

1

00:00:00,000 --> 00:00:06,000

On this edition of Sightings, a mysterious force lashes out at the residents of this house.

2

00:00:06,000 --> 00:00:07,000

We've got fresh blood here.

3

00:00:07,000 --> 00:00:11,000

In this sightings exclusive, a dangerous spirit makes contact.

4

00:00:14,000 --> 00:00:17,000

We cannot, in our own bodies, make that sound.

5

00:00:17,000 --> 00:00:26,000

Then, secrets from the Red Empire, the Soviet military called at height 611, a UFO crashed here, and now the evidence is analyzed.

6

00:00:26,000 --> 00:00:29,000

It could very well be of an extraterrestrial origin.

7

00:00:29,000 --> 00:00:32,000

Of course, it may not have been a hoax after all.

8

00:00:32,000 --> 00:00:34,000

Witnesses tell us that Nessie lives.

9

00:00:34,000 --> 00:00:40,000

All I can say is that I saw a very large creature, living creature for sure.

10

00:00:40,000 --> 00:00:45,000

And this boy's mysterious connection with dolphins leads to a miracle.

11

00:00:45,000 --> 00:00:49,000

The dolphins just went crazy. It was like he had come home. He was in heaven now.

12

00:00:59,000 --> 00:01:21,000

Music

13

00:01:21,000 --> 00:01:24,000

Welcome to Sightings. I'm Tim White.

14

00:01:24,000 --> 00:01:34,000

Since Sightings went online, your response has been staggering, and no story has generated more e-mail than our series of reports on Heartland Ghost.

15

00:01:34,000 --> 00:01:40,000

We heard from skeptics, believers, and many viewers who had good ideas about how to broaden our investigation.

16

00:01:40,000 --> 00:01:48,000

So good, in fact, we decided to put them into action when we returned to the house with world-renowned parapsychologist, Kerry Gaynor.

17

00:01:49,000 --> 00:01:54,000

For the Midwestern family who lives here, the last two years have been a paranormal nightmare.

18

00:01:54,000 --> 00:02:02,000

They've asked us not to reveal their true names, so we're using the pseudonyms Pam, Jeff, and their young son, Donnie.

19

00:02:02,000 --> 00:02:10,000

When Sightings first came to document the phenomena here, we were stunned to see long, bleeding

welts forming on Jeff's body.

20

00:02:10,000 --> 00:02:14,000

He believed it was the work of a child ghost family called Sally.

21

00:02:14,000 --> 00:02:16,000

I personally wanted to stop.

22

00:02:16,000 --> 00:02:25,000

We contacted parapsychologist Kerry Gaynor, whose groundbreaking investigations of the entity in Poltergeist's cases have made him an undisputed authority in the field.

23

00:02:25,000 --> 00:02:34,000

This is the beginning of the research, and a lot more needs to be done in order for me to really feel comfortable that this is a legitimate case.

24

00:02:34,000 --> 00:02:42,000

So Sightings returned to the house on two subsequent occasions, and each time the pattern of bloody welts appeared on Jeff.

25

00:02:42,000 --> 00:02:55,000

There's one question that friends and relatives that do know of our situation ask, and I'm sure probably everyone at your television viewers ask, is why do you stay here?

26

00:02:55,000 --> 00:03:00,000

Why don't you just get out? What holds you there?

27

00:03:00,000 --> 00:03:08,000

Curiosity. There needs to be more data so that we can know what exactly this is, what causes it.

28

00:03:08,000 --> 00:03:13,000

Why do these things happen to certain people, certain places, certain times?

29

00:03:13,000 --> 00:03:20,000

Based on our initial findings, Kerry Gaynor joined the Sightings investigative team on our most recent trip to the Midwest.

30

00:03:20,000 --> 00:03:25,000

Tell me about your fear level in the beginning and how you feel now.

31

00:03:25,000 --> 00:03:33,000

After viewing hours of videotape shot in the field, Kerry Gaynor sat with Pam and Jeff to develop a

detailed profile of the ghostly activity.

32

00:03:33,000 --> 00:03:42,000

We also put in place an arsenal of electronics, oscilloscopes, frequency counters and surveillance cameras that would monitor the house continuously.

33

00:03:42,000 --> 00:03:50,000

Much of our equipment was concentrated in the nursery where earlier photographic anomalies had been recorded.

34

00:03:50,000 --> 00:03:59,000

Another camera position was at the top of the stairs where, on a previous visit, psychic Peter James had encountered what he felt was a frightening entity.

35

00:03:59,000 --> 00:04:07,000

I'm getting a lot of resistance right here at the door, meaning whatever is in the room wants me out.

36

00:04:07,000 --> 00:04:13,000

Two cameras were placed in the living room area where many people had experienced strange events.

37

00:04:13,000 --> 00:04:19,000

Our pictures on the wall are turned upside down. The vacuum will turn off when we're vacuuming.

38

00:04:19,000 --> 00:04:24,000

The TV will come back on after we've turned it off. The stereo will come back on after we've turned it off.

39

00:04:24,000 --> 00:04:28,000

My son's musical toys will play for no reason.

40

00:04:28,000 --> 00:04:33,000

We were now set to monitor any anomalous activity that might occur inside the house.

41

00:04:33,000 --> 00:04:41,000

We turned the family kitchen into a control center. Audio transmitters were placed around the house and separate video recorders assigned to each camera.

42

00:04:41,000 --> 00:04:50,000

We also set up a handheld thermal imaging system. Any unusual cold spots would turn the normally red tones of human flesh to blue.

43

00:04:50,000 --> 00:04:53,000

During this setup, producer Craig Armstrong had his own encounter.

44

00:04:53,000 --> 00:05:01,000

It went right again, right over here. But I get this, I get like a cool right here, right here. It's really weird.

45

00:05:01,000 --> 00:05:11,000

Perhaps it was a premonition of things to come, or a result of what Peter James had felt during his psychic investigation when he sensed death and despair.

46

00:05:11,000 --> 00:05:20,000

I do feel, as we speak, that over the years, that at least three people died in this house.

47

00:05:21,000 --> 00:05:29,000

Our review of town records confirmed Peter James' psychic impressions. Three people did, in fact, die in the house.

48

00:05:29,000 --> 00:05:39,000

One in 1872, another in 1900, the last in 1918. We unearthed their death records on the eve of our all night vigil.

49

00:05:39,000 --> 00:05:45,000

Kerry Gaynor asked that his investigation continue by low level lamp light.

50

00:05:45,000 --> 00:05:51,000

Alright, why don't you make a request, anything that comes to your mind?

51

00:05:51,000 --> 00:05:59,000

Is that like you do this for me, please? I'd like for you to show them that you're really here.

52

00:05:59,000 --> 00:06:06,000

No one in the room heard a response, but our videotape recorded a chilling sound.

