

Figure 3

Unresected Mouse

1
00:00:00,050 --> 00:00:05,170
all right well I'm going to speak about

2
00:00:10,910 --> 00:00:08,270
the comparison between the effects of

3
00:00:16,250 --> 00:00:10,920
using an oil and energy accumulated on

4
00:00:19,220 --> 00:00:16,260
mice with cancer and the treatment of

5
00:00:24,890 --> 00:00:19,230
similar mice not by myself but by a

6
00:00:30,080 --> 00:00:24,900
colleague using intentional healing

7
00:00:32,600 --> 00:00:30,090
methods I presented this material first

8
00:00:36,620 --> 00:00:32,610
place let me say that I very much

9
00:00:39,100 --> 00:00:36,630
appreciated dr. Leslie iyx talk because

10
00:00:43,160 --> 00:00:39,110
it gives such a broad range of

11
00:00:48,380 --> 00:00:43,170
especially in the review of what's going

12
00:00:52,010 --> 00:00:48,390
on in this field and we know basically

13
00:00:52,790 --> 00:00:52,020

very little about how healing takes

14

00:00:57,470 --> 00:00:52,800

effect

15

00:01:00,020 --> 00:00:57,480

I reviewed prior to coming here 35 books

16

00:01:05,530 --> 00:01:00,030

and papers written over the last 10

17

00:01:10,480 --> 00:01:05,540

years by researchers and healers

18

00:01:13,820 --> 00:01:10,490

physicists physicians and so forth and

19

00:01:16,760 --> 00:01:13,830

besides the an attempt to utilize

20

00:01:19,670 --> 00:01:16,770

quantum mechanical theory to explain

21

00:01:23,210 --> 00:01:19,680

some of these strange effects these

22

00:01:26,660 --> 00:01:23,220

anomalous effects there is very little

23

00:01:28,910 --> 00:01:26,670

that's satisfying to someone who really

24

00:01:32,749 --> 00:01:28,920

wants to understand how is this is what

25

00:01:34,760 --> 00:01:32,759

takes place here so what I want to

26

00:01:37,219 --> 00:01:34,770

present today is just a little bit of

27

00:01:41,359 --> 00:01:37,229

information to help us get a little bit

28

00:01:43,190 --> 00:01:41,369

into what takes place when some kinds of

29

00:01:45,920 --> 00:01:43,200

healing take place

30

00:01:50,030 --> 00:01:45,930

now the ergon energy accumulator was

31

00:01:53,960 --> 00:01:50,040

invented by wilhelm reich as in the

32

00:01:59,780 --> 00:01:53,970

course of his own research into human

33

00:02:04,399 --> 00:01:59,790

emotions and through over 30 years of

34

00:02:07,550 --> 00:02:04,409

work and biology and physics and human

35

00:02:08,300 --> 00:02:07,560

emotions he developed this accumulator

36

00:02:11,080 --> 00:02:08,310

this

37

00:02:14,690 --> 00:02:11,090

which is really a passive device

38

00:02:17,030 --> 00:02:14,700

ostensibly it consists of multiple

39

00:02:19,429 --> 00:02:17,040

layers of nonmetallic and metallic

40

00:02:23,649 --> 00:02:19,439

materials with a metal material on the

41

00:02:27,380 --> 00:02:23,659

inside and that's very easy to see here

42

00:02:30,259 --> 00:02:27,390

this is the inside part of it this is

43

00:02:33,740 --> 00:02:30,269

metal nonmetal metal nonmetal and the

44

00:02:38,140 --> 00:02:33,750

outside is stipulated has to be of a

45

00:02:40,369 --> 00:02:38,150

nonmetallic material now the right

46

00:02:42,110 --> 00:02:40,379

demonstrated many interesting and

47

00:02:44,149 --> 00:02:42,120

ominous phenomena that take place on a

48

00:02:47,960 --> 00:02:44,159

physical level within such an enclosure

49

00:02:53,569 --> 00:02:47,970

but he also did some studies on the

50

00:02:57,530 --> 00:02:53,579

treatment of mice with cancer and what

51
00:03:01,129 --> 00:02:57,540
he used were animals with spontaneous

52
00:03:02,119 --> 00:03:01,139
tumors and that study was followed by

53
00:03:05,000 --> 00:03:02,129
myself

54
00:03:09,170 --> 00:03:05,010
following Mike's death using animals

55
00:03:13,099 --> 00:03:09,180
with spontaneous tumors and transplanted

56
00:03:16,339 --> 00:03:13,109
tumors all mammary tumors and then there

