

1

00:00:00,000 --> 00:00:02,800

On this edition of Sightings,

2

00:00:02,800 --> 00:00:05,840

scientists one step closer to a Bigfoot encounter.

3

00:00:05,840 --> 00:00:08,720

It's a very tough task to find one of these things.

4

00:00:08,720 --> 00:00:11,840

I think we're the people who are going to find one, almost certainly.

5

00:00:11,840 --> 00:00:14,320

A paralyzed boy, praised for death.

6

00:00:14,320 --> 00:00:17,840

It was definitely, it was possessed.

7

00:00:17,840 --> 00:00:20,120

A supernatural light guides him home.

8

00:00:20,120 --> 00:00:21,960

I came back and I was a different man.

9

00:00:21,960 --> 00:00:24,880

Man, alien abduction. Could you be next?

10

00:00:24,880 --> 00:00:27,480

In the beginning, I thought I was going crazy.

11

00:00:27,480 --> 00:00:29,480

I know something has happened to me,

12

00:00:29,600 --> 00:00:32,000

but I was in extreme denial.

13

00:00:32,000 --> 00:00:36,600

And later, these people have seen a vision of their future lives.

14

00:00:36,600 --> 00:00:40,480

I was a little afraid the first time when I experienced my death in this life.

15

00:00:59,480 --> 00:01:12,480

Welcome to Sightings. I'm Tim White.

16

00:01:12,480 --> 00:01:19,480

In business, competition and secrecy are par for the course.

17

00:01:19,480 --> 00:01:22,480

Well, the same holds true for paranormal investigators.

18

00:01:22,480 --> 00:01:26,480

That's a problem, especially for investigators in search of Bigfoot,

19

00:01:26,480 --> 00:01:30,480

who need to keep track of sightings and possible migration patterns.

20

00:01:30,480 --> 00:01:35,480

Now, one organization is trying to collect every report, footprint and eyewitness account

21

00:01:35,480 --> 00:01:37,480

into one communal database.

22

00:01:37,480 --> 00:01:48,480

It's called the Bigfoot Research Project,

23

00:01:48,480 --> 00:01:51,480

headquartered here in the heart of Bigfoot Country,

24

00:01:51,480 --> 00:01:53,480

the Cascade Mountains of the Pacific Northwest.

25

00:01:53,480 --> 00:01:56,480

For the first time, Sasquatch is online,

26

00:01:56,480 --> 00:02:02,480

and every possible sighting, noise, footprint, hair sample and anecdote is being checked out,

27

00:02:02,480 --> 00:02:04,480

cross-referenced and rechecked.

28

00:02:04,480 --> 00:02:07,480

Already, the computer analysis is paying off.

29

00:02:07,480 --> 00:02:12,480

This color film was shot by Roger Patterson in 1967.

30

00:02:12,480 --> 00:02:14,480

It has never been proven to be a hoax.

31

00:02:14,480 --> 00:02:18,480

These are footprints shot on videotape just weeks ago.

32

00:02:18,480 --> 00:02:21,480

They were discovered in the same area the Patterson footage was shot,

33

00:02:21,480 --> 00:02:29,480

and the size of the prints and the length of the stride correspond exactly to the creature discovered 25 years earlier.

34

00:02:29,480 --> 00:02:33,480

One of the questions that arises is, when is one going to be found?

35

00:02:33,480 --> 00:02:35,480

There's no answer to that.

36

00:02:35,480 --> 00:02:38,480

Today, a week from now, 10 years from now, nobody knows.

37

00:02:38,480 --> 00:02:40,480

There are no guarantees.

38

00:02:40,480 --> 00:02:43,480

The way we're going with our project, which is a very sophisticated project,

39

00:02:43,480 --> 00:02:46,480

I think we're the people who are going to find one, almost certainly.

40

00:02:46,480 --> 00:02:51,480

The project is receiving grant money from the Academy of Applied Science in Boston, Massachusetts.

41

00:02:51,480 --> 00:02:56,480

This prestigious institution believes Peter Byrne deserves a chance to bring one in alive.

42

00:02:56,480 --> 00:03:00,480

It's not easy. It's a very tough task to find one of these things.

43

00:03:00,480 --> 00:03:05,480

We're dealing with something which is shy, elusive, very wary of man,

44

00:03:05,480 --> 00:03:10,480

which has an enormous area to live in and to hide in, and it's not going to be found easily.

45

00:03:10,480 --> 00:03:14,480

While sightings were shooting this interview, a call came in to the project.

46

00:03:14,480 --> 00:03:18,480

Independent eyewitnesses were reporting something moving at the base of Mount Hood.

47

00:03:18,480 --> 00:03:21,480

Byrne's team responded immediately.

48

00:03:21,480 --> 00:03:25,480

They're clearly visible, and they definitely are primates of some kind.

49

00:03:25,480 --> 00:03:29,480

They are walking upright, and they're moving fairly fast.

50

00:03:29,480 --> 00:03:34,480

And the time we've been here, they've moved about 200 yards, maybe 250 yards.

51

00:03:34,480 --> 00:03:38,480

Analysis identified the two lower dark areas as rocks.

52

00:03:38,480 --> 00:03:43,480

Above these rocks, two shapes were moving at approximately two miles an hour.

53

00:03:43,480 --> 00:03:50,480

There were no reports of hikers at that time, but the distance was too great to confirm this as a big-foot sighting.

54

00:03:50,480 --> 00:03:54,480

It will be used to corroborate any other sightings in the same area.

55

00:03:54,480 --> 00:03:59,480

Photographs like this one come in every day, but Byrne quickly rules out all but a very few.

56

00:03:59,480 --> 00:04:03,480

This is a fake footprint. It's very square. You can see the line of the turrets across the top here.

57

00:04:03,480 --> 00:04:06,480

It's simply straight, which is wrong. They should be angled.

58

00:04:06,480 --> 00:04:09,480

And then the sides are dead straight, and it's recognizable as a fake footprint,

59

00:04:09,480 --> 00:04:12,480

probably made with a wooden mold or some kind.

60

00:04:12,480 --> 00:04:17,480

This is an important videotape. The Bigfoot Research Project is concentrating on right now.

61

00:04:17,480 --> 00:04:22,480

It's from Northern California, and it's from late last year.

62

00:04:22,480 --> 00:04:29,480

And the photographers say that in here, in the center of the picture, they're just there.

63

00:04:29,480 --> 00:04:30,480

The dark area?

64

00:04:30,480 --> 00:04:33,480

The dark area. You can see something, and you can see something moving.

65

00:04:33,480 --> 00:04:40,480

Independent Bigfoot researchers Scott Harriet and Darrell Owen captured these images in Northern California.