53

00:06:07,000 --> 00:06:18,000

We've asked two independent experts to analyze the sound and determine its possible origin.

54

00:06:22,000 --> 00:06:27,000

We'll bring you the complete report on their findings later in this program.

55

00:06:27,000 --> 00:06:29,000

Talk about not having much longer.

56

00:06:30,000 --> 00:06:36,000

During the time that the strange sound was being recorded, only one of two oil lamps began to flicker.

57

00:06:36,000 --> 00:06:41,000

Although the wick was trimmed, the windows were closed and the air was still.

58

00:06:41,000 --> 00:06:45,000

Then, a few minutes later, Jeff felt a bizarre chill in front of him.

59

00:06:54,000 --> 00:06:56,000

Yeah, we've got a new scratch.

60

00:06:59,000 --> 00:07:04,000

Yeah, we've got fresh blood here. This wasn't here two minutes ago.

61

00:07:04,000 --> 00:07:10,000

It was just one of many scratches that appeared periodically throughout a night of bizarre events.

62

00:07:10,000 --> 00:07:16,000

When Pam walked in a specific area at the top of the stairs where many had felt a menacing presence,

63

00:07:16,000 --> 00:07:23,000

our frequency counter suddenly and inexplicably jumped from 399 to 575 megahertz.

64

00:07:23,000 --> 00:07:29,000

Earlier in the day, in the same area, one of our surveillance cameras picked up large amounts of interference,

65

00:07:29,000 --> 00:07:32,000

seen here in slow motion.

66

00:07:32,000 --> 00:07:38,000

But this camera was on a closed circuit and it would be impossible for it to pick up electrical interference.

67

00:07:38,000 --> 00:07:44,000

And in the nursery, video signals seemed to drift and then disappear entirely,

68

00:07:44,000 --> 00:07:48,000

although there was no break in electrical power or the video cable.

69

00:07:48,000 --> 00:07:52,000

After a few moments, the signal returned to normal.

70

00:07:54,000 --> 00:07:58,000

The next morning, a sense of calm returned to the house.

71

00:07:58,000 --> 00:08:05,000

But for paranormal investigator, Carrie Gaynor, it had been an unforgettable night filled with unexplained events.

72

00:08:05,000 --> 00:08:10,000

Yesterday and last evening, I spent about 14 straight hours here investigating this case.

73

00:08:10,000 --> 00:08:16,000

During that time, Jeff was attacked 11 separate times.

74

00:08:16,000 --> 00:08:20,000

There were 11 separate instances of scratch marks on his body.

75

00:08:20,000 --> 00:08:27,000

Some of the scratches were very thin and some were very thick, welt-like scratches that were really quite frightening.

76

00:08:27,000 --> 00:08:34,000

Now, I was sitting here, he was sitting here, he was within a foot or two of me,

77

00:08:34,000 --> 00:08:38,000

and I had him under my supervision at all times.

78

00:08:38,000 --> 00:08:45,000

If he got up and walked away when he came back, I asked him to take off his shirt so that I could examine what marks were there

79

00:08:45,000 --> 00:08:48,000

to make sure there was no trickery involved.

80

00:08:48,000 --> 00:08:52,000

During the last 20 years, I've investigated about 850 cases and during that time,

81

00:08:52,000 --> 00:08:55,000

I have never come across anything like this.

82

00:08:55,000 --> 00:09:03,000

I think we've got something very interesting and very exciting here and really potentially dangerous.

83

00:09:03,000 --> 00:09:08,000

Coming up, is this the sound of a dangerous entity communicating?

84

00:09:08,000 --> 00:09:11,000

I've never heard anything quite like it.

85

00:09:11,000 --> 00:09:14,000

Our startling discovery is analyzed next.

86

00:09:16,000 --> 00:09:24,000

During our most recent investigation into the Heartland Ghost, we heard this.

87

00:09:24,000 --> 00:09:27,000

I'd like for you to show them that you're really here.

88

00:09:31,000 --> 00:09:39,000

That anomalous low-level noise wasn't heard in the field by producer Craig Armstrong or any other member of our crew,

89

00:09:39,000 --> 00:09:42,000

but back in our sightings offices in the midst of an edit session,

90

00:09:42,000 --> 00:09:49,000

Armstrong and editor Mark Quinn Anderson heard the ghostly sounds that seemed to come in response to Jeff's plea.

91

00:09:56,000 --> 00:10:01,000

We immediately took copies of the suspect tape to two diverse audio experts.

92

00:10:01,000 --> 00:10:09,000

Rick Wilson, president of DigiSonic, is a forensic audio specialist who works routinely with the CIA and FBI

93

00:10:09,000 --> 00:10:13,000

and has also analyzed black box recordings for the FAA.

94

00:10:20,000 --> 00:10:27,000

We looked for a lot of the characteristics that would immediately identify it as a definitely mechanical sound,

95

00:10:27,000 --> 00:10:30,000

as a definitely electronic sound, and those were ruled out.

96

00:10:30,000 --> 00:10:35,000

See, one thing that makes this sound interesting and eliminates a lot of possibilities right off the bat

97

00:10:35,000 --> 00:10:38,000

is that above about 500 hertz, there's nothing there.

98

00:10:38,000 --> 00:10:44,000

There's nothing in this sound. There's a lot of background noise, but that's constant before and after the sound.

99

00:10:44,000 --> 00:10:48,000

But when this sound comes in, it's all low frequency, and that's it.

100

00:10:48,000 --> 00:10:52,000

And we cannot, in our own bodies, make that sound.

101

00:10:52,000 --> 00:10:57,000

If the sound is not natural, could it be supernatural?

102

00:10:57,000 --> 00:11:02,000

For an answer, we turn to electronic voice phenomena authority Sarah Eastep.

103

00:11:06,000 --> 00:11:14,000

I've been taping for 18 years, and I've investigated a number of haunted homes, houses, properties, locations,

104

00:11:14,000 --> 00:11:17,000

and I've never heard anything quite like it.

105

00:11:20,000 --> 00:11:25,000

It sounds more like an energy sound, perhaps put out by the other side.

106

00:11:25,000 --> 00:11:33,000

It's interesting that it came right after Jeff asked them to ask Sally to please let them know that she was here.

107

00:11:33,000 --> 00:11:42,000

And then this low rumbling sound started and built up in volume, an energy sound that perhaps they produced at his request.

108

00:11:42,000 --> 00:11:44,000

Very, very interesting.

109

00:11:44,000 --> 00:11:49,000

Is it a ghost? I really have absolutely no way of knowing. I really don't.

110

00:11:49,000 --> 00:11:57,000

My best bet is that it's something magnetic, and how that magnetism was introduced is anybody's guess.

111

00:11:57,000 --> 00:12:00,000

I'd like for you to show them that you're really here.

112

00:12:05,000 --> 00:12:09,000

Many people have asked, why doesn't the family simply move out?

