

1  
00:00:06,380 --> 00:00:03,050  
we see typically a little bit larger

2  
00:00:08,690 --> 00:00:06,390  
response to it then we do for the whole

3  
00:00:13,549 --> 00:00:08,700  
network is that answering your question

4  
00:00:17,050 --> 00:00:13,559  
yeah yeah we don't have that much

5  
00:00:19,760 --> 00:00:17,060  
sophistication yet we're working on it

6  
00:00:21,980 --> 00:00:19,770  
Roger comment about your wrist

7  
00:00:23,650 --> 00:00:21,990  
appropriate response to the question

8  
00:00:26,929 --> 00:00:23,660  
over here about could you specify

9  
00:00:28,910 --> 00:00:26,939  
behavior on the rigs I appreciate your

10  
00:00:31,640 --> 00:00:28,920  
saying well we're in this group we know

11  
00:00:35,600 --> 00:00:31,650  
anything is possible but more

12  
00:00:38,479 --> 00:00:35,610  
specifically the question you ask is so

13  
00:00:39,860 --> 00:00:38,489

significant it makes me think of Bel

14

00:00:42,260 --> 00:00:39,870

tellers work with intentionally

15

00:00:44,630 --> 00:00:42,270

imprinted electronic devices where he

16

00:00:47,299 --> 00:00:44,640

works with specific very very specific

17

00:00:49,490 --> 00:00:47,309

processes and questions so I would say

18

00:00:53,000 --> 00:00:49,500

the tiller work combined with this work

19

00:00:55,910 --> 00:00:53,010

so as the answer is yes is I think it is

20

00:00:57,799 --> 00:00:55,920

definitely yes but it's something that

21

00:01:00,080 --> 00:00:57,809

we have only begun to explore I mean

22

00:01:03,110 --> 00:01:00,090

we've formulated the question and it's a

23

00:01:04,369 --> 00:01:03,120

it needs a little more refinement and

24

00:01:07,190 --> 00:01:04,379

then it would be a good question which

25

00:01:09,080 --> 00:01:07,200

will have the answer embedded in it bill

26

00:01:11,030 --> 00:01:09,090

Roger do you have any results in the

27

00:01:13,070 --> 00:01:11,040

Chinese Chinese earthquakes did you ever

28

00:01:16,399 --> 00:01:13,080

because located yes the Chinese

29

00:01:18,950 --> 00:01:16,409

earthquake is positive deviation is not

30

00:01:21,890 --> 00:01:18,960

itself highly significant we have

31

00:01:25,160 --> 00:01:21,900

learned over time slowly that major

32

00:01:27,410 --> 00:01:25,170

disasters the effects on human

33

00:01:30,980 --> 00:01:27,420

consciousness and the emotional state of

34

00:01:34,600 --> 00:01:30,990

the world develop over days not in a few

35

00:01:37,490 --> 00:01:34,610

hours that typically are our events so
