

1

00:00:00,000 --> 00:00:09,200

Today, the UFO phenomena is a regular fixture of mainstream media reports and has gripped

2

00:00:09,200 --> 00:00:14,920

the attention of the general public more than ever.

3

00:00:14,920 --> 00:00:20,240

In fact, it's now common knowledge that the federal government has recently funded secretive

4

00:00:20,240 --> 00:00:23,680

programs to investigate the subject.

5

00:00:23,680 --> 00:00:28,320

And whistleblowers are starting to come forward declaring that our intelligence agencies know

6

00:00:28,320 --> 00:00:31,680

much more than they are willing to reveal.

7

00:00:31,680 --> 00:00:36,520

My name is Dr. Travis Taylor and I was not only the chief scientist on the federal government's

8

00:00:36,520 --> 00:00:51,120

UAP task force from 2019 to 2022, but I'm also part of a civilian investigation at a 512

9

00:00:51,120 --> 00:00:57,240

acre property in Utah that's been a UAP hotspot for decades, if not centuries.

10

00:00:57,240 --> 00:01:02,080

There is something in the mesa right there, a place known as Skinwalker Ranch.

11

00:01:02,080 --> 00:01:07,080

And tonight, we're looking back on a number of shocking events and discoveries we made

12

00:01:07,080 --> 00:01:15,040

there just in the past year that may finally help reveal the truth behind the UAP phenomena.

13

00:01:15,040 --> 00:01:17,960

There is a ranch in northern Utah.

14

00:01:17,960 --> 00:01:26,560

It is considered the epicenter of the strangest and most disturbing phenomena on Earth.

15

00:01:26,560 --> 00:01:34,080

Stomachal mutilations, bizarre UFO sightings and unusual energies that have proven harmful

16

00:01:34,080 --> 00:01:35,080

to humans.

17

00:01:35,080 --> 00:01:41,400

For 20 years, the federal government tried to find answers and failed.

18

00:01:41,400 --> 00:01:48,920

Now, a new team of dedicated scientists, researchers and experts has taken over.

19

00:01:48,920 --> 00:01:55,560

They are determined to solve the mystery and reveal.

20

00:01:55,560 --> 00:02:03,920

The secret of Skinwalker Ranch.

21

00:02:03,920 --> 00:02:04,920

Let's proceed.

22

00:02:04,920 --> 00:02:13,120

We've got a big day ahead of us and an exciting time to kick off this phase of the investigation.

23

00:02:13,120 --> 00:02:17,480

When Brandon Fugel, the owner of Skinwalker Ranch and his principal investigator, Eric

24

00:02:17,480 --> 00:02:22,800

Bard, led the effort to reignite our team's investigation into all the bizarre phenomena

25

00:02:22,800 --> 00:02:29,160

this year, we all agreed that Ground Zero should be a location known as the Triangle.

26

00:02:29,160 --> 00:02:33,680

This spot near the middle of the ranch has been a major hotbed for what we call high

27

00:02:33,680 --> 00:02:34,680

strangeness.

28

00:02:34,680 --> 00:02:38,320

We've got lift off.

29

00:02:38,320 --> 00:02:42,640

Oh my God, during launch, the electromagnetic spectrum is going crazy, guys.

30

00:02:42,640 --> 00:02:44,600

I've never seen anything like it.

31

00:02:44,600 --> 00:02:49,320

It's here that we've not only detected GPS anomalies, as well as a mysterious radio

32

00:02:49,320 --> 00:02:54,640

signal measured at a frequency of 1.6 gigahertz from the ground level up to nearly a mile

33

00:02:54,640 --> 00:02:55,640

high.

34

00:02:55,640 --> 00:03:12,200

It's also where we've seen a number of UAPs, some of which vanished into thin air.

35

00:03:12,200 --> 00:03:16,960

So for our first experiment this year, in the hopes of identifying just what causes

36

00:03:16,960 --> 00:03:18,560

all these phenomena.

37

00:03:19,000 --> 00:03:23,640

Cameron Fugel flew me and technologist Pete Kelsey up above the triangle so that Pete

38

00:03:23,640 --> 00:03:27,720

could scan that anomalous zone with a handheld LiDAR device.

39

00:03:27,720 --> 00:03:30,080

I mean, we're at the triangle right now.

40

00:03:30,080 --> 00:03:35,160

All right, so give me about 10 seconds and we'll be scanning.

41

00:03:35,160 --> 00:03:37,920

Holy cow.

42

00:03:37,920 --> 00:03:40,720

There's something right outside the aircraft.

43

00:03:40,720 --> 00:03:41,720

You're kidding.

44

00:03:41,720 --> 00:03:42,720

Oh, I am not kidding.

45

00:03:42,720 --> 00:03:47,200

You were at 300 feet and were detecting an object in the air.

46

00:03:47,200 --> 00:03:48,200

What?

47

00:03:48,200 --> 00:03:50,400

You gotta be kidding me.

48

00:03:50,400 --> 00:03:55,840

But right as we reached an altitude of 300 feet, the infrared lasers of the LiDAR scanner

49

00:03:55,840 --> 00:04:00,200

began tracing something that was totally invisible to the naked eye.

50

00:04:00,200 --> 00:04:02,920

About 300 feet above ground level.

51

00:04:02,920 --> 00:04:05,840

You can see the green is the ground, the red is the thing.

52

00:04:05,840 --> 00:04:06,840

This is unbelievable.

53

00:04:06,840 --> 00:04:07,840

Unbelievable.

54

00:04:07,840 --> 00:04:08,840

They're climbing.

55

00:04:08,840 --> 00:04:15,280

We're gonna search the spider elling up toward that 5000 foot over the triangle.

56

00:04:15,280 --> 00:04:20,440

We were stunned when the LiDAR scanner detected something strange just 300 feet in the air.

57

00:04:20,440 --> 00:04:25,480

So we were really anxious to see what we would find up in the mile high zone.

58

00:04:25,480 --> 00:04:26,480

Holy cow.

59

00:04:26,480 --> 00:04:27,480

Look, look at that.

60

00:04:27,480 --> 00:04:28,480

You see it?

61

00:04:28,480 --> 00:04:29,480

Yes.

62

00:04:29,480 --> 00:04:38,640

We've got an anomaly, a clear anomaly right beside us.

63

00:04:38,640 --> 00:04:46,120

We've had eyes on it with three steps binoculars and we've seen nothing.

64

00:04:46,120 --> 00:04:47,120

Tell the launch.

65

00:04:47,120 --> 00:04:48,120

Go ahead and launch.

66

00:04:48,120 --> 00:04:49,800

You're good to watch.

67

00:04:49,800 --> 00:04:54,920

In order to see if we could stimulate these anomalies to appear, we launched a rocket.

68

00:04:54,920 --> 00:05:00,200

Three, two, one.

69

00:05:00,200 --> 00:05:07,200

There it goes.

70

00:05:07,200 --> 00:05:10,520

That's insane.

71

00:05:10,520 --> 00:05:11,520

What?

72

00:05:11,520 --> 00:05:12,520

Can you see the wind direction?

73

00:05:12,520 --> 00:05:13,520

Yeah.

74

00:05:13,520 --> 00:05:14,520

It seems like we're in a vortex.

75

00:05:14,520 --> 00:05:15,520

Whoa.

76

00:05:15,520 --> 00:05:16,520

Whoa.

77

00:05:16,520 --> 00:05:17,520

Hold on.

78

00:05:17,520 --> 00:05:18,520

The winds make no sense.

79

00:05:18,520 --> 00:05:19,520

There you go.

80

00:05:19,520 --> 00:05:25,520

They go from 40 knots down to seven in a different direction.

81

00:05:25,520 --> 00:05:26,520

I got you.

82

00:05:26,520 --> 00:05:27,520

I got you.

83

00:05:27,520 --> 00:05:28,520

I've never seen that before.

84

00:05:28,520 --> 00:05:32,680

We're not sure if the rocket stimulated it, but right after the launch, the helicopter

85

00:05:32,680 --> 00:05:36,000

was suddenly hit by what felt like high winds.

86

00:05:36,000 --> 00:05:40,520

Even though the helicopter's gauges showed that any natural gust would be coming from

87

00:05:40,520 --> 00:05:42,000

a totally different direction.

88

00:05:42,000 --> 00:05:44,000

I think it's time to abort.

89

00:05:44,000 --> 00:05:46,680

We're just descending back down now.

90

00:05:46,680 --> 00:05:48,920

We're going to land at the helipad.