113

00:12:09,000 --> 00:12:11,000

And in fact, they will be moving as soon as possible.

114

00:12:11,000 --> 00:12:16,000

Sightings will continue to keep in touch with the family to see if the haunting activity follows them,

115

00:12:16,000 --> 00:12:18,000

or if it remains in the house.

116

00:12:19,000 --> 00:12:26,000

Next, is it all a lie? A new high-tech investigation and terrified eyewitnesses tell us that Nessie lives.

117

00:12:26,000 --> 00:12:29,000

They were shocked, Bridget. Totally shocked.

118

00:12:33,000 --> 00:12:38,000

Drum the Docket on the shores of Loch Ness is the town a monster built.

119

00:12:38,000 --> 00:12:45,000

Since the 1930s, thousands of biologists, zoologists and tourists have flocked to the Scottish Highlands in search of Nessie,

120

00:12:45,000 --> 00:12:47,000

the Loch Ness monster.

121

00:12:47,000 --> 00:12:54,000

But recent revelations about hoaxed photographs and phony reports are putting a serious dent in Monster Mania.

122

00:12:57,000 --> 00:13:01,000

Suddenly I saw this colossal great hump, about 60 or 70 feet long.

123

00:13:01,000 --> 00:13:07,000

It looked black against the water, you know, and it was going fast against the wind.

124

00:13:07,000 --> 00:13:13,000

All I can say is that I saw a very large creature, living creature, for sure.

125

00:13:14,000 --> 00:13:18,000

I'm convinced there's something. What is it? I don't know, but there's something definite in the law.

126

00:13:18,000 --> 00:13:21,000

That's big. That's moving. That's alive.

127

00:13:23,000 --> 00:13:30,000

Scores of once skeptical eyewitnesses now believe that there is a lake monster hiding in Loch Ness.

128

00:13:30,000 --> 00:13:33,000

And the Loch can hide its secrets well.

129

00:13:33,000 --> 00:13:38,000

900 feet deep, 23 miles long and one mile wide,

130

00:13:38,000 --> 00:13:44,000

it's been estimated that there is enough water in this lake to submerge the entire population of the earth,

131

00:13:44,000 --> 00:13:47,000

all five billion of us, three times over.

132

00:13:47,000 --> 00:13:52,000

That's certainly enough water to hide a small population of unknown aquatic predators.

133

00:13:52,000 --> 00:13:56,000

The thing turned and came streaking across straight towards me.

134

00:13:56,000 --> 00:14:03,000

I was looking from here across the castle and it came straight towards me, very fast, from the far side of the Loch.

135

00:14:03,000 --> 00:14:06,000

But there was no head and neck showing then. There was just this great hump.

136

00:14:06,000 --> 00:14:10,000

The hysteria over the Loch Ness monster really took off in the 1930s,

137

00:14:10,000 --> 00:14:14,000

when a spate of photographs and films captured the world's imagination.

138

00:14:14,000 --> 00:14:21,000

Here is the most unusual film of recent years, but it proves the existence of a monster in Loch Ness.

139

00:14:22,000 --> 00:14:27,000

Taken in 1934, this is the world's most famous photograph of Nessie.

140

00:14:27,000 --> 00:14:34,000

Called the Surgeon's Photo, it has colored our perception of what the monster looks like for more than 60 years.

141

00:14:34,000 --> 00:14:41,000

But a recent in-depth investigation by Alistair Boyd has turned up compelling evidence that this photo is a fake.

142

00:14:41,000 --> 00:14:46,000

People have pinned their faith on that photograph. They believe in Nessie because of that photograph,

143

00:14:46,000 --> 00:14:53,000

which is a very dangerous thing to do, because all that is is a little image on a piece of paper or on a negative,

144

00:14:53,000 --> 00:15:00,000

and at the end of the day, that is all it is. And in fact, it's a model built on a clockwork toy submarine.

145

00:15:00,000 --> 00:15:02,000

There isn't any doubt about that.

146

00:15:02,000 --> 00:15:07,000

The one-foot-high monster was made of plastic wood and set atop a toy submarine.

147

00:15:07,000 --> 00:15:12,000

But one hoax does not explain away hundreds of other credible sightings.

148

00:15:12,000 --> 00:15:20,000

Even after many crop circles were exposed as fakes, there remains extensive documentation that not every one of them is man-made.

149

00:15:20,000 --> 00:15:25,000

It's the same at Loch Ness. Some things just cannot be explained away.

150

00:15:25,000 --> 00:15:30,000

Naturalist Adrian Shine has been studying the Loch for the last 20 years.

151

00:15:30,000 --> 00:15:37,000

The 1980s were rarely the time for sonar. The classic photographs had already been dismissed.

152

00:15:37,000 --> 00:15:48,000

The underwater pictures were controversial. Sonar was the one area in which it seemed that you could get reproducible, unusual results.

153

00:15:48,000 --> 00:15:55,000

And we believe that sonar has revealed some unusual objects in the water column, but the argument is about what they are.

154

00:15:56,000 --> 00:16:00,000

A submarine is the newest addition to the Loch Ness research effort.

155

00:16:00,000 --> 00:16:08,000

Captain Alan Whitfield has experienced some mysterious contacts deep under the murky, peat-stained waters of the Loch.

156

00:16:08,000 --> 00:16:16,000

In July of 1994, a cruise ship above Whitfield's submarine picked up an unusual image on its sonar.

157

00:16:16,000 --> 00:16:23,000

It appeared to be a very large object moving deliberately through the water, shadowing the submarine.

158

00:16:24,000 --> 00:16:27,000

Two targets came up on the screen. One, obviously, the submarine.

159

00:16:27,000 --> 00:16:32,000

A hard target at a depth of about 450 feet. The second target was quite large.

160

00:16:32,000 --> 00:16:35,000

According to the captain, possibly as big as a submarine.

161

00:16:35,000 --> 00:16:44,000

This was definitely a substantial echo. When we saw the large object below the submarine, we immediately contacted the submarine control.

162

00:16:44,000 --> 00:16:51,000

Now, when asked were we towing anything, were we flying anything, we said no, we'd do nothing, and we didn't normally do.

163

00:16:51,000 --> 00:16:53,000

So obviously something was out there.

164

00:16:54,000 --> 00:16:59,000

The question now is not if, but what is roaming the vast blindness of Loch Ness.

165

00:16:59,000 --> 00:17:04,000

And ironically, revelations about hoaxes have helped rather than hindered serious investigation.

166

00:17:04,000 --> 00:17:12,000

The search as photograph, when it was revealed to be a hoax, it got rid of a lot of dead wood, it

got rid of a wild card.

167

00:17:12,000 --> 00:17:18,000

There's never been a sighting like that since, and before, for that matter, the head and the neck doesn't exist.

