

1

00:00:00,000 --> 00:00:05,680

Sightings String of Unidentified Flying Objects appeared in the sky over South Korea.

2

00:00:05,680 --> 00:00:09,640

Sightings was the first report on the UFO's connection to other strange craft spotted

3

00:00:09,640 --> 00:00:11,800

in Mexico and the United States.

4

00:00:11,800 --> 00:00:17,520

Well now, almost a year to the day later, a new UFO over South Korea has been caught

5

00:00:17,520 --> 00:00:21,040

on tape.

6

00:00:21,040 --> 00:00:26,320

It was a little over a year ago when this astonishing amateur video captured a UFO being

7

00:00:26,320 --> 00:00:28,800

sighted all over Seoul, South Korea.

8

00:00:28,800 --> 00:00:34,760

The craft was either breaking apart or replicating itself, a rare phenomenon known to ufologists

9

00:00:34,760 --> 00:00:37,120

as a cluster UFO.

10

00:00:37,120 --> 00:00:45,920

Right now, each ball seems to be about 100 feet in diameter and 10,000 feet in the air,

11

00:00:45,920 --> 00:00:50,960

moving at 7,800, 900 miles an hour.

12

00:00:50,960 --> 00:00:56,560

We think it's probably not a weather balloon that's become untethered.

13

00:00:56,560 --> 00:01:03,920

We think it is probably not a military project.

14

00:01:03,920 --> 00:01:08,560

Computer analysis seemed to indicate that this was the brainchild of advanced technology,

15

00:01:08,560 --> 00:01:10,520

not a freak of nature.

16

00:01:10,520 --> 00:01:15,560

It was only the third time in history that a cluster UFO could be analyzed.

17

00:01:15,560 --> 00:01:23,200

Sightings found rare tape of a cluster over Utah in 1952 and over Mexico City in 1992.

18

00:01:23,200 --> 00:01:27,600

This Lee and Brett Elders began studying the clusters after they witnessed the Mexico

19

00:01:27,600 --> 00:01:28,600

City UFO.

20

00:01:28,600 --> 00:01:30,840

We've seen this before.

21

00:01:30,840 --> 00:01:32,840

This is not new to us.

22

00:01:32,840 --> 00:01:37,600

In October of 1992, we saw our first cluster.

23

00:01:37,600 --> 00:01:43,400

Almost a year to the day after sightings initial report, we received a new video and a warning

24

00:01:43,400 --> 00:01:45,760

that Korea was on edge.

25

00:01:45,760 --> 00:01:50,520

Many citizens are reporting in with sightings of a new, unidentified craft, and the general

26

00:01:50,520 --> 00:01:54,480

consensus is that this is the beginning of a new flap.

27

00:01:54,480 --> 00:01:59,040

The latest videotape shows a UFO very different from the cluster of last year.

28

00:01:59,040 --> 00:02:04,920

It streaks above Seoul, flying perilously close to the city skyline.

29

00:02:04,920 --> 00:02:09,960

While the original Korean cluster UFO is generally recognized by ufologists as a true

30

00:02:09,960 --> 00:02:16,320

unknown, the new UFO has met with much skepticism even within the UFO community.

31

00:02:16,320 --> 00:02:21,320

We've obtained the new video for an exclusive U.S. analysis.

32

00:02:21,320 --> 00:02:27,000

Jeff Sanyo is chief video analyst for MUFON, the world's largest UFO research group.

33

00:02:27,000 --> 00:02:32,560

He looks at thousands of supposed UFO photographs and videotapes every year.

34

00:02:32,560 --> 00:02:39,320

Typically, a majority of both photos and videos I get are of ordinary objects from sincere

35

00:02:39,320 --> 00:02:40,320

people.

36

00:02:40,320 --> 00:02:47,000

So in analyzing it, the first thing to do is eliminate ordinary objects as possibilities.

37

00:02:47,000 --> 00:02:51,480

Sanyo spent more than three days examining the new Korean UFO.

38

00:02:51,480 --> 00:02:55,720

What we see in this footage from Korea is a very distant shot.

39

00:02:55,720 --> 00:02:57,920

You do have a reference object in there.

40

00:02:57,920 --> 00:03:02,200

It's a cable hanging off of a construction crane.

41

00:03:02,200 --> 00:03:03,200

Fairly out of focus.

42

00:03:03,200 --> 00:03:06,320

And also you can see the UFO here.

43

00:03:06,320 --> 00:03:08,880

So you can assume that it's also out of focus.

44

00:03:08,880 --> 00:03:10,360

Fairly hard to make out there.

45

00:03:10,360 --> 00:03:14,720

And so you roll this, you can make out a contrail shape there.

46

00:03:14,720 --> 00:03:20,160

And if you watch here, you can see a fairly well-defined head on it.

47

00:03:20,160 --> 00:03:24,720

You can see right here it's moved a little bit further out, typical of an airplane.

48

00:03:24,720 --> 00:03:26,240

Straight ordinary motion.

49

00:03:26,240 --> 00:03:29,440

And while right here you can see a little glint of light.

50

00:03:29,440 --> 00:03:32,160

It's probably a reflection of the sun off of a window.

51

00:03:32,160 --> 00:03:35,200

So you see really no anomalous motion.

52

00:03:35,200 --> 00:03:40,440

Here's the good example of how you can see a well-intentioned person here with a very

53

00:03:40,440 --> 00:03:47,280

high zoom camera unable to see it by eye is mistaking an ordinary object for something

54

00:03:47,280 --> 00:03:48,800

unusual.

55

00:03:48,800 --> 00:03:55,000

Despite Mufan's official dismissal of the videotape, thousands of Koreans remain unconvinced.

56

00:03:55,000 --> 00:04:00,400

They see the UFO as an omen, a new generation of UFOs that will follow in the footsteps

57

00:04:00,400 --> 00:04:02,960

of last year's spectacular cluster.

58

00:04:02,960 --> 00:04:08,400

There will be more, Korean UFOlogists are saying, and contact is inevitable.

59

00:04:08,400 --> 00:04:15,320

If Earth is being visited by people from other places, from other worlds, from other dimensions,

60

00:04:15,320 --> 00:04:18,640

they're speeding up the process right now.

61

00:04:18,640 --> 00:04:22,640

Something major is happening.

62

00:04:22,640 --> 00:04:25,440

Why Korea and why now?

63

00:04:25,440 --> 00:04:30,120

Veteran UFOlogists suggest that the answer can be found by studying the past in an unusual

64

00:04:30,120 --> 00:04:32,040

number of reported flaps.

65

00:04:32,040 --> 00:04:37,520

Every UFO events are followed by a period of momentous geological or political change

66

00:04:37,520 --> 00:04:39,200

in the same area.

67

00:04:39,200 --> 00:04:44,360

That is why some people in South Korea believe that their UFOs pretend peace with North Korea.