91

00:05:48,920 --> 00:05:54,040

After what we felt up there and saw on the lidar, we wanted to get another set of data

92

00:05:54,040 --> 00:05:55,560

to confirm the findings.

93

00:05:55,560 --> 00:05:57,400

Here we go.

94

00:05:57,400 --> 00:06:02,080

So high speed camera expert Burdette Anderson joined us for a new rocket experiment at the

95

00:06:02,080 --> 00:06:07,760

triangle snapping a thousand frames per second in the hopes of giving us a glimpse of anything

96

00:06:07,760 --> 00:06:08,760

strange up there.

97

00:06:08,760 --> 00:06:09,760

Great.

98

00:06:09,760 --> 00:06:12,760

We've got the next one on the pad.

99

00:06:12,760 --> 00:06:19,080

Five, four, three, two, one.

100

00:06:19,080 --> 00:06:22,080

That is cool.

101

00:06:22,080 --> 00:06:24,320

Oh, that one was awesome.

102

00:06:24,320 --> 00:06:26,360

Well, that went up pretty high.

103

00:06:26,360 --> 00:06:29,880

Hey, we got a light that's right there that's moving.

104

00:06:29,880 --> 00:06:30,880

Yeah.

105

00:06:30,880 --> 00:06:31,880

We got it.

106

00:06:31,880 --> 00:06:32,880

There is right there.

107

00:06:32,880 --> 00:06:35,480

Now, this was moving pretty fast.

108

00:06:35,480 --> 00:06:37,120

What is that?

109

00:06:37,120 --> 00:06:38,920

That's not the plane.

110

00:06:38,920 --> 00:06:43,560

After launching two rockets up through the triangle, a UAP suddenly appeared in the sky.

111

00:06:43,560 --> 00:06:46,120

Did it look like it just sped up to y'all?

112

00:06:46,120 --> 00:06:47,880

Yes, it did.

113

00:06:47,880 --> 00:06:49,880

That's no satellite.

114

00:06:49,880 --> 00:06:53,120

Dude, it just vanished.

115

00:06:53,120 --> 00:06:55,280

But then it simply disappeared.

116

00:06:55,280 --> 00:06:56,280

Went away.

117

00:06:56,280 --> 00:06:57,280

Well, I don't see any more.

118

00:06:57,280 --> 00:07:00,120

I think we ought to get that rocket up and see if we can make it.

119

00:07:00,120 --> 00:07:01,120

Yep, I hear you.

120

00:07:01,120 --> 00:07:02,120

Replicate it.

121

00:07:02,120 --> 00:07:04,000

Thomas was right.

122

00:07:04,000 --> 00:07:08,440

If the UAP came from the triangle, we needed to launch another rocket in order to see if

123

00:07:08,440 --> 00:07:11,960

we could get another one to appear that we could hopefully identify.

124

00:07:11,960 --> 00:07:12,960

You going in?

125

00:07:12,960 --> 00:07:17,960

Five, four, three, two, one.

126

00:07:17,960 --> 00:07:22,960

Oh, we got a malfunction.

127

00:07:22,960 --> 00:07:24,120

Everybody watch out.

128

00:07:24,120 --> 00:07:29,120

At first, we all thought the rocket simply blew up at about 31 feet high.

129

00:07:29,120 --> 00:07:30,120

Oh.

130

00:07:30,120 --> 00:07:32,120

Hey, Travis.

131

00:07:32,120 --> 00:07:33,120

Yeah.

132

00:07:33,120 --> 00:07:35,120

We caught the malfunction on the high speed.

133

00:07:35,120 --> 00:07:36,120

Oh, really?

134

00:07:36,120 --> 00:07:37,120

Yeah.

135

00:07:37,120 --> 00:07:40,680

Hey, check this out.

136

00:07:40,680 --> 00:07:46,120

There's something on the camera.

137

00:07:46,120 --> 00:07:47,720

Something I've never seen before.

138

00:07:47,720 --> 00:07:48,720

Check this out.

139

00:07:48,720 --> 00:07:49,720

So as it's going, look what you've got.

140

00:07:49,720 --> 00:07:54,680

There's something in the sky above the rocket, right here.

141

00:07:54,680 --> 00:07:56,400

It was unbelievable.

142

00:07:56,400 --> 00:08:01,880

Just where the rocket exploded, the high speed camera captured an image of a blob-like feature.

143

00:08:01,880 --> 00:08:06,880

After all our experiments there, we may have finally gotten an image of what causes some

144

00:08:06,880 --> 00:08:09,600

of the phenomena above the triangle.

145

00:08:09,600 --> 00:08:12,400

We may be looking at the anomaly for the first time, guys.

146

00:08:12,400 --> 00:08:13,400

That's crazy.

147

00:08:13,400 --> 00:08:14,400

My gosh.

148

00:08:14,400 --> 00:08:15,400

Ha-ha.

149

00:08:15,400 --> 00:08:16,400

Helicopter, helicopter.

150

00:08:16,400 --> 00:08:19,400

Eric, we got a helicopter right over the ranch.

151

00:08:19,400 --> 00:08:21,400

Right over the ranch.

152

00:08:21,400 --> 00:08:25,400

I am getting no helicopter above the ranch on the ADSV receiver here.

153

00:08:25,400 --> 00:08:28,400

We have a helicopter right over the triangle.

154

00:08:28,400 --> 00:08:30,400

Hey, it just went dark.

155

00:08:30,400 --> 00:08:32,400

And it just vanished.

156

00:08:32,400 --> 00:08:33,400

But we're still here.

157

00:08:33,400 --> 00:08:37,400

We've wondered before if our investigations were being surveilled by someone.

158

00:08:37,400 --> 00:08:42,400

But when a Black Hawk military helicopter that was not transponderable, it was just

159

00:08:42,400 --> 00:08:43,400

a helicopter.

160

00:08:43,400 --> 00:08:45,400

It was a helicopter.

161

00:08:45,400 --> 00:08:48,400

The investigations were being surveilled by someone.

162

00:08:48,400 --> 00:08:53,400

But when a Black Hawk military helicopter that was not transponding a signal suddenly

163

00:08:53,400 --> 00:08:58,400

flew over the ranch right after the blob appeared just 31 feet above the triangle, we were

164

00:08:58,400 --> 00:08:59,400

pretty certain.

165

00:08:59,400 --> 00:09:01,400

There's not a military base nearby.

166

00:09:01,400 --> 00:09:03,400

I mean, right nearby that has helicopters.

167

00:09:03,400 --> 00:09:04,400

We're talking minutes.

168

00:09:04,400 --> 00:09:05,400

Yeah.

169

00:09:05,400 --> 00:09:06,400

Who alerted him that fast?

170

00:09:06,400 --> 00:09:07,400

And where was that helicopter?

171

00:09:07,400 --> 00:09:08,400

Where did it come from?

172

00:09:08,400 --> 00:09:10,400

How did it get here so quick?

173

00:09:10,400 --> 00:09:14,400

It's well known that the federal government funded investigations of Skinwalker Ranch from

174

00:09:14,400 --> 00:09:16,400

the mid-90s to the early 2000s.

175

00:09:16,400 --> 00:09:20,400

Well, this just made us wonder if it's happening again.

176

00:09:20,400 --> 00:09:23,400

And do they know something about the triangle that we don't?

177

00:09:23,400 --> 00:09:27,400

It just made us more curious to keep poking that hotspot for answers.

178

00:09:27,400 --> 00:09:33,400

But the next experiment we conducted there pointed us in a whole new direction.

179

00:09:33,400 --> 00:09:37,400

There is literally something.

180

00:09:37,400 --> 00:09:40,400

We may be looking at the anomaly for the first time, guys.

181

00:09:40,400 --> 00:09:46,400

Earlier this year, after we documented images of the blob-like anomaly just 31 feet above

182

00:09:46,400 --> 00:09:52,400

the triangle, we were eager to see even more high-tech experiment to find out just what

183

00:09:52,400 --> 00:09:53,400

it could be.

184

00:09:53,400 --> 00:09:55,400

I hope you brought some good stuff for us to use.

185

00:09:55,400 --> 00:09:56,400

I sure did.

186

00:09:56,400 --> 00:10:00,400

I brought a triple-spectrum light-wave transmitter.

187

00:10:00,400 --> 00:10:02,400

Oh, yeah.

188

00:10:02,400 --> 00:10:07,400

To help us, UAP investigator David Mason brought out a device called a triple-spectrum

189

00:10:07,400 --> 00:10:08,400

light-wave transmitter.