168

00:17:18,000 --> 00:17:27,000

So now we can concentrate on what we feel are the right sightings, the humpback. This is what's come forward so many times.

169

00:17:27,000 --> 00:17:34,000

Alistair Boyd has revealed many nessy photographs to be hoaxes, but he's not only a debunker.

170

00:17:34,000 --> 00:17:40,000

His intense interest in the subject is the result of his own life-changing encounter at Loch Ness.

171

00:17:40,000 --> 00:17:44,000

There was a large body clearly in the middle of these flippers.

172

00:17:44,000 --> 00:17:49,000

There was a kind of a sort of vortex effect following it. As it went round, I mean, I thought

that's probably that.

173

00:17:49,000 --> 00:17:57,000

And then this huge hump came out of the water. It was rolling forward as it came out.

174

00:17:57,000 --> 00:18:03,000

It was like a whale. It was black. You could see the water running off its back as it came out.

175

00:18:03,000 --> 00:18:09,000

When it actually stabilised, there was no less than 20 feet of it actually sitting there still.

176

00:18:09,000 --> 00:18:18,000

You know, for several seconds it was just sitting there. All I can say is that I saw a very large creature, living creature for sure.

177

00:18:18,000 --> 00:18:25,000

Certainly not a boatwake, certainly not a log, certainly not an otter, certainly not birds or anything else that I've ever seen here.

178

00:18:25,000 --> 00:18:30,000

Sightings travelled to the far side of the Loch, to the small town of Doors.

179

00:18:30,000 --> 00:18:34,000

Like Drumna Drachat, the locals here believe that there is something in the Loch,

180

00:18:34,000 --> 00:18:40,000

but unlike the tourists centre to the west, people in Doors keep their sightings to themselves.

181

00:18:40,000 --> 00:18:46,000

You won't find souvenir shops here, but you will hear about Nessie if you know who to ask.

182

00:18:46,000 --> 00:18:51,000

In 1993, fisherman Roland O'Brien saw something amazing.

183

00:18:51,000 --> 00:18:56,000

It was a large, dark hump, possibly about 8 to 10 feet long, about 4 feet out of the water.

184

00:18:56,000 --> 00:19:03,000

It was dark in colour and there was no head or neck. I couldn't see anything like that at all.

185

00:19:03,000 --> 00:19:10,000

In the middle of the body, there was a splashing commotion at the side of it this time, not in the front of it.

186

00:19:10,000 --> 00:19:18,000

I don't honestly know what that was. It could have been a flipper, then proceeded to about, within about 250 yards from the shore,

187

00:19:18,000 --> 00:19:23,000

but upon it just sank again, no commotion at all. It just sank completely out of sight.

188

00:19:23,000 --> 00:19:27,000

And basically I was shocked, rigid, totally shocked.

189

00:19:28,000 --> 00:19:34,000

The many credible eyewitness accounts stand as the only reliable proof of Nessie's existence.

190

00:19:34,000 --> 00:19:40,000

After compiling the characteristics common to those sightings, we can build this profile of the Loch Ness monster.

191

00:19:40,000 --> 00:19:47,000

The sightings are of a large hump, no head or neck. The creature can move swiftly against the tide.

192

00:19:47,000 --> 00:19:51,000

There are fins at its side. It is black and resembles a whale.

193

00:19:51,000 --> 00:19:56,000

When it submerges, it goes straight down, without a ripple, and it is huge.

194

00:19:56,000 --> 00:20:05,000

60 years have gone by. What do we actually know? Very little, very little. Everybody has theories, but to my mind, there are too many theories at Loch Ness,

195

00:20:05,000 --> 00:20:12,000

and not enough people out here watching. I think if everybody who's ever put forward a theory on the identity of the Loch Ness monster actually had put in a thousand hours watching,

196

00:20:12,000 --> 00:20:14,000

there wouldn't be a mystery.

197

00:20:15,000 --> 00:20:19,000

Where are all the scientists who once considered Loch Ness their second home?

198

00:20:19,000 --> 00:20:23,000

Well, many of them are now concentrating on a more promising lake creature called Champ.

199

00:20:23,000 --> 00:20:29,000

Champ is Nessie's North American cousin, and is thought to inhabit the deep waters of Lake Champlain.

200

00:20:29,000 --> 00:20:35,000

It's been a mystery since 1986, but now there are answers.

201

00:20:35,000 --> 00:20:40,000

It could very well be physical evidence of an extraterrestrial origin.

202

00:20:40,000 --> 00:20:44,000

And later, a little boy's special bond with dolphins leads to a miracle.

203

00:20:45,000 --> 00:20:53,000

An alien craft hurtling through space at a million miles an hour crashes to Earth.

204

00:20:53,000 --> 00:21:00,000

Debris is scattered over a desolate landscape. The military moves in and retrieves the evidence, covering up their tracks.

205

00:21:00,000 --> 00:21:09,000

But this isn't a story about Roswell, New Mexico. It's a remote place called Height 611 in eastern Siberia, and sightings is there to investigate.

206

00:21:10,000 --> 00:21:19,000

Many UFO sightings have occurred in clusters called flaps, and ufologists charge that military bases are the object of alien reconnaissance,

207

00:21:19,000 --> 00:21:22,000

especially bases where nuclear weapons are stored.

208

00:21:22,000 --> 00:21:29,000

In recent years, sightings have occurred near military installations in New Mexico, Nevada, and Florida.

209

00:21:29,000 --> 00:21:33,000

The US military base in Bentwaters, England, a nuclear repository for NATO,

210

00:21:34,000 --> 00:21:41,000

was the site of a series of UFO sightings and power outages over several days in late December 1980.

211

00:21:41,000 --> 00:21:44,000

We are now learning these encounters are not limited to the West.

212

00:21:44,000 --> 00:21:56,000

A series of sightings over the Siberian cities of Vladivostok and Dolnykorsk have some convinced that extraterrestrial spies are surreptitiously observing military installations in the former Soviet Union.

213

00:21:56,000 --> 00:22:02,000

Vladivostok is home to the Russian fleet, including nuclear-powered submarines.

214

00:22:03,000 --> 00:22:10,000

It is a place where UFOs are sighted very frequently and where similar phenomenon occur.

215

00:22:10,000 --> 00:22:15,000

Alexander Rempel is president of the Vladivostok Association of Ufologists.

216

00:22:15,000 --> 00:22:20,000

An engineer and former military officer, Rempel has amassed a catalog of local sightings.

217

00:22:20,000 --> 00:22:24,000

This is a panoramic view of Vladivostok.

218

00:22:24,000 --> 00:22:31,000

In broad daylight, people suddenly saw a bright flash up in the sky, and this glowing sphere rose up.

219

00:22:31,000 --> 00:22:35,000

One passerby had a camera and shot this object.

220

00:22:35,000 --> 00:22:43,000

This photograph of what appears to be a strange three-toed footprint was shot near a Vladivostok military installation.

