

1  
00:00:04,550 --> 00:00:02,000  
return to the natural order when you

2  
00:00:08,020 --> 00:00:04,560  
change the intention you get a very

3  
00:00:11,180 --> 00:00:08,030  
different pattern you see in effect when

4  
00:00:14,930 --> 00:00:11,190  
the water is treated but you don't see

5  
00:00:17,090 --> 00:00:14,940  
in effect directly when this intention

6  
00:00:19,340 --> 00:00:17,100  
is directed toward toward the tumor

7  
00:00:21,080 --> 00:00:19,350  
cells now we can discuss this and I'm

8  
00:00:22,580 --> 00:00:21,090  
not really sure this is a real anomaly

9  
00:00:24,080 --> 00:00:22,590  
for me this is not at all what I

10  
00:00:26,359 --> 00:00:24,090  
expected so this can't be an

11  
00:00:28,339 --> 00:00:26,369  
experimenter effect and this effect was

12  
00:00:30,970 --> 00:00:28,349  
seen with with the loving intention and

13  
00:00:34,880 --> 00:00:30,980

it was seen with the dematerialization

14

00:00:37,959 --> 00:00:34,890

intention but it was not obtained with

15

00:00:40,910 --> 00:00:37,969

the return to the natural order so this

16

00:00:43,819 --> 00:00:40,920

phenomenon is at this point completely

17

00:00:45,560 --> 00:00:43,829

unexplained I really don't have an

18

00:00:48,229 --> 00:00:45,570

explanation other than to say that

19

00:00:51,529 --> 00:00:48,239

certainly intentions resonate with water

20

00:00:55,100 --> 00:00:51,539

in a different way and can be stored in

21

00:00:58,010 --> 00:00:55,110

a different way and therefore have and

22

00:01:02,000 --> 00:00:58,020

can be read by the biological system in

23

00:01:03,650 --> 00:01:02,010

a different way so this is you know

24

00:01:05,000 --> 00:01:03,660

preliminary experiments which is the

25

00:01:08,810 --> 00:01:05,010

whole purpose of being in this kind of

26

00:01:12,710 --> 00:01:08,820

society this is unpublished data but

27

00:01:15,380 --> 00:01:12,720

there's clearly is a defect on the

28

00:01:19,910 --> 00:01:15,390

different intentions so that is my

29

00:01:22,280 --> 00:01:19,920

conclusion that the healing effects can

30

00:01:25,370 --> 00:01:22,290

be direct or they can be indirect that

31

00:01:26,990 --> 00:01:25,380

water seems to mediate the effects water

32

00:01:33,080 --> 00:01:27,000

in this case is storing the information

33

00:01:35,390 --> 00:01:33,090

and the treatment time is over 15

34

00:01:37,819 --> 00:01:35,400

minutes as I said but the biological

35

00:01:41,300 --> 00:01:37,829

system is reading the information stored

36

00:01:43,969 --> 00:01:41,310

in the water over 24 hour period because

37

00:01:50,749 --> 00:01:43,979

the growth period was over a 24-hour

38

00:01:52,219 --> 00:01:50,759

period it seems that some intentions are

39

00:01:53,929 --> 00:01:52,229

quite effective and some are not

40

00:01:57,920 --> 00:01:53,939

effective there's a difference between

41

00:02:04,010 --> 00:01:57,930

direct and indirect and it seems that

42

00:02:06,800 --> 00:02:04,020

there's a lot of unknown phenomena

43

00:02:09,109 --> 00:02:06,810

anomalous phenomena occurring okay since

44

00:02:11,720 --> 00:02:09,119

I do have a couple more minutes I want

45

00:02:13,520 --> 00:02:11,730

to address the possible mechanisms how

46

00:02:16,370 --> 00:02:13,530

this phenomena could

47

00:02:19,610 --> 00:02:16,380

be occurring now water memory is

48

00:02:22,580 --> 00:02:19,620

actually it's controversial but there is

49

00:02:25,880 --> 00:02:22,590

some scientific literature that water

50

00:02:28,730 --> 00:02:25,890

can remember heat exposure that's

51  
00:02:30,770 --> 00:02:28,740  
thermal memory and that's known that the

52  
00:02:33,760 --> 00:02:30,780  
vibration and rotation modes of the

53  
00:02:36,140 --> 00:02:33,770  
water molecules can store heat energy

54  
00:02:38,150 --> 00:02:36,150  
ultraviolet energy can be stored in

