

**THE EXISTENCE  
OF PARANORMAL  
PHENOMENA &  
UFOS HAVE BEEN  
STUDIED AND  
DEBATED FOR  
DECADES AND  
LONGER**

1  
00:00:09,799 --> 00:00:03,710  
I almost got off with the world's

2  
00:00:15,620 --> 00:00:09,809  
briefest presentation I thank Bob for

3  
00:00:18,230 --> 00:00:15,630  
that I I got into physics a long time

4  
00:00:21,710 --> 00:00:18,240  
ago as a young kid I really was curious

5  
00:00:23,210 --> 00:00:21,720  
about the world and I thought that

6  
00:00:26,320 --> 00:00:23,220  
science would be the way to get the

7  
00:00:29,240 --> 00:00:26,330  
answers so I went to MIT and Princeton

8  
00:00:31,550 --> 00:00:29,250  
thinking that conventional physics was

9  
00:00:33,680 --> 00:00:31,560  
going to have a satisfying theory of the

10  
00:00:35,420 --> 00:00:33,690  
universe and I kind of came away feeling

11  
00:00:38,690 --> 00:00:35,430  
that something was missing still it

12  
00:00:40,520 --> 00:00:38,700  
didn't it didn't seem it's not the basic

13  
00:00:45,350 --> 00:00:40,530

deep questions all fit together very

14

00:00:47,810 --> 00:00:45,360

well this is a book that so summarizes

15

00:00:51,369 --> 00:00:47,820

my search to date the synchronized

16

00:00:55,939 --> 00:00:51,379

universe new science at the paranormal

17

00:00:58,910 --> 00:00:55,949

what what I found in the mid-80s is a

18

00:01:00,770 --> 00:00:58,920

clue for what I was missing

19

00:01:03,740 --> 00:01:00,780

can everyone hear me in the back okay is

20

00:01:06,560 --> 00:01:03,750

this okay I discovered remote viewing

21

00:01:11,600 --> 00:01:06,570

and remote viewing of course allows you

22

00:01:13,460 --> 00:01:11,610

to to to move in space and in time far

23

00:01:17,960 --> 00:01:13,470

beyond what our conventional physics

24

00:01:19,910 --> 00:01:17,970

would allow based on causality so that

25

00:01:22,160 --> 00:01:19,920

was just plus it doesn't weaken with

26

00:01:24,350 --> 00:01:22,170

with distance with the square of the

27

00:01:26,870 --> 00:01:24,360

distance like the forces we know about

28

00:01:29,410 --> 00:01:26,880

do so all of a sudden we had some major

29

00:01:32,210 --> 00:01:29,420

anomalies I mean this was a clue for me

30

00:01:35,480 --> 00:01:32,220

that maybe there were some things that

31

00:01:38,060 --> 00:01:35,490

the grad school had not covered that I

32

00:01:40,609 --> 00:01:38,070

needed to look into since that time a

33

00:01:42,710 --> 00:01:40,619

number of other anomalies have shown up

34

00:01:44,800 --> 00:01:42,720

in mainstream physics of course

35

00:01:47,990 --> 00:01:44,810

physicists theorists are very quick to

36

00:01:50,149 --> 00:01:48,000

provide explanations for them Dark

37

00:01:53,240 --> 00:01:50,159

Matter being one but it was kind of an

38

00:01:55,460 --> 00:01:53,250

unexpected anomaly when I went to grad

39

00:01:57,350 --> 00:01:55,470

school in the gravity group at Princeton

40

00:01:59,359 --> 00:01:57,360

no one talked about dark matter everyone

41

00:02:01,819 --> 00:01:59,369

thought that the Big Bang model was a

42

00:02:03,889 --> 00:02:01,829

pretty good shape in those days now we

43

00:02:07,580 --> 00:02:03,899

know there's a whole lot of extra stuff

44

00:02:11,360 --> 00:02:07,590

out there that was not included we're

45

00:02:12,620 --> 00:02:11,370

also seeing anomalies in pendulum

46

00:02:15,890 --> 00:02:12,630

phenomena the

47

00:02:18,680 --> 00:02:15,900

the the merese la experiments or once

48

00:02:21,140 --> 00:02:18,690

axel and others have also duplicated

49

00:02:24,110 --> 00:02:21,150

this when you have a pendulum swinging

50

00:02:26,540 --> 00:02:24,120

and the Earth turns beneath that there's

51  
00:02:29,270 --> 00:02:26,550  
a certain angular change the pendulum is

52  
00:02:32,330 --> 00:02:29,280  
supposed to undergo but when a solar

53  
00:02:35,330 --> 00:02:32,340  
