

1
00:01:05,650 --> 00:00:58,300
in a moist corner of Australia lies the

2
00:01:10,510 --> 00:01:05,660
little town of meter meter not a lot

3
00:01:16,240 --> 00:01:10,520
happens in bit emitter but today it's

4
00:01:19,030 --> 00:01:16,250
gearing up for a more hos master and a

5
00:01:21,070 --> 00:01:19,040
nearby wombat gulley the skeptics of

6
00:01:30,400 --> 00:01:21,080
gathered to discuss the next day's

7
00:01:31,960 --> 00:01:30,410
dowsing challenge well what we found at

8
00:01:33,850 --> 00:01:31,970
last year's challenge is the water

9
00:01:38,770 --> 00:01:33,860
divinest were a very genuine very

10
00:01:42,130 --> 00:01:38,780
engaging group of people they had an and

11
00:01:45,190 --> 00:01:42,140
by very fervently that what they did was

12
00:01:46,990 --> 00:01:45,200
correct at the end of the challenge and

13
00:01:50,440 --> 00:01:47,000

no none of the professionals of honors

14

00:01:52,990 --> 00:01:50,450

have come close we found that they had

15

00:01:56,320 --> 00:01:53,000

no animosity and awful and treated the

16

00:01:58,449 --> 00:01:56,330

whole event as a social opportunity and

17

00:02:01,749 --> 00:01:58,459

most of them as they left said we'll see

18

00:02:05,440 --> 00:02:01,759

you next year so my thought on water

19

00:02:07,480 --> 00:02:05,450

dividing I don't believe it works

20

00:02:10,660 --> 00:02:07,490

but I do believe that they will be

21

00:02:13,870 --> 00:02:10,670

practices everywhere sincere believe

22

00:02:21,809 --> 00:02:13,880

that it works I'm hoping we can convince

23

00:02:36,050 --> 00:02:24,209

and I look forward to seeing them all

24

00:02:42,030 --> 00:02:39,360

the mighty Miller master has all the

25

00:02:59,290 --> 00:02:42,040

traditional features of an Aussie bush

26

00:03:08,030 --> 00:03:05,150

water diviners this is the MIT emitter

27

00:03:17,390 --> 00:03:08,040

tennis court but there'll be a different

28

00:03:19,010 --> 00:03:17,400

game played here today can you tell me

29

00:03:22,190 --> 00:03:19,020

something about the setup here for the

30

00:03:24,800 --> 00:03:22,200

dowsers today oK we've got 25 bottles

31

00:03:27,050 --> 00:03:24,810

filled with either water or sand the

32

00:03:30,650 --> 00:03:27,060

number of sand is around a number picked

33

00:03:35,180 --> 00:03:30,660

out of a hat between 5 and 15 people

34

00:03:36,830 --> 00:03:35,190

will be scored on 2020 targets the fact

35

00:03:39,320 --> 00:03:36,840

that they feel least comfortable with

36

00:03:40,910 --> 00:03:39,330

least company about they can discard and

37

00:03:42,860 --> 00:03:40,920

if they don't discard them will randomly

38

00:03:46,250 --> 00:03:42,870

discard pride from their score sheet and

39

00:03:48,470 --> 00:03:46,260

if anybody gets 17 or more right out of

40

00:03:49,850 --> 00:03:48,480

their 20 they can then go for the

41

00:03:51,620 --> 00:03:49,860

hundred and ten thousand dollar prize

42

00:03:53,960 --> 00:03:51,630

and a much more tightly controlled test

43

00:03:55,550 --> 00:03:53,970

for the skeptics challenge normally when

44

00:03:59,050 --> 00:03:55,560

you when you darling what is your

45

00:04:13,820 --> 00:03:59,060

success rate 100 percent

46

00:04:16,250 --> 00:04:13,830

oh my you Wow and it just bends it up

47

00:04:18,500 --> 00:04:16,260

right so straighten it out again you

48

00:04:21,170 --> 00:04:18,510

break too many sticks yeah yeah oh I'll

49

00:04:23,570 --> 00:04:21,180

break stuff that big right hey let me

50

00:04:34,370 --> 00:04:23,580

talk whisky no fans that'd be something

51
00:04:39,770 --> 00:04:36,950
