:40:40,640

The things we captured this year are beyond phenomenal.

685

00:40:40,640 --> 00:40:48,600

I'm super excited and optimistic that Skinwalker Ranch ultimately may be the place where we

686

00:40:48,600 --> 00:40:53,120

start unlocking some of the mysteries of the world around us.

687

00:40:53,120 --> 00:40:57,200

There are big things coming for Skinwalker Ranch.

688

00:40:57,200 --> 00:40:59,320

We're just getting started.

689

00:40:59,320 --> 00:41:05,760

What we're witnessing is classically impossible, and that's dang fascinating.

690

00:41:05,760 --> 00:41:11,320

This year we have seen many things that are very hard for us to explain.

691

00:41:11,320 --> 00:41:16,480

We don't know what we've witnessed, so I find this tantalizing.

692

00:41:16,480 --> 00:41:21,280

We've heard that the ranch is an intelligent entity that is home to a secret underground

693

00:41:21,280 --> 00:41:25,320

base and that it might even be a gateway to other dimensions.

694

00:41:25,320 --> 00:41:31,400

Well, we've documented scientific evidence that supports each one of these legends.

695

00:41:31,400 --> 00:41:37,480

All I know is that in order to find the truth, we have a lot more work to do.

696

00:41:37,480 --> 00:41:43,760

Our investigation at Skinwalker Ranch attests to the reality of not only the phenomena,

697

00:41:43,760 --> 00:41:46,400

but the fact that we are onto something.

698

00:41:46,400 --> 00:41:53,880

We are dealing with powerful forces, unknown forces, and we are finally on the precipice

699

00:41:53,880 --> 00:41:57,440

of getting the very answers that we've been seeking for years.