66

00:04:40,480 --> 00:04:45,480

It was their first face-to-face encounter with an elusive creature they've been tracking for 10 years.

67

00:04:45,480 --> 00:04:48,480

I can see him pointing at something after about 29 seconds.

68

00:04:48,480 --> 00:04:52,480

He then lowered the camera, looked at me, and started crying.

69

00:04:52,480 --> 00:04:56,480

I mean, he literally had a little minor break, started crying and said, let's get out of here.

70

00:04:56,480 --> 00:04:59,480

I was very scared at that point as well. We went down the hill.

71

00:04:59,480 --> 00:05:06,480

I'm crying at this moment, so excuse my voice. It's right here. You can see it. Okay.

72

00:05:06,480 --> 00:05:14,480

The footage is being analyzed at Wonderfilm Design. Here, advanced computer enhancement technology allows researchers to take a closer look.

73

00:05:14,480 --> 00:05:20,480

Right here would be the head in the arm down this way. And let me rock back and forth here.

74

00:05:20,480 --> 00:05:28,480

And as you can see, that it's something right there is moving while everything else in the picture stays static.

75

00:05:28,480 --> 00:05:32,480

There is something unusual moving in the thick woods of the Cascade Range,

76

00:05:32,480 --> 00:05:36,480

but the Bigfoot Research Project remains cautious in their optimism.

77

00:05:36,480 --> 00:05:42,480

Hokes' are rampant in a field where film and videotape are considered still the best evidence.

78

00:05:42,480 --> 00:05:48,480

Especially in the 1960s and 70s, it seemed like everyone with a first suit and a lot of spare time

79

00:05:48,480 --> 00:05:52,480

was coming up with supposedly authentic photographic evidence.

80

00:05:52,480 --> 00:05:56,480

Only a few pieces of photographic evidence have deserved serious attention.

81

00:05:56,480 --> 00:06:01,480

But even these compelling images are enough to satisfy scientists.

82

00:06:01,480 --> 00:06:05,480

I have to say that I'm a skeptic regarding the Sasquatch.

83

00:06:05,480 --> 00:06:12,480

It would probably be if we were able to verify its existence, the most exciting biological find of the century,

84

00:06:12,480 --> 00:06:17,480

until we find physical evidence that's indisputable.

85

00:06:17,480 --> 00:06:24,480

I think that all scientists have to take a rather pessimistic view as to its existence.

86

00:06:24,480 --> 00:06:34,480

Wildlife biologist John Bindernagel is one scientist who no longer shares the pessimistic view of his mainstream colleagues.

87

00:06:34,480 --> 00:06:39,480

I was very slow to come out of the closet, very slow to talk about this.

88

00:06:39,480 --> 00:06:45,480

I was concerned about my employability. Biologists weren't really accepting this as an actual animal.

89

00:06:45,480 --> 00:06:50,480

So I still remain very quiet. I'm not sure why in the end I came out.

90

00:06:50,480 --> 00:06:58,480

I guess I found in the last few years talking to people that people weren't as disbelieving as they used to be.

91

00:06:58,480 --> 00:07:04,480

One reason may be the overwhelming number of anomalous tracks recently cited in Washington state.

92

00:07:04,480 --> 00:07:11,480

Down through here, there's a heel spot right here. It's about 3-4 inch wide here.

93

00:07:11,480 --> 00:07:17,480

It comes up across and here's a toe down through here.

94

00:07:17,480 --> 00:07:24,480

In this area, there are two that are hanging in this area here.

95

00:07:24,480 --> 00:07:29,480

They've been here for better than a year now that they've had people who have seen them.

96

00:07:29,480 --> 00:07:36,480

Skeptical scientists put Bigfoot into the same mythological creature category as leprechauns, fairies and gnomes.

97

00:07:36,480 --> 00:07:41,480

But Bigfoot researchers ask, when was the last time you saw color film of a leprechaun?

98

00:07:41,480 --> 00:07:44,480

Have you ever seen the footprints of a gnome? Well, of course not.

99

00:07:44,480 --> 00:07:53,480

Bigfoot is different, they insist. He's out there somewhere and finding him is just a matter of timing, patience and luck.

100

00:07:53,480 --> 00:08:00,480

You would think that every inch of the Pacific Northwest would have been scoured by now, but since 1948,

101

00:08:00,480 --> 00:08:05,480

over 50 airplanes have crashed in Washington state, never to be seen again.

102

00:08:05,480 --> 00:08:11,480

If large reflective metal craft have remained undetected for as long as 50 years,

103

00:08:11,480 --> 00:08:16,480

perhaps it's not so far-fetched that researchers have yet to recover a Bigfoot.

104

00:08:16,480 --> 00:08:22,480

Coming up, a young boy's encounter with a supernatural light saves him from certain death.

105

00:08:22,480 --> 00:08:27,480

It was very dark and lonely and that was just replaced by a brilliant light.

106

00:08:30,480 --> 00:08:34,480

What happened to Will Barton was nothing short of a tragedy.

107

00:08:34,480 --> 00:08:40,480

After a serious fall, doctors told the 16-year-old that it would be a miracle if he ever walked again.

108

00:08:40,480 --> 00:08:48,480

Will Barton believes that first angels and then a near-death experience created that miracle in his life.

109

00:08:50,480 --> 00:08:55,480

Will's transformation began here on the family's thousand-acre ranch in Carmen, Idaho.

110

00:08:55,480 --> 00:09:02,480

They call it God's Country, a clean, safe place to raise a family, a place that tragedy usually forgets.

111

00:09:02,480 --> 00:09:08,480

We were having a family reunion and all of my brother and sisters were together for the first time in probably five years.

112

00:09:08,480 --> 00:09:11,480

And we were having a really enjoyable time together.

113

00:09:11,480 --> 00:09:19,480

We had decided that we would have Christmas before everybody went home and William was assigned to get the Christmas tree.

114

00:09:19,480 --> 00:09:26,480

Will and his friend Matt volunteered to drive into the mountains in search of the perfect Christmas tree.

115

00:09:26,480 --> 00:09:32,480

And just boom, I saw the tree I wanted. It was just beautiful.

116

00:09:32,480 --> 00:09:39,480

Will wanted to climb the tree and cut off just the top, but his friend warned him it was too dangerous.

117

00:09:39,480 --> 00:09:45,480

I didn't see any danger. The hill was very, very steep. The tree was very, very tall.

118

00:09:45,480 --> 00:09:51,480

And it was starting to get dark. It was definitely like I was possessed to get the tree.

119

00:09:51,480 --> 00:09:56,480

After a brief breathtaking moment at the top, Will's life changed forever.

120

00:09:56,480 --> 00:10:06,480

I just was enjoying the beauty when I could feel my arms scrambling out, trying to find branches, but I didn't have any control.

