

In "traditional" fields:

Tension between:

empirical sciences & clinical application
(basic lab & theory) (patients)

Tension between:

"science" & "art"?

Eg. biopsychiatry & medicine
experimental psychology & clinical?

(There is extensive literature on this.)

1
00:00:07,280 --> 00:00:05,749
filtering in I'm interested in I don't

2
00:00:11,330 --> 00:00:07,290
know if the transitioning is the good

3
00:00:13,220 --> 00:00:11,340
part or the profit come in Garrett's

4
00:00:15,200 --> 00:00:13,230
work just before you do some basic

5
00:00:17,330 --> 00:00:15,210
research and your transition to clinical

6
00:00:19,010 --> 00:00:17,340
data and that's the way I think we've

7
00:00:20,870 --> 00:00:19,020
conventionally thought of of the way

8
00:00:23,359 --> 00:00:20,880
research goes I'm not sure how much that

9
00:00:25,040 --> 00:00:23,369
applies I think a couple of slides from

10
00:00:28,700 --> 00:00:25,050
now I have the possibility that in

11
00:00:30,919 --> 00:00:28,710
healing arts and I investigate the

12
00:00:32,569 --> 00:00:30,929
energy healing I guess that oftentimes

13
00:00:35,990 --> 00:00:32,579

it goes in the opposite direction that

14

00:00:37,900 --> 00:00:36,000

we see something clinically and then we

15

00:00:39,680 --> 00:00:37,910

try to figure out what what happens

16

00:00:42,260 --> 00:00:39,690

there are a number of people in this

17

00:00:44,660 --> 00:00:42,270

room who are experimentalists I consider

18

00:00:45,860 --> 00:00:44,670

myself among them and there are a number

19

00:00:48,770 --> 00:00:45,870

of people in this room who are

20

00:00:51,950 --> 00:00:48,780

clinicians and I consider myself among

21

00:00:53,869 --> 00:00:51,960

them so I've played in the in the

22

00:00:56,029 --> 00:00:53,879

healing arts and the energy healing arts

23

00:00:57,619 --> 00:00:56,039

in an experimental camp I've played on

24

00:01:01,400 --> 00:00:57,629

in the clinical camp so I've been on

25

00:01:03,410 --> 00:01:01,410

both I guess I'm bipolar I don't know so

26

00:01:05,570 --> 00:01:03,420

I've been on booked yet on the

27

00:01:08,149 --> 00:01:05,580

borderline schizophrenic but bipolar and

28

00:01:10,670 --> 00:01:08,159

so I played it in both sides and

29

00:01:13,850 --> 00:01:10,680

probably in my own history I started by

30

00:01:15,740 --> 00:01:13,860

observing clinical phenomena of healing

31

00:01:18,469 --> 00:01:15,750

and then I I tried to take it into the

32

00:01:20,240 --> 00:01:18,479

lab and figure out what's behind it so I

33

00:01:22,899 --> 00:01:20,250

guess in a perverse sense I've been

34

00:01:25,370 --> 00:01:22,909

going into the lab to try to figure out

35

00:01:27,620 --> 00:01:25,380

how I do what I already know how to do I

36

00:01:29,510 --> 00:01:27,630

don't know how else to put that so the

37

00:01:31,429 --> 00:01:29,520

clinical stuff comes naturally the

38

00:01:34,719 --> 00:01:31,439

experimental work is really interesting

39

00:01:37,569 --> 00:01:34,729

but those people who are not bipolar

40

00:01:39,410 --> 00:01:37,579

I've come into some interesting

41

00:01:41,289 --> 00:01:39,420

circumstances where clinical people

42

00:01:42,889 --> 00:01:41,299

really think clinically and

43

00:01:46,130 --> 00:01:42,899

experimentalists really think

44

00:01:48,700 --> 00:01:46,140

experimentally and and the twins don't

45

00:01:51,139 --> 00:01:48,710

meet and and just as a quick

46

00:01:53,420 --> 00:01:51,149