before the contest could get underway

52
00:04:51,800 --> 00:04:39,780
the dowsers needed to be sure no

53
00:04:53,590 --> 00:04:51,810
underground streams would interfere you

54
00:04:56,570 --> 00:04:53,600
going to make sure that maybe there's no

55
00:04:58,640 --> 00:04:56,580
underground interference before the oh I

56
00:05:00,020 --> 00:04:58,650
just said these three me up there last

57
00:05:02,180 --> 00:05:00,030
year there was a little stream every

58
00:05:04,130 --> 00:05:02,190
last year but did that won't worry me

59
00:05:08,450 --> 00:05:04,140
because I could tell the difference in

60
00:05:11,810 --> 00:05:08,460
the pool at last year's event

61
00:05:14,120 --> 00:05:11,820
the bottles were placed like this the

62
00:05:16,750 --> 00:05:14,130
dowsers were asked to identify any

63
00:05:20,000 --> 00:05:16,760

underground streams

64

00:05:25,280 --> 00:05:20,010

unfortunately no two dowers could agree

65

00:05:30,540 --> 00:05:27,990

well underground streams have never been

66

00:05:33,180 --> 00:05:30,550

detected from thousands of drill holes

67

00:05:35,280 --> 00:05:33,190

that are put down every month looking

68

00:05:36,990 --> 00:05:35,290

for water thousands of little holes to

69

00:05:38,610 --> 00:05:37,000

put down every month looking for

70

00:05:40,440 --> 00:05:38,620

minerals and thousands of drill holes

71

00:05:43,560 --> 00:05:40,450

looking for coal there are also

72

00:05:45,780 --> 00:05:43,570

thousands of fasts in Australia where

73

00:05:49,500 --> 00:05:45,790

people go underground to look for coal

74

00:05:51,720 --> 00:05:49,510

to mine metals those underground streams

75

00:05:53,970 --> 00:05:51,730

haven't been found now it's really odd

76
00:05:55,620 --> 00:05:53,980
that the dowsers can find them with a

77
00:05:57,810 --> 00:05:55,630
piece of stick yet when you have a

78
00:05:59,190 --> 00:05:57,820
three-dimensional view of the earth you

79
00:06:01,230 --> 00:05:59,200
don't seem to find them do they do they

80
00:06:03,990 --> 00:06:01,240
just sort of disappear when you put a

81
00:06:06,780 --> 00:06:04,000
hole on the ground that stream will tell

82
00:06:09,690 --> 00:06:06,790
you about the one that's 400 feet man I

83
00:06:11,040 --> 00:06:09,700
can't stand up on the actual stream it

84
00:06:14,490 --> 00:06:11,050
just knocks leg straight out from

85
00:06:25,430 --> 00:06:14,500
underneath me that's really moving the

86
00:06:31,950 --> 00:06:29,340
so you're a young dowser and how do you

87
00:06:34,980 --> 00:06:31,960
normally go yeah

88
00:06:37,440 --> 00:06:34,990

you have good success yes I do I'm very

89

00:06:40,140 --> 00:06:37,450

good at picking up septic tanks septic

90

00:06:41,940 --> 00:06:40,150

tanks okay that must be an interesting

91

00:06:47,580 --> 00:06:41,950

reaction you get for a septic tank oh

92

00:06:48,450 --> 00:06:47,590

yes and can you pick up water yes and

93

00:06:50,310 --> 00:06:48,460

what do you think with the whole

94

00:06:52,020 --> 00:06:50,320

experiment here today the whole setup

95

00:07:00,420 --> 00:06:52,030

did do you think it's quite reasonable

96

00:07:36,880 --> 00:07:00,430

or not reasonable these bottles were

97

00:07:48,429 --> 00:07:40,280

each dowser was accompanied by a skeptic

98

00:08:04,379 --> 00:07:52,089

on a day of high tension there was more

99

00:08:09,159 --> 00:08:04,389

to come every dowser had their own

100

00:09:16,160 --> 00:08:09,169

tried-and-true technique some had single

101

00:09:27,990 --> 00:09:21,590

some had a pendulum yeah

102

00:09:30,390 --> 00:09:28,000

