

INTENTION AFFECTS WATER

Healing intention affects water structure

- Changes in UV and IR spectroscopy—Dean(1983)
- Changes in IR spectroscopy- Schwartz (1990)
- Changes in UV spectroscopy – Rein (1994)-JSE
- Changes in Raman Spectroscopy – Rein (1996)
- Changes in crystallization pattern – Emoto (2000)

1
00:00:04,430 --> 00:00:02,360
okay so obviously there's been some

2
00:00:06,440 --> 00:00:04,440
interest in water in this conference and

3
00:00:08,450 --> 00:00:06,450
I wanted to summarize some of the

4
00:00:11,450 --> 00:00:08,460
research that I've done with water and

5
00:00:12,770 --> 00:00:11,460
intent and I guess it's the pictures are

6
00:00:15,620 --> 00:00:12,780
nice and clear you can see the picture

7
00:00:17,599 --> 00:00:15,630
on the left where the man's intent - you

8
00:00:19,460 --> 00:00:17,609
can see I'll turn it off right right

9
00:00:23,000 --> 00:00:19,470
don't turn it off you can see that he's

10
00:00:24,950 --> 00:00:23,010
standing on a cover here and his intent

11
00:00:26,720 --> 00:00:24,960
is obviously to get the water to go out

12
00:00:29,720 --> 00:00:26,730
and through the hole whereas in this

13
00:00:31,970 --> 00:00:29,730

slide the picture on the right the

14

00:00:33,440 --> 00:00:31,980

intent of the water perhaps is more

15

00:00:35,000 --> 00:00:33,450

interesting than the intent of the man

16

00:00:38,119 --> 00:00:35,010

who's like a little small little guy

17

00:00:41,889 --> 00:00:38,129

over there yeah anyway so in this

18

00:00:44,299 --> 00:00:41,899

context I wanted to just introduce the

19

00:00:47,060 --> 00:00:44,309

anomalous effect of electromagnetic

20

00:00:49,850 --> 00:00:47,070

field on water because there is a

21

00:00:52,010 --> 00:00:49,860

scientific rationale and basis for

22

00:00:54,560 --> 00:00:52,020

looking at the effects of intention and

23

00:00:57,229 --> 00:00:54,570

consciousness on water if in fact we can

24

00:00:58,819 --> 00:00:57,239

make parallels between the energy of

25

00:01:01,700 --> 00:00:58,829

consciousness and the energy of an

26

00:01:07,240 --> 00:01:01,710

electromagnetic field and it turns out

27

00:01:09,649 --> 00:01:07,250

that in as early as the 1960s when when

28

00:01:13,550 --> 00:01:09,659

Russian scientists started looking at

29

00:01:17,510 --> 00:01:13,560

the physical effects on the physical

30

00:01:20,030 --> 00:01:17,520

properties of water that were induced as

31

00:01:22,429 --> 00:01:20,040

a result of exposure to an

32

00:01:23,719 --> 00:01:22,439

electromagnetic field sorry what's

33

00:01:27,280 --> 00:01:23,729

particularly important here is that

34

00:01:31,190 --> 00:01:27,290

these physical effects are observed

35

00:01:36,140 --> 00:01:31,200

after you turn off the stimulus so in

36

00:01:37,520 --> 00:01:36,150

fact the water seems to remember the

37

00:01:41,050 --> 00:01:37,530

fact that it was exposed to an

38

00:01:45,770 --> 00:01:41,060

electromagnetic field in my own research

39

00:01:47,960 --> 00:01:45,780

back into the 90s which it experiment I

40

00:01:49,580 --> 00:01:47,970

did with actually Bill Taylor we looked

41

00:01:52,219 --> 00:01:49,590

at the difference between a magnetic

42

00:01:54,499 --> 00:01:52,229

field I mean the B component of a

43

00:01:57,080 --> 00:01:54,509

magnetic field and the magnetic vector

44

00:01:58,370 --> 00:01:57,090

potential which for those physicists in

45

00:02:00,830 --> 00:01:58,380

the audience it turns out that the a

46

00:02:05,469 --> 00:02:00,840

field is an important component for

47

00:02:10,669 --> 00:02:05,479

storing and structuring of water but

48

00:02:12,830 --> 00:02:10,679

moving on the list now is pretty long of

49

00:02:13,280 --> 00:02:12,840

the physical kinds of changes that can

50

00:02:15,140 --> 00:02:13,290

occur

51
00:02:17,179 --> 00:02:15,150
in water exposed to an electromagnetic

52
00:02:19,630 --> 00:02:17,189
field and since we've been talking about