55  
00:02:40,370 --> 00:02:38,160  
electron transitions of the water

56  
00:02:42,410 --> 00:02:40,380  
molecule there's even a phenomenal

57  
00:02:44,330 --> 00:02:42,420  
hydration memory which is in the

58  
00:02:48,190 --> 00:02:44,340  
scientific literature published in

59  
00:02:50,780 --> 00:02:48,200  
peer-reviewed journals in this case the

60  
00:02:53,990 --> 00:02:50,790  
has been done with enzymes and

61  
00:02:56,600 --> 00:02:54,000  
particular chemicals that are added to

62  
00:02:59,870 --> 00:02:56,610  
the water that affects the enzymes the

63  
00:03:02,390 --> 00:02:59,880

the result in effect on the enzyme

64

00:03:04,400 --> 00:03:02,400

activity it has more to do with the

65

00:03:07,040 --> 00:03:04,410

ability of the chemical to structure the

66

00:03:09,970 --> 00:03:07,050

water than it does with the chemical

67

00:03:13,370 --> 00:03:09,980

structure of the additive which is a

68

00:03:15,020 --> 00:03:13,380

interesting phenomenon so in additional

69

00:03:17,420 --> 00:03:15,030

to the traditional mechanisms we have

70

00:03:18,979 --> 00:03:17,430

non traditional mechanisms and we've

71

00:03:22,009 --> 00:03:18,989

talked really hurt a little bit about

72

00:03:24,590 --> 00:03:22,019

the hydrogen bond this afternoon which

73

00:03:27,080 --> 00:03:24,600

is which allows water to form clusters

74

00:03:29,810 --> 00:03:27,090

and this is one possible mechanism

75

00:03:32,509 --> 00:03:29,820

except for the fact that these clusters

76

00:03:34,819 --> 00:03:32,519

kind of disappear and disappear and

77

00:03:37,220 --> 00:03:34,829

flicker on and off so if the information

78

00:03:39,500 --> 00:03:37,230

was to be stored in the structure as

79

00:03:41,509 --> 00:03:39,510

soon as the structure dissipates you

80

00:03:43,490 --> 00:03:41,519

would think the information would just

81

00:03:46,160 --> 00:03:43,500

dissipate along with it so I'm not sure

82

00:03:48,560 --> 00:03:46,170

that's the best of explanations there

83

00:03:51,560 --> 00:03:48,570

are various other explanations I think

84

00:03:53,810 --> 00:03:51,570

the most likely explanation is the one

85

00:03:56,000 --> 00:03:53,820

that was proposed by del Giudice a

86

00:03:59,449 --> 00:03:56,010

couple of years ago where he described

87

00:04:03,170 --> 00:03:59,459

quantum domains in water so in addition

88

00:04:06,170 --> 00:04:03,180

to having these structural clusters of

89  
00:04:08,479 --> 00:04:06,180  
water we have quantum domains which are

90  
00:04:11,900 --> 00:04:08,489  
described in terms of quantum fields

91  
00:04:14,509 --> 00:04:11,910  
within the quantum domains and coherent

92  
00:04:17,779 --> 00:04:14,519  
oscillations between the coherent

93  
00:04:21,289 --> 00:04:17,789  
domains so it seems to me that that's

94  
00:04:25,000 --> 00:04:21,299  
one likely possible explanation because

95  
00:04:27,230 --> 00:04:25,010  
of the quantum nature of consciousness

96  
00:04:28,640 --> 00:04:27,240  
so I'm throwing that out as

97  
00:04:30,260 --> 00:04:28,650  
possible mechanisms there are other

98  
00:04:32,749 --> 00:04:30,270  
mechanisms involved these

99  
00:04:34,580 --> 00:04:32,759  
superconducting filaments and solo times

100  
00:04:37,520 --> 00:04:34,590  
and for all the physicists in the

101  
00:04:39,650 --> 00:04:37,530  
audience obviously there are a lot of

102  
00:04:41,480 --> 00:04:39,660  
theories out but very little bit of

103  
00:04:43,670 --> 00:04:41,490  
correlation between the theory and the

104  
00:04:45,460 --> 00:04:43,680  
experimental data since I have 30

105  
00:04:52,850 --> 00:04:45,470  
seconds left I want to thank you for

106  
00:05:04,159 --> 00:04:52,860  
your time that's it okay so we really

107  
00:05:10,070 --> 00:05:04,169  
have five minutes um has anyone looked

108  
00:05:13,309 --> 00:05:10,080  
at the investigated the the law the