221

00:22:43,000 --> 00:22:52,000

The traces left by these unusual beings are found at the sites of well-guarded military units.

222

00:22:52,000 --> 00:22:56,000

This is where radioactive waste from Russia is kept.

223

00:22:57,000 --> 00:23:05,000

A few miles away from Vladivostok, near the small mining town of Dolnykorsk, a UFO crashed on this hilltop in 1986.

224

00:23:05,000 --> 00:23:11,000

The site, known only by its height, height 611, is littered with strange debris

225

00:23:11,000 --> 00:23:16,000

and is considered to be one of the most significant UFO locations in all of Russia.

226

00:23:16,000 --> 00:23:22,000

The sphere was red, it was flying straight, and then sharply fell down.

227

00:23:23,000 --> 00:23:29,000

I saw a fire balloon fly from this side and fall there on this knoll.

228

00:23:29,000 --> 00:23:34,000

After that, a fire started. It burned for one hour.

229

00:23:34,000 --> 00:23:42,000

The first person to reach this scene was biologist and Academy of Sciences meteorite commission member Valery Dujildy.

230

00:23:42,000 --> 00:23:48,000

Something was burning. This could have been a meteorite, but meteorites do not cause fires.

231

00:23:48,000 --> 00:23:55,000

When I climbed up to this place, the snow was deep. There I saw a place which left a great impression on me.

232

00:23:55,000 --> 00:24:02,000

There was no snow, it just evaporated. I saw the remains of a burnt tree and the remains of metallic spheres.

233

00:24:03,000 --> 00:24:08,000

Samples of charred metal gathered at the site attracted nationwide attention.

234

00:24:08,000 --> 00:24:12,000

Analysis was done by Russia's most prestigious academies.

235

00:24:12,000 --> 00:24:17,000

Whatever remained, the site itself had such unusual properties.

236

00:24:17,000 --> 00:24:22,000

Paul Stonehill, head of the Russian Ufology Research Center, headquartered in the United States,

237

00:24:22,000 --> 00:24:25,000

has examined many of the samples from height 611.

238

00:24:25,000 --> 00:24:29,000

The mesh itself had something very strange, very unusual.

239

00:24:29,000 --> 00:24:35,000

Tiny filaments, and inside those filaments, quartz filaments,

240

00:24:35,000 --> 00:24:42,000

one could find yet other filaments or nettings, gold nettings,

241

00:24:42,000 --> 00:24:47,000

7 microns thick, I mean a human hair is 56 microns.

242

00:24:47,000 --> 00:24:55,000

Now, we have no technology to insert gold filaments of that size into quartz filaments.

243

00:24:55,000 --> 00:24:58,000

What they could be used for remains an enigma.

244

00:24:58,000 --> 00:25:04,000

It's an enigma that continues to draw serious attention from Russia's top scientific researchers.

245

00:25:04,000 --> 00:25:11,000

Their Academy of Sciences has an ongoing public study of UFOs since the 1970s.

246

00:25:11,000 --> 00:25:14,000

George Knapp is an investigative journalist.

247

00:25:14,000 --> 00:25:20,000

He is frustrated by the seeming lack of interest in UFOs by American academics.

248

00:25:20,000 --> 00:25:26,000

Here, people like Carl Sagan say, you can't study UFOs, there's nothing to study, there's no physical evidence.

249

00:25:26,000 --> 00:25:28,000

Well, that's baloney and the Russians are proving that.

250

00:25:28,000 --> 00:25:36,000

Their Academy of Sciences, the most respected scientific organization in that nation, has been studying it for decades.

251

00:25:36,000 --> 00:25:38,000

They do what scientists are supposed to do.

252

00:25:38,000 --> 00:25:40,000

They take samples, they conduct experiments,

253

00:25:40,000 --> 00:25:45,000

they dig in the soil, they check for radiation, and they've come up with some fairly amazing results.

254

00:25:45,000 --> 00:25:51,000

In the case of samples collected by scientists at Height 611, the results are startling.

255

00:25:51,000 --> 00:25:56,000

It could very well be physical evidence of an extraterrestrial origin.

256

00:25:56,000 --> 00:26:01,000

That was the conclusion of the initial scientific team that went to the site.

257

00:26:01,000 --> 00:26:05,000

There were strange alloys in there that couldn't be readily identified.

258

00:26:05,000 --> 00:26:12,000

Rare earth metals in combinations that have never been seen of natural origin.

259

00:26:12,000 --> 00:26:15,000

Here we can see the results of our tests.

260

00:26:15,000 --> 00:26:19,000

The sample contains elements such as lutetium, nickel, and some others.

261

00:26:19,000 --> 00:26:23,000

But most importantly, it contains the element promethium.

262

00:26:23,000 --> 00:26:28,000

The element promethium is artificial, it cannot be found on the earth.

263

00:26:28,000 --> 00:26:31,000

Human subject testing also took place.

264

00:26:31,000 --> 00:26:38,000

In a controlled study, physicians and medical researchers examined those who had worked at Height 611

265

00:26:38,000 --> 00:26:41,000

in the days following the UFO incident.

266

00:26:41,000 --> 00:26:45,000

Samples of blood, blood pressure, and pulse were taken.

267

00:26:45,000 --> 00:26:51,000

For the group that went to the top of Height 611, the number of red blood cells,

268

00:26:51,000 --> 00:26:57,000

the differential blood count was altered, and the amount of elements in the blood rose.

269

00:26:57,000 --> 00:27:02,000

In the meantime, the control group's blood tests stayed normal.

270

00:27:02,000 --> 00:27:08,000

I believe that either alien machinery or a spaceship fell down and crashed.

271

00:27:08,000 --> 00:27:12,000

I think that otherwise it cannot be explained.

272

00:27:12,000 --> 00:27:17,000

Doctors and researchers inside Russia continue their investigation,

273

00:27:17,000 --> 00:27:22,000

while a handful of American experts are still having difficulty convincing our own scientists

274

00:27:22,000 --> 00:27:25,000

of the importance of Height 611.

275

00:27:26,000 --> 00:27:29,000

Height 611 is extremely important to pay attention to.

276

00:27:29,000 --> 00:27:34,000

I'm glad that somebody actually went to that Height 611 and brought out the information,

277

00:27:34,000 --> 00:27:40,000

because the heights we could reach with that information are still unknown to us.

278

00:27:41,000 --> 00:27:47,000

Our crew returned with this microscopic metal fragment entrusted to us by our Russian contacts.

279

00:27:47,000 --> 00:27:50,000

Analysis of this crucial bit of evidence will take many months.

280

00:27:50,000 --> 00:27:54,000

We'll bring you the results of our findings on a future episode.

281

00:27:55,000 --> 00:28:00,000

Next, an unusual connection between a dolphin and a little boy brings about a medical miracle.

