

1  
00:00:14,509 --> 00:00:12,650  
this is a very interesting little model

2  
00:00:16,370 --> 00:00:14,519  
it's a box you can use it to put little

3  
00:00:19,190 --> 00:00:16,380  
things in little toys or trinkets or

4  
00:00:20,660 --> 00:00:19,200  
lollies or anything you like a little

5  
00:00:23,780 --> 00:00:20,670  
box with handles let's see if we can

6  
00:00:27,380 --> 00:00:23,790  
make it so we'll start with a square

7  
00:00:38,560 --> 00:00:27,390  
piece of paper fold the bottom point

8  
00:00:42,200 --> 00:00:38,570  
here up to the top like that now unfold

9  
00:00:51,110 --> 00:00:42,210  
this time fold this side here this point

10  
00:00:54,139 --> 00:00:51,120  
over to the other side folding it in

11  
00:00:59,180 --> 00:00:54,149  
half and unfold again now we'll turn the

12  
00:01:02,330 --> 00:00:59,190  
model over now once you've turned the

13  
00:01:05,360 --> 00:01:02,340

model over sort of swivel it around a

14

00:01:14,960 --> 00:01:05,370

little bit fold the bottom edge up to

15

00:01:24,770 --> 00:01:14,970

the top like that unfold now fold this

16

00:01:27,980 --> 00:01:24,780

side over to that side and once more

17

00:01:30,980 --> 00:01:27,990

unfold gives us a nice sort of star

18

00:01:40,390 --> 00:01:30,990

shape of the creases now fold each of

19

00:01:54,680 --> 00:01:44,350

that one

20

00:01:56,150 --> 00:01:54,690

your model should look like that now

21

00:01:59,570 --> 00:01:56,160

what we're going to do is just pick it

22

00:02:03,410 --> 00:01:59,580

up a little bit fold it in half along

23

00:02:05,300 --> 00:02:03,420

the ridges at the top like that swivel

24

00:02:08,750 --> 00:02:05,310

it around do the same thing here

25

00:02:17,560 --> 00:02:08,760

pinching those ridges and then very

26

00:02:21,950 --> 00:02:19,940

which will give us an interesting little

27

00:02:25,250 --> 00:02:21,960

shape back to a sort of a square shape

28

00:02:27,050 --> 00:02:25,260

again now what I want you to do is if

29

00:02:29,000 --> 00:02:27,060

you look carefully you've sort of made a

30

00:02:30,560 --> 00:02:29,010

little pocket there right on the top of

31

00:02:34,220 --> 00:02:30,570

the model itself you can actually open

32

00:02:39,920 --> 00:02:34,230

that up at the same time bringing the

33

00:02:43,100 --> 00:02:39,930

top point down or any open that pocket

34

00:02:49,820 --> 00:02:43,110

and both sides right out like that press

35

00:02:52,580 --> 00:02:49,830

the whole section flat just like that

36

00:02:55,430 --> 00:02:52,590

I'll show you again on the other side so

37

00:02:57,110 --> 00:02:55,440

we'll turn the model over put your

38

00:03:00,530 --> 00:02:57,120

fingers in this little pocket here that

39

00:03:04,550 --> 00:03:00,540

side and the other side and just bring

40

00:03:10,640 --> 00:03:04,560

the whole point squashing it down like

41

00:03:13,370 --> 00:03:10,650

that not too difficult if you give it a

42

00:03:18,280 --> 00:03:13,380

few goes okay what I want you to do now

43

00:03:21,920 --> 00:03:18,290

is fold this side here across like that

44

00:03:26,090 --> 00:03:21,930

turn the model over and do exactly the

45

00:03:29,270 --> 00:03:26,100

same thing for this side across like

46

00:03:32,870 --> 00:03:29,280

that now it might help in fact if you

47

00:03:34,520 --> 00:03:32,880

turn the whole model around like this so

48

00:03:38,090 --> 00:03:34,530

the pointy end is sort of facing away

49

00:03:40,850 --> 00:03:38,100

from you alright get the edge here on

50

00:03:46,830 --> 00:03:40,860

the top flap only and fold it right into

51  
00:03:49,210 --> 00:03:46,840  
the center line trust like that

52  
00:03:54,040 --> 00:03:49,220  
same thing on the other side of the top

53  
00:04:00,940 --> 00:03:54,050  
flap only folding the edge into the

54  
00:04:04,540 --> 00:04:00,950  
center just like that turn the model

55  
00:04:08,340 --> 00:04:04,550  
around and do exactly the same thing

56  
00:04:11,110 --> 00:04:08,350  
again fold this edge into the center and

57  
00:04:18,340 --> 00:04:11,120  
finally this edge here also into the

58  
00:04:21,340 --> 00:04:18,350  
center nearly finished your box if you

59  
00:04:23,680 --> 00:04:21,350  
get the top point here the top flap only

60  
00:04:30,280 --> 00:04:23,690  
in the top point and fold it straight

61  
00:04:33,040 --> 00:04:30,290  
down along this line here like this turn

62  
00:04:39,280 --> 00:04:33,050  
the model over do exactly the same thing

63  
00:04:42,370 --> 00:04:39,290

on the other side like this box is

64

00:04:45,280 --> 00:04:42,380

nearly finished simply grab the last two

65

00:04:48,370 --> 00:04:45,290

folds who did pull it apart slightly put

66

00:04:52,600 --> 00:04:48,380

your fingers inside like this open the

67

00:04:57,910 --> 00:04:52,610

model out pressing it as you go you'll

68

00:05:00,750 --> 00:04:57,920

find it makes a lovely little box very
