

INVESTIGATIONS OF THE 12% FAILURE RATE (1)

- Previous experiments: healer + cell manager
- New experiments (n =100):
healer + cell manager + observer
- Observer: made a donation to charity during treatment & willed any resulting good karma to be directed to the cells

1
00:00:04,730 --> 00:00:02,270
between the cells and the healer turns

2
00:00:06,140 --> 00:00:04,740
out to be unimportant the cells were set

3
00:00:08,720 --> 00:00:06,150
up in a certain way in the laboratory

4
00:00:11,509 --> 00:00:08,730
they were always set up that way thus

5
00:00:14,060 --> 00:00:11,519
the healers were able to visualize how

6
00:00:16,099 --> 00:00:14,070
those cells were set up they initially

7
00:00:17,840 --> 00:00:16,109
worked on the cells in culture in our

8
00:00:20,150 --> 00:00:17,850
lab via the telephone

9
00:00:22,880 --> 00:00:20,160
we had healers that worked on the cells

10
00:00:25,759 --> 00:00:22,890
in culture from a distance of some 6,000

11
00:00:30,859 --> 00:00:25,769
miles same result as if the healer were

12
00:00:32,810 --> 00:00:30,869
in the lab we shielded in a set of about

13
00:00:35,990 --> 00:00:32,820

a hundred experiments we shielded though

14

00:00:39,380 --> 00:00:36,000

the cells in the lab from INF EMF and

15

00:00:41,959 --> 00:00:39,390

gamma radiation a lead walled room

16

00:00:44,389 --> 00:00:41,969

Faraday cages the healer was 6,000 miles

17

00:00:46,340 --> 00:00:44,399

away similarly shielded at prescribed

18

00:00:48,830 --> 00:00:46,350

times the healer worked themselves in

19

00:00:51,380 --> 00:00:48,840

culture same results as if the healer

20

00:00:54,410 --> 00:00:51,390

win the laboratory so whatever this

21

00:00:56,180 --> 00:00:54,420

healing process involves it involves

22

00:00:58,279 --> 00:00:56,190

some form of energy ie

23

00:00:59,990 --> 00:00:58,289

subtle energy that is something we

24

00:01:02,060 --> 00:01:00,000

certainly do not understand and is

25

00:01:05,570 --> 00:01:02,070

different from any kind of energy form

26
00:01:08,539 --> 00:01:05,580
that we know about the experience of the

27
00:01:09,830 --> 00:01:08,549
healers were slightly important even but

28
00:01:13,100 --> 00:01:09,840
even a beginning student could actually

29
00:01:16,640 --> 00:01:13,110
produce a result the effects were

30
00:01:19,910 --> 00:01:16,650
actually enhanced by group healing group

31
00:01:23,390 --> 00:01:19,920
healers actually treating cells both

32
00:01:24,620 --> 00:01:23,400
before and after radiation so survival

33
00:01:29,480 --> 00:01:24,630
rates actually went up to something like

34
00:01:32,149 --> 00:01:29,490
98% healers however failed to produce a

35
00:01:34,550 --> 00:01:32,159
result in about 12% of the experiments

36
00:01:38,179 --> 00:01:34,560
even it's very clean lab 12% of the

37
00:01:40,340 --> 00:01:38,189
experiments failed these findings I

38
00:01:43,280 --> 00:01:40,350

think are very difficult to explain in

39

00:01:46,670 --> 00:01:43,290

terms of the standard scientific

40

00:01:48,350 --> 00:01:46,680

paradigm it's curious my physics friends

41

00:01:50,620 --> 00:01:48,360

really don't have too many problems with

42

00:01:57,459 --> 00:01:50,630

this my colleagues in medicine biology

43

00:02:02,870 --> 00:01:59,690

let's look at the importance of

44

00:02:06,679 --> 00:02:02,880

conditioned workspace these eight

45

00:02:09,499 --> 00:02:06,689

hundred and fifty-four experiments done

46

00:02:11,809 --> 00:02:09,509

in the conditioned space failed twelve

47

00:02:13,430 --> 00:02:11,819

percent of the time or 102 out of 850

48

00:02:15,590 --> 00:02:13,440

