

1  
00:00:40,440 --> 00:00:37,350  
hello I'm Richard Saunders welcome again

2  
00:00:43,580 --> 00:00:40,450  
to formula origami this time we hang

3  
00:00:49,060 --> 00:00:43,590  
time this little some sort of course

4  
00:00:56,900 --> 00:00:52,700  
so you begin without square of paper

5  
00:01:02,750 --> 00:00:56,910  
with the count side now we follow the

6  
00:01:08,720 --> 00:01:02,760  
bottom edge up to the top like this like

7  
00:01:13,170 --> 00:01:08,730  
a nice crease here will unfold that

8  
00:01:21,600 --> 00:01:15,990  
now take this edge here hold it across

9  
00:01:29,400 --> 00:01:21,610  
like that again another nice crease and

10  
00:01:31,620 --> 00:01:29,410  
unfold now turn them all over this fold

11  
00:01:39,320 --> 00:01:31,630  
this corner here up to the top leg

12  
00:01:42,330 --> 00:01:39,330  
battery a nice pole here unfold that and

13  
00:01:50,060 --> 00:01:42,340

do the same with this corner here hold

14

00:01:57,390 --> 00:01:54,390

nice crease unfold that now if we pick

15

00:01:59,880 --> 00:01:57,400

up the model push that up slightly we

16

00:02:03,320 --> 00:01:59,890

should be able to grab the ridges at the

17

00:02:09,780 --> 00:02:03,330

top here and squash the whole thing

18

00:02:12,090 --> 00:02:09,790

together squash it down flat next thing

19

00:02:15,030 --> 00:02:12,100

to do is to fold this bottom edge here

20

00:02:20,100 --> 00:02:15,040

on the top flap only in towards the

21

00:02:26,970 --> 00:02:20,110

center that Max increase and do the same

22

00:02:44,350 --> 00:02:30,140

that

23

00:02:51,410 --> 00:02:44,360

unfold the last three faults they're

24

00:02:53,720 --> 00:02:51,420

there now to grow a pair of scissors cut

25

00:02:56,540 --> 00:02:53,730

the very top flap only from the base

26

00:03:00,800 --> 00:02:56,550

here to that point there at the fold

27

00:03:08,050 --> 00:03:00,810

we've just made only on the top flap so

28

00:03:16,610 --> 00:03:14,540

just like that now we fold up this new

29

00:03:21,410 --> 00:03:16,620

flat we've created here straight up and

30

00:03:28,380 --> 00:03:21,420

out to the side fold this side and the

31

00:03:34,860 --> 00:03:31,640

once we've done that turn the model over

32

00:03:41,700 --> 00:03:34,870

do exactly the same thing to this side

33

00:03:41,710 --> 00:03:48,210

bring in this edge here

34

00:03:48,220 --> 00:03:54,120

and finally bring the top down like that

35

00:04:03,070 --> 00:03:56,580

unfold the last three folds you make

36

00:04:06,570 --> 00:04:03,080

once again scissors and cut

37

00:04:10,830 --> 00:04:06,580

top flap only

38

00:04:17,190 --> 00:04:10,840

this base the point right to the crease

39

00:04:20,610 --> 00:04:17,200

you just made like that once again fold

40

00:04:23,500 --> 00:04:20,620

these parts up and out to the side one

41

00:04:27,290 --> 00:04:23,510

this part is why

42

00:04:29,540 --> 00:04:27,300

how do you function at the moment next

43

00:04:32,090 --> 00:04:29,550

thing to do is to fold these areas can

44

00:04:45,279 --> 00:04:32,100

half towards the center so I'll grab

45

00:04:45,289 --> 00:04:52,920

to the same with this side oh let across

46

00:04:58,140 --> 00:04:55,570

turn the model over

47

00:05:05,270 --> 00:04:58,150

and do the same thing on the other side

48

00:05:05,280 --> 00:05:15,700

this side across like this

49

00:05:22,550 --> 00:05:19,879

now turn the model around so these areas

50

00:05:25,100 --> 00:05:22,560

are facing you next thing we're going to

51  
00:05:28,360 --> 00:05:25,110  
do we're going to open up this side here

52  
00:05:33,450 --> 00:05:28,370  
to make the tail so put our thumb and

53  
00:05:33,460 --> 00:05:36,860  
in itself

54  
00:05:46,890 --> 00:05:43,200  
squash my life make time for the head do

55  
00:05:51,959 --> 00:05:46,900  
the same thing further up thumb inside

56  
00:05:54,410 --> 00:05:51,969  
and squash him down to make me

57  
00:05:59,640 --> 00:05:56,839  
and there's the

58  
00:06:02,730 --> 00:05:59,650  
that is our somersaulting horse and to