190

00:10:08,400 --> 00:10:13,400

It projects infrared and ultraviolet lasers, which are invisible to the naked eye.

191

00:10:13,400 --> 00:10:15,400

All right, that'll work.

192

00:10:15,400 --> 00:10:18,400

And it also projects a laser that is visible.

193

00:10:18,400 --> 00:10:25,400

The plan was to use that to broadcast the 1.6-gigahertz signal that we previously recorded on the

194

00:10:25,400 --> 00:10:30,400

ranch through all three lasers while they were aimed straight at the triangle.

195

00:10:30,400 --> 00:10:35,400

We hoped it would be an effective stimulant to get the blob-like anomaly to reappear.

196

00:10:35,400 --> 00:10:37,400

Do some rocket surgery.

197

00:10:37,400 --> 00:10:43,400

Meanwhile, Caleb Bench and I got set up to launch rockets as well as mortars, which are

198

00:10:43,400 --> 00:10:47,400

like high-powered fireworks, right up through the triangle to see if that would also help

199

00:10:47,400 --> 00:10:51,400

stir up phenomena and finally give us some answers.

200

00:10:51,400 --> 00:10:54,400

This is the first time that David Mason has been on the property.

201

00:10:54,400 --> 00:10:58,400

And as far as I know, this is the first time that any equipment of the kind that he has

202

00:10:58,400 --> 00:11:01,400

brought out has ever been used on the property.

203

00:11:01,400 --> 00:11:03,400

And I'm really anxious to see what's going to happen.

204

00:11:03,400 --> 00:11:05,400

Okay, these are working.

205

00:11:05,400 --> 00:11:08,400

Just making sure that we're getting a signal.

206

00:11:08,400 --> 00:11:11,400

So everything looks quiet right now.

207

00:11:11,400 --> 00:11:14,400

All right, we're going to launch this rocket.

208

00:11:14,400 --> 00:11:15,400

Copy that.

209

00:11:15,400 --> 00:11:17,400

We'll get ready with David's instruments.

210

00:11:17,400 --> 00:11:24,400

Five, four, three, two, one.

211

00:11:24,400 --> 00:11:27,400

There we go.

212

00:11:28,400 --> 00:11:32,400

Whoa, what was that purple light over there?

213

00:11:32,400 --> 00:11:34,400

Did anybody else see a purple light over there?

214

00:11:34,400 --> 00:11:39,400

The rocket launched up through the triangle as planned, but we were all baffled when

215

00:11:39,400 --> 00:11:44,400

Thomas saw a flashing purple light hundreds of yards away in the south field.

216

00:11:44,400 --> 00:11:49,400

Dave, I'm going to head down and try to come around the back side.

217

00:11:49,400 --> 00:11:57,400

We need to know whether we've got people down there or if this is an actual reaction to that rocket.

218

00:11:57,400 --> 00:11:59,400

I'm taking the UTV.

219

00:11:59,400 --> 00:12:04,400

I'm going to roll down through the dark forest and try to come up from the other direction.

220

00:12:04,400 --> 00:12:10,400

I see that purple flash again, and I'm wondering if we've got trespassers down there or something else.

221

00:12:10,400 --> 00:12:13,400

Is this a response to our experiments?

222

00:12:13,400 --> 00:12:15,400

Thomas, where are you?

223

00:12:15,400 --> 00:12:18,400

So we have just rendezvoused with Tom and Candice here.

224

00:12:18,400 --> 00:12:22,400

Neither one of us has seen anything in an account for that purple light.

225

00:12:22,400 --> 00:12:25,400

Once he got there, the purple light had disappeared.

226

00:12:25,400 --> 00:12:30,400

Hey, Thomas, Eric, with our night vision, there's something right over Tom and Candice down there

227

00:12:30,400 --> 00:12:34,400

in the sky blinking at about 10 degrees up.

228

00:12:34,400 --> 00:12:42,400

But then Caleb and I saw another UAP higher in the sky above Thomas that seemed to be tracking his movement.

229

00:12:42,400 --> 00:12:45,400

It is clearly something there.

230

00:12:49,400 --> 00:12:52,400

Let's see what we can do with this tree right here.

231

00:12:52,400 --> 00:12:57,400

After our experience with this mysterious purple light in the southeast region of the property,

232

00:12:57,400 --> 00:13:02,400

we've decided that we need to increase our surveillance efforts down there.

233

00:13:02,400 --> 00:13:06,400

I've instructed our team to install additional cameras.

234

00:13:06,400 --> 00:13:08,400

Whoa, what is that in front of us?

235

00:13:15,400 --> 00:13:18,400

What kind of animal is that?

236

00:13:18,400 --> 00:13:20,400

Looks like a deer.

237

00:13:20,400 --> 00:13:25,400

Our team would end up finding the remains of two dead deer in the south field.

238

00:13:25,400 --> 00:13:30,400

And when a local veterinarian examined them, she believed they had been killed by a large predator,

239

00:13:30,400 --> 00:13:34,400

but nothing like a coyote, which are known to inhabit the area.

240

00:13:34,400 --> 00:13:36,400

Huh, look at this.

241

00:13:36,400 --> 00:13:40,400

Got a burn mark.

242

00:13:40,400 --> 00:13:46,400

And it was even stranger when Thomas noticed a fence post with a mysterious circular burn,

243

00:13:46,400 --> 00:13:49,400

as if something had blown right through it.

244

00:13:49,400 --> 00:13:52,400

There's nothing burned around here.

245

00:13:52,400 --> 00:13:54,400

What the heck would have burned this post?

246

00:13:54,400 --> 00:13:56,400

Pretty fresh looking.

247

00:13:58,400 --> 00:14:03,400

I just wanted to stop right here, Don, to really give you an idea of where we're at.

248

00:14:03,400 --> 00:14:08,400

To help us figure out what could have burned and damaged the post in such a strange way,

249

00:14:08,400 --> 00:14:16,400

Don Mitchell, a local UNT to Basin fire management officer and member of the eastern Shoshone Nation came to check it out.

250

00:14:16,400 --> 00:14:18,400

Our initial thought is lightning.

251

00:14:18,400 --> 00:14:25,400

But I'd assume if we had a lightning strike here, we'd see definitely more damage on the ground.

252

00:14:25,400 --> 00:14:27,400

We would definitely see debris.

253

00:14:27,400 --> 00:14:38,400

As you can see in the smoldering phase of this, that there's no blackening that comes up around the post in any direction.

254

00:14:38,400 --> 00:14:46,400

So if I'm understanding correctly based off of what you're saying, it seems as though it was something extremely hot that scorched it,

255

00:14:46,400 --> 00:14:48,400

it never really incinerated.

256

00:14:48,400 --> 00:14:49,400

Correct.

257

00:14:49,400 --> 00:14:57,400

But I can tell you this is not arson, this is not chemical, and this in my opinion is not lightning.

258

00:14:57,400 --> 00:15:00,400

So what is it then?

259

00:15:00,400 --> 00:15:07,400

I'll only touch on it just briefly, because this is definitely strange.

260

00:15:07,400 --> 00:15:14,400

Speaking culturally, it would go back to what the ranch is named after.

261

00:15:14,400 --> 00:15:15,400

Okay.

262

00:15:15,400 --> 00:15:20,400

I'm sorry, I don't feel comfortable speaking on that portion.

263

00:15:20,400 --> 00:15:22,400

I don't want to breach anything that is...

264

00:15:22,400 --> 00:15:24,400

But we will continue on.

265

00:15:24,400 --> 00:15:32,400

Most indigenous tribal members won't even come on the ranch due to their beliefs that it's cursed and possibly home to otherworldly phenomena.

266

00:15:32,400 --> 00:15:39,400

So we respected Don's reluctance to offer any more speculation about what burned the post or killed the deer.

267

00:15:42,400 --> 00:15:43,400

Hey, Brent.

268

00:15:43,400 --> 00:15:46,400

I got those cards from those cameras.

269

00:15:46,400 --> 00:15:47,400

Okay, cool.

270

00:15:47,400 --> 00:15:48,400

Let's check it out.

271

00:15:48,400 --> 00:15:56,400

But then one day later, Caleb and Dragon were stunned by what they saw in some footage that was recorded by the new cameras.

272

00:15:56,400 --> 00:15:59,400

I'm surprised we haven't seen any game of any kind yet.

273

00:15:59,400 --> 00:16:02,400

That's why I'm wondering what's setting off the cameras.