282

00:28:00,000 --> 00:28:05,000

They were like soulmates. They bonded and they just connected.

283

00:28:09,000 --> 00:28:14,000

As recently as 20 years ago, children with Down syndrome were considered hopeless cases.

284

00:28:14,000 --> 00:28:18,000

Doctors routinely recommended that the children be placed in institutions

285

00:28:18,000 --> 00:28:21,000

so their parents could get on with their lives.

286

00:28:21,000 --> 00:28:25,000

Today, parents of Down syndrome children are getting on with their lives

287

00:28:25,000 --> 00:28:29,000

by keeping their children at home and exploring alternative therapies.

288

00:28:29,000 --> 00:28:34,000

In one unique program, they're getting astonishing results.

289

00:28:35,000 --> 00:28:38,000

They are an unlikely breed of therapist.

290

00:28:38,000 --> 00:28:43,000

Dolphins who swim freely yet seek out the company of humans, especially humans in need.

291

00:28:43,000 --> 00:28:48,000

No one knows why a unique bond exists between people and these aquatic mammals,

292

00:28:48,000 --> 00:28:51,000

but it's there and its effect is measurable.

293

00:28:51,000 --> 00:28:56,000

I think the reason that dolphins are interested in human beings is because they're very intelligent

294

00:28:56,000 --> 00:28:58,000

and there's a real sensitivity that they seem to have.

295

00:28:58,000 --> 00:29:03,000

Dr. David Nathanson is a psychologist who has found that dolphin-assisted therapy

296

00:29:03,000 --> 00:29:07,000

is a powerful tool for teaching neurologically impaired children.

297

00:29:07,000 --> 00:29:14,000

About 15 years ago, I was very interested in taking a look at doing some research with animals and children

298

00:29:14,000 --> 00:29:17,000

because I've worked with disabled kids for about 30 years

299

00:29:17,000 --> 00:29:21,000

and there are three things that they seem to be most interested in, animals, music and water.

300

00:29:21,000 --> 00:29:27,000

Animal-assisted therapy generally, if it's done properly by experienced people with gentle animals,

301

00:29:27,000 --> 00:29:28,000

is very effective.

302

00:29:28,000 --> 00:29:33,000

But dolphins are especially helpful because the additional dimension of being in warm water

303

00:29:33,000 --> 00:29:37,000

and the fact that the dolphins are so intelligent and sensitive

304

00:29:37,000 --> 00:29:40,000

makes it almost kind of the optimum environment for healing.

305

00:29:40,000 --> 00:29:44,000

Kathy Anderson already had two children, Mia and Andrea,

306

00:29:44,000 --> 00:29:46,000

when her son, Dean Paul, was born.

307

00:29:46,000 --> 00:29:52,000

When Dean Paul was first born, the feelings were very mixed.

308

00:29:52,000 --> 00:29:57,000

I knew immediately as soon as I held him that he had Down syndrome.

309

00:29:57,000 --> 00:30:02,000

It was kind of a scary feeling, but then I also knew that somehow, some way,

310

00:30:02,000 --> 00:30:04,000

everything was really going to be all right.

311

00:30:04,000 --> 00:30:06,000

He wasn't like a normal baby.

312

00:30:06,000 --> 00:30:08,000

He cried, but he didn't, that's about it.

313

00:30:08,000 --> 00:30:11,000

He didn't make any noise, just kind of laid there.

314

00:30:11,000 --> 00:30:14,000

He was more like a doll than anything else.

315

00:30:14,000 --> 00:30:19,000

Down syndrome is a congenital disorder in which there is an extra chromosome

316

00:30:19,000 --> 00:30:21,000

present in each cell of the body.

317

00:30:21,000 --> 00:30:26,000

The condition causes toxins to build up between the brain and the skull.

318

00:30:26,000 --> 00:30:29,000

As a result, the brain cannot grow to full size.

319

00:30:29,000 --> 00:30:33,000

Most kids with Down syndrome are in the moderate range of mental retardation.

320

00:30:33,000 --> 00:30:36,000

Some are in the mild range, some are in the severe range.

321

00:30:36,000 --> 00:30:41,000

When Dean Paul was first born, the doctors said that he would be a vegetable.

322

00:30:41,000 --> 00:30:43,000

And that was the word they used.

323

00:30:43,000 --> 00:30:45,000

He would not have thought processes.

324

00:30:45,000 --> 00:30:50,000

If we were lucky, he would eventually walk and be able to dress himself

325

00:30:50,000 --> 00:30:52,000

and maybe be able to feed himself.

326

00:30:52,000 --> 00:30:58,000

Kathy refused to accept the dismal prognosis offered by Dean Paul's doctors.

327

00:30:58,000 --> 00:31:03,000

The whole family worked tirelessly to try and motivate Dean Paul's progress

328

00:31:03,000 --> 00:31:05,000

using traditional therapy techniques.

329

00:31:05,000 --> 00:31:09,000

But even after two and a half years, it seemed that it would take nothing short of a miracle

330

00:31:09,000 --> 00:31:13,000

to elicit even one word from the struggling toddler.

331

00:31:13,000 --> 00:31:16,000

Then Kathy Anderson found her miracle.

332

00:31:16,000 --> 00:31:21,000

Gracefully swimming circles in the dolphin tank at the local zoo.

333

00:31:21,000 --> 00:31:27,000

Our first visit to the Oklahoma City Zoo was when Dean Paul was two and a half years old.

334

00:31:27,000 --> 00:31:31,000

We went to the zoo because they had just opened their aquaticus show.

335

00:31:31,000 --> 00:31:36,000

And since I love dolphins, I was going to go see it and he was going with us.

336

00:31:36,000 --> 00:31:39,000

We got into the dolphin show and he sat up straight.

337

00:31:39,000 --> 00:31:42,000

His eyes flew open and his mouth just gaped.

338

00:31:42,000 --> 00:31:45,000

And he didn't take his eyes off the dolphins.

339

00:31:45,000 --> 00:31:50,000

I was amazed. He had never paid that much attention to anything and for that long a period of time.

340

00:31:50,000 --> 00:31:55,000

He went up after the show when they were feeding the dolphins.

341

00:31:55,000 --> 00:31:59,000

And there was a lot of other little kids there, but he just stood and just stared at the dolphins

342

00:31:59,000 --> 00:32:04,000

and they came right to him. They didn't get us their food or they wanted to play with Dean Paul.

343

00:32:04,000 --> 00:32:07,000

And they were talking to him and just splashing him.

344

00:32:07,000 --> 00:32:10,000

I remember the smile he got on his face.

345

00:32:10,000 --> 00:32:16,000

It was a breakthrough moment that would eventually lead Kathy and Dean Paul to Dr. Nathanson

346

00:32:16,000 --> 00:32:20,000

and his dolphin project in Miami, Florida.