109  
00:05:15,800 --> 00:05:13,319  
other logical possibility that distant

110  
00:05:18,080 --> 00:05:15,810  
intentional effects on tumor growth

111  
00:05:21,710 --> 00:05:18,090  
could be in negative direction and to

112  
00:05:24,320 --> 00:05:21,720  
increase the tumor growth rate yes from

113  
00:05:26,990 --> 00:05:24,330

other experiments that I've done with

114

00:05:30,080 --> 00:05:27,000

with the same healer where we were more

115

00:05:31,430 --> 00:05:30,090

focusing on direct experiments these

116

00:05:33,409 --> 00:05:31,440

were not actually done at a distance

117

00:05:36,770 --> 00:05:33,419

they were done in the lab and the healer

118

00:05:39,560 --> 00:05:36,780

just laid his hands on the water but

119

00:05:43,580 --> 00:05:39,570

depending on his intention yes he could

120

00:05:47,300 --> 00:05:43,590

inhibit the growth if he visualized the

121

00:05:50,330 --> 00:05:47,310

end point was you know fewer cells in

122

00:05:52,790 --> 00:05:50,340

the petri dish the actual growth was uh

123

00:05:54,589 --> 00:05:52,800

I mean more especially the opposite more

124

00:05:56,300 --> 00:05:54,599

cells he could actually stimulate the

125

00:05:59,749 --> 00:05:56,310

growth as well as inhibit the growth

126

00:06:01,820 --> 00:05:59,759

depending on the intention a Glen two

127

00:06:03,950 --> 00:06:01,830

quick questions um could you comment on

128

00:06:05,930 --> 00:06:03,960

the level of purity the water a and B

129

00:06:08,270 --> 00:06:05,940

the second question is what hydration

130

00:06:11,959 --> 00:06:08,280

memory be most like a homeopathic

131

00:06:14,719 --> 00:06:11,969

dilution well first question is easy it

132

00:06:17,540 --> 00:06:14,729

was deionized water standard laboratory

133

00:06:21,320 --> 00:06:17,550

water that we use to measure to use to

134

00:06:25,879 --> 00:06:21,330

make tissue culture medium hydration

135

00:06:31,640 --> 00:06:25,889

memory and homeopathy hmm I have to

136

00:06:32,870 --> 00:06:31,650

think about that it yeah I hadn't

137

00:06:35,420 --> 00:06:32,880

actually thought about that but that's a

138

00:06:36,950 --> 00:06:35,430

very feasible explanation because it's

139

00:06:38,779 --> 00:06:36,960

the presence of the chemical which

140

00:06:40,250 --> 00:06:38,789

actually structures the water and then

141

00:06:42,480 --> 00:06:40,260

has a result in effect

142

00:06:46,530 --> 00:06:42,490

so yes that that's a very feasible

143

00:06:49,560 --> 00:06:46,540

mechanism for homeopathy a question if I

144

00:06:52,020 --> 00:06:49,570

understand correctly you've shown that

145

00:06:54,720 --> 00:06:52,030

intention affects the structure of water

146

00:06:58,290 --> 00:06:54,730

right and you've also shown in other

147

00:07:02,610 --> 00:06:58,300

experiments that intention applied to

148

00:07:04,530 --> 00:07:02,620

water or to a subject effects a healing

149

00:07:07,110 --> 00:07:04,540

or produces healing an effect on the

150

00:07:09,600 --> 00:07:07,120

biological system correct but the so the

151

00:07:11,880 --> 00:07:09,610

question still remains is that the

152

00:07:15,870 --> 00:07:11,890

structure in the water that produces the

153

00:07:18,840 --> 00:07:15,880

healing when that water is given to

154

00:07:21,840 --> 00:07:18,850

the what needs to be healed or is it

155

00:07:24,900 --> 00:07:21,850

just a direct effect of that intention

156

00:07:26,880 --> 00:07:24,910

and the water could have been applying

157

00:07:28,350 --> 00:07:26,890

the intention to that lamp instead and

158

00:07:31,230 --> 00:07:28,360

it still would have healed that person

159

00:07:33,780 --> 00:07:31,240

so it seems to me the way to really

160

00:07:35,250 --> 00:07:33,790

prove that it's the water structure that

161

00:07:38,430 --> 00:07:35,260

has done the healing and not just the