illustration a friend of mine who's an

47

00:01:55,249 --> 00:01:53,430

internist an MD internist practicing

48

00:01:57,800 --> 00:01:55,259

internist and he's trying to give up

49

00:02:00,980 --> 00:01:57,810

medicine to become a healer which i

50

00:02:03,050 --> 00:02:00,990

think is pretty interesting and so I

51
00:02:05,359 --> 00:02:03,060
introduced him to another person that I

52
00:02:07,940 --> 00:02:05,369
know who used to be a pediatric

53
00:02:10,969 --> 00:02:07,950
oncologist who had given that up ten

54
00:02:13,550 --> 00:02:10,979
years ago in is a healer and so they're

55
00:02:17,119 --> 00:02:13,560
going the route from conventionally

56
00:02:19,400 --> 00:02:17,129
medical training to healing the healing

57
00:02:21,080 --> 00:02:19,410
arts energy healing arts smite

58
00:02:23,509 --> 00:02:21,090
introduced a two of them but I had a

59
00:02:26,089 --> 00:02:23,519
very instructive meeting a couple years

60
00:02:29,390 --> 00:02:26,099
ago with the the first guy the internist

61
00:02:31,759 --> 00:02:29,400
and he in he came to me he said well I'm

62
00:02:33,199 --> 00:02:31,769
aware of some of your publications and

63
00:02:35,030 --> 00:02:33,209

some of your data and all these other

64

00:02:36,710 --> 00:02:35,040

kinds of things and and what what are

65

00:02:39,320 --> 00:02:36,720

the techniques you use when you do your

66

00:02:40,729 --> 00:02:39,330

experiments what what how do you heal so

67

00:02:42,320 --> 00:02:40,739

I started going through here's a

68

00:02:43,759 --> 00:02:42,330

technique one here's a technique to

69

00:02:45,500 --> 00:02:43,769

here's a technique three here's a

70

00:02:47,270 --> 00:02:45,510

technique for and I'm and I'm doing it

71

00:02:50,690 --> 00:02:47,280

with all the conventional experimental

72

00:02:53,660 --> 00:02:50,700

caveats and those included I don't have

73

00:02:55,309 --> 00:02:53,670

a clue what works so I don't know if I'm

74

00:02:57,259 --> 00:02:55,319

using four techniques and I'm throw in

75

00:02:59,089 --> 00:02:57,269

the kitchen sink at a healing problem I

76

00:03:01,640 --> 00:02:59,099

don't know what works and you know in a

77

00:03:06,050 --> 00:03:01,650

similar way that that how do I pass out

78

00:03:08,930 --> 00:03:06,060

there's technique one compliment detract

79

00:03:10,699 --> 00:03:08,940

from I don't know and and he looked at

80

00:03:13,910 --> 00:03:10,709

me with a complete straight face this is

81

00:03:18,009 --> 00:03:13,920

a MD and he said what's the difference

82

00:03:22,160 --> 00:03:18,019

and then we just stared at each other

83

00:03:27,440 --> 00:03:22,170

and I had nothing to say and after a

84

00:03:30,170 --> 00:03:27,450

long astonished pause I said that's what

85

00:03:33,199 --> 00:03:30,180

matters I need to find out what's behind

86

00:03:35,030 --> 00:03:33,209

all this stuff and I realized that I

87

00:03:37,849 --> 00:03:35,040

can't just be a clinician it would drive

88

00:03:40,879 --> 00:03:37,859

me nuts and I don't know how to parse

89

00:03:42,559 --> 00:03:40,889

out clinical effects so Alistair's

90

00:03:44,300 --> 00:03:42,569

talked before I'm sitting there thinking

91

00:03:46,280 --> 00:03:44,310

oh and the questions that people were

92

00:03:47,479 --> 00:03:46,290

asking and you said I you know I don't

93

00:03:50,180 --> 00:03:47,489

know what works how do you get this

94

00:03:50,949 --> 00:03:50,190