57
00:03:19,819 --> 00:03:16,349
was a group in in South America that did

58
00:03:25,189 --> 00:03:19,829
another study using a kind of

59
00:03:29,439 --> 00:03:25,199
transplanted tumor so let's see where do

60
00:03:37,660 --> 00:03:32,119
in all those experiments I just

61
00:03:45,520 --> 00:03:41,260
the healing capabilities of the person

62
00:03:51,100 --> 00:03:45,530
doing the study including myself was

63
00:03:52,930 --> 00:03:51,110

unknown that is all of us as far as I

64

00:03:55,840 --> 00:03:52,940

can tell certainly I know for myself I

65

00:03:57,430 --> 00:03:55,850

know Reich's literature very well and I

66

00:04:01,210 --> 00:03:57,440

knew the papers from the people in South

67

00:04:05,130 --> 00:04:01,220

America none of them had any idea that

68

00:04:09,790 --> 00:04:05,140

their intention was playing any role in

69

00:04:13,090 --> 00:04:09,800

what the results might be however in all

70

00:04:15,130 --> 00:04:13,100

of us there was an intense desire that

71

00:04:20,680 --> 00:04:15,140

there would be some kind of healing

72

00:04:27,840 --> 00:04:20,690

outcome now what we found was that

73

00:04:33,550 --> 00:04:30,610

when you dissect a mouse that's been

74

00:04:36,659 --> 00:04:33,560

treated the all these animals were in an

75

00:04:42,340 --> 00:04:36,669

accumulator put the center of this box

76
00:04:44,050 --> 00:04:42,350
for usually an hour each day animals

77
00:04:46,090 --> 00:04:44,060
that were treated this is what their

78
00:04:49,510 --> 00:04:46,100
innards looked like when they were

79
00:04:55,780 --> 00:04:49,520
dissected at the end of the treatment

80
00:04:59,860 --> 00:04:55,790
period after they had died these are the

81
00:05:03,280 --> 00:04:59,870
untreated mice we use suitable controls

82
00:05:05,440 --> 00:05:03,290
they were put in a box and for the same

83
00:05:07,780 --> 00:05:05,450
period of time and then returned to

84
00:05:09,969 --> 00:05:07,790
their cages so they were removed from

85
00:05:12,640 --> 00:05:09,979
their cages for the same period of time

86
00:05:14,650 --> 00:05:12,650
as the treated as the accumulator

87
00:05:21,250 --> 00:05:14,660
treated animals so you can see there's

88
00:05:25,060 --> 00:05:21,260

an enormous difference excuse me the

89

00:05:26,950 --> 00:05:25,070

blackness here is due to toxins mice

90

00:05:29,590 --> 00:05:26,960

with cancer when they die really smell

91

00:05:31,750 --> 00:05:29,600

bad they stink they're full of toxins

92

00:05:33,880 --> 00:05:31,760

it's just black material you examine it

93

00:05:38,230 --> 00:05:33,890

under the microscope it's a mixture of

94

00:05:43,710 --> 00:05:38,240

bacteria and and breakdown products of

95

00:05:48,250 --> 00:05:43,720

tissue and you don't get any of that in

96

00:05:57,070 --> 00:05:52,330

and these are the results and the

97

00:05:58,780 --> 00:05:57,080

accumulator tests we can see that these

98

00:06:02,080 --> 00:05:58,790

are the treated animals and you can see

99

00:06:03,670 --> 00:06:02,090

that they live longer in all four

100

00:06:06,280 --> 00:06:03,680

experiments that we're done

101
00:06:08,020 --> 00:06:06,290
this was rights this was mine this was

102
00:06:13,380 --> 00:06:08,030
mine and this was the South American

103
00:06:15,700 --> 00:06:13,390
group and the statistical analysis

104
00:06:21,270 --> 00:06:15,710
reveals that in practically all cases

105
00:06:32,939 --> 00:06:21,280
there was highly significant results and

106
00:06:38,219 --> 00:06:36,179
the results we can say was there was a

107
00:06:41,309 --> 00:06:38,229
definite prolongation of life but what

108
00:06:42,959 --> 00:06:41,319
I'm interested in more today is this is

109
00:06:46,740 --> 00:06:42,969
a finding that there was an intense

110
00:06:53,309 --> 00:06:46,750
inflammatory reaction in all of these

111
00:06:56,939 --> 00:06:53,319