for failed

49

00:02:19,100 --> 00:02:15,600

in a non conditioned lab that is a lab

50

00:02:21,770 --> 00:02:19,110

that was treated that was not treated by

51
00:02:27,160 --> 00:02:21,780
panic healers no effect in 90% of the

52
00:02:30,140 --> 00:02:27,170
experiments very dirty lab 100% failure

53
00:02:32,390 --> 00:02:30,150
moving right along let me quickly look

54
00:02:35,150 --> 00:02:32,400
at the investigation of this 12 percent

55
00:02:37,190 --> 00:02:35,160
failure rate in the previous experiment

56
00:02:40,280 --> 00:02:37,200
we actually had a healer plus a cell

57
00:02:41,960 --> 00:02:40,290
manager in a new set of experiments a

58
00:02:43,400 --> 00:02:41,970
hundred that we did we know they had a

59
00:02:45,680 --> 00:02:43,410
healer but a cell manager as well as

60
00:02:48,830 --> 00:02:45,690
someone that observed this and what this

61
00:02:50,480 --> 00:02:48,840
observer did was the following as the

62
00:02:52,220 --> 00:02:50,490
experiment was going on they picked up

63
00:02:55,040 --> 00:02:52,230

their cell phone and call their favorite

64

00:02:58,700 --> 00:02:55,050

charity and made a donation to that

65

00:03:00,980 --> 00:02:58,710

charity and willed any good karma that

66

00:03:04,040 --> 00:03:00,990

came from that gift of money to the

67

00:03:08,150 --> 00:03:04,050

charity to go to these cells and the

68

00:03:13,220 --> 00:03:08,160

change in to the survival rate kind of a

69

00:03:15,470 --> 00:03:13,230

strange experiment but here the results

70

00:03:18,170 --> 00:03:15,480

there were there was no improvement in

71

00:03:23,150 --> 00:03:18,180

the cell survival rates but the failure

72

00:03:25,040 --> 00:03:23,160

rate dropped from 12% to 4% no

73

00:03:28,640 --> 00:03:25,050

correlations between success rate and

74

00:03:30,140 --> 00:03:28,650

amount donated or charity used and I'd

75

00:03:31,850 --> 00:03:30,150

suggest that this represents the first

76
00:03:39,130 --> 00:03:31,860
experimental observation and measurement

77
00:03:41,150 --> 00:03:39,140
of karmic intervention summary

78
00:03:43,400 --> 00:03:41,160
particular can reverse the effects of

79
00:03:44,720 --> 00:03:43,410
radiation on cells and culture results

80
00:03:45,800 --> 00:03:44,730
are independent of shielding and of

81
00:03:48,680 --> 00:03:45,810
distance between the healer and the

82
00:03:50,240 --> 00:03:48,690
subject results are dependent on one

83
00:03:53,030 --> 00:03:50,250
condition of lab space however and

84
00:03:55,880 --> 00:03:53,040
perhaps the results are improved by

85
00:03:57,890 --> 00:03:55,890
karmic intervention the results are

86
00:03:59,240 --> 00:03:57,900
inconsistent with the Newtonian physics

87
00:04:01,630 --> 00:03:59,250
worldview and I should note that

88
00:04:03,590 --> 00:04:01,640

Newtonian physics is the basis for

89

00:04:07,310 --> 00:04:03,600

contemporary biology and Western

90

00:04:09,020 --> 00:04:07,320

medicine and that these results are

91

00:04:12,470 --> 00:04:09,030

probably consistent with a more quantum

92

00:04:16,820 --> 00:04:12,480

mechanical worldview I'd like to just

93

00:04:18,800 --> 00:04:16,830

take one minute to provide a couple of

94

00:04:20,810 --> 00:04:18,810

comments some of you have heard these

95

00:04:22,940 --> 00:04:20,820

comments before which I apologize but

96

00:04:25,909 --> 00:04:22,950

let me let me go in anyway with some

97

00:04:27,230 --> 00:04:25,919

final remarks in our culture today space

98

00:04:30,350 --> 00:04:27,240

travel is sometime

99

00:04:32,210 --> 00:04:30,360

described as a final frontier let me

100

