

Origami Dragon

1
00:00:27,560 --> 00:00:24,409
hello I'm Richard Saunders from Sydney

2
00:00:29,900 --> 00:00:27,570
Australia I'm skeptic but I also love to

3
00:00:33,530 --> 00:00:29,910
do origami and today I'd like to show

4
00:00:35,810 --> 00:00:33,540
you how to fold your own little origami

5
00:00:38,160 --> 00:00:35,820
dragon

6
00:00:40,860 --> 00:00:38,170
so we'll start with the square piece of

7
00:00:50,310 --> 00:00:40,870
paper first of all I want you to fold

8
00:00:53,940 --> 00:00:50,320
this corner over to this corner giving

9
00:01:03,200 --> 00:00:53,950
that a nice crease now unfold that now

10
00:01:11,040 --> 00:01:08,249
like that and unfold again now fold this

11
00:01:23,219 --> 00:01:11,050
edge here into the center crease you

12
00:01:29,940 --> 00:01:23,229
just made like that and the same on the

13
00:01:37,650 --> 00:01:29,950

other side sort of gives us a kite shape

14

00:01:48,260 --> 00:01:37,660

now unfold those two last folds and do

15

00:02:04,830 --> 00:02:02,160

on this edge here unfold those again now

16

00:02:07,919 --> 00:02:04,840

I want you to pinch this corner here

17

00:02:10,469 --> 00:02:07,929

like this at the same time folding it in

18

00:02:14,699 --> 00:02:10,479

towards the center along the lines you

19

00:02:22,170 --> 00:02:14,709

just made should be quite easy there we

20

00:02:28,220 --> 00:02:22,180

are that's one and the same on the other

21

00:02:42,290 --> 00:02:36,240

pinching that corner and flattening it

22

00:02:47,460 --> 00:02:44,900

that gives us what's called a fish base

23

00:02:50,340 --> 00:02:47,470

okay the next thing to do is to fold the

24

00:02:58,140 --> 00:02:50,350

top section down underneath to the

25

00:03:01,110 --> 00:02:58,150

bottom like this next thing to do is to

26

00:03:04,199 --> 00:03:01,120

fold this top flap straight up but not

27

00:03:07,380 --> 00:03:04,209

of the point here but just below it I'll

28

00:03:10,860 --> 00:03:07,390

show you what I mean take this top flap

29

00:03:18,180 --> 00:03:10,870

only and fold it straight up about like

30

00:03:20,190 --> 00:03:18,190

that so that's how the model should look

31

00:03:27,780 --> 00:03:20,200

right now now fold the whole model in

32

00:03:36,479 --> 00:03:27,790

half from this side over to here little

33

00:03:39,180 --> 00:03:36,489

bit tricky might pick it up there just

34

00:03:42,410 --> 00:03:39,190

like that now makes a lot of sense if we

35

00:03:45,479 --> 00:03:42,420

just swivel the model around a bit now

36

00:03:47,220 --> 00:03:45,489

this section here is going to form one

37

00:03:49,140 --> 00:03:47,230

of the wings what I want you to do is

38

00:03:52,530 --> 00:03:49,150

fold it straight back up in this

39

00:03:55,830 --> 00:03:52,540

direction like that so it sort of sticks

40

00:04:01,110 --> 00:03:55,840

up a little bit now turn the model over

41

00:04:02,729 --> 00:04:01,120

and do exactly the same thing on this

42

00:04:10,910 --> 00:04:02,739

section here folding it up to meet the

43

00:04:10,920 --> 00:04:16,969

starts to look like wings already okay

44

00:04:26,370 --> 00:04:22,770

we'll flip it over now we're going to

45

00:04:28,170 --> 00:04:26,380

make the neck and the head so I want you

46

00:04:31,500 --> 00:04:28,180

to put your thumb in this section very

47

00:04:34,050 --> 00:04:31,510

carefully underneath same time pressing

