

Conclusions

The predicted Gravito-Inertial Effect called "Stimulated Anomalous Reaction to Gravity" (SARG) relies on a physical principle not envisaged from the Classical and Modern Physics.

- The SARG effect is a change of the physical vacuum parameters, which define the gravito-inertial mass of the object and the surrounding zone, so it provides acceleration with reduced turbulence inertial effect.
- The propulsion based on SARG effect may work in atmospheric and in deep space environments. A proper gas mixture for EM activated plasma is needed.
- If a strong SARG effect is invoked by EM activated plasma, the surrounding zone will exhibit the following effects:
 - Non-thermal optical radiation
 - Disturbed propagation of light and EM waves
 - Fragmented Earth magnetic field
 - Longitudinal (shock waves) and possibly soft X rays - a biomedical hazard
 - EM noise

The SARG effect is suitable only for interplanetary and deep space travel, but not for replacing the jet propulsion systems in the Earth atmosphere.

- unwanted Michelson effect for a not properly design experiment. Example:

1
00:00:07,490 --> 00:00:04,519
deriving their connected with the non

2
00:00:10,160 --> 00:00:07,500
physical parameters one is the static

3
00:00:13,720 --> 00:00:10,170
cosmic lattice pressure and it is

4
00:00:18,620 --> 00:00:13,730
important because it is like a pleasure

5
00:00:20,450 --> 00:00:18,630
defining pressure on the internal

6
00:00:23,359 --> 00:00:20,460
structure the blue metallic particles

7
00:00:28,130 --> 00:00:23,369
that is impenetrable to this cosmic

8
00:00:31,429 --> 00:00:28,140
lattice and define the Newton Mass so in

9
00:00:34,819 --> 00:00:31,439
fact the mass that participate in all

10
00:00:38,090 --> 00:00:34,829
equations is not something constant it

11
00:00:42,920 --> 00:00:38,100
appears as a pleasure of the Disco's

12
00:00:46,459 --> 00:00:42,930
mcclarty's then the northern is that if

13
00:00:50,110 --> 00:00:46,469

some parameters of the physical vacuum I

14

00:00:53,479 --> 00:00:50,120

called cosmic lattice and delayed it

15

00:01:02,119 --> 00:00:53,489

then you could change the mass of the

16

00:01:09,200 --> 00:01:02,129

object and from here it is predicted one

17

00:01:11,600 --> 00:01:09,210

guru to inertial mass effect and it is

18

00:01:14,390 --> 00:01:11,610

based on this that this cosmic lattice

19

00:01:17,960 --> 00:01:14,400

not they have the same frequency and

20

00:01:20,120 --> 00:01:17,970

easy is a synchronized and in fact all

21

00:01:23,749 --> 00:01:20,130

the time they are synchronized with one

22

00:01:26,270 --> 00:01:23,759

parameter Compton the length that is

23

00:01:28,429 --> 00:01:26,280

involved in definition the velocity of

24

00:01:30,620 --> 00:01:28,439

light here we don't have to take just

25

00:01:34,249 --> 00:01:30,630

velocity of light like a postulate but

26

00:01:36,380 --> 00:01:34,259

we see why it is constant and what

27

00:01:40,399 --> 00:01:36,390

parameters defined the light velocity

28

00:01:45,050 --> 00:01:40,409

and this self synchronization is almost

29

00:01:47,740 --> 00:01:45,060

persistent but there is a conclusion

30

00:01:50,240 --> 00:01:47,750

that if you disturb the self

31

00:01:53,780 --> 00:01:50,250

synchronization and this cosmic light is

32

00:01:55,700 --> 00:01:53,790

not around the solid object this should

33

00:01:59,510 --> 00:01:55,710

affect the gravitational and inertial

34

00:02:02,179 --> 00:01:59,520

mass with simultaneous disturbance of

35

00:02:05,660 --> 00:02:02,189

delight and electromagnetic waves in the

36

00:02:09,210 --> 00:02:05,670

surrounding zone so in fact we have here

37

00:02:13,890 --> 00:02:09,220

the Newtonian

38

00:02:22,350 --> 00:02:13,900

equation but we have change of the force

39

00:02:24,630 --> 00:02:22,360

by the change of the mass and the theory

40

00:02:29,820 --> 00:02:24,640

of symmetrical disturbance of the

41

00:02:32,960 --> 00:02:29,830

synchronous self synchronization this by

42

00:02:35,760 --> 00:02:32,970

using the unveils electrons properties

43

00:02:38,250 --> 00:02:35,770

because to make such disturbance we have

44

00:02:43,910 --> 00:02:38,260

to read run super high frequency that is