121

00:10:06,480 --> 00:10:09,480

I remember hitting the ground, but it wasn't very intense.

122

00:10:09,480 --> 00:10:15,480

Like you might think, it was just like jelly spotting on the floor and I couldn't feel anything.

123

00:10:15,480 --> 00:10:21,480

Will had fallen 50 feet into a steep ravine. His friend Matt needed help to rescue him.

124

00:10:21,480 --> 00:10:31,480

We were all in the home. Some of us were playing games, playing with the kids, and all of a sudden one of the brothers ran in and said, somebody's been hurt.

125

00:10:31,480 --> 00:10:36,480

So we started putting up a search and we searched and we searched and we searched and finally we found him.

126

00:10:36,480 --> 00:10:43,480

Will's sister Julie and brother Brad scrambled down the rocky slope. The temperature was dropping rapidly and there was snow.

127

00:10:43,480 --> 00:10:46,480

They struggled to carry Will up to the road but couldn't.

128

00:10:46,480 --> 00:10:51,480

They needed more strength and stopped on the cliffside to ask for that strength through prayer.

129

00:10:51,480 --> 00:11:07,480

Will told us later that he saw several what he perceived to be white men, angels, so to speak, just come out of heaven and just carry him up the rest of the way out of the mountain.

130

00:11:07,480 --> 00:11:12,480

And it was incredible. Our strength was totally renewed and we just went up the rest of the way.

131

00:11:13,480 --> 00:11:20,480

This angelic vision and his rescuers renewed strength may have been key to Will's survival.

132

00:11:20,480 --> 00:11:26,480

Will was rushed from the scene to a local hospital and the nightmare was just beginning.

133

00:11:26,480 --> 00:11:35,480

When Will arrived in the emergency room he was hypothermic, meaning he had a low body temperature from lying in the snow for a couple of hours.

134

00:11:35,480 --> 00:11:39,480

He was totally paralyzed although he was breathing on his own.

135

00:11:39,480 --> 00:11:54,480

We did a portable neck x-ray after he had been stabilized and that x-ray revealed a fracture dislocation of cervical vertebrae C4 on C5.

136

00:11:54,480 --> 00:12:06,480

I remember a doctor examining me and saying he had a needle or he had a sharp, something sharp and he was saying, do you feel this?

137

00:12:06,480 --> 00:12:10,480

No, do you feel this? No, do you feel this? No.

138

00:12:12,480 --> 00:12:17,480

Will was immediately transferred to the intensive care unit at St. Patrick's Hospital in Missoula, Montana.

139

00:12:17,480 --> 00:12:23,480

Prognosis was not good and Will began to deteriorate physically and mentally.

140

00:12:23,480 --> 00:12:32,480

When someone is totally out, the chances of recovering are as near zero as you can get.

141

00:12:32,480 --> 00:12:37,480

He just laid there and kind of like he was in a trance and I said, what's happening Will?

142

00:12:37,480 --> 00:12:41,480

And he says, I'm just practicing being a vegetable.

143

00:12:41,480 --> 00:12:51,480

To me it's the most single devastating injury that people get because they're locked inside a body, they can't do anything.

144

00:12:51,480 --> 00:13:08,480

It comes as a sudden thing and almost every instance from one minute laughing, having a good time to all of a sudden, oh, I've done something I shouldn't have done and now can you put me back together and we say, no, we can't?

145

00:13:08,480 --> 00:13:12,480

I'd pray at night and my prayer was, please let me die.

146

00:13:12,480 --> 00:13:18,480

If I could, I would have taken my life, but I couldn't. I couldn't move.

147

00:13:18,480 --> 00:13:24,480

So I did the only thing I could do. I asked my mother.

148

00:13:24,480 --> 00:13:29,480

He says, if you really love me, you'd get me out of my misery and you'd take this pillow and put over my face.

149

00:13:29,480 --> 00:13:37,480

And she just looked back at me with loving eyes and couldn't respond.

150

00:13:37,480 --> 00:13:46,480

Will had lost all hope of ever being able to walk again. He became uncooperative and refused to participate in rehabilitation exercises.

151

00:13:46,480 --> 00:13:50,480

Then an unfortunate mistake changed Will's life once again.

152

00:13:50,480 --> 00:14:01,480

They got me on the tilt table and tilted me up way too fast and I do remember I could see the floor for the first time in my new life.

153

00:14:01,480 --> 00:14:09,480

And I could feel the blood just running out of my head and the room started to get a little bit dark and splotchy.

154

00:14:09,480 --> 00:14:15,480

And he just passed out and the nurse couldn't get a blood pressure. We couldn't get a heartbeat.

155

00:14:15,480 --> 00:14:23,480

I want to die. And all those prayers that I'd said every night were answered.

156

00:14:23,480 --> 00:14:36,480

It was very dark and lonely. And that was just replaced by a brilliant, brilliant light that just completely drowned the darkness.

157

00:14:36,480 --> 00:14:41,480

And the whole soul was just completely immersed in this light.

158

00:14:41,480 --> 00:14:44,480

Will says the light offered him a choice.

159

00:14:44,480 --> 00:14:50,480

To die and go where this light was taking me or breathe and live.

160

00:14:50,480 --> 00:14:55,480

He started to turn blue. By this time the other nurse had gotten oxygen to him.

161

00:14:55,480 --> 00:15:03,480

And as I laid there consumed by this light with the choice to make about quitting, I thought about meeting my God.

162

00:15:03,480 --> 00:15:09,480

I'm looking at him and saying I quit and I couldn't do that.

163

00:15:09,480 --> 00:15:15,480

Then his diaphragm started taking over again and he was breathing shallow again.

164

00:15:15,480 --> 00:15:24,480

I came back and I was a different man. I could just feel my face shining and I just glowed.

165

00:15:24,480 --> 00:15:30,480

Will says he was transformed by the experience that took him to the very brink of death.

166

00:15:30,480 --> 00:15:37,480

I've heard and read of these various episodes of people seeing the light and the tunnel of light and the near-death experiences.

167

00:15:37,480 --> 00:15:45,480

I'm sure that there's something that occurs. I don't think we have any scientific explanation.

168

00:15:45,480 --> 00:15:53,480

Before the accident, William was very shy. After his experience, it was like the dam broke and his whole being came out.

169

00:15:53,480 --> 00:15:56,480

And we got to know William at that point.

170

00:15:56,480 --> 00:16:05,480

I was going to live my life. And the doctors kept saying, I'll never walk again, Will.

171

00:16:05,480 --> 00:16:12,480

But Will's near-death experience had given him a new determination and he began to have hints of feeling throughout his body.

