

1

00:00:00,000 --> 00:00:07,000

Now researchers are studying the message abductees insist that they've been asked to deliver.

2

00:00:07,000 --> 00:00:16,000

In Washington D.C., ongoing UFO research is taking a surprising turn.

3

00:00:16,000 --> 00:00:22,000

For some studying undedicated flying objects, it's no longer the mechanics, but the message that's important.

4

00:00:22,000 --> 00:00:31,000

There's some tendency for people to look on UFOs and aliens almost as bringing a supernatural message.

5

00:00:31,000 --> 00:00:37,000

One, sometimes which brings salvation to the human race.

6

00:00:37,000 --> 00:00:43,000

And the link between Orthodox religion and unorthodox sightings extends to the entities as well.

7

00:00:43,000 --> 00:00:50,000

UFOs very much behave like supernatural beings, like angels.

8

00:00:50,000 --> 00:00:58,000

In fact, some scholars have compared UFO apparitions to apparitions of angels and saints and the Virgin Mary.

9

00:00:58,000 --> 00:01:06,000

Although Saliba's notion of UFOs as saviors is controversial, many non-traditional religious groups are embracing this new theory.

10

00:01:06,000 --> 00:01:10,000

They come to help us in our struggles here on earth.

11

00:01:10,000 --> 00:01:17,000

And since they are of course superior to us, immensely superior to us, they have a lot to teach us.

12

00:01:17,000 --> 00:01:22,000

This new breed of UFO believer is not afraid of the alien abduction experience.

13

00:01:22,000 --> 00:01:29,000

Instead, they are seeking out, making pilgrimages to high elevations to bring them closer to the heavens.

14

00:01:29,000 --> 00:01:33,000

And many tell sightings that contact is being made.

15

00:01:33,000 --> 00:01:41,000

The major believer is that there are other creatures or intelligent beings living outside what we call planet earth.

16

00:01:41,000 --> 00:01:48,000

Some abductees claim they are returning with warnings of global disasters, messages of peace and newfound healing powers.

17

00:01:48,000 --> 00:01:53,000

Sightings will bring you their stories on an upcoming edition of this program.

18

00:01:57,000 --> 00:02:04,000

In the Highlands of Tibet, western researchers have recently discovered a breed of prehistoric horse long thought to be extinct.

19

00:02:05,000 --> 00:02:14,000

This discovery boosts the contention of cryptozoologists like Roy Mackle, who believe there are many more ancient mythic creatures yet to be found.

20

00:02:14,000 --> 00:02:22,000

The fact that reports of other kinds of unidentified animals might refer to real animals is somewhat strengthened.

21

00:02:22,000 --> 00:02:27,000

It leads us to at least hope that we might have something really important.

22

00:02:27,000 --> 00:02:35,000

The horses are being called living fossils and were completely unknown to all but a handful of Tibetans living in the remote Ruhachi Valley.

23

00:02:35,000 --> 00:02:44,000

It will also produce further impetus to other groups and other expeditions to look for species of large animals,

24

00:02:44,000 --> 00:02:50,000

rather than just saying, well, everything's been discovered and there's nothing left to do.

25

00:02:50,000 --> 00:02:58,000

Mackle believes the rediscovery of the Ruhachi horses bodes well for the eventual discovery of another legendary creature,

26

00:02:58,000 --> 00:03:02,000

North America's enigmatic Sasquatch, aka Bigfoot.

27

00:03:02,000 --> 00:03:10,000

These are all evidences or involve all the same kinds of animals which may have survived in isolated areas.

28

00:03:10,000 --> 00:03:15,000

Therefore, I have an open mind with regard to the Sasquatch or the Bigfoot.