even to wires so you've just you've just

103

00:09:32,850 --> 00:09:30,400

finished your the trial run there how do

104

00:09:34,530 --> 00:09:32,860

you think you won oh well I worked out

105

00:09:36,720 --> 00:09:34,540

what was going on with them that it's

106

00:09:40,500 --> 00:09:36,730

sort of no problems picking up today

107

00:09:42,450 --> 00:09:40,510

something the sample bottle was

108

00:09:45,300 --> 00:09:42,460

interfering a little bit with one there

109

00:09:49,170 --> 00:09:45,310

and maybe they should move in further

110

00:09:50,700 --> 00:09:49,180

back but where they're pretty clear cap

111

00:09:52,320 --> 00:09:50,710

which one's ever water on top of the

112

00:09:54,120 --> 00:09:52,330

yeah you had no trouble determining

113

00:09:56,400 --> 00:09:54,130

which is that now they do it's a couple

114

00:10:01,590 --> 00:09:56,410

of those frames but yeah the only one

115

00:10:04,560 --> 00:10:01,600

was long side one biaxial limit limited

116

00:10:06,030 --> 00:10:04,570

the pool from the strain and that can

117

00:10:16,590 --> 00:10:06,040

direct that the X to pull a gun on the

118

00:10:17,970 --> 00:10:16,600

water so it's work on that there is a

119

00:10:30,060 --> 00:10:17,980

couple of hidden strains but they're not

120

00:10:55,650 --> 00:10:30,070

interference team please be consistent

121

00:11:00,079 --> 00:10:55,660

thank you consistency will be so you've

122

00:11:04,730 --> 00:11:00,089

concluded notice he didn't use a doesn't

123

00:11:10,500 --> 00:11:07,620

I just use my hands and did you get a

124

00:11:12,840 --> 00:11:10,510

good result today yeah I got six hours a

125

00:11:15,300 --> 00:11:12,850

little bit skeptical about

126

00:11:17,579 --> 00:11:15,310

I crossed out five now let's number 13

127

00:11:20,400 --> 00:11:17,589

purely because I thought well you know

128

00:11:23,579 --> 00:11:20,410

I've just gotta lose one it's gonna be

129

00:11:26,400 --> 00:11:23,589

that line but they love Mazda delivery

130

00:11:39,960 --> 00:11:26,410

you can tell it's an award this is my

131

00:12:03,259 --> 00:11:48,970

time moves slowly in mitt emitter but

132

00:12:08,879 --> 00:12:05,220

well what happened with the squeaking

133

00:12:10,710 --> 00:12:08,889

horn was \$1.00 in a pub okay sitting

134

00:12:16,049 --> 00:12:10,720

their head like you know I put these on

135

00:12:18,179 --> 00:12:16,059

like this one day and this person came

136

00:12:19,970 --> 00:12:18,189

up to me you guys are just like you

137

00:12:27,079 --> 00:12:19,980

can't come into a pub like this what

138

00:12:36,900 --> 00:12:29,359

when he's quit the horn

139

00:12:38,970 --> 00:12:36,910

Patel which bottles of beer so after

140

00:12:44,909 --> 00:12:38,980

about 4700 I decide to come down here

141

00:12:49,259 --> 00:12:44,919

I'll give this a go I mean now and I

142

00:13:03,689 --> 00:12:49,269

believe so yeah I'm actually supposed to

143

00:13:06,689 --> 00:13:03,699

say this is actually a scientific test

144

00:13:08,639 --> 00:13:06,699

because the water board can find a leak

145

00:13:13,679 --> 00:13:08,649

in a pipe within about two foot radius

146

00:13:16,679 --> 00:13:13,689

by listening to the sound from the noise

147

00:13:20,519 --> 00:13:16,689

of the leak so they go up to one in a

148

00:13:27,100 --> 00:13:20,529

play listen you know frequency device

149

00:13:35,420 --> 00:13:31,790

because of the difference in time where

150

00:13:37,240 --> 00:13:35,430

the late kids difference between Sam and

151

00:13:41,180 --> 00:13:37,250

water is it has a different dig

152