00:04:35,510 --> 00:04:32,220

suggest to you that the data presented

101
00:04:39,110 --> 00:04:35,520
here clearly shows that there is yet

102
00:04:42,379 --> 00:04:39,120
another frontier a frontier beyond our

103
00:04:44,839 --> 00:04:42,389
common notions of space and time that

104
00:04:47,390 --> 00:04:44,849
involves the power of the mind of the

105
00:04:49,550 --> 00:04:47,400
mind through focus intentionality to

106
00:04:53,450 --> 00:04:49,560
intervene in and to change the physical

107
00:04:56,600 --> 00:04:53,460
world to approach this new frontier will

108
00:04:59,510 --> 00:04:56,610
require a new worldview and a new

109
00:05:01,070 --> 00:04:59,520
paradigm for science perhaps even a

110
00:05:02,990 --> 00:05:01,080
formalism in which science and

111
00:05:06,710 --> 00:05:03,000
spirituality are finally United

112
00:05:08,360 --> 00:05:06,720
this coming paradigm shift may well be

113
00:05:11,300 --> 00:05:08,370

important as those that occurred with

114

00:05:15,140 --> 00:05:11,310

Galileo or with Darwin it will change

115

00:05:17,270 --> 00:05:15,150

forever the way in which we heal one

116

00:05:18,830 --> 00:05:17,280

another and the way in which we view

117

00:05:21,890 --> 00:05:18,840

ourselves in the universe

118

00:05:32,620 --> 00:05:21,900

opening infinite possibilities for those

119

00:05:46,010 --> 00:05:36,860

Thank You Joey very very exciting work I

120

00:05:48,890 --> 00:05:46,020

see some hands in the back you define

121

00:05:50,890 --> 00:05:48,900

success as the difference in survival

122

00:05:53,720 --> 00:05:50,900

rate between experimental control groups

123

00:05:57,440 --> 00:05:53,730

do you have any sense about whether the

124

00:05:59,390 --> 00:05:57,450

control groups in the clean lab had a

125

00:06:04,670 --> 00:05:59,400

different survival rate than the control

126

00:06:05,860 --> 00:06:04,680

groups in the dirty lab no no they did

127

00:06:10,070 --> 00:06:05,870

not

128

00:06:17,750 --> 00:06:10,080

okay what criteria did you use to choose

129

00:06:22,960 --> 00:06:17,760

the healers the criteria for choosing

130

00:06:31,670 --> 00:06:28,280

well basically people that that felt

131

00:06:33,080 --> 00:06:31,680

they could could make changes in the

132

00:06:35,240 --> 00:06:33,090

cells in culture and were willing to do

133

00:06:38,450 --> 00:06:35,250

the experiments basically there were a

134

00:06:40,730 --> 00:06:38,460

number of healers that when that eagerly

135

00:06:42,680 --> 00:06:40,740

volunteered for these for these studies

136

00:06:45,650 --> 00:06:42,690

but then when the studies were explained

137

00:06:47,000 --> 00:06:45,660

to them backed off but cause I think

138

00:06:51,380 --> 00:06:47,010

they felt they were going to get tested

139

00:06:52,640 --> 00:06:51,390

and so it was it was virtually I mean we

140

00:06:55,160 --> 00:06:52,650

were open to basically basically

141

00:07:07,550 --> 00:06:55,170

basically anyone that felt that they

142

00:07:13,400 --> 00:07:10,100

my name is Robin Claire and I would like

143

00:07:16,010 --> 00:07:13,410

to ask you if any of the healers made a

144

00:07:17,870 --> 00:07:16,020

distinction between not even recognizing

145

00:07:21,140 --> 00:07:17,880

the difference between the energy in the

146

00:07:24,080 --> 00:07:21,150

lab and the energy in the cell perhaps

147

00:07:27,379 --> 00:07:24,090

focusing on the fact that energy is

148

00:07:29,240 --> 00:07:27,389

energy and they could just go in and as

149

00:07:32,590 --> 00:07:29,250

they clean the lab they could so to

150

00:07:35,540 --> 00:07:32,600