53
00:02:22,390 --> 00:02:19,640
oxygen content in the previous slide

54
00:02:27,190 --> 00:02:22,400
that's I think of interest that the

55
00:02:30,920 --> 00:02:27,200
oxygen content in the water can't change

56
00:02:32,360 --> 00:02:30,930
now in the by electromagnetic society

57
00:02:34,160 --> 00:02:32,370
they've been studying the effects of

58
00:02:38,030 --> 00:02:34,170
electromagnetic fields on biological

59
00:02:40,160 --> 00:02:38,040
systems for many years again it was the

60
00:02:42,470 --> 00:02:40,170
Russians who decided well maybe these

61
00:02:44,990 --> 00:02:42,480
effects are mediated by water as Gary

62
00:02:46,729 --> 00:02:45,000
had alluded in his talk and what they

63
00:02:49,270 --> 00:02:46,739

did was they exposed water to an

64

00:02:53,030 --> 00:02:49,280

electromagnetic field and then added the

65

00:02:55,420 --> 00:02:53,040

treated water to cells in culture in

66

00:02:57,920 --> 00:02:55,430

this particular experiment kidney cells

67

00:03:00,289 --> 00:02:57,930

they which are exposed to a magnetic

68

00:03:04,610 --> 00:03:00,299

field a very high frequency magnetic

69

00:03:07,430 --> 00:03:04,620

field 42 gigahertz and then they were

70

00:03:09,379 --> 00:03:07,440

able to measure the change in the

71

00:03:11,839 --> 00:03:09,389

electro physiological properties of

72

00:03:13,580 --> 00:03:11,849

these cells in particular the opening

73

00:03:15,800 --> 00:03:13,590

and closing of the potassium channel

74

00:03:19,069 --> 00:03:15,810

which you can see on the bottom is very

75

00:03:23,210 --> 00:03:19,079

much enhanced by the information stored

76
00:03:25,509 --> 00:03:23,220
in the water you can see this effect as

77
00:03:28,610 --> 00:03:25,519
much as twenty minutes after the

78
00:03:30,979 --> 00:03:28,620
exposure so this clearly is an anomaly

79
00:03:35,509 --> 00:03:30,989
in terms of any kind of physics to

80
00:03:37,099 --> 00:03:35,519
explain this phenomenon now that's the

81
00:03:39,229 --> 00:03:37,109
background of course here we're more

82
00:03:42,289 --> 00:03:39,239
interested in effects of intention on

83
00:03:45,140 --> 00:03:42,299
water so we start with can intention

84
00:03:46,550 --> 00:03:45,150
also change the physical properties of

85
00:03:49,369 --> 00:03:46,560
water

86
00:03:53,449 --> 00:03:49,379
Douglas Dean first did these experiments

87
00:03:57,170 --> 00:03:53,459
back in 1983 Stephen Schwartz followed

88
00:03:59,569 --> 00:03:57,180

by similar kind of experiments using you

89

00:04:03,949 --> 00:03:59,579

know various forms of spectroscopy to

90

00:04:05,839 --> 00:04:03,959

measure the change in the water I did

91

00:04:10,280 --> 00:04:05,849

some similar experiments in nineteen

92

00:04:13,129 --> 00:04:10,290

forty 1994 and published it in JSC as it

93

00:04:17,360 --> 00:04:13,139

happens my first introduction to the

94

00:04:20,000 --> 00:04:17,370

society and I did some other experiments

95

00:04:22,820 --> 00:04:20,010

with Raman spectroscopy Zhun published

96

00:04:25,250 --> 00:04:22,830

and of course we all know dr. emoto's

97

00:04:27,350 --> 00:04:25,260

work changing the crystallization

98

00:04:32,659 --> 00:04:27,360

patterns of water

99

00:04:36,050 --> 00:04:32,669

exposed to intention so I wanted to

100

00:04:39,159 --> 00:04:36,060

elaborate more on my experiments because

101
00:04:41,809 --> 00:04:39,169
not only can you change the the

102
00:04:43,670 --> 00:04:41,819
structural properties of water but when

103
00:04:46,339 --> 00:04:43,680
you add these water this water to a

104
00:04:48,589 --> 00:04:46,349
biological system you can influence the

105
00:04:51,110 --> 00:04:48,599
biological system just as has been done

106
00:04:53,749 --> 00:04:51,120
with an electromagnetic field the first

107
00:04:55,909 --> 00:04:53,759
series of experiments that I did was

108
00:05:00,369 --> 00:04:55,919
when I was working at the Institute of