274

00:16:02,400 --> 00:16:03,400

Right.

275

00:16:07,400 --> 00:16:08,400

Whoa, whoa.

276

00:16:08,400 --> 00:16:09,400

You see that?

277

00:16:09,400 --> 00:16:11,400

Yeah, back that up what?

278

00:16:11,400 --> 00:16:12,400

What was that?

279

00:16:12,400 --> 00:16:15,400

I'm just running through it frame by frame.

280

00:16:20,400 --> 00:16:21,400

What?

281

00:16:22,400 --> 00:16:25,400

Like a silver orb or something.

282

00:16:27,400 --> 00:16:33,400

At first glance, it appeared to be a silver orb type shaped object off in the distance.

283

00:16:33,400 --> 00:16:37,400

I don't know whether it's exotic or not, but it's still a concern.

284

00:16:38,400 --> 00:16:41,400

We just found something that we thought you guys might want to look at.

285

00:16:41,400 --> 00:16:42,400

Really?

286

00:16:42,400 --> 00:16:43,400

Yeah.

287

00:16:43,400 --> 00:16:44,400

Okay.

288

00:16:44,400 --> 00:16:45,400

All right, here we go.

289

00:16:46,400 --> 00:16:48,400

Whoa, whoa, whoa, whoa, whoa, whoa.

290

00:16:48,400 --> 00:16:49,400

Right there.

291

00:16:49,400 --> 00:16:50,400

Oh, wow.

292

00:16:50,400 --> 00:16:52,400

Holy cow.

293

00:16:52,400 --> 00:16:59,400

Well, the fact that the shape of the dark spot is different than it seems to have expanded relative to the rest of it.

294

00:16:59,400 --> 00:17:04,400

It's kind of consistent with reflections because it's in a different place.

295

00:17:04,400 --> 00:17:08,400

Which suggests that it's metallic or at least reflective of some sort.

296

00:17:08,400 --> 00:17:10,400

It does suggest that.

297

00:17:11,400 --> 00:17:14,400

This silver orb left us baffled by what it could be.

298

00:17:14,400 --> 00:17:16,400

What was this thing?

299

00:17:16,400 --> 00:17:22,400

Could it have been connected to the dead deer, the burnt post, or the UAPs we saw in the south field?

300

00:17:22,400 --> 00:17:23,400

And where did it come from?

301

00:17:23,400 --> 00:17:29,400

Well, what we would soon discover at another location on the ranch just might answer those questions.

302

00:17:29,400 --> 00:17:32,400

Middle of the day, an orb like that is showing up.

303

00:17:33,400 --> 00:17:34,400

That's crazy.

304

00:17:37,400 --> 00:17:39,400

First, go into the east field, okay?

305

00:17:39,400 --> 00:17:40,400

All right.

306

00:17:40,400 --> 00:17:41,400

Now we're tracking.

307

00:17:41,400 --> 00:17:45,400

Hopefully, we'll be able to capture something interesting.

308

00:17:45,400 --> 00:17:49,400

Yeah, every time Pete's been out here, something interesting has happened.

309

00:17:49,400 --> 00:17:50,400

Oh, this'll be good.

310

00:17:50,400 --> 00:17:52,400

I've been in Crease altitude.

311

00:17:53,400 --> 00:18:01,400

During our first helicopter experiment this year, where we detected strange lidar anomalies at 300 feet and nearly a mile above the triangle,

312

00:18:01,400 --> 00:18:05,400

we also had Pete Kelsey scan the east field of Skinwalker.

313

00:18:05,400 --> 00:18:18,400

It was here where a photogrammetry experiment that Pete helped us conduct in 2021 captured 3D images of a mysterious column shaped anomaly

314

00:18:18,400 --> 00:18:22,400

that, believe it or not, was also 300 feet tall.

315

00:18:22,400 --> 00:18:29,400

And it's near a mega-length spiral shaped boulder formation up on the Mesa that was created hundreds of years ago

316

00:18:29,400 --> 00:18:37,400

by Indigenous tribal members for the reported purpose of representing an interdimensional portal on Skinwalker Ranch.

317

00:18:38,400 --> 00:18:40,400

All right, the east field.

318

00:18:40,400 --> 00:18:42,400

We should be about over and right in here.

319

00:18:42,400 --> 00:18:43,400

Okay.

320

00:18:43,400 --> 00:18:45,400

All right, I'm going to start scanning.

321

00:18:45,400 --> 00:18:46,400

All right.

322

00:18:53,400 --> 00:18:56,400

We're getting buffeted from the wind a little bit.

323

00:18:57,400 --> 00:19:00,400

But there's no freaking wind.

324

00:19:02,400 --> 00:19:04,400

Whoa, whoa, whoa!

325

00:19:04,400 --> 00:19:06,400

We're getting our asses kicked.

326

00:19:06,400 --> 00:19:07,400

It was crazy.

327

00:19:07,400 --> 00:19:11,400

It looks like it's being pushed around from the ground right now.

328

00:19:11,400 --> 00:19:20,400

At an altitude of 300 feet, right where we detected the column shaped anomaly last year, something invisible started pushing the helicopter around.

329

00:19:20,400 --> 00:19:23,400

Well, the weird thing is it says there's no wind down there.

330

00:19:23,400 --> 00:19:24,400

Yeah.

331

00:19:24,400 --> 00:19:25,400

Feel that.

332

00:19:25,400 --> 00:19:26,400

That says crazy.

333

00:19:29,400 --> 00:19:31,400

Oh, wow, we're getting something.

334

00:19:31,400 --> 00:19:32,400

What?

335

00:19:32,400 --> 00:19:36,400

We are getting an anomaly in the air right now, right there.

336

00:19:36,400 --> 00:19:37,400

You're kidding?

337

00:19:37,400 --> 00:19:39,400

No, I am not kidding.

338

00:19:40,400 --> 00:19:45,400

Just like at the Triangle, the LIDAR detected something in the air 300 feet high.

339

00:19:45,400 --> 00:19:53,400

And what's really incredible is that it lined up perfectly with the top of the column shaped anomaly we documented one year ago.

340

00:19:53,400 --> 00:19:55,400

So what in the heck was it?

341

00:19:55,400 --> 00:20:00,400

And could it possibly have been related to the spiral boulders on the nearby Mesa?

342

00:20:01,400 --> 00:20:05,400

Now at this point, we feel it's important to acknowledge something.

343

00:20:05,400 --> 00:20:15,400

Like with any scientific investigation, sometimes the initial observation of collected data in the field seems a lot more exciting than it proves to be after further analysis.

344

00:20:15,400 --> 00:20:17,400

Watch this.

345

00:20:18,400 --> 00:20:23,400

There's something screaming across there right after the rocket.

346

00:20:23,400 --> 00:20:33,400

During a high speed camera experiment this year in the East field, we captured images of what we first believed was a very fast moving, unidentified aerial phenomena.

347

00:20:33,400 --> 00:20:34,400

Look at this thing.

348

00:20:34,400 --> 00:20:38,400

That field of view across there is across the whole Mesa, so that's about a half a mile.

349

00:20:38,400 --> 00:20:40,400

And it's at 2,000 frames a second.

350

00:20:40,400 --> 00:20:42,400

So he just went a half a mile in...

351

00:20:42,400 --> 00:20:44,400

1.12 seconds, I believe.

352

00:20:44,400 --> 00:20:50,400

So it literally went from about halfway here in the Mesa to above these trees over here in a second.

353

00:20:50,400 --> 00:20:55,400

However, when the camera stopped rolling on Skimwalker Ranch, the research continues.

354

00:20:55,400 --> 00:21:04,400

And after further study of the images that the high speed camera captured, we've determined that it was simply a winged creature of some kind, most likely a bird.

355

00:21:04,400 --> 00:21:08,400

We don't believe it was an insect because it would have been too close to the lens.

356

00:21:09,400 --> 00:21:14,400

This just reinforces the principle that all the data requires careful follow-up analysis.

357

00:21:14,400 --> 00:21:21,400

Using the scientific method, we will always continue researching the data and then reporting our conclusions.

358

00:21:21,400 --> 00:21:30,400

Because the truth is that in most cases, we still have been unable to explain a lot of what we've seen and encountered here on Skimwalker Ranch.

359

00:21:30,400 --> 00:21:34,400

Just like during another experiment that was conducted right in the East field.

360

00:21:34,400 --> 00:21:36,400

Thanks so much for coming in.

361

00:21:36,400 --> 00:21:39,400

I'm anxious for you to share with us a little bit about Blazing Bear.