45

00:02:47,250 --> 00:02:43,920

a Content frequency 1.2 3 6 10 power 20

46

00:02:50,100 --> 00:02:47,260

how to ditch this in fact it could be

47

00:02:52,530 --> 00:02:50,110

rich with much lower frequency by using

48

00:02:55,170 --> 00:02:52,540

electrons that have the same frequency

49

00:02:59,030 --> 00:02:55,180

but properly motion of this electron

50

00:03:02,250 --> 00:02:59,040

accelerating by a much lower occipital

51
00:03:05,310 --> 00:03:02,260
alternated frequency it could reach this

52
00:03:09,199 --> 00:03:05,320
frequency would can modulate the the

53
00:03:11,750 --> 00:03:09,209
cosmic lattice the Physical lab vacuum

54
00:03:14,820 --> 00:03:11,760
this reason was investigated

55
00:03:19,610 --> 00:03:14,830
electromagnetic plasma then it was

56
00:03:22,830 --> 00:03:19,620
identified the technology and of the

57
00:03:25,800 --> 00:03:22,840
envisioned methods should work abnormal

58
00:03:29,729 --> 00:03:25,810
pressure and in vacuum if there is a

59
00:03:34,400 --> 00:03:29,739
proper gas surrounding here's some

60
00:03:39,030 --> 00:03:34,410
laboratory experiments as shown here the

61
00:03:42,030 --> 00:03:39,040
force field activator and here also one

62
00:03:45,660 --> 00:03:42,040
demonstration of the predicted effect in

63
00:03:48,000 --> 00:03:45,670

the last conference of the society

64

00:03:51,240 --> 00:03:48,010

annual meeting in fact I show a

65

00:03:56,780 --> 00:03:51,250

demonstration of rotating based on

66

00:04:05,310 --> 00:04:02,070

now I have another effect that another

67

00:04:08,520 --> 00:04:05,320

demonstration I enclosed all data Vater

68

00:04:11,699 --> 00:04:08,530

in the volume of cylinder activating

69

00:04:15,240 --> 00:04:11,709

this actuator the whole cylinder moves

70

00:04:18,150 --> 00:04:15,250

in fact this contradicts to the Newton's

71

00:04:20,210 --> 00:04:18,160

law of motion because if you in one

72

00:04:22,460 --> 00:04:20,220

wagon and try to

73

00:04:25,760 --> 00:04:22,470

to push inside the wagon to move it's

74

00:04:29,500 --> 00:04:25,770

not it doesn't but in this case it moves

75

00:04:33,580 --> 00:04:29,510

so the only explanation is that the

76

00:04:37,880 --> 00:04:33,590

gravitational mass of this object

77

00:04:40,730 --> 00:04:37,890

activator is affected and it is affected

78

00:04:45,500 --> 00:04:40,740

also in it directionally by properly

79

00:04:51,320 --> 00:04:45,510

activated surrounded plasma of the

80

00:04:54,230 --> 00:04:51,330

object and here if you need if we

81

00:04:57,380 --> 00:04:54,240

investigate a lot of this phenomena the

82

00:05:00,380 --> 00:04:57,390

effects about UFO we found so much

83

00:05:04,430 --> 00:05:00,390

similarity that is predicted by this

84

00:05:06,350 --> 00:05:04,440

physical effect the conclusion said that

85

00:05:08,210 --> 00:05:06,360

the predicted curve to inertial effect

86

00:05:10,610 --> 00:05:08,220

across stimulated on the mallows

87

00:05:12,980 --> 00:05:10,620

reaction to gravity relies on the

88

00:05:18,020 --> 00:05:12,990

physical principle not envision from the

89

00:05:20,360 --> 00:05:18,030

classical and modern physics the circ

90

00:05:22,840 --> 00:05:20,370

effect is a change of the physical

91

00:05:27,409 --> 00:05:22,850

vacuum parameters which define the great

92

00:05:30,380 --> 00:05:27,419

inertial mass the propulsion could be

93

00:05:34,900 --> 00:05:30,390

used in the most Eric and in deep space

94

00:05:37,580 --> 00:05:34,910

environment also the effects in this

95

00:05:40,190 --> 00:05:37,590

that matched the effects of the observed

96

00:05:43,940 --> 00:05:40,200

phenomena are quite understandable and

97

00:05:46,760 --> 00:05:43,950

explainable from this point of view but

98

00:05:49,550 --> 00:05:46,770

the conclusion is that this effect is

99

00:05:52,219 --> 00:05:49,560

suitable only for interplanetary and

100

00:05:54,680 --> 00:05:52,229

deep space travel but not for replacing

101
00:05:58,190 --> 00:05:54,690
the jet propulsion system in the earth

102
00:06:01,790 --> 00:05:58,200
atmosphere why because this modulation

103
00:06:04,880 --> 00:06:01,800
of space may may have some unwanted

104