speak clean the cells at the same time

151

00:07:37,129 --> 00:07:35,550

well there were certainly some healers

152

00:07:39,050 --> 00:07:37,139

that were less sensitive to the

153

00:07:40,550 --> 00:07:39,060

laboratory environment but we're still

154

00:07:41,300 --> 00:07:40,560

equally successfully treating the cells

155

00:07:43,370 --> 00:07:41,310

and culture

156

00:07:45,770 --> 00:07:43,380

it seemed that several of the healers

157

00:07:48,189 --> 00:07:45,780

were particularly sensitive to the

158

00:07:50,990 --> 00:07:48,199

environment they were working in and

159

00:07:55,580 --> 00:07:51,000

that in fact is what led us to do the

160

00:07:57,589 --> 00:07:55,590

cleaning of the lab bill Beatty what was

161

00:08:00,379 --> 00:07:57,599

the source of ionizing radiation

162

00:08:02,300 --> 00:08:00,389

it's a gamma a gamma source yeah I mean

163

00:08:06,080 --> 00:08:02,310

if what someone want to replicate it

164

00:08:08,120 --> 00:08:06,090

what would they have to find well

165

00:08:12,050 --> 00:08:08,130

actually it's a it's a fixed gamma ray

166

00:08:13,670 --> 00:08:12,060

source and we use several different ones

167

00:08:15,050 --> 00:08:13,680

during the course of study and I can I

168

00:08:17,540 --> 00:08:15,060

can give you some further details later

169

00:08:20,060 --> 00:08:17,550

but so fairly it's a standard gamma-ray

170

00:08:24,260 --> 00:08:20,070

source there's several different I'm

171

00:08:26,990 --> 00:08:24,270

Garrett Modell so bill Bankston asked

172

00:08:29,510 --> 00:08:27,000

the question about the clean lab versus

173

00:08:32,540 --> 00:08:29,520

the dirty lab and the control as you

174

00:08:35,089 --> 00:08:32,550

probably know in his results he had a

175

00:08:39,199 --> 00:08:35,099

lot of trouble controlling the control

176
00:08:44,930 --> 00:08:39,209
and just comparing what you did with

177
00:08:47,000 --> 00:08:44,940
what he did do you have any reason to or

178
00:08:49,579 --> 00:08:47,010
any explanations as to why you got

179
00:08:51,470 --> 00:08:49,589
different results than he did something

180
00:08:54,130 --> 00:08:51,480
okay let me I think that I probably

181
00:08:56,630 --> 00:08:54,140
responded his question incorrectly the

182
00:08:59,300 --> 00:08:56,640
if I remember correctly what he was

183
00:09:03,949 --> 00:08:59,310
asking was do we see differences in the

184
00:09:05,360 --> 00:09:03,959
control group and there were some

185
00:09:07,220 --> 00:09:05,370
slightly you know if you take the

186
00:09:10,160 --> 00:09:07,230
control group into the into the really

187
00:09:13,550 --> 00:09:10,170
dirty lab you do see some you do see

188
00:09:15,980 --> 00:09:13,560

some differences yeah you know and I

189

00:09:16,970 --> 00:09:15,990

think the major implications of the

190

00:09:20,840 --> 00:09:16,980

study are one of them

191

00:09:23,780 --> 00:09:20,850

occasions is that many people have tried

192

00:09:26,600 --> 00:09:23,790

to conduct subtle energy experiments and

193

00:09:30,310 --> 00:09:26,610

if they conduct these experiments in a

194

00:09:32,810 --> 00:09:30,320

laboratory environment that's not

195

00:09:35,389 --> 00:09:32,820

conditioned they're going to get very

196

00:09:38,540 --> 00:09:35,399

poor results and this also clearly has

197

00:09:41,090 --> 00:09:38,550

implications for practitioners of any

198

00:09:43,129 --> 00:09:41,100

medical modality that if you treat

199

00:09:44,930 --> 00:09:43,139

patients in an environment that's dirty

200

00:09:54,900 --> 00:09:44,940

you're not going to get very good