362

00:21:39,400 --> 00:21:41,400

Yeah, thanks for having us.

363

00:21:41,400 --> 00:21:47,400

So like these guys are all Command Chiefs in Kiowa's and Cheyenne's, Shawnee's, Navajos.

364

00:21:47,400 --> 00:21:49,400

We all represent different tribes.

365

00:21:49,400 --> 00:21:51,400

These guys are very traditional.

366

00:21:51,400 --> 00:21:55,400

They have old songs that have been sung for hundreds of years.

367

00:21:55,400 --> 00:21:59,400

So we want to see what's going to happen.

368

00:21:59,400 --> 00:22:01,400

So let's get moving.

369

00:22:02,400 --> 00:22:10,400

Jim Morse and Navajo Ranger John Dover brought an indigenous drum circle group named Blazing Bear out to the ranch.

370

00:22:10,400 --> 00:22:23,400

According to John, the indigenous cultures in the area believe very strongly that certain sound frequencies can actually open portals or wormholes to other dimensions or places in the universe.

371

00:22:23,400 --> 00:22:28,400

And they even claim to have witnessed UFOs fly into and out of Rocky Maces.

372

00:22:32,400 --> 00:22:44,400

Our plan was to have David Mason film Blazing Bear with his thermal cameras as they performed a sacred ritual in front of the mesa below the spiral of boulders.

373

00:22:44,400 --> 00:22:50,400

We wanted to see if we could capture anything strange that we might not be able to naturally observe.

374

00:22:56,400 --> 00:22:59,400

Well, when they started singing, the temperature literally changed.

375

00:22:59,400 --> 00:23:05,400

Look at the top of the mesa. Eric, the stone circle is where it's heating up on top of the mesa.

376

00:23:05,400 --> 00:23:06,400

Are you kidding me?

377

00:23:06,400 --> 00:23:09,400

You should see this. This is fascinating.

378

00:23:09,400 --> 00:23:11,400

Right there. That's where the stone circle is.

379

00:23:11,400 --> 00:23:14,400

And it's heating up. Look how hot it's getting.

380

00:23:16,400 --> 00:23:26,400

Of all the experiments we've conducted over the past four years, Blazing Bear seemed to have conjured some of the most perplexing phenomena we've ever seen on Skinwalker Ranch.

381

00:23:26,400 --> 00:23:32,400

There was a distinct heat anomaly that appeared right over the spiral of boulders on top of the mesa.

382

00:23:40,400 --> 00:23:42,400

Now look at it. It's cooling off.

383

00:23:42,400 --> 00:23:43,400

Yeah. Yeah.

384

00:23:43,400 --> 00:23:46,400

And it only appeared during their song ritual.

385

00:23:49,400 --> 00:23:53,400

Now we're about to see another event that I found interesting.

386

00:23:53,400 --> 00:24:01,400

The following day, Eric surprised us even more with the incredible data he found while scouring through all the thermal footage.

387

00:24:01,400 --> 00:24:03,400

Now look at what's happening here.

388

00:24:03,400 --> 00:24:07,400

So we've got the ridge line fairly well defined.

389

00:24:07,400 --> 00:24:09,400

And now look at this.

390

00:24:09,400 --> 00:24:12,400

There it is. Go back. Go back. Go back.

391

00:24:13,400 --> 00:24:15,400

What is that?

392

00:24:17,400 --> 00:24:19,400

That's crazy.

393

00:24:19,400 --> 00:24:30,400

In addition to the hotspot that appeared during the song ritual, the thermal camera captured two bright UAPs flying directly into the mesa right near the spiral of boulders.

394

00:24:30,400 --> 00:24:32,400

It doesn't go in front of the mesa.

395

00:24:32,400 --> 00:24:38,400

You can clearly see the line of the mesa and it's like there's something going behind it there.

396

00:24:39,400 --> 00:24:49,400

Could we have really documented something that offers evidence to support the ancient indigenous traditions about portals and UAPs flying in and out of masas?

397

00:24:50,400 --> 00:24:59,400

Well, what we later discovered this year while investigating a different area of the mesa might have revealed something that no one could have ever expected.

398

00:25:03,400 --> 00:25:05,400

You guys cleared out of spot.

399

00:25:05,400 --> 00:25:06,400

Yeah.

400

00:25:08,400 --> 00:25:09,400

We made it out, huh?

401

00:25:09,400 --> 00:25:10,400

Yeah, we made it.

402

00:25:11,400 --> 00:25:20,400

One of the most perplexing locations on Skinwalker Ranch is a particular region of the rocky mesa that borders the north side of the property.

403

00:25:20,400 --> 00:25:31,400

In fact, there are even crazy rumors from past investigators who worked with the federal government about a secret base or even some kind of ET spacecraft being buried inside there.

404

00:25:31,400 --> 00:25:38,400

Eric's also captured surveillance footage of this area being totally illuminated during the middle of the night.

405

00:25:38,400 --> 00:25:54,400

It sounds unbelievable, but in 2021 we drilled into it, boy, that thing sounds like it's hitting something and scraped along the bottom of a four-point dome shaped anomaly that the bit couldn't penetrate.

406

00:25:54,400 --> 00:25:56,400

What is that?

407

00:25:58,400 --> 00:26:00,400

What do you think it was when you first saw it?

408

00:26:00,400 --> 00:26:02,400

I wondered if it was like metal flakes or something.

409

00:26:02,400 --> 00:26:05,400

That's exactly the same impression I got.

410

00:26:05,400 --> 00:26:20,400

However, we did extract metallic fragments that when scientifically analyzed proved to be composed of the same kinds of materials that NASA uses to protect the surface of the space shuttle during reentry into the atmosphere.

411

00:26:20,400 --> 00:26:22,400

Let's get drilling.

412

00:26:22,400 --> 00:26:23,400

All right.

413

00:26:23,400 --> 00:26:27,400

So this year, after removing some boulders from the base of the mesa...

414

00:26:28,400 --> 00:26:30,400

Going out.

415

00:26:30,400 --> 00:26:38,400

The team from straight shot drillers came back out, but this time we had them aim for the top of the believed dome shaped object.

416

00:26:38,400 --> 00:26:42,400

Meanwhile, Dragon and Caleb Bench hiked up the mesa.

417

00:26:42,400 --> 00:26:43,400

Okay.

418

00:26:43,400 --> 00:26:45,400

Hey, let me try it. We got it here.

419

00:26:45,400 --> 00:26:47,400

Let's suck her up again.

420

00:26:47,400 --> 00:26:53,400

And fed a snake camera down through the boulders to look for any of the other anomalies that could be in there.

421

00:26:53,400 --> 00:26:57,400

Whoa. Look at that pink stuff.

422

00:26:57,400 --> 00:27:00,400

What in the hell is that?

423

00:27:00,400 --> 00:27:02,400

You see that right there?

424

00:27:02,400 --> 00:27:04,400

Oh, yeah, right there.

425

00:27:04,400 --> 00:27:07,400

That doesn't look natural or like it should be. Look at that.

426

00:27:07,400 --> 00:27:14,400

We weren't sure what to make of the pink substance, so we had the video sent to the University of Utah for expert analysis.

427

00:27:14,400 --> 00:27:16,400

So he's hitting resistance right now.

428

00:27:16,400 --> 00:27:18,400

You can hear that. Drills hit something hard.

429

00:27:18,400 --> 00:27:19,400

Oh, yeah.

430

00:27:19,400 --> 00:27:21,400

What's going on, Thomas?

431

00:27:21,400 --> 00:27:29,400

After drilling more than 270 or 280 feet of going through sandstone like butter, the drill is encountered a hard object that it cannot penetrate.

432

00:27:29,400 --> 00:27:35,400

Wow. Just like last year, the drill couldn't penetrate the top of the dome shaped object either.

433

00:27:35,400 --> 00:27:39,400

Seein' we're at 8,000 pounds of sandstone.

434

00:27:39,400 --> 00:27:46,400

Aaron Blunt finally had to call it quits and retracted his drill bit. We all expected it to be severely damaged.

435

00:27:46,400 --> 00:27:48,400

Gettin' this cleaned off?

436

00:27:48,400 --> 00:27:50,400

I can't see anything.

437

00:27:50,400 --> 00:27:52,400

I don't see anything.

438

00:27:52,400 --> 00:27:54,400

I can't see anything.

439

00:27:54,400 --> 00:27:57,400

I'm not sure what to do with this.

440

00:27:57,400 --> 00:27:59,400

I'm not sure what to do with this.