00:13:44,660 --> 00:13:41,190

frequency density story now technically

153

00:13:45,620 --> 00:13:44,670

speaking if you're not tone deaf you

154

00:13:49,250 --> 00:13:45,630

should be able to hear the difference

155

00:13:51,500 --> 00:13:49,260

between what's and what's not the same

156

00:13:55,550 --> 00:13:51,510

way you can go up to a drum knocker and

157

00:13:58,940 --> 00:13:55,560

go this is full this one something

158

00:14:03,410 --> 00:13:58,950

different you rather go different

159

00:14:13,060 --> 00:14:03,420

density different sound to different

160

00:14:13,070 --> 00:14:36,180

well each to their own device

161

00:15:00,810 --> 00:14:38,710

there are many different steps to

162

00:15:33,730 --> 00:15:04,900

while off the court the dowsers never

163

00:15:42,800 --> 00:15:35,930

it goes off to that scrimmage the

164

00:15:49,730 --> 00:15:42,810

warding is too far away from the water

165

00:15:52,420 --> 00:15:49,740

back here I suppose dowsing is more

166

00:15:56,270 --> 00:15:52,430

popular in Australia than most

167

00:15:57,830 --> 00:15:56,280

paranormal beliefs because of the effect

168

00:16:00,500 --> 00:15:57,840

of geography really we are the driest

169

00:16:02,810 --> 00:16:00,510

complan and water has never present need

170

00:16:05,140 --> 00:16:02,820

in our society and it isn't all that

171

00:16:07,970 --> 00:16:05,150

prevalent in this natural condition so

172

00:16:09,520 --> 00:16:07,980

there's a big incentive for people to be

173

00:16:12,250 --> 00:16:09,530

able to find underground water

174

00:16:15,710 --> 00:16:12,260

agriculture and for various other things

175

00:16:17,120 --> 00:16:15,720

so I would think that's a it's one of

176

00:16:20,720 --> 00:16:17,130

the main reasons why dowsing is so

177

00:16:22,270 --> 00:16:20,730

popular here and it's now folk crafts if

178

00:16:24,860 --> 00:16:22,280

you like I mean people have been dowsing

179

00:16:28,430 --> 00:16:24,870

for a long long time not just in

180

00:16:32,270 --> 00:16:28,440

Australia but it attracts a certain

181

00:16:34,040 --> 00:16:32,280

amount of urgency here because dowsers

182

00:16:36,470 --> 00:16:34,050

probably started in Europe where you

183

00:16:39,800 --> 00:16:36,480

usually raise perhaps here it usually

184

00:16:42,430 --> 00:16:39,810

doesn't and I I would think that's the

185

00:16:45,410 --> 00:16:42,440

reason but I mean thousands by and large

186

00:16:47,390 --> 00:16:45,420

are sincere genuine believers that they

187

00:16:49,280 --> 00:16:47,400

can find water are they probably can in

188

00:16:51,290 --> 00:16:49,290

a lot of instances but not for what

189

00:16:53,000 --> 00:16:51,300

because they're twigs Bend all the bits

190

00:16:55,100 --> 00:16:53,010

of why I cross over all that the

191

00:16:58,160 --> 00:16:55,110

pendulum starts way but because they

192

00:16:59,720 --> 00:16:58,170

know the local territory they know where

193

00:17:03,130 --> 00:16:59,730

water is likely to be found most of them

194

00:17:05,300 --> 00:17:03,140

operate in their own locality and

195

00:17:07,850 --> 00:17:05,310

Bushies know their own area about lots

196

00:17:10,010 --> 00:17:07,860

of things that dowsing is just that sort

197

00:17:18,079 --> 00:17:10,020

of myth that's been planted on top of it

198

00:17:24,090 --> 00:17:20,909

it had been a long day on the mitt

199

00:17:33,490 --> 00:17:24,100

emitter tennis court but now it was game

200

00:17:33,500 --> 00:17:57,840

would the players be happy

201
00:18:04,239 --> 00:18:01,719
is it rainwater can say it's not it came