172

00:16:12,480 --> 00:16:20,480

He moved his toe and we were so excited. I remember running out to the barn and I'm going to my twin brother and saying, Rick, Rick, he moved his toe.

173

00:16:20,480 --> 00:16:24,480

And we just sat there and held each other and cried over a toe movement.

174

00:16:24,480 --> 00:16:30,480

It was almost like every week we'd get a new phone call saying, he's sat up, he's walking now, he's standing up.

175

00:16:30,480 --> 00:16:35,480

What happened to Will when he saw that intense light cannot be easily explained.

176

00:16:35,480 --> 00:16:42,480

His family attributes the transformation to their prayers and faith. Doctors have a harder time explaining Will's recovery.

177

00:16:42,480 --> 00:16:51,480

Conventional medical wisdom would have said that he would be totally paralyzed for life. And I certainly would call this a miracle.

178

00:16:51,480 --> 00:17:03,480

If you define a miracle as something that occurs very, very rarely, I mean it's probably somewhat analogous to winning the lottery.

179

00:17:03,480 --> 00:17:11,480

He's had a chance to have his life, to lose his life as he knows it, and to have a back again.

180

00:17:11,480 --> 00:17:15,480

And that's something that very few people give the chance to do in this life.

181

00:17:16,480 --> 00:17:29,480

Since his near fatal accident, Will Barton has gone from paralysis to first a walker, then braces, a cane, and now he walks on his own.

182

00:17:29,480 --> 00:17:33,480

Doctors have stopped putting limits on what he may be capable of next.

183

00:17:33,480 --> 00:17:39,480

With his recovery in full swing, Will is on to the next challenge. He's enrolled in college.

184

00:17:39,480 --> 00:17:45,480

Next, is intuition more than a feeling? Is it a psychic ability we all possess?

185

00:17:45,480 --> 00:17:49,480

25% of Americans tend to rely on their intuition.

186

00:17:53,480 --> 00:17:58,480

Intuition has been described as knowing something without knowing how you know it.

187

00:17:58,480 --> 00:18:03,480

It's also called gut instinct, hunch, or even ESP.

188

00:18:03,480 --> 00:18:15,480

Some researchers believe that intuition is a spark, and that many people can be taught how to take that spark and use it to ignite a greater psychic power.

189

00:18:15,480 --> 00:18:18,480

Intuition is knowing without knowing how you know.

190

00:18:18,480 --> 00:18:27,480

And for some people that means you get a flash, you see something in your mind's eye, you hear an inner voice that says, you know, don't trust that person when you first meet them.

191

00:18:27,480 --> 00:18:35,480

It's a way of knowing something that goes beyond what we think of as rational, logical knowing.

192

00:18:35,480 --> 00:18:43,480

Author Laurie Nadell believes the so-called sixth sense is present in everyone, and that a lot of people use their intuitive power without even knowing it.

193

00:18:43,480 --> 00:18:49,480

How you perform in the workplace is a good indication of whether or not you're tapping into your psychic power.

194

00:18:49,480 --> 00:18:56,480

Certain people will go in and they'll do a lot of studies and they'll do time management studies and cost analysis.

195

00:18:56,480 --> 00:19:02,480

They'll get all the numbers and all the data, and then you'll have somebody who's like a troubleshooter who's kind of a maverick,

196

00:19:02,480 --> 00:19:09,480

and that person might go in and say, look, I want to talk to these three people, and they'll talk to three people for 20 minutes apiece,

197

00:19:09,480 --> 00:19:12,480

and they'll come up with a big picture of what's wrong.

198

00:19:12,480 --> 00:19:20,480

Long-term studies are now testing for intuitive ability, trying to determine if certain people are more psychically tuned in than others.

199

00:19:20,480 --> 00:19:29,480

25% of Americans tend to rely on their intuition, and 75% tend to use their five physical senses.

200

00:19:29,480 --> 00:19:37,480

Now, the same studies when given to children, they find that 51% of children like to rely on their intuition for problem solving.

201

00:19:37,480 --> 00:19:44,480

And a lot of people come to me saying, you know, when I was a child, it seemed to me that it was more natural for me,

202

00:19:44,480 --> 00:19:50,480

it was easier for me to trust my feelings, to trust my instincts, you know, to come up with quick answers.

203

00:19:50,480 --> 00:19:52,480

And now I'm always second guessing myself.

204

00:19:52,480 --> 00:19:56,480

I know mine was activated. I didn't realize that I had this.

205

00:19:56,480 --> 00:20:06,480

And it seems to occur for me in very threatening, life-threatening, fearful situations or in very intense cases.

206

00:20:06,480 --> 00:20:12,480

They're going to make the arrest, if it was, of course, state lines against her. Well, yes.

207

00:20:12,480 --> 00:20:20,480

Jane Finnegan believes it was her intuitive ability that kept her alive during the 14 years she served as a New York City police officer.

208

00:20:20,480 --> 00:20:22,480

Today, she's a private investigator.

209

00:20:22,480 --> 00:20:25,480

They went to bed, and apparently everything was fine.

210

00:20:25,480 --> 00:20:29,480

When you have a missing person, there'll be a certain format that you'll follow.

211

00:20:29,480 --> 00:20:36,480

You'll find out if they had a driver's license, if they had a vehicle, evidence and things to lead you in an area.

212

00:20:36,480 --> 00:20:44,480

But I believe that what tangent you choose is generally an instinct and intuitive sense.

213

00:20:44,480 --> 00:20:48,480

I'm sure my boss would have like a stroke as I'm saying this, but it is true.

214

00:20:48,480 --> 00:20:58,480

Researchers now believe that women are able to pick up on kind of subliminal cues and eye movements, breathing, posture, physiology, you know,

215

00:20:58,480 --> 00:21:02,480

and also, very subtle cues that men may not be aware of.

216

00:21:02,480 --> 00:21:09,480

And out of that, they are able to come up with a picture that this is somebody to trust or this is somebody not to trust.

217

00:21:09,480 --> 00:21:15,480

So, I've had a number of women come to me and say, this is a fairly common story.

218

00:21:15,480 --> 00:21:19,480

My husband had a business partner, and he brought his business partner in for dinner.

219

00:21:19,480 --> 00:21:23,480

And I told him after dinner, Fred, don't do it.

220

00:21:23,480 --> 00:21:28,480

This man is going to take advantage of you. You're going to get hurt. You're going to get into trouble.

221

00:21:28,480 --> 00:21:34,480

And in each of these stories, of course, the man had gone off and hired the business partner, gotten into business with him.

222

00:21:34,480 --> 00:21:41,480

And a year and a half later, they found that the partner had embezzled or they were bankrupt or he had stolen or he had done something.