product it's a it's a very complicated

95

00:03:53,800 --> 00:03:50,959

world to live in

96

00:03:56,780 --> 00:03:53,810

so I'm bipolar and I live in both worlds

97

00:03:58,610 --> 00:03:56,790

and and I'd like to to talk about some

98

00:04:01,400 --> 00:03:58,620

experimental data some clinical

99

00:04:03,800 --> 00:04:01,410

applications and then this actually

100

00:04:05,750 --> 00:04:03,810

turns out to be ten years since I first

101
00:04:07,460 --> 00:04:05,760
gave a presentation on energy healing

102
00:04:09,020 --> 00:04:07,470
the first time ever did it was that ten

103
00:04:11,629 --> 00:04:09,030
years ago at an SSE meeting in

104
00:04:15,979 --> 00:04:11,639
Albuquerque and at that time I had done

105
00:04:18,920 --> 00:04:15,989
for research lab experiments on cancer

106
00:04:19,349 --> 00:04:18,930
by this time I'm up to many more than

107
00:04:20,999 --> 00:04:19,359
that

108
00:04:23,670 --> 00:04:21,009
and I think I've learned some things and

109
00:04:24,990 --> 00:04:23,680
I want to kind of sum it up and I want

110
00:04:27,270 --> 00:04:25,000
to sum it up with the balance between

111
00:04:31,290 --> 00:04:27,280
experimental and clinical you see how

112
00:04:33,059 --> 00:04:31,300
that goes so my question here

113
00:04:34,860 --> 00:04:33,069

I don't read from slides which comes

114

00:04:37,050 --> 00:04:34,870

first data or clinical application it's

115

00:04:39,330 --> 00:04:37,060

probably oftentimes it's clinical

116

00:04:40,529 --> 00:04:39,340

experience so probably even the title of

117

00:04:41,939 --> 00:04:40,539

my talk is a little off

118

00:04:44,520 --> 00:04:41,949

it doesn't necessarily go from

119

00:04:49,350 --> 00:04:44,530

experimental data to clinical

120

00:04:50,969 --> 00:04:49,360

application if we're doing anomalies

121

00:04:53,330 --> 00:04:50,979

research of course things are more

122

00:04:56,219 --> 00:04:53,340

complicated because we're going from

123

00:04:57,629 --> 00:04:56,229

unexplained phenomenon to trying to make

124

00:04:59,070 --> 00:04:57,639

something that presumably if there's

125

00:05:04,379 --> 00:04:59,080

clinical application it predictably

126

00:05:06,570 --> 00:05:04,389

works so we got unknown compounded with

127

00:05:08,399 --> 00:05:06,580

who knows how many variables and trying

128

00:05:12,839 --> 00:05:08,409

to make something work in the real

129

00:05:14,670 --> 00:05:12,849

clinical application so I'd like to

130

00:05:17,730 --> 00:05:14,680

summarize a little bit from my energy

131

00:05:20,760 --> 00:05:17,740

energy healing work on cancer and I

132

00:05:22,589 --> 00:05:20,770

break it down alright I'd like to think

133

00:05:25,769 --> 00:05:22,599

in these terms what is it that I know

134

00:05:29,339 --> 00:05:25,779

with reasonable certainty what do I

135

00:05:31,459 --> 00:05:29,349

think I know with some uncertainty what

136

00:05:35,219 --> 00:05:31,469

don't I understand well at all and

137

00:05:37,260 --> 00:05:35,229

basically what am i clueless about and I

138

00:05:40,050 --> 00:05:37,270

assure you in a whole bunch of research

139

00:05:42,869 --> 00:05:40,060

that the dominant place that I am is the

140

00:05:46,350 --> 00:05:42,879

last two categories I don't know much

141

00:05:48,059 --> 00:05:46,360

with reasonable certainty I don't know

142

00:05:50,850 --> 00:05:48,069

that much with a little bit of

143

00:05:53,189 --> 00:05:50,860