48

00:04:39,540 --> 00:04:34,060

down on the top holding near the wings

49

00:04:44,159 --> 00:04:39,550

and folding that down inside itself once

50

00:04:48,750 --> 00:04:44,169

it gets to there squashing it flat so it

51
00:04:50,790 --> 00:04:48,760
should look like that on both sides do

52
00:04:53,930 --> 00:04:50,800
exactly the same thing again except

53
00:04:55,830 --> 00:04:53,940
bringing this section here straight up

54
00:05:03,779 --> 00:04:55,840
open it up a little bit

55
00:05:06,120 --> 00:05:03,789
fold it straight up and close it that's

56
00:05:07,680 --> 00:05:06,130
made the neck now to make the head do

57
00:05:10,800 --> 00:05:07,690
exactly the same thing right at the tip

58
00:05:13,409 --> 00:05:10,810
so we open that up very carefully push

59
00:05:16,830 --> 00:05:13,419
the head section down and just pinch it

60
00:05:19,320 --> 00:05:16,840
shut gives us a sort of a bird looking

61
00:05:22,500 --> 00:05:19,330
head let's tuck the tip of the nose back

62
00:05:25,710 --> 00:05:22,510
in opening that up tucking the nose in

63
00:05:29,969 --> 00:05:25,720

and squashing it flat looks more like a

64

00:05:32,670 --> 00:05:29,979

dinosaur or a dragon I think all right

65

00:05:37,620 --> 00:05:32,680

now we're going to make the tail and the

66

00:05:39,149 --> 00:05:37,630

back legs flip the model around might be

67

00:05:39,980 --> 00:05:39,159

easier if you don't but I prefer it that

68

00:05:43,310 --> 00:05:39,990

way

69

00:05:46,250 --> 00:05:43,320

now open up the bottom section here and

70

00:05:49,589 --> 00:05:46,260

fold this whole section across this way

71

00:05:51,320 --> 00:05:49,599

inside itself and underneath I'll show

72

00:05:56,880 --> 00:05:51,330

you what I mean

73

00:06:01,680 --> 00:05:56,890

fold it across like that to about there

74

00:06:06,779 --> 00:06:01,690

I guess and squashing it should look

75

00:06:09,260 --> 00:06:06,789

exactly the same on both sides one more

76
00:06:14,000 --> 00:06:12,290
just pass the wings here opening up the

77
00:06:18,170 --> 00:06:14,010
bottom section and following it ride

78
00:06:20,480 --> 00:06:18,180
across and then shutting now we're going

79
00:06:23,450 --> 00:06:20,490
to fold this back again in exactly the

80
00:06:31,480 --> 00:06:23,460
same way so opening it up folding it

81
00:06:33,680 --> 00:06:31,490
back and then shutting that there and

82
00:06:36,530 --> 00:06:33,690
that's how your model should look at the

83
00:06:38,380 --> 00:06:36,540
moment now let's make the hind legs the

84
00:06:40,580 --> 00:06:38,390
sort of the curve of the hind legs here

85
00:06:42,200 --> 00:06:40,590
you'll find you can put your finger in

86
00:06:47,210 --> 00:06:42,210
this little section here near the tail

87
00:06:48,890 --> 00:06:47,220
and just tuck that fold that up under

88
00:06:50,870 --> 00:06:48,900

itself like that just gives you a nice

89

00:06:55,640 --> 00:06:50,880

little curve there and the same on the

90

00:06:59,360 --> 00:06:55,650

other side just tuck that under like

91

00:07:01,100 --> 00:06:59,370

that makes it look like a hind leg the

92

00:07:03,200 --> 00:07:01,110

last step to make our dragon complete is

93

00:07:05,030 --> 00:07:03,210

to curl the tail a little bit and you

94

00:07:14,409 --> 00:07:05,040

can just do that around your finger

95

00:07:22,460 --> 00:07:14,419

little folds like that and finally