eclipse occurs an anomaly happens the

54  
00:02:38,180 --> 00:02:35,340  
angle veers off in many cases at a

55  
00:02:40,460 --> 00:02:38,190  
strange angle suggesting that something

56  
00:02:44,600 --> 00:02:40,470  
is missing from our current gravity

57  
00:02:49,010 --> 00:02:44,610  
model cold fusion despite all the hoopla

58  
00:02:51,740 --> 00:02:49,020  
after the 89 announcements and the

59  
00:02:53,960 --> 00:02:51,750  
suppose and failure to replicate at MIT

60  
00:02:57,020 --> 00:02:53,970  
and Princeton we now know that the print

61  
00:03:00,770 --> 00:02:57,030  
at the MIT and Caltech we now know that

62  
00:03:03,410 --> 00:03:00,780  
the MIT group actually did get excess

63  
00:03:06,050 --> 00:03:03,420

energy which they subtracted out in the

64

00:03:08,870 --> 00:03:06,060

final draft of their paper and since

65

00:03:11,300 --> 00:03:08,880

then over 500 labs around the world have

66

00:03:13,880 --> 00:03:11,310

replicated various aspects of cold

67

00:03:16,490 --> 00:03:13,890

fusion we don't really have a theory a

68

00:03:18,800 --> 00:03:16,500

satisfactory theory for why it happens

69

00:03:21,860 --> 00:03:18,810

but there are a number of very

70

00:03:24,080 --> 00:03:21,870

successful experiments going on today in

71

00:03:27,170 --> 00:03:24,090

many labs around the world

72

00:03:30,170 --> 00:03:27,180

charge clusters one more anomaly that

73

00:03:34,100 --> 00:03:30,180

falls into current hard science if you

74

00:03:37,700 --> 00:03:34,110

create a spark in a vacuum chamber and

75

00:03:40,790 --> 00:03:37,710

you produce a large number of electrons

76  
00:03:43,390 --> 00:03:40,800  
in a very small space if you make maybe

77  
00:03:47,420 --> 00:03:43,400  
a 10 billion or so in a micron sized

78  
00:03:49,550 --> 00:03:47,430  
sphere anomalies start to show up that

79  
00:03:53,150 --> 00:03:49,560  
are not accounted for by current physics

80  
00:03:55,070 --> 00:03:53,160  
they don't repel at enormous speeds the

81  
00:03:57,020 --> 00:03:55,080  
way they should instead they tend to

82  
00:03:59,210 --> 00:03:57,030  
clump together so when they hit a

83  
00:04:01,790 --> 00:03:59,220  
witness plate some distance away the

84  
00:04:04,880 --> 00:04:01,800  
lower picture there shows the pattern

85  
00:04:07,550 --> 00:04:04,890  
that you get each dark spot is a charged

86  
00:04:09,250 --> 00:04:07,560  
cluster with billions of electrons and

87  
00:04:11,660 --> 00:04:09,260  
these charged clusters themselves

88  
00:04:13,760 --> 00:04:11,670

develop a little magnetic fields and

89

00:04:15,620 --> 00:04:13,770

they kind of link together like a pop

90

00:04:20,090 --> 00:04:15,630

beads on a necklace when they hit the

91

00:04:22,760 --> 00:04:20,100

witness plate we think probably that at

92

00:04:25,010 --> 00:04:22,770

this density of charge we're getting

93

00:04:25,760 --> 00:04:25,020

some zero point value Manama leas that

94

00:04:30,469 --> 00:04:25,770

are not deterrent

95

00:04:32,719 --> 00:04:30,479

explained in current physics but you

96

00:04:34,879 --> 00:04:32,729

know it certainly is one one more clue

97

00:04:37,249 --> 00:04:34,889

that our science does not have all the

98

00:04:40,610 --> 00:04:37,259

answers at the present time when this

99

00:04:43,550 --> 00:04:40,620

charge cluster hits a metal plate you

100

00:04:46,760 --> 00:04:43,560

get a hole it drills into the plate in

101

00:04:49,580 --> 00:04:46,770

the top picture here and it looks a lot

102

00:04:52,399 --> 00:04:49,590

like some kind of fusion or some kind of

103

00:04:55,100 --> 00:04:52,409

very strong melting is occurring when

104

00:04:56,899 --> 00:04:55,110

the electrons hit the metal in cosmology

105

00:05:03,460 --> 00:04:56,909

there are also anomalies this is a

106

00:05:10,070 --> 00:05:07,399

galaxy with jets that are some that are

107

00:05:11,659 --> 00:05:10,080