202
00:18:08,529 --> 00:18:04,249
out of Russell Kelley's hosts and you're

203
00:18:12,519 --> 00:18:08,539
saying they're consistent now find one

204
00:18:15,310 --> 00:18:12,529
that doesn't work I went to one place

205
00:18:27,909 --> 00:18:15,320
and had a wall painting they're three

206
00:18:31,419 --> 00:18:27,919
layers of water in any toilet over this

207
00:18:33,999 --> 00:18:31,429
it didn't work over that one it did work

208
00:18:35,950 --> 00:18:34,009
I know that he's saying it doesn't it

209
00:18:38,560 --> 00:18:35,960
doesn't know they're yours you're

210
00:18:40,779 --> 00:18:38,570
telling me that this and there are

211
00:18:51,869 --> 00:18:40,789
exactly the same water sales all came

212
00:18:59,440 --> 00:18:55,029
saying there seems to be a differential

213
00:19:01,269 --> 00:18:59,450

somewhere but mine is now but I can pick

214

00:19:03,070 --> 00:19:01,279

up a certain amount of the bottles after

215

00:19:07,210 --> 00:19:03,080

they're uncovered the same as so I could

216

00:19:09,700 --> 00:19:07,220

pick up than before but the symbols I

217

00:19:11,649 --> 00:19:09,710

can't pick up at all they telling me

218

00:19:13,570 --> 00:19:11,659

that they're consistent now what is the

219

00:19:15,489 --> 00:19:13,580

difference between the ones I can pick

220

00:19:16,749 --> 00:19:15,499

up and the ones I can what what do you

221

00:19:18,789 --> 00:19:16,759

think might be the difference

222

00:19:21,119 --> 00:19:18,799

the only explanation is that they're

223

00:19:24,159 --> 00:19:21,129

different water but they're saying not

224

00:19:28,180 --> 00:19:24,169

evil mine yeah I've got a simple bottle

225

00:19:30,639 --> 00:19:28,190

me I'm water yeah and it doesn't here to

226

00:19:32,889 --> 00:19:30,649

the bubbles okay so the ones that I

227

00:19:34,659 --> 00:19:32,899

can't pick up with their bowls to me are

228

00:20:36,049 --> 00:19:34,669

the same as my own vomit so it seems you

229

00:20:42,000 --> 00:20:39,570

please the same opinions light bottles

230

00:20:46,500 --> 00:20:42,010

around gives you tips you are in the

231

00:20:48,419 --> 00:20:46,510

rain water and I'm work on yeah that's

232

00:21:28,970 --> 00:20:48,429

that's what we've got a forehead well

233

00:21:39,110 --> 00:21:31,130

they're on the top me in there all right

234

00:21:44,450 --> 00:21:39,120

we're not the same waters all the waters

235

00:21:48,410 --> 00:21:44,460

here came out of the same something

236

00:21:51,880 --> 00:21:48,420

different this year yeah I wasn't able

237

00:21:56,570 --> 00:21:51,890

to pick em that good just just not today

238

00:22:01,580 --> 00:21:59,990

say your aunt you think this test was it

239

00:22:07,670 --> 00:22:01,590

may have been a bit unusual but it was a

240

00:22:10,790 --> 00:22:07,680

difficult fan who went on last year I

241

00:22:11,810 --> 00:22:10,800

didn't have any problems but I knew

242

00:22:17,630 --> 00:22:11,820

nothing about it

243

00:22:19,210 --> 00:22:17,640

so I I feel that the one question I want

244

00:22:21,050 --> 00:22:19,220

to know is whether anybody divined

245

00:22:23,570 --> 00:22:21,060

beforehand to find if there was any

246

00:22:25,250 --> 00:22:23,580

streams underneath the two years the

247

00:22:26,720 --> 00:22:25,260

older man who was here who's left now he

248

00:22:29,510 --> 00:22:26,730

did that he did that he declared it

249

00:22:36,260 --> 00:22:29,520

clearly he did okay and apart from that

250

00:22:39,350 --> 00:22:36,270

I mean in all intents and purposes I

251
00:22:42,160 --> 00:22:39,360