441

00:27:59,400 --> 00:28:01,400

I don't see anything.

442

00:28:01,400 --> 00:28:03,400

I don't see anything.

443

00:28:03,400 --> 00:28:05,400

I'm not sure what to do with this.

444

00:28:05,400 --> 00:28:07,400

I've never seen anything like this before.

445

00:28:07,400 --> 00:28:13,400

It's all cleaned off. These teeth are all perfectly intact.

446

00:28:13,400 --> 00:28:16,400

It's not missing a single tooth.

447

00:28:16,400 --> 00:28:20,400

I mean, it looks like it's in perfect condition.

448

00:28:20,400 --> 00:28:23,400

What in the heck could be covering the surface of this anomaly?

449

00:28:23,400 --> 00:28:27,400

It was like some kind of force field out of a science fiction movie.

450

00:28:27,400 --> 00:28:30,400

You know, this is what you guys imaged.

451

00:28:30,400 --> 00:28:33,400

So that's the pink rock inside the mason.

452

00:28:33,400 --> 00:28:38,400

The geology geophysics guys are giving us their best guess based upon these images.

453

00:28:38,400 --> 00:28:40,400

They have a couple of opinions on this.

454

00:28:40,400 --> 00:28:45,400

When we got the report back from the University of Utah about the pink substance in the mason,

455

00:28:45,400 --> 00:28:49,400

it was speculated that it could contain zinc selenite.

456

00:28:49,400 --> 00:28:55,400

That's a compound that the Defense Advanced Research Projects Agency, or DARPA,

457

00:28:55,400 --> 00:29:00,400

is currently experimenting with for possible cloaking applications on a number of assets

458

00:29:00,400 --> 00:29:07,400

for the United States Department of Defense, including soldiers, gear, tanks, and even fighter jets.

459

00:29:07,400 --> 00:29:11,400

What could that mean about what's buried inside the mason?

460

00:29:11,400 --> 00:29:14,400

Well, Jeremiah, it's been a long time in the making.

461

00:29:14,400 --> 00:29:17,400

Yeah, great to finally be here in person.

462

00:29:17,400 --> 00:29:19,400

Okay, I think we're good.

463

00:29:19,400 --> 00:29:20,400

We're going to go for launch.

464

00:29:20,400 --> 00:29:24,400

In order to get to the bottom of the mason and the triangle,

465

00:29:24,400 --> 00:29:31,400

we've invited tech expert Jeremiah Pate and his team from Lunason to perform an aerial balloon radar scan

466

00:29:31,400 --> 00:29:38,400

that would not only look all through the anomalous zone of the triangle, but image the inside of the mason.

467

00:29:38,400 --> 00:29:43,400

Greetings, Jeremiah. Thank you for joining.

468

00:29:43,400 --> 00:29:46,400

Yeah, thank you, Brandon. Hello, everyone.

469

00:29:46,400 --> 00:29:50,400

It took Jeremiah several weeks to process the data from the mason,

470

00:29:50,400 --> 00:29:54,400

and I didn't wait to hear what he and his team had to reveal.

471

00:29:54,400 --> 00:29:59,400

You've got a room full of people who are on the edge of their seats waiting to see what you've discovered.

472

00:29:59,400 --> 00:30:06,400

Absolutely. So here's a 2D rendering that seems wrong above what we saw underground.

473

00:30:06,400 --> 00:30:09,400

It definitely seems like a tonal type of structure.

474

00:30:09,400 --> 00:30:13,400

It's actually stretching into the mason itself.

475

00:30:13,400 --> 00:30:14,400

Wow.

476

00:30:14,400 --> 00:30:17,400

We really got our attention.

477

00:30:17,400 --> 00:30:18,400

Yeah.

478

00:30:18,400 --> 00:30:21,400

It's very, very interesting.

479

00:30:21,400 --> 00:30:27,400

So these structures right here, some of these are in the order of 60 feet wide.

480

00:30:27,400 --> 00:30:29,400

Make this room.

481

00:30:29,400 --> 00:30:31,400

Jeremiah, what do you conclude from this?

482

00:30:31,400 --> 00:30:37,400

If you were to speculate based on your expertise, what are we looking at here?

483

00:30:37,400 --> 00:30:43,400

The conclusion this has all led me to is some sort of tunnel with a high metallic content.

484

00:30:43,400 --> 00:30:50,400

So we've encountered what we believe is a 400 foot long dome-shaped metallic object inside the mason

485

00:30:50,400 --> 00:30:57,400

that might be related to spacecraft materials, and now we've detected possible massive metallic tunnels.

486

00:30:57,400 --> 00:31:01,400

Could the crazy legends about Skinwalker Ranch really be true?

487

00:31:01,400 --> 00:31:07,400

Well, when we conducted more complex experiments at the Triangle, we were blown away by the possible answer.

488

00:31:07,400 --> 00:31:10,400

Oh my gosh. What have we stumbled on?

489

00:31:10,400 --> 00:31:11,400

Yeah.

490

00:31:14,400 --> 00:31:16,400

All right, we're green.

491

00:31:16,400 --> 00:31:18,400

Yeah, we'll just be ready to go.

492

00:31:18,400 --> 00:31:23,400

In order to help us get to the bottom of all the phenomena that keeps happening at the Triangle,

493

00:31:23,400 --> 00:31:31,400

we invited Jim Royston and his amazing colleagues from a company called OmniTag to help us conduct a new high-tech experiment.

494

00:31:31,400 --> 00:31:33,400

Space station, start tracking.

495

00:31:33,400 --> 00:31:35,400

All right.

496

00:31:38,400 --> 00:31:40,400

Oh, there it is.

497

00:31:40,400 --> 00:31:41,400

Tracking the space station now.

498

00:31:41,400 --> 00:31:42,400

It's got it locked on?

499

00:31:42,400 --> 00:31:43,400

Yep.

500

00:31:44,400 --> 00:31:50,400

Our plan was to use high-powered antennas to lock onto a radio signal from the International Space Station

501

00:31:50,400 --> 00:31:56,400

and track it through the anomalous zone as the space station passed over the ranch.

502

00:31:56,400 --> 00:32:05,400

Meanwhile, Jim would be flying a cutting-edge drone-based LiDAR device to scan through the anomalous zone above the Triangle with infrared lasers.

503

00:32:05,400 --> 00:32:13,400

So if anything broke our connection with the space station's signal, we hope that the LiDAR would be able to see it and confirm what it was.

504

00:32:21,400 --> 00:32:23,400

We just lost the space station.

505

00:32:23,400 --> 00:32:26,400

Uh, are you getting it?

506

00:32:26,400 --> 00:32:27,400

No, it's not showing up right now.

507

00:32:27,400 --> 00:32:32,400

But just after we made the connection to the space station, something strange cut it off.

508

00:32:32,400 --> 00:32:33,400

That's odd, isn't it?

509

00:32:33,400 --> 00:32:35,400

Travis, we got something strange.

510

00:32:35,400 --> 00:32:37,400

You have something? What frequency?

511

00:32:37,400 --> 00:32:42,400

So, well, it's at 1.6510.

512

00:32:42,400 --> 00:32:48,400

And then we detected the 1.6 gigahertz signal.

513

00:32:48,400 --> 00:32:50,400

It's like a beacon.

514

00:32:50,400 --> 00:32:56,400

If there is something going on right there now because we're having this problem, I want to launch a rocket through it.

515

00:32:56,400 --> 00:32:57,400

Let's do it.

516

00:32:57,400 --> 00:32:58,400

You hot over there?

517

00:32:58,400 --> 00:33:00,400

Yep, we're hot there.

518

00:33:00,400 --> 00:33:02,400

Everybody in position for rocket launches?

519

00:33:02,400 --> 00:33:03,400

Okay.

520

00:33:07,400 --> 00:33:09,400

Dude, that was a beautiful launch.

521

00:33:09,400 --> 00:33:10,400

We caught it.

522

00:33:10,400 --> 00:33:12,400

That was amazing.

523

00:33:12,400 --> 00:33:16,400

It dispersed all the points out really wide.

524

00:33:16,400 --> 00:33:20,400

Meaning that the LiDAR points around it moved out of the way?

525

00:33:20,400 --> 00:33:21,400

Yeah.

526

00:33:21,400 --> 00:33:23,400

What?

527

00:33:23,400 --> 00:33:32,400

Jim Royston's LiDAR captured images of the rocket clearly passing through some kind of invisible mass right at about 31 feet high.

