

1
00:00:20,470 --> 00:00:18,310
hello welcome to fold along origami i'm

2
00:00:22,550 --> 00:00:20,480
richard saunders this time we're going

3
00:00:36,310 --> 00:00:22,560
to make pegasus

4
00:00:44,709 --> 00:00:39,030
very easy to make fold along with me

5
00:00:48,869 --> 00:00:46,950
so start with a square of paper doesn't

6
00:00:51,190 --> 00:00:48,879
matter what color it is

7
00:00:52,950 --> 00:00:51,200
if it's white on one side then have the

8
00:00:55,510 --> 00:00:52,960
white side facing down

9
00:00:56,630 --> 00:00:55,520
start by folding our paper in half

10
00:01:00,389 --> 00:00:56,640
bottom

11
00:01:11,030 --> 00:01:04,070
making a nice crease unfold

12
00:01:18,469 --> 00:01:13,190
again making

13
00:01:23,429 --> 00:01:20,070

unfold that again

14

00:01:54,550 --> 00:01:26,070

and fold all the sides all the corners

15

00:01:59,910 --> 00:01:56,469

that's how our model should look

16

00:02:04,389 --> 00:02:01,590

now comes an interesting fold it's

17

00:02:05,830 --> 00:02:04,399

called a rabbit ear fold

18

00:02:06,870 --> 00:02:05,840

what we're going to do is we're going to

19

00:02:09,270 --> 00:02:06,880

fold

20

00:02:11,830 --> 00:02:09,280

this edge here

21

00:02:19,830 --> 00:02:11,840

to this crease in the middle

22

00:02:26,869 --> 00:02:24,229

make a nice crease now unfold that again

23

00:02:37,910 --> 00:02:26,879

this time fold this top edge here

24

00:02:41,110 --> 00:02:39,670

like that

25

00:02:42,710 --> 00:02:41,120

unfold that

26
00:02:44,390 --> 00:02:42,720
now what we're going to do is going to

27
00:02:46,949 --> 00:02:44,400
bring this point here

28
00:02:48,630 --> 00:02:46,959
in towards the center at the same time

29
00:02:52,150 --> 00:02:48,640
folding along the creases we've just

30
00:02:55,509 --> 00:02:52,160
made give this a little pinch

31
00:02:59,589 --> 00:02:57,030
like that

32
00:03:02,710 --> 00:02:59,599
finally that point

33
00:03:06,550 --> 00:03:04,630
and that's how it should look now let's

34
00:03:10,070 --> 00:03:06,560
do the same on this side

35
00:03:15,910 --> 00:03:12,869
fold it up towards

36
00:03:17,110 --> 00:03:15,920
into the center crease

37
00:03:19,350 --> 00:03:17,120
unfold

38
00:03:24,070 --> 00:03:19,360

the top edge here and fold it into the

39

00:03:27,190 --> 00:03:25,110

like that

40

00:03:29,270 --> 00:03:27,200

unfold

41

00:03:31,190 --> 00:03:29,280

finally pinch this side

42

00:03:35,910 --> 00:03:31,200

bring it in towards the center along the

43

00:03:40,390 --> 00:03:38,470

and fold that point up

44

00:03:43,670 --> 00:03:40,400

okay what we do now is we turn the model

45

00:03:48,390 --> 00:03:46,070

starts to look a bit like a diamond take

46

00:03:51,270 --> 00:03:48,400

the four top flaps which should be loose

47

00:03:52,470 --> 00:03:51,280

fold them straight out to the sides one

48

00:03:53,589 --> 00:03:52,480

two

49

00:03:55,830 --> 00:03:53,599

three

50

00:03:58,229 --> 00:03:55,840

four

51
00:03:59,750 --> 00:03:58,239
so that's how your model should look

52
00:04:00,630 --> 00:03:59,760
now we take the top point and fold it

53
00:04:02,949 --> 00:04:00,640
down

54
00:04:04,550 --> 00:04:02,959
along the line the imaginary line

55
00:04:15,429 --> 00:04:04,560
between that point

56
00:04:20,789 --> 00:04:18,390
i will form eventually the

57
00:04:22,790 --> 00:04:20,799
tail and the hind legs

58
00:04:24,870 --> 00:04:22,800
now fold this new point here back

59
00:04:26,310 --> 00:04:24,880
towards the top and just a little way

60
00:04:28,390 --> 00:04:26,320
above

61
00:04:31,909 --> 00:04:28,400
those two points there

62
00:04:35,590 --> 00:04:33,830
there we go

63
00:04:36,950 --> 00:04:35,600

that's how your model should look now

64

00:04:38,310 --> 00:04:36,960

the next thing we're going to do is make

65

00:04:40,390 --> 00:04:38,320

the tail

66

00:04:41,749 --> 00:04:40,400

so we get this line here

67

00:04:43,270 --> 00:04:41,759

we fold it in

68

00:04:44,950 --> 00:04:43,280

along that

69

00:04:46,870 --> 00:04:44,960

heavy line there

70

00:04:48,469 --> 00:04:46,880