162

00:07:40,380 --> 00:07:38,440

intention directly would be to show for

163

00:07:43,350 --> 00:07:40,390

example that the degradation of the

164

00:07:45,540 --> 00:07:43,360

structure in the water correlates in

165

00:07:47,580 --> 00:07:45,550

time with the degradation of the healing

166

00:07:51,500 --> 00:07:47,590

power or something like that has

167

00:07:54,570 --> 00:07:51,510

anything like that been done the degra

168

00:07:57,390 --> 00:07:54,580

we don't know how long it lasts in

169

00:07:59,910 --> 00:07:57,400

compared to the electromagnetic exposure

170

00:08:03,480 --> 00:07:59,920

which we know lasts about 20 minutes to

171

00:08:07,440 --> 00:08:03,490

a half an hour have I looked at that

172

00:08:08,910 --> 00:08:07,450

much the no III do not know how long it

173

00:08:12,720 --> 00:08:08,920

lasts and I have not made any such

174

00:08:14,190 --> 00:08:12,730

correlations and no nobody has done

175

00:08:16,080 --> 00:08:14,200

those kind of experiments and a few

176

00:08:19,230 --> 00:08:16,090

scientists who do these kind of

177

00:08:22,230 --> 00:08:19,240

experiments usually our first looking at

178

00:08:23,760 --> 00:08:22,240

the phenomenological aspects of it you

179

00:08:26,220 --> 00:08:23,770

know the phenomena is you know that

180

00:08:29,910 --> 00:08:26,230

water seems to be able to carry the

181

00:08:31,860 --> 00:08:29,920

information of intent and once you have

182

00:08:33,750 --> 00:08:31,870

that phenomena then you can go into much

183

00:08:35,520 --> 00:08:33,760

more details the first attempt at even

184

00:08:37,710 --> 00:08:35,530

looking at the mechanism is to say is

185

00:08:40,110 --> 00:08:37,720

there a structural change in the water

186

00:08:42,270 --> 00:08:40,120

that correlates with the storage of the

187

00:08:43,380 --> 00:08:42,280

information so that's the first attempt

188

00:08:48,090 --> 00:08:43,390

and obviously there's a lot more

189

00:08:49,650 --> 00:08:48,100

experiments to do glenwood to share with

190

00:08:51,810 --> 00:08:49,660

us the difference between the Sham

191

00:08:53,280 --> 00:08:51,820

healing of the water as well as the

192

00:08:55,259 --> 00:08:53,290

cells I didn't see

193

00:08:58,400 --> 00:08:55,269

that clearly represented in your slides

194

00:09:01,019 --> 00:08:58,410

maybe I missed something okay the the

195

00:09:05,249 --> 00:09:01,029

experiment the tumor cells were split

196

00:09:07,999 --> 00:09:05,259

into two batches of cells six petry

197

00:09:11,550 --> 00:09:08,009

dishes and six patrie dishes and I had a

198

00:09:14,610 --> 00:09:11,560

second person independently bring the

199

00:09:18,120 --> 00:09:14,620

dishes to the healer in one room and the

200

00:09:20,430 --> 00:09:18,130

the non healer in another room and then

201  
00:09:22,350 --> 00:09:20,440  
they for during the 15-minute period you

202  
00:09:24,569 --> 00:09:22,360  
know the healer did his intention thing

203  
00:09:25,680 --> 00:09:24,579  
and the non healer well actually I

204  
00:09:27,180 --> 00:09:25,690  
didn't mention that but in some

205  
00:09:30,329 --> 00:09:27,190  
experiments I actually had the non

206  
00:09:32,639 --> 00:09:30,339  
healer read a book so that they were the

207  
00:09:34,410 --> 00:09:32,649  
results all the Sham healing that was my

208  
00:09:37,079 --> 00:09:34,420  
question I understood the method yeah oh

209  
00:09:42,420 --> 00:09:37,089  
sorry there well the data was presented

210  
00:09:46,829 --> 00:09:42,430  
as the as the per the percent inhibition

211  
00:09:48,660 --> 00:09:46,839  
and oh IC relative to the control yeah I

212  
00:09:52,199 --> 00:09:48,670  
with the Sham healer compared to the

213  
00:09:57,449 --> 00:09:52,209

lender Glasgow right the magnitude of

214

00:09:59,519 --> 00:09:57,459

the effect was taken into account and I