223

00:21:41,480 --> 00:21:49,480

I've come so much to trust my intuition that I really was able to develop my psychic abilities,

224

00:21:49,480 --> 00:21:51,480

and I have since become a professional psychic.

225

00:21:51,480 --> 00:21:55,480

And my home life is very exciting and interesting for me because my husband is a physicist.

226

00:21:55,480 --> 00:22:02,480

And I was even in touch with people at Princeton, Stanford, a lot of big universities are doing work on what we already know.

227

00:22:02,480 --> 00:22:03,480

We already know this.

228

00:22:03,480 --> 00:22:09,480

Not everyone has the potential to be a professional psychic, but there are ways to better develop your own intuition.

229

00:22:09,480 --> 00:22:13,480

It's kind of like the old joke about Carnegie Hall. Practice, practice, practice.

230

00:22:13,480 --> 00:22:16,480

Part of what you're learning how to do is to focus your attention.

231

00:22:16,480 --> 00:22:23,480

Then you can actually ask your intuition or ask your hunches or gut feelings to give you answers to questions.

232

00:22:25,480 --> 00:22:30,480

Beyond semantics, is there a difference between intuition and ESP?

233

00:22:30,480 --> 00:22:38,480

Are experts defined intuition as foresight based on some degree of prior knowledge, no matter how small that knowledge may be?

234

00:22:38,480 --> 00:22:43,480

Psychic ability, on the other hand, is foresight without any prior knowledge.

235

00:22:47,480 --> 00:22:51,480

Either there's something very special about this fantasy, or it's not a fantasy.

236

00:22:51,480 --> 00:22:58,480

Could you be next? Then have these people traveled through time and a musical crop circle mystery?

237

00:23:03,480 --> 00:23:09,480

When the first reported case of alien abduction, the Betty and Barney Hill case, occurred in 1961,

238

00:23:09,480 --> 00:23:14,480

most serious researchers felt that it was just a blip on the paranormal screen.

239

00:23:14,480 --> 00:23:20,480

But since then, thousands of seemingly credible people have made similar claims.

240

00:23:21,480 --> 00:23:28,480

There was this big black triangle just moving real slow across the sky and it kind of fall over.

241

00:23:28,480 --> 00:23:38,480

I watched it and it got to about here, kind of stopped, pivoted a little bit, made a hissing sound,

242

00:23:38,480 --> 00:23:42,480

and it kind of continued on toward the north real slow and it just kept watching it.

243

00:23:42,480 --> 00:23:45,480

I could see some little detail in the back, like little circles and a little square,

244

00:23:45,480 --> 00:23:50,480

and I remember thinking, well that's where I went in through, was the bottom of it.

245

00:23:50,480 --> 00:23:56,480

Brian Koski is not lying. He honestly believes he's been inside an alien spacecraft.

246

00:23:56,480 --> 00:24:00,480

He isn't trying to sell a book or get his proverbial 15 minutes of fame.

247

00:24:00,480 --> 00:24:03,480

He wants answers. What is happening to him?

248

00:24:03,480 --> 00:24:09,480

The experts have radically different opinions about the root causes of his encounters.

249

00:24:09,480 --> 00:24:14,480

It's what we call waking dreams. When people start to fall asleep, many occasions,

250

00:24:14,480 --> 00:24:20,480

they have a mixture, a peculiar mixture of reality and fantasy or dreams.

251

00:24:20,480 --> 00:24:25,480

And in this particular state of consciousness, which is an altered state,

252

00:24:25,480 --> 00:24:30,480

they see little aliens and they see spaceships and lights in the sky and so on.

253

00:24:30,480 --> 00:24:40,480

After working with more than 125 alleged abductees, psychiatrist Dr. Richard Boylan believes the abduction experience goes far beyond dreaming.

254

00:24:40,480 --> 00:24:47,480

I was pretty skeptical personally, but when I saw people who were very mentally sound,

255

00:24:47,480 --> 00:24:54,480

talking about these experiences and having nothing to gain by putting them out there and lots to lose,

256

00:24:54,480 --> 00:24:57,480

I had to start taking them seriously.

257

00:24:57,480 --> 00:25:03,480

Dr. Boylan encourages his patients to draw pictures of their extraterrestrial experiences.

258

00:25:03,480 --> 00:25:09,480

These images often arise during hypnotherapy sessions, where repressed memories are supposedly brought to the fore.

259

00:25:09,480 --> 00:25:14,480

Skeptics say these memories are unreliable, but in the case of Connie Smith,

260

00:25:14,480 --> 00:25:19,480

she not only has memories and visions, she believes she also has physical evidence.

261

00:25:19,480 --> 00:25:25,480

I just woke up in the morning and I did have that groggy feeling that, you know, like I've been up all night,

262

00:25:25,480 --> 00:25:34,480

yet I got an eight hour sleep and I sat down on the couch and I looked down and I had a mark just above my knee.

263

00:25:35,480 --> 00:25:40,480

And there was no pain to it. You could poke and poke at it and there was no pain.

264

00:25:40,480 --> 00:25:46,480

And then I had a little scab in my belly button with a little pinhole puncture mark in the middle.

265

00:25:46,480 --> 00:25:52,480

And for the most part, I just kind of kicked it out, didn't think anything of it until my daughter came to me.

266

00:25:52,480 --> 00:25:56,480

She had the same huge bruise, which was not painful to her.

267

00:25:56,480 --> 00:26:02,480

Then I asked if I could see her belly button and I checked and she had the same thing as I did.

268

00:26:02,480 --> 00:26:06,480

Nothing in my psychiatric education, nothing in medical school,

269

00:26:06,480 --> 00:26:09,480

made me an expert on ufology and extraterrestrials.

270

00:26:09,480 --> 00:26:14,480

They either exist or they don't exist. They either abduct people or they don't abduct people.

271

00:26:14,480 --> 00:26:17,480

But that's not the issue. When somebody comes to me as a clinician,

272

00:26:17,480 --> 00:26:22,480

my job is to help them come to a point of comfort with their own experience.

273

00:26:22,480 --> 00:26:29,480

Dr. Rima Lebo believes hypnotherapy may be unduly influencing alleged abductees.

274

00:26:29,480 --> 00:26:33,480

She uses biofeedback to achieve similar states of relaxation.

275

00:26:33,480 --> 00:26:39,480

Surprisingly, she's hearing the same kinds of abduction stories that have been reported by

hypnotherapists.

276

00:26:39,480 --> 00:26:46,480

They appear to have been overwhelmed by an episode outside their own control and making,

277

00:26:46,480 --> 00:26:51,480

which leaves them in a post-traumatic state. That's very interesting.

278

00:26:51,480 --> 00:26:58,480

Either there's something very special about this fantasy that causes what otherwise does not occur,

279

00:26:58,480 --> 00:27:00,480

or it's not a fantasy.