animals that is the tumors would develop

112
00:06:59,790 --> 00:06:56,949
and at certain point just before the

113
00:07:04,439 --> 00:06:59,800

animal died the area around the tumor

114

00:07:07,890 --> 00:07:04,449

would become swollen with with fluid red

115

00:07:12,119 --> 00:07:07,900

blood cells strong vascular reaction and

116

00:07:14,459 --> 00:07:12,129

then this would burst and the animal

117

00:07:16,950 --> 00:07:14,469

would die most often that was a sequence

118

00:07:19,920 --> 00:07:16,960

so there was intense inflammatory

119

00:07:22,290 --> 00:07:19,930

reaction taking place in every single

120

00:07:28,490 --> 00:07:22,300

case the animals that were treated with

121

00:07:36,260 --> 00:07:33,689

now you may recognize this fellow he's

122

00:07:38,670 --> 00:07:36,270

sitting in our audience today I

123

00:07:42,140 --> 00:07:38,680

presented this data on the accumulator

124

00:07:47,129 --> 00:07:42,150

several years ago to the food society

125

00:07:49,950 --> 00:07:47,139

and following that I was just

126

00:07:51,839 --> 00:07:49,960

I heard Bill speak and described his

127

00:07:54,360 --> 00:07:51,849

experiments with identical mice that I

128

00:07:56,339 --> 00:07:54,370

had used but Bombay wasn't using and

129

00:07:59,909 --> 00:07:56,349

this bill Bengston by the way those of

130

00:08:02,189 --> 00:07:59,919

you who don't know bill was using

131

00:08:04,950 --> 00:08:02,199

identical mice that I had used in my

132

00:08:07,290 --> 00:08:04,960

research and he wasn't using an Oregon

133

00:08:10,679 --> 00:08:07,300

accumulator but he was using a method of

134

00:08:18,179 --> 00:08:10,689

healing that he had been from someone

135

00:08:22,469 --> 00:08:18,189

else and this is the Bankston method if

136

00:08:23,969 --> 00:08:22,479

I may call it that it involves you

137

00:08:26,909 --> 00:08:23,979

working with students and as bill

138

00:08:30,119 --> 00:08:26,919

himself learned I assume from the person

139

00:08:31,829 --> 00:08:30,129

who taught him it involves teaching and

140

00:08:34,589 --> 00:08:31,839

learning how to do a very rapid mental

141

00:08:35,340 --> 00:08:34,599

imagining and then putting one's hands

142

00:08:38,430 --> 00:08:35,350

around the

143

00:08:44,640 --> 00:08:38,440

of the mice to be treated and then an

144

00:08:48,180 --> 00:08:44,650

accelerated image cycling and Bill

145

00:08:51,240 --> 00:08:48,190

wonders if this is what does it that is

146

00:08:54,510 --> 00:08:51,250

this methodology or with something

147

00:08:58,170 --> 00:08:54,520

passed on from his teacher to himself

148

00:09:00,770 --> 00:08:58,180

and from himself to his students who he

149

00:09:04,110 --> 00:09:00,780

was also able to train to do healing

150

00:09:09,360 --> 00:09:04,120

using this method for describe this

151
00:09:14,910 --> 00:09:09,370
fairly well go good okay so now the

152
00:09:18,030 --> 00:09:14,920
remarkable thing about Bill's study was

153
00:09:20,730 --> 00:09:18,040
that the mice who developed these these

154
00:09:24,300 --> 00:09:20,740
were their transplants weren't they

155
00:09:26,400 --> 00:09:24,310
transplanted tumors into something I had

156
00:09:29,970 --> 00:09:26,410
never seen before and I've done a lot of

157
00:09:33,630 --> 00:09:29,980
this kind of research all the mice in

158
00:09:37,410 --> 00:09:33,640
Bill's study the tumors there was an

159
00:09:40,530 --> 00:09:37,420
intense inflammatory reaction the

160
00:09:43,800 --> 00:09:40,540
release of something called tumor

161
00:09:47,550 --> 00:09:43,810
necrotic factor in which the whole area

162
00:09:49,320 --> 00:09:47,560
gets blackened we store loose or strong

163
00:09:49,620 --> 00:09:49,330

inflammatory reactions but nothing like

164

00:09:52,500 --> 00:09:49,630

that

165

00:09:57,480 --> 00:09:52,510

and then it's as if the tumor imploded