528

00:33:32,400 --> 00:33:35,400

The same level we saw the blob.

529

00:33:35,400 --> 00:33:37,400

But what was it?

530

00:33:37,400 --> 00:33:40,400

Had some time to start processing and looking at it.

531

00:33:40,400 --> 00:33:42,400

This is what we saw.

532

00:33:42,400 --> 00:33:44,400

So I'll plug this in so you guys can see it.

533

00:33:44,400 --> 00:33:45,400

Turn the video.

534

00:33:45,400 --> 00:33:46,400

There we go.

535

00:33:48,400 --> 00:33:49,400

Oh, oh.

536

00:33:49,400 --> 00:33:52,400

So, what's the, what do we look at?

537

00:33:52,400 --> 00:33:57,400

The process data showed a black void in the center of the triangle.

538

00:33:57,400 --> 00:33:59,400

Can you zoom way out?

539

00:34:01,400 --> 00:34:02,400

Whoa.

540

00:34:02,400 --> 00:34:03,400

Look at that.

541

00:34:03,400 --> 00:34:04,400

That's interesting.

542

00:34:04,400 --> 00:34:05,400

Yeah.

543

00:34:05,400 --> 00:34:08,400

It's a shadow of something.

544

00:34:08,400 --> 00:34:10,400

What are we looking at?

545

00:34:10,400 --> 00:34:11,400

Black hole.

546

00:34:11,400 --> 00:34:15,400

Could be, well, that could be a shadow of a wormhole.

547

00:34:15,400 --> 00:34:22,400

Could we have possibly captured a LiDAR image of a wormhole?

548

00:34:22,400 --> 00:34:26,400

If we did, we needed to find some way to confirm it.

549

00:34:26,400 --> 00:34:31,400

Five, four, three, two, one.

550

00:34:31,400 --> 00:34:35,400

Oh, that was so cool.

551

00:34:35,400 --> 00:34:37,400

They're almost hit.

552

00:34:37,400 --> 00:34:43,400

One week later, while we launched rockets vertically and horizontally through the anomalous zone of the triangle,

553

00:34:43,400 --> 00:34:47,400

Brandon, Caleb, and Eric flew in the helicopter with Cameron

554

00:34:47,400 --> 00:34:52,400

so Eric could scan the triangle with a spectrum analyzer for any telltale evidence.

555

00:34:52,400 --> 00:34:56,400

Wait, Thomas, look right there, right there, right above the horizon.

556

00:34:56,400 --> 00:35:00,400

Although we did capture a large UAP in the sky,

557

00:35:00,400 --> 00:35:06,400

I have some video footage taken from the vantage point of the helicopter

558

00:35:06,400 --> 00:35:10,400

that we all need to get eyes on, and you'll see why.

559

00:35:10,400 --> 00:35:14,400

We were really shocked by what Eric found in the footage collected by a camera

560

00:35:14,400 --> 00:35:16,400

that was mounted on Brandon's helicopter.

561

00:35:16,400 --> 00:35:17,400

Can you see in it, Thomas?

562

00:35:17,400 --> 00:35:18,400

Whoa.

563

00:35:18,400 --> 00:35:20,400

Okay, look at that, look at that.

564

00:35:20,400 --> 00:35:22,400

This is the feature of interest.

565

00:35:22,400 --> 00:35:25,400

Right, I'm seeing it.

566

00:35:25,400 --> 00:35:27,400

Oh.

567

00:35:27,400 --> 00:35:29,400

Oh my gosh.

568

00:35:29,400 --> 00:35:30,400

Went behind the mesa.

569

00:35:30,400 --> 00:35:31,400

Where'd it go?

570

00:35:31,400 --> 00:35:33,400

Right behind the mesa?

571

00:35:33,400 --> 00:35:34,400

Yes.

572

00:35:34,400 --> 00:35:38,400

And on closer inspection, it appears as if there's a corresponding light

573

00:35:38,400 --> 00:35:41,400

and illuminated area on the mesa itself.

574

00:35:41,400 --> 00:35:43,400

Watch what happens as we play through.

575

00:35:48,400 --> 00:35:49,400

Oh, right here.

576

00:35:49,400 --> 00:35:50,400

Oh my gosh, look.

577

00:35:50,400 --> 00:35:51,400

Oh my gosh.

578

00:35:51,400 --> 00:35:53,400

Oh my gosh.

579

00:35:53,400 --> 00:35:55,400

We all saw it.

580

00:35:55,400 --> 00:35:58,400

A UAP clearly entered the top of the mesa in the east field

581

00:35:58,400 --> 00:36:03,400

and then reemerged from the front of the mesa right at the triangle.

582

00:36:03,400 --> 00:36:07,400

Did we really see what indigenous people have claimed for generations?

583

00:36:07,400 --> 00:36:10,400

A UAP traversing through an actual wormhole?

584

00:36:10,400 --> 00:36:15,400

Well, it led us to conduct our most complex experiment yet in order to prove it.

585

00:36:15,400 --> 00:36:18,400

And the results went beyond what we expected.

586

00:36:20,400 --> 00:36:22,400

Travis, something set up over here.

587

00:36:22,400 --> 00:36:23,400

So how are you doing over there?

588

00:36:23,400 --> 00:36:25,400

Everything set up here.

589

00:36:25,400 --> 00:36:26,400

Alan, you guys good? Dave, you guys good?

590

00:36:26,400 --> 00:36:28,400

Yeah, we're armed and ready.

591

00:36:28,400 --> 00:36:31,400

After all the unique experiments we conducted this year at the Triangle,

592

00:36:31,400 --> 00:36:35,400

each of which produced bizarre and varied phenomena,

593

00:36:35,400 --> 00:36:38,400

before we suspended our investigation for the winter,

594

00:36:38,400 --> 00:36:41,400

we decided to combine a bunch of technologies

595

00:36:41,400 --> 00:36:44,400

and poke this hotspot harder than ever before

596

00:36:44,400 --> 00:36:48,400

to get answers related to the energy spikes, the UAPs,

597

00:36:48,400 --> 00:36:53,400

and try to answer whether or not wormholes really exist on Skinwalker Ranch.

598

00:36:53,400 --> 00:36:55,400

Tim, I say we go ahead and bring the lasers up.

599

00:36:55,400 --> 00:36:57,400

Lasers up.

600

00:36:57,400 --> 00:36:58,400

Lasers are up.

601

00:36:58,400 --> 00:37:02,400

The experiment included an array of lasers that scanned the anomalous zone

602

00:37:02,400 --> 00:37:06,400

while broadcasting an audio file of the Blazing Bear Song Ritual.

603

00:37:06,400 --> 00:37:08,400

Everything's ready?

604

00:37:08,400 --> 00:37:09,400

Drones are armed.

605

00:37:09,400 --> 00:37:12,400

A swarm of 250 illuminated drones

606

00:37:12,400 --> 00:37:16,400

programmed to once again fly in formation up to the 300 foot level.

607

00:37:16,400 --> 00:37:17,400

Want them here?

608

00:37:17,400 --> 00:37:19,400

Yeah, just ground it here.

609

00:37:19,400 --> 00:37:24,400

As well as several rounds of rockets equipped with increasing power

610

00:37:24,400 --> 00:37:28,400

so that we could reach higher and higher altitudes within the anomalous zone

611

00:37:28,400 --> 00:37:30,400

throughout the...

612

00:37:31,400 --> 00:37:32,400

Great. Golden.

613

00:37:32,400 --> 00:37:37,400

And of course, we were also filming this mega experiment with thermal cameras.

614

00:37:37,400 --> 00:37:39,400

Okay, I've got eyes on the flare.

615

00:37:39,400 --> 00:37:41,400

All right, we're going hot with the rockets.

616

00:37:41,400 --> 00:37:42,400

We got all six hot.

617

00:37:42,400 --> 00:37:49,400

Here we go in five, four, three, two, one.

618

00:37:54,400 --> 00:37:55,400

Where are the others going?

619

00:37:55,400 --> 00:37:56,400

What's going on?

620

00:38:00,400 --> 00:38:01,400

Well, that was weird.

621

00:38:01,400 --> 00:38:05,400

As soon as the experiment started, things got strange.

622

00:38:05,400 --> 00:38:09,400

When we triggered the rockets, which were initially set to launch simultaneously,

623

00:38:09,400 --> 00:38:12,400

they mysteriously took off one at a time

624

00:38:12,400 --> 00:38:17,400

and appeared to be deflected off course right at the 31 foot blob level.