109
00:05:03,339 --> 00:05:00,379
heart math and we were demonstrated that

110
00:05:07,159 --> 00:05:03,349
water could change the in fact

111
00:05:09,649 --> 00:05:07,169
ultraviolet absorption spectroscopy was

112
00:05:12,439 --> 00:05:09,659
used which actually measures the oxygen

113
00:05:14,980 --> 00:05:12,449

content of the water and this was

114

00:05:17,839 --> 00:05:14,990

altered and then when you added that

115

00:05:20,450 --> 00:05:17,849

treated water water treated with the

116

00:05:22,999 --> 00:05:20,460

intention of a love the loving intention

117

00:05:24,769 --> 00:05:23,009

to just actually it wasn't an intention

118

00:05:26,390 --> 00:05:24,779

to a specifically affect the water the

119

00:05:29,179 --> 00:05:26,400

intention was just to be in a loving

120

00:05:32,059 --> 00:05:29,189

state and direct that intention to the

121

00:05:34,700 --> 00:05:32,069

water that water when it was added to

122

00:05:36,439 --> 00:05:34,710

DNA actually caused the DNA to wind and

123

00:05:39,050 --> 00:05:36,449

those of you who were here last year

124

00:05:43,579 --> 00:05:39,060

heard the summary of my research on DNA

125

00:05:45,140 --> 00:05:43,589

as a target for direct healing intention

126

00:05:48,619 --> 00:05:45,150

but in this particular case it was

127

00:05:51,050 --> 00:05:48,629

through the mediator through water since

128

00:05:52,279 --> 00:05:51,060

dean radin is in this audience i don't

129

00:05:54,379 --> 00:05:52,289

really want to elaborate on his

130

00:05:56,929 --> 00:05:54,389

experiments but he repeated the Emoto

131

00:06:01,390 --> 00:05:56,939

experiments and was able to show that

132

00:06:05,570 --> 00:06:01,400

water treated with positive intentions

133

00:06:08,209 --> 00:06:05,580

were perceived differently the aesthetic

134

00:06:11,980 --> 00:06:08,219

appeal was different when you when you

135

00:06:18,320 --> 00:06:16,279

structured by the water so this is the

136

00:06:21,230 --> 00:06:18,330

first here is a background information

137

00:06:24,110 --> 00:06:21,240

that you can transfer the intention that

138

00:06:26,179 --> 00:06:24,120

is stored in water in the present

139

00:06:28,730 --> 00:06:26,189

experiments that i want to talk about

140

00:06:30,800 --> 00:06:28,740

we're going to use a different model

141

00:06:34,519 --> 00:06:30,810

system in this case it's the growth of

142

00:06:35,930 --> 00:06:34,529

tumor cells in vitro in the abstract I

143

00:06:38,430 --> 00:06:35,940

mentioned other experiments that are

144

00:06:41,820 --> 00:06:38,440

done with lymphocyte proliferation

145

00:06:43,650 --> 00:06:41,830

in fact I want to mention not those

146

00:06:48,960 --> 00:06:43,660

experiments but more the ones with tumor

147

00:06:51,270 --> 00:06:48,970

cells in this case the water was treated

148

00:06:53,100 --> 00:06:51,280

and then with that water you make tissue

149

00:06:56,940 --> 00:06:53,110

culture medium and you add that tissue

150

00:07:00,000 --> 00:06:56,950

culture medium to the cells and measure

151
00:07:01,350 --> 00:07:00,010
the growth of tumor cells just to be

152
00:07:04,470 --> 00:07:01,360
technical here's the detailed

153
00:07:07,020 --> 00:07:04,480
explanation the tumor cells were split

154
00:07:09,110 --> 00:07:07,030
into twelve petri dishes half were

155
00:07:12,030 --> 00:07:09,120
treated and half were nine treated

156
00:07:14,340 --> 00:07:12,040
simultaneously in a second room with a

157
00:07:16,680 --> 00:07:14,350
non healer who was mimicking the action

158
00:07:19,590 --> 00:07:16,690
of the healer kind of doing this with

159
00:07:21,630 --> 00:07:19,600
their hands and trying to simulate what

160
00:07:25,800 --> 00:07:21,640
was going on the treatment was a

161
00:07:32,280 --> 00:07:25,810
15-minute treatment the experiment was

162
00:07:34,890 --> 00:07:32,290
done blindly the the the treated tissues

163