connected to three objects that are

108

00:05:14,029 --> 00:05:11,669

supposed to be there are classified as

109

00:05:16,490 --> 00:05:14,039

quasars that should be much much further

110

00:05:18,950 --> 00:05:16,500

away than the nearby object and yet they

111

00:05:21,379 --> 00:05:18,960

have these Jets connecting them and he

112

00:05:23,480 --> 00:05:21,389

reasons from this that actually our

113

00:05:25,189 --> 00:05:23,490

whole idea of what a quasar is is wrong

114

00:05:27,950 --> 00:05:25,199

and that a whole lot of redshifts are

115

00:05:30,080 --> 00:05:27,960

missing something important the speed of

116

00:05:32,450 --> 00:05:30,090

light one more example Raymond chow and

117

00:05:34,279 --> 00:05:32,460

others we've seen anomalies in the speed

118

00:05:37,399 --> 00:05:34,289

of light where we get faster than light

119

00:05:39,469 --> 00:05:37,409

propagation in some cases what I want to

120

00:05:42,529 --> 00:05:39,479

talk about today are other types of

121

00:05:45,019 --> 00:05:42,539

phenomena that also give us hints about

122

00:05:47,510 --> 00:05:45,029

anomalies that might help us to

123

00:05:50,269 --> 00:05:47,520

construct a better theory of physics or

124

00:05:53,360 --> 00:05:50,279

help us to get to guide us if we are

125

00:05:55,129 --> 00:05:53,370

missing things that need to be added and

126

00:05:59,540 --> 00:05:55,139

of course other paranormal phenomena and

127

00:06:05,120 --> 00:05:59,550

UFOs or to anomalistic areas that are

128

00:06:06,909 --> 00:06:05,130

good guides to provide clues for us so

129

00:06:10,279 --> 00:06:06,919

if we can look at what some of those

130

00:06:12,800 --> 00:06:10,289

experiments and incidents teach us I'm

131

00:06:15,649 --> 00:06:12,810

not trying to prove that either one

132

00:06:18,439 --> 00:06:15,659

exists today that's a big subject that

133

00:06:20,839 --> 00:06:18,449

would be a much longer talk some good

134

00:06:23,360 --> 00:06:20,849

references supporting each phenomena can

135

00:06:25,070 --> 00:06:23,370

be suggested for the paranormal

136

00:06:26,749 --> 00:06:25,080

the psychic discoveries behind the iron

137

00:06:29,080 --> 00:06:26,759

curtain by Australia and Schroder back

138

00:06:32,330 --> 00:06:29,090

in nineteen seventy was one of the great

139

00:06:33,680 --> 00:06:32,340

watershed books margins of reality by

140

00:06:37,360 --> 00:06:33,690

Bob John in brennidon

141

00:06:39,550 --> 00:06:37,370

Dean Raiden's books bill tillers books

142

00:06:40,900 --> 00:06:39,560

genic monocles books output

143

00:06:42,790 --> 00:06:40,910

mine at the bottom there I think I try

144

00:06:45,820 --> 00:06:42,800

to summarize these things but there are

145

00:06:48,280 --> 00:06:45,830

many many books that got a good guide

146

00:06:51,730 --> 00:06:48,290

for those who were learning about the

147

00:06:54,010 --> 00:06:51,740

anomalies in the paranormal and for UFOs

148

00:06:56,409 --> 00:06:54,020

I would say Timothy goods above top

149

00:06:58,810 --> 00:06:56,419

secret was one of those great books in

150

00:07:01,330 --> 00:06:58,820

the late 80s that showed us there was

151

00:07:03,909 --> 00:07:01,340

some substance here that we weren't we

152

00:07:06,400 --> 00:07:03,919

had not been seeing before Michael Hess

153

00:07:08,640 --> 00:07:06,410

omens UFOs the secret history is a very

154

00:07:12,190 --> 00:07:08,650

thorough book about some of the evidence

155

00:07:15,070 --> 00:07:12,200

built hoarse those day after Roswell Ray

156

00:07:18,040 --> 00:07:15,080

Fowler's books John Mac's books witty

157

00:07:22,050 --> 00:07:18,050

streamers books all give different views

158

00:07:24,820 --> 00:07:22,060

of this very complex and large subject

159

00:07:27,010 --> 00:07:24,830

some paranormal phenomena as you know

160

00:07:30,400 --> 00:07:27,020

have been demonstrated in the lab with