280

00:27:00,480 --> 00:27:05,480

This is the craft I saw in 1973 out in the backyard. This is pretty much what it looked like.

281

00:27:05,480 --> 00:27:13,480

Brian Koski says his abduction was not a fantasy. He has vivid recollections of being aboard alien spacecraft.

282

00:27:13,480 --> 00:27:19,480

Have these little silver panels that tend to control a ship with their mind.

283

00:27:19,480 --> 00:27:24,480

This is the tail I seem to do their navigation from. I always saw those.

284

00:27:25,480 --> 00:27:30,480

I know something has happened to me, but I was in extreme denial.

285

00:27:30,480 --> 00:27:38,480

They can't tell the difference between whether it was a memory, a real event, or whether it was imagination.

286

00:27:38,480 --> 00:27:40,480

And this is the problem.

287

00:27:40,480 --> 00:27:44,480

Kurt had been troubled by periods of missing time.

288

00:27:44,480 --> 00:27:51,480

He remembers several episodes of Coming Two on his back porch, not knowing how or when he'd gotten there.

289

00:27:51,480 --> 00:27:55,480

Under hypnosis, Kurt filled in the missing time.

290

00:27:55,480 --> 00:28:04,480

I looked down the stairs to my right, and standing there was a being that is very hard to describe.

291

00:28:04,480 --> 00:28:09,480

It's unlike anything I have ever seen or have since seen.

292

00:28:09,480 --> 00:28:17,480

It was approximately five foot tall. I call it kind of a pillowy liquid kind of being.

293

00:28:17,480 --> 00:28:24,480

There's no form to it. The only thing that even remotely resembles a human was what I believed to be.

294

00:28:24,480 --> 00:28:30,480

Two little black, like raggedy and doll eyes that it had in the area that looked like its head.

295

00:28:30,480 --> 00:28:34,480

Other than that, unlike anything that I've ever seen.

296

00:28:34,480 --> 00:28:44,480

Keith Thompson is the author of *Angels and Aliens*, a book that tries to delineate between myth, imagination, and reality in the abduction phenomenon.

297

00:28:44,480 --> 00:28:49,480

Although he remains grounded in the laws of physics, Thompson still keeps an open mind.

298

00:28:49,480 --> 00:28:56,480

I believe they've had experiences of a reality that is somehow both part of our reality, but also larger than our reality.

299

00:28:56,480 --> 00:29:03,480

It's almost as if my dog is sitting on the living room floor. I'm watching the evening news.

300

00:29:03,480 --> 00:29:07,480

I can follow what's going on in the evening news differently from my dog.

301

00:29:07,480 --> 00:29:13,480

My dog hears the sounds. He hears the newsman and the reporter's voice, but doesn't track it the same way.

302

00:29:13,480 --> 00:29:19,480

I do. It doesn't track the content. Likewise, I think in relationship to the UFO phenomenon, we're tuned into it.

303

00:29:19,480 --> 00:29:27,480

But it is so dimensional. It is so complex and so much more comprehensive than our capacity to perceive it,

304

00:29:27,480 --> 00:29:31,480

that we can only pick out those parts of the signal that fit for us.

305

00:29:31,480 --> 00:29:36,480

And we do our best to explain them to ourselves. But we end up having to try to fit it into our categories,

306

00:29:36,480 --> 00:29:40,480

and I think the problem with that is that it just doesn't fit. It's a larger reality.

307

00:29:40,480 --> 00:29:45,480

I believe I've been touched by something that's not from this reality that we're used to.

308

00:29:45,480 --> 00:29:51,480

You're not just seeing something in the sky and saying, that was weird. This is something that affects you all your life.

309

00:29:51,480 --> 00:29:58,480

I know it as real as I'm sitting here talking to you people, that what has happened to me has indeed happened.

310

00:29:58,480 --> 00:30:04,480

Joining me now is psychologist Dr. Robert Baker. He is Professor Emeritus from the University of Kentucky.

311

00:30:04,480 --> 00:30:10,480

Dr. Baker is a researcher who believes that the alien abduction phenomenon is out of control.

312

00:30:10,480 --> 00:30:17,480

Dr. Baker, if supposed abductees feel that they're being helped through therapy and hypnosis, well, what's the harm in that?

313

00:30:17,480 --> 00:30:23,480

There's no harm in hypnosis itself. It can be used both for good and for evil.

314

00:30:23,480 --> 00:30:30,480

The problem is that the hypnotist should not mislead both himself and his client

315

00:30:30,480 --> 00:30:37,480

into believing certain things happened that never happened, or to believe that things didn't happen that did happen.

316

00:30:37,480 --> 00:30:44,480

What advice would you have Dr. Baker for someone who believes that they may have been the victim of an alien abduction? What should they do?

317

00:30:44,480 --> 00:30:55,480

You should go to see a therapist who can help you deal with the anxiety and the other aspects of your living that have been disturbed by this experience that you think you've had.

318

00:30:55,480 --> 00:31:01,480

Dr. Robert Baker, thank you for joining us. And we'll be back with more sightings in just a moment.

319

00:31:01,480 --> 00:31:06,480

Coming up is time travel, an amazing new possibility.

320

00:31:06,480 --> 00:31:11,480

It was very exhilarating, the initial impact of jumping into the future.

321

00:31:15,480 --> 00:31:22,480

Throughout history there have been visionaries. In the 15th century, Leonardo da Vinci was designing helicopters.

322

00:31:22,480 --> 00:31:29,480

Is this ability to see into the future a special gift or something that lies dormant within all of us?

323

00:31:29,480 --> 00:31:36,480

Hypnotherapist Dr. Chet Snow believes that he may hold the key to unlocking a visionary power we all have.

324

00:31:37,480 --> 00:31:40,480

The first step, paradoxically, is to forget.

325

00:31:40,480 --> 00:31:45,480

Forget your preconceived notions about past, present and future.

326

00:31:45,480 --> 00:31:51,480

Allow your mind to ask the same questions great philosophers have asked since the beginning of history.

327

00:31:51,480 --> 00:31:55,480

What is time and can I travel through?

328

00:31:58,480 --> 00:32:03,480

It was very exhilarating, the initial impact of jumping into the future.

329

00:32:04,480 --> 00:32:10,480

I was a little afraid the first time when I experienced my death in this life. That was kind of scary.

330

00:32:12,480 --> 00:32:17,480

I like the world like it is now. I'm not sure about the vision I saw of the future.

331

00:32:18,480 --> 00:32:24,480

I want to start out by having us take a few deep breaths, so just close your eyes.

332

00:32:25,480 --> 00:32:29,480

Their visions are the result of a process called future life progression.