like this

71

00:04:50,629 --> 00:04:48,479

at the same time

72

00:04:52,710 --> 00:04:50,639

this edge here the top one

73

00:04:54,310 --> 00:04:52,720

you fold up so it's like a double

74

00:04:56,469 --> 00:04:54,320

movement

75

00:04:58,150 --> 00:04:56,479

so in here

76

00:05:01,350 --> 00:04:58,160

this line comes up

77

00:05:04,390 --> 00:05:02,870

like that

78

00:05:06,790 --> 00:05:04,400

that's how that should look let's try

79

00:05:08,950 --> 00:05:06,800

the same on the other side

80

00:05:11,990 --> 00:05:08,960

this line here comes in towards the

81

00:05:13,510 --> 00:05:12,000

center same time you squash this area

82

00:05:47,350 --> 00:05:13,520

here

83

00:05:53,590 --> 00:05:49,270

this is going to make the

84

00:05:55,430 --> 00:05:53,600

face and the front legs

85

00:05:56,950 --> 00:05:55,440

like that

86

00:05:58,790 --> 00:05:56,960

next thing to do

87

00:06:01,510 --> 00:05:58,800

is we can fold the model

88

00:06:04,469 --> 00:06:03,590

like this and i think already you can

89

00:06:06,230 --> 00:06:04,479

see

90

00:06:08,550 --> 00:06:06,240

the pig shape starting to take place

91

00:06:10,309 --> 00:06:08,560

here are the legs the head

92

00:06:12,629 --> 00:06:10,319

these will be the wings

93

00:06:14,309 --> 00:06:12,639

so we'll make the wings

94

00:06:15,909 --> 00:06:14,319

first of all we'll get this point here

95

00:06:18,710 --> 00:06:15,919

fold it across

96

00:06:23,590 --> 00:06:20,230

turn the model over and do the same on

97

00:06:27,749 --> 00:06:26,070

so those points are facing the other way

98

00:06:31,830 --> 00:06:27,759

now if we just fold that point up

99

00:06:36,150 --> 00:06:34,550

you can see it's made a wing turn the

100

00:06:37,909 --> 00:06:36,160

model over

101
00:06:40,790 --> 00:06:37,919
and repeat on the other side to make the

102
00:06:44,390 --> 00:06:42,710
now we're going to make the snout the

103
00:06:46,150 --> 00:06:44,400
face and the snout

104
00:06:49,990 --> 00:06:46,160
so what we do is we open up the model a

105
00:06:55,990 --> 00:06:53,110
pinch near the wings at the top here

106
00:06:58,390 --> 00:06:56,000
you press in like this

107
00:07:00,550 --> 00:06:58,400
at the same time

108
00:07:03,110 --> 00:07:00,560
this area here comes out like a little

109
00:07:05,749 --> 00:07:03,120
zigzag fold

110
00:07:10,230 --> 00:07:05,759
it might take you a few times

111
00:07:15,350 --> 00:07:13,270
let's have a look at that again

112
00:07:16,790 --> 00:07:15,360
so we open up the model a little bit

113
00:07:18,550 --> 00:07:16,800

press in

114

00:07:20,309 --> 00:07:18,560

at the same time bring this point out

115

00:07:23,029 --> 00:07:20,319

again

116

00:07:28,950 --> 00:07:25,350

finally for the snout we fold the very

117

00:07:30,870 --> 00:07:28,960

tip in under itself

118

00:07:32,870 --> 00:07:30,880

give him a little nose

119

00:07:34,710 --> 00:07:32,880

now let's make the legs

120

00:07:36,309 --> 00:07:34,720

first of all the hind legs

121

00:07:39,110 --> 00:07:36,319

we're going to do a zigzag fold so we're

122

00:07:41,990 --> 00:07:39,120

going to push this hind leg in

123

00:07:42,790 --> 00:07:42,000

there's a natural fold there you'll find

124

00:07:48,150 --> 00:07:42,800

in

125

00:07:51,270 --> 00:07:48,160

like that that's how that fold looks

126

00:07:56,950 --> 00:07:53,189

we'll try the same on this leg here so

127

00:08:00,469 --> 00:07:59,189

pinch it

128

00:08:03,430 --> 00:08:00,479

and

129

00:08:04,790 --> 00:08:03,440

nice little fold there are the hind legs

130

00:08:06,070 --> 00:08:04,800

front legs are a little trickier but

131

00:08:07,350 --> 00:08:06,080

it's the same

132

00:08:08,710 --> 00:08:07,360

sort of idea

133

00:08:11,189 --> 00:08:08,720

fold it in

134

00:08:14,869 --> 00:08:11,199

out again

135

00:08:20,230 --> 00:08:17,029

now the front leg

136

00:08:22,070 --> 00:08:20,240

in and out again

137

00:08:23,510 --> 00:08:22,080

finally to finish it off

138

00:08:24,830 --> 00:08:23,520

give a little twist