00:06:07,010 --> 00:06:04,890
effects that some case could be

105
00:06:09,650 --> 00:06:07,020
dangerous for example that is one

106
00:06:12,520 --> 00:06:09,660
unwanted effects in effect that I

107
00:06:22,870 --> 00:06:12,530
apparently also receive in my

108
00:06:30,770 --> 00:06:27,080
for example in one my experiments this

109
00:06:35,659 --> 00:06:30,780
rod that I used as a inductor apparently

110
00:06:39,710 --> 00:06:35,669
get sparks and want its part and this

111
00:06:42,969 --> 00:06:39,720
rod was curved just for the two seconds

112
00:06:46,790 --> 00:06:42,979
it's a you could not curve this rod for

113
00:06:51,890 --> 00:06:46,800

5,000 degrees heating by hours and it is

114

00:06:55,580 --> 00:06:51,900

curved without any crack so this effect

115

00:06:58,820 --> 00:06:55,590

in fact is something changing something

116

00:07:05,510 --> 00:06:58,830

of the space environment of the physical

117

00:07:09,920 --> 00:07:05,520

vacuum and one of the major reason is

118

00:07:12,200 --> 00:07:09,930

this just in to make a test of the speed

119

00:07:15,830 --> 00:07:12,210

of light repeat this experiment that

120

00:07:26,130 --> 00:07:15,840

Stefan marinov repeat and see that

121

00:07:36,040 --> 00:07:28,330

now we have time for five minutes of

122

00:07:39,490 --> 00:07:36,050

questions okay all right let's start on

123

00:07:49,150 --> 00:07:39,500

this side of the room questions okay

124

00:07:51,400 --> 00:07:49,160

we'll start with York on that side I am

125

00:07:54,510 --> 00:07:51,410

indebted to tom van Flandern for

126
00:07:57,310 --> 00:07:54,520
pointing out some months ago that the

127
00:07:59,020 --> 00:07:57,320
the existence of the global positioning

128
00:08:02,470 --> 00:07:59,030
satellite system and the fact that

129
00:08:04,750 --> 00:08:02,480
people can actually succeed in

130
00:08:06,640 --> 00:08:04,760
navigating with it consists of an

131
00:08:09,310 --> 00:08:06,650
empirical demonstration that the speed

132
00:08:11,200 --> 00:08:09,320
of light is in fact constant and

133
00:08:14,830 --> 00:08:11,210
isotropic in the environment of earth

134
00:08:17,020 --> 00:08:14,840
and is an observation with with now

135
00:08:21,610 --> 00:08:17,030
billions of instances and thousands more

136
00:08:23,710 --> 00:08:21,620
accumulating every day therefore this

137
00:08:26,890 --> 00:08:23,720
would seem to be an overwhelming body of

138
00:08:30,100 --> 00:08:26,900

evidence that anything any experiment

139

00:08:32,409 --> 00:08:30,110

that has claimed to find a velocity

140

00:08:34,450 --> 00:08:32,419

relative to the medium of electrum

141

00:08:40,890 --> 00:08:34,460

dynamic of electromagnetic propagation

142

00:08:43,810 --> 00:08:40,900

is simply wrong okay if you make

143

00:08:47,830 --> 00:08:43,820

measurements of the velocity of light

144

00:08:53,950 --> 00:08:47,840

without salt that is not interrupted not

145

00:08:57,430 --> 00:08:53,960

in sequences the Doppler shift come is

146

00:09:00,340 --> 00:08:57,440

compensated by the clock rate change

147

00:09:03,220 --> 00:09:00,350

from the special relativity so this

148

00:09:06,910 --> 00:09:03,230

effect is not observable but if you make

149

00:09:10,690 --> 00:09:06,920

a measurement by intercepting a flight

150

00:09:13,300 --> 00:09:10,700

in two directions and both shattered

151

00:09:16,240 --> 00:09:13,310

work simultaneously as the experiment of

152

00:09:18,810 --> 00:09:16,250

the Stefan marinov not only his but

153

00:09:23,170 --> 00:09:18,820

there is another experiment that clearly

154

00:09:25,840 --> 00:09:23,180

detect the motion of the our solar

155

00:09:28,570 --> 00:09:25,850

system for the Milky Way and it is

156

00:09:34,420 --> 00:09:28,580

detected in the lab in the laboratory

157

00:09:37,000 --> 00:09:34,430

and this experiment there in the

158

00:09:41,810 --> 00:09:37,010

peer-reviewed journal

159

00:09:43,940 --> 00:09:41,820

um I unfortunately I can't tell enough

160

00:09:46,280 --> 00:09:43,950

from just this presentation to don't

161

00:09:48,980 --> 00:09:46,290

really understand your phenomena is

162

00:09:57,620 --> 00:09:48,990

there something simple that i could do