347

00:32:20,000 --> 00:32:27,000

Dr. Nathanson told me at the time that we chocked on the phone that he was seeing

348

00:32:27,000 --> 00:32:34,000

sometimes as much as ten times the learning abilities and speed with the children that he worked with.

349

00:32:34,000 --> 00:32:41,000

And he was seeing great strides with kids with Down syndrome in their communications and speech development.

350

00:32:41,000 --> 00:32:46,000

Which of course Dean Paul was really behind in.

351

00:32:46,000 --> 00:32:53,000

With just a glimmer of hope that Dean Paul might benefit from dolphin therapy the way other children with Down syndrome had,

352

00:32:53,000 --> 00:32:55,000

the Andersons left for Florida.

353

00:32:55,000 --> 00:33:01,000

There were two problems with Dean Paul. One was that he was pretty withdrawn.

354

00:33:01,000 --> 00:33:05,000

And the second is that his language was severely delayed.

355

00:33:05,000 --> 00:33:10,000

In Dean Paul's case he loved the water and he loved working with the dolphins.

356

00:33:10,000 --> 00:33:15,000

I wouldn't let Dean Paul interact the way he went to unless he tried much harder.

357

00:33:15,000 --> 00:33:20,000

So he was highly motivated, he paid attention beautifully and as a result his language started to improve,

358

00:33:20,000 --> 00:33:24,000

his confidence started to improve and he got to go in the water a lot more.

359

00:33:24,000 --> 00:33:26,000

And this was very important to him.

360

00:33:26,000 --> 00:33:30,000

The first time Dean Paul had therapy the dolphins just went crazy.

361

00:33:30,000 --> 00:33:34,000

They just were jumping and screeching and yelling at him.

362

00:33:34,000 --> 00:33:37,000

It was like he had come home, he was in heaven now.

363

00:33:37,000 --> 00:33:43,000

What was it about Dean Paul that drew the dolphins to him and allowed him to utter his very first sounds?

364

00:33:43,000 --> 00:33:49,000

Within less than 20 minutes he was working with the dolphins and just having a great time at it.

365

00:33:49,000 --> 00:33:51,000

He became immediately more verbal.

366

00:33:51,000 --> 00:33:54,000

The vocalizations of any sound were welcome.

367

00:33:54,000 --> 00:33:56,000

I knew he had the capability of sound.

368

00:33:56,000 --> 00:33:59,000

Now he was using it and he was using it for communication.

369

00:33:59,000 --> 00:34:03,000

In the months that followed Dean Paul literally came alive.

370

00:34:03,000 --> 00:34:07,000

The dolphins were succeeding where science had largely failed.

371

00:34:07,000 --> 00:34:14,000

The little boy who couldn't talk or run or swim disappeared and the real Dean Paul was emerging.

372

00:34:14,000 --> 00:34:19,000

He showed him picture boards and he was to make an attempt to identify the picture.

373

00:34:19,000 --> 00:34:26,000

If he identified it correctly then he could give a signal to the dolphins or have a swim.

374

00:34:26,000 --> 00:34:33,000

He progressed so rapidly that soon he was in the water doing his picture boards from the water

375

00:34:33,000 --> 00:34:37,000

and would do five to ten of them before he had to have his reward.

376

00:34:37,000 --> 00:34:43,000

In general I think animals can sometimes reach people when people can't reach them

377

00:34:43,000 --> 00:34:47,000

and that kind of unconditional love and interest in the child is a remark.

378

00:34:47,000 --> 00:34:52,000

Don't forget if you're a child with a disability let's say Down syndrome and you're walking in the supermarket

379

00:34:52,000 --> 00:34:54,000

some people are friendly, some people are not friendly.

380

00:34:54,000 --> 00:34:58,000

Just on the basis of how you look that doesn't matter to the dolphins.

381

00:34:58,000 --> 00:35:03,000

But the bond between Dean Paul and the dolphins transcended unconditional love.

382

00:35:03,000 --> 00:35:07,000

It went even deeper than that especially with one dolphin named Bee.

383

00:35:07,000 --> 00:35:12,000

The experience the Dean Paul had with Bee was incredible to me.

384

00:35:12,000 --> 00:35:15,000

They bonded immediately.

385

00:35:15,000 --> 00:35:20,000

It got to the point that he couldn't even do therapy with her because she would just take him away

386

00:35:20,000 --> 00:35:24,000

and take him out to the middle of the pool and just stay there.

387

00:35:24,000 --> 00:35:28,000

Dean Paul's relationship with Bee was almost maternal.

388

00:35:28,000 --> 00:35:33,000

They bonded and they just connected. They were like soulmates.

389

00:35:33,000 --> 00:35:40,000

Bee then became very ill after we'd moved to Miami.

390

00:35:40,000 --> 00:35:45,000

And she would only come up to the front of the pool when Dean Paul was there.

391

00:35:45,000 --> 00:35:48,000

Then one day she didn't come up to the front of the pool.

392

00:35:48,000 --> 00:35:51,000

Two nights later Kathy was awakened in the middle of the night.

393

00:35:51,000 --> 00:35:56,000

Dean Paul had been sound asleep. He set straight up in bed and said,

394

00:35:56,000 --> 00:36:01,000

Oh my Bee and climbed out of his bed and raced to the front door calling for Bee.

395

00:36:01,000 --> 00:36:03,000

Just oh Bee, Bee.

396

00:36:03,000 --> 00:36:08,000

After I took him to school the next morning I got a phone call that Bee had died in the night.

397

00:36:08,000 --> 00:36:14,000

And by night and knew then that she had died at that time.

398

00:36:14,000 --> 00:36:17,000

While children like Dean Paul are considered disabled,

399

00:36:17,000 --> 00:36:23,000

they also seem to have a singular ability to understand and communicate with these silent, gentle sea creatures.

400

00:36:23,000 --> 00:36:27,000

Dean Paul attended dolphin assisted therapy weekly for three years.

401

00:36:27,000 --> 00:36:32,000

And as a result he now has near normal skills in cognitive and neuromotor areas.

402

00:36:32,000 --> 00:36:38,000

I feel that Dean Paul has progressed past the normal mode that we've put kids with Down syndrome in.

403

00:36:38,000 --> 00:36:44,000

If you see him out on the playground you can't tell Dean Paul from any of the other kids.

404

00:36:44,000 --> 00:36:48,000

But a natural disaster brought Dean Paul's therapy to an abrupt end

405

00:36:48,000 --> 00:36:53,000

when Hurricane Andrew forced the Anderson's to move back to Enid, Oklahoma.

406

00:36:53,000 --> 00:36:57,000

Dean Paul hasn't been with dolphins for almost two years now.

407

00:36:57,000 --> 00:37:02,000

And he cries for them often.

408

00:37:02,000 --> 00:37:08,000

The realities of life have severed the loving bond that Dean Paul once shared with his dolphin therapists.

