Skeptiko.com is covering the science of human consciousness. We cover six main categories:

- Near-death experience science and the ever growing body of peer-reviewed research surrounding it.
- Parapsychology and science that defies our current understanding of consciousness.
- Consciousness research and the every expanding scientific understanding of who we are.
- Spirituality and the implications of new scientific discoveries to our understanding of it.
- Others and the strangeness of close encounters.
- Skepticism and what we should make of the "Skeptics".