333

00:32:29,480 --> 00:32:39,480

In Santa Fe, New Mexico, Dr. Chet Snow believes relaxation techniques and hypnosis allow his clients to transcend time and experience a possible future.

334

00:32:40,480 --> 00:32:50,480

It is essentially what we have found is that when you're in the dreaming mind, you can bypass this concept of past to present to future.

335

00:32:50,480 --> 00:32:59,480

And you're sort of in an eternal now. And so the mind can then look at the future and yet to the person who's experiencing it,

336

00:32:59,480 --> 00:33:03,480

it's what they're experiencing right at that moment and so it's like simultaneous to them.

337

00:33:04,480 --> 00:33:13,480

Until recently, interdimensional time travel was considered an exclusive club whose membership was limited to Nostradamus,

338

00:33:13,480 --> 00:33:16,480

Edward Casey and a handful of psychics and futurists.

339

00:33:17,480 --> 00:33:24,480

Certainly looking for the future or hunting for the future is a very ancient tradition and people have wanted to know about the future

340

00:33:24,480 --> 00:33:27,480

as long probably as there have been human beings on the planet.

341

00:33:27,480 --> 00:33:35,480

What has changed is that now instead of relying on a few psychics who have this extraordinary ability to look into the future,

342

00:33:35,480 --> 00:33:42,480

ordinary people can actually do a workshop and look into their own future.

343

00:33:42,480 --> 00:33:45,480

Now people can see a very personalized vision.

344

00:33:45,480 --> 00:33:54,480

We were supposed to die and experience our life in the future, but for some reason it triggered me to experience my death in this life.

345

00:33:55,480 --> 00:33:58,480

So I wasn't really ready for that, but it happened.

346

00:33:58,480 --> 00:34:04,480

When I looked in the mirror, I scared myself and I was really, really skinny and I looked at my legs and they looked like polio legs.

347

00:34:04,480 --> 00:34:09,480

And I think I was like dying of some disease where you just get initiated.

348

00:34:11,480 --> 00:34:16,480

Death is an inevitable stage in any future life progression, but it doesn't necessarily end there.

349

00:34:16,480 --> 00:34:21,480

Both Michael Husband and Joff Seljes experienced a personal future that took them to the sea.

350

00:34:22,480 --> 00:34:24,480

So the year was 2150.

351

00:34:24,480 --> 00:34:29,480

I was working in a underwater station.

352

00:34:29,480 --> 00:34:40,480

There were tanks filled with fish and there were long trays of salt water that also had sea life in them.

353

00:34:40,480 --> 00:34:42,480

And I was a monitor of some kind.

354

00:34:42,480 --> 00:34:48,480

I had machinery, I had notes and my job was to monitor the sea life.

355

00:34:49,480 --> 00:34:54,480

I was piloting a vehicle which went in and out of the water, up and down.

356

00:34:54,480 --> 00:34:57,480

When I went under the water, the water was very clear and blue.

357

00:34:57,480 --> 00:35:02,480

There were perhaps domes or something down at the ocean floor.

358

00:35:02,480 --> 00:35:06,480

I did look at a calendar and it was 2150.

359

00:35:06,480 --> 00:35:08,480

That was the year.

360

00:35:08,480 --> 00:35:14,480

Brainwave patterns recorded during future life progressions mimic those recorded in the dream state.

361

00:35:14,480 --> 00:35:20,480

But Joff and Michael believe they have shared a vision of the future that cannot be a dream.

362

00:35:20,480 --> 00:35:25,480

We were both very stunned to find that we both had very, very similar visions.

363

00:35:25,480 --> 00:35:28,480

We had seen the same landscape.

364

00:35:28,480 --> 00:35:33,480

I suspect that I was patrolling the same ocean where his station was located.

365

00:35:33,480 --> 00:35:36,480

We described the same living quarters.

366

00:35:36,480 --> 00:35:41,480

So there were a lot of things, similarities that were surprising to us.

367

00:35:41,480 --> 00:35:46,480

Because time travel is an interior process, it can't be measured or charted.

368

00:35:46,480 --> 00:35:51,480

But while many in mainstream science dismiss future life progression as a mental exercise,

369

00:35:51,480 --> 00:35:54,480

they do believe in the possibility of time travel.

370

00:35:54,480 --> 00:35:59,480

In the realm of physics, time travel is possible in principle.

371

00:35:59,480 --> 00:36:03,480

If we look at particles and objects that are the size of atoms,

372

00:36:03,480 --> 00:36:07,480

they can be sped up enough so that we can see real time changes.

373

00:36:07,480 --> 00:36:12,480

For ordinary sized objects, people, rocket ships, airplanes, ordinary clocks,

374

00:36:12,480 --> 00:36:17,480

the speeds that are practical with current technology are simply too low

375

00:36:17,480 --> 00:36:20,480

to actually get any significant change in time.

376

00:36:20,480 --> 00:36:26,480

But after 25 years teaching physics, Dr. Jones feels there's much we don't understand yet.

377

00:36:26,480 --> 00:36:31,480

Personally, I think that time travel through hypnotic projection

378

00:36:31,480 --> 00:36:36,480

or some other kind of mental gymnastics is a possibility

379

00:36:36,480 --> 00:36:41,480

because I do believe that our current notions about time and space

380

00:36:41,480 --> 00:36:45,480

as defined and described in science are not the whole story.

381

00:36:45,480 --> 00:36:50,480

I don't believe that we really understand everything there is to know about existence and time and space and matter.

382

00:36:50,480 --> 00:36:55,480

At least I'm open to the possibilities and I do think they're possible.

383

00:36:55,480 --> 00:36:57,480

I personally am optimistic about the future.

384

00:36:57,480 --> 00:37:03,480

I think that once humanity gets awakened, then we will make positive and correct choices

385

00:37:03,480 --> 00:37:08,480

and the future will turn out to be much brighter than some of the people have seen in these future dreams.

386

00:37:08,480 --> 00:37:16,480

Dr. Snow believes these visions come when the conscious mind releases its preconceptions about past, present and future

387

00:37:16,480 --> 00:37:24,480

and steps into the time-space continuum, a concept first suggested by a visionary named Albert Einstein.

388

00:37:26,480 --> 00:37:31,480

Hypnosis has been used to great advantage by a number of professional therapists,

389

00:37:31,480 --> 00:37:36,480

but it's wise to remember that it's also been used by professional showmen and carnivals.

390

00:37:36,480 --> 00:37:43,480

Before investing time in money and hypnotherapy, do your own research, investigate the claims made by the therapists,

391

00:37:43,480 --> 00:37:48,480

talk to former patients and then make an informed decision.

392

00:37:48,480 --> 00:37:54,480

Next is an alien intelligence using music to communicate through these crop circles.