think the test is fair you know that the

252
00:22:44,720 --> 00:22:42,170
only other way would be an extremely

253
00:22:47,870 --> 00:22:44,730
complicated way which is to have sort of

254
00:22:50,570 --> 00:22:47,880
running water that can't be seen like

255
00:22:51,770 --> 00:22:50,580
intermittent running and no water or

256
00:22:53,300 --> 00:22:51,780
something like that because I think a

257
00:22:55,690 --> 00:22:53,310
lot of people that our diviners they're

258
00:22:59,510 --> 00:22:55,700
used to going out in the field where

259
00:23:03,380 --> 00:22:59,520
they're walking along or you know that

260
00:23:05,270 --> 00:23:03,390
there's running water in the ground how

261
00:23:07,910 --> 00:23:05,280
to test whether it's all accurate or

262
00:23:12,100 --> 00:23:07,920
true scientifically it's how to prove it

263
00:23:17,840 --> 00:23:15,680

what what's the story well we haven't

264

00:23:19,820 --> 00:23:17,850

seen any evidence yet that dowsing works

265

00:23:22,190 --> 00:23:19,830

the scores are the the score sheets that

266

00:23:23,540 --> 00:23:22,200

have been marked so far the numbers are

267

00:23:25,310 --> 00:23:23,550

clustered around where the middle of the

268

00:23:26,580 --> 00:23:25,320

bell curve will be and the highest score

269

00:23:32,009 --> 00:23:26,590

so far

270

00:23:33,869 --> 00:23:32,019

13:20 that we're not finished yet I also

271

00:23:36,690 --> 00:23:33,879

think that because water divining has

272

00:23:38,639 --> 00:23:36,700

been so misunderstood the years and no

273

00:23:40,590 --> 00:23:38,649

one knows a great deal about you Cavani

274

00:23:42,269 --> 00:23:40,600

stagnant water and what convinced that

275

00:23:46,890 --> 00:23:42,279

if you take some really severe training

276

00:23:51,120 --> 00:23:46,900

on it and started

277

00:23:53,670 --> 00:23:51,130

being able to get results but - well

278

00:23:55,530 --> 00:23:53,680

actually looking for some bank might

279

00:23:57,080 --> 00:23:55,540

fund those might be quite good people I

280

00:24:00,720 --> 00:23:57,090

think the biggest problem is that

281

00:24:02,100 --> 00:24:00,730

actually no one has enough money so if

282

00:24:04,140 --> 00:24:02,110

you're talking about water drilling and

283

00:24:06,870 --> 00:24:04,150

you're saying if you go along and Devine

284

00:24:09,480 --> 00:24:06,880

and you say well ok I think streams here

285

00:24:12,270 --> 00:24:09,490

drill here and it could be

286

00:24:15,419 --> 00:24:12,280

about this many feet cost thousands of

287

00:24:18,120 --> 00:24:15,429

dollars to drill so and that's the only

288

00:24:29,880 --> 00:24:18,130

conclusive evidence or proof in a way

289

00:24:34,169 --> 00:24:29,890

that you could do a real test since this

290

00:24:34,470 --> 00:24:34,179

morning that lost half their food all of

291

00:24:36,660 --> 00:24:34,480

them

292

00:24:40,140 --> 00:24:36,670

the water that I could pick up yeah has

293

00:24:42,540 --> 00:24:40,150

lost half they pull that is the right

294

00:24:44,940 --> 00:24:42,550

that they pull that is dropping as

295

00:24:49,780 --> 00:24:44,950

electricity dropped off what makes the

296

00:24:52,499 --> 00:24:51,400

when you're running out the fat first

297

00:24:55,169 --> 00:24:52,509

thing

298

00:24:58,529 --> 00:24:55,179

electricity and the longer you label

299

00:25:00,180 --> 00:24:58,539

molest electricity I could hold monthly

300

00:25:02,519 --> 00:25:00,190

me up there near without any trouble at

301
00:25:09,299 --> 00:25:02,529
all but see now a bunch of the victim is

302