uncertainty I am still mystified every

144

00:05:55,019 --> 00:05:53,199

time I do an experiment most of my

145

00:05:57,240 --> 00:05:55,029

hypotheses that I generate don't come

146

00:05:59,010 --> 00:05:57,250

out the way I expect it indicates to me

147

00:06:01,079 --> 00:05:59,020

that I probably don't have a handle on

148

00:06:03,029 --> 00:06:01,089

the mechanisms of healing and such and

149

00:06:06,510 --> 00:06:03,039

so it's a really complicated problem but

150

00:06:10,709 --> 00:06:06,520

it's also pretty interesting so what I'd

151

00:06:13,309 --> 00:06:10,719

like to do is give seven propositions in

152

00:06:17,129 --> 00:06:13,319

decreasing order of certainty

153

00:06:19,980 --> 00:06:17,139

I'm really very reasonably certain about

154

00:06:21,899 --> 00:06:19,990

the first I'll be less certain about the

155

00:06:24,600 --> 00:06:21,909

second and when I get down to the

156

00:06:27,959 --> 00:06:24,610

seventh I'm going you know that kind of

157

00:06:30,240 --> 00:06:27,969

thing so on the first one proposition

158

00:06:31,060 --> 00:06:30,250

one cancer can be cured using energy

159

00:06:32,650 --> 00:06:31,070

healing I haven't

160

00:06:34,750 --> 00:06:32,660

experimental evidence I have clinical

161

00:06:36,880 --> 00:06:34,760

evidence I got a pile of evidence now

162

00:06:38,080 --> 00:06:36,890

the interesting thing is I began this

163

00:06:40,480 --> 00:06:38,090

research as a skeptic

164

00:06:43,060 --> 00:06:40,490

and so I really stand before you as a

165

00:06:45,760 --> 00:06:43,070

failed skeptic and the evidence has

166

00:06:47,680 --> 00:06:45,770

overwhelmed me and it's overwhelming

167

00:06:49,270 --> 00:06:47,690

clinically and it's overwhelmed me

168

00:06:49,960 --> 00:06:49,280

experimentally and here's the

169

00:06:52,420 --> 00:06:49,970

interesting thing

170

00:06:55,300 --> 00:06:52,430

since I'm constantly amazed I think it

171

00:06:57,010 --> 00:06:55,310

really means I'm still a skeptic and I

172

00:06:59,340 --> 00:06:57,020

think that's a good place to be every

173

00:07:01,960 --> 00:06:59,350

time something happens in a lab I guess

174

00:07:07,000 --> 00:07:01,970

every time something happens clinically

175

00:07:08,520 --> 00:07:07,010

I gasp which means I don't I don't sit

176

00:07:12,580 --> 00:07:08,530

completely comfortably with this stuff

177

00:07:15,370 --> 00:07:12,590

yet I have to follow the data and I have

178

00:07:17,530 --> 00:07:15,380

to follow my experience and if my data

179

00:07:19,000 --> 00:07:17,540

are eventually proven right terrific if

180

00:07:22,090 --> 00:07:19,010

they're eventually proven wrong I can

181

00:07:24,580 --> 00:07:22,100

live with that etc etc so I'm reasonably

182

00:07:27,160 --> 00:07:24,590

certain now very reasonably certain that

183

00:07:30,880 --> 00:07:27,170

cancer can be cured using energy healing

184

00:07:34,870 --> 00:07:30,890

and so I give a couple of examples here

185

00:07:35,920 --> 00:07:34,880

from first experimental data some people

186

00:07:37,900 --> 00:07:35,930

have seen a couple of these slides

187

00:07:39,940 --> 00:07:37,910

before I've dealt with traditional

188

00:07:43,330 --> 00:07:39,950

mammary cancers from the Jackson labs

189

00:07:46,270 --> 00:07:43,340

they have predictable lifespans and

190

00:07:49,330 --> 00:07:46,280

maximum lifespans after transplantation

191

00:07:51,850 --> 00:07:49,340