409

00:37:08,000 --> 00:37:16,000

The dolphin's unique role in his learning experience has no human counterpart and simply can't be replaced.

410

00:37:16,000 --> 00:37:23,000

When we return Dean Paul will once again swim with the dolphins for the first time in almost two years.

411

00:37:23,000 --> 00:37:33,000

When sightings returns doctors begin to understand the mysterious connection between Dean Paul and the dolphins that transformed his life.

412

00:37:33,000 --> 00:37:42,000

Sightings wanted to know if Dean Paul Anderson's amazing success could be documented scientifically.

413

00:37:42,000 --> 00:37:46,000

To that end we brought together the Anderson's and the Aqua Thought Foundation.

414

00:37:46,000 --> 00:37:51,000

That's a research organization which studies the effects of dolphin interaction on humans.

415

00:37:51,000 --> 00:37:57,000

We sponsored the trip for scientific reasons but the rewards came straight from the heart.

416

00:37:57,000 --> 00:38:05,000

The remarkable progress of Dean Paul Anderson has been studied and analyzed by psychologists and physicians around the world.

417

00:38:05,000 --> 00:38:11,000

But unfortunate circumstances have prevented Dean Paul from having any dolphin contact for over two years.

418

00:38:11,000 --> 00:38:18,000

He surrounded himself with his dolphin pictures early on but then took them all down and I asked,

419

00:38:18,000 --> 00:38:23,000

why have you taken your pictures down? He said, I just miss them too much.

420

00:38:23,000 --> 00:38:28,000

Sightings arranged for the Anderson's to visit a facility in Cancun, Mexico called Scarrette.

421

00:38:28,000 --> 00:38:35,000

The dolphins at Scarrette are not involved in dolphin assisted therapy but do interact with humans on a regular basis.

422

00:38:35,000 --> 00:38:41,000

Our goal was to try to document any measurable effects when these new unfamiliar dolphins met Dean Paul.

423

00:38:41,000 --> 00:38:51,000

What we're trying to find is some sort of explanation of why there's a perceived healing phenomena by the humans after interacting with dolphins.

424

00:38:51,000 --> 00:38:58,000

David Warner is a neuroscientist at Loma Linda University Medical Center and a researcher with the Aqua Thought Foundation.

425

00:38:58,000 --> 00:39:06,000

A non-profit organization which studies the as yet unexplained link between dolphins, healing and their beneficial effects on the human brain.

426

00:39:06,000 --> 00:39:14,000

I would say that Dean Paul's interaction with the dolphins has profoundly altered his course.

427

00:39:14,000 --> 00:39:23,000

My personal opinion is that there are several factors involved here. One is just the pure stimulation of being in the water with a large intelligent mammal.

428

00:39:23,000 --> 00:39:32,000

To document Dean Paul's encounter with the dolphins in Cancun, Aqua Thought researcher and computer specialist David Cole accompanied our sightings team to Mexico.

429

00:39:32,000 --> 00:39:44,000

We take electroencephalographic information from 16 points on the scalp and then it's visualized using the mindset product.

430

00:39:44,000 --> 00:39:52,000

And our visualization takes the electrical information and relates it back to a picture of Dean Paul's brain.

431

00:39:52,000 --> 00:39:58,000

Before he even sees the dolphins, a detailed recording is made of Dean Paul's brain waves.

432

00:39:58,000 --> 00:40:02,000

This information will later be compared to recordings made after his dolphin swim.

433

00:40:02,000 --> 00:40:09,000

It's an attempt to quantify what everyone on our team experienced emotionally and Dean Paul began his swim.

434

00:40:09,000 --> 00:40:25,000

Why do I think these are Dr. Dolphins? When you have, for instance, a child like Dean Paul in the water with his mother, take a look at the way the dolphins behave, they're genuinely interested in him and I think that they have the potential of sensing his disorder.

435

00:40:25,000 --> 00:40:34,000

When studying the literature, one finds a common phenomena reported in that the dolphins, when interacting with children, are gentler.

436

00:40:34,000 --> 00:40:49,000

They seem to recognize that this is a more fragile individual. The hypothesis is that the dolphin

identifies the difference in the child that is ill and seeks out an interaction with that child for what only the dolphins really know.

437

00:40:49,000 --> 00:40:55,000

What we're seeing here is Dean Paul's brain wave activity before he entered the water with the dolphins.

438

00:40:55,000 --> 00:41:08,000

The blue and green is demonstrating high-speed brain waves. This relates to a state of consciousness which is not conducive to efficient learning.

439

00:41:08,000 --> 00:41:15,000

The mindset is showing us an increased amount of warmer colors in Dean Paul's brain wave activity after swimming with dolphins.

440

00:41:15,000 --> 00:41:20,000

This definitely would indicate a more conducive state for healing and learning.

441

00:41:20,000 --> 00:41:29,000

Dolphins use a complicated echolocation sonar system to help them maneuver through the water. It's a natural form of radar.

442

00:41:29,000 --> 00:41:35,000

Dolphins are able to send out sound waves that travel through the water and bounce off objects in their path.

443

00:41:35,000 --> 00:41:39,000

The returning sound waves allow the dolphins to create a mental picture of the object.

444

00:41:39,000 --> 00:41:49,000

Remarkably, because the human body is mostly water, a dolphin's echolocator is able to pick up the images of a person's internal organs, their bones, and their brain.

445

00:41:49,000 --> 00:41:58,000

The dolphin echolocation energy, which can be quite intense, is strong enough to make changes in the body actually at the level of the cells.

446

00:41:58,000 --> 00:42:05,000

For some reason, those physiological changes push the organism, in this case the human being, into a state of better health.

447

00:42:05,000 --> 00:42:10,000

The universal pleasure that we see in the children that do experience this is quite profound.

448

00:42:10,000 --> 00:42:19,000

So even if scientifically we're running up a dead end, behaviorally we're dead on track.

449

00:42:19,000 --> 00:42:26,000

If we can prove something definitively that being in the water with a dolphin affects your brain in a way that's potentially beneficial,

450

00:42:26,000 --> 00:42:30,000

then we've opened the door to serious research.

451

00:42:30,000 --> 00:42:38,000

For now, the proof is in the child. He was never supposed to speak or laugh or play, but Dean Paul does all that now and more.

452

00:42:38,000 --> 00:42:44,000

Science may not know why, but the Andersons do. They call it dolphin magic.

453

00:42:44,000 --> 00:42:53,000

Kathy Anderson reports that since Dean Paul's return from Cancun, his comprehension and retention skills in school have dramatically increased.

454

00:42:53,000 --> 00:42:57,000

Kathy reports it's as if everything just clicked.

455

00:43:23,000 --> 00:43:27,000

For Sightings, I'm Tim White.

456

00:43:53,000 --> 00:43:58,000

Sightings
