10:11 AM 1/20/2020

1
00:00:06,019 --> 00:00:03,999
but her clips speaks to specifically

2
00:00:09,530 --> 00:00:06,029
specifically this is right out of your

3
00:00:11,839 --> 00:00:09,540
book which it is you make the point that

4
00:00:15,320 --> 00:00:11,849
hey people when they're resuscitated

5
00:00:17,029 --> 00:00:15,330
they claim to have seen things that they

6
00:00:19,189 --> 00:00:17,039
shouldn't be able to see well they've

7
00:00:22,429 --> 00:00:19,199
seen it on TV they make it up here's a

8
00:00:24,410 --> 00:00:22,439
researcher who asked that question with

9
00:00:27,710 --> 00:00:24,420
the control group I had then patients

10
00:00:29,750 --> 00:00:27,720
who's been successfully resuscitated but

11
00:00:31,400 --> 00:00:29,760
they didn't have a near-death experience

12
00:00:33,830 --> 00:00:31,410
so they didn't have the antibody

13
00:00:36,290 --> 00:00:33,840

component and I asked them if they could

14

00:00:39,740 --> 00:00:36,300

describe what they thought that we had

15

00:00:41,990 --> 00:00:39,750

done to them and they were like what do

16

00:00:47,660 --> 00:00:42,000

you mean I don't I was dead I don't

17

00:00:51,080 --> 00:00:47,670

remember anything right I have no idea

18

00:00:53,180 --> 00:00:51,090

what you did to me at all like and the

19

00:00:55,549 --> 00:00:53,190

majority of them couldn't even guess

20

00:00:57,979 --> 00:00:55,559

they couldn't make a guess as to what

21

00:01:00,680 --> 00:00:57,989

we'd done and then a few of them then

22

00:01:03,110 --> 00:01:00,690

did make a guess and it was based on T V

23

00:01:05,240 --> 00:01:03,120

Hospital dramas that they've been

24

00:01:07,460 --> 00:01:05,250

watching and what I found is that there

25

00:01:09,770 --> 00:01:07,470

were errors and misconceptions in what

26
00:01:11,690 --> 00:01:09,780
they thought we had done to them and so

27
00:01:14,780 --> 00:01:11,700
some of them thought that they had been

28
00:01:16,580 --> 00:01:14,790
DC shocked with the paddles and they

29
00:01:19,730 --> 00:01:16,590
hadn't those people had just had the

30
00:01:22,010 --> 00:01:19,740
resuscitation the CPR and drugs

31
00:01:25,130 --> 00:01:22,020
administered such as adrenaline or

32
00:01:28,100 --> 00:01:25,140
noradrenaline and then some of them made

33
00:01:29,840 --> 00:01:28,110
her educated guesses but the police

34
00:01:32,780 --> 00:01:29,850
where they thought that we put the

35
00:01:36,340 --> 00:01:32,790
paddles on to their body was completely

36
00:01:41,210 --> 00:01:36,350
wrong yes it was wrong it was incorrect

37
00:01:42,980 --> 00:01:41,220
you know this is great stuff yeah so it

38
00:01:45,920 --> 00:01:42,990

just you know it just goes to show that

39

00:01:48,050 --> 00:01:45,930

the people who did report and the a

40

00:01:50,149 --> 00:01:48,060

death experience describe their

41

00:01:52,850 --> 00:01:50,159

experience with accuracy whereas the

42

00:01:54,590 --> 00:01:52,860

control group weren't went accurate and

43

00:01:59,090 --> 00:01:54,600

they most of them couldn't even hazard a

44

00:02:00,889 --> 00:01:59,100

guess okay so first of all full

45

00:02:02,190 --> 00:02:00,899

disclosure you didn't know about that

46

00:02:08,830 --> 00:02:02,200

research

47

00:02:10,780 --> 00:02:08,840

that what are the objective criteria by

48

00:02:13,510 --> 00:02:10,790

which they decide whether a narrative

49

00:02:16,600 --> 00:02:13,520

account is a hit or a miss of what they

50

00:02:19,000 --> 00:02:16,610

did how many details have to get correct

51
00:02:21,280 --> 00:02:19,010
for you to say yes that's accurate for

52
00:02:22,840 --> 00:02:21,290
what we were doing - you know you must

53
00:02:24,850 --> 00:02:22,850
have gotten that from a TV drama because

54
00:02:28,420 --> 00:02:24,860
that's not what we did to you so many so

55
00:02:30,820 --> 00:02:28,430
many story no no this is super in

56
00:02:32,890 --> 00:02:30,830
science you have to operationally glad

57
00:02:37,210 --> 00:02:32,900
you're back to science she wrote and

58
00:02:38,950 --> 00:02:37,220
published a peer-reviewed paper Oh what