161

00:07:32,950 --> 00:07:30,410

good statistics the prepare lab Dean

162

00:07:37,120 --> 00:07:32,960

Radin global consciousness project with

163

00:07:39,430 --> 00:07:37,130

ESP PK and remote viewing now we can say

164

00:07:43,150 --> 00:07:39,440  
have been established with high

165

00:07:44,950 --> 00:07:43,160  
probability in my mind some effects are

166

00:07:46,960 --> 00:07:44,960  
more spectacular in a rare and more

167

00:07:49,740 --> 00:07:46,970  
controversial and they depend more on

168

00:07:54,550 --> 00:07:49,750  
anecdotal evidence levitation

169

00:07:57,130 --> 00:07:54,560  
teleportation etc this is a problem

170

00:08:01,659 --> 00:07:57,140  
studying UFOs scientifically since you

171

00:08:03,250 --> 00:08:01,669  
can't really control repeatability its

172

00:08:07,450 --> 00:08:03,260  
although it's desirable to have good

173

00:08:09,909 --> 00:08:07,460  
statistics in science some events are

174

00:08:11,890 --> 00:08:09,919  
rare and non repeatable and yet we have

175

00:08:14,830 --> 00:08:11,900  
to live with it if the event is

176  
00:08:16,690 --> 00:08:14,840  
spectacular enough the Big Bang is one

177  
00:08:20,290 --> 00:08:16,700  
we've kind of stuck with we get one you

178  
00:08:22,390 --> 00:08:20,300  
know to study the first atomic bomb test

179  
00:08:26,200 --> 00:08:22,400  
was sufficient to convince the military

180  
00:08:29,620 --> 00:08:26,210  
that they were ready to go the Omega

181  
00:08:32,560 --> 00:08:29,630  
minus particles of scotch to convince

182  
00:08:34,510 --> 00:08:32,570  
people that su3 the Eightfold way of

183  
00:08:38,110 --> 00:08:34,520  
Mariko maan was correct there so there

184  
00:08:42,100 --> 00:08:38,120  
are cases where a few examples have a

185  
00:08:43,719 --> 00:08:42,110  
lot of power it's not ideal but it's we

186  
00:08:47,829 --> 00:08:43,729  
have we're stuck with basically until we

187  
00:08:49,810 --> 00:08:47,839  
have some better data in case of UFOs

188  
00:08:52,940 --> 00:08:49,820

there are some really high credibility

189

00:08:54,710 --> 00:08:52,950

witnesses so for people who have

190

00:08:57,050 --> 00:08:54,720

looked into the subject - who are

191

00:08:59,420 --> 00:08:57,060

skeptics it's worthwhile looking at what

192

00:09:03,920 --> 00:08:59,430

some pretty high credibility individuals

193

00:09:06,080 --> 00:09:03,930

said about their existence it's time for

194

00:09:08,360 --> 00:09:06,090

the truth to be brought out behind the

195

00:09:11,570 --> 00:09:08,370

scenes high ranking Air Force officers

196

00:09:13,670 --> 00:09:11,580

are soberly concerned about UFOs but

197

00:09:15,800 --> 00:09:13,680

through official secrecy secrecy and

198

00:09:18,620 --> 00:09:15,810

ridicule many citizens are led to

199

00:09:21,170 --> 00:09:18,630

believe the unknown objects are nonsense

200

00:09:23,660 --> 00:09:21,180

and this is the former CIA director

201  
00:09:27,650 --> 00:09:23,670  
Vice Admiral Roscoe Helen Cotter in a

202  
00:09:30,290 --> 00:09:27,660  
statement to Congress this flying saucer

203  
00:09:31,820 --> 00:09:30,300  
situation is not at all imaginary or

204  
00:09:34,250 --> 00:09:31,830  
seeing too much in some natural

205  
00:09:36,680 --> 00:09:34,260  
phenomena something is really flying

206  
00:09:40,340 --> 00:09:36,690  
around the phenomenon is something real

207  
00:09:42,710 --> 00:09:40,350  
and not visionary or fictitious general

208  
00:09:47,180 --> 00:09:42,720  
Nathan twining chief of staff US Air

209  
00:09:48,680 --> 00:09:47,190  
Force more than 10,000 sightings have

210  
00:09:50,780 --> 00:09:48,690  
been reported the majority of which

211  
00:09:53,720 --> 00:09:50,790  
cannot be accounted for by any

212  
00:09:56,270 --> 00:09:53,730  
scientific explanation I'm convinced

213  
00:09:58,910 --> 00:09:56,280

these objects do exist and that they are