or injection and what's supposed to

192

00:07:55,030 --> 00:07:51,860

happen in these this particular mouse

193

00:07:57,580 --> 00:07:55,040

model that would be the mouse is that

194

00:07:59,770 --> 00:07:57,590

the tumor is non-metastatic it grows

195

00:08:02,590 --> 00:07:59,780

it's pretty simple to measure gets

196

00:08:04,480 --> 00:08:02,600

larger and larger and eventually the

197

00:08:07,420 --> 00:08:04,490

tumor basically simply crushes the

198

00:08:09,510 --> 00:08:07,430

animal it's it not a good way to go it

199

00:08:11,410 --> 00:08:09,520

dies of malnutrition or some combination

200

00:08:14,800 --> 00:08:11,420

here's how you heal you get an

201
00:08:16,360 --> 00:08:14,810
exceedingly good-looking person that's

202
00:08:18,610 --> 00:08:16,370
step one so I'm giving away the store

203
00:08:20,950 --> 00:08:18,620
here you know so write this down get an

204
00:08:22,510 --> 00:08:20,960
exceedingly good-looking person and and

205
00:08:24,040 --> 00:08:22,520
what you do is you said this is these

206
00:08:25,690 --> 00:08:24,050
are experiments I did at Indiana

207
00:08:27,400 --> 00:08:25,700
University med school I've done this in

208
00:08:29,380 --> 00:08:27,410
five different places to medical schools

209
00:08:31,150 --> 00:08:29,390
and sites so you sit there now it looks

210
00:08:32,920 --> 00:08:31,160
like I'm meditating so we've heard about

211
00:08:35,709 --> 00:08:32,930
meditation and such I assure you I'm not

212
00:08:38,130 --> 00:08:35,719
I'm really bored to tears there's almost

213
00:08:41,670 --> 00:08:38,140

nothing worse than healing

214

00:08:43,230 --> 00:08:41,680

it's boring I don't get rushes of bliss

215

00:08:45,240 --> 00:08:43,240

or anything like that

216

00:08:50,670 --> 00:08:45,250

sit I usually sit there going how did my

217

00:08:51,240 --> 00:08:50,680

life come to this yeah I mean it's a

218

00:08:53,670 --> 00:08:51,250

Dacian

219

00:08:55,199 --> 00:08:53,680

and so I'm sitting there go please make

220

00:08:58,470 --> 00:08:55,209

it stop you know make the clock go

221

00:09:00,480 --> 00:08:58,480

faster so I'm going I'm doing relatively

222

00:09:03,180 --> 00:09:00,490

mechanical techniques they don't involve

223

00:09:05,340 --> 00:09:03,190

belief of any sort they don't give you

224

00:09:07,860 --> 00:09:05,350

again rushes of insight or anything like

225

00:09:09,840 --> 00:09:07,870

that you don't go I'll just leave it at

226

00:09:13,769 --> 00:09:09,850

that and and so I sit with them for a

227

00:09:16,319 --> 00:09:13,779

specific length of time if you do that

228

00:09:19,470 --> 00:09:16,329

and you use the techniques that I've

229

00:09:22,139 --> 00:09:19,480

used you get this kind of a pattern the

230

00:09:26,040 --> 00:09:22,149

tumor grows and that was my first

231

00:09:28,980 --> 00:09:26,050

surprise the tumor then gets a necrotic

232

00:09:31,530 --> 00:09:28,990

blackened area on its surface how's my

233

00:09:34,079 --> 00:09:31,540

second surprise the tumor that ulcerates

234

00:09:37,590 --> 00:09:34,089

that was my third and then it implodes

235

00:09:41,550 --> 00:09:37,600

to full cure and so I'm gonna show you a

236

00:09:44,160 --> 00:09:41,560

couple of pictures this is this is

237

00:09:51,890 --> 00:09:44,170

indicating days after injection or

238

00:09:56,900 --> 00:09:54,140

and so you get the beginning of an

239

00:09:59,210 --> 00:09:56,910

ulceration you get a large L serration