393

00:37:54,480 --> 00:37:58,480

All of the right keys on the piano are present in the crop circles.

394

00:38:01,480 --> 00:38:10,480

Astronomer Gerald Hawkins drew worldwide attention when he proved mathematically that Stonehenge is a giant celestial calendar.

395

00:38:10,480 --> 00:38:14,480

Now, Dr. Hawkins has turned his attention to crop circles.

396

00:38:14,480 --> 00:38:19,480

He believes that some crop circles display geometric principles so advanced

397

00:38:19,480 --> 00:38:24,480

they can only have been created by the greatest mathematical minds on this planet.

398

00:38:25,480 --> 00:38:29,480

Geometry turns shapes into numbers.

399

00:38:29,480 --> 00:38:33,480

Here's an easy one. Two circles, one inside another.

400

00:38:33,480 --> 00:38:36,480

The big circle is twice as big as the little circle.

401

00:38:36,480 --> 00:38:39,480

In geometry, that's called a ratio of two to one.

402

00:38:39,480 --> 00:38:42,480

The big circle is two times the size of the little circle.

403

00:38:42,480 --> 00:38:48,480

Advanced mathematicians like Professor Hawkins can figure out ratios for almost every geometric pattern

404

00:38:48,480 --> 00:38:53,480

where we see just three circles, he sees a ratio of 16 to 3.

405

00:38:53,480 --> 00:38:58,480

Where we see three enigmatic crop circles, Hawkins sees mathematical genius.

406

00:38:58,480 --> 00:39:03,480

The circle makers have set up a theorem where we can prove by Euclidean geometry

407

00:39:03,480 --> 00:39:14,480

that the large circle is exactly  $16/3$  times the area of the middle circle.

408

00:39:14,480 --> 00:39:22,480

$16/3$  thirds, a very strange number, but it's exactly the note of F in the third octave.

409

00:39:22,480 --> 00:39:25,480

How can a fraction be a musical note?

410

00:39:25,480 --> 00:39:31,480

Different notes travel to your ear at different frequencies. C is wavier than G.

411

00:39:31,480 --> 00:39:37,480

The difference between C and G, like the difference between geometric shapes, can be written down as a ratio.

412

00:39:37,480 --> 00:39:40,480

Here are the ratios for one musical scale.

413

00:39:40,480 --> 00:39:44,480

Here are the ratios of eight crop circles Hawkins has studied.

414

00:39:44,480 --> 00:39:47,480

Strange numbers, but they're exactly the same.

415

00:39:48,480 --> 00:39:58,480

The maker of the circles is, we have to admit, clever, not only in making them, but in what is encoded in them.

416

00:39:58,480 --> 00:40:02,480

One possibility is that they're not humans.

417

00:40:02,480 --> 00:40:09,480

Is someone or something with a superior intellect sending us messages through these complex circles?

418

00:40:09,480 --> 00:40:16,480

Are these combinations of geometric patterns really combinations of notes that play out an extraterrestrial message?

419

00:40:16,480 --> 00:40:25,480

At the University of California, San Diego, professor of music, F. Richard Moore, is looking for a musical message that might be encoded in the crop circles.

420

00:40:25,480 --> 00:40:34,480

What I did was to use a computer to synthesize the sounds so we actually hear them in the precise relationships that they are expressed in these mathematical theorems.

421

00:40:34,480 --> 00:40:44,480

The first set of results is just a sequence of 14 different sounds that correspond to the 14 different crop circle theorems that I've been provided with.

422

00:40:47,480 --> 00:40:53,480

After playing the circles one at a time, Professor Moore combined them.

423

00:40:53,480 --> 00:41:04,480

This is the crop circle chord, and it's all 14 of these messages combined into a single chord that lasts for several seconds.

424

00:41:05,480 --> 00:41:24,480

Perhaps in trying to communicate things between different species or different types of intelligent beings, we have to rely on things that are very fundamental, having to do with basic relationships,

425

00:41:24,480 --> 00:41:34,480

because we have no conventional way of discussing things when you don't know even the size of someone or what temperatures they like to live at and this sort of thing.

426

00:41:34,480 --> 00:41:42,480

Could the math of the crop circles and their musical properties simply be the product of coincidence and an overactive imagination?

427

00:41:42,480 --> 00:41:44,480

Fields don't naturally lie down in circles.

428

00:41:44,480 --> 00:41:48,480

Lots of crop fields have lots of tramlings in them.

429

00:41:48,480 --> 00:41:53,480

Horses and cows walk around in grains of wheat and barley all the time. They don't leave circles.

430

00:41:53,480 --> 00:42:02,480

Circles are special, and that's why we recognize them. They are too special to suspect that they're there for no reason at all.

431

00:42:02,480 --> 00:42:10,480

Professor Moore's passion for music and his skill with computers challenges him to search for meaning in the crop messages that lie a cognitive way.

432

00:42:10,480 --> 00:42:12,480

He believes, though, that we've got a long way to go.

433

00:42:12,480 --> 00:42:22,480

The stage of development that we're at corresponds to a tribe of Neanderthals discovering suddenly a grand piano sitting in the middle of a field.

434

00:42:22,480 --> 00:42:28,480

And our problem is to discover its function and to learn to use it.

435

00:42:28,480 --> 00:42:32,480

And it'll be a while, I think, before we figure it out.

436

00:42:32,480 --> 00:42:38,480

The idea of using music as a form of intergalactic communication is not unique to Dr. Hawkins.

437

00:42:38,480 --> 00:42:50,480

When NASA launched the Voyager space probe in 1977, among its cargo was a 12-inch copper disc and a playing needle, in case the Voyager was intercepted by intelligent life.

438

00:42:50,480 --> 00:42:53,480

The record carried greetings in 55 different languages.

439

00:42:53,480 --> 00:42:58,480

A message from then-president Jimmy Carter and 90 Minutes of Music.

440

00:43:21,480 --> 00:43:33,480

On the next edition of Sightings, survivors thought it was the end of the world, an explosion bigger than 2,000 A-bombs, and now Russian scientists believe a UFO crashed in Siberia.

441

00:43:33,480 --> 00:43:38,480

Then, a grisly supernatural force may have caused these bizarre deaths.

442

00:43:38,480 --> 00:43:47,480

And you can't see it, you can't touch it, but a mysterious ghostly energy has been captured on tape in an exclusive Sightings investigation.

443

00:43:48,480 --> 00:43:54,480

That's next time. Until then, remember, no mystery is closed to an open mind.

444

00:43:54,480 --> 00:43:57,480

For Sightings, I'm Tim White.

445

00:44:17,480 --> 00:44:19,480

Sightings, on Sight-Eye.
