

10:10:03 03/10/08 daily

1  
00:00:04,100 --> 00:00:02,330  
here's the second video from our ongoing

2  
00:00:06,230 --> 00:00:04,110  
research exploring whether the

3  
00:00:08,390 --> 00:00:06,240  
connection we have with our dog can form

4  
00:00:11,180 --> 00:00:08,400  
a telepathic link that lets the dog know

5  
00:00:13,220 --> 00:00:11,190  
when the owners coming home as many of

6  
00:00:15,200 --> 00:00:13,230  
you know this research was originally

7  
00:00:17,120 --> 00:00:15,210  
pioneered by dr. Rupert Sheldrake in his

8  
00:00:17,990 --> 00:00:17,130  
book dogs that know when their owners

9  
00:00:21,170 --> 00:00:18,000  
are coming home

10  
00:00:23,390 --> 00:00:21,180  
the dogs that no project aims to extend

11  
00:00:26,150 --> 00:00:23,400  
this research by looking at more dogs

12  
00:00:27,920 --> 00:00:26,160  
over a longer period of time in order to

13  
00:00:31,250 --> 00:00:27,930

better understand this amazing

14

00:00:32,930 --> 00:00:31,260

phenomenon here's our second video the

15

00:00:34,430 --> 00:00:32,940

set up for this experiment is similar to

16

00:00:35,569 --> 00:00:34,440

the first except for two important

17

00:00:37,970 --> 00:00:35,579

differences that I'll talk more about

18

00:00:39,799 --> 00:00:37,980

later there's a webcam with the time

19

00:00:41,840 --> 00:00:39,809

recording feature and its position to

20

00:00:44,330 --> 00:00:41,850

record the same hallway we recorded in

21

00:00:46,610 --> 00:00:44,340

the first trial again this is the spot

22

00:00:49,119 --> 00:00:46,620

where the family has identified as a

23

00:00:51,619 --> 00:00:49,129

place where Tommy and sometimes princess

24

00:00:54,020 --> 00:00:51,629

demonstrate their unique waving behavior

25

00:00:56,360 --> 00:00:54,030

we're ready for Jane to start the video

26  
00:00:58,279 --> 00:00:56,370  
recording and leave the house like

27  
00:01:00,680 --> 00:00:58,289  
before the exact time of the owners

28  
00:01:02,840 --> 00:01:00,690  
departure and return is non routine and

29  
00:01:04,850 --> 00:01:02,850  
doesn't follow any pattern and when she

30  
00:01:07,580 --> 00:01:04,860  
leaves there's no one else in the house

31  
00:01:09,800 --> 00:01:07,590  
unlike the first trial this time we'll

32  
00:01:13,910 --> 00:01:09,810  
be measuring Tommy's reaction to Jane's

33  
00:01:16,130 --> 00:01:13,920  
son John when he comes home we found the

34  
00:01:18,499 --> 00:01:16,140  
dogs in the house are more sensitive to

35  
00:01:20,570 --> 00:01:18,509  
the first person that comes home and are

36  
00:01:21,850 --> 00:01:20,580  
less likely to wait when someone is in

37  
00:01:23,800 --> 00:01:21,860  
the house

38  
00:01:26,080 --> 00:01:23,810

another difference between this trial

39

00:01:28,660 --> 00:01:26,090

and the first is the time and distance

40

00:01:31,090 --> 00:01:28,670

of the return trip and the first

41

00:01:34,000 --> 00:01:31,100

experiment Jane was almost 10 miles from

42

00:01:36,730 --> 00:01:34,010

home and took 13 minutes to return this

43

00:01:38,970 --> 00:01:36,740

time John is almost 20 miles away and

44

00:01:41,710 --> 00:01:38,980

will take almost 25 minutes to come home

45

00:01:44,680 --> 00:01:41,720

we've sped up the video but keep your

46

00:01:47,080 --> 00:01:44,690

eye on Tommy notice that just like last

47

00:01:52,690 --> 00:01:47,090

time he never lays down in the hallway

48

00:01:54,700 --> 00:01:52,700

he never waits ok this point marks the

49

00:01:57,100 --> 00:01:54,710

time that John begins heading for home

50

00:02:00,070 --> 00:01:57,110

watch what happens within a minute or

51  
00:02:02,110 --> 00:02:00,080  
two after he begins his trip Tommy gets

52  
00:02:05,170 --> 00:02:02,120  
up and moves to the spot in the hallway

53  
00:02:07,480 --> 00:02:05,180  
we've identified as his waiting spot now

54  
00:02:09,430 --> 00:02:07,490  
keep watching Tommy just like in the

55  
00:02:12,820 --> 00:02:09,440  
first trial he doesn't budge from this

56  
00:02:15,640 --> 00:02:12,830  
spot and this time around he stays there

57  
00:02:18,430 --> 00:02:15,650  
for almost 18 minutes while John is on

58  
00:02:21,310 --> 00:02:18,440  
the way home it only gets up when John's

59  
00:02:23,380 --> 00:02:21,320  
car is near the driveway the results

60  
00:02:26,380 --> 00:02:23,390  
from this second trial we're nearly as

61  
00:02:28,540 --> 00:02:26,390  
amazing as the first Tommy's telepathic

62  
00:02:30,820 --> 00:02:28,550  
link with his owner caused him to wait

63  
00:02:33,340 --> 00:02:30,830

in the exact spot that the owners

64

00:02:35,530 --> 00:02:33,350

predicted and this waiting behavior was

65

00:02:36,340 --> 00:02:35,540

dramatically different when John was on

66

00:02:38,860 --> 00:02:36,350

the way home

67

00:02:41,140 --> 00:02:38,870

compared to when he wasn't this is an

68

00:02:43,810 --> 00:02:41,150

ongoing experiment that's being repeated

69

00:02:46,570 --> 00:02:43,820

many times with different dogs for more