00:07:36,330 --> 00:07:34,900

were blind blindly labeled so that when

164

00:07:38,850 --> 00:07:36,340

I actually did the experiment I didn't

165

00:07:40,860 --> 00:07:38,860

know which was which actually there were

166

00:07:42,540 --> 00:07:40,870

two kinds of experiments done either

167

00:07:44,960 --> 00:07:42,550

direct experiments where the healer

168

00:07:48,900 --> 00:07:44,970

treated the tumor cells directly or

169

00:07:53,280 --> 00:07:48,910

where they treated the water the cells

170

00:07:54,690 --> 00:07:53,290

were harvested and DNA fraction was

171

00:07:56,400 --> 00:07:54,700

obtained and then what you basically

172

00:07:59,580 --> 00:07:56,410

measure is the amount of radioactive

173

00:08:01,440 --> 00:07:59,590

thymidine incorporated into DNA compared

174

00:08:04,020 --> 00:08:01,450

to the total amount of protein which is

175

00:08:05,610 --> 00:08:04,030

a measure cell growth if they're right

176

00:08:07,110 --> 00:08:05,620

in there our biochemists and the this

177

00:08:08,760 --> 00:08:07,120

audience one of the few audiences I

178

00:08:12,750 --> 00:08:08,770

talked to where there are biochemists

179

00:08:14,670 --> 00:08:12,760

great so that there's the protocol the

180

00:08:17,159 --> 00:08:14,680

particular healer that I used was

181

00:08:19,140 --> 00:08:17,169

Leonard Lascaux who's written a book

182

00:08:21,000 --> 00:08:19,150

called healing with love and he was

183

00:08:25,350 --> 00:08:21,010

actually able to with the aid of

184

00:08:28,350 --> 00:08:25,360

meditation obtain certain transpersonal

185

00:08:35,670 --> 00:08:28,360

states of consciousness where he could

186

00:08:37,380 --> 00:08:35,680

actually obtain different intentions he

187

00:08:39,750 --> 00:08:37,390

had in these particular experiments he

188

00:08:42,420 --> 00:08:39,760

used three different intentions one was

189

00:08:44,790 --> 00:08:42,430

for the cells now they remember these

190

00:08:47,310 --> 00:08:44,800

are tumor cells to return to the natural

191

00:08:50,250 --> 00:08:47,320

order in harmony of their normal non

192

00:08:51,010 --> 00:08:50,260

tumorous state tension number two was

193

00:08:53,920 --> 00:08:51,020

unconditioned

194

00:08:57,070 --> 00:08:53,930

love with no specific direction to the

195

00:09:00,000 --> 00:08:57,080

cells and intention number three was the

196

00:09:02,410 --> 00:09:00,010

release of disease energy into the void

197

00:09:04,900 --> 00:09:02,420

if any healers in the audience this

198

00:09:06,220 --> 00:09:04,910

would kind of make sense for well you

199

00:09:08,550 --> 00:09:06,230

know we all understand unconditional

200

00:09:13,170 --> 00:09:08,560

love but anyway this is the kind of

201
00:09:15,190 --> 00:09:13,180
healing intentions that he used with his

202
00:09:18,420 --> 00:09:15,200
people who he healed

203
00:09:20,380 --> 00:09:18,430
okay so the first results were obtained

204
00:09:22,300 --> 00:09:20,390
when I want to show you the difference

205
00:09:23,650 --> 00:09:22,310
between direct and indirect treatment

206
00:09:26,770 --> 00:09:23,660
kind of the question that I had asked

207
00:09:28,960 --> 00:09:26,780
Gary so when I say indirect I mean the

208
00:09:31,510 --> 00:09:28,970
the water was treated and then the water

209
00:09:34,420 --> 00:09:31,520
was given to the cells and the on the

210
00:09:38,110 --> 00:09:34,430
y-axis here we have the percent

211
00:09:42,360 --> 00:09:38,120
inhibition of growth so the tumor cells

212
00:09:45,010 --> 00:09:42,370
slowed down their growth in all cases

213
00:09:46,630 --> 00:09:45,020

the magnitude of the effect there's

214

00:09:49,720 --> 00:09:46,640

actually quite similar twenty five

215

00:09:52,000 --> 00:09:49,730

percent versus thirty eight percent the

216

00:09:54,870 --> 00:09:52,010

direct versus indirect yes direct is a

217

00:09:58,660 --> 00:09:54,880

little bit stronger but quite similar