00:25:25,129 --> 00:25:09,309
falling for me yeah because I've always

303
00:25:29,759 --> 00:25:28,079
now that the complaint is of course that

304
00:25:32,039 --> 00:25:29,769
the water lost its electric charge

305
00:25:33,599 --> 00:25:32,049
during the day yes because it stopped

306
00:25:36,299 --> 00:25:33,609
flowing when we got it out of the hose

307
00:25:38,699 --> 00:25:36,309
and put it in the bottle yeah and that

308
00:25:41,129 --> 00:25:38,709
it can be recharged now it works when he

309
00:25:45,809 --> 00:25:41,139
goes and shakes it up so the new physics

310
00:25:47,729 --> 00:25:45,819
is that you can charge like there's

311
00:25:49,859 --> 00:25:47,739
change water with static electricity by

312
00:26:00,059 --> 00:25:49,869
shaking we've discovered a new physical

313
00:26:02,999 --> 00:26:00,069

pen here today if the dowzers had picked

314

00:26:07,619 --> 00:26:03,009

on pure chance this is the way the graph

315

00:26:10,379 --> 00:26:07,629

would have looked if however they'd had

316

00:26:17,069 --> 00:26:10,389

seventy five percent success it would

317

00:26:22,240 --> 00:26:17,079

have looked like this this is the

318

00:26:31,280 --> 00:26:27,620

more in line with chance to dowzers

319

00:26:36,020 --> 00:26:31,290

achieved 13 out of 20 the highest score

320

00:26:37,160 --> 00:26:36,030

of the day the skeptics in the money

321

00:26:41,510 --> 00:26:37,170

will return

322

00:26:53,240 --> 00:26:41,520

we hope the dowzers will too drawn to

323

00:26:56,360 --> 00:26:53,250

meter like a dog to a bone the gang

324

00:26:59,000 --> 00:26:56,370

turned up armed with wire and wood to

325

00:27:01,340 --> 00:26:59,010

locate the water wherever they could by

326

00:27:03,950 --> 00:27:01,350

reading vibrations that come from the

327

00:27:07,880 --> 00:27:03,960

ground which show where the water was

328

00:27:10,760 --> 00:27:07,890

sure to be found they came to win money

329

00:27:13,040 --> 00:27:10,770

at the dowzers convention but prayers of

330

00:27:16,700 --> 00:27:13,050

hope that the behind intervention to

331

00:27:20,480 --> 00:27:16,710

help them to sense the old h2o then one

332

00:27:23,420 --> 00:27:20,490

by one they all had a go chance

333

00:27:25,490 --> 00:27:23,430

predicted the success they would face as

334

00:27:28,220 --> 00:27:25,500

they searched for the water all over the

335

00:27:30,650 --> 00:27:28,230

place at the muster in the hills up MIT

336

00:27:34,490 --> 00:27:30,660

emitter way who will dilute on the line

337

00:27:36,950 --> 00:27:34,500

they were ready to play walking in a

338

00:27:38,980 --> 00:27:36,960

circle or in a crisscross line with a

339

00:27:41,720 --> 00:27:38,990

weight of belief in the autumn sunshine

340

00:27:44,660 --> 00:27:41,730

making sweat on their brows as they

341

00:27:48,530 --> 00:27:44,670

tried to tell which was just said and

342

00:27:51,380 --> 00:27:48,540

where was the well then the Sun went

343

00:27:53,630 --> 00:27:51,390

down on the muster of bitter the sweet

344

00:27:56,450 --> 00:27:53,640

taste of victory had turned a bit better

345

00:27:59,390 --> 00:27:56,460

for the dowsers and diviners had failed

346

00:28:02,010 --> 00:27:59,400

to find water maybe their rods should

347

00:28:04,890 --> 00:28:02,020

have been longer or shorter

348

00:28:07,919 --> 00:28:04,900

the contestants blame static and streams

349

00:28:10,860 --> 00:28:07,929

and fences that disturb the waves and

350

00:28:12,980 --> 00:28:10,870

twiddle their senses but the skeptics

351

00:28:16,410 --> 00:28:12,990

went home with their booty intact