625

00:38:17,400 --> 00:38:19,400

Anything in the flare?

626

00:38:19,400 --> 00:38:21,400

Oh, wow.

627

00:38:22,400 --> 00:38:24,400

Yeah.

628

00:38:24,400 --> 00:38:26,400

You did see something in the flare?

629

00:38:26,400 --> 00:38:29,400

Yeah, moving up here from the center up towards the upper left-hand corner of the screen.

630

00:38:29,400 --> 00:38:30,400

Oh, what is that?

631

00:38:30,400 --> 00:38:35,400

Then Eric saw a UAP in the sky that appeared on the flare thermal camera.

632

00:38:35,400 --> 00:38:36,400

All right, drones are going.

633

00:38:36,400 --> 00:38:37,400

Drones are going.

634

00:38:37,400 --> 00:38:39,400

Oh, fantastic.

635

00:38:39,400 --> 00:38:40,400

Here we go.

636

00:38:40,400 --> 00:38:43,400

Three, two, one.

637

00:38:46,400 --> 00:38:47,400

Wow, look at that.

638

00:38:51,400 --> 00:38:53,400

They're going up in two layers.

639

00:38:53,400 --> 00:38:55,400

That's just spectacular.

640

00:38:59,400 --> 00:39:01,400

We got one that's hung out over here.

641

00:39:03,400 --> 00:39:05,400

Look at that.

642

00:39:05,400 --> 00:39:07,400

What's that one doing?

643

00:39:07,400 --> 00:39:08,400

I don't know.

644

00:39:08,400 --> 00:39:10,400

Preston, I've got one coming down.

645

00:39:10,400 --> 00:39:14,400

And when the drones ascended up to the 300 foot level, first one,

646

00:39:14,400 --> 00:39:17,400

and then several others fell out of formation.

647

00:39:17,400 --> 00:39:19,400

Now, third one's falling out.

648

00:39:19,400 --> 00:39:20,400

A fourth one.

649

00:39:20,400 --> 00:39:22,400

As if something was pushing them around.

650

00:39:22,400 --> 00:39:27,400

It was just like what happened during the first drone experiment earlier in the year.

651

00:39:27,400 --> 00:39:31,400

And when Brandon's helicopter got jostled around in midair.

652

00:39:31,400 --> 00:39:32,400

We are clear.

653

00:39:32,400 --> 00:39:33,400

Clear, clear.

654

00:39:33,400 --> 00:39:34,400

Ready?

655

00:39:34,400 --> 00:39:42,400

All right, there's going to be a staggered launch in five, four, three, two, one.

656

00:39:45,400 --> 00:39:46,400

Get it.

657

00:39:46,400 --> 00:39:47,400

Wow.

658

00:39:47,400 --> 00:39:48,400

Those criss-crawls.

659

00:39:48,400 --> 00:39:50,400

Right through the middle.

660

00:39:50,400 --> 00:39:51,400

That one went way north.

661

00:39:51,400 --> 00:39:53,400

Hey, do we have an airplane up north?

662

00:39:53,400 --> 00:39:54,400

I'm looking.

663

00:39:54,400 --> 00:39:55,400

I don't see it.

664

00:39:55,400 --> 00:39:57,400

Because I got something in the flare right here.

665

00:39:57,400 --> 00:39:58,400

What?

666

00:39:58,400 --> 00:39:59,400

Something in the flare?

667

00:39:59,400 --> 00:40:00,400

Right here.

668

00:40:03,400 --> 00:40:05,400

Yeah, there is something in the flare.

669

00:40:07,400 --> 00:40:10,400

The moment we launched it popped up right in here.

670

00:40:10,400 --> 00:40:12,400

We have an object in the flare.

671

00:40:12,400 --> 00:40:16,400

It's a hot object in the sky.

672

00:40:16,400 --> 00:40:18,400

Probably 100 feet on a mesa.

673

00:40:19,400 --> 00:40:21,400

The strange events continued throughout the night.

674

00:40:21,400 --> 00:40:23,400

Hey, we got something on the flare.

675

00:40:23,400 --> 00:40:25,400

We got something on the flare.

676

00:40:25,400 --> 00:40:29,400

Including one UAP that seemed to morph into several smaller ones.

677

00:40:29,400 --> 00:40:32,400

When one of the rockets went right there.

678

00:40:32,400 --> 00:40:36,400

And it went from a line into many bright lights.

679

00:40:36,400 --> 00:40:37,400

Wow.

680

00:40:37,400 --> 00:40:42,400

You know, I could be convinced that we're looking at something formation flying.

681

00:40:42,400 --> 00:40:43,400

Seriously?

682

00:40:43,400 --> 00:40:50,400

During this experiment, we also documented repeated phenomena at the 31 foot level, as well as the 300 foot level.

683

00:40:50,400 --> 00:40:52,400

And we saw numerous UAPs.

684

00:40:52,400 --> 00:40:54,400

Whoa, whoa, whoa, whoa, look, we got here.

685

00:40:54,400 --> 00:40:55,400

We got here.

686

00:40:55,400 --> 00:41:00,400

Once again, we got repeated data at multiple points above the triangle.

687

00:41:00,400 --> 00:41:03,400

And they all point to something extraordinary going on there.

688

00:41:07,400 --> 00:41:12,400

We're seeing things that are very hard for us to explain over the ranch.

689

00:41:12,400 --> 00:41:17,400

And I can't help but wonder whether we are in fact dealing with something technological.

690

00:41:18,400 --> 00:41:20,400

We have to continue searching.

691

00:41:21,400 --> 00:41:28,400

We are dealing with forces that are powerful and yet to be explained or understood.

692

00:41:28,400 --> 00:41:34,400

The deeper down the rabbit hole that we travel, the more complex that it appears.

693

00:41:34,400 --> 00:41:42,400

With everything our team experienced this year, I'd like to think we're close to the ultimate answers behind all the phenomena out here.

694

00:41:42,400 --> 00:41:46,400

But given all the questions that clearly still exist,

695

00:41:46,400 --> 00:41:53,400

I think it's more likely that we're just getting started uncovering the true secret of Skinwalker Ranch.

696

00:42:16,400 --> 00:42:18,400

I'm not sure if you can hear me.

697

00:42:18,400 --> 00:42:19,400

I'm not sure.

698

00:42:19,400 --> 00:42:20,400

I'm not sure.

699

00:42:20,400 --> 00:42:21,400

I'm not sure.

700

00:42:21,400 --> 00:42:22,400

I'm not sure.

701

00:42:22,400 --> 00:42:23,400

I'm not sure.

702

00:42:23,400 --> 00:42:24,400

I'm not sure.

703

00:42:24,400 --> 00:42:25,400

I'm not sure.

704

00:42:25,400 --> 00:42:26,400

I'm not sure.

705

00:42:26,400 --> 00:42:27,400

I'm not sure.

706

00:42:27,400 --> 00:42:28,400

I'm not sure.

707

00:42:28,400 --> 00:42:29,400

I'm not sure.

708

00:42:29,400 --> 00:42:30,400

I'm not sure.

709

00:42:30,400 --> 00:42:31,400

I'm not sure.

710

00:42:31,400 --> 00:42:32,400

I'm not sure.

711

00:42:32,400 --> 00:42:33,400

I'm not sure.

712

00:42:33,400 --> 00:42:34,400

I'm not sure.

713

00:42:34,400 --> 00:42:35,400

I'm not sure.

714

00:42:35,400 --> 00:42:36,400

I'm not sure.

715

00:42:36,400 --> 00:42:37,400

I'm not sure.

716

00:42:37,400 --> 00:42:38,400

I'm not sure.

717

00:42:38,400 --> 00:42:39,400

I'm not sure.

718

00:42:39,400 --> 00:42:40,400

I'm not sure.

719

00:42:40,400 --> 00:42:41,400

I'm not sure.

720

00:42:41,400 --> 00:42:42,400

I'm not sure.

721

00:42:42,400 --> 00:42:43,400

I'm not sure.

722

00:42:43,400 --> 00:42:44,400

I'm not sure.

723

00:42:44,400 --> 00:42:55,400

Today, the UFO phenomena is a regular fixture of mainstream media reports and has gripped the attention of the general public more than ever.

724

00:42:55,400 --> 00:43:04,400

In fact, it's now common knowledge that the federal government has recently funded secretive programs to investigate the subject.

725

00:43:04,400 --> 00:43:11,400

And whistleblowers are starting to come forward declaring that our intelligence agencies know much more than they're willing to.
